HOW MUCH LONGER
WILL USED MACHINES
LEAD THE PARADE?

"The Coin Machines Merry-Go-Round"

by Bill Gersh

HOW LONG WILL THE USED MACHINES BUSINESS CONTINUE TO LEAD?

As the war in Europe draws to a close, more and more coinmen thruout the nation are beginning to wonder whether they should continue to regard used equipment as the leading division of their business.

Some are of the opinion that used machines will experience a tremendous price drop the moment the war in Europe ends. Others are of the belief that used machines will continue to be the one and only item of this industry for sometime to come.

This is a serious problem for the coinman dealing in used machines. There is every possibility that he may be caught short with a tremendous stock on hand. Prices may fall far below what he actually paid for the machines, not considering the additional amount he spent to put them into proper operating condition.

Then, again, should he allow used machine deals to get away from him at this time, in the belief that the war may soon be all over, and then find that used machines will still be the essence and backbone of this business, even after the war in Europe is finished, he may find himself without any merchandise to sell. And this is not taking into consideration the loss of profit which will also result.

Many national and even international moves must be taken into consideration in regard to the possibility of an early return to domestic products manufacture.

It is now well known that the moment the war in Europe is finished much of the war material in that theatre will be left there, probably sold to the countries where it will remain. The men from this war theater will be hurriedly moved to the Pacific.

In this fashion, army experts claim, they will be able to get reinforcements into the Pacific area so much faster. At the same time this will eliminate using much outmoded war material.

The armed services are therefore adamant that production continue at top speed so that when these men are shipped to the Pacific fronts, and most of these men will be shipped directly from Europe without even touching these shores, they will find the proper material awaiting them when they arrive at their destination. This means continued all out production of war merchandise.

This can hold back conversion for a year or even more, depending upon the progress of the Pacific war. Transferring millions of soldiers from the European to the Pacific front not only requires every available inch of shipping space but also makes necessary tremendous amounts of war material to be awaiting these men when they land so that they can get into instant action.

Another factor which enters into this equation is whether the present government agencies will decide that reconversion will be allowed on the basis of the number of people a factory employs or whether it will be gauged on the essentiality of the product manufactured.

In short will WPB, WMC and the other governmental agencies involved, decide that a manufacturer who makes plumbing and sanitation equipment be allowed to convert his plant to domestic production first because of the essential nature of these products, or will these agencies decide that a factory, regardless of what it manufactures, be first to return to former products production because of the fact that it employs a large number of people?

This, in addition to the requirements and the position taken by the armed forces, who now are in control of all production, is the puzzle which this, and all other industry, is trying to solve, so as to be completely prepared.

The average man, who has done some studying of this problem, is of the belief that this industry will not see an early return to any of its former products production.

"The Coin Machines Merry-Go-Round"

He feels that even when the manufacturers in this business get the "green light" to go ahead it will take months for them to reconvert to former products production. Therefore these men are of the belief that used machines will continue to be most prominent in this trade. They also feel that when the first early rays of the "green light" become visible that prices will take a tremendous drop. Not from lack of actual value, but rather from the effects of post-war hysteria which will then become most outstanding.

After this first "false" drop in prices, they claim, and after the trade comes to the realization that the new products are still far away, prices will once again return to their former marks and may even go higher. They may even remain at this higher mark until production again reaches that point where competitive selling comes into being.

Even the first real production, they feel, will not mean anything as far as volume is concerned. They claim that such production will not even begin to shrink the tremendous backlog demand in this trade.

All the above, and the following, has been gathered over a period of some weeks by The Cash Box from the leaders in this industry. It seems to be logical. It does signify sound thought on the part of many in this industry. It again proves that the members of this trade are carefully watching their future business interests.

Tho all this can come about as conjectured here, there is still the possibility that sudden and great victories can bring about a return to former products production and much sooner than expected. The word has already come out of Washington that once again War Mobilization Director James F. Byrnes is putting together reconversion plans, even tho these are as yet only on paper.

Many of Washington's experts are of the belief that the present progress of the war is such that both fronts, European and Pacific, may have a sudden termination. They believe that the victories already gained in the Pacific have helped to tremendously shorten this war.

Regardless of all prediction and statements, the problem persists. Most feel certain that the used equipment market will continue on prominently. At the same time new equipment may also be seen on the market even tho the used machines business may continue most outstanding, regardless of this new equipment.

The return to former products production conversion will take many months. No one manufacturer will be allowed preference over another manufacturing similar merchandise, according to Washington authorities. This, too, can hold back reconversion in some industries for a long time.

The main problem arising in reconvertng to former production is time. Just as it took time to prepare factories for war production, it will again take time to get set for peacetime production. Time will be required to unscramble government owned machinery from private owned machinery and clear out the government machines.

Time will be needed to again establish a flow of parts and materials from suppliers especially if some of the older suppliers continue in war work. Time will be needed to build new tools and design new machines. Time will also be needed for engineering work. The time problem is therefore of greatest importance. Every day's delay now means more unemployment later.

In addition, the backlog demand for machines in this industry is so great that it will be years before any true saturation point is reached.

It is therefore safe to state at this time, in concensus, that for some many months to come the used machines field is going to continue on just as great as ever.

THE "SPRING SPECIAL" ISSUE

A great many letters have arrived at The Cash Box covering every subject which has been discussed in these pages these past months. These men are anxious to see something concrete. They report that they are looking forward to The Cash Box annual "Spring Special" issue to once again present a plan which will help all concerned with this industry.

Therefore, the "Spring Special" issue (which will close March 15) will probably be one of the most important from the standpoint that a great many world shaking events are in the making, as well as from the point of view that this industry is so eager to start on the path to what is sure to be its greatest era.

This "Spring Special" issue because of this great interest offers every advertiser the most outstanding opportunity to gain complete attention to his advertisement. It is also one issue wherein he can present himself to the trade in the light he most desires. This time is of the essence - and is growing shorter each day.

"The Coin Machines Merry-Go-Round"

WILL LARGE MFERS START DIRECT SALES ERA

For many months it has been rumored thruout the industry that certain large industrialists, formerly not connected with this business, will enter into this field.

It is also believed, by those who claim to know the facts, that these industrialists will work thru their own national distributing organizations, and not thru the present coin machines men.

As is also well known, certain automobile manufacturers have been mentioned from time to time as possible producers of coin operated equipment in the post-war period.

Should the reports which are now circulating thruout the trade be true, that these manufacturers will work thru their own dealer organizations, then this industry faces a very serious problem.

The members of this industry have long fought the idea of any storekeeper, or any other outsider to this business, being able to pay 25¢ for a magazine at a newsstand and learning all about this industry while, at the same time, being able to purchase equipment and thereby push coinmen out of locations.

Some of these new manufacturers, entering this industry for the first time in the post-war period, are reported to have planned to sell thru their dealers direct to retailers on a time payment basis, and will even arrange for mechanics to be furnished by their dealers when the retailer needs such help.

Payment for the machines they will sell direct will be exacted from the income of the equipment and collected by the dealer's service force. The location may receive only a small share of the take until the machine is paid for. Once completely paid it becomes the storekeeper's property. He can then continue to operate it on his own account.

A service organization, such as the auto manufacturer now requires that his dealer have, will be enlarged and put into action so that the storekeeper will need only to pay a nominal fee to the dealer he buys his machine from to keep the equipment in condition at all times.

Tho there is really nothing new or startling in this plan, for it was in operation in this industry in the days of the coin operated pianos, and even before then, it was never before attempted on so grand a scale. Perhaps with the financial power of these large industrialists such a plan can be proved practical.

Should such merchandising even be attempted, much serious discomfort would result as far as the present coinman is concerned. It is therefore imperative that the coin machines man, to make sure he will not have to face such trouble in the future, get legal and binding contracts signed with his locations.

This is the one and only way such a sales plan can be stymied.

As the average merchandiser in this industry knows it would not be too difficult for some very large manufacturer to enter into the automatic music business and sell direct to locations. The location owner would be happy to buy were he assured of an easy and comfortable time payment plan and a fine service organization to keep his machine in tip-top shape at all times.

Such a manufacturer could easily prove to his dealers, especially these days, and more especially in the post-war period with music machines bound to grow even more outstanding and prominent everywhere in the nation, that by creating a service organization, by furnishing the average retailer with records, needles, parts, etc., etc., as well as with trained mechanics (who would probably be trained at a factory school as the auto mechanics are) that he would have a tremendously profitable long-life business. This wouldn't be too hard for the average auto dealer to believe.

It is well known that all industries seek other lines of endeavor, in addition to their present merchandise. The Firestone retail stores featuring glassware, electrical appliances, drugs, sundries, records, radios, phonographs, picnic ware, and a hundred and one other items, in addition to their main business of selling tires, are a very outstanding and pertinent example of what is coming in the post-war era. This is happening in every industry. Many are at present investigating this field. This business not only offers the manufacturer a marvelous means for entrance into the average retail store but it also creates a contact which he can make extremely profitable. Worked on a national basis this can be developed into a really terrifically profitable business by these large industrialists.

It is therefore imperative that coinmen everywhere in this nation, protect themselves from such a post-war invasion of their business by using the method suggested by The Cash Box.

"Talking Out Loud"

RECORD DISTRIBUTORS SNUB RETURNED SOLDIER

HOSPITALIZED COINMAN, HONORABLY DISCHARGED, PUSHED AROUND BY RECORD DISTRIBUTORS AFTER RETURN TO HIS PHONO ROUTE, BEGS FOR HELP TO GET REHABILITATED AND IS COLD-SHOULDERED INSTEAD. WAS THIS WHAT HE WAS FIGHTING FOR?

NEW YORK — The most shocking letter yet received in regard to the tactics used by the record manufacturers' distributors, agents and branch offices, reached The Cash Box this past week from an honorably discharged soldier who has just returned to his phono route.

Frederick W. Popolos, Pine Tree Distributors Co., Waterville, Maine, coin machines man, enlisted voluntarily in the Army of the United States on May 22, 1942. He turned the operation of his route over to a relative while he fought for his country. After being hospitalized, he was honorably discharged from the Army in April, 1944.

He learned on his return to his business that his relative had not been able to get records from the record distributors who had been selling him previous to his enlistment.

He personally called on Farrar-Brown Company of Portland, Me., distributors for Columbia Records, and advised them that he had been hospitalized, honorably discharged, and was now trying to get rehabilitated. In his own words the person in charge "was unimpressed".

He then contacted Decca Distributing Corp., Boston, Mass., with whom he had also formerly dealt, and received the very same treatment from them.

Since he is far out of the metropolitan areas he had hoped that he would be given some consideration. He knows, as does everyone in this industry, that honorably discharged soldiers of the United States Army are to be given every consideration while trying for rehabilitation. All business men have pledged themselves to this end.

In fact, certain large record manufacturers have written some tear-jerking, flag-waving advertisements about "when our boys come marching home again".

But, instead of giving this returned soldier-coinman, who voluntarily enlisted in the United States Army, any consideration whatsoever, he received a cold shoulder from one record distributor and a snub from the other.

He is now trying his best to continue operating his route. He is trying, with these obstacles in his path, to rehabilitate himself. To again earn a living.

WAS THIS WHAT HE WAS FIGHTING FOR?

"OPS NOT GETTING BRUSH-OFF" SAYS "The Billboard" ON RECORDS

NEW YORK—The Billboard magazine, which caters to coinmen thru newsstands, in its March 3, 1945 issue has a feature article entitled, "The Operators' Disk Supply Situation".

The second paragraph of this article is headlined with the words, "Ops Not Getting Brush-Off". And is followed by this sentence, "The general charge that the record companies are brushing off operators in favor of retailers and other outlets does not seem to stand up under close scrutiny".

The Cash Box leaves the above to all the music machine men in this coin operated machines industry. These men who have reported purchasing records for years and are now being told that they can't get any. These men who report that they are forced to buy anywhere from 75% to 90% of their records from retail stores.

These same men who are back of The Cash Box in its fight to get the record manufacturers to grant this industry, the industry that pulled them out of the worst slump of despair they had ever fallen into, equitable distribution.

Every day, everywhere in the nation, new retail record stores pop up and are rapidly supplied. Yet coinmen who have worked to help make the record manufacturers so healthy financially—get NOTHING or so few it doesn't matter. And that statement is backed up by the large number of letters in The Cash Box office.

We leave the accuracy of the statements made in this article in The Billboard to the judgment of the music machine men of the nation.

RECORDS & FURNITURE

WICHITA FALLS, TEX.—In the above item in The Billboard the trade is advised that no new outlets are being created by the record manufacturers. It may be of interest to this newsstand paper to read the following from W. E. Thompson of this city.

"The North Texas Furniture Store has just opened a record store this year. This in view of the fact that we can't get enough records to service our machines. However, I can buy any numbers in quantity from the local 5 and 10¢ store. In fact, I am forced to buy at retail from the numerous record shops here."

TAX BUGS BITING IN TEXAS

THREE TAX BILLS SMASHED AT COINMEN.
\$50 FOR PHONOS, \$100 FOR MARBLE GAMES,
\$20 FOR VENDORS. OPS HOPE NEW 15%
GROSS TAKE BILL HAS BEEN KILLED.

AUSTIN, TEX.—Texas coinmen are all up in the air over the three bills now before their state tax committees here.

In two of the bills now being discussed in the tax committee license fee for phonos will be placed at \$50 per year, Pin Games at \$100 per year and merchandise vendors at \$20 per year.

The third bill which has been introduced, and which Texas coinmen hope they have killed in committee, goes both of these former two proposals many times better as far as income for the state is concerned. This bill proposes that there be 15% revenue taken from the gross receipts on phonos and pin games.

Coinmen here from various Texas cities have been engaged in this fight for almost a month. They have been visiting with the committees in charge and explaining that the taxes proposed are confiscatory and extremely inequitable and that their equipment even at present earning capacity could not operate with such a tax load.

These coinmen have written to The Cash Box and suggested that a National Tax Council get under way as soon as possible. They believe that the need is extremely great and urge that such a tax council should be made immediately effective.

OPS PLAN HIGHER COMMISH BASIS TO COMBAT 12 PM CLOSE

NEW YORK — From leading metropolitan centers throught the country comes word that operators believe the one and only way to combat the losses they expect which will result in many of their locations from the 12 P.M. curfew will be to instantly install The Cash Box suggestion for a better commission basis by arranging to give such locations only 30% of the take.

In this city music ops have already met with their association and have brought this plan to the fore. Just what percentage they have suggested be placed into effect is not as yet made known. It is understood, tho, that most Ops here have proposed that The Cash Box plan of a 70%-30% commission basis be placed in effect. The executive committee of the music association here is reported to now have this plan under advisement.

From Detroit, Cleveland, Chicago, St. Louis, and other cities throught the nation, The Cash Box has received letters that coinmen believe the 70%-30% commission basis can now be placed into effect in a great many locations.

These men are now of the belief that this 12 P.M. curfew emergency ruling will, instead of harming this industry, help by allowing coinmen to get a better commission basis under way.

Many of the ops in the larger cities claim that locations, where the play has been heavy after the midnight hour (as in New York City), are going to suffer. They are carefully watching the receipts for this first week of the curfew. Should the play drop as much as they expect that it will they are going to get started on a new commission basis to protect themselves.

ARKANSAS MUSIC ASSN. FIGHTING TAX GRAB

LITTLE ROCK, ARK. — The Arkansas Music Ops Assn. thru their attorney Albert J. Demers are doing everything in their power to fight the tax grab now being asked by this state.

As reported in this past week's issue of The Cash Box the state of Arkansas is asking for 33 1/3 percent of the gross take of all coin operated phonos, as well as coin operated amusement devices.

Mr. Demers is going before all committees in the state legislature here and pleading the cause of the coinmen. He pointed out that such a grab will force most of the men out of this business. The hope is that he will be successful.

THE CONFIDENTIAL PRICE LISTS

AN EXCLUSIVE MERCHANDISING SERVICE FOR THE COIN MACHINES INDUSTRY ISSUED EVERY WEEK BY: THE CASH BOX, 381 FOURTH AVENUE, NEW YORK 16, N. Y.

FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for the past week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth \$150.00 whereas someone on the East Coast may think it worth but \$75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

METHOD

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the past week. Where only one price appears this should be considered lowest price.

CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.
3. MEANS MACHINE JUST ADDED TO LIST.
4. MEANS PRICES WENT UP AND DOWN DURING THE PAST WEEK
5. MEANS PRICES REMAINED SAME AS IN LAST PRICE LISTS.
6. MEANS NO PRICES QUOTED FOR PAST TWO WEEKS
7. MEANS NO PRICES QUOTED FOR PAST THREE WEEKS
8. MEANS NO PRICES QUOTED FOR PAST FOUR WEEKS OR LONGER

IMPORTANT

Machines underlined mean these were most active in trading the past week.

NOTICE! March, 1942. Market Prices for Wholesalers as per GMPR of OPA appeared in September 7, 1943 issue. Reprints are available.
