Monitoring for the Summer, 1987 TRAPMAN REPORT (based on the October release of Summer ratings) was conducted from mid-October to mid-November, 1987. Each of the fifteen stations in this report were monitored for one-hundred and twenty contiguous hours. The total of 1,800 hours of monitoring produced information on 19,060 titles.

Special programming containing titles which did not appear in a station's regular programming have been deleted during the music identification process. Should you require additional information on special programming for individual stations, please contact James Jones or Craig Erickson at our offices in Charleston.

****Please note:** The listing for 'AM ONLY' *should not* be considered a complete monitor. For the most part, titles from before 1955 (i.e. the Big Band era) are not reported. All titles monitored from 1955 forward have been reported.
