On top of it all.

The John Hancock Mutual Life Insurance Company is owner-developer of John Hancock Center.

The John Hancock Center. Soaring 1,000 feet above the city. Tall testimony to Chicago's restless, daring drive to innovate. Elevate. Get things done in a big way. This, in all ways, is the credo of WGN Television. No wonder,

then, that our transmitting antenna will top the Hancock Building. No wonder we continuously search for new ways to serve our city even better. So in the future, as in the proud past, we can say with pride . . .

Sample all America for the price of a metro market!

You can count on Indianapolis for meaningful test market information because its people are a cross section condensation of all the rest of the people in America. What they will buy . . . or not . . . is typical of results you can count on everywhere else. The market is 14th in ADI market sales, and 17th in total sales, according to Sales Management estimates. So, the sample base is a good broad one, too! This, combined with a representative population plus a balanced economy, provides you with a perfect test situation. And there is little or no interference from outside media.

Then, to further polish your purchase, choose The WFBM Stations for resultful coverage! The WFBM Stations are heavy favorites in the Indianapolis market. For proof, check your rating books and contact our KATZ representative.

Pie in the Louisiana sky!

There's no way to show the effective buying income of a Baton Rouge family on a pie chart. But the bar graphs show an average Baton Rouge family has \$1,633 more to spend than a New Orleans family. Baton Rouge is first in Louisiana in EBI. Beats out New Orleans, Shreveport (by \$1,457), Jackson, Mississippi (by \$1,183) and a dozen other cities that you can look up in your Funk and Wagnalls... Spend your advertising money where there's money to be spent... Get your slice of pie from WBRZ-TV!

THE DETROIT WAY

Distributor ignition points, as small as they are, make the vital difference between an automobile running smoothly or not running at all. The small points work like light switches—opening and closing with precise timing. They control the amount and intensity of electric current delivered to the spark plugs. At 65 mph the average set of distributor points flicks on and off 16,000 times per minute.

...where vitality works!

Detroit found out a long time ago that little things like distributor points make a world of difference in the operation of a car.

The WWJ Stations found out a long time ago that *vitality* in broadcasting makes the same kind of difference. With it, there's extra spark...there's imagination, innovation, community involvement, pride in accomplishment.

Listeners and viewers know it. So do advertisers. They know that *vitality* works...to intrigue audiences—and to sell products. And they know that making vitality work is the WWJ/Detroit way of doing things.

Both sides of KOIN come on top in Portland

Choosing the channel that more people watch doesn't have to be a toss-up. Not in the Portland market area. Not when KOIN-TV is the favorite news *and* entertainment station.

KOIN-TV reaches 26,300 more TV homes than Portland's number two station. KOIN-TV's net weekly circulation is 512,400—55,400 more than the second best circulation. And KOIN-TV also is out in front by 54,400 (or 18%) in average daily circulation.

Pick a category—TV households, adults, young housewives, children, new car buyers, ratings, etc. Then pick KOIN-TV. Cash in.

With a \$50,000.00 budget your Aunt Martha could come up with a good 60 second commercial!

But most advertisers, especially the local and regional types who buy KPRC-TV, don't have that kind of money to play with! So, we've built Houston's only complete commercial production facility to provide them with an economical way to properly use television. We have the studios, the color cameras for film and tape sequences, the animation equipment, the laboratories to give them next morning rushes, the electronic ability to fuse film and tape into one, and the imaginative, capable, efficient personnel to do whatever the job is. We've already produced and provided top-flight commercials for Humble Oil & Refining Company, The Duncan Foods Division of Coca-Cola, The Savings and Loan Foundation, Sears, Gordon's Jewelers, Jackson Brewing Company and others. We can deliver on either tape or film but most important, we deliver! We have the concept, the creativity, and the facilities to provide economical, effective television commercials for local and regional advertisers At KPRC-TV Aunt Martha might make it on a lot less than \$5000.00!

a better delivery boy...

Sure, timebuyers like good numbers, realistic cpm's and specific demographics, but there are more ways to make buying easier and WBAY-TV is the station that delivers them — —

instant confirmation - fast service, efficient handling of paper - IBM systemized traffic and avails - market research and merchandising - courteous direct response from career personnel in Traffic, Operations.

Then, to instill confidence, there's the station image - second to none in the industry - tops in the communities we serve - plus WBAY-sponsored civic events and the energetic personal contacts of over 100 professional

staff members on the social-economic life in Northeastern Wisconsin.

When you buy the best you expect these important extras. Timebuyers tell us TV-2 is a better delivery boy. We invite you to try our service.

TV Allocations, State, City

Note: UHF and VHF TV allocations have been made by the FCC to the following cities. A plus or minus after a channel indicates that a station occupying the channel must operate with its carrier frequencies offset 10 kilocycles above or below, respectively, the normal carrier frequencies. The offset indicators are not shown for UHF assignments, which were the subject of a rulemaking adopted June 4, 1965. The designators were to be added in a later order, but had not been published by time the Yearbook went to press. Meanwhile, the appropriate designators are shown on construction permits and licenses issued for UHF stations.

Asterisks (*) indicate channels reserved for noncommercial use.

INTERNATIONAL

The country-by-country information presented below is compiled from various authoritative sources, both official and unofficial. Every effort was made to provide information as up-to-date as possible, but information derived from official government reports, in particular, sometimes tends to be delayed. For the most part, however, the information below is based on reports of the situation as it existed in the first half of 1969.

Aden

One TV station, government-controlled and commercial, services 16,000 TV sets. South Arabian Television Service, Box 1264, Aden.

Argentina

About 32 TV stations are operating. Government, which operates one of four stations in Buenos Aires, licenses channels on one-to-a-customer basis and does not permit simultaneous networking, although stations outside Buenos Aires may buy and present recordings of programs after their Buenos Aires presentation.

Australia

Broadcasting is under dual system, with government operating noncommercial stations and other entities commercial. Commercial radio stations reported at about 110, noncommercial radio at 69. In TV, 43 were operating commercially, while government (Australian Broadcasting Commission) had 39 noncommercial stations in operation. Receiver licenses, required by government, as of June 1969 numbered 2,700,000 for radio-TV combinations. Governing body is Australian Broadcasting Control Board (373 Elizabeth St., Melbourne, C.I. Victoria), headed by Miles Wright, chairman.

TV service includes one government, non-commercial station and one to three commercial stations in 33 areas. Commercial stations follow general U.S. format, selling up to six minutes each hour plus station-break time. Spot messages range from 1.D. to one-minute; and sponsored programs range from five-minute news to 15, 30 and 60 minute shows. Co-sponsorship permitted in series or as half-sponsorship with spots

The Radio and Television Audiences

Radio and television were in more U.S. homes than ever before as 1970 approached.

■ **Television**—A total of 58.5 million homes, or 95.3% of all U.S. homes (excluding Alaska and Hawaii), were TV-equipped as of September 1969, according to the A. C. Nielsen Co. The American Research Bureau estimated the total would be 59,388,600 homes (excluding Alaska) as of January 1970.

■ **Color TV**—Homes equipped with color TV sets totaled 22.2 million, or 37.5% of all TV homes, as of Oct. 1, 1969, according to estimates by NBC.

■ **Radio**—The Radio Advertising Bureau estimated that

60.6 million U.S. homes, or about 98.6%, were radio-equipped in 1969.

■ **Radio Sets**—The number of working-order radio sets in the U.S. totaled 303.4 million in 1969, according to industry estimates. The estimates anticipated this distribution: 218.5 million in homes, 74.9 million in automobiles, 10 million in public places. The new total would represent a gain of 36.4 million, or 13.6%, over the 267 million estimated for 1968.

■ **Viewing and Listening**—The extent to which radio and television sets were used is indicated in numerous ways in the tables that follow. The television figures were furnished by the Nielsen company and its Nielsen Television Index (NTI). The radio data came from RAB, NBC and other sources as noted.

Cumulative Audiences: Radio and TV

Cumulative reach of radio is compared with that of television in the following figures from NBC Radio's 1965 Cumulative Radio Audience Method (CRAM) study, made public in 1966. Although the study was conducted primarily to test new research methodology, NBC said it considered these estimates "approximate" but "conservative" benchmarks.

Number (and %) of Different U.S. Adults Reached (18 Years of Age and Over)

	In One Day	In Seven Days
Radio.....	92,100,000 (75.1%)	111,000,000 (90.5%)
Television*.....	80,900,000 (65.9%)	106,500,000 (86.8%)

* TV percentages based on a special Nielsen Television Index tabulation covering in-home viewing only, adjusted to reflect (1) all U.S. individuals 18 years of age and over from both TV and non-TV households, and (2) April TV set usage patterns. NBC's CRAM report said this radio-TV comparison "does not imply that television and radio are equal in impact or effectiveness" but "does suggest that radio's broad reach makes the medium an ideal choice for backing up television advertising."

Minutes of TV Viewing and Radio Listening by TV Viewers

Amount of time that adult viewers (over 18 years of age) spend daily with the broadcast media, by day part and for the day as a whole, is shown in the following tables. In each case the viewers are classified in five groups according to how much time they spend with TV, from the 20% who watch most (at top) in descending order to the 20% who watch least (bottom). TV dominates 6 p.m. to midnight period, but

radio has an edge in all other day parts, with the biggest advantage among lighter viewing groups. Data, the most recent available in this form, was prepared for Radio Advertising Bureau by R. H. Bruskin Associates, independent research firm, based on nationwide interviewing conducted in July 1964.

HOURLY-BY-HOURLY variations in television and radio audience sizes are shown in these tables. The TV figures, from Nielsen's NTI data for March-April 1969, show the television audience in terms of percentage of homes tuned in per average minute of each hour, Monday through Sunday. The radio figures, compiled for RAB by Sindlinger & Co. in a 1964 study, represent the percentage of all adults who listen to radio, also hour by hour.

If you've got the job of
buying that new transmitter
you don't need *congratulations* . . .

YOU NEED A HAND!

Sure, you can spend more *money*, but you'll be paying just for a name, not more reliability . . . not more quality!

Spend your valuable *time* dealing with salesmen who have your best interest at heart . . . A.E.L.!

If you're thinking *value*, look to A.E.L.

You can't do any better. Anywhere.
