### "AM Radio Stigma?"

Dear R&R:

I have a small beef, and no doubt some will think it is trivial. Recently we received the current Dreamboat Annie singla, which is on a 12 inch 45rpm. What bugs me is this. On the two minute, or edited side, they printed "AM Radio" and on the 2:59 side they printed "FM Radio." Both sides were in stereo, so that wasn't the reason for the labeling. Why do record companies attach a stigma to AM radio and naturally assume that we are going to play the edit. I think this is very unfair. Our station, which is AM, plays very few edits, while our FM competition plays many more, including the 2 minute Dreamboat Annie. Assuming that an AM is automatically going to play the edit while "hip" FMers is going to play the whole cut is a notion that should be put to rest. I can't speak for all AM stations, but this one doesn't just play the Osmonds and the Sylvers. We play cuts by Jackson Browne, Atlanta Rhythm Section, Aerosmith and Boston a good three to four weeks before our FM competitor. Let's not put a label on a station just because it happens to be kilocycles and not megacycles. **Don Michaels**

### FASTER THAN THE SPEED OF SOUND?

### An R&R Report: Speeding Up Records

Research by J.J. Jordan

The practice of speeding up records on the air has always been a controversial one for radio people. Although many observers believe it to be a thing of the past. R&R discovered that whether to speed up or not to speed up is an issue that's still very much alive among Top 40 stations across the country.

Most of the negative views on the practice revolve around the idea that it misleads the consumer. Says Al Mason, PD KING/Seattle, "We do not speed up the records. When one of our listeners buys a record they hear on our station, and it sounds different at home, he gets mad. We want our listeners to hear the record as it was made." Gary Burkowitz, PD WPRO-FM/Providence, echoes Mason's sentiments: "We want our listeners who buy records to buy what they hear... I think it destroys the record when you speed it up." Charlie Van Dyke, KHJ PD, sums it up: "We've received audience feedback over the years that our listeners don't like to hear a song sped up more than its original speed."

Still on the negative side, T.J. Lambert (PD WGCL/Cleveland) brings up another point. "We don't speed records up because of the good fidelity on FM." John Long, PD WHBQ/Memphis, says, "I've sped up records in the past at other stations, but at HBQ we don't since the competition doesn't, and I feel there's no need. Also, at the present time we don't have the necessary equipment to do it correctly. I feel that speeding up records in one of those dying things that we all did a few years ago." The most vehement negative comment came from Jay Cook, PD at WFIL. "It sounds Mickey Mouse and I see no need for it." And fellow Philadelphia programmer Bob Hamilton (PD WIFI) said simply, "If the records were supposed to be faster than they are, the studio would have sped them up."

But some stations admit to speeding up their records, though only to a very slight degree. Jim Elliott, MD of WPGC/Washington, says "We speed up our records a hair. It's done on an individual basis but all records are sped up to some degree. We don't go overboard and speed the music up too much—basically, just a hair." The basic reason given for record acceleration is a minor but meaningful improvement in liveliness and "brightness." Says E. Alvin Davis, PD WSAI/Cincinnati, "I will occasionally speed up some records that may sound a little better sped up slightly...It really depends on the particular record." KSLQ/St. Louis PD Charlie Lake agrees, but more cautiously. "Some records do sound better when sped up a hair. However, if one of the album stations in town breaks a record long before we play it, we will not speed it up when we add it, since we feel the public has already heard it the way it was made." And for Jimi Foxx, PD 10Q/Los Angeles, it's the terminology that bothers him. "I don't call it speeding up records...It's tempo enhancement. Each song is handled on an individual basis. Some songs are even slowed down."

Tempo enhancement, speeding up, "hot turntables," - whatever it's called, it is a

practice which still exists, however uncommon it may be. For a point of view from the other side of the street, R&R went to Producer Mike Chapman, writer and producer of the current Smokle hit "Living Next Door To Alice," and producer of several international hits with the Sweet, Suzi Quatro, Mud, and New World. Chapman had this to say about the speed-up practice:

"There's very little a record producer can do about anything a radio station wants to do to a record. They can compress it to hell, they can edit it, they can speed it up, slow it down—and in certains cases I don't think it hurts at all. A few years back I sped up a record I'd completely finished and it ended up selling three million copies around the world, Suzi Quatro's "Can The Can." I found it was too slow and it just needed that little bit...I guess I put it to about 47 (rpm) when I actually cut the record and it made a lot of difference."

"If I had a record I felt very close to...that had a specific meaning to me as a writer...and they sped it up and it lost what it had for me, then I'd get very upset. Nine times out of ten, though, I think it helps the record, and I think the reason they speed it up is because they know that. They have a lot of reasons, like speeding it up so they can fit more records in, but generally it does help the record appeal to the general public—though mind you when they go out and buy the record, they find it's a different speed."

Getting a bit more technical. Chapman commented on the effects of speeding up records. "It changes the pitch, the song goes up a semitone or even as much as a tone. It can present problems—for instance, when I sped up 'Can The Can,' it presented problems for Suzi when she appeared live because she couldn't sing it, it was totally outside her range. But I don't think changing the pitch is going to affect the quality of the record. Certain frequencies will change, the bottom end will change and the top end will change, and that could destroy the sound of a record. I cut the records myself, and I wouldn't like all my EQ-ing changed because some Program Director sped it up, and that's why I say in certain records the frequency changes can make the record sound very different over the air. If you get into the technical side of it, I suppose there's a lot of difference, but to the average ear, no, not at all."

Do producers commonly speed up records in the recording studio? "I've done it on occasion," admits Chapman, "and I'm sure most record producers have sped up records in the past. The ones that probably get most upset are the artists themselves, because they're the only people in the end who know. They hear the key the record's in and think, 'Hang on a minute, that's not the key I sang it in." I'm sure many producers are speeding up their records and then the radio stations speed them up again, and by the time you finish the record's running at about 49 or 50."

Like the issue of playing edited versions of lengthy LP cuts, previously explored in **R&R**, the speed up question is a potentially controversial one, and the last word is far from in. Is higher RPM for our AM listeners the right answer for those in radio? It's worth some 'thought.

AMC Cuts Ad Budget

Slow sales was the main reason given by American Motors Corp. for their recent cut-back in advertising spending. The company will spend less during the current fiscal year than in the year-ago period. The budget hasn't been slashed totally, however, announced figures show total ad spending down only \$2.9 million, with an overall budget of \$30 million.

Radio Spots For Movie

The movie was first shown last Christmas in the Southeast, openings in New York and Philadelphia are slated for this week, California premiere is within two weeks. and the Midwest will start the movie in mid-March.

Color Copiers Cause Problems

Xerox' 6500 color copier is so perfect, it has caused several companies a great deal of concern. Counterfeiters are using the machine for everything from forging payroll checks and stock certificates to bus transfers and McDonald's gift certificates. The Justice Department's criminal division has been alerted to the problem, causing one assistant attorney general to note that even amateur counterfeiters can effectively use the Xerox to copy valuable items. Although other manufacturers have introduced color copies as far back as 1969, the Xerox model, made available in 1973, was the first to make it relatively easy for bogus documents to be reproduced. At this time, Xerox is standing by its copier, telling companies to increase security on the model.

Autos Are Main BBB Beef

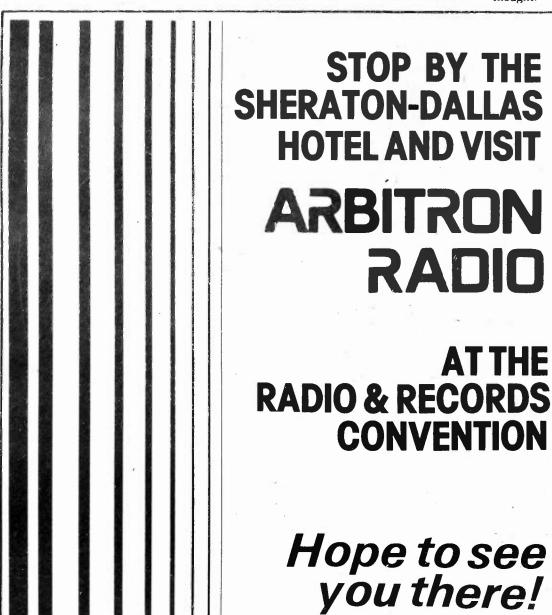

The Better Business Bureau reports that complaints about automobiles topped their list of beefs for the first nine months of 1976. Nearly 8 percent of all gripes to the Bureau were auto-related. After cars, the other main complaints were about clothing, furniture, appliances and floor coverings.

Private Plane Boom

Despite increased costs for fuel and small airplanes, the private flying industry is seeing a large boom period. Last year, 130,000 Americans started flying lessons, up over 14 percent from 1974. A record \$1.23 billion in new non-airline craft were sold during '76 as well. Some flying school owners note that businessmen make up the main part of new students.

### Phoenix: The Shakeup, New Rockers And Promotion Controversy

by Jay Stone

PD KUPD AM/FM Phoenix

The lid blew off and the bottom fell out here and there in Phoenix this Arbitron sweep. It all began in late August of last year. It ended, (temporarily, as always) just recently with some degree of concern, (maybe "controversy" as well) on the parts of a couple of other local radio stations regarding KPUD's ongoing methodology of promotion.

Briefly back to August. That's when I left KRIZ where I'd been programming for two years, in order to join KUPD. Almost simultaneously jocks flew from stationto-station such as I've never seen throughout my seven years in this market. Blown out were jocks at KBBC and at KRIZ, following my departure there. Upon arrival at KUPD with assistant (also wife) Debbie, plans were made to reorganize the station to accommodate our scientifically oriented/research based programming techniques. Close to complete staff turnover at KUPD was the result. Our objective simply to put people in here that wanted to work, would love KUPD and interest themselves in the programming philosophies that have consistently held top ratings in this market for six years, and in Dallas, Denver, San Antonio and others where remarkable books were the continuous result under the then Program Director, Todd Wallace.

Still not enough pre-book market action. Rumors hit the vine; there would be no less than three new Rock/Contemporary stations in town and on the air for the rating. For once, the "rumor mill" hit it pretty close. On came KQXE-AM with Rock, KSGR-AM with Oldies-based Rock and K-104-FM with "Soft" Rock, Now there totaled five full-tilt Rockers in Phoenix: KUPD AM/FM, KRIZ, KRUX, KQXE and KSGR. Six counting KBBC-FM which was "softening" evolutionarily through the book. With K-104-FM, KDKB AM/FM (AOR) and KOY (P/A) we found ourselves up against nine radio stations, all after at least part of our target audience.

It became obvious KUPD needed something "revolutionary" as a promotional vehicle, and in harmony with a newly developed philosophy of mine it had to cost the station under two-thousand dollars cash for the duration of the survey and beyond. KUPD call-letter awareness had to be reconstructed, and in a way that did not incorporate the negative aspects of busy-signal fighting on the part of the listener. (That promotional approach was researchresultant statistics gathered led to the conclusion on my part that "call-in-to-win" contests were of annoyance to a good percentage of the upper demos, not believeable to others, unaccepted by all but about 8% of our audience of availability and those primarily teens. Hence, a major "phoner" promotion was ruled out due to high probability of lack of effectiveness in this market situation, anyway).

□ ONE YEAR—\$130

Heavy skull sessions began (along with the standard hundred-hour work weeks) between Debbie and myself and collaborator Dave Wilmont. The result: "The Kupid Checkbook" promotion; "To win, just fill it in!"

Mechanically, the promotion operated thusly: KUPD listeners were advised to "turn anything into their Kupid Checkbook." In it, they would record their listening to KUPD only and were then advised to "take your Kupid Checkbook with you, whereever you go, because the people from KUPD could knock on your door, or walk up to you in person, at anyplace, anytime." Upon contact, winners were awarded "from one, to one-hundred dollars cash for every hour you've spent listening to KUPD out of the past twentyfour, as recorded in your Kupid Checkbook." In order to win, each Checkbook had to be dated on the day we found the winner in question, thus a running account of KUPD listening had to be kept. No reference to any other radio station, or to any rating or survey being taken at any time was ever made. expressed or implied.

The promotion hit the air and immediate objections were offered to any and all who might be interested by more than one competitor. Arbitron was consulted. They felt the promotion would not interfere with their diary survey in any way. So, we continued to run the promotion, which is designed to run year-round on KUPD.

Our research indicates that promotion in contest form on the radio has effect on but a small percentage of those who listen, regardless of design and method of operation. Some, however, are more offensive than others. I don't believe promotion does a rating make, although it can help. As much as it can hurt. Remember all those stations that blew all those hundreds-of-thousands just to lose?

What did it for KUPD was not just "the" PROMOTION (as it is unaffectionately termed by some here in town). It was the dilligent efforts of a devoted airstaff, backed by quarter-hour-maintenance provided by MUSIC and frequency control per daypart/per record/per demo of that music as it is completely pre-programmed via cross-reference between our random-sampling music research system and the natural, predeveloped listener habit patterns unique to each market, and revealed in the Arbitron report, And, of course, the Program Director's and staff's willingness to enjoy playing NOT what THEY want to hear, but ONLY what their audience of availability will accept.

Given the decision to make myself, I sincerely doubt I'd ever dump thousands upon thousands of dollars into contests in any market, regardless of the amount the competition chose to throw away.

WSGN News also conducted on the street interviews with members of the Carter family and citizens of Plains. The interviews were part of a series of specials run during Inauguration week. By the time you are reading this, Radio & Records Convention '77 will be off and running. To those of you at the convention, I offer a hearty "Welcome to..." and to those who couldn't make it, "Greetings from..."

Advance regultration indicated that this convention will once again feature the largest gathering of AOR broadcasters ever assembled under one roof, not to neglect equally impressive turnouts from Top 40, Country, and Pop/Adult. Another extremely positive aspect of this year's turnout is the increase in the number of local and regional promotion executives who will be in attendence. The informal one-to-one nature of this event should undoubtedly bring many people together who, up until now, were just faceless names or voices on the telephone to each other.

Don't forget, next week's edition of R&R will include extensive coverage (including photos) of the convention and the special R&R Arbitron Supplement, which will feature a national breakout of this past book "at a glance."

With most of the nation's programmers simultaneously "out of town," this week's activity will probably be slightly altered from the normal flow of the industry. Next week, however, things should return to the unpredictable normalcy that we've all grown accustomed to

On behalf of all of us at Radio & Records, may this year's convention be inspirational and tangibly fruitful for each and every member of our combined industries. If we are able to take just one small step toward increased communication, honesty, and good will, then we'll know that we've achieved a goal worthy of all our efforts and a satisfaction worthy of our sharing.

Rock 'n' roll in the Southern Tradition not only moves feet all across America, but across the seas as well. And nobody can move them like a double bill of The Marshall Tucker Band and Bonnie Bramlett.

Playing before a packed house in London, Toy Caldwell's graceful slide and powerhouse lead guitar led The Marshall Tucker Band through the wellknown tunes from all their Capricorn albums, including "Long Hard Ride." Wailing, soaring, driving music, rock with a jazz-tinge, Home Sweet Home Never Sounded So Good as in this live recorded

performance.

Bonnie Bramlett, stepping out on her own after her long successful career with Delaney & Bonnie and Friends, covered all the **R&B** classics

No introductions necessary here - Eric Clapton, recorded live in Dallas, Texas, a 90-minute King Biscuit Special.

From the stinging blues of "Key To The Highway," through the surging intensity of "Layla," the reggae-based "I Shot The Sheriff," the relaxed joy of "Willie And The Hand Jive," to selections from his latest RSO album, "No Reason To Cry," it is a stunning performance that reveals the master guitarist and singer at his most exciting, his most mature. And Eric is backed by a brilliant band, featuring the soulful singing of Yvonne Elliman.

It's 90-minutes of Eric Clapton, in quadraphonic and compatible stereophonic sound, hosted by Bill Minkin.

And if you've been searching for the classic early Clapton albums, the search is over — they're now available in special collector's editions, on/RSO records and tapes.

For further information on upcoming shows, contact Bob Meyrowitz, Peter Kauff or Alan Steinberg at DIR Broadcasting Corp., 445 Park Avenue, New York, NY 10022 (212) 371-6850.

# Tony Wilson:

# You'll like his style.

When he left Hot Chocolate last year, Tony Wilson could point with pride to 5 years of exceptional

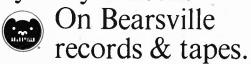

musical accomplishments.

As the internationally famous band's bassist and singer, he simultaneously built a major songwriting reputation as co-author of Hot Chocolate's "You Sexy Thing" and "Emma," and Stories' "Brother Louie." From Trinidad to London to Bearsville, a label that signs rarely but well, Tony Wilson's emer-

gence has pointed in one direction.

# THE NEW FEBR

# THE JELLY

THE JELLY has appeared on the road before and the thousands who've seen it...remember it well. Sleek, racy, fast and designed for those who like to own something a little different. Like mind-bending. Sit behind your new JELLY. The engine roars. It idles. The parts fit perfectly. Pipes wide-open or harmonized on cruise. The acceleration is furious but THE JELLY can whirl and stop on a dime. If you haven't experienced the new JELLY, you're missing something. Don't drive it. It'll drive you.

# THE CORKY

Better known to some as THE LAING. Fine-tuned and tested over some of the roughest rock roads in the world. E. G., "The Mountain"..."The West, Bruce & Laing"... and more. THE CORKY was a former demolition derby stalwart but now boasts smoother, more refined lines designed by Laing himself. Still, the new CORKY is fully-powered, durable, fast and steady. High-altitude rating. Strut front suspension. Tires optional.

# THE BLONDIE

Sometimes called, THE CHAPLIN. THE BLONDIE was created in South Africa and further developed in England and America. It first came to prominence while driven by The Beach Boys. Fans still remember the early BLONDIE valves full-blown on "Sail On Sailor" and other fine tunes. The current BLONDIE is self-contained, stripped of chrome, big inside, and out-runs anything on the road. BLONDIES are now produced for mass appeal. A hot rod in every garage.

# THE BOOKER T

Or, AND THE MGs. This redesigned BOOKER combines the soft styling of previous editions plus a completely new power source and street-holding ability produced by a revolutionary testing procedure called, "living and learning." THE BOOKER is fine for long touring. Comes with a reclining headrest for meditation or anything else you care to do in a prone position.

# THE TELEVISION

THE TELEVISION is the most remarkable invention since, Television. It drives itself, allowing the passenger to sit back and watch (or imagine) where he's going or where he's been. Designed on the streets of New York, THE TELEVISION can hold its own in any kind of traffic. This astounding gift to the world of vision moves even when it's not moving. THE TELEVISION is especially good on the prowl. It glows and knows in the dark.

## THE SAMPLER

Everything you want to hear under one hood. Accessories include: The EAR-car Portrait Set—suitable for framing; The EAR-car Sticker—suitable for sticking; The EAR-car T-shirt—suitable for wearing; Five Banners—suitable for display; Radio Spots—for the airwaves...AND LOTS MORE. The Sampler. Just one way to celebrate THE YEAR OF THE E.A.R. From Elektra/Asylum Records.

# DEAN FRIEDMAN WON'T CHANGE HIS NAME AND WE'RE DAMN MAD ABOUT IT!!

We just can't understand it. Here's this incredibly talented young singer-songwriter with his whole future ahead of him and he's willing to throw it all away for a few syllables.

Listen, we tell him, no one's ever going to believe that someone named Dean Friedman can write love songs as moving as "Woman of Mine" and "Solitaire," or write sagas of suburban seduction like "Ariel," or a song as emotionally evocative as "Song For My Mother." But the kid won't listen to reason.

We need your help before it's too late. Listen to Dean's new album on Lifesong and then send us a suggestion using the coupon below. The kid has reluctantly agreed to consider all suggestions. All entrants will receive a special gift from Dean and the best suggestion will receive a brand new portable tv-radio from Lifesong.

But hurry, because it'll only be a matter of weeks before the whole country insists on calling him Dean Friedman.

HALL will be teaching a songwriting course at Middle Tennessee State University...KEBC-FM has begun to carry Oklahoma City's only 24 hour a day live news service...TOM CHECHE, News Director of WPOC-FM/Baltimore, was presented with three awards at the recent Eastern Motorsport Press Association Convention in New Jersey...JAY HOFFER of KRAK/Sacramento sent a note to me about a listener who wrote him in Finland. Apparently because of a signal skip, a gentleman in Finland was able to pick up the station for a period

PICKUP THE TEMPO: Had a few reporters mention some complaints about the lack of uptempo material. Hope you record industry people make note of his for your future releases. Get it up!

PROMOTIONS: CHRIS McQUIRE, PD of KFTN/Provo, is going to get his boss BILL ANDERSON involved in their next promotion. Anderson will be pumping free gass to anyone who comes to a certain gas station with a KFTN bumper/window sticker on their vehicle. I can see the traffic jams now...WCOP/Boston, PD BOB KNIGHT is asking for taped one hour concerts to run on their FM station TK-101. If you can help contact Knight at (617) 267-0123...KWMT/Fort Dodge is running a promotion to pay the heating bills of a listener for one month. With the record cold they have been having, the winner should get a nice slice of the bread. The jocks are making hourly out calls. The person who answers their phone: "KWMT Is Gonna Keep Me Warm" will win.

Barry Grant (second from left) PD at WIRK-FM, West Palm Beach, surprised Mercury recording artist Cledus Maggard (left) at the recent South Florida Fair with the best roof-top sign in the Country "K" Convoy to the fair. The contest was designed to take advantage of the television coverage from the \$150,000 Coca-Cola helicopter, which was donated to the station for the promotion. The helicopter carried many area newspersons. The winning sign is held up by two "Country mounties" that helped with traffic control during the convoy. Over 200 vehicles participated.

Bo Wiley, noon to 3 air personality on KAYO/Seattle, is shown with his recent special guest, a snake. Asked why he would do something like this, Wiley stated: "In this business you have to get your name out front to become a popular personality. This was just one of the many things I've done on the air. Not the most dangerous, but certainly the most frightening." By the way, the snake is a seven and a half foot King Boa.

During the recent National Western Stock Show in Denver, KERE Program Director R.T. Simpson spent time interviewing many special guests on his remote broadcast from the show. Pictured above with R.T. (the one wearing the glasses), during one of his on-air "bull" sessions, is just one of the many interesting participants in the show. As R.T. carefully walked away he was overheard to have said, "That guy is really full of bull, must have been something he ate."

MARY MacGREGOR came to town to sing on the GRAND OLE OPRY! Three years ago she came toMusic City looking for a record home, met VIC WILLIS of the WILLIS BROS, and got to sing some on WMS's daily live music show "The Waking Crew" but didn't find a producer, so she went home to Steamboat Springs, Colorado. PETER YARROW (of Peter, Paul & Mary) took her to Muscle Shoals to cut this song he had written for her after she had sang backup vocals on his album "Love Songs." Mary MacGregor is not spending much time in Steamboat Springs these

# POP/ADULT NOTES

MIKE KASABO

Welcome to R&R Convention & Expo '77.

This year we have the heaviest turn-out of Pop/Adult programmers yer, so let's take advantage of that and concentrate on the shoring

ever, so let's take advantage of that and concentrate on the sharing of ideas, formulas and observations. With that in mind, we can't miss making this the best ever industry convention.

The new Charlie Rich album "Take Me" contains a track that many programmers have mentioned to me..."On My Knees" is the cut and it features the lovely voice of Janie Fricke.

The new Baby Face went right on a couple of biggies...WIOD, WCCO and WSAV

Good first week play on the Judy Collins...WHIO, WTMJ and WMGC.

A label change for Bobby Goldsboro appears to have done him some

A label change for Bobby Goldsboro appears to have done him some good. First week airplay action on "Me And The Elephants" for Epic is his best start in a long time...check New & Active.

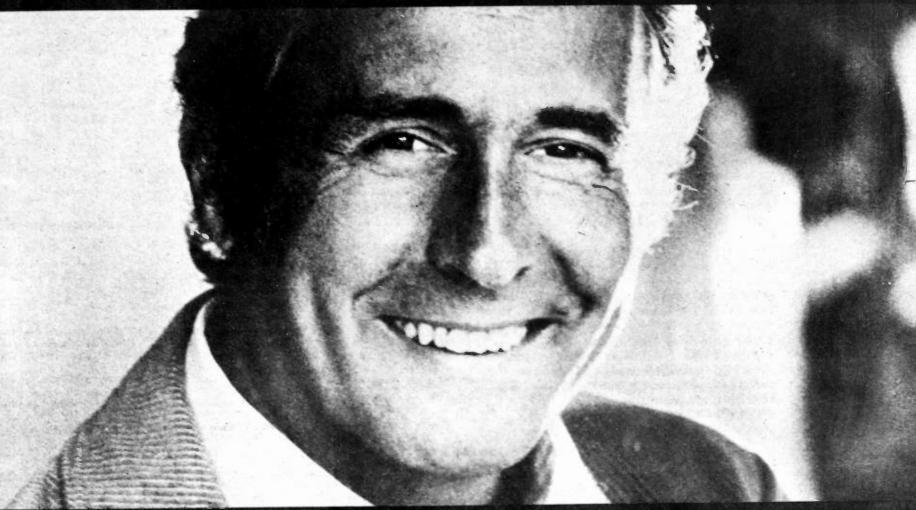

Since many programmers have asked object the Mall Co.

Since many programmers have asked about the Hall & Oates and any negatives as it relates to Pop/Adult radio, I'll answer by saying that those stations playing it so far (they include WTAE, KEX, KGB, WGAR, WNIC-FM, K101 and more) have not had any significant negative reaction to it so far. We note, however, that several stations are, fading it early to avoid the "rich bitch" line at the end of the record.

Henry Mancini continues to look active with his theme from "Charlie's Angels." Late adds are WBAL and WMAL.

Bette Midler's "You're Moving Out Today" got some heavy new airplay action this week...WMAL, KEX, WSB and WGY.

It took three beautiful ladies to make the series, and one beautiful man to break the hit.
