Beeline® Country...awfully big in Family Income

... and BEELINE RADIO is a proven way to reach this important market.

Over 900,000 households live in the 43 counties covered by Beeline radio. Their effective buying income per household is over \$8,600 which adds up to \$7.8 billion for the entire area. Talk to the family through Beeline Radio. You will also be reaching the farm family — a market whose combined farm income is greater than any one of 45 states — \$2 billion. So speak through the four Beeline stations; nearly 3 million people will be listening. Beeline Radio holds the attention of California's Inland Valley and Western Nevada.

With all the people we reach you'd think we were AM

For the past year WPRO-FM has been competing for adult listenership with the top 5 stations in Southern New England. What's more, we've been competing with the AM stations on their own terms and have been winning consistently.

We've done it by offering adult listeners what *they* want to hear... 13 minute segments of uninterrupted familiar, good music, plus classic little features like the Roxy Rothafel Ski reports. That's how WPRO-FM keeps its listeners happy 24 hours a day.

And we keep our advertisers happy, too. By bringing them the kind of results they expect from one of the top radio stations in the market. The kind of results that makes them forget we're FM. The only thing that reminds them is our cost efficiency. Call Blair for details.

This is CATV Show Biz

...or how to make your system a box-office hit

Cable: Available in seamless lengths up to 1/2 mile

Timatch® perfect match connectors

TIMES
CATV CABLE & CONNECTORS

Putting a good show on the home screens of your subscribers is one part of CATV show business. Having the equipment to back up your programming—with clear, dependable pictures that don't ghost, fade or give up altogether—is another.

Times 30db CATV cable—and instantly-installed matching connectors—delivers award-winning performance to your subscribers' homes year after year. It's the surest way to keep them happy and put profits in your system's picture. Times cable is trouble-free because of the way it's made:

in continuous seamless lengths up to 1/2 mile. This means fewer splices, fewer trouble points, less maintenance . . . and less labor cost. And because it's seamless, it's water and vaporproof . . . won't stop the signal short of target. All in all, you get improved electrical performance from Times cable and matching Timatch connectors. Long after so-called economy cable has been replaced, Times cable will still be a top performer, even while you're upgrading your system.

To take advantage of this direct way to assure your system's pay-out, contact Times for information on its CATV cable.

Collins could sell FM transmitters for 20% less

BUT then they wouldn't be the best in the world

All Collins transmitters could be sold for less.

- Corners could be cut on transformers (narrowing safety margins for continuous operation).
- Less shielding could be used against spurious radiation (sacrificing some degree of stability).
- Standards on components, wiring, cabling and switches could be lowered.
- Collins' rigid testing could be bypassed.
- Meeting proper load conditions could be left to luck.
- Money devoted to research and development could be saved.
- Collins' 2-year warranty could be cut to the 1-year period of other manufacturers.

All these compromises could lower the price—as well as the *quality, performance and reliability* of the product—about 20%. But then Collins transmitters wouldn't be known for their careful engineering, conservatively-rated components, and precision manufacturing techniques.

Collins gives the broadcaster a discount in the form of quality and service. And that's worth a lot more than 20%.

For technical information on any FM transmitter ranging from 250w to 20kw, contact Collins Radio Company, Broadcast Communication Division, Dallas, Texas. Area Code 214, AD 5-9511.
