WANTED

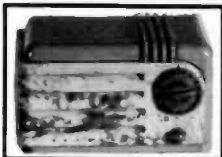

AIR KING SKYSCRAPERS

PAYING **\$14,500.00+** for near mint condition red or blue
\$10,000.00+ for green, lavender or yellow
\$3000.00+ for black and **\$2000.00+** for white or brown
ALSO WANTED ANY COLOR-ANY CONDITION
 COLLECTOR PAYING TOO MUCH, CALL ME LAST

TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond. red, green, orchid, blue
\$2500.00+ for any mint condition one
ALSO WANTED ANY COLOR-ANY CONDITION

DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond. black, white
\$1,450.00+ for beetle, gray, salt & pepper
\$2000.00+ for red, blue **\$3500.00+** for green or lavender
ALSO WANTED ANY COLOR-ANY CONDITION

WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & YELLOW \$900.00, YELLOW & RED \$3,750.00
 ARVIN 532 ANY COLOR \$2,500.00, BENDIX 526 GREEN & BLACK \$625.00,
 DeWALD A501, A502 BROWN \$375.00, YELLOW \$425.00, RED \$1,200.00
 EMERSON AU 190 & BT 245 YELLOW \$1,300.00, GREEN \$2,500.00,
 DARK RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00
ESPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!
 EMERSON BM258 YELLOW \$750, GREEN \$1,350, RED \$2,150, BLUE \$4,000
 EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00
 FADA L56,F55,52,5F50,5F60,136,53X, YELLOW \$1,500.00, LT GREEN \$1,750.00
 MAROON & YELLOW \$2,200.00, YELLOW & BLUE \$2,500.00, YELLOW & RED \$3,100.00,
 EMERALD GREEN & YELLOW \$7,000.00, BLUE & YELLOW \$7,000.00,
 FADA 115, 116 & 1000 ALL YELLOW \$700.00, MAROON & YELLOW \$950.00,
 YELLOW & RED \$1,150.00, PEA GREEN \$1,300.00, BLUE & YELLOW \$2,550.00
 GAROD 6AUI MAROON \$675.00, YELLOW & RED 1,350.00,
 RED & YELLOW \$1,450.00
 HALSON ANY COLOR \$1,500.00 TO \$5,000.00
 MOTOROLA 50XC ALL YELLOW \$1,750, BROWN & TORT \$2,750.00,
 RED & YELLOW \$6,000.00,
 GREEN & YELLOW \$6,250.00,
 MOTOROLA 52 YELLOW & TORT \$1,500.00, MAROON & YELLOW \$1,850.00,

ANTIQUE RADIO ON CD-ROM

Sam's Photofacts

Sets 1-100 now available on 4 CD-ROM's, 1-25, 26-50, 51-75, 76-100

Only \$ 79 each prepaid USA

"The Best Resource One Can Have For Old Radios!" - acclaimed to be the most comprehensive and most detailed service information on old equipment. Each CD contains 25 sets and each set contains between 25-35 service manuals and data for equipment produced after the end of WWII. Sets 1-100 cover all sorts of radio, TV, amplifiers produced from 1946 - 1950. The 4-CD's will contain approximately 3,000 service manuals for all of these types of old electronic equipment. A must for any serviceman or restorer!

ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, One River Road, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone: (866) 371-0512, 8:30 AM to 5:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$39.49 by Periodicals mail and \$57.95 by First Class mail.

Annual foreign rates. By air: Canada - \$61.00; Mexico - \$67.00; Other foreign countries - \$105.00. Surface mail: Canada - \$51.00; Other foreign countries - \$58.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

© Copyright 2001 by John V. Terrey.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

Printed in U.S.A.

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

STAFF:

Publisher and Editor: John V. Terrey
Assistant Publisher: Cindie Bryan
Managing Editor: Dorothy Schecter
Circulation Manager: Tammy DeGray
Advertising Manager: Cindie Bryan
Office Manager: Tammy DeGray
Publishing & Editorial Staff: Ray Bintliff, Dave Crocker, Lisa Friedrichs, Bobby Lyman
Founding Publisher/Editor: Gary B. Schneider
Contributing Writers & Consultants: Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Paul J. Bourbin, Norman Braithwaite, Dave Crocker, Dick Desjarlais, Alan Douglas, Richard Foster, Fred Geer, Jim Kreuzer, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White, Ralph Williams, Walter Worth
CONTACTING ANTIQUE RADIO CLASSIFIED. All correspondence should be sent to:
A.R.C., P.O. Box 2, Carlisle, MA 01741.
Only UPS, FedEx, etc. items to street address: One River Road.
Telephone: (866) 371-0512; Fax: (978) 371-7129
E-mail: ARC@antiqueradio.com - Web: www.antiqueradio.com
Please, no classified ads by telephone: thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

In keeping with tradition, A.R.C.'s December issue has always had a "Tis the season to be jolly" tone, especially indicated by the cover. However, in the light of recent events, it hasn't been easy to strike a celebratory note, and there's no question that the mood of the nation this holiday season is more subdued than ever before. Nothing quite right jumped out of our files for our cover or lead article.

But then, we realized that radio collectors have something other than the holidays to celebrate this month — the 100th anniversary of Marconi's transatlantic wireless message from England to Newfoundland on December 12, 1901. Though transatlantic cables had been the means of intercontinental communication for 35 years, Marconi's wireless transmission meant the beginning of a new era — the era of radio.

Searching for the right theme, we were delighted that Michael Dalzell had proposed an article on a newly minted £2 coin — the British way of recognizing the importance of Marconi's achievement. The article combines Michael's interest in both radio and coin collecting and provides information about Marconi's struggles to achieve his goal and about how to procure the commemorative coin.

There are three versions of the coin — nickel-brass, silver, and gold. I could not resist any of them and can guarantee that all are beautiful — especially the one in gold which is accompanied by a very good, hardcover book on the Marconi saga. Travelers to Britain will find it interesting to see the circulated version showing up in their change, but many of you may want to order the special uncirculated versions.

Just as Michael's article fell into place for the Marconi celebration, so too did staff member Bobby Lyman's late summer vacation on Nantucket. Bobby happened to notice the plaque honoring the first Marconi station in the U. S. at Siasconset, Nantucket. Her curiosity led to contact with the Nantucket Historical Association and permission to reprint a 1991 *Historical Nantucket* article on the Siasconset station.

Most interesting is the fact that a ship-to-shore transmission to Siasconset in August 1901 predated the Newfoundland contact in December of the same year. However, Marconi chose Newfoundland for the intercontinental trial because it is closer than a U.S. station would be to England.

To continue the Marconi celebration, Ray Bintliff has reviewed *Marconi's Miracle* by D.R. Tarrant, a book about the 1901 event, published in Newfoundland. To keep the roles of both sides of the Atlantic in view, Marconi Communications in Coventry, England, published *Marconi's Atlantic Leap* by historian Gordon Bussey, which accompanies the uncirculated gold commemorative coin. Both are popular press books intended for the general readership, and both are highly recommended.

Photo Review includes a wide variety of items ranging from a 1-tube Crosley Pup and an Amrad battery set of the 1920s to a 1948 TV and a 1950s auto radio. Radio

had come a long way in that quarter of a century.

The Muchow auction followed by our coverage of the events of September 11 delayed our AWA Conference report by a month. In many ways, this was an outstanding meet, and those who attended had an enjoyable time. However, as we say in the report, while AWA looks for a new location in 2002, we hope that the conference's shortcomings will be overcome.

In both the flea market and the auction, desirable items appeared. The contest too had many interesting entries. The auction totaled \$39,607, a respectable result, though down from last year's \$48,656. Attendance was also down, and now that most of the hotel has become a dormitory, folks should stay tuned to see how AWA resolves the problems.

Another significant summer meet is the Michigan Antique Radio Club's Extravaganza, which was a success across the board, including good programs and an auction that totaled nearly \$13,000. This flea market is particularly successful due perhaps to the rigorous restriction to Friday morning opening. Though registration is allowed on Thursday night, people seem to respect the rule against early opening. This is a weekend meet and thus encourages attendance, which was up 25 percent. AWA should take note.

Radio Miscellanea includes a response to my suggestions in our October report as to how the Muchow auction might have been handled better. A spirited exchange of ideas is always welcome in A.R.C. Comments on the AWA Conference are also included.

The Internet. Since the holidays are upon us, we urge you to take advantage of our new A.R.C. benefits: books shipped free by book rate to addresses in the U. S.; Discover and American Express added to Visa and MasterCard as acceptable credit cards; a new toll-free number, 866-371-0512; and a ten percent discount on all book orders for our qualifying subscribers. All should aid in easing your wish-list shopping.

Coming Radio Events. Over 30 meetings, swaps, and holiday parties will take place in the month of December. In addition, our "Mark Your Calendar" section lists another 46 events already scheduled for the year 2002, including some of the major annual meets. Start planning your travel schedules now!

Happy Collecting and Happy Holidays from all the A.R.C. team — John, Dorothy, Cindie, Tammy, Bobby, Ray, Dave and Lisa!

John V. Terrey, Editor

ON THE COVER

Our cover shows the uncirculated £2 commemorative Marconi coin issued by the British Royal Mint on October 15, 2001. Designed by Royal Mint engraver Robert Evans, wireless waves are depicted emanating from the center portion and around the outer border. A series of dots for the letter "S" in Morse code heard by Marconi in 1901 radiate from the date. See our lead article for purchase information.

THE WIRELESS YEARS

British Coin Commemorates Marconi Centennial

BY MICHAEL DALZELL

Once in a rare while, two collecting passions become one. In the following article, Mike Dalzell, brings his interest in coin and radio collecting together with a great moment in communications history — Marconi's first transatlantic transmission in December 1901, the anniversary of which we celebrate in this issue. (Editor)

On a raw Canadian Maritime morning, the scientist was in the mood to fly a kite. It wasn't recreation that drove the man; rather, he burned to prove that electromagnetic waves sent through the air were unaffected by the curvature of the earth. The white bedsheet that Guglielmo Marconi sent skyward that December morning in 1901 carried an aerial wire extending to the ground, which he would soon use to sense signals beamed from almost half a planet away.

This test flight at St. John's, Newfoundland, on December 10 was a success, setting the stage for Marconi's grand experiment. Across the Atlantic Ocean, engineers at a station Marconi had built the previous year were given the go-ahead to transmit the Morse letter "S" for three hours a day — from 1 to 3 A.M., and noon to 1 P.M. On December 11, signals began to emanate from the station in Poldhu, England, on the Cornwall peninsula. Shortly after 12:30 P.M. on December 12, Marconi heard through his headphones a weak but unmistakable *dit-dit-dit* telegraphic signal "S." Communication would never be the same.

To recognize the centennial of the occasion, the British Royal Mint issued on October 15, 2001, a special £2 commemorative coin that is certain to appeal to radio enthusiasts and numismatists alike. The bimetallic coin is composed of a gold-colored outer ring and silver-colored insert, and is minted in gold, silver, and nickel-brass versions.

As on all British coins, the front of this coin depicts the Queen in the portrait by Ian Rank-Broadley. Around the edge is the inscription, "Wireless Bridges the Atlantic... Marconi 1901..." American readers may find it interesting that the guidelines for reproducing coins of the

United Kingdom prohibit showing the side with the Queen's likeness.

The reverse side of this coin features a stylized series of telegraphic symbols for the letter "S" that beam from a spark of electricity linking the zeros in the date 2001. Radiating waves overlap the symbols. Around the edge of the coin are more wireless waves.

In striking this coin, the Royal Mint broke with tradition by allowing the public — for the first time — to choose the design. More than 13,000 readers of *Radio Times*, as well as customers on the mint's mailing list and visitors to its Web site, were asked to vote for their favorite of three designs: one depicting the sending and receiving of radio waves across a curved ocean, one with Marconi's face superimposed over a map of the North Atlantic, and a third — the eventual winning design by Royal Mint engraver Robert Evans — graced by the telegraphic "S's."

CROWNING ACHIEVEMENT

Evans's conceptualization of the moment is as forceful as was Marconi's will to demonstrate that electromagnetic signals could be transmitted over long distances. In 1894, just seven years before his transatlantic achievement, Marconi had been the first to suppose that Hertzian waves could be used to communicate.

Marconi pictured at Signal Hill, Newfoundland, just after receiving the first wireless signal to cross the Atlantic on December 12, 1901. It consisted of the Morse code letter "S" (*dit-dit-dit*) transmitted from his wireless station at Poldhu, Cornwall. (From Bussey's "Marconi's Atlantic Leap.")

The uncirculated, nickel-brass £2 Marconi commemorative coin, shown with its presentation folder. It is available for \$9.95 U. S.

Fascinated by the work of Maxwell, Hertz, and Lodge, the 20-year-old Marconi built on their theories, constructed his first crude radios, and sent signals from a window in his Italian granary to the end of his garden — about 100 meters — where a farmer waved a handkerchief to indicate the signal had been received. A year later, in 1895, Marconi transmitted a signal over a hill (an obstacle that experts said would kill the signal) to a receiver two miles away — a moment considered as the birth of wireless communication.

In 1896, the Italian government turned up its nose at Marconi's now-patented system as "not suitable for telecommunications." However, his mother recognized the importance of her son's invention. Through her cousin, Londoner David Jameson, Marconi was able to secure financial backing (as well as the world's first wireless-telegraphy patent) from the British government. By 1898, Marconi had improved his equipment and succeeded in sending a signal across the English channel, though most scientists of the day still dismissed his notion of using wireless for long-distance communication.

In October 1900, Marconi completed his transmitting station at Poldhu in Cornwall. Early the next year, he began constructing a receiving station on Cape Cod, but an autumn northeaster blew the station apart. Marconi traveled farther north, to St. John's, Newfoundland, where he landed November 26 and hastily prepared to complete his experiment. Without time to build a proper receiving station, Marconi improvised. The airborne kites served his purpose, floating high enough to pick the signals from Poldhu out of the air.

And what did he get for his trouble? Marconi was promptly driven out of Newfoundland by cable companies that claimed a monopoly on transatlantic communication. The next year, Marconi was invited by the Canadian government to

set up a sending-and-receiving station in Glace Bay, Nova Scotia. By December, he had succeeded in sending and receiving messages from west to east — making 2-way transatlantic communication possible. Marconi was awarded the Nobel prize for physics in 1909.

COIN OPTIONS

The nickel-brass Marconi coin (\$9.95) makes a fun gift idea for yourself or someone else who appreciates the early history of radio. It is mounted in a pictorial presentation folder that tells the story of his historic event in 1901.

The sterling silver version (\$47.95), features a 22-karat-gold-plated outer ring and is limited to a mintage of 25,000. This mintage is extremely rare by modern standards; for example, in 2000, the Royal Mint coined 31 million circulating £2 coins.

The gold version is composed of a yellow-gold band. Its \$550 price tag bespeaks its rarity (2,500 coins).

The coins are available from the British Royal Mint. Telephone: 800-221-1215 or at www.royalmint.com on the Web. With the gold coin, the Royal Mint offers Gordon Bussey's hard-cover book *Marconi's Atlantic Leap*. The book is available separately at amazon.co.uk for \$10.95 U. S. Bussey, consultant historian for Marconi PLC, briefed the three artists and inspired their sketches for the coin design contest.

The £2 piece is a lasting tribute to a man whose vision sparked the most profound revolution in communication since the printing press and until the development of the Internet.

(Michael Dalzell, 5073 Winfield Court, Bensalem, PA 19020)

Michael Dalzell, a former radio journalist, is now the managing editor of "Managed Care" magazine. He caught the old-radio bug in 1973 when, at the age of 10, he discovered his grandfather's Hallicrafters Sky Buddy in the basement. He began actively collecting antique radios in 1987. He also has collected coins since 1971.

EARLY WIRELESS

Siasconset Wireless Station

BY CAPTAIN JOHN LACOUTURE

The following is an excerpt from an article published in the fall 1990 issue of "Historic Nantucket," and brought to our attention by A.R.C. staff member Bobby Lyman who vacations on the island. The entire article covers the history of Marconi stations on Nantucket from 1901 to 1922. This excerpt concentrates on the first of these stations at Siasconset and the first ship-to-shore wireless message, which predated by a few months the famous transatlantic transmission from England to Newfoundland. (Editor)

For years we have been coming to our cottage in 'Sconset near Bunker Hill, the site of America's first permanent wireless station. [See Figure 1.] And, normally, each spring we spend several weeks on the Helford River in Cornwall, England, about twenty miles from the spectacular site on the cliffs at Poldhu where Guglielmo Marconi transmitted the first radio signal across the Atlantic. It seems inevitable, therefore, that I should write about the early days of Siasconset's Marconi stations.

This 'Sconset story began in Europe in the late nineteenth century with Marconi's wireless experiments in marine communication, first in his native Italy and then in Great Britain. He installed his equipment on lightships and lighthouses, on British naval vessels and ocean liners, and on shore stations, transmitting and receiving messages which ranged from reports of popular racing regattas to accidents at sea.

Impressed by Marconi's accomplishments, Commander John D. J. Kelley, senior writer-manager of the *New York Herald*, alerted its owner and publisher, James Gordon Bennett, who was also a yachtsman and racing enthusiast, to the usefulness of wireless to newspapers. At Bennett's direction, Marconi put up stations on shore and on two ships to cover the 1899 America's Cup Races in lower New York Harbor. He became a national hero by sending 1200 messages that updated the races' progress, and his success confirmed the *Herald's* confidence in the potential of wireless communication as a tool of the press.

The news vacuum which had for so long frustrated those on the high seas could now be eliminated. Transatlantic liners could report their position and estimated time of arrival. Their passengers could keep informed of world events and could exchange messages with persons ashore.

The enthusiasm of Kelley and Bennett for using the Marconi system to communicate with ships at sea would move the focus of events closer to Siasconset. As western stations, the *Herald* se-

Figure 1. The plaque erected by the Nantucket Historical Association in 1971 to commemorate the site of Siasconset's wireless operation and the 70th anniversary of the reception of the *Lucania's* historic message.

lected Nantucket Island, and, forty-two miles away, South Shoals where Nantucket Lightship was the first point of contact for ocean liners bound for New York City. Crookhaven on the south coast of Ireland became the eastern location.

When Siasconset was chosen as the specific site for a wireless station on Nantucket, Guglielmo Marconi was not present. He had worked continuously since the America's Cup Races to improve transmission distance and reception clarity and was deeply involved in preparing for his most spectacular triumph of transatlantic com-

Figure 2. The Hussey cottage, site of the first Siasconset Marconi Station, which began operation on August 12, 1901. Wireless equipment was installed in the left ell.

munication, which linked Poldhu, England, with St. John's, Newfoundland. His representative, W.W. Bradfield, and Commander Kelley selected a lot owned by Samuel Pitman on Bunker Hill behind 'Sconset village as the ideal spot for a marine communication station. They rented the Hussey cottage already on the site to hold the wireless equipment and to house the operators. [See Figure 2.]

Early in August 1901, Antone Perry of New Bedford and a crew of five riggers began construction of the station under the supervision of Commander Kelley. He, in turn, was assisted by Mr. Bradfield, J. C. Lockyer, and E. N. George, all from the Marconi Wireless Company in London. Twenty-five hundred feet of wire arrived on August 3 from New Bedford. Spars for the mast were also built there. The bottom spar—77½ feet of Douglas fir, 18 inches diameter, weighing 3½ tons—was the largest ever shaped in that historic whaling port. The topmast was white pine 68 feet long, 11½ inches thick, weighing ¾ ton; and the topgallant mast was 45 feet long, 8 inches thick, weighing 700 pounds.

The spars were so large that the regular Nantucket steamer refused to load them, and the tug *Petrel* had to be chartered to tow them the seventy miles to the island. The location of Nantucket's wharves and the narrowness of its streets complicat-

ed the arduous task of dragging the huge masts, mounted on wheels, to 'Sconset. The largest spar required a team of eight horses. By August 10, forty-eight hours after arrival, all three sections were nevertheless raised in place.

The whole procedure caused great interest among Nantucket's permanent residents, and many retired master mariners gathered to watch and advise. The 186-foot mast, located on land 55 feet high, placed the receiving wire 241 feet above sea level. Meanwhile, Bradfield and his assistants were busy in the Hussey cottage erecting the apparatus for the large receivers, the transmitter key, and other equipment. Within twenty-four hours after the mast was in place, the Siasconset wireless station was ready to transmit and receive.

Bradfield and Lockyer along with Perry and the riggers then planned to set out immediately by tug for treacherous South Shoals and *Nantucket Lightship No. 66* where they would secure a 45-foot wooden spar to her 60-foot steel mast, rig the cables, and install the wireless equipment. Although they were delayed at Nantucket by a reluctant tugboat skipper and at South Shoals by seasick riggers, Bradfield managed to complete the installation and departed from the lightship on Sunday evening, August 11. He left Lockyer to operate the wireless initially and to train two *New York Herald* operators. The first test was set up for Monday morning.

At 9:00 A.M. on August 12, 1901, as many curious Nantucket citizens watched on 'Sconset's Bunker Hill, the signal from South Shoals came in loud and clear: three dots and a dash, the letter V in Morse code. "We've got her!" shouted Bradfield, and signals were quickly exchanged. Siasconset's signal, or call sign, was MSC. The first message from station to lightship was: "How are you all? What's doing?. The response from No. 66: "Convalescent thanks. Foghorn going since last night."

(Continued on following page)

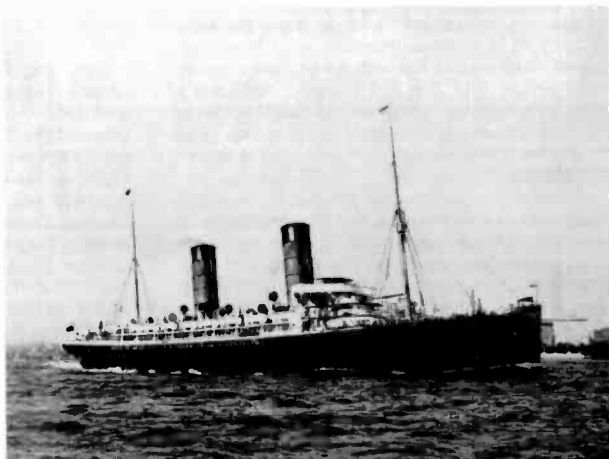

Figure 4. Cunard liner "S.S. Lucania," the first transatlantic liner to greet the *New World* with a wireless message sent from midocean on August 18, 1901. Photo: Peabody Museum of Salem.

(Siasconset Wireless Stations, cont.)

News of the successful contact spread throughout the island. Soon, there was a string of visitors at the wireless station, marveling at the flying blue sparks and amazed that it was possible to communicate through space. On Tuesday morning, Margaret Fawcett, the little daughter of well-known actors, George and Percy Haswell Fawcett, raised the Stars and Stripes on the big telegraph staff. [See Figure 3.] Construction personnel and station operators had given her the honor in gratitude to the Fawcetts for their many kindnesses. Those in neighboring cottages followed the example and set their colors in recognition of the event.

In the meantime, the *New York Herald* built up publicity prior to receiving the first official message from a transatlantic liner. One article trumpeted that the *Herald's* wireless station on *Nantucket Lightship* would shorten the Atlantic crossing by one day and that westbound passengers could communicate with the American continent fourteen to sixteen hours earlier. The paper announced that the route of communication from the liner would be first by wireless from the lightship at South Shoals to the 'Sconset station, then by telephone to the Nantucket office of the Southern Massachusetts Telephone Company and finally by telephone to the mainland and the *Herald* office in New York.

The Cunard liner *Lucania*, [shown in Figure 4] sailing from Liverpool on August 10, was selected as the first transatlantic liner to greet the New World with a wireless message sent from mid-ocean. The *Herald* flashed: "... [It] is singularly appropriate that the old Cunard company's line...should inaugurate this magnificent achievement of science, genius, and inventive skill." The long ocean voyage would be robbed of the terrors of isolation.

While everyone awaited the much publicized approach of the *Lucania*, the first message to reach the Siasconset station actually came on Wednesday evening when the westbound German liner *Lahn* asked to be reported. On Thursday, a passing tramp steamer made the same request. As Friday, August 16, approached and the *Lucania* reached transmission range, Commander Kelley of the *Herald* assigned men to forward messages from the *Lucania* quickly and sent the lightship a series of latest news bulletins to be transmitted.

Finally, the historic message from Captain Horatio McKay was received at *Lightship No. 66*, and was transmitted by Marconi operator Lockyer to Siasconset. As Kelley and Bradfield listened and

Figure 5. The front page of the "New York Herald," Sunday, August 18, 1901, announcing transmission of the first message from the "Lucania" to the Siasconset station, as relayed from Nantucket Lightship No. 66.

watched breathlessly, operators Tom Tierney and E. Mitchell wrote out the words: "All well on board. We are 237 miles from Sandy Hook. Expect to reach New York Harbor Saturday." Within thirty minutes the *Herald* office had the story. The first private message from the *Lucania* was from passenger Carroll Payne to Clark Howell at the *Atlanta Constitution*: "Homeward bound. Passage rough. Though far from home message sent thanks to the *Herald's* enterprise."

By midnight, Siasconset station could read *Lucania's* messages directly, and by 2:45 a.m. there was good two-way communication between the ship and the station. Eight hours elapsed from the initial exchange of signals between *Lucania* and *Lightship No. 66* until the final exchange between 'Sconset and liner. As the passengers of the *Lucania* disembarked, they received a souvenir issue of the *Herald* covering the vessel's historic voyage. [See Figure 5.] Copies were sent to 'Sconset and the lightship so that all participants would be able to show their grandchildren the story of the inaugural operations of the first, permanent Marconi system in the United States.

Marconi's Miracle The Wireless Bridging of the Atlantic

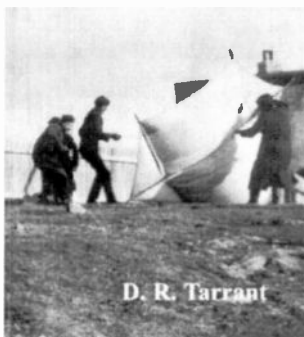

By D. R. Tarrant

REVIEWED BY RAY BINTLIFF

This book's title *Marconi's Miracle-The Wireless Bridging of the Atlantic* suggests some more Marconi lore. But the book contains much more than that. It describes the accomplishments of those scientists and inventors who paved the way for Marconi's practical application of their work. Those mentioned include Oersted, Hertz, Faraday, Maxwell and Morse. The author is a professional engineer with extensive experience in the communications field and a Canadian. While the book reflects a Canadian perspective with Newfoundland ties, it is not a highly technical book that an engineer might write. The book can be understood and enjoyed by both the technically inclined and non-technical readers.

Marconi's Miracle

The Wireless Bridging of the Atlantic

stations in other North American locations, but Newfoundland just missed being the first.

Obviously, Marconi was wary of Anglo-American when he first arrived in Newfoundland because he did not reveal the true purpose of his visit. He indicated that he intended to conduct wireless experiments with shipping in the area and made no mention of his plan to receive transatlantic transmissions.

The book tells of Marconi's successes, as well as his disappointments, such as the storm damaged antenna systems at Poldhu in Cornwall and Cape Cod in Massachusetts. It was the loss of these elaborate antenna systems that forced him to rethink his plans for the trans-

atlantic trials. With a makeshift antenna at Poldhu, he wisely chose to shorten the transmission path and selected Newfoundland (about 1,000 miles closer to Poldhu) as the location for his receiving station. His original plans called for a transmitting and receiving capability on each side of the Atlantic.

Although centered on Marconi's activities in Newfoundland, the author's coverage of Marconi's life is quite complete. The book contains over 30 black and white illustrations, appendices and a bibliography. Sources of the interesting photographs reproduced in the book include Marconi plc, Memorial University of Newfoundland, Parks Canada, and the Provincial Archives of Newfoundland and Labrador.

Tarrant takes the reader back 100 years to that epic event at Signal Hill in St. John's, Newfoundland and the remarkable individuals who made it happen.

Marconi's Miracle contains 109 pages and is printed in a 9" x 6" format with a hard cover. It may be ordered from the publisher, Flanker Press Ltd., P.O. Box 2522, Stn. C, St. John's, Newfoundland, Canada, A1C 6K1. E-mail: info@flankerpress.com. It is priced at \$11.95 U.S. Please check for ordering and shipping information.

(Ray Bintliff, 2 Powder Horn Lane, Acton, MA 01720)

As you might expect, *Marconi's Miracle* provides details of his background and accomplishments. But the book also weaves an interesting tale about Newfoundland's role in the fledgling telegraph industry and the construction of transatlantic telegraph cables. Before cables spanned the Atlantic, news from Europe reached North America by ship. Tarrant tells how the Associated Press stationed a boat at Cape Race in Newfoundland to meet transatlantic ships on their way to New York and Halifax. News and messages from Europe were placed in watertight containers, thrown overboard from transatlantic steamers and retrieved by smaller boats. The messages were then telegraphed to North America by the Cape Race telegraph office. Little wonder that the transatlantic cable, and later, wireless were considered major technological advances

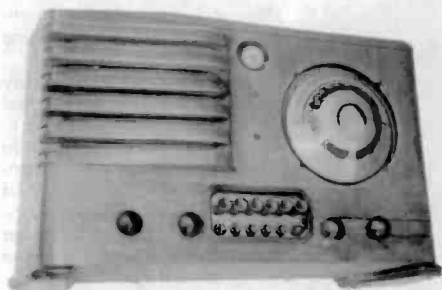

The author covers Marconi's activities in Newfoundland in great detail. He tells of the conflict between the Anglo-American Telegraph Co. and Marconi Wireless. Anglo-American, a transatlantic cable company, held sole rights to telegraphic operations in Newfoundland. It threatened court action if Marconi attempted to establish a wireless station in Newfoundland. Anglo-American regarded Marconi's successful transatlantic transmission and his promise of lower message rates as a competitive threat that required a response. Of course Marconi went on to establish wireless

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

EMERSON MODEL BU-229 – One of many Emerson models in the wooden Ingraham cabinet series, this 1938 set is missing the conical dial center and the eye-tube escutcheon. It is a 7-tube receiver with broadcast and shortwave bands. (*Ralph Jackson – Northboro, MA*)

FIRESTONE MODEL 4-C-16 – This 1950 portable is a 4-tube radio using Types 1R5, 1U4, 1U5 and 3V4 tubes. It operates on either batteries or AC power. The lightweight case is a pretty, swirled brown plastic. (*Cyril G. Brennan – Pike Road, AL*)

DELCO MODEL 987682 – This early 1950s car radio was made by the Delco Radio Division of General Motors Corp. for use in its own automobiles. Called the "Selectronic" radio, it has the standard 5 push buttons. (*Clark Trissell – Lincoln, NE*)

ALL-AMERICAN MOHAWK NAVAJO – This 1926 battery-operated receiver uses 6 tubes and features 1-dial tuning. The Mohawk series had early American names; hence, the arrowhead-shaped escutcheon. (*Wally Worth – Wollaston, MA*)

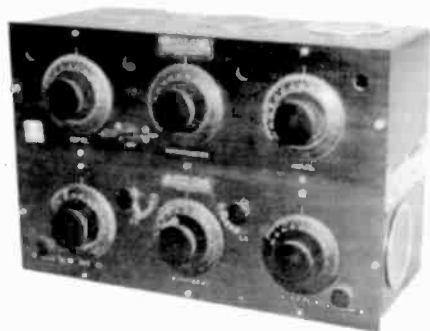

PHOTO REVIEW

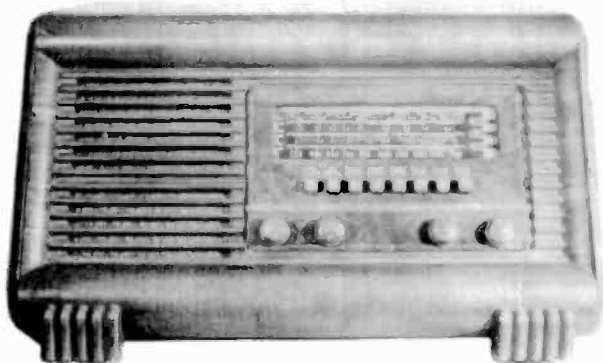

CROSLLEY PUP – This all-metal, 1-tube regenerative radio was sold by the Crosley Radio Corp. in 1925 for \$9.75. The price was important because it was 25¢ cheaper than the 1-tube radio selling for \$10 at the time. In reality, it's the same set as the Crosley Model 50, except that it is jammed into a tiny metal box. To do so, Crosley had to redesign its book condenser to fit. This particular Pup was found in its original box and was never sold! It still has the original price tag (\$9.75) attached. (*Dave Crocker – Mashpee, MA*)

MOTOROLA MODEL 7-VT1 – This 7" television set, manufactured in 1948, has the "porthole" look. It is shown here in a wooden cabinet, but it also came in an all-Bakelite cabinet. (*Clark Trissell – Lincoln, NE*)

AMRAD TYPE 3500-I – This "double-decker" of 1923 was manufactured by the American Radio and Research Corp. of Medford Hillsides, Mass. On top is a Type 2634 unit, which is a 3-tube detector and amplifier. The unit on the bottom is a Type 3475 1-tube tuner. (*Wally Worth – Wollaston, MA*)

PHILCO MODEL 41-255 – This wooden 1941 receiver was found in dirty but restorable condition. It has 8 push buttons and 4 knobs, all inside a swirled plastic dial frame. The AC on/off switch, which is part of the push-button assembly, was broken. I replaced it with a more modern switch by making a mounting bracket inside. That's all it needed. (*Alton A. DuBois, Jr. – Queensbury, NY*)

MEET & AUCTION REPORT

Antique Wireless Association Conference and Auction Report Rochester, New York — September 5-8, 2001

COMPILED FROM REPORTS BY LARRY BABCOCK, RAY CHASE,
JOHN V. TERREY, AND THE AWA

The Antique Wireless Association (AWA) held its 40th annual historical radio conference at the RIT Inn and Conference Center, formerly the Thruway Marriott in Rochester, New York, September 5-8, 2001. Registered attendees numbered 854, down from last years 981.

The change of hotel name came as a surprise to everyone, including the AWA organizers who did not know until mid-August that the Marriott ownership had been transferred to the Rochester Institute of Technology. More than half the hotel rooms had already become dormitory rooms, and AWA members felt very much like displaced persons. In fact, some really were displaced because their reservations were not honored, and they were moved to other hotels.

In addition, the guest facilities were obviously being scaled down, as there were fewer choices on the restaurant menu and the bar was closed — not a happy circumstance for people from all over the world looking for a common, social meeting place. In general, having students on the premises was not a major problem, except for obvious signs of destruction, such as graffiti on the walls. Such signs of deterioration were particularly sad, as our last year's report remarks on the extensive hotel renovations that made the accommodations so improved.

Considering the difficulties of a last minute scramble to relocate people and to keep the conference together, the AWA organizers should be commended for doing the best that they could. Fortunately, the same Marriott staff was running

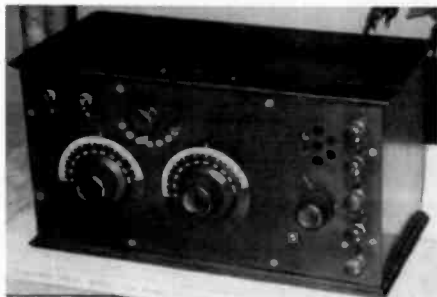

A late arrival at the flea market being swamped by eager buyers.

things, so we saw familiar faces helping out. Also, there was ample parking because there were fewer guests in the hotel.

Naturally, the scuttlebutt everywhere was, "What about next year?" Some said that we'll just have to live with the changed circumstances. Others, of course, see this as an opportunity to fix all the problems with this conference that have existed for years. A.R.C. falls into this latter camp.

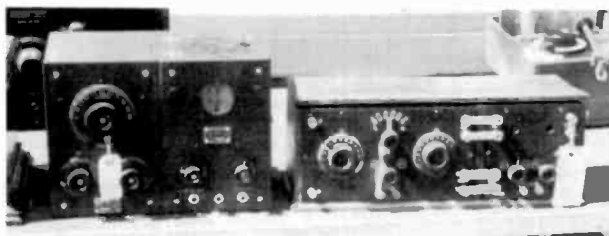

Those problems have been pointed out in previous A.R.C. reports on the AWA conference, but none have been addressed to date. The core issue remains convenience of parking, not just for members but for the encouragement of participation by the general public. A venue must be found that will not require a shuttle bus that drops a casual attendee, who might also be a potential member and buyer, at a forbidding sign saying, "For Members Only... Strictly Enforced."

This Maclite, Type A, 1-tube battery receiver, manufactured in Boston in 1924, was a contest entry.

This early 3-tube radio won a blue ribbon in the contest.

A Westinghouse RC (left) and a Tuska 225, the 2-panel version, seen in the flea market at \$250 and \$500 respectively.

A nice lineup in the flea market. Front: a U.S. Gloritone, left, and two Philco Model 86s. Rear: left, a Majestic 310A and an Emerson tombstone in an Ingraham cabinet.

As we have suggested in past years, the time for compromise with the idea of having the hotel, flea market, and all activities in one place is at hand. If no facility can be found to accommodate everything, then let the hotel component be elsewhere. Most hotels, after all, object to having a flea market occupy their parking lots, so a separate, large flea market space near enough to the AWA's roots in Rochester would seem to be the solution. As we have also said before, because AWA has always in many ways been a success doesn't mean that it can't get much better. Given the hotel change, now is the time.

The "Welcome" sign still lacked even a touch of warmth — though your editor suggested a better wording in last year's A.R.C. report.

Though some may have been disgruntled about the accommodations, they couldn't complain about the weather. It was beautiful — some said "the best ever" — no rain and temperatures in the 70s and 80s. In your editor's annual walk around the flea market on Wednesday noon, 189 vendors were open, about the same as last year but down from the late 1990s. Sold spaces numbered 278, but not everyone was set up at the same time. On Thursday, the number of open vendors dropped to 148, a faster drop than in the past.

Among the rare and unusual items that appeared in the flea market was an early wireless CN-113 offered for \$3,200. Another SE-1420 was priced at \$3,800. Early battery sets were also in evidence; for example, a Federal 61 at \$1,475, a 2-panel version of the Tuska 225 at \$500, and a Paragon IV at \$400.

Stromberg-Carlson as a theme inspired many interesting contest entries. Striking entries were a S-C International Allwave Model AWP-8, an 8-band portable, and a S-C 1924 portable prototype similar to the Model 1B, both seen in photos

on these pages. A Maclite Model B, manufactured in Boston and excellent test-equipment entries also piqued interest.

What sets this meet apart from all others is the number and quality of the seminars. Little did Bart Lee know when presenting his "News for Short-

(Continued on following page)

This 1924 Stromberg-Carlson 199, a portable factory-built prototype, was an outstanding contest entry. Originally owned by Dr. Ray Manion, chief engineer and then President of Stromberg-Carlson, it was used and tested extensively from 1924 to 1928. Handwritten log cards and original blueprints were also displayed.

The flea market overflowed to the grass. Here's something for nearly everyone.

(AWA 2001, continued)

wave Listeners" seminar on the 5th that he would be using his skills only six days later to keep communications lines open at the World Trade Center disaster as we reported last month. Another opening day presentation was the "AWA Members' Forum," an open discussion about the operation and mission of AWA, conducted by AWA President Bill Fizette.

Other interesting topics were "Key and Telegraph," moderated by Tom Perera; "Big' Millen

The annual guided sightseeing tour to the Corning Museum of Glass was a highlight for some on Friday. The museum recently had a \$60 million dollar renovation and was worth a second look by those who had visited it before. A visit to Corning's Rockwell Museum was also offered, as well as lunch at one of several historic restaurants and many shopping choices — a pleasure for family members looking for a break from the radio scene:

Both the Awards banquet on Friday and the finale luncheon on Saturday were well attended.

A Radiola II awaiting a buyer in the flea market.

Transmitter on the Air for 75M Phone AM Operation," presented by Don Buska; "Moonlight Restoration Forum," hosted by Marc Ellis; "A Review of Amateur Operation" with Mike and Bob Raide; and "Pre-1912 Wireless and Electrical Apparatus," moderated by Lauren Peckham.

Unfortunately, tube expert Ludwell Sibley and his wife Marilyn were seriously injured in an automobile accident on their way to the conference, and Lud's seminar on the Stromberg-Carlson Company had to be cancelled. Luckily, an AWA slide presentation on WHIM, the Stromberg-Carlson station in Rochester, New York, was available as a substitute.

We're glad to report that after a lengthy stay in a Chicago hospital and then a therapy period, the Sibleys are back home in Oregon working toward throwing away props like walkers and crutches. Lud reports that he expects to be "back in business-as-usual for next year's AWA — wherever it is."

This unusual Stromberg-Carlson contest entry is an International Allwave portable Model AWP-8 with 8 bands and Taylor Instruments temperature, humidity, and barometer indicators. It is displayed with manuals and a warranty card.

This Federal Model 61 in nice condition had a price tag of \$1,475 in the flea market.

But, of course, the real center of interest always came back to the auctions.

The communications auction, conducted by Ed Gable as usual, is noted for both its amusing banter and knowledgeable comments from Ed, the Ham gear expert. About 52 items were presented, which is about average. Nine were no-sales when they did not meet sellers reserves. However, some buyers reconsidered, as several no-sales were seen to be changing hands immediately after the auction. Total communications auction sales were \$2,300, down 24% from last year.

On Thursday night, the tube auction offered 113 lots, up from last year's 105. However the proceeds at \$6,376 were down from last year's \$9,203. The high-ticket items were WE tubes — a WE-101F and WE-102F selling at \$599 and a WE-350B at \$400. WD-11s sold for from \$32 to \$35 each. No Spherical Audions showed up at all this year.

The paper and advertising auction had several outstanding entries enabling the total of \$4,796.50 to exceed last year's total of \$2,286 by 110%! Highlights were the NBC photo album at \$725, 22 early issues of Radio News at \$575, and a Thomas A. Edison banner at \$425.

Among the highlights of the general auction were a Patterson PR15, with documentation, selling at \$400; an excellent Federal 61 at \$1,300; a Madison-Moore superhet kit at \$1,900; a Mercury Super 10 at \$1,100; a Northern Electric R-4 at

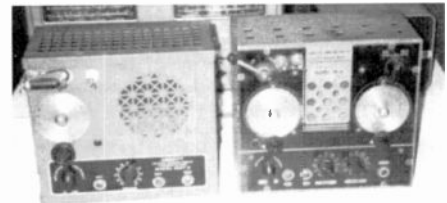

\$1,050; an Atwater Kent 5 on a smaller Atwater Kent board at \$2,250; a wooden Amplion 6301 horn speaker at \$575; and an Amplion AR-114 petal bell speaker at \$725. The general auction total was \$26,134.50, down 23% from last year's total of \$34,029.

The total for all auctions was \$39,607, down from last year's \$48,656 by 19 percent and continuing a downward pattern in attendance and auction activity. Other major meets have not experienced such broad downturns several years in a row, so we can only hope that, as the current Chairman Bruce Roloson has indicated, everything that has been wrong with the meet will be fixed. With the hotel change, the time is right to address all the problems of recent years.

MEET & AUCTION REPORT

Michigan Antique Radio Club Extravaganza 2001 Lansing, Michigan — July 6-8, 2001

REPORTED BY JOHN REINICKE

The Michigan Antique Radio Club (MARC) held its annual Extravaganza at the Holiday Inn South Convention Center, in Lansing, Michigan, July 6-8, 2001. MARC prides itself on having one of the best run and friendliest of the big radio shows, and this year the considerable effort of the board was reflected in an outstanding event.

The weather cooperated with a perfect, cool, sunny day on Friday, and only a few very brief showers on Saturday morning. As in the past, Extravaganza featured a "big top" in the middle of the flea market area with hospitality and table spots for vendors. The attendance was up about 25 percent from last year, and it was obvious that a good time was enjoyed by all.

This meet opens with registration on Thursday evening, a plan which gives everyone a chance to claim his or her flea market space. No selling can take place on Thursday, but the attendees are not at a loss since the first program is offered on Thursday evening under the big top. This year, club President John Reinicke did a presentation on the ins and outs of collecting and using oscilloscopes. After John's presentation, club Trustee Rob Murrell brought out a vintage training movie and a sound projector and the show continued under the big top.

The meet started in earnest at dawn on Friday as the flea market opened. The rather informal dawn start provides the early bird with a chance for some spirited trading and for the opportunity to decide when "dawn" occurs. The result is that not everyone opens at once, and buyers get a chance to move from vendor to vendor as they open up for the day.

This year, the flea market was almost filled, so exploring was particularly satisfying. You could find just about anything from early breadboards to hi-fi equipment. If you wanted a break from the bright sun, you could take in over 40 tables under the big top. A number of new faces were in evidence and several people reported this was their first meet.

In addition to flea market activities, two more programs were offered on Friday afternoon. The programs provided a place to sit down inside, to relax, and to learn something in the bargain. Bill Turner provided information on "Dial Covers, Tube Adapters, and all that Jazz." Club Trustee Rob Murrell once again set up the sound movie projector, and the second presentation consisted of viewing vintage training

Cone speakers dominated this booth.

films. The films made for a bit of "time travel" for the viewer.

Friday evening's Social Hour, open to all attendees, was memorable. In addition to snacks and entertainment, the club held the contest display at this time. The theme for this year's meet was "Radio's Golden Era," and four of the twelve categories were dedicated to this period. Because of the large size of high performance consoles of the 1930s, it is not often one sees more than a few of them; however, there was a substantial number of these multiband sets with large tube complements. Represented were E. H. Scott, McMurdo Silver, Midwest, and, of course, Philco, RCA and Zenith.

Dan Gutowski, club Trustee and Golden Radio fan, presided over the contest. The club is very grateful that so many people are willing to display rare and valuable objects for us all to enjoy.

The John Reece Band featuring Queen Darlene provided entertainment, and feet were tapping to the lively music. We were all surprised when Darlene invited club member Ed Ripley to accompany her on the keyboard. Ed's performance was outstanding, and he joined the band for other numbers as well.

Saturday morning saw a continuation of the flea market activities, and Mark Oppat, club PR Director, provided a very well attended program

It almost looks like "Tent City" at Extravaganza 2001.

on "Radio Repair for Beginners." As a part of the presentation, Mark actually repaired a radio set borrowed from the flea market.

The auction on Saturday afternoon was presided over by club member and noted radio auctioneer Richard Estes, who offered a total of 195 lots. Among the many notable items was a Scott Allwave 23 with expander, sparkling with perfect chrome. Mounted in a Westminster cabinet, it brought the auction high bid of just over \$2,000. The sales totaled a little over \$12,877.

The Extravaganza auction is a "buy-back" auction. They are included in the listing below. (The minimum bid was \$20.) Rather than set a reserve on an item, the owner is permitted to bid on his own item. Thus, the seller is protected and a value can be set for this auction. There was a total of \$2,560 in buy-back items, so, clearly, most items found a new home.

The meet closed on Sunday morning with the donation auction. This is a fun event where attendees can bid on items donated to the club with the proceeds going to help pay for the event. The donation auction featured several items of fair quality and the bidding was quite lively. Don Colbert, club Vice-President, acted as auctioneer, assisted by Rob Murrell and John Reinicke.

Throughout the event, Debbie and Bruce Eddy hosted hospitality, and we all enjoyed the goodies and a chance to relax at the tables. Of course, every day included a 50/50 drawing and a seller's drawing to round out the events.

It is said that Michigan is glorious in the summer, and this year's Extravaganza certainly did its part to make the old adage true.

Buyers find much of interest under the tent.

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

AWA Conference — Comments

Dear Editor,

Like most people I have to work, so I missed the first day (Wednesday), but took off from work on Thursday and Friday. I showed up for the flea market at 6:30 A.M. on Thursday morning. Since I was preregistered for a space, I didn't think there would be a problem. The "guard" at the gate said he didn't have the flea market space paperwork, and I would have to go inside to register when they opened. I asked when they would open, and he said, "7:00 A.M. or 8:00 A.M., I have no idea." The other "guard" said, "Hey, go get us some Krispy Kreme donuts since you have a lot of time." I responded to both appropriately. The AWA shouldn't have people at the gate who are uninformed or obnoxious.

Registration opened at 8:00 A.M. No one could answer why someone who is preregistered has to wait. No money needed to be exchanged, and on the first day of the meet, they had the paperwork outside.

Additionally, everyone I spoke with feels the flea market needs to be shortened to the weekends and that the general public should be admitted.

For now on, my vision of the AWA officials will be like a Krispy Kreme donut — full of fat and lard.

Jon Kummer, Port Washington, NY

Muchow Auction — Comments

Dear Editor,

I read with interest your coverage on the recent Muchow radio auction — one of the most intensive and complex radio auctions ever accomplished. While I understand to some extent your criticisms of the event, several points must be remembered when deciding to "grade" the auction, as you have apparently done.

The job of any auction company is to work to disperse the contents of the consignor, first and foremost. The hall, the format, the days of the event, and the items to be sold were all the decisions of the consignors, with some input from Estes Auctions and me. If we were to have every item tagged as to order of sale, two results would have transpired, neither of which were acceptable. The setup, of which most everyone thought highly, could not have been the same, requiring us to have lots arranged by order of sale, since not all of the help had total knowledge of what every item looked like. This would also mean that we could not have the sale at Hemmens, since we would then definitely not have had enough room. I think the "AK Wall" was one of the coolest sights anyone has ever seen at an auction!

The fact that we did not have an all-inclusive catalog resulted from two situations — one, that the printer was very late with the product. When it was found that five pages of text and some photos were missing, there was no time to rectify the situation. Also, even then we did not wish to have an all inclusive list because this took away the ability of the Muchow family to add items later to the auction, which benefitted the buyers. Some of the great paper showed up during the setup! I am curious to know

More on the AWA Conference

Just got back from Rochester this afternoon. Got there about 6 P.M. yesterday and enjoyed seeing familiar faces. The biggest disappointment was the hotel. I have had reservations since June. I received a note from Marriott that the hotel had been sold, but my reservations would be honored. I called two weeks ago to confirm and was told there were no problems. When I got there last night, no room. We ended up staying at the Marriott on the other side of town. I heard from many other attendees very similar stories. Very aggravating!

Other than that, the meet was a bit smaller than normal but bargains abounded.

From an Internet posting by Donald Cochrane

I just got back, too... day trip, no hotel thank goodness!

I agree. Things seemed sparser than in the past but I wasn't far into things before the bargains were to be had... I also had a great time talking to many Internet contacts... and eBay doesn't include that in its dealings... there are a lot of nice people in our hobby.

So I left very happy, with a lot of nice projects for the winter.

From an Internet posting by Keith Park

just what a "country auction" is compared to other auctions I have attended. In any case, this auction was conducted with professionalism and in my opinion was a great success. The consignors are happy, the buyers had a chance to buy great equipment, and I personally am very happy to have had the opportunity to work with the Muchows and Estes Auctions.

Though I am only a consultant for Rich, he has been great to work with and listens carefully to criticisms, for the benefit of all the attendees. Hopefully, this note will give you readers an idea of the total scope of such an endeavor. And if anyone knows of a radio-related "country auction" coming up, let me know, cause I'm a goin'! Thank you,

Bob Dobush, Consultant, Estes Auctions

As we said in our report, Richard Estes "deserves accolades for an outstanding job of communicating and tabulating information during the auction." However, with a year to prepare and the knowledge that many from all over the world would attend, the additional cost of preparing and printing a comprehensive catalog would have paid for itself. More buyers might have come, and those who could not come could have placed more informed bids. And, the preparation of comprehensive catalog would not preclude displaying and auctioning the items in any order desired, or adding items at the last minute.

I, too, would attend a radio "country auction" almost anywhere, and my use of the term was not meant to be derogatory. It simply indicates the difference between the auctions that we are all used to at estate sales and radio meets and a more comprehensive approach expected by long-distance attendees and bidders. (Editor)

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors do occur, upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." U.S. stamps or cash are OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. *Antique Radio Classified* welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and non-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Since artwork is reduced to 63% in the printing process, originals must be the artwork size listed below. Do not send in artwork on art board or send negatives. Ads should be typeset or typed neatly with a carbon ribbon, black ink (not pencil) on white. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Photos should be at an 85-line screen; otherwise, add \$16.00 per photo for screening. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for	Cost for	Cost for	Cost for	One Time

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: **Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike: for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D, r and n; 6, b and G; V, U, u, v and Y; A and R, 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, and to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See a so Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET— 10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET**, etc. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

To encourage varied content of the ads, the same classified ad may be run only once per issue and for only two consecutive months. (To run an ad longer, use a boxed classified or display ad.)

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE***

29¢ per word for extra words over 20 plus

10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47¢ per word plus

10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

40¢ per word for all words,* none free, plus

10¢ per word for each bold word plus

10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

50¢ per word for all words* plus

10¢ per word for each all-caps word.

Non-Subscribers:

Add 20¢ per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing (If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE**, etc., count as **one word** each time used in an ad. **Name, address and (one) telephone number**, count as **6 words**, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

RESTORATION VIDEO!

Come along as a 1936 Philco is transformed from "flea-market-find" to working, museum-ready show-piece! Along the way, you'll get basic tube theory, basic receiver theory, plus learn to trouble-shoot your set, test voltages, rebuild Bakelite-block capacitors, repair an old lacquer finish without stripping, and much more. For beginning- and intermediate-level restorers, or any old radio lover!

run time: 115 minutes

A GREAT GIFT IDEA!

The Old Timer's Bulletin Back Issue Library on CD-ROM

The Antique Wireless Association

The entire run of *The Old Timer's Bulletin* (*The OTB*) from Volume 1 through Volume 37 (1960-1996) available on two CD-ROMs. Set up for use with Acrobat Reader 4.0, each page is scanned full-size at 300 dpi resolution so pages are crisp and clear, and look very much like the originals both on the screen and when printed.

**Volume 1 — The OTB Volume 1, No. 1 (January 1960)
through Volume 25, No. 4 (March 1985)**

**Volume 2 — The OTB Volume 26, No. 1 (June 1985)
through Volume 37, No. 4 (November 1996)**

Each CD-ROM also contains a searchable index covering *The OTB* and other AWA publications through February 2000.

**Volume 1 — \$49.95 • Volume 2 — \$49.95
Buy Both Volumes for — \$89.95**

Runs on both PC and Mac.

A free copy of Acrobat Reader 4.0 for PC is included on each disc. Mac users may download a free copy of Acrobat Reader from Adobe at www.Adobe.com.

System requirements: 486 or Pentium processor, Microsoft Windows 95 or 98, minimum 8 MB RAM (16 MB recommended) and 10 MB available hard disk space.
