U. S. AM Radio by Frequencies

As of Sept. 15, 1965

CP—Construction permit for frequency.
L—Limited time: operates night hours only when dominant station is not operating.
CR—Canadian restricted.
CH—Critical hours.
DA—Directional antenna.
D—Daytime operation.
LS—Local sunset.
N—Night.
U—Unlimited time.
SH—Specified hours.
*CP granted for increase in power.
†CP granted for new station.
‡Special authorization for power or frequency.
Note: Class of station is shown in parentheses. For explanation of classes see FCC Rules, page C-44.

College or University Campus-Limited Radio Stations in the U.S.

The following college or university campus-limited stations are operated principally by students enrolled in the schools. Their transmission is by radiation, and reception is limited to on-campus listening. IBS indicates affiliation with Intercollegiate Broadcasting System. See Associations, page E-30. Station affiliation is listed beside the call letters.

The pop-click-hum bug is dead.

Collins' new Speech Console hasn't a mechanical contact in the program circuits.

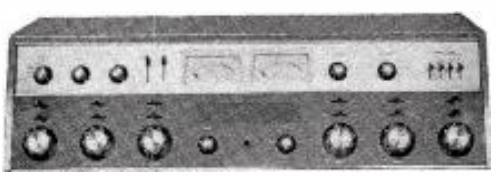
Photoconductive cells instead of relays and switches.
No contacts to wear and get dirty. Nothing at all to keep clean. Result: your most troublesome maintenance problem is ended. Also: no pops, clicks and hums from mechanical switches. Your audio is the cleanest, clearest audio on the air.

A lot less wire (and a lot less hum).
Audio doesn't have to travel to front panel and back. This means you have a lot less wire to pick up noise. (There is no noise, either, from attenuators. They are sealed in protective capsules.)

Module design ends time-wasting troubleshooting.
Simply take out one card and plug in another. Replace attenuatot, input switches, and amplifier output switches with one quick shuffle of cards.

The Collins solid state 212S-1 is for stereo and dual channel operation for FM, AM and TV stations. The companion 212M-1 Console has fewer modules for mono program and monitor outputs.

For details, call your Collins representative. Or write: Broadcast Communication Division, Collins Radio Company, Dallas, Texas 75207.



This is the Collins 212S-1 that killed the pop-click-hum bug.

COLLINS

COMMUNICATION / COMPUTATION / CONTROL · COLLINS RADIO COMPANY / WORLD HEADQUARTERS / DALLAS, TEXAS

To what lengths must a cable manufacturer go to prove his product is better?

As long as the distance between your amplifiers-even up to one-half mile continuous lengths.

When Times Wire and Cable decided to build a CATV cable to outdistance any other in length and performance, we really went all the way: We built a cable that can span the entire distance between your amplifiers.

However, it's not just that Times JT-1000 CATV cable is longer that makes it better. It's also continuous. It's seamless for the entire length. And it's aluminum. Put them all together and you have *continuous seamless aluminum tube sheath CATV cable* in lengths up to ½ mile long—a feat nobody else has yet been able to match!

Here's what these new longer lengths mean to your CATV operations:

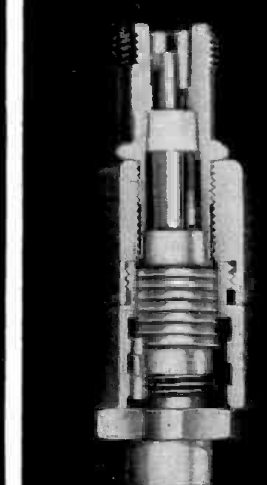
- **Easily saves you 10% installation and shipping costs.** Longer lengths mean fewer splices—8% saved. Another example: Only 1 reel needed for 2,500 feet of cable instead of 1 reel for each 1,000 feet—another 2% saved.
- **Times seamless cable is waterproof.** Puncture it, splice it, apply as many pressure taps as you like. Water vapor and/or water can't travel in Times self-sealing solid sheath cable. Complete dielectric adhesion to center conductor and complete compression seal to outer conductor eliminate longitudinal vapor or water paths.
- **Times cable gives you minimum return loss guarantee.** Your choice of guaranteed 26 db or 30 db minimum return loss—a must for minimum ghosting, true color reproduction.
- **Increases profit by decreasing splices and scrap.** Fewer splices mean less material wasted (fewer tailings), less maintenance needed, too. Less maintenance means less labor cost and more profit.

And don't forget: long after so-called economy cable has been replaced (it starts deteriorating the day you install it), Times continuous seamless aluminum tube sheath CATV cable will still be a top performer, keeping pace with your system's planned potential.

There you have it: the longer the cable, the fewer the splices, the lower the maintenance, the better the performance... and the higher the profits. Times did it all, with its new longer CATV cable... and we're shipping it right now!

Presenting the Times Family of Firsts— The Standards of the CATV Industry...

First to design a long-life cable specifically for CATV.
First with foam dielectric cables for CATV.
First with cable that made all-band CATV systems economically feasible.
First to offer 26 db minimum return loss guarantee for CATV.
First again with ½ mile lengths of seamless aluminum sheath CATV cable.



Timatch®

This quality CATV Connector is available with COILGRIP Clamp in series N, F, UHF, VSF. Splices and bulkhead connectors available in all sizes.

Timatch® Connectors with Coilgrip® clamp

The quality CATV connector

One piece construction

The Timatch Connector with Coilgrip Clamp introduces a new concept in connector design ..."simplicity." A one piece construction incorporating excellent electrical characteristics and a positive, simple, non-destructive clamp. Eliminating separate sleeves, nuts, collets, rings, inserts, etc., all components of Timatch Connector with Coilgrip Clamp have been integrally designed into the connector body.

Because of this one-piece construction, Timatch Connector are simple to attach:

1. Cut outer conductor flush with dielectric exposing inner conductor.
2. Slip connector on cable.
3. Tighten back nut.

AMECO, INC. 2949 West Osborn Road • P. O. Box 11326 • Phoenix, Arizona 85017 • Phone (602) 252-6041

AMECO & CATV

a dynamic company pioneering and expanding an exciting industry . . .

AMECO, INC. was founded 13 years ago in Safford, Arizona by a CATV pioneer, Bruce Merrill. Its products were engineered to provide maintenance-free equipment that would prove reliable in the abrupt temperature changes of the Southwest.

In these early days of CATV, word soon spread of the superior AMECO equipment that performed with equal high reliability in the searing 115 degree desert or below zero mountain country.

Soon AMECO equipped CATV systems were in operation throughout the United States. Within a few years AMECO reliability and performance were setting new standards for the industry.

Other CATV pioneers hearing about this equipment and seeing the results in various Southwest towns began using this equipment. Soon AMECO CATV equipment spread throughout the country.

Solid-State, All-Band Equipment — In 1962, AMECO offered another first to a now booming industry . . . transistorized CATV equipment. This reliable, (virtually maintenance-free) equipment can now be found in over 60% of the CATV systems in the United States and Canada.

Engineering — AMECO has engineering experience in depth. Thoroughly trained in all phases of CATV, AMECO engineers produce reliable, high performance systems. AMECO field engineers conduct signal strength surveys, supervise preparation of system layouts, coordinate construction and installation of equipment.

Financing — AMECO has several custom financing plans for veteran CATV operators as well as newcomers to the business. With AMECO's component financing plan, CATV operators can expand and upgrade their system immediately. AMECO offers direct, low cost financing for equipment purchases or turnkey construction. Credit approvals are made within 24 hours.

Turnkey Construction — AMECO has engineered and built some of the largest CATV systems in the country. In 1962, AMECO built the first all transistorized system in Santa Barbara, California. Cable TV of Santa Barbara offers residents 12 channels and now has over 6,500 subscribers.

In 1965, AMECO turnkeyed an 80 mile system in Rome, New York for Newhouse Broadcasting Company in the record time of 2½ months.

In addition to conducting signal surveys, AMECO prepares strand maps, electronic distribution maps and then completes construction in record time. Years of experience and excellent system performance are AMECO's best recommendation.

AMECO Service — AMECO customers are not forgotten once the equipment is delivered. Another "first" in the industry is the AMECO salesmobile. A CATV warehouse on wheels with a factory trained AMECO Tech-Rep will call on you and offer assistance with any technical problem. Each Salesmobile is outfitted with the proper equipment to sweep cable, test and align amplifiers, "troubleshoot," give instant service and on the spot delivery.

Nationwide Distribution — AMECO offers national distribution and sales. District offices are staffed with experts that can answer all your CATV problems. Salesmobile Tech-Reps call on every CATV system in the country and provide technical assistance and promotional advice.

Research & Development — AMECO has developed many "firsts" in CATV: Solid-state CATV equipment, "Ameco-matched" connectors, 65 & 70 series of amplifiers to name a few. But more important is the work now being done to further the state of the art. All AMECO equipment is designed with the future in mind, and much of tomorrow's CATV equipment is undergoing tests in AMECO laboratories today.

AMECO . . . CATV quality, performance and ingenuity

ameco

EQUIPMENT MAKERS, DISTRIBUTORS

The following is an alphabetical directory of manufactures and services to the business of broadcasting. Each listing contains company name, headquarters address, telephone, executive personnel, and branch offices. To locate products of these companies, please turn to PRODUCT GUIDE, page C-3.

Saf-T-Climb — the only 100% positive safe climbing device — prevents falls from any vertical structure, above or below ground.

And, Saf-T-Climb is simplest to install, simplest to use — even on convex and concave structures. Galvanized, aluminum or stainless Saf-T-Notch Rail attaches rigidly to structure.

Worker wears belt snapped to manganese bronze Saf-T-Lok Sleeve with patented locking pawl that limits falls to 6-inch maximum. Widely approved; proven in use for over 12 years.

Getting all the action!

the ultra compact, new CM-16 by Beckman & Whitley

At last a truly portable 16mm sound camera for professionals. The CM-16 is 14 pounds light with zoom lens and 400 feet of film. It's slim and compact to move as fast as the action. Performance advantages include: both single and double system sound capability; self blimped quiet; full brilliance reflex viewing and focusing; pin registered continuous moving film for superb sound and picture quality. Reliability proven, the CM-16 has been field tested for two years by top pros. Built by the largest, most experienced manufacturer of ultra high speed cameras. Write for more information: Cine Products, Beckman & Whitley, Inc., 441 Whisman Rd., Mountain View, Calif. 94041.

www.americanradiohistory.com

We'll do a month's work for you free!

Just send this page to CBS Laboratories. We will send Audimax and Volumax to your station. If you want to send them home after 30 days, we will pay the freight. But if you want to make your station their permanent home, all you do is pay $665 each.

At the end of that period, chances are you will be so sold on Audimax and Volumax you will want to buy them.

And you should. After all, they can increase your program power 8 times.

Solid state Audimax is an automatic level control years ahead of the ordinary AGC. By automatically controlling audio levels, it frees engineers, cuts costs and boosts your signal.

Volumax, also solid state, outmodes conventional peak limiters by controlling peaks automatically without side effects. By expanding effective range and improving reception, it brings in extra advertising revenue.

We can afford to give Audimax and Volumax away free. Because we know they're so good, most people can't afford to give them back.

NEW! FAIRCHILD COMPATILIZER

An automatic approach to the production of compatible stereo records. Unit rejects low frequency information automatically above a predetermined level. COMPATILIZER also permits increase in high level recording time on discs and provides maximum separation on stereo records above 100 cycles.

NEW! FAIRCHILD BASS-X

A dynamic low frequency roll-off filter — that can roll off high level low frequency information, starting at 500 cycles, with a maximum obtainable attenuation of 12 db at 30 cycles. Device is automatic, is in use only when needed — therefore it does not alter overall apparent low end response to the ear. THE FAIRCHILD BASS-X allows higher levels to be maintained in disc recording, and particularly assists AM stations in increasing their effective signal by automatically controlling the often troublesome low end response.

FAIRCHILD CONAX

The world-accepted way to control high frequency spillovers in FM due to pre-emphasis. Lets your station maintain real high levels even with brass and crashing cymbals and still avoid FCC citations.

THE REVERBERTRON

The new compact reverberation system which gives your station that real big voice. With the Reverbertron you can have that Carnegie Hall effect as close as the gain control on the Reverbertron. And there's the added plus of an increase in apparent loudness of your station sound due to reverberation, as originally described by Dr. Maxfield.

Write to FAIRCHILD — the pacemaker in professional audio products — for complete details.

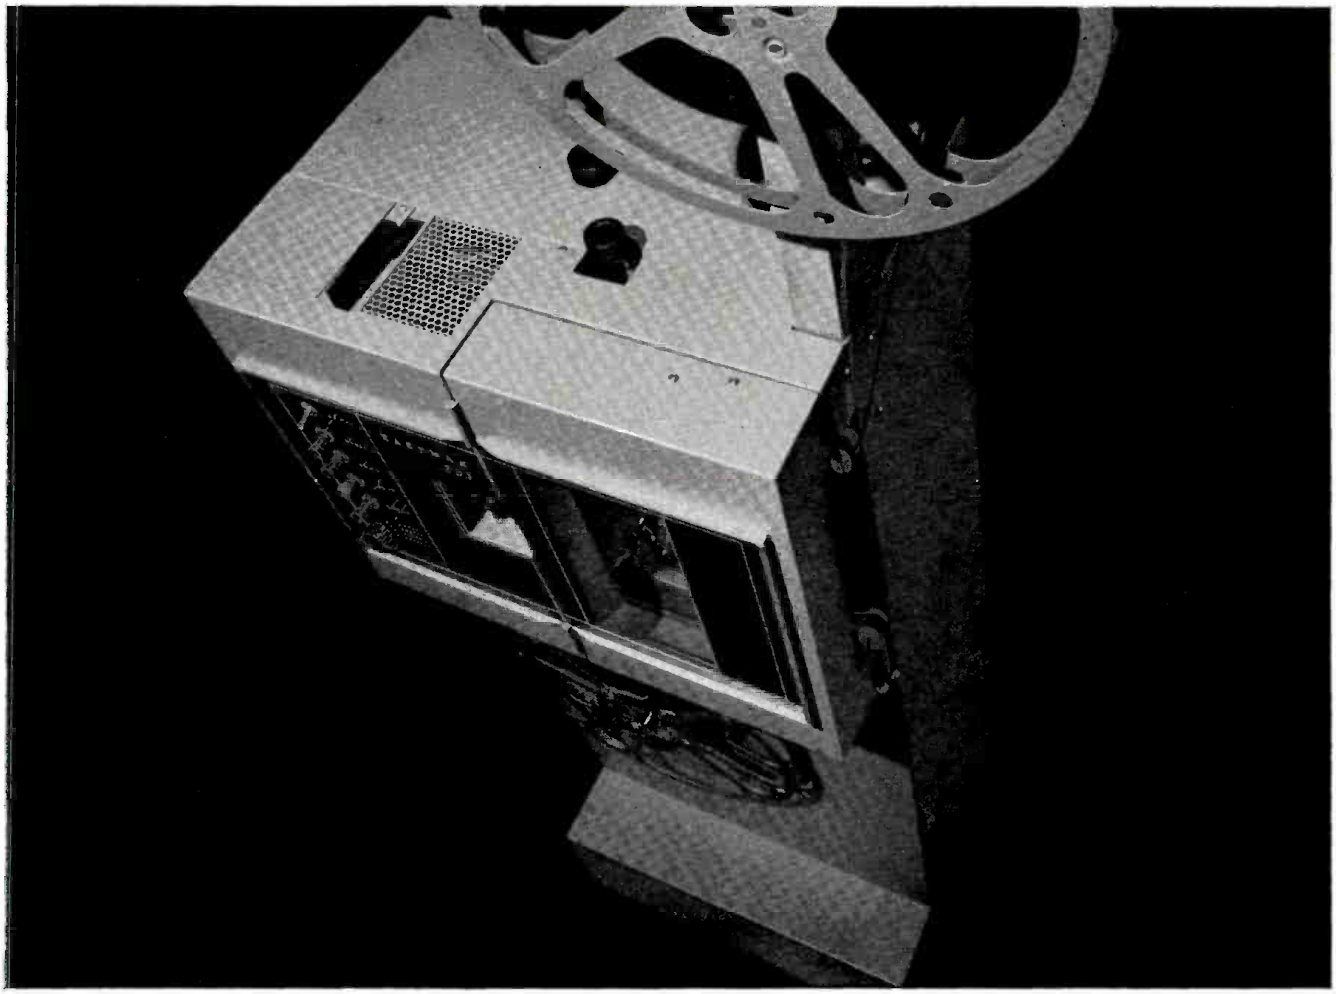
BOX 17040 / DALLAS, TEXAS 75217

www.americanradiohistory.com



A TV projector should deliver highest fidelity in both picture and sound with uninterrupted performance for thousands of hours.

This is the story of the new EASTMAN 16mm TV Projector, Model 285

Nowhere can you get more dependable 16mm television projector performance. All components in the new EASTMAN Model 285 Projector — projection optics, sound optics and the mechanical system—have been conceived and engineered in the light of what television programming demands.

This projector has evolved from the EASTMAN Model 275 Projector, widely regarded as the quality standard for 16mm TV projectors. The Model 285 incorporates a *still frame* feature, which maintains the same brightness and color temperature as in normal projection; a *flat gate* which provides uniform resolution throughout the picture area, from corners to center; a take-up reel mounted near the operating controls; ready accessibility to the projector mechanism; and a contemporary-design cabinet.

Reliability is the prime requisite of a TV projector—and Eastman continues to assure this reliability by separating the film transport system from the Geneva-type drive, thereby isolating shock forces.

Several KODAK Television Projection EKTAR Lenses of exceptional resolving power are available with the Model 285. The projector also allows rapid replacement of a burned-out lamp. Light output is more than enough for black-and-white and color transmission. Sound reproduction, both for magnetic and optical tracks, is unequalled in the 16mm field.

A *magnetic sound playback kit* and *automatic cuing kit* are just two of the several optional pieces of equipment that make the Model 285 Projector so versatile. A film reverse accessory will soon be available. With or without these accessories, you'll find this projector an outstanding value.

The EASTMAN 16mm Television Projector, Model 285, is part of a rapid-access 16mm TV film system that takes you from "on the spot" to "on the screen" in minutes. It includes camera, pre-striped films, processor and projector. For a brochure with complete details, write to:

Ten Good Reasons Why Leading Audio Engineers (Who'll Stop at Nothing to Improve Quality) Choose E-V Professional Microphones!

1. High FIDELITY is your stock in trade. And the peak-free 40-20,000 cps response of the E-V 655C provides it simply and directly, with no complex added equipment to burden you.

2. It's quite easy to maintain complete COMPATIBILITY between the sound of lavalier microphones and stand units. Simply use the tiny E-V 649B with your larger E-V microphone. Voice quality mixes perfectly.

3. The reputation for RELIABILITY enjoyed by the E-V 666 comes from its ability to deliver superb cardioid response even after accidental abuse that would destroy many a lesser microphone.

4. The ready AVAILABILITY of E-V professional microphones at leading radio parts distributors everywhere is an E-V pioneered policy begun back when the "workhorse of the industry", the E-V 635, was introduced.

5. Outstanding in its FLEXIBILITY is the new E-V 654A. This versatile microphone slips easily into floor or desk stands, or can be hand held or used as a lavalier.

6. Ten E-V professional models give you unusual VARIETY. For instance, if you require close-up sound pickup, yet mustn't hide the performer, the ultra-thin E-V 652 solves both problems handsomely.

7. The CREATIVITY of E-V engineers comes from intimate knowledge of field problems. It earned them an Academy Award for their unique solution to film and TV sound problems with the E-V 642 microphone.

8. ECONOMY is vital in every studio operation, yet quality must be upheld. And the E-V 665 is ideal where superb cardioid performance is needed, but the utmost in mounting flexibility is not required.

9. Even the 7-foot long E-V 643 ultra-directional microphone is protected by this unique E-V GUARANTEE: except for refinishing, all repairs are *free* no matter what happens to the unit during the first two years!

10. The VITALITY of E-V design comes from constant improvement of existing models, plus fresh new ideas that solve your problems. Newest is the E-V 668, specifically created for boom microphone applications.

Put all ten good reasons to work for you in your studio or in the field by choosing the E-V Professional microphone that's right for your sound pickup requirements. Your E-V distributor can offer up to 15 years of experience in assisting studios to better sound. See him today, or write for a complete distributor list and free microphone catalog.

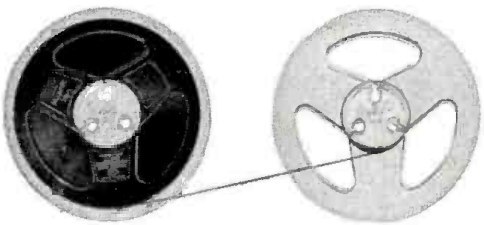
THIS MAGNECORD MODEL 1021 IS NOT BROADCAST READY



(You have to put a tape on it)

Just add a reel of tape and you are ready for production with the most versatile and complete monaural recorder/reproducer in the field.

Truly a broadcast ready instrument, the Magnecord 1021 requires no accessories. Broadcast standard input and output connectors, standard impedances, an inbuilt cueing speaker with separate level control, a mixing auxiliary input and an amplifier which will drive an external speaker are already incorporated into the design.

Ease of operation is built right in, too. You can one-hand cue if you like, and the cue button lifts tape to the heads, releases the brakes and applies low, even torque to the reels. A single pole, single throw switch controls remote start-stop in a preset mode. The Model 1021 features a fine hysteresis synchronous capstan drive and is engineered for safe, gentle tape handling and braking, even with the thinnest tapes.

Looking for a completely broadcast ready tape instrument? All you need is the Magnecord Model 1021 and a reel of tape. See your authorized Magnecord dealer today, or write for free brochure.

FOR CARTRIDGE MACHINES
HEAD BRACKET ASSEMBLIES
REPLACEMENT HEAD LISTING

■ No-Mount Head Bracket Assembly for Cartridge Machines

QK-114 installs two no-mount dual channel heads for monophonic use or two no-mount three channel heads for stereo operation. The left head is for recording. The right head is for playback. Requires heads similar to 2000 series. Completely assembled—Semi aligned.....Net Each **$13.60**

QK-115 installs two no-mount monophonic 2-Track heads (see monitor conversion information below). Requires heads similar to 3000 series. Completely assembled—Semi aligned.....Net Each **$13.60**

QK-117 installs one no-mount monophonic head and one no-mount dual channel head, and provides the advantages of monitoring program material during recording. Requires one head similar to 3000 series and one head similar to 2000 series. The left head is a special monophonic record-only head with a 500 micro-inch gap for optimum recording of the upper program channel. The right head is a dual channel Record/Play head. The upper channel monitors and plays the program signal. The lower channel records and plays the cue tone. (See shaded columns in table below for these monitor conversions). Completely assembled—Semi aligned.....Net Each **$13.60**

All models come complete with cartridge hold-down spring and cartrige guide rail

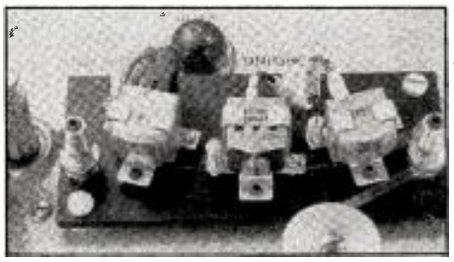
Head Mounting Brackets for Professional Machines

QK-76 WITH NORTRONICS HEAD MOUNTED IN PLACE

QK-76 is a neatly packaged kit containing all of the hardware and detailed illustrated instructions necessary to adapt a Nortronics head to the shield cup of an Ampex head nest. It consists of a precision cast aluminum block; spacers; screws; connector plug; and complete instructions. All other parts necessary are utilized from the original Ampex equipment.....Net Each **$12.00**

QK-35 is a special base-mount bracket kit for adapting Nortronics no-mount heads for replacement of Brush heads or in any application requiring a large base mounting stud.
(Stud—¼-28 x ⅜).....Net Each **$2.00**

QK-66 is a standard base-mount bracket kit for adapting Nortronics no-mount heads for most base-mount applications.
(Stud—6-32 x 5/16).....Net Each **$1.00**



QK-81 WITH 3 NORTRONICS HEADS MOUNTED IN PLACE ON MAGNECORD PT6 MACHINE

QK-81 is a completely assembled kit which allows conversion of the Magnecord PT6 and PT63 type machines to modern heads. The third head position can be used for monitor or stereo playback. Instructions are included to adapt the original Magnecord electronics to accept the new Nortronics heads and meet NAB standards on equalization. Response to 15 KC at 7.5 IPS and 10 KC at 3.75 IPS.
Net Each **$25.00**

QK-38 is a standard side-mount bracket kit for adapting Nortronics no-mount heads for most side-mount applications. Net Each **$1.00**

THE NORTRONICS COMPANY, INC. • 8121 TENTH AVE. NO. • MINNEAPOLIS, MINN. 55427

it pays to use the best

Before RCA's new solid-state silicon rectifiers became commercially available as direct plug-in replacements for mercury vapor and gas rectifiers, they had to be the best. At stake was RCA's reputation with the broadcasters.

Now, after 1,000,000 hours of cumulative life tests on prototypes and same-socket plug-ins, RCA types CR273/8008, CR274/872A, CR275/866A/3B28 are available for high-reliability performance in your broadcast equipment.

Here are benefits you can count on when you use RCA Silicon Rectifiers:

1. NEW SOLID-STATE RUGGEDNESS—nothing to vibrate or deteriorate.
2. INSTANT-ON—No warm-up time, no cool-down necessity.
3. INTERFERENCE-FREE—No arc-backs, no rectifier "hash."
4. LESS TO MAINTAIN—Long life—replacements minimized.
5. LESS EQUIPMENT—No filament transformer required.
6. SAME-SOCKET REPLACEMENTS—Type numbers identical to those of your present mercury vapor and xenon rectifier types.

RCA Silicon Rectifier plug-ins are available *only* through your RCA Industrial Distributor. Call him for price and delivery information.

RCA Electronic Components and Devices, Harrison, N.J.

The Most Trusted Name in Electronics

ROHN TOWERS "STAND UP" to Hurricane Hilda!

A series of ROHN micro-wave towers, used on Shell Oil Company offshore platforms near the Louisiana coast, took on the full fury of "Hurricane Hilda" and withstood the test!

Designed for *50 pound windload per square foot,* these towers stood up to winds known to have been well in excess of this.

For towers proved in design, engineering and construction, specify *ROHN.* Complete tower, lighting kit, microwave reflector, and tower accessory catalogs and specifications available on request. Representatives world-wide.

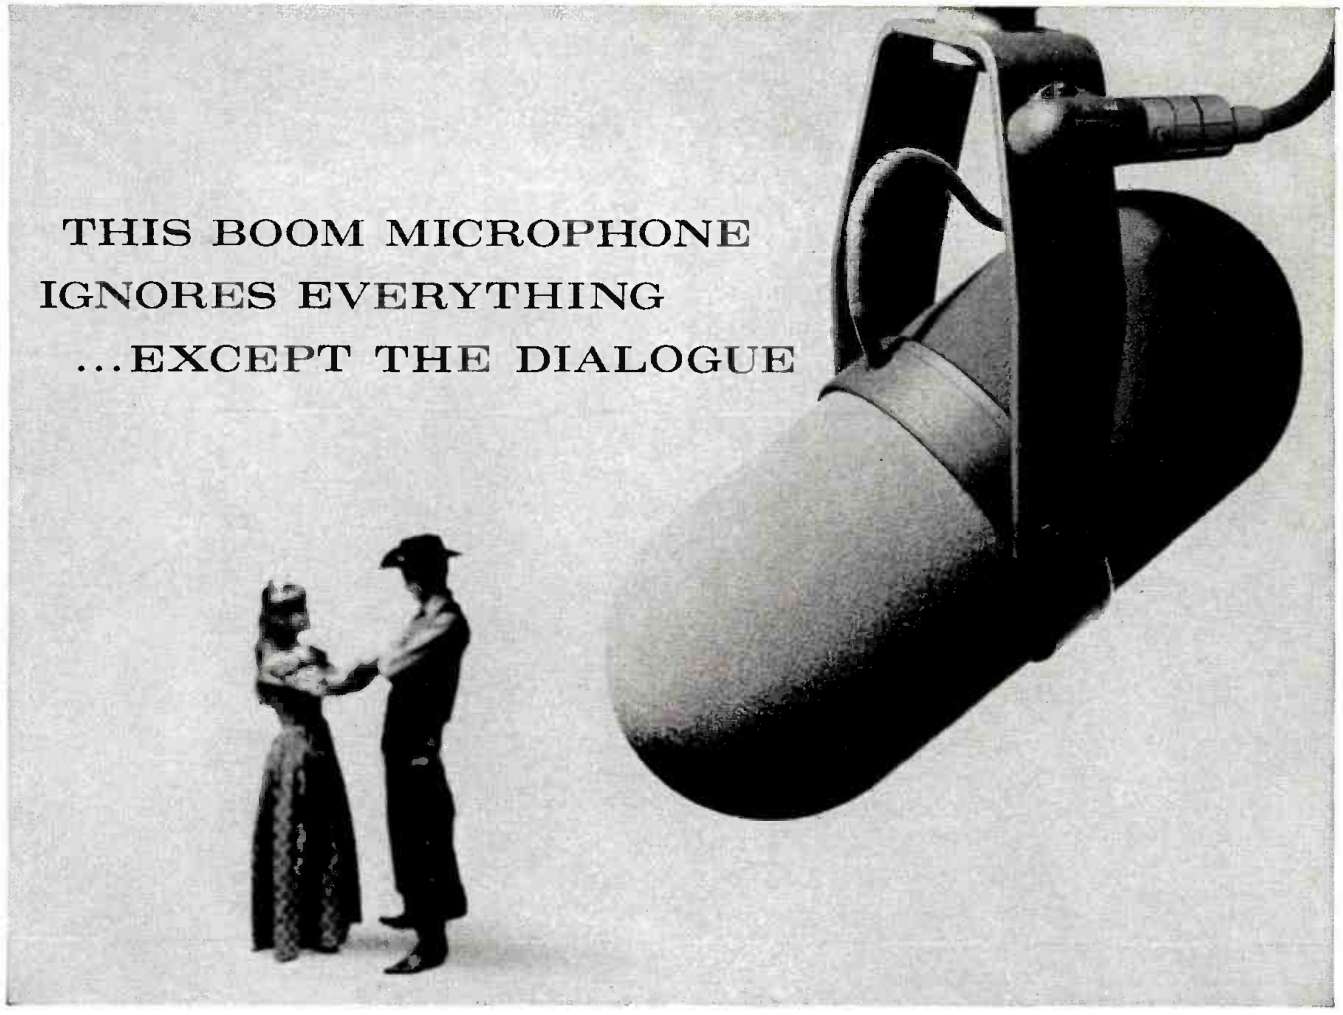
THIS BOOM MICROPHONE IGNORES EVERYTHING ...EXCEPT THE DIALOGUE



Consistency of sound track quality on an endless variety of locations and sets can be dramatically improved with the remarkable Shure SM5 Boom Microphone. It "hears" the dialogue rather than the ever-changing character of the surroundings.

Because its cardioid directional pattern is uniquely uniform with frequency and symmetrical about its axis, the SM5 is singularly independent of the effects of environment. Even in extreme shooting situations (such as with tight sets, low ceilings, hard walls, low microphone angles, traffic or air conditioner noise and rumble, and changing distance) the SM5 minimizes sound coloration and ambient noise pickup. Equalization changes—on the set or in transfer—are seldom, if ever, necessary.

The highly effective attached windscreen completely encloses the two-stage mechanical filter, so that there are no external "rubber bands" for the wind to "strum." The absence of response-correcting inductors or impedance transformers assures freedom from hum.

Call on the Shure SM5 to solve your most annoying boom problems!

For additional information, write directly to Mr. Robert Carr, Manager of Professional Products Division, Shure Brothers, Inc., 222 Hartrey Ave., Evanston, Illinois.

SHURE SM5

UNIDIRECTIONAL DYNAMIC BOOM MICROPHONE

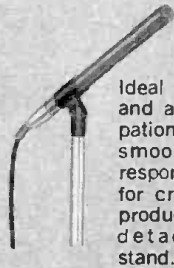
SHURE PROFESSIONAL MICROPHONES . . . FOR BETTER AUDIO

MODEL SM56
CARDIOID
DYNAMIC

Extremely versatile in studio, control room, and remote use. Also widely acclaimed for rhythm recording. Bright, clean sound. Exceptionally uniform cardioid pattern gives optimum control of environment.

MODEL SM33
UNIDIRECTIONAL
RIBBON

Warm, smooth sound for studio, control room, and scoring stage. Super-cardioid directional pattern. Compact, yet rugged.



MODEL SM76
¾" OMIDIRECTIONAL
DYNAMIC

Ideal for interviews and audience participation, yet unusually smooth wide range response (40-20 KC) for critical music reproduction. Instantly detachable from stand. Steel case with Cannon connector.

MODEL SM50
OMNIDIRECTIONAL
DYNAMIC

Self-windscreened and pop-free for news, sports, remotes, and interviews. Also ideal for many studio and control room applications. Comfortably balanced for hand or stand use. Natural response.

v.i.t. displays with video-waveform monitor

TEKTRONIX

with capability for sine-squared testing

Type RM529

frequency responses—Four response characteristics necessary to monitor Video Test Signals are provided:

1. FLAT to 5 MHz ±1%, to 8 MHz ±3%. *This flat response position to 8 MHz assures waveform fidelity and makes the video-waveform monitor ideally suited for sine-squared testing.*
2. HIGH PASS 3.58 MHz center frequency, 30% down at ±400 kHz.
3. LOW PASS -18 dB at 500 kHz.
4. IEEE 1958 STD 23-S-1. Color subcarrier -20 dB.

YRBG or RBG display capability—For monitoring output of color processing amplifiers.

line selector—Provides stable displays of the Vertical Interval Test signals. Adequate brightness is provided even at the fastest sweep speed. Can display any line desired. Brightening pulse automatically intensifies the displayed line as viewed on the associated picture monitor. No modification to the picture monitor is required.

field selection—Positive acting circuit allows selection of field one or two for display. Noise will not cause random field changing.

dc restorer—A feedback-type restorer acts during the backporch time. Not affected by presence of color burst. Does not distort the burst. Front-panel switch can disable the restorer—when other than video waveforms are viewed.

Cabinet Model also available. Same features as RM Model and designed for side-by-side mounting with a picture monitor in standard racks. Takes only 8¾" of rack space. Field case offered as an optional accessory for Type 529.

Type RM529 Video-Waveform Monitor. $1100
Type 529 Video-Waveform Monitor 1050
U.S. Sales Prices, f.o.b. Beaverton, Oregon

STATION APPLICATION PROCEDURE
How to Apply for a Broadcasting Station (AM/FM/TV)

(Updated to January 1965)

Any qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a standard (AM), frequency modulation (FM), or television (TV) broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the commission that they are legally, technically and financially qualified, and that operation of the proposed station would be in the public interest.

The licensing procedure is detailed in Part 1 of the commission's rules of "Practice and Procedure," while station operation is covered by Part 73 (formerly Part 3) "Radio Broadcast Services." The latter includes technical standards for AM, FM and TV stations, and TV and FM channel (frequency) assignments by states and communities. Copies of these rules are not supplied by the commission but are available from the Government Printing Office.

Most applicants employ engineering and legal services in preparing their applications. The workload of the commission does not enable it to make technical or other special studies, etc., for prospective applicants. Nor does it recommend individual lawyers or engineers. Those who practice before the commission have their own associations, the members of which are listed in various trade publications.

Following is a summary of the consecutive steps to be followed in applying for authorization to build and operate a broadcast station. The application procedure is substantially the same whether the facility sought is AM, FM or TV.

Selecting A Facility

An AM applicant must make his own search for a frequency on which he could operate without causing or receiving interference from existing stations and stations proposed in pending applications. AM broadcast stations operate on "local," "regional," or "clear" channels. Stations of 250 watts power nighttime and up to 1 kilowatt daytime serve small communities; stations of 500 watts to 5 kilowatts power cover centers of population and surrounding areas; stations of 10 to 50 kilowatts power are for large area coverage, particularly at night.

An FM station applicant must request an FM channel assigned to the community in which he proposes to operate, or a place within a 25-mile radius which has no FM channel assignment. Power, antenna height and station separation are governed by which of three zones the station is to be located. There are three classes of commercial FM stations. Class A stations use power of from 100 watts to 3 kilowatts to cover a radius of about 15 miles; Class B stations, 5 kilowatts to 50 kilowatts for 40-mile service and Class C, 25 kilowatts to 100 kilowatts for 65-mile range. Noncommercial educational FM stations are in a separate category and may operate with power as low as 10 watts. Operating commercial and educational FM stations may apply for a "Subsidiary Communications Authorization" (Form 318) to furnish certain supplemental services (those of educational FM stations being of a noncommercial nature). FM stations, if they so desire, may engage in stereophonic broadcasting, for which no special application is required.

An applicant for a TV station must request a VHF (very high frequency) or a UHF (ultra high frequency) channel assigned to the community in which he proposes to operate, or a place having no channel assignment within 15 miles of that community. Power depends upon the kind of channels used (VHF or UHF) and station separation is determined by three zones. TV "translator" stations serve remote communities by picking up and rebroadcasting the programs of outside stations, with latter's permission. They operate on VHF or the upper 14 UHF channels. Booster stations fill in the shadows of UHF station service areas. Certain channels are assigned for noncommercial educational TV operation.

Applying for a Construction Permit

After a prospective broadcaster has decided upon the type of station he desires, and the place where it would be located, he should ascertain and plan to meet the programing needs of the locality he intends to serve. The next step is to apply for a construction permit. This is done on FCC Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers AM, FM or TV broadcast, except educational applicants who use FCC Form 340, TV translators (Form 346), and booster stations (Form 343). These forms require information about the citizenship and character of the applicant, as well as his financial, technical and other qualifications, plus details about the transmitting apparatus to be used, antenna and studio locations, and the service proposed. Triplicate copies are required. Nonprofit educational institutions apply for new or changed instructional fixed TV stations on Form 330P.

CONCERNING FCC RULES AND REGULATIONS

"How to Apply for a Broadcast Station License" is a concise report prepared by the FCC Office of Reports & Information as a lay language guide. Serious applicants will also wish to study the FCC Rules & Regulations. Excerpts of the rules begin on page C-44.

Applicants Must Give Local Notice

Applicants for new broadcast stations, license renewals, station sales or major changes in existing stations must give local public notice of such intent, also of any subsequent designation of their applications for hearing. This is done over the applicant's local station (if any) and by advertising in the local newspaper. It affords interested persons an opportunity to comment on these applications to the commission.

Application Processing

All broadcast applications are reported twice by the commission—when first tendered (received) and, again, when formally accepted for filing. An application is not acted upon until at least 30 days after the commission gives public notice of its acceptance. During that time it is subject to objecting petitions being filed.

Applications are, in general, processed in the order in which accepted. They are reviewed in their engineering, legal and financial aspects by the Broadcast Bureau, which makes recommendations to the commission. If, upon examination of an application, the commission determines that there are no engineering or other conflicts, or valid protests, that the applicant is qualified, and that all other requirements are met, the application is granted without hearing and a construction permit is issued. All such grants are announced by the commission. Petitions for reconsideration of grants made without hearing can be filed within 30 days thereafter but must show good cause why the objections were not raised prior to the grant.

Hearing Procedure

Where it appears that an application does not conform to the commission's rules and regulations; that serious interference would be caused; there is protest of merit; or if other serious questions of a technical, legal or financial character are involved, a hearing is usually required. The commission must accord a hearing to timely filed competing applications.

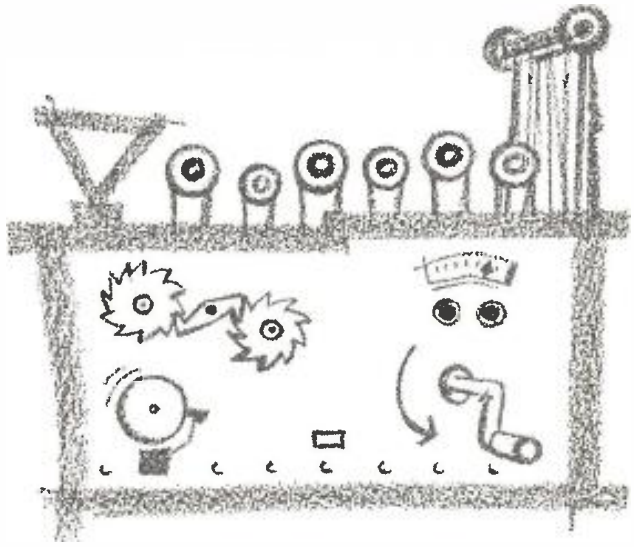
In designating an application for hearing, the commission gives public notice of the issues for the information of the applicant and others concerned. The hearing notice generally allows the applicant 60 days or more in which to prepare. Even after being designated for hearing, an applicant may find it possible to amend his application to resolve engineering or other problems. (Commission approval is required for all mergers or "pay-offs" involving competing applicants.)

Hearings on competing applications are normally held at the commission's Washington offices; however, hearings on license revocations and renewals are held in the communities affected.

Hearings are customarily conducted by

www.americanradiohistory.com

this is a bird... it cheeps



this is a cheap color processor ...it's for the birds!

We make a line of continuous laboratory processors. They're good.

Sometimes we wonder whether we make them too good. (Apparently some people are willing to settle for less.)

For example, take our processor for color television.

We could forget that top color performance is essential in today's mad scramble for ratings . . . and knock off hundreds of dollars by using low capacity dryers, second-rate heat exchangers, and two-bit controls.

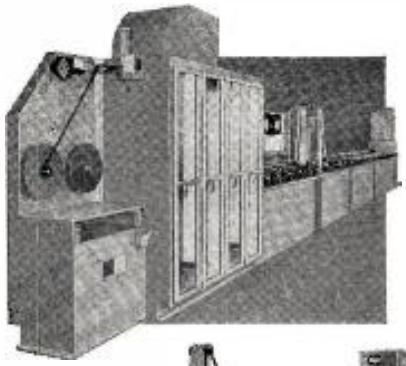
If we did all that (— and more), we could probably sell our TV color processor for 20% less. But would it make sense?

Is it old-fashioned to give every processor the extra dependability that skilled, dedicated craftsmen can build in?

Is it wasteful to test every unit we build to make sure you get all the performance our reputation promises?

Has the practice of providing an honest product at a reasonable price gone out of style?

We don't think so. And apparently a lot of people agree. They figure they get what they pay for. They believe that Treise quality is a bargain. And they've helped us grow to the point where we have designed, built, and installed more Ektachrome Processors than any other manufacturer in the world!



Write for free catalog on our complete line of Color and B&W Processors and Accessories

TREISE ENGINEERING, INC.

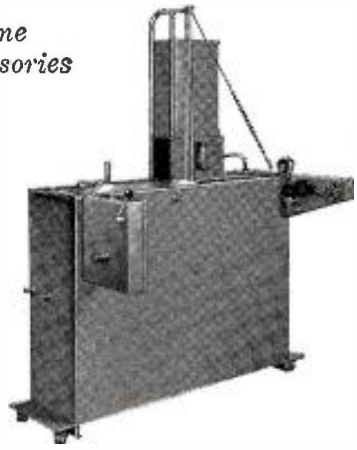
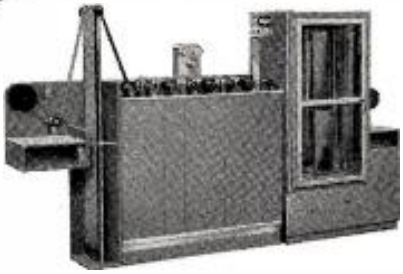
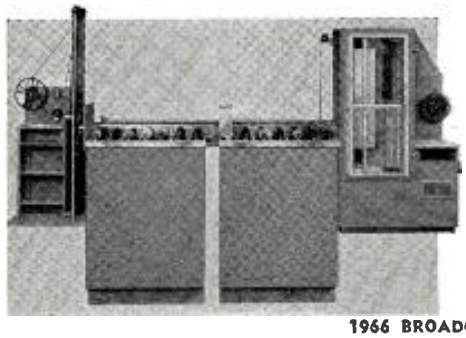
EMPIRE 5-3124 (213)







www.americanradiohistory.com

an examiner. He has authority to administer oaths, examine witnesses and rule upon the admission of evidence. A prehearing conference is held to reach agreement on procedural matters.

Within 20 days after the close of a record by the hearing examiner, each party and the chief of the Broadcast Bureau of the commission can file proposed findings of fact and conclusions to support their contentions. After review of the evidence and statements, the hearing examiner issues an initial decision.

If he wishes to contest the initial decision, the applicant or any other party in interest has 30 days from the date on which the initial decision was issued to file exceptions. In all cases heard by an examiner, the commission or its review board may hear oral argument on timely request of any party. After oral argument, the commission or the review board, as the case may be, may adopt, modify or reverse the hearing examiner's initial decision. In cases where the review board has acted on the exceptions, an appeal from its decision may be taken to the commission within 30 days thereafter. However, the commission may in its discretion deny an appeal for review without stating reasons for such action.

Court appeals can be taken within 30 days following release of the final decision, in which case the commission's action is stayed pending court determination.

Construction Permit

When an application is granted a construction permit is issued. The new permittee may then request call letters which, if available and conforming to the rules, are issued. A period of 60 days from date of the construction permit is provided in which construction shall begin, and a maximum of 6 months thereafter as the time for completion (or 8 months in all). Application to modify a broadcast construction authorization, or to make changes in an existing station, or to modify a license, is made on the same form used in seeking initial construction authorization. If the permittee is unable to build his station within the time specified, he must apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving reasons. Upon completion of construction the permittee conducts equipment (not program) tests.

License

The final step is to apply for the actual license on Form 302 ("Application for New Broadcast Station License"), or Form 341 (for noncommercial educational stations), Form 344 (for TV boosters), or Form 347 (for TV translators). Applicants must show compliance with all terms, conditions and obligations set forth in the original application and the construction permit. Not until he applies for a license can the holder of a construction permit request authority to conduct program tests. The license application form provides a space for program test request, or it can be made separately. A station license and program test authority are issued if no new cause or circumstance has come to the attention of the commission that would make operation of the station contrary to public interest.

Renewal of License

Applicants for renewal of station licenses must show that they have operated according to the terms of their authorizations and the promises they made in obtaining them. Renewal applications are made on Form 303 ("Application for Renewal of Broadcast Station License"), except that noncommercial educational licensees use Form 342; TV boosters Form 345, and TV translators Form 348. Pending the disposition of any commission hearing or other proceeding involving license renewal or revocation considerations the station continues to operate even though its license term may have expired.

Sales and Transfers

If the holder of a construction permit or license desires to assign the same to someone else, he makes application on Form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License"). Should the permittee or licensee wish to transfer corporate control, he applies on Form 315 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License"). Form 316 ("Application for Assignment or Transfer—Short Form") may be used when the transfer or assignment involves no substantial change in interest. Sale of stations held less than three years are subject to hearing except in case of death, hardship or other mitigating circumstances beyond the licensee's control.

Construction Changes

Applicants for authority to make construction changes in existing stations make application on the same form used in applying for a construction permit for the type of station involved.

Application Fees

Since March 17, 1964, the commission has exacted fees for most application filings. This is to comply with government policy to charge for certain federal services. The fee for broadcast applications for construction permits for new stations, major changes in existing stations, license renewals, assignment of license or transfer of control (exclusive of FCC Form 316), is $50 for AM and FM stations, $100 for TV stations, and $30 for translators and auxiliaries. Applicants using FCC Form 316 (the short form for transfer or assignment involving no substantial change in interest) pay $30. except translators and auxiliaries (for which there is no fee). A charge of $20 is made for applications to change broadcast station call letters. The fee for all other broadcast applications (excluding TV translators not specified above) is $30. Fees are not required for applications filed by tax-exempt organizations for operating noncommercial educational broadcast stations, whether or not such operation is on frequencies reserved for noncommercial educational use.

Printed Rules

The Commission does not furnish copies of its rules. The latter are sold in printed form by the Government Printing Office, Washington, D. C. 20402. The rules on FCC practices and procedures are contained in Volume I, which is available at the Government Printing Office for $2.50 a copy; the broadcast rules are contained in Volume III, the price of which is $4.50. Orders should be sent to the Government Printing Office direct (not through the FCC). The printed rules are sold on a subscription basis, which entitles the purchaser to receive subsequent amendments to the rule part purchased until an overall revised printing is necessary.

FCC Rules Regulating Radio-Television

(Selected sections amended to Sept. 1, 1965. Compiled with the cooperation of Pike & Fischer Inc., publisher of Pike & Fischer Radio Regulation.)

ALLOCATIONS AND DEFINITIONS

In am rules . . .

§73.1 Standard broadcast station.—The term "standard broadcast station" means a broadcasting station licensed for the transmission of radio-telephone emissions primarily intended to be received by the general public and operated on a channel in the band 535-1605 kilocycles.

§73.2 Standard broadcast band. — The term "standard broadcast band" means the band of frequencies extending from 535-1605 kilocycles.

§73.3 Standard broadcast channel.—The term "standard broadcast channel" means the band of frequencies occupied by the carrier and two side bands of a broadcast signal with the carrier frequency at the center. Channels shall be designated by their assigned carrier frequencies. The 107 carrier frequencies assigned to standard broadcast stations shall begin at 540 kilocycles and be in successive steps of 10 kilocycles.

§73.4 Dominant station. — The term "dominant station" means a Class I station, as defined in §73.21, operating on a clear channel.

§73.5 Secondary station. — The term "secondary station" means any station except a Class I station operating on a clear channel.

§73.6 Daytime. — The term "daytime" means that period of time between local sunrise and local sunset.

§73.7 Nighttime.—The term "nighttime" means that period of time between local sunset and 12 midnight local standard time.

§73.8 Sunrise and sunset.—The term "sunrise and sunset" means for each particular location and during any particular month, the time of sunrise and sunset as specified in the instrument of authorization.

§73.9 Broadcast day.—The term "broadcast day" means that period of time between local sunrise and 12 midnight local standard time.

§73.10 Experimental period.—The term "experimental period" means that time between 12 midnight and local sunrise. This period may be used for experimental purposes in testing and maintaining apparatus by the licensee of any standard broadcast station on its assigned frequency and with its authorized power, provided no interference is caused to other stations maintaining a regular operating schedule within such period. No station licensed for "daytime" or "specified hours" of operation may broadcast any regular or scheduled program during this period.

§73.11 Service areas. — (a) The term "primary service area" of a broadcast station means the area in which the ground wave is not subject to objectionable interference or objectionable fading.

(b) The term "secondary service area" of a broadcast station means the area served by the sky wave and not subject to objectionable interference. The signal is subject to intermittent variations in intensity.

(c) The term "intermittent service area" of a broadcast station means the area receiving service from the ground wave but beyond the primary service area and subject to some interference and fading.

§73.12 Portable transmitter.—The term "portable transmitter" means a transmitter so constructed that it may be moved about conveniently from place to place, and is in fact so moved about from time to time, but not ordinarily used while in motion. In the standard broadcast band, such a transmitter is used in making field intensity measurements for locating a transmitter site for a standard broadcast station. A portable broadcast station will not be licensed in the standard broadcast band for regular transmission of programs intended to be received by the public.

§73.13 Auxiliary transmitter.—The term "auxiliary transmitter" means a transmitter maintained only for transmitting the regular programs of a station in case of failure of the main transmitter.

Allocations—(am)

§73.21 Classes of standard broadcast channels and stations.

(a) Clear channel. A clear channel is one on which the dominant station or stations render service over wide areas, and which are cleared of objectionable interference within their primary service areas and over all or a substantial portion of their secondary service areas. Stations operating on these channels are classified as follows:

(1) Class I station. A Class I station is a dominant station operating on a clear channel and designed to render primary and secondary service over an extended area and at relatively long distances. Its primary service area is free from objectionable interference from other stations on the same and adjacent channels, and its secondary service area free from interference except from stations on adjacent channels, and from stations on the same channel in accordance with the channel designation in §§73.25 or 73.182. The operating power shall not be less than 10 kilowatts nor more than 50 kilowatts. (Also see §73.25[a] for further power limitation.)

(2) Class II station. A Class II station is a secondary station which operates on a clear channel (see §73.25) and is designed to render service over a primary service area which is limited by and subject to such interference as may be received from Class I stations. Whenever necessary a Class II station shall use a directional antenna or other means to avoid interference with Class I stations and with other Class II stations, in accordance with §73.182 (and §73.22 in the case of Class II-A stations). Class II stations are divided into three groups:

(i) Class II-A station. A Class II-A station is an unlimited time Class II station operating on one of the clear channels listed in §73.22 and assigned to a community within a state specified in the Table contained in that section. A Class II-A station shall operate with power of not less than 10 kilowatts nighttime nor more than 50 kilowatts at any time.

(ii) Class II-B station. A Class II-B station is an unlimited time Class II station other than those included in Class II-A. A Class II-B station shall operate with power not less than 0.25 kilowatts nor more than 50 kilowatts.

NOTE: The Class II station operating unlimited time on 760 kc at San Diego and the Class II station operating unlimited time on 750 kc at Anchorage, Alaska, shall be limited to a power of 10 kw. Both stations shall protect the I-A station on the same frequency to its 0.5 mv/m 50% skywave contour.

(iii) Class II-D station. A Class II-D station is a Class II station operating daytime or limited time. A Class II-D station shall operate with power not less

www.americanradiohistory.com

than 0.25 kilowatts nor more than 50 kilowatts.

(b) Regional channel. A regional channel is one on which several stations may operate with powers not in excess of 5 kilowatts. The primary service area of a station operating on any such channel may be limited to a given field intensity contour as a consequence of interference.

(1) Class III station. A Class III station is a station which operates on a regional channel and is designed to render service primarily to a principal center of population and the rural area contiguous thereto. Class III stations are subdivided into two classes.

(i) Class III-A station. A Class III-A station is a Class III station which operates with power not less than 1 kilowatt nor more than 5 kilowatts and the service area of which is subject to interference in accordance with §73.182.

(ii) Class III-B station. A Class III-B station is a Class III station which operates with power not less than 0.5 kilowatt, nor more than 1 kilowatt night and 5 kilowatts daytime, and the service area of which is subject to interference in accordance with §73.182.

(c) Local channel. A local channel is one on which several stations operate with powers no greater than provided in this paragraph. The primary service area of a station operating on any such channel may be limited to a given field intensity contour as a consequence of interference. Such stations operate with power no greater than 250 watts nighttime, and power daytime no greater than 1 kilowatt (or no greater than 250 watts if the station is located 100 kilometers [62 miles] or closer to the Mexican border, or in the area of the state of Florida south of 28 degrees north latitude and between 80 and 82 degrees west longitude).

(1) Class IV station. A Class IV station is a station operating on a local channel and designed to render service primarily to a city or town and the suburban and rural areas contiguous thereto. The power of a station of this class shall not be less than 0.1 kilowatt, and not more than 0.25 kilowatt nighttime and 1 kilowatt daytime, and its service area is subject to interference in accordance with §73.182.

NOTE 1: Under NARBA the power ceiling for Class IV stations is 250 watts daytime as well as nighttime. The U.S.-Mexican Agreement permits such stations to operate with up to 1 kilowatt power daytime if they are located further than 100 kilometers [62 miles] from the Mexican border. Pursuant to the U.S.-Mexican Agreement and informal coordination with the other NARBA signatories, the Commission will consider applications for Class IV stations on local channels with daytime powers more than 250 watts, up to 1 kilowatt, if such station is to be located outside of the areas specified in paragraph (c) of this section, and if no objectionable interference would be caused (under the standards set forth in the pertinent international agreement) to a duly notified station in Mexico, Haiti, or any foreign country signatory to NARBA.

NOTE 2: All authorizations of new or changed Class I-B, Class II-B, Class II-D, Class III or Class IV facilities after October 30, 1961, are subject to whatever interference may be received from, or whatever overlap of 2.0 mv/m and 25 mv/m groundwave contours or overlap of 25 mv/m groundwave contours may be involved with previously or subsequently authorized Class II-A facilities.

§73.22 Assignment of Class II-A stations.

(a) Table of assignments. One Class II-A station may be assigned on each channel listed in the following table within the designated state or states:

Channel (kc)	Existing Class I Station		State(s) in which Class II-A Assignment may be Applied for
670	WMAQ	Chicago	Idaho
720	WGN	Chicago	Nevada or Idaho
780	WBBM	Chicago	Nevada
880	WCBS	New York	No. Dakota, So. Dakota or Nebraska
890	WLS	Chicago	Utah
1920	KDKA	Pittsburgh	New Mexico
1030	WBZ	Boston	Wyoming
1100	KYW	Cleveland	Colorado
1120	KMOX	St. Louis	California or Oregon
1180	WHAM	Rochester	Montana
1210	WCAU	Philadelphia	Kansas, Nebraska or Oklahoma

(b) Minimum service to "white" areas. No Class II-A station shall be assigned unless at least 25% of its nighttime interference-free service area or at least 25% of the population residing therein receives no other interference-free nighttime primary service.

(c) Power. Class II-A stations shall operate with not less than 10 kw power nighttime.

(d) Protection. (1) Protection by Class II-A stations to other stations. The co-channel Class I-A station shall be protected by the Class II-A station to its 0.1 mv/m contour daytime and its 0.5 mv/m 50% skywave contour nighttime. All other stations of any class authorized on or before October 30, 1961, shall normally receive protection from objectionable interference from Class II-A stations as provided in §3.182.

(2) Protection to Class II-A stations. A Class II-A station shall normally receive daytime protection to its 0.5 mv/m groundwave contour and nighttime protection to the contour to which it is limited by the co-channel Class I-A station.

(e) Applications not complying with this section. Applications for Class II-A stations which do not meet the requirements of paragraphs (b) and (c) of this section will be returned without further consideration.

§73.23 Time of operation of the several classes of stations.—The several classes of standard broadcast stations may be licensed to operate in accordance with the following:

(a) "Unlimited time" permits operation without a maximum limit as to time.

(b) "Limited time" is applicable to class II (secondary) stations operating on a clear channel with facilities authorized before Nov. 30, 1959. It permits operation of the secondary station during daytime, and until local sunset if located west of the dominant station on the channel, or if located east thereof, until sunset at the dominant station; and in addition during night hours, if any, not used by the dominant station or stations on the channel.

(c) Daytime permits operation during the hours between average monthly local sunrise and average monthly local sunset. Daytime stations operating on local channels with a power of 0.1 kw or 0.25 kw may, upon notification to the Commission and to the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

(d) "Sharing time" permits operation during hours which are so restricted by the station license as to require a division of time with one or more other stations using the same channel.

(e) Specified hours means that the exact operating hours are specified in the license. (The minimum hours that any station shall operate are specified in §73.71.) Specified hours stations operating on local channels with a power of 0.1 kw or 0.25 kw, except those sharing time with other stations may, upon notification to the Commission and the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

§73.24 Broadcast facilities; showing required.—An authorization for a new standard broadcast station or increase in facilities of an existing station will be issued only after a satisfactory showing has been made in regard to the following, among others:

(a) That the proposed assignment will tend to effect a fair, efficient and equitable distribution of radio service among the several states and communities.

(b) (1) That a proposed new daytime station (or change in frequency of an existing daytime station) complies with the standards of station separation set forth in §73.37.

(2) That a proposed change in daytime facilities (other than a change in frequency or a Class IV station increasing daytime power) does not involve overlap of contours prohibited by §73.37 with any other station in any area where there is not already such overlap between the two stations.

(3) That a proposed new nighttime operation or change in frequency of any existing nighttime operation (except Class IV stations) would (i) not cause objectionable interference to any existing station (see §73.182(o); and (ii) provided a first primary AM service to at least 25 percent of the area within the proposed interference free nighttime service area.

(4) That a proposed change in nighttime facilities (other than a change in frequency) would not cause objectionable interference to any other station (see §73.182(o)).

NOTE: The preceding provisions of this paragraph (b) shall not be applied to applications for new Class II-A stations or to applications accepted for filing before July 13, 1964. With respect to such applications, a showing must be made that:

(a) Objectionable interference will not be caused to existing stations or that, if interference will be caused, the need for the proposed service outweighs the need for the service which will be lost by reason of such interference. (For special provisions concerning interference from Class II-A stations to stations of other classes authorized after October 30, 1961, see Note 2 to §73.21 and §73.22(d). For determining objectionable interference, see §§73.182 and 73.186.)

(b) The proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree.

(c) That the applicant is financially qualified to construct and operate the proposed station.

(d) That the applicant is legally qualified. That the applicant (or the person or persons in control of an applicant corporation or other organization) is of good character and possesses other qualifications sufficient to provide a satisfactory public service.

(e) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations of this subpart and §73.188.)

(f) That the facilities sought are subject to assignment as requested under existing international agreements and the rules and regulations of the Commission.

(g) That the population within the 1 m/v contour does not exceed 1.0 per cent of the population within the 25 mv/m contour: Provided, however, that where the number of persons within the 1 m/v contour is 300 or less the provisions of this subparagraph are not applicable.

(h) That, in the case of an application for a class II station, the proposed station would radiate, during two hours following local sunrise and two hours preceding local sunset, in any direction toward the 0.1 mv/m ground-wave contour of a co-channel United States Class I station, no more than the maximum radiation values permitted under the provisions of §73.187.

(i) That, in the case of an application for a Class II-A station (see §73.22), 25% or more of the area or population within the nighttime interference-free service contour of the proposed station receives no nighttime interference-free primary service from another station.

(j) That the public interest, convenience and necessity will be served through the operation under the proposed assignment.

§73.25 Clear channels: Classes I and II stations.—The frequencies in the following tabulations are designated as clear channels and assigned for use by the classes of stations given:

(a) On each of the following channels, one Class I station will be assigned, operating with power of 50 kw: 640, 650, 660, 670, 700, 720, 750, 760, 780, 820, 830, 840, 870, 880, 890, 1020, 1030, 1040, 1100, 1120, 1160, 1180, 1200 and 1210 kc. In addition, on the channels listed in this paragraph, Class II stations may be assigned as follows:

(1) On 670, 720, 780, 880, 890, 1020, 1030, 1100, 1120, 1180 and 1210 kc, one Class II-A unlimited time station, assigned and located pursuant to the provisions of §73.22.

(2) On the channel 750 kc, an unlimited time Class II station located at Anchorage.

(3) On the channel 760 kc, an unlimited time Class II station located at San Diego.

(4) On any of the channels listed in this paragraph (to the extent consistent with the assignments provided in subparagraphs [1], [2], and [3] of this paragraph), unlimited time Class II stations located in Alaska, Hawaii, Virgin Islands, or Puerto Rico, which will not deliver more than 5 microvolts per meter groundwave day or night or microvolts per meter 10 percent time skywave at night at any point within the continental limits of the United States excluding Alaska.

(5) On any of the channels listed in this

www.americanradiohistory.com

paragraph (to the extent consistent with the Class I, Class II-A, and Anchorage and San Diego Class II assignments provided in this paragraph, and, in the case of limited time stations, subject to the restrictions contained in §73.38), limited time and daytime only stations, as follows:

(i) In Alaska, Hawaii, Puerto Rico and Virgin Islands.

(ii) Within the continental United States excluding Alaska, where the station would operate with facilities authorized as of October 30, 1961.

NOTE 1: In view of special circumstances arising from the provision of presunrise broadcast service on 640 kc at Ames, Iowa, applications will be accepted for broadcast operations on 640 kc between 6:00 a.m. central standard time and local sunrise at Ames, Iowa, with not to exceed 1 kw power: Provided, that such applications will be acted upon only after and in light of the decision reached in Docket No. 11290.

NOTE 2: In view of special circumstances arising from the provision of a service during some nighttime hours by a Class II station operating on 830 kc at New York, N. Y., (i.e. from 6:00 a.m. to local sunrise and from sunset at Minneapolis to 10:00 p.m. E.S.T.), applications will be accepted for such operation: Provided, that they will be acted upon only after and in light of the decision reached in Docket No. 11227.

NOTE 3: On the frequency 770 kc, two Class I stations may be assigned.

NOTE 4: See NARBA concerning priority for Canadian Class I-B and Cuban I-C assignments on 640 kc.

NOTE 5: See NARBA concerning Cuban Class II-E assignments on 660, 670, 760, 780, 830, 1020, 1030 and 1120 kc.

NOTE 6: See U.S.-Mexican Agreement concerning Mexican use of 660, 760 and 830 kc.

(b) To each of the following channels there may be assigned Class I and Class II stations: 680, 710, 810, 850, 940, 1000, 1060, 1070, 1080, 1090, 1110, 1130, 1140, 1170, 1190, 1500, 1510, 1520, 1530, 1540, 1550 and 1560 kilocycles.

NOTE 1: See NARBA and the U.S.-Mexican Agreement concerning a Cuban Class II-E assignment on, and Mexican use of, 1030 kc.

NOTE 2: Class I and Class II stations on 1540 kc shall deliver not over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point of land in the Bahama Islands, and such stations operating nighttime (i.e., sunset to sunrise at the location of the Class II station) shall be located not less than 650 miles from the nearest point of land in the Bahama Islands.

(c) For Class II stations which will not deliver over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point on the Canadian border, and provided that such station operating nighttime (i.e. sunset to sunrise at the location of the Class II station) are located not less than 650 miles from the nearest point on the Canadian border, 690, 740, 860, 990, 1010, and 1580 kilocycles.

NOTE: See NARBA concerning priority for Cuban Class I-B assignment on 1010 kcs, Class I-C assignments on 690 and 860 kcs, and Class I-D assignment on 740 kcs.

(d) The frequencies 730, 800, 900, 1050, 1220 and 1570 kilocycles, for Class II stations which operate daytime only, which will not deliver at any point on the Mexican border over 5 microvolts per meter groundwave, and which operate with no more than the following powers:

(1) If not located within the areas specified in subparagraph (2) of this paragraph, 5 kilowatts.

(2) If operating on any of the following frequencies within the following specified areas, no more than one kilowatt:

(i) 800 kcs: less than 1319 kilometers (820 miles) from Ciudad Juarez, Chihuahua.

(ii) 1050 kcs: less than 998 kilometers (620 miles) from Monterrey, Nuevo Leon.

(iii) 1570 kcs: less than 998 kilometers (620 miles) from Ciudad Acuna, Coahuila.

NOTE: See the U.S./Mexican Agreement concerning specific U.S. unlimited time Class II assignments on each of the following channels: 730, 800, 900, 1050 and 1220 kcs.

(e) The frequency 540 kilocycles, for Class II stations which will not deliver a signal of more than 5 microvolts per meter groundwave or 25 microvolts per meter 10% skywave at any point on the Canadian border, nor more than 10 microvolts per meter daytime or 50 microvolts per meter nighttime at any point on the Mexican border: Provided, that stations operating at night shall be located:

(1) Within the continental United States including Alaska; and

(2) Not less than 650 miles from the nearest point on the Canadian border; and

(3) North of the parallel 35° N. if west of the meridian 93° W., or north of the parallel 30° N. if east of said meridian.

NOTE: See §2.106 (a) of this chapter with respect to use of 540 kcs.

§73.26 Regional channels: Classes III-A and III-B stations.—The following frequencies are designated as regional channels and are assigned for use by class III-A and III-B stations: 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 910, 920, 930, 950, 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, and 1600 kilocycles.

NOTE: See NARBA concerning Cuban Class I-C assignment on 550 kc, Class I-D assignments on 570, 590, 630, 920, 950 and 980 kcs. and Class III-E assignments on 790, 910 and 1150 kcs.

§73.27 Local channels: Class IV stations.—The following frequencies are designated as local channels and are assigned for use by class IV stations: 1230, 1240, 1400, 1450, and 1490 kilocycles.

NOTE: See NARBA concerning Cuban Class IV-E assignments on 1240 and 1340 kcs.

§73.28 Assignment of stations to channels.—(a) With respect to applications for new Class II-A stations, and other applications accepted for filing before July 13, 1964, the individual assignments of stations to channels which may cause interference to other United States stations only shall be made in accordance with the provisions of this part for the respective classes of stations involved. (For determining objectionable interference, see §§73.22, and 73.182 through 73.186.)

(b) Except as provided in §73.21(c) concerning Class IV stations, no assignment of a standard broadcast station will be made which would be inconsistent with the provisions of NARBA or the U.S./Mexican Agreement. Similarly, as long as protection for U.S. assignments from Haitian assignments continues, no U.S. assignment of a standard broadcast station will be made which would cause objectionable interference (under the standards set forth in NARBA) to a duly notified Haitian station. (The Haitian stations considered to be duly notified are those notified and accepted in accordance with past agreements, and those subsequently notified in accordance with the procedures and understandings which have pertained thus far.) In all cases where an individual assignment may cause interference with, or may involve a channel assigned for priority of use by, a station in another North American country, the classifications, allocation requirements, and engineering standards set forth in NARBA and the U.S./Mexican Agreement shall be observed.

NOTE: In general, an application for a standard broadcast station assignment, the grant of which would be consistent with the provisions of NARBA and the U.S./Mexican Agreement and would not cause objectionable interference to a duly notified station in Haiti, will be considered and acted upon by the Commission in accordance with its rules and established procedure for action upon such applications. However, in particular cases such applications may also present considerations of an international nature which require that a different procedure be followed. In such cases the procedure to be followed will be determined by the Commission in the light of the special considerations involved.

With respect to applications for facilities which would involve conflict with NARBA only as to a country which has signed but not completed formal ratification of that agreement, and facilities which would cause objectionable interference to a duly notified Haitian station, special provisions of a procedural nature are contained in §1.352 of this chapter.

(c) Engineering standards now in force domestically differ in some respects from those specified for international purposes. The engineering standards specified for international purposes (in NARBA and the U.S./Mexican Agreement) will be used to determine: (1) the extent to which interference might be caused by a proposed station in the United States to a station in another country of the North American Region; and (2) whether the United States should register an objection to any new or changed assignment notified by another country of the North American Region. The domestic standards in effect in the United States will be used to determine the extent to which interference exists or would exist from a foreign station where the value of such interference enters into a calculation of: (1) the service to be rendered by a proposed operation in the United States; or (2) the permissible interfering signal from one station in the United States to another United States station.

(d) With respect to applications for new Class II-A stations, and other applications accepted for filing before July 13, 1964, the following shall apply: Upon showing that a need exists, a Class II, III, or IV station may be assigned to a channel available for such class, even though interference will be received within its normally protected contour, subject to the following conditions: (1) No objectionable interference will be caused by the proposed station to existing stations or that if interference will be caused, the need for the proposed service outweighs the need for the service which will be lost by reason of such interference; (2) Primary service will be provided to the community in which the proposed station is to be located; (3) The interference received does not affect more than 10 percent of the population in the proposed station's normally protected primary service area; however, in the event that the nighttime interference received by a proposed Class II or III station would exceed this amount, then an assignment may be made if the proposed station would provide either a standard broadcast nighttime facility to a community not having such a facility or if 25 percent or more of the nighttime primary service area of the proposed station is without primary nighttime service. This subparagraph (3) shall not apply to existing Class IV stations on local channels applying for an increase in power above 250 watts, nor to new Class IV stations proposing power in excess of 250 watts with respect to population in the primary service area outside the equivalent 250 watt, 0.5 mv/m contour.

§73.29 Class IV stations on regional channels.—No license will be granted for th operation of a class IV station on a regional channel, provided, however, that class IV stations presently authorized to operate on regional channels will not be required to change frequency or power but will not be protected against interference from class III stations.

In FM rules . . .

§73.201. Numerical designation of fm broadcast channels.—For convenience, the frequencies available for fm broadcasting (including those assigned to noncommercial educational broadcasting) are given numerical designations which are shown in the table below:

EDITOR'S NOTE: [The band is 88-108 mc. Noncommercial educational fm occupies 88-92 mc.]

§73.202. Table of Assignments. — (a) General. The following Table of Assignments contains the channels (other than noncommercial educational channels) assigned to the listed communities in the 48 conterminous United States. Channels designated with an "A" are for Class A FM stations. All other listed channels are for Class B stations in Zones I and I-A and for Class C stations in Zone II.

[EDITOR'S NOTE: Channel assignments by cities are reprinted in the AM-FM directory and are not repeated here.]

§73.203. Availability of channels. — (a) Subject to the provisions of paragraph (b) of this section, applications may be filed to construct FM broadcast stations in the 48 conterminous states only on the channels assigned in the Table of Assignments (§73.202(b)) anly only in communities listed therein. Applications which fail to comply with this requirement, whether or not accompanied by a petition to amend the Table, will not be accepted for filing: provided, however, that applications specifying channels which accord with publicly announced Commission orders changing the Table of Assignments will be accepted for filing even though such applications are tendered before the effective dates of such channel changes.

(b) A channel assigned to a community listed in the Table of Assignments is available upon application in any unlisted community which is located within 25 miles of the listed community. Where channels are assigned to two or more communities listed in combination in the Table of Assignments the provisions of this paragraph shall apply separately to each community

www.americanradiohistory.com

so listed. The distance between communities shall be determined by the distance between the respective coordinates thereof as set forth in the publication of the United States Department of Commerce entitled "Air Line Distance Between Cities in the United States." (This publication may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402). If said publication does not contain the coordinates of either or both communities, the coordinates of the main post office in either or both of the communities shall be used. The method to be followed in making the measurements is set forth in §73.208(b).

§73.204. International agreements and other restrictions on use of channels.

(a) Authorizations issued by the Commission for fm broadcast facilities will be subject to the provisions of any agreements entered into by the United States with Canada concerning fm assignments and authorizations. The Commission may decide after consultation with Canada that an application should not be granted; or if, pursuant to an agreement providing for timely objection after grant, Canada files such objection, the Commission may on its own motion set aside the grant pending consideration. The Commission will give notice of the filing of such objections.

(b) The frequency 89.1 mcs (ch. 206) is reserved in the New York City metropolitan area for the use of the United Nations with the equivalent of an antenna height of 500 feet above average terrain and effective radiated power of 20 kilowatts, and the Commission will make no assignments which would cause objectionable interference with such use.

(c) In Alaska, the frequency band 88-100 mcs is allocated exclusively to government radio services and the nongovernment fixed service. The frequencies 88.1 through 99.9 mcs (chs. 201 through 260) will not be assigned in Alaska for use by fm broadcast stations.

(d) In Hawaii, the frequency band 98-108 mcs is allocated for nonbroadcast use. The frequencies 98.1 through 107.9 mcs (chs. 251 through 300) will not be assigned in Hawaii for use by fm broadcast stations.

§73.205. Zones.

For the purpose of allocation and assignment, the United States is divided into three zones as follows:

(a) Zone I consists of that portion of the United States located within the confines of the following lines drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum): Beginning at the most easterly point on the state boundary line between North Carolina and Virginia; thence in a straight line to a point on the Virginia-West Virginia boundary line located at North Latitude 37° 49' and West Longitude 80° 12' 30"; thence westerly along the southern boundary lines of the states of West Virginia, Ohio, Indiana, and Illinois to a point at the junction of the Illinois, Kentucky, and Missouri state boundary lines; thence northerly along the western boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin state boundary lines; thence easterly along the northern state boundary line of Illinois to the 90th meridian; thence north along the meridian to the 43.5° parallel; thence east along this parallel to the 71st meridian; thence in a straight line to the intersection of the 69th meridian and the 45th parallel; thence east along the 45th parallel to the Atlantic Ocean. When any of the above lines pass through a city, the city shall be considered to be located in Zone I. (See figure 1 of §73.699 [in complete copy of rules]).

(b) Zone IA consists of Puerto Rico, the Virgin Islands, and that portion of the State of California which is located south of the 40th parallel.

(c) Zone II consists of Alaska, Hawaii and the rest of the United States which is not located in either Zone I or Zone IA.

§73.206. Classes of commercial channels, and stations operating thereon.

(a) **Class A channels and stations.**

(1) Except as provided in §73.202, the following frequencies are designated as Class A channels and are assigned for use, in all zones, by Class A stations only:

Frequency (mc)	Channel No.	Frequency (mc)	Channel No.
92.1	221	100.1	261
92.7	224	100.9	265
93.5	228	101.7	269
94.3	232	102.3	272
95.3	237	103.1	276
95.9	240	103.9	280
96.7	244	104.9	285
97.7	249	105.5	288
98.3	252	106.3	292
99.3	257	107.1	296

(2) A Class A station is a station which operates on a Class A channel, and is designed to render service to a relatively small community, city, or town, and the surrounding rural area.

(3) A Class A station will not be authorized to operate with effective radiated power greater than 3 kilowatts (4.8 dbk), and the coverage of a Class A station shall not exceed that obtained from 3 kilowatts effective radiated power and antenna height about average terrain of 300 feet. For provisions concerning minimum facilities, and concerning reduction in power where antenna height above average terrain exceeds 300 feet, see §73.211.

(b) **Class B-C channels and Class B and Class C stations.**

(1) Except for the channels specified in paragraph (a) (1) of this section, all of the channels listed in §73.201 from 222 through 300 (92.3 through 107.9 mcs) are classified as Class B-C channels, and (subject to the restrictions set forth in §73.204) are assigned for use in Zones I and I-A by Class B stations only, and for use in Zone II by Class C stations only (there are no Class C stations in Zones I or I-A and no Class B stations in Zone II).

(2) A Class B station is a station which operates on a Class B-C channel in Zone I or Zone I-A, and is designed to render service to a sizable community, city, or town, or to the principal city or cities of an urbanized area, and to the surrounding area.

(3) With respect to Class B stations authorized after September 10, 1962, no such station will be authorized with effective radiated power greater than 50 kilowatts (17 dbk), and the coverage of a Class B station authorized after that date shall not exceed that obtained from 50 kilowatts effective radiated power and 500 feet antenna height above average terrain. For provisions concerning minimum power, and concerning reduction in power where antenna height above average terrain exceeds 500 feet, see §73.211.

(4) A Class C station is a station which operates on a Class B-C channel in Zone II, and is designed to render service to a community, city, or town, and large surrounding area.

(5) With respect to Class C stations authorized after September 10, 1962, no such station will be authorized with effective radiated power greater than 100 kilowatts (20 dbk), and the coverage of a Class C station authorized after that date shall not exceed that obtained from 100 kilowatts effective radiated power and antenna height above average terrain of 2,000 feet. For provisions concerning minimum power, and reduction in power where antenna height above average terrain exceeds 2,000 feet, see §73.211.

§73.207. Minimum mileage separations between co-channel and adjacent-channel stations on commercial channels.

(a) Petitions to amend the Table of Assignments (§73.202(b)) (other than those expressly requesting amendment of this section or §73.205) will be dismissed and no application for a new station, change in the channel of an existing station, or (except as provided in paragraph (b) of this section) increase in antenna height or effective radiated power, or change in location of an existing station will be accepted for filing unless the proposed facilities will be located at least as far from the transmitter sites of other co-channel and adjacent-channel stations (both existing and proposed) as the distances specified in this paragraph. Proposed stations of the respective classes shown in the left-hand column of the table (below) shall be located no less than the distance shown from co-channel stations and first adjacent-channel stations (200 kc/s removed) and second and third adjacent-channel stations (400 and 600 kc/s removed) of the classes shown in the remaining columns of the table. The distances shown between stations of different classes apply regardless of which is the proposed station under consideration (e.g., distances shown from a new Class A station to an existing Class C station are also the distances between a new Class C and an existing Class A station.) The distances between Class B and Class C stations apply only across zone lines. The adjacent-channel spacings listed also apply: (1) To applications for noncommercial educational facilities on channels 218, 219, or 220, with respect to other stations on channels 221, 222, or 223; (2) to applications for facilities on channels 221, 222, or 223 with respect to noncommercial educational stations on channels 218, 219, or 220 (for classification of noncommercial educational stations, see §73.504).

(b) Where an existing station is located less than the minimum distances specified in paragraph (a) of this section with respect to co-channel or adjacent-channel stations:

(1) It may apply for increases in antenna height, or in effective radiated power up to the maximum specified in §3.204 for its class, if the application for increase is accompanied by a request to decrease power or antenna height so that the station's 1 mv/m contour (located pursuant to Figure 1 of §3.333) will be no further from the station's transmitter than with its present facilities.

(2) It may apply for permission to move transmitter site, but this will not be granted if it would increase the amount by which the station is located at substandard separation.

(c) The zone in which the transmitter of an fm station is located or proposed to be located determines the applicable rules with respect to minimum required spacings.

§73.209. Protection from interference.

(a) Permittees and licensees of fm broadcast stations are not protected from any interference which may be caused by the grant of a new station, or of authority to modify the facilities of an existing station, in accordance with the provisions of the subpart.

(b) The nature and extent of the protection from interference accorded to **FM** broadcast stations is limited solely to the protection which results from the minimum assignment and station separation requirements and the rules with respect to maximum powers and antenna heights set forth in this subpart.

§73.211. Power and antenna height requirements.

(a) *Minimum requirements.*

(1) Except as provided in paragraph (b) (2) of this section, the minimum effective radiated power shall be:

Class A	100 watts (—10 dbk)
Class B	5 kw (7 dbk)
Class C	25 kw (14 dbk)

(2) No minimum antenna height above average terrain is specified.

(b) *Maximum power and antenna height.*

(1) The maximum effective radiated power in any direction, and maximum antenna height for equivalence purposes, shall be as follows for the various classes of stations:

	Maximum power	Maximum antenna height (feet above average terrain)
Class A	3 kw (4.8 dbk)	300
Class B	50 kw (17.0 dbk)	500
Class C	100 kw (20.0 dbk)	2,000

(2) Antenna heights may be used ex-

Class of Station and Frequency Separation (kc/s)

	Class A				Class B				Class C				10-watt educational			
Class of Sta.	Co-ch.	200	400	600	Co-ch.	200	400	600	Co-ch.	200	400	600	Co-ch.	200	400	600
Class A	65	40	15	15	—	65	40	40	—	105	65	65	—	30	15	15
Class B					150	105	40	40	170	135	65	65	—	—	40	40
Class C									180	150	65	65	—	—	65	65
10-watt educational													—	—	—	—

NOTE: Stations or assignments separated in frequency by 10.6 or 10.8 Mc/s (53 or 54 channels) will not be authorized unless they conform to the following separation table:

Class of Stations	*Required Spacing in Miles*
A to A	5
B to A	10
B to B	15
C to A	20
C to B	25
C to C	30

www.americanradiohistory.com

ceeding those specified in this paragraph for equivalence purposes, provided effective radiated power is reduced in the amount determined by use of the appropriate curves in Figure 3 of §73.333. Where, under Figure 3 of §73.333, effective radiated power must be reduced to an amount less than the normal minimum specified in paragraph (a)(1) of this section for the class of station involved, the effective radiated power determined by Figure 3 of §73.333 shall be the minimum for the station involved.

(3) In Puerto Rico antenna heights may be used up to 2000 feet above average terrain with effective radiated powers up to 25 kw. For antenna heights above 2000 feet the power shall be reduced so that the station's 1 mv/m contour (located pursuant to Figure 1 of §73.333) will be no further from the station's transmitter than with the facilities of 25 kw and antenna height of 2000 feet.

(c) Determination of applicable rules. The zone in which the transmitter of an fm station is located or proposed to be located determines the applicable rules with respect to the class of station, and thus the minimum and maximum requirements as to facilities.

(d) Existing stations. Stations authorized as of September 10, 1962, which do not conform to the requirements of this section, may continue to operate as authorized; but any application to change facilities will be subject to the provisions of this section, except that the minimum power specified in paragraph (a) of this section shall not apply to an application to increase facilities.

(b) In Alaska and Hawaii the frequency bands 76-82 mc and 82-88 mc are allocated for nonbroadcast use. These frequency bands (Channels 5 and 6) will not be assigned in Alaska and Hawaii for use by television broadcast stations.

(c) Channel 37, 608-614 Mc/s. is not available for assignment prior to January 1, 1974.

ED. NOTE — Subsection (d) withdraws Channel 4 from television broadcast use in Guam.

§73.606. Table of Assignments.—(a) The following Table of Assignments contains the channels assigned to the listed communities in the United States, its Territories, and Possessions. Channels designated with an asterisk are assigned for use by noncommercial educational broadcast stations only. A station on a channel identified by a plus or minus mark is required to operate with its carrier frequencies offset 10 kc above or below, respectively, the normal carrier frequencies.

[EDITOR'S NOTE: Channel assignments by cities are reprinted in the TV station directory and are not repeated here.]

§73.607. Availability of channels.—(a) Subject to the provisions of paragraph (b) of this section, applications may be filed to construct television broadcast stations only on the channels assigned in the Table of Assignments and only in the communities listed therein. Applications which fail to comply with this requirement, whether or not accompanied by a petition to amend the Table, will not be accepted for filing provided, however, that applications specifying channels which accord with publicly announced Commission orders changing the Table of Assignments will be accepted for filing even though such applications are tendered before the effective dates of such channel changes.

(b) A channel assigned to a community listed in the Table of Assignments is available upon application in any unlisted community which is located within 15 miles of the listed community. In addition, a channel assigned to a community listed in the Table of Assignments and not designated for use by noncommercial educational stations only, is available upon application in any other community within 15 miles thereof which, although listed in the table, is assigned only a channel designed for use only by noncommercial educational stations. Where channels are assigned to two or more communities listed in combination in the Table of Assignments the provisions of this paragraph shall apply separately to each community so listed. The distance between communities shall be determined by the distance between the respective coordinates thereof as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Between Cities in the United States." (This publication may be purchased from the Government Printing Office, Washington, D. C.) If said publication does not contain the coordinates of either or both communities, the coordinates of the main post office in either or both of such communities shall be used. The method to be followed in making the measurements is set forth in §73.611(d).

§73.609. Zones.—(a) For the purpose of allocation and assignment, the United States is divided into three zones as follows:

(1) Zone I consists of that portion of the United States located within the confines of the following lines drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°: North American datum): Beginning at the most easterly point on the state boundary line between North Carolina and Virginia; thence in a straight line to a point of the Virginia-West Virginia boundary line located at North Latitude 37° 49' and West Longitude 80° 12' 30"; thence westerly along the southern boundary lines of the states of West Virginia, Ohio, Indiana and Illinois to a point at the junction of the Illinois, Kentucky, and Missouri State boundary lines; thence northerly along the western boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin state boundary lines; thence easterly along the northern state boundary line of Illinois to the 90th meridian; thence north along this meridian to the 43.5° parallel; thence east along this parallel to the 71st meridian; thence in a straight line to the intersection of the 69th meridian and the 45th parallel; thence east along the 45th parallel to the Atlantic Ocean. When any of the above lines pass through a city, the city shall be considered to be located in Zone I. (See Figure 1 of §73.699.)

(2) Zone II consists of that portion of the United States which is not located in either Zone I or Zone III, and Puerto Rico, Alaska, Hawaiian Islands and the Virgin Islands.

(3) Zone III consists of that portion of the United States located south of a line, drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum), beginning at a point on the east coast of Georgia and the 31st parallel and ending at the United States-Mexican border, consisting of arcs drawn with a 150 mile radius to the north from the following specified points:

	North Latitude	West Longitude
a)	29°40'00"	83°24'00"
b)	30°07'00"	84°12'00"
c)	30°31'00"	86°30'00"
d)	30°48'00"	87°58'30"
e)	30°00'00"	90°38'30"
f)	30°04'30"	93°19'00"
g)	29°46'00"	95°05'00"
h)	28°43'00"	96°30'30"
i)	27°52'30"	97°32'00"

When any of the above arcs pass through a city, the city shall be considered to be located in Zone II. (See Figure 2 of §73.699.)

§73.610. Separations.—(a) The provisions of this section relate to assignment separations and station separations. Petitions to amend the Table of Assignments (§73.606(b)) (other than those also expressly requesting amendment of this section or §73.609) will be dismissed and all applications for new television broadcast stations or for changes in the transmitter sites of existing stations will not be accepted for filing if they fail to comply with the requirements specified in paragraphs (b), (c) and (d) of this section.

NOTE: Licensees and permittees of television broadcast stations which were operating on April 14, 1952 pursuant to one or more separations below those set forth in §73.610 may continue to so operate, but in no event may they further reduce the separations below the minimum. As the existing separations of such stations are increased, the new separations will become the required minimum separations until separations are reached which comply with the requirements of §73.610. Thereafter, the provisions of said section shall be applicable.

(b) Minimum co-channel assignment and station separations:

(1) Zone	Channels 2-13	Channels 14-83
I	170 miles	155 miles
II	190 miles	175 miles
III	220 miles	205 miles

(2) The minimum co-channel mileage separation between a station in one zone and a station in another zone shall be that of the zone requiring the lower separation.

(c) Minimum assignment and station adjacent channel separations applicable to all zones:

(1) Channels 2-13	Channels 14-83
60 miles	55 miles

(2) Due to the frequency spacing which exists between channels 4 and 5, between channels 6 and 7, and between channels 13 and 14, the minimum adjacent channel separations specified above shall not be applicable to these pairs of channels (see §73.603).

(d) In addition to the requirements of paragraphs (a), (b) and (c) of this section, the minimum assignment and station separations between stations on channels 14-83, inclusive, as set forth in Table IV of §73.698 must be met in either rule making proceedings looking towards the amendment of the Table of Assignments (§73.606(b)) or in licensing proceedings. No channel listed in column (1) of Table IV of §73.698 will be assigned to any city, and no application for an authorization to operate on such a channel will be granted unless the mileage separations indicated at the top of columns (2)-(7), inclusive, are met with respect to each of the channels listed in those columns and paralliel with the channel in column (1).

(e) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to co-channel mileage separations where the transmitter is located in a different zone from that in which the channel to be employed is located.

§73.614. Power and antenna height requirements.—(a) Minimum requirements. Applications will not be accepted for filing if they specify less than—10 dbk (100 watts) visual effective radiated power in any horizontal direction. No minimum antenna height above average terrain is specified.

(b) Maximum power. Applications will not be accepted for filing if they specify a power in excess of that provided in this paragraph. Except as provided in subparagraph (1) below, the maximum effective radiated powers of television broadcast stations operating on the channels set forth below with antenna heights not in excess of 2000 feet above average terrain shall be as follows:

Channel Nos.	Maximum visual effective radiated power in db above one kilowatt (dbk)
2-6	20 dbk (100 kw)
7-13	25 dbk (316 kw)
14-83	37 dbk (5000 kw)

(1) In Zone I, on Channels 2-13 inclusive, the maximum powers specified above for these channels may be used only with antenna heights not in excess of 1000 feet above average terrain. Where antenna heights exceeding 1000 feet above average terrain are used on Channels 2-13, or antenna heights exceeding 2000 feet above average terrain are used on Channels 14-83, the maximum power shall be based on the chart designated as Figure 3 of

www.americanradiohistory.com

*UHF mileage separations, see Sec 73.610(d).

§73.699.

NOTE: This limitation shall not apply to any licensee or permittee in Zone I who received an authorization after March 22, 1951, to relocate its transmitter site and construct a new tower and antenna to a height in excess of 1000 feet above average terrain and who constructed or who had substantially completed construction of said tower and antenna prior to April 14, 1952. In such case, maximum power may be utilized at the height above average terrain specified in the authorization. The limitation shall apply, however, where the tower or other principal supporting structure had been constructed prior to the date of such authorization.

(2) In Zones II and III, the maximum powers which may be used by television broadcast stations operating on the respective channels set forth in the above table with antenna heights exceeding 2000 feet above average terrain shall be based on the chart designated as Figure 4 of §73.699.

(3) The effective radiated power in any horizontal or vertical direction may not exceed the maximum values permitted by this section and Figures 3 and 4 of §73.699.

(4) The maximum effective radiated power in any direction above the horizontal plane shall be as low as the state of the art permits and may not exceed the effective radiated power in the horizontal direction in the same vertical plane.

(c) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to maximum antenna heights and powers for VHF stations when the transmitter is located in Zone I and the channel to be employed is located in Zone II, or the transmitter is located in Zone II and the channel to be employed is located in Zone I.

[Note: The maximum visual effective radiated power of television broadcast stations operating on channels 14-83 within 250 miles of the Canadian-U. S. border may not be in excess of 30 dbk (1,000 kw.)]

MULTIPLE OWNERSHIP

In AM rules . . .

§73.35. Multiple ownership—No license for a standard broadcast station shall be granted to any party (including all parties under common control) if:

(a) Such party directly or indirectly owns, operates, or controls one or more standard broadcast stations and the grant of such license will result in any overlap of the predicted or measured 1 mv/m groundwave contours of the existing and proposed stations computed in accordance with §73.183 or §73.186; or

(b) Such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other standard broadcast station if the grant of such license would result in a concentration of control of standard broadcasting in a manner inconsistent with public interest, convenience, or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of area served, the number of people served, classes of stations involved and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven standard broadcast stations.

NOTE 1: The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

NOTE 2: In applying the foregoing provisions to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

NOTE 3: Paragraph (a) of this section will not be applied so as to require divestiture, by any licensee, of existing facilities. Said paragraph will not apply to applications for increased power for Class IV stations, to applications for assignment of license or transfer of control filed in accordance with §§1.540(b) or 1.541(b) of this chapter, or to applications for assignment of license or transfer of control to heirs or legatees by will or intestacy where no new or increased overlap would be created between commonly owned stations. Said paragraph will apply to all applications for new stations, to all other applications for assignment or transfer, and to all applications for major changes in existing stations except major changes that will result in overlap no greater than that already existing. (The resulting overlap areas in such major change cases may consist partly or entirely of new terrain. However, if the population in the resulting overlap areas substantially exceeds that in the previously existing overlap areas, the Commission will not grant the application if it finds that to do so would be against the public interest, convenience, and necessity.) Commonly owned stations with overlapping contours prohibited by paragraph (a) of this section may not be assigned or transferred to a single person, group, or entity, except as provided in this Note.

In FM rules . . .

§73.240. Multiple ownership.—(a) No license for an FM broadcast station shall be granted to any party (including all parties under common control) if:

(1) Such party directly or indirectly owns, operates, or controls one or more FM broadcast stations and the grant of such license will result in any overlap of the predicted 1 mv/m contours of the existing and proposed stations, computed in accordance with §73.313; or

(2) Such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls or has any interest in, or is an officer or director of any other FM broadcast station if the grant of such license would result in a concentration of control of FM broadcasting in a manner inconsistent with the public interest, convenience or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of areas served, the number of people served, classes of stations involved and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven FM broadcast stations.

(b) Paragraph (a) of this section is not applicable to non-commercial educational FM stations.

www.americanradiohistory.com

NOTE 1: The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

NOTE 2: In applying the foregoing provisions to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

NOTE 3: Paragraph (a)(1) of this section will not be applied so as to require divestiture, by any licensee, of existing facilities. Said paragraph will not apply to applications for assignment of license or transfer of control filed in accordance with §§1.540(b) or 1.541(b) of this chapter, or to applications for assignment of license or transfer of control to heirs or legatees by will or intestacy where no new or increased overlap would be created between commonly owned stations. Said paragraph will apply to all applications for new stations, to all other applications for assignment or transfer, and to all applications for major changes in existing stations except major changes that will result in overlap no greater than that already existing. (The resulting overlap areas in such major change cases may consist partly or entirely of new terrain. However, if the population in the resulting overlap areas substantially exceeds that in the previously existing overlap areas, the Commission will not grant the application if it finds that to do so would be against the public interest, convenience, and necessity.) Commonly owned stations with overlapping contours prohibited by paragraph (a)(1) of this section may not be assigned or transferred to a single person, group, or entity, except as provided in this Note.

In TV rules . . .

73.636. Multiple ownership.—(a) No license for a television broadcast station shall be granted to any party (including all parties under common control) if:

(1) Such party directly or indirectly owns, operates, or controls one or more television broadcast stations and the grant of such license will result in overlap of the Grade B contours of the existing and proposed stations, computed in accordance with §73.684; or

(2) Such party, or any stockholder, officer or, director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other television broadcast station if the grant of such license would result in a concentration of control of television broadcasting in a manner inconsistent with public interest, convenience, or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of areas served, the number of people served, and the extent of other competitive service in the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven television broadcast stations, no more than five of which may be in the vhf band.

(b) Paragraph (a) of this section is not applicable to non-commercial educational stations.

NOTE 1: The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

NOTE 2: In applying the provisions of paragraph (a) of this section to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

NOTE 3: Paragraph (a)(1) of this section will not be applied so as to require divestiture, by any licensee, of existing facilities. Said paragraph will not apply to applications for assignment of license or transfer of control filed in accordance with §§1.540(b) or 1.541(b) of this chapter, or to applications for assignment of license or transfer of control to heirs or legatees by will or intestacy where no new or increased overlap would be created between commonly owned stations. Said paragraph will not apply to major changes in UHF television broadcast stations authorized as of September 30, 1964, which will result in Grade B overlap with another television broadcast station that was commonly owned, operated, or controlled as of September 30, 1964. Such major changes will be considered on a case-by-case basis to determine whether such overlap exists with a commonly owned, operated, or controlled station as to be against the public interest. Said paragraph will apply to all applications for new stations, to all other applications for assignment or transfer, and to all other applications for major changes in existing stations except major changes that will result in overlap no greater than that already existing. (The resulting overlap areas in such major change cases may consist partly or entirely of new terrain. However, if the population in the resulting overlap areas substantially exceeds that in the previously existing overlap areas, the Commission will not grant the application if it finds that to do so would be against the public interest, convenience, and necessity.) Commonly owned stations with overlapping contours prohibited by paragraph (a)(1) of this section may not be be assigned or transferred to a single person, group, or entity, except as provided in this Note.

NOTE 4: Paragraph (a)(1) of this section will not be applied to television stations which are primarily "satellite" operations. Television "satellite" operations will be considered on a case-by-case basis in order to determine whether such overlap exists with a commonly owned, operated, or controlled station as to be against the public interest. Whether or not a particular station which does not present a substantial amount of locally originated programming is primarily a "satellite" operation will be determined on the facts of the particular case. An authorized and operating "satellite" television station the Grade B contour of which overlaps that of a commonly owned, operated, or controlled "non-satellite" parent television station may subsequently become a "non-satellite" station with local studios and locally originated programming. However, such commonly owned "non-satellite" stations with Grade B overlap may not be transferred or assigned to a single person, group, or entity.

STUDIO LOCATION ORIGINATIONS

In AM rules . . .

§73.30 Station location and program origination.—(a) Except as provided in paragraph (b) of this section, each standard broadcast station will be licensed to serve primarily a particular city, town, political subdivision, or community which will be specified in the station license and the station will be considered to be located in such place. Unless licensed as a synchronous amplifier transmitter, each station shall maintain a studio, which will be known as the main studio, in the place where the station is located provided that the main studio may be located at the transmitter site whether or not the transmitter site is in the place where the station is located. A majority (computed on the basis of duration and not number) of a station's programs or in the case of a station affiliated with a network 2/3 of such station's non-network programs, whichever is smaller, shall originate from the main studio or from other studios or remote points situated in the place where the station is located.

(b) Stations will be licensed to serve more than one city, town, political subdivision, or community only where a satisfactory showing is made that each such place meets all the requirements of the rules and regulations of this subpart with substantial number of local live programs that the station can and will originate a respect to the location of main studios; from each such place; and that the requirements as to origination of programs contained in paragraph (a) of this section would place an unreasonable burden on the station if it were licensed to serve only one city, town, political subdivision or community. A station licensed to serve more than one place shall be considered to be located in and shall maintain main studios in each such place. With respect to such station the requirements as to origination of programs contained in paragraph (a) of this section shall be satisfied by the origination of programs from any or all of the main studios or from other studios and remote points situated in any or all of the places in which the main studios are located.

(c) The transmitter of each standard broadcast station shall be so located that primary service is delivered to the borough or city in which the main studio is located in accordance with the rules and regulations of this subpart.

§73.31. Authority to move main studio.—The licensee of a station shall not move its main studio outside the borders of the borough or city, state, district, territory, or possession in which it is located, unless such move is to the location of the station's transmitter, without first securing a modification of construction permit or license. The licensee shall promptly notify the Commission of any other change in location of the main studio.

In FM rules . . .

§73.210 — [EDITOR'S NOTE: In substance the same as §73.30, above, except that subsection (c) reads as follows.

(c) The transmitter of each FM broadcast station shall be so located that, on the basis of the effective radiated power and antenna height above average terrain employed, a minimum field strength of 70 decibels above one microvolt per meter, or 3.16 millivolts per meter, will be provided over the entire principal community to be served.

In TV rules . . .

§73.613 Main studio location.—(a) The main studio of a television broadcast station shall be located in the principal community to be served. Where the principal community to be served is a city, town, village or other political subdivision, the main studio shall be located within the corporate boundaries of such city, town, village or other political subdivision. Where the principal community to be served does not have specifically defined political boundaries, applications will be considered on a case-to-case basis in the light of the particular facts involved to determine whether the main studio is located within the principal community to be served.

(b) In cases where an adequate showing is made that there is good cause for locating a main studio outside the principal community to be served and that to do so would not be inconsistent with the operation of the station in the public interest, the Commission will permit the use of a main studio location other than that specified in paragraph (a) of this section. The licensee or permittee of a television broadcast station shall not move his main studio outside the principal community in which it is located without first securing a modification of construction permit or license. Such a licensee or permittee shall notify the Commission promptly of any change of the location of the main studio within the community. In any case where the main studio is located outside the principle community to be served, the licensee or permittee of a television broadcast station shall not move his main studio without first securing a modification of construction permit or license.

OPERATING SCHEDULES

For AM stations . . .

§73.71 Minimum operation schedule.—(a) All standard broadcast stations are required to maintain an operating schedule of not less than two-thirds of the total hours they are authorized to operate between 6 a.m. and 6 p.m., local standard time, and two-thirds of the total hours they are authorized to operate between 6 p.m. and midnight, local standard time, on each day of the week except Sunday: Provided, however, that stations authorized for daytime operation only need comply only with the minimum requirement for operation between 6 a.m. and 6 p.m.

(b) In the event that causes beyond the licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

§73.72 Operation during experimental period.—The licensee of each standard broadcast station shall operate or refrain from operating its station during the experimental period as directed by the Commission in order to facilitate frequency measurement or for the determination of interference.

§73.73 Specified hours.—If the license of a station specifies the hours of operation, the schedule so specified shall be adhered to except as provided in §§73.71 and 73.72.

www.americanradiohistory.com

time or vice versa.) Such option may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

NOTE: As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

NOTE: All time options permitted under this section must be for specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

§73.135 Right to reject programs.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a) with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable: or which (b) with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

§73.136 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability in (terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

NOTE: Effective date of this section with respect to any station may be extended from time to time in order to permit the orderly disposition of properties; and it shall be suspended indefinitely with respect to regional network organizations.

§73.137 Dual network operation.—No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network: provided, that this section shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

§73.138 Control by networks of station rates.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

In FM rules . . .

§73.231-73.238, inclusive—

[EDITOR'S NOTE: Same as §§73.131-73.138, above with the following exceptions: (1) references are to FM rather than standard stations and networks; and (2) the section on "Network Ownership of Stations" is changed to read as follows:

§73.236 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common controls of a network organization, for an FM broadcast station in any locality where the existing FM broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters, that competition would be substantially restrained by such licensing. (The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.)

In TV rules . . .

§73.658. Affiliation agreements.— (a) Exclusive affiliation of station. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

(The term "network organization" as used herein includes national and regional network organizations. See chapter VII, J. of Report on Chain Broadcasting.)

(b) Territorial exclusivity. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another broadcast station in the same community from broadcasting the network's programs not taken by the former stations, or which prevents or hinders another broadcast station located in a different community from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its community upon the program of the network organization. As employed in this paragraph the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

(c) Term of Affiliation. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than 2 years: Provided that a contract, arrangement, or understanding for a period of up to two years may be entered into within 6 months prior to take commencement of such period.

(d) Station commitment of broadcast time. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with any network organization, which provides for optioning of the station's time to the network organization, or which has the same restraining effect as time optioning. As used in this section, time optioning is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

(e) Right to reject programs. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which, with respect to programs offered or already contracted for pursuant to an affiliation contract, prevents or hinders the station from (1) rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable or contrary to the public interest, or (2) substituting a program which in the station's opinion, is of greater local or national importance.

(f) Network ownership of stations. No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control of a network organization, for a television broadcast station in any locality where the existing television broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used in this section is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

(g) Dual network operation. No license shall be issued to a television broadcast station affiliated with a network organization which maintains more than one network of television broadcast stations: Provided, that this section shall not be applicable, if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

(h) Control by networks of station rates. No license shall be granted to a television broadcast station having any contract, arrangement or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

(i) No license shall be granted to a television broadcast station which is represented for the sale of non-network time by a network organization or by an organization directly or indirectly controlled by or under common control with a network organization, if the station has any contract, arrangement or understanding, express or implied, which provides for the affiliation of the station with such network organization; provided, however, that this rule shall not be applicable to stations licensed to a network organization or to a subsidiary of a network organization.

COMMON ANTENNA SITE

§73.635. Use of common antenna site. No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for television broadcasting in a particular area and (a) which is not available for use by other television licensees; and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a particular area or would unduly restrict competition among television stations.

REPORTS TO BE FILED

All broadcast stations . . .

§1.611 Financial report.—Each licensee or permittee of a commercially operated standard, FM, television, or international broadcast station (as defined in Part 73 of this chapter) shall file with the Commission on or before April 1 or each year, on FCC Form 324, an annual financial report.

§1.613 Filing of contracts.—Each licensee or permittee of a standard, FM, television, or international broadcast station (as defined in Part 73 of this chapter), whether operating or intending to operate on a commercial or non-commercial basis, shall file with the Commission copies of the following contracts, instruments, and documents together with amendments, supplements, and cancellations, within 30 days of execution thereof. The substance of oral contracts shall be reported in writing.

(a) Contracts relating to network service. All network affiliation contracts, agreements, or understandings between a station and a national, regional, or other network shall be filed. Transcription agreements or contracts for the supplying of film for the television stations which specify option time must be filed. This section does not require the filing of transcription agreements or contracts for the supplying of film for television stations which do not specify option time, nor contracts granting the right to broadcast music such as ASCAP, BMI, or SESAC agreements.

(b) Contracts relating to ownership or control. Contracts, instruments, or documents relating to the present or future ownership or control of the licensee or permittee or of the licensee's or permittee's stock, rights, or interests therein, or relating to changes in such ownership or control. This paragraph shall include but is not limited to the following:

(1) Articles of partnership, association, and incorporation, and changes in such instruments;

(2) Bylaws, and any instruments effecting changes in such bylaws;

(3) Any agreement, document, or instrument (i) providing for the assignment of a license or permit or (ii) affecting, directly or indirectly, the ownership or voting rights of the licensee's or permittee's stock (common or preferred, voting or non-voting), such as: (a) Agreements for transfer of stock; (b) Instruments for the issuance of new stock; or (c) Agreements for the acquisition of licensee's or permittee's stock by the issuing licensee or permittee corporation. Pledges, trust agreements, options to purchase stock and other executory agreements are required to be filed.

(4) Proxies with respect to the licensee's or permittee's stock running for a period in excess of one year; and all proxies, whether or not running for a period of one year, given without full and detailed instructions binding the nominee to act in

www.americanradiohistory.com

a specified manner. With respect to proxies given without full and detailed instructions, a statement showing the number of such proxies, by whom given and received, and the percentage of outstanding stock represented by each proxy shall be submitted by the licensee or permittee within 30 days after the stockholders' meeting in which the stock covered by such proxies has been voted: Provided, however, that when the licensee or permittee is a corporation having more than 50 stockholders, such complete information need be filed only with respect to proxies given by stockholders who are officers or directors, of who have 1% or more of the corporation's voting stock; in cases where the licensee or permittee is a corporation having more than 50 stockholders and the stockholders giving the proxies are neither officers or directors nor hold 1% or more of the corporation's stock, the only information required to be filed is the name of any person voting 1% or more of the stock by proxy, the number of shares voted by proxy by such person, and the total number of shares voted at the particular stockholders' meeting in which the shares were voted by proxy:

(5) Mortgage or loan agreements containing provisions restricting the licensee's or permittee's freedom of operation, such as those affecting voting rights, specifying or limiting the amount of dividends payable, the purchase of new equipment, the maintenance of current assets, etc.; or

(6) Any agreement reflecting a change in the officers, directors, or stockholders of a corporation, other than the licensee or permittee, having an interest, direct or indirect, in the licensee or permittee as specified by §1.615.

(c) Contracts relating to the sale of broadcast time to "time brokers" for resale.

(d) Contracts relating to Subsidiary Communications Authorization Operation, except contracts granting licensees or permittees engaged in SCA the right to broadcast copyright music.

(e) Time sales contracts. Time sales contracts with the same sponsor for 4 or more hours per day, except where the length of the events (such as athletic contests, musical programs, and special events) broadcast pursuant to the contract is not under control of the station.

(f) Contracts relating to personnel.

(1) The following contracts, agreements, or understandings shall be filed: management consultant agreements with independent contractors; contracts relating to the utilization in a management capacity of any person other than an officer, director, or regular employee of the licensee or permittee station; management contracts with any persons, whether or not officers, directors, or regular employees which provide for both a percentage or profits and a sharing in losses, of any similar agreements.

(2) The following contracts, agreements, or understandings need not be filed: agreements with persons regularly employed as general or station managers or salesmen; contracts with program managers or program personnel; contracts with chief engineers or other engineering personnel except those contracts required to be filed under the provisions of §§73.93(c), 73.265 (c), and 73.565(c); contracts with attorneys, accountants, or consulting radio engineers; contracts with performers; contracts with station representatives; contracts with labor unions; or any similar agreements.

§1.615 Ownership reports.—(a) Each licensee of a TV, FM or standard broadcast station (as defined in Part 73 of this chapter), other than noncommercial educational stations, shall file an Ownership Report (FCC Form 323) at the time the application for renewal of station license is required to be filed: Provided, however, the licensees owning more than one TV, FM, or standard broadcast station need file only one Ownership Report at 3-year intervals. Ownership Reports shall give the following information as of a date not more than 30 days prior to the filing of the Ownership Report:

(1) In the case of an individual, the name of such individual;

(2) In the case of a partnership, the names of the partners and the interest of each partner;

NOTE: Any change in partners or in their rights will require prior consent of the Commission upon an application for consent to assignment of license or permit. If such change involves less than a controlling interest, the application for Commission consent to such change may be made upon FCC Form 316 (Short Form).

(3) In the case of a corporation, association, trust, estate. or receivership, the data applicable to each:

(i) The name, residence, citizenship, and stock-holdings of officers, directors, stockholders, trustees, executors, administrators, receivers, and members of any association;

(ii) Full information as to family relationship of business association between two or more officials, and/or stockholders, trustees, executors, administrators, receivers, and members of any association;

(iii) Capitalization with a description of the classes and voting power of stock authorized by the corporate charter or other appropriate legal instrument and the number of shares of each class issued and outstanding; and

(iv) Full information on FCC Form 323 with respect to the interest, and identity of any person having any direct, indirect, fiduciary, or beneficiary interest in the licensee or any of its stock;

For example:

(a) Where A is the beneficial owner or votes stock held by B, the same information should be furnished for A as is required for B.

(b) Where X corporation controls the licensee, or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of the licensee, the same information should be furnished with respect to X corporation (its capitalization, officers, directors, and stockholders and the amount of stock [by class] in X held by each) as is required in the case of the licensee, together with full information as to the identity and citizenship of the person authorized to vote licensee's stock, in case of voting stock.

(c) The same information should be furnished as to Y corporation if it controls X corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of X, and as to Z corporation if it controls Y corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of Y and so on back to natural persons.

(4) In the case of all licensees:

(i) A list of all contracts still in effect required to be filed with the Commission by §1.342 showing the date of execution and expiration of each contract; and

(ii) Any interest which the licensee may have in any other broadcast station.

(b) A permittee shall file an Ownership Report (FCC Form 323) within 30 days of the date of grant by the Commission of an application for original construction permit. The Ownership Report of the permittee shall give the information required by the applicable portions of paragraph (a) of this section.

(c) A supplemental Ownership Report (FCC Form 323) shall be filed by each licensee or permittee within 30 days after any change occurs in the information required by the Ownership Report from that previously reported. Such report shall include without limitation:

(1) Any change in capitalization or organization;

(2) Any change in officers and directors;

(3) Any transaction affecting the ownership, direct or indirect, or voting rights of licensee's or permittee's stock, such as:

(i) A transfer of stock;

(ii) Issuance of new stock or disposition of treasury stock; or

(iii) Acquisition of licensee's or permittee's stock by the issuing corporation; or

(4) Any change in the officers, directors, or stockholders of a corporation other than the licensee or permittee such as X, Y, or Z corporation described in the example in paragraph (a) (3) of this section.

NOTE: Before any change is made in the organization, capitalization, officers, directors, or stockholders of a corporation other than licensee or permittee, which results in a change in the control of the licensee or permittee, prior Commission consent must be received under Section 310(b) of the Communications Act and §1.329. A transfer of control takes place when an individual, or group in privity, gains or loses affirmation or negative (50%) control. See instruction on FCC Form 323 "Ownership Report."

(d) Exceptions: Where information is required under paragraphs (a), (b), or (c) of this section with respect to a corporation or association having more than 50 stockholders or members, such information need be filed only with respect to stockholders or members who are officers or directors of the corporation or association, or to other stockholders or members who have 1% or more of either the voting or non-voting stock of the corporation or voting rights in the association.

(e) The provisions of this paragraph apply to all licensees and permittees of noncommercial educational TV, FM, or standard broadcast stations.

(1) Each licensee covered by this paragraph shall file an Ownership Report (FCC Form 323E): Provided, however, that licensees owning more than one noncommercial educational TV, FM, or standard broadcast station need file only one Ownership Report at 3-year intervals. Ownership Reports shall give the following information as of a date not more than 30 days prior to the filing of the Ownership Report:

(i) The following information as to all officers, members of governing board, and holders of 1 percent or more ownership interest (if any): Name, residence, office held, citizenship, principal profession or occupation, and by whom appointed or elected.

(ii) Full information on FCC Form 323E with respect to the interest and identity of any individual, organization. corporation, association, or any other entity which has direct or indirect control over the licensee or permittee.

(iii) A list of all contracts still in effect required by §1.342 to be filed with the Commission, showing the date of execution and expiration of each contract.

(iv) Any interest which the licensee or permittee or any of its officers, members of the governing board, and holders of 1 percent or more ownership interest (if any) hold in any other broadcast station.

(2) A permittee shall file an Ownership Report (FCC Form 323E) within 30 days of the date of grant by the Commission of an application for original construction permit. The Ownership Report of the permittee shall give the information required by the applicable portions of this paragraph.

(3) A supplemental Ownership Report (FCC Form 323E) shall be filed by each licensee or permittee within 30 days after any change occurs in the information required by Ownership Report from that previously reported. Such report should include, without limitation:

(i) Any change in organization:

(ii) Any change in officers or directors;

(iii) Any transaction affecting the ownership (direct or indirect) or voting rights with respect to the licensee or permittee (or with respect to any stock interest therein).

(f) A copy of all ownership and supplemental ownership reports and related material filed pursuant to this section shall be maintained and made available for public inspection locally as required by §1.526.

§1.526 Records to be maintained locally for public inspection by applicants, permittees, and licensees.

(a) Every applicant for a construction permit for a new station in the broadcast services shall maintain for public inspection a file for such station containing the material in subparagraph (1) of this paragraph, and every permittee or licensee of a station in the broadcast services shall maintain for public inspection a file for such station containing the material in subparagraphs (1), (2), (3), and (4) of this paragraph, as follows.

(1) a copy of every application tendered for filing by the applicant for such station after May 13, 1965, pursuant to the provisions of this part, with respect to which local public notice is required to be given under the provisions of §1.580 or 1.594; and all exhibits, letters and other documents tendered for filing as part thereof, all amendments thereto, copies of all documents incorporated therein by reference, all correspondence between the Commission and the applicant pertaining to the application after it has been tendered for filing, and copies of Initial Decisions and Final Decisions in hearing cases pertaining thereto. Information incorporated by reference which is already in the local file need not be duplicated if the entry making the reference sufficiently identifies the information so that it may be found in the file, and if there has been no change in the document since the date of filing and the applicant, after making the reference, so states.

(2) A copy of every application tendered for filing by the licensee or permittee for such station after May 13, 1965, pursuant to the provisions of this part, which is not included in subparagraph (1) of this paragraph and which involves changes in program service, which requests an extension of time in which to complete con-

www.americanradiohistory.com

§73.79 License to specify sunrise and sunset hours.—If the licensee of a broadcast station is required to commence or cease operation, or to change the mode of operation of the station at the times of sunrise and sunset at any particular location, the controlling times of each month of the year are set forth in the station's instrument of authorization. Uniform sunrise and sunset times are specified for all of the days of each month, based upon the actual times of sunrise and sunset for the fifteenth day of that month adjusted to the nearest quarter hour. In accordance with a standardized procedure described therein, actual sunrise and sunset time are derived by interpolation in the tables of the 1946 American Nautical Almanac, issued by the Nautical Almanac Office of the United States Naval Observatory.

§73.80 Secondary station; filing of operating schedule.—The license of a secondary station authorized to operate limited time and which may resume operation at the time the dominant station (or stations) on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a coby of its regular operating schedule, bearing a signed notation by the licensee of the dominate station of its objection or lack of objection thereto. Upon approval of such operating schedule, the Commission will affix its file mark and return one copy to the licensee authorized to operate limited time, which shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be permitted only in accordance with the procedure set forth in §73.77.

§73.81 Secondary station; failure to reach agreement.—If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the Commission shall be so notified by the licensee of the station authorized limited time. After receipt of such statement the Commission will designate for hearing the applications of both stations for renewal of license, and pending the hearing the schedule previously adhered to shall remain in full force and effect.

§73.82 Departure from schedule; material violation.—In all cases where a station licensee is required to prepare and file an operating schedule, any deviation or departure from such schedule, except as herein authorized, shall be considered as a violation of a material term of the license.

§73.83 Local standard time.—All references herein to standard time or local standard time refer to local standard time as determined and fixed by the Interstate Commerce Commission.

§73.84 Daylight saving time.—If local time is changed from standard time to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of all such stations on that channel shall be understood to refer to daylight saving time, and not standard time, as long as daylight saving time is observed at such location. This provision shall govern when the time is changed by provision of law or general observance of daylight saving time by the various communities, and when the time of operation of such stations is specified in the license or is mutually agreed upon by the licensees; provided, however, that when the license specifies average time of sunrise and sunset, local standard time shall be observed. In no event shall a station licensed for daytime only operate on regular schedule prior to local sunrise, or shall a station licensed for greater daytime power than nighttime power or for a different radiation pattern for daytime operation than for nighttime operation operate with the daytime power or radiation pattern prior to local sunrise.

§73.85 Changes in time; agreement between licensees.—Where the local time is not changed from standard to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of such stations shall be understood to have reference to standard time, and not daylight saving time, unless said licensees mutually agree upon a new schedule which shall be effective only while daylight saving time is observed at the location of some of these stations.

§73.86. Local standard time: license provisions.—The time of operation of any broadcast station which does not share time with other stations on the same channel shall be understood to have reference to local standard time unless modification of such license with respect to hours of operation is authorized by the Commission.

§73.87 Program transmission prior to local sunrise.— (a) The provisions of §§73.6, 73.8, 73.9, 73.10, 73.23, 73.79 and 73.84 shall not prevent the transmission of programs between four o'clock a.m., local standard time, and local sunrise of standard broadcast stations with their authorized daytime facilities, provided, that the provisions of this rule shall not extend to:

(1) Stations regularly sharing time during daylight hours either under licenses pursuant to which time-sharing agreements have been entered into or licenses specifying hours of operation, unless time-sharing agreements have been reached covering such operation prior to local sunrise. Sections 73.74, 73.77, and 73.78 shall be applicable to such agreements.

(2) Any Class II station which by use of its daytime facilities causes objectionable interference, as determined by the standard broadcast Technical Standards of the subpart or by the engineering standards of NARBA or the U.S./Mexican Agreement (whichever is controlling) within the 0.5 mv/m 50 percent time skywave contour of any Class I station of the United States, Mexico or any country party to NARBA, except (i) where the Class I station is located east of the Class II station, in which case operation may begin at local sunrise at the Class I station; (ii) where an agreement has been reached with the United States Class I station affected to begin operation prior to local sunrise.

(3) Operation by use of its daytime facilities of any Class II station on any Class I-A channel not assigned to the United States under the North American Regional Broadcasting Agreement or under the U.S./Mexican Agreement.

(4) Class IV stations authorized for operation with daytime power in excess of 250 watts.

(b) Any station operating during such hours receiving notice from the Commission that undue interference is caused shall refrain from such operation during such hours pending further notice from the Commission.

(c) Nothing contained in outstanding instruments of authorization for such stations shall prohibit such operation except as herein provided.

(d) The period 4 a.m. to 6 a.m., local standard time, shall not be included in determining compliance with §73.71.

(e) Restrictions imposed by §73.187 on daytime operations shall apply to presunrise operation under this section.

EDITOR'S NOTE: Further notice of proposed rulemaking adopted Nov. 28, 1962, would permit daytime-only stations in areas without unlimited time stations to begin operating at 6 a.m. or sunrise, whichever is earlier. Grants authorizing such operation would be conditioned on stations limiting power to 500 w and to using directional antenna.

§73.88 Blanketing interference.—The licensee of each broadcast station is required to satisfy all reasonable complaints of blanketing interference with the 1 v/m contour.

For FM stations . . .

§73.242 Duplication of AM and FM programing.—(a) After October 15, 1965, licensees of FM stations in cities of over 100,000 population (as listed in the latest U. S. Census Reports) shall operate so as to devote no more than 50 percent of the average FM broadcast week to programs duplicated from an AM station owned by the same licensee in the same local area. For the purposes of this paragraph, duplication is defined to mean simultaneous broadcasting of a particular program over both the AM and FM station or the broadcast of a particular FM program within 24 hours before or after the identical program is broadcast over the AM station.

(b) Compliance with the non-duplication requirement shall be evidenced by such showing in connection with renewal applications as the Commission may require.

(c) Upon a substantial showing that continued program duplication over a particular station would better serve the public interest than immediate non-duplication, a licensee may be granted a temporary exemption from the requirements of paragraph (a) of this section. Requests for such exemption must be submitted to the Commission, accompanied by supporting data, at least 6 months prior to the time the non-duplication requirement of paragraph (a) of this section is to become effective as to a particular station. Such exemption, if granted, will ordinarily run to the end of the station's current license period, or if granted near the end of the license period, for some other reasonable period not to exceed 3 years.

§73.261 Time of operation.—(a) All FM broadcast stations will be licensed for unlimited time operation. A minimum of 36 hours per week during the hours of 6 a.m. to midnight, consisting of not less than 5 hours in any one day, except Sunday, must be devoted to the fm broadcast operation.

(b) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

§73.262 Experimental operation. — The period between 1:00 a.m. and 6:00 a.m., local standard time, may be used for experimental purposes in testing and maintaining apparatus by the licensee of any fm broadcast station on its assigned frequency and not in excess of its authorized power, without specific authorization by the Commission.

For TV stations . . .

§73.651 Time of operation.—(a) (1) All television broadcast stations will be licensed for unlimited time operation. Each such station shall maintain a regular program operating schedule as follows: not less than 2 hours daily in any five broadcast days per week and not less than a total of 12 hours per week during the first 18 months of the station's operation; not less than 2 hours daily in any 5 broadcast days per week and not less than a total of 16 hours, 20 hours and 24 hours per week for each successive 6-month period of operation, respectively; and not less than a total of 28 hours per week thereafter.

(2) "Operation" includes the period during which a station is operated pursuant to temporary authorization or during program tests, as well as during the license period. Time devoted to test patterns, or to aural presentations accompanied by the incidental use of fixed visual images which have no substantial relationship to the subject matter of such aural presentations, shall not be considered in computing periods of program service.

(3) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) (1) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the engineer in charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

(b) Noncommercial educational television broadcast stations are not required to operate on a regular schedule and no minimum number of hours of operation is specified; but the hours of actual operation during a license period shall be taken into account when considering the renewal of noncommercial educational television broadcast licenses.

(c) (1) The aural transmitter of a television station shall not be operated separately from the visual transmitter except for the following purposes:

(i) For actual tests of station equipment or actual experimentation in accordance with §73.666; and

(ii) For emergency "fills" in case of visual equipment failure or unscheduled and unavoidable delays in presenting visual programs. In such situations the aural transmitter may be used to advise the audience of difficulties and to transmit for a short period program material of such nature that the audience will be enabled to remain tuned to the station: for example, music or news accompanying a test pattern or other visual persentation.

(2) During periods of transmission of a test pattern on the visual transmitter of a television station, aural transmission shall consist only of a single tone or

www.americanradiohistory.com

series of variable tones. During periods when still pictures or slides are employed to produce visual transmissions which are accompanied by aural transmissions, the aural and visual transmission shall be integral parts of a program or announcement and shall have a substantial relationship to each other; Provided: That nothing herein shall preclude the transmission of a test pattern, still picture or slides for the following purposes and periods:

(1) To accompany aural announcements of the station's program schedule and aural news broadcasts or news commentaries, for a total period not to exceed one hour in any broadcast day.

(ii) To accompany aural transmissions for a period of time not to exceed fifteen minutes immediately prior to the commencement of a programming schedule.

Examples: (1) Duplication of AM or FM programs on the aural transmitter of a television station while the same program is broadcast on the visual transmitter (i.e., a "simulcast") is consistent with this paragraph.

(2) Duplication of AM or FM programs on the aural transmitter of a television station while a test pattern is broadcast on the visual transmitter is not consistent with this paragraph, except for the specific purposes and periods specified in paragraph (c) (2).

(3) A travel lecture in which the words of the lecturer are broadcast simultaneously with still pictures or slides of scenes illustrating the lecture, and a newscast in which the words of the newscaster are broadcast simultaneously with still pictures or slides of the news events, are examples of programs in which the aural and visual transmission are integral parts of the same program having a substantial relationship to each other, within the meaning of paragraph (c) (2). Mood music unrelated to the visual transmission is not consistent with this paragraph.

(4) The broadcast of a test pattern accompanied by a musical composition for the purpose of demonstration, sale, installation or orientation of television receivers, or receiving antennas is not consistent with this paragraph.

(5) Music accompanying the transmission of a test pattern upon which is visually imposed a moving test consisting of continuous program material, such as a running newscast or news commentary, is consistent with this paragraph.

(6) Music accompanying the transmission of a test pattern upon which is visually imposed a clock indicating the time of day, or a text that is changed at spaced intervals, is not consistent with this paragraph.

OPERATOR REQUIREMENTS

In AM rules . . .

§73.93 Operator requirements.—(a) One or more radio operators holding a valid radiotelephone first-class operator license, except as provided in paragraph (b) of this section, shall be in actual charge of the transmitting apparatus and shall be on duty either at the transmitter location or remote control point. If operation by remote control has not been authorized, the transmitter shall be readily accessible and clearly visible to the operator at his normal operating position. If operation by remote control is authorized, the control and monitoring equipment shall be readily accessible and clearly visible to the operator at his normal operating position.

(b) In the cases where a station is authorized for non-directional operation with power not in excess of 10 kilowatts, the routine operation of the transmitter may be performed by an operator holding a valid first-class or second-class radiotelephone or radiotelegraph operator license or a radiotelephone third-class operator permit which has been endorsed for broadcast station operation. The operator shall be on duty at the transmitter or authorized remote control point and in actual charge thereof. Except at times when the operation of the station is under the immediate supervision of an operator holding a valid radiotelephone first-class operator license, adjustments of the transmitting equipment shall be limited to the following:

(1) Those necessary to turn the transmitter on and off.

(2) Adjustments of external controls as may be required to compensate for voltage fluctuations in the power supply.

(3) Adjustments of external controls to maintain modulation of the transmitter within the prescribed limits.

(4) Adjustments of external controls necessary to effect routine changes in operating power which are required by the station's instrument of authorization.

(5) Adjustments of external control necessary to effect operation in accordance with a National Defense Emergency Authorization during an Emergency Action Condition.

It shall be the responsibility of the licensee to insure that the person who may be required to perform these tasks as well as to perform other duties (such as reading meters and making log entries), is properly instructed so as to be capable of performing the duties required of him at times when not under the immediate supervision of a radiotelephone first-class operator. Where necessary, printed step-by-step instructions shall be posted for those transmitter adjustments which the lesser grade operator is authorized to make. Should the transmitting apparatus be observed to be operating in any manner inconsistent with this subpart or the current instrument of authorization for the station at any time when an operator holding a valid radiotelephone first-class operator license is not immediately available and none of the above adjustments is effective in correcting the condition of improper operation, the emissions of the station shall be immediately terminated.

(c) If the routine operation of the transmitting apparatus at a standard broadcast station with power of 10 kw or less and non-directional antenna is performed by an operator other than a radiotelephone first-class operator pursuant to the provisions of paragraph (b) of this section, the licensee shall either employ one or more operations holding a valid radiotelephone first-class operator license as a full-time member of the station staff or, in the alternative, contract in writing for the services on a part-time basis of one or more such operators. The radiotelephone first-class operator or operators shall perform transmitter maintenance and shall be promptly available at all times to correct conditions of improper operation beyond the scope of authority of the lesser grade operator on duty. If such services are on a contract part-time basis, a signed copy of the agreement shall be kept in the files of the station and at the transmitter or control point and shall be made available for inspection upon request by any authorized representative of the Commission. A signed copy of the agreement shall also be forwarded to the Commission and to the Engineer in Charge of the radio district in which the station is located within 3 days after the agreement is signed.

NOTE: During the period prior to April 19, 1964, the alternative of contracting in writing for the services of radiotelephone first-class operators on a part-time basis may not be followed unless the routine transmitter operation under the provisions of paragraph (b) of this section is performed by operators holding at least valid radiotelephone third-class operator permits which have been endorsed for broadcast station operation. Information concerning examinations for such operator permits is available to all applicants through the Commission's field offices.

(d) The licensed operator on duty and in charge of a standard broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another radio station or stations in accordance with the class of operator's license which he holds and the rules and regulations governing such other stations: Provided, however, that such duties shall in nowise interfere with the proper operation of the standard broadcast transmitter.

(e) At all standard broadcast stations, a complete inspection of all transmitting equipment in use shall be made by an operator holding a valid radiotelephone first-class operator license at least once each day, 5 days each week, with an interval of not less than 12 hours between successive inspections. This inspection shall include such tests, adjustments, and repairs as may be necessary to insure operation in conformance with the provisions of this subpart and the current instrument of authorization for the station.

In FM rules . . .

§73.265 Operator requirements.

[EDITOR'S NOTE: Substantially the same as §73.93.]

In TV rules . . .

§73.661 Operator requirements. — One or more operators holding a valid radiotelephone first class operator license shall be on duty at the place where the transmitting apparatus is located or at a remote control point established pursuant to the provisions of §73.676, and in actual charge thereof whenever the transmitter is delivering power to the transmitting antenna. The original license (or FCC Form 759) of each station operator shall be posted at the place where he is on duty. The licensed operator on duty and in charge of a television broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another station or stations in accordance with the class of license which he holds and the rules and regulations governing such other stations. However, such other duties shall in nowise impair or impede the required supervision of the television broadcast transmitter. If operation by remote control has not been authorized, the transmitter shall be readily accessible and clearly visible to the operator at his normal operating position. If operation by remote control is authorized, the control and monitoring equipment shall be readily accessible and clearly visible to the operator at his normal operating position.

FACSIMILE

§73.266 Facsimile broadcasting and multiplex transmission.—(a) FM broadcast stations may transmit simplex facsimile in accordance with transmission standards set forth in §73.318 during periods not devoted to FM aural broadcasting. Such transmissions may not exceed one hour during the period between 7 a.m. and midnight (no limit for the hours between midnight and 7 a.m.) and may not be counted toward the minimum operation required by §73.261. The Commission shall be notified by the licensee of the FM broadcast station of its intent to transmit such facsimile.

(b) FM broadcast stations may, upon securing authorization from the Commission, transmit multiplex facsimile in accordance with transmission standards set forth in §73.318; provided that the transmission of such facsimile does not reduce the quality of aural programs simultaneously transmitted by the licensee below that required by the technical standards of this subpart and that no degradation of such aural programs will result from such facsimile transmissions when received on FM receivers not equipped with filter or other additional equipment.

NETWORK AFFILIATION

In AM rules . . .

§73.131 Exclusive affiliation of station.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization. (The term "network organization" as used herein includes national and regional network organizations. See Chapter VII, J of Report on Chain Broadcasting.)

§73.132. Territorial exclusivity. —No license shall be granted to a standard broadcast station having any contract arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This section shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary organization.

§73.133 Term of affiliation.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years; provided, that a contract, arrangement, or understanding for a period up to two years, may be entered into within six months prior to the commencement of such period.

§73,134 Option time.—No license shall be granted to a standard broadcast station which options for network programs any time subject to call on less than 56 days' notice, or more time than total of three hours within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8:00 a.m. to 1:00 p.m.; 1:00 p.m. to 6:00 p.m.; 6:00 p.m. to 11:00 p.m.; 11:00 p.m. to 8:00 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year, regardless of shifts from standard to daylight saving

www.americanradiohistory.com

ties in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

(b) The licensee of a standard broadcast station may, without further authority of the Commission, rebroadcast the program of a United States standard or high frequency broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

The foregoing requirements concerning notification of call letters and certification of authority shall not apply to a station when rebroadcasting Defense Network (FM) programs. Blanket authorizations for the rebroadcast of such programs have been filed with the commission by all Defense Network (FM) stations.

NOTE: The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a standard broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

(c) (1) The licensee of a standard broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of a United States international broadcast station.

(2) The licensee of a standard broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast any program of a United States international broadcast station.

(3) In the case of any rebroadcast under the provisions of this paragraph (c), the Commission shall be notified of the call letters of each station whose programs are rebroadcast and the licensee shall certify that express authority has been received from the licensee of the station originating the program.

(d) No licensee of a standard or high frequency broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification of consent of the licensee of the station originating the program.

NOTE: The broadcasting of a program relayed by a remote pickup broadcast station (§74.401) is not considered a rebroadcast. Informal application may be employed. By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, §73.121(d) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U.S. Government radio stations.

(e) In case of a program rebroadcast by several standard broadcast stations, such as a chain rebroadcast, the person legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcast both from the Commission and from the person or licensee of the station originating the program.

(f) Attention is directed to section 325 (b) of the Communications Act of 1934, which reads as follows:

No person shall be permitted to locate, use, or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there, having a power output of sufficient intensity, and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission, upon proper application therefor. [See §1.327.]

In TV rules . . .

§73.655 Rebroadcast.—(a) The term "rebroadcast" as used below means reception by radio of the program of a television broadcast station, and the simultaneous or subsequent retransmission of such programs by a broadcast station. The broadcasting of a program relayed by an auxiliary broadcast station licensed to the television broadcast station is not considered a rebroadcast. (As used in this section, program includes any complete program or part thereof.)

(b) The licensee of a television broadcast station may, without further authority of the Commission, rebroadcast the program of a United States television broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

NOTE: The notice and certification of consent shall be given within 3 days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a television broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for such rebroadcast practice if begun during a license period.

(c) No licensee of a television broadcast station shall rebroadcast the program of any United States radio station not designated in paragraph (b) of this section without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program. The foregoing requirements concerning notification of call letters and certification of authority shall not apply to a station when rebroadcasting Defense Network (FM) programs. Blanket authorizations for the rebroadcast of such programs have been filed with the commission by all Defense Network (FM) stations.

REVOCATIONS, MODIFICATIONS, SUSPENSIONS

(All Classes of Station Licenses)

§1.87 Modification of license or construction permit on motion of the Commission.—(a) Whenever it appears that a station license or construction permit should be modified, the Commission will notify the licensee or permittee in writing of the proposed action and the grounds and reasons therefor and direct him to show cause why an order modifying the license or construction permit in the manner proposed by the Commission should not be issued.

(b) Any order to show cause issued in accordance with paragraph (a) of this section will notify the licensee or permittee that he may request, within a period of time to be stated in the order to show cause, that a hearing be held on the proposed modification. In case of timely request, a hearing will be held on the proposed modification, in no event less than 30 days after the receipt of the order to show cause, unless the Commission finds that safety of life or property require the fixing of a shorter period.

(c) In order to avail himself of the right to request a hearing and of the opportunity to appear and give evidence upon the matters specified in the order to show cause, the licensee or permittee, in person or by his attorney shall, within the period of time as may be specified in the order to show cause, file with the Commission a written statement stating that he requests a hearing and will appear at the hearing and present evidence on the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter specified in the order to show cause and the permittee or licensee shall be limited in the hearing to matters fairly encompassed within the issues raised by the response.

(d) The right to request a hearing shall, unless a good cause is shown in a petition to be filed not later than 5 days before the lapse of the time specified in paragraph (c) of this section, be deemed waived:

(1) In case of failure to timely file a written statement as required by paragraph (c) of this section.

(2) In case of filing the written statement provided for in paragraph (c) of this section but failure to appear at the hearing, either in person or by counsel.

(e) Where the right to request a hearing is waived and no written statement has been filed within the period of time specified in the order to show cause, the licensee or permittee will be deemed to consent to the modification as proposed in the order to show cause and a final decision will be issued by the Commission accordingly.

(f) Where the right to request a hearing has been waived, a written statement may be filed within the period of time to be specified in the order to show cause, showing with particularity why the license or construction permit should not be modified or not so modified as proposed in the order to show cause. In this case, the Commission may, depending upon the facts alleged and proof offered, either call upon the submitting party to furnish additional information under oath, designate the proceeding for hearing, or issue without further proceedings an order modifying the construction permit or license as proposed in the order to show cause or in said written statement. The order to show cause will advise the person against whom it is directed of procedure set forth in this paragraph.

(g) Any order of modification issued pursuant to this section shall include a statement of the findings and the grounds and reasons therefor, shall specify the effective date of the order and shall be served on the licensee or permittee.

§1.89 Notice of violations.—(a) Any licensee who appears to have violated any provision of the Communications Act or any provision of this chapter shall be served with a written notice calling the facts to his attention and requesting a statement concerning the matter. FCC Form 793 may be used for this purpose.

(b) Within 10 days from receipt of notice or such other period as may be specified, the licensee shall send a written answer, in duplicate, direct to the office of the Commission originating the official notice. If an answer cannot be sent nor an acknowledgement made within such 10-day period by reason of illness or other unavoidable circumstances, acknowledgement and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay.

(c) The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. In every instance the answer shall contain a statement of action taken to correct the condition or omission complained of and to preclude its recurrence. In addition:

(1) If the notice relates to violations that may be due to the physical or electrical characteristics of transmitting apparatus and any new apparatus is to be installed, the answer shall state the date such apparatus was ordered, the name of the manufacturer, and the promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification shall be given as will permit ready identification of the application.

(2) If the notice of violation relates to lack of attention to or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

§1.91 Revocation and/or cease and desist proceedings: hearings.—(a) If it appears that a station license or construction permit should be revoked and/or that a cease and desist order should be issued, the Commission will issue an order directing the person to show cause why an order of revocation and/or a cease and desist order, as the facts may warrant, should not be issued.

(b) An order to show cause why an order of revocation and/or a cease and desist order should not be issued will contain a statement of the matters with respect to which the Commission is inquiring and will call upon the person to whom it is directed (the respondent) to appear before the Commission at a hearing, at a time and place stated in the order, but not less than thirty days after the receipt of such order, and give evidence upon the matters specified in the order to show cause. However, if safety of life or property is involved, the order to show cause may specify a hearing date less than thirty days from the receipt of such order.

(c) To avail himself of such opportunity for hearing, the respondent, personally or by his attorney, shall file with the Commission, within thirty days of the service of the order or such shorter period as may be specified therein, a written appearance stating that he will appear at the hearing and present evidence on the matters specified in the order. The Commission in its discretion may accept a late appearance. However, an appearance tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petition for acceptance of late appearance will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

www.americanradiohistory.com

(d) Hearings on the matters specified in such orders to show cause shall accord with the practice and procedure prescribed in this subpart and Subpart B of this part, with the following exceptions: (1) In all such revocation and/or cease and desist hearings, the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the Commission; and (2) the Commission may specify in a show cause order, when the circumstances of the proceeding require expedition, a time less than that prescribed in §§1.276 and 1.277 within which the initial decision in the proceeding shall become effective, exceptions to such initial decision must be filed, parties must file requests for oral argument, and parties must file notice of intention to participate in oral argument.

(e) Correction or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

(f) Any order of revocation and/or cease and desist order issued after hearing pursuant to this section shall include a statement of findings and the grounds therefor, shall specify the effective date of the order, and shall be served on the person to whom such order is directed.

§1.92 Revocation and/or cease and desist proceedings: after waiver of hearing.—(a) After the issuance of an order to show cause, pursuant to §1.91, calling upon a person to appear at a hearing before the Commission, the occurrence of any one of the following events or circumstances will constitute a waiver of such hearing and the proceeding thereafter will be conducted in accordance with the provisions of this section.

(1) The respondent fails to file a timely written appearance as prescribed in §1.91(c) indicating that he will appear at a hearing and present evidence on the matters specified in the order.

(2) The respondent, having filed a timely written appearance as prescribed in §1.91 (c), falls in fact to appear in person or by his attorney at the time and place of the duly scheduled hearing.

(3) The respondent files with the Commission, within the time specified for a written appearance in §1.91(c), a written statement expressly waiving his rights to a hearing.

(b) When a hearing is waived under the provisions of paragraph (a) (1) or (3) of this section, a written statement signed by the respondent denying or seeking to mitigate or justify the circumstances or conduct complained of in the order to show cause may be submitted within the time specified in §1.91(c). The Commission in its discretion may accept a late statement. However, a statement tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petitions for acceptance of a late statement will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(c) Whenever a hearing is waived by the occurrence of any of the events or circumstances listed in paragraph (a) of this section, the Chief Hearing Examiner (or the presiding officer if one has been designated) shall, at the earliest practicable date, issue an order reciting the events or circumstances constituting a waiver of hearing, terminating the hearing proceeding, and certifying the case to the Commission. Such order shall be served upon the respondent.

(d) After a hearing proceeding has been terminated pursuant to paragraph (c) of this section, the Commission will act upon the matters specified in the order to show cause in the regular course of business. The Commission will determine on the basis of all the information available to it from any source, including such further proceedings as may be warranted, if a revocation order and/or a cease and desist order should issue, and if so, will issue such order. Otherwise, the Commission will issue an order dismissing the proceeding. All orders specified in this paragraph will include a statement of the findings of the Commission and the grounds and reasons therefor, will specify the effective date thereof, and will be served upon the respondent.

(e) Corrections or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

(Of Operator Licenses)

§1.85 Suspension of operator licenses.—Whenever grounds exist for suspension of an operator license, as provided in Section 303(m) of the Communications Act, the Chief of the Safety and Special Radio Services Bureau, with respect to amateur operator licenses, or the Chief of the Field Engineering and Monitoring Bureau, with respect to commercial operator licenses, may issue an order suspending the operator license. No order of suspension in any operators' license shall take effect until 15 days' notice in writing of the cause for the proposed suspension has been given to the operator licensee, who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application before the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be designated for hearing by the Chief, Safety and Special Radio Services Bureau or the Chief, Field Engineering Bureau, as the case may be, and said order of suspension shall be held in abeyance until the conclusion of the hearing. Upon the conclusion of said hearing, the Commission may affirm, modify or revoke said order of suspension. If the license is ordered suspended, the operator shall send his operator license to the office of the Commission in Washington, D. C., on or before the effective date of the order, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

LOGS AND RECORDS

§1.6 Availability of station logs and records for Commission inspection.—(a) Station records and logs shall be made available for inspection or duplication at the request of the Commission or its representative. Such logs or records may be removed from the licensee's possession by a Commission representative or, upon request, shall be mailed by the licensee to the Commission by either registered mail, return receipt requested, or certified mail, return receipt requested. The return receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. A receipt shall be furnished when the logs or records are removed from the licensee's possession by a Commission representative and this receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. When the Commission has no further need for such records or logs, they shall be returned to the licensee. The provisions of this rule shall apply solely to those station logs and records which are required to be maintained by the provisions of this chapter.

(b) Where records or logs are maintained as the official records of a recognized law enforcement agency and the removal of the records from the possession of the law enforcement agency will hinder its law enforcement activities, such records will not be removed pursuant to this section if the Chief of the law enforcement agency shall promptly certify in writing to the Federal Communications Commission that the removal of the logs or records will hinder law enforcement activities of the agency, and stating insofar as feasible the basis for his decision and the date when it can reasonably be expected that such records may be released to the Federal Communications Commission.

LOTTERIES

§3.122 Lotteries.—(a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a broadcast station, will not be granted where the applicant proposes to follow or continue to follow a policy or practice of broadcasting or permitting "the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all such prizes." (See 18 U.S.C. §1304.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of paragraph (a) of this section if in connection with such program a prize consisting of money or thing of value is awarded to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize, such winner or winners, are required to furnish any money, or thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question.

§1304 (of U. S. Criminal Code) **Broadcasting Lottery information.**—Whoever broadcasts by means of any radio station for which a license is required by any law of the U. S. or whoever, operating any such station, knowingly permits the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise of scheme, whether said list contains any part or all of such prizes, shall be fined not more than $1,000 or imprisoned not more than one year, or both.

Each day's broadcasting shall constitute a separate offense.

CENSORSHIP

§326 (of Communications Act.)—Nothing in this Act shall be understood to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.

INDECENT LANGUAGE

§1464 (of U. S. Criminal Code) **Broadcasting obscene language.**—Whoever utters any obscene, indecent, or profane language by means of radio communication shall be fined not more than $10,000 or imprisoned not more than two years, or both.

TRANSFERS and ASSIGNMENTS

§1.540 Application for voluntary assignment or transfer of control.—(a) Application for consent to the assignment of construction permit or license, or for consent to the transfer, of control or a corporation holding such a construction permit or license, shall be filed with the Commission on FCC Form 314 (Assignment of License), FCC Form 315 (Transfer of Control), or FCC Form 316 (Short Form). Such application should be filed with the Commission at least 45 days prior to the contemplated effective date of assignment or transfer of control.

(b) The following assignment or transfer applications may be filed on Form 316.

(1) Assignment from individual or individuals (including partnerships) to a corporation owned and controlled by such individuals or partnerships without any substantial change in their relative interests; (2) Assignment from a corporation to its individual stockholders without effecting any substantial change in the disposition of their interests; (3) Assignment or transfer by which certain stockholders retire and interest transferred is not a controlling one; (4) Corporate reorganization which involves no substantial change in beneficial ownership; (5) Assignment or transfer from corporation to wholly owned subsidiary thereof or vice versa, or where there is assignment owned or controlled by assignor stockholders without substantial change in their interests; or (6) Assignment of less than a controlling interest in a partnership.

§1.541. Application for involuntary assignment of license or transfer of control.—(a) The Commission shall be notified in writing promptly of the death or legal disability of an individual permittee or licensee, a member of a partnership, or a person directly or indirectly in control of a corporation which is a permittee or licensee.

(b) Within 30 days after the occurrence of such death or legal disability, an application on FCC Form 316 shall be filed requesting consent to involuntary assignment of such permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

www.americanradiohistory.com

struction of a new station, or which requests consent to involuntary assignment or transfer, or to voluntary assignment or transfer not resulting in a substantial change in ownership or control and which may be applied for on FCC Form 316; and copies of all exhibits, letters, and other documents filed as part thereof, all amendments thereto, all correspondence between the Commission and the applicant pertaining to the application after it has been tendered for filing, and copies of all documents incorporated therein by reference. Information incorporated by reference which is already in the local file need not he duplicated if the entry making the reference sufficiently identifies the information so that it may be found in the file, and there has been no change in the document since the date of filing and the licensee, after making the reference, so states.

(3) A copy of every ownership report or supplemental ownership report filed by the licensee or permittee for such station after May 13, 1965, pursuant to the provisions of this part; and copies of all exhibits, letters, and other documents filed as part thereof, all amendments thereto, all correspondence between the permittee or licensee and the Commission pertaining to the reports after they have been filed, and all documents incorporated therein by reference, including contracts listed in such reports in accordance with the provisions of §1.615 (a)(4)(i) and which according to the provisions of §0.417 of this chapter are open for public inspection at the offices of the Commission. Information incorporated hy reference which is already in the local file need not be duplicated if the entry making the reference sufficiently identifies the information so that it may be found in the file, and if there has been no change in the document since the date of filing and the licensee or permittee, after making the reference, so states.

(4) Such records as are required to be kept by §§73.120(d), 73.290(d), 73.590(d), and 73.657(d) of this chapter concerning broadcasts by candidates for public office.

(b) (1) In cases involving applications for consent to assignment of broadcast station construction permits or licenses, with respect to which public notice is required to be given under the provisions of §1.580 or 1.594, the file mentioned in paragraph (a) of this section shall be maintained by the assignor. If the assignment is consented to by the Commission and consummated, the assignee shall maintain the file commencing with the date on which notice of the consummation of the assignment is filed with the Commission. The file maintained by the assignee shall cover the period both before and after the time when the notice of consummation of assignment was filed. The assignee is responsible for obtaining copies of the necessary documents from the assignor or from the Commission files.

(2) In cases involving applications for consent to transfer of control of a permittee or licensee of a broadcast station, the file mentioned in paragraph (a) of this section shall be maintained by the permittee or licensee.

(c) The file need contain only applications, ownership reports, and related material that concern the station for which the file is kept. Applicants, permittees, and licensees need not keep in the file copies of such applications, reports, and material which pertain to other stations with regard to which they may be applicants, permittees, or licensees, except to the extent that such information is reflected in the materials required to be kept under the provisions of this section.

(d) The file shall be maintained at the main studio of the station or at any other accessible place (such as a public registry for documents or an attorney's office) in the community to which the station is or is proposed to be licensed, and shall be available for public inspection at any time during regular business hours.

(e) The records specified in paragraph (a) (4) of this section shall be retained for the periods specified in §§73.120(d), 73.290(d), 73.590(d), and 73.657(d) of this chapter (2 years). The records specified in paragraph (a)(1), (2), and (3) of this section shall be retained as follows:

(1) The applicant for a construction permit for a new station shall maintain such a file so long as the application is pending before the Commission or any proceeding involving that application is pending before the courts. (If the application is granted, subparagraph (2) of this paragraph shall apply.)

(2) The permittee or licensee shall maintain such a file so long as an authorization to operate the station is outstanding.

LICENSE RENEWALS

General . . .

§1.539 Application for renewal of license.—(a) Unless otherwise directed by the Commission, an application for renewal of license shall be filed at least 90 days prior to the expiration date of the license sought to be renewed except that applications for renewal of license of an experimental or developmental broadcast station shall be filed at least 60 days prior to the expiration date of the license sought to be renewed.

(b) No application for renewal of license of any broadcast station will be considered unless there is on file with the Commission, the information, if any, currently required by §§1.611-1.615, inclusive, for the particular class of station. The renewal application shall include a reference hy date and file number to such information on file.

(c) Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application has been received.

(d) The following application forms shall be used:

[EDITOR'S NOTE: There follows a list of forms to be used in filing for license renewals.]

In AM rules . . .

§73.34 Normal license period.—(a) Licenses for standard broadcast stations ordinarily will be issued for a period of three years and, when regularly renewed, at three year intervals thereafter: Provided, however, that, if the Commission finds that the public interest, convenience and necessity will be served thereby, it may issue either an initial license or a renewal thereof for a lesser term. When regularly issued or renewed, licenses will be issued to expire at the hour of 3:00 a.m., eastern standard time, in accordance with the following schedule, and at three year intervals thereafter.

[EDITOR'S NOTE: For list of expiration dates for licenses see TV rules below.]

In FM rules . . .

§73.218 Normal license period.—(a) Licenses for FM broadcast stations ordinarily will be issued for a period of three years and, when regularly renewed, at three year intervals thereafter: Provided, however, that, if the Commission finds that the public interest, convenience and necessity will be served thereby, it may issue either an initial license or a renewal thereof for a lesser term. When regularly issued or renewed, licensees will be issued to expire at the hour of 3:00 a.m., eastern standard time, in accordance with the following schedule, and at three year intervals thereafter.

[EDITOR'S NOTE: For list of expiration dates for licenses see TV rules below.]

In TV rules . . .

§73.630 Normal license period.—(a) Licenses for television broadcast stations ordinarily will be issued for a period of three years and when regularly renewed, at three year intervals thereafter: Provided, however, that, if the Commission finds that the public interest, convenience and necessity will be served thereby, it may issue either an initial license or a renewal thereof for a lesser term. When regularly issued or renewed, licenses will be issued to expire at the hour of 3:00 a.m., eastern standard time, in accordance with the following schedule, and at three year intervals thereafter.

(1) For stations located in Florida, Puerto Rico, and Virgin Islands, February 1, 1964.

(2) For stations located in Alabama and Georgia, April 1, 1964.

(3) For stations located in Arkansas, Louisiana, and Mississippi, June 1, 1964.

(4) For stations located in Tennessee, Kentucky, and Indiana, August 1, 1964.

(5) For stations located in Ohio and Michigan, October 1, 1964.

(6) For stations located in Illinois and Wisconsin, December 1, 1964.

(7) For stations located in Iowa and Missouri, February 1, 1965.

(8) For stations located in Minnesota, North Dakota. South Dakota, Montana, and Colorado, April 1, 1965.

(9) For stations located in Kansas, Oklahoma, Nebraska, June 1, 1965.

(10) For stations located in Texas, August 1, 1965.

(11) For stations located in Wyoming, Nevada, Arizona, Utah, New Mexico, and Idaho, October 1, 1965.

(12) For stations located in California, December 1, 1965.

(13) For stations located in Washington, Oregon, Alaska, Guam and Hawaii, February 1, 1966.

(14) For stations located in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, April 1, 1966.

(15) For stations located in New Jersey and New York, June 1, 1966.

(16) For stations located in Delaware and Pennsylvania, August 1, 1966.

(17) For stations located in Maryland, District of Columbia, Virginia, West Virginia, October 1, 1966.

(18) For stations located in North Carolina, South Carolina, December 1, 1966.

STATION IDENTIFICATION

In AM rules . . .

§73.117 Station identification.—(a) A licensee of a standard broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour preceding the next hour: Provided.

(h) Such identification announcement need not be made on the hour when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, operatic production or forum of longer duration than 30 minutes. In such cases the identification announcement shall be made at the beginning of the program, at the first interruption of the entertainment continuity, and at the conclusion of the program.

(c) Such identification announcement need not be made on the half hour or quarter hours when to make such an announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or operatic production. In such cases an identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion of the program: Provided, that an announcement within 5 minutes of the time specified in paragraph (a) (2) of this section will satisfy the requirements of identification announcements.

(d) In the case of variety show programs of longer duration than 30 minutes, the identification announcement shall be made within 5 minutes of the hour and of the times specified in paragraph (a)(2) of this section.

(e) In the case of all other programs the identification announcement shall be made within 2 minutes of the hour and of the times specified in paragraph (a)(2) of this section.

(f) In making the identification announcement the call letters shall be given only on the channel of the station identified thereby, except as otherwise provided in §73.287 of the Commission's Rules Governing FM Broadcast Stations.

In FM rules . . .

§73.287 Station identification.—(a) A licensee of an FM broadcast station shall make separate station identification announcement (call letters and location) for such station; provided, however, that if the same licensee operates an FM radio broadcasting station and a standard broadcast station and simultaneously broadcasts the same programs over the facilities of both such stations, station identification announcements may be made jointly for both stations for periods of such simultaneous operation. If the call letters of the FM station do not clearly reveal that it is an FM station, the joint announcement shall state that one of the stations is an FM station. Station identification announcements shall be made at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour following the hour and at the quarter hour preceding the next hour: Provided:

[EDITOR'S NOTE: Remainder is identical with paragraphs (b), (c), (d), (e) and (f) of §73.117 above.]

In TV rules . . .

§73.652. Station identification.—(a) A licensee of a television broadcast station shall make station identification announcements (call letters and location) at the beginning and ending of each time of operation and during the operation on the hour. The announcement at the beginning and ending of each time of operation shall be by both aural and visual means. Other

www.americanradiohistory.com

announcements may be by either aural or visual means.

(b) Identification announcements during operation need not be made when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or any type of production. In such cases, the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

SPONSORED PROGRAMS (Announcement of)

In AM rules . . .

§73.119 Sponsored programs, announcement of.—(a) When a standard broadcast station transmits any matter for which money, services, or other valuable consideration is either directly or indirectly paid or promised to, or charged or received by, such station, the station shall broadcast an announcement that such matter is sponsored, paid for, or furnished, either in whole or in part, and by whom or on whose behalf such consideration was supplied: Provided, however, that "service or other valuable consideration" shall not include any service or property furnished without charge or at a nominal charge for use on, or in connection with, a broadcast unless it is so furnished in consideration for an identification in a broadcast of any person, product, service, trademark, or brand name beyond an identification which is reasonably related to the use of such service or property on the broadcast.

(b) The licensee of each standard broadcast station shall exercise reasonable diligence to obtain from its employees, and from other persons with whom it deals directly in connection with any program matter for broadcast, information to enable such licensee to make the announcement required by this section.

(c) In any case where a report (concerning the providing or accepting of valuable consideration by any person for inclusion of any matter in a program intended for broadcasting) has been made to a standard broadcast station, as required by Section 508 of the Communications Act of 1934, as amended, of circumstances which would have required an announcement under this section had the consideration been received by such standard broadcast station, an appropriate announcement shall be made by such station.

(d) In the case of any political program or any program involving the discussion of public controversial issues for which any records, transcriptions, talent, scripts, or other material or services of any kind are furnished, either directly or indirectly, to a station as an inducement to the broadcasting of such program, an announcement shall be made both at the beginning and conclusion of such program on which such material or services are used that such records, transcriptions, talent, scripts, or other material or services have been furnished to such station in connection with the broadcasting of such program: Provided, however, that only one such announcement need be made in the case of any such program of 5 minutes' duration or less, which announcement may be made either at the beginning or conclusion of the program.

(e) The announcement required by this section shall fully and fairly disclose the true identity of the person or persons by whom or in whose behalf such payment is made or promised, or from whom or in whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in paragraph (d) of this section are furnished. Where an agent or other person contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known to the station, the announcement shall disclose the identity of the person or persons in whose behalf such agent is acting instead of the name of such agent.

(f) In the case of any program, other than a program advertising commercial products or services, which is sponsored, paid for, or furnished, either in whole or in part, or for which material or services referred to in paragraph (d) of this section are furnished, by a corporation, committee, association, or other unincorporated group, the announcement required by this section shall disclose the name of such corporation, committee, association, or other unincorporated group. In each such case the station shall require that a list of the chief executive officers or members of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group shall be made available for public inspection at the studios or general offices of one of the standard broadcast stations carrying the program in each community in which the program is broadcast.

(g) In the case of broadcast matter advertising commercial products or services, an announcement stating the sponsor's corporate or trade name, or the name of the sponsor's product, when it is clear that the mention of the name of the product constitutes a sponsorship identification, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the program.

(h) Commission interpretations in connection with the foregoing rules may be found in the Commission's Public Notice entitled "Applicability of Sponsorship Identification Rules" and such supplements thereto as are issued from time to time.

In FM rules . . .

§73.289 [EDITOR'S NOTE: Identical with §73.119 above.]

In TV rules . . .

§73.654 [EDITOR'S NOTE: Identical with §73.119 above.]

[EDITOR'S NOTE: In a statement issued in 1950, the FCC warned that the sponsor or his product must be identified by a distinctive name and not by one merely descriptive of the type of business or product. The following are acceptable, the Commission said: "Henry Smith offers you . . ." or "Smith Stove Co. offers you . . ." or "Ajax Pens brings you . . ." The following are not acceptable: "Write to the Comb Man . . ." or "Send your money to Nylons, Box— . . ." or "This program is sponsored by your Sink man . . ."]

RECORDINGS and TRANSCRIPTIONS (Identification of)

In AM rules . . .

§73.118 Mechanical reproductions.—(a) No mechanically reproduced program consisting of a speech, news event, news commentator, forum, panel discussion, or special event in which the element of time is of special significance, or any other program in which the element of time is of special significance and presentation of which would create, either intentionally or otherwise, the impression or belief on the part of the listening audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast, shall be broadcast without an appropriate announcement being made either at the beginning or end of such reproduction or at the beginning or end of the program in which such reproduction is used that it is a mechanical reproduction or a mechanically reproduced program: Provided, however, that each such program of one minute or less need not be announced as such.

(b) The exact form of identifying announcement is not prescribed, but the language shall be clear and in terms commonly used and understood. Any other program mechanically reproduced or series of mechanical reproductions, including a mechanical reproduction used for background music, sound effects, station identification, program identification (theme music of short duration) or identification of sponsorship of the program proper, need not be announced as provided in subsection (a), but the licensee shall not attempt affirmatively to create the impression that any program being broadcast by mechanical reproduction consists of live talent.

(c) The requirements of subsection (a) are waived with respect to network programs, transcribed and rebroadcast at a later hour because of the time zone differentials between the place where the program originates and where it is rebroadcast, this waiver being applicable whether the off-the-line recording is made by the network itself at one of its key stations or by an individual station, but only when the on-the-line recording is for broadcast at an hour not exceeding the time zone differential between the place where the program originates and where it is rebroadcast. Each station which broadcasts network programs at a later hour in accordance with this waiver shall make an appropriate announcement at least once each day between the hours of 10:00 a.m. and 10:00 p.m., stating that some or all of the network programs which are broadcast by that station are delayed broadcasts by means of transcription. This waiver provision also applies during the annual period in which daylight saving time will be effective with respect to network programs transcribed and rebroadcast one hour later because of the time differential resulting from the adoption of daylight saving time in some areas.

In TV rules . . .

§73.653—[EDITOR'S NOTE: Identical with §73.118 above.]

POLITICAL BROADCASTS

For AM, FM and TV . . .

§73.120 Definitions.—(a) A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who

(1) has qualified for a place on the ballot or

(2) is eligible under the applicable law to be voted by sticker, by writing in his name on the ballot, or other method, and (1) has been duly nominated by a political party which is commonly known and regarded as such, or (2) make a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

(b) General requirements.—No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such facilities: Provided, that such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) Rates and practices.—(1) The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means direct or indirect. A candidate shall, in each case, be charged no more than the rate the station would charge if the candidate were a commercial advertiser whose advertising was directed to promoting its business within the same area as that encompassed by the particular office for which such person is a candidate. All discount privileges otherwise offered by a station to commercial advertisers shall be available upon equal terms to all candidates for public office.

(2) In making time available to candidates for public office no licensee shall make any discrimination between candidates in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to this part, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) Records: inspections.—Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such request, and the charges made, if any, if request is granted. Such records shall be retained for a period of two years.

NOTE: See §1.526 of this chapter.

(e) A request for equal opportunities must be submitted to the licensee within one week of the day on which the prior use occurred.

(f) A candidate requesting such equal opportunities of the licensee, or complaining of non-compliance to the Commission, shall have the burden of providing that he and his opponent are legally qualified candidates for the same public office.

[EDITOR'S NOTE: In FM this is §73.290; in TV, §73.657].

REBROADCASTS

In AM rules . . .

§73.121 Rebroadcast.—(a) The term "rebroadcast" means reception by radio of the program of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station.

NOTE: As used in §73.121, program includes any complete program or part thereof, or any signals if other than A-3 emission. In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facili-

NAB Television Code

Preamble

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

The revenues from advertising support the free, competitive American system of telecasting and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of his station. He, however, is obliged to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

The American businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminded that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

Television and all who participate in it are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for the advancement of education and culture, for the acceptability of the program materials chosen, for decency and decorum in production, and for propriety in advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television.

In order that television programing may best serve the public interest, viewers should be encouraged to make their criticisms and positive suggestions known to the television broadcasters. Parents in particular should be urged to see to it that out of the richness of television fare, the best programs are brought to the attention of their children.

I. Advancement of Education and Culture

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools, institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and cooperation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken to mean that process by which the individual is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest possible audience.

4. The television broadcaster should be thoroughly conversant with the educational and cultural needs and desires of the community served.

5. He should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

6. He should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

7. It is in the interest of television as a vital medium to encourage and promote the broadcast of programs presenting genuine artistic or literary material, valid moral and social issues, significant controversial and challenging concepts and other subject matter involving adult themes. Accordingly, none of the provisions of this code, including those relating to the responsibility toward children, should be construed to prevent or impede their broadcast. All such programs, however, should be broadcast with due regard to the composition of the audience. The highest degree of care should be exercised to preserve the integrity of such programs and to ensure that the selection of themes, their treatment and presentation are made in good faith upon the basis of true instructional and entertainment values, and not for the purposes of sensationalism, to shock or exploit the audience or to appeal to prurient interests or morbid curiosity.

II. Responsibility Toward Children

1. The education of children involves giving them a sense of the world at large. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. In addition, those programs which might be reasonably expected to hold the attention of children and which are broadcast during times of the day when children may be normally expected to constitute a substantial part of the audience should be presented with due regard for their effect on children.

2. Such subjects as violence and sex shall be presented without undue emphasis and only as required by plot development or character delineation. Crime should not be presented as attractive or as a solution to human problems, and the inevitable retribution should be made clear.

3. The broadcaster should afford opportunities for cultural growth as well as for wholesome entertainment.

4. He should develop programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

5. Programs should reflect respect for parents, for honorable behavior, and for the constituted authorities of the American community.

6. Exceptional care should be exercised with reference to kidnapping or threats of kidnapping of children in order to avoid terrorizing them.

7. Material which is excessively violent or would create morbid suspense, or other undesirable reactions in children, should be avoided.

8. Particular restraint and care in crime or mystery episodes involving children or minors, should be exercised.

III. Community Responsibility

1. A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

2. Requests for time for the placement of public service announcements or programs should be carefully reviewed with respect to the character and reputation of the group, campaign or organization involved, the public interest content of the message, and the manner of its presentation.

IV. General Program Standards

1. Program materials should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has towards his society. The intimacy and confidence placed in television demand of the broadcaster, the network and other program sources that they be vigilant in protecting the audience from deceptive program practices.

2. Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

3. Words (especially slang) derisive of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combating prejudice, are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

4. Racial or nationality types shall not be shown on television in such a manner as to ridicule the race or nationality.

5. Attacks on religion and religious faiths are not allowed. Reverence is to mark any mention of the name of God, His attributes and powers. When religious rites are included in other than religious programs the rites shall be accurately presented. The office of minister, priest or rabbi shall not be presented in such a manner as to ridicule or impair its dignity.

6. Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually as a solution for marital problems.

7. In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar ailments and offending them or members of their families.

8. Excessive or unfair exploitation of others or of their physical or mental afflictions shall not be presented as praiseworthy.

The presentation of cruelty, greed and selfishness as worthy motivations is to be avoided.

9. Law enforcement shall be upheld and, except where essential to the program plot, officers of the law portrayed with respect and dignity.

10. Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and recognized ethical and professional standards.

11. The use of animals both in the production of television programs and as part of television program content shall at all times, be in conformity with accepted standards of humane treatment.

12. Care should be exercised so that cig-

For definitions of abbreviations used in the 1966 YEARBOOK see page E-66

www.americanradiohistory.com

arette smoking will not be depicted in a manner to impress the youth of our country as a desirable habit worthy of imitation.

13. Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treatment of the commission of crime in a frivolous, cynical or callous manner is unacceptable.

The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

14. The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.

15. Suicide as an acceptable solution for human problems is prohibited.

16. Illicit sex relations are not treated as commendable.

Sex crimes and abnormalities are generally unacceptable as program material.

The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

17. Drunkenness should never be presented as desirable or prevalent.

The use of liquor in program content shall be de-emphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

18. Narcotic addiction shall not be presented except as a vicious habit. The administration of illegal drugs will not be displayed.

19. The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature.

20. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with federal, state and local laws, and should concentrate on the subject as a public sporting event.

21. Program material pertaining to fortune-telling, occultism, astrology, phrenology, palm-reading, numerology, mind-reading or character-reading, is unacceptable when presented for the purpose of fostering belief in these subjects.

22. Quiz and similar programs that are presented as contests of knowledge, information, skill or luck must, in fact, be genuine contests and the results must not be controlled by collusion with or between contestants, or any other action which will favor one contestant against any other.

23. No program shall be presented in manner which through artifice or simulation would mislead the audience as to any material fact. Each broadcaster must exercise reasonable judgment to determine whether a particular method of presentation would constitute a material deception, or would be accepted by the audience as normal theatrical illusion.

24. The appearances or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

25. The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

26. Contests may not constitute a lottery.

27. Any telecasting designed to "buy" the television audience by requiring it to listen and/or view in hope of reward rather than for the quality of the program, should be avoided.

28. The costuming of all performers shall be within the bounds of propriety and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

29. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers.

30. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

31. The use of the television medium to transmit information of any kind by the use of the process called "subliminal perception," or by the use of any similar technique whereby an attempt is made to convey information to the viewer by transmitting messages below the threshold of normal awareness, is not permitted.

32. The broadcaster shall be constantly alert to prevent activities that may lead to such practices as the use of scenic properties, the choice and identification of prizes, the selection of music and other creative program elements and inclusion of any identification of commercial products or services, their trade names or advertising slogans, within a program dictated by factors other than the requirements of the program itself. The acceptance of cash payments or other considerations in return for including any of the above within the program is prohibited except in accordance with Sections 317 and 508 of the Communications Act.

33. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements, nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially) such as "flash" or "bulletin" and statements such as "we interrupt this program to bring you . . ." should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words or phrases which do not necessarily imply that the material following is a news release.

34. Program content should be confined to those elements which entertain or inform the viewer and to the extent that titles, teasers and credits do not meet these criteria, they should be restricted or eliminated.

35. Hypnosis, either as fiction or in fact, should be presented with proper precautions to avoid adverse effects on the viewing audience.

V. Treatment of News and Public Events

News

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

4. At all times, pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

5. Good taste should prevail in the selection and handling of news:

Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

6. Commentary and analysis should be clearly identified as such.

7. Pictorial material should be chosen with care and not presented in a misleading manner.

8. All news interview programs should be governed by accepted standards of ethical journalism, under which the interviewer selects the quesions to be asked. Where there is advance agreement materially restricting an important or newsworthy area of questioning, the interviewer will state on the program that such limitation has been agreed upon. Such disclosure should be made if the person being interviewed requires that questions be submitted in advance or if he participates in editing a recording of the interview prior to its use on the air.

9. A television broadcaster should exercise due care in his supervision of content, format, and presentation of newscasts originated by his station, and in his selection of newscasters, commentators, and analysts.

Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. The treatment of such events by a television broadcaster should provide adequate and informed coverage.

VI. Controversial Public Issues

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. The television broadcaster should seek out and develop with accountable individuals, groups and organizations, programs relating to controversial public issues of import to his fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. Requests by individuals, groups or organizations for time to discuss their views on controversial public issues, should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure.

3. Programs devoted to the discussion of controversial public issues should be identified as such. They should not be presented in a manner which would mislead listeners or viewers to believe that the program is purely of an entertainment, news, or other character.

4. Broadcasts in which stations express their own opinions about issues of general public interest should be clearly identified as editorials. They should be unmistakably identified as statements of station opinion and should be appropriately distinguished from news and other program material.

VII. Political Telecasts

1. Political telecasts should be clearly identified as such. They should not be presented by a television broadcaster in a manner which would mislead listeners or viewers to believe that the program is of any other character.

(Ref.: Communications Act of 1934, as amended, Secs. 315 and 317, and FCC Rules and Regulations, Secs. 3.654, 3.657, 3.663, as discussed in NAB's "A Political Catechism.")

VIII. Religious Programs

1. It is the responsibility of a television broadcaster to make available to the community appropriate opportunity for religious presentations.

2. Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion.

3. Religious programs should be presented respectfully and accurately and without prejudice or ridicule.

4. Religious programs should be presented by responsible individuals, groups and organizations.

5. Religious programs should place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

6. In the allocation of time for telecasts of religious programs the television station should use its best efforts to apportion such time fairly among the representative faith groups of its community.

IX. General Advertising Standards

1. This Code establishes basic standards for all television broadcasting. The principles of acceptability and good taste within the Program Standards section govern the presentation of advertising where applicable. In addition, the Code establishes in this section special standards which apply to television advertising.

2. A commercial television broadcaster makes his facilities available for the advertising of products and services and accepts commerical presentation for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements.

3. Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission.

4. In consideration of the customs and attitudes of the communities served, each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. These standards should be applied with judgment and flexibility, taking into consideration the characteristics of the medium, its home and family audience, and the form and content of the particular presentation.

5. The advertising of hard liquor (distilled spirits) is not acceptable.

www.americanradiohistory.com

6. The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable only subject to federal and local laws. *(See Television Code Intrepretation No. 7)*

7. The advertising of cigarettes should not be presented in a manner to convey the impression that cigarette smoking promotes health or is important to personal development of the youth of our country.

8. Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses in generally unacceptable.

9. The advertising of firearms is acceptable only subject to federal and local laws.

10. The advertising of fortune-telling, occultism, astrology, phrenology, character reading or subjects of a like nature is not permitted.

11. Because all products of a personal nature create special problems, such products, when accepted, should be treated with special emphasis on ethics and the canons of good taste. Such advertising of personal products as is accepted must be presented in a restrained and obviously inoffensive manner.

The advertising of particularly intimate products which ordinarily are not freely mentioned or discussed is not acceptable. *(See Television Code Interpretation No. 4)*

12. The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

13. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

14. "Bait-switch" advertising, whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes, is not acceptable.

15. Personal endorsements (testimonials) shall be genuine and reflect personal experience. They shall contain no statement that cannot be supported if presented in the advertiser's own words.

X. Presentation of Advertising

1. Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony with the content and general tone of the program in which it appears.

2. The role and capability of television to market sponsors' products are well recognized. In turn, this fact dictates that great care be exercised by the broadcaster to prevent the presentation of false, misleading or deceptive advertising. While it is entirely appropriate to present a product in a favorable light and atmosphere, the presentation must not, by copy or demonstration, involve a material deception as to the characteristics, performance or appearance of the product.

3. The broadcaster and the advertiser should exercise special caution with the content and presentation of television commercials placed in or near programs designed for children. Exploitation of children should be avoided.

Commercials directed to children should in no way mislead as to the product's performance and usefulness.

Appeals involving matters of health which should be determined by physicians should not be directed primarily to children.

4. Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes.

5. Commercials for services or over-the-counter products involving health considerations are of intimate and far-reaching importance to the consumer. The following principles should apply to such advertising:

a. Physicians, dentists, or nurses, or actors representing physicians, dentists or nurses, shall not be employed directly or by implication. These restrictions also apply to persons professionally engaged in medical services (e.g., physical therapists, pharmacists, dental assistants, nurses' aides).

b. Visual representations of laboratory settings may be employed, provided they bear a direct relationship to bona fide research which has been conducted for the product or service. (See Code, X, 10.) In such cases, laboratory technicians shall be identified as such and shall not be employed as spokesmen or in any other way speak on behalf of the product.

c. Institutional announcements not intended to sell a specific product or service to the consumer and public service announcements by nonprofit organizations may be presented by accredited physicians, dentists or nurses, subject to approval by the broadcaster. An accredited professional is one who has met required qualifications and has been licensed in his resident state.

6. Advertising copy should contain no claims dealing unfairly with competitors, competing products, or other industries, professions or institutions.

7. A sponsor's advertising messages should be confined within the framework of the sponsor's program structure. A television broadcaster should avoid the use of commercial announcements, which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called trailer or "hitch-hike" announcements). To this end, the program itself should be announced and clearly identified, both audio and video, before the sponsor's advertising material is first used, and should be signed off, both audio and video, after the sponsor's advertising material is last used.

8. Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fulfilled.

9. A charge for television time to churches and religious bodies is not recommended.

10. Reference to the results of bona fide research, surveys or tests relating to the product to be advertised shall not be presented in a manner so as to create an impression of fact beyond that established by the work that has been conducted.

XI. Advertising of Medical Products

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer because of the direct bearing on his health.

2. Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe," "without risk," "harmless," or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

3. A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects.

XII. Contests

1. Contests shall be conducted with fairness to all entrants, and shall comply with all pertinent laws and regulations. Care should be taken to avoid the concurrent use of the three elements which together constitute a lottery—prize, chance and consideration.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown, or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of products, reasonable facsimiles thereof should be made acceptable unless the award is based upon skill and not upon chance.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. *(See Time Standards for Advertising Copy.)*

XIII. Premiums and Offers

1. Full details of proposed offers should be required by the television broadcaster for investigation and approval before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of viewers.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

XIV. Time Standards for Advertising

In accordance with good telecast advertising practice, the time standards for commercial material are as follows:

1. Prime Time [Programs]

Definition: A continuous period of not less than three evening hours per broadcast day as designated by the station.

Commercial material, including total station break time, in prime time shall not exceed 17.2% (10 minutes and 20 seconds) in any 60-minute period.

Not more than three announcements shall be scheduled consecutively.

Commercial material in prime time includes billboards, public service announcements, promotional announcements (except those for the same program) and "below the line" credits as well as commercial copy. *(See Television Code Interpretation No. 6.)*

2. All Other Time [Programs]

Definition: All time other than prime time. Commercial material, including total station break time, within any 60-minute period may not exceed 27.2% (16 minutes and 20 seconds).

Individual programs of five minutes duration may include commercial material not in excess of one minute and 15 seconds and individual programs of 10 minutes duration may include commercial material not in excess of two minutes and 10 seconds.

Not more than three announcements shall be scheduled consecutively.

Commercial material in all other times does not include public service announcements, promotional announcements and opening and closing billboards which give sponsor identification.

3. Station Breaks

Definition: Station breaks are those periods of time between programs, or within a program as designated by the program originator, which are set aside for local station identification and spot announcements. In prime time a station break shall consist of not more than two commercial announcements plus noncommercial copy such as station identification, public service or promotional announcements. Total station break time in any 30-minute period may not exceed one minute and 10 seconds. In other than prime time individual station breaks shall consist of not more than two commercial announcements plus the conventional sponsored 10-second ID, and shall not exceed two minutes and 10 seconds.

Station break announcements shall not adversely affect a preceding or following program.

4. Multiple-Product Announcements

A multiple-product announcement is one in which two or more products or services are presented within the framework of a single announcement.

(1) Only those multiple-product announcements which meet the following criteria shall be counted under the code (Section XIV, 1, 2, 3) as a single announcement:

(a) The products or services are related in character, purpose or use; and

(b) The products or services are so treated in audio and video throughout the announcement as to appear to the viewer as a single announcement; and

(c) The announcement is so constructed that it cannot be divided into two or more separate announcements.

www.americanradiohistory.com

NAB RADIO CODE

(2) Multiple-product announcements not meeting the criteria of 4 (1) above (commonly referred to as "piggybacks") shall be counted as two or more announcements under this section of the code.

(3) Multiple-product announcements of retail or service establishments are exempted from the provisions of (1) (a) above.

5. Prize Identification

Reasonable and limited identification of prizes and statement of the donor's name within formats wherein the presentation of contest awards or prizes is a necessary and integral part of program content shall not be included as commercial time within the meaning of paragraphs 1 and 2, above; however, any aural or visual presentation concerning the product or its donor, over or beyond such identification and statement, shall be included as commercial time within the meaning of paragraph 1, above. *(See Television Code Interpretation No. 5.)*

6. Care should be exercised in the selection, placement and integration of non-program material in order to avoid adversely affecting the program or diminishing audience interest.

7. Programs presenting women's services, features, shopping guides, fashion shows, demonstrations and similar material with genuine audience interest provides a special service to the viewing public in which what ordinarily might be considered advertising material is an informative and necessary part of the program content. Because of this, the Time Standards may be waived to a reasonable extent and limited frequency.

The Code Authority will evaluate each such program on its own merits.

8. Except for normal guest identifications, any casual reference by talent in a program to another's product or service under any trade name or language sufficiently descriptive to identify it should be condemned and discouraged.

9. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade-mark or slogan may be used only incidentally. They should not obtrude on program interest or entertainment. "On Camera" shots of such materials should be fleeting, not too frequent, and mindful of the need of maintaining a proper program balance.

10. Each opening and closing billboard, regardless of the number of sponsors, shall not exceed 10 seconds in program periods of one half-hour or less, or in the ratio of 10 seconds of opening and closing billboard per 30 minutes of program time in periods exceeding 30 minutes, provided that a billboard for any one sponsor at no time shall exceed 20 seconds in programs exceeding 30 minutes.

11. Billboard language may not include a commercial message and should be confined to the sponsor's name, product and established claim or slogan. Billboards should not mention contests, premiums, offers or special sales.

Interpretations of the Television Code by the Code Review Board

No. 1, June 7, 1956, Revised March 30, 1960, March 15, 1962

Integrated and Piggy-Back Announcements

Note: Interpretation No. 1 has been replaced by amendment to the code. See Section XIV, paragraph 4, Time Standards for Advertising.

No. 2, June 7, 1956, revised June 9, 1958

"Pitch" Programs

The "pitchman" technique of advertising on television is inconsistent with good broadcast practice and generally damages the reputation of the industry and the advertising profession.

Sponsored program-length segments, consisting substantially of continuous demonstration or sales presentation, violate not only the time standards established in the Code, but the broad philosophy of improvement implicit in the voluntary Code operation and are not acceptable.

No. 3, June 7, 1956

Hollywood Film Promotion

The presentation of commentary or film excerpts from current theatrical releases in some instances may constitute "advertising copy" under "Time Standards for Advertising." Specifically, for example, when such presentation, directly or by inference, urges viewers to attend, it shall be counted against the advertising copy time allowance for the program of which it is a part.

No. 4, June 7, 1956

Non-Acceptability of Particularly Intimate Products

Paragraph 10 of the "Advertising Standards" reads in part, "The advertising of intimately personal products which are not freely mentioned or discussed is not acceptable."

Products for the treatment of hemorrhoids and for use in connection with feminine hygiene are not acceptable under the above stated language.

No. 5, Jan. 23, 1959

Prize Identification

Aural and/or visual prizes identification of up to 10 seconds duration may be deemed "reasonable and limited" under the language of Paragraph 4 of the Time Standards of Advertising. Where such identification is longer than 10 seconds, the entire announcement or visual presentation will be charged against the total commercial time for the program period.

No. 6, Feb. 25, 1965

Below-the-line Credits

Below-the-line credits are deemed to mean those for technical and physical services and facilities as distinct from generally recognized artistic and creative services such as those performed by cast, writers, directors, producers and the like.

No. 7, March 4, 1965

Drinking on Camera

Paragraph six, Section IX, General Advertising Standards, states that the "advertising of beer and wine is acceptable only when presented in the best of good taste and discretion." This requires that commercials involving beer and wine avoid any representation of on-camera drinking.

NAB Radio Code of Good Practices

We Believe:

That radio broadcasting in the United States of America is a living symbol of democracy; a significant and necessary instrument for maintaining freedom of expression, as established by the First Amendment to the Constitution of the United States;

That its influence in the arts, in science, in education, in commerce, and upon the public welfare is of such magnitude that the only proper measure of its responsibility is the common good of the whole people;

That it is our obligation to serve the people in such manner as to reflect credit upon our profession and to encourage aspiration toward a better estate for all mankind; by making available to every person in America such programs as will perpetuate the traditional leadership of the United States in all phases of the broadcasting art;

That we should make full and ingenious use of man's store of knowledge, his talents, and his skills and exercise critical and discerning judgment concerning all broadcasting operations to the end that we may, intelligently and sympathetically:

Observe the proprieties and customs of civilized society;

Respect the rights and sensitivities of all people;

Honor the sanctity of marriage and the home;

Protect and uphold the dignity and brotherhood of all mankind;

Enrich the daily life of the people through the factual reporting and analysis of news, and through programs of education, entertainment, and information;

Provide for the fair discussion of matters of general public concern; engage in works directed toward the common good; and volunteer our aid and comfort in times of stress and emergency;

Contribute to the economic welfare of all by expanding the channels of trade, by encouraging the development and conservation of natural resources, and by bringing together the buyer and seller through the broadcasting of information pertaining to goods and services.

Toward the achievement of these purposes we agree to observe the following:

I. PROGRAM STANDARDS

A. News

Radio is unique in its capacity to reach the largest number of people first with reports on current events. This competitive advantage bespeaks caution—being first is not as important as being right. The following standards are predicated upon that viewpoint.

1. News Sources. Those responsible for news on radio should exercise constant professional care in the selection of sources—for the integrity of the news and the consequent good reputation of radio as a dominant news medium depend largely upon the reliability of such sources.

2. News Reporting. News reporting shall be factual and objective. Good taste shall prevail in the selection and handling of news. Morbid, sensational, or alarming details not essential to factual reporting should be avoided. News should be broadcast in such a manner as to avoid creation of panic and unnecessary alarm. Broadcasters shall be diligent in their supervision of content, format, and presentation of news broadcasts. Equal diligence should be exercised in selection of editors and reporters who direct news gathering and dissemination, since the station's performance in this vital informational field depends largely upon them.

3. Commentaries and Analyses. Special obligations devolve upon those who analyze and/or comment upon news developments, and management should be satisfied completely that the task is to be performed in the best interest of the listening public. Programs of news analysis and commentary shall be clearly identified as such, distinguishing them from straight news reporting.

4. Editorializing. Broadcasts in which stations express their own opinions about issues of general public interest should be clearly identified as editorials and should be clearly distinguished from news and other program material.

5. Coverage of News and Public Events. In the coverage of news and public events the broadcaster has the right to exercise his judgment consonant with the accepted standards of ethical journalism and especially the requirements for decency and decorum in the broadcast of public and court proceedings.

6. Placement of Advertising. A broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

B. Controversial Public Issues

1. Radio provides a valuable forum for the expression of responsible views on public issues of a controversial nature. The broadcaster should develop programs relating to controversial public issues of importance to his fellow citizens; and give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. Requests by individuals, groups or organizations for time to discuss their views on controversial public issues should be considered on the basis of their individual merits, and in the light of the contributions which the use requested would make to the public interest.

3. Programs devoted to the discussion of controversial public issues should be identified as such. They should not be presented in a manner which would create the impression that the program is other than one dealing with a public issue.

C. Community Responsibility

1. A broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted with its needs and characteristics in order to serve the welfare of its citizens.

2. Requests for time for the placement of public service announcements or programs should be carefully reviewed with respect to the character and reputation of the group, campaign or organization involved, the public interest content of the message, and the manner of its presentation.

D. Political Broadcasts

1. Political broadcasts, or the dramatization of political issues designed to influence an election, shall be properly identified at such.

2. They should be presented in a manner which would properly identify the nature and character of the broadcast.

www.americanradiohistory.com

3. Because of the unique character of political broadcasts and the necessity to retain broad freedoms of policy void of restrictive interference, it is incumbent upon all political candidates and all political parties to observe the canons of good taste and political ethics, keeping in mind the intimacy of broadcasting in the American home.

E. Advancement of Education and Culture

1. Because radio is an integral part of American life, there is inherent in radio broadcasting a continuing opportunity to enrich the experience of living through the advancement of education and culture.

2. The radio broadcaster, in augmenting the educational and cultural influences of the home, the church, schools, institutions of higher learning, and other entities devoted to education and culture:

(a) Should be thoroughly conversant with the educational and cultural needs and aspirations of the community served;

(b) Should cooperate with the responsible and accountable educational and cultural entities of the community to provide enlightenment of listeners;

(c) Should engage in experimental efforts designed to advance the community's cultural and educational interests.

F. Religion and Religious Programs

1. Religious programs shall be presented by responsible individuals, groups or organizations.

2. Radio broadcasting, which reaches men of all creeds simultaneously, shall avoid attacks upon religious faiths.

3. Religious programs shall be presented respectfully and without prejudice or ridicule.

4. Religious programs shall place emphasis on religious doctrines of faith and worship.

G. Dramatic Programs

1. In determining the acceptability of any dramatic program containing any element of crime, mystery, or horror, proper consideration should be given to the possible effect on all members of the family.

2. Radio should reflect realistically the experience of living, in both its pleasant and tragic aspects, if it is to serve the listener honestly. Nevertheless, it holds a concurrent obligation to provide programs which will encourage better adjustments to life.

3. This obligation is apparent in the area of dramatic programs particularly. Without sacrificing integrity of presentation, dramatic programs on radio shall avoid:

(a) Techniques and methods of crime presented in such manner as to encourage imitation, or to make the commission of crime attractive, or to suggest that criminals can escape punishment;

(b) Detailed presentation of brutal killings, torture, or physical agony, horror, the use of supernatural or climatic incidents likely to terrify or excite unduly;

(c) Sound effects calculated to mislead, shock, or unduly alarm the listener;

(d) Disrespectful portrayal of law enforcement;

(e) The portrayal of suicide as a satisfactory solution to any problem.

H. Responsibility Toward Children

The education of children involves giving them a sense of the world at large. It is not enough that programs broadcast for children shall be suitable for the young and immature. In addition, programs which might reasonably be expected to hold the attention of children and which are broadcast during times when children may be normally expected to constitute a substantial part of the audience should be presented with due regard for their effect on children.

1. Programs specifically designed for listening by children shall be based upon sound social concepts and shall reflect respect for parents, law and order, clean living, high morals, fair play, and honorable behavior.

2. They shall convey the commonly accepted moral, social and ethical ideals characteristic of American life.

3. They should contribute to the healthy development of personality and character.

4. They should afford opportunities for cultural growth as well as for wholesome entertainment.

5. They should be consistent with integrity of realistic production, but they should avoid material of extreme nature which might create undesirable emotional reaction in children.

6. They shall avoid appeals urging children to purchase the product specifically for the purpose of keeping the program on the air or which, for any reason, encourage children to enter inappropriate places.

7. They should present such subjects as violence and sex without undue emphasis and only as required by plot development or character delineation. Crime should not be presented as attractive or as a solution to human problems, and the inevitable retribution should be made clear.

8. They should avoid reference to kidnapping or threats of kidnapping of children.

I. General

1. The intimacy and confidence placed in radio demand of the broadcaster, the networks and other program sources that they be vigilant in protecting the audience from deceptive program practices.

2. Sound effects and expressions characteristically associated with news broadcasts (such as "bulletin," "flash," "we interrupt this program to bring you," etc.) shall be reserved for announcement of news, and the use of any deceptive techniques in connection with fictional events and nonnews programs shall not be employed.

3. The acceptance of cash payments or other considerations for including identification of commercial products or services, trade names or advertising slogans, including the identification of prizes, etc., must be disclosed in accordance with provisions of the Communications Act.

4. When plot development requires the use of material which depends upon physical or mental handicaps, care should be taken to spare the sensibilities of sufferers from similar defects.

5. Stations should avoid broadcasting program material which would tend to encourage illegal gambling or other violations of federal, state and local laws, ordinances and regulations.

6. Simulation of court atmosphere or use of the term "court" in a program title should be done only in such manner as to eliminate the possibility of creating the false impression that the proceedings broadcast are vested with judicial or official authority.

7. Quiz and similar programs that are presented as contests of knowledge, information, skill or luck must in fact, be genuine contests and the results must not be controlled by collusion with or between contestants, or any other action which will favor one contestant against any other.

8. No program shall be presented in a manner which through artifice or simulation would mislead the audience as to any material fact. Each broadcaster must exercise reasonable judgment to determine whether a particular method of presentation would constitute a material deception, or would be accepted by the audience as normal theatrical illusion.

9. Legal, medical and other professional advice will be permitted only in conformity with law and recognized ethical and professional standards.

10. Program material pertaining to fortune-telling, occultism, astrology, phrenology, palm-reading, numerology, mind-reading, character-reading, or subjects of a like nature, is unacceptable when presented for the purpose of fostering belief in these subjects.

11. The use of cigarettes shall not be presented in a manner to impress the youth of our country that it is a desirable habit worthy of imitation in that it contributes to health, individual achievement or social acceptance.

12. Profanity, obscenity, smut and vulgarity are forbidden. From time to time, words which have been acceptable, acquire undesirable meanings, and broadcasters should be alert to eliminate such words.

13. Words (especially slang) derisive of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combating prejudice, are forbidden.

14. Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually as a solution for marital problems.

15. Broadcasts of actual sporting events at which on-the-scene betting is permitted should concentrate on the subject as a public sporting event and not on the aspects of gambling.

II. ADVERTISING STANDARDS

Advertising is the principal source of revenue of the free, competitive American system of radio broadcasting. It makes possible the presentation to all American people of the finest programs of entertainment, education and information.

Since the great strength of American radio broadcasting derives from the public respect for and the public approval of its programs, it must be the purpose of each broadcaster to establish and maintain high standards of performance, not only in the selection and production of all programs, but also in the presentation of advertising.

This code establishes basic standards for all radio broadcasting. The principles of acceptability and good taste within the program standards section govern the presentation of advertising where applicable. In addition, the code establishes in this section special standards which apply to radio advertising.

A. General Advertising Standards

1. A commercial radio broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, he shall, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements.

2. In consideration of the customs and attitudes of the communities served, each radio broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. These standards should be applied with judgment and flexibility, taking into consideration the characteristics of the medium, its home and family audience, and the form and content of the particular presentation.

B. Presentation of Advertising

1. The advancing techniques of the broadcast art have shown that the quality and proper integration of advertising copy are just as important as measurement in time. The measure of a station's service to its audience is determined by its overall performance.

2. The final measurement of any commercial broadcast service is quality. To this, every broadcaster shall dedicate his best effort.

3. Great care shall be exercised by the broadcaster to prevent the presentation of false, misleading or deceptive advertising. While it is entirely appropriate to present a product in a favorable light and atmosphere, the presentation must not, by copy or demonstration, involve a material deception as to the characteristics or performance of a product.

4. The broadcaster and the advertiser should exercise special caution with the content and presentation of commercials placed in or near programs designed for children. Exploitation of children should be avoided. Commercials directed to children should in no way mislead as to the product's performance and usefulness.

5. Appeals involving matters of health which should be determined by physicians should be avoided.

6. Reference to the results of research, surveys or tests relating to the product to be advertised shall not be presented in a manner so as to create an impression of fact beyond that established by the study. Surveys, tests or other research results upon which claims are based must be conducted under recognized research techniques and standards.

C. Acceptability of Advertisers and Products

In general, because radio broadcasting is designed for the home and the entire family, the following principles shall govern the business classifications listed below:

1. The advertising of hard liquor shall not be accepted.

2. The advertising of beer and wines is acceptable when presented in the best of good taste and discretion.

3. The advertising of fortune-telling, occultism, astrology, phrenology, palm-reading, numerology, mind-reading, character-reading, or subjects of a like nature, is not acceptable.

4. Because the advertising of all products of a personal nature raises special problems, such advertising, when accepted, should be treated with emphasis on ethics and the canons of good taste, and presented in a restrained and inoffensive manner.

5. The advertising of tip sheets, publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

www.americanradiohistory.com

6. The advertising of cigarettes shall not state or imply claims regarding health and shall not be presented in such a manner as to indicate to the youth of our country that the use of cigarettes contributes to individual achievement, personal acceptance, or is a habit worthy of imitation.

7. An advertiser who markets more than one product shall not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

8. Care should be taken to avoid presentation of "bait-switch" advertising whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes.

9. Advertising copy should contain no claims dealing unfairly with competitors, competing products, or other industries, professions or institutions.

10. Advertising testimonials should be genuine and reflect an honest appraisal of personal experience.

11. Advertising by institutions or enterprises offering instruction with exaggerated claims for opportunities awaiting those who enroll, is unacceptable.

D. Advertising of Medical Products

Because advertising for over-the-counter products involving health considerations are of intimate and far-reaching importance to the consumer, the following principles should apply to such advertising:

1. When dramatized advertising material involves statements by doctors, dentists, nurses or other professional people, the material should be presented by members of such profession reciting actual experience, or it should be made apparent from the presentation itself that the portrayal is dramatized.

2. Because of the personal nature of the advertising of medical products, the indiscriminate use of such words as "safe," "without risk," "harmless," or other terms of similar meaning, either direct or implied, should not be expressed in the advertising of medical products.

3. Advertising material which offensively describes or dramatizes distress or morbid situations involving ailments is not acceptable.

E. Time Standards for Advertising Copy

1. The maximum time to be used for advertising shall not exceed an average of 14 minutes an hour, computed on a weekly basis; provided, however, that in no event shall the maximum exceed 18 minutes in any single hour or 10 minutes in any 30-minute segment.

2. The maximum time to be used for advertising allowable to any single sponsor regardless of type program shall be:

5	minute	programs	1:30
10	"	"	2:10
15	"	"	3:00
25	"	"	4:00
30	"	"	4:15
45	"	"	5:45
60	"	"	7:00

3. Any reference to another's products or services under any trade name, or language sufficiently descriptive to identify it, shall, except for normal guest identifications, be considered as advertising copy.

4. For the purpose of determining advertising limitations, such program types as "classified," "swap shop," "shopping guides," and "farm auction" programs, etc., shall be regarded as containing one and one-half minutes of advertising for each five-minute segment.

F. Contests

1. Contests shall be conducted with fairness to all entrants, and shall comply with all pertinent laws and regulations.

2. All contest details, including rules, eligibility requirements, opening and termination dates, should be clearly and completely announced or easily accessible to the listening public; and the winners' names should be released as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of products, reasonable facsimiles thereof should be made acceptable. However, when the award is based upon skill and not upon chance, evidence of purchase may be required.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time limitations heretofore provided. (See Time Standards for Advertising Copy.)

G. Premiums and Offers

1. The broadcaster should require that full details of proposed offers be submitted for investigation and approval before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. If a consideration is required, the advertiser should agree to honor complaints indicating dissatisfaction with the premium by returning the consideration.

4. There should be no misleading descriptions or comparisons of any premiums or gifts which will distort or enlarge their value in the minds of the listeners.

NEWS-A-THON

The TeleMation NEWS-A-THON offers broadcasters an entirely new source of revenue . . . a completely automatic, and highly salable presentation of station I.D., News, Weather, Sports Scores, Special Features, and Paid Commercials.

NEWS-A-THON is an automated combination of TeleMation's newest development, NEWS CHANNEL, and the highly successful WEATHER CHANNEL, (over 250 now in use). NEWS-A-THON with the addition of music becomes an ideal late night/early morning unattended program source permitting 24-hour station operation at minimum cost.

No other program source offers comparable immediate and long term returns for such a modest investment. Leasing and terms available.

For details write, wire, or call collect.

ASCAP

The Music of America

The American Society
of Composers, Authors and Publishers
has a membership of more than 10,000
men and women who create and publish
the music of our nation.

Our members are active
in every field of musical literature:
Broadway shows, motion pictures,
television, radio, religious, symphonic
and concert, country and folk music —
all these are included
in the ASCAP repertory.

The music which
ASCAP offers, through its
system of licensing, provides the one essential
vital to the entertainment and pleasure
of the public. In brief — ASCAP music
is the music of America.

STATIONS
in B&W or COLOR
America's oldest church-sponsored telecast now in B&W and "heavenly" color. One program director recently said: "It is the best color program that we play."
For All Faiths—Practical religion, not theology, is emphasized on this telecast.
Varied Format—Dramas, interviews, and musical half-hour public service programs.
Popular—Up to 10,000 letters are received each week in the New York City headquarters.
This family telecast is available weekly, without charge. For further information write to:

CREATE THE RIGHT MOOD EVERY TIME

with the

Major Background Music Library

Major offers you a full forty-five hours of background music for titles, bridges, background music for scoring, editing, recording and dubbing music for your Video tape productions, documentaries, TV films, slide films, animation, sales presentations, industrial films and radio commercials.

Major specializes in sound—you get exceptional technical know-how and beautifully-recorded original music on tape or records.

IMPORTANT: *Major* owns its own copyrights on *all* mood music in its library; world rights available to you on a completely sound legal basis.

Music available on a "per selection" or "unlimited use" arrangement.

Highlights of "The Public's View of Television and Other Media, 1959-64"

(Study prepared for Television Information Office by Elmo Roper & Associates and released March 15, 1965, at NAB Convention)

I. Television has replaced newspapers as the public's primary news source.

Q. "First, I would like to ask you where you get most of your news about what's going on in the world today from the newspapers or radio or television or magazines or talking to people or where?"

	1959 %	1961 %	1963 %	1964 %
Source of most news				
Television	51	52	55	58
Newspapers	57	57	53	56
Radio	34	34	29	26
Magazines	8	9	6	8
People	4	5	4	5
Don't know or no answer	1	3	3	3

II. Television has increased its winning margin as the public's most believable source of news.

Q. "If you got conflicting or different reports of the same news story from radio, television, the magazines, and the newspapers, which of the four versions would you be most inclined to believe—the one on radio or television or magazines or newspapers?"

	1959 %	1961 %	1963 %	1964 %
Most believable				
Television	29	39	36	41
Newspapers	32	24	24	23
Radio	12	12	12	8
Magazines	10	10	10	10
Don't know or no answer	17	17	18	18

III. More people select television as most desired medium than select all others combined.

Q. "Suppose you could continue to have only one of the following—radio, television, newspapers, or magazines—which one of the four would you most want to keep?"

	1959 %	1961 %	1963 %	1964 %
Most want to keep				
Television	42	42	44	49
Newspapers	32	28	28	27
Radio	19	22	19	15
Magazines	4	4	5	5
Don't know or no answer	3	4	4	4

IV. Acceptability of Commercials

Q. "Which one of these four statements comes closest to describing how you feel about commercials on television?"

	1963 %	1964 %
I dislike practically all commercials on television	10	10
While some of the commercials on television are all right, most of them are very annoying	29	26
There are some very annoying commercials on TV, but most of them are perfectly all right	31	36
The commercials on television seldom annoy me—in fact, I often enjoy them	24	23
Don't know or no answer	6	6

If the first two responses are combined as the unfavorable attitude, and the third and fourth combined to get the favorable attitude, we find the following:

	1963 %	1964 %
Favorable	55	58
Unfavorable	39	36

V. Television is favored as a source of political information in national elections.

Q. "Which would you say gives you the clearest understanding of the candidates and issues in national elections—radio, television, newspapers, or magazines?"

	November 1963 %	November 1964 %
National issues and candidates:		
Television	49	51
Newspapers	24	26
Magazines	8	10
Radio	4	6
Don't know or no answer	15	10

Hot Program Format: Country and Western

SOME 1,600 STATIONS USE C&W, OVER 200 ARE FULLTIME

About the hottest programing commodity to hit radio in 1965 was the switch to fulltime country & western music by large and small stations all across the nation. A mid-year survey by the Country Music Association, called the "marshalling force" of the industry, showed there were more than 1,600 radio stations programing from 2 to 24 hours a day of country music. A similar survey in 1963 showed only 1,300 stations. In 1965 more than 200 of the stations programed C&W fulltime, compared to 97 in 1963.

At the time of the survey, 43 states had fulltime country music stations, and Texas led the list with 28, followed by California with 19.

Considered very important by the C&W industry was the number of major markets that were being served by one or more fulltime country music outlets. New York, Los Angeles, Chicago, San Francisco, Denver, Pittsburgh, Washington, Miami, Atlanta, Detroit, New Orleans, Nashville, El Paso, Forth Worth and Dallas, each had a station feeding a diet of C&W all year round.

Sound from Tennessee—Contemporary musicologists lay much of the new-found success of country music at Nashville's doorstep. For the Nashville sound permeates not only most of the modern country tunes, but many of the top popular songs as well.

Country music has been described as folk music with a beat. Its basic ingredients are a simple melody, uncomplicated and intelligible lyrics, and usually a soulful rendition. The Nashville sound has become identified with fiddles, guitars and a driving bass producing a sound that is at home on a C&W station, a middle-of-the roader or an outright rocker.

And it is perhaps this uniformity of sound that has led C&W to its new prominence on the American music scene.

Many of the stations switching to country have done so after being middle-road pop or top 40 outlets and the switch has been accompanied by a format that resembles pop stations. Only the music has changed.

Country & western stations in the 1960's have also dropped much of the folksy, friends and neighbors approach that had characterized the country music station and its announcer for years. In its place they have put in announcers with good diction, who know C&W music and its artists, and who appeal to city as well as country audiences.

The appeal of C&W to urbanites is not a new facet of the business, but for years it had lain fallow and largely unrecognized in large metropolitan areas. In addition, the country music devotees are now being demographed and the statistics indicate that today's C&W listeners have money to spend, are mainly in the blue-collar category and are home owners.

The figures pointed to most often by country music partisans are from a 24-market Pulse survey which gives the typical C&W household this type of profile:

- The median age for the male head of the household is 45.8 years.
- There is an average of 3.5 persons living in each household.
- The median family income is $5,675, with 15.6% having family incomes of $8,000 or more.
- There are two cars in 31.6% of the households; one car in 50.1%.
- Homeowners make up 75.9% of the audience; 22.3% rent homes.
- There are 70.6% with savings accounts, 24% having more than one account.
- The male head of the household is classified as operative (semiskilled) in 20.5% of the families; craftsman (skilled) in 16.3%; executive, managerial or proprietor in 10.5%; professional or technical in 5.9%; sales in 3.9%; clerical in 3.8%; students or armed forces in 2.6%.

CHICAGO'S ONLY C & W STATION . . .

RADIO CHICAGO WJJD

TV programing: live, film, video tape

Analyses of programing, based on questionnaire returns from U. S. television stations and networks, have been a continuing feature of BROADCASTING since 1953. The current statistics cover an average week in June 1965.

The accompanying tables afford comparisons between figures for 1965; the previous year, five years ago (1960) and ten years ago (1955).

FILM/TAPE/LIVE PROGRAMING on STATIONS

	Survey Date	NETWORK AFFILIATES Average Hrs. Per Week	NETWORK AFFILIATES % of Total Schedule	NON-NET STATIONS Average Hrs. Per Week	NON-NET STATIONS % of Total Schedule	ALL STATIONS Average Hrs. Per Week	ALL STATIONS % of Total Schedule

Today's many worlds of music
are the result of an opportunity provided
by BMI for thousands of composers,
writers and publishers to be heard,
to be treated with dignity and respect,
and to share impartially
in the economic rewards
of their talents.

ABC-TV STATIONS AFFILIATES ASSOCIATION

Thomas Chisman, WVEC-TV Norfolk, chmn; Herbert Cahan, WJZ-TV Baltimore, vice chmn; Burt Ladow, KTVK(TV) Phoenix, sec; Robert Wiegand WTVN-TV Columbus, treas; Leslie Norins KEYT-TV Santa Barbara Calif.; Martin Umansky, KAKE-TV Wichita; Mike Shapiro, WFAA-TV Dallas: Joseph Brechner, WFTV(TV) Orlando; Joseph Hlady, Jr., KCRG-TV Cedar Rapids, Iowa.

ABC-TV NETWORK RATES

Below are gross rates for Class A hour. Class A time is 6-11 p.m., Sunday through Saturday. Class B rate (75% of Class A rate) applies to stations not primarily affiliated with ABC-TV. Class C time (50% of Class A rate) is 11 p.m. to sign-off Sunday through Saturday, 9 a.m. to 6 p.m. Saturday and Sunday, and 5-6 p.m. Monday through Friday. Class D time (33.3% of Class A rate) is daytime hours up to 5 p.m. Monday through Friday, except for special programs on national holidays, which are charged as Class C. Rates for each period of time of less than one hour are figured at the following percentages of the hour rate: half hour—60%; quarter hour—40%; one-third of an hour—40%; two-thirds of half-hour—40%; one-third of half-hour—20%; one-sixth of hour—20%.

ABC has no must-buy list of basic stations. Its rate card states "Advertisers are required to purchase for each program a minimum cleared gross for station time equivalent to $100,000 for each Class A hour telecast."

NBC-TV NETWORK RATES

Rate Basis

Rate Classifications

Class A Rates: Full rates listed herein Mon. thru Sun. 6-11 PM *Local Time*.

Class C Rates: 50% of Class A rates Mon. thru Sun. 5-6 PM. *Local Time* and 11 PM-1 AM *Local Time*, Sat. and Sun. 4-5 PM *Local Time*.

Rates for fractional periods in excess of one hour in the above rate classifications are based upon the following precentages of the applicable hour rate:

Minutes	% of Hour Rate	Minutes	% of Hour Rate
45	80%	15	40%
30	60%	5	25%

Class E Rates: 35% of Class A rates. All other times.

Rates for fractional periods in excess of one hour in the above rate classifications are based upon the following percentages of the applicable hour rate:

Minutes	% of Cl. A Hour Rate	Minutes	% of Cl. A Hour Rate
45	26.25%	15	8.75%
30	17.5%	5	2.92%

Rates for fractional periods in excess of one hour in all rate classifications are in direct proportion to the one hour rate. (e.g., 1 hour and 15 minutes = 125% of applicable hour rate.)

Voice of America Fact Sheet

The Voice of America, a part of the U. S. Information Agency, submits evidence to the peoples of other nations that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress and peace. Equally, the Voice combats communist anti-American propaganda and exposes communist aggression and subversion on a worldwide basis.

Radio is the fastest, most effective day-by-day medium for achieving these objectives; it speaks directly to people abroad, instantaneously surmounting barriers of distance and illiteracy. It also overcomes local efforts at censorship and control, including "jamming."

Facilities

The Voice has a network of 102 transmitters, of which 36 are in the United States. These latter are short wave stations ranging in power from 50 kw to 500 kw, owned and operated by the USIA. The largest transmitter complex is at Greenville, North Carolina. There, 18 transmitters feed programs received via microwave from the Washington studios to audiences and relay bases abroad over 73 directional antennas. Total power at Greenville is 4,800 kw. Other domestic facilities are at Bethany, Ohio; Honolulu; Delano and Dixon, both Calif. In addition, the Voice leases NBC short wave facilities at Bound Brook, N. J., and naval medium wave facilities at Sugar Loaf, Fla.

Overseas relay stations are at Munich, Thessaloniki, Rhodes, Tangier, Liberia, the Philippines, Okinawa, England and Ceylon, and include short and medium wave transmitters. Two of these are one million watt transmitters, placing them among the world's most powerful.

In addition to its network of fixed transmitters, the Voice's broadcast service has four transportable transmitters. These are all 50 kw, three shortwave and one medium wave. They are designed to be moved quickly to wherever they are needed by land, sea or air. The medium-wave transportable transmitter is on Marathon Key, Florida, broadcasting Spanish-language programs to Cuba. The three shortwave transportables are in the Philippines, where they augment existing facilities in relaying Voice programs to Southeast Asia and the Far East. A new facility, being planned in the Philippines with 10 250 kw transmitters, is scheduled to be on the air by the end of 1967.

This and other construction planned or now under way by the USIA, both in the United States and overseas, will add 7,800 kw in short and medium wave power to the existing 15,135 kw, giving a total of 22,935 kw and making the USIA's radio facilities flexible and competitive.

In West Berlin the USIA operates RIAS (Radio in the American Sector), which broadcasts an average of 33 hours a day in German over medium and short wave facilities as well as FM.

Approximately 40% of VOA's total program effort is directed to listeners in Communist countries, including Cuba. Other transcribed programs, music recordings and script material are furnished by U. S. Information Agency offices throughout the free world for local distribution and broadcast. Other relays and rebroadcasts are made through arrangements with local broadcasters in West Europe, Africa, the Near East, South Asia, the Far East and Latin America. Currently some 3,000 stations overseas are rebroadcasting more than 13,000 hours of USIA programing weekly.

Program Content

The USIA's directive to its broadcast service states; "The long-range interests of the United States are served by communicating directly with the peoples of the world by radio. To be effective, the Voice of America must win the attention and respect of listeners. These principles will govern VOA broadcasts:

1. "VOA will establish itself as a consistently reliable and authoritative source of news. VOA news will be accurate, objective and comprehensive.
2. "VOA will represent America, not any single segment of American society. It will therefore present a balanced and comprehensive projection of significant American thought and institutions.
3. "As an official radio, VOA will present the policies of the United States clearly and effectively. VOA will also present responsible discussion and opinion on these policies."

Implementation of this directive has resulted in approximately half of the word output being devoted to news. The other half consists of news analyses, commentaries, press reviews, round-table discussions, documentary programs and special events covering American political, economic, social and cultural topics so as to provide overseas audiences a balanced and accurate concept of the United States and clear information regarding United States policies. The VOA also broadcasts programs of Western popular and popular music.

Audiences

The USIA estimates its current world radio audience is in the range of from 17 to 26 million on an average day, and about double that amount for an average week. During times of international crisis, or for such special events as an American space launch, the audience increases considerably.

Schools Specializing In Radio-TV

(This list includes only those schools which specialize in professional or technical courses in broadcasting. Many colleges and universities also offer courses in radio and television. Current information on colleges and universities which offer degrees in radio-TV follows this listing.)

Allied Technical Schools. 207 Madison Ave., Memphis 38103. (901) 525-8896. E. R. Ledbetter, pres; G. R. Yarbrough, dir.

Courses offered: Radio-TV announcing, time selling, all phases electronics.

Broadcast Training Center. 25 West 43rd St., New York 10036. (212) Oxford 5-9245. Morris Brownstein, pres; Moya Phillips, dir; Marvin Matusof, chm tech studies.

Courses offered: Radio-TV commercial course, radio-TV announcing course; FCC 1st class ticket preparation course; copywriting; operators course.

C. B. School of Modern Radio Technique. 259 Geary St., San Francisco. YU 2-9640.

Broadcasting Institute of America Inc. 3230 Patterson Drive, New Orleans 70114. Box 6071. Joseph M. Costello III, dir.

Courses offered: Individual instruction, in broadcast announcing, personality projection, speech correction; news journalism with emhpasis on sports and weather and editorializing; continuity writing, and production recording (utilizing sound effects, stingers and tags;) traffic, sales; promotions, public relations, music programing, broadcast laws and regulations, console operation, all training within commercial broadcast stations. Approved for veterans. Placement service for graduates.

CONSIDER THIS: How can ANY school develop your "on-the-air" personality in a class? Every student has individual problems! The Broadcasting Institute of America is the only school offering INDIVIDUAL INSTRUCTION. NO CLASSES. You may enroll at any time. Read over our course described above. Compare it against all listed; then write us for more information. By the way, our course in Broadcasting is accredited by the State Board of Education of Louisiana, the Veterans Administration, and we are associate members of the Louisiana Association of Broadcasters.
THE BROADCASTING INSTITUTE OF AMERICA
BOX 6071 NEW ORLEANS, LA.

Broadcasting-Video Arts School. 2016 Walnut St., Philadelphia 19103. (215) Locust 3-0826.

Courses offered: Basic courses covering radio-TV performance.

Cambridge School of Broadcasting. 637 Beacon St., Boston 02215. (617) 536-2050. Milton Graham, pres; Jack Nesson, VP; Albert Williams, dir.

Courses offered: Radio and TV production, announcing, sales, continuity writing, sportscasting, newscasting, operation of equipment; programing.

Capitol Radio Engineering Institute. 3224 16th St., N.W., Washington 20010. (202) Hobart 2-1520.

Courses offered: Career development programs in electronic engineering technology; engineering math; management; nuclear engineering technology, and new programs in space data systems, space tracking systems, space guidance and control communications.

Cleveland Institute of Electronics. 1776 E. 17th St., Cleveland 44114. (216) Superior 1-9400.

Courses offered: Electronics technology; industrial electronics & automation; broadcast engineering; 1st-class FCC license; electronic communications; advanced communications engineering.

Columbia College. 2328 W. Seventh St., Los Angeles 90057. (213) Dunkirk 8-0551.

Courses offered: TV studio techniques, camera operation, audio-video controls, switching, video tape, lighting; TV production, writing, directing, staging, announcing, acting; radio, board operation, record cueing, personality projection; broadcasting, lab and theory preparation for FCC license. All work credited toward Bachelor of Arts degree. Graduate work also offered.

Columbia School of Broadcasting. 4444 Geary Blvd., San Francisco 94118. (415) SK 2-5163. William A. Anderson, pres & dir; William M. Reed, exec VP; V. Richard Good, VP; E. Kersh Walters Jr., VP & dir; Gerald Berman, dir; Tony Gaetani, sec; and Barbara Baker, registrar.

Los Angeles: 430 Foothill Building, La Canada, Calif. Robert L. Graham, 790-0510.

Courses offered: Complete correspondence radio announcing course, recorded by network quality announcers and 33-1/3rd. long play records plus texts. Training includes voice, diction and prounciation exercises, commercial delivery, newscasting, broadcast terminology, disk jockeying, music formulae and programing, michrophone techniques, studio procedure, ad libbing, sportscasting, conducting interviews, telephone call-in programs, control room operation, getting first job, FCC 3rd class license and upon successful completion of the course, nationwide job placement service provided. FCC 1st class license, correspondence.

DeVry Technical Institute. 4141 Belmont Ave., Chicago 60641. (312) Kildare 5-2700. T. J. Lafeber, pres; O. I. Thompson, exec VP; M. E. Houghton, dir of home training; J. J. Gershon, dean; J. T. Anagnost, dean of men; G. C. Fritzche, registrar.

Courses offered: Laboratory training in radio, TV, communications, automation electronics, instrumentation, electronics engineering technology. Home training in radio, TV, communications, electronic instrumentation and control, space & missile electronics, electronic computer control; electronic control systems; electronic automation technology.

Elkins Institute of Radio & Electronics. 2603 Inwood Rd., Dallas 75235. (214) Fleetwood 7-4001. Bill Elkins, pres; Billy Bob Elkins, exec VP & dir; Jim Craddock, VP in charge of placement & admissions; Gene Riley, VP & dir of training.

Atlanta 9: 1139 Spring St., N.W. (404) Trinity 2-0375. Gene Riley, VP.

Chicago 4: 14 East Jackson Blvd. (312) Wabash 2-5430. Don Willard, dir.

New Orleans 12: 333 St. Charles Ave. (504) 525-2910. John Whytsell, dir.

Minneapolis 6: 4119 E. Lake St. 722-2726. George Fore, dir.

Courses offered: 6-week theory & laboratory training in radio, TV, electronics, terminated by acquisition of a 1st class radio-telephone FCC license, 12-week course in fundamental broadcasting encompassing announcing, scriptwriting, sportscasting, newscasting, control operation, recording, programing, production, and voice training.

Emerson College. 130 Beacon St., Boston 02116. (617) 262-2010.

EMERSON COLLEGE

Accredited liberal arts college. Specialization in radio. TV, theatre arts, speech, speech and hearing therapy. B.A., B.S., M.A., M.S. degrees. Day, evening, summer sessions. Broadcasting, announcing, writing, radio and TV production. Electronic production studio, theatre, FM radio station, speech and hearing clinic. Outstanding opportunities for achieving professional competence in acting, directing, and script writing for radio and TV. Coed. 85th year. For catalog write: Director of Admissions.

Experiments cover all phases of TV servicing including circuits, oscillators, amplifiers, UHF and VHF, troubleshooting and interpretation and antenna adjustment.

Radio Operating Questions and Answers By J. Hornung and A. McKenzie. McGraw-Hill Book Co., 330 West 42nd St., New York 10036, 1964, 660 pp., $6.00.

Provides commercial radio operator candidates with clear, concise aid in preparing to pass the Federal Communications Commission licensing examinations.

MAJOR TRENDS AND EVENTS—SEPT. 1964 THROUGH AUG. 1965

Brief references, grouped by subject, to some of the major news developments reported in BROADCASTING—*The Business Weekly of Television and Radio*, for the year starting Sept. 1, 1964, and ending Aug. 31, 1965. Dates refer to the issues of BROADCASTING in which the stories appeared. Many stories affect more than one aspect of radio-TV, making classification a matter of arbitrary decision, since space does not permit extensive duplication. Users are therefore urged to look under all appropriate headings. For similar references to earlier years, see appropriate BROADCASTING YEARBOOKS.

Advertiser-Agency Relations

Account switches in 1964 moved $132 million in broadcast billings—1/4/65; $116 million in first half of 1965—7/5/65.

BBDO tests new compensation plan with American Tobacco, Schaefer Brewing—2/8/65; loses International Salt account—2/22/65; president reports on progress—5/10/65.

Advertising's goal is profits, not sales, K & E president says—2/22/65.

Advertisers examine agency relations more closely, research study shows—5/17/65.

Agency profits rise in 1964, reversing long-time trend—7/26/65.

Advertiser-Broadcaster Relations

Advertiser is held responsible for program he sponsors, so needs to control TV programing, B&B's Rich tells ANA—11/16/64; ANA members favor national TV policy—5/3/65.

Corporate profits depend on TV advertising, TVB's Cash says—11/13/64.

Tiger is ad animal of 1964—12/21/64; top spot TV advertisers grow faster—3/15/65.

American Medical Assn. charges censorship as TV networks refuse to sell AMA time for anti-Medicare spots—9/14/64; ABC-TV takes them—9/29/64; CBS-TV gives half-hour to AMA, another to Senior Citizens Council—10/12/64; AMA asks for time to answer Sen. Anderson's attack on NBC-TV's *Today*—9/21/64.

General Foods produces its own TV series, *Linus the Lion Hearted*—9/21/64.

E. H. Russell, McCloskey & Co. dissolves media department as obsolete—1/11/65.

Southern California Broadcasters Association takes commercial creators on agency tour to generate more interest in radio—6/28/65.

Preseason predictions of program successes, failures cause concern—8/2/65.

Allocations

FCC proposal to share TV auxiliary service channels with space research draws NAB protest—12/7/64.

FCC ponders revision of financial qualification standards for UHF applicants—9/14/64, 9/28/64; asks for three-year survival assurance — 3/15/65, grants stay in applying standard to three applicants—4/19/65.

Duopoly rule changed to aid UHF—10/5/64.

FCC tells UHF grantees to get going or give up grants—11/9/64; 11/16/64, 3/22/65; dark UHF's ask more time—5/17/65; some get extensions—6/21/65.

FCC proposes revisions in field strength curves for TV and FM—5/17/65, Committee for Full Development of All-Channel Broadcasting urges change—6/28/65; schedules engineering conference—8/16/65; more data asked—8/23/65.

FCC refuses to reconsider denial of short-spaced VHF drop-ins in seven markets—9/7/64, 3/22/65, but is willing to dis-

www.americanradiohistory.com

cuss it—3/29/65, makes exception for KBMT (TV) Beaumont, Tex.—1/11/65.
Committee for Full Development of All-Channel Broadcasting asks FCC to require networks to affiliate with UHF stations in fringe area of primary VHF affiliates—1/25/65, 2/22/65.
Examiner recommends rejection of request of UHF station for protection from plan of VHF station to extend coverage—6/7/65.
New UHF table would create new class of "community" stations in upper UHF channels—6/7/65, 6/14/65; gets support of NAB—7/26/65; but ABC questions—8/23/65; so does NAEB—8/3/65.
Citizens band radio operators are major cause of TV interference—10/19/64.
Plan to give UHF ch. 14 and 15 to land mobile services is urged, opposed—10/12/64, 3/1/65, 4/5/65, 4/12/65, 5/17/65, 8/2/65, 8/9/65; VHF channel 6 requested in California—8/23/65.
Duplicate assignments for clear channels create problems—9/7/64, 11/23/64, 3/1/65, 3/8/65; 770 kc case may have to be reopened—3/1/65, 7/26/65.
Super power for clear-channel stations opposed—9/7/64; Senate bill would forbid it—3/22/65.
Clear channels may lose protection—8/30/65.
Daytime broadcasters organize to get pre-sunrise restrictions abolished—9/21/64, 10/12/64; financial data reported—3/22/65.
Class IV AM stations want nighttime power boost — 11/16/64, 11/1/65; FCC says no—5/31/65.
FCC adopts FM channel assignment table for noncontinental U. S. areas and Alaska—10/12/64.
Equal power for New York network-owned AM stations the rule; if one has cut others must take it too is theory—7/26/65.

Audience

More homes have radio and TV sets than toasters or vacuum cleaners, Dept. of Labor finds—11/23/64; Census Bureau may count homes with color, UHF sets—3/29/65, 6/21/65; ARF will count them—7/12/65.
Radio audience totals 80 million a day, Sindlinger reports — 9/28/64; listens 1,238 million hours a week, WBC finds—9/28/64; 82% of New Yorkers listen at least once a week, Media Statistics says—5/17/65; CBS charts radio audience for 16 years—10/26/64.
TV viewing at record high—11/16/64, 3/15/65; TV has 93% penetration, Nielsen finds—12/7/64, with audience gaining steadily—4/26/65, and network viewing up at night—12/14/64.
Television is best way to reach farm families, TvB asserts'—10/19/64; Harris poll claims richer, better educated young adults deserting TV—4/12/65; CBS denies this—5/17/65; so does TIO—6/21/65.
Child viewer is sophisticated today—7/19/65.
Audience composition more important than numbers to advertiser—1/18/65, 1/25/65; ANA study of audience trends—3/8/65.
Sindlinger compares audiences of radio, TV, newspapers, magazines—9/28/64.
How housewives listen—8/16/65.

Broadcast Economics

TV 1964 revenue, expenses—8/9/65.
TV's growth, 1949-64—11/16/64.
Network television profitable for owners and affiliates—10/26/64.
Census lists income of agencies, station representatives, producers—8/2/65.
Broadcast stocks continue strong—1/11/65.
Station sales top $200 million in 1964—2/22/65.
Station profits—8/2/65.
Employment is up at radio stations, the same for TV stations—11/23/64; salesmen cost more—12/28/64; American Women in Radio and Television have average salary of $7,500—5/24/65.

Clutter doesn't affect commercial impact, Chicago study shows—6/21/65.

TV ads get more attention than they are credited with—3/15/65.

Children watch, remember brands and parents buy them—5/31/65.

Piggyback commercials pose problems for stations, sponsors: Procter & Gamble won't permit triple-spotting—9/7/64, but has own piggyback for Crest and Prell—10/5/64; reverses policy and agrees to go along with NAB code rules—6/21/65; Colgate-Palmolive refuses to pay premium charges for piggybacks—9/7/64; some stations revise policies—9/28/64; others don't and lose C-P business—10/5/64; Helene Curtis cuts back on spot TV—9/14/64; four-product commercial raises question—9/28/64, but Alberto-Culver five-product spot is ruled to be integrated—11/2/64; NAB identifies multiple-product spots as integrated or piggyback—9/21/64, 10/12/64, 11/2/64, 11/16/64, 12/14/64, 2/1/65; stations protest NAB waiver of political commercials from piggyback status—9/7/64, 10/12/64; some agree to accept piggybacks without extra charge—1/25/65.

TV commercials follow programs into color—7/12/65.

Radio commercials ignore recording standards—8/23/65.

TV commercials described in BROADCASTING include: apparel: Manhattan shirts—12/21/64, Keds—3/22/65; automotive: American Oil—9/7/64, Chevrolet—6/7/65, Dodge—12/14/64, 12/21/64, Ford—11/30/64, 5/24/65; Earl Scheib (repainter)—7/12/65; Standard Oil of Ohio—7/26/65; beverages: Cinzano vermouth—10/26/64, Falstaff beer—2/15/65, Koehler beer—5/31/65, Monsieur Henri wines—11/30/64, Pepsi-Cola—3/29/65; Polynesian Punch—7/5/65; cleansers: Brillo soap pads—2/15/65, Chiffon detergent—10/19/64; foods: Accent—2/8/65, A-1 Sauce—1/4/65, Big Shot chocolate syrup—10/19/64, Chun King Chinese foods—9/21/64, 4/19/65, Green Giant corn—4/26/65; Hiland potato chips—11/16/64, Holsum bread—6/7/65, Hunt's catsups—2/15/65, Maltex cereal—1/4/65, Nestle's Choco-Bake—4/19/65, Mrs. Schlorer's mayonnaise—4/19/65; pens: Paper-Mate—11/23/64, Waterman-Bic—3/15/65; political: Democratic—9/21/64, Republican—10/26/64; smoking: Dutch Master cigars—11/16/64, Lucky Strike filter cigarettes—9/7/64, Muriel cigars—10/5/64, Tar Gard—5/31/65; toiletries: Jade East—8/16/65; Schick hot lather shave cream—11/2/64. Shontex shampoo—5/24/65; miscellaneous: Aluminum Ltd.—3/1/65; Florida Council of Churches—8/2/65; GE housewares—11/9/64; Radio Free Europe—12/28/64; Rival pet foods—3/1/65; Sun Soft fabric softener—4/6/65; Vertagreen—3/22/65; Wurzberg department store—9/21/64.

Radio commercials described in BROADCASTING include: Del Monte soft drinks—4/26/65; Ford Dealers Adv. Assn. of So. Calif.—5/24/65; KABC-TV Los Angeles—9/21/64.

Community Antenna Television Systems

Who should regulate CATV and how kept broadcasters, community antenna operators and FCC busy trying to find practical answer. CATV operators and broadcasters discuss legislation needed to give FCC authority—9/7/64; Television Accessory Manufacturers Institute (TAME) would give FCC same authority it has over broadcasting—9/21/64; ABC agrees—10/19/64, as do other broadcasters—11/23/64, but CATV operators don't—11/30/64, 12/14/64, 12/28/64, joint FCC-state regulation proposed—1/4/65; freeze requested—1/25/65; restriction to areas unreached by broadcast signals proposed—2/8/65, 2/15/65, 3/1/65; electric dealers want regulation—4/5/65; FCC proposes to regulate all CATV—4/19/65, 4/26/65; Rep. Harris (D.-Ark.) questions FCC authority—5/3/65, 5/10/65; Harris bill for FCC to regulate but not license CATV wins CATV support but is opposed by NAB and AMST—5/17/65, 5/31/65, 6/7/65; public wants CATV—6/21/65; NAB gets objections—6/7/65, resignations—7/12/65; networks disagree—7/26/65; Loevinger plan—6/14/65; FCC proposal for separate CATV microwave service beings prompt opposition—7/12/65; broadcasters divided—8/2/65, 8/9/65; court asked to declare CATV common carrier—8/20/65.

Study made by Dr. Franklin Fisher for NAB shows drop in station revenue when CATV enters market—10/26/64; NCTA questions report's validity—12/21/64; NAB tells FCC broadcasters need full protection vs CATV—11/2/64, but stations with CATV affiliations challenge NAB—11/16/64; FCC economist, Dr. Martin Seiden says CATV profit potential has been misunderstood—12/14/64; FCC studies Seiden report—2/22/65, which proposes use of translators to avert CATV threat—3/8/65, finds CATV profits far better than those of stations—3/8/65; Fisher calls Seiden report wrong—4/12/65; Seiden says it's Fisher who's wrong—4/19/65; NCTA calls CATV no threat to broadcasters—6/21/65; CBS says little threat—7/26/65; NAEB watches CATV—11/30/64; finds it as much threat to ETV as to commercial stations—7/5/65.

NAB and NCTA negotiations reach tentative agreement on plan for CATV regulation, but NAB Future of Television in America Committee rejects it—12/21/64; broadcasters divided—12/28/64, 1/4/65; new attempt at NAB-NCTA agreement—1/11/65, bogs down—1/18/65, 1/25/65, 2/1/65; another try—2/22/65; brodcasters don't agree—3/29/65, 3/12/65, 4/19/65, 6/28/65.

FCC, concerned with broadcasters ownership of CATV, defers license renewals—10/5/64; is urged to favor cross-ownership—10/19/64, 10/26/64, 11/2/64, but translator group opposes—11/30/64; FCC takes new look—12/14/64, 6/7/65, gives renewals to 21 stations with CATV interests in same market—7/19/65; court orders hearing of CATV sale to town's only TV station—5/10/65; FCC authorizes common ownership of translators and CATV—5/24/65; first grant—8/2/65.

Connecticut Public Utilities Commission, only state agency in nation with regulatory authority over CATV, holds hearings on 21 applications—9/21/64, 9/28/64, 10/19/64; ponders how much profit a CATV system should be allowed—11/9/64, and effect of CATV on UHF 11/16/64; considers rates—11/23/64, and inducements to new subscribers—11/30/64; is asked to invite FCC to join in proceedings—1/4/65; bill to make CATV a public utility in Connecticut—3/8/65, evokes NCTA opposition—4/12/65; hearings reopen with applicants quizzed on finances—3/29/65, 5/3/65, 5/10/65, 5/24/65, 5/31/65, 6/14/65, 6/21/65, 7/5/65; state tax on gross proposed—5/3/65; phone company wants rates lowered—7/12/65.

Public utility status for CATV proposed in New Jersey—1/25/65, Pennsylvania 2/1/65, Oregon—2/22/65, New York—2/22/65, 5/3/65; California—6/14/65; North Dakota—8/2/65.

Effects of CATV on radio pondered by NAB board—2/1/65; CATV called problem for radio as well as TV—2/22/65; some systems provide FM signals—4/26/65; NAB starts study—7/19/65.

Relations of CATV operators and telephone companies worsened as Bell System companies suggest they could provide whole service, not just pole space 10/19/64, 11/2/64; AT&T says they'll continue to provide pole-line attachments—1/9/64; rates lowered—2/15/65; CATV tariffs filed in 26 states—5/10/65; Southern Bell rates to get court test in North Carolina—10/26/64; Asheville, N. C., system may buy Bell service—11/16/64, so may system in Brunswick, Ga.—12/21/64; New York state independent phone system prepares to enter CATV field—11/30/64; so does United Utilities, holding company for independent phone companies—5/31/65; FCC asked to reconsider rules for CATV systems served by phone companies—5/31/65; New Jersey holds hearings on phone company CATV rates—7/5/65; pole line problems increase—7/12/65, 7/26/65; FCC letter—8/23/65, 8/30/65; New England TET promises no pressure—8/23/65.

Rights of CATV systems to pick up broadcast programs at will are challenged by CBS—10/26/64; CBS files test suit against Teleprompter—12/7/64, which denies charges—12/21/64, 2/15/65; United Artists threatens actions—1/11/

www.americanradiohistory.com

65, 2/1/65, 2/15/65; U.S. Supreme Court refuses to review appeals court ruling that CATV can use programs of KMVT Twin Falls, Idaho, until station proves it has protectable copyrights—2/1/65; copyright bill revision would give stations rights to control CATV pickups —5/31/65, 8/23/65; so would amendment to Communications Act—6/21/65, 6/28/65, 7/19/65.

CATV plans to invade New York City—10/26/64, brings opposition, imitation, warnings — 11/2/64, 11/16/64, 11/23/64; NCTA questions city's authority—12/7/64; more applicants—12/21/64; hearing —1/18/65; city franchise bureau recommends grants—5/3/65, 5/10/65, 5/24/65, 7/5/65, but state may do regulating—5/3/65.

FCC asks communities about CATV licenses—9/14/64; TAME urges cities to bar CATV — 12/21/64; AMST wants CATV barred from cities — 2/8/65; TAME endorses stand — 2/15/65; FCC may halt CATV in markets with three stations or less—3/22/65; city ordinance right upheld—8/16/65.

CATV was also active in York, Pa.—9/21/64; New Haven, Conn.—9/28/64, 10/19/64; Schenectady, N.Y.—9/28/64, 2/8/65, 2/22/65; 37 New Jersey cities—10/12/64; Bennington, Vt.—11/23/64; Cleveland — 11/16/64, 2/1/65, 3/8/65; Philadelphia — 11/23/64, 12/7/64, 12/14/64; Raleigh, N.C.—11/30/64, 3/15/65; Charlotte, N.C.—11/16/64; Bakersfield, Calif. — 11/30/64; Asheville, N.C.—12/7/64; Wilmington, Del. — 12/7/64; Toledo, O. —2/8/65; Pittsburgh—2/15/65, 2/22/65; Santa Maria, Calif. — 4/5/65; Bristol, R.I.—4/19/65; Clarksburg, W. Va.—5/10/65; Jackson, Mich.—5/24/65.

Degradation of signal by CATV charged by Springfield Television Broadcasting Corp.—9/7/64, 9/14/64, 9/28/64, 10/12/64, 4/19/65; Bill Daniels, CATV broker, offers $10,000 for proof of deliberate degradation — 1/18/65, 2/1/65, 2/15/65, 3/1/65, 3/8/65, 3/22/65.

CATV homes, estimated — 11/30/64, 1/25/65; counted — 3/15/65; could serve farmers too—12/14/64.

CATV penetration analyzed—8/2/65; analysis criticized—8/23/65.

Is CATV common carrier?—8/2/65.

ABC looks into CATV ownership—7/12/65; deal falls through—7/19/65; NBC also interested—8/30/65.

FCC proposed microwave rules criticized —10/12/64, 12/7/64; translators denied protection vs CATV—11/2/64; freeze on CATV microwave applications asked—11/9/64; NAB and NCTA divide on 15-day duplication protection — 2/1/65, 3/15/65; FCC says required only of CATV systems using microwave—2/8/65; FCC right to impose conditions gets court test—3/1/65, 3/8/65, 6/28/65; protection denied for grade B coverage — 3/8/65, 7/5/65; right of CATV system to drop signal formerly carried—11/16/64, goes to hearing—7/19/65.

Frederick W. Ford leaves FCC to become NCTA president — 11/23/64, 1/4/65; CATV major topic at NAB regional meetings—11/23/64; NAB counsel sees no solution — 3/29/65; fantastic potential, mammoth problems discussed at NCTA convention—7/26/65.

Use of vacant CATV channels for public service programing proposed—2/8/65.

Major CATV operators belong to NCTA—3/8/65.

Radio broadcasters urged to get into CATV—5/24/65; CATV holdings of NAB board members—6/21/65; CBS buys into Vancouver, B.C., CATV system—10/19/64; ABC plans—5/31/65.

Associated Press offers visual news service to CATV—7/26/65.

New CATV equipment shown in Denver —7/26/65.

Conventions

Major meetings of organizations, associations and labor unions directly or indirectly associated with broadcasting, as reported between Sept. 1, 1964, and Aug. 31, 1965. ABC Radio Affiliates—3/29/65; ABC-TV Affiliates—12/7/64, 3/22/65, 6/21/65; Advertising Association of the West—6/28/65, 7/5/65; Advertising Federation of America — 6/28/65; AFA-AAW Washington conference—2/8/65; Advertising Research Foundation—10/12/64; American Association of Advertising Agencies—10/26/64, 11/2/64, 11/16/64, 11/23/64, 4/26/65; American Marketing Association—1/4/65; American Society of Composers, Authors & Publishers—9/28/64; American Society of Newspaper Editors — 4/19/65; American Women in Radio & Television — 10/5/64, 11/16/64, 5/17/65; Arizona Broadcasters Association—12/7/64; Associated Press—4/26/65; Association of Maximum Service Telecasters — 3/29/65; Association of National Advertisers — 10/5/64, 11/16/64, 1/25/65, 4/12/65, 5/17/65; Association for Professional Broadcasting Education—3/29/65.

Broadcasters Promotion Association—11/23/64; California Broadcasters Association—6/21/65; CBS Radio Affiliates—9/28/64; CBS-TV Affiliates—12/7/64, 5/3/65; Clear Channel Broadcasting Service — 3/29/65; Committee for Full Development of All-Channel Broadcasting — 5/17/65; Electronic Industries Association—10/5/64, 12/7/64; Federal Bar Association — 9/14/64; Florida Association of Broadcasters — 7/5/65; Georgia Association of Broadcasters — 6/21/65; Idaho Broadcasters Association — 7/26/65; Institute of Broadcasting Financial Management — 11/16/64; Institute of Electrical and Electronic Engineers—3/29/65; International Radio and Television Society College Conferences—4/12/65; Kansas Association of Radio Broadcasters—5/17/65; Kentucky Association of Broadcasters—5/10/65; Michigan Association of Broadcasters—9/14/64; Mississippi Broadcasters Association — 5/10/65; Montana Broadcasters Association—5/10/65.

National Association of Broadcasters, annual convention: 3/15/65, 3/22/65, 3/29/65, 4/5/65; state presidents conference —2/8/65; regional meetings—10/19/64, 10/26/64, 11/2/64, 11/16/64, 11/23/64; board meetings — 2/1/65, 6/28/65; radio program clinics—5/24/65, 5/31/65, 6/14/65; National Association of FM Broadcasters—3/29/65; National Association of Television and Radio Farm Directors 11/30/64; National Association of Television Program Executives — 5/17/65; National Broadcast Editorial Conference — 7/26/65; National Community Television Association — 7/19/65, 7/26/65; National Religious Broadcasters—2/1/65; National Spanish Language Broadcasters — 7/12/65; NBC-TV Affiliates—3/22/65; New York State Broadcasters Association — 7/26/65; North Carolina Association of Broadcasters—6/28/65; Ohio Association of Broadcasters—5/17/65; Oregon Association of Broadcasters—5/10/65.

Pennsylvania Association of Broadcasters 10/26/64; Radio Advertising Bureau—3/29/65; Radio Television News Directors Association — 11/16/64; Retail Advertising Conference—1/25/65; Sigma Delta Chi—12/7/64; Society of Broadcast Engineers — 3/29/65; Society of Motion Picture & Television Engineers 4/5/65; Station Representatives Association —5/17/65, 8/9/65; TV Stations Inc.—3/29/65; Television Bureau of Advertising 11/23/64, 3/29/65; Texas Association of Broadcasters—10/5/64, 4/19/65; United Press International—4/26/65; Washington State Association of Broadcasters 5/17/65; Western Electronic Show and convention—8/23/65.

Copyright

Revision of Copyright Act argued in hearing of House Judiciary Committee—5/24/65; would require juke boxes to pay royalties, CATV operators to get permission of originating stations — 5/31/65; fees for record companies proposed —6/14/65; more testimony—8/9/65, 8/23/65.

Music licensing organizations, a special BROADCASTING report—3/15/65; new one, Coin Operated Phonograph Performance Society, formed—5/17/65.

Montana legislature moves to put music licensing under state control — 2/15/65; bill is passed—3/8/65, 3/15/65, but vetoed 3/22/65; Montana broadcasters claim NAB let them down—3/29/65, 7/26/65.

Court fines three Washington state stations $60,000 for copyright infringements, rules music must be paid for regardless of state laws—9/12/64, 2/15/65; two stations settle — 3/8/65; ASCAP sues others—4/12/65.

Guideline for savings in copyright fees—11/16/64, denounced by ASCAP—5/3/65.

ASCAP income mostly from radio-TV—9/28/64.

ASCAP and TV networks reach agreement —11/2/64, but All-Industry TV Stations Music License Committee won't take those terms — 11/9/64; asks court to make ASCAP divulge financial data, 1949-64 — 1/11/65, 2/1/65; court orders some but less than asked—3/22/65, 3/29/65, 4/12/65, 4/19/65; radio committee wants similar data—3/29/65, 4/26/65, 5/31/65; Metromedia seeks special license —12/7/64; court denies request—3/15/65.

BMI may be divorced from broadcaster ownership—11/2/64; sells last publishing firm—11/16/64; Dept. of Justice files antitrust suit — 12/14/64, 12/21/64, 3/8/65.

BMI offers stations indefinite license extensions—2/15/65.

BMI President Bob Burton dies—4/5/65; board takes time in picking successor——4/26/65.

All-Industry Radio Music License Committee queries stations about SESAC dealings—12/7/64.

Background music services file piracy suits—1/11/65, 8/23/65.

Editorializing

Nearly half of AM stations editorialize—9/28/64.

CATV systems are entitled to time to answer anti-CATV editorials, FCC warns —3/15/65.

KABC Los Angeles establishes first editorial scholarship—4/12/65.

Educational Television

Finances continued as biggest problem for ETV stations. Income, expenses reported in NAEB study—7/12/65; urged to provide financial support to ETV—10/5/64, commercial broadcasters have already done so, a BROADCASTING survey reveals 11/9/64, 11/30/64; committee of communications industry is formed to help—4/15/65; half-educational, half-commercial operation proposed—10/12/64, 12/5/65; programs donated by commercial firms, who get air credits—1/4/65, are criticized by NET—1/4/65, approved by FCC—4/5/65, protested by NAB—4/26/65, 5/10/65, but go on—6/28/65; WENH-TV Durham, N.H., stages own fund-raising drive—9/14/64; Florida Educational Television Commission grants — 9/21/64; National Home Library Foundation gives NAEB $80,000 — 9/21/64; Dept. of HEW grants — 11/30/64; Ford Foundation grants — 12/7/64, 1/11/65, 2/1/65, 7/19/65; CBS gifts —1/25/65, 3/22/65; NBC gifts—3/15/65; Rockefeller Foundation gifts — 4/12/65; Rep. James C. Cleveland proposes federal funds be used to buy ETV time on commercial stations—12/28/64.

Petition of Midwest Program for Airborne Television Instruction to have experimental license made permanent, with more channels — 9/21/64, meets opposition—10/19/64, 5/17/65, is denied—7/5/65; reconsideration is sought—8/9/65.

KCET(TV) Los Angeles begins operations — 9/28/64, thanks donors — 1/25/65; Georgia ETV network plans expansion—1/11/65; NAEB plans collegiate network —5/24/65.

More colleges offer radio-TV courses, degrees—3/1/65.

Chicago Teachers College and city's TV stations offer 15-week graduate course in TV teaching—9/14/64.

Georgia ETV stations air feature films, raise questions—7/26/65.

Equipment

Set makers back drive to repeal excise tax 10/5/64, 11/16/64, 11/23/64, 12/28/64; bill introduced—2/15/65, 5/24/65, passed —6/21/65.

Production and sale of sets is up—11/30/64, 2/22/65, 3/8/65, with new highs anticipated—7/5/65.

Sealtest commercial sent from Ayer office in Philadelphia to WTTG(TV) Washington via Picturephone—10/5/64.

ABC shows photo process combining still and motion pictures—10/12/64.

Ampex introduces magnetic disk recorder 10/19/64.

FCC looks at stereo for TV — 11/16/64; EIA urges caution—2/1/65.

Zoomar introduces automatic camera control—2/1/65.

ABC plans $5 million plant expansion in Hollywood—2/15/65.

Army demonstrates 7-channel laser beam as TV carrier—2/22/65; WTIC tests laser too—7/19/65.

Norelco has solid-state TV camera—2/22/65; so has RCA—3/1/65.

NAB complains over omission of AM from radios with solid-state tuners—3/1/65.

Equipment exhibits at NAB convention attract attention and sales—4/5/65.

Westinghouse shows Phonoid system of recording pictures on disks—5/10/65.

Electronic Industries Association and Magnetic Recording Industry Association merge—5/24/65.

Ex Parte

Since 1958, when ex parte (off-the-record) contacts between applicants and individual FCC commissioners were suspected to have influenced votes on station licenses, these grants have been argued before the FCC and in court. During 12 months, September 1964-August 1965, BROADCASTING reported:

Boston, ch. 5 — FCC upholds grant to WHDH-TV—11/23/64.

www.americanradiohistory.com

Jacksonville, ch. 12—court orders FCC to reopen case to admit new applicants—5/10/65, rejects request for rehearing — 6/28/65.
Miami, ch. 10—unsuccessful applicants ask court to reverse FCC grant to WLBW-TV —9/7/64; FCC and WLBW-TV ask court to deny appeal—1/18/65, 3/15/65, 4/12/65, 5/10/65; court upholds grant—7/12/65.
Orlando, ch. 9—court orders FCC to reopen case, accept new applicants—3/8/65.
FCC adopts new rules for ex parte contacts—7/12/65.

Federal Communications Commission

10-year growth—11/23/64.
Actions taken in fiscal 1964—1/25/65; annual report — 12/28/64; a look ahead—1/4/65.
Budget of $17,494,000 requested — 2/1/65; is cut to $16.9 million—5/10/65; approved by House—5/17/65; Senate hearing—5/24/65; House-Senate conference—8/9/65, 8/16/65.
Asserts jurisdiction over all common carriers, intrastate as well as interstate—12/28/64.
Senate loosens conflict of interest restrictions on FCC employees—8/9/65.
Comparative criteria for competitive hearings challenged—5/3/65; policy for hearing guides set—5/24/65.
U.S. Supreme Court upholds FCC's right to require testimony in open hearing from MCA's Taft Schreiber — 12/14/64, 5/31/65.
Urban spread creates problems in defining "community"—7/12/65.
Excessive commercialization to be handled on case-by-case basis — 7/12/65; Texas stations get letters—7/19/65, 7/26/65.
Burden of proof in allegations of serious misconduct to be on those making charges, not on applicants—7/19/65.
Rule requiring stations to make license records available for public inspection—4/5/65, is protested—4/12/65, 4/19/65, 5/3/65, 5/10/65, 5/24/65, 6/21/65.
Fear of concentration of control of mass media leads to dissents in license grants —10/12/64, 1/4/65, 7/19/65.
Application hearing is delayed when witness refuses to testify under fifth amendment privilege—2/1/65, 6/21/65.
Decision not to accept plea that community can't support second station upheld by court of appeals—9/21/64.
Requires applicant to demonstrate ability to finance station for year—7/5/65.
Remote control operation of TV transmitters, proposed—9/14/64, would mean substantial saving—1/14/65.
Amends rules to put aural ERP of TV stations at not more than 20% of video peak—3/22/65.
Drops prime time local programing issue —7/5/65.
Refuses to relax first-class operator requirements for AM stations with directional antennas—11/16/64.
Logging rule changes opposed by NAB —6/21/65.
Filing fees for license applications protested—11/2/64; court won't consider—1/25/65; name change costs GE $2,918 —11/30/64; fees total $3.3 million in first year—5/3/65.
James J. Wadsworth succeeds Frederick W. Ford as FCC commissioner—3/29/65, 4/19/65, 5/10/65.

WITHDRAWN

www.americanradiohistory.com

"This is NBC
at the picket line
in Washington"

"This is CBS
direct from Parliament
in London"

"This is ABC
at army headquarters
in Saigon"

"This is Storer
at the scene of the fire
on Central Avenue"

Emphasis on local news is one of the Storer standards.

Keeping the public well informed on what happens close to home is just one of the ways Storer carries out its communications responsibility. The exacting standards adhered to by all 12 Storer stations mean more worthwhile listening for the public and more successful selling for advertisers.

STORER
BROADCASTING COMPANY

LOS ANGELES KGBS	PHILADELPHIA WIBG	CLEVELAND WJW	NEW YORK WHN	TOLEDO WSPD	DETROIT WJBK
MIAMI WGBS	MILWAUKEE WITI-TV	CLEVELAND WJW-TV	ATLANTA WAGA-TV	TOLEDO WSPD-TV	DETROIT WJBK-TV

Storer standards make every Storer station a great salesman.

The wise money's on Mutual!

And why not? Mutual has plenty to hoot about. A greater percentage of Mutual's vast audience is composed of today's heavy-spending young families (18-50), growing families and larger families than that of any other network.* Hoot, mon! No wonder the wise money's on Mutual!

FLORIDA

ARCADIA—Universal Cablevision Inc.,

www.americanradiohistory.com

It will take you 117 seconds to read this booklet. It took us 8 years to write it.

We started writing this booklet when we started operating our first cable system . . . back in 1957.

Even then, we knew a sound CATV system depended on more than just the equipment.

So, instead of basing our outlook on just nuts, bolts and wires, we took the broader approach. We delved into franchise procurement . . . feasibility research . . . engineering . . . construction . . . financing . . . sales promotion . . . as well as personnel training and management. These are areas in which TeleSystems serves CATV operators. And you'll find all of our services outlined in this brief little booklet, called "Scope."

Today, when someone wants the broad picture on CATV, he comes to TeleSystems. Or, he fills out this coupon, and we come to him.

Serving CATV Systems in Engineering, Construction, Equipment, Promotion & Management

excellence
in
CATV

has become
synonymous with
ENTRON, because...

We have been in CATV
from its beginning.

•

Our equipments/systems set
the industry quality standards.

•

Our new Solid State In-A-Line
series is unmatched
in the industry.

•

Our technical and
management staff
is unequalled.

•

Our start-to-finish package,
from proposal to construction,
is your assurance of the
finest in CATV systems.
May we prove it?

excellence in CATV

has become synonymous with ENTRON, because...

We have been in CATV from its beginning.

•

Our equipments/systems set the industry quality standards.

•

Our new Solid State In-A-Line series is unmatched in the industry.

•

Our technical and management staff is unequalled.

•

Our start-to-finish package, from proposal to construction, is your assurance of the finest in CATV systems. May we prove it?

Write Dept. 16 for corporate brochure.

Community Antenna TV Systems

Individual CATV systems are listed alphabetically by state and city. Firms or persons owning three or more systems are listed in the Multiple Ownership directory, page A-154. Information on CATV systems is in this sequence; firm name, street address and/or post office box number followed by ZIP code, telephone number (preceded by area code), name of executive in charge with title, number of subscribers, number of estimated potential subscribers, installation charge, monthly charge, call letters and locations of TV stations carried by CATV (other services provided such as weather channel or background music or FM stations are listed, and if CATV originates programing or commercials, this is noted), date system began operation, name of principal owner(s) and indication whether owner has other CATV or media interests.

Omitted information was not furnished by owners before publication.

For complete list of abbreviations, see page E-66. Asterisk (*) indicates member in National Community Television Association for CATV's; asterisk before TV's indicates noncommercial.

List of broadcasters in CATV page A-157.

when Jerrold hands you the key you're in CATV

Jerrold "turnkey" service can pave your way to CATV profits!

This, we admit, is a bold statement. We urge you to verify it. How? Simply examine Jerrold's fifteen-year CATV record. We believe that the facts will convince you that Jerrold can put you in business faster and more profitably than any other CATV contractor.

Learn for yourself why Jerrold equipment does the job better, lasts longer, requires less maintenance. By all means, compare Jerrold equipment and specifications with any others on the market.

Find out why Jerrold has built more systems on a "turnkey" basis than any other manufacturer-contractor in CATV. Discover why we say: "*Satisfied subscribers make operators contented Jerrold customers.*"

Finally, consider the comprehensive Jerrold "turnkey" package. We provide every necessary service from market and feasibility surveys, through construction, financing, community relations—to handing you a completely operational CATV system.

For complete details phone 215-226-3456, or write:

Packaged CATV– from Anaconda

Anaconda's packaged CATV relieves you of *all* the problems, all the guesswork, at every stage in the creation of a CATV system–from initial feasibility studies and surveys of potential market, to engineering and construction. Anaconda furnishes a complete system warranty. All you have to do is call Anaconda, discuss your requirements, and we take it from there.

What, specifically, does Anaconda supply? Complete systems research, development, design and engineering; subscriber commercial survey; a signal availability study; a signal verification survey; a receiver site location study; local marketing assistance–and, finally, a complete system backed by full system warranty.

Anaconda packaged CATV systems utilize the finest components available: flexible, moistureproof Sealmetic® Coaxial cable, system-evaluated electronic equipment and hardware–all selected to assure the highest long-term system reliability.

It will pay you to talk with your Anaconda man. Anaconda Wire and Cable Company, 605 Third Avenue, New York, N. Y. 10016. 65218A

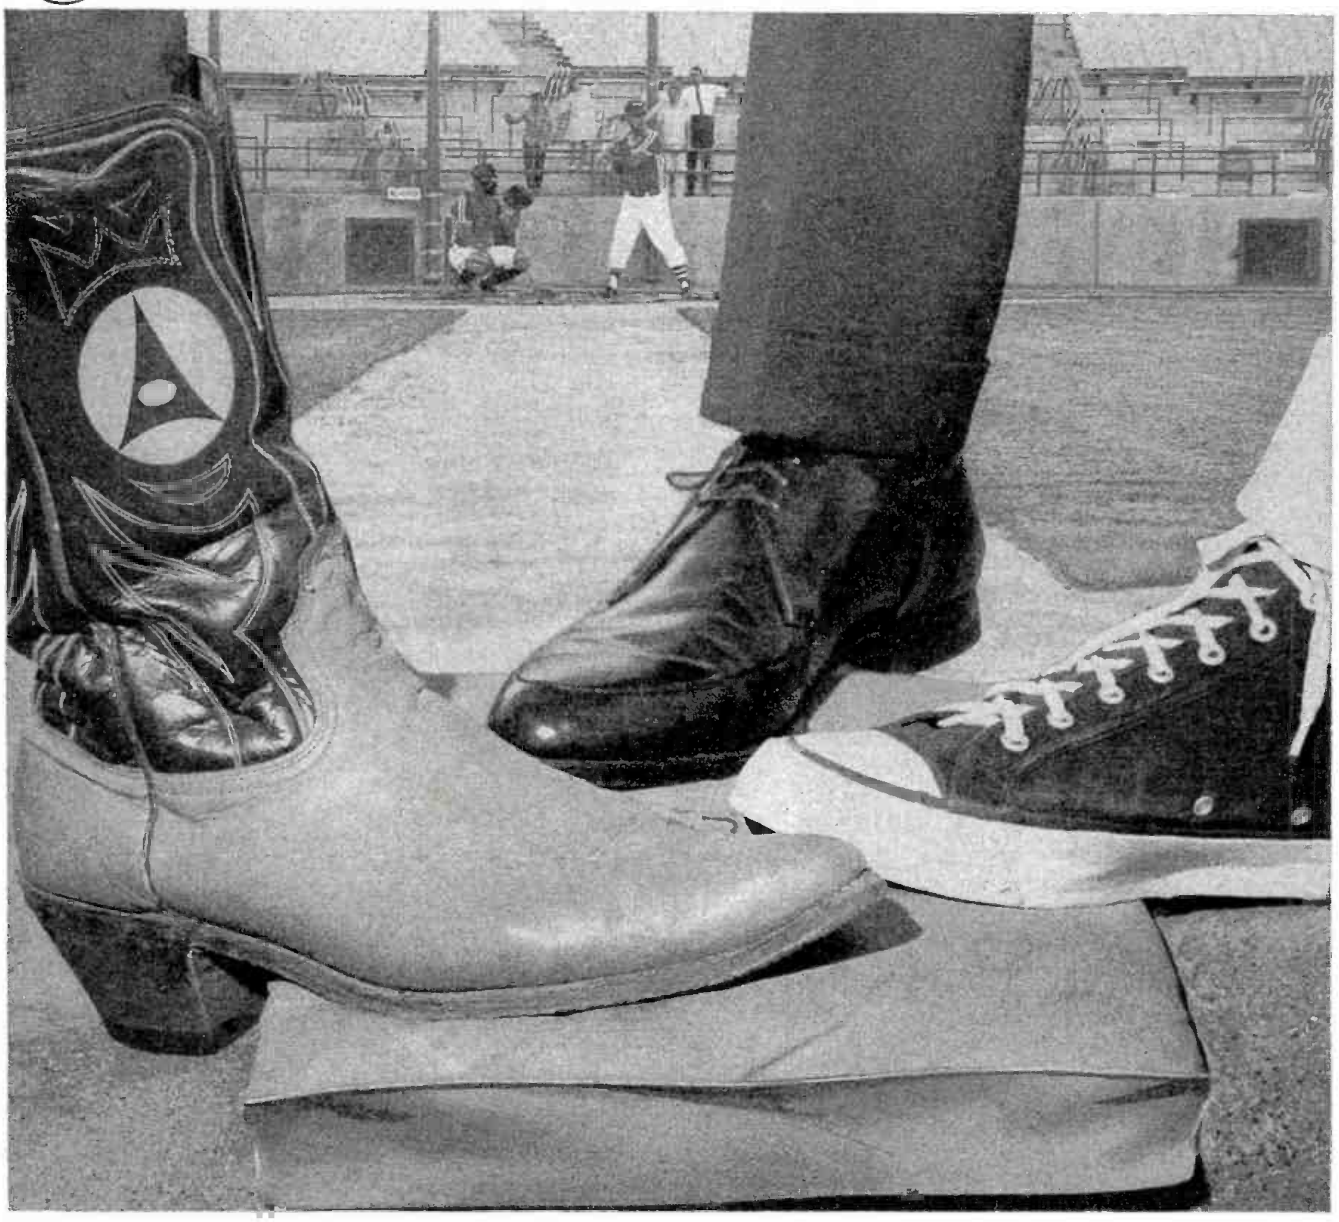
AMECO INC. 2949 West Osborn Road • P. O. Box 11326 • Phoenix, Arizona 85017 • Phone (602) 252-6041



WHO'S ON FIRST? We at AMECO think we're first in CATV. Some of our friends in the East claim they're first. Other CATV manufacturers assure the industry that they are first in something or other. We really don't care who says they're first in CATV. We do care about our customers. We do care about building the best CATV equipment. We do care about constructing reliable CATV systems that will produce the greatest profits for our customers.

And for what it's worth, here's some AMECO firsts: ■ FIRST with a complete line of solid-state all-band cable television equipment. ■ FIRST with a variety of leasing and financing plans tailored strictly for CATV. ■ FIRST with doorstep delivery from a parts and service warehouse on wheels. ■ FIRST with trained technicians to man these "Salesmobile" trucks that blanket the nation. ■ FIRST with solid state amplifiers in over 60% of the known cable systems. ■ FIRST with a new and better connector standard for all types of popular cable in use today. Well . . . we still say we're first, but better yet we'd like the opportunity to show how we can help *you* be first in CATV.

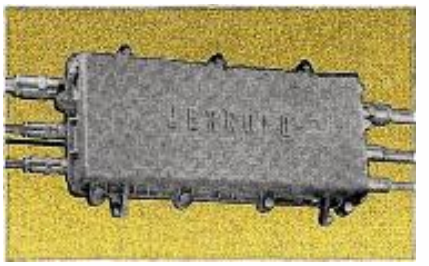
what does it take to be first in CATV

(and how do you stay there)?

Jerrold's answer is: "Customer satisfaction!" Our systems satisfy the CATV owner/operator because they're engineered for subscriber satisfaction. When you buy Jerrold, you get . . .

Reputation—15 years and 1,700 systems after we equipped the first commercially successful CATV system, more CATV operators depend upon Jerrold for subscriber satisfaction than upon any other single source. *Jerrold is Number One* in the CATV industry.

Know-how—Jerrold has consistently maintained the industry's largest staff of development engineers. A staff which has provided such "firsts" as the Channel Commander which made 12-Channel systems a reality. A staff which is justifiably proud of its latest "first": Starline —the new standard for solid-state CATV distribution system quality and performance.



STARLINE MAIN-TRUNK STATION
All active equipment for any specific location fits into a similar compact housing.

Services—Jerrold has built more systems on a "turnkey" basis than any other manufacturer/contractor in CATV. Our nationwide organization can help you in any and every stage of providing a profitable CATV system—from marketing and engineering-surveys, through system engineering and construction, to turning over to you a complete, operating system.

Whatever your CATV requirement—consult Jerrold first. Call 215-226-3456 or write: CATV Systems Division, **JERROLD ELECTRONICS CORPORATION,** 15th and Lehigh Ave., Philadelphia, Pa. 19132

JERROLD

FIRST IN CATV **The nation's largest, most experienced manufacturer/supplier of CATV equipment and services.**

NOW AT LAST...

KAISER-COX CATV

A Name You Can Depend On

Here Are 6 FACTS About Kaiser-Cox to Remember in Planning and Building Your Complete CATV System. 6 Good Reasons Why You Can Depend on Kaiser-Cox for the Finest in CATV System Design – Financing – Engineering – Construction – Equipment – Service. Here's What Kaiser-Cox CATV Means to You.

THE KAISER NAME . . . internationally known and internationally respected for *quality control* and *quantity production*. Two "pluses" that have long made Kaiser a formidable giant in the industrial world.

THE COX NAME . . . A leader in broadcasting . . . the broadcaster who has taken the lead in CATV. The company that knows both fields. The company that will market *the ultimate* in CATV equipment.

THE KAISER-COX NAME . . . The combination that will not settle for "second best." The combination that will bring *a new way of business* in the big, bold, booming CATV industry.

DEPEND ON KAISER-COX FOR CATV

www.americanradiohistory.com

it's a big small world...

and our broad and diverse repertory is constantly expanding to meet the demands of new international musical trends and to extend the scope of existing standards.

Through performance and mechanical rights, programing and sales aids to the broadcaster and our special projects department, we are dedicated to serving the needs of the music user everywhere.

Why WITI-TV purchased Seven Arts' "Films of the 50's and 60's"

Says Roger LeGrand:

Vice President and General Manager of WITI-TV 6, Milwaukee

"We purchased Volumes 3, 9 and 10 of Seven Arts' 'Films of the 50's and 60's' because we needed quality feature films for

prime time colorcasting

And we got them! 165 of these 297 top features (56%) were produced in color including such box office hits as 'Love Is A Many Splendored Thing', 'The Seven Year Itch', 'Magnificent Obsession', 'The Glenn Miller Story', 'Mr. Roberts' and 'April In Paris'.

Color TV is booming now in Milwaukee. Today we have more than 80,000 color TV homes (11% of the market). Set sales are mounting and the total should expand considerably during the 1965-66 Fall Season.

*We are known to be the No. 1 movie station in Milwaukee. In addition, WITI-TV is the No. 1 television station in the market, sign-on to sign-off.**

Our reputation as one of the top ABC affiliates in the country makes us strive harder to maintain this high standing.

Seven Arts' 'Films of the 50's and 60's' are indeed responsible for much of our success in feature film programming and colorcasting. Our recent acquisition of Volume 10—(76% in color)— adds considerable impact to our 'Cinema 6' feature film showcase (Friday 8:00 to 10:00 P.M.)".

** ARB March '65 and June-July '65. Estimated and Limited as shown in report.*
