CONTACTING ANTIQUÉ RADIO CLASSIFIED. All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.
Only UPS, FedEx, etc. items to street address: 498-A Cross Street.
Telephone: (866) 371-0512; Fax: (978) 371-7129
E-mail: ARC@antiqueradio.com
Web: www.antiqueradio.com

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest from its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

"Global" is the operative word today, and far be it for radio collectors to be out of sync. For one thing, our club activities are, indeed, global, as articles in this issue attest. From the annual AWA meet in upstate New York, to a museum exhibit in Florida and a 25th anniversary jubilee in Australia, radio activities are alive and well. Even our cover photo of a Stromberg-Carlson and its world map of time zones reflects the international scope of our avocation.

The AWA Conference has always had an international following. Swiss collector Max Bodner, a regular attendee, is pictured this month with a prize acquisition. And Alan Carter of Croydon, England, was presented a Special Recognition Award for his twenty unbroken years of attendance. Max, Alan, and everyone else who gathered in Rochester, New York, enjoyed all aspects of this well-organized event. Though the four-day rain forecast put a damper on the flea market, vendors still managed to do well between showers. Note the photo of Jim Moneghan's empty table.

Photos of the flea market and contest show a range of unusual items on display. Though the auction proceeds were down a bit, the good news was that Marconi lives — his bust went for \$1,500! The seminars and banquet were well attended, so, as always, this conference is worth planning to attend.

On to Australia to join our fellow collectors, at least in spirit, for the Historic Radio Society's celebration of its silver jubilee. Richard Begbie paints a sweeping picture of down-under radio collectors gathering from the far corners of that vast land to pay tribute to vintage radio. Every period of radio history was on display, a well-organized auction was a highlight of the weekend, and the banquet and entertainment were first class.

Of note was the flea market which was open to the public who were eager buyers of nostalgia and were in awe of what had survived the passage of time. U.S. clubs take note: in addition to new buyers, this open door policy led to new memberships.

On to Florida where new memberships were also a welcome result of the Jacksonville An-

tique Radio Society's exhibit at the Jacksonville Beaches Museum and History Center. A club that makes this kind of effort to attract the community to radio collecting does much to encourage the preservation of radio history.

Of course, the same is true of those who engage in restoration projects. Mike Biddison reminds us of the pleasure of rediscovering his Troy 75 and then bringing it back to life.

In a similar vein, Roger Schreuer describes the reawakening of old memories in his letter to Walt Lindenbach, author of the Heathkit scope story in the December 2006 issue. A happy memory is always worth sharing.

Unfortunately, a not so happy memory will linger forever for Herb Sollman as a result of the loss of everything, including his collection, due to a Kansas flood. Though we report most often on good radio times, Herb's story stands as a reminder that the worst can happen in the face of natural disaster.

Memories are an integral part of radio history, and Art Redman's article on Oregon's first radio station may well evoke a few for some of Portland's senior citizens. The Northwest Radio Manufacturing Company, the subject of Art's earlier article, supplied the equipment for Station 7XG. Once again, one article leads to another, and that's a plus for us all.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, www.antiqueradio.com; books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders.

Coming Radio Events. The big event for us here in the East is Radio XXXIX on February 17 in Westford, Mass., which is organized by A.R.C. We look forward to seeing you there. In addition, there are three auctions, 10 meets, and 27 meetings listed this month. Be sure to make at least one of them.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Ken Lowther entered the handsome Stromberg-Carlson International Model AWP-8 on our cover in the AWA old equipment contest. Not only is it an all-wave, portable, 8-band radio, but it is topped by a time-zone map, and contains Taylor weather instruments. His display also included the manual for the radio and the weather station.

OOPS!

The January issue of A.R.C had hardly landed in your mailboxes when we received e-mails from both "Irv" and "Ian" Sanders correcting the attribution of the Heathkit article on page 13. The article was written by Irv, not Ian. Our apologies to both.

AUCTION REPORT

Antique Wireless Association Conference and Auction Report Rochester, New York — August 22-26, 2007

REPORTED BY RAY CHASE WITH CONTRIBUTIONS FROM LARRY BABCOCK,
JIM MONEGHAN, JOHN V. TERREY, AND THE AWA

The 46th AWA conference was held August 22-26, 2007, at the RIT Conference Center, Rochester, New York, and followed the schedule initiated last year. Registration opened on Wednesday, and though vendors could park in the flea market area, selling was not permitted until the grand opening on Thursday morning. The main auction was on Saturday, leaving Sunday for a museum tour.

Flea market preregistration was for 210 spots, exceeding last year's numbers; however, the forecast for rain for all four days was an obvious deterrent to attendance. On Thursday, for example, there were probably only two 1-hour periods when the rain let up. Unfortunately, there were numerous flea market no-shows.

Nevertheless, the 496 registrants enjoyed the indoor sessions, and A.R.C. for one did very good

Jim Moneghan from Rhode Island, touts his old radio wares in the flea market. Rear, left to right, is a Western Electric 4-D, a Federal 57, an AirWay Type F and a Federal panel set. In front, left to right is a Western Electric 7-A, a Crosley 51 and a Clapp Eastham DD.

business in the "Book Fair" room just off the lobby. In past years we have set up both indoors and outdoors, but the weather always has the last word.

New this year was opening the flea market to the general public, though it was not advertised as such. Still, this is a step in the right direction, as it encourages wider interest in radio collecting. It also created a friendlier atmosphere, as there were no hired security guards checking badges at check points as in the past. Of course, AWA membership was required for a flea market table and for entrance to all the meet events, and this year that privilege was extended to ARRL members. In all, AWA is increasing its outreach to potentially new members who will be the future of this great avocation.

The meet started with a bang on Wednesday as members gathered to register and then to

Left to right, Bill Timoszyk, Ken Nevins and Tom Kordowski in the flea market — during a break in the rain, all are smiling.

join in a "Mixer" with a cash bar and hors 'd'oeuvres. Tom Perera's seminar on Phil Weingarten's replicas followed and was well attended. Many brought examples of replicas built by Phil and, to the inexperienced eye, they look surprisingly authentic. However, it's always a concern that once a replica gets sold, a future inexperienced buyer might purchase it as an original. On the other hand, any collector who purchases a significant item should be experienced enough to recognize a replica.

Other seminars were also well received. Peter Yanczer can always be relied on to bring in an interesting television topic. This time it was TV in 1928. Alex Magoun offered a broader view of TV historical history in a later seminar.

In keeping with the theme of "One hundred Years of Electronic Communications," Lauren Peckham and Felicia Kreuzer moderated a discussion and display of items shown by members. This theme is so broad that the club incorporated it into the usual standard contest categories, rather than have a separate contest theme. The contest, in turn, had very good participation, and one observer called the number of early and unique items displayed as "fantastic."

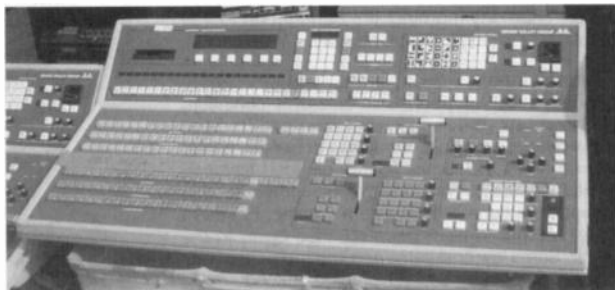

Though there were fewer flea market vendors than last year, some collectors thought that the quality of the items offered was better. For example, Jim Moneghan reported seeing several very nice early battery sets, as well as five Federal 57s. Furthermore, he found a vacuum tube that he'd been looking for over 20 years — a real success story.

Jim also touted the Book Fair as one of the highlights of the show because it offered so many quality paper items from folks like Jerry Simkin, Ray Chase, and A.R.C. It was a great place to gather with old friends for an old-fashioned chat.

The museum was open for two-hour periods on

Jim Moneghan's selections and prices must have been right on target — all items were sold!

Not everyone collects only the receiving end of radio and television. This video mixing console was for sale in the flea market.

both Thursday and Sunday. Though it will take a few years to make the transfer of all the items from the present display building and the Annex, the museum's new home will be right across the street from the current Annex. The new facility is much larger than the old and is handicapped accessible.

THE AUCTION

The auction on Saturday was once again conducted by Richard Estes assisted by his brother John and by Bob Dobush who organized the tube portion. Starting at 8:30 A.M., all three sections — tubes, paper and equipment — were done in that order.

The number of lots offered was fewer than last year by about 20 percent, and the total realized was about \$32,300, down about 15 percent. Interestingly, the highflyers were specialty items, such as a Weingarten Fleming valve replica, selling at \$1,900; a bust of Marconi, at \$1,500; a Ducretet spark coil at \$1,550; and a Rockwell KWM-380, at \$1,600. Individual prices seemed to be on the low side. By conclusion at around 2:30 P.M., about 325 lots had crossed the block.

AWA auctions peaked in 1997/1998 and have been on a

(AWA Conference continued)

steady decline since then. They currently yield about one-half the volume and value as they did nine or ten years ago.

However, this is still an enjoyable meet where camaraderie is a primary ingredient. The accommodations continue to improve, but the hotel rooms still have a way to go to transition from college dormitory standards to hotel standards. If only the weather would cooperate, the conference could be as successful as in the past.

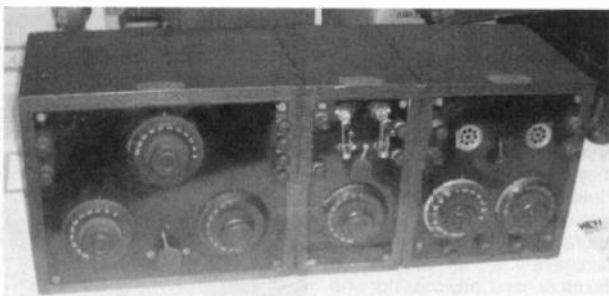

Next year's dates are August 20 to 23, continuing with the shifted schedule which places the flea market opening on Thursday morning, the banquet on Friday night and the auction on Saturday.

Abbreviations: e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, N.O.S.=new old stock, N.I.B.=new in box, wk=working, nwk=not working, WT=with tubes, NT=no tubes, BB=brass based, gf=good filament, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons, WE=Western Electric, HC=hard cover. A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

This 3-panel set from was part of Bob Dobush's exhibit of Cleveland, Ohio, area radios in the old equipment contest. The set consists of, left to right, a tuner, a double crystal detector and a 2-stage audio amplifier.

Bob Dobush also included this Carco (Carter Mfg. Co.) crystal set in his display of Cleveland area radios.

Ray Chase has been a radio enthusiast and a collector of many types of radios for years. Currently, he specializes in World War II electronics equipment, as well as early battery superheterodynes. He also has an extensive collection of radio documentation and ephemera.

MEET AND AUCTION REPORT

The Historic Radio Society of Australia Silver Jubilee Melbourne, Australia — April 2007

BY RICHARD BEGBIE

The following report shows that the radio folks "Down Under" know how to put on a great show. As our Australian correspondent Richard Begbie describes it, this 25th anniversary was a significant milestone for Australian vintage radio enthusiasts. (Editor)

It was April 2007, and they came from all over the country — the tropical north and the deep Tasmanian south, from the bush and the cities, from Sydney and Melbourne, Brisbane and Adelaide, Hobart and Canberra. Gathered in suburban Melbourne was probably as representative a group of our society as has ever come together. Over a magic weekend around 200 society members celebrated the Historic Radio Society's 25th birthday, with activities dear to every

A stunning display of Dick Howarth's Deco speakers from the 1920s.

A re-creation of a typical "Down Under" radio and battery shop from the past with brand names that are familiar to U.S. collectors as well.

vintage radio heart.

U.S. readers may be surprised to learn that from a population base less than a tenth of the USA's, our premier society has a membership close to 1,100. Local meetings are well attended, and for this event, members thought nothing of driving a thousand miles down the eastern coastline to our southern-most mainland city.

The weekend began convivially on Friday evening at a nearby hotel ("pub," in Aussie parlance). Weary travelers were soon engrossed in nonstop conversation over a drink or three, and a festive air augured well for what was to follow.

THE HISTORIC RADIO DISPLAY

Saturday morning introduced most of us to the main venue, a magnificent conference centre with terrific facilities. Just to walk in was an experience. Contributors had laboured long and meticulously to produce a magnificent display of historic radios in almost every conceivable aspect. Fine examples of virtually every phase of period radio were laid out in logical timeline and intelligent groupings.

Provenance and ephemera were often as fascinating as hardware. In almost every case clear and vivid interpretive text brought to life some of the finest historical material from around the country. Wartime and communications sectors were not neglected, and some of the specialist displays were simply absorbing.

Along one wall adjacent radio and battery "shops" had been expertly set up, with a wealth of period material and some of the more eye-catching Australian Bakelites of the 1930s. Nearby, Ian Johnston's display of spark era technology took us back to the beginning. A fine display of 1920s broadcast gear was complemented by Dick Howarth's stunning array of Deco cone speakers of that period. Buford Chidester would have been proud.

The Bakelite, plastic, portable and transistor eras were well represented by fine exemplars, many of which brought nostalgic gasps from visitors. The adventure of outback radio was another crowd-puller, with Brian Lackie's well-presented Traeger outfit a real feature. And just when you thought you'd seen it all, you discovered the "Sound Lounge," a display celebrating the era when the console ruled in Aussie living rooms. Continuous period programs, courtesy of an in-house transmitter, lent authenticity.

THE AUCTION

A well-organised, brisk auction in the centre's main theatre attracted

An "Infradyne" kit set from 1926 which sold for \$525 (\$472.50 U.S.).

nearly 150 bidders for the 300-plus items on offer. Cameras in the pre-auction display room threw giant images of each item onto a screen behind the auctioneer, saving the time-consuming business of bringing every item to the auction table, as well as providing clear images for even the most shortsighted among us

A full house saw most items make reserve, though the day's top bid of \$2,750 (\$2,475 U.S.) on a rare Kriesler grandfather clock radio did not. It was sold privately after auction, while auction sales totaled \$21,000 (\$18,900 U.S.). The event owed much to

(Continued on following page)

This impressive E.H. Scott "Allwave," ca 1935, won the "Best Display in Show" award.

An Australian Navy Crystal set, ca 1914, from a large prewar radio factory in Sydney.

(Silver Jubilee, continued)

auctioneers Arthur Courtney and Mike Eager, as well as the camera operators in the display room.

THE ENTERTAINMENT

Saturday evening brought around 80 together for the dinner, which for all who attended was a real highlight of the weekend. The menu was first class, the company congenial, and the entertainment terrific.

Old-time ventriloquist Ron Blaskett, an early star of Australian television, shared highlights of his career and his brushes with famous names in the Australian entertainment industry. His alter ego Jerry Gee finally appeared, and to everyone's delight was joined briefly by another "dummy" (HRSA President Mike Osborne) for a tour de force to end Ron's performance.

Next morning saw stallholders setting up early for a flea market which offered something for everyone. This was opened to the general public, who surprised everyone by buying up big, before moving on to the various displays on offer. People's nostalgia, enthusiasm and even astonishment at just what had survived were palpable, and led to quite a few new memberships.

Meanwhile, in the auditorium, our New Zealand life member Peter Lankshear headed a Q & A session, along with Mike Osborne and restorer Mike Justin. The fluency and lack of hesitation Peter showed in answering the most arcane of technical questions was, to say the least, breathtaking.

The entertainment for the public, as well as for members, rolled on with a Tony Maher-inspired "Portables on Parade" event. If not quite the Christian Dior catwalk, it was a fun hour of nostalgia, with a string of portables from the 1920s to the 1950s playing manfully to a light-hearted crowd. Some wonderful film footage from radio's Golden Age brought what had been a truly memorable and fitting celebration to a close.

Younger members, as well as optimistic older ones, are already anticipating our 50th!

(Richard Begbie, Woodend, RMB 113, Bungendore 2621, Australia. E-mail rb@bordernet.com.au)

Richard Begbie lives on a farm near Canberra, Australia, where he divides his time between merino sheep, writing, and a fascination with unusual broadcast receivers, from crystal sets to consoles. He is a columnist for the "Canberra Times," which he describes as Australia's nearest thing to the "Washington Post."

This extremely rare Kriesler grandfather clock radio failed to meet its reserve price.

RESTORATION TOPICS

The Upside of Moving Rediscovering a Troy 75

BY MIKE BIDDISON

Discovering a radio treasure can sometimes happen twice. Mike Biddison describes his lucky re-find as a result of another family move. (Editor)

After a lifetime habit of moving, I can readily say it ain't no picnic! But once in a while, as in this latest move from Southern California, an unexpected treasure turns up. In this case it was an artifact I didn't remember I had, so it was like finding it for the first time!

In the final stages of settling in to our new home, during a fit of unpacking several dozen paper wrapped objects, I came upon this unusual table radio, a 1936 Troy, manufactured in Los Angeles. See Figure 1. I can barely recall purchasing it, but I must have at some point in the past, and I could see why I did. Stylish arced lines in the grille gave it a "War of the Worlds" look that was reflected in the dial logo as well. Impressed into the metal plaque on the back of the chassis, was the model number 75, as shown in Figure 2.

THE AS-FOUND CONDITION

The 5-tube layout was conventional with one notable exception, which I will get to. There were three knobs — volume, tuning and a high-low tone switch. The cabinet had been refinished, albeit carelessly, exhibiting some obvious runs in the spray toning, and the toning color was a cordovan red, which did not quite match the walnut tinted veneer on the front of the cabinet.

In addition, the grille cloth had been replaced with something the restorer may have found in his wife's sewing box. It was an abstract brown and gold pattern that would look good on a couch or a large throw pillow. However, when used in small measure as a grille cloth, it was vaguely confusing.

Despite these defects, I was immediately in love with the Troy. Behind the glass-covered dial face loomed a figure that might be described as a spaceman from heaven! He

Figure 1. The Troy 75, ca 1936, with its stylish cabinet design and unusual dial.

Figure 2. On the rear of the Troy is the nameplate showing the model number "75" and the watts as "40." (Note: These areas on the nameplate have been enhanced so these numbers can be seen more clearly.)

had a Buck Rogers helmet and lines like wings radiating from his shoulders. In the middle of the figure, a lighted space shone with the dial positions, as shown in Figure 3. I have since learned from the Bunis *Collectors Guide to Antique Radios* that the design probably depicts a Trojan warrior carrying a spear, but I prefer to think of him as a man of the future, 1930s style.

It appeared that the radio's electronics had been somewhat casually restored in the not too distant past, and I did have to attend to certain overlooked details that affected its performance.

(Continued on following page)

RESTORATION DETAILS

First, I discovered that the speaker had been replaced with a permanent magnet, or dynamic type, not common in the 1930s. This speaker was buzzing, so I figured that since the original was not available, I would replace it with something that sounded good. I settled on a 4-ohm, 4-inch car audio speaker, with good bass response. See Figure 4.

The previous restorer had installed a choke to replace the field coil of the original speaker, so no further circuit modifications were necessary. The audio improved immensely, but an annoying hum arose with the increased bass. The hum was still there with the volume down, a clear sign of filter cap problems.

The original filters had been replaced, so after a bit of head scratching, I looked to the schematic for answers. Turns out the previous casual restorer had placed one of the filters to ground instead of to the center tap of the power transformer, thereby effectively taking it out of the circuit. I made the simple adjustment, and the hum went away.

At this point a new problem arose. I noticed that when I turned up the volume, there was a howl, followed by lots of hum and distortion. It happened across the dial. I examined the barely legible schematic that I had downloaded off the internet for clues. Maybe a bad bias resistor. Aha! There was a thumb-sized battery cell on the grid of the Type 75 detector/audio tube, which obviously no longer provided voltage! This battery was the infamous Mallory bias cell. The 1930s acorn-sized battery had been used to provide bias to the first audio, something that I had not run across until recently in my dozen years of collecting.

Just two weeks before, I had visited Cliff Berthelsen at his radio warehouse in Merced, California, the city to which my family and I had just moved. Cliff, a member of the Central Valley Chapter of the California Historical Radio Society, claims he has a mere 150 or

Figure 3. The Troy dial face with its elaborate design, depicting what may be a Trojan warrior or perhaps a spaceman.

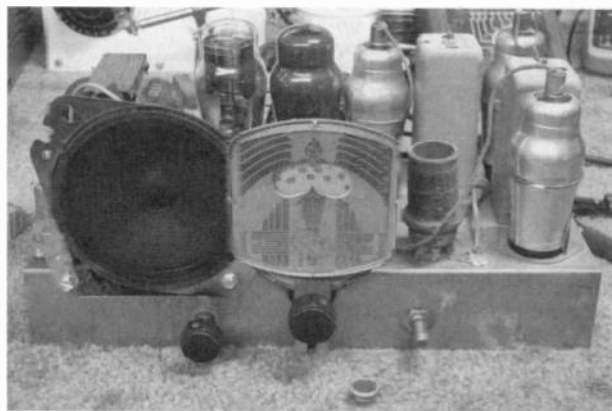

Figure 4. The 5-tube Troy chassis showing the replacement speaker and other components. The small 3v battery is in the foreground.

so radios as such, but the whole story is that there are thousands of radios and related items stuffed into that small warehouse.

Cliff can, after some deliberation, put his finger on everything in there. While I was visiting, he showed me a tray full of tiny bias cells and associated holders that came out of 1930s period radios. Cliff said the cells produced about 1.5 volts, and he showed how he rigged replacements.

Until that time, I had never seen one of

these things, and now here they were. I inserted a AAA sized battery into the Troy circuit, and the sound immediately improved. Unfortunately, a AAA battery looked a bit out of place and would be difficult to hook up as well.

The answer to the dilemma was at my local RadioShack. There I found a lithium watch battery, just about the right size to fit into the battery holder with no modifications other than tweaking the spring to clamp onto the slimmer battery case. See Figure 5. It was a 3v but seemed to work as well as the 1.5v with only a slight reduction in volume. And because it was lithium, it would be five years before I had to replace it!

The Troy sounds good now, and looks OK, despite its naïve finish and grille cloth. I think I will leave it alone for a while, displaying it in a prominent place, so I won't forget about it again.

(Mike Biddison, 2959 Atlantic St., Merced, CA 95340)

Mike Biddison first came to love old radios in college in the 1960s while DXing with a World War II era Zenith console. He has since worked in commercial radio for 25 years, and embraced collecting as a hobby in 1994. He now repairs pro-audio and vacuum tube electronics in California.

Losses to Flood — Federal Disaster #1711

BY HERB SOLLMAN

Yes, it happened again. We thought Katrina had done it all, but as we all know, Mother Nature is relentless. In our September 2006 issue, we told the story of Pete Van Waesberge's devastating losses to Katrina, including his treasured radio collection. Now we learn of Herb Sollman's losses in July 2007 to Federal Disaster #1711 in Kansas. Herb's notice to us of his change of address led to this account. (Editor)

In response to your inquiry about what has happened here after I asked for a change of address, I appreciate your concern. Unfortunately, everything I owned is a complete and total loss.

My home and my shop building with my collection, test equipment, and Ham station were under eight feet of water. It was not just flood water, but also several hundred thousand barrels of oil and other unknown chemicals due to the flooding of a refinery just north of me. The flood also contained raw sewage from several towns upstream from the river.

The flood left severe environmental damage to 411 homes. The water was so corrosive that it ate up wiring in just a few days. The wood became so

brittle that it would disintegrate if you even touched it. The only things I got out with were the clothes on my back, a handi-talkie, and my vehicle. I am living with a fellow Ham, since there is no housing available, and even FEMA housing is months away.

Between 55 and 65 years of collecting and restoring mainly glowbug and military gear is nothing but a wet, moldy pile of rubble, even now as I write this some six weeks later. I was not covered by insurance because I was in a 500-year flood plain, so I never thought I would need flood insurance.

I am too old to start over, so I am going to live with my friend, as he has graciously offered me a room in his home for as long as I should need it. From predictions, that looks like a minimum of two years. At least I can still get on the air, and I survived in good health.

Thanks again for your concern. Your magazine will be even more anticipated now to help me to live vicariously.

(Herb Stollman, P.O. Box 564, South Coffeyville, OK 74072)

RADIO IN THE TWENTIES

Station 7XG — An Oregon First

BY ART REDMAN

Northwestern Radio Manufacturing Company products were the subject of Art Redman's article in the September 2005 issue of A.R.C. This article describes the Northwestern equipment used at Radio Station 7XG in Oregon in the 1920s. (Editor)

Radio Station 7XG was the first station in Oregon to broadcast on an announced schedule. It was located at the Willard P. Hawley family residence at 400 NE 22nd Street (now 1914 NE 22nd Avenue) in Portland. The station's schedule began on March 7, 1922, playing instrumental and vocal music between 8 and 8:45 P.M. every Tuesday and Wednesday, and between 9 and 9:30 P.M. every Thursday on 833 KHz. Station 7XG was rated by the *Oregon Journal* newspaper as "the finest amateur station west of Chicago."

Willard P. Hawley, Jr., hired Charles Austin of the Northwestern Radio Manufacturing Company to engineer and equip his station for \$6,000. Music was provided by an electric-driven Victoria phonograph with a Magnavox tonearm and a Steinway grand piano. Two Magnavox hand microphones picked up the music and voices.

THE TRANSMITTER

The transmitter consisted of four 50-watt Radiotron power tubes, two being used as Colpitts oscillators and two as Heising plate modulators. The filament current was supplied by a 9.75-volt Acme transformer. The 500 volts to the plates of the power tubes was provided by a Robbins & Myers motor/generator set with a ¼ hp motor connected to a double-wound generator having a 72-bar commutator at each end.

The two generators had a ¼ KW power rating at 1,500 volts DC when the leads were connected in series. Voltage regulation from 300 to 1,500 volts was obtained by a 10K-ohm Ward Leonard rheostat. A chopper motor, a ½ HP Westinghouse with a 900-cycle note, was used for continuous wave.

The four transmitter controls were the following: a five-position drum switch marked for voice, receiving, off, CW and chopper; a control for wavelength, followed by coupling and capacitor tuning controls. The five Weston meters on the panel measured oscillator plate current, oscillator grid current, modulator plate current, and plate voltage. The fifth meter was a radiation thermometer.

THE RECEIVING EQUIPMENT

The receiving set that covered 160 to 900 meters was a Northwestern Radio Manufacturing Company's Model SR-1 regenerative tuner, shown in Figure 1,

connected to a Northwestern Model SR-2 detector and 2-stage amplifier, shown in Figure 2. A 6-volt, 100-ampere Exide storage battery provided current to the filaments of the Cunningham brand tubes, and two 45-volt Eveready batteries supplied the voltage to the plates of the two Northwestern units.

For the longer wavelengths from 175 to 25,000 meters, the Kennedy Model 110 Universal was used as the receiver. Control of the wavelength of the Kennedy receiver was obtained by switches cutting in and out of wound banks inductances connected to the Northwestern Model SR-2 detector/amplifier. The long-wave receiving antenna was a 350 feet long, 7-strand,

No. 20 phosphor bronze wire strung 70 feet above the ground. There were three sets of headphones available — a Brandes Navy type, a Western Electric set, and a Baldwin mica diaphragm phone. A jackbox mounted on the instrument

table allowed the three sets of phones to be used at the same time.

In addition to a Magnavox audio amplifier for use with either receiver, there was a 3-stage audio amplifier powered by a pair of 5-watt Cunningham transmitting tubes connected in parallel for each of the three stages. An 8-volt, 80 amp-hour Exide storage battery was used to energize the coil of the Magnavox speaker and light the tube filaments of the six power tubes.

For the plates of the power tubes, three banks of Eveready dry cells were used, each bank giving 108 volts when connected in series. The storage batteries were charged by a 75-volt, 6-ampere General Electric tungar rectifier.

ANTENNAS

The transmitting and shortwave receiving aerial was a "T" type. The flat portion was 40 feet long and suspended between two 100-foot high poles, 70 feet apart and consisting of four wires equally spaced on 100-foot long, spruce spreaders. Each wire of the flat-top portion was insulated at both ends with 24-inch long Victor insulators capable of withstanding 100,000 volts on a wet arc test.

The lead-in consisted of four wires brought together about 50 feet above the ground forming a rattlein from that point to the equipment. The wire used was 7-strand #20 phosphor bronze.

A six-wire counterpoise made of 7-strand #20 phosphor ran parallel to the antenna flattop section directly beneath the antenna and extended fifteen feet beyond the antenna at both ends. The counterpoise was connected to the transmitter to improve the antenna's efficiency. The ground system consisted of four 60-foot

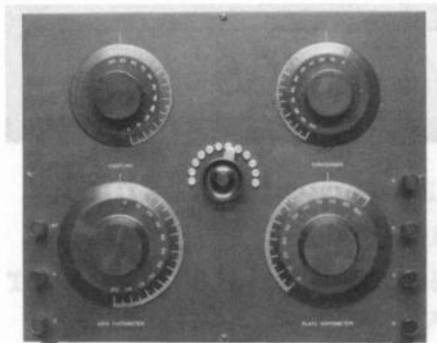

Figure 1. A front panel view of the Type SR-1 regenerative receiver used by Station 7XG.

strips of 3-inch flat copper ribbon, buried about eight inches deep, directly beneath the aerial, each strip being two feet apart.

Two months later, Hawley spent an extra \$4,000 upgrading Station 7XG which became KGY. The Hawley family made their money in the pulp and paper industry and lived at the 22nd Avenue residence until 1940. Today the house, which contained the studios of KGY, is a bed and breakfast inn and is listed on the National Register of Historic Places.

Art Redman is a charter member of the Northwest Vintage Radio Society founded in 1974. He is a frequent contributor to the Society's newsletter "The Call Letter." His current interest is doing research on Pacific Northwest radio manufacturers, such as Long Radio Works, Northwest Radio Manufacturing, and Cole, McKay, and Magic crystal sets.

Another Heathkit Scope Story

BY ROGER SCHREUR

The following letter was sent on to us by Walter Lindenbach, author of the article in the November 2007 A.R.C. about his childhood experience with a Heathkit scope. It's always interesting to know how an article can trigger memories and inspire more shared information. (Editor)

Dear Walter:

I totally enjoyed your "The Scope That Went To Heaven" article in A.R.C. it brought back a lot of great memories. My Dad told me I first took an interest in electronics at age five, and one of my earliest memories was my putting an AC plug on an old phonograph and plugging it in just to have it flash and turn my hand and the wall black! To a lot of people this would have been enough to scare them off to find some other interest, but not me, my interest just continued to grow.

When I was ten, I built my first of many Heathkits. It was a VOM which worked perfectly right off the bat. It, along with the excellent instruction manual, was a good learning tool. It also got me hooked on Heathkits.

By the time I got married in 1966, I had my first workshop setup with all Heath equipment. It wasn't long after this that I got a flyer from Heathkit about the AR-15 state-of-the-art FM receiver, which put out 50 watts per channel into an 8-ohm load and

had crystal filters in the IF. I ordered it right away — \$325 on time payments.

It took me 40 hours after work each night til 2 A.M. to get it finished. After doing all of the pre-checks, it was time to plug it in, and I was breathing hard when I first turned it on and heard the "thunk" in the speakers. I breathed a sigh of relief. I went through all of the alignment steps, and everything worked perfectly.

I put it on the newly built shelf with my RR recorder and timer, and phonograph. I was so proud sitting there listening — when suddenly there was a huge pop in one speaker and then nothing! I was amazed.

It turned out that a feedback capacitor in one channel was defective and caused runaway that made the amp blow. I wrote to Heath explaining exactly which part had failed and why. Heath wrote back saying I was right and offered to pay to have my non-Heath speakers repaired.

Needless to say, I was quite impressed with the company, and several years later I got the opportunity to work for Heathkit in El Cerrito, California, for six years. It was one of the most enjoyable jobs of my career. I still have the AR-15 I built in 1967 on my test bench today. Thanks for the memories!

(Roger Schreur, P.O. Box 745, Forest Ranch, CA 95942)

MUSEUM MUSINGS

Jacksonville Antique Radio Society Exhibit at the Jacksonville Beaches Museum & History Center

BY GERRY LUKACH

Though the exhibit described below was already a thing of the past when the story was submitted to us, Gerry Lukach reminds us of how important such outreach activities are to the preservation of radio history. We encourage all clubs to take advantage of any opportunities to exhibit the radio treasures so often hidden away in private collections. (Editor)

The purpose of any antique radio club is to promote the history of radio and to exhibit the radio sets of yesteryear. Show any young person, with an ipod around his neck, a vintage radio, and he will probably ask "what are those glass jars inside?" With the advances in electronics and the use of recorded media, satellite radio, internet streaming, etc., the knowledge of real old time radio is dwindling.

The Jacksonville Antique Radio Society was formed to help keep vintage radio alive and to reach young people who are interested in the subject. Our desire is to encourage that interest and to show people that radio collecting has been and still is an exciting hobby. There are a hundred years of history in the subject that spans from the first dot-dash signals, through battery-operated sets of the 1920s, wonderful consoles and Art Deco models of the 1930s, low-cost, plastic radios during the 1940s, and the introduction of the transistor sets of the 1950s.

Our club was tasked with an exhibit in the new Jacksonville Beach Historical Society Museum, Jacksonville Beach, Florida, that would fill one exhibit room and show an interesting cross section of radio history. If a radio club is of any size, members' radios could easily fill a small warehouse, let alone a small exhibit hall. The club decided to show a few radios from each radio era, and the exhibit was held from June to September, 2006.

SETS OF THE 1920S

Battery radios of the 1920s included a Magnavox Model 75 lowboy console which was sold

Figure 1. 1920s battery radios and consoles. Rear, left to right: an American Bosch Model 48C, a Magnavox Model 75, and a Blue Ribbon model by the Chicago Nipple Company. In the foreground is an early battery set and horn speaker.

Figure 2. Two examples of a radio purist's basic radio — a Radiola III and a Crosley 51.

as a fine piece of furniture that would hide the batteries in an integral battery compartment. Another small console that is relatively rare is a Blue Ribbon model manufactured by the Chicago Nipple Company. This model also housed the speaker, radio, and batteries in a single cabinet. Both sets are shown in Figure 1.

The Radiola III and its competitor the Crosley 51, both shown in Figure 2, were manufactured in 1924 and were the radio purist's basic radio; i.e.; two tubes, battery power, the requirement for a long wire antenna, the longer the better, and all connections and wires exposed. All the batteries were usually installed under a table or bench, and the single listener sat next to the set using headphones. There were amplifiers available that could boost the signal high enough to drive a horn speaker.

Later in the 1920s, power supplies were added to the radios so that they could operate on AC power that was being installed in homes. A 1928 Atwater Kent Model 52 was a radio that could feel at home in any part of the house. It looked similar to an oil fired stove of that era. The more traditional American Bosch Model 48-C, also in Figure 1, was designed as a piece of furniture that could be displayed proudly in a parlor.

SETS OF THE 1930S

Radios of the 1930s spanned a varied range of styles, from the massive wood consoles to the low-priced, wood, table models aimed at the general public during the Depression. The cathedral style was born to provide a fancy looking radio while keeping the cost in the market to consumers.

Zenith had a reputation for providing well built, good-looking sets that would stand out in a home and make the owner the envy of the neighborhood. The Zenith Model 9S262 shutterdial is a fine example. It could receive broadcast bands and multiple shortwave bands, and was housed in a solid, multiple veneer cabinet. Its nine tubes assured good reception even in remote areas.

The 1938 Zenith Model 6S238 chairside, shown in Figure 3, was the epitome of urban elegance. A man could sit in his favorite easy chair with his pipe and brandy and be able to just reach over and adjust stations and sound without moving out of his chair.

SETS OF THE 1940S

The 1940s was a period of transition for radio. Large consoles were becoming less popular because of cost, and because of a newer invention that would take over the space in the parlor, television. The manufacture of radio sets during the war years was essentially halted except for military models. New molded plastics were becoming more popular also. Zenith introduced a line of well-made, Trans-Oceanic, portable radios that would continue into the 1950s as sought after sets with long range receiving capabilities.

Figure 3. A Zenith Model 6S238 chairside (1938), shown with a period chair, suggested a relaxed evening listening to favorite programs.

As mentioned earlier, the exhibit at the museum ran for a period of three summer months and provided something different from the normal museum items. All visitors seemed to appreciate the display, as well as the background broadcasts of old radio programs throughout the day. These broadcasts included Charlie McCarthy, and mp3s of the *Arthur Godfrey Show* and the *Don McNeil Breakfast Club*. The exhibit also promoted our radio club and helped to add members, always a boon to any club.

The Jacksonville Beaches Museum and History Center is a local museum that mounts exhibits of area history and other subjects of interest to the local population. It is located at 380 Pablo Ave., Jacksonville Beach, Florida. Hours are Tuesday-Saturday, 10 A.M. to 4:30 P.M. Though the exhibit which is the subject of this article has closed, JARS has been invited to mount another exhibit in the near future.

(Gerry Lukach, 7053 Catalonia Ave., Jacksonville, FL 32217)

Gerry Lukach traces his interest in radio to age three when he had fun listening to shortwave on an old Stromberg-Carlson Model 58T radio with his grandfather. He still owns and listens to that set. A collector since high school, he confines himself to small, space-saver sets. He enjoys restoring basketcases, as well as his involvement with the Jacksonville Club, which provides enjoyable learning experiences at each meeting.

For information about the Jacksonville Antique Radio Society (JARS), meetings, programs, and other radio-related activities, e-mail the club at: jarsclubradio@hotmail.com or www.jarsradioclub@msn.com. Website: www.jarsradioclub.com.

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors do arise made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. **Do not** send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers:

First 20 words: **FREE***

29¢ per word for extra words over 20 **plus**

10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only **one** ad each month.

Non-Subscribers:

47¢ per word **plus**

10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

CLASSIFIED ADVERTISEMENTS

FOR SALE: We've recently acquired a large collection of classic Collins S-line & Drake gear! Examples: Collins 75 S1, 75 S2, 75 S3, 32 S3, 51 S1, KWM 2, 30 L1, TM 2. There are also correct accessories, remotes, speakers, power supplies, etc. Also, there's a Drake line w/same accessories; i.e., speakers, remotes, tuners, power samples. Examples: MN 2700, R7, TR7, R4C, TR7A, TR4CW, T4XC, R4C, C4, RX4, MS4. There are also several fine boat anchors by Hallicrafters, SX100, HT 32, Heath SB303, SB401, National NC 300, RME 6900, Collins R388, Collins 51J4, R390 receivers. Lots more! We will consider cash out, cash & trade partials, etc... E-mail best way to contact or send SASE for hard copy list. Pix available any & all. 73 and HYN. Ward Kremer, K14JHA, 57262 Poppy Rd., South Bend, IN 46619. Ph./fax: (574) 204-2877. E-mail: witzend99@comcast.net. Website: http://www.radioattic.com/kremer

FOR SALE: 1936 Zenith console 8S154, restored chassis, original cabinet & grille cloth - \$450, pick up only. Dick Friedman, 1502 Elmwood, Wilmette, IL 60091. (847) 256-1432

RADIO XXXIX

An Indoor Old Radio Flea Market

Biggest Show on the East Coast ★ Same Giant Location

Last Year: 600+ Attendees ★ 72 Exhibitors ★ 109 Tables

Sunday, February 17, 2008 — 8:00 AM to 12:00 NOON

Registration begins for all at 7:30 AM

\$11 admission (spouse & children free) – Exhibitors see below.

Westford Regency Inn — Regency Room — Westford, Mass.

(I-495 at Exit 32 — directions below)

Refreshments will be available.

Visit John Terrey's Collection of Early Radio & Wireless
(1 PM to 3 PM – 5 miles from Regency Inn – get directions & sign up at meet)

Pre-registration & Information:

A.R.C., P.O. Box 2-W20, Carlisle, MA 01741 – (866) 371-0512 – arc@antiqueradio.com

Exhibitors: \$11 per person/family for admission plus \$33 per table. Table sizes and location assigned on a first come-first serve basis. Early registration is recommended. Last year's exhibitors in the main hall may request the same location, if we receive their paid registration by February 1, 2008. Four table limit per exhibitor. Exhibitors must occupy tables for entire show. Tables unoccupied 15 minutes prior to the end of the show will not have priority for the same location in 2009. Exhibitors may register at the door (if tables are available), or may pre-register by mailing payment to: Radio XXXIX, c/o A.R.C., P.O. Box 2-W20, Carlisle, MA 01741. (Make check/MO to A.R.C.; Visa, MasterCard, Discover, American Express OK, too.) If paying by credit card, exhibitors may pre-register by calling (866) 371-0512 or faxing (978) 371-7129. Note: Show opens to all at 8:00 AM. At 7:30 AM, exhibitors may enter the hall only to deliver goods to their tables (no setup/no unpacking/no buying/no selling) and then must return to the foyer until the doors open for everyone at 8 AM. If desired, one person may sit at the table for security purposes (no setup/no unpacking/no buying/no selling). Speak with show manager for special situations. **Cancellation Policy:** Table fee will be refunded only if requested and the table is resold. If a table is not occupied by 9 AM, a table may be cancelled and resold.

Overnight stay: Westford Regency Inn at 1-800-543-7801. Mention Radio XXXIX for special rates. Room reservations should be made by January 25, 2008 for special rates. Bring your family to enjoy indoor pool, health club, racquetball courts, three restaurants, bar, etc. Night skiing at Nashoba Valley Ski Area, only 2 miles away!

Directions: From I-495, take Exit 32. Follow "To Rt. 225" sign. At traffic light by gas stations, turn right onto Rt. 110-West for 0.4 miles. The Westford Regency is on the right. Use doors on right (north) side of Inn. Ramps at both show entrances! The Westford Regency Inn and Conference Center is a 193-room hotel with two restaurants and over 500 parking spaces. With over 20,000 square feet of conference space, we have room to expand our future radio meets!

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio Auction

**“The Evers Collection” from Lawton, Oklahoma
Saturday, March 15, 2008 – 10 AM EDT**

at the Expo Auction Center
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love’s Truck Stop, turn left
onto Garman Rd. and follow one mile to the auction site.

Estes Auctions will offer this large collection of radios at the Expo Auction Center. A very nice selection of radios with ca. 1920s battery sets all the way to novelty type radios. Some of the items to be sold are a beautiful Neutrowound, a Model 10 Atwater Kent breadboard radio, Atwater Kent Models 33, 30, 20, a big box Model 20, Crosley 51, 52, a Trirdyne, Radiola IIIA, Radiola III, Radiola 16, Radiola 25, Radiola 20, Grebe MU-1, Zenith Super VII, Howard, AC Dayton, Freshman Masterpiece, Freed-Eisemann, a Westinghouse RA-DA, Radiola V, many others. The collection offers over a hundred table radios, many wood type as well as Bakelite radios, lots of speakers to include Magnavox R-2, Magnavox R-3, Tower, Radiola, MusicMaster, Atwater Kent Type L and the Type M, Bristol, Stromberg-Carlson, cone speakers by Crosley and Atwater Kent, also drum and mantle speakers, a selection of cathedral and tombstone radios also offered. We will have books and magazines, thousands of radio tubes, many to be sold in bulk lots. All the early tubes sold are first tested for filament and emission before they are offered for sale. Mr. & Mrs. Evers had a very large collection of novelty radios that numbered in the hundreds. We will also sell these in a separate ring at the auction. This will be a good sale. We hope to see you there. Terms: Cash, check, Visa, MC. 5% buyers fee.

Radio Auction

The Mark Stein Collection

Saturday, February 23, 2008 – 10 AM EST

at the Expo Auction Center
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow one mile to the auction site.

It is with great pleasure that we have been selected to offer the very unique and beautiful collection of Mark Stein. Mark has put together a collection of radios from the Deco period of our society and many of these same radios are ones that appear in the pages of the many reference books he has written. Mark made the task of finding information about radios easier for all of us with his *Machine Age to Jet Age* volumes, *The Complete Price Guide to Antique Radios Pre-War Consoles*, *The Complete Price Guide to Antique Radios Tabletop Radios*, and the book, *Plastic Radios*. The time and effort that goes into these publications makes it much easier for other collectors to identify and also to get an idea of the worth or value of a radio. I'm sure many of us have met Mark at the many antique radio meets where he would always be glad to sign copies of his books for anyone who would ask. We will move this collection to Ohio in early January 2008 and get pictures on our website. We are very excited about this upcoming auction and hope you make plan to join us. **We have included a listing of some of the radios on the opposite page in this issue of *Antique Radio Classified*.**
