CAN THE BEST GET BETTER?

REA created the first Riders CD-Series. Now we introduce "THE" CD that no radio restorer, repair-person or historian should miss! We proudly introduce the Radiotron-Cunningham Complete Perpetual Troubleshooters Manual published in 1933 by John Rider on a single high resolution CD-ROM

This CD runs with Windows on a PC. It holds 2,767 pages of very high resolution scanned schematic diagrams of all of the early radios from 1920 to 1933 when this publication was produced. This was the fore-runner to the famous 23 Volume series that John Rider produced of early radio schematics and that REA made easier by scanning and putting it on 6 CD-ROM's. This CD has the entire Radiotron-Cunningham publication with an accurate index and even a bonus of radio set information that can be used in identifying no-name or model number radio sets. This CD will show the most minute parts values as each page was scanned at 3 times the resolution of our original Riders CD-series. Early set restorers know about parts values whose value is unreadable. We also know of the site on the internet where one can find some "free" schematics that are worthless because you can't see the values. So we felt that with the new technology that is available that the time had come to perhaps make the best really get better. This CD is not a replacement to our database driven 6-CD set, but an addition to it to improve the quality of the images to get even the smallest unreadable characters magnified on the screen for easy reading!

A must CD - Only \$ 85 postpaid USA, \$ 95.00 export

Other CD-ROM Publications:

Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)

CONTACTING ANTIQUÉ RADIO CLASSIFIED. All correspondence should be sent to:
A.R.C., P.O. Box 2, Carlisle, MA 01741.
Only UPS, FedEx, etc. items to street address: 498-A Cross Street.
Telephone: (866) 371-0512; Fax: (978) 371-7129
E-mail: ARC@antiqueradio.com
Web: www.antiqueradio.com

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

EDITOR'S COMMENTS

Nineteen is a ripe old age for a small specialty magazine, and so we take pleasure in inviting you to share in our anniversary celebration. Though these are troubled times, we like to think we are a source of stability to the radio collecting community who can count on us as a source of information and camaraderie. We hope you'll stay with us for the big bang 20th anniversary in June 2004 and beyond.

Anniversaries always prompt retrospection and an assessment of how many changes have taken place. Without question, the biggest change has been the success of the Internet. But, most recently we've been struck by one of the negatives of that success — the proliferation of spam e-mail. Articles in publications like the *New York Times* and elsewhere have indicated that everyone remains at a loss as to what to do about this frustrating problem.

Our best answer at the moment is to urge you to observe the following suggestions in order to help us to differentiate your message from the more than 2,000 spam messages we receive daily:

First, make sure that your subject line is clear and descriptive, something that we can recognize as radio matter. A single word like "ad" or "help" could get by the weary reader. Be more detailed and explicit. Second, avoid attachments, unless there is no other way to communicate with us. If you must send attachments, let us know ahead of time. Third, watch for a confirmation of your ad and notify us if it doesn't arrive.

Finally, please send your e-mail only to ARC@antiqueradio.com. Any other address could be missed amidst the spam maze. Sometimes we long for the good old days of the straight U.S. Postal Service. Maybe that's why we appreciate the one-on-one contacts collectors still enjoy, such as radio meets.

In fact, radio meets are great treasure hunts. For example, recently at the New England Antique Radio Club meet in Nashua, N. H., the colorful cover on a 1927 magazine caught my eye, thanks to Frank Bequaert of Bequaert Old Books. It seemed the perfect cover for our anniversary issue, since the magazine had published from 1883 to 1936. A 50-plus record is one we'd like to match.

But, the cover was not the only lure. Even more exciting was the subtitle "Radio Number" and the back cover with a full page ad for an Atwater Kent Model E speaker. The cartoons and short, humorous articles related to radio made this a must purchase.

The subject matter of the cartoons is an interesting mix of past and present. Grebe is no longer around, but the Yankees and Detroit are, as is the "Battle of the Centuries" (read Sexes?). And how about headphones in use at the opera? It might be a challenge at one of today's meets to distinguish them from an Apple iPod MP3 player.

But, we're sure John Hagman, who reports on the latest NEARC meet in N. H., would be up to the challenge. John proves once again that one-day meets

continue to be successful.

The cartoons in the 1927 issue of *Life* also depict a life-style that seems ripe for the advent of the 1930s portable radios in Phil MacArthur's interesting article. These are the predecessors of the pocket transistor radio and the boombox. Summertime makes it easy to relate to the pleasure these sets brought to leisure hours on the beach or the front porch.

Doug Fox also takes us back to earlier forms of pleasure for radio hobbyists — homebrewing, which is a rarity today. In those good old days, Doug's 3-tube AC-powered regen was a good entry level set for a new enthusiast who could build a receiver from old parts.

Among the more striking items in *Photo Review* this month is an unusual pair of code keys, manufactured in the mid-1960s by Robert Enemark, a well-known shortwave radio collector. It would be interesting to know if there are any more of his keyers still out there.

Our intrepid reporter Ray Chase, who never saw an auction he wouldn't attend, reports on another Estes auction. Estes auctions generate a lot of excitement, and there are more scheduled, so watch for announcements in A.R.C. In this one, a number of items sold for over \$1,000, including Atwater Kent breadboards. The grand total was \$62,000.

Brian Belanger reports on the second part of the Rodger Nye estate auction. The third part is scheduled for June. These auctions serve a noble cause — support of the Radio-Television Museum in Bowie, Maryland. Nye was instrumental in launching an endowment fund for the museum. Such generous donors do much to preserve the history of radio.

Radio Miscellanea contains news, both good and sad. We're sorry to report the deaths of two avid radio/TV collectors — Danny Gustafson and Andy DuBois. They would have appreciated the support shown our avocation and A.R.C. by other letters on the page. Keep those letters coming.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: a toll-free number, (866) 371-0512; the Web: www.antiqueradio.com; Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U. S. by book rate; and to current subscribers, a ten percent discount on all book orders.

Coming Radio Events. With summer coming on in full swing, events are multiplying. Be sure to get to at least one of the 44 meets and two auctions in June.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

The colorful cover of the September 22, 1927 early *Life* magazine with the subtitle "Radio Number" was too good to ignore for our anniversary issue cover. The caption "The Man at the Switch" suggests the male chauvinist temper of the times — times that some would say haven't fully changed. Cover: Copyright 1927 Life Pub. Co.

WITH THE COLLECTORS

Life — 1927 “Radio Number”

BY DOROTHY SCHECTER

The following article has an underlying message — when you go to a meet, don't hesitate to tell a dealer what you're looking for, if he doesn't already know your interests. When Frank Bequaert of Bequaert Old Books in Fitzwilliam, N.H., called out to me at a recent meet, “John, you'll like this,” he was absolutely right. Dealers like Frank know their stock better than you do and can lead you to finds that give the old thrill that motivates the search. (Editor)

Radio meets are wonderful discovery places. You just never know what will show up that sparks a memory or excites the imagination. This time at the April New England Antique Radio Club (NEARC) meet in Nashua, N.H., what caught the eye was an old *Life* magazine with the colorful cover, now on our cover. It has the provocative subtitle “Radio Number” and is dated September 22, 1927. How could the editor of a contemporary radio magazine resist?

Our research indicates that this early *Life* magazine was published by the Life Publishing Company in New York City from 1883 to 1936. Its connection, if any, to the later *Life* magazine we all know, is not clear. However, the year the early *Life* ceased publication — 1936 — was the year that Henry Luce and his colleagues at Time, Inc. in Chicago, Ill., created what Luce called the “picture magazine.” This *Life* ran weekly until 1972. From 1972 to 1978, it ran in semi-annual reports, but since then, it has been published monthly.

EMPHASIS ON HUMOR

The general tenor of this 1927 issue is humor, as demonstrated by the cartoons reproduced on these pages. We particularly like the solution for husbands who hate opera but are obliged to attend. Or how about the husband's response to his wife's inquiry about how he likes the soup she made from a recipe on the radio — “I can taste the static.” Or the drawing that captures

The Humane Society puts radio headsets in opera boxes for husbands who hate opera.

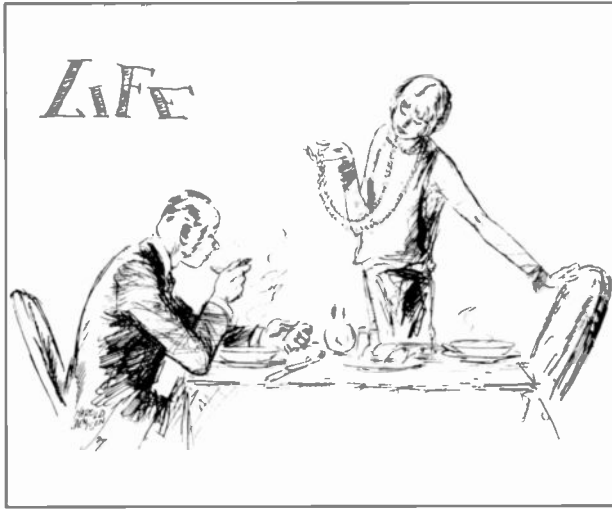

the sophistication of the 1920s era with the family elegantly dressed lounging around the set topped by a large speaker. The exception is Father with his big cigar who stands as if in charge, and the caption is “The Speaker of the House.”

Another cartoon is captioned, “The Battle of the Centuries.” The eight frames follow a marriage proposal scene in which the nervous Jack really doesn't have a chance of escaping this lady and her family members who are eavesdropping. The scene is “described” over a loudspeaker as if being broadcast to the world.

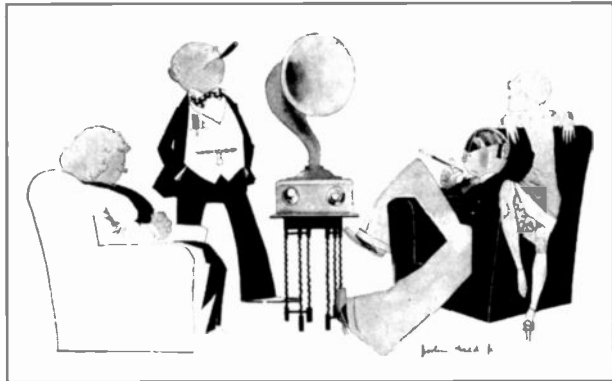

On another page, there is what can only be described as a “playlet” called “Freedom of the Air,” broadcasting the meeting of a few senators with some radio men who

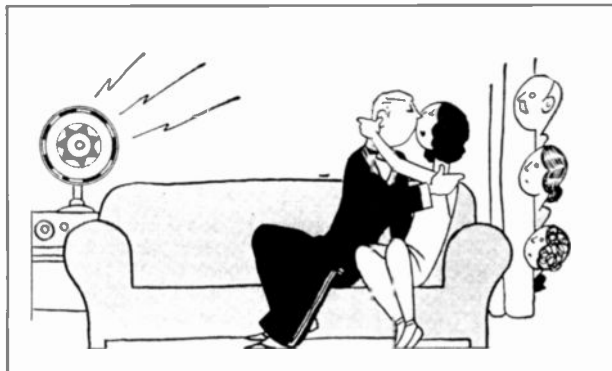

The Triumph of a Grebe Testing Room Engineer. He discovers a Grebe Radio a fraction “off” in tone. (Three of eight frames)

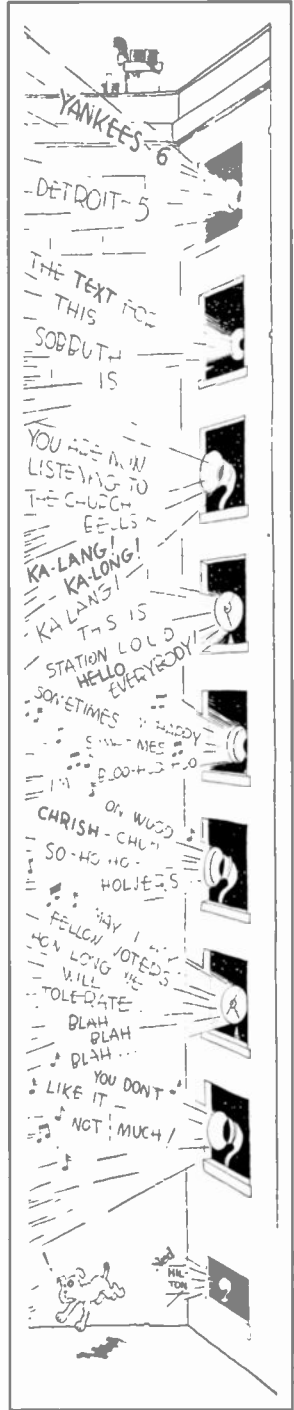

Bride: How do you like the soup, dear? I got the recipe over the radio.
Her Husband: I can taste the static.

The Speaker of the House.

The Battle of the Centuries. ... "He closes in fast! ... He plants a hard right to the face... they clinch..."(Frame #4 of 8 frames.)

The Day of Rest.

(Continued on following page)

(Life Radio Number continued)

have asked for a hearing about wavelengths. Once the senators have heard wavelengths defined, they will be able to tell the radio men how many they can have. But, of course, the subject is never really addressed, as the senators get distracted by their complaints about song requests they had made that were ignored. The author of this piece is Marc Connolly, a noted playwright of the times.

ARTICLES AND ADVERTISING

Here and there, articles unrelated directly to radio are included. One is a drama review section by Robert Benchley, another well-known writer of the day. Another entitled "Is Your Town Safe?" is really an ad for the Metropolitan Life Insurance Company. The article is in the nature of a public service piece about accident prevention, but the insurance company urges you to send for two booklets on safety, one to keep and one to give to the mayor of your city.

On the other hand, advertising is the life-blood of any publication. Naturally, the ad department of any major radio manufacturer of the day would opt for the back cover of *Life's* 1927 "Radio Number." And Atwater Kent did just that with a full-page ad for a Model E speaker, touting its sensitivity "to the least tonal vibration." The price "with 9 feet of flexible cord" was \$30 (slightly higher west of the Rockies and in Canada). In addition, the ad lists 12 radio stations in cities across the country that carry the Atwater Kent Radio Artists Sunday evening summer shows. Who were those "artists"?

A full-page Grebe Radio ad features an 8-frame

cartoon following the "Triumph of a Grebe Testing Room Engineer" as "He discovers a Grebe Radio a fraction off in tone." The products featured are the Grebe Natural Speaker, selling at \$35, the Grebe Socket Power, at \$50, and the Grebe Synchronphase Seven, at \$135.

Life also ran an Alibi Contest weekly. The rationale for the contest was that alibi-making had become a "national pastime." After viewing the picture of the week, contestants would complete the sentence beginning with, "Well, you see, it's this way..." in 25 words or less. First prize was \$50 for the most ingenious conclusion.

For this issue, "Alibi Number Forty-one" was, of course, radio-related. In the picture, Father, who had always scorned radio, was caught tuning in. Three family members challenge him. Not having the next issue of *Life*, we can't know what the winning alibi was.

Perhaps Frank Bequaert will find the answer for us among his many treasures. Now that he knows how much we care, we're sure he'll be on the lookout. Meanwhile, we urge all of you to ask around — to "network" — for your radio interests. You too may find that gem you've been looking for all these years. As the *Life* motto goes, "Where there is *Life*, there's hope."

New England Antique Radio Club Spring 2003 Meet

BY JOHN HAGMAN

Thanks, again, to John Hagman for this personal report on another New England radio meet. (Editor)

As is my habit, I attended the NEARC meet on April 26, 2003 in Nashua, New Hampshire. This meet is again being run by Sue and Marty Bunis of guidebook fame, who founded it years ago. Joe Coco and his wife who chaired until recently did a good job of breathing life into a gathering which had recently appeared to be withering. But Marty Bunis boasted yesterday that the never too popular July meet will sell out — something that hasn't happened in years, if ever. It's great to have these enthusiastic legends of the hobby back in the saddle.

I stayed as usual at Motel 6, whose internet rate is just too good to resist. I could leave Vermont at 4 A.M., and avoid staying over, but that's just too taxing. It was already enough of an ordeal lugging two tables full of massive Hickok sweep generators and other heavy metal stuff from the van in the steady drizzle.

I arrived at 7:20 A.M. and about half the hall was set up. It was 8 A.M. before I had my two Airline consoles playing and my tables priced and arranged.

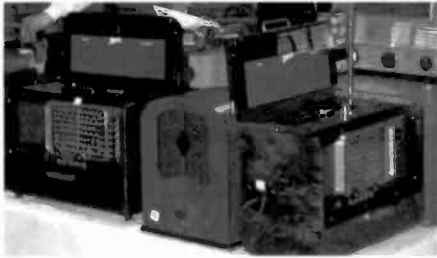

I was annoyed in the parking lot by a couple of swap jackals who don't feel it's a bargain unless they buy it out of the van. Actually I concluded they linger outside, buzzing around vans like gnats attacking arriving campers during the Very Early Admission period (\$15) until 8 A.M. when the admission price drops to five bucks.

This Radiola gets a close inspection from a potential buyer.

It's such a whirlwind getting everything all out and arranged, at least when you have literally half a ton of stuff to sell as I did. I should mention I bought out a collection in the fall that consisted of more than 100 pieces, mostly fixer uppers, parts sets, and lots of test equipment.

I sold a bunch of stuff right away, and about 8:30 found a second to enter my Supreme tube tester and Jackson 1" oscilloscope in the contest. In addition to "Big" and "Little Tubes," and "Painted Sets," there was a "Service Equipment" category. I had recapped the

Examples of the "good stuff," including two nice portables.

Jackson, and had a transistor radio feeding it an audio signal so the screen wasn't just a flat line. The Supreme is a nice walnut paneled emissions tester in a leatherette case, from the fat-pin era. It was also working, with a Globe 27 fired up while on display. I mislabeled what button to push to test the tube, but someone fortunately corrected this for me. There was also a neat TV service console, and in the tube section, a giant transmitting tube all aglow nearby.

I got a chance to shop a bit around 9 A.M., and found a nice horn (for a lonely Magnavox driver base I have) for a mere \$20. I also had to pick up a couple of 6E5 eye tubes, which I buy at every meet, as these just aren't getting cheaper.

And I visited Joe Coco and picked up some capacitors. He has had some 8 and 16 mfd capacitors custom-made because he actually has a lot of customers who don't like to use 10 and 22 mfd replacements in a radio. Their reason is that the original engineer specified 8 or 16. It made me giggle — I had used a 100 mfd. at 400-volt capacitor recently to replace a 16/25 for an audio cathode bypass. His custom caps were very reasonable, though. I bought a bunch of the 16 mFd at 450 v for a dollar a piece.

There was also a bunch of rough low and middle end wood radios for sale fairly cheap, but as I have quite a few of these in the queue already, I managed to resist them. I did really want a very early Hickok tester (only two sockets) that looked like a work of art, but the fellow wanted \$500 for it which I thought a bit steep.

By 11 A.M., I had sold my Airline 1104 console, and about 500 pounds of stuff altogether. I probably erred selling a few items too cheap, but it's been a good deal of work sorting, cleaning, and lugging this stuff, so I was

A wide range of test equipment was in abundant supply.

still happy to see it go. Besides, I've bought enough stuff at swaps that was under priced by over burdened sellers. I see it as appropriate karmic payback. I do the same now that I have plenty too much to sell.

What remained at the end of the swap is the techy stuff that should sell well at Hosstraders hamfest the next weekend. So all in all, it was a great success.

Sometime before noon, I noted I'd won 2nd prize in the contest — the TV repair station got 1st. I also ended up selling the 1" scope to someone who had fallen in love with it. I have a 1" Hickok oscillograph still, so again I felt I should share the wealth.

Too many people started packing up at 11 A.M. for my taste, as usual. The Bunises had sent out cards to the general public advertising the show as lasting until noon, and I saw some people about that time to find the hall nearly empty. I didn't have my van reloaded until after 1 P.M., and noted with satisfaction my suspension travel had increased from two inches to well over four inches with the 500 pounds of sold items.

"I wonder if any of these work," might be the thought in this onlooker's head.

I thought of how far I've come as a collector in five years, to the point where I think in terms of pounds when selling — hundreds of pounds! I got a dollar a pound on average, not bad for a bunch of ancient test gear and a few battered radios.

Thanks to Sue and Marty for putting on another fine show. More of you should come to this one (that means you, Uncle Peter). I did have a chance to meet Sven, who took off pretty quickly probably thinking I looked busy. He should know I don't go to meets to make money, but to make friends and influence people.

I reserved a table for the July 26th NEARC show. See you there!

(John Hagman, "On the West Coast of New England," or 190 Park St., # 2, Burlington, VT 05401)

John Hagman is a Vermont "radio archeologist" with a talent (or weakness) for barn and basement dwelling radio orphans. His specialty is AC high-end wooden sets. 1930-1940. <http://home.att.net/~yanny>

The New England Antique Radio Club (NEARC) publishes "The Escutcheon" and holds swap and sell meets quarterly. Dues are \$14 a year. For membership information, write to Bob Andersen, P.O. Box 201, Spofford, NH 03462. bandersen@rfd.org

WITH THE COLLECTORS

The Picnic Portables of the Late 1930s

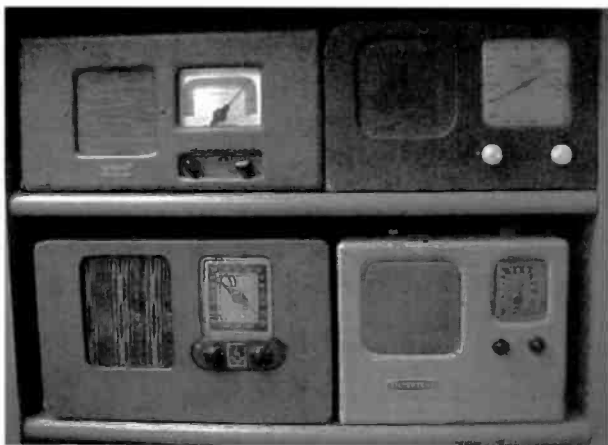

BY PHIL MACARTHUR

By including "picnic" in his title, Phil MacArthur conveys a real sense of the place portables have had in American life. We associate them with times of fun and relaxation in the days before the boombox and Walkman took over the scene. What a marvel of invention portables must have seemed in their day to everyone. (Editor)

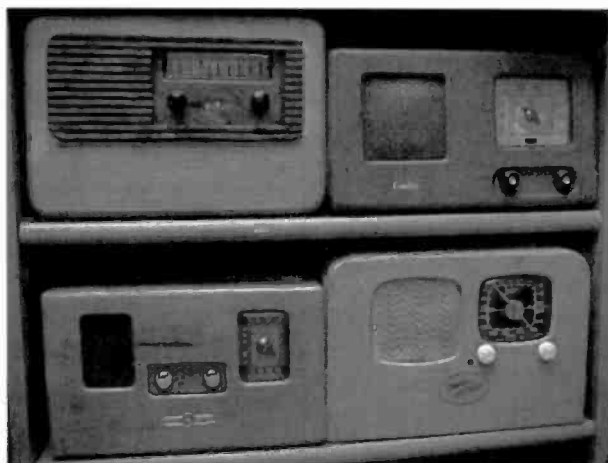

In his 1991 work *The Portable Radio in American Life*, M.B. Schiffer leads us through fifteen years (1923-1938) worth of false starts for the portable radio. The real boom came only after the blossoming of high quality programming during the 1930s, the proliferation of high power stations, the development of Sylvania's low drain radio tubes (1A7, 1H5, 1N5, 1A5 etc.) in 1938, and the growing interest in the events unfolding in Europe in the late 1930s. From mid-1938 to the end of 1939, the number of models of true portable radios grew from perhaps a dozen to over 150.

The cabinet of choice for these portables was most often airplane or suitcase cloth of a striped tweed design. These radios were used at the beach, on roadside picnics, in boats, or at the camp so they had to be easily cleaned and had to survive the bumps and scrapes of every trip. Cloth-covered and sometimes leather-covered wood worked well, and many of these radios still look nice after 60 years.

My collection (I'm blaming Mr. Schiffer here) has about 40 of these gems, mostly of similar size (12" x 8" x 6") and weight (5 lbs, plus another 6-10 for batteries). There is a wonderful diversity of escutcheon design and dialwork, and I have included pictures of the extremes. Many of you will be able to guess the makers just these clues. The casework is quite varied,

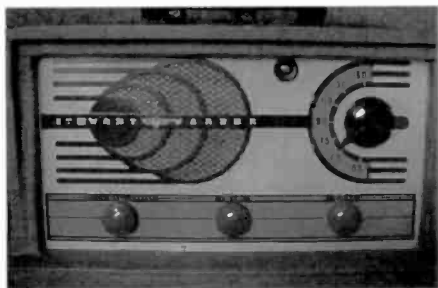

On the top row, left, is a Sky Chief and a Truetone Four 4BF. On the bottom row is an Emerson EA357 and a Silvertone 290.

The top row, left, displays an Olympic 6A606 and a Grebe. On the bottom row are a GE and a Zenith 5G604.

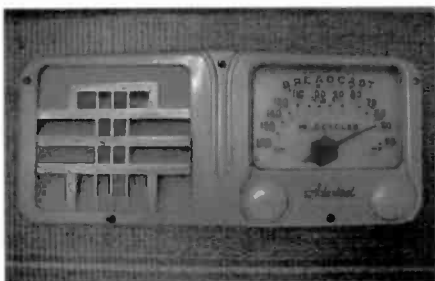

with various colors and spacing of stripes overlaid on backgrounds of tweed in dozens of patterns. However, if the Catalins are at the extreme of

A tie in my "personal award" winning faces is the Stewart-Warner 9007A at the left, and the Stromberg-Carlson 1105 at the right.

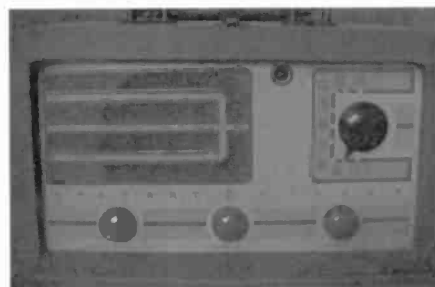

Majestic's 7P420 receives the "best slogan" award for "Mighty Monarch of the Air."

This Admiral P6 gets my award for the "fanciest face."

One of the "personal award" winners is the brass escutcheon on the Mantola L35XG6.

Shown in this photo is a 6-tube Stewart-Warner Model 9007F. This luggage-style portable was manufactured in 1946.

design impact and color, these picnic portables are the conservative country cousins.

Electronically, there is very little difference with a few exceptions. Several makers included a Wavemagnet antenna (Zenith's trademark) to improve reception in buildings and vehicles. Some included such touches as headphone jacks, a momentary contact dial lamp switch, a front panel battery/line switch, and a shortwave operation (most notably the Trans-Oceanic). Many includ-

ed the 1700 Kc police band, and most were "universal" sets, allowing three-way operation: battery and 115-volt AC or DC.

The only really different approach to universal operation I found in a Remler Scotty Model 93. Nine tubes are present providing two separate radios on one chassis — 35Z5, 35L6, 12A8, 12SK7, 12SQ7, and then 3Q5, 1N5, 1H5. 1A7 — all in a compact 11" x 10" x 7" case. What fun! I wonder if there are any similar examples out there.

My personal award winners are the following:
(Continued on following page)

(Picnic Portables, continued)

Best Slogan: Majestic, "Mighty Monarch of the Air." Most Serious Radio: Zenith Trans-Oceanic Clipper (duh!). Deco Face: a tie between the Stromberg-Carlson 1105 and the Stewart-Warner 9007A. Grille: the embroidered sailboat on the Zeniths of the period. Escutcheon: the all-brass Mantola L35XG6. Fancy Face: Admiral P6.

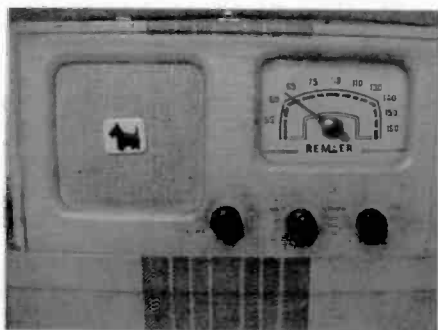

E-mail me with your entries. Heck, SELL me your entries. I realize the overall beauty contest would be taken by the Radiola 24, but that's another era, not to mention another article!

(Phil MacArthur, 701 Spanish Main #71, Summerland Key, FL 33042)

Phil MacArthur, an engineer, teaches mathematics at the Florida Keys Community College in Key West. An antique radio collector since 1955, he enjoys hearing from other collectors at keywestmac@cs.com.

This is a Remler "Scottie" 93. Remler radios featured a Scottie dog on the front of their sets..

Here is the typical chassis of the "picnic portable" radios, this one for the Remler Scottie 93.

This photo shows approximately 20 of the "Picnic Portables" in my collection. On the top row, left to right is a Zenith 5G401, Admiral P6, Mantola R661, Firestone Roamer S-7426-7, Majestic 7P420. On the 4th row down, at far left is a G.E. Beamascope, which is similar to the one used by Western Electric as the platform for the very first transistor radio. Next to it is an unusual Zenith with the upside down Bakelite chassis (5419) in a tweed case. This chassis is more often seen in a varnished wooden case.

RESTORATION TOPICS

A 3-Tube AC-Powered "Regen"

BY DOUGLAS D. FOX

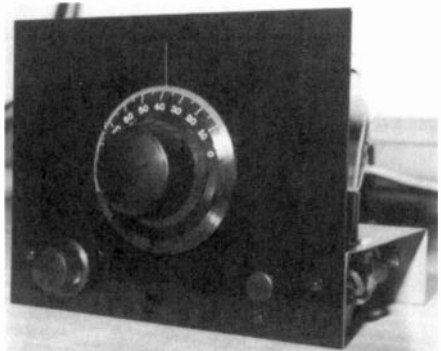

During the 1930s, the regenerative receiver was very popular with entry level radio builders. Usually, these sets were battery-operated. This 3-tuber is an AC/DC set with a floating ground. Like any AC/DC set, the usual safety precautions should be observed. The use of an isolation transformer is recommended. (Editor)

I acquired this interesting 3-tube AC powered regenerative radio about three years ago from another collector. The set uses two Type 37 triodes for the regenerative detector and audio amplifier. A third Type 37 is connected as a half-wave rectifier (grid and plate are tied together). A resistor line cord is used to drop the line voltage to about 119 VAC, and the heaters of the three tubes are connected in series.

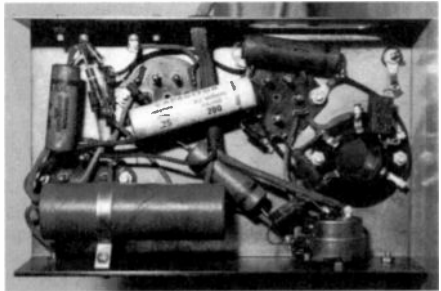

The tuning circuit is very simple, employing a single gang tuning capacitor and a plug-in coil for the Broadcast Band (BC). The BC coil was the only coil supplied with the set. The radio uses a regenerative detector in which the volume control adjusts the amount of regenerative feedback.

There wasn't much to be done to restore the radio. After thoroughly cleaning the radio, I removed the front panel and repainted it a gloss black. The filter capacitors were replaced. After the set was reassembled and tested, it turned out to be a good performer on local Chicago metro stations, picking up several with enough volume to drive a high impedance magnetic cone speaker. The set has not been tested on shortwave, since no SW coils were available at the time of this writing.

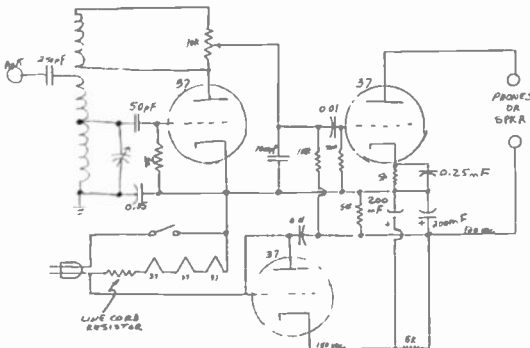

I have no idea of the origin of the radio, but I do not think that it was home-brewed. Why? Because all holes, both in the chassis and front panel, are factory punched. It also seems that there was provision for more than one coil, since they are plug-in. There are no markings or any indication of a manufacturer any-

The front panel of the 3-tube regenerative radio.

A view looking underneath the chassis of the 3-tube regenerative radio.

Schematic diagram for the 3-tube regenerative radio.

where on the set. Perhaps this was a training kit for a correspondence course? If anyone has information on this radio, please contact me directly. Thanks!

(Douglas D. Fox, 603 S. 12th Ave., St. Charles, IL 60174)

Doug Fox is an engineering technician for CX2 Technologies, Inc. in Burr Ridge Ill. He has had an interest in antique radios that goes back to his junior high school days. Among his collecting interests are battery radios from the 1920s, early AC sets, Philco cathedrals, Bakelite table radios, and early hi-fi gear.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

CUTTING & WASHINGTON TELEDYNE – This 1925 receiver was manufactured in Minneapolis, Minn. It has a regenerative circuit using four Type 199 tubes. Inside are the original batteries. (*Ross Mason – Mason City, IA*)

AGA CRYSTAL SET – This 1926 crystal set was made in Sweden. It has variometer tuning inside its wooden case and jacks for two headphones. (*Erwin Macho – Vienna, Austria*)

MARCONI TYPE 22-B RECEIVER – This 2-tube receiver was manufactured for British naval use. Connected by buss wire on the left is the Type 229-B long-wave panel. Connected in the same way on the right is the Type 227-B amplifier. (*Jim Taylor – Bournemouth, England*)

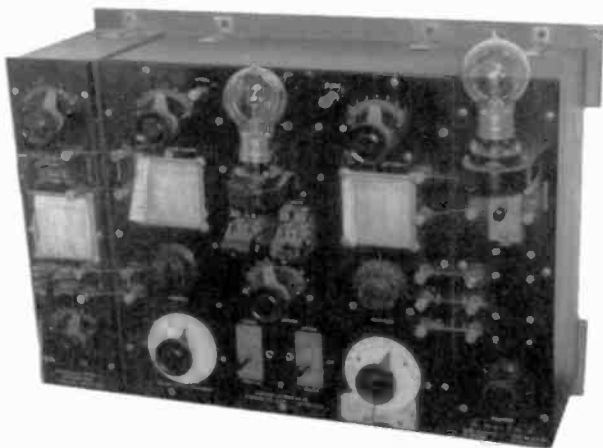

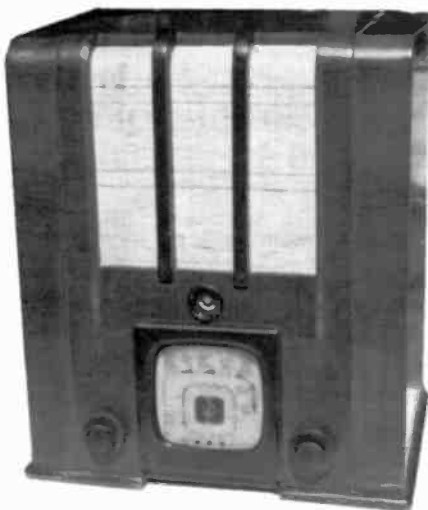

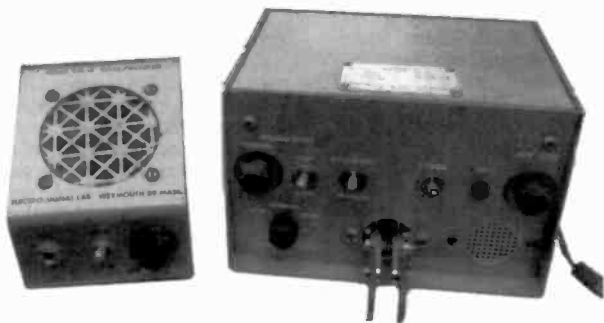

PHOTO REVIEW

ATWATER KENT MODEL 627 – This 1933 cathedral has a 7-tube superheterodyne chassis and features automatic volume control. It stands 19" tall and 15" wide. I found it with the dealer's operating instructions still attached behind the knobs. (*Dave Crocker – Mashpee, MA*)

PHILIPS MODEL 324N – This 7-tube, wooden cabinet tombstone was manufactured by the Philips Co. of Holland in the late 1930s. It tunes from 530 KHz to 22 mHz in three bands. It has an 8" PM speaker and uses Type EF3 as RF and IF amps, Type EK2 as converter, Type EBC3 as detector, Type EL4 for output, and Type AZ1 as a rectifier. The "magic eye" is a Type EM4. (*Carlos Queiroz – Buffalo, NY*)

ENEMARK KM-1 AND EK-1 TRANSISTOR CODE KEYERS – I designed the two transistor code keyers shown in this photo in 1964-1965. Model KM-1 on the left has tone and hi-low volume controls. It keys transmitters using a large reed relay. Several dozen were sold to Hams through *QST* ads, but at \$19.95, the profit potential was minimal. The Automatic Keyer Model EK-1 on the right uses early integrated, dual-2 input nand-gates (Fairchild mL914), 2N2926s, and 1N276 diodes. It has a full speed range, adjustable make-break ratio, variable side-tone, dash memory, reed relay keying, and included a Brown Brothers, built-in paddle as shown. This prototype was priced out to sell at \$99.95, but the investment needed for its production was too high to be practical to compete with a Waters product. I have used this one-and-only keyer in my Ham station for years, and it still works very well! (*Robert E. Enemark – Duxbury, MA*)

AUCTION REPORT

Estes Auction Seville, Ohio – September 21, 2002

REPORTED BY RAY CHASE

Richard Estes Auctions of Seville, Ohio, seems to be the premier radio auction house, (they did the 3-day Muchow auction in Elgin, Illinois), so we decided to take a look at one of their specialty radio auctions held in Ohio. Advance advertising indicated that some very rare and historic items would be included, some from a collector in Hawaii. Upon arrival, we were somewhat dismayed to find an old barn behind a farmhouse as the auction site, and I mean a really old barn! Outside were about nine tables of "low-end radio stuff" — boxes of tubes, chassis, parts, etc. The forecast was for storms, and, although there were tarps about, I wondered how these goods would fare through the night.

Inside the barn was just as rustic as the outside; old church pews had been arranged in sloping tiers for seating and old carpets covered the dirt floor. However, the range and breadth of the radios was outstanding. No less than six Atwater Kent breadboards; Paragons, early DeForests, Grebes, hosts of really nice cathedrals, tombstones and consoles, about 20 microphones, about 25 crystal sets, over 50 speakers of all types, many good tubes, parts books and paper. Items were coming in Friday evening and even Saturday morning. In all, over 750 lots were auctioned, not counting the

Shown here are some of the items sold: a DeForest SP-500 selling at \$1,200, a Marconiphone 1 tube receiver at \$300, a Paragon Type VI at \$350, a DeForest/Crosley Model 51 at \$100, a Kodak "microphone" speaker at \$450, a black Neutrodyne, complete with tubes and caps, at \$350, and an RCA Radiola III-A, with tubes, at \$105.

"cheap stuff" outside.

On Saturday, a good crowd turned up. Although most of the license plates were from Ohio, buyers came from North Carolina, West Virginia, Louisiana, Pennsylvania, New Jersey and other states. The outside goods sale started at 8:30 A.M. They had suffered some water damage from a fierce storm that passed through during the night. Many lots sold for one or two dollars, and tubes were sold for almost millipennies each when one considers the size of the box lots and the sale price. Many of the buyers' pick-up truck beds quickly filled up.

At 10:15 A.M. inside the barn, Richard Estes started the sale of the good stuff, and he worked nonstop until 4:30 P.M. when he was relieved. The sale ended at 5:45 P.M. The auction moved right along at 100 lots per hour and each item was well described and displayed. Prices were generally fair and reasonable and there was no buyer's premium. Really good buys were occasionally to be had, especially if you stayed to the bitter end. There was good quality and quantity and no re-

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

serves that sometimes keep items from being sold. The total realized from this sale was in the order of \$62,000, much better than all of the recent AWA auction sales. Estes has some interesting auctions coming up so it will pay to keep an eye on their schedule in A.R.C. ads.

Approximately 50 sales are not listed either because they were missed or were very low in value. Prices are rounded down to the dollar.

AUCTION REPORT

Nye Estate Auction and Sale Davidson, Maryland — March 30, 2003

REPORTED BY BRIAN BELANGER

Rodger Nye of Columbia, Maryland, was an unusually enthusiastic radio collector. An FCC engineer prior to his retirement, he lived alone, and attending auctions, estate sales, and flea markets was his chief form of entertainment. After three decades of collecting, his home was filled with radios. In some cases, Rodger had two or three examples of the same radio, especially Philcos, which he dearly loved. There were dozens of pieces of test equipment — oscilloscopes, signal generators, tube testers, VOMs — and shelves filled to overflowing with parts and chassis.

Rodger was a major supporter of the Radio-Television Museum in Bowie, Maryland, operated by the Radio History Society. He made a generous contribution to launch an endowment fund for the museum and made two challenge grants soon after the museum was established. He provided the funds to purchase the impressive Philco neon sign that hangs just inside the entrance to the museum.

Rodger died last year after a long illness. He had willed his entire radio collection to the Radio History Society, along with a sum of money to be used for our building fund. In recognition of all that Rodger had done to encourage the museum, the Board of Directors voted to name the 1930s room "The Nye Room," as his favorite radio era was the 1930s. Several of his radios now grace that room, including a Philco grandfather clock radio of which he was particularly fond.

PREPARING FOR THE SALE

We rented a 26-foot truck and located suitable storage space. It took a large crew of hard working volunteers three days and five truckloads to transfer all of Rodger's radio items. Obviously we

David Willenborg and Don Ross admire an RCA console prior to the auction.

could not keep all of the collection. While there are many beautiful radios, including Catalins and cathedrals, that we are adding to the museum's permanent collection, there were hundreds of items that were duplicates or were not in good condition. We have been busy sorting through these items and deciding what to keep and what to auction.

Proceeds from auctions like these provide critical operating funds to pay for insurance, utilities, building rent, exhibit materials, and new acquisitions. At the same time, we are getting our excess radio items into the hands of collectors who will enjoy them.

We scheduled the first Nye estate auction in October, 2002, and held this, the second one on March 30, 2003. The third is scheduled for June

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

An auction attendee carefully scrutinizes a Model 46-1201 Philco "Bing Crosby" radio/phonograph.

22. The auctions are held at the Davidsonville Family Recreation Center, Davidsonville, Maryland (between Annapolis, Maryland, and Washington, DC).

The weather was dreadful the day of the March auction — snow showers most of the day, which probably discouraged some from attending. Nevertheless, nearly 100 people showed up, from as far away as Florida. Prior to the start of the regular auction, we sold dozens of box lots and inexpensive single items that nearly covered the floor of the hall. At first, they were \$10 per box. When business began to slack off, we dropped the price to \$5, then \$2, and finally, \$1 per box. A few remaining boxes were given away free.

Auction prices were generally quite reasonable, and attendees commented that they were pleased that they had come. The auction moved along quickly, with 150 items crossing the auction block (not counting the box lots mentioned above) in roughly two hours.

The listing below is not complete, but rather provides examples of the wide variety of items sold and prices.

For more information on the Museum, future auctions, and tube sales, check our website: www.radiohistory.org

(Brian Belanger, 5730 Avery Park Dr., Rockville, MD 20855-1738; bcbelanger@aol.com)

In March 1999, Radio History Society President Ed Walker and the City of Bowie signed a long-term lease agreement for the Radio & Television Museum, located in a fully restored turn-of-the-century building at 2608 Mitchellville Rd., Bowie, MD 20716. Open Saturday/Sunday from 1:00 to 4:00 P.M. and weekdays by appointment. Admission is free; donations are accepted. Tel: (301) 390-1020; Web: www.radiohistory.org. For more information: Brian Belanger, Curator, at the above address.

A potential buyer peruses the goodies to be auctioned during the preview time.

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

Hooked on A.R.C. and Radio

Dear Editor:

I look forward to every issue of A.R.C. I guess you could say I'm hooked. I've been at this radio thing for about seven years, and it looks as though it's only getting better. I love making these relics from the past warm up and come to life again. Wow! I need to get a real life! Keep up the good work.

Bob Snively, Richmond, IN

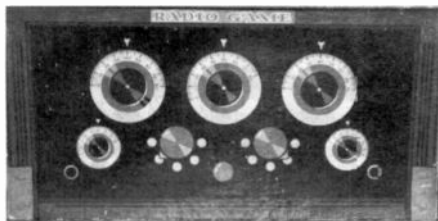

Hams Should Find A.R.C.

Dear Editor:

Since TAP stopped circulation of *Amateur Radio Trader*, there should be an opportunity there for A.R.C. TAP thought that they could make a fortune with upgrading the publication. Apparently, they did not recognize that it was a specialty market that would not support such an approach. On the other hand, A.R.C. is not well known to many Hams and has few ads designed for the Ham radio community. An opportunity for you?

L.C. Cutright, Dallas, TX

Yes it is. In fact, A.R.C. advertises in several ham magazines which are among our best sources for new subscribers. (Editor)

Radio Game

Dear Editor,

I found this "Radio Game" at a rural farm auction. It was made by Milton Bradley in the mid-1920s

First, you draw cards that have city names and that town's radio station call sign printed on them. The object of the game is to deliver messages to the cities on your cards. You then advance on a game board by chance to those towns to deliver your messages. The first player to deliver 11 messages to 11 towns is the winner.

The cards also list each station's frequency, not in kHz, but in meters..

Claude Chafin, Independence, MO

Great Articles

Dear Editor:

Keep up the good work! Your publication has great articles for the nontechnical historian like me.

Will De Vries, Dixfield, ME

Alton A. DuBois, Jr. — 1918-2003

Thanks to longtime subscriber Harry Goldman, who sent an obituary from the April 13, 2003, *Post Star* of Glens Falls, N.Y., we have learned of the passing of Alton A. (Andy) DuBois, Jr., on April 10, in Glens Falls. Andy was a frequent contributor to *Antique Radio Classified*, most recently of amusing vignettes about his life as a radio-TV serviceman before and after World War II. He was always eager to share some piece of radio information and often corresponded with our technical staff.

Andy was born on July 27, 1918, in Byram, Conn., and graduated from the Eastchester High School in 1939. His interest in radio began with a job after school working for an engineer for 10 cents an hour. In 1940, he enlisted in the U.S. Combat Engineers, but re-enlisted on December 5, 1941, and served in the 711 Railway Operating Battalion. He retired from the RCA Service Co. in 1981 after 32 years of service, and he became a founding member of an RCA Retirees Club.

We extend our sympathies to the DuBois family. Andy's contributions to A.R.C. will be missed. (Editor)

Danny Gustafson — 1942-2002

Many of you know Danny as a TV collector. I knew him as a good friend. Danny was a longtime member and past president of the Antique Radio Club of Illinois. He also was the owner and founder of Gustafson-Shields Advertising Agency in Chicago. His partners, employees, customers and friends were his family. His collecting passions were early television, almost anything RCA, and many other things, including vintage autos.

At a young age, he taught himself how to repair televisions, and by age sixteen, he sold and serviced Philco and RCA television sets. It was a great pleasure to him when he appeared on "The Today Show" during a celebration of TV's 50th anniversary and when his collections were featured in *Forbes Magazine*.

Danny loved nothing better than an evening with friends discussing politics or his latest find, or telling jokes. In fact, we had one of our recent dinners at our favorite Chinese restaurant before he passed away. He will be greatly missed.

Burby Janov, Des Plaines, IL

Article Kudos

Dear Editor:

I received the following brief note from John C. Capron, Lathrop, California, regarding my article "Radio Row — The Other Side":

"Thanks for the great article in A.R.C., the February 2003 issue."

Gene Katz, Mount Laurel, NJ

Even a response of a few words is most welcome. (Editor)

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. **Do not** send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay, therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests, add 15% but call first. Clubs write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a slash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital l and the small L.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET— 10th of the month!

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

Classified Ad Rates per Month

Subscribers:

- First 20 words: FREE*
- 29c per word for extra words over 20 plus
- 10c per word for a shaded ad (count all words including free words).
- * Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47c per word plus
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

- 40c per word for all words * none free, plus
- 10c per word for each bold word plus
- 10c per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

- 50c per word for all words * plus
- 10c per word for each all-caps word.

Non-Subscribers:

- Add 20c per word to above costs.

*Three words can be bold-all-caps at no extra charge

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

EXTRAVAGANZA '03

Hosted by the Michigan Antique Radio Club

July 11 & 12, 2003

Holiday Inn South Convention Center
6820 S. Cedar Street, Lansing, MI 48911
(517) 694-8123

Come join us for our 18th annual convention

This year we are proud to honor a remarkable period of design. In 1925 the "Exposition Internationale des Arts Decoratifs Industriels et Modernes" held in Paris, would celebrate and define style for the next two decades. Radio design was profoundly influenced by the style and the result would be some of the most desirable sets. Come celebrate this remarkable era with us.

ART DECO

HIGHLIGHTS:

RADIO RESTORATION PARTS

Vacuum Tube Repair Wafers

These wafers are solid-state devices for quick and easy repair of early vacuum tubes. The wafer is installed by simply sliding it over the tube pins and reinserting the tube into its socket. If the filament is intact but there is little or no emission, the filament may be lit for best visual effect. However, the tube can be open filament.

No change in radio operating voltages is required. Any number of tubes may be repaired in a radio. If wafers are installed on all tubes, the B+ voltage typically may be reduced without sacrificing volume or sensitivity. Performance will vary between radio models. For best results, order one (1) "D" detector wafer for each radio. **\$10 each (3 or more, \$7.50 each)**

Complete Auction & Appraisal Service*

“The Donald Rosbach Collection” Vintage Radio Collection

Saturday, September 20, 2003 at 10 A.M. EDT
at the Expo Auction Center, 8157 Garman Rd.,
Burbank, Ohio, Exit 204 off Interstate 71

Estes Auctions is pleased to offer the collection of Donald Rosbach of Canton, Ohio for auction. Don collected early radios and crystal sets as well as amateur radio receivers. Everything in his collection is in pristine condition. He also has a nice assortment of tubes and other items. In the following weeks we will be taking photos of Don's collection for our website. There are several nice Federal radios in his collection. We will have flyers at the summer meets in Michigan, Elgin & Rochester. Also watch A.R.C. for our announcement on a super auction from New York State that may be combined with the Rosbach auction.
