COUNTRY CONFIDENTIAL

by Lynn Shults

BILLBOARD AND ITS sister publications, the Airplay Monitors, are teaming up to host a three day radio business conference. The Billboard/Monitor Radio Seminar is scheduled for September 8-10 in New York.

THE SEMINAR WILL focus on how the radio and record businesses have dramatically changed as a result of relaxed station ownership rules, duopolies, local marketing agreements, new formats, and more accurate music charts and reporting systems. The event will feature keynote speeches and general interest panels as well as format-specific gatherings for top 40, AC, R&B, country, album and modern rock, and Spanish radio. In addition, Billboard's sister company, Broadcast Data Systems, will be hosting a panel and also organizing hands-on workshop sessions where broadcasters can get personalized instructions on how to use and understand BDS information.

THE EVENT WILL feature interactive panel sessions orchestrated by facilitators rather than the traditional panelist-and-audience format. The Billboard Radio Awards, previously held during the fall National Association of Broadcasters convention, have been renamed the Billboard/Monitor Radio Awards and will be moved to the new conference. The gala awards ceremony will be the Seminar's Saturday night closing event. So, circle the dates, Sept. 8-10, and we'll see you in the Big Apple for a most enlightening event.

Rotation leaders are those monitored stations which registered 35 or more detections on any record registering 2500 or more total detections in the survey week. For records with 500-2499 total detections, rotation leaders register 15 or more detections. New airplay lists those stations registering six or more detections per week on a record for the first time.

Monitor C

COUNTRY AIRPLAY

DETECTIONS

APRIL 4—10, 1994

Compiled from a national sample of airplay supplied by Broadcast Data Systems' Radio Track service to Country Airplay Monitor. 133 country stations are electronically monitore 24 hours a day, 7 days a week. Songs ranked by number of detections. ©1994, Billboard/BPI Communications.

Records showing an increase in detections over the previous week, regardless of chart movement. Airpower awarded to those records which attain 2500 detections for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 that are decreasing in plays are removed from the chart after 20 weeks.
