## The ADI Market Atlas

The Area of Dominant Influence is a geographic market design that defines each television market exclusive of the others, based on measurable viewing patterns. Each market's ADI consists of all counties in which the home market stations receive a preponderance of viewing, and every county in the U.S. (excluding Hawaii and part of Alaska) is allocated exclusively to only one ADI—there is no overlap. The estimated television households are therefore additive, and the total of all ADI's represents the total television households in the U.S.

The ADI is a standard market definition. As a television buying tool it is a geographic and demographic means for maximum efficiency. As a station tool it has numerous applications for more effective sales efforts, and for programing and promotion planning.

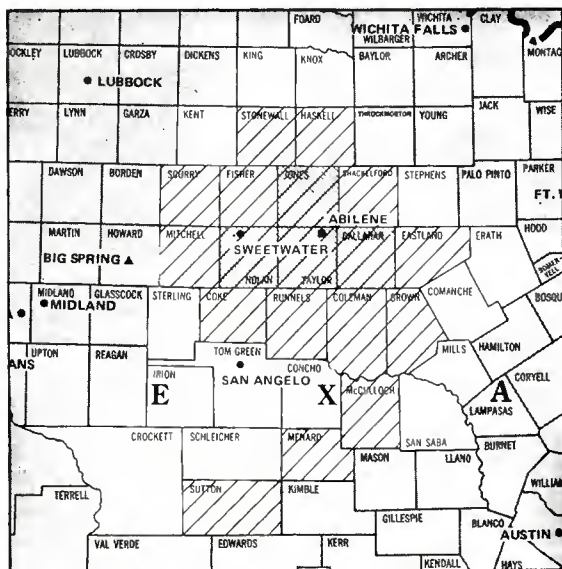

Following, in alphabetical order, are Arbitron Television's 214 ADI markets for 1980-81 with coverage maps for each and county-by-county breakouts of TV households. Other data included the market's stations,

and their cities of license, channel numbers and network affiliations. (Networks in parentheses indicate secondary affiliations.)

Coverage maps show total survey areas in white, the ADI's themselves in light crosshatching, and Arbitron Metro Rating Areas in heavier cross-hatching. The survey areas consist of all counties in which the home market stations are viewed to any significant extent, including via cable. (Note—The survey area figures are of 1979.) The Metro Areas, save for an occasional deviation caused by geographical or historical factors, conform to the U.S. Census Standard Metropolitan Statistical Areas.

Arbitron has also designated several "supplementary markets"—TV-station home counties where the stations of a different market receive the preponderance of viewing. Supplementary markets therefore do not meet Arbitron's criteria for having an ADI of their own; they are listed in this atlas next to the ADI of which they are a part. (Note—The survey area of a supplementary market usually differs from that of the neighboring ADI market.)

A complete list of the supplementary markets appears on page B-53, and a cross-reference list for cities in a multi-city ADI on B-77.

# Fifty-nine Emmys in four years.

It's not the number of Emmys we're proud of, but what they stand for . . . our commitment to local programming. And the highest award of all is the one our viewers have given throughout the years in their loyalty to our news, public affairs and entertainment programming. That's why we say, we are New England . . . Channel 5 and you.

## Supplementary markets

The following supplementary markets have no ADI. Reports for these non-ADI markets may be produced in the November, February and/or May surveys. Data on each market is listed in the surrounding atlas adjacent to the ADI in which it falls. TV household estimates for supplementary markets are nonadditive, since these markets are composed of counties which are a part of other markets' ADI's.

## TV Markets by Nielsen Marketing Research Territory

Nielsen Marketing Research territory groupings are another standard way of reporting sales data. The following table ranks TV markets within each Nielsen Territory. This provides a yardstick for determining the number of spot markets needed to achieve a given coverage of a territory. For example, if the national media are not delivering sufficient advertising weight in New England, the planner will find that three TV markets

(Boston, Hartford and Providence) contain more than 80% of the New England territory households. Or, he can use the table to get a better idea of how and what TV markets are needed to cover all of New England. Data is from special Nielsen Station Index tabulation based on a September 1980 estimate.

## How Network Delivery Varies by Market

National advertisers use spot television to increase network advertising weight in specific markets to achieve a predetermined level. These market goals are derived from the advertising budget and the market's share of the brand's projected sales. Thus, a spot schedule is usually indicated where a market has an unusually high brand-sales potential, or where the network weight delivered for the brand is below the national average used in planning, or both.

The first factor, market brand potential, varies by product and is difficult to generalize. The second factor, local-market network audiences, must be generalized because planning is based upon next season's *anticipated* network performance. The prevalence of network "package" buys, which tend to deliver average audience levels, sup-

ports the use of average data.

The following tabulation, chosen especially for the *BROADCASTING Yearbook*, shows Arbitron Television's Areas of Dominant Influence (ADI) in terms of percent of the total number of U.S. TV households. Also given, in like percentage terms, are the network audiences in each ADI market during prime-time hours. It is this market audience figure, when compared to the market's share of population, that indicates whether the network commitment will perform above or below the national plan average in that market.

The figures are based on Arbitron Television's May 1980 Network Program Group Analysis.

# If you are in the communications business, you should be reading **Broadcasting** every week

BROADCASTING Magazine keeps 130,000 professionals up to date on the rapid changes going on in television, radio, cable television and allied enterprises. BROADCASTING's award-winning editorial staff outnumbers all others in the field and commands respect for its professionalism and experience. And that's why *People* magazine, in its April 14, 1980 issue, referred to BROADCASTING as the "bible."

Here's what subscribers receive—every week—in the pages of BROADCASTING . . .

**Closed Circuit**—exclusive insider's report that is first-thing reading for executives at the top—or on their way there.

**Business Briefly**—early-warning report on spot TV and radio campaigns: who's buying what where.

**Top of the Week**—focus on major news breaks.

**The Media**—keeping up with all the elements of broadcasting and the allied arts: radio, television, cable, pay TV, MDS, video disks and cassettes—today's media, and tomorrow's.

**Business**—the commercial side of communications media, with the accent on finance: the earning of money, the losing of it, the wheeling and dealing with it.

**Programing**—what, in the long run, the business is all about. What's hot, what's cold, what's coming on, what's on the way out in all the media.

**Journalism**—staying on top of the electronic news-gathering, and news propagating, businesses—always among the most significant elements of the media and increasingly among the most vigorous.

**Law & Regulation**—focusing on the regulatory, legislative and judicial developments that so crucially affect the media marketplace.

**Technology**—covering the developments in electronic wizardry and spectrum politics that make electronic communications the most volatile of media.

**Fates & Fortunes**—keeping up with people.

**Where Things Stand**—first-of-the-month updating of electronic communications issues.

**For the Record**—weekly compilation of actions, filings, rulemakings and rule changes at the FCC.

**Plus: Bottom Line, Intermedia, Monitor, In Sync, Newsbeat and Washington Watch**—six background columns that stay out front in each of BROADCASTING's main areas of reporting activity.

**Plus:** other regular features including weekly commentaries by the trend makers in media advertising, a weekly "Profile" of a person in the news and editorials that have led to national policy. And much more.

To receive **Broadcasting** every week, fill in the coupon below and mail it today.

# Visualize simplicity of operation...

## Then take a good, hard look at the CGE Model "F's" solid state visual driver.

Featuring a practical, highly efficient, state-of-the-art design, the Canadian General Electric Model "F's" visual driver is a solid state linear power amplifier with an output capacity ranging from 200 W in the 5 kW transmitter up to 1.5 kW in the 30 kW transmitter. It requires absolutely no tuning because its response is flat over the entire band. And because the aural driver is also solid state, there are only two tubes in the entire transmitter. The result? Increased reliability and lower operating and maintenance costs. What's more, the solid state drivers offer the additional benefit of reducing the number of power supplies and their voltage ratings.

## Quadrature Couplers Protect Transistors

The visual driver consists of modules which are used as building blocks that are easily field-replaceable. The output modules, as well as the transistors on the modules, are combined in quadrature couplers so that if a transistor should ever fail, power output will be reduced only slightly and there will be no damage to the remaining transistors.

## Reliable Air-Cooling and Overtemperature Protection

Speaking of the transistors, here's something that's good to know. They're cooled by simple, reliable air-cooling, and thermal switches are provided for overtemperature protection.

## Front-Panel Meter and Selector Switch

Thanks to a convenient front-panel meter and selector switch you can easily check the operation of the individual modules as well as the overall amplifier.

If you can visualize having simplicity of operation, then take a good, hard look at the CGE Model "F's" superior, solid state visual driver. Call or write for our product brochure today. You'll see what we mean.

# OUR SATs BRING YOU A NEW SPECTRUM IN PROGRAMMING

The California Microwave Small Aperture Terminal (SAT) can make you a superstation in your market. From world news to stereo disco and the MET, the broadcast networks using satellite technology pioneered by California Microwave will deliver a new spectrum of program diversity and quality right to your local studio. And that means delivering audience, economically, anywhere in the country. Our modular SAT assures you unmatched flexibility at a surprisingly low cost with features such as these:

- Greater than 70 dB audio dynamic range
- Impeccable stereo delivery nationwide
- Cue, automation, hard copy, and wire service data channels
- Multiple channels per carrier (MCPC) for regional sports

The SAT that has set the standard for the broadcast networks and wire services is available now.

# In Baltimore, You'll See More From Here.

## A Commitment to News

The ability to present all the news that's important to Marylanders means having the means to do so.

Channel 2 was first in Baltimore with Copter Cam 2, bringing our viewers "live," on-the-scene news reports from the Inner Harbor to the Eastern Shore.

The addition of Color Radar 2 has given Channel 2 News' Meteorologist Ken Philips a way to pinpoint exact weather conditions state-wide, and across the country.

Recently Channel 2 added Contact 2, a special news unit directly geared to serve the public. It is Baltimore's first and only TV news citizens' help service.

## contact 2

And Channel 2 provides our viewers with more local news coverage by broadcasting 4 complete newscasts every weekday at noon, 5:30, 6:00 and 11:00, plus the first network news of the day, the CBS Evening News with Dan Rather, weeknights at 6:30.

## A Commitment to the Community

In addition to our everyday commitment to helping our community through Public Affairs and Public Service programming, Channel 2 donates major blocks of air time to raise money for various worthy causes, including the Johns Hopkins Hospital Children's Oncology Center through the Variety Club Telethon, the Epilepsy Association of Maryland through the "Bong Show"

Telethon, the United Negro College Fund Telethon, and the Jerry Lewis Muscular Dystrophy Telethon.

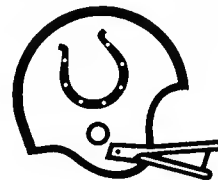

# 2

## A Commitment to Sports

Baltimore has "Bird Fever," and Channel 2 will telecast more than 55 Orioles games this season.

Each summer, Channel 2 telecasts the Colts pre-season football games.

Channel 2 brought Baltimore's newest home team, the Baltimore Blast indoor soccer, to our viewers with 7 televised games this season.

Channel 2 is the only station with a local weekly sports program, "Sports-Scene Magazine," every Sunday night at 11:30. In addition, during Colts football season, Channel 2 highlights and reviews the action with a weekly edition of "ColtScene Magazine."

## TV Assignments

**Note**—UHF and VHF TV assignments have been made by the FCC to the following cities. A plus or minus after a channel indicates that a station occupying the channel must operate with its carrier frequencies offset 10 kilohertz above or below, respectively, the normal carrier frequencies.

Asterisks (\*) indicate channels reserved for non-commercial use. Footnotes: 1) Following the decision in Docket 18261 (amendment of rules regarding geographic reallocation of channels 14-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 3) This channel is not available for Asbury Park, N.J., unless FCC determines it is not needed at New Brunswick, N.J. 4) Channel 15 will not be available for television use until further action by the FCC. 5) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico. 6) Operation on this channel is subject to the conditions, terms, and requirements set out in the report and order in docket 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972, FCC-72-19. (As of August, 1980)
