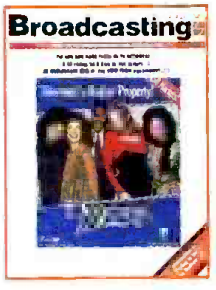
60 years in the making and almost perfect.

You don't stay on top by standing still. So, this past year, as we celebrated our 60th Anniversary, we changed. Not just in the way we look–more color, bolder headlines, larger type–but in the way we report the news. Sharper, a livelier writing style, and more coverage of programing, the production centers, cable and the new technologies.



We've kept all the good stuff. Our superb coverage of the FCC, the fast-breaking news stories on every aspect of the business. And incisive analyses of the important issues of the day.

Stay tuned.

Television Assignments by State

The following table of assignments contains the channels designated for the listed communities in the United States, its Territories, and Possessions. Channels designated with an asterisk (*) are assigned for use by noncommercial educational broadcast stations only. A station on a channel identified by a plus (+) or minus (-) mark is required to operate with its carrier frequencies offset 10 khz above or below, respectively, the nominal carrier frequencies. **Footnotes:** 1) Following the decision in Docket 18261 (amendment of rules regarding geographic re-allocation of channels 1-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) Operation on this channel is subject to the conditions, terms and requirements set out in the report and Order in Docket No. 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972, FCC 72-19 (Added 72-19, 1/7/72). 3) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 4) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico, to no more than the effective radiated power which would be radiated by an omnidirectional radio station using maximum permissible effective radiated power for antenna height above average terrain, at the minimum distances from such stations specified in 73.610(b). The FCC shall consider the status of the negotiations with the appropriate British authorities concerning these allotments when the applications for construction permits come before the FCC.
