## QuickSet Samson (Wt. Capacity 70 lbs.)

### QST-1 ENG/EFP Tripod

Load Capacity . . . . . 70 lbs. (31.8kg)  
Maximum Height . . . . . 58" (147.3cm)  
Minimum Height . . . . . 32" (81.3cm)  
Weight . . . . . 9 lbs. (4.1kg)

### QST-1

Strong, lightweight tripod, struts, extendable legs. Without elevator column.

### QST-3 Tripod With Elevator

Load Capacity . . . . . 40 lbs. (18.2kg)  
Maximum Height . . . . . 76" (193cm)  
Minimum Height . . . . . 34" (86.4cm)  
Weight . . . . . 10 lbs. (4.5kg)

### QST-3

Strong, easily portable tripod with geared elevator center column.

### QST-5

3/4 size version of QST-3

Maximum Height . . . . . 55" (139.7cm)  
Minimum Height . . . . . 21" (53.3cm)

### QST-9 Trolley

Load Capacity . . . . . 40 lbs. (18.2kg)  
Maximum Height . . . . . 54" (137.2cm)  
Minimum Height . . . . . 36" (91.4cm)  
Column Height . . . . . 18" (45.7cm)  
Wheel Circle . . . . . 34" (86.4cm)  
Weight . . . . . 13 lbs. (5.9kg)

### QST-9

Trolley, tubular, single section legs with wheels permanently attached. Geared elevator column.

### QSP-1 Mobile Pedestal

Load Capacity . . . . . 40 lbs. (18.2kg)  
Maximum Height . . . . . 55" (139.7cm)  
Minimum Height . . . . . 37" (94cm)  
Wheel Circle . . . . . 28" (71.1cm)  
Weight . . . . . 23 lbs. (10.5kg)

### QSP-1

Mobile pedestal has geared elevator column housed within 4" diameter vertical tube. Three radiating arms, at the base, house 4" wheels.

### QSC-1 Stationary Column

(includes Side Arm and Head)

Load Capacity . . . . . 15 lbs. (6.8kg)  
Maximum Height . . . . . 30" (76.2cm)  
Minimum Height . . . . . 37" (94cm)  
Horizontal Reach . . . . . 10" (25.4cm)  
Weight . . . . . 8 lbs. (3.6kg)

### QSC-3 Safety Elevator Column Unit

Load Capacity . . . . . 25 lbs. (11.4kg)  
Maximum Height . . . . . 24" (60.9cm)  
Minimum Height . . . . . 6" (15.2cm)  
Weight . . . . . 6 lbs. (2.7kg)

### QSC-3

Geared elevator column with mounting flange.

### QSD-1 Dolly

Load Capacity . . . . . 50 lbs. (22.7kg)  
Wheel Size . . . . . 4" x 3/4" (10.2 x 1.9cm)  
Wheel Circle . . . . . 42" (106.7cm)  
Folds to . . . . . 6 1/2" x 7 1/2" x 21 1/2"  
(16.5 x 19.0 x 54.6cm)  
Weight . . . . . 9 lbs. (4.1kg)

### Video Friction Head

Load Capacity . . . . . 25-35 lbs. (11.4-15.9kg)  
Tilt Angle . . . . . 45° up, 90° down  
Pan Rotation . . . . . 360°  
Dimensions . . . . . 5 1/2" x 6 1/2" x 6 1/2"  
(14.1 x 16.6 x 16.6cm)

Weight . . . . . 2 1/2 lbs. (1kg)  
Mountings . . . . . 1/4 x 20 camera screw

### QSH-4

Standard Counterbalance Spring (25 lb. cap.)

### QSH-3

Heavy-Duty Counterbalance Spring (35 lb. cap.)

3/8 x 16 mounting screw available on special order.

### QSH-6 CAM Head

Load Capacity . . . . . 40 lbs. (18.1kg)  
Tilt Angle . . . . . 30° up, 40° down  
Pan Rotation . . . . . 360°  
Dimensions . . . . . 8 1/2" x 6 1/2" x 4 1/2"  
(21.6 x 16.6 x 11.5cm)

Mountings . . . . . 1/4 x 20 camera screw  
3/8 x 16 mounting screw available on special order.

### QSH-9 Photographic Geared Still Head

Load Capacity . . . . . 25 lbs. (11.4kg)  
Tilt Angle . . . . . 45° up, 90° down, ± 15° side  
Pan Rotation . . . . . 360°  
Dimensions . . . . . 8 1/2" x 6 1/2" x 6"  
(21.6 x 16.5 x 15.2cm)

Weight . . . . . 2 1/2 lbs. (1.1kg)

### QSH-11 Geared Movie Head

Load Capacity . . . . . 25 lbs. (11.4kg)  
Tilt Angle . . . . . 45° up, 90° down  
Pan Rotation . . . . . 360°  
Dimensions . . . . . 6" x 6 1/2" x 7 1/2"  
(15.2 x 16.5 x 19cm)

Weight . . . . . 2 lbs. (1kg)

## Tripods, Pedestals, Trolley and Columns

<b>QST-1</b>	ENG/EFP Tripod (Use with QSH-27 or QSH-19 only) (Wt. Cap. 70 lbs.) (Max. Ht. 58") . . . . .	<b>\$350.00</b>

## Heads-Video, Cam and Gear Type

<b>QSH-4</b>	Video Friction Head w/Counterbalance Spring (Wt. Cap. 25 lbs.) . . . . .	<b>\$185.00</b>
<b>QSH-3</b>	Video Friction Head w/Heavy-Duty Counterbalance Spring (Wt. Cap. 35 lbs.) . . . . .	<b>195.00</b>
<b>QSH-6</b>	Cam Head (Wt. Cap. 40 lbs.) . . . . .	<b>490.00</b>
<b>QSH-9</b>	Photographic Geared Still Head (Wt. Cap. 25 lbs.) . . . . .	<b>360.00</b>
<b>QSH-11</b>	Geared Movie Head (Wt. Cap. 25 lbs.) . . . . .	<b>335.00</b>

## Fluid Heads

<b>QSH-15</b>	"Mini" (Wt. Cap. 10 lbs.) For tripods with Samson columns . . . . .	<b>\$ 435.00</b>
<b>QSH-17</b>	"Junior" (Wt. Cap. 30 lbs.) For tripods with Samson columns . . . . .	<b>820.00</b>
<b>QSH-19</b>	"Junior" (Wt. Cap. 30 lbs.) For QST-1 Tripod . . . . .	<b>805.00</b>
<b>QSH-25</b>	"Super-Hydro" (Wt. Cap. 50 lbs.) For tripods with Samson columns . . . . .	<b>1040.00</b>
<b>QSH-27</b>	"Super-Hydro" (Wt. Cap. 50 lbs.) For QST-1 Tripod . . . . .	<b>1020.00</b>

## Dolly and Accessories

<b>QSD-1</b>	Dolly for QST-1 and QST-3 tripods . . . . .	<b>\$165.00</b>
<b>QSM-1</b>	Second Control Arm for Video, Cam and Fluid Heads . . . . .	<b>48.00</b>

QSH-6

### QSH-15 Mini Fluid Head

Load Capacity . . . . . 10 lbs. (4.5kg)  
Tilt Angle . . . . . ± 90°  
Pan Rotation . . . . . 360°  
Dimensions . . . . . 4" x 5" x 6"  
(10.2 x 12.7 x 15.2cm)

Base . . . . . For Samson Column  
Weight . . . . . 4.5 lbs. (2.0kg)

### Junior Fluid Heads

Load Capacity . . . . . 30 lbs. (13.6kg)  
Tilt Angle . . . . . ± 85°  
Pan Rotation . . . . . 360°  
Dimensions . . . . . 4" x 6" x 6"  
(10.2 x 15.2 x 15.2cm)

Weight . . . . . 7.0 lbs. (3.2kg)

### QSH-17

For Tripods w/Samson Columns

### QSH-19

For QST-1 Tripod

### Super-Hydro Fluid Head

Load Capacity . . . . . 50 lbs. (22.6kg)  
Tilt Angle . . . . . ± 80°  
Pan Rotation . . . . . 360°  
Dimensions . . . . . 6 3/4" x 6" x 7"  
(17.1 x 15.2 x 17.8cm)

Weight . . . . . 10 3/4 lbs. (4.9kg)

### QSH-25

For Tripods w/Samson Columns

### QSH-27

For QST-1 Tripod

## QuickSet Hercules (Wt. Capacity 150 lbs.)

**QHT-1 Tripod With Elevator**  
Load Capacity . . . . .150 lbs. (68.2kg)  
Maximum Height . . . . .73" (185.4cm)  
Minimum Height . . . . .33" (83.8cm)  
Weight . . . . .19 lbs. (8.6kg)

**QHT-3**  
3/4 size version of QHT-1  
Maximum Height . . . . .55" (139.7cm)  
Minimum Height . . . . .26" (66.0cm)

**QHT-1**  
Strong, heavy-duty tripod with geared center column.

**QHT-3**  
Same as QHT-1, but in 3/4 size where lower operating height is required.

**QHP-1 Mobile Pedestal**  
Load Capacity . . . . .80 lbs. (36.4kg)  
Maximum Height . . . . .56" (142.3cm)  
Minimum Height . . . . .38" (96.5cm)  
Weight . . . . .35 lbs. (15.9kg)  
Wheel Circle . . . . .34" (86.4cm)

**QHP-1**  
Heavy-duty mobile pedestal. Geared elevator column housed within a 6" diameter vertical tube. Three radiating arms, at the base, hold double lock 4" wheels.

**QHH-3 Instrument Geared Head**  
Load Capacity . . . . .15-50 lbs. (6.8-22.7kg) \*  
Tilt Angle . . . . .45° up, 90° down  
Pan Rotation . . . . .360°  
Dimensions . . . . .7" x 6" x 6 3/4"  
(17.8 x 15.2 x 17.1cm)  
Weight . . . . .7 lbs. (3.2kg)  
\*Choice of counterbalance spring

**QHH-5 Cam Head**  
Load Capacity . . . . .80 lbs. (36.3kg)  
Tilt Angle . . . . .35° up, 45° down  
Pan Rotation . . . . .360°  
Dimensions . . . . .5" x 9" x 10"  
(12.7 x 22.9 x 25.4cm)  
Weight . . . . .21 lbs. (9.5kg)

**QHH-7 Cam Head**  
Load Capacity . . . . .140 lbs. (63.3kg)  
Tilt Angle . . . . .± 50°  
Pan Rotation . . . . .360°  
Dimensions . . . . .8 1/2" x 9 1/2" x 9 1/2"  
(21.6 x 24.1 x 24.1cm)  
Weight . . . . .25 1/2 lbs. (11.6kg)

**QHH-11 Instrument Geared Head, Calibrated**  
Same as QHH-3 with calibrations and verniers.  
Calibrations: Azimuth in 1° (0°-360°) w/  
Verniers; Elevation in 1° (+90° to -45°) w/  
Verniers; Verniers at 15 minutes

**QHP-1  
Mobile Pedestal**

**QHH-5 Cam Head**

**QHD-1 Dolly**  
Load Capacity . . . . .500 lbs. (226.8kg)  
Wheel Size . . . . .4" x 1" (10.2 x 2.5cm)  
Wheel Circle . . . . .45" (114.3cm)  
Folds to . . . . .7" x 13" x 28"  
(17.8 x 33.0 x 71.1cm)  
Weight . . . . .17 lbs. (7.7kg)

**QHD-1**  
Dolly with 4" wheels

**QHD-7**  
Dolly with 8" wheels and cable guards.

### Tripods, Pedestals, and Columns

**QHT-1** Tripod, Safety Elevator Column (Wt. Cap. 150 lbs.) (Max. Ht. 73") . . . . . \$780.00

# HEAVYWEIGHT TRIPODS/ PEDESTALS/COLUMNS/HEADS/ DOLLIES/ADAPTOR CHART

## QuickSet Gibraltar (Wt. Capacity 400 lbs.)

QGT-3 Heavy-Duty  
Field/Studio Tripod

Load Capacity: 400 lbs. (181.8kg)  
Max. Height: 41 1/2" (108cm)  
Min. Height: 25 5/8" (64.8cm)  
Weight: 24 lbs. (10.9kg)

QGT-3 Heavy-duty crutch leg type tripod without separate elevating column mechanism 3" diameter swivel foot plate. (QGM-ST spike tips available)

QGT-5 Tripod with Elevator

Load Capacity: 200 lbs. (90.7kg)  
Max. Height: 85" (215.9cm)  
Min. Height: 42" (106.7cm)  
Weight: 42 lbs. (19.1kg)

QGT-7 — 3/4 Size Version of QGT-5

Max. Height: 65" (165.1cm)  
Min. Height: 30" (76.2cm)

QGT-5 Heavy-duty capacity tripod featuring extendable legs and geared elevator column

QGT-7 Same as QGT-5 but in 3/4 size for lower operating height

QGP-1 Mobile Pedestal

Load Capacity: 200 lbs. (90.7kg)  
Max. Height: 60" (152.4cm)  
Min. Height: 42" (106.7cm)  
Weight: 96 lbs. (43.5kg)  
Wheel Circle: 38" (96.5cm)

QGP-1 Heavy-duty mobile pedestal. Geared elevator column is housed within 8" diameter vertical tube. Radiating arms at the base house 8" wheels with cable guards

QGP-3 Counterbalance Studio Pedestal

Load Capacity: 150 lbs. (68.2kg)  
Max. Height: 54" (137.2cm)  
Min. Height: 36" (91.4cm)  
Doorway Width: 32" (81.3cm)  
Steering Wheel

Weight: 250 lbs. (113.3kg)

QGP-3 Studio pedestal, counterbalanced for loads to 150 lbs.

QGH-3 Instrument Geared Head

Load Capacity: 55-200 lbs.  
(22.7-90.0kg)  
Tilt Angle: 53° up, 67° down  
Pan Rotation: 360°  
Dimensions: 10" x 10" x 12"  
(25.4 x 25.4 x 30.5cm)  
Weight: 18 lbs. (8.2kg)

QGH-5 Cam Head

Load Capacity: 375 lbs. (170.5kg)  
Tilt Angle: ± 50°  
Pan Rotation: 360°  
Dimensions: 13" x 11" x 10"  
(33 x 28 x 25cm)  
Weight: 46 lbs. (20.9kg)

Specify type of camera, lens and teleprompter for Cam designation.

QGH-9 Instrument

Geared Head Calibrated  
Same as QGH-3 with calibrations and verniers.

QHD-1 Dolly

Load Capacity: 500 lbs. (226.8kg)  
Wheel Size: 4" x 1" (10.2x2.5cm)  
Wheel Circle: 45" (114.3cm)  
Folds to: 7" x 13" x 28"  
(17.8 x 33.0 x 71.1cm)  
Weight: 17 lbs. (7.7kg)

QHD-1 Dolly With 4" double lock wheels

QHD-7 Same as above with 8" wheels and cable guards

QGT-5

QGP-1

## TRIPODS, PEDESTALS, AND COLUMNS

# CASES

## Rampart ATA Style Cases

- Exterior laminates are available to suit your needs in ABS plastic, aluminum, or fiberglass
- 1/4", 3/8", or 1/2" exterior plywood construction
- Exclusive Rampart Design Aluminum tongue and groove valance insures tight closure
- Edging is extruded aluminum, machine riveted every three inches. (More metal per inch than any competitor)
- All interior partitions are secured by riveted aluminum bracing
- Recessed, spring loaded handles and spring latches, machine riveted for durability and security
- Full length, heavy-duty piano hinge secured with machine driven rivets
- Large steel ball corners protect case surface from excessive wear
- Double woven nylon lid straps, riveted and heat sealed
- Interior lined with 2.2 lb./cu. ft. esterfoam or ethafoam as required

Rampart Cases afford superior protection for your goods. They are designed and manufactured to the most exacting specifications.

Rampart Cases are individually designed and fabricated to suit any requirement. We maintain an extensive computer library containing hundreds of repetitive designs. These designs may be modified to suit your individual requirements or we can custom design a Rampart Case to your specifications at no additional cost.

Rampart Cases are of the highest quality and manufactured to provide safe transport of the most delicate equipment while still retaining aesthetic appeal. Rampart Cases use 3/8" exterior grade plywood as a standard feature. Our exclusive design interlocking, heavy-duty aluminum valance is the sturdiest in the industry. With more metal per lineal inch than any competitor, you are assured years of service without concern of damage to the most vulnerable part of any transit case—the open edges.

## ATA Style Instrument Cases

Sensitive test equipment requires the finest in protection to assure that it arrives at its destination without damage to delicate calibration settings. Rampart's custom interior foam cushioning guarantees you will be able to use your equipment upon arrival.

## ATA Style Rampart Display Cases

The major reason that you attend trade shows and conventions is to attract new business. A damaged display is obviously a poor representation. Protect your investment with a Rampart Case, custom designed to your needs.

## Rampart Defender Cases

Defender—Perfect for local or short distance use. The "Defender" offers a high level of protection but is lighter in weight and considerably less expensive. The exterior of the Defender features top grade plywood laminated with high impact, high gloss ABS plastic or aluminum and the same hardened framework as the Rampart Series. Exterior mounted latches, attache or spring loaded valance mounted handles offer easy maneuvering and quick portability. A full length piano hinge securely riveted guarantees precision alignment for the interlocking valance. The Defender interior features urethane foam cut to fit your particular needs. With the Defender, you receive all the design options of our Rampart case, in a lighter weight and less expensive case.

Audio Visual Cases

Instrument Cases

Display Cases

## ATA Style Audio Visual Cases

Overhead projection, motion, multi-image and strip equipment will arrive safe and ready for your presentation when shipped in a Rampart Case. Our cases are designed to hold power packs, cords and cables, all in the same sturdy case as your other A/V equipment.

## ATA Style Computer Cases

Our design library contains specifications for hundreds of systems and individual components, whether you are shipping display units, keyboards, disk drives or other peripheral equipment a Rampart Case assures that your hardware will reach its destination unharmed.

## Rampart Traveler Case

The Traveler—The newest addition to our full line of quality cases is the lightest and least expensive way to protect delicate equipment for local moves. The Traveler's exterior is constructed of 1/8" high gloss, high impact ABS plastic molded to fit securely in our custom design tongue and groove aluminum valance and protected with high quality aluminum edge trim. Square steel plated corners ensure the ultimate in protection. Attache and spring loaded valance mounted handles are available to speed quick transport. The interior of the case offers all the flexibility of custom design as all Rampart Cases do. Lined with high density urethane foam, the Traveler protects and defends your equipment in a light and inexpensive design.

### JPR-985PR

#### "Lyceum" ITV Color Receiver/Monitor

- 25" diagonal picture
- Full off-air channel capability including 57 cable TV channels
- 51 function Digital Infrared Remote Control (Optional Extra)
- New Color Processing System
- Improved all solid-state design
- Solid-state CCD (Charged Coupled Device) comb filter for improved bandwidth and resolution
- Vertical detail enhancement
- Keyboard electronic tuner with on screen display
- Automatic Light Sensor (ALS)
- Electronic-to-electronic videotape recording capability
- 110° precision in-line slotted mask COTY picture tube
- Expanded Video-Audio termination panel
- Broadcast stereo sound
- Automatic color balance
- 27 function optional remote control

#### General Specifications

<b>Color Standard:</b>	525 line NTSC Color
<b>Chassis:</b>	CTC 131 all solid-state, unitized
<b>Power Requirements:</b>	120VAC $\pm$ 10%, 60 Hz
<b>Power Consumption:</b>	Not to exceed 157W Av. 134W
<b>Power Cord:</b>	Type SJT 3-wire, 20' long, shielded
<b>Service Adjustments:</b>	Accessible behind rear panel cover
<b>Certification:</b>	U.L. Commercial
<b>Height:</b>	21 3/4" (55.2 cm)
<b>Width:</b>	25 1/4" (64.1 cm)
<b>Depth:</b>	19" (46.26 cm)
<b>Shipping Weight:</b>	106 lbs.
<b>Cabinet:</b>	Rosewood Veneers on fiberboard
<b>Picture Tube:</b>	25" 110° COTY Precision in-line 52% Light Transmission with High Potential, Bipotential Gun, Super Arched Shadow Mask and striped, pigmented phosphors

#### "Lyceum" ITV Color Receiver/Monitor

- 20" diagonal square picture eliminates "corner cut-off"
- Channel lock Electronic Scan tuning
- Optional infrared wireless remote control
- Improved all solid-state design
- Keyboard electronic tuner with LED readout
- Automatic Light Sensor (ALS)
- Precision in-line slotted mask COTY picture tube
- 150 channel tuning system allowing access of up to 57 cable channels

#### General Specifications

<b>Color Standard:</b>	525 line NTSC Color
<b>Chassis:</b>	ColorTrak, all solid-state CTC 130
<b>Power Requirements:</b>	120 VAC $\pm$ 10%, 60 Hz
<b>Power Consumption:</b>	130W, max.
<b>Power Cord:</b>	Type SJT 3-wire, 10' long
<b>Service Adjustments:</b>	Accessible at rear of cabinet
<b>Certification:</b>	U.L. Commercial Listing
<b>IR Remote Capabilities:</b>	When used with optional CRK-39K or CRK-40A IR Transmitter
<b>Height:</b>	18 3/4" (47.6 cm)
<b>Width:</b>	19 3/4" (50.2 cm)
<b>Depth:</b>	15 3/4" (40.0 cm)
<b>Shipping Weight:</b>	52 lbs.
<b>Cabinet:</b>	Simulated walnut finish on plastic
<b>Picture Tube:</b>	20" Precision In-Line 52% Light Transmission, Accufilter, 110° deflection

## VHS RECORDER/PLAYERS

### VPT290 Videocassette Recorder

- 2-head system • Infrared remote control • Integrates into unified RCA audio/video system • Remote control programming with fluorescent display instructions • Up to one year, 4-event programmer • Fluorescent displays • Delayed-start XPR • Broadcast/cable frequency-synthesis tuner with auto-programming • High speed search and stop action • Compact design • Automatic power-on when cassette is inserted • Automatic rewind and shut-off • HQ picture VHS system • 8-hour recording capability

VPT290 ..... \$349.00

VPT290

### VPT295 Stereo Videocassette Recorder

- 2-head system • Broadcast stereo recording capability with SAP audio channel reception • Stereo playback with Dolby\* noise reduction • Infrared remote control • Integrates into unified RCA audio/video system • Remote control programming with fluorescent display instructions • Up to one year, 4-event timer • Fluorescent displays • Record stereo simulcasts (with optional FM tuner) • Delayed-start XPR • Broadcast/cable frequency-synthesis tuner with auto-programming • High speed search and stop action • Compact design • Automatic power-on when cassette is inserted • Autoplay • Automatic rewind and shut-off • HQ VHS system • 8-hour recording capability

VPT295 ..... \$449.00

VPT295

### VPT385 Videocassette Recorder

- 3-head system • Infrared remote control • Integrates into unified RCA audio/video system • Remote control programming with fluorescent display instructions • Up to one year, 4-event programmer • Fluorescent function displays • Delayed-start XPR • Broadcast/cable frequency-synthesis tuner with auto-programming • "Field-still" video system with jitter-free special effects • Compact design • Automatic power-on when cassette is inserted • Automatic rewind and shut-off • HQ picture VHS system • 8-hour recording capability

VPT385 ..... \$399.00

VPT385

### VPT390 Videocassette Recorder

- 3-head system • Infrared remote control • Integrates into unified RCA audio/video system • Remote control programming with on-screen instructions • Up to one year, 6-event timer • On-screen display graphics • Delayed-start XPR • Broadcast/cable frequency-synthesis tuner with auto-programming • "Field-still" video system with jitter-free special effects • Compact design • Automatic power-on when cassette is inserted • Autoplay • Automatic rewind and shut-off • HQ VHS system • 8-hour recording capability

VPT390 ..... \$429.00

VPT390

### VPT395 Stereo Videocassette Recorder

- 3-head system • Broadcast stereo recording capability with SAP audio channel reception • Linear stereo playback with Dolby noise reduction • Infrared remote control • Integrates into unified RCA audio/video system • Remote control programming with on-screen instructions • Up to one year, 6-event timer • On-screen display graphics • Record stereo simulcasts (with optional FM tuner) • Delayed-start XPR • Broadcast/cable frequency-synthesis tuner with auto-programming • "Field-still" video system with jitter-free special effects • Compact design • Automatic power-on when cassette is inserted • Autoplay • Automatic rewind and shut-off • HQ VHS system • 8-hour recording capability • Built-in AC outlet

# VIDEOCASSETTE RECORDERS

## VCRs WITH PIX-IN-PIX AND ON-SCREEN PROGRAMMING

- **Pix-in-Pix.** Now you can watch a TV program and a video tape. Both at the same time and both on the same screen. One signal is displayed as the main image, while the other appears as an inset in one corner. This second image (it takes up about 1/12<sup>th</sup> the total viewing area) can be turned on and off, moved to any corner of the screen, or even swapped with the main picture—all via remote control
- **Multi-Pix (VPT595 only).** Splits your TV screen into miniature still frames from 12 different broadcast or cable channels. It's a great way to preview what's on TV in just a few seconds. The same Multi-Pix capability also lets you freeze sequential frames from any TV program (off-air or cable) or from video tape. You can even vary the speed to produce an effect very like slow motion
- **Special digital effects (VPT595 only).** Off-air freeze. Instantly freeze a picture on your TV screen, either from a tape or off-air. Useful for freezing addresses or movie credits
- **Other digital effects.** "Mosaic" effect converts your picture into a colorful abstract pattern. "Posterization" produces an effect similar to those seen in music videos.

- "Field-still" video system. A special head enables this system to generate clean, jitter-free special effects (SP and SLP modes). Field-still video performance helps minimize noise bars in Stop Action, Frame Advance and Slow Motion
- On-screen programming MTS stereo
- Compact size

### VPT595 with Multi-Pix

- Advanced digital effects—Multi-Pix, Pix-in-Pix, "Mosaic," "Posterization," Stop Action and Slow Motion—all activated by remote control
- Digital circuitry provides rock-solid, noise-free still frames and slow motion in both SP and SLP modes. You can even "freeze" off-air pictures whenever you want
- Six-event/one-year on-screen programming
- Built-in MTS Stereo with Dolby noise reduction

- Built-in MTS stereo with Dolby™ noise reduction
- 120-channel broadcast/cable FS tuning\* with Auto-programming
- Compatible with RCA unified TV/VCR remote controls

### VPT495 with Dolby Stereo

- On-screen six-event/one-year remote programming
- 120-channel broadcast/cable FS tuning\* with Auto-programming
- Jitter-free "field-still" special effects (SP and SLP modes)
- On-screen tape counter display
- Compatible with RCA's TV/VCR remote control system

### VPT490

- Offers same basic features as VPT495 but without stereo recording and playback

## DIMENSIA VHS VCRs

- Well over 400 lines of resolution
- Compatible with your present VHS tape library. S-VHS VCRs automatically switch to standard VHS whenever you insert a standard VHS cassette for recording or playback
- High-Performance S-VHS Video Tape. A high-density, high-resolution oxide tape formulated especially for use with S-VHS VCRs

### VPT640HF S-VHS Hi-Fi Stereo

- Superior picture
- Built-in MTS Hi-Fi stereo
- On-screen remote programming of as many as six shows up to one year in advance
- 120-channel broadcast/cable FS tuning\* with Auto-programming
- Complete compatibility with Dimensia audio/video systems

VPT695HF

### VPT695HF S-VHS VCR

- S-VHS circuitry
- Advanced digital special effects including built-in MTS Hi-Fi stereo sound, 8-event/1-year on-screen programming, Pix-in-Pix, Multi-Pix, Off-air freeze, "Mosaic" and "Posterization"
- Remote control operates all Digital Special Effects, plus on-screen remote programming and playback controls

- 167-channel broadcast/cable FS tuning\*
- On-screen readouts include tape time remaining as well as tape counter
- Electronic indexing makes it easy to find the start of a previously taped show
- Headphone jack permits private listening
- Compatible with RCA's "intelligent" Dimensia audio/video systems

\*Local systems vary; check your cable company's compatibility requirements

# COLOR TELEVISIONS

## COLORTRAK 20" DIAGONAL TABLE MODELS WITH BUILT-IN MTS STEREO

- Top performance in space-saving cabinetry
- FPR560R and 570R include 10-jack audio/video monitor panel for hooking up auxiliary components
- Digital command 31-button remote control. Select channels by digital pushbutton, scanning up or down, or previous channel recall. On-screen time and channel number display at the touch of a button
- Built-in MTS stereo sound. Built-in dbx™ system automatically suppresses noise during stereo broadcasts. SAP (Second Audio Program) for "bilingual" telecasts
- ColorTrak light sensor. Virtually eliminates manual picture adjustments by monitoring room light. Once the picture is set the way you like it, automatic picture controls adjust contrast and color intensity for consistent picture performance
- Square-corner Hi-Con™ screen. 20" diagonal picture tube gives you a bigger picture with straight edges and no corner cut-off. Hi-Con tinting enhances contrast by absorbing over 2/3 of picture-fading room light as it strikes the screen
- Auto-Programming. Programs channel scan memory with one touch of a button. Includes add/erase controls for updating channel scan list

FPR560R

FPR555R

- 147-channel broadcast/cable tuning\*. Electronic digital counters and comparators automatically lock onto the signal with quartz crystal accuracy—no fine tuning needed. Built-in cable tuning eliminates most cable adaptors for unscrambled channels so you can still use your TV's remote control

### FPR570R Monitor-Receiver

- Front-mounted 5" oval speakers
- 5W/channel amplifier
- 50-15,000Hz (from auxiliary audio inputs), into 8 ohms, with no more than 1% THD
- 10-jack monitor panel simplifies VCR hookup

- Tawny Oak finish on plastic
- 18" H x 24<sup>5</sup>/<sub>8</sub>" W x 16<sup>1</sup>/<sub>8</sub>" D

### FPR560R Monitor-Receiver

- "All-picture" cabinet fits the same space as many 13" TVs
- MTS stereo sound system
- 3<sup>1</sup>/<sub>2</sub>" oval speakers
- Other features same as FPR570R
- Ebony finish on plastic cabinet
- 19<sup>3</sup>/<sub>8</sub>" H x 20" W x 15<sup>7</sup>/<sub>8</sub>" D

### FPR555R

- Front-mounted 5" oval stereo speakers
- ColorTrak picture performance
- Walnut finish on plastic cabinet
- 18" W x 24<sup>5</sup>/<sub>8</sub>" W x 16<sup>1</sup>/<sub>8</sub>" D

## XL-100 20" DIAGONAL TABLE MODELS

### FPR518R with MTS Stereo

- Built-in MTS stereo
- ChannelLock 18-button remote control lets you change channels by digital pushbutton, scanning up or down, or previous channel recall. Also adjusts and mutes volume
- Square-corner Hi-Con screen
- 147-channel broadcast/cable tuning
- Two 3<sup>1</sup>/<sub>2</sub>" oval speakers
- Auto-programming
- Walnut finish on plastic cabinet
- 18<sup>1</sup>/<sub>4</sub>" H x 24<sup>7</sup>/<sub>8</sub>" W x 19<sup>1</sup>/<sub>4</sub>" D

### FPR515R

- 20" diagonal square-corner screen in a cabinet no wider than many 13" diagonal TVs
- 147-channel broadcast/cable tuning\*
- Two 3<sup>1</sup>/<sub>2</sub>" oval speakers
- Auto-programming
- Walnut finish on plastic cabinet
- 18<sup>5</sup>/<sub>8</sub>" H x 20<sup>1</sup>/<sub>8</sub>" W x 19" D

### FPR510R

- 18-button digital remote control
- Square-corner screen
- 147-channel broadcast/cable tuning
- Auto-programming
- 3" speaker
- Walnut finish on plastic cabinet
- 17" H x 23<sup>1</sup>/<sub>8</sub>" W x 19<sup>5</sup>/<sub>8</sub>" D

### FPR505

- Square-corner Hi-Con screen
- 147-channel broadcast/cable tuning\*
- ChannelLock digital keyboard tuning
- 3<sup>1</sup>/<sub>2</sub>" oval speaker
- Walnut finish on plastic cabinet
- 18<sup>5</sup>/<sub>8</sub>" H x 20<sup>1</sup>/<sub>8</sub>" W x 19" D

### FPR500

- Square-corner Hi-Con picture tube
- Solid-state tuning with separate knobs for UHF and VHF channels
- 3" speaker
- Walnut finish on plastic cabinet
- 17" H x 23<sup>1</sup>/<sub>8</sub>" W x 19<sup>5</sup>/<sub>8</sub>" D

\*With optional signal splitter, up to 122 channels without splitter. Check your cable company's compatibility requirements.

# BATTERY BELTS/PACKS/ LIGHT/ACCESSORIES

## BATTERY BELTS

### M12B Pro Battery Belt

The M12B Pro is a 12V, 12AH battery belt with a running time of 55 minutes (with a 100W load). 4-pin Cannon connector. Built-in meter. Self-resetting circuit breaker. Dual harness construction. Padded Cordura nylon case. Quick release buckle. Comes with CH912 charger (can be fast charged with a CHF12). Waist size, 35"-52".

**M12B Pro** . . . . . \$299.95

### M20B Pro Battery Belt

The M20B Pro is a 12V, 20AH battery belt with a running time of 100 minutes (with a 100W load). 4-pin Cannon connector. Built-in meter. Self-resetting circuit breaker. Dual harness construction. Padded Cordura nylon case. Quick release buckle. Comes with CH912 charger (can be fast charged with a CHF12). Waist size, 30"-52".

**M20B Pro** . . . . . \$349.95

### M6E Pro Battery Pack

The M6E Pro is a 12V, 6.5AH battery pack with a running time of 25 minutes (with a 100W load). 4-pin Cannon connector. Built-in meter. Self-resetting circuit breaker. Padded Cordura nylon case. Quick-releasing and adjustable belt/shoulder strap. Comes with CH512 charger (can be fast charged with a CHF12). Waist size, 30"-48".

**M6E Pro** . . . . . \$164.95

### Maximizer Pro Battery Pack

The Maximizer Pro's 13.2V allows it to run longer, and run truer to 12V operation since voltage drops when the power goes on. 4.8AH with a running time of 30 minutes (with a 100W load). 4-pin Cannon connector. Short circuit protection. Dual harness construction. Padded Cordura nylon case. Quick release buckle. Comes with CH12 charger. Waist size, 30"-48".

**Maximizer Pro** . . . . . \$209.95

### 6E Pro Battery Pack

The 6E Pro is a 12V, 6.5AH battery pack with a running time of 25 minutes (with a 100W load). 4-pin Cannon connector. Self-resetting circuit breaker. Padded Cordura nylon case. Quick-releasing and adjustable belt/shoulder strap. Comes with CH512 charger (can be fast charged with a CHF12). Waist size, 30"-48".

**6E Pro** . . . . . \$134.95

### M1030B Pro Battery Belt

The M1030B Pro is a 30V, 10AH battery belt with a running time of 65 minutes (with a 250W load). 2-pin Amphenol connector. Built-in meter. Self-resetting circuit breaker. Dual harness construction. Padded Cordura nylon case. Quick release buckle. Comes with CH930 charger (can be fast charged with a CHF30). Waist size, 30"-52".

**M1030B Pro** . . . . . \$399.95

### M630B Pro Battery Belt

The M630B Pro is a 30V, 6AH battery belt with a running time of 35 minutes (with a 250W load). 2-pin Amphenol connector. Built-in meter. Self-resetting circuit breaker. Dual harness construction. Padded Cordura nylon case. Quick release buckle. Comes with CH530 charger (can be fast charged with a CHF30). Waist size, 30"-52".

**M630B Pro** . . . . . \$349.95

## FAST CHARGERS

**CHF12 Pro** 12V, 4A charger with 4-pin Cannon connector. . . . . \$199.95

**CHF30 Pro** 30V, 1.7A charger with 2-pin Amphenol connector . . . . . \$279.95

## MAINTENANCE CHARGERS

**CHMW12 Pro** 12V, 800mA charger with 4-pin Cannon connector. Wall plug-in unit . . . . . \$99.95

**CHM12 Pro** 12V, 2A charger with 4-pin Cannon connector. . . . . \$179.95

**CHM30 Pro** 30V, 700mA charger with 2-pin Amphenol connector . . . . . \$209.95

## OVERNIGHT CHARGERS

**CH512 Pro** 12V, 500mA charger with 4-pin Cannon connector. Accepts the M6E Pro and 6E Pro . . . . . \$24.95

**CH912 Pro** 12V, 900mA charger with 4-pin Cannon connector. Accepts the M12B Pro, M20B Pro and Maximizer Pro . . . . . \$29.95

**CH530 Pro** 30V, 500mA charger with 2-pin Amphenol connector. Accepts the M630B Pro . . . . . \$34.95

**CH930 Pro** 30V, 900mA charger with 2-pin Amphenol connector. Accepts the M1030B Pro . . . . . \$39.95

## LIGHTS AND ACCESSORIES

### RL100/150 Pro AC/DC Video Light

This ultra-lightweight AC/DC video light is designed for use with camcorders. Its lamp filament is computer positioned for the most uniform light distribution, then bonded in a 2" dichroic reflector. Adjustable barndoors, and a horizontal and vertical adjust allow correct lighting every time. Easily stowed, since it never gets hot. Includes: 150W AC lamp, 100W DC lamp, 4' cord, RL 4M/FAC adaptor (4-pin Cannon male to a female AC receptacle). . . . . \$174.95

### Belt WB48

48" adjustable nylon webbing belt for the Maximizer Pro, M6E or 6E . . . . . \$12.95

### Lamps

**RL100 DC**  
12V, 100W. For use with battery power only . . . . . \$24.95

M6E Pro

Maximizer Pro

M630B Pro

### RL150 AC

120V, 150W. For use with wall power only . . . . . \$24.95

### RLAC/DC

Both 12V/100W and 120V/150W . . . \$44.95

## ADAPTOR CORDS

### RL 4M/FAC

For any 12V with an AC plug receptacle to a 4-pin Cannon male. This is the same adaptor cord that comes with the AC/DC video light . . . . . \$19.95

### RL 4M/FCL

For any 12V with a cigarette lighter receptacle to a 4-pin Cannon male . . . . . \$19.95

# REMEE PRODUCTS CORP.

41 Bridge St.

(914) 651-4431 Telex: 64-6715  
(800) 431-3864

# COAXIAL CABLE

## Coaxial Cable 3

REMEE Products manufactures a broad spectrum of coaxial cables. Our cables range from 50 ohms to 100 ohms. In addition to the standard coaxial cables, REMEE provides twinaxial, and triaxial cables in a variety of shielding types. Each configuration offers different characteristics in terms of cost, electrical and physical requirements. Military or maximum coverage cables are 100% sweep tested.

### Application:

For use in MATV/CATV/CCTV and CB applications.

### Construction:

Conductor solid and stranded copper, and/or copper covered steel, (copperweld) insulation, solid polyethylene or cellular polyethylene; or semi-solid polyethylene; shielding and braided bare copper, or tinned copper, aluminum foil (Remfoil) with drain wires, or braided aluminum; jacket polyvinylchloride or polyethylene.

## Kart-a-Bag®

### Comet-110

• All steel cart 7 x 8 platform • Extends to 39 1/2" • Collapses to 22 1/2" x 12 1/2" • 4" wheels • Permanently attached elastic cord • Weighs only 5 lbs. • Supports up to 100 lbs.

Comet-110 .....\$21.95

### TKT-900

• Personal computer transport cart • 2-4-6 wheels • Sturdy platform • Extends to 49" • Collapses to 20 1/8" • Weighs 28 lbs. • Supports up to 300 lbs. • Removable computer tray • Keyboard extension

TKT-900 .....\$200.00

### EK-Kart 150

• Economically priced • Sturdy, tubular steel construction • Easy opening and closing • Simple, patented locking device • Extended height 37", collapses to 22 1/4" x 12 1/2" for compact storage • 10" x 10" platform for large loads • Weighs 5 lbs., supports up to 100 lbs. • Permanently attached elastic cords to secure load • Your choice of 4" or 6" wheels with sturdy plastic core and solid rubber tires • No carrying case available

EK-Kart 150 .....\$28.50

### Continental 500

• Double telescopic back supports with self-locking rods • Patented "one-motion" opening and closing feature • Comfortable finger grip handle • Cart can be pushed or pulled when loaded • Vinyl carrying case with pocket and shoulder strap • Weighs 4 lbs., carries up to 100 lbs. • Elastic cords permanently attached • Extended height 40", collapses to 20 3/4" • High impact Cicolac® base (9 1/2" x 7 1/2") • High quality 3" rubber wheels • Sturdy, high impact Lexan® crossbars

Continental 500 .....\$49.50

### Concorde 555

• Zippered vinyl carrying case with pocket and shoulder strap • Double telescopic back supports with self locking rods • Patented "one-motion" closing and opening feature • Comfortable finger grip handle • Can be pushed or pulled when loaded • Carry-aboard feature • Weighs 4 1/2 lbs., can support 150 lbs. • Extended height 41", collapses to 18 5/8" • Steel platform base (9" x 7 1/2") • 4" rubber wheels with molded core • Elastic cords permanently attached

Concorde 555 .....\$52.50

### Concorde II

• Extended height 41", collapses to 18 5/8" • Large, strong steel platform base (11 1/2" x 9 1/2"). Ideal for soft luggage • Patented "one-motion" opening and closing feature • Double telescopic self-locking rods • Can be pushed or pulled when loaded • Carry-aboard feature • Weighs 4 1/2 lbs., supports up to 150 lbs. • High quality 4" rubber wheels • Wire wheel guards for added protection • Elastic cords permanently attached • Vinyl carrying case with pocket and shoulder strap

Concorde II .....\$57.00

### Concorde III

• Sturdy, double telescopic self-locking rods • Extended height 41 1/2", collapses to 19 1/2" • Large, strong steel platform base (11 1/4" x 9 1/2"). Ideal for soft luggage • Patented "one-motion" opening and closing feature • Loads can be pushed or pulled • "Step Slide" feature for easy access over stairs and curbs • Wheel and mud guards for added protection • Weighs 7 lbs., supports up to 175 lbs. • High quality 5" sleeve-bearing rubber rim wheels • Elastic cords permanently attached • Carry-aboard feature • Zippered vinyl carrying case with pocket and adjustable shoulder strap • Optional garment bag caddy available • Shipped in master carton of 4. Shipping weight 34 lbs.

Concorde III .....\$63.25

Ek-Kart 150

Concorde 555

Tri-Kart 800

### Commander 600

• Heavy-duty model for larger loads • Sturdy, double telescopic self-locking rods • Extended height 49", collapses to 20 1/8" • Large 12 1/2" x 16" steel base • Patented "one-motion" opening and closing feature • Load can be pushed or pulled • "Step-Slide" feature for easy access over stairs and curbs • Weighs only 11 lbs., supports up to 300 lbs. • 5" ballbearing wheels with solid rubber tires • Elastic cords permanently attached • Optional zippered, vinyl carrying case available

Commander 600 .....\$83.00

Tote .....10.00

### Super 600

• Heavy-duty model for larger loads • Sturdy, double telescopic self-locking rods • Extended height 49", collapses to 20 1/8" • Large 12 1/2" x 16" steel base • Patented "one-motion" opening and closing feature for easy access over stairs and curbs • Weighs only 11 lbs., supports up to 300 lbs. • 6" ball bearing wheels with solid rubber tires • Elastic cords permanently attached • Wheel and mud guards for added protection • Optional zippered vinyl carrying case available

Super 600 .....\$93.50

Tote .....12.00

### Tri-Kart 700™

• Can be used as a 2 or 4 wheel cart • Patented design back-support swivel-bearing caster wheels for added stability • Sturdy, double telescopic self-locking rods • Extended height 41 1/2" collapses to 19 1/2" • Large, strong steel platform base (11 1/4" x 9 1/2"). Ideal for soft luggage • Patented "one-motion" opening and closing feature • "Step-Slide" feature for easy access over stairs and curbs • Wheel and mud guards for added protection • Weighs only 9 lbs., supports up to 175 lbs. • Quality, 5" sleeve-bearing rubber rim front wheels; 2" auxiliary caster wheels easy to extend and close • Elastic cords permanently attached • Optional zippered carrying case available on request • Optional garment bag caddy available

Tri-Kart 700 .....\$89.00

Tote .....10.00

### Tri-Kart 800™

• All weight is on the wheels, no load on the arms...just push or pull • Can be used as a 2 or 4 wheel cart • Patented design back-support swivel-bearing caster wheels for added stability • Sturdy 6" pneumatic rubber rim front wheels; 3" auxiliary caster wheels easy to extend and close • Sturdy, double telescopic self-locking rods • Extended height 49", collapses to 20 1/8" • Large 12 1/2" x 16" steel base • Patented "one-motion" opening and closing feature • "Step-Slide" feature for easy access over stairs and curbs • Wheel and mud guards for added protection • Weighs only 17 lbs., supports up to 300 lbs. • Elastic cords permanently attached with adjustable clamp to secure load • Optional zippered carrying case available

Tri-Kart 800 .....\$120.00

Tote .....12.00

# COLOR MEDIA PRODUCTS

## Prism Filters

### Spot Light Prism Filters

Three different styles of holographically produced films that break light up into different prism effects. Each filter is 9" square and a rigid 10 mils thick.

- 750011 Grid . . . . . \$10.00
- 750111 Linear . . . . . 10.00
- 750211 Burst . . . . . 10.00

### Pin Beam Prism Filters

Two styles specially designed for use with pin beams (rain light). These filters are 6" square and are a rigid 10 mils thick. Each design allows a central beam of light with the prismatic effect radiating outward from its center.

- 750311 Linear . . . . . \$9.00
- 750511 Circle . . . . . 9.00

## ThermoGuard Film

This clear film has a proprietary multilayer coating which reflects most of the damaging infrared heat emitted by stage and architectural lighting fixtures. Positioned, with air spaces, between high output sources and the color frame, ThermoGuard will protect the Roscolux color filters from otherwise destructive heat conditions. Until now, such luminaires could only be used with expensive glass colors. ThermoGuard permits the use of the full range of Roscolux colors.

- 99510 ThermoGuard Film  
12" x 12" . . . . . \$ 40.00
- 99511 ThermoGuard Film  
20" x 24" . . . . . 120.00

## Marcplot

A fresh approach to teaching and creating lighting design. Basic kit includes 220 magnetized markers, a special marking pen and complete manual written by Marc B. Weiss.

- 845010 Marcplot kit . . . . . \$49.95
- 845110 Marcplot board 24" x 36" . . 49.95

## Safety Frames

The replacement for hazardous metal color frames. Special, heavyweight, flame retardant fiberboard will not transmit heat to the filter. Remains cool for safe handling.

- 862010 3 1/2" frame (4 1/4" x 4 1/4") . . \$ .80
- 862110 6" frame (7 1/2" x 7 1/2") . . . . . 1.50
- 862210 8" frame (10" x 10") . . . . . 1.90
- 862310 4 1/2" frame (mini-ellipse) . . . . . 95

Rosco's Safety Frames feature rounded edges, fiberboard construction and a handling tab that stays cool.

## Roscolux Designer Selector

Large size Roscolux Swatchbook

- 881510 Large size Roscolux Swatchbook. . . . . \$12.95

## Swatchbooks

Roscolux and Roscolene swatchbooks have been, for many years, the lighting designer's favorite tool for color filter selection. The swatchbooks contain samples of every color in the range. Roscolux swatchbooks include transmission curves for each filter. All Rosco swatchbooks are dated and users are advised to have an up-to-date swatchbook on hand.

- 880710 Roscolux Swatchbook . . . \$2.50
- 880410 Roscolene Swatchbook. . . . 2.50

# COLOR OF LIGHT

## Color Of Light Videotape

### The Movie and Workbook

The "Color of Light" is an educational package for people who want to learn more about the art and science of color in stage lighting. It is designed for use in either a classroom situation or as a self-teaching tool. The package consists of four inter-related parts.

**The Movie.** A 20-minute film in handy videotape cassette form (VHS or Beta) takes the viewer into a light lab, a dance recital, a lighting class, a Shakespearean production and through the lighting process of a live band performance.

**The Workbook.** The real self-learning takes place in the pages of the Workbook. It includes brief chapters which describe how color works, and then a series of exercises so the student can apply what the text and the slides teach him.

**The Instructors' Guide.** Explains the system and gives the teacher an outline of how to use each of the components.

**The Slides.** There are eleven 35mm slides in each package, designed to help the teacher (or a student working alone) learn about color.

- 191010 "Color Of Light" package. Includes: videotape on VHS format, workbook, set of slides, instructors' guide and Roscolux swatchbook . . . . . \$39.95
- 191510 "Color Of Light" package, as above, but videotape in Beta format . . . . . 39.95
- 193010 "Color Of Light" workbooks, packages of 12 copies . . . . . 29.95

## Super Heat Shield

A protective transparent filter of extremely heat stable polymer, specially designed to deflect heat. This product should be placed between the bulb and the color filter, allowing space for the escape of heated air.

- 199111 2 mil 20" x 24" . . . . \$ 7.50
  - 199112 2 mil 24" x 50' . . . . . 191.50
- Add 1 to product number for sheet.  
Add 2 to product number for roll.

## Fluorescent Sleeves

For simple and economical control of fluorescent lighting. Clear carrier sleeve is supplied with one insert filter in any of the 62 Roscolene colors.

- 840110 48" Roscosleeve . . . . . \$9.50

## UV Filter

A virtually transparent filter, specially coated to absorb ultra-violet rays. The material allows less than 10% transmission below 390nm.

**Note:** A black light filter passes UV. Rosco's filter block UV.

- 311411 20" x 24" sheets . . . . \$ 4.50
- 311412 24" x 50' rolls . . . . . 116.00
- 311413 54" x 100 sq. ft. . . . . 112.00

## Teaching and Specifying Aids

**Designer Patterns — Technotes 9.** A guide to the technical and creative aspects of pattern projection. The text covers the history and use of patterns as well as providing valuable practical advice to the designer or technician.

**Designer Pattern Posters.** A set of two posters (17" x 22" each) displaying the collection of 276 patterns including Rosco's unique pattern holder.

**Designer Pattern Catalog.** An essential for any technical library. The 276 patterns in the Rosco collection are displayed by category together with a numerical index. Technical data and designer biographies are included.

**Color Media Guide.** A comparison of all 112 Roscolux and 62 Roscolene colors by hue in a convenient chart form. The guide also contains recommendations for the use of each color.

**Technotes 2A.** A technical guide to the manufacturing of color filters and their use in entertainment lighting. The brochure outlines Rosco's unique manufacturing process and offers practical solutions for dealing with excessive heat, etc.

**Technotes 3A.** Rosco's light diffusion media guide. In addition to defining light diffusion and suggesting applications for each Rosco diffusion filter, the brochure contains actual photographs which illustrate the diffusing effect of each filter.

## Designer Patterns

Rosco's patterns are precisely photoetched in a durable grade of stainless steel. They will fit the gates of the most commonly used ellipsoidal reflector spotlights. All patterns are circular. The outside diameter is 3.28". Price is \$8.95 per pattern, except for the Mesh-tone patterns (numbers ending with 92), which are \$15.00 each.

The standard pattern is "B" size. Most styles are available in "A" size, outside diameter is 3.9".

Illustrated Catalog Available On Request.

## Glass Gobos

Custom-made patterns fabricated on specially treated, heat-resistant glass. Using technology developed for the microchip industry, the process permits transferring virtually any black and white image, including such halftone art as photographs, to a glass pattern. Glass Gobos are available in the square "B" size format, which will fit the pattern holders made for use in Altman, Strand, Colortran and other manufacturers' ellipsoidal reflector spotlights. Consult your dealer for your requirements in either round format or other sizes. A collection of standard designs in Glass Gobos will be available soon.

Tooling charge, including one Glass Gobo Pattern, B (or A) size, square format: \$140.00. Repeat patterns from same tooling: \$40.00 ea.

## Pattern Holder

The Pattern Holder is designed to fit the gates of the most widely used 6" ellipsoidal spotlights. It features a heat-resistant finger hold at the top to facilitate removal and replacement.

Most fixture manufacturers offer their own pattern holders and Rosco Designer Patterns will fit these holders. However, because of the wide variety of dimensions offered, the sides of the patterns may have to be trimmed with a scissors to fit some of the holders.

Rosco Designer Patterns will also fit the holders designed for most 3 1/2" spotlights, though the patterns have to be cut. Rosco, or your Rosco dealer, can offer guidance on which pattern designs are best suited for smaller spotlights.

799902	Standard Pattern Holder . . . . .	\$ 5.50
799905	Television Pattern Holder designed to fit 2000W ellipsoidal reflector instruments widely used for pattern projection in television . . . . .	20.00

## Custom-Made Patterns

Rosco can produce a custom-made pattern from camera ready artwork. Consult your dealer or Rosco office for technical details and the "How to Specify a Custom-Made Pattern" data sheet.

Tooling charge including one stencil pattern, B size: \$85.00

Repeat stencil pattern, B size: \$25.00

Tooling charge including one meshed pattern, B size: \$100.00

Repeat meshed pattern, B size: \$34.00

Other sizes are available on request.

## Donut

A low cost accessory to sharpen the definition of projected images. 7 1/2" x 7 1/2" fits most 6" ellipsoidal reflector spotlights.

798910 . . . . . \$3.95

## Tonal Mesh Patterns

This unique series of Tonal Mesh Patterns is fabricated with a special process that creates gray areas and varies the light intensity in portions of the projected image. They allow the designer to create an effect of heightened realism.

Test kit available.

## Clear Gloss and Flat Acrylics

These clear acrylic mediums are designed to be diluted with water and applied as an overcoat to a painted surface or they can be mixed with the paints for additional binder strength. Rosco Clear Acrylics are compatible with all of Rosco's paint systems and most other water extendable paints. They also serve as a binder for Rosco Dry Pigments.

No.	Description	5 Gal.	1 Gal.
558011	Clear Gloss	\$95.00	\$20.00
55811	Clear Flat	95.00	20.00

Note: Add 9 to the product number for 5 gallons and 7 for 1 gallon.

## Super-Saturated Roscopaint

Brilliant, opaque colors formulated to be diluted with substantial quantities of water while retaining binder strength. Works on most scenic surfaces including muslin, plastic and metal. Dries to a completely matte, non-reflective finish. Color is sold in units comprised of two single quarts packaged in a shipping carton.

59801	Iron Red	\$17.50
59821	Yellow Ochre	17.50
59851	Burnt Umber	17.50
59861	Raw Umber	17.50

Note: Product number is for color only. When ordering add to product number: 6 for 2-quart, 7 for 1 gallon and 9 for 5 gallon.

## UV Inhibitor

UV Inhibitor is a unique formulation designed to combat the fading of dyes and pigments exposed to the sun. The sun's ultraviolet rays are the leading cause of fading and yellowing of scenic material used outdoors. UV inhibitor absorbs those rays to extend color life. UV inhibitor is formulated with an acrylic binder and each concentrated gallon of UV Inhibitor should be diluted with at least one part water before application. One diluted gallon will cover approximately 800 sq. ft.

## Video Paints

### Ultimatte™

Ultimatte Paints are the approved Ultimatte Paint System. These paints were designed in conjunction with the Ultimatte technical staff to meet the requirements of their keying effects systems. These acrylic paints can be used on nearly any surface. Sold in one gallon and five gallon containers.

- 57201 Ultimatte Blue (1 gal.) . . . \$ 30.50  
(5 gal.) . . . 145.00  
57211 Ultimatte Green (1 gal.) . . . 39.50  
(5 gal.) . . . 189.00

For 1 gallon add 7 to product number. For 5 gallon add 9 to product number.

### Chroma Key

Chroma Key Paints have been specifically formulated to provide high luminance values and color saturation for keying effects. The acrylic colors provide high build, one-coat coverage for use on nearly any surface. Sold in 1 gallon and 5 gallon containers.

- 57101 Chroma Key Blue (1 gal.) \$ 30.50  
(5 gal.) . . 145.00  
57111 Chroma Key Green (1 gal.) . 30.50  
(5 gal.) . . 145.00

For 1 gallon add 7 to product number. For 5 gallon add 9 to product number.

### TV White and Black

Specially formulated for the sensitive contrast requirements of standard television systems, this versatile acrylic latex paint can be applied to nearly any surface and comes ready to use right out of the bucket. TV White and Black are complete intermixable and allow the user to achieve intermediate grays. Featuring one-coat coverage, this system dries to a matte, non-reflective finish and allows for easy touch-up. Available in gallons.

### TV White

A neutral gray that meets the specifications for 60% reflectance (maximum brightness intended for transmission).

- 573517 TV White (1 gal.) . . . . . \$18.00

### TV Black

A rich, matte black that meets the specifications for 3% reflectance (minimum brightness intended for transmission).

- 574017 TV Black (1 gal.) . . . . . \$18.00

### Roscoglo

A phosphorescent paint designed for use in total darkness for stage direction and visual orientation. Roscoglo appears, in the dark, as a distinctive yellow-green light—a 2" square is visible up to 30'. Ideal for marking hazardous areas or placing people or props in black-out situations. Sold in 1 ounce jars or in pint containers.

- 566510 Ounce . . . . . \$ 3.75  
566614 Pint . . . . . 39.95

### Iddings Paint Sprayers

#### Scenic Artist Sprayers

The superior tool for the professional scenic artist or the busy paint shop. These specially adapted sprayers feature in-line filters, a variety of spray nozzles for various scene painting techniques and, in the 3 and 4 gallon models, compression gauges. All tanks are stainless steel.

No.	Tank Capacity	Price

560110	3 gal.	215.00
560210	1 1/3 gal.	175.00

#### Sprayer Accessories

- 560710 Service kit for 560210. . . \$10.00  
560910 Spray nozzle for Artist Sprayers . . . . . 3.50  
568010 24" curved extension . . . . 12.95

### Paint Mixing Pails

Sturdy, handsome plastic pails designed specially for mixing any of the Rosco paints. Lids are supplied for paint storage. Convenient tapered pail has a wide mouth for easy mixing, painting and stocking. A 7" priming brush fits easily into both the 1 gallon and 2 gallon size.

- 900117 Mixing pail (1 gal.) . . . . . \$2.00  
900118 Mixing pail (2 gal.) . . . . . 3.50

### Iddings Brushes

A group of fitches (liners) of professional quality, but priced within the budget of scene painting students.

No.	Bristle Length (in.)	Ferrule Width (in.)	Price
561010	1.5	.25	\$ 3.50
561110	1.75	.5	5.00
561210	2.0	.75	8.00
561310	2.25	1.0	11.00
561410	2.5	1.25	13.00
561510	2.75	1.5	16.50
561610	3.0	2.0	21.00
561710	Set of 7 brushes, one each of all of the above		69.50
561810	3" Foliage		34.75
561910	Set of 7 brushes plus 3" Foliage		99.50
565010	8" Lay-in		69.95
565210	2" Enamel		35.00
565310	3" Enamel		42.00

### Dutch Style Priming and Laying-In Brushes (Chinese White Bristle)

No.	Width	Price
562110	4"	\$25.50
562210	7"	40.50

### Ford Chalk Stick

This dual purpose tool is handcrafted from aluminum tubing. It is designed for cartooning as well as for attaching your favorite hand brush.

- 567210 For #17 Charcoal (1/4") . . . \$19.95  
567410 For #9 Charcoal (1/2") . . . 19.95

# PAINT PRODUCTS

## Roscoflamex Flame Retardants

A full range of flame retardants to serve virtually every flameproofing need. The range includes products for treating the full spectrum of theatrical materials from non-absorbent synthetics to wood and the traditional natural fabrics.

Each product can be easily applied with a roller, brush, sprayer or by immersion. Roscoflamex flame retardants leave no powdery residue. The standard unit is one gallon, but larger packing is available by special order.

### Roscoflamex C26

An improved version of Rosco's original flameproofing for cotton muslin and canvas. By adding 2 or 3 parts water, each gallon yields 3 to 4 gallons of economical flameproofing. The "C26" identifies the cotton formulation and should be specified when ordering.

### Roscoflamex S33

A formulation for treating synthetics including polyester, nylon, acrylic, rayon and a variety of blends. The liquid is premixed and ready for use. Specify "S33" when ordering.

### Roscoflamex W40

Flameproofing for hard to treat scenic materials including wood, silk, and some wool blends. The liquid is pre-mixed and ready for use. Specify "W40" when ordering.

No.	Description	Price/Gal.
792617	Roscoflamex C26 . . . . .	\$29.00
793317	Roscoflamex S33 . . . . .	36.00
794017	Roscoflamex W40 . . . . .	36.00

## Fluorescent Paints

Vivid colors that are visible and brighter in normal light, and fluorescent under ultraviolet light. Available in quart size.

No.	Color	Price/Qt.
57791	White (White) . . . . .	\$14.95
57801	Red (Fire Red) . . . . .	14.95
57811	Orange (Orange) . . . . .	14.95
57821	Yellow (Lemon Yellow) . . . . .	14.95
57831	Green (Emerald Green) . . . . .	14.95
57841	Blue (Sky Blue) . . . . .	14.95
57851	Invisible Blue . . . . .	14.95

**Note:** Product number is for color only. Add 5 to designate quart. Refer to Off-Broadway Color Card for close representation of color. White fluoresces a light blue under black light. Invisible Blue is clear under normal light and fluoresces light blue.

## Iddings Ice Colors

Iddings Ice Colors were selected for use by the 1980 Lake Placid Olympic Games and are extensively used by professional arenas and ice shows throughout the country. Designed to be mixed with water without losing brilliance or color tone. They are easier to apply and more economical than any other ice paint available.

No.	Color	5 Gal.	No.	Color	1 Gal.
580019	White . . . . .	\$98.00	579017	Black . . . . .	\$31.00

			579617	Blue . . . . .	31.00
			579717	Green . . . . .	31.00
			579817	Brown . . . . .	31.00

**Note:** Special colors may be ordered. Minimum quantity: 5 gallons.

## Colorine

Technicians have been coloring lamps and glass with Rosco's Colorine since 1910. This popular product is designed for low wattage bulbs, which include a wide range used in stagecraft and live entertainment. Colors are brilliant and long lasting.

	Pint	Gallon
Color	\$8.75	\$60.00
Thinner	5.95	34.50

No.	Color	No.	Color
76011	Cardinal Red (26)	76071	Emerald Green (90)
76021	Ruby Red (27)	76101	Golden Amber (41)
76031	Magenta (49)	76151	Canary Yellow (15)
76041	Moonlight Blue (80)	76171	Clear
76051	Urban Blue (82)	76801	Thinner

**Note:** Product number is for color only. When ordering add to product number: 4 for pint, 7 for gallon. Refer to Roscolux swatchbook for close representation of color.

# SPECIAL EFFECTS, PROPS/ COSTUME PRODUCTS

## Breakaways

Reasonably priced bottles and glasses that shatter realistically and without danger. Special packaging assures guaranteed intact delivery. Price: \$88.00 per dozen. Minimum packing: one dozen. Add 1 to product number for Amber, 2 for Green, 3 for Clear.

80011	Beer Bottle
80021	Cola Bottle
80031	Whiskey Bottle
80051	Wine Bottle
80061	Water Glass

## Roscoblood

Non-toxic, non-staining stage blood. Roscoblood will dry more slowly than real blood. When dry, it has the same appearance as dried blood on both skin and fabrics. Roscoblood will "read" like blood on stage, film or video.

797511	2 oz. container. . . . .	\$ 2.50
797613	6 oz. container. . . . .	5.50
797714	16 oz. container. . . . .	11.50

## Roscobond

Safe, non-flammable, pressure sensitive adhesive for bonding non-porous materials to non-porous surfaces. Designed for use with plastic films. Also works on many porous materials.

820215	Quart . . . . .	\$ 7.50
820317	Gallon. . . . .	23.00
820419	5 Gallon . . . . .	85.00

## Storage Drawers

Heavy gauge 2" deep corrugated drawer and sleeve that accepts 20" x 24" sheets of Rosco color filters. Shipped completely assembled. Packed six to a case.

860110	Storage Drawers (set of 6) . . . . .	\$36.00
--------	---	---------

## Fabric Colors

Specially developed water-based dyes for coloring silk, lightweight wool and some synthetic stretch fabrics. Colors can be intermixed, sprayed and stencilled and should be steam-set. 1/2 liter containers.

## Tutu Nets

Three styles of woven net materials widely used in the construction of tutus for ballet dancers. Available in bolts that are 43 yards long, 52" wide. Prices upon request.

520011	Ballet Tutu Soft	White
520031	Ballet Tutu Soft	Black
530011	Ballet Tutu Stiff	White
530031	Ballet Tutu Stiff	Black
540001	Ballet Soft Skin	Natural
540011	Ballet Soft Skin	White

## Paint Kits

### Rosco Paint Sampler

24-piece kit contains 1 ounce samples of Iddings Deep Colors, Super-Saturated Roscopaint, Rosco Off-Broadway Scenic Paint, Iddings Dry Pigments, Fluorescent Paint, Clear Gloss, Clear Flat, Roscoglo and Roscoflamex C26. Package includes data sheets, instruction booklets, color cards and a free Rosco Iddings brush.

599010 . . . . . \$29.95

### Deep Colors

24-piece kit contains 1 ounce samples of the entire range of Iddings Deep Colors. Package also includes a scene painting brochure, data sheets on other Rosco paint products and a color card.

558510 . . . . . \$14.95

### Off-Broadway

24-piece kit contains 1 ounce samples of each Off-Broadway color on information manual, data sheets and a color card.

537510 . . . . . \$14.95

### Super-Saturated Roscopaint

24-piece kit contains 1 ounce samples of the entire range of colors plus neutral base, Rosco Clear Gloss and Clear Flat, Roscoflamex, a brochure on scene painting, data sheets and a color card.

593510 . . . . . \$14.95

## Rosco Stages and Risers

Rosco offers stages and risers in units or as complete stages in specified configurations. These are among the safest, most widely used stages and risers in the world. Over 100,000 such units are in use in theaters, opera houses, multipurpose halls and exhibition halls. Also available are orchestra pit covers as well as a complete range of stage accessories such as mobile stairs, guard rails, ramps, etc.

6415	40" x 80" Stage Unit
6420	4' x 8' Stage Unit

## Daylight Conversion Filters

RoscoSun Daylight Conversion Filters are used when shooting in an interior at a 3200°K balance. They are required at windows or other openings to convert incident daylight to an approximation of 3200°K. Partial conversions are utilized where less than full correction (a cooler or bluer daylight appearance) is preferred. All roll materials are 100 sq. ft., 58" wide, and are optically clear.

3401	RoscoSun 85	Converts 5500°K daylight to a nominal 3200°K	\$112.00
3407	RoscoSun CTO	Converts 5500°K daylight to a nominal 2900°K	112.00
3408	RoscoSun 1/2 CTO	Converts 5500°K daylight to a nominal 3800°K	112.00
3409	RoscoSun 1/4 CTO	Converts 5500°K daylight to a nominal 4500°K	112.00
3410	RoscoSun 1/8 CTO	Converts 5500°K daylight to a nominal 4900°K	112.00
3761	Roscolex 85	Optically clear rigid acrylic. Panel, 51" x 100" Performs same function as RoscoSun 85	164.00

## Neutral Density Filters

RoscoSun Neutral Density Filters reduce the level of incident daylight. Two of the materials also convert daylight to a nominal 3200°K. Except for SilverScrim and BlackScrim (54" wide) all roll materials are 100 sq. ft., 58" wide and are optically clear.

3402	RoscoSun N3	Reduces light intensity one stop	\$112.00
3403	RoscoSun N6	Reduces light intensity two stops	112.00
3404	RoscoSun N9	Reduces light intensity three stops	112.00
3405	RoscoSun 85N3	Reduces light intensity one stop and converts daylight to nominal 3200°K	115.00
3406	RoscoSun 85N6	Reduces light intensity two stops and con- verts daylight to nominal 3200°K	115.00
3762	Roscolex N3	Optically clear rigid acrylic panel, 51" x 100", reduces light intensity one stop	164.00
3763	Roscolex N6	Optically clear rigid acrylic panel, 51" x 100", reduces light intensity two stops	164.00
3421	BlackScrim	Perforated material, 54" wide, black on both sides. Reduces light intensity two stops with no effect on Kelvin	112.00
3809	RoscoScrim	Similar to BlackScrim above. Dual purpose material, 54" wide. Black side functions as neutral density window scrim	112.00

## Tungsten Conversion Filters

Tungsten Conversion Filters convert incandescent 3200°K sources to nominal daylight. These filters offer a deep-dyed base for optical clarity and high heat stability. They are 54" wide, 100 sq. ft., and provide a palette to match varying daylight conditions.

3202	Full Blue (CTB)	Boosts 3200°K to nominal 5500°K daylight	\$112.00
3204	Half Blue (1/2 CTB)	Boosts 3200°K to nominal 4100°K daylight	112.00
3206	1/3 Blue (1/3 CTB)	Boosts 3200°K to nominal 3800°K daylight	112.00
3208	1/4 Blue (1/4 CTB)	Boosts 3200°K to nominal 3500°K daylight	112.00
3216	1/8 Blue (1/8 CTB)	Boosts 3200°K to nominal 3300°K daylight	112.00

## Cinegel Selector

880910	Large Size Cinegel Swatchbook	\$12.95
--------	-------------------------------	---------

For Cinegel rolls, add 13 to product number. For Cinegel sheets add 11 to product number.

## Diffusion Materials

The Cinegel System includes the broadest range of diffusion material available: 16 different products, plus four which combine diffusion and a blue tint to boost Kelvin temperature. All diffusers are 100 sq. ft. "Tough" designation indicates heat stable filter. "Soft" diffusion should be placed at a distance.

3002	Soft Frost	54"	65.00
3023	Wide Soft Frost	72"	85.00
3004	Half Density Soft Frost	54"	65.00
3014	Hilite	55"	115.00
3032	Light Grid Cloth	43"	85.00
3030	Grid Cloth	40"	85.00
3000	Tough Rolux	49"	85.00
3001	Light Tough Rolux	49"	85.00
3006	Tough Spun	54"	85.00
3007	Light Tough Spun	54"	85.00
3022	1/4 Tough Spun	54"	85.00
3008	Tough Frost	48"	85.00
3009	Light Tough Frost	48"	85.00
3010	Opal Tough Frost	48"	85.00
3011	Tough Silk	54"	85.00
3026	Tough White Diffusion	54"	85.00
3027	Tough 1/2 White Diffusion	54"	85.00
3028	Tough 1/4 White Diffusion	54"	85.00
3029	Silent Frost	54"	85.00

## Diffusion/Booster Materials

These filters offer the same diffusion properties as those described above, but contain a deep-dyed blue correction, integral to the material, which raises the Kelvin temperature of 3200°K sources. These materials are 54" wide, 100 sq. ft.

3012	Tough Booster Silk	Diffuses and increases 3200°K sources to 3500°K	\$90.00
3013	Tough Booster Frost	Diffuses and increases 3200°K to 3800°K	90.00
3017	Full Blue Frost	Diffuses and increases 3200°K sources to nominal daylight	90.00

# CINEGEL PRODUCTS

## Fluorescent Light Filters

Standard cool white or daylight fluorescent tubes offer a reasonable approximation of photographic daylight except for their excessive green content. Two separate techniques are available to deal with this situation—balance all sources to the fluorescents or balance the fluorescents to the sources. Product 3304 is applied to windows or daylight sources and 3306 to 3200°K sources, respectively, to balance them to the fluorescent lights. Products 3308, 3313, 3314, 3310 and 3311 are applied to the fluorescent lights to convert them to either 3200°K or nominal daylight. All roll materials are 54" wide, 100 sq. ft., and are optically clear.

3304	Tough Plusgreen	Converts daylight to match fluorescents		\$ 112.00
3315	Tough 1/2 Plusgreen	Adds partial green to Daylight and 3200°K sources for balancing with fluorescents and discharge lamps. Equivalent to CC15 Green		112.00
3316	Tough 1/4 Plusgreen	Adds partial green to Daylight and 3200°K sources for balancing with fluorescents and discharge sources. Equivalent to CC075 Green		112.00
3306	Tough Plusgreen 50	Converts 3200°K sources to match cool white fluorescents		112.00
3308	Tough Minusgreen	Converts cool white fluorescents to nominal daylight by absorbing excess green output		112.00
3313	Tough 1/2 Minusgreen	Partial green absorbing filter equivalent to 0.15cc Magenta. Useful on some fluorescent types or discharge sources		112.00
3314	Tough 1/4 Minusgreen	Partial green absorbing filter equivalent to 0.075cc Magenta. Useful on some fluorescent types or discharge sources		112.00
3310	Fluorofilter	Converts cool white fluorescents to 3200°K		112.00
3311	Fluorofilter	Same as 331013 in 4' sleeves for covering lamps		9.50

## Arc Light Filters

The Cinegel System offers a wide range of filters for carbon arcs, HMI, CID and CSI lamps. They vary in the character and the amount of color correction provided to deal with the ages of the lamps in use and other operating conditions. All materials are 100 sq. ft., and are fabricated in a deep dyed base for optical and high heat stability.

3107	Tough Y1	A pale straw filter used in U.S. on HMI or white flame arcs to absorb UV and reduce Kelvin for daylight balance	54" W	\$ 112.00
3110	Tough WF Green	Because of generally higher ambient Kelvin preferred in Europe for the same purpose as Tough Y1	48" W	112.00
3106	Tough MTY	A single filter combining MT2 and Y1 for correction of 5500°K white flame arcs and HMI to 3200°K	54" W	112.00
3102	Tough MT2	When used in combination with Y1, converts white flame arcs to 3200°K. Also useful as an amber conversion filter on HMI and CID conversion	54" W	112.00
3115	Tough 1/2 MT2	A partial amber conversion for use on arcs and HMI	54" W	112.00
3116	Tough 1/4 MT2	Pale amber correction for arcs and HMI	54" W	112.00
3134	Tough MT54	A pale straw correction for white flame arcs or HMI	48" W	112.00
3114	Tough UV Filter	A clear slightly tinted filter that absorbs 90% of UV wavelengths below 390nm. For absorbing UV output of arc sources	54" W	112.00

## Reflection Media

Reflector materials offer a wide variety of choices for surfacing reflector boards or for use wherever reflected light is required. The product designation generally indicates the quality of the reflection. These materials are fabricated in a durable, washable plastic laminate. They are 100 sq. ft. and 54" wide (except for RoscoBounce W, which is 48" wide).

3801	Roscoflex M (mirror)	\$ 90.00
3802	Roscoflex H (hard)	90.00
3803	Roscoflex S (soft)	90.00
3804	Roscoflex SS (super-soft)	90.00
3805	Roscoflex G (gold tinted)	90.00
3806	Roscoflex C (cool blue tint)	90.00
3807	Roscoflex D (daylight blue/silver)	90.00
3808	Roscoflex F (featherweight)	90.00
3809	Roscoscrim (perforated silver/black)	112.00
3810	Roscoflex W (white/silver)	90.00
3821	RoscoBounce W (white)	45.00

## Roscobond

Pressure sensitive adhesive for bonding Roscoflex media to aluminum or other non-porous board surfaces.

820215	Roscobond Quart	\$ 7.50
820317	Roscobond Gallon	23.50
820419	Roscobond 5 Gallon	85.00

## Roscopaks

Roscopak materials are lightweight, yet strong and durable. These materials can be taped or tacked to virtually any wall, ceiling or panel and turn that area into an efficient reflector. Each Roscopak consists of 18 sq. ft. of material packaged in a handy pocket size pouch.

850210	Roscopak F (silver)	\$ 15.00
850310	Roscopak D (blue/silver)	15.00
850910	Roscopak G (gold/silver)	15.00
851010	Roscopak W (white/silver)	15.00

## Cinecolor

Cinecolor range is a series of effects colors available in rolls that are a full 48" wide. This wide width color is designed to filter large fixtures or multiple sources with a single, seamless frame. The material is deep-dyed for stability on hot lights and superior color transmission. Rolls are 48" wide, 100 sq. ft., \$104.00 each.

## VIDEO KITS

### Light Control, Color Corrective Materials for Video and Film Production

Based on experience with cinematographers and lighting directors around the world. Rosco has selected filters for a group of kits for film and video lighting. These low cost kits were developed to deal with the most frequently encountered lighting situations. They offer the filmmaker and video technician a set of tools to help achieve professional results in controlled lighting environments or on location.

### Daylight Correction Kit

There are three materials in this kit, which are packaged in a handy tube. Each of them is designed to be applied to windows. They are used when daylight and tungsten light appear in the same scene. Materials included are: RoscoSun 85, 8' long, 58" wide; RoscoSun N6, 8' long, 58" wide; Soft Frost, 8' long, 54" wide.

325110 Daylight Correction Kit \$59.95

### Diffusion Kit

Nineteen 10" x 12" Rosco diffusion materials are packaged in this kit. Diffusion materials help control the "character" of the lighting in each scene. Rosco's range is offered in closely graded steps so the cinematographer or videographer can select the exact material for each situation.

302010 Diffusion Kit \$24.95

### Creative Color Kit

The ten color filters in this kit are selected from the range of over 300 colors which Rosco produces for theater, film and television. Each of the sheets of color is 10" x 12" and deep-dyed on a heat resistant base. They are ideal for the lights used in most video productions.

852510 Creative Color Kit \$24.95

### Polarizing Filters

A neutral gray linear polarizing film for use in front of lights. Reduces the glare reflected by smooth surfaces such as glass, water, paper and certain metallic objects. Especially effective when used in conjunction with a polarizing filter at the lens ("cross-polarization"). Should be placed at slight distance from "hot" lights.

730011 19" x 20" sheet \$ 37.75  
730012 19" x 5' roll 112.00

### Tungsten Correction Kit

This kit contains ten 10" x 12" sheets of five different materials to raise the Kelvin temperature of tungsten light sources. Materials included are: Rosco's Tough Blue 50, Booster Blue, Half Booster Blue, Quarter Booster Blue and Tough Blue 50 Frost.

325010 Tungsten Correction Kit \$24.95

### Roscopak W and D

These kits each consist of a single sheet of lightweight reflector material that is 18 square feet. Both have a silver or "hard" reflector surface on one side. Roscopak W has a matte or "soft" reflector surface on the other side. Roscopak D has a blue surface on the other side from which tungsten light reflects as nominal daylight. Roscopak D is particularly useful when the basic source of light is daylight but tungsten light has to be reflected into an area for additional keylight or illumination.

851010 Roscopak W \$ 15.00  
850310 Roscopak D 15.00

### Cinefoils

Rosco's range of Cinefoils are specially fabricated aluminum materials designed to either mask or reflect light. Matte Black Cinefoil thoroughly absorbs light, and is ideal for masking light leaks and/or eliminating unwanted light reflections. Satin Silver Cinefoil will reflect light softly and evenly for applications where both masking and reflection may be required. Rosco Cinefoils may be molded to form barndoors or flag lights in other masking configurations. They are packaged in 50 sq. ft. (4.6 sq. m) rolls, 12" or 24" wide, in a handy dispenser box. Rolls are \$22.95 each.

100112 Matte black 24" x 25'  
100113 Matte black 12" x 50'  
100212 Satin silver 24" x 25'  
100213 Satin silver 12" x 50'

# FOG AND SMOKE SYSTEMS

## Fog and Smoke Systems

Fog and smoke systems are specially designed for applications in theater, film, television and live entertainment. They have been thoroughly tested for both safety and effectiveness. Two different machines are presently available and the fluid is sold in a variety of sizes and scents. The products listed here have been proven over thousands of hours of use throughout the entertainment industry.

### 1500

The 1500 Fog/Smoke Machine provides the opportunity for high reliability and continuous production of dry smoke at a low price.

The 1500 features an external tank, allowing fluid to be pumped from any container, ranging from the standard one-liter bottle to a huge drum. This, plus reliable components, permits non-stop operation without interruptions for re-cycling or re-filling.

Features of the 1500 include continuously variable smoke control, allowing you to design the smoke effect you need, from wispy cigarette smoke to billowing clouds.

The machine's heat exchanger (the component that atomizes liquid into smoke) as well as its electrically-operated internal pump and the associated electronics package, are all state-of-the-art devices. The 1500 comes equipped with a standard remote control module, 6' power cord, and instruction manual.

150010	1500 . . . . .	\$695.00
150050	Carrying case . . . . .	235.00
150060	Super remote control . . . . .	124.95

150085	50' Remote extension . . . . .	55.00
150086	100' Remote extension . . . . .	65.00

### Standard Fog/Smoke Fluid

Unlike the products used for this purpose previously, Rosco Fluid contains no petroleum. When vaporized, this formulation produces a dense, realistic smoke which is non-toxic and non-irritating. It has no unpleasant odor and leaves no slippery residue and will not irritate eyes, nose or throat. Gallons are packed two gallons per case.

820613	Fog fluid gallon . . . . .	\$ 49.00
820711	Fog fluid liter . . . . .	12.95
820712	Fog fluid 24 liter case . . . . .	310.80

### Scented Fog/Smoke Fluid

The range of scented fog fluids is designed for use with all Rosco Fog/Smoke machines. They are designed for special applications in live entertainment. These fluids have been carefully tested and may be used in the Rosco System without affecting machine warranties or function.

	Liter	Gallon	24 Liter Case

Strawberry	820785	820687	820789

1500

Pro-3000

### Stage and Studio Fog/Smoke Fluid

This formulation offers the same safety features as standard Fog/Smoke Fluid, but two additional benefits for users in theater and television. This special fluid, when used with either of Rosco's Fog/Smoke machines, will dissipate more quickly than the standard fluid. This is especially useful for theatrical or video applications where the effect must appear (and disappear) on cue. When properly chilled, the Stage and Studio Fog/Smoke Fluid generates an excellent theatrical fog which also dissipates quickly, without rising in the air. Consult your dealer for details on chilling the smoke.

900011	Liter . . . . .	\$ 12.95
900012	24 liter case . . . . .	310.80
900013	Gallon . . . . .	49.00

### Pro-3000

The Pro-3000 Smoke Generator is designed for applications where either dense smoke, or continuous smoke (or both) are required.

The Generator features an internal pump, eliminating the need for any external or internal source of air pressure. Because of its unique design, fluid can be poured into the internal tank while the machine is operating, or may be fed from an external tank. If an external tank is used, there is virtually no limit to the duration of the Generator's continuous smokemaking operation — six, eight or twelve hours are well within its capability.

The Pro-3000 uses Rosco's standard Fog Fluid, insuring the same safety features as when the fluid is used in Rosco's other Fog Machines.

# COMPUTER SOFTWARE FOR THE PERFORMING ARTS

## Computer Software

Microcomputer programs written for performing arts companies by theatrical professionals. These programs are designed to save time and money and can make any production company or department efficient. Properly equipped microcomputers can provide both on-screen and hard copy printed reports. Manuals may be bought before program purchase to examine program operation and determine suitability. An order form for the program disks is included with each manual. Disks should be ordered only on this form.

## A.L.D./PRO

### Updated Version 2.0

An improved and expanded version of A.L.D. lighting paperwork software. Some additional features include:

- The capacity for up to 600 instruments
- Control channel numbers from 1-999 can be used in addition to dimmer numbers
- Data uses 30% less disk space
- Automatic channel assignments
- Automatic dimmer assignments
- Additional error checks
- Works with enhanced graphics adaptor
- Expanded import/export functions
- Greatly enhanced printer support
- Expanded global replacement function
- Separate accessory counting
- Customization of printouts are now possible including the use of ditto marks
- Additional shorthand commands to speed up program use by the experienced user
- Works with stock equipment inventory

266010	Manual including disk order form . . . . .	\$ 25.00
260014	Program disk (IBM). . . . .	425.00
260044	30 day, 75 instrument demo disk . . . . .	4.95

## Assistant Lighting Designer Paperwork

A blessing for the busy or novice lighting designer. A.L.D. displays and prints out virtually all of the paperwork required to light simple or complex productions. The program provides extensive error-checking capabilities as well as a variety of printed documents.

255010	Manual including disk order form . . . . .	\$ 25.00
255014	Program disk . . . . .	275.00

## Demo Disks

PACS A.L.D./Pro and Stagelights now have low cost demo disks available.

## Stagelights

This program examines and manipulates stage lighting instrument applications using both data and drawn-to-scale graphics. User selects a specific instrument and location, the computer calculates and displays distances, angles and intensities and then draws a side section of the resulting beam of light. Program includes an on-line library of manufacturer's photometric data.

## Performing Arts

### Center System (PACS)

A comprehensive system of programs to direct the operations of the Box Office and Marketing Office in a performing arts center. PACS provides for graphic representations of up to 10 venues from which the user may sell tickets. Up to 16 ticket types (usable for various discount sales) and 7 seating sections are provided for as well as 9 methods of payment. Reservations and refunds can be accommodated. Reports may be produced based on the sales during a given day for all shows as well as the sales for a given show over all selling days. Graphic printouts of the status of the theater for any performance are possible. Patron lists and mailing labels may be produced based on patron buying habits or other patron information. On-site training and telephone help service is available. Requires IBM-PC-XT or equivalent.

207010	PACS . . . . .	\$5990.00
--------	----------------	-----------

### Ticket Stock (PACS)

80 lb. cardboard, continuous form ticket stock expressly designed for Rosco's PACS Box Office/Marketing Management software. Contains 2000 white tickets per case.

290111	Ticket Stock/Case . . .	\$150.00
--------	-------------------------	----------

### Candlepower For the Macintosh®

Candlepower is a computer software template used in conjunction with Business FileVision® by Telos. It lets Macintosh users produce light plots and lighting paperwork in one easy-to-use package. Candlepower uses Business FileVision's ability to integrate the database management facilities needed for printed schedule production and the superior graphic capabilities of the Macintosh needed for plot generation. A symbol library included with the template (one of 3 methods of entering data), contains both graphics and data that can be utilized with the program. Because Candlepower works with Business FileVision, the user interface is familiar to many Macintosh users. Plotter interfacing is possible for production of 1/4" and 1/2" drawings.

Minimum hardware requirements: Macintosh 512K.

280018	Candlepower program disk and manual . . . . .	\$150.00
285018	Business FileVision including start-up disk, program disk and manual . . . . .	225.00

# TEXTILES

## Textiles

A wide range of specialized fabrics for theater, film, and television applications. Textiles are normally sold by the bale. Please call for quotes on finished drops. Some Rosco textiles now available in cut yardage. Textile swatchbook: \$2.50 each.

### Wide Width Muslin

Muslin 14'5", 19'6", or 32'9" wide is manufactured on some of the newest looms in the world. Ideal for translucent style scenic effects. Bales are 65 yds. long. Available untreated natural or Flame Retardant in the following colors: Natural, Sky Blue, CBS Gray, and Bleached White.

### Dyed 102" Muslin

Bolt length approximately 100 yds.

No.	Color	No.	Color
150029	Light Gray	150049	Light Blue
150109	Dark Gray	150119	Dark Blue

### Bounce Cloth

Inherently Flame Retardant Bounce Cloth. True color bounce, no shifting of color.

260019 72"W White . . . . .yd./\$8.70  
in 60 yd. rolls

### Chroma Key Material

These Chroma Key materials are woven from Flame Retardant synthetic fibers. Color meets the standards set for most television applications. Material is 59"W, bolts are 65 yds. long. This product sold by the yard. Finished Chroma Key backdrops available, made to specification.

20004 Chroma Key Blue  
20005 Chroma Key Green

See Paint Section for matching Chroma Key Paints.

### Velvet Velour

A rich velvetlike deep, deep black velour. Available 54"W in a 21 oz. weight. Flame Retardant.

80003 Velvet Velour

### Duveltyne

88003 54" Duveltyne Black  
89003 54" Heavy Opaque Duveltyne

### Sharkscrim

The traditional scrim in extra wide widths all Flame Retardant.

# DESIGNER PRODUCTS

## Slit Drape

Rosco's version of a slash curtain picks up and bounces light in exciting new ways. Overlapping 1/8" wide layers of durable vinyl do the trick. Each style is available 36" wide in 8', 16', or 24' lengths, and custom sizes are available on special order.

## Cascade Curtains

Shimmering decorator curtains in 25 colors. Flame retardant and faceted 1/4" strips for spectacular reflection. Heading is the same material and color as curtain, with 3/4" spacing to hold curtain. Individually packed in clear plastic tube. Each curtain is 3' wide.

## Roscoscreen

### Rear Projection Screen

A range of four rear projection screen materials, each with special technical properties. The range includes a unique black surface. Specified by major opera houses and theaters throughout the world. Available by the yard or as custom made screens. 55" wide.

## Sparklene

Eighteen glitter laminate plastic film colors for exciting effects. These are pressure sensitive and available in standard rolls 24" x 15'.

No.	Color	Price/Roll
399012	Silver	\$40.00
399112	Blue	40.00
399212	Red	40.00
399312	Green	40.00
399412	Fuschia	40.00
399512	Gold	40.00
399612	Red/Green Iridescent	40.00
396012	Fluorescent Green	40.00
396112	Fluorescent Pink	40.00
396212	Fluorescent Yellow	40.00
396312	Prism Silver	40.00
396412	Blue/Green Iridescent	40.00
396512	Sky Blue	40.00
396612	Linear Gold	40.00
396712	Linear Red	40.00
396812	Linear Silver	40.00
396912	Red Dot Pattern	40.00
397012	Red Lenticular	40.00

## Diffractions

Six exciting silver metalized plastic films for extraordinary scenic effects. All the materials are self-extinguishing and are silver in color. Roll size: 24" x 15'

No.	Product	Price/Roll
295622	Exotic Circles	\$40.00
295722	Exotic Hex	40.00
295822	Star	40.00
296022	1/4" Mosaic	40.00
296122	Checkerboard	40.00
296222	Horizontal Stripes	40.00

## Transparents

Transparents are clear, self-extinguishing plastic rolls. They may be painted or slit for fire or other stage effects or used in stage windows or panels. All rolls: 54" x 30'.

393302	Thin Transparent	\$15.00
393502	Heavy Transparent	44.00
393602	Heavy Pearltext	85.00

## Metalix

Durable, metalized plastic scenic materials in a variety of colors and surfaces. The four most popular colors are available in a handy wide width: 54" x 30'.

390202	Silver Pebble	\$60.00
397102	Soft Silver	74.00
397202	Gold Pebble	60.00
397302	Silver Scrim	80.00

## Smooths

The smooth colors are paper-backed. Roll size: 24" x 30'.

397422	Bright Orange	\$28.00
397522	Gun Metal Gray	28.00
397622	Cherry Red	28.00
397722	Penny Copper	28.00
397822	Sky Blue	28.00
397922	Polished Brass	28.00
398022	Royal Blue	28.00
398122	Silver	28.00
398222	Emerald Green	28.00
398322	Pink Fizz	28.00
398522	Light Gold	28.00
398622	Smooth Iridescent	80.00
398722	Fluorescent Pink	28.00
398822	Fluorescent Green	28.00

# DESIGNER PRODUCTS

## Floortapes

No.	Product	Price
501410	Black Vinyl Tape 2" x 36 yds.	\$10.50
501510	White Vinyl Tape 2" x 36 yds.	10.50
501610	Gray Vinyl Tape 2" x 36 yds.	10.50
874010	Roscofloor Double Stick Tape 2" x 32 yds.	10.50
100120	Gray Polycloth Tape 2" x 32 yds.	6.50
100140	Gray Polycloth Tape 4" x 32 yds.	13.00
100220	Black Polycloth Tape 2" x 32 yds.	6.50
100240	Black Polycloth Tape 4" x 32 yds.	13.00

## Roscotiles

Roscotiles are 3' x 3' squares of 100% vinyl, designed specifically for use in television studios, or other applications where flooring needs to be smooth, even and durable. Roscotiles will withstand a static load of 125 lbs. per square inch. They will not break or crack under normal use, but if a sharp object is dropped and gouges a tile, only that tile needs to be replaced, rather than an entire floor or section. These 1/8" thick tiles will lie flat on a studio floor, though some professionals prefer to use a Rosco floor tape for extra security on the tile corners and edges.

No.	Color	Price/Tile
841510	White	\$30.00
842210	Black	30.00
843510	TV Gray	30.00

## Roscofloors

Roscofloor is a durable, non-skid surface in a matte non-reflective vinyl. All Roscofloors are two-sided. They may be used on either surface and can easily be rolled up and used again and again. Roscofloor will not crack, separate or fracture. Despite the floor's strength and durability, Roscofloor weighs less than 3 lbs. per linear foot.

875014	Black/Gray 63" x linear ft.	\$ 8.50
875114	Brown/Gray 63" x linear ft.	8.50
875314	Black/White 63" x linear foot	8.50
872019	Black/Gray 63" x 131.25' roll	roll/918.75
872119	Brown/Gray 63" x 131.25' roll	roll/918.75
872319	Black/White 63" x 131.25' roll	roll/918.75
875510	Dance Floor Bag 14" x 6'	125.00
871010	Performance Floor Cleanser—5 lb. bag. Granulated chemical developed to clean vinyl dance floor surfaces.	\$12.75

## Display Fabrics

72"	Felt, flame retardant (assorted colors)
41"	Exhibition taffeta, flame retardant, (12 colors)
48"	Banjo cloth, flame retardant, (14 colors)
60"	Ripstop nylon, flame retardant, (8 colors)
54"	Show plastic, flame retardant, (11 colors)
54"	Patent vinyl, (assorted colors)

## Specialty Fabrics

*38"	Chincha standard (100 yd. bolts)
*48"	Chincha standard (100 yd. bolts)
50"	Monks cloth, natural
44"	Osnaburg, natural
72"	Nylon netting, (assorted colors) (40 yd. bolt only)
54"	Nylon tulle, (assorted colors) (40 yd. bolt only)
*45"	Tropical net, flame retardant, white
45"	Silk, inherently flame resistant, (assorted colors)
45"	Chiffon, (assorted colors) (50 yd. bolt only)

## Bullion Drapery Fringe

4"	White or gold
6"	White or gold

## Velour

50-55 yds. per roll. Less than full roll subject to 10% surcharge.

54"	Flame retardant, 21 oz. weight (23 colors available)
54"	Flame retardant, 25 oz. weight (23 colors available)
54"	Flame retardant, 16 oz. weight (8 colors available)

## Drapery Fabrics

*54"	Duvelyn, flame retardant, black
*54"	Commando cloth (extra heavy duvelyn), flame retardant, black
*54"	Commando cloth, flame retardant, gray, cranberry, blueberry, beige, white
54"	Nassau, Chevron Repp, flame retardant, black, gray, beige, dark blue
48"	Atlas oxford, flame retardant, black, gray or beige
54"	Lining denim, flame retardant, black or beige
48"	Vegas, extra heavy weight, inherently flame resistant
48"	Duval, extra heavy weight, inherently flame resistant opaque vinyl bonded

## Metallics

25 yd. minimum per color	
40"	Laminette (assorted colors)
40"	Tissue lame (assorted colors)
40"	Spongy lame (assorted colors)
40"	Eyelash (assorted colors)
48"	Glamé—10 yard roll only

## Muslin

40 to 60 yard bolts	
*45"	Light weight muslin—for costumes, lining, patterns
*40"	Medium weight muslin
*72"	Bleached white medium weight muslin
*76"	Medium weight muslin
*81"	Medium weight muslin
*77"	Medium/heavy weight muslin
*93"	Medium/heavy weight muslin
*54"	Heavy weight muslin
*63"	Heavy weight muslin
*72"	Heavy weight muslin
*81"	Heavy weight muslin
*90"	Heavy weight muslin
*108"	Heavy weight muslin

## Flame Retardant Scenery Muslin

50 to 60 yard rolls

Approx. Width

*72/73"	Flame retardant medium weight muslin
*79/80"	Flame retardant medium weight muslin
*68/69"	Flame retardant heavy weight muslin
*77/78"	Flame retardant heavy weight muslin
*104/106"	Flame retardant heavy weight muslin
*102/104"	Flame retardant sky blue muslin
*102/104"	Flame retardant dark blue muslin
*102/104"	Flame retardant light gray muslin
*102/104"	Flame retardant dark gray muslin
*102/104"	Flame retardant bleached white muslin

## Extra Wide Seamless

### Translucent Muslin

14'	Flame retardant muslin
14'	Flame retardant blue or gray muslin
19'	Flame retardant muslin
19'	Flame retardant blue or gray muslin
33'	Flame retardant muslin
33'	Flame retardant blue or gray muslin

## Scrims

Approx. width

*36"	Cotton scrim—100 yd. bolts
*58"	Cotton scrim—100 yd. bolts
30'	Sharkstooth scrim, flame retardant, white
30'	Sharkstooth scrim, flame retardant, black

# THEATRICAL FABRICS

# PRODUCTION SWITCHERS

## RVS210A/RVS216A Video Production Switchers

### Features Common to Both Models:

- Three bus Multi-Level Effects (MLE) system permits manipulation of foregrounds, backgrounds and titles without ever locking up the switcher and the Transition Preview system enables you to see every effect or wipe before you take it, even with the switcher on the air
- Program/Presets permit simple flip/flop operation using the cut button. Transition controls include cut button, wipe or dissolve using fader handle or auto transition
- Three completely independent auto transition units, programmable from 1 to 999 frames
- Key bus permits source selection for chroma keys, video keys and matte keys
- MLE keyer features video or matte fill, internal, external or split-screen key, optional RGB chroma key, key invert, key mask using pattern generator
- Three independent matte generators for wipe borders, title matte and background
- Key input from key bus, an external source or a character generator; key fill from internal video, character generator or the independent DSK matte generator
- Key invert and key mask using pattern generator
- Downstream keyer transition can be tied to the effects system
- In normal operation, the MLE keyer and Downstream keyer "remember" key and softness levels, fill source, borders etc. for each source
- Independent frame rate auto transition for fade-to-black with preview system that shows next program output after fade-to-black is completed
- Linear keying for compatibility with anti-aliasing character generators
- Standard general purpose interface to each of the three auto transitions or a fourth line which permits selection of any one of the three
- Video Input: 1V p-p, composite, bridging
- Pulse Input: 1-8V p-p, 75 ohms, bridging; 1 sync, 1 blanking, 1 burst flag (PAL only)
- Video Outputs: 1V p-p, 75 ohms, 2 program, 2 preview, 1 black
- Frequency response:  $\pm 0.1$ dB to 5.5MHz; +0.1 to -1.0dB to 8MHz

## RVS210A Video Production Switcher

- Twelve wipe patterns with modifiers: hard or soft edges, hard or soft bordered edges, pattern aspect ratio, pattern reverse, rate-controlled pattern positioner
- Independent control of both wipe and split screen border widths and soft edge
- Cut or dissolve titles in or out manually or with independent frame rate auto transition
- Learn Key feature permits computerized editor to initiate wipe or dissolve to multiple keys
- Control panel measures 14.5" x 17.6" x 7" deep. Can be mounted on desk or in rack space using optional adaptors. Rackmounting requires 8 rack units. Rack frame requires 3 rack units 5 1/4" and is 18.25" deep
- Differential phase:  $\leq 0.7^\circ$  (10-90% APL)
- Differential gain:  $\leq 0.7\%$  (10-90% APL)

**210A-10** Video Production Switcher (10 inputs) including your choice of: 2 meter control cable (210A-302) or 10 meter control cable (210A-310). . . . . \$10,950.00

### Options

**210A-115** RGB chroma keyer . . . . . \$ 800.00  
**210A-135** Pulse regenerator . . . . . 1,000.00  
**210A-140** Enhanced digital key border generator . . . . . 1,500.00  
**210A-141** Analog key border generator . . . . . 2,500.00  
**210A-230** Twelve event memory system . . . . . 1,200.00  
**210A-231** Serial interface adaptor . . . . . 1,200.00

### 210A-136 Feature Package Number 1 Includes:

- **Function Button**—This feature brings a wide range of operational modes, additional production facilities and aids to easier operation
- 210A-136** . . . . . 1,200.00

RVS-216A

### 210A-137 Feature Package Number 2 Includes:

- 12 additional wipes
  - Two extra DSK border shadow modes
- 210A-137** . . . . . \$900.00  
**210A-250** Spares kit . . . . . 450.00  
**210A-330** Control cable, 30 meters. . . . . 175.00  
**210A-400** Rackmount adaptor for control panel . . . . . 100.00  
**210A-410** In-desk mounting adaptor for control panel . . . . . 150.00

**Note:** Feature package 2 may only be purchased in conjunction with feature package 1, building upon the items offered by package 1.

## RVS216A Video Production Switcher

- 24 wipe patterns with modifiers: hard or soft edges, hard or soft bordered edges, pattern aspect ratio, pattern reverse, rate-controlled pattern positioner. One of the patterns is user programmable
- Wipe limit determines maximum size of wipe pattern at full limit of fader movement
- Non-sync inhibit detects non-synchronous sources and inhibits keys, wipes or dissolves and substitutes a cut at the end of the transition. Non-sync LEDs indicate the presence of a non-synchronous source
- Pulse processor provides consistent color framing of synchronous signals by means of sync and burst reinsertion
- Cut, dissolve, or wipe titles in or out manually or with independent frame rate auto transition
- Linear keyer
- Function button allows the user to select many alternate modes of switcher operation, useful operator aids and diagnostic routines
- Control panel measures 14.5" x 22.25" x 7.5" deep
- Rack frame requires 3 rack units (5.25") and is 18.25" deep
- Differential phase:  $\leq 0.5^\circ$  (10-90% APL)
- Differential gain:  $\leq 0.5\%$  (10-90% APL)

**216A-16** Video production switcher (16 inputs) including your choice of: 2 meter control cable (216A-302) or 10 meter control cable (216A-310). . . . . \$15,450.00

### Options

**216A-115** RGB chroma keyer . . . . . \$ 800.00  
**216A-110** Encoded and RGB chroma keyer . . . . . 3,100.00  
**216A-140** Enhanced digital key border generator . . . . . 1,500.00  
**216A-141** Analog key border generator . . . . . 2,500.00  
**216A-135** Pulse regenerator . . . . . 1,000.00  
**216A-230** 12 event memory system . . . . . 1,200.00  
**216A-231** Serial interface adaptor . . . . . 1,200.00  
**216A-250** Spares kit . . . . . 450.00  
**216A-330** Control cable, 30 meters. . . . . 175.00  
**216A-410** In-desk mounting adaptor for control panel . . . . . 225.00

**Note:** Switcher price includes one each of operation and installation manual

# PRODUCTION SWITCHERS

## RVS-504/505 Series Video Production Switchers

• Clean panel layout only 46" long • Most simple transitions are made between Background bus (B) and Background Preset bus (B PST) • B bus is always the On-Air Bus • When B PST source is transferred to the On-Air B Bus at the end of a transition, the B source is automatically transferred to the B PST bus • Foreground source is selected on the F bus and the processing mode is selected in the Foreground group of MLE controls • Mode selections include RGB and Encoded Chroma Keys, Non-Additive Mix, Split Screen, Spotlight, PST Key and Matte Key • Each MLE Title Keyer is a complete Downstream Keyer with 4 input sources. Three inputs can be wired from primary crosspoints...and tally is supplied • The Transition Control Group...Dissolve, Wipe and Take buttons are located adjacent to the Fader • HOLD buttons, conveniently located in the control group for each MLE level, allow directing a transition to any or all levels • Available with 16, 20 and 24 inputs, and in NTSC, PAL and PAL-M standards

504A-16	Video Production Switcher (16 inputs) . . . . .	\$36,850.00
504A-20	Video Production Switcher (20 inputs) . . . . .	\$38,505.00
	Extra control cable for basic switcher. . . . .per ft./	8.40
505A-16	Video Production Switcher (16 inputs). . . . .	\$40,719.00
505A-20	Video Production Switcher (20 inputs) . . . . .	\$42,790.00
505A-24	Video Production Switcher (24 inputs) . . . . .	\$45,054.00
	Extra control cable for basic switcher. . . . .per ft./	8.40

## Options

### Encore Memory System

504-220	Encore (freestanding) . . . . .	\$7,857.00
504-220A	Encore with extension tub to match switcher tub. . . . .	8,634.00
504-220B	Encore with cassette storage . . . . .	8,683.00
504-220C	Encore with cassette and extension tub . . . . .	9,550.00
504-224	Extra control cable for Encore . . . . .per ft./	1.40
505-220	Encore (free standing) . . . . .	7,857.00
505-220A	Encore with extension tub to match switcher tub. . . . .	8,634.00
505-220B	Encore with cassette storage . . . . .	8,683.00
505-220C	Encore with cassette and extension tub . . . . .	9,550.00
505-224	Extra control cable for Encore . . . . .per ft./	1.40

### Quad Split

• Quad Split does not tie up any switcher bus, and virtually gives you 4 extra buses free • Each quadrant has access to any 9 predetermined primary inputs • Includes diagonal, offset and conventional quad patterns • Has its own border color generator • Lets you preset the next source for each quadrant...then do a vertical internal take of the entire scene

505-160	Quad Split Screen . . . . .	\$3,596.00
---------	-----------------------------	------------

## RVS 514 Series Video Production Switchers

• Designed for any small studio, edit suite or van • Operational convenience of the PGM PST style of switcher offers added power to a fully integrated MLE system • Complex multilevel effects are immediately accessible via wipe, dissolve or cut transitions • See the next event on the preview monitor as you compose it • Logical controls allow any effect to be achieved easily • Patented Transition Preview System • Most simple transitions are made between the PGM bus and the PST bus • PGM bus is always the On-Air bus • When the PST source is transferred to the On-Air bus at the end of a transition, the PGM source is automatically transferred to the PST bus • Foreground source is selected on the F bus and the processing mode is selected in the Foreground group of MLE controls. Mode selections include RGB and Encoded Chroma Keys, Non-Additive Mix, Split Screen, Spotlight, PST Key and Matte Key • Complete Downstream Keyer with a 4-input source selector...the 5<sup>th</sup> bus of the switcher • The Transition Control Group...Dissolve, Wipe and Take buttons are located adjacent to the Fader • Conveniently located HOLD buttons allow directing a transition to any or all levels • One rack frame only 7" (4 RU's) also contains all optional accessories and 2 aux buses • Additional frame is required to accommodate 6 more aux buses • Switcher panel width is 28" (12

RVS-514

inputs or 34" (20 inputs) and 18" deep • Available with 12 or 20 inputs, and in NTSC, PAL and PAL-M standards

514A-12	Video production switcher (12 inputs) . . . . .	\$29,652.00
514A-20	Video production switcher (20 inputs) . . . . .	\$31,801.00
	Extra control cable for basic switcher (per ft.) . . . . .	8.40

## RVS 524 Series Switchers

• Designed for any small studio, editing suite or mobile van • Manipulate up to four video signals with just one fader handle • Permits changing the background picture either separately or in combination with the foreground and title sources...or dissolving or wiping behind a chroma key...all without locking up the switcher • Most simple transitions are made between the PGM bus and the PST bus, using the familiar flip/flop mode of operation • PGM bus is always the on-air bus. When the PST source is transferred to the on-air bus at the end of a transition, the former PGM source is automatically transferred to the PST bus.

• The foreground source is selected on the F bus and the processing mode is selected in the foreground group of MLE controls. Mode selections include RGB and encoded chroma key, split screen, PST key and matte key • MLE title keyer is a complete Downstream Keyer with a 4 input source selector...the 5<sup>th</sup> bus of the switcher • A variety of patterns and effects can be created with the 18 basic patterns (Inner Pattern Group), Pattern Modulation, Horizontal and Vertical Multipliers, Joystick positioner and optional Rotary and Spin wipes • Each pattern, chosen with the rotary selector, can have colored and soft edge borders • Push-pull switch on the aspect ratio control knob is used to round corners on the box wipe patterns • Horizontal and vertical multipliers multiply the pattern a number of times horizontally or vertically or both • Joystick can change the number of multiple patterns appearing on the screen, as well as positioning a pattern • Colored and soft edge borders are standard • One rack frame only 7" high (4 RU's) houses all electronics and optional equipment, plus two aux buses. An additional frame is required to accommodate six more aux buses • Switcher panel width is 22" (12 inputs) or 28" (20 inputs) and 16.65" deep

## Options

### Rotary/Spin Wipe

• Nine standard rotary wipe patterns are available with colorized and soft borders • Spin: A full excursion of the fader handle spins some patterns 360° and simultaneously reduces their size until they vanish • Spin Preset: The angular position of a pattern can be set manually

524B-12	Video production switcher, 12 inputs . . . . .	\$23,756.00
524B-20	Video production switcher, 20 inputs . . . . .	\$25,690.00
	Extra control cable for basic switcher. . . . .per ft./	8.40

# PRODUCTION SWITCHERS

## RVS-508 Video Projection Switcher

- 20 or 24 inputs, as selected, includes Color Black and Color Background • 2 Multi-Level Effects (MLE) Systems, each with 3 buses (foreground, background and background preset), foreground keyer, title keyer, 31 pattern wipe generator, and patented transition preview system • Foreground keyer has 9 inputs, including self key, matte key, non-additive mix, external, split screen, spotlight, and preset/key bus, plus optional RGB/ultra key and encoded chroma keyers • Title keyer has 4 input source selector, including preset/key bus for self key, color outline/matte fill generator, and analog border generator. Borders may be white or black • Wipe pattern positioner can preset wipe location and modulate vertical edges with adjustable frequency and amplitude. Modulation can be used in the locked or free-run mode • Wipe aspect ratio is adjustable and box or corner wipes may have their corners rounded. Wipe patterns may be multiplied horizontally, vertically, or both • Program and preset buses • Master fade-to-black handle • Color generator for color background pushbuttons, MLE-1 Wipe/Border, and MLE-1 Matte Fill • Non-synchronous input inhibit automatically performs cut at end of fader travel when dissolves or wipes between non-sync inputs would cause unwanted picture disturbances • Choice of colored or white bus pushbuttons • Wipe limits are adjustable • Masking available on foreground keyer • 2 heavy-duty power supplies • 25' interconnect cables between control panel and electronics mainframe • Oak panels on ends and top • Extender board • Special tool kit • Spare parts kit • Technical manual

508B-20 Video production switcher (20 inputs) . . \$69,857.00  
 508B-24 Video production switcher (24 inputs) . . .73,465.00  
 Extra control cable for basic switcher (per ft.) . . 14.00

## RVS 517 Series Switchers

- 12 or 20 inputs • Designed for any post-production, van or studio installation • Wide range of optional equipment enables the 517 to meet most production requirements • Operational convenience of the PGM/PST style of switcher offers the added power of two fully integrated MLE systems • Logical controls allow any effect to be achieved easily with a minimum of confusion. For example: preset a title by the push of only a single button, then move the fader handle to put it on-air • Complicated transitions that include up to four sources can be seen on the preview monitor and adjusted without disturbing the on-air output of the effects system • After previewing a wipe or dissolve, switching off TRANS P/V automatically returns the monitor to the next scene preview mode, regardless of which limit the fader is at • Most simple transitions are made between the PGM bus and the PST bus. At the end of a transition, the PST source selection is transferred to the PGM bus and the PGM source is automatically transferred to the PST bus • MLE title keyer is a complete downstream keyer with a four-input source selector • The Transition Control Group—dissolve, wipe and take buttons are located adjacent to the fader handle • Conveniently located HOLD buttons permit directing a transition to any or all levels • The Preview (or next scene) monitor always shows what change will take place in the next transition • Adjusting key levels, effects, borders or colors is simplified and there are no surprises because the next

RVS508

scene is always in sight on the preview monitor • A wide variety of patterns and effects can be created with the 30 basic patterns, pattern modulation, horizontal and vertical multipliers, joystick positioner and optional rotary/spin wipes and matrix wipes • Equipped with two pattern generators which are independently controlled by an assignable pushbutton pattern selector • Selector has 30 pattern keys, an assign key and a shift key. The most commonly used patterns may be selected directly • When the SHIFT key is turned on, 30 different patterns may be selected, thereby providing a total of 60 patterns from the selector panel • 17 1/2" of rack space required for the 517 electronics package, including all options. Control panel 34" -38" wide and 26" high, depending on number of inputs

517A-12 Video production switcher (12 inputs) . . \$51,744.00  
 517A-20 Video production switcher (20 inputs) . . \$55,524.00  
 Extra control cable for basic switcher (per ft.) . . . . . 12.72

## Option

### Ultra Key

- Keying with any color • Superior hue discrimination • Production flexibility • Ease of operation • Continuous remote control of hue adjustment—you can key with any color • Completely integrated into the MLE system, meaning that you use it like an ordinary chroma key unit without the limitations and restrictions imposed by add-on units • Change foreground or background sources separately or in combination with each other or with titles • Permits the use of two or more chroma key cameras with selection right on the switcher control panel, including automatic key follow of the foreground bus video selection • Optional multi-camera selector is available • No distortion of colors in the keyed scene. That means you can make transitions to and from chroma key situations without the distracting hue shifts on the keyed-in subject • Separate "traveling matte" output may be recorded for subsequent post-production to eliminate problems of encoded keying • Two remote controlled adjustments—hue selection and null control. With the use of the null control, you can eliminate blue edging or blue tint

Ultra Key . . . . . \$3,780.00

# VIDEO PROJECTION MONITORS

## CINEMABEAM RGB AND CINEMABEAM A/V

### Features Common to Both Models:

- **Long Life**—7" projection tubes insure very high continuing brightness over thousands of hours of use. Proven solid-state circuits insure long term reliable performance
- **Wide Range of Picture Sizes**—Individual angle adjustments on the lens/tube assemblies allow any picture size from 5'W to either 20'W or 25'W. Electronic size controls allow variable screen to projector throw distances
- **Very Quick Setup**—Expanded convergence with simplified controls allow setup to different picture sizes in minutes. Separate corner convergence controls make final touch up a snap. Light weight and compact size allow easy positioning
- **Exceptionally Sharp Picture**—Built-in comb filter and either 5MHz or 10MHz video bandwidth, combine to insure that all of your signal is clearly reproduced on the screen. High resolution lenses insure extra sharpness

Cinemabeam RGB

### Cinemabeam RGB

Compact ceiling or table mount RGB/video projector. Picture sizes from 5'W to 20'W. Supplied with remote control unit and mounting hardware.

#### Specifications

**Picture Size:** 5'W to 20'W  
**Power Consumption:** 147W (max.)  
**Power Requirements:** 115V-60Hz  
**Projection Tubes:** 7" Matsushita high brightness CRT  
**Projection Lenses:** f/1.0 U.S. Precision Delta II D (Hi-Resolution)  
**Standards:** NTSC (3.58), RGB  
**Resolution (RGB):** 800 lines  
**Video Bandwidth (RGB):** 10MHz  
**Video Bandwidth (composite video):** 5MHz minimum  
**Resolution (composite video):** 400 lines  
**Video Input:** NTSC 1.0V p-p composite 75 ohm  
**Video Connectors:** BNC  
**RGB Input:** Automatic TTL or analog  
**RGB Connectors:** BNC  
**Sync:** Switchable: "On Green" or external

**Sync Connector:** BNC  
**Scan Rate NTSC and RGB:** 15.75kHz  
**Brightness:** Approx. 350 lumens  
**Dimensions:** 11"H x 25"W x 20"D  
**Weight:** 67 lbs. (w/o remote)  
**Shipping Weight:** 99 lbs.  
**Remote Dimensions:** 9" x 7" x 3 1/2" x 2"  
**Remote Functions:** 13 (Centering convergence and all Std. TV)  
**Remote Cable Length:** 15' (25-pin connector)  
**High Voltage (anode):** 29.5 ± 1.5kV  
**Remote Unit Weight:** 3 lbs.  
**Cinemabeam RGB . . . . . \$5695.00**

Cinemabeam A/V

### Cinemabeam A/V

Compact ceiling or table mount video projector. Picture sizes from 5'W to 25'W. Supplied with remote control unit and mounting hardware.

#### Specifications

**Picture Size:** 5'W to 25'W  
**Power Consumption:** 147W (max.)  
**Power Requirements:** 115V-60Hz  
**Projection Tubes:** 7" Matsushita high brightness CRT's  
**Projection Lenses:** f/1.0 U.S. Precision Delta II M (Delta II D optional)  
**Standard:** NTSC (3.58)  
**Video Bandwidth (composite video):** 5MHz minimum  
**Resolution (composite video):** 400 lines  
**Video Input:** NTSC 1.0V p-p composite 75 ohms  
**High Voltage (anode):** 29.5 ± 1.5kV  
**Video Connector:** BNC  
**Scan Rate:** 15.75kHz  
**Brightness:** Approx. 350 lumens  
**Dimensions:** 11"H x 25"W x 20"D  
**Weight:** 67 lbs. (w/o remote)  
**Shipping Weight:** 99 lbs.  
**Remote Dimensions:** 9" x 7" x 3 1/2" x 2"  
**Remote Functions:** 14 (Centering convergence and all Std. TV)  
**Remote Cable Length:** 15' (25-pin connector)  
**Optional Remote Extensions:** 25', 50', 75', 100'  
**Remote Unit Weight:** 3 lbs.  
**Cinemabeam A/V . . . . . \$4995.00**

# CAMERA SUPPORT EQUIPMENT

Hot Pod

## Hot Pod

- Locked when folded
- Central lock for easy set-up
- Self-locking lever for camera levelling
- Pneumatically supported center column for increased rise and height
- Handy grip provided

## For ENG Cameras:

The Sachtler Hot Pod with the Sachtler Panorama head.

Minimal height	940mm
(up to wedge plate)	
Legs fully extended	1432mm
Max. height	1892mm

## For Recording Cameras:

The Sachtler Hot Pod with the Sachtler Video 20.

Minimal height	957mm
(up to wedge plate)	
Legs fully extended	1449mm
Max. height	1909mm

## Volume, For Transport and Storage:

Hot Pod with Panorama	
Full length	1003mm, ø195mm
Hot Pod with Video 20	
Full length	1020mm, ø240mm

Hot Pod (5185/10) with Spring 22 lbs. (10kg) for use with Panorama 7 + 7 Fluid head for ENG cameras . . . . . \$1,065.00  
Hot Pod (5185/14) with Spring 31 lbs. (14kg) for use with VIDEO 20 Fluid head for recording cameras . . . . . \$1,065.00

Semi-Dolly

Triangle

## Sachtler Semi-Dolly

- Lightweight rolling triangle
- Independent brakes for rolling and spinning action of the wheels
- Height adjustable wheel cable guards
- Easy-transport handy grip

Sachtler Semi-Dolly . . . . . \$845.00

## Sachtler Triangle

- Rubber and polyamid parts for slippery or delicate floors
- Light, robust, unbreakable
- Rubber pull loop tripod attachments
- Folds inward for transporting ease

Sachtler Triangle—Lightweight . . . . . \$265.00  
Sachtler Triangle—Heavy-Duty . . . . . \$375.00

(516) 867-4900

# CAMERA SUPPORT EQUIPMENT

## Pedestal 14

- Pneumatically supported center column tripod
- Allows the camera movement to acquire a third dimension
- Air pressure in the inside of the center column can be exactly adjusted to the camera weight. The camera is thus floating on an air cushion
- Center column can be locked in any position. For safe transportation, even while the center column is under pressure, a safety catch is engaged
- Center column is running on ball bearings
- Using the extendable tripod the stroke range of the center column can be adapted to the shooting requirements
- Height range: Spreader 29.1" - 53.5", Dolly 34.1" - 58.7"
- Center column range: 15.7"
- Maximum load: up to 44 lbs.

4190 Pedestal 14 . . . . . \$1,085.00

## Video 14 II Fluid Head

- 3 step dial-in drag adjustment
- Damping can be set for 3 different drag levels but the drag can also be disengaged. A selected setting can be re-engaged at any time
- Temperature span from -40° to +60°C
- Free-wheeling for pan and tilt
- Sliding, quick-release wedge plate (1/4" and 3/8" screws) for center of gravity compensation
- Touch and go system quickly fastens the camera to the supporting mount
- 2 adjustable pan arms
- In order to counterbalance (while tilting the camera) two adjustable pull-back springs are used
- Built-in counter balance spring tilt ± 60°
- Tripod interface flat base for video 14 pedestal/75mm bowl tripod
- Vertically and horizontally working brakes which when applied do not transmit vibrations to the camera
- For horizontal levelling a precise circular waterlevel is built-in
- Maximum load: approx. 33 lbs.

1400 Video 14 II Fluid Head . . . . . \$1,175.00

## Dolly 14 Rolling Triangle

- For pedestal and 75mm bowl tripod
- Heavy-duty 3.15" diameter casters
- Built-in handle
- 9.7 lbs.
- Dimensions for transporting: 75" H X 7.9" W x 24.2" L
- Maximum load: 88 lbs.

7053 Dolly 14 . . . . . \$240.00

## Tripods 14

- Work with a height of 15cm off the ground up to a height of approx. 1.50 meters
- 75mm bowl leveling
- Black anodized aluminum construction
- Maximum load: 33 lbs.

### Tripod 14 Medium

- Height range: Spreader 14: 5.9" - 31.1"; Dolly 14: 16.1" - 33.5"

### Tripod 14 Long

- Height range: Spreader 14: 24.8" - 54.3"; Dolly 14: 32.8" - 59.4"

4151 Medium . . . . . \$260.00

4182 Long . . . . . \$280.00

## Spreader 14

- For 75mm bowl tripod
- Works on slippery or delicate floors
- Light, robust and unbreakable
- For transportation purposes the spreader is simply folded up and remains attached to the tripod
- Maximum load: 88 lbs.

7001 Spreader 14 . . . . . \$99.00

# FLUID HEADS

## Video 20 II/Video 25 II/Video 30 II Fluid Heads

- Sliding camera platform  $\pm 50$ mm
- Drag individually adjustable in 7 steps for pan and tilt
- Touch and go quick-release system
- Counterbalancing momentum
- Temp. range:  $-40^{\circ}$  to  $+60^{\circ}$ C
- $\pm 60^{\circ}$  tilt range
- $360^{\circ}$  pan
- 18mm, extension 22mm pan arm  $\phi$
- Small touch and go wedge-plate-camera interface (Video 30 heavy-duty interface)
- Black enamel finish

Video 20  
Series II

## ENG/EFP Video 20 II Fluid Head

- Powerful counterbalancing spring
- Positive operational pan and tilt lock
- Safety lock
- 100mm bowl, Pro-Junior intermediate tripod interface
- 15kg capacity
- 5.5kg

A medium sized ENG/EFP fluid head for the ultimate in mobility. Lightweight but stable enough to accept ENG camera with EFP accessories.

- Video 16 II 1 step on/off drag control for pan + tilt . . . . \$1,995.00
- Video 17 II 3 step on/off drag control for pan + tilt . . . . \$2,550.00
- Video 18 II 7 step on/off drag control for pan + tilt . . . . \$2,975.00
- Video 20 II 7 step on/off drag control for pan + tilt . . . . \$3,950.00

Video 25  
Series II

## ENG/EFP Video 25 II Fluid Head

- Balancing momentum adjustable in 4 steps
- Positive operational pan and tilt lock
- Optional adjustable lens-support
- Safety lock
- 150mm bowl, Mitchell intermediate tripod interface
- 25kg capacity
- 6.5kg

A medium sized ENG/EFP fluid head optimized for on location shooting combining the stability and pan and tilt comfort previously offered only by significantly larger and heavier camera supporting systems.

- Video 25 II . . . . . \$4,875.00

Video 30  
Series II

## EFP Video 30 II Fluid Head

- Heavy-duty 7 position dynamic counterbalancing system
- Optional adjustable lens-support
- 2 EFP pan arms
- 150mm bowl, Mitchell intermediate-tripod interface
- 40kg capacity
- 9kg

For studio and field production using small studio or O.B. cameras.

- Video 30 II . . . . . \$6,150.00

## ENG Panorama 7 + 7 Fluid Head

- Touch and go quick-release system
- One adjustable pan arm
- 7 adjustable positions for pan and tilt
- $\pm 90^{\circ}$  tilt range
- 100mm bowl Pro-Junior intermediate tripod interface
- 14mm pan arm  $\phi$
- Touch and go system camera interface
- Black enamel finish
- 10kg capacity
- 2.8kg

A small, lightweight fluid head for real news gathering, with an integrated counterbalance spring adequate for today's ENG cameras.

- Panorama 7 + 7 . . . . . \$2,590.00
- Panorama 1 + 1 1 step on/off drag control for pan + tilt . . . \$1,545.00
- Panorama 3 + 3 3 step on/off drag control for pan + tilt . . . \$2,150.00
- Panorama to come with flat base in exchange for 100mm ball  
. . . . . add 100.00

Panorama 7 + 7

# CAMERA SUPPORT EQUIPMENT

## Video 80 Fluid Head

- OB/Studio applications
- Leakproof, zero-friction fluid head
- Fluid damping modules control very precisely camera/lens combinations weighing up to approx. 80kg
- Damping modules guarantee grades of drag which can be reproduced exactly at all temperatures at which cameras can still be operated
- Seven settings of drag for the horizontal and vertical position
- Locks for the horizontal and vertical direction are working independent of the damping and counterbalancing system. They bring the camera to a stop, wherever desired, without transmitting vibrations
- Maximum load: approx; 198 lbs.
- Drag can be completely turned off, if one has to make sudden movements with the camera
- Grades of drag: horizontally and vertically 7 each and 0
- V-shaped wedge plate is used to mount the camera to the sliding balance plate
- Tilt angle:  $\pm 60^\circ$

Video 80

## OB 2 Tripod/OB Dolly

- Developed especially for outside broadcasting
- Can be extended twice
- Crank operated elevation unit
- OB Dolly can have pneumatic tires of 8" diameter. As a special feature Sachtler offers an extender for the OB dolly. This extender, on the one side increases the size of the supporting base and on the other side it takes the weight off the wheels

8080 Video 80 . . . . . \$7,935.00  
Tripod OB 2 (optional: with elevation unit) . . . . . POR  
OB Dolly (optional: with base extender, pneumatic tires) . . . . . POR

## Combi Pedestal

- Studio and field operation
- Compact, modular set-up
- Long-time wheel alignment of casters based on overload protection at each wheel case and after half a cycle of the steering wheel, all casters are aligned again
- Double-wheeled casters with plained treads
- Center column is supported with a low pressure pneumatic spring. A hand pump which is attached to the pedestal can be used to make readjustments while on location
- Primary filling is made with a manual compressor
- Brake for the center column
- Make use of the pedestal's "on air" height adjustments without attaching the dolly
- On slippery or delicate surfaces clip-on rubber feet for the pedestal are taking effect
- Three-legged support construction
- Safety catch prevents the center column from raising. Transport-clips at the center column prevent the tripod from unfolding while being carried
- Precisely steerable dolly can be changed from a one-wheel to a 3-wheel steering mode (crab and steer)
- Big steering wheel and telescopic transmission
- Cable guards (height is adjustable)
- Overload protection within each wheel guard ensures that the casters continue to run parallel
- Transport and operation lock for the dolly arms
- Folding design for pedestal and dolly to ease transport, no tools required; built-in handles
- Twin wheels with a 4" diameter. Option: 6"
- Maximum load: 55kg
- Weight: 21kg

Combi Pedestal

# CAMERA LENSES

## Gyrozoom 60/300™ Image Stabilizer Lens

- Automatic iris with momentary manual mode
- Lens attachment and power connector same as standard lenses
- Variable speed zoom control
- Power drain is 4 additional minutes per hour as referenced to a standard lens
- Low battery indicator light flashes at 10.6V (12V nominal)
- Computer designed optics insure ultra high resolution and contrast
- Anti-reflective multilayer coatings on all air-to-glass surfaces enhance light transmission

The Gyrozoom 60/300 Image Stabilizer Lens fits most 2/3" ENG cameras and eliminates virtually all image vibration. Smooth footage is obtained when shooting from any moving vehicle—helicopter, truck, boat, motorcycle—even on foot—whether the camera is handheld or on a tripod. The image is stabilized optically—not with braces or brackets.

Zoom from 60mm to 300mm. This lens enables you to shoot close-up from 1000' with a perfectly steady image.

The Gyrozoom weighs approximately 6 lbs. Power drain is only 4 additional minutes per hour.

### Specifications

<b>Stabilization:</b>	Designed to eliminate high frequency vibration
<b>Iris Aperture:</b>	6.2 to 32 (at all focal lengths)
<b>Focus Range:</b>	3.048m to infinity
<b>Pan and Tilt Rate:</b>	6° per second
<b>Image Format:</b>	2/3" camera (compatible to most cameras) (11mm diagonal Ø6.6 x 8.8)
<b>Flange Focus Range:</b>	± 1.5mm
<b>Field Angle (half diagonal):</b>	1.05° at 300mm, 5.24° at 60mm
<b>Filter Size:</b>	72mm diameter
<b>Power:</b>	12V, 150mA DC
<b>Ambient Temperature:</b>	-4°F to +122°F (-20°C to +50°C)
<b>Dimensions:</b>	47/16" H x 73/4" W x 13" L
Gyrozoom 60/300 with deluxe travel and storage case	\$12,500.00

## Gyrozoom FP-1 Image Stabilizer Lens

Same features as Gyrozoom 60/300 except:

- 30° pan/tilt rate per second
- 12V, 600mA DC
- Power drain is additional minutes per hour as referenced to a standard lens
- Weighs 7 lbs. 4 oz.

Gyrozoom FP-1 with one cable and deluxe carry case	\$16,250.00
Gyrozoom FP-1 Image Stabilizer Upgrade	4,000.00
Manual Focus Module	290.00
Nova II Night Vision Device	6,800.00
C-Mount Adaptor	210.00

Gyrozoom 60/300

Gyrozoom FP-1

### Accessories

#### Wide Angle Attachment

- Reduces the focal length by 5X (12mm to 60mm) (Note: When the wide angle is attached the 12mm to 60mm focal range is not stabilized)
  - Attaches quickly to the front of the Gyrozoom lens with a threaded mount
  - f/6.2 at all focal lengths
  - Minimum operating distance is 3"
  - Computer designed optics ensure ultra high resolution and contrast
  - Anti-reflective multilayer coatings on all air-to-glass surfaces for maximum light transmission
- Wide Angle Attachment (12mm to 60mm) . . . . . \$1,495.00

#### Remote Control System\*

- Provides remote control of focus, stabilization, iris and zoom functions
  - Operator can be positioned up to 150' from camera. (When powered by 115VAC)
  - The Gyrozoom 60/300 remote system is compatible with several pan and tilt mechanisms
  - Power requirements 115VAC or 28VDC
- Remote Control System . . . . . \$2,250.00  
 \*(Requires factory retrofit)

#### Soft Travel Bag

- Padded, soft travel bag assures convenient, safe transport of your Gyrozoom lens
  - Separate compartments are provided to hold the wide angle attachment and additional lens cables
  - Lightweight yet sturdy
- Soft Travel Bag . . . . . \$98.00

## SEG-11—Special Effects Generator

- Requires one camera with built-in genlock or SciTech camera upgrade and N-2 GenClock • Stereo Hi-Fi and Audio-Follow-Video standard
- Light and portable; weighs only 1.8 lbs., measures only 8" x 4<sup>3</sup>/<sub>8</sub>" x 2"
- Power requirement: 12V, 0.35A • Professional soft-touch buttons
- Accepts all SciTech accessories, including EU-3 expansion board
- Built-in cuts and dissolves • Accepts 20 optional plug-in modules
- Rugged and reliable

SEG-11 .....\$524.00

## SEG-21—Special Effects Generator Genlock Combination

- Built-in genlock, cuts and dissolves • Requires one Magnavox VR8282BK, VR8283BK or JVC GN-X80U camera or one SciTech camera upgrade on one of your own cameras • Stereo Hi-Fi and Audio-Follow-Video standards
- Light and portable: only 1.8 lbs., measures 8" x 4<sup>3</sup>/<sub>8</sub>" x 2"
- Power requirement: 12V, 0.35A • Professional soft-touch buttons
- Accepts all SciTech accessories, including EU-3 expansion board
- Accepts 20 optional plug-in special effect modules
- Includes PS-3R power supply and one 1-HPUH horizontal wipe cartridge

SEG-21 .....\$824.00

## SEG-31—Special Effects Generator

- Requires one camera with built-in genlock or SciTech camera upgrade and N-2 GenClock on one of your cameras • Stereo Hi-Fi and Audio-Follow-Video standard
- Professional soft-touch buttons
- Accepts complete line of SciTech accessories including EU-3 expansion board
- Light and portable. Only 2.2 lbs., measures 8" x 4.6" x 2"
- Power requirements 12V, 0.35A • Preview output of special effect video
- Intercom amplifier, headset jack and volume control built-in
- Speed auto-wipe and fade to black
- Complete portable studio for two or more color cameras
- Includes built-in cuts, dissolves horizontal, vertical and corner wipes

## Portable Mobile Studio Systems

All VC-SEG mobile systems handle two color video cameras. The ADUPS AC/DC Uninterruptible Power Supply gives you the freedom of complete mobility.

The rugged aluminum folding cart allows you to operate equally at ease indoors or outdoors, on a studio or anywhere else. It folds neatly and securely with all equipment connected. Folded, it will fit in the trunk of most cars, even compacts.

# TIME BASE EQUALIZER/CORRECTOR/ EDITING CONTROLLER

## 142 TIBEC—Time Base Equalizer/Corrector

- Allows use of special effects generators with two VCRs in playback
- Replaces two conventional time base correctors for A/B roll editing
- Performs all functions of one conventional TBC
- Locks VCRs to non-interlaced computers, laser disks and other sources
- Genlockable reference timing generator with gray burst output
- Built-in slave video process amplifier. Optional for master video
- Compatible with 3/4", 1/2" VHS and Beta, M, Betacam and 8mm VCRs
- Operates with one VCR with ext. sync or ext. sync and ext. SC inputs

The 142 is the first TBC capable to correct the time base of a VCR playback video to a stable reference or to equalize it (make it equal) to the time base of another VCR. It can also change the timing of a VCR to progressive sync sources such as computers and other interlaced or not, stable or unstable video sources. Dissolves, wipes and other special effects among these sources can be easily performed with a single 142 TIBEC.

The 142 TIBEC is also a TBC and can be used as such in all applications where conventional TBC's are used: VCR Time Base Correction to house or internal sync for broadcast or cablecast, satellite transmission, jitter-free duplication, etc. The 142 TIBEC is compatible with all VCR formats, including 3/4", 1/2" VHS or Beta and 8mm.

The Slave VCR used with the 142 must have an External Sync input, as many industrial 1/2" and 3/4" VCRs are. The 142 can also drive an External Subcarrier input if the VCR has one, as many 3/4" VCRs do.

Special Effects Generators used with the 142 TIBEC operated in TBE mode must be capable to handle unstable and incoherent video signals. All SEG's built by SciTech (SEG-11, SEG-21, SEG-31, Comprehensive MS-2000, Magnavox AR9160 and others) can do so, as can some industrial SEG's from Panasonic and other manufacturers. Other SEGs may or may not operate properly under these demanding conditions, depending on its internal design. Other video equipment used downstream of the 142 used in TBE Mode such as character generators, keys, etc., must be capable to operate with the sync of the video source used as the 142 Master Input.

142 TIBEC ..... \$3995.00

142 TIBEC

## ABREC—A/B Roll Editing Controller

The combination of TIBEC and ABREC technologies allows the creation of consistent second-generation tapes, edited with special effects and repeatable at any time. With these two SciTech products, low cost video post production is an affordable reality.

The ABREC interfaces a customer supplied Personal Computer (PC) with three (3) VCRs and one (1) SciTech SEG-41C Special Effects Generator (SEG).

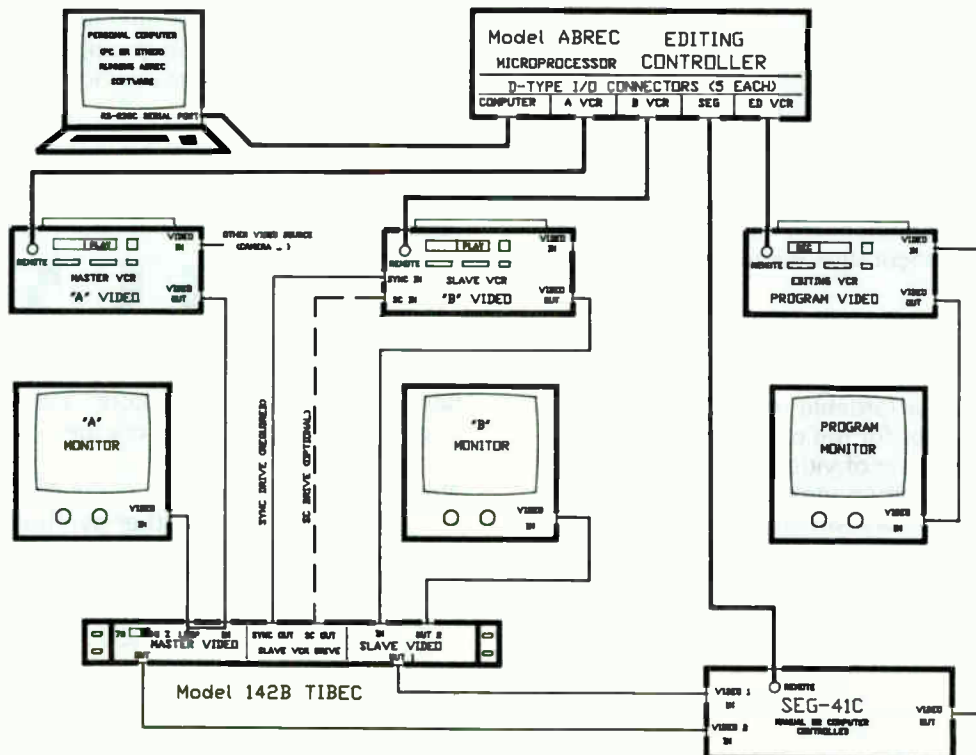

Using the ABREC software, tape logs (or list of contents of a cassette) and Edit Decision Lists (intended contents of the tape to be edited) can be prepared, modified, printed and saved in the computer. Once an Edit Decision List is complete, the video editing is controlled by the computer, connected to the three VCRs and the Computer Controlled SEG-41C through Model ABREC.

The PC used to work with ABREC can be any make/model, such as IBM PC/XT/AT, Apple II, Commodore AMIGA, 64/128, Atari, etc., as long as it is equipped with an RS-232C Serial Interface. Software for many of these popular computers will be available for ABREC. Software and connection cables for the IBM Personal Computers PC/XT/AT (and most "look-alikes") are initially offered.

At this time, ABREC-VHS-1 is supplied with hardware and software drivers compatible with Matsushita-built VCRs equipped with a 5-pin Remote Connector, including, among others, the following models:

Panasonic — NV-8420, AG-6400, PV-8110, PV-9600, PV-8600, PV-8500, PV-5850 and the AG-1950. This last model is recommended as Editor. Canon — VR-20A GE 1CVP5022, 1CVP5024, 1CVP5025, 1CVP5028, 1CVP5030. Magnavox — VR8570SL, VR8572SL, VR858BK, VR8590SL, VR8592SL. Sylvania — VC4527SL, VC4546SL. Quasar — VP5450YQ, VP5750YE.

# COLOR VIDEO TITLER

## Super Micro Script Color Video Titler

- **Genlock:** Synchronizes Super Micro Script to an external color video signal (i.e.: VCR in the playback mode, etc.)
- **Crawl:** Displays one moving line of information from right to left horizontally at the bottom of the screen (speed is selectable); crawls may be superimposed
- **Page Cycling:** Allows variable series of entire pages with information to be displayed sequentially at selectable rates of speed. These displays may also be superimposed
- **Video Fader:** Controls the intensity level of superimposed white text and/or graphics
- **Battery Back-Up:** Provides memory retention
- **Set Up Page:** A menu of commands that permit the user to choose the crawl speed; the number of pages to be cycled as well as their cycling speed; plus color bar display
- **RF Modulator Connector:** An FCC approved RF modulator is available as an option
- **Video Input/Output Connectors:** Allows the insertion of titles, graphics or crawls during live video productions; or during tape to tape transfers
- **Eight (8) vibrant colors for large characters and graphics:** Green, yellow, blue, red, pearl, cyan, magenta, orange
- **Seven (7) full pages of memory capacity**
- **Output Signal:** NTSC-type Composite Video (1V p-p)
- **Internal negative sync generator on-board**
- **May be used as a sync source with most video switches and genlockable cameras for superimposing information**
- **Can accommodate an RF modulator**
- **9VDC at 600mA (on board voltage regulator) with supplied step down transformer (110VAC to 9VDC)**
- **40 Keys on a membrane-type keyboard in a 5 x 8 matrix. It controls all functions and cursor direction commands**
- **PC Board:** Glass-Epoxy type (same quality as that used by the major computer companies); housed in a rugged all-metal chassis with decorative wood side panels for long life and durability
- **Weight:** 2<sup>3</sup>/<sub>8</sub> lbs. approximately. 3<sup>1</sup>/<sub>4</sub>" H x 7<sup>3</sup>/<sub>4</sub>" W x 8<sup>3</sup>/<sub>4</sub>" L

Super Micro Script is an affordable portable character, graphics and title generator for the consumer, industrial and institutional or cable user of video. It can create letters, numbers, and/or graphic images (computer-like pictures) in eight (8) brilliant colors: Green, yellow, blue, red, pearl, cyan, magenta and orange. Up to seven (7) full pages of information can be stored in its memory. No computer language or programming is necessary to operate this unit.

## Fonts

### Small Characters:

32 characters per line x 16 lines per page. These will appear as white characters on a red background

### Large Characters:

4 lines of 10 characters per line on a black raster. Large characters can be shown in any of the following colors: Red, blue, green, yellow, magenta, pearl, cyan, or orange. The operator may select each character's color individually; or use the same color for the entire text being displayed

### Color Bars:

8 vertical bars of color appear on screen in this order: Green, yellow, blue, red, pearl, cyan, magenta, orange. Practical for adjusting your video display on a TV set or monitor

## Graphics

Super Micro Script can produce graphic symbols in seven (7) different block configurations:

These may be combined together to form an infinite variety of computer-like images. The graphic elements may be generated in eight (8) colors: Green, yellow, blue, red, pearl, cyan, magenta, and orange.

**Note:** The entire alphabet, digits 0 through 9, punctuation marks, plus other symbols and color blocks can be generated with Super Micro Script. Both font sizes as well as graphics may be mixed simultaneously on the same display page.

**Super Micro Script . . . . . \$495.00**

# VIDEO PRINTERS

## VP-115/95II/45 Video Printers

### Common Features:

- The line-head system offers a pixel density of up to 300 dots/inch (VP-115) producing a very highly detailed image
- The output of brilliant hard copy takes as little as 10 seconds (VP-95II). If you want to stop the printing process, just hit "Print" key again
- The line-head construction with a minimum of moving parts and built-in self-testing (including input signal diagnosis) assure you of reliability and peak performance for years of maintenance free operation
- Paper loading takes no time at all. A simple connection from your system to the video input of the printer—just press "Print" key
- Various kinds of control signal (TTL level) are featured so that remote printing and other printing modes are available
- The incorporated video interface is compatible with composite or separate video signal by the switch selection
- Some images look better when the Posi/nega status is reversed. Video Printer allows you to do this at the flip of a switch
- Video Printer is ready to go with no warm-up time
- With Video Printer you are not "locked in." A wide range of horizontal scan rates and vertical refresh rates can be accommodated

### VP-115

- True 64 shades of gray printing
- Full image control (brightness, contrast, etc.)
- High resolution (300 dots/inch)
- Large printing size (8.5" width paper)

### Applications

- Image processing (computer enhanced)
- Image data base system
- Scanning electron microscopes
- Semiconductor wafer inspection
- Astronomy
- Satellite weather mapping
- Laser video disc filing
- Wire services (Transmission of photographs and text over long distance communications links)
- Industrial X-ray, process control, security, quality assurance, production control, medical X-ray CT, ultrasonic CT, NMR CT

VP-115 . . . . . \$5900.00

### VP-95II

- Ideally suited to wide range of thermal for CAD/CAM and similar applications that require excellent quality and high-speed printout
- 1280 x 1280 pixels compatible (up to 80MHz)
- High-speed printing (10 second/copy)
- High-resolution (152.4 dots/inch)
- Large printing size (8.5" width paper)
- RGB input available

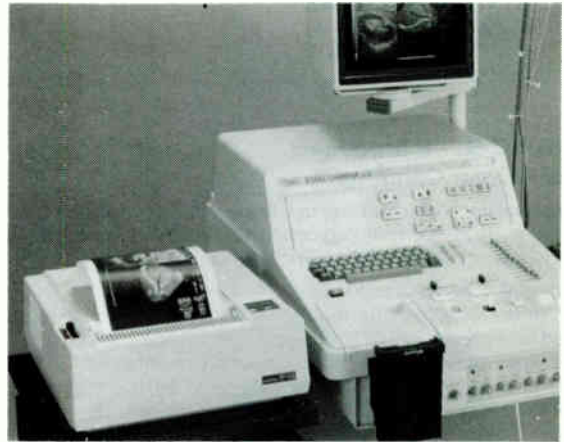

### Applications

- Workstations
  - CAD/CAM Systems
  - Computer Terminals
  - Graphics Terminals
- Video monitors
- Test and measurement instruments

VP-95II . . . . . \$4200.00

### VP-45

- A handy, compact thermal printer that lets you record directly from a CRT screen
- Compact size (5" width paper)
- High-speed printing (15.3 second/copy)
- High-resolution (150 dots/inch)

VP-115

VP-95II

### Applications

- Test and measurement instruments
  - Logic Analyzer
  - Protocol Analyzer
  - Spectrum Analyzer
  - FFT Analyzer
- Personal computer terminals
- Video monitors

VP-45 . . . . . \$1900.00

### VP-3500 Video Printer

- Resolution up to 1280 x 1250
- 64-tone gray scale printing
- 300 dots/inch resolution
- Built-in 1280 x 1280 x 6-bit frame buffer
- Accommodates 8.5" paper
- Programmable front panel with 16-character by 2-line LCD readout
- Switch-selectable reverse printing
- Display parameters retained in memory for future use
- Optional front panel adaptor for rackmounting

### Applications

- Satellite weather mapping and surveillance
- Electron microscopy
- Medical X-ray, ultrasonic, and NMR CT
- Process/production control
- Quality assurance, including industrial X-ray and semiconductor wafer inspection
- CAD/CAM
- Security systems
- Laser video disc (CD ROM) filing
- Wire services transmission of photos and text

VP-3500 . . . . . \$6700.00

# SHARP ELECTRONICS CORP.

Sharp Plaza

FAX: (201) 529-8413

# COLOR CAMERAS

## XC-B10/XC-B20P Broadcast ENG/EFP Color Cameras

Broadcast-caliber picture quality starts with three  $\frac{2}{3}$ " Diode Gun LOC/MS Saticon\* (XC-B10) or Plumbicon\* (XC-B20P) tubes coupled with a high-transparency glass f/1.4 prism beam splitter.

### The Standard Automatics:

- **Auto-White**—The high performance Auto-White circuit is supplemented by a preset 3200°K setting
- **Auto-Black**—Black balance is continuously maintained by high-gain DC clamp circuitry and precisely calibrated by the microcomputer Digital Auto-Black Balance. This combination totally eliminates black balance adjustment when switching from 0 to 18dB gain
- **Auto-Centering**—The Automatic Centering circuit allows centering to be automatically adjusted using computer control. A preset switch position is also available
- **Automatic Beam Optimization Adjustment (A.B.O.)** Built-in automatic beam optimization circuitry can handle incident light intensity up to 8 times higher than normal. This feature eliminates "comet tailing" and "blooming" phenomena caused by bright pin-point light sources.

### The Exceptional Automatics:

- **Auto Iris**—With NAM (non-additive mix) of R, G and B plus center screen weighting, achieves performance that rarely needs manual intervention
- **Auto Contrast**—The Auto-Contrast circuit automatically adjusts the camera when shooting in low contrast conditions. Manual Master Black adjustment is also available for shots where special effects are desired.
- **Auto-Knee**—The Auto-Knee circuit widens the dynamic range of the camera. Soft compression of the whites is automatically adjusted to capture the maximum information in high contrast outdoor or back-lighted scenes
- **The Standard Displays:**  
Zebra with Level Adj and ON/OFF, Video Low, A/W, A/B, A/C Status, Genlock, Gain Position, Lo-Battery, Tally
- **The Exceptional Displays:**  
Audio VU meter to get that perfect recording, Tape Remaining, Camera Number, Iris f-Stop, Filter Wheel Position, Lens Zoom Position, Auto Contrast...and more

The camera display is placed off-center so as not to disturb shooting. Display erases automatically, leaving only critical information on permanent display

### Component VCR Compatibility

The XC-B10 and XC-B20P are compatible with Betacam and MII format component recorders. It is also compatible with the 26-pin SMPTE camera-to-VCR standard.

### Choice of Viewfinders

1.5" Viewfinder with underscan can swivel 180° and can slide right or left. Additional features include a built-in peaking circuit, oversize optics for non-critical eye position and adjustable diopter.

5" High Resolution Viewfinder (over 500 TV lines) with underscan and precision low-profile pan/tilt mechanism.

### Specifications

<b>Optical System:</b>	Prism beam splitter (f/1.4) with bias light injection
<b>Lens Mount:</b>	Bayonet
<b>Pick-Up Tubes:</b>	Three $\frac{2}{3}$ " Diode Gun LOC MS Saticons (XC-B10) or Plumbicons (XC-B20P)
<b>Scanning System:</b>	525 lines; 2:1 interlace 30 frames/second
<b>Synchronization</b>	
a. <b>Internal Synchronization:</b>	Built-in sync generator (meets SC-H Phase requirements of RS-170A)
b. <b>External Synchronization:</b>	Locks to composite video or black burst
<b>Timing for External Synchronization:</b>	H-sync adjustable from 2 $\mu$ s delay to 4 $\mu$ s advance with respect to genlock input signal. Subcarrier phase adjustable 360° with respect to gen-lock input signal
c. <b>Blanking Width:</b>	H-Blanking adjustable from 10.0 $\mu$ s to 11.5 $\mu$ s V-Blanking selectable—1B, 19 or 20 lines

XC-B20P

<b>Color Encoder System:</b>	NTSC (I, Q System)
<b>Sensitivity:</b>	
<b>Standard Illumination:</b>	2000 lux B9.9% Refl. 3200°K f/4
<b>Horizontal Resolution:</b>	XC-B10—750 lines—center G-ch. 600 lines encoded XC-B20P—660 lines—center G-ch. 600 lines encoded
<b>S/N Ratio:</b>	57dB measured without Gamma and without image enhancement
<b>Geometric Distortion:</b>	Less than 1.5% of picture height
<b>Color Temperature</b>	Built-in optical filter turret, 3200°K, 5600°K, 5600°K + 12%
<b>Compensation:</b>	ND, cap and built-in auto-white balance circuit with memory produce total range from 2000°K to 10,000°K
<b>Gain Boost:</b>	+9dB (+6dB) or +18dB (+12dB)
<b>Detail Correction:</b>	2 line including level dependence, noise coring and comb filtering
<b>Character Display:</b>	VF character display of camera status. Optional status display on main video
<b>Zebra Indication:</b>	Adjustable zebra with ON/OFF switch
<b>Color Bar:</b>	Split field 100% saturated, 75% amplitude in accordance with EIA RS-189A (with camera identification) Compensated for individual channels
<b>Flare Compensation:</b>	
<b>Input Signals:</b>	
a. <b>Genlock Signal:</b>	1V, composite video or 0.43V, black burst (75 ohm) 2 inputs—BNC connector, Remote/VCR connector
b. <b>Return Video:</b>	1V (75 ohm) composite video synchronous or non-synchronous 1 input—Remote/VCR connector
c. <b>Mike:</b>	1 input—XLR connector
d. <b>Tally:</b>	1 input—Remote/VCR connector, BNC connector
<b>Output Signals:</b>	
a. <b>Encoded Video:</b>	1V (75 ohm) composite video 2 outputs—Remote/VCR connector, BNC connector
b. <b>R,G,B Video:</b>	0.7V (75 ohm) non-composite or 1V p-p with Sync internally selectable 1 output for each signal at Remote/VCR connector
c. <b>Monitor Video:</b>	1V (75 ohm). R,G,B individual video, encoded video, R-G, B-G. Registration video
d. <b>Mike Audio:</b>	Microphone Direct 1 output—Remote/VCR connector
<b>Power Requirements:</b>	+11V to +17.4VDC, approx. 21W regardless of input voltage approx. 24W with 1.5" viewfinder
<b>Ambient Operating Conditions:</b>	14°F to 104°F (-10°C to +40°C)
<b>Weight:</b>	Camera head approx. 9.2 lbs. (4.2kg) Viewfinder approx. 1.32 lbs. (0.6kg)
<b>Dimensions:</b>	Height: Approx. 10 $\frac{5}{16}$ " including legs Width: Approx. 16 $\frac{3}{8}$ " including 1.5" viewfinder Depth: Approx. 7 $\frac{13}{16}$ " including 1.5" viewfinder (without mike holder)

FAX: (201) 529-8413

# COLOR CAMERA

## XC-A1 Professional ENG/EFP Color Video Camera

### 2/3" Diode Gun Saticon® Tubes with Prism Optics

Broadcast-caliber picture quality starts with the three 2/3" Diode Gun LOC/MS Saticon tubes coupled with a high-transparency glass f/1.4 prism beam splitter. The result is high sensitivity, enhanced resolution (750 lines), excellent S/N ratio (57dB), truer colorimetry, plus reduced image retention and comet tailing. Bias lighting further reduces lag, especially for those critical low-light scenes.

### Automatic Functions Offer Increased Ease-of-Use

- **Auto-White**—The Auto-White circuit is supplemented by a preset 3200°K setting. This allows shooting to begin immediately if the action requires a quick change of scene
- **Auto-Black**—Black balance is continuously maintained by high-gain DC clamp circuitry and precisely calibrated by the microcomputer Digital Auto-Black Balance. This combination totally

eliminates black balance adjustment when switching from 0 to 18 dB gain, and reduces routine maintenance requirements.

- **Auto-Centering** — The Automatic Centering circuit allows centering to be automatically adjusted using computer control. A preset switch position is also available

### +9/+18dB High Gain Switch

Sensitivity can be increased 3X or 8X for low-light level scenes using the +9dB and +18dB settings. Minimum required illumination is an amazingly low 30 lux (2.8fc) at f/1.4.

### Compact, Lightweight Diecast Body

Sharp has precision-machined the diecast camera body to create a durable, solid unit that assures optical alignment under the roughest ENG applications.

### Automatic Beam Optimization Adjustment (A.B.O.)

Built-in automatic beam optimization circuitry can handle incident light intensity up to 8 times higher than normal. This feature eliminates "comet tailing" and "blooming" phenomena caused by bright pin-point light sources.

### Color Temperature Filter System

A 4-position rotating filter system allows selecting the optimum color temperature filter for indoors, normal outdoor light, bright sunlit outdoors, and cloudy/dim outdoor light levels.

### Power Conserving Standby Switch

Switching to standby mode further extends running time with battery operation by reducing power consumption to a minimum while the operator is waiting for the action to begin.

### Information-Packed 1.5" Viewfinder

The 1.5" underscanned electronic viewfinder can swivel a complete 180° and can slide right and left. Additional features include a built-in peaking circuit and a zebra pattern video level indicator with adjustable threshold.

### Multi-Standard Intercom System

The intercom provides communication with virtually all major 2-wire intercoms presently in use.

**XC-A1U (ENG configuration, less lens) ..... \$7450.00**

a. Zone 1 (within a circle of diameter equal to 80% of picture height):	Less than 0.1% of picture height
b. Zone 2 (within a circle of diameter equal to picture width):	Less than 0.2% of picture height
c. Zone 3 (outside of Zone 2):	Less than 0.5% of picture height
<b>Geometric Distortion:</b>	Less than 1.5% of picture height
<b>Color Temperature Compensation:</b>	Built-in optical filter turret, 3200°K, 5600°K, 5800°K, +12% ND, cap and built-in auto-white balance circuit with memory produce total range from 2000°K to 10,000°K +9 dB (+6 dB) or +18 dB (+12 dB)
<b>Gain Boost:</b>	+9 dB (+6 dB) or +18 dB (+12 dB)
<b>Detail Correction:</b>	2 line type including level dependence, noise coring and comb filtering
<b>Automatics:</b>	Auto-White, Auto-Black, Auto-Centering with memory and presets
<b>Character Display:</b>	VF character display of camera status. Optional status display on main video

<b>ABO:</b>	Automatic Beam Optimization stabilizes highlights up to 8 times normal
<b>Auto Iris:</b>	Uses NAM (non-additive mix) of RGB plus center screen weighting
<b>Zebra Indication:</b>	Adjustable zebra with On/Off switch
<b>Color Bar:</b>	Split field 100% saturated, 75% amplitude in accordance with EIA RS-189A (with camera identification)
<b>Flare Compensation:</b>	Compensated for individual channels
<b>Input Signals:</b>	
a. Gen-Lock Signal:	1V, composite video or 0.43V, black burst (75 ohm) 2 inputs—BNC connector, Remote/VTR connector
b. Return Video:	1V (75 ohm) composite video synchronous or non-synchronous. 1 input — Remote/VTR connector
c. Mic:	0 dB or +50 dB Gain (internally selectable) 1 input — XLR connector
d. Tally:	
<b>Output Signals:</b>	
a. Encoded Video:	1V (75 ohm) composite video 2 outputs—Remote/VTR connector, BNC connector
b. RGB Video:	0.714V (75 ohm) non-composite 1 output for each signal at Remote/VTR connector (GRN with sync available)
c. Monitor Video:	1V (75 ohm). RGB individual video, encoded video, R-G, B-G. Registration video
d. Mic Audio:	-20 dBm or -70 dBm 600 ohm unbalanced 1 output—Remote/VTR connector
<b>Power Requirements:</b>	+10V to +17.4V DC, approx. 22W regardless of input voltage
<b>Ambient Operating Conditions:</b>	-10°C to +40°C (14°F to 104°F) less than 90% humidity
<b>Weight:</b>	Camera head approx. 8.58 lbs. (3.9kg) Viewfinder approx. 1.32 lbs. (0.6kg)
<b>Dimensions:</b>	Height: Approx. 10-15/16" including legs Width: Approx. 15-7/8" including 1.5" viewfinder Depth: Approx. 7-13/16" including 1.5" viewfinder (without mic. holder)

## VIDEOCASSETTE RECORDERS/ COLOR MONITOR

### Professional Series Videocassette Recorders

#### XA-200 VCR with Auto Play and VHS-HQ

- Direct drive motors
- Grounded (3-wire) AC power cord
- VHS-HQ (High Quality) picture enhancement plus double comb filter
- Full auto play
- Wireless remote control with special effects
- Cable compatible 14 day/4 event programmable tuner/timer
- Counter memory
- 3-speed record/playback
- Front load design
- Fine editing system

XA-200 ..... \$475.00

XA-200

#### XA-205 4-Head VCR with VHS HQ

- 4-head video system
- Noiseless still frame and field frame advance
- Variable slow motion
- Two speed video search
- Simple record timer
- Plus all of the features of the XA-200

XA-205 ..... \$550.00

XA-205

#### XA-110 4-Head Industrial VCR with VHS-HQ

- Advanced double azimuth 4-head video system for noiseless special effects
- Industrial 8-pin and BNC connectors
- Continuous auto repeat
- Simple record timer
- Slow motion
- Camera remote pause jack
- 3-way source selector switch
- Plus all of the advanced features of the XA-200

XA-110 ..... \$650.00

XA-110

#### XA-120 Stereo/Bilingual 4-Head VCR with VHS-HQ

- Stereo and bilingual record/playback
- Full 2-channel audio dub capability
- Left and right channel microphone inputs
- Headphone jack with level control
- Hi-cut audio equalization
- Variable slow motion (noiseless)
- Plus all of the advanced features of the XA-110

XA-120 ..... \$795.00

XA-120

### XM-1300 13" High Resolution

#### Professional Color Monitor

- 0.31mm dot pitch
- Over 600 lines resolution
- Standard U.S. controlled phosphors
- Comb filter is provided for maximum resolution and to minimize cross color interference
- Front panel switch allows for selection of either the comb filter or a notch filter
- Two video inputs
- Direct RGB inputs
- H-delay and V-delay functions
- Fast (0.5msec) or slow (7.0msec) AFC time constants can be selected
- Normal and underscanned picture modes
- Hue, chroma, contrast, brightness and aperture are individually adjustable
- White balance, black balance, individual gun switches located behind a separate hinged door on the front panel
- Automatic/manual degauss circuit neutralizes the XM-1300 from the effects of magnetic fields
- Low power consumption
- Diecast aluminum front mask

XM-1300 ..... \$3500.00

XM-13RMK (Rackmount kit) ..... 165.00

# COLOR MONITORS

## 11 and 7 Series Color Monitors

- Ideal as a master monitor or studio monitor at broadcasting stations, for supervising video quality at field pick-up stations, as a VTR monitor or for installation in field van
- There are two series of color monitors to meet with every monitoring need. Whether you choose from the model CMM20-11/CMM14-11 having high-resolution shadow mask CRT's or model CMM20-7/CMM14-7 adopting the in-line black stripe system, you'll find all your specific requirements in a color monitor have been fully realized
- Fully unitized construction and systematic plug-in unit design assures complete unit interchangeability in respective series

### 11 Series Color Monitors

These CMM20-11 and CMM14-11 high-performance color monitors are designed to supervise color video signals, and have high-resolution shadow-mask CRT's. As they maintain excellent performance, they can be used for various purposes: such as master monitors at broadcasting stations, studio monitors, video-quality surveillance at field pick-up stations, VTR's and picture monitors.

They feature compact, lightweight design and the use of IC's makes them shock resistant to make installation possible even in field vans. The CMM20-11 and CMM14-11 are available in series to meet specific requirements.

Adoption of a CRT of high fineness has greatly upgraded resolution; with up to 600 lines at the center of the picture and up to 550 lines around its center, clear pictures are reproduced without moire patterns.

Also, the black-matrix (BM) system is incorporated for maximum control in bright locations.

In addition to the NTSC system, two other (PAL or SECAM) systems or all three of these can be built into the CMM20-11 series. Using a separate device these system changes are also possible on the CMM14-11 series models. As a result, all of these models are ideal for signal source surveillance.

### 7 Series Color Monitors

The compact CMM20-7 and CMM14-7 high-performance color monitors are designed to supervise color video signals. With a low price, they maintain the excellent performance of conventional color monitors. And they serve a variety of purposes: including master monitors at broadcasting stations, laboratories and TV production lines for supervising video quality. Due to their low power consumption, they are ideal for installation in field vans as VTR's.

Choose from the ordinary or high-resolution CRT (HR type). With the HR-type you'll find resolution has been upgraded; with up to 600 lines at the center of the picture and up to 550 lines around its center, crystal clear pictures reproduced without moire patterns.

Also, the in-line black stripe system is incorporated for maximum contrast control in bright locations.

Normal CRT and high-resolution CRT (HR type) are available. The HR type CRT has a built-in comb filter which greatly upgrades resolutions with a clear picture reproduced without moire patterns.

The comb filter is optionally available for models with a normal CRT. And due to the adoption of the in-line black stripe tube, high-quality picture contrast can be obtained even in bright locations.

# INTERMATRIX CONVERTER/ DIGITAL EFFECTS/SWITCHERS

## MC-1 Component

### Intermatrix Converter

- Three BNC connectors for either YIQ, RGB, Y, Y-B and B-Y external genlock input
- Stand alone unit, one rackunit high
- Used as an integral part of editing and post production set-ups
- Genlocks to studio colorback
- Outputs are six BNC connectors for two sets of the selected format
- Bandwidth is better than 20MHz
- Equipped with one conversion matrix
- Basic proc amp is built-in

MC-1 . . . . . \$2000.00

MC-1

## Chromafex 770

### Digital Video Effects Framesync

- Combines three functions into one package: special effects, full frame store and infinite window time base correction
- Designed to enhance your on-air performance, and simultaneously simplify and speed up your day-to-day production work
- Equipped with a full frame synchronizer/framestore and can perform strobe, posterize, mosaic, falsecolor image, picture compression (1/2, 1/4, 1/9), picture positioning and many other features

770 . . . . . \$9900.00

Extender Card Set 770X . . . . . 450.00

770

## 12X Routing Switcher Series

- 12 inputs of either composite video (V), three channel component video (C), or three channel audio (A)
- Control three separate video channels for RGB, YIQ, Y, R-Y, B-Y formats
- Can receive commands from any 12X remote control unit
- Engineered for the highest possible electrical performance and system transparency

### 12X-C4

"12X" high-isolation routing Switcher for component video 12 inputs and 4 outputs with 3 channels per output. 30MHz bandwidth. RS422 (SMPTE) remote controller with status indicators . . . . . \$6990.00

### 12X-V4

"12X" high-isolation video routing switcher, 12 inputs, 4 output buses. Remote controllable . . . . \$3300.00

### 12X-S1

12 x 1 stereo audio switcher . . . . . \$1500.00

12X

## 260 AFV Routing Switcher

- Provides passive switching of both video and up to 2 associated audio signals from 12 inputs to one output
- Can be used for stereo or a combination of audio and time code channel
- Audio circuits consist of two identical balanced pairs
- Equipped with a mechanical indicator switch
- Audio override capability built-in

260 . . . . . \$510.00

260

# DISTRIBUTION AMPLIFIERS/ TRAYS

## 332 Duplication Video-Stereo Audio Distribution Amplifier

- Output capacity is 12
- Unit contains its own power supply
- One rack unit high enclosure
- Video, via BNC, audio via RCA
- Wideband low-noise
- For use in electromagnetically noisy environments
- Designed for duplication facilities

332 ..... \$700.00

332

## 336 Video Distribution Amplifier

- One input with loopthrough and termination switch
- Video gain screwdriver adjustment on front panel
- Six outputs
- All-silicon solid-state for multiple fan-out, high grade distribution systems

336 ..... \$300.00

336

## 211 Video Tray

- Accommodates 4 video modules and one power supply module
- Power supply module included
- Loopthrough input
- One rack unit high

211 ..... \$570.00

211

## 212 Video Tray

- Accommodates 8 video modules and two power supply modules for redundancy
- 1 power supply module included
- Loopthrough inputs
- Two rack units high

212 ..... \$750.00

212

## 213 Audio DA Tray

- Accommodates 4 audio modules and one power supply
- Power supply included
- Rear panel connection via terminal strips

213 ..... \$630.00

213

## 220 Super-Wideband Audio DA Module

- Designed for signal distribution in broadcast installations
- Exceeds broadcast specs in all crucial areas

220 ..... \$250.00

220

## 250 Video Distribution Amplifier Module

- Built-in 500' adjustable cable comp
- Broadcast specs
- 1 loopthrough, 6 out
- Trims are front accessible

250 ..... \$160.00

250

## 252 Video Distribution Amplifier Module

- 250 VDA with 12dB boost at 4MHz
- Cable compatible (non-broadcast)
- Crisp character display
- Designed for flight information display systems at airports

252 ..... \$200.00

# SHINTRON CO., INC.

 Telex: 92-1497 FAX: (617) 491-8278

## 690 ET (Everything Time Code)

### Reader/Generator

- Independent readers and generators handle time code and user bits in either Vertical Interval Time Code (VITC) or Longitudinal Time Code tracks
- Translate between VITC and Longitudinal Time Code
- Character generator for data display and user interface/menu purposes
- Interface based on the RS-422 Orange Bus protocol
- Microprocessor controlled
- Adjustable hysteresis levels from -15 to -25dB
- Ten internal memories
- All setups are stored in non-volatile memory
- In the longitudinal mode, reads at speeds from 1/60 to 80 times normal play speed in either forward or reverse
- One frame is automatically added when reading in the forward direction or is subtracted when reading in the reverse direction
- Jam-sync to other Time Code Generators in either Longitudinal or VITC mode

- 690 ET . . . . . \$4500.00  
 690-TD 690 with time/date option and built-in time/date calendar generator . . . . . 4800.00  
 650 Combination SMPTE/EBU TC/Userbits Generator/Reader identical to 690 except it does not include VITC capability . . . . . 3000.00  
 Time Clock/Date Calendar Option . . . . . 300.00

### 647 SMPTE/EBU Edit Code Generator

- Capable of generating SMPTE/EBU code either independently or in synchronism with incoming video
- 6 digit, 1/2" LCD with back light
- Dropframe or non-dropframe
- Freely resettable time data
- Userbits are set by thumbwheels on the front panel

647 . . . . . \$1500.00

### 646 Edit Code Reader/Raster Display

- Reads either SMPTE or EBU code
- Front panel 8 digit LED numerics of 1/2" height
- Readable tape speed range from 1/8" to 40X
- Capable of keying in the data on video raster in either black letter on white background or the reverse

646 . . . . . \$1500.00

### 640/641 Portable SMPTE Time Code Generators

- Places time code on tapes to identify segments, takes and frames for later editing
- Battery-operated 3 "AA" cells
- Can be attached to portable VTRs such as Sony BVU series and JVC
- Displays both time code and userbits on liquid crystal digits and is able to generate userbits as well

640 SMPTE for ENG/EFP, dropframe . . . . . \$ 900.00  
 641 SMPTE or EBU, dropframe or nondropframe . . . . . 1500.00

### CB100-EN NTSC/PAL Encoder

- Encodes RGB to NTSC or PAL
- Produces correct ScH relationship
- Genlocks to colorback
- 1 set of RGB input and 2 NTSC outputs
- Subcarrier phase adjustable

CB100-EN . . . . . \$990.00

### CB100-SY NTSC Sync Generator

- Genlocks to helical video
- Correct ScH relationship
- Produces color ID pulse
- Colorblack, sync, blank and subcarrier outputs
- H and Sc phases are adjustable
- 2 independent selectable inputs
- Genlocks to incoming video or internal crystal

CB100-SY . . . . . \$1500.00

# SIGNAL PROCESSING EQUIPMENT

690 ET

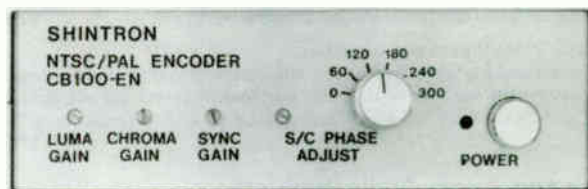

646

647

641

CB100-EN

### CB100-PT Protocol Translator

- Translates Grass Valley Switcher protocol and Shintron Orange Bus Language
- No external adjustment
- Automatic operations

CB100-PT . . . . . \$2000.00

### CB100-LC IBM-PC

#### To Video Level Converter

- Detects CGA or EGA card automatically
- Converts IBM-PC's RGBI to video RGB
- Produces proper waveform acceptable to video equipment
- Converts impedance to 75 ohm for long lines
- TTL inputs and buffered outputs
- Jumper selection of color/monochrome and sync level
- Adjustable horizontal blanking interval

CB100-LC . . . . . \$500.00

### CB100-VA Dual

#### Video Distribution Amplifier

- 2 (1 loopthrough/5 out) or 2 (1 terminated in/6 out) or 1 (1 in/2 out)
- 15MHz bandwidth
- Self contained power supply
- Adjustable cable compensation of 500' is built in
- Gain adjustable +6dB to -10dB

CB100-VA . . . . . \$300.00

# SIGMA ELECTRONICS, INC.

# SYNC AND DISTRIBUTION EQUIPMENT

## Color System Timing and Testing Products

### TSG-375 Test Signal and Sync Generator

Stable and accurate test signal generator, with 24 different patterns, a complete sync generator with 3 blackburst outputs, several production-aid outputs including source ID and countdown generator . . . . . \$2995.00

### SCH-385 Subcarrier/Horizontal Phase Meter

A display indicates relative sync and subcarrier of two different inputs, absolute SC/H phase of either input, and the associated "Color-Incidence" light provides a green light for proper color-framed edits or special effects . . . . . 1650.00

### CSG-450 Color Sync Generator

Master RS-170A Sync Generator with all standard sync outputs, C.F.I.D., and 3 blackburst signals. . . . . 1200.00

### CSG-455 Color Sync Generator

Same as CSG-450 with additional outputs of selectable test signals of SMPTE Bars, Crosshatch, Red Field, and Safe Areas, plus Audio Tone. . . . . 1600.00

### CSG-460 Color Sync Generator

Master or genlockable RS-170A sync generator, with all standard sync outputs, C.F.I.D., and 3 blackburst signals . . . . . 1500.00

### CSG-465 Color Sync Generator

Same as CSG-460 with the addition of selectable test signals of SMPTE Bars, Crosshatch, Red Field, and Safe Areas, plus Audio Tone . . . 1900.00

### BTS-414 Blackburst Timing System

Genlocks to either composite video or blackburst, and provides 4 independently adjustable blackbursts out. Providing advance or delay of horizontal sync and 360° of continuous burst phase adjustment . . . . . 1750.00

### VPA-380 Video Processing Amplifier

Built-in genlocking sync generator, adjustable blanking width controls to allow saving the various vertical test and identification signals; and a dual mode genlock circuit to allow acceptance of either stable or VTR signals . . . . . 1750.00

## Video and Stereo-Audio Products

### VSS-120 Switcher

12 x 1 video with stereo-audio-follow passive switcher. Useful in stereo TV or 2nd language channel operations. Green legend indicates selected input, all others remain terminated in their characteristic impedance . . . \$265.00

### VAS-120 Switcher

12 x 1 video with single audio channel. . . . . 240.00

### SVX-210 Video Only Switcher

Provides vertical interval switching of 10 inputs to a dual output line. Output clamping is standard, with DC restoration optional . . . . . 695.00

### SAV-210 Audio/Video Switcher

Provides vertical interval switching of Audio-Follow-Video, Audio only, and Video only. A "dwell-timed" control function allows one handed selection of either audio or video breakaway. After dwell time has elapsed, the control function reverts to audio-follow-video operation. An audio input/output interface option provides for easy audio wiring . . . . . 875.00

### SSV-210 Stereo-Audio/Video Switcher

Functions in the same manner as the SAV-210, with an additional audio channel. Either channel is suitable for use with SMPTE time code. . 995.00

### VSD-200 Video/Stereo Audio Distribution Amplifier

1 x 6 video with stereo-audio distribution amplifier. Optimum pricing and packaging for stereo television and duplication facilities . . . . . 900.00

### VAD-200 Video/Audio Distribution Amplifier

1 x 6 video with single channel audio DA . . . . . 650.00

### ADA-110 Audio Distribution Amplifier

High performance Audio DA. One input and ten outputs; low noise, flat response, adjustable gain -8 to +23.5dB. Can be used for SMPTE Code . . . . . 405.00

TSG-375

SCH-385

ADA-110

### ADA-210 Audio Distribution Amplifier

Same high performance DA as the 110 except dual configuration. Can be either dual 1 x 10 or a single 1 x 20. Ideal for SMPTE Code . . . . \$610.00

## Self-Contained Sync and Distribution Equipment

### VDA-115 Video Equalizing Amplifier

The VDA-115 is an extremely versatile unit. In its most simple configuration, it is a 1 x 6 Video DA. More importantly, it is a cable equalizing amplifier that can serve as a "line-driver" or "line-receiver" to compensate for up to 1100' of coaxial cable. It features a differential input that can eliminate as much as 10VAC of hum . . . . . \$360.00

### VDA-100A Video Distribution Amplifier

6 output DA frequency response 0.2dB to 10MHz, looping input, DC coupled, ± 6dB gain adjustable, 110/220VAC. Desk or rackmount . . . . 310.00

### ADA-106 Audio Distribution Amplifier

1 x 6, high performance amplifier, with a frequency response of ± 0.1dB to 30kHz, can be used for SMPTE Code. Screw capturing terminals. 110/220VAC. Desk or rackmount . . . . . 310.00

### PDA-100A Pulse Distribution Amplifier

1 x 6 pulse regenerative DA with looping input. 110/220VAC. Desk or rackmount . . . . . 310.00

### SDA-110 Subcarrier Distribution Amplifier

Regenerative subcarrier amplifier, 2 independently adjustable outputs. 110/220VAC. Desk or rackmount . . . . . 390.00

### PDA-110 Pulse Delay Amplifier

Ideal aid in system timing. Four independently delayable outputs, range of 0.2 to 2µsec. 110/220VAC. Desk or rackmount . . . . . 415.00

### CSG-160 Color Sync Generator

Provides all the standard synchronizing outputs including blackburst. RS-170 standard. Desk or rackmount . . . . . 800.00

### AFV-100 Passive Audio Follow Video Switcher

6 inputs to one output RCA jacks for audio . . . . . 185.00

### VS6-100 Passive Video Switcher

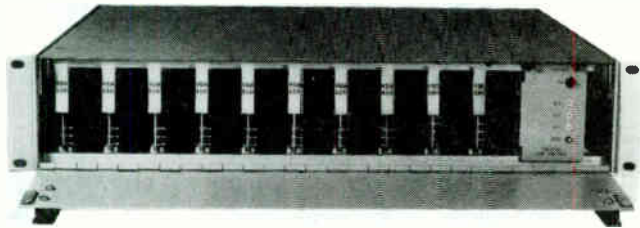

For switching six video inputs to one input. Desk or rackmount . . . . 115.00

# SIGNAL PROCESSING EQUIPMENT

## MODULAR DISTRIBUTION EQUIPMENT

System 500

### System 500 Modular Distribution System

- Flexible
- Hinged front door
- 10 modules and 1 power supply capacity
- Space efficient
- EX-505 is required to service any of the distribution modules in the frame
- Frame is supplied with rear mounting blank panels
- Accepts a second PS-501A for redundant power supply operation

For any signal distribution equipment, the FR-500 Module Mounting Frame provides maximum flexibility in a very efficient package. Intended for use in broadcast, cable, industrial, duplication and similar installations.

Flexibility and versatility. An internal motherboard allows both modules and rear frame adaptors to be conveniently installed or reorganized, to meet any system requirement. Up to ten modules plus a power supply can reside in the frame, and any combination of existing or future System 500 modules can simultaneously be installed in the frame.

### FR-500 Module Mounting Frame

Holds up to ten of any combination of modules plus a power supply. Internal "motherboard" allows for easy additional modules . . . \$400.00

EX-505 Module Extender . . . . . 30.00

### PS-501A Power Supply Module

Provides necessary power for a fully loaded frame of modules. 110/220VAC operation. . . . . 150.00

### VDA-510 Video Distribution Amplifier

1 input/6 outputs, DC coupled, frequency response  $\pm 0.2$ dB to 10MHz, diff. phase 0.2°, diff. gain 0.2%,  $\pm 3$ dB gain adjustment . . . . . 240.00

### VDA-515 Video Equalizing Amplifier

Capable of compensating up to 1100 ft. of coaxial cable . . . . . 280.00

### ADA-526 Audio Distribution Amplifier

1 input/6 outputs, an extremely flat frequency response (0.1dB to 30kHz). Can operate bal. or unbal. . . . . 280.00

### PDA-530 Pulse Distribution Amplifier

Regenerative Pulse Amplifier 1 input/6 outputs. Input level 2-6V p-p, output level 4V p-p . . . . . 240.00

### PDA-535 Pulse Delay Amplifier

Two sections of two independently adjustable stages . . . . . 360.00

### SDA-540 Subcarrier Distribution Amplifier

1 input/3 outputs. Each output is independently adjustable . . . 320.00

### BTM-551 Blackburst Timing Module

Provides horizontal and burst phase adjustment of its blackburst output. Requires a BSG-100A for reference timing signals . . . . . 375.00

### CBG-565 Color Bar Module

Provides dual outputs of selectable outputs of SMPTE Bars, Cross-hatch, Red Field and Safe Areas. This unit requires timing signals from BSG-550 . . . . . 600.00

### BSG-550 Black Signal Generator

Provides two RS-170A blackburst outputs, plus synchronizing signals for other System 500 modules . . . . . 400.00

### CGM-560 Color Genlock Module

Used to genlock other System 500 modules, such as CBG-565 or BTM-551 to an external reference. . . . . 500.00

## SMALL STUDIO AND EDIT SUITE EQUIPMENT

BSG-100A

CBG-100A

BTM-100A

### BSG-100A Black Signal Generator

Provides two RS-170A blackburst outputs, plus control driving signals for other Series 100 modules . . . . . \$495.00

### CBG-100A Color Bar Generator

Provides dual outputs of selectable SMPTE Bars, Crosshatch, Red Field, and Safe Areas. This unit requires a BSG-100A for timing reference . . . . . 495.00

### BTM-100A Blackburst Timing Module

Provides horizontal and burst phase adjustment of its blackburst output. Requires a BSG-100A for timing reference . . . . . \$495.00

### CGM-100A Color Genlock Module

Used to genlock CBG-100A and BTM-100A to an external reference . . . . . 495.00

### FR3-100 Rackmount Frame

For any 3 small box modules. . . . . 70.00

# TIME CODE GENERATORS/ READERS

## TCR-111 Time Code Reader

- Versatile desktop or rackmounting • Compact half rack wide package • Wide range of reading speeds (1/40 to 80X) • Large green LEDS for increased visual comfort • Dual standard SMPTE/EBU • True "on time" display • Reshaped code output • Microprocessor control • Simple operation • Low power enhances reliability

TCR-111 .....\$ 1100.00

TCR-111

TCR-112

## TCR-112 Time Code Reader

- Simultaneously displays both Time and User bits • Time and User Bit displays are independently controllable • Selectable character heights 16/32/64/128 lines • Positionable over entire video raster • True "on time" display • Power fail memory backup • Reshaped code output • White or black characters in contrasting window • Window may be turned off • High legibility character font

The TCR-112 has all the features of model TCR-111 (except the Green LED display) and also includes the above features.

TCR-112 .....\$ 1350.00

RMK-1L Rackmounting kit for one unit on left .....75.00

RMK-2 Rackmounting kit for two units .....75.00

## TCR-80 SMPTE Time Code Wide Band Reader

- LED display with contrast enhancing filter • Low power consumption • Small size • Display of time and user data • Reads code from less than 1/20X to greater than 40X play speed • Digital decoding techniques • Retains and displays last code read when machine is stopped • Self-contained video character generator • Display of drop frame mode • Wide dynamic range AGC • Error detection and bypass • Dub output of reshaped LTC code input

TCR-80 SMPTE/EBU LTC Reader .....\$ 1365.00

TCR-80V SMPTE/EBU LTC & VITC Reader .....1965.00

### TCR Options

- 011 Parallel data input-001/output-011 .....\$450.00
- 012 Byte serial data input-002/output-012 for jam slave . .115.00
- 114 Video character inserter .....600.00
- 214 Same as 114—includes remote control with 2 meter cable .....750.00
- 018 VITC input .....600.00

TCR-80V

## TCG-80N SMPTE Time Code Production Generator

- Internal LTC reader for jam slave of time and/or user bits • LED display with contrast enhancing filter • Thumbwheel switches to set time and user data • Full user data facilities • Low power • Small size • Drop frame or non-dropframe are mode front panel selectable • High level output capable of feeding multiple machines • Self-contained video character generator • Unaffected by momentary power dropout • Color field identification defined by internal measurement or external field one pulse

TCG-80N SMPTE LTC Generator .....\$ 1755.00

TCG-80P EBU LTC Generator (PAL) .....1875.00

TCG-80N-005 SMPTE LTC Generator with film  
 techometer interface .....2155.00

### TCG Options

- 001 Parallel data input-001/output-011 .....\$450.00
- 002 Byte serial data input-002/output-012 for jam  
 slave .....115.00

TCG-80N

004 Video character insert .....600.00

006 VITC reader for jam slave .....450.00

008 VITC output .....600.00

## Quartz Units

### 700-SG

• Low cost, compact 600W flood featuring a broad, even beam pattern • Supplied with a 600W 75 hr. DYH lamp rated at 3200°K • With safety glass  
Unit shown with optional 701-401301 4-leaf barndoors.

Rating: 120V—5.4A at 600W. Socket: Miniature 2-pin (G5.3). Switch: Unit-mounted. Cable: 10', 2-wire grounded. Construction: Phenolic resin. Mounting: Universal— $\frac{3}{8}$ " to  $\frac{5}{8}$ ". Reflector: Etched aluminum

700-SG	401110	600W Quartz Light with DYH Lamp	..... \$80.00
DYH	401928	600W Lamp, 3200°K, 120V, Clear	..... 26.00
701	401301	Barndoor for 700-SG	..... 39.95

### 710-SG

• Professional 600W focusing quartz unit • Well suited for key, fill and backlighting applications • Rear-mounted focusing lever allows easy flood to spot control • Ideal for photographic and video applications • Complete with safety cable and safety glass

Rating: 120V—5.4A at 600W. Socket: Miniature 2-pin (G5.3). Switch: In-line. Cable: 10', 3-wire grounded. Construction: Double-wall vented aluminum. Mounting: Universal— $\frac{3}{8}$ " to  $\frac{5}{8}$ ". Reflector: Pebble-finish spun aluminum

710-SG	401108	600W Focusing Light	..... \$140.00
DYH	401928	600W Lamp, 3200°K, 120V, Clear	..... 26.00
711	401307	Barndoor for 710-SG	..... 39.95
712	401312	Single Scrim for 710-SG	..... 14.95

### 720-SG

• Similar in design to the 710-SG • Delivers up to 1000W output for more demanding applications • Complete with safety wire and safety glass

Rating: 120V—8.4A at 1000W. Socket: Recessed single contact (R7S). Switch: In-line. Cable: 10' 3-wire grounded. Construction: Vented aluminum. Mounting: Universal— $\frac{3}{8}$ " to  $\frac{5}{8}$ ". Reflector: Soft-grained spun aluminum

720-SG	401109	1000W Focusing Light	..... \$160.00
721	401308	Barndoor for 720-SG	..... 49.95
722	401316	Single Scrim for 720-SG	..... 17.95

### 740-SG

• 650W quartz broad light provides rectangular, flat, even fill illumination over large areas • Permanently attached 4-leaf barndoors provide positive light control with sharp, even cut-off • Large insulated handle for easy adjustment • Perfect for photographic and video applications • Also ideal as a copy light • Complete with safety wire and safety glass

Rating: 120V—5.5A at 650W. Socket: Recessed single contact (R7S). Switch: In-line. Cable: 10', 3-wire grounded. Construction: Vented steel. Mounting: Universal— $\frac{3}{8}$ " to  $\frac{5}{8}$ ". Reflector: Embossed, soft-etched aluminum

740-SG	401106	650W Broad Light, incl. Barndoors	..... \$165.00
FBX	401987	650W Lamp, 3200°K, 120V, Frosted	..... 34.15
742	401319	Single Scrim for 740-SG	..... 14.95

### 750-SG

• Similar in design to the 740-SG • Provides 1000W of fill illumination over large areas • Permanently attached 4-leaf barndoors provide sharp, even cut-off • Ideal for photographic, video, and graphic arts applications • Complete with safety wire and safety glass

Rating: 120V—8.4A at 1000W. Socket: Recessed single contact (R7S). Switch: In-line. Cable: 10' 3-wire grounded. Construction: Vented steel. Mounting: Universal— $\frac{3}{8}$ " to  $\frac{5}{8}$ ". Reflector: Embossed, soft-etched aluminum

750-SG	401107	1000W Broad Light, incl. Barndoors	..... \$175.00
FHM	401989	1000W Lamp, 3200°K, 120V, Frosted	..... 37.14
752	401322	Single Scrim for 750-SG	..... 15.95

### 760

• Fixed focus general purpose 600W quartz fill light for photographic and video applications • High efficiency pebble-finished aluminum reflector provides even coverage over entire lighted area • Safety wire provided

Rating: 120V—5.4A at 600W. Socket: Miniature 2-pin (G5.3). Switch: In-line. Cable: 10', 3-wire grounded. Construction: Double-wall vented aluminum. Mounting: Universal— $\frac{3}{8}$ " to  $\frac{5}{8}$ ". Reflector: Pebble-finish spun aluminum

760	401112	600W Fill Light	..... \$109.95
-----	--------	-----------------	----------------

### 770

• Economical, compact 600W quartz broad unit • Provides rectangular, flat even illumination over large areas • All aluminum construction provides for cool operation • For photographic, video, and graphic arts applications • Safety wire provided

Rating: 120V—5.4A at 600W. Socket: Miniature 2-pin (G5.3). Switch: In-line. Cable: 10', 3-wire grounded. Construction: Vented aluminum. Mounting: Universal— $\frac{3}{8}$ " to  $\frac{5}{8}$ ". Reflector: Embossed, soft-etched aluminum

## Standard Adapta-Lites

- All units are equipped with 660W phenolic sockets with 10', 2-wire cords
- Insulated heat-free handles • 3/8" stand mounting hardware
- Finished in hard, baked-on enamel • Available in sizes from 5" to 12"

**A5 (401001)** 5" reflector, when equipped with a 250W lamp, yields a 60° beam. Excellent for background lighting and special effects . . . . . **\$27.95**

**A8UL (401002)** 8" reflector, when equipped with a 500W lamp, yields a broad, flat 100° beam. Ideal for background lighting and copy work. U.L. . . . . **\$29.95**

**A10UL (401003)** 10" reflector, when used with 250W lamp emits a 50° beam. Ideally suited for key and fill applications. U.L. . . . . **\$29.95**

**A12UL (401004)** 12" reflector, utilizing a 500W lamp, yields a 60° beam. Perfect for key and fill applications. U.L. . . . . **\$39.95**

Standard Adapta-Lites

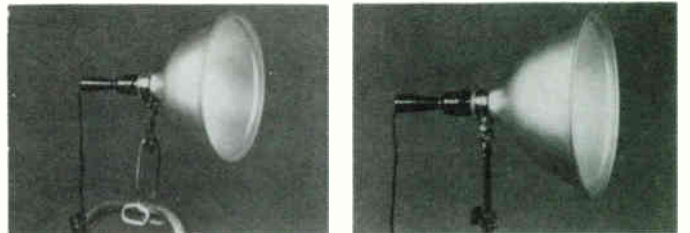

## Economy Adapta-Lites

The same quality that goes into every Smith-Victor product makes these economically priced units a good dollar value.

**90UL (401008)** 10 1/2" general purpose reflector provides an even light pattern with either a 250W or 500W lamp. Equipped with a 600W phenolic socket, 10', 2-wire cord, and insulated heat-free handle. Complete with Model C-1 clamp for mounting versatility. U.L. . . . . **\$29.95**

**100UL (401011)** Inexpensive socket, handle and cord set with C-1 mounting clamp accepts any medium screw base reflector-type lamp up to 500W. Compactness makes this unit an ideal supplementary light source for location work. U.L. . . . . **\$18.95**

**910UL (401015)** Identical to the 90UL Economy Adapta-Lite but with hardware to attach to any 3/8" stand. U.L. . . . . **\$28.95**

Economy Adapta-Lites

## PL Studio Lights

- Reflectors are spun from aluminum alloy • Provides 55% greater light output
- Extruded aluminum power base • Computer-calculated heat sinks
- Power base is mounted on a positive position swivel yoke with handle
- Universal mount fits light stands from 3/8" to 5/8" in diameter
- Heavy-duty 10', 3-wire grounded power cord • Heavy-duty porcelain lamp socket
- On-off rocker switch

**PL12 (401044)** 12" reflector, utilizes up to 500W photo lamp, emits 60° beam. White housing. U.L. CSA . . . . . **\$79.95**

**PL10 (401043)** 10" reflector, utilizes up to 250W photo lamp, emits 50° beam. Blue housing. U.L. CSA . . . . . **\$69.95**

**PL8 (401042)** 8" reflector, utilizes up to 500W photo lamp, emits 100° beam. Red housing. U.L. CSA . . . . . **\$69.95**

Ultra Cool Studio Lights

## Ultra Cool Studio Lights

- Revolutionary design allows performance at much lower operating temperatures than conventional units
- Integral baffles and vents
- Porcelain socket and 10', 3-wire grounded safety cord
- Universal 3/8" to 5/8" swivel mount
- Lamp data is permanently applied on mount
- Convenient, heavy-duty can-mounted on/off switch
- Baked-on enamel color

**A50 (401016)** 5" reflector, when equipped with a 250W lamp yields a 60° beam. Excellent for background lighting and special effects. U.L. . . . . **\$54.95**

**A80 (401017)** 8" reflector, when equipped with a 500W lamp yields a broad, flat 100° beam. Great for background lighting and copy work. U.L. . . . . **\$54.95**

**A100 (401018)** 10" reflector, when used with a 250W lamp, emits a 50° beam. Perfectly suited for key and fill applications. U.L. . . . . **\$54.95**

**A120 (401019)** 12" reflector, when used with a 500W lamp yields a 60° beam. Ideal for key and fill applications. U.L. . . . . **\$69.95**

**A160 (401030)** Professional 16" reflector accepts mogul-base lamps up to 1000W. 60° beam offers soft, diffused lighting. For portrait work or wherever soft light is desired. U.L. . . . . **\$140.00**

# VIDEO CAMERA LIGHTS/ LIGHT PACK

## Q250-SG Video Camera Light

Designed to mount on any video camera shoe, the Q250-SG is a compact 250W flood unit featuring a broad, even beam pattern. Lightweight and equipped with an extra long 15' cord, the light can be adjusted to a variety of angles to fill a host of camera situations. The Q250-SG will enhance colors and eliminate undesirable shadows. Complete with 250W 3200°K, 50 hour quartz lamp, shoe mount bracket and safety glass.

Q250 (401138) . . . . . \$74.95

### Accessory

QL250 (401906) Replacement 250W, 120V, 3200°K quartz lamp for SV Q250. May also be used in SV models 700-SG, 710-SG, 760 and 770. . . . . \$22.50

Q250-SG

## BL 110/Q 150 Soft-Look Video Camera Lights

Brighten your picture taking and give depth and definition to indoor and group shots with one of two light units specially designed for low light video and 35mm cameras. The BL 110 and the Q150 are compact, with a built-in glass safety shield. Their special plastic and metal housing also makes for cooler operation and longer bulb life.

The BL 110 operates on 12V and offers 100W of light. The BL 110 comes equipped with a retractable coil cord and will operate on battery pack.

The Q150 offers 150W of light from standard house current of 115V and is shipped with a 12' cord.

A special screw-type shoe lock keeps the video lights securely attached to your camera, while the holder is also easily adjustable for bounce lighting. An adaptor is available for mounting on stands, tripods and gaffer grips.

BL 110 (631801) . . . . . \$79.95  
Q150 (631101) . . . . . \$89.95

<b>S84</b>	<b>401241</b>	8', 5/8" mount version of S9 folds to 37". ....		<b>\$39.95</b>

## BR10 Roller Base Stand

This professional 4-legged roller base stand is equipped with a 10', 5/8" mount upright. Solid steel legs feature 4 locking ball-bearing casters to prevent creeping or rolling on uneven surfaces

**BR10 401250** ..... **\$170.00**

## BP4 Light Boom

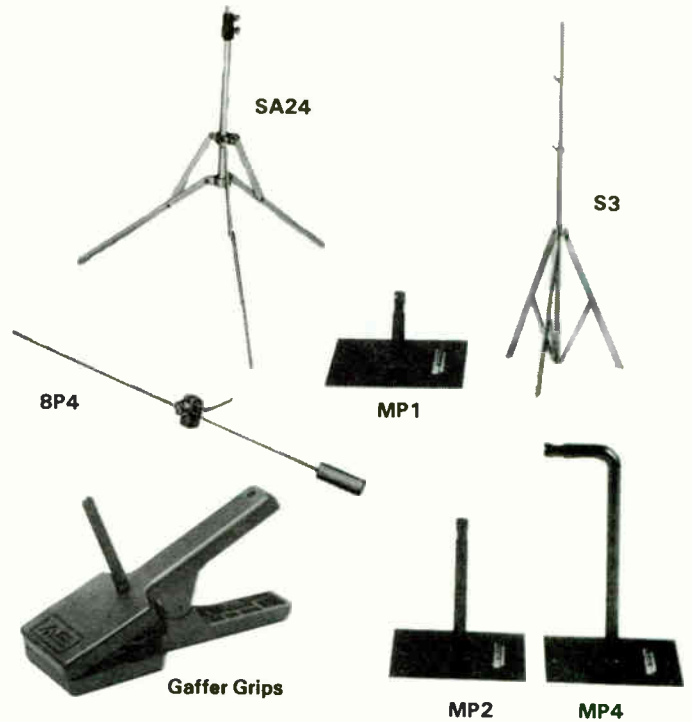

This versatile light boom incorporates a 2 lb. counterweight mounted on a 51" steel shaft. An adjustable locking swivel allows for unlimited positioning. Fits all 3/8" mount stands. Also doubles as a microphone boom.

**BP4 401224** ..... **\$59.95**

## Stand Extension

Add up to 30" to any 3/8"-5/8" mount light stand. May also be used as a crossarm to mount 2 light units on a single stand.

**401260 Stand Extension 5/8" mount**  
(adds 30") ..... **\$12.95**

## 85 Mini Boom

A winning combination—a boom arm and light in one. Using either spot or flood reflector lamps, the mini-boom provides the solution to many lighting problems. 44" aluminum boom with counterweight features a 660W swivel socket easily adjusted to any position by means of attached control handle. Unit comes with 12' cord and fits any 3/8" mount stand.

**85 401012** ..... **\$29.95**

## Mounts

Smith-Victor offers 3 wall mount brackets with various stud lengths to fit a variety of applications. Base plates on all models measure 4" x 6". Wall mounts are ideally suited for permanent installations when a grid system is not feasible. They may also be gaffer-taped to walls for location shooting.

**MP1 401217** 3" long, 5/8" dia. stud ..... **\$22.95**

**MP2 401218** 6" long, 5/8" dia. stud ..... **\$22.95**

**MP4 401220** 9" long, 5/8" dia. stud with  
90° bend ..... **\$24.95**

## C7 C-Clamp

For heavy-duty applications, this professional 5/8" mount, C-clamp is ideal for grid-type applications. Can be clamped to any pipe up to 2" O.D.

**C7 401216** ..... **\$26.95**

## G3-G5 Gaffer Grips

Spring-loaded Lexan® casting takes over where the C1 clamp leaves off. Equipped with a 3" long stud, the gaffer grip clamps to any surface up to 2 1/2" wide. Rubber cleats prevent marring. Pre-drilled to accept an extra stud allowing you to mount 2 lights. Extra studs are available.

**G3 401263** 3/8" mount ..... **\$16.50**

**G5 401264** 5/8" mount ..... **\$16.50**

# TAPE ERASERS

## VX-1401/1601 Videoraser®

### Erases High Grade Videocassettes

The Videoraser VX-1601 erases VHS and Beta videocassettes in seconds for better, cleaner recordings. Reduces wear on expensive video recording heads. Erases regular, High Grade, and Extra High Grade tape. U.L. listed with thermal cutoff switch. 4 lbs. No home video system is complete without it.

- VX-1401 Videoraser . . . . . \$59.00
- VX-1601 Videoraser . . . . . 69.00

## VP-2001 Pulsing Videoraser

The VP-2001 offers 3 power levels, addressing the data processing, consumer video, and professional video markets.

Industrial and broadcast video tapes are the hardest to erase. The VP-2001's powerful pulsing action removes all traces of video and audio signals, and even time codes from all grades of 3/4" U-Matic and 1" and 2" video tape. Handheld, weighs just 4 lbs. With thermal cutoff switch.

- VP-2001 Videoraser . . . . . \$179.00

# COLOR CAMERA

## DXC-M3A Mark II

### 3-Tube MF Saticon™ Color Video Camera

- Diode Gun LOC MF Saticon pickup tubes produce over 750 lines of horizontal resolution with improved depth of modulation
- 58.5dB Signal-to-Noise Ratio (luminance) with low noise FET, and LOC targets, 40 lux minimum illumination (f/1.6, + 18dB gain up, 100 IRE)
- Mixed Field (MF) system: electromagnetic focus and electrostatic deflection for precise focusing, superior linearity of the beam
- Fast f/1.4 prism optics
- Three-position VTR selector handles One-Inch Type C, U-Matic®, and even consumer half-inch VTRs without adaptors
- Choice of lenses with bayonet mount; standard lens for DXC-M3A Mark II is Canon J15X9.5B 15:1 Zoom with macro function
- Choice of three optional electronic viewfinders: standard viewfinder is DXF-M3A 1.5" high resolution monochrome finder which adjusts for left-eye, right-eye and tripod viewing. Diopter adjustment is also provided
- Flexible configurations: studio, portable, medical/scientific, and teleconference
- Split-Field Color Bars conforming to EIA RS-189A for convenient monitor adjustment
- EIA RS-170A Sync Signal Generator for SC-H phase compatibility
- Variable two-line image enhancer with comb filter for crisper images
- Microcomputer Automatic Centering virtually eliminates registration problems; digital memory saves settings even when power is off
- Microcomputer Automatic White and Black Balance with digital memory for stable accurate color and tone rendition
- Character Generator for status displays, warnings, and superimposition of shooting information on the video output
- "Automatic Iris Close" when power is off, during Preheat, during Color Bars, during Black Balance protects tubes from accidental image retention or "Burn"
- Zebra pattern video level indicator in viewfinder for convenient and accurate manual video level adjustment
- Adjustable Master Pedestal with viewfinder indication for operator control of dark contrast and noise
- Auto-iris override level with viewfinder indication for unusual lighting situations

# COLOR CCD CAMERA

## DXC-3000/1 CCD Color Video Camera

- Three Interline Transfer CCD Chips: each  $\frac{2}{3}$ " chip has over 250,000 picture sensing elements for over 520 lines of horizontal resolution
- 56dB Signal-to-Noise Ratio: thanks to on-chip preamplifier and Cor-related Double Sampling (CDS) circuit
- Excellent sensitivity in low light: 25 lux minimum illumination (F1.7, + 18dB gain up)
- Fast F1.4 prism optics
- Built-in microphone plus XLR connector for external mike
- Four-position VTR selector handles 1" Type C, U-Matic, and even consumer  $\frac{1}{2}$ " VTRs without adaptors
- Choice of more than 10 lenses with bayonet mount; standard lens for DXC-3000K/1 is VCL-1012BY 12:1 Zoom
- Choice of three optional electronic viewfinders: standard viewfinder is DXF-3000 1.5" high-resolution monochrome finder which adjusts for left-eye, right-eye and tripod viewing
- Flexible configurations: studio, portable and medical
- Built-in Color Bar generator for convenient monitor and system adjustment
- Sync Signal Generator
- Two-line image enhancer with comb filter for crisper images
- Microcomputer Controlled Automatic White Balance with viewfinder status displays and digital memory to store settings up to 12 hours
- Microcomputer Controlled Automatic Black Balance with digital memory
- Character Generator for status displays, warnings, and superimposing shooting information on the video output
- Automatic Iris Close when power is off, during Preheat, during Color Bars, during Black Balance
- Zebra pattern video level indicator in viewfinder for convenient manual video level adjustment
- Adjustable master pedestal with viewfinder indication
- Adjustable auto-iris level with viewfinder indication

# COLOR CAMERA

## DXC-1850HBS Trinicon® Color Camera

- 2/3" HBST (High Band Saticon Trinicon) pickup tube for the best possible picture from a single-tube color video camera
- HBST pickup tube assures high resolution, good color fidelity and uniformity, low image lag and retention
- Lightweight camera head (less than 1 lb. 9 oz.) for precision interface with optical equipment: microscopes used in medicine, biology, metallurgy
- Full range of automatic controls for very simple, very safe operation
- Ideal for surveillance and teleconferencing, especially when lighting and installation space is limited
- 3-Mode white balance: automatic, manual and halogen lamp
- Red Hue Expander, Red Detail Control for enhancing and delineating red color nuances
- Provision for handle on control unit, which is 19" EIA Standard for rackmounting
- Safety conscious features include an exterior finish highly resistant to alcohol and disinfectants, electrical leakage of less than 10 micro Amps and solid housings not prone to damage from accidental spills
- On-screen illumination indicating lines simplify illumination adjustments
- Uniformity control ensures optimum color quality with wide variety of optical instruments by compensating for color hue distortions
- Built-in two line type Vertical Image Enhancer
- Automatic Beam Optimizer—ABO
- VBS Genlock capability
- Automatic and manual gain/iris control
- Chroma level control

The DXC-1850 with HBST pickup tube delivers the best possible picture in a single-tube camera. The camera head, by virtue of its compact design and extremely light weight, is ideally suited for use with specialized fiber optics and a wide range of other optical instruments in fields ranging from medicine to metallurgy.

## Specifications

<b>Pickup tube:</b>	2/3" HBST tube
<b>Scanning system:</b>	525 Lines 30 frames NTSC 2:1 interlace
<b>Sync system:</b>	Internal or external
<b>Horizontal resolution:</b>	400 lines
<b>Sensitivity:</b>	2000 lux f/.4
<b>Automatic gain control range:</b>	120-2000 lux (with f/2.5 lens)
<b>Output:</b>	1.0 Vp-p, sync negative 75 ohms unbalanced x3
<b>Video signal-to-noise ratio:</b>	53dB
<b>Lens mount:</b>	C-mount
<b>Power requirement:</b>	AC 120V, 60Hz +11 to +16 VDC
<b>Power consumption:</b>	AC 26W DC 18W
<b>Operating temperatures:</b>	0°C to +40°C
<b>Weight:</b>	CHU: 1 lb. 9 oz. (0.71kg) CCU: 17 lb. 10 oz. (8.2kg)
<b>Dimensions:</b>	CHU: 2-1/4" x 2-3/8" x 7-3/4" HWD (55mm x 59mm x 196mm HWD); CCU: 3-1/2" x 16-3/4" x 13-3/8" HWD (88mm x 424mm x 340mm HWD)

DXC-1850 ..... \$9350.00

## Supplied Accessories

- Camera cable (10m) • 75 ohm coaxial cable with BNC connector (10m) • AC power cord • Camera head bracket • Bracket set for 19" rackmounting • Filter set (ND4, W14 and replacement tool) • Battery (Eveready M542)

## Optional Accessories

- VCL-1106YB 6:1 auto iris power zoom lens • VCL-08S Wide angle lens • CCJ-10 10m camera cable • CCJ-25 25m camera cable • CCJ-50 50m camera cable • MVA-11 Microscope adaptor • MVA-102 Endoscope adaptor for Olympus • MVA-102R Endoscope adaptor for C. Storz.

# COLOR CAMERA

## DXC-1820/1821 SMF Trinicon® Color Video Camera

- Flexible configurations: studio, portable and special purpose/scientific
- Choice of lenses: S-Mount (DXC-1820); choice of C-Mount lenses (DXC-1821); standard lens for DXC-1820KA is VCL-1012SY 12:1 Zoom
- Choice of four optional electronic viewfinders: standard viewfinder is DXF-1820 1.5" high-resolution monochrome finder with warning indicators for VTR/tape problem, low battery, low light, and low video output
- Microcomputer automatic white balance with digital memory even when power is off; 3200°K Preset position for quick start-ups without white balancing
- Excellent low-light sensitivity with switchable gain; shooting down to 4 fc (40 lux) with gain at +18dB
- VTR selector handles four kinds of VTRs without adaptors
- Variable fade-in/fade-out from 0 to 5 seconds
- Negative/Positive switch for shooting photographic negatives
- Color Bar Generator for easy system set-up
- Built-in electret condenser microphone
- Intercom headset jack on camera head
- Diode Gun SMF Trinicon® sophisticated single-tube system
- Mixed field (MF) system: electromagnetic focus and electrostatic deflection for precise focusing, superior linearity
- Saticon® pickup for minimum lag excellent low-light sensitivity
- Trinicon color separation system for remarkable color purity
- Automatic Beam Optimizer (ABO) handles intense light and highlights without comet tails or blooming

### Specifications

- Signal-to-Noise Ratio:** 53dB in luminance channel  
**Minimum Illumination:** 4.0 fc (40 lux) at f/1.6, +18dB gain up  
**Sensitivity:** 186fc (2000 lux) f/4 at 3200°K, 89.9% reflectance
- Horizontal Resolution:** 300 lines  
**Pickup Tube:** 2/3" diode gun SMF Trinicon with built-in bias light, CT-2232
- Lens Mount:** DXC-1820: S mount, DXC-1821: C mount  
**Optical Filter:** 3200°K, 4800°K, 5800°K, white fluorescent lamp
- Signal System:** EIA standard, NTSC color  
**Sync System:** Internal sync, or genlock  
**Video Output:** BNC (1.0V p-p, 75 ohms)  
**VTR/CCU:** Sony Q type 14-pin (automatic detection)  
**Mike Input:** Mini jack (-60dB, 600 ohms)  
**Genlock:** BNC (composite or black burst, 75 ohms)  
**Gain Switch:** Auto (0 to +12dB), 0, +6, +12, +18dB  
**Vertical Enhancer:** 1H  
**Power Consumption:** 12W (camera head only); 14W (with 1.5" viewfinder)
- Operating Temperature:** 32° to 104°F (0° to 40°C)  
**Weight:** 6 lbs., 6 oz. (camera head only); 11 lbs. 11 oz. (camera + 12X zoom lens + 1.5" viewfinder + shoulder pad)
- Dimensions:** 3 5/8" H x 7 1/8" W x 12 7/8" D
- Configurations**  
**DXC-1820KA Portable Kit:** DXC-1820 camera head; DXF-1820 1.5" viewfinder; DC-6 battery adaptor; LC-1820 carrying case; VCL-1012SY lens; CCQ-2AR cable . . . . . \$3650.00  
**DXC-1820 Portable Kit:** Same as above, without lens . . . . . \$3100.00  
**PAC 1820/Portable Kit:** Same as above, with VCL-914SY (14X) lens . . . . . \$3900.00  
**Studio 1820A:** DXC-1820 camera head; DXF-40 and DXF-1820 viewfinders; DC-6 battery adaptor; LC-1820 carrying case; VCL-1012SY lens; CCQ-2AR cable; CCU-1820 control unit; RMM-1800 rackmount adaptor; CMA-8AC adaptor; VCT-12 tripod adaptor; LO-25 lens . . . . . \$6510.00

DXC-1820

**DXC-1821H:** DXC-1821 camera head with C-type lens mount; CCQ-2AR cable . . . . . \$2895.00

**Studio 1821A:** DXC-1821 camera head, DXF-40 viewfinder; VCL-1110YA zoom lens; CCQ-2AR cable; CCU-1820 control unit; RMM-1800 rackmount adaptor; CMA-8AC adaptor; LO-21 lens kit . . . . . \$5850.00

### Lenses and Lens Accessories

- VCL-1206A** 6:1 zoom 12.5-75mm f/1.8, C mount . . . . . \$ 380.00  
**VCL-08S** Wide angle lens 8mm f/1.4, C mount . . . . . \$350.00  
**VCL-1110YA** 10:1 zoom, 11-110mm f/1.8, 2 speed power zoom, auto iris, macrofocus . . . . . \$725.00  
**VCL-914SY** 14:1 zoom lens, 9-126mm, f/1.6, S lens mount . . . \$1450.00  
**LO-21** Flexible cable drive for tripod control of zoom and focus of VCL-1110Y lens . . . . . \$620.00  
**LO-24ZS** Lens conversion kit (for zoom) for VCL-1010SY or VCL-914SY . . . . . \$700.00  
**LO-24F** Lens conversion kit (for focus) for VCL-1010SY or VCL-914SY . . . . . \$480.00  
**LO-25** Lens conversion kit for VCL-1012SY lens . . . . . \$1130.00

### Camera Accessories

- CCU-1820** Camera control unit for DXC-1820, DXC-1821H . . \$1140.00  
**DXF-40** Detachable 4" viewfinder for DXC-1820, DXC-1821H. Also can be used as rackmountable monitor with RMM-1800 . . . . . \$600.00  
**DXF-50** Detachable 5" electronic high resolution viewfinder for DXC-1820, DXC-1821H . . . . . \$1000.00  
**DXF-1820** 1.5" viewfinder for DXC-1820, DXC-1821H . . . \$630.00  
**LC-2003** Carrying case for RMM-1800, CCU-1820, CMA-8, DXF-40 . . . . . \$310.00  
**MVA-12** Microscope attachment for DXC-1821H, DXC-1850 . . . . . \$660.00  
**MVA-102** Endoscope (Olympus) adaptor for DXC-1821H, DXC-1850 . . . . . \$3300.00  
**MVA-102R** Endoscope (Storz) adaptor for DXC-1821H, DXC-1850 . . . . . \$3500.00  
**RMM-1800** 19" rackmount for CCU-1820, CMA-8, DXF-40 . . \$150.00  
**VCT-12** Tripod adaptor for DXC-1820 only . . . . . \$110.00  
**8P-60** Battery DXC-1800, DXC-1820, DXC-1821H, VO-4800, SLO-340 and SEG-2000A . . . . . \$90.00  
**8P-65AN** NiCad battery for DXC-1800, DXC-1820, DXC-1821H . . . . . \$530.00  
**CMA-8** AC adaptor for VO-6800, DXC-1820, DXC-1821H . \$500.00

## DXC-101/102 CCD Color Video Cameras

- CCD Semiconductor image sensor
- No image burning
- Excellent picture reproduction due to zero geometric distortion
- Long life and high reliability
- Low lag
- Free from magnetic field interference
- High sensitivity in minimum illumination of 30 lux with f/1.4 lens
- High resistance to vibration and shock
- Shooting start-up only 0.5 seconds
- 320 TV lines of horizontal resolution
- Accepts all types of C-mount lenses with auto-close functions
- DXC-102 offers cable extension up to 300m, DXC-101 up to 100m
- Better than 48dB signal-to-noise ratio
- Power consumption DXC-101: 4.2W and DXC-102: 6.0W
- DXC-102 genlock capacity
- DXC-101: 2.6 x 2.4 x 6.1"
- DXC-102: 2.6 x 2.4 x 8.0"
- DXC-101: 1 lb., 3 oz. DXC 102: 1 lb., 12 oz.

DXC-101 . . . . . \$1465.00  
DXC-102 . . . . . 1720.00

### Supplied Accessories

- Lens mount cap
- Connecting cable CCDC-10

DXC-102

DXC-101

### Optional Accessories

VCL-16Y	Auto iris lens with C-mount f/1.4, 16mm . . .	\$360.00
VCL-08Y	Auto iris lens with C-mount f/1.4, 8mm . . .	430.00
CMA-10	AC adaptor with remote control capability for DXC-102 . . . . .	410.00
CMA-D1	AC adaptor for 2 DXC-101's . . . . .	270.00

## SSC-D5 Monochrome CCD Camera

- 2/3" CCD image sensor with interline transfer technology for high-resolution, long life, and high resistance to shock and vibration
- High sensitivity in low light (min. illum. 1.5 lux with f/1.4 lens, without infrared cutoff filter; 3.0 lux with infrared cutoff filter)
- 380 lines horizontal resolution
- 50dB S/N ratio
- 2.5W power consumption
- Multiplexed power/video input through single coaxial cable (with CMA-D5 power adaptor)
- Accepts C-mount standard auto-iris lenses (4-pin connector)
- Adjustable back focus length
- Gamma switchable
- AGC on/off selectable
- H (Horizontal) phase adjustable
- Genlock capability (internal or external sync) (VBS, VS or BS)
- Top and bottom 1/4" — 20 mounting receptacles
- Built-in detachable infrared ray cutoff filter
- 1 15/16" H x 1 5/16" W x 4 11/16" D
- 10.2 oz.

### CMA-D5 Power Adaptor

- 120VAC, 60Hz
- BNC connectors
- AC power cord supplied
- 16W
- 2 5/8" H x 6 3/4" W x 5 1/8" D
- 3 lbs.

SSC-D5

The CMA-D5 is the AC adaptor designed for the SSC-D5. It features phantom power capability. The SSC-D5 can also be used with the CMA-D1.

SSC-D5	CCD Camera . . . . .	\$899.95
CMA-D5	AC Adaptor . . . . .	219.00
CMA-D1	Camera Adaptor . . . . .	270.00
VCL-08Y	Auto Iris Lens, 8mm . . . . .	430.00
VCL-16Y	Auto Iris Lens, 16mm . . . . .	360.00
CCDC-10	DC Power Cable 32' . . . . .	50.00
CCDC-25	DC Power Cable 82' . . . . .	80.00
CCDC-50	DC Power Cable 165' . . . . .	140.00

H6SND43B 6:1 Zoom lens, 12.5-75mm, f/1.2, C-mount, with built-in ND, requires CRD-1B	970.00
VCL-08D1 Wide angle lens, 8mm, f/1.6, Mini bayonet	470.00
VCL-08S Wide angle lens 8mm f/1.4, C-mount	350.00
VCL-08Y Wide angle lens, 8mm, f/1.4, C-mount	430.00
VCL-16Y Fixed angle lens, 16mm, f/1.4, C-mount	360.00
VCL-914SY 14:1 Zoom lens, 9-126mm, f/1.6, (S lens mount)	1450.00
VCL-1110YA 10:1 Zoom lens, 11-110mm f/1.8, 2 speed power zoom, Auto iris, macrofocus, C-mount	725.00
VCL-1206A 6:1 Zoom lens 12.5-75mm f/1.8, C-mount	380.00

## Remote Controls for Fujinon Lenses

FMM-6A Focus module for A12X9BERM-88, A14X9BERM, A16X9.5BRMG, and A18X8.5BERM when used with RM-S5A	\$ 170.00
FMM-7 Focus module for A7X78RM lens when used with RM-S5A	170.00
LO-1011 Studio remote control kit for Fujinon Lenses: A12X9BERM-88, A16X9.5BRM, A14X9BERM, A18X8.5BERM, VCL-1012BY (A12X10BRM)	1095.00
RMD-2 Remote control box for A10X10BMD-D8, A16X9.5BMD-D8. Controls zoom, focus, and iris	825.00
RM-S5A EFP/Studio rear control kit. Includes: CFH-1 focus handle, SRD-52 zoom grip handle, CFC-990 drive cable, ECC-1000 extension cable, MCA-1 (2 sets) handle clamps. Kit requires optional focus module (FMM-7 or FMM-6A)	1325.00

## Extension Cables for Fujinon Lenses

ECM-025F Extension cable between A10X10BMD-DB, A16X9.5BMD-D8 and RMD-2/25'	\$350.00
ECM-050F Extension cable between A10X10BMD-DB, A16X9.5BMD-D8 and RMD-2/50'	425.00
ECM-100F Extension cable between A10X10BMD-DB, A16X9.5BMD-M8 and RMD-2/100'	725.00

## Remote Controls for Canon Lenses

LO-1309 Studio remote control kit for J15X9.5B, J13X9BIE2 and J18X8.5B	\$1170.00
--	-----------

## Remote Controls for Tamron Lenses

LO-24F Lens conversion kit (for focus) for VCL-1010SY or VCL-914SY	\$480.00
LO-24ZS Lens conversion kit (for zoom) for VCL-1010SY or VCL-914SY	700.00

## Remote Controls for Other Color Camera Lenses

CC-7T Remote control unit	\$ 440.00
CC-8T Remote control unit	320.00
CRD-18 Remote control unit	490.00
LO-21 Flexible cable drive for tripod control of zoom and focus of VCL-1110YA lens	620.00
LO-25 Studio remote control for VCL-1012SY lens for zoom and focus	1130.00

## Viewfinders

DXF-1820 1.5" viewfinder for the DXC-1B20/1B21H	\$ 630.00
DXF-3000 1.5" viewfinder with diopter adjustment for DXC-3000	525.00
DXF-M3A 1.5" viewfinder for DXC-M3A, Mark II	820.00
DXF-40 4" viewfinder, can be used as a rackmountable monitor with RMM-1800	600.00
DXF-50 5" high resolution viewfinder	1000.00

## Camera Control Units and Related Accessories

CCU-M3 Camera control unit for DXC-3000/M3/M3A Mark II, requires CMA-B AC adaptor	\$1500.00
CCU-1820 Camera control unit for DXC-1B20/1B21H. Requires: CMA-B AC adaptor	1140.00
CA-M3 CCU cable extension adaptor for 1000' control for DXC-3000/M3/M3A Mark II requires CMA-9 AC adaptor and CCZ-M10/M100 cable	2200.00

## Camera Accessories

BC-20 Dual battery charger for BP-20/A and BP-60	\$ 195.00
BC-1WA Battery charger for four NP-1A	405.00
BC-65AN Battery charger for BP-65AN	85.00
BC-1000 Battery charger for six BP-20A and BP-60	575.00
BP-60 Battery for DXC-1B20, DXC-1B21H and CCU-1B00/M3	90.00
DC-8G Battery adaptor for Two NP-1A	400.00
CAC-2 Battery attachment for DXC-M3A for DC-8G	54.00
CAC-21 Battery attachment for DXC-3000 for DC-BG	65.00
DC-65AN Battery attachment for BP-65AN, used with DXC-1B20	172.00
DC-309AN Battery attachment for BP-65AN used with DXC-M3A	85.00
BP-65AN 4AH NiCad battery for DXC-M3A series, DXC-3000 series and DXC-1B20 series	530.00
NP-1A NiCad battery, 1.7AH	80.00
CMA-8 AC adaptor for VO-6B00, DXC-1B20, DXC-1B21H, DXC-3000, DXC-M3A Mark II	500.00
CMA-9 AC adaptor for CA-M3	1000.00
CMA-10 AC adaptor with remote control capability for DXC-102	410.00
CMA-D1 AC adaptor for DXC-102	270.00
CMA-D5 AC adaptor for SSC-D5 phantom power (single wire video/DC) with 75 ohm coax	219.00
C-74 Shotgun type microphone	860.00
CAC-1 Microphone holder for DXC-M3A Mark II	46.00
CAC-11A Microphone holder for DXC-3000	110.00
ECM-672 Shotgun type microphone	475.00
DR-10A Headset for intercommunication	90.00
DR-100 Lightweight headset for intercommunication	120.00
CAC-3 Chest rest for DXC-M3A	110.00
LC-2003 Carrying case for RMM-1800, CCU-1B20, CMA-8, DXF-40	310.00
LC-3001 Carrying case for DXC-3000	185.00
LC-M3A Carrying case for DXC-M3A	500.00
EB-3000 Extension board for DXC-3000	130.00
EB-M3 Extension board for DXC/M3/M3A Mark II	130.00
MVA-12 Microscope attachment with C mount	660.00
MVA-31 Microscope adaptor with bayonet mount	940.00
MVA-32 Microscope adaptor with variable light control with bayonet mount	TBA
MVA-102 Endoscope (Olympus) adaptor with C mount	3300.00
MVA-102R Endoscope (Storz) adaptor with C mount	3500.00
MVA-302 Endoscope adaptor for Olympus with bayonet mount	3500.00
RMM-1800 19" metal rackmount for CCU-1B20, CCU-M3, CMA-8, DXF-40	150.00
VCT-12 Tripod adaptor for DXC-3000 series and DXC-1B20	110.00
VCT-20A Tripod	130.00
VCT-M3 Tripod adaptor for DXC/M3A Mark II	160.00

## Cables

CCDC-10 DC power cable for DXC-101, 32'	\$ 50.00
CCDC-25 DC power cable for DXC-101, 82'	80.00

# U-MATIC RECORDERS/PLAYERS

## VP-5020 U-Matic Videocassette Player

- Large and user friendly function buttons • Programmed operation
- Simple remote control • Picture search • Noiseless still picture
- Long pause • Digital tape time counter • Timer operation • Auto rewind mode • RF modulator • Horizontal resolution: Color 240 lines
- 50-15,000Hz frequency response • 53W power consumption • 8 x 5 forward and reverse search • 7.6" H x 16.7" W x 19.30" D • 16kg

VP-5020 .....\$1595.00

VP-5020

## VP-7000 U-Matic Videocassette Player

- Highly reliable U-matic format • Address and frame codes for accurate random access and external computer control • User friendly
- System versatility • External sync • RS-232C interface capability
- 33-pin parallel remote control interface • Real time counter • Timer operation • Programmed operation • RF modulator • 4-unit height/rackmountable
- Still picture • Quick start • Self-diagnostic functions • 7.6" H x 16.7" W x 19.3" D • 35.3 lbs.

VP-7000 .....\$2225.00

## VO-5600 U-Matic Videocassette Recorder/Player

- Front loading tape transport • Aluminum diecast chassis • Direct drive for both drum and capstan • Digital servo LSI with "Phi Square Servo"
- DC motor reel servo • x5 Forward and reverse search
- Noiseless still—Fine still picture • 19" rackmountable • High picture quality
- Tilt-out control panel • Switching regulator power supply provides wide range of voltage and frequency, with low power consumption—55W
- Exclusive connector for RX-303 and RX-353
- Random access/interactive capability • Microcomputer based logic control • External sync lock capability • 9<sup>3</sup>/<sub>8</sub>" H x 17<sup>5</sup>/<sub>8</sub>" W x 20<sup>3</sup>/<sub>8</sub>" D
- 50 lbs., 9 oz.

VO-5600 .....\$2950.00

VO-5600

## VO-5630 U-Matic Videocassette Recorder/Player

- High efficiency power supply permits operation on 110 to 120V, 50/60Hz
- Front-loading tape transport • Tilt-out control panel • Aluminum diecast chassis
- Direct drive drum and capstan, and digital servo IC
- High speed search at 5 times normal speed in forward/reverse
- Still frame capability • Long pause with automatic tape protection
- Built-in "programmed operation" function allows automatic tape segment repeat
- End-of-tape automatic rewind • Optional RF modulator allows playback on ordinary TV receiver
- Optional timer allows unattended automatic playback stop and start
- Random access/interactive capability
- Exclusive data in/out connector for RX-303CE/RX-353CE automatic search controls
- External sync input capability
- PAL/SECAM color recording/playback • NTSC color playback
- Dub-in/dub-out connectors • Audio dubbing capability • Audio limiter function • 9<sup>3</sup>/<sub>8</sub>" H x 17<sup>5</sup>/<sub>8</sub>" W x 20<sup>3</sup>/<sub>8</sub>" D • 51 lbs., 7 oz.

VO-5630 .....\$3850.00

VO-5630

## VP-5040 U-Matic Videocassette Player

- Player version only of VO-5630 • PAL/SECAM color recording/playback • NTSC color playback

VP-5040 .....\$2375.00

## VO-5800H High Resolution B/W Videocassette Recorder/Player

- Same features as VO-5800 plus horizontal resolution monochrome more than 408 lines
- U-scan high speed picture search (with RM-580 and KCS tape)
- Exclusive connector for RX-353 or RX-303 • 2 audio tracks
- Remote control of record start and stop for continuous time lapse recording
- Automatic video gain control • 9<sup>3</sup>/<sub>8</sub>" H x 17<sup>5</sup>/<sub>8</sub>" W x 20<sup>1</sup>/<sub>2</sub>" D • 53 lbs.

VO-5800H .....\$7975.00

# U-MATIC RECORDER/PLAYER

## VO-6800 U-Matic Portable Recorder/Player

- Real time tape counter
- Logic control system
- Backspace editing capability
- Picture search
- Soft eject
- Rain and dust proof
- Remote control capability

A Video Confidence Head makes it possible to monitor just-recorded images simultaneously when the VO-6800 is in the Rec mode. These images can be seen in the camera viewfinder when the return video button on the camera is pressed. This function allows the operator to make sure that what he is shooting is actually being recorded on the tape.

Two NiCad Batteries (NP-1A) can be installed for long-time battery operation (approximately two hours for VTR recording or one hour with the Sony DXC-M3A Mark II.) Since the unit can also be powered by a single battery, continuous recording or playback is possible if two batteries are used in tandem. Pop-up battery compartments are adopted for easy battery replacement.

The Tape Remaining Time can be seen in the camera viewfinder when the return video button is pressed. Eight different indications can be displayed, 15 min, 10 min, 5 min, 4 min, 3 min, 2 min, 1 min and Tape Before End. (Accuracy is  $\pm 7$  sec. when using Sony's KCS-10K/20K Series). This function conveniently lets the operator know just how much shooting time he has left.

A Complete Warning System notifies the operator of recording conditions in three different ways.

- 1.) LED indicators on the control panel of VTR.
- 2.) Warning sound (1kHz) output to the earphone of the VTR.
- 3.) Blinking warning lamp in the camera viewfinder.

This threefold warning system makes sure the operator knows in advance of any malfunctions so that the recording will come out perfect from the first time.

A sendust head and XLR connector (balanced) bring the signal-to-noise ratio to 50dB and widen the frequency response range from 50 to 15,000Hz. Wow and flutter is reduced to a mere 0.2%, thanks to a highly accurate capstan motor.

Using the optional RFK-634 RF modulator, you can play back tapes on a conventional TV receiver.

Using the optional RM-680 remote control unit, you can control Rec, Play, F. Fwd, Rew, Pause, and Stop operations. (The cable can be extended up to 50 meters).

VO-6800

# VTR CONTROLLERS/ ACCESSORIES

## RM-440 Automatic Editing Control Unit

- Interfaces with both U-matic Editing Recorder/Players and Betamax Editing Recorder/Players, allowing U-matic to U-matic, Beta to Beta or Beta to U-matic editing
- Edit point memory system memorizes the edit-in points for a player and a recorder and 1 edit-out point for either machine
- Insert and assemble editing capabilities
- Preview function allows rehearsal before actual edit is made
- Review function allows instant edit review
- Return/jump function: in preview mode, tapes return to edit-in point; in review, tape fast forwards to a point 5 seconds before the cutout point, then returns to normal speed to review edit-out section
- Butt edit and trim edit functions
- Cue-Out connector provides cue signal for camera recording and computer generated graphic insertion
- Automatic safety pause release
- Weight: 4 lbs. 14 oz.
- Dimensions: 3<sup>1</sup>/<sub>8</sub>" H x 15<sup>3</sup>/<sub>8</sub>" W x 8<sup>3</sup>/<sub>4</sub>" D

RM-440 .....\$2205.00

## RX-353 Programmable Auto Search Control

- Handheld remote keyboard
- Memorizes locations of up to 63 programs and commands automatic playback of any 8 segments in any sequence
- Compatible with most Betamax and U-matic units
- Functions include automatic repeat plus skip and return
- Segment data recording capability for automatic playback retrieval
- Timer-activated programmable operating capability with Betamax and U-matic units
- Weight: 1 lb. 5 oz.
- Dimensions: 1<sup>1</sup>/<sub>2</sub>" H x 3<sup>5</sup>/<sub>8</sub>" W x 7<sup>1</sup>/<sub>8</sub>" D

RX-353 .....\$550.00

RX-303

## RX-303 Programmable Auto Search Control

- Handheld remote keyboard
- Memorizes locations of up to 63 programs and commands automatic playback of any 8 segments in any sequence
- Compatible with most Betamax and U-matic units
- Functions include automatic repeat plus skip and return
- Weight: 1 lb. 2 oz.
- Dimensions: 1<sup>1</sup>/<sub>2</sub>" H x 3<sup>5</sup>/<sub>8</sub>" W x 7<sup>1</sup>/<sub>8</sub>" D

RX-303 .....\$460.00

## Type 5 Accessories

### RM-500 Remote Control Unit

- Basic function remote control
- Functions: Stop, FF, Play, Rew, Pause, Rec, Dub, X5 Search Forward, X5 Search Reverse
- DC operation (power supplied from VTR)
- Cable length: 10' (3m) can be extended to 60' (18m)

RM-500 .....\$255.00

### RM-555 Multi-Unit Remote Controller

- Simultaneous control with RM-500 or RM-580: Up to 5 VTRs controlled simultaneously; Up to 4 RM-555s can be connected in series for control of up to 20 VTRs
- Sequential record/playback with DA-500 or VCS-500: Up to 5 VTRs can be controlled to record or play back in one sequence or in continuous sequences; Timer operation capability enables unattended operation
- Individual control with VCS-500 and RM-V5: Any 1 of up to 5 VTRs can be selected with the RM-V5 for control by an RM-500, RM-580 or RM-440. VCS-500 will select appropriate video and audio outputs. RM-300 or RX-303/RX-353 can be used for random access multi-VTR operation

RM-555 .....\$2255.00

### RM-580 Remote Control Unit

- Full function remote control with Bidirex search dial
- Functions: Stop, FF, Play, Rew, Pause, Search (Bidirex Dial), Rec, Edit, Pre-Roll
- LED tape timer, includes frame counts
- DC operation (power supplied from VTR)
- Pre-roll start jack for remote start
- Cable length 10' (3m) can be extended to 60' (18m)

RM-580 .....\$820.00

### RM-690 Remote Control Unit

- For VO-6800, VP-5020/VP-5040, BVU-150
- Compact size and light weight
- Handheld
- Search function
- Easy operation with flexible wire
- FF, REW, REC, Play, Pause, Stop and Search

RM-690 .....\$145.00

### RM-V5 VTR Selector

- Up to 5 VTRs can be selected with RM-555
- 1 out of 5 selection with VCS-500
- Selection can be expanded to 1 out of 1-4 or 1 out of 5-9 using VCS-500 group selector switch
- Remote cable length 10' (3m) with 20 pin connector can be extended up to 160' (50m)

RM-V5 .....\$285.00

RM-580

RM-555

VCS-500

## DA-500 Video and Audio Distribution Amplifier

- 1 video input (BNC), 2 channel audio input RCA and 1 dub input (7 pin)
- 5 outputs of each input
- Individual direct outputs of each input permit branching to additional distributors
- Single input can be expanded to a maximum of 20 outputs with up to 4 DA-500s
- Power requirements: 120VAC ± 10%, 20W

DA-500 .....\$890.00

## VCS-500 Video and Audio Switcher

- 5 video inputs (BNC), 2 channel audio (RCA) and 2 dub-in inputs (7 pin)
- 1 video output (BNC), 2 channel audio output (RCA) and dub-out (7 pin)
- 1 sync input (BNC) and 5 sync outputs (BNC) for external sync-lock operation
- Vertical interval switching
- Interface with RM-V5 or RM-555
- Dual VCS-500s can be used for control of up to 9 inputs
- Power consumption: 20W

VCS-500 .....\$1525.00

Teaneck, NJ 07666  
(201) 833-5200

# FRAME CODE SYSTEM

FCG-700

## FCG-700 Frame Code Generator

### 6 Digit Frame Code

The FCG-700 Frame Code Generator generates a 6 digit numeral for each frame which is inserted into the seventeenth and eighteenth lines of the vertical blanking intervals of the video signals to be recorded onto videocassettes. Since the FCG-700 generates frame codes sequentially from 000000 to 299999, it is capable of generating frame numbers for 2 hours and 46 minutes for NTSC and 3 hours and 20 minutes for PAL. The starting point can be set anywhere between 000000 to 299999, and after 299999, it goes back to 000000 automatically and continues sequential generation.

### Start Trigger Setting

To assure precise and proper start-up of Frame code generation, the FCG-700 is capable of selecting three start triggers by setting the start trigger switch on the front panel.

### External Pulse

The FCG-700 can accept an external pulse trigger through the External Pulse In connector on the rear panel.

### Cue Tone

As soon as the FCG-700 detects a 1kHz cue tone, it starts generating the Frame Code.

### Manual Mode

Generating starts by simply pressing the start button on the front panel.

In the External Pulse and Cue Tone modes, a preroll time can be set between 0 and 9999 frames so that the user can set the beginning of the Frame Code exactly at the desired position. The default set time is 150 frames for NTSC and 125 frames for PAL.

### Character Display

The Frame Code and the status of the Frame Code Generator can be superimposed on the picture output from the VIDEO OUT-2 connector while recording. By setting the superimpose switch, the Frame Code and the status, only the Frame code, or no indications can be superimposed on the screen.

### Specifications

<b>Power Requirements:</b>	120VAC, 50/60Hz (NTSC) 220VAC ~ 240VAC, 50/60Hz (PAL)
<b>Power Consumption:</b>	10W (120V) 12W (220 ~ 240V)
<b>Dimensions:</b>	Approx. 1.9" H x 16.7" W x 10.1" D (49 x 424 x 256mm)
<b>Weight:</b>	Approx. 7.3 lbs (3.3kg)
<b>Video In:</b>	BNC, 1.0Vp-p (75 ohms on/off selectable)
<b>Video Out 1:</b>	BNC, 1.0Vp-p (at 75 ohm load)
<b>Video Out 2:</b>	BNC, 1.0Vp-p (at 75 ohm load)
<b>Audio In:</b>	XLR, +4dBs phono, -5dBs
<b>Audio Out:</b>	XLR, +4dBs phono, -5dBs
<b>External Pulse In:</b>	BNC, TTL level
<b>Supplied Accessories:</b>	Rackmount brackets, Operation manual, AC cord
<b>FCG-700</b> .....	<b>\$3550.00</b>

## BKU-701 Computer Interface Board

The BKU-701 reads the Frame Codes that have been recorded on the videocassette's tape when it is installed in a VTR. The BKU-701 provides an RS-232C interface and allows the VTRs to be controlled from an external computer or the RX-707. VIDEO/AUDIO signals can be output or muted by setting the dip switches on the BKU-701 on or off. These switches also allow the baud rate of the BKU-701 to be selected from 1200, 2400, 4800, or 9600 bits per second (bps).

### Specifications

<b>Signal:</b>	RS-232C
<b>Connector:</b>	D-sub, 25-pin
<b>Dimensions:</b>	Approx. 2" H x 4.9" W x 8.8" D (52 x 125 x 223mm)
<b>Weight:</b>	Approx. 0.6 lb. (260g)
<b>Usable VTRs:</b>	VO-9600, VP-9000, VP-7000
<b>Supplied Accessory:</b>	Operation manual
<b>BKU-701</b> .....	<b>\$410.00</b>

BKU-701

## RX-707 Auto Search Control Unit

The RX-707 Auto Search Control Unit enables simple search and program operation.

### Simple Search

By setting a Frame Code number with the ten-key on the control unit, the desired picture can be retrieved easily. The simplified search procedure saves time and is more efficient.

### Program Operation

The RX-707 can memorize up to 15 program (PGM) segments. The playback of each segment can be set at one to nine times, or can be set to repeat continuously.

Sequential playback of all of the program segments can also be set at one to nine times or for continuous repeat.

### Specifications

<b>Dimensions:</b>	Approx. 0.7" H x 2.4" W x 8.5" D (18 x 62 x 215mm)
<b>Weight:</b>	Approx. 0.9 lb. (400g)
<b>Cable Length:</b>	5m
<b>Supplied Accessory:</b>	Operation manual
<b>RX-707</b> .....	<b>\$475.00</b>

# MODULAR VIDEO CONSOLE SYSTEM

SU-501

SU-502

SU-511/512/513/514

## SU-501 Video Console

A special console ideally suited for use in offices, showrooms or reception areas. The upper section of the unit contains a slide-out equipment shelf with a locking door that disappears into the console when open. The lower section is a roomy, locking drawer that can be used to store tapes or accessories . . . . . **\$525.00**

## SU-502 Video Console

A companion unit to the SU-501 console that has exactly the same features plus an elevated pedestal large enough to accommodate up to 19" monitors . . . . . **\$650.00**

## SU-511/512/513/514 Video Consoles

An incredibly versatile system of custom designed video consoles for users of Sony Type 5 U-matic and other video equipment. The completely modular EIA standard system can be assembled in countless different configurations to suit individual requirements. It's a K-D (knockdown) design that assembles easily in minutes and can easily be expanded via convenient add-on options.

## Modular Console Components

### SU-511 Basic Single Bay Console

Basic console: 2 side panels with vents (dark gray), 1 back panel with vents and handgrips (black), 1 top panel (light gray), 2 feet (black), 3 structural members, 1 blank panel 3 1/2" x 19" (dark gray), 1 blank panel 10 1/2" x 19" (dark gray) . . . . . **\$570.00**

### SU-512 Single Bay Table

Single Table: 2 slide supports (dark gray), 1 padded front piece, 19" wide, with simulated leather covering (dark brown) . . . . . **\$160.00**

### SU-513 Single Bay Add-On Module

Add-On Module: 1 center panel (light gray), 1 back panel with vents and handgrips (black), 1 top panel (light gray), 1 foot (black), 1 blank panel 3 1/2" x 19" (dark gray), 1 blank panel 10 1/2" x 19" (dark gray) . . . . . **\$435.00**

### SU-514 Single Bay Add-On Table

Add-on table: 1 center support (dark gray), 1 padded front piece 19" wide, with simulated leather covering (dark brown) . . . . . **\$145.00**

### SU-515 Twin Bay Table

2 side supports (dark gray), 1 padded front piece 38" wide, with simulated leather covering (dark brown), 38" wide table panel with cut out for RM-440 (light gray), mounting hardware included . . . . . **\$265.00**

## RMM-501 Type 5 Mounting Kit

Hardware kit for mounting Type 5 U-matic units. Kit includes: Pair of 3-section ball bearing steel chassis slides; chassis slide mounting hardware; chassis slide mounting adaptors for non-Sony Consoles; pair of rack handle brackets; filler strip; necessary screws. . . . . **\$275.00**

## RMM-502 Panel for RM-500/RM-V5

2 unit mounting panel with cut-out for either RM-500 or RM-V5; screws included . . . . . **\$65.00**

## RMM-503 Mounting Brackets for RM-580

Pair of brackets to rackmount RM-580; screws included . . . . . **\$50.00**

## RMM-504 Panel for RM-440

4 unit mounting panel with cut-out for RM-440; screws included . . . . . **\$70.00**

## RMM-505 Mounting Brackets for RM-550 and RM-V5

Brackets for side-by-side rackmounting of RM-555 and RM-V5 . . . . . **\$45.00**

## RMM-507

Rackmount kit for VP-5020/5040, VP-5000, VP-9000, VO-9600, and BVE-900 . . . . . **\$300.00**

## BLP-501 1 Unit Blank Panel

1 3/4" x 19" light gray filler panel with predrilled mounting holes . . . . . **\$27.00**

## BLP-502 2 Unit Blank Panel

3 1/2" x 19" light gray filler panel with predrilled mounting holes . . . . . **\$30.00**

## BLP-503 3 Unit Blank Panel

5 1/4" x 19" light gray filler panel with predrilled mounting holes . . . . . **\$30.00**

## BLP-504 1 Unit Padded Panel

1 3/4" x 19" foam padded panel with simulated leather PVC covering and predrilled mounting holes . . . . . **\$55.00**

## BLP-505 2 Unit Padded Panel

3 1/2" x 19" foam padded panel with simulated leather PVC covering and predrilled mounting holes . . . . . **\$55.00**

## BLP-506 Mounting Conversion Kit

Special hardware to modify standard 5 unit height upper console section to accept 6 unit height equipment . . . . . **\$55.00**

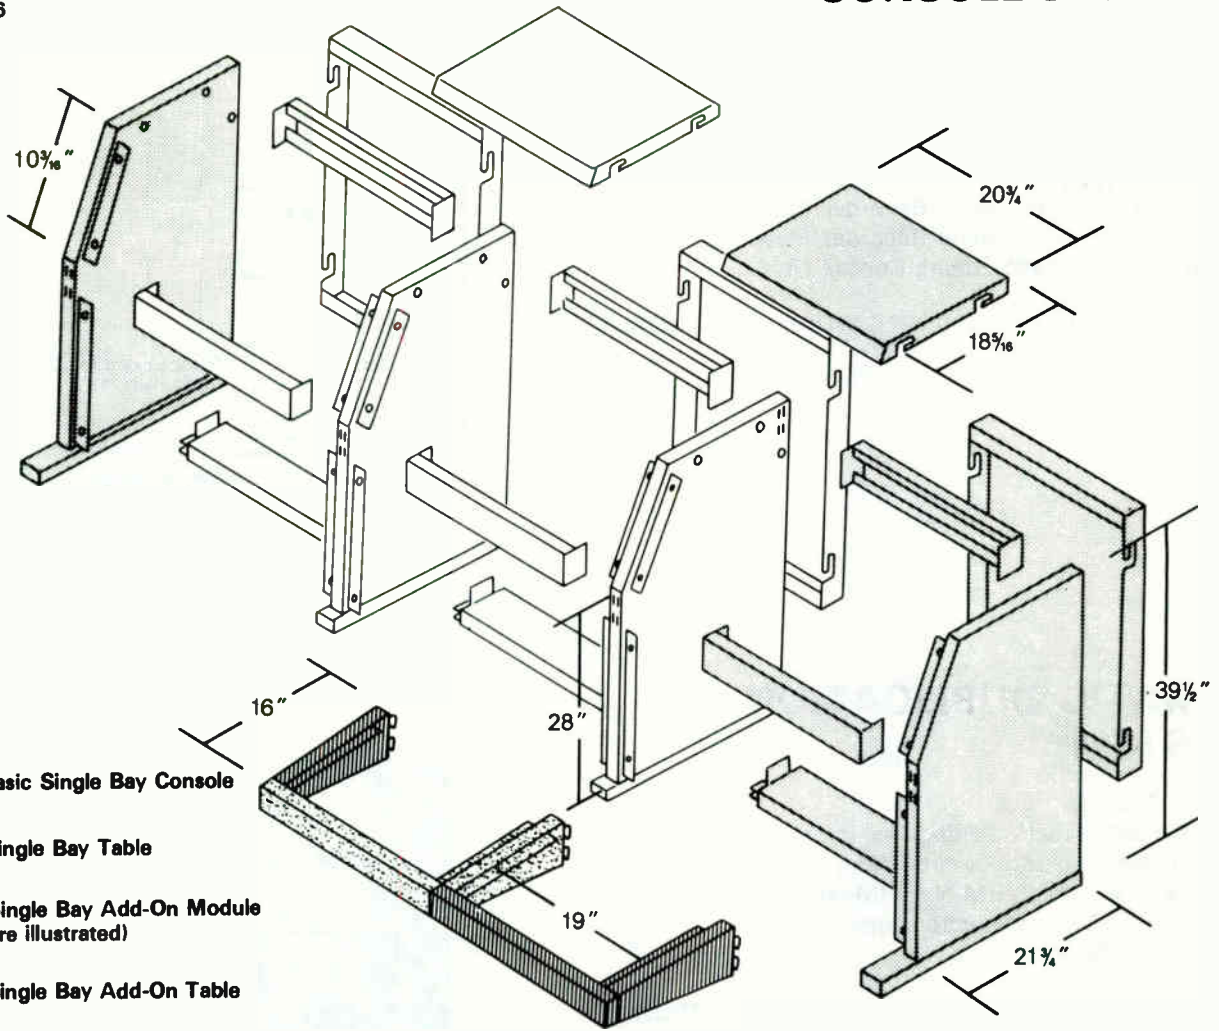

## BLP-507 Mounting Conversion Kit

Special hardware to modify 5 unit height upper console section to 6 unit for use without table . . . . . **\$55.00**  
CT-501 Casters . . . . . **25.00**

# MODULAR VIDEO CONSOLE SYSTEM

-  **SU-511 Basic Single Bay Console**
-  **SU-512 Single Bay Table**
-  **SU-513 Single Bay Add-On Module (2 units are illustrated)**
-  **SU-514 Single Bay Add-On Table**

	<b>SU-511 Basic Single Bay Console</b> Basic console: 2 side panels with vents (dark grey), 1 back panel with vents and handgrips (black), 1 top panel (light grey), 2 feet (black), 3 structural members, 1 blank panel 3 1/2" x 19" (dark grey), 1 blank panel 10 1/2" x 19" (dark grey)
	<b>SU-512 Single Bay Table</b> Single Table: 2 side supports (dark grey), 1 padded front piece, 19" wide, with simulated leather covering (dark brown)
	<b>SU-513 Single Bay Add-On Module</b> Add-On Module: 1 center panel (light grey), 1 back panel with vents and handgrips (black), 1 top panel (light grey), 1 foot (black), 1 blank panel 3 1/2" x 19" (dark grey), 1 blank panel 10 1/2" x 19" (dark grey)
	<b>SU-514 Single Bay Add-On Table</b> Add-on-table: 1 center support (dark grey), 1 padded front piece, 19" wide, with simulated leather covering (dark brown)
	<b>SU-515 Twin Bay Table</b> 2 side supports (dark grey), 1 padded front piece 38" wide, with simulated leather covering (dark brown), 38" wide table panel with cut out for RM-440 (light grey), mounting hardware included
	<b>RMM-504 Panel for RM-440</b> 4 unit mounting panel with cut-out for RM-440; screws included

	<b>RMM-506 Mounting Brackets for RM-550 &amp; RM-V5</b> Brackets for side-by-side rack mounting of RM-550 and RM-V5
	<b>BLP-501 1 Unit Blank Panel</b> 1 1/2" x 19" Light grey filler panel with predrilled mounting holes
	<b>BLP-502 2 Unit Blank Panel</b> 3 1/2" x 19" Light grey filler panel with predrilled mounting holes
	<b>BLP-503 3 Unit Blank Panel</b> 5 1/2" x 19" Light grey filler panel with predrilled mounting holes
	<b>BLP-504 1 Unit Padded Panel</b> 1 1/2" x 19" foam padded panel with simulated leather PVC covering and predrilled mounting holes
	<b>BLP-505 2 Unit Padded Panel</b> 3 1/2" x 19" foam padded panel with simulated leather PVC covering and predrilled mounting holes

	<b>BLP-506 Mounting Conversion Kit</b> Special hardware to modify standard 5 unit height upper console section to accept 6 unit height equipment
	<b>RMM-501 Type 5 Mounting Kit</b> Hardware kit for mounting Type 5 U-matic units. Kit includes: Pair of 3-section ball bearing steel chassis slides; chassis slide mounting hardware; chassis slide mounting adaptors for non-Sony Consoles; pair of rack handle brackets; filler strip; necessary screws
	<b>RM-502 Panel for RM-500/RM-V5</b> 2 unit mounting panel with cut-out for either RM-500 or RM-V5; screws included
	<b>RMM-503 Mounting Brackets for RM-580</b> Pair of brackets to rack mount RM-580; screws included

# SUPERBETA VIDEO SYSTEM

## SuperBeta™ System

The SuperBeta system is designed around a recording technique that shifts the video carrier signal frequency higher by 800kHz, creating a wider luminance bandwidth. The resulting picture is sharper and has finer detail and texture than conventional Betamax® VCR. This system with higher horizontal resolution and superior dubbing picture quality is ideal for program origination as well as multi-generation editing.

The SuperBeta system includes the one-piece GCS-1 Betamovie® color camera/recorder unit, the GCS-50 Betamax editing videocassette recorder and the SLO-1800 duplicator.

GCS-1

## GCS-1 SuperBetamovie® Camera/Recorder

- Advanced CCD image sensor
- Monochrome electronic viewfinder
- Sensitivity selector provides 0dB, AGC and 6dB switching
- Iris lock
- Data display system
- Time or date can be recorded directly on tape
- Capability to record index signals directly on video tape
- 3 hours of recording time
- Hi-band recording system
- 300 TV lines horizontal resolution
- X6 power zoom lens with macro, 12mm to 72mm, f/1.4
- Rotary two-head helical scanning system
- Built-in electret condenser microphone
- 5.9" H x 15.2" W x 7.3" D
- 5 lbs. 11 oz.

GCS-1 . . . . . \$1995.00

GCS-50

## GCS-50 Betamax Editing Videocassette Recorder

- Advanced SuperBeta recording system
- Less deterioration in dubbing mode
- High band recording technology
- DA Pro 4 head
- Rotary erase heads
- High quality Beta hi-fi sound
- Built-in insert editing function
- Jog/shuttle dial
- Index capability
- Full automatic editing function with RM-E50
- Automatic rewind function
- 19" rackmountable
- 270 TV lines horizontal resolution
- 20Hz to 20kHz frequency response
- 41°F to 104°F operating temperature
- 4 3/4" H x 17" W x 17 3/4" D
- 26 lbs. 7 oz.

GCS-50 . . . . . \$2730.00

SLO-1800

## SLO-1800 Super Beta Duplicator with Beta Hi-Fi®

- Direct drive mechanism
- Electric tension servo
- Check terminal
- Hours meter
- Separate input for hi-fi and conventional audio
- Simultaneous control of up to 150 SLO-1800's with RM-S18
- 33-pin parallel remote control
- Detachable control knobs
- Index function
- 19" EIA rackmount
- Recording in B-II and PB in B-I, II, III

SLO-1800 . . . . . \$1875.00

## Accessories for GCS-1

- RM-81 BetaMovie remote commander® . . . . . \$ 10.00
- SAD-100 External microphone shoe . . . . . 25.00
- TPD-8 Tripod dolly . . . . . 85.00
- VCT-40 Lightweight tripod . . . . . 110.00
- VCT-150K Heavy-duty tripod . . . . . 199.95
- VCL-0758A Wide conversion lens . . . . . 174.00
- VCL-0758WA Wide attachment lens . . . . . 55.00

- VCL-1558A Teleconversion lens . . . . . \$130.00
- VCT-130CB Video camera brace . . . . . 40.00
- XB-200W Video light bulb . . . . . 18.00

## Accessories for GCS-50

- AC-M110 AC power adaptor . . . . . \$130.00
- BC-300V Multi battery charger . . . . . 112.00
- BP-400 Battery belt . . . . . 280.00
- DCC-2600 Car battery cord . . . . . 40.00
- ECM-K 120 Unidirectional external microphone . . . . . 80.00
- HVL-200W Video light (200W, AC power) . . . . . 109.95
- HVR-200 Pan tilter . . . . . 290.00
- LC-770 Carrying case . . . . . 140.00
- NP-11 Rechargeable battery pack . . . . . 59.00
- RM-E50 Automatic editing control unit for GCS-50.  
Up to 64 programmable memory, two job/shuttle  
dials, insert/assemble edit, preview/trim/go-to  
functions . . . . . 1425.00
- RMM-50 Mounting bracket for GCS-50 . . . . . 245.00

## VTR Cables

- UGC-5 BNC-UHF coaxial cable. 16' . . . . . \$13.00

# BETAMAX RECORDERS/PLAYERS

## SLP-305 Betamax® Player

- Beta I, II and III playback capability with automatic mode selection and LED mode indication • 2 head system • Variable speed playback in all Beta modes, Beta I: Still, continuous slow, variable speed play up to X2 and auto frame advance, Beta II: Still, continuous slow, variable speed play up to X4, Beta III: Still, continuous slow, variable speed play up to X6 • BetaScan high speed search in all modes • Repeat/Auto Stop function • Exclusive connector for RX data • 33-pin remote control connector enhances random access and interactive applications • Logic controlled tape transport design allows direct switching between tape travel modes • End-of-tape automatic rewind • Dual audio tracks for playback of stereo or bilingual recording • Direct head drum and capstan drives • Switchable RF modulator • Soft eject cassette mechanism • Weight: 23 lbs. 13 oz. • Dimensions: 5<sup>7</sup>/<sub>8</sub>" H x 15<sup>1</sup>/<sub>2</sub>" W x 13<sup>7</sup>/<sub>8</sub>" D

SLP-305

SLP-305 . . . . . \$1425.00  
SLP-305/RX-303 with automatic search controller . . . . . 1800.00  
SLP-305/RX-353 with programmable automatic search controller . . . . . 1850.00

## SLO-325 Betamax Recorder/Player

- Beta I recording and Beta I, II and III playback capability with automatic mode selection and LED mode indication • Advanced four head system • Variable speed playback in all Beta modes, Beta I: Still, continuous slow, variable speed play up to X2 and auto frame advance, Beta II: Still, continuous slow, variable speed play up to X4, Beta III: Still, continuous slow, variable speed play up to X6 • BetaScan high speed search in Beta I mode • Repeat/Auto Stop function • Exclusive connector for RX data • 33-pin remote control connector enhances random access and interactive applications • Logic controlled tape transport design allows direct switching between tape travel modes • End-of-tape automatic rewind • Dual audio tracks permit stereo or bilingual recording • Direct head drum and capstan drives • Switchable RF modulator • Soft eject cassette mechanism • Weight: 27 lbs. 2 oz. • Dimensions: 5<sup>7</sup>/<sub>8</sub>" H x 15<sup>1</sup>/<sub>2</sub>" W x 13<sup>7</sup>/<sub>8</sub>" D

SLO-325

SLO-325 . . . . . \$1950.00  
SLO-325/RX-303 with automatic search controller . . . . . 2275.00  
SLO-325/RX-353 with programmable automatic search controller . . . . . 2325.00

## SLO-340 Betamax Portable Videocassette Recorder/Player

- Will record in either color or black and white for up to 90 minutes on its internal lightweight battery pack • Offers all the basic Betamax advantages • Quality recording on smaller, less expensive videocassettes • Simple one-button operation and interchangeability of cassettes • Weighs less than 20 lbs.

SLO-340 . . . . . \$1750.00

SLO-420

## SLO-420 Betamax Videocassette Recorder/Player

- Super-compact size 3<sup>1</sup>/<sub>8</sub>" H x 17" W • Front-loading and front-panel control • Beta II and III recording capability plus Beta I, II and III playback • SwingSearch™ continuous search in forward/reverse at normal speed, 2 times normal speed, 1/5<sup>th</sup> and 1/10<sup>th</sup> normal speed, plus slow-motion, frame-by-frame advance and still frame • BetaScan II™ search in forward/reverse at 9 times (Beta II) and 15 times (Beta III) normal speed • Linear time counter shows exact tape position in hours, minutes, seconds • Optional Wireless Remote Commander® RMT-312 with recording and speed control functions • Double azimuth head eliminates frame jitter and delivers noise-free slow motion • Micro Timing Phase Circuitry maintains precise transitions at record/pause and on/off • Tab Marker™ electronic indexing system • Two channel audio • External sync lock capability • Weight: 20 lbs. 12 oz. • Dimensions: 3<sup>1</sup>/<sub>8</sub>" H x 17" W x 13<sup>3</sup>/<sub>8</sub>" D

SLO-340

SLO-420 . . . . . \$1765.00

## 8mm VIDEO EQUIPMENT

### EVM-8010R Color Monitor/8mm Deck System

- Monitor: NTSC system • 8" microblack™ Trinitron® • 230 lines resolution • Audio/Video/DC inputs • Audio/Video/Headphone outputs • 8mm deck: NTSC system • Rotary two head video recording • Helical scanning FM system • Rotary head audio recording • FM system • Recording in SP mode and playback in SP/LP mode • Optional RM-749 remote control

EVM-8010R .....\$1250.00

EVM-8010R

### EVO-110 Mini 8™ Camera Recorder

- 250,000 pixel CCD image sensor • 3 position zone focus • Pre-set white balance • Recording in SP mode • Backspace edit with flying erase head • Includes: NP-22, ACP-88, BCA-80

EVO-110 .....\$1250.00

EVO-110

### EVO-210 Video 8™ Portable Recorder/Player

- 3-way power operation up to 150 minutes • Playback on a single NP-22 battery • Automatic track following • Edit switch for better dubbing • Built-in insert editing with flying erase head • Recording in SP mode and playback in SP/LP mode • Includes RFU-80

EVO-210 .....\$600.00

EVO-210

### EVO-410 Video 8 Recorder/Player

- Tuner timer • 148 channel cable ready, 7 day/3 event programmable timer • Wireless remote function • Auto play • Power-off-eject • Auto rewind • One key recording • Special playback functions: clean still, frame by frame search, noiseless slow motion

EVO-410 .....\$620.00

EVO-410

### EVO-510 Video 8 Recorder/Player

- Simultaneous control of up to 150 EVO-510 units for duplication by using optional RM-S18 • Still frame advance • Tape return • Wireless remote control both record and playback in SP/LP mode

EVO-510 .....\$750.00

EVO-510

### EVO-511 Video 8 Recorder/Player

- Simultaneous control of up to 150 EVO-511 units for duplication by using optional RM-S18 • Compact size and simple operation • High picture quality in SP mode • Auto repeat • Auto rewind • Tape return • Front loading

EVO-511 .....\$820.00

### EVO-1000U Video 8 Duplicator

- Simultaneous control of up to 150 EVO-1000U units by using optional RM-S18 • PCM stereo audio with optional PCM-EV1000U processor • RF signals (CH1, CH2) • Switching pulse outputs for check • Hour meter • Record and playback in SP mode only

EVO-1000U .....\$1200.00

EVO-1000U

### PCM-EV1000V Video 8 PCM Stereo Processor

- PCM digital audio recording on PCM track • Separate REC level controls for mono AFM/PCM CH-1/PCM CH-2 • Peak level meter • 2-line in/out • Power on/off from EVO-1000U • Headphone jack • Compact and lightweight

PCM-EV1000V .....\$360.00

# STILL VIDEO SYSTEM

## ProMavica™ Still Video System

### MVR-5500 Still Video Recorder/Player

The MVR-5500 is an ideal tool for still video picture presentation systems. It records a still video picture with a simple press of the recording button. Its video in/out and RGB in/out connectors allow connections with various video equipment and microcomputers. It can be directly connected with Betacam equipment through the optional VDC-62 cable to allow high quality duplication. It is also provided with manual control of the video input level, external time base corrector connector, etc. to meet the demands of high quality business/industrial applications.

### MVP-2500 Still Video Player

As a player-only deck, the MVP-2500 is a cost effective way to display presentations that are created with the MVR-5500. An affordable and efficient editing system can be created with the MVP-2500, MVR-5500, and RM-E5500.

### High Picture Quality

The ProMavica series produces high quality pictures with 360 lines of horizontal resolution and a 46dB S/N ratio. It is capable of providing clear information due to its vivid still picture imaging system.

### Quick Random Access

Quick random access to any desired picture is achieved between 30ms (to the next track) and 1.5 seconds (from the first track to the fiftieth track) when the MVR-5500 is operated from the RM-E5500, or when the MVP-2500 is controlled from the RM-E5500 or RM-2500.

### Simple Remote Control

Playback operations of the MVR-5500/MVP-2500 can be controlled from an optional simple remote controller, the RM-52. With the combination of the RM-E5500 and the RM-52, forward or backward execution of the program can be controlled remotely.

### External Control

The MVR-5500/MVP-2500 can be controlled by an external microcomputer through the RS-232C connector to allow even more advanced applications than are possible by simply using the remote controllers. Cue tone control is possible through the TC sync connector because the picture of the next track is played back when the MVR-5500/MVP-2500 detects a 1kHz tone signal.

### ID Number Display

The ID Number is displayed when the ID button is pressed. Six digit ID numbers, such as dates of recording or product numbers, can be recorded with the desired pictures when the MVR-5500 is connected with the optional RM-E5500 Editing Controller.

### Track Number Display

The current track number appears on the upper right corner of the screen when the Track button is pressed.

### Track Number Information Display

The Track Number Information Display shows recording information. It indicates which tracks have been recorded and whether they are field-recorded or frame-recorded, and which tracks are vacant. The information will be automatically updated every time recording or erasure takes place.

### Frame/Field Information

The MVR-5500/MVP-2500 automatically detects field and frame recorded pictures and plays back field/frame pictures accordingly. The Field Only button allows field playback of frame recorded pictures. It is very useful when playing back a frame recording of a fast moving object.

### Review/Continuous Function

The recorded pictures can be reviewed immediately after recording when the Review button has been pressed, or the recording on the next track will be set for recording when the Cont. (continuous) button has been pressed. (MVR-5500 only).

**MVR-5500** Still video recorder/player . . . . . \$3,750.00  
**MVP-2500** Still video player . . . . . 2,550.00

(201) 930-1000

# VIDEODISC PLAYERS

LDP-2000

## LDP-2000 Series Videodisc Players

The LDP-2000 Series of fast, internally expandable videodisc players combines random access video, analog and digitally compressed audio and external computer control for unprecedented multimedia and communications capabilities. The players are capable of accessing any frame in 1.5 seconds or less. With the LDP-2000 Series, Sony has introduced the concept of planned internal expandability for videodisc players.

To enable users to select the level of player capability best suited to their needs, the LDP-2000 players are available in 5 different configurations. Upgrading from one configuration to another is achieved by the simple addition of boards making additional wiring or add-ons unnecessary.

### LDP-2000/1

In its most basic form, the LDP-2000 is a linear (Level 1) player controlled by an external computer. It features built-in, industry standard RS-232C computer interface port and switchable baud rates of 9600, 4800, 2400 and 1200.

LDP-2000/1 . . . . . \$2099.00

### LDP-2000/2

#### LDP-2000/1 + Control Expansion Board (DB-2010)

The addition of DB-2010 board permits the playback of (Level II) videodiscs with audio track control programs, including those designed for Sony LDP-1000 and LDP-1000A disc players. In this configuration, the player reads the command codes on the disc and stores them in the expansion board's random access memory (RAM).

LDP-2000/2 . . . . . \$2435.00

### LDP-2000/3

#### LDP-2000/2 + Parallel Interface Board (DB-2020)

The LDP-2000/3 is designed for applications that require the basic features of the LDP-2000/2 with a parallel interface. The DB-2020 is the IEEE-488 standard interface board for fast data communication between the player and an external computer. The IEEE-488 bus also permits computer control of up to 15 videodisc players via just one IEEE-488 port on an external computer.

LDP-2000/3 . . . . . \$2553.00

LDP-1500

## LDP-1500 Videodisc Player

The LDP-1500 player provides random access in 2.5 seconds or less to any video frame on a CAV disc. It also incorporates an RS-232C interface port for excellent software control over the player through a wide range of commands, automatic feedback codes and queries.

### LDP-2000/4

#### LDP-2000/2 + Computer Data/SFA Board (DB-2040)

The LDP-2000/4 expands the capabilities of LDP-2000/2 with the added dimension of Still Frame Audio (SFA). SFA is an audio signal digitally compressed to take up considerably less space on the videodisc, enabling the extension of audio playback while still pictures are displayed on the monitor. The SFA data are recorded in blocks. One block consists of 2 to 32 frames or 2 to 40 seconds of audio. In conventional systems, 300 frames are required to record 10 seconds of audio, and only 30 minutes of playback is possible on one side of a disc. With the DB-2040 SFA board, however, only 15 frames are needed for 10 seconds of audio. This permits 15 hours of audio playback. In this configuration, SFA can be used either in a standalone mode or controlled by an external computer via the RS-232C port.

LDP-2000/4 . . . . . \$3762.00

IF-100 Chapter Selector . . . . . 700.00

### LDP-2000/5

#### LDP-2000/2 + DB-2010 + DB-2020 + DB-2040

The fully configured LDP-2000/5 allows an external computer to read computer data recorded on a videodisc with the same reliability as a micro floppydisc. Digital data access is achieved via the DB-2010 and DB-2040 boards. The DB-2020/IEEE-488 bus permits high speed transfer of digital data.

LDP-2000/5 . . . . . \$3860.00

All of the LDP-2000 configurations utilize a semiconductor laser. In contrast to the conventional helium-neon gas laser, the new optical block with the diode laser is both smaller and designed for higher reliability. An automatic optical block locking mechanism, which is activated when the power is turned off, obviates the need for manual lockdown screws during transportation. The motor-driven, front-load videodisc tray on the players is activated manually, by external computer. The players also incorporate CX™ noise reduction system for improved signal-to-noise ratio.

## Accessories

RM-2001	Remote control unit . . . . .	\$ 86.00
RMM-201A	Rails & handles for rackmounting . . . . .	260.00

DB-2060	Used with DB-2050 board to loop through the reference signal . . . . .	210.00

CX™ is a trademark of CBS, INC.

The LDP-1500 contains a semiconductor laser and features automatic locking of the optical block assembly when power is turned off. This feature minimizes the possibility of damage in shipping and obviates the need for manual lock down screws.

The front loading videodisc tray is motor-driven for ease of use, with functions controllable manually or by external computer.

LDP-1500 . . . . . \$1195.00

# SWITCHER SYSTEM

SEG-2000A

WEX-2000

CRK-2000

## DIRECTOR 2000 SWITCHER SYSTEM

The Director 2000 Switcher System is made up of three beautifully matched, professional quality components that, as a trio, provide an incredibly diverse range of production possibilities coupled with outstanding control and broad flexibility. The impressive capabilities of the SEG-2000A, the central system component, are enhanced and extended through interaction with the WEX-2000 Wipe Pattern Extender and the CRK-2000 Chroma Keyer and create a system that is capable of very sophisticated and artistic special effects.

The SEG-2000A, by virtue of its ability to operate on either AC or DC power can be used for both studio and field production. The unit mounts in standard 19" racks for optimum studio convenience, yet is light enough at 21 lbs to be eminently portable at the same time. It is equipped with connections for up to six color cameras, one playback VTR, a camera for an external keyer and one camera for downstream keying using the built-in downstream keyer. A full complement of professional controls provide professional results with cut, mix, external key, downstream key and wipe functions. Output connections are extensive with three program outputs, two preset outputs, seven video outputs, four black burst outputs, a V drive output and four tally intercom connectors.

The WEX-2000 extends the wipe pattern selection of the SEG-2000A to 84 different patterns and provides easy-to-use keyboard actuation of the desired pattern with memorization of up to 3 patterns for enhanced convenience. There are auto wipe, servo wipe and trim wipe functions with variable wipe speeds.

The CRK-2000 has dual inputs for composite video signals as well as a separate RGB input. Another unique feature is the natural chroma key facility which creates natural shadow and softness on the compound key camera's picture. It also has a built-in effect amplifier, a background color generator and a sync generator which coupled with its external key input and SC/H phase indicator allow it to be used not only as a chroma keyer but also as a switcher. In operation with the SEG-2000A and WEX-2000, this unit enables the user to create a diverse range of artistic and creative special effects.

**System Price** ..... \$11,200.00

### SEG-2000A Special Effects Generator

• Color System: NTSC color • Switching System: Vertical blanking switcher • Effects: MIX: Dissolve by special effects control lever and PGM/PST mix lever. WIPE: 6 selectable wipe patterns, continuously variable wipe edge softness, border line with continuously variable hue, chroma, luminance, width and amplitude. EXT KEY: 0.7V p-p (VB) or 1.0V p-p (VBS) input signal, 75 ohms unbalanced, BNC connector. DOWNSTREAM KEYER: Genlock with PGM bus line signal, 6 pin B & W camera connector. Output Signal: Horizontal Drive, Vertical Drive, VD 4V p-p, 75 ohms, unbalanced. Input Signal: Video 0.7V p-p, 75 ohms, unbalanced. Shadow: Wide and Narrow, Selectable. BACKGROUND COLOR: Chroma: 0-650mV p-p (variable according to the hue level). Hue: 0° to 360°. Luminance (Y): 0-450mV continuously variable

SEG-2000A ..... \$5660.00

### Optional Accessories

- Sony CVM and PVM Series Color Video Monitors • Sony DXC Series Color Video Cameras • Sony B & W Series Black and White Video Cameras • Sony CCDD, CCF Connecting Cables • BP-60 Rechargeable Battery Pack • LC-2003 Carrying Case for Camera Control Unit and Monitor • LC-2006 SEG 2000A Carrying Case • BC-20 Battery Charger

### WEX-2000 Wipe Pattern Extender

- Color System: NTSC color • Genlock Input: Sync 0.3V p-p, Burst 0.3V p-p • Wipe patterns: 84 kinds • Wipe outputs: OUT 1: 6 pin for SEG-2000A (via CCF-5 cable). OUT 2: BNC connector for SEG-2000A or CRK-2000, 1.0V p-p, 75 ohms • Wipe speed: Approximately 0.5 to 9 seconds • Pairing wipe: Every other line • Pattern modulation: Wave length and frequency are continuously variable • Power requirements: 120V AC, 50/60 Hz; 11-15V DC, external DC • Power consumption: 19 W AC, 14 W DC • Operating temperature: 32°F to 140°F (0°C to 40°C) • Dimensions: 3-1/2"H x 19"W x 11-7/8"D (88 x 482 x 300 mm) • Weight: 15 lbs. 7 oz. (7 kg)

WEX-2000 ..... \$2850.00

### Supplied Accessory

- AC power cord

### Optional Accessory

- CCF-5 interface cable with the SEG-2000A

### CRK-2000 Chroma Keyer

- Color system: NTSC color • Video inputs: VBS 1.0V p-p, 75 ohms • RGB inputs: 1.0V p-p, 75 ohms • External key: VIDEO INPUT: 1.0V p-p or 0.7V p-p, 75 ohms. HD/VD OUTPUT: 3.8V p-p • Gen lock input: Sync 0.3V p-p, Burst 0.3V p-p • Video outputs: VBS 1.0V p-p, 75 ohms • Video output channel crosstalk: Better than 40 dB • Video output DP: 1.5% • Video output DG: 1.5% • Video output frequency response: 5MHz +/-1 dB • Chroma key outputs: VBS 1.0V p-p • Chroma key output crosstalk: 32dB (fsc) • Chroma key output DP: 2.5% • Chroma key output DG: 2.5% • Chroma key output frequency response: 5MHz +/-1 dB • Black burst outputs: Sync 0.3V p-p, Burst 0.3V p-p • Keying bandwidth: RGB mode more than 2.0MHz, Line mode more than 0.8MHz • Power requirements: 120V AC, 50/60 Hz • Power consumption: 29 W • Operating temperature: 32°F to 140°F (0°C to 40°C) • Dimensions: 3-1/2"H x 19"W x 11-7/8"D (88 x 482 x 300 mm) • Weight: 15 lbs. 7 oz. (7 kg)

CRK-2000 ..... \$2890.00

### Supplied Accessories

- AC power cord • Chroma key cloth (Blue) • Instruction tape (U-matic® format)

SEG-WEX PAC Contains SEG-2000A, WEX-2000, CCF-5 extension cable ..... \$400.00

# COLOR MONITORS

## PVM-1220

### Super Fine Pitch 12" Trinitron Color Video Monitor

- High resolution—more than 550 lines • Comb filter • Three sets of video inputs (Channel A/B and TEST) enhance studio flexibility
- Normal/underscan selection • Interval check or horizontal and vertical separately and horizontal plus vertical (cross pulse) in delayed scanning mode • Accepts external sync • Auto/color/monochrome selection • White-balance control inside quick-access slide-out drawer
- Aperture control adjusts frequency response • Front panel tally lamp
- Loop-through connectors for both video and sync allow multiple bridging • EIA standard 19" rackmountable • Weight: 55 lbs., 2 oz.
- Dimensions: 11<sup>1</sup>/<sub>4</sub>"H x 19"W x 20<sup>1</sup>/<sub>4</sub>"D

PVM-1220 .....\$2460.00

## PVM-1271Q

### Super Fine Pitch 12" Trinitron Color Video Monitor

- High resolution—550 lines with video input and 600 lines with RGB inputs • PAL/SECAM/NTSC/NTSC 4.43 reproduction capability with automatic sensing of each color standard • 80-character, 25-line (2000 characters) computer display capacity • RGB inputs capable of accepting both digital and analog signals • Normal/underscan selection • AFC slow/fast switch • Switchable int./ext. sync • Switchable color temperature 6500°/9300°K • Comb filter • Video/sync/audio loop-through capability for multiple connections • Built-in speaker for audio monitoring • Rackmountable with optional MB-502 Rack Attachment plus optional SLR-102 Slide Rail • Weight: 32 lbs., 2 oz.
- Dimensions: 13<sup>13</sup>/<sub>16</sub>"H x 13<sup>1</sup>/<sub>2</sub>"W x 15<sup>3</sup>/<sub>16</sub>"D • IBM PC compatible

PVM-1271Q .....\$995.00

## PVM-1380

### Trinitron 13" Color Video Monitor

- Picture tube: black face Trinitron 14", visible picture size 13" measured diagonally • Horizontal resolution: 250 TV lines at center
- Weight: Approx. 25 lbs., 6 oz. • Dimensions: Approx. 14.4"H x 14.0"W x 16.1"D

PVM-1380 .....\$480.00

## PVM-1910

### 19" Trinitron Color Video Monitor

- Line A (Tuner)/Line B/VTR/RGB/CMPTR • Built-in interface for IBM-PC • Accepts analog/digital RGB • RGB loop-through • RGB/NTSC superimposition • Display center adjustment for convenient adjustment of left side of display margin • Color TV tuner (optional) can be connected by a single connecting cable • Comb Filter Select Switch (COMB/TRAP) • AFC switch (Fast/Slow) • Built-in speaker • Removable screen frame/shield • Weight: 63 lbs., 15 oz. • Dimensions: 18<sup>1</sup>/<sub>4</sub>"H x 19<sup>1</sup>/<sub>4</sub>"W x 21<sup>1</sup>/<sub>4</sub>"D

PVM-1910 .....\$905.00

## PVM-1910Q

### 19" Trinitron Color Video Monitor

- PAL/SECAM/NTSC/NTSC 4.43 switches automatically • Line A (Tuner)/Line B/VTR/RGB/CMPTR • Built-in interface for IBM-PC • Accepts analog/digital RGB • RGB loop-through • RGB/NTSC superimposition • Display center adjustment for convenient adjustment of left side of display margin • Color TV tuner (optional) can be connected by a single connecting cable • Comb Filter Select Switch (COMB/TRAP) • Automatic Frequency Control (AFC) switch (Fast/Slow) • Built-in speaker • Removable screen frame/shield • Weight: 63 lbs., 15 oz. • Dimensions: 18<sup>1</sup>/<sub>4</sub>"H x 19<sup>1</sup>/<sub>4</sub>"W x 21<sup>1</sup>/<sub>4</sub>"D

PVM-1910Q .....\$1225.00

PVM-1271Q

PVM-2530/BS

SSM-2010

## PVM-2030/B (20")/PVM-2530/BS (25") Cubic Color Video Monitors

- 560 lines resolution • Prismatic cube shape, can be stacked both horizontally and vertically with minimal space between adjacent tubes
- Monitor function controls replaced by a hidden front touch panel embedded under the monitor's thin frame • Sharp 2,000 character display with RGB input • Delay line aperture control uses comb filter with notch switch • Dynamic Focus™ circuitry with electro magnetic quadrupole lens • Velocity Modulation™ scanning system continually adjusts the speed of the electron beam • Auto white balance • 3 video inputs, BNC loopthrough, 8-pin VTR input and a 25-pin connector for RGB • 15W built-in stereo amplifiers (PVM-2530/BS); 5W (PVM-2030/B) • Unswitched AC input allows other monitors or video equipment to be directly connected

PVM-2030/B .....\$1125.00

PVM-2530/BS .....1425.00

## SSM-2010 20" Trinitron Color Video Monitor

- Patented Trinitron color system • Microblack™ high-contrast screen • 20" picture, measured diagonally • Suitable for wherever you need a presentation monitor • 400 lines horizontal resolution • Audio/video inputs, audio/video outputs • Sleek styling fits in anywhere • Sub-panel controls

SSM-2010 .....\$549.95

# COLOR/MONOCROME MONITORS

## PVM-411 Quadruple 4" Monochrome Monitor

- Four independently controlled 4" screens (measured diagonally)
- Fits EIA standard 19" rack
- Individual unit shielding
- Spot-killer circuitry
- Loopthrough capability
- Individual front-mounted contrast, brightness
- V-hold and H-hold controls
- 35 lbs., 4 oz.
- 5 1/4" H x 19" W x 12 1/2" D

PVM-411 .....\$1350.00

PVM-411

## PVM-91 9" Monochrome Video Monitor

- Black and white monitor
- Ideal for computer display
- CCTV applications or studio control room monitor
- 800 lines of horizontal resolution at center
- Selectable scanning systems: Normal/Underscan
- DC clamp switch provides a stable reference for the black level
- Accepts an external sync
- Loopthrough BNC connectors for video and sync
- Can be installed/rackmounted as a dual video with the MB-504 optional mounting bracket monitor
- Can be installed with a waveform monitor or a vectorscope by using an MB-501 optional mounting bracket
- 12 lbs., 12 oz.
- 8 3/4" H x 9" W x 10" D

PVM-91 .....\$375.00

PVM-91

## PVM-122 12" Monochrome Video Monitor

- 1000 lines of horizontal resolution at center
- Selectable scanning systems: Normal/Underscan
- DC clamp switch provides a stable reference for black level
- External sync input
- Selectable A/B line inputs with front switch
- Loopthrough BNC connectors for line, A/B and sync
- Built-in speaker for audio monitoring
- Tally lamp
- 21 lbs., 11 oz.
- 12 3/16" H x 12" W x 12 3/16" D

PVM-122 .....\$545.00

PVM-5300

## PVM-5300 Trinitron® Triple 5" Color Video Monitor

- Fits 19" EIA standard rack
- External sync input terminals
- Loopthrough receptacles for both video and sync
- Setup switch for easy adjustment of white balance and horizontal static convergence
- 52 lbs., 7 oz.
- 7" H x 19" W x 16 1/2" D

PVM-5300 .....\$2625.00

PVM-8020

PVM-8221

## PVM-8020 Portable 8" Color Video Monitor

- Microblack Trinitron tube
- 3-way AC/DC operation
- Built-in stand
- Supplied hood
- Push-to-lock controls
- 2 video input/output
- 6-pin DIN connector for optional TU-1110 TV tuner
- Blue-only, normal/underscan and HV-delay

PVM-8020 .....\$695.00

## PVM-8220 Trinitron 8" Color Video Monitor

- Can be mounted in a 19" EIA standard rack together with a second PVM-8220 for use as a dual monitor by using the optional mounting bracket (MB-504)
- Underscan, HV-delay, blue only mode select switches
- Accepts an external sync
- Two video inputs can be selected; Video A or Video B
- Microblack Trinitron tube
- Horizontal resolution: 250 TV lines at center
- 16 lbs., 9 oz.
- 8.6" H x 8.5" W x 12.6" D

PVM-8220 .....\$645.00

IDX-5000

## PVM-8221 Trinitron "Super Fine Pitch" 8" Color Video Monitor

- Microblack Trinitron tube
- High resolution of 400 TV lines at center
- The PVM-8221 can be mounted in a 19" EIA standard rack together with a second PVM-8221 for use as a dual monitor by using the optional mounting bracket (MB-504)
- Underscan, HV-delay, blue only mode select switches
- Accepts an external sync
- Two video inputs can be selected; Video A or Video B
- 16 lbs., 9 oz.
- 8.6" H x 8.5" W x 12.6" D

PVM-8221 .....\$920.00

## IDX-5000 Indextron™ 5" Color Video Monitor

- Ten times brighter than conventional 5" sets: 1,800fL
- Bright enough for daylight viewing without a hood
- Innovative Sony Indextron tube with 5" diagonal screen
- Zero misconvergence, excellent geometric linearity
- One beam electronically indexed to carry all three color signals, as opposed to the usual separate beams for red, green, and blue
- Extra-large cathode gun for high brightness; because one gun occupies the space of three
- No shadow mask, so more electrons reach the screen; conventional color tubes require Shadow Mask to divide the three beams
- Unaffected by the earth's magnetic field
- 220 lines resolution
- Liquid cooling to keep the Indextron tube operating at optimum brightness, to improve tube life
- Splash resistant design for use in all types of field locations
- Compact, portable design is suitable for hand-carrying; built-in handle

IDX-5000 .....\$2955.00

# COLOR DATA/ VIDEO PROJECTORS

## VPH-1040Q Super Bright Color Video Projector

- Light output of more than 600 lumens
- Accommodates screen sizes from 60" to 250", measured diagonally
- Flexible placement: Can be mounted on a desk, suspended from the ceiling, or placed on an optional low-rise pedestal (Sony SU-722)
- Total screen flexibility: Projects onto any flat screen, high-gain curved screen (optional Sony VPS-100HG1), translucent rear screen or even directly onto a white wall
- Convenient scan reversal for ceiling mount and rear projection, via reversible connectors and switches
- Four video signal standards: Automatic sensing and selection of PAL, SECAM, NTSC, and NTSC 4.43
- Analog RGB inputs
- Transportable with optional VLC-1030 carrying case
- Simplified set-up requires no special training; internal test pattern for quick alignment
- Built-in audio eliminates the need for bulky external PA equipment
- Ultra-high horizontal resolution: 520 lines via video inputs; 900 lines (center) via RGB input
- Special Blue Mode selects blue background to enhance legibility of computer images
- Three powerful 5.5" coolant-sealed picture tubes for high brightness; large-diameter guns for high resolution; liquid color filtering for exceptional color purity
- Bright f/1.0/130mm lenses use glass/acrylic hybrid design for superior resolution and contrast
- Dual-focus lens with separate internal adjustments for center focus and corner focus; maintains clarity across the face of the screen
- Optional VPR-722 Remote Control maintains full flexibility in permanent installations

VPH-1040Q ..... \$6,200.00

## VPH-1030Q1/VPH-2030Q1

### Multi-Scan Data/Video Projectors

- Full automatic locking for computer signals (H:15-36kHz, V: 50-100Hz)
- High resolution (RGB: 900 lines, Video: 520 lines)
- Displays 4000 characters
- High brightness of 300 lumens
- PAL/SECAM/NTSC/NTSC 4.43
- Auto sense for TV standard
- RGB/video superimpose
- 2 RGB inputs
- Built-in speaker

# INTERACTIVE VIDEO SYSTEMS

## VIW-3015/VIW-3020 Interactive Video Systems

At the heart of each VIEW System is the SMC-3000V Microcomputer and either the LDP-2000 Series or LDP-1500 Videodisc Player. These components can easily be internally configured and mated to a variety of options to suit a broad range of interactive video applications.

### VIW-3015 VIEW System

The VIW-3015 VIEW System provides fully integrated, advanced interactive video performance through the use of the SMC-3000V Microcomputer. The computer is mated with the LDP-1500, a basic videodisc player that has all the features considered essential in an industrial-grade system. The VIW-3015 thus represents a high-quality, lower-cost alternative to users who do not require the expandability of the LDP-2000 Series Videodisc Player.

- Integrated single package simplifies installation and transportation, reduces space requirement, and ensures trouble-free operation
- Runs commercially available VIEW courseware and authoring software
- Intel 80286 microprocessor in SMC-3000V runs at 8MHz for fast performance and operates under MS-DOS for IBM PC/AT compatibility
- AT-standard 16-bit bus with 5 open slots permits expansion and customization of system using plug-in boards readily available from many sources
- Advanced graphics capability, including IBM CGA-compatible and VIEW System HG graphics; up to 672 x 496 resolution; multi-page memory for faster graphics displays updates; RGB Superimposer for combined video/graphics

### LDP-1500 Videodisc Player

- **Quick Random Access** — Any video frame on a CAV disc can be accessed in 2.5 seconds or less
- **External Computer Interface** — RS-232C protocol provides a high degree of software control over player's functions through a wide range of commands, automatic feedback codes, and status queries
- **Automatic Optical Block Lock-down** — protects critical optical assembly from potential damage during transportation and eliminates need for manual lock-down screws
- **Automatic Front Loading** — Motor-driven disc tray can be operated manually or by external computer

VIW-3015 .....\$7580.00

VIW-3020

VIW-3015

### VIW-3020 VIEW System

The VIW-3020 VIEW System comprises the SMC-3000V Microcomputer and the LDP-2000 Series Videodisc Player, a combination which must be considered the state-of-the-art in interactive video.

It delivers all the hardware, software, graphics, and compatibility features of the VIW-3015 VIEW System. The integration of the LDP-2000 Videodisc Player, however, gives the VIW-3020 the added dimension of easy system expandability.

### LDP-2000 Series Videodisc Player

The key to the LDP-2000's expandability is its modular design, which makes it possible to configure the player through simple board additions. Because you can choose only those functional capabilities you truly need, you won't have to pay for unnecessary features. And you can upgrade your system at a later date without external add-ons and messy wiring or, worse, replacing the entire player.

In addition to all of the features found on the LDP-1500, plus an even faster random access (any CAV disc video frame can be accessed in 1.5 seconds or less), the LDP-2000 provides the following optional capabilities:

- **Still Frame Audio Option** — Allows you to play videodiscs with still frame audio, which permits compressed digital audio to be stored in each video frame, thus greatly enhancing the audio capabilities of the VIEW System.
- **Videodisc Computer Data Option** — Allows the external computer to read data from a videodisc as reliably as from magnetic media (e.g., floppy disks)
- **IEEE-488 Interface Option** — Permits player control via a parallel interface and provides faster transmission rates when transferring digital data from videodisc to external computer

VIW-3020 .....\$8495.00

## V1-K Series 1" Video Tape

• Offers smooth transport in all modes and on all C-format VTRs • For professionals with the most demanding requirements

**Cartons**—V1-K-18B, V1-K-34B, V1-K-66B, V1-K-96B

**Shipper Case**—V1-K-18SP, V1-K-34SP, V1-K-66SP, V1-K-96SP, V1-K-126SP, V1-K-156SP, V1-K-188SP

## V-16 Series 1" Video Tape

• High sensitivity for mastering durability to withstand stress of editing and repeated play • Minimal dropouts 3 per minute.

**Cartons**—V-16-18B, V-16-34B, V-16-66B, V-16-96B, V-16-126, V-16-188  
**Shipper Case**—V-16-18SP, V-16-66SP, V-16-34SP, V-16-96SP

## HD-1 Series High Definition 1" Video Tape

High density VIVAX™ magnetic particle rendering high quality picture and sound reproduction required for HDVS.

**Shipper Case**—HD-1-33SP, HD-1-48SP, HD-1-63SP

## XBR Series U-Matic Videocassettes

• The ultimate broadcast master • Offers improved video and audio characteristics, greater durability, reliability and low dropout rate

**KCA XBR Videocassettes (for standard size U-Matic machines)**

KCA-10XBR, KCA-20XBR, KCA-30XBR, KCA-60XBR

**KCS XBR Mini Videocassettes (for portable, in-field use)**

KCS-10XBR, KCS-20XBR

## BRS Series U-Matic Videocassettes

• Broadcast standard videocassette • Carbon Mirror™ backcoating and anti-static shell

**KCA BRS Videocassettes (for standard size U-Matic machines)**

KCA-10BRS, KCA-20BRS, KCA-30BRS, KCA-60BRS.

**KCS BRS Mini Videocassettes (for portable, in-field use)**

KCS-10BRS, KCS-20BRS.

## KSP Series U-Matic Videocassettes

• Designed especially for use with Sony Pro Plus VCRs • Super Vivax magnetic particles allows tape to handle higher FM carrier frequency of the U-matic SP system

KSP 10, 20, 30, 60

KSPS Mini S10, S20

# VIDEO/AUDIO TAPE

## BCT Series Betacam Videocassettes

• Designed to meet the producers' needs for reliable, durable, broadcast quality cassettes.

BCT-5K, BCT-10K, BCT-20K, BCT-30K

BCT-60L, BCT-90L (to be used only with Betacam SP VTRs capable of loading large cassettes)

## BCT Metal Series Betacam SP Videocassettes

• Ultra-fine metal particle for greatly enhanced video and audio characteristics

BCT-5M, BCT-10M, BCT-20M, BCT-30M (small metal cassettes)

BCT-5ML, BCT-10ML, BCT-20ML, BCT-30ML, BCT-60ML, BCT-90ML (large metal cassettes)

## 4:2:2 Component Digital Video Master Cassettes

• Super Vivax magnetic particles • High Polymer binder system ensures uniform, high density particle distribution

DCM-600, DCL-1300

## 1/2" PRO X Series Videocassettes

• Designed for professional quality • Ultra fine super precision Vivax • High density • Beta S/N improved by 1dB, color S/N by .5dB • VHS S/N by 1.5dB compared to ESX Hi-Fi • Perfect for recording video master tapes, editing and dubbing, PCM digital audio recording

**BETA**

L-250, L-500

**VHS**

T-120

## 1/2" Dynamicron-Series Videocassettes

Economical high value performance for general purpose recording

**BETA**

L-125, L-250, L-500,  
L-750, L-830

**VHS**

T-60, T-90, T-120, T-160

## MP Series Metal Particle 8mm Videocassette

• Cosmiclute Ultra-fine magnetic particle ensuring high output and low noise. Unique UST (Ultra Surface Treatment) virtually eliminates dropouts.

**Packages**—P6-30MP, P6-60MP, P6-90MP, P6-120MP

**Bulk**—P6-30PH, P6-60PH, P6-90PH, P6-120PH

## D-1/4, D-1/2 Series Open Reel Digital Audio Tape

• High coercivity magnetic particles and precise surface technology provide excellent resolution and high output, especially in the high frequencies

1/4" — D-1/4-730, D-1/4-1460, D-1/4-2190

1/2" — D-1/2-1460, D-1/2-2920

## 3/4" Digital Audio Master Cassette

• Extremely low dropout rate • High precision cassette shell for reliable tape transport

KCA-60BRK-PCM, D-3/475U

## Tape Accessories

CL-25—U-Matic tape case; CL-1-SPS—1" Tape shipper case (9" dia.);

CL-1-SPM—1" Tape Shipper Case (10.5" dia.); CL-16SPL—1" Tape

shipper case (14" dia.); KCS-1CL—U-Matic cleaning cassette; BCT-

5CL—Betacam cleaning cassette; L-25CL—Betamax cleaning cas-

sette; V-25CL—VHS cleaning cassette; RI-9V—1" Empty reel (9");

RI-10V—1" Empty reel (10.5"); RI-11V—1" Empty reel (11.75");

RI-14V—1" Empty reel (14")

# U-MATIC VIDEOCASSETTE RECORDERS

## BVU-110 Portable U-Matic Videocassette Recorder

- Lightweight and rugged construction
- Low power consumption (13W)
- Back-space editing
- Recording/playback of SMPTE/EBU time code
- Real time counter
- Picture search function
- Warning indicators
- Built-in color replay
- AGC or manual audio recording
- Framing servo
- TBC connection facility
- 9.53cm/sec tape speed
- 260 lines horizontal resolution
- 50Hz-15kHz frequency response

### Supplied Accessories

Carrying case  
Shoulder strap  
Carrying strap  
Camera cable CCJQ (10-pin, 14-pin) 0.5m  
Operation and maintenance manual

### Optional Accessory

BK-112 Plug-in time code generator

BVU-110

### Specifications

Dimensions: 5.3" H x 13.2" W x 15.5" D

Weight: 20 lb. 1 oz.  
(w/battery & cassette): 24 lb. 15 oz.  
Power Requirements: DC 12<sup>1/2</sup>V  
Power Consumption: 13W (12V, 1.08A)  
Operating Temp.: 32°F to 104°F  
Storage Temp.: -4°F to 140°F  
F FWD, REW TIME: < 3 min.  
Tape Speed: 9.53cm/sec.  
Wow/flutter: 0.2% RMS

BVU-110 . . . . . \$5,460.00

## BVU-150 Portable U-Matic Videocassette Recorder

- Two modes of record/replay: SP U-matic mode and conventional U-matic mode
- Compact, lightweight, and rugged design
- Improved picture quality employing Y/C separator, chroma enhancer, and noise canceller, etc.
- SP tape activates SP mode for the highest possible video and audio quality
- Integral time code generator, BKU-150
- Video confidence playback
- Back space editing capability
- External time base corrector facility
- Dolby C noise reduction system
- Audio mixing for recording and playback
- Status and malfunction indicators

### Supplied Accessories

Carrying case  
Shoulder strap  
Carrying handle  
Carrying strap  
Level control knob  
Operation and maintenance manual

### Specifications

Dimensions: 5.5" H x 10.3" W x 14.0" D  
Weight: 15 lbs.  
Power Requirements: 11.0 to 14.0VDC (NiCad battery pack BP-90 used)  
AC operation with AC adaptor AC-500 (optional)  
Power Consumption: < 23W  
Operating Temp.: 32°F to 104°F  
Storage Temp.: -4°F to 140°F

BVU-150

Fast Forward Time: (with Sony KSP-S20/KCS-20B RK/KCS-20K) < 3 min.  
Rewind Time: (with Sony KSP-S20/KCS-20B RK/KCS-20K) < 3 min.  
Search Speed: Approx. 10 times normal speed in forward and reverse directions  
Tape Speed: 3<sup>3/4</sup> ips (9.53cm)  
Wow and Flutter: < 0.2% RMS

# U-MATIC VIDEOCASSETTE RECORDERS/ REMOTE CONTROLS/TBC

## BVU-850/870 SP Broadcast Studio U-Matic® Videocassette Recorder/Players

- Wide range dynamic tracking™ (BVU-870)
- Two modes of record/replay: SP U-matic mode and conventional U-matic mode, and all equivalent BVU-800 functions
- Improved picture quality resulting from the Y/C separator, chroma enhancer, and noise canceller
- Comprehensive built-in editing facility
- High speed picture search function: bidirex search at 1/30, 1/10, 1/5, 1/2, 1, 2, 5, or 10 times normal speed
- Jog mode provides field by field tape movement
- Plug-in time code generator/reader
- Interfaces with RS-422 serial interface and 36-pin parallel interface
- 19" rackmountable with 6 units of space
- Audio mixing for recording and playback
- S/N ratio better than 52dB (Dolby off)
- Tape speed: 9.53cm/sec
- Horizontal resolution: SP Mode: 340 lines NTSC
- Frequency response: 50Hz to 15kHz ± 3dB (SP mode)

**BVU-850** . . . . . \$15,225.00

## BVU 950 SP U-Matic Videocassette Recorder

- Sendust heads
  - 340 TV lines
  - Type-C Dolby NR
  - 15kHz ± 3dB
  - 52dB S/N with Dolby NR off
  - 72dB with Dolby NR on
  - Dolby NR auto detection system
  - Accurate audio insert editing
  - BKU-901 plug-in time base corrector, optional
  - BKU-905 plug-in time code generator/reader, optional
  - Dial operation concept
  - Built-in editing facility
  - Speeds of still to 10 times high speed picture search
  - RS-422 Serial interface (remote 1, 9-pin)
  - TBC remote connector
  - 24-pin parallel interface (remote 2, amphenol)
  - External TBC connection
  - Video/out-1/-2 two monitor output connectors
  - REF Video in and out connectors
  - Self diagnostics
  - Digital hour meter
  - Anti-clog facility
  - 19" EIA rackmountable
  - Hinged and detachable front panel
- BVU-950** . . . . . \$12,500.00

**BVR-800**

**BVR-820**

## BVR-800 Remote Control Unit

- Fluorescent tube display — CTL/Time code, VTR operation mode, Cue points
  - Up to 500m remote control capability with RS-422 interface
  - Various remote control functions — Record, Playback, Fast Forward, Rewind, Stop, Stand-by, Eject, Preroll, Search
  - Adjustable preroll time — up to 9 seconds 29 frames (NTSC, PAL-M)
  - External command input and status output
- BVR-800** . . . . . \$1,300.00

## BVR-820 Remote Control Unit

- Cue-point memory up to 3 points for cue up, preroll, stunt play
  - Adjustable preroll time — up to 9 seconds 29 frames (NTSC, PAL-M)
  - Dynamic tracking playback between two cue points
  - Capability of memory expansion up to 256 points
  - Fluorescent tube display — CTL/Time code, VTR operation mode
  - Up to 500m remote control capability with RS-422 interface
  - Various remote control functions — Record, Playback, Fast Forward, Rewind, Stop, Stand-by, Eject, Preroll, Search
  - External command input and status output
- BVR-820** . . . . . \$2,400.00

## BVT-810 Digital Time Base Corrector

- TBC for capstan servo color under VTRs
  - Compact and lightweight
  - 15H p-p window correction
  - 8 bits, 3X fsc sampling
  - Built-in process mode
  - Recognizable B/W picture up to ± 40 times normal speed
  - Built-in digital DOC; 1H (NTSC)
  - Remote control capability
  - Selectable V-blanking
  - Chroma noise reduction
- BVT-810** . . . . . \$11,550.00

# EDITING CONTROL UNITS/ SPECIAL EFFECTS GENERATOR

## BVE-800 Editing Control Unit

- Time code/CTL editing • 3 machine control • Quick access to edit point • 10-key input/scratchpad register • 128 event memory • Auto search function • First edit function • Split editing • Cue-tone recording/playback

### Supplied Accessories

- AC power cord • Extension cord • Dust cover • Operation and maintenance manual

### Specifications

**Power Requirements:** 100VAC to 240VAC, 50/60Hz  
**Power Consumption:** 75W max.  
**Weight:** 13.3kg  
14.5kg with BK board mounted  
**Operating Temperature:** 5°C to 40°C  
**Storage Temperature:** -20°C to 60°C  
**Dimensions:** 7.5" H x 16.6" W x 21.7" D  
**BVE-800** .....\$6,000.00

BVE-800

## BVE-900 Automatic Editing Control Unit

- Four VTR control • Switcher control for full effects • Audio mixer control • 2 auxiliary sources—both can be assigned to access • Multiple source selection • Longitudinal, vertical internal time code, control track • Battery backup—protects edit decision list events in case of power failure • Non-volatile memory • Color framing • Cue tone record/playback option • Advanced graphic effect mode display • Full synchronization accuracy selection • Dynamic motion control—-1 to +3 times normal speed synchronization • Crosspoint selection • Matched frame edit • Automatic time tracking

**BVE-900** .....\$ 7,875.00  
**BVE-900 Pro Pac** (includes BVE-900, CPD-121, 2 BKE-904's) .....10,350.00

BVE-900

## SEG-2550 Color Special Effects Generator

- 8 video inputs and 4 bus • Preset/program bus • External key • Versatile wipe patterns and control • Shadow and edge adjustment • Downstream keyer (DSK) accepts key source from a black and white camera and SMC-70G microcomputer • Independent color generation for the DSK • Interfaces with the BVE-900 Edit Controller • Interfaces with an external computer via RS-232C communication port • Fully integrated E-file system • Integral sync generator • Tally and intercom facility • 19" rackmountable • Torque adjustable • SC/H Phase adjustment • Interface capability with CRK-2000 which provides a chroma keyer input • Crosstalk: >-50dB • Frequency response: 8MHz ± 0.5dB • Signal-to-noise ratio: <-60dB • 14.5kg

**SEG-2550** .....\$9,800.00

# TIME CODE GENERATORS/READER

## BVG-100 Portable Time Code Generator

- LTC and VITC generator for portable 1-inch and portable U-Matic recorders • Normal speed LTC reader function • Slave/extrapolation capability • Color frame lock • Error concealment capability • Hold/remote hold function • User's bit

### Supplied Accessories

- 6-pin cable plug for remote control • Reference labels (hexadecimal number and tens frame digit notation) • Operation and maintenance manual

### Optional Accessories for BVG-100

#### BK-101 Interface Kit for BVU-500a Series

- 14-pin — 14-pin multi-cable (connecting to VTR, 0.4m) • 6-pin — XLR 3-pin cable (time code output cable, 0.36m) • XLR 3-pin — 24-pin cable (time code input cable, 0.23m) • Mounting plate

#### BK-102 Interface Kit for BVU-50 Series

- 14-pin — 14-pin multi-cable (connecting to VTR, 0.4m) • 6-pin — DIN 5-pin cable (time code output cable, 0.23m) • Mounting adaptor • Mounting plate

#### BK-103 Interface Kit for BVU-100 Series

- 14-pin — 10-pin/XLR 3-pin cable (connecting to VTR, 0.4m) • 6-pin — DIN 5-pin cable (time code output cable, 0.23m) • Mounting adaptor • Mounting plate

### Specifications

**Dimensions:** 2" H x 4.5" W x 6" D  
(including projecting parts and controls)

**Weight:** 1 lb. 9 oz. including battery

BVG-100

**Operating Temperature:** 32°F to 104°F  
**Storage Temperature:** -4°F to 140°F  
**Power Requirements:** 9VDC to 18VDC, supplied from VTR or battery (6F22)  
**Power Consumption:** 10mA max.  
 When power is off: 0.4mA max.  
 When light is on: 70mA max.

BVG-100 ..... \$2035.00

## BVG-1500 Time Code Reader

- Readout capability of LTC/VITC and user bits • Built-in character generator • 8-digit LED display/display hold • Waveform processing function (LTC) • Various mode indication • Frame suppress function • Compact and lightweight • TTY interface capability with BKG-1501 (optional)

### Supplied Accessories

- 50-pin ribbon connector • 6-pin connector • Rackmount metal kit • Labels for remote indicator • Operation and maintenance manual

### Specifications

**Power Requirements:** 100VAC to 120/240VAC to 240VAC  
± 10%, 50/60Hz

**Power Consumption:** < 20W

**Operating Temperature:** 32°F to 104°F

**Storage Temperature:** -4°F to 140°F

BVG-1500

**Dimensions:** 1.7" H x 16.7" W x 13" D

**Weight:** Approx. 8 lbs. 13 oz.

BVG-1500 ..... \$4000.00

## BVG-1600 Time Code Generator

- LTC/VITC generator • Hexadecimal user bits data setting • Normal speed LTC reader function • Slave/extrapolation capability • Time code color frame lock capability • 8-digit LED display • Various mode indications

### Supplied Accessories

- 50-pin cable • 50-pin ribbon connector • 6-pin connector • Rackmount metal kit • Labels for remote indicator • Operation and maintenance manual

### Specifications

**Power Requirements:** 100VAC to 120/220VAC to 240VAC  
± 10%, 50/60Hz

**Power Consumption:** < 20W

**Operating Temperature:** 32°F to 104°F

**Storage Temperature:** -4°F to 140°F

BVG-1600

## DZN-1/QEP Lighting Control System

The DZN-1/QEP Lighting Control System provides low cost control and power distribution to incandescent lighting instruments. The system's expandability enables the user to increase the capacity and control as needed. QEP's may be "daisy chained" to increase power capability, and DZN's may be linked in series or parallel to provide increased channels or two scene capabilities.

### DZN Control Modules

- Dual masters for each channel
- Push buttons to flash
- Master blackout
- A/B submaster switches
- Control voltage: 12VDC
- 19" rackmount
- Size: 2 1/2" H x 19" W x 8 3/4" D
- Weight: 6 lbs.

DZN-1 12-channel single scene expandable control for QEP . . \$440.00  
DZN-2 12-channel single scene expandable control for OX-12 . . 440.00

### DZN-2C Control Modules

- X/Y split crossfaders with pile-on capability
- X/Y scene masters
- Master/slave selector for expansion
- Master/slave master selectors for each channel
- Independent master
- Grand master
- Bump buttons
- Pushbutton blackout
- Control voltage: 2-10VDC
- 19" rackmount
- Size: 12 1/4" H x 19" W x 5" D
- Weight: 6.5 lbs.

DZN-2C-1 12-channel, two scene expandable control for QEP . . \$627.00  
DZN-2C-2 12-channel, two scene expandable control for OX-12 . . 627.00

### QEP Power Modules

- Rig mountable for easy economical set-up and reliable performance
- Powered from a wall outlet, eliminating direct hook-up
- Each channel is individually fused with an AGC 5 or 10A fuse, depending on operation parameters
- Each QEP carries its own power supply and timing signal, eliminating any phase problems
- Size: 11 1/2" H x 7 1/2" W x 3 1/4" D
- Weight: 5 lbs.

QEP-15 4-channel power module—NEMA 5-15 power input . . \$301.40  
QEP-20 4-channel power module—NEMA 5-20 power input . . 301.40

### EFC Foot Operated Controller

- Dipless crossfade or pile on
- Channel chase on/off
- Scene sequence on/off
- Fade out
- Black out
- Foot adjustable fade/sequence and chase rates
- Programmable chase matrix
- Size: 19" H x 4" W x 11" D
- Weight: 12 lbs.

EFC 8-channel, four scene for QEP . . . . . \$650.00

### Control Cables and Accessories

## EVO Series Modular Controller

The EVO Series Modular Controller represents a versatile design approach in lighting control. The EVO's mainframe design permits maximum system flexibility and enables the user to streamline the system to suit specific applications. The system will readily adapt to future requirements and has literally, unlimited expansion capabilities.

"Specialty" modules, designed for specific applications may be incorporated into existing systems when desired. These specialty modules will ensure EVO's suitability to far more applications than any other controller.

The Autofade Master Module (M1) provides the central mastering functions, and is the foundation from which your EVO system will grow. The desired number of six channel dimmer control modules (DC1) are then added to provide the individual channel functions. More DC1's may be added as your system requirements increase.

EVO-M1 Master Module . . . . . \$900.00  
EVO-DC1 6 channel, 2 scene dimmer control module . . . . . 550.00

# VIDEO PRESENTATION SYSTEM

VM-55

## VM-55 VHS Video Presentation System

- 5 1/4" color monitor
- Full size 1/2" VHS format
- 4-head deck
- 22 lbs.
- Fits under an airplane seat

The VM-55 is geared for the sales, marketing or training professional. It can be operated with both AC and DC (using an accessory battery pack), has a built-in battery charger, retains a 10-pin connector for easy camera hook-up and boasts rotary 4-head helical scan, azimuth recording for superior playback, pause and slow motion (with the use of remote control).

The unit utilizes full size 1/2" VHS cassettes, has top-mounted loading and function controls, has a fold down arm which acts as both a carrying handle and an elevation device and comes equipped to accept a full range of accessories. The VM-55 is constructed to withstand rugged use, and comes in a matte industrial black finish to complement its business-like design.

### Specifications

<b>Format:</b>	1/2" VHS Portable Recorder/Player with monitor built-in. Rotary 4-head Helical Scan, Azimuth Recording
<b>Speed:</b>	SP, LP and EP (Records and Plays up to 8 hours)
<b>Monitor:</b>	5" Diagonal. Tint, Color, Contrast and Brightness Control Knobs
<b>Speaker:</b>	0.5W, 8 ohms
<b>Loading:</b>	Top Loading (Cassette)

### Features:

(Front Panel or Top) Play, Stop, Record, Cassette Ejection, Pause, Counter, Rewind/Fast Forward (high speed and viewable), Counter Reset, Audio Volume, Power Switch, After Recording, Insert, Tracking, Sensor for Wireless Remote Control and Auto-Rewind. (Slow motion available with use of Remote Control only).

### Indicator Lamp:

Play, Stop, Pause, Record, After Recording, Battery Warning, Dew Light

### Earphone Jack:

Included (Disengages internal speaker when in use)

### Video In/Out:

Included

### Video Input:

0.5-2.0V p-p (75 ohm RCA Connector).

### Video Output:

1.0V p-p (75 ohm RCA Connector).

### Video S/N:

45dB Over

### 10-Pin

#### Connector:

Included

### Audio Output:

Microphone: -67dB (mini jack)

Line: -20dB (RCA Connector)

Line: -6dB (RCA Connector)

### Audio Output:

70Hz-8kHz Audio Output: Line (Standard)

### Audio Hertz:

Over 240 Lines (Standard)

### Resolution:

5.5" H x 15" W x 16" D

### Dimensions:

22 lbs.

### Weight:

117VAC, 12VDC (Battery Pack Extra Option).

VM-55 ..... \$675.00

### INFORMATION REGARDING SLOPING FRONT CONSOLES

**A. Material:**

1. Cabinet-corner post: 14 ga. steel
2. Mouldings and braces: 16 ga. steel
3. Panel mounting angles: 12 ga. steel

**B. Manufacturing/assembly procedure:**

1. "Butt-welding" and seam welding
2. Electronically-controlled spot-welding

**C. 19" wide panel space (for standard 19" formed or flat panels) available at front, rear, and top.**

**D. Panel mounting hole spacing: EIA and WE.**

**E. Panel mounting holes TAPPED 10-32 thread.**

**F. May be bolted together in any quantity for multiple installation or developing console assemblies.**

**G. Panel mounting angles:**

1. Two pair provided, one pair at front, one pair at rear.
2. May be positioned to any depth from front to back or back to front by loosening the bolt that holds them to the STANTRON "UNICHANNEL."

**H. Pontoon base features:**

1. Bolted to cabinet bottom.
2. Will accept casters (catalog VCC3, load capacity 800 lbs. per set of four; casters are recessed. Casters add 1" to height.)
3. Has provisions for bolting to floor. (By reversing)

**I. Other accessories, such as drawers, work/writing surfaces, etc., are available**

**EXHAUST or INTAKE FAN ASSEMBLIES**

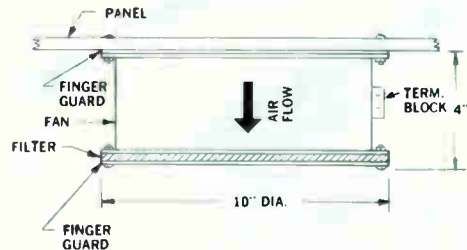

**MODEL NO. VCTA530**

- STANTRON TUBE AXIAL FAN has been designed for flushing and cooling VIDEO CENTER cabinets. The FAN can be used for both exhaust or intake since air flow direction is established by mounting position.
- Two finger guards, one on each side, are provided with each FAN and unit cost includes installation.
- When ordering, specify VCTA530-EX for exhausting air or VCTA530-IN for intake of air.
- IMPORTANT: When ordering, specify where fan is to be installed. If installed in door, indicate top or bottom.

1. Plain:
  - (a) 5/8" flange all four sides
  - (b) Fits into 5/8" recessed opening on all STANTRON cabinets to create "flush appearance"

**2. Louvered:**

- (a) Same features as plain panel
- (b) Double-row of louvers
- (c) Louvers are 6" long
- (d) Louvers are 3/4" high
- (e) 1" between louvers
- (f) Approximately 1 3/4" square inches of ventilation per louver

**3. Perforated:**

- (a) Same features as plain panel
- (b) 1/16" dia. holes on 1/8" centers — staggered rows
- (c) 26% open area

# The Bill Daniels 1988 Illustrated Trade References

**The Most  
Comprehensive  
Library Of  
Equipment  
Trade References  
Ever Published!**

### **Professional Audio & Commercial and Industrial Sound**

Over 1,800 pages of studio and remote audio equipment for stage, concerts, auditoriums, stadiums and more, plus sound reinforcement, background music, paging, intercommunications, telephone & telecommunications systems & equipment.

**ONLY \$195.00** (2 Volume Set)

### **Industrial & Professional Video**

Over 1,200 pages of equipment information for those persons engaged in video production and communications, professionals who have operating responsibilities, purchasing and specifying authority. A reference book that presents in detail the majority of all equipment available and sold through dealers.

**ONLY \$95.00**

### **Broadcast Equipment**

Over 1,200 pages of studio, remote and location equipment and systems for commercial and tape production, broadcast television, radio, cable, pay and satellite TV, special effects, animation and music videos.

**ONLY \$95.00**

### **Closed Circuit Video Surveillance & Antenna Systems Equipment**

Provides a comprehensive review with over 700 pages of video surveillance and master antenna

distribution systems. This book provides the product information necessary to design, specify and purchase video surveillance and signal distribution equipment from single camera/monitor to multi-camera sequential switching systems with time-lapse alarm activated recorders—from single antenna/TV set to thousands of TV outlets.

**ONLY \$69.50**

### **Security & Loss Prevention Equipment & Devices**

A must for any security executive's desk. Features over 2,300 pages of surveillance systems, loss prevention, residential, personal and vehicle protection, electronic countermeasures, radio and communication equipment, and fire detection systems.

**ONLY \$195.00** (2 Volume Set)

### **Educational, Training, Presentation & Photographic Equipment**

300 plus manufacturers of the equipment and devices used in presentations from classrooms to boardrooms. This reference features the industry's products from film cameras to electronic blackboards. If your interest is in expanding and improving communication methods through effective use and audio-visual, multi-image and photographic media, this book contains most of the products available.

## CASES

If it's Audio, Video, Computerized, or anything that is valuable and must travel safely, Star Case has probably built a case for it during the past decade. Star Case offers 3 completely different lines of fiberglass cases (ATA Star/Super Star/Ultra Star) that conform to and exceed all ATA specifications, plus a lightweight (Carry Star) case line designed for surface transportation. Custom cases can be built to your requirements or you can use one of the 50,000 predesigned models from the Star Case library.

### Carry Star Surface Travel Cases

- 1/8" plywood with tough shock resistant fiberglass
- Exterior surface-mount hardware
- Lightweight, yet rugged
- Perfect for local travel
- Choice of 4 colors

### ATA Star Flight Cases

- 1/4" plywood with tough shock resistant fiberglass
- Recessed step-down hardware
- Exceeds Air Transport Association Spec 300 Category I and Military Spec 810 D
- Choice of 11 colors

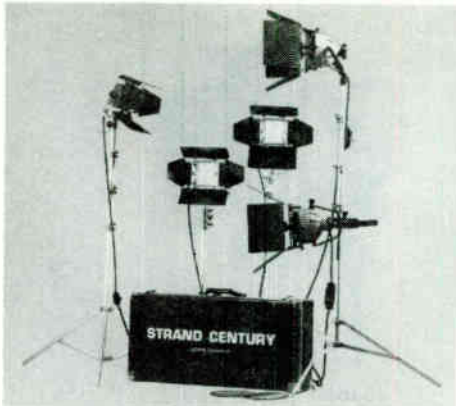

### Super Star and Ultra Star Premium Flight Cases

- 1/4" plywood (Super Star) with tough shock resistant fiberglass
- 1/2" plywood (Ultra Star) with tough shock resistant fiberglass
- Extra deep tongue and groove valance
- Recessed step-down hardware
- Exceeds Air Transport Association Spec 300 Category I and Military Spec 810 D
- Choice of 11 colors

KIT V

## Pulsar 600W

A light, compact, open faced floodlight, it is ideally suited for remote and location work. Stand camera-mounted or handheld, the Pulsar's fiberglass "cool touch" housing is a great asset. It gives a soft edged beam with variable spread, has a rapid-turn fast focus knob and an integral heat dissipator — and slips into compact storage. Operates both 120V and 240V lamps.

## lanebeam 650W

lanebeam floodlights have basic features in all sizes: They are open faced, lightweight, compact, durable and ideally suited for work in film, television and still photography. They provide a soft edged beam with variable spread and fast focus. The 650W model accepts a variety of tungsten-halogen lamps for both 120V and 240V operation.

## lanebeam 1000W

The 650W and 1000W lanebeam floodlights feature molded fiberglass housing for "cool touch" operation permitting faster pack-up after shooting as well as comfortable handling. The 1000W accepts a

# PORTABLE LIGHTING KITS

KIT VII

variety of tungsten-halogen lamps and like all lanebeams has available a wide variety of accessories and both yokes for stand mounting as well as gaffer grips.

## lanebeam 2000W

The largest lanebeam offered as a kit component is the 2000W which features a lightweight aluminum housing, will operate on 120V and provides a soft edged beam with variable output. It has rapid-turn fast focus knob, is equipped with yoke and stand mounting bracket and a complete range of mounting and grip equipment and accessories. Will also operate on 240V.

## iadi 1000W

This unit provides high output fill light for portable and remote applications in television, film and still photography and features a one piece reflector for a wide field and smooth light distribution. The compact housing with folding, springloaded integral 4-way barn doors is ventilated for cooling and efficient operation on a wide range of tungsten-halogen lamps for both 120V and 240V operation.

includes complete rear-end and front barrel,  
11 lbs. (5kg) .....190.00  
**2750** 500/750W kit for all 6" (152mm) units, includes  
complete rear-end assembly, 6 lbs. (2.7kg) .....150.00

### Notes

- Fixtures are provided with 3' (.9m) leads, connectors and C-clamp for hanging unless otherwise specified
- To specify grounded connector type, add suffix to catalog number  
GP—Three Pin  
GTL—Twistlock  
GR—Parallel Blade U-Ground  
HGP—Harj-lock Pin Connector
- Lamps and color frames not included unless otherwise noted
- Lamps listed are 3200°K unless otherwise noted. Lamps and fixtures are 120V unless otherwise noted
- For international applications, designate 100, 120, 220 or 240V operation

†Call for current lamp prices.

# LIGHTING CONTROL

## Mantrix™ 2S Control Console

- A complete two scene preset console with up to 56 manual overlapping submasters • Operates as a standard four scene preset Mantrix 2 at the flip of a switch • Electronic matrix patch (optional) with displays allows assignment of dimmers to control channels at proportional levels • Controls up to 288 dimmers on 12 to 48 channels • Split crossfader with tracking LED display • Fade rate control for times from 1 second to 4 minutes with manual takeover • Grand Master • Blackout switch • Multiplexed control signal for control of up to 96 2.4kW dimmers on 4 wires, or 97 to 288 dimmers on 8 wires • Controls any combination of 2.4kW, 6kW and 12kW CD80 dimmers • Ideal for use as manual back-up or stage manager's panel with Light Palette® or MiniLight Palette®

### Single Tier Consoles

8110	12 channels, without patch	\$2,070.00
8111	12 channels with patch	3,150.00
8112	24 channels, without patch	2,700.00
8113	24 channels with patch	3,780.00
8108	36 channels, without patch	3,420.00
8114	36 channels with patch	4,500.00
8109	48 channels, without patch	4,050.00
8115	48 channels with patch	5,130.00

### Double Tier Consoles

8116	36 channels with patch	\$4,950.00
8117	48 channels with patch	5,580.00
8118	60 channels with patch	6,300.00
8119	72 channels with patch	6,930.00
8120	84 channels with patch	7,560.00

## Mantrix 2S With Memory

(All prices include 25' control cable)

### Single Tier Consoles

8181	12 channels	\$8,186.00
8182	24 channels	8,822.00
8183	24 channels with video module	9,550.00
8184	36 channels	9,458.00

### Double Tier Consoles (all with video modules)

8186	36 channels	\$10,641.00
8187	48 channels	11,278.00
8188	60 channels	11,914.00
8189	72 channels	12,550.00

## Light Palette Control Console

- Programs and executes six-part fades • Six timed or manual faders, two of which are split • Electronic proportional patching • Programmable fade profiles • Integral memory backup system • Multiplexed output • Special effects package

Light Palette . . . . .POR

## Mini Light Palette Control Console

- Two 9" high resolution CRT displays with all operational information
- Proportional patch for assigning dimmers and levels to channels • 7 overlapping pile-on submasters, 3 inhibitive submasters • Executes up to 3-part cues • 3 crossfaders, 1 of which is split • 200 control channels for up to 384 dimmers • Special effects package • Electronic back-up • Disk for library storage • Interfaces to any dimmer • Diagnostics program

### Options

- Designer's remote console • Remote control unit • Printer • Remote monitor • Full system back-up • Mantrix manual console • Non-dim and auxiliary controls

Mini Light Palette . . . . .POR

Mantrix 2S

Mini Light Palette

Light Palette

Lightboard M

## MLP/2 Mini Light Palette Two Control Console

- Two full-color, high resolution CRT displays are integral • Ability to respond to ambient lighting conditions: dark control booth or bright work lights, MLP/2 adjusts the CRT intensity automatically • Up to 100 unique lighting groups can be loaded onto 10 fully overlapping submasters for ease of operation • Lighting information on all 10 submasters may be assigned and replaced quickly and easily providing random access to 10 banks of manual presets—it's like having a 10-scene preset and memory console in one • Bump buttons are included for even greater effect

MLP/2 . . . . .POR

## Lightboard M Control Console

- Multiplex control signal to drive 384 dimmers, with optional expansion to 768 • Up to 96 channels can be addressed digitally or manually • Up to 48 overlapping submasters • 200 memories • 2 internal special effects generators • 8 remote field-programmable function keys for automated systems • 3 1/4" disk drive standard • Video output standard • Optional remote focus module and printer • Bump buttons on channels and submasters with level control • Recorded or manual rate control

Lightboard M . . . . .POR

CD80 Pack

CD80 Dimmer Bank

CD80 Dimmer Module

## CD80 Dimmer Banks and Modules

• Compact, high density dimmer banks • Dual 2.4kW, single 6kW or 12kW dimmer modules • Designed for all theatrical and television applications

### Dimmer Banks

• Extremely shallow—only 17 3/4" (.45m) deep • Up to 96 plug-in 2.4kW dimmers in 24 1/2" (6.2m) width • Ideal for dimmer per circuit applications • Equipped with quiet fans to maintain proper operating temperatures • Designed to reduce installation costs • Full length guides and self aligning dimmer connectors for positive dimmer module alignment

### Dimmer Modules

• Heavy gauge aluminum chassis • Heavy-duty, self aligning power and control plug • Toroidal chokes • Plug-in non dim modules available

## CD80/8 Dimmer Banks

• High performance, increased filtering chokes that address the requirements of rise time and harmonic distortion in applications where electrical noise and lamp sing is a concern • Racks allow control from more than one console and have the provision of "status quo memory" operation • Compatible with all control consoles in the Strand family • Available with 2.4kW and single 6.0kW modules • No loss in density—48 modules per rack • Compact size—only 17 3/4" (0.45m) deep x 24 1/2" wide • Easy to install; simple to maintain • Quiet fans to maintain operating temperatures • Optional split rack control • Optional "status quo" memory

CD80/8 Dimmer Bank

1584	Swivel crossbar for Coda/3 . . . . .	20.00
1585	Swivel crossbar for Coda/4 . . . . .	28.00
1586	Safety cable for Coda . . . . .	8.00
1963	Gaffer grip, 5/8" (16mm) stud. 0.9 lbs. (0.4kg) . . . . .	34.00
1964	Heavy-duty gaffer grip, supports up to 25 lbs. (11.4kg) 2 lbs. (0.9kg) . . . . .	73.00
1965	Gaffer grip (small) with 5/8" (16mm) socket . . . . .	41.00
1966	Gaffer grip (large) with 5/8" (16mm) socket . . . . .	92.00

## Bases

1560	Table stand with 5/8" (16mm) stud. 4 lbs. (1.8kg) . . . . .	\$33.00
1561	3" (76mm) diameter base, 1 lb. (0.45kg) . . . . .	38.00
1562	6" (152mm) diameter base, 3 lbs. (1.4kg) . . . . .	40.00

## Tormentors and Ladders

1570	1 1/2" (38mm) Tormentor boom, 20' (6.1m) long, 6" (152mm) base and tie-off 65 lbs. (29.5kg) . . . . .	\$237.00
1571	1 1/2" (38mm) Tormentor pipe, 12' (3.7m) long, wall mounted, 44 lbs. (20kg) . . . . .	160.00
1572	Three-rung ladder with four 18" (457mm) 20A pigtails and two 12' (3.7m) 20A feed cables. 60 lbs. (27.2kg) . . . . .	696.00
1573	Three-rung ladder, same as 1572, unwired. 50 lbs. (22.7kg) . . . . .	370.00

## Stands

1513	4'-7' (1.2m-2.1m) stand with 14" (356mm) diameter. 20 lbs. (9.1kg) base . . . . .	\$113.00
1514	5'-8' (1.5m-2.4m) stand with 18" (457mm) diameter. 25 lbs. (11.3kg) base . . . . .	165.00
1519	"Trojan" folding stand for lanebeam 2000 . . . . .	134.00
1520	3'-5' (0.9m-1.5m) stand, castered 30 lbs. (13.6kg) legs . . . . .	196.00

1521	5'-8' (1.5m-2.4m) stand, castered 40 lbs. (18.1kg) legs . . . . .	\$ 200.00
1522	Stand, heavy-duty aluminum castered, extends from 4' (1.22m) to 8'6" (2.6m) 18.5 lbs. (8.4kg) . . . . .	353.00
1529	Stand for 4500MP Pulsar . . . . .	68.00
1530	Small kit stand, aluminum, folds to 21" (533mm) extends to 8'6" (2.6m), 5/8" (16mm) stud. 2.3 lbs. (1.04kg) . . . . .	75.00
1531	Wind-up stand, extends to 8'6" (2.6m) . . . . .	495.00
1535	Regular kit stand, aluminum, folds to 30" (762mm), extends to 8'6" (2.6m), 5/8" (16mm) stud. 2.9 lbs. (1.3kg) . . . . .	88.00
1631	Gladiator stand for 12,000 HMI . . . . .	5725.00

## Operating Poles

1941	Operating pole, 6' (1.8m) 2.1 lbs. (0.95kg) . . . . .	\$107.00
1942	Operating pole, 9'3" (2.8m). 2.8 lbs. (1.3kg) . . . . .	112.00
1943	Operating pole, 12'7" (3.8m) 3.5 lbs. (1.6kg) . . . . .	118.00
1944	Operating pole, 15'10" (4.8m) 4.2 lbs. (1.9kg) . . . . .	124.00

## Lite Lifts and Hangers

1980	Pantograph lite lift, supports 12 lbs. (5.4kg), extends 10' (3m) 13.5 lbs. (6.1kg) . . . . .	\$428.00
1981	Pantograph lite lift, supports 25 lbs. (11.3kg), extends 10' (3m) 13.5 lbs. (6.1kg) . . . . .	450.00
1983	Pantograph lite lift, supports 35 lbs. (15.9kg), extends 10' (3m) 15.5 lbs. (7kg) . . . . .	571.00
1984	Telescopic hanger, 10-20 lbs. (4.5-9.1kg), extends 12'3" (3.7m) 16.5 lbs. (7.5kg) . . . . .	320.00
1985	Telescopic hanger, 10-20 lbs. (4.5-9.1kg), extends 7'4" (2.2m) 12.5 lbs. (5.7kg) . . . . .	279.00
1986	Telescopic hanger, 20-40 lbs. (9.1-18.1kg), extends 12'3" (3.7m) 14.5 lbs. (6.6kg) . . . . .	376.00
1987	Telescopic hanger, 20-40 lbs. (9.1-18.1kg), extends 7'4" (2.2m) 15 lbs. (6.8kg) . . . . .	320.00

## Extension Cables

6410	10' (3m) 3-wire grounded pin connectors 20A, 2.6 lbs. (1.2kg) . . . . .	\$52.00
6411	10' (3m) 3-wire grounded twistlock connectors 20A, 2.6 lbs. (1.2kg) . . . . .	57.00

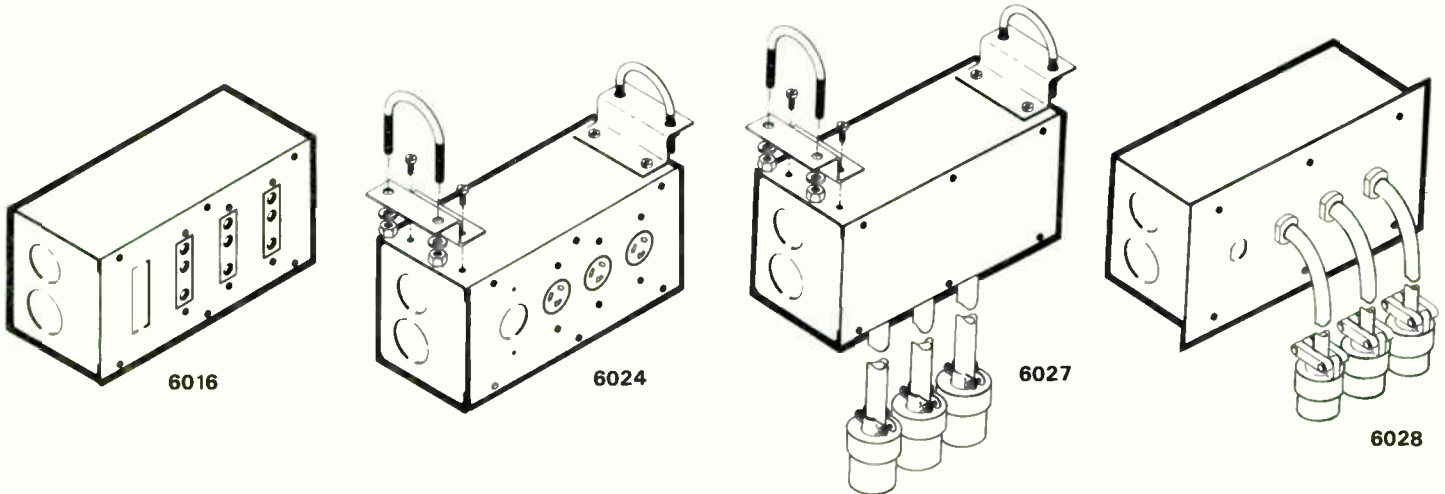

## Cases

1977	Carrying case for Century Kit I (1051) . . . . .	\$271.00
1978	Carrying case for Century Kits II (1052), III (1053), IV (1054), V (1055), VI (1056), VII (1057), VIII (1058) and IX (1059) . . . . .	311.00
1979	Carrying case for Century Kit XI (1061) . . . . .	311.00
3363	Fixture case for 575W HMI head, 25 lbs. (11.3kg) . . . . .	504.00
3366	Ballast case for 575W HMI ballast, 34 lbs. (15.4kg) . . . . .	790.00
3573	Fixture case for 1200W HMI ballast, 39 lbs. (17.7kg) . . . . .	728.00
3576	Ballast case for 1200W HMI ballast, 39 lbs. (17.7kg) . . . . .	896.00
3683	Fixture case for 2500W HMI head, 43 lbs. (19.5kg) . . . . .	830.00
3686	Ballast case, castered for 2500W HMI ballast, 45 lbs. (20.4kg) . . . . .	952.00
3786	Ballast case, castered for 4000W HMI ballast, 52 lbs. (23.6kg) . . . . .	986.00
3793	Fixture case for 4000W HMI head, 49 lbs. (22.2kg) . . . . .	964.00

# FOLLOWSPOTS

## Trouper—Follow Spotlight

- "Cold" metal reflector • Six color boomerang filters • Ultra-Violet filter available • Horizontal masking control • Nichrome steel iris
- Spot focus adjusting knob • Dimming control • Controls for adjusting spotlight height, vertical and horizontal movement • Warranted for 1500 hours • Operating time—continuous • Color temperature 5700°K • Maximum downward tilt 45° • Maximum upward tilt 25°
- Horizontal sweep 360°

48050 700W Xenon	.....\$6,975.00
41050 1200W Metal Halide	.....6,500.00
41103 1200W Replacement Halide bulb	.....435.00

## Xenon Super Trouper—Follow Spotlight

- "Cold" metal reflector • Six color boomerang filters • Ultra-Violet filter available • Horizontal masking control • Nichrome steel iris
- Spot focus adjusting knob • Dimming control • Controls for adjusting spotlight height, vertical and horizontal movement • Operating time—continuous • Color temperature 5900°K • Maximum downward tilt 45° • Maximum upward tilt 25° • Horizontal sweep 360°
- Gross weight approx. 700 lbs.

83051 1000W Xenon	.....\$8,675.00
83050 1600W Xenon	.....8,975.00
83060 1600W Short Throw Xenon	.....8,675.00
83070 2000W Xenon	.....9,350.00
83080 2000W Short Throw Xenon	.....9,100.00

## Xenon Gladiator II and III—Follow Spotlights

- "Cold" metal reflector • Six color boomerang filters • Ultra-Violet filter • Horizontal masking control • Nichrome steel iris • Spot focus adjusting knob • Dimming control • Controls for adjusting spotlight height, vertical and horizontal movement • 2500W Xenon bulb • Operating time—continuous • Color temperature (approx.) 5600°K • Maximum downward tilt 45° • Maximum upward tilt 25°
- Horizontal sweep 360° • Gross weight 930 lbs.

47050 2500W Xenon (Gladiator II)	.....\$11,995.00
47061 3000W Xenon (Gladiator III)	.....13,430.00

## Trouperette III—Quartz-Halogen Spotlight

- 1000W Quartz-Halogen lamp, 250 hour life • Draws only 8.5 to 9.5A • Exclusive single lever controlled two element variable focal length lens system • Horizontal masking control with 45¼ angle adjustment • Nichrome heavy-duty iris • Simple to operate built-in six color boomerang • Quick relamp design • 115VAC operation
- Equipped with 25' 3 wire cable • Maximum downward tilt 36° • Maximum upward tilt 32° • Horizontal sweep 360° • Gross weight 90 lbs.

45003 1000W Halogen	.....\$1,110.00
---------------------	-----------------

## Super Trouperette—Metal Halide Spotlight

- 400W HTI light source • Self-cancelling six color boomerang • High-efficiency optical system • HTI lamp module provides 250 hours of performance • Self-contained power supply operates on 115 or 220VAC • Slightly larger than Trouperette III with 204% more light output

45050 400W Metal Halide	.....\$2,795.00
45901 Lamp Module	.....360.00

## 575—Metal Halide Spotlight

- "Cold" metal reflector • Six color boomerang color filters • Horizontal masking control • Nichrome steel iris • Spot focus adjusting knob • Dimming control • Controls for adjusting spotlight • Height, vertical and horizontal movement • 575W Metal Halide bulb • Life expectancy—750 hrs. • Operating time—continuous • Color temperature 5600°K • Maximum downward tilt 45° • Maximum upward tilt 30° • Horizontal sweep 360° • Gross weight approx. 266 lbs.

41000 575W Metal Halide	.....\$4,875.00
41102 575W Replacement Halide bulb	.....290.00

# TAPE ERASERS

## 409 TABERASER

### Method Of Operation

Tape is placed on the spindle and rotated manually several times at slow speed. Erasure is accomplished by exposing tape to a strong magnetic field. To avoid high-energy pops and thumps being recorded on the tape due to turn-off transients, the field is gradually reduced automatically. Tapes over one inch wide should be turned over and the above process repeated.

### Types Of Tape

Taberaser completely erases all audio, video, instrumentation tapes and magnetic films (widths over one inch must be turned over). Audio and video cartridges, as well as tapes on reels or in boxes, can be efficiently degaussed. Reel sizes up to 16 inches can be accommodated.

### Erasure

30Hz to 15kHz the depth of erasure is 76dB below saturation (from reference control tape).

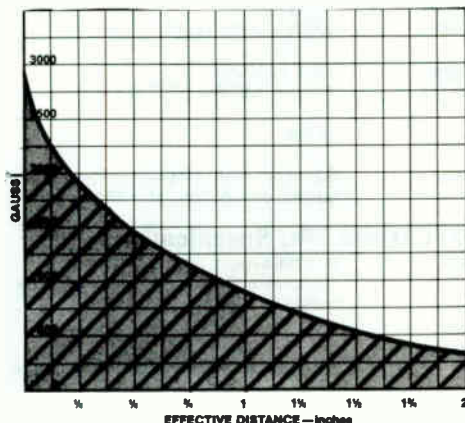

### Thermal Protection

At 150° to 170°F coil surface temperature, the automatic heat overload circuit activates internal blower circuit indicated by front panel red light.

## SPECIFICATIONS

<b>Cycle Time To Erase:</b>	20 seconds
<b>Power:</b>	95-135 VAC, 60Hz, 1 phase 210-230 VAC, 50Hz, 1 phase (both 3 wire)
<b>Maximum Current:</b>	Up to 10 amps
<b>Nominal Current:</b>	2-1/2 amps
<b>Size:</b>	5"H x 10"W x 13-1/2"D
<b>Weight:</b>	409110-60: 46-1/2 lbs. (21kg) 409220-50: 49-1/2 lbs. (22-1/2kg)

409

1500H

## 1500H AUTOMATIC TAPE DEGAUSSER

### Precision Controlled Erasure

Eraser automatically erases all tapes by moving the tape through a strong field while electronically diminishing the field over a precisely controlled decay of the erase field.

### Easy Operation

Operation is accomplished by inserting reels of tape or film stock in the top, or U-Matic; VHS; RCA video cassettes or audio cassettes in the side. The tape control mechanism either rotates the reels or conveys cassettes through the field while the electronics decay the field, thus providing the smoothest and deepest erasure yet accomplished in the state-of-the-art.

### Degaussing Efficiency

Tape with coercivity from 150 oersteds to 1500 oersteds (contact dealer or factory for details) will be erased to a depth of 80dB or greater (as measured from a reference control tape).

### Reel Size

Up to a 19 inch reel of 2 inch video tape, audio tape, 1 inch instrumentation tape, or film stock.

### Cassette Video or Audio

Erases any size video cassette, VHS, U-Matic, 2 inch quad cartridge, audio cartridge or cassette.

### Erase Time

20 to 45 seconds depending on tape format and power configuration.

### Thermal Overload

At 150° to 170°F coil surface temperature, the automatic heat overload circuit activates internal blower circuit indicated by front panel red light.

## SPECIFICATIONS

<b>Power Requirements:</b>	AC Voltage 115 VAC, 60Hz, +/-10% at 20 Amps. Optional 115 VAC, 50Hz, +/-10% at 20 Amps.
<b>Size:</b>	25-1/2"W x 30-1/2"L x 15"H
<b>Weight:</b>	320 lbs.

**X01-100  
FOTOVIX**

## FOTOVIX/FOTOVIX PRO™ Film Video Processors

The FOTOVIX lets you take the film you shot with your 35mm camera, whether slides or film strips, and put it on a TV screen. The resulting image on the screen has the same high resolution as the photographic image and the FOTOVIX will not change or alter the quality of the film in any way.

You can see an instant enlargement of your negatives without a print to check for focusing and color. Slides or positive film can be seen on a large screen which makes it easy to select the right one or check the image.

The FOTOVIX also has creative controls which let you enhance the image on the screen as you wish. Use the vertical/horizontal conversion control to convert film shot with a vertical composition into a full-sized horizontal image.

### Crop Your Picture the Way You Want Utilizing the 6X Zoom and the Easy Positioning Controls

A single control allows you to zoom in on specific areas of the image or to increase magnification to show detail. You can enlarge up to 6X (or 36X in terms of area comparison).

Images enlarged to fill the TV screen may lead to unexpected and exciting discoveries of detail on small photographs. The easy to use positioning controls let you move the image up or down, and left or right. Use the two controls together and trimming is a cinch.

### Simple To Use

The FOTOVIX is loaded with the most technologically advanced features, but is so simple to operate, you can learn to use it from the first day of purchase. Just a flick of a switch and a turn of a knob is all it takes to operate the FOTOVIX.

A touch of a button is all it takes to automatically adjust the white balance for beautiful, clear color reproduction of negative films. The FOTOVIX also has brightness and contrast controls that allow you to change the light intensity and color saturation in your picture. Completely portable, the unit weighs only 13 lbs. and can be used anywhere a TV set or monitor is available.

### Produce Enhanced Color Tones, Achieve Clear Color Reproduction, and Control Brightness and Contrast with Simple Adjustments

The FOTOVIX lets you reproduce the clear color of your film with startling brilliance on your TV screen or be creative and bring out specific colors. The color balance adjustment control lets you enhance the color tone of the picture even if the original negative or positive film is of poor quality. This simple control lets you create special and unusual color effects with a quick adjustment.

### Images Can Be Moved Vertically or Horizontally Just by Using the Easy Positioning Controls

An image is easily moved vertically or horizontally by rotating the vertical or horizontal movement control. The horizontal movement control also acts to advance the film. These functions allow you to create images with different compositions by cutting out unwanted parts and by moving and enlarging the desired part of an image. If you want a close-up of an image in a large area, just move that part to the center of the screen and enlarge it. This handy function will enable you to specify any areas you may want trimmed when you have the picture printed.

### High Quality Video Album Editing

By connecting FOTOVIX with a video cassette deck, you can record on video tape, the photographic images you projected on the TV screen. Make a high quality production with the special features of the FOTOVIX. The electronic fader control lets you fade in or out easily or cut in or out. Even the time in and out can be adjusted. You can add narration or background music to your video album by using the audio dubbing function on the video deck for a professional finished product.

### Connects to a Personal Computer

If you connect an RGB-NTSC encoder or other peripheral device to your personal computer, you can combine the photographic images on your TV screen with computer graphics.

**X01-100 FOTOVIX . . . . . \$2369.00**  
**X02-100 FOTOVIX PRO (Genlock, external sync) . . . . . \$3069.00**

## Type II Bulk Tape Degausser

750 Oe instrumentation tape cannot be considered desensitized until it has been degaussed by  $> -90\text{dB}$ . While a conventional degausser erases a 1600Hz signal at 30 ips to  $-70\text{dB}$  (18.75 mil wavelength), the Type II erases that signal by  $> -95\text{dB}$ . The Type II is also qualified to desensitize 520 Oe computer tape, such as IBM's 3480 tape cartridge.

1500 Oe metal particle video tape, when saturated with a square wave signal of 25kHz at 30ips (1.2 mil wavelength), presents another challenge to degaussing equipment. Tape manufacturers specify a minimum erasure level of  $-60\text{dB}$  for rerecording integrity. A conventional degausser erases to  $-41\text{dB}$ . The Type II erases the signal  $> -80\text{dB}$ .

### Performance

Erasure:  $-90\text{dB}$  minimum; Cycle Time: 45 seconds; Degaussing Safeguards: Continuous monitoring of field currents with latching audible alarm and visible reset indicator, interlocking turn table cover, temperature protection safely limits duty cycle during operation under abusive environmental conditions.

### Media Size

Open reels to 1" wide x 14" diameter, with NAB hubs and optional  $\frac{5}{16}$ " and computer hub adaptors.

### Operational Duty Cycle

Designed for continuous duty with two minute cycles, 45 seconds degaussing time, and 115 seconds idle time, (enabling operator to properly package and unpackage tapes) at  $80^{\circ}\text{F}$  ( $27^{\circ}\text{C}$ ) ambient temperature.

# BULK TAPE DEGAUSSERS

Type II

### Controls and Indicators

Illuminated circuit breaker/power switch, operate pushbutton with erase and reset indicators, cover open indicator, over temperature indicator, lamp test function at power on.

### Power Requirements

16A at 208V 60Hz, consult factory for 240V 60Hz, and 200-250V 50Hz versions

### Dimensions

Standard: Bench Mount  $11\frac{7}{8}$ " H x  $23\frac{1}{4}$ " W x  $34\frac{5}{8}$ " L; Weight: 180 lbs.

## TC-14 Bulk Tape Degausser

In a 15 second cycle, this machine will completely erase long wave audio and control tracks, along with short wave video tracks on conventional 700 Oe magnetic video tape. It accommodates reels up to 14", and requires no adaptor changes.

Once the TC-14 has erased a typical video signal to  $-90\text{dB}$ , there is very little difference between new tape and the tape just erased.

Also, the conveyor belt media transport for this bulk eraser enables you to fully automate your degaussing stations. This transport system provides you with a variety of tape applications, including general maintenance.

### Performance

Erasure:  $-90\text{dB}$  typical; Cycle Time: 15 seconds; Degaussing Safeguards: Continuous monitoring of field currents. Temperature protection safely limits duty cycle during continuous operation.

### Media Size

Transport: Conveyor belt, needs no adaptors. Open reels to 1" wide x 14" in diameter, cassette and cartridges through large D-1 size.

### Controls and Indicators

Illuminated circuit breaker powers up with fan on. Erase pushbutton to engage belt and erase fields. Reset pushbutton to disengage belt and erase fields and allow maximum cool down before turning circuit breaker off. Amp meter monitors erase field currents.

TC-14

### Power Requirements

9A at 208/240VAC. (Selectable by internal tap), consult factory for 200-250V 50Hz.

### Dimensions

Standard: Bench mount 11" H x  $23\frac{3}{4}$ " W x  $33\frac{1}{2}$ " L; Weight: 160 lbs.

# VIDEO/AUDIO TAPE

## VIDEOCASSETTES

### HD-XPro High Definition-Extra

- 7 layer tape construction for improved picture clarity and tape transportability
- Dropout frequency for 5 and 15µs disturbances is superior to virtually all other 1/2" videocassettes
- SQ precision cassette mechanism for optimum tape transport, tracking and alignment

VHS	Beta
T-120 HD-XPro	L-750 HD-XPro
VHS-C	
TC-20 HD-XPro	

### HD High Definition

- HDD binder system and USF (Ultra-Smooth and Flat) film base with a 1µm back coating provide HD with a mirror-smooth finish on the active face and optimum frictional coefficients on its rear surface
- Luminance and chrominance signal-to-noise ratios have been improved +3.0dB and +2.5dB respectively
- SQ (Super Quality) precision cassette mechanism for optimum tape transport, tracking and alignment

VHS	Beta
T-120 HD	L-750 HD

### E-HG Extra High Grade

- Finest video and audio characteristics of any 1/2" video tape in its class
- Packaged to maintain original performance characteristics

VHS	Beta
T-60 E-HG	L-500 E-HG
T-120 E-HG	L-750 E-HG
VHS-C	
TC-20 E-HG	

### HS High Standard

- Ultra-refined Super Avilyn particles with a BET value of 25m<sup>2</sup>/g
- HDD binder system significantly reduces oxide shedding on video heads thereby extending tape life and reducing dropout levels
- Special static-resistant DP leader tape maintains high level performance

VHS	Beta
T-30 HS	L-500 HS
T-60 HS	L-750 HS
T-120 HS	
T-160 HS	

## AUDIO CASSETTES

### D Dynamic

- Excellent high frequency response with low distortion
- Wide dynamic range, high MOL
- Low noise
- Precision cassette mechanism
- Touch and tell marks allow you to identify A and B sides with your fingertip

D30	D90
D46	D120
D60	

### AD Acoustic Dynamic

- Ideal for car cassette playback, home decks, and portables
- Delivers wide dynamic range, extra high MOL with low bias noise

AD-60	AD-90
-------	-------

### AD-S Acoustic Dynamic Special

- "C-Thru" shell construction
- Rigid, weighted transparent plastic shell provides resonance control in the frequency area
- ST (smooth transparent) liner sheets provide optimum travel conditions
- Dual spring pressure pad promotes direct tape-to-head contact
- Touch and tell marks

AD-S90

### AD-X Acoustic Dynamic-Extra

- High sensitivity and superior MOL compared to other Type I (normal bias) cassettes
- Extended frequency response, low bias noise level

AD-X60	AD-X90
--------	--------

### HX-S Metal Particle High-Bias

- Four times more magnetic storage ability than other Type II formulations
- Extended high frequency response assures excellent transient performance
- Particularly suitable for recording the high energy output of digital sources

HX-S60	HX-S90
--------	--------

### SA Super Avilyn

- Superior frequency response and recording headroom
- Improved Laboratory Standard cassette mechanism
- Outstanding sensitivity across the entire frequency range

SA60	SA90
------	------

### SA-X Super Avilyn-Extra

- "DLM" cassette mechanism for reduced modulation noise
- Dual coated Super Avilyn formulation provides low bias noise for less tape hiss and extends dynamic range
- Extra-high sensitivity and MOL

SA-X60	SA-X90
--------	--------

### SA-XG Super Avilyn-Extra

- Low bias noise yields less tape hiss and extends dynamic range
- Extra-high sensitivity and MOL
- RS-II mechanism virtually eliminates sympathetic vibration

SA-XG60	SA-XG90
---------	---------

### MA Metal Alloy

- Allows for high level recording without distortion, resulting in increased dynamic range and reduced tape noise
- Offers superior MOL characteristics over Type II tapes
- Super Finavinx formulation

MA-60	MA-90
-------	-------

### MA-X Metal Alloy-Extra

- "DLM" cassette mechanism for reduced modulation noise
- Super Finavinx particles provide a high packing density
- Increased MOL handles transient peaks without distortion
- Accepts high input levels without saturation
- Reduced bias noise

MA-X60	MA-X90
--------	--------

### MA-XG Metal Alloy-Extra Grade

- Optimum recording from all music sources
- Accepts high input levels without saturation
- RS-II shell mechanism virtually eliminates vibration and provides uniform performance between Side A and Side B

MA-XG60	MA-XG90
---------	---------

# LIGHTING CONTROL

## Genesis Series Dimmers

**Genesis 660-6 6000W Channels**

**Genesis 1224-12 2400W Channels**

- Front removable electronics drawer
- Immune to miswiring of the input power
- 10,000A thermal/magnetic breakers
- Dim/non-dim switchable
- Simultaneous analog and multiplex control
- 24" rackmountable
- Override switches on each channel
- LED control signal tracking on each channel
- Input power, single or three phase switchable
- U.L. listed

The Genesis Series Dimmers are very rugged, heavy-duty 50A (660) or 20A (1224) per channel dimmers. They use special SCR-pair modules for dimming and will carry 6000W or 2400W per channel. Hot patching, overloading, or miswiring of the power feeds should cause no functional damage. The units can be wired for single or three phase input power at 50 or 60Hz, and can be used on 120 or 240V power grids. Input power phase changing is extremely simple, and the unit may be rackmounted in a standard 24" equipment rack if desired.

Typical uses for the Genesis dimmers are locations where ruggedness is important and downtime is unacceptable. Any use where the personnel using the products are inexperienced and where load and power input connections could be miswired calls for Genesis dimmers. Broadcast Television, Cable Studios, Theaters, Schools, Night Clubs, and heavy Touring Companies should all use these heavy-duty dimmers, any critical application where the best is called for.

Genesis is equipped with many standard deluxe features to make life easier for the user. Each channel has an on/off override switch with an LED control present indicator housed inside, and a thermal magnetic circuit breaker with a 10,000A interrupting capacity. Four input power phase present indicators are also prominent on the front removable electronics drawer. Each channel is selectable dim/non-dim on an individual basis. In the unlikely event of a failure, all electronics are easily removed for replacement through the front removable electronics drawer. The unit is cooled for longer life by a quiet low-speed fan.

Equipped with heavy-duty locking metal connectors, the Genesis uses either our standard 12 channel analog control cables, or our AMX 192, 192 channel analog multiplex control cable. Either of these control methods may be used individually or you may use both simultaneously (one for a back up system). The analog control voltage is 0-10VDC, which is supplied typically by the control console.

Genesis dimmers are ruggedly built of steel and aluminum, finished in a brushed black anodize with white nomenclature. All necessary servicing of the unit can be achieved without soldering using only a philips screwdriver and pliers. A high degree of noise filtering is provided by a toroidal-core filter choke on each channel.

Genesis 660

Genesis 1224

### Accessories

## Producer II Computer-Assisted Lighting Control Console

• 24, 36 or 48-channel 2-scene configurations • 10 pile-on submasters (all consoles) • 24 crossfading submasters (all consoles) • Battery backup memory with five year life • 10 pages of up to 192 steps of chase • Any step of any chase can be either a dimmer, control channel, or submaster • 192 dimmer proportional patch (USITT Std. AMX 192) • Timers on X/Y crossfaders and grandmaster • Progress bargraphs for each timed fader • Alter functions: Allowing preset levels to be altered up or down manually through the key pad alter function • Dual gooseneck lights with electronic dimmer • Blackout switch with flashing LED • Key switch record lockout • Channel/submasters selection switch with LED in each scene • Bump buttons on all channel and submaster sliders (both scenes)

The Producer II is a computer-assisted lighting console that operates similarly to a conventional manual console, but includes many more capabilities. In its standard configuration, the Producer II is ideal for theater, television, film or live entertainment performance lighting.

Though your console may be a two scene 24 or 36-channel unit, all Producer II's have a 1-scene 48-channel mode. In this mode, you could, for instance, record your 34 submasters with 48 channels in each, and then change back to a 2-scene 24 or 36-channel unit for playback. Your crossfading and pile-on submasters would each contain 48 channels.

Sony or Panasonic* (3/4, 1/2 or Beta) 10' length .....	40.00
JVC (3/4 or 1/2) 10' length .....	70.00
*Panasonic NV-1310 or AG-2200 10' length .....	70.00

## DubMaster™ Remote Control

• Built-in serial port for use with the JVC BR-7000UR and Panasonic AG-6810 • Timer feature eliminates the need to manually stop the VCRs when recording is completed • Can be programmed to power down the system • Lockout feature • Master power switch has a safety feature • Power requirements: 115V, 60Hz—5W • 1 3/4" H x 19" W x 14 1/2" D

The DubMaster is an easy and cost effective way to control VCRs in a video duplication system. The DubMaster can control a master playback deck and as many recorders as desired. Any remote controllable VCR can be used with the DubMaster.

The DubMaster allows freedom of design. VCRs of various makes and formats may be mixed. The system can easily be expanded in groups of six or twelve recorders with additional rack control boxes.

The DubMaster has a built-in serial port for use with the JVC BR-

7000UR and Panasonic AG-6810 with serial control option. In this case the control cables and rack boxes are not needed.

DubMaster .....	\$1195.00
*Rack Box — RB-6 (controls 6 VCRs) .....	395.00
*Rack Box — RB-12 (controls 12 VCRs) .....	495.00
*Control Cable (one for each VCR—including source) .....	75.00
*Not needed when using JVC BR-7000UR or Panasonic AG-6810 with serial control port.	

## PVC-5 Programmable Video Controller

• Expandable memory • Battery back-up for clock and memory • Cassette players are easy to replace • Fewer moving parts require less maintenance • Individual machine failure does not cancel entire program cycle • Intermix video tape formats (3/4", 1/2" VHS or Beta) • Switched AC for on/off control of video tape players • Preview capabilities of all input sources • Easy review of program memory • Single or dual operation • Power requirements: 115V-60Hz—30W • 5 1/4" H x 19" W x 14 1/4" D • 12 lbs.

The PVC-5 is compatible with most remote controllable VTRs, and when combined with existing VTRs it provides a cost effective playback system without the large initial expenditure necessary with other similar systems. The PVC-5 will automatically control up to 8 different VTRs following your pre-programmed schedule. The PVC-5 will control and can intermix different industrial tape formats such as 3/4", Beta and VHS. The PVC-5 provides maximum flexibility. An entire day of programming can be entered in a few minutes. Up to 64 separate commands can be programmed into memory for daily operation of power, play, stop or rewind functions—automatically switching video and audio sources at the prescribed time.

The PVC can be wired for two separate independent channel outputs utilizing four input positions per output channel. Programming and control of the two channels can be simultaneous.

An additional memory section can be added to the PVC, increasing its memory an additional 64 positions, to a total of 128.

PVC-5 Programmable Video Controller .....	\$4850.00
Expanded Memory Option .....	668.00

\*User must furnish wireless handheld controller for interface

## CSS-1 Computer Select Switcher

• Designed for applications where operation of multiple computers sharing a common monitor is desired • 3 by 1 buffered TTL switcher • Momentary pushbutton with LED indicators • Both input and output connectors are standard DB-9 jacks • Works equally well with mono, color or enhanced color computers • Comes complete with a self-contained plug-in power transformer • Tabletop design is attractive, compact and color coordinated for use with the IBM-PC • Control switches are conveniently located for easy access and the LEDs provide instant recognition of source.

CSS-1 .....	\$275.00
-------------	----------

## TDA-1 TTL Distribution Amplifier

• Designed for applications where operation of multiple image output (such as monitors and projectors) share a common computer • One input, three output TTL buffered • Buffered signal provides enough strength to allow the signal to be run a longer distance • Both input and output connectors are standard DB-9 jacks • Comes complete with a self-contained plug-in power transformer • Tabletop design is attractive, compact, and color-coordinated for use with IBM-PC

TDA-1 .....	\$250.00

# BLACKBURST GENERATOR/ FREQUENCY CONVERTER/PANELS

## EBG-110 RS170A Video

### Blackburst Generator

- Four composite RS 170A blackburst outputs
- Oven controlled 14.31818MHz crystal oscillator
- Front panel oven temperature indicator
- Perfect for "blacking tapes," external reference
- Output Pedestal: 7.5 IRE
- Environmental: 0°C-60°C
- Power LED: lights when internal voltages are present
- Xtal LED: bi-state LED will be red during warm-up time and turn green when oven has reached operating temperature
- Output Impedance: 75 ohm
- Power: 120VAC ± 20% 50/60Hz, 20W
- Television signal standard: NTSC
- ABS plastic enclosure
- Connectors: BNC
- Output comp sync-40 IRE, rise and fall time 140ns ± 20ns
- Output burst: ± 20 IRE, 9 cycles, frequency 3.579545MHz
- 2.5" H x 8.125" W x 7" D
- Weight: 3 lbs.

EBG-110

The EBG-110 is a stand-alone RS170A blackburst generator which is packaged in small cabinet and provides four oven controlled crystal derived 75 ohm blackburst outputs.

A bi-state status LED on the front panel indicates the oven condition of the unit.

Typical applications include: genlocking source for other equipment, control track writer for video tapes and as an external TBC reference signal.

EBG-110 . . . . . \$600.00

## VFC-150 Bi-Directional

### 3.58-4.43-3.58 Video

### Frequency Converter

- Bi-directional video frequency converter
- Provided with BNC connections for in and out
- Simple to use
- Converts "modified NTSC 4.43MHz" to "real NTSC 3.58MHz" and vice versa
- Allows Sony VO-5630 PAL-SECAM NTSC 4.43 U-matic VTR to record NTSC in color
- Allows NTSC 3.58 VTRs to record from NTSC 4.43 VTRs
- Allows NTSC 4.43 VTRs to play on NTSC 3.58 monitors or projection systems
- Color lock front panel control
- Lightweight
- Available in 110 or 220VAC 50/60 cycles power supply

VFC-150

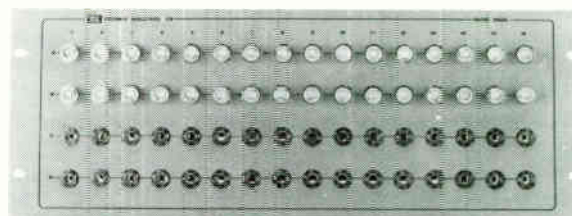

The VFC-150 is a high quality composite video color frequency converter which can change NTSC 3.58 (real NTSC) to NTSC 4.43 (modified NTSC) or vice versa. This device is designed to interface standard multi-standard video equipment with standard NTSC equipment.

VFC-150 . . . . . \$650.00

## Audio-Video Patchfield Panels

- Custom built as required
- Combination systems audio or video
- Uses .25" phone or RCA phono jacks for audio
- Delivered with self-adhesive labeling kit
- Screened with alphanumeric location guides
- Uses BNC bulkhead connectors for video
- EIA 19" rack space width
- Stamped on 1/8" thick aluminum panels

These custom designed audio/video patch panels are economical yet extremely versatile. Each row holds 16 connectors with a 2 row minimum per panel. Please specify the connectors needed with order.

AV Patchfield Panel

BNC Video . . . . . per patch point \$8.32  
 RCA Audio . . . . . per patch point 3.50  
 1/4" Phone Mono . . . . . per patch point 4.10  
 1/4" Phone Stereo . . . . . per patch point 5.30

Prices vary with each system and include panel

# DISTRIBUTION AMPLIFIER/ SWITCHING SYSTEM

## MDA-310 Video and Hi-Fi Audio Distribution Amplifier

- 1 x 20 video distribution amplifier
- 1 x 20 Hi-Fi stereo distribution amplifier
- Bridging video and audio inputs
- Front panel amplitude adjustments
- Front Panel test outputs
- Two EIA rack spaces in height (3.5")
- Solid-state modular design
- Can be used for PAL/NTSC/SECAM
- Enclosed in a 3.5" high 19" rackmount cabinet

The MDA-310 is a broadcast quality 20 output video Hi-Fi audio distribution amplifier. Perfectly suited for the Hi-Fi stereo video duplication facilities of today, the MDA-310 sports many innovative and practical features.

Looping inputs for both video and audio allow the connection of other MDA-310s for any mass duplication requirements. Front panel controls allow the user to adjust video and audio gain. Buffered test outputs are front panel mounted for calibration or monitoring equipment hook-ups. Internal adjustments are provided for cable compensation once the unit has been installed.

MDA-310

High quality integrated circuit design with individual on-board regulated power supplies per input channel, provide ultra clean signals and reliable system performance. Printed circuit boards are modular in design, making the MDA-310 easy to repair in minutes by simple board replacement.

With a video operating bandwidth of 10MHz, the MDA-310 can be used for PAL/SECAM and NTSC-4.43 video signals.

**MDA-310 . . . . . \$690.00**

## CSS20-AVPS, 20 x 1 Stereo Audio Follow Video Switching System

- 20 x 1 video switcher
- 20 x 1 Hi-Fi audio follow switcher
- Allows control room diagnostic and program monitoring
- Remote controllable
- Solid-state active switching
- Unlimited expansion capabilities
- Rackmountable (3 1/2" high)
- Front panel LED status indicators displays input "on line"

The unique preview switcher system allows the user to minimize cabling, manpower and equipment while increasing cost effectiveness and quality. The 20 input audio follow video switcher comes complete with remote which enables the operator to control the switcher from up to 300'.

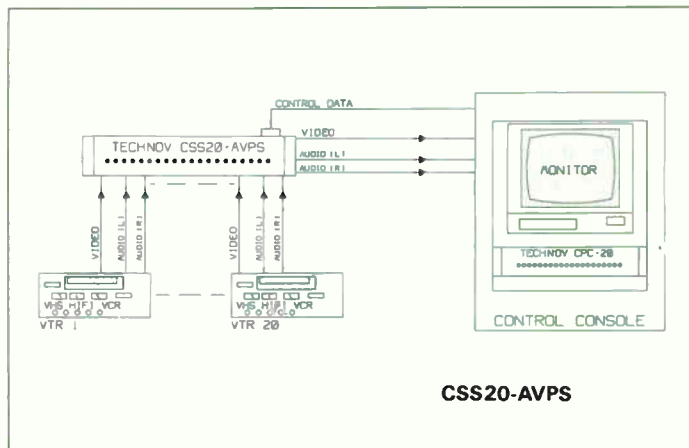

For duplication facilities, the unit is mounted above the VTR dupe racks. The output from each CSS20-AVPS is then fed back to the main console for audio and video monitoring.

This unit is also ideal for diagnostic use in the control room and monitoring the various inputs.

Comes complete with 50' interface cable between control panel and switcher (cable uses standard 25 pin subminiature "D" connectors).

**CSS20-AVPS . . . . . \$995.00**

**CPC-20 Remote control . . . . . 495.00**

# SYNC GENERATORS

## CSG-300/RS170A Sync Pulse and Colorbar Generator

- 14.31818MHz oven controlled crystal oscillator
- Video: colorbars (2 outputs) blackburst (4 outputs)
- Pulse: sync, blanking, HD, VD, BFP 2 outputs each
- Subcarrier: 2 outputs • Buffered front panel BNC testpoints provided for colorbars, blackburst and genlock video input signals • SC/H phasing during genlock mode • 120VAC  $\pm$  20%, 50/60Hz, 20W fuse— .50A • EIA 19" rackmount metal cabinet 1.75"H x 19"W x 9"D • 7 lbs., less shipping carton

The CSG-300 is a broadcast quality RS170A sync pulse and colorbar generator. The unit is designed to be used as a master "house sync" generator or it can be genlocked to composite video for timing into other sync systems.

The core of the CSG-300 is the 14.31818MHz oven controlled crystal. The pulse train generated from this type oscillator is ultra stable and extremely accurate. The CSG-300 delivers six standard NTSC pulse drives: Sync, Blanking, Horizontal, Vertical, Burst Flag and Subcarrier.

CSG-300

NTSC split-field RS170A colorbars are provided for system reference and calibration. Four RS170A composite blackburst outputs are also provided for timing other systems requiring a genlock signal.

The CSG-300 provides high quality video system sync and reference signals at a low cost and in a single EIA rack space cabinet.

**CSG-300 . . . . . \$1295.00**

## CSG-110 RS170A

### Color Sync and Blackburst Generator

- Six standard sync drive outputs • Two RS170A composite video blackburst outputs • Oven controlled 14.31818MHz crystal oscillator • Front panel oven temperature indicator • Small compact size • Impedance: 75 ohm • Subcarrier amplitude: 2V p-p sine wave • Subcarrier frequency: 3.579545Hz • 2.5"H x 8.125"W x 7"D • Weight: 3 lbs.

The CSG-110 is a high quality RS170A stand-alone color sync and blackburst generator. This small package unit is designed for those applications where a stable crystal based sync generator is required without a major investment. Edit systems, character generators, remote and ENG systems and service centers are just a few of the typical applications for the CSG-110.

All six standard sync pulse drives as well as two composite blackburst outputs are derived from an oven controlled 14.31818MHz crystal. RS170A phasing as well as blanking interval widths are automatically maintained at broadcast specifications.

CSG-110

A bi-state status LED on the front panel indicates the stable oven condition of the unit.

The CSG-110 is an economical and practical answer to your sync generator applications.

**CSG-110 . . . . . \$630.00**

# INTERFACE TRIGGER BOX/ EDIT EXPANDER MODULE

## IFI-400P General Purpose Interface Trigger Box

- Works exclusively with Sony RM-440 edit controllers
- Delivers trigger pulse to SEGs, DVEs, keyers
- Trigger delays adjustable by seconds up to 999 seconds
- Output trigger pulse high or low simultaneously
- Output pulse may be used to drive relays up to 250mA
- Automatically triggers the Pyxis or other GPI special effects generators

IFI-400P.....\$295.00

IFI-400P

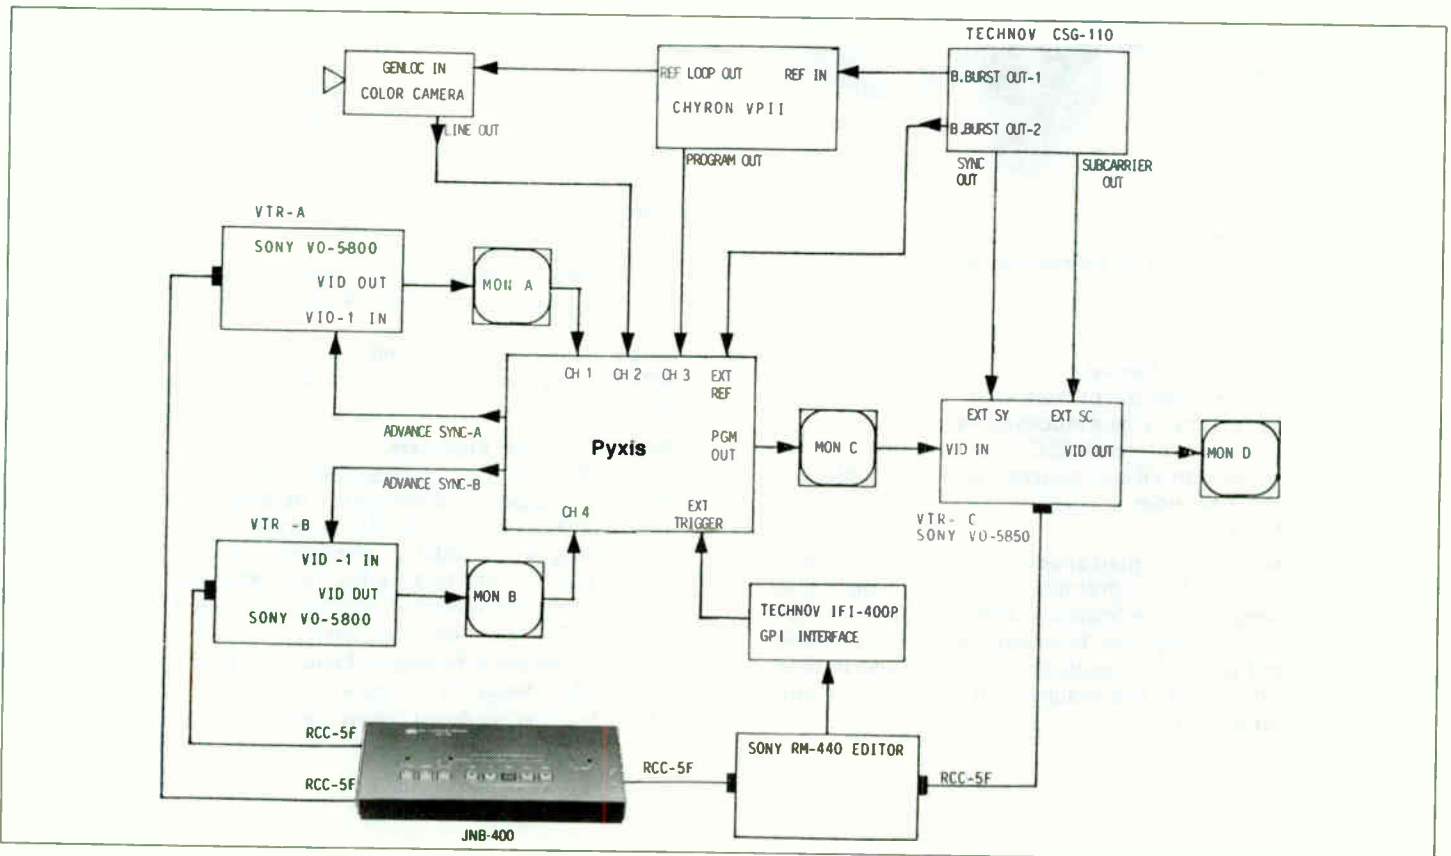

## JNB-400 Edit Expander Module

- Expands existing two VTR RM-440 and type 5 U-matic editing to three VTR simple A/B roll system
- No equipment modifications when used with RM-440, 5800s, 5850s
- Requires no external power
- Solid-state circuitry design
- A or B source with LED confirm
- Enable control switches
- Built-in video-audio-time code switcher for use with ECS-90s
- As easy to use as the RM-440
- Capable of combining with any TBC and special effects generator
- FF, Rew, Play, Stop, Pause, with LED confirm
- 3.3" H x 14" W x 7" D
- 6.5 lbs.

JNB-400.....\$1250.00

JNB-400

\* You may also use 2 separate TBCs and an SEG.

# PROMPTER SYSTEM

909

909T

## 909 Prompter System

- Uses a variety of material for on-camera prompts
- State-of-the-art controls
- Compact, rugged design
- Aluminum casting
- Uses script paper in any format
- Lets your talent see what the camera sees
- Pans and tilts as smoothly as a studio camera
- Provides individually-buffered NTSC video outputs
- Switches between normal and reverse video text displays
- Adjustable video enhancer
- Suited to EFP and ENG

The 909 is a prompter designed specifically to work with your portable video camera. Other prompting systems, designed for heavy studio cameras, have front-mounted imaging monitors that must be counterweighted. The result is a clumsy system that doesn't lend itself to smooth camera work and is time-consuming to set up. The 909 eliminates these problems with a totally different design.

## Full-function display control

The 909T provides for two NTSC inputs: One for the text camera and one for your portable camera, with instant switching between cameras. Script feed stops when the talent or operator switches to the auxiliary video feed. When the script is recalled, it continues where it left off, at the exact speed it was moving before the switch.

## State-of-the-art microcircuitry controls

The 909T uses a pulse frequency modulation circuit to give you precise one-touch control of script speed forward and backward. A bar-graph display indicates scroll-ready status, direction of movement, and speed. Once your script assistant has established the best speed for the talent, that precise speed can be used every time. Scrolling speed and video-input switching can also be controlled by means of a plug-in remote controller.

## Pan and tilt your portable as smoothly as a studio camera

The 909V Camera Viewing Unit mounts on any standard-mount field or studio tripod and accepts any portable camera. It holds the prompting monitor below the camera, so that both are balanced over the tripod head. Tekskil uses folded optics—a surface-reflectance mirror and a 70/30 beamsplitter—to bring the prompts up in front of the lens.

## Specifications

<b>Power</b>	120VAC, .2 amp, 60Hz; or (optional) 240VAC, .1 amp, 50Hz
<b>909V Viewing Unit</b>	
<b>Weight</b>	(without monitor) 11.0 lbs. (5.0kg)
<b>Imaging Monitor</b>	9" industrial monitor, Panasonic TR-930 or equivalent
<b>Dimensions</b>	18" H x 12 1/2" W x 19 7/8" D (45.8 x 31.7 x 50.5cm)
<b>909T Script Transport</b>	
<b>Weight</b>	(without camera) 17.0 lbs. (7.7kg)
<b>Inputs</b>	Two, 1V p-p, negative sync video, BNC connector standard
<b>Outputs</b>	Three individually buffered NTSC outputs
<b>Text Camera</b>	Panasonic WV1410, c/w 16mm lens
<b>Dimensions</b>	15 3/8" H x 17 1/8" W x 17 1/16" D (39.0 x 43.5 x 44.9cm)

**909 Prompter System** - Includes 909T (script transport), 909V (Camera viewing unit), Remote control and cables

.....\$4250.00

**909V\*** Camera viewing unit .....1340.00

**909T\*** Script transport includes remote control and cables .....2910.00

## 909C Computer Prompter

The 909C lets you compose, edit and play back scripts anywhere in a case small enough to fit under an airplane seat. It has a 128K memory, a display, a keyboard and its own micro-processing system built in. The 909C comes with its own 12V power source, and takes a live feed from the camera or any output from the switcher and lets you see it on the prompt monitor. The talent can also use it via remote control.

**\*909C Computer Prompter** Includes carrying case, text file cartridge, 2 handheld remote control units .....\$5495.00

\*Note: Prices above do not include camera or monitor

# VIDEO MEASUREMENT SET

## VM700 VIDEO MEASUREMENT SET

The VM700 is a complete video monitoring and measuring instrument which can be used for automatic measurements and monitoring, as well as for manual measurements. The user can select a display of numeric values to confirm the quality of the signal path, or may select graphic displays for more detailed analysis.

### Automatic Video Measurement Set

The VM700 makes standard television measurements automatically, including those specified in RS-250B/EIA-250C, NTC-7, and RS-170A. These measurements can be compared with user-defined limits and an alarm message generated when these limits are violated.

New graphic displays are provided for measurements such as signal-to-noise ratio and group delay, enabling the user to better understand (and improve) the transmission path.

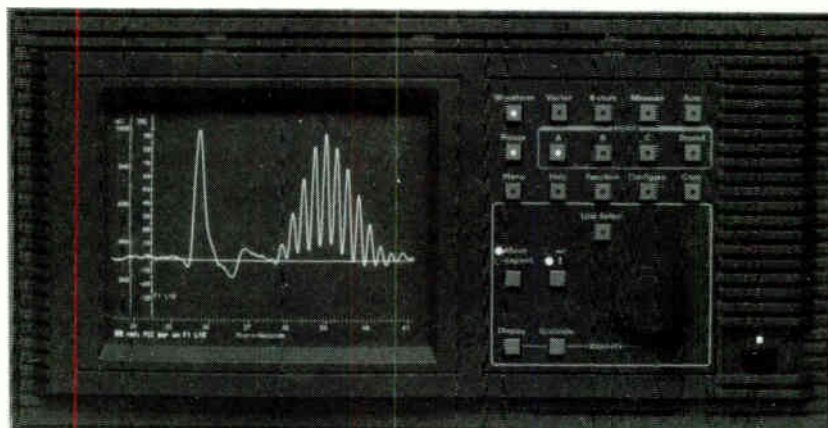

### User-Programmable Functions

Any sequence of operations may be identified with a user-defined function. For example, the measurements to be made on a transmitter demodulator output could be identified with a function labeled DEMOD. A technician would simply select this function to make all measurements, and provide a printout.

### Digital Waveform Monitor/Vectorcope

For a more detailed analysis of the waveform, the actual signal may be displayed and additional measurements made manually.

In waveform mode, cursors are available to aid in measuring time, frequency and amplitude. These cursors allow a very quick and precise location of the 10%, 50%, or 90% points on any transition.

VM700

The Waveform display can be expanded around any point both vertically and horizontally. Because the data is digitized, the display remains bright at all expansion factors. The axes automatically expand with the waveform, so all units are correct as displayed.

The vector mode provides the normal vectorscope display. The vectors may be rotated or expanded, with the rotation angle and gain values displayed numerically on the screen.

Line select can be used to quickly specify any line for display, or automatic measurement (when a test signal is used).

### Hardcopy

All information on the screen may be printed on printers supporting Postscript® or 24-pin Epson® graphics via the standard RS-232C interface. Automatic measurement results can be printed on most ASCII printers using the same interface.

### Picture Mode

The signal source can be quickly verified using the picture display, and any line may be selected on the picture for viewing in the waveform or vector displays.

### Power Requirements

#### Mains Voltage

Range: 87VAC to 132VAC or 174VAC to 250VAC

#### Mains

Frequency: 47Hz to 63Hz

#### Power

Consumption: 250W

#### Environmental:

Operating temperature range 0°C to +50°C ambient

# NTSC TELEVISION GENERATOR

## TSG-170A NTSC Television Generator

- Simple, Effective Test Signal Complement
- RS-170A Sync Pulse Generator with Digital Genlock
- Separate Timing Controls for Sync and Test Signals
- Separate SMPTE Bars Output with Programmable ID (option 01)
- Audio Tone Output (option 01)
- Tape Leader Countdown

The Tektronix TSG-170A NTSC Television Generator offers you the test signals you need plus the advantages of master and genlock sync capability. It provides true 10 bit digital signal accuracy with a full complement of test signals and a stable RS-170A sync generator.

The rugged, compact TSG-170A is designed to support both operational and maintenance requirements. The TSG-170A Option 01 provides even more versatility by adding a separate SMPTE bar generator, programmable identification, and audio tone output.

## RS-170A Sync Generator with Digital Genlock

The TSG-170A sync generator's stable color standard and unique digital genlock make it ideal for either master generator or slave operation. All outputs are correctly SC-H phased, even if the TSG-170A is locked to an improperly SC-H phased reference input. The digital genlock calculates sync timing and subcarrier phase to properly identify color framing of the input reference signal. The TSG-170A automatically senses composite video or 3.58 MHz subcarrier reference inputs. It switches to an internal oscillator in the absence of a reference input signal. This high stability crystal oscillator, with its constant temperature oven, ensures long term frequency stability.

## Flexible Timing Controls

Horizontal and subcarrier phasing control settings are stored in nonvolatile RAM for digital control of genlock timing. In addition, a separate set of timing controls is provided for sync outputs to simplify system timing. A front panel lockout feature prevents inadvertent changes to the front panel system timing controls.

## SMPTE Bars with Programmable ID and Audio Tone (Option 01)

Option 01 adds a separate SMPTE bar output for routine studio needs, such as tape leaders, freeing the front panel selected test signals for engineering and maintenance.

An ID of up to 12 alphanumeric characters may be inserted in the SMPTE bar output. This front panel programmable ID is ideal for identifying satellite feeds, and videotapes.

Option 01 also provides a 400 Hz audio tone output, useful for checking program line continuity and adjusting audio levels. The tone can be adjusted over a 0 dBm to +8 dBm range into 150  $\Omega$  or 600  $\Omega$ .

## Remote Control

Remote operation of test signal selection and timing functions is available by simple ground closure control through a rear panel connector.

## TEST SIGNAL GENERATOR

Luminance Amplitude Accuracy	$\pm 1\%$
Chrominance-to-Luminance Gain	$\pm 1\%$
Output Impedance	75 ohm
Return Loss	36 dB to 4.2 MHz

# SYNC GENERATOR

SPG-170A

## SPG-170A Sync Generator

- Digitally generated RS-170A black burst
- Digital genlock
- High stability subcarrier
- Flexible pulse outputs
- Pulse timing independent of black
- Remote control timing presets
- Remote control ID presets
- Optional SMPTE bars, ID, and audio tone

The SPG-170A sync generator offers all the features expected in a sync generator, plus the advantages of digital accuracy and system flexibility. Ideal for either master or slave generator operation, the SPG-170A features stable RS-170A performance and a rugged 1<sup>3</sup>/<sub>4</sub>" package. The SPG-170A Option 1 provides even more versatility by adding SMPTE bars with programmable identification and audio tone.

### Digital Accuracy

All SPG-170A signals are digitally generated to provide excellent SCH and timing accuracy. The SPG-170A also has a digital genlock to ensure consistent color framing and to eliminate timing drift inherent in other genlock systems. This microprocessor-based system calculates genlock input burst phase and sync timing to control output timing and color framing. All outputs are correctly SCH phased, even if the SPG-170A is locked to an improperly SCH phased input. When no input signal is present, it switches to an internal oscillator. This high stability crystal oscillator, enclosed in a constant temperature oven, ensures long term frequency accuracy.

### System Flexibility

The flexibility of the SPG-170A's pulse outputs allows you to configure it to your specific system needs. The SPG-170A has eight sync generator outputs: Sync, Subcarrier, Blanking, Black Burst, and four selectable outputs. The selectable outputs can be used for Burst Flag, H Drive, V Drive, and Color Frame Pulse, or they can be used to provide an additional set of outputs for the pulses most commonly used in modern television facilities. Horizontal blanking can be set to 10.5, 10.7, or 10.9  $\mu$ s and vertical blanking can be set to either 19 or 20 lines.

The SPG-170A sync timing controls allow you to advance or delay subcarrier and pulse outputs relative to the black burst output, eliminating the need for separate delay lines. Microprocessor control enables both genlock and sync timing settings to be stored in nonvolatile memory in case of power failure. To prevent inadvertent changes to critical timing settings, the front panel timing controls can be locked out by an internal jumper. Up to eight timing presets are selectable through the remote control to simplify timing of shared equipment.

### SMPTE Bars with ID and Audio Tone (Option 1)

By specifying Option 1, basic video and audio test capabilities are added to the SPG-170A. Option 1 includes SMPTE bars and audio tone generators for setting program levels. Also, a preset ID of up to 12 characters can be added over the SMPTE bar output. This ID is stored in nonvolatile memory from the front panel, and up to four preset IDs can be recalled through the remote control. Additionally, the remote control allows the ID to be replaced by a countdown, providing a tape leader function. The vertically locked 450Hz audio tone provides a unique method for checking audio edit quality. The audio tone can be combined with a variable rate click to distinguish various audio sources.

### Total System Solution

The SPG-170A NTSC sync generator is ideal in a master sync system with the ECO-170A synchronous changeover and TSG-170A NTSC television generator.

SPG-170A NTSC sync generator . . . . . \$3300.00

# SYNCHRONOUS CHANGEOVER

ECO-170A

## ECO-170A

### Synchronous Changeover

- Automatic sync changeover
- Clean electronic switching
- Unique fault detection system
- 8 channels
- Manual override
- Remote control with fault indicators

The ECO-170A Synchronous Changeover provides transparent, automatic selection of sync sources. Front panel controls allow simple access to changeover functions. A two level front panel lockout protects these controls in critical master sync systems.

### Transparent Switching

The ECO-170A employs electronic sync transfer to ensure uninterrupted sync for critical production and on-air operations. Unlike other sync changeovers, the ECO-170A uses relay switching only for bypass in case of power failure. This gives optimum sync system performance while ensuring maximum system reliability. Manual sync source selection provides a means for periodic verification of changeover and backup sync generator operation.

### Fault Detection

By testing both pulse amplitude and pulse timing, the ECO-170A provides two methods of error checking for your sync system. Conventional amplitude detection finds missing pulses quickly, while the ECO-170A's additional timing detection identifies errors that would otherwise be undetected. When the ECO-170A detects a fault, it automatically switches to the backup generator, unless the backup generator also has a fault. Separate indi-

cators on both the front panel and remote control display faults for each generator. These indicators remain on until cleared by an operator.

### System Configuration

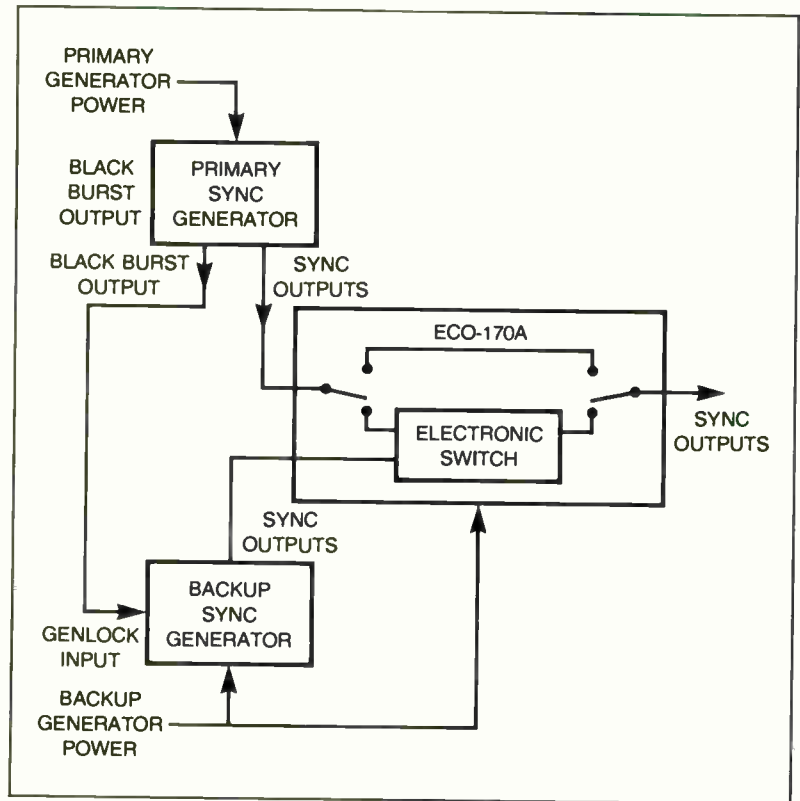

The flexibility of the ECO-170A lets you configure it to your specific system needs. The ECO-170A has eight inputs for each sync generator: Sync, Subcarrier, Blanking, Composite Video, and four selectable outputs. The selectable outputs can be used for Burst Flag, H Drive, V Drive and Color Frame Pulse, or they

can be used to provide an additional set of outputs for the pulses most commonly used in modern television facilities. The composite video channels may be black burst or color bars.

### Reliable Sync

With its clean switching and two level fault detection, the ECO-170A teams with your sync generators to provide a reliable master sync system.

1410R

**1410R/1411R/1412R  
 SYNC/TEST GENERATORS**

- Five Test Signal Generators and One Switcher
- Conforms to EIA Standard RS-170A (1410R)
- Sync to Subcarrier Phasing Maintained or Corrected
- Color Frame Reference Output
- Genlock to Composite Video
- Lock to External References
- Adjustable Blanking Widths
- Adjustable Sync Delays (H and V)
- Parallel Test Signal Outputs

The 1410R Series Sync and Test Signal Generators are precision generators for use in studios, remote vans, maintenance facilities and anywhere high quality sync or test signals are required.

**1410R Series Products**

Description	Color Standard		
	NTSC	PAL	PAL-M
Mainframe	1410R	1411R	1412R
Sync Pulse Generator	SPG2A	SPG12	SPG22

Linearity Generator	TSG3	TSG13	TSG23
Pulse/Bar Generator	TSG5	TSG15	TSG25
Multiburst Generator	TSG6	TSG16	TSG26
Signal Switcher	TSP1	TSP11	TSP21

**SPG2A/SPG12/SPG22  
 SYNC PULSE GENERATORS**

The SPG2A, SPG12 and SPG22 are high quality sync generators designed for use in systems where accuracy, stable SCH (Sync-to-Subcarrier) phasing capability, and lockup mode versatility are of prime importance.

Two external synchronization modes, external reference and genlock, are available. In the genlock mode, line field, subcarrier and PAL pulse (SPG12, SPG22) timing are derived from the incoming composite video signal.

In the external reference mode, line, field, subcarrier, and PAL pulse timing is derived from individual reference signals applied to the generator.

The SCH phasing of the generator outputs can be set for zero error or offset to match the SCH phase of the incoming genlock signal.

A slow genlock mode is provided for those applications where fast-lock may upset the system. The slow-lock selector is located on the generator card sets.

Internal adjustments permit some variation of burst and blanking widths on the burst flag, comp blanking, and black burst outputs.

**CHARACTERISTICS**

**Sync Pulse Generators**

1410R Subcarrier—Frequency ( $F_{sc}$ ): 3.579545MHz  $\pm$  1Hz. Pull-in Range:  $F_{sc} \pm$  20Hz.

1411R Subcarrier—Frequency  $F_{sc}$ : 4.43361875MHz  $\pm$  1Hz. Drift  $\leq$  1 part in  $10^7$  per week. Pull-in Range:  $F_{sc} \pm$  20Hz

1412R Subcarrier—Frequency  $F_{sc}$ : 3.57561149MHz  $\pm$  1Hz. Drift  $\leq$  1 part in  $10^7$  per week. Pull-in Range:  $F_{sc} \pm$  20Hz.

**PULSE OUTPUTS**

Output Level (Into 75 ohms)—4V (1410R), 1V, 2V, or 4V (selectable, 1411R and 1412R)  $\pm$  2V.

Return Loss —  $\geq$  30dB to 5MHz

Risetime and Falltime—10% to 90% (Linear Ramp). 140ns, (1410R, 1412R). 250ns (1411R—Other values internally selectable).

Jitter—Linlock:  $\leq$  10ns. Subcarrier Lock:  $\leq$  4ns.

Outputs—Comp sync, comp blanking, burst flag, H drive, V drive, Field reference, 1411R/1412R only: PAL pulse, V/2, V/4, and 64H.

**SUBCARRIER OUTPUT**

Amplitude—2V p-p into 75 ohm. Return Loss:  $\geq$  30dB to 5MHz.

**BLACK BURST OUTPUT**

Amplitudes—Sync: 286mV  $\pm$  3.57mV (1410R); 300mV  $\pm$  3mV (1411R, 1412R) from blanking. Burst: 286mV  $\pm$  2.86mV (1410R). Absolute: 300mV  $\pm$  9mV. Setup: 53.57mV  $\pm$  3.57mV (1410R), 0% (1411R), 50mV  $\pm$  2.5mV (1412R).

VIR Signal—(1410R Only) Chrominance Amplitude (40 IRE); phase within 0.5° of burst; envelope risetime  $\text{Sin}^2$  shaped 1 $\mu$ s  $\pm$  150ns. Luminance: Setup level (7.5 IRE  $\pm$  0.5 IRE); gray level (50 IRE  $\pm$  0.5 IRE); chroma pedestal (70 IRE  $\pm$  0.7 IRE); risetime and falltime  $\text{Sin}^2$  shaped. 250 ns.  $\pm$  39 ns.

**GENLOCK**

Input Configuration—75 ohm Loopthrough with Return Loss:  $\geq$  -46dB to 5MHz (1410R);  $\geq$  40dB to 7MHz (1411R);  $\geq$  40dB to 5MHz (1412R).

Input Requirements—1V nominal composite video or black burst, sync negative. Sync Amplitude: Nominal  $\pm$  6dB. Burst Amplitude: Nominal  $\pm$  12dB. Burst Sync Ratio: Within 6dB.

Subcarrier Phase Range—360° via front panel goniometer.

Line Sync Delay Range—Adjustable to advance output sync  $\geq$  10 $\mu$ s or delay  $\geq$  4 $\mu$ s (internal adjustment). A front panel screwdriver adjustment provides a delay/advance range of  $\pm$  0.5 $\mu$ s.

Stability (Over Ambient Temperature Range 0°C to  $\pm$  50°C)—Line Lock: Within 70ns. Subcarrier Lock: Within 35ns.

Field/Frame Sync—Fast Lock: Direct-acting in one field. Slow Lock: One line/field slew.

Loss of Lock—Indicated by front panel LEDs (automatic switching to full or partial internal).

1410R NTSC Mainframe and SPG2A . . . \$4200.00  
 Includes: Extender board (670-4441-02); 1.5 A fuse (159-0016-00); 0.75 A fuse (159-0042-00); rack-mount hardware; instruction manual.

## 1410 R Series (Cont'd)

### TSG7/TSG11/TSG21 Color Bars Generators

- Color Bars Signals
- SMPTE Color Bars (TSG7)
- EIA (TSG7)
- Fixed Full Field (TSG11/TSG21)
- Full Field with Switchable Components
- 75% or 100% Amplitude
- Split Field/Y Reference
- Split Field/Red
- Split Field Bars/Bars Reversed

The TSG7, TSG11 and TSG21 provide high-quality full field and split field color bars for the 1410R series signal generators. Fixed configuration signals are available for operational environments such as post production. For lab and maintenance facilities, front panel control of luminance and chrominance signal components provides the flexibility to meet most engineering and testing requirements. The split field bars/Y reference signal provides a convenient means for simultaneous checking of picture monitor color performance and gray scale tracking.

The split field bars/red field signal is useful in detection of VTR noise and moire.

The SMPTE Bars signal provides an easy way to adjust picture monitor chroma, hue, and brightness.

TSG7 (NTSC) . . . . .	\$ 1965.00
TSG11 (PAL) . . . . .	1575.00
TSG21 (PAL-M) . . . . .	.POR

### TSG2/TSG12 Convergence Test Signal Generators

- Dots and Crosshatch
- Dots Only
- Vertical Lines Only
- Horizontal Lines Only
- Vertical and Horizontal Lines
- Position Controls

The TSG2 and TSG12 provide high-quality convergence test signals for the 1410R Series signal generators. You can use them to determine picture monitor or camera scanning linearity, aspect ratio, and geometric distortion. Signals for the TSG2 conform to IEEE Standard 202.

Provision is made for on/off switching of the dots, vertical lines, and/or horizontal lines and for positioning vertical and horizontal lines.

TSG2 (NTSC) . . . . .	\$560.00
TSG12 (PAL) . . . . .	520.00

### TSG5/TSG15/TSG25 Pulse and Bar Generators

- Pulse and Bar Overlay
- Full and Half Amplitude Pulse and Bar
- Field Squarewave and Window
- Modulated Pulse and Modulated Bar
- Front Panel Selection of 2T, T, and T/2 Pulse Width and Bar Risetime

The TSG5, TSG15, and TSG25 are sin<sup>2</sup> pulse and bar television test signal generators designed for use with the 1410R Series signal generators.

The pulse and bar test signal consists of a sin<sup>2</sup> modulated pulse, a sin<sup>2</sup> pulse, and luminance bar. The pulse and bar overlay mode lets you conveniently compare pulse to bar ratio without manipulating waveform monitor controls.

TSG5 (NTSC) . . . . .	\$ 1800.00
TSG15 (PAL) . . . . .	1680.00
TSG25 (PAL-M) . . . . .	.POR

### TSG3/TSG13/TSG23 Linearity and Modulated Pedestal Test Generators

- 5 Step and 10 Step Staircase Signal
- Ramp Signal
- 2 Modulation Amplitudes
- One or Three Level Modulated Pedestal
- Flat Field with 11 Fixed Levels
- AC and DC Bounce
- Variable APL

The TSG3, TSG13 and TSG23 provide high-quality linearity and modulated pedestal test signals for the 1410R Series signal generators.

You can select the 5 step and 10 step staircase signals and the ramp signal with or without 180° subcarrier modulation for NTSC, or U subcarrier modulation for PAL and PAL-M. Applications include measuring differential phase and gain, dynamic gain, luminance linearity, and burst phase errors.

On the ac Bounce signal, the active portion of each line (excluding sync) changes APL levels at a rate determined by the rate control (1 second to 30 second intervals). Blanking level remains fixed at 0 V. To check ac coupled circuitry use ac bounce.

On the dc bounce signal, ac bounce occurs as described above. In addition, the entire signal changes dc level in the opposite direction at the same rate resulting in no change in average dc level. Clamp circuits may be checked using dc bounce.

TSG3 (NTSC) . . . . .	\$ 1375.00
TSG13 (PAL) . . . . .	1285.00
TSG23 (PAL-M) . . . . .	.POR

# TEKTRONIX, INC.

P.O. Box 500

# SYNC & TEST SIGNAL GENERATORS

## 1410 R Series (Cont'd)

### TSP1/TSP11/TSP21 Switchers and Convergence Generators

- Single Switchable Output for Two to Six Generated Signals
- Blanking, Sync and Burst Insertion for External Sync
- Matrixing—Eight Programmed Display Formats to up to Six Sequential Signals
- Convergence Border
- Convergence Key
- Crosshatch or Dots
- Combined Crosshatch and Dots

The TSP1, TSP11, and TSP21 combine the capabilities of a test signal switcher and convergence signal generator in a single unit. They simplify and expand the uses of the 1410R Series signal generators.

From a single, electronically switched output, you have access to all the test signals generated by the card sets in the mainframe. Meanwhile, you may continue to use the individual generator card sets' parallel outputs, so no restrictions are imposed on an established system. As an added feature, one of the input signals can be external (composite or non-composite). All of the switcher inputs are provided with clamp circuitry.

Eight different matrixes are stored in the PROM. This signal matrixing capability, combined with the full-field mode of the TSP1 presents several combinations of signals sharing the full field display.

Most of TSP1 switching functions can be remotely controlled through the mainframe's Remote connector.

TSP1 (NTSC) .....	\$1725.00
TSP11 (PAL) .....	1610.00
TSP21 (PAL-M) .....	POR

### TSG6/TSG16/TSG26

- Multiburst Signal Generators
- Multiburst Signal
- Controlled Risetime Burst Packets
- Last Burst Frequency Variable
- Manual and Field Swept Frequency Signals to 20MHz
- Markers for Both Frequency and Amplitude Reference
- Full and Reduced Amplitude on all Signals

The TSG6, TSG16 and TSG26 are television multiburst and video sweep test signal generators designed for the 1410R Series signal generators.

Performance advances include reduction in harmonic content of sinewave signals and skirt energy associated with gating burst packets. Phase modulation of the burst packets aids ease of measurement by filling in shape of packets. Two ranges of multiburst frequencies are available: the 500 kHz to 4.1 MHz (TSG6) range aids in testing television transmitters and common carrier links, while the 1.25 MHz to 12 MHz range is used in testing television studio equipment and cabling.

Use these generators where nonlinearities make reduced amplitude test signals desirable. The reduced amplitude multiburst signal allows accurate testing of video tape record/playback systems, since it is not subject to the false distortion of the full amplitude multiburst that often occurs in such applications.

High and low frequency bands are provided for both the multiburst and sweep signals. Amplitude and frequency markers may be added to the sweep signal.

Color burst and the horizontal and field sync signals may be removed when non-composite signals are required.

TSGG (NTSC) .....	\$2495.00
TSG16 (PAL) .....	.2330.00
TSG26 (PAL-M) .....	POR

## Specifications:

### SYNC PULSE GENERATORS

**1410R Subcarrier** — Frequency ( $F_{SC}$ ): 3.579545 MHz  $\pm$  1 Hz. Pull-in Range:  $F_{SC} \pm 20$  Hz.

**1411R Subcarrier** — Frequency  $F_{SC}$ : 4.43361875 MHz  $\pm$  1 Hz. Drift  $\leq$  1 part in  $10^7$  per week. Pull-in Range:  $F_{SC} \pm 20$  Hz.

**1412R Subcarrier** — Frequency  $F_{SC}$ : 3.57561149 MHz  $\pm$  1 Hz. Drift  $\leq$  1 part in  $10^7$  per week. Pull-in Range:  $F_{SC} \pm 20$  Hz.

### PULSE OUTPUTS

**Output Level (into 75  $\Omega$ )** — 4 V (1410R), 1 V, 2 V, or 4 V (selectable, 1411R and 1412R)  $\pm$  2 V.

**Return Loss** —  $\geq$  30 dB to 5 MHz.

**Risetime and Faltime** — 10% to 90% (Linear Ramp). 140 ns, (1410R, 1412R). 250 ns (1411R — Other values internally selectable).

**Jitter** — Linelock:  $\leq$  10 ns. Subcarrier Lock:  $\leq$  4 ns.

**Outputs** — Comp sync, comp blanking, burst flag, H drive, V drive, Field reference, 1411R/1412R only: PAL pulse, V/2, V/4, and 64H.

### SUBCARRIER OUTPUT

**Amplitude** — 2 V p-p into 75  $\Omega$ . Return Loss:  $\geq$  30 dB to 5 MHz.

### BLACK BURST OUTPUT

**Amplitudes** — Sync: 286 mV  $\pm$  3.57 mV (1410R); -300 mV  $\pm$  3 mV (1411R, 1412R) from blanking. Burst: 286 mV  $\pm$  2.86 mV (1410R). Absolute: 300 mV  $\pm$  9 mV. Setup: 53.57 mV  $\pm$  3.57 mV (1410R), 0% (1411R), 50 mV  $\pm$  2.5 mV (1412R).

**VIR Signal** — (1410R Only) Chrominance Amplitude (40 IRE); phase within 0.5° of burst; envelope risetime Sin<sup>2</sup> shaped 1  $\mu$ s  $\pm$  150 ns. Luminance: Setup level (7.5 IRE  $\pm$  0.5 IRE); gray level (50 IRE  $\pm$  0.5 IRE); chroma pedestal (70 IRE  $\pm$  0.7 IRE); risetime and faltime Sin<sup>2</sup> shaped, 250 ns  $\pm$  39 ns.

### GENLOCK

**Input Configuration** — 75  $\Omega$  Loop-Through With Return Loss:  $\geq$  -46 dB to 5 MHz (1410R);  $\geq$  40 dB to 7 MHz (1411R);  $\geq$  40 dB to 5 MHz (1412R).

**Input Requirements** — 1 V nominal composite video or black burst, sync negative. Sync Amplitude: Nominal  $\pm$  6 dB. Burst Amplitude: Nominal  $\pm$  12 dB. Burst Sync Ratio: Within 6 dB.

**Subcarrier Phase Range** — 360° via front panel goniometer.

**Line Sync Delay Range** — Adjustable to advance output sync  $\geq$  10  $\mu$ s or delay  $\geq$  4  $\mu$ s (internal adjustment). A front panel screwdriver adjustment provides a delay/advance range of  $\pm$  0.5  $\mu$ s.

**Stability (Over Ambient Temperature Range 0°C to  $\pm$ 50°C)** — Lin<sup>c</sup> Lock: Within 70 ns. Subcarrier Lock: Within 25 ns.

**Field/Frame Sync** — Fast Lock: Direct-acting in one field. Slow Lock: One line/field slew.

**Loss of Lock** — Indicated by front panel LED's (automatic switching to full or partial internal).

1910 DIGITAL GENERATOR

## 1910 Digital Generator

- Four External VITS Inputs for Insertion of Teletext, Closed Captioning, Source ID, etc.
- Nonvolatile Memory to Maintain Selected VITS and Full Field Signal Configuration after Power Interruption
- Signal Stored in Replaceable PROMs so Your 1910 won't Become Obsolete
- The Accuracy and Stability of an all-Digital 10-Bit Sync and Signal Generation (RS-170A)
- User Friendly RS-232C Control Port for Added Versatility
- New Signals (Eye Test Pattern, Special Multipulse, Color Multipulse), New Functions (VITS Sequence, Field Sequence and More)

The 1910 Digital Generator is a state-of-the-art test signal generator designed for performance testing of NTSC video systems and equipment. The 1910 is especially suited where high accuracy and stability are required. It is also a VITS inserter (internal and external) with a full complement of signals that allow testing in studio, transmitter, production or research environments. Four external VITS inputs permit insertion of signals such as teletext, closed captioning, source ID, and other similar sources. These four inputs may be converted to four pulse outputs for use in a production environment.

External interfacing of the 1910 is controlled by an internal microprocessor and its nonvolatile memory. Test signals are stored as 10-bit digital words and converted to analog form by a 10-bit precision DAC (with deglitching to reduce differential gain and differential phase) to ensure signal accuracy as well as long term stability and repeatability.

Since all signals are stored in replaceable EPROMs, changing needs and industry standards will not cause obsolescence.

Control and versatility of the 1910 are greatly enhanced by the use of its RS-232 control port. Most functions of the 1910 can be controlled, reconfigured and saved. This includes VITS and full field signal selection, matrix signal creation, sequences and other features.

### Remote Control

Remote control via a ground closure interface allows the user to control the full field signals, VITS insertion on lines 14 through 21 (VITS changes are saved in nonvolatile memory), VIR mode, bypass/operate, genlock source, control mode and reset to preprogrammed condition.

The matrix feature of the 1910 divides the field into 16 blocks of lines consisting of approximately 16 lines each. Through the RS-232 control port the user can program any full field signal to appear in any of the 16-line blocks. Any signal can be repeated in as many blocks as necessary. There are three matrix signals in the 1910 that are factory set, but can be user-redefined and saved in a nonvolatile memory.

Some of the applications of this feature include user-defined tape headers or monitor or monitor test patterns. The matrixed signal can serve several users simultaneously, reducing the need for multiple signal outputs. By using the 15-line feature of the Tektronix 1480-Series Waveform Monitors, particular signals in the matrix can be viewed by the users.

V-1074

## Programmability and RS-232 Control Port Features

The 1910 has a friendly command language that allows the user to program its features to meet specific applications. The user does not need to be a programming expert as the 1910 has a language that allows him to concentrate on the applications and not on programming.

The 1910 can be programmed and controlled using an RS-232 terminal. It can also be controlled or run under program control using an RS-232 host computer, including some handheld models or personal computers. The host computer could also be the Tektronix 1980 Automatic Measurement Set which would use the 1910 as a programmable signal source to stimulate and measure television equipment or a transmission link.

The 1910 can also be controlled over telephone lines. An auto-answer modem connected to the 1910 will allow the user to take control of the 1910, observe or modify its status and subsequently release control. The control and reconfiguration can also be accomplished automatically by a host computer.

Some of the capabilities offered by the RS-232 port include the ability to redefine the signal selection on the front panels (1910 and remote control unit) to better meet particular user needs, such as placing frequently used signals in a preferred position or in a convenient sequence for calibration; production testing or other special uses.

### Pulse Out Feature

This included feature of the 1910 allows the user to change the four external VITS inputs to four pulse outputs for limited camera drive. The outputs available are H Drive, V Drive, Composite Blanking, and Burst Flag. Applications for pulse outputs are remote vans or standby sync generators. Composite sync and subcarrier outputs are always available.

The 1910 can also be used as a stand-alone signal source that will remain SCH phased and locked to an internal oven-controlled reference.

### SYNC AND SUBCARRIER OUTPUT

All pulse outputs have negative going output levels of 4 V  $\pm$  10% into 75  $\Omega$  and have a risetime and falltime of 140 ns  $\pm$  20 ns.

**Composite Sync Timing**—EIA RS-170A Specifications.

**Subcarrier Output**—Frequency: See Genlock. Amplitude: 2 V p-p  $\pm$  10%.

The following optional outputs replace the external VITS input function of the 1910.

**Composite Blanking**—Horizontal Blanking Width: 10.7  $\mu$ s  $\pm$  100 ns. Field Blanking: Field 1 = 21 lines, Field 2 = 21 lines.

### SIGNAL MATRIXING

# DIGITAL GENERATOR

**Horizontal Drive Timing**—Start of line blanking to end of line sync,  $\pm$ 100 ns.

**Vertical Drive Timing**—Coincident with start of field. Duration: 9 lines.

**Burst Flag**—Duration: 2.5  $\mu$ s  $\pm$  100 ns. Delay from Line Sync: 5.3  $\mu$ s  $\pm$  100 ns.

### RS-232C INTERFACE

Supports EIA Standard RS-232C format to the extent shown below.

**Baud**—300 bit/s, 1200 bit/s, 2400 bit/s or 4800 bit/s.

**Input/Output**—ASCII, serial, asynchronous data. Full duplex input and output.

**Character Length**—Eleven bits/character, including a start and two stop bits.

**Parity**—Input: No parity required and, if present, is ignored. Output: No parity sent.

### DIGITAL DATA INTERFACE

Parallel, 12 balanced, signal pairs consisting of 10 bits/sample, a clock, a timing reference signal.

**Sampling Frequency**—Four times color subcarrier. Nominally 14.3 MHz.

**Sampling Phase Angle**—Referenced to I axis and Q axis.

**Dynamic Range**—Ten bits/sample. Blanking level (0 IRE) is at digital word 240. Reference white (100 IRE) is at digital word 800 (5.6 LSB/IRE).

**Input Logic Levels Terminated in 100  $\Omega$** —10 k ECL compatible.

**Output Logic Levels**—10 k ECL compatible.

**Digital Input Timing**—Setup and hold times are 10 ns before and after the 50% point of the negative transition of the clock.

**Output Clock Timing**—The 50% point of the leading edge of the clock pulse precedes the data by 5 ns  $\pm$  5 ns.

### POWER SUPPLY

**Line Voltage Range**—90 V ac to 132 V ac. 180 V ac to 250 V ac.

**Maximum Power Consumption**—130 W.

**Line Frequency**—47 Hz to 63 Hz.

### PHYSICAL CHARACTERISTICS

## 110-S Video Synchronizer

- True 10-Bit Accuracy and Resolution
- Tracks Signals into the Noise
- Optional Four-Field Memory for the Highest Picture Quality
- Adaptive Decoding—Minimizes Picture Shifts while Preserving Horizontal and Vertical Detail, Provides Exceptionally High Quality Picture Freeze
- Adaptive Clamping—Minimizes Streaking on Noisy Signals
- Digitally Precise RS-170A Sync and Burst Insertion
- Heterodyne Color Processing
- Auto VTR Signal Recognition
- Infinite Window Correction Range
- Processing Amplifier
- Passes the Vertical Interval
- Precalibrated Boards in Modular Design

The 110-S Video Synchronizer is a high quality 10-bit, 4X Fsc video synchronizer. The 10-bit architecture, adaptive decoding, and adaptive clamping combine to provide a synchronizer that performs well on noisy signals, minimizes horizontal picture shifts, and is virtually transparent to the processed signal.

### 10-Bit Precision

A Tektronix-designed 10-bit digitizer and a sampling rate of four times the subcarrier frequency result in negligible quantizing errors, low differential gain and phase, and a flat frequency response. Compared to 8-bit synchronizers, the 110-S has four times the accuracy and resolution. The resulting transparency to the video signal allows cascading of 110-S synchronizers in the signal path with minimum signal degradation.

### Tracking Into Noise

When noise from a fading ENG microwave feed or static interference degrades the S/N ratio, the 110-S will continue to track the signal. If the original sync and burst are clean, they may be passed with the original signal. Noisy sync and burst are replaced with precise, digitally-generated RS-170A sync and burst. The 110-S can be configured to track into the noise, freeze field, or go to black upon loss of the incoming signal. As noise increases, the adaptive clamp slows down to prevent horizontal streaking while still responding quickly to hot switches.

### Adaptive Signal Decoding

Correct color framing on the standard, two-field memory 110-S is maintained with an adaptive comb/notch decoder. Vertical correlation of the picture information (for example a flag pole) allows chrominance/luminance separation to be done by a 3-line comb

110-S

filter, thus preserving the fine detail in the picture. Absence of vertical correlation in the picture causes the notch decoder to be activated, thus preserving vertical chroma resolution.

### Processing Amplifier with Remote Control

The 110-S processing amplifier provides adjustment of video gain, setup, chroma gain, and hue. Adjustment may be made with internal controls or via a rear panel remote control connector with externally supplied control voltages. The processing amplifier controls are located in the output circuitry and are active in both normal and freeze frame operation. The proc amp controls are included on the 110-RC Remote Control Unit.

### Digital Test Ports

A Digital Test input port allows use of a digital signal from any of the Tektronix 1900 Series test signal generators to test the decoder and digital-to-analog converter. A Digital Output port enables analysis of the input video signal after it has been digitized by the analog-to-digital converter and processed through memory. This data can drive the DAC in a 1900 Series generator.

### Reliable Operation

110-S reliability is assured by using high quality components, preconditioned IC's and two-piece connectors. Dual adaptive cooling fans provide overheating protection. The infrequent task of trouble shooting becomes fast and simple with modular, front-panel loaded circuitry designed so that the 110-S can be repaired without removing it from the rack. Factory precalibration of boards allows them to be replaced without disturbing the calibration of the synchronizer. Built-in diagnostics and input signal condition monitors continually check system status indicating possible problems. Memory error concealment allows in-service compensation of a memory fault, with remaining accuracy and resolution still better than 8-bit synchronizers. The 110-S automatically bypasses the signal when line power is lost.

### Audio Delay

An Audio Delay control port allows automatic audio-video delay correction when used with a Tektronix 118-AS Audio Synchronizer.

### Quantizing Error Included in Specifications

The industry has neglected the effects of quantizing error on synchronizer product specifications. The following 110-S specifications, however, include quantizing error for a modulated ramp with 40 IRE subcarrier.

### Specifications:

**Digital Sampling** — 10 bits at 14.3 MHz (1024 levels at four-times NTSC Subcarrier).

#### ELECTRICAL PROGRAM CHANNEL

**Gain** — Program Output: Unity  $\pm 1\%$ .

**Frequency Response** —  $\pm 1\%$  to 4.2 MHz.

**Signal to Noise Ratio** —  $> 60$  dB unweighted.

**Chrominance/Luminance Gain Error** —  $< 1\%$ .

**Chrominance/Luminance Delay Error** —  $< 10$  ns.

**Differential Gain** —  $< 1\%$ .

**Differential Phase** —  $< 1^\circ$ .

**2T Pulse K Factor** — 0.5%.

**2T Pulse to Bar Ratio Error** —  $< 1\%$ .

**Short Time Distortion** —  $< 1\%$ .

**Line Time Distortion** —  $< 0.5\%$ .

**Field Time Distortion** —  $< 0.5\%$ .

#### CHROMINANCE DECODER

**Video Signal Filtering Modes** — Pass: Signal unaltered. Comb: Chrominance inverted using 3-line comb filter. Burst is comb decoded. Notch: Chrominance inverted using 9-point transversal notch filter. VITS are notch decoded. Adaptive: Chrominance inverted using combination of notch and comb filters.

110-S Video Synchronizer . . . . \$14,975.00

Includes: Power cord (161-0066-00); remote plug 36-pin unwired connector with shell (131-0293-00); one set of rack slides (351-0636-00); circuit board extender (670-7754-00); operator manual, service manual.

#### Options

Option 10—Four-Field Memory Adaptive Decoder . . . . . \$1,500.00

Option 20—Adds time base correction for heterodyne color VTFs . . . . . 2,000.00

110-RC Remote Control Unit . . . . . 500.00

# VIDEO NOISE GENERATOR

1434

## 1434 Video Noise Generator

- Calibrated Noise Levels
- White Noise
- Impulse Noise with Selectable Polarity, and Variable Width and Density
- Hum — 50 or 60Hz
- 5KHz Sine Wave
- Noise Gating
- Calibrated Video Attenuation
- Works with NTSC, PAL, PAL-M, and SECAM

Video equipment must often deal with noisy input signals and until now there has been no easy way to evaluate equipment noise susceptibility. Tek's new 1434 Video Noise Generator provides an easy means for adding a known quantity of noise to a video signal. Noise types available in the 1434 include white, impulse, hum, and 5 KHz. White noise bandwidth is internally selectable.

In addition to its calibrated noise levels, the 1434 includes provisions for attenuating or

boosting the gain of the input video signal, making it possible to obtain a wide range of signal to noise ratios with input signal amplitudes from -60 to +6 dB.

Noise gating is also provided in the 1434. This feature is useful when testing one parameter of a device without disturbing other circuitry. For example, gating noise onto just the video signal back porch would permit clamp testing without having the test affected by the device sync separator.

The 1434 also provides an external input for adding a user-created disturbance to the input video signal. If desired, the external input signal may be combined with the noise signals generated by the 1434.

Typical applications of the 1434 are clamp and sync separator testing in video equipment.

### CHARACTERISTICS

**Attenuator** — Range: 0 to -60 dB. Resolution: 1 dB. Absolute accuracy:  $\pm 0.5$  dB. Relative Step matching:  $\pm 0.25$  dB.

**Noise Sources** — White Noise: Amplitude 700 mV RMS=0 dB. Bandwidth: Narrow: -6 dB @ 5 MHz. Wide: -6 dB @ 8 MHz.

Impulse: Amplitude 700 mV P-P=0 dB. Accuracy:  $\pm 1$  dB. Width: Variable 0.5  $\mu$ s to 200  $\mu$ s typical. Density: Variable 10  $\mu$ s to 10 ms typical. Polarity: Positive or Negative.

Hum: Amplitude 700 mV P-P=0 dB. Accuracy:  $\pm 1$  dB.

Waveform: Sine wave at 50/60 Hz (Same as power line input).

5 KHz: Amplitude 700 mV P-P=0 dB. Accuracy:  $\pm 1$  dB. Waveform: 5 kHz sine wave.

**External Input** — Input Range:  $\pm 1$  V max. Input Impedance: 15 K $\Omega$ . Frequency Response: 5 MHz  $\pm 0.5$  dB.

**Gating Input** — Input Range: 7.5 V P-P max. Input Impedance: 15 K $\Omega$ . Frequency: from 1 Hz to at least 250 KHz.

**Video Input** — Input Amplitude:  $\pm 1$  V Peak. Input Impedance: 75  $\Omega$ , 40 dB Return Loss. Gain: +3 dB, +6 dB, or 0 to -60 dB. Frequency Response: Direct mode (attenuator bypassed)  $\pm 0.1$  dB to 5 MHz; -3 dB @ 18 MHz (typical). Atten mode (through attenuator)  $\pm 0.5$  dB to 5 MHz; -3 dB @ 14 MHz (typical).

**Outputs** — Adds Video Input, External In, and Noise. Impedance: 75  $\Omega$ , 30 dB Return Loss.

**Packaging** — Dual Width TM 500 Module (Compatible with TM 500 and TM 5000 Series Mainframes).

1434 Video Noise Generator . . . \$5500.00

# TEKTRONIX, INC.

P.O. Box 500

# RANDOM NOISE MEASUREMENT SET

1430

## 1430 Random Noise Measurement Set

- Conforms to CCIR Recommendation 568
- In-Service Testing
- Program Material Protected by Fail-Safe Provisions
- 525/60 or 625/50 Standards

The 1430 provides random noise measurement capabilities on an in-service basis using the spatially adjacent noise matching technique with a waveform monitor. A program channel allows deletion of VITS and/or noise on selected lines in the vertical blanking interval and a monitor channel is provided for making measurements in conjunction with a waveform monitor.

The 1430 has two sections. One section, permanently mounted in the rack, contains inputs and outputs and program protecting material. The second section, containing circuitry and controls, may be easily removed without cable disconnection.

### Monitor Channel

The monitor channel has an output independent from program for waveform comparison of the noise on the incoming signal and noise from the internal noise generator. Front-panel controls determine monitor channel parameters with three operating modes: VITS, Full Field, and Out of Service.

In the VITS mode, any line between 10 and 21 in either or both fields may be selected for insertion of the reference noise. The Full Field mode provides insertion on all active lines.

The Out of Service mode is provided for measurements on sources that do not have composite sync. In particular, these include transmission circuits not carrying signals at the time testing is conducted. Horizontal sync is added for waveform monitor synchronization.

In all modes the insertion width is internally set at 26  $\mu$ s. Delay between insertion and sync is controlled by the Delay adjustment. A switch and a potentiometer covering a range of 0 IRE to 100 IRE controls the insertion pedestal level.

Monitor channel gain control, with a  $\pm 3$  dB range, allows normalizing the signal for a 1 V peak-to-peak signal so that noise measurement relative to 1 V may be made. The internal noise weighting filter may be switched in or out from the front panel for evaluation of the spectral content of the incoming noise. This filter is the monitor channel only and does not affect the program output.

The 1430 may be used on both 625/50 and 525/60 systems but is shipped equipped for 525/60. The 1430 Option 01 is equipped for 625/50. Both mod-

els use the unified weighting filter per CCIR Recommendation 568. Insertion loss characteristics are as follows:

Insertion Loss	
1 MHz	5.9 dB
2 MHz	10.2 dB
3 MHz	12.0 dB
4 MHz	13.0 dB
5 MHz	13.6 dB

### Program Channel

The Program Channel has a 75  $\Omega$  input impedance and unity gain and output impedance of 75  $\Omega$ . No program impairment is introduced. A relay provides program signal continuity if the 1430 loses power. Internal programming, readily changeable, controls all deletion parameters. Up to three lines between 10 and 21 in either or both fields may be deleted. The deletion may be varied between the first half, second half, or full active portion of the video line. A pedestal may be inserted in the deleted portion of a line at 10 IRE, 50 IRE, or 100 IRE levels.

## CHARACTERISTICS

### PROGRAM CHANNEL

- Signal Input Level — 1 V nominal.
- Input Impedance — 75  $\Omega$  nominal.
- Input Return Loss — Power On:  $\geq 46$  dB to 5 MHz. Power Off or Bypass:  $> 40$  dB to 5 MHz.
- Output Impedance (Operating) — 75  $\Omega$  nominal.
- Output Return Loss (All) —  $\geq 30$  dB to 5 MHz.
- Output Blanking, Dc Level — 0 V within 50 mV, for blanking pulses.
- Inserted Pedestal Level — Adjustable to 100 IRE, 50 IRE, 10 IRE, or 0 IRE.
- 2T Pulse to Bar Amplitude — Within 0.25%.
- Mod Sin<sup>2</sup> Pulse (Chrominance and Luminance) — 100% within 0.5%.
- Waveform, Tilt — Field Rate Squarewave  $\leq 0.5\%$ , 26  $\mu$ s Bar,  $\leq 0.5\%$ .
- Differential Phase (10% to 90% APL, Standard Input) — Program Output:  $\leq 0.15^\circ$ .
- Differential Gain (10% to 90% APL, Standard Input) — Program Output:  $\leq 0.2\%$ .
- Line Time Amplitude Nonlinearity (10% to 90% APL, Standard Input) —  $\leq 0.5\%$ .
- Random Noise — Program Output:  $\geq 75$  dB (RMS) down (using weighting and low pass filters, 5 MHz).
- Hum or Transients on Noninserted Lines —  $\geq 60$  dB down, (using weighted and low pass filters, 5 MHz).
- Spurious Signals During Blanking Lines —  $\geq 40$  dB down, low pass (5 MHz).
- Signal Attenuation in Delete Mode — 2T Pulse:  $\geq 70$  dB down. Subcarrier (Color Bars):  $\geq 60$  dB down. Insertion pedestal: 10 IRE, 50 IRE, and 100 IRE, first half, second half, or entire line (up to 3: 10 to 21) or full field.
- Unwanted Pedestal at Time of VITS Insertion —  $\leq 0.7$  IRE.
- Time Jitter —  $\leq 5$  ns.

## NOISE

- Pedestal Level — Pedestal Amplitude: 10 IRE, 50 IRE, and 100 IRE.
- Pedestal Position (Insertion Mode Only) — Delay: 10  $\mu$ s to 50  $\mu$ s.
- Noise Amplitude — 20 dB to -59.5 dB (0 dB = 700 mV RMS).
- Noise Attenuators — Absolute Amplitude: Within 1 dB.
- Noise Spectrum — Energy/Unit Bandwidth: Flat within 6 dB, 15 kHz to 5 MHz.
- Output Impedance — 75  $\Omega$  nominal.
- Output Return Loss —  $\geq 30$  dB.
- Noise Weighting and Low Pass Filter — Per CCIR recommendation 421-2.

## AC POWER

- Line Voltage Range — 115 V ac: 90 V to 132 V. 230 V ac: 180 V to 264 V. Standard 1430: Factory set at 115 V ac. 1430 Option 01: Factory set at 230 V ac.
- Maximum Line Current — 0.25 A.
- Maximum Power Consumption — 30 W.
- Line Frequency Range — 48 Hz to 66 Hz.

## PHYSICAL CHARACTERISTICS

# VIDEO CORRECTOR

1440

REMOTE CONTROL UNIT

REMOTE MONITOR UNIT

## 1440 Automatic Video Corrector

- Reduces Operating Costs
- Extends Transmitter Tube Life and Reduces Maintenance Costs
- Maintains Consistent High Quality Color Pictures
- Automates Transmitter Modulation Level Control
- Maintains Correct Sync-To-Video Ratios During Line Voltage Fluctuations
- Automatic VIRS Referenced Correction of:
  - Overall Video Signal Amplitude
  - Chrominance to Luminance Gain Ratio
  - Black Level
  - Chrominance Phase
  - Burst Gain
  - Sync Gain
- Optional Closed Loop Capabilities for Greater Efficiency and Economy in Transmitter and VTR Operations

The 1440 VIRS Automatic Video Corrector gives fully automatic correction of video gain, chrominance to luminance gain ratio, black level (set up), chroma phase, burst amplitude, and sync amplitude errors. With this corrector in your facility, the quality of the program signal is rigidly maintained. Ordinary changes and even many severe distortions are automatically corrected.

Video gain correction is referenced to the 50 IRE level of the VIRS. Chrominance to luminance gain ratio and burst phase corrections are referenced to the amplitude and phase of the VIRS chrominance respectively. Set up level correction is referenced to the 7.5 IRE level of the VIRS. Sync and burst gain corrections are controlled respective to their standard amplitudes.

## Auxiliary Units

In most applications, the usefulness of an automatic correction is enhanced by a Tektronix Remote Control Unit. You can conveniently select corrector modes and manually correct six signal parameters with this unit. The remote unit allows easy adjustment of the parameter's preset values for operation in the absence of a reference signal. Automatic correction value adjustments are also provided.

The Tektronix Remote Monitoring Unit provides meter indications of the amount of correction applied to the signal.

## CHARACTERISTICS

Input Impedance—75  $\Omega$  nominal.

Video Display—145 ns.

Output Impedance—75  $\Omega$ .

Linear Waveform Distortions (Maximum)—Field Time: 0.5%, Line Time: 0.5%. Short Time: T Pulse/Bar: 2%. 2T Pulse/Bar: 1%.

Nonlinear Waveform Distortions—Differential Gain (10% to 90% APL): 0.5% Differential Phase (10% to 90% APL): 0.5%. Dynamic Gain (10% to 90% APL): Picture 0.5%, sync 0.5%. Chrominance/Luminance Intermodulation: 0.5%. Line Time Nonlinearity: 0.5%.

Unweighted Video Signal to Random Noise Ratio— $\geq 60$  dB to 5 MHz.

Spurious Subcarrier— $-60$  dB.

Field Time Tilt Correction—25% Tilt on Input Signal: Will be reduced to  $\leq 1\%$ .

Clamping Characteristics—10% to 90% APL or 90% to 10% APL. Recovery within one line to within five IRE without overshoot. Slow clamp option provided to reduce keyboarding when used with noisy signals. Hum Reduction: 1 V hum on input signal can be reduced to  $\leq 25$  mV.

Maximum Correction Ranges—Video Level at Input:  $\pm 6$  dB. Sync Level at Input:  $\pm 3$  dB. Chrominance/Luminance Gain:  $\pm 3$  dB. Burst Level:  $\pm 6$  dB. Burst/Chrominance Phase:  $\pm 25^\circ$ . Black Level Set Up:  $\pm 10$  IRE.

Reduced Correction Ranges—Video Level:  $\pm 2$  dB. Sync Level:  $\pm 3$  dB. Chrominance/Luminance Gain:  $\pm 3$  dB. Burst/Chrominance Phase:  $\pm 25^\circ$ . Black Level Set Up:  $\pm 5$  IRE.

Dc Error-Signal Output—Source Impedance: 10 k $\Omega$ . Open Circuit Voltage: 10 V for remote metering and telemetry. Six Outputs: Video gain, sync gain, burst gain, relative chroma gain, burst phase, and set up.

Chroma/Luminance Gain Correction ( $-3$  dB to  $-3$  dB)—2T Pulse/Bar Ratio—110% maximum and 92% minimum. T Pulse/Bar Ratio: 125% maximum and 85% minimum. 2T Pulse Preshoot: 5% maximum. T Step Overshoot: 5% maximum. T Step Risettime: 95 ns minimum and 155 ns maximum. Chrominance/Luminance Delay: 10 ns minimum and 10 ns maximum. VIR Signal Correction Rate: 0.35 s (90% correction without overshoot).

## POWER SUPPLY

Line Voltage Range—115 V ac  $\pm 10\%$  and 230 V ac  $\pm 10\%$ .

Maximum Power Consumption—35 W

Line Frequency Range—48 Hz to 66 Hz.

## PHYSICAL CHARACTERISTICS

# PAL AND PAL-M INSERTION TEST SIGNAL GENERATORS

## R148/R148M Test Signal Generators

- Insertion Test Signals (Per EBU, CCIR Recommendation 473-2, Annex 1)
- Full-Field Test Signals (Per CCIR Recommendation 567)
- Easily Reprogrammable
- Safe In-Service ITS Insertion (Per EBU Specifications)
- Noise Measurement
- APL Bounce Signal
- Source Identification Code
- Operates with Sound In Sync
- Locks with Mixed Sync (Per EBU Homologation Specifications for ITS Generators) Subcarrier, PAL Pulse, Burst Flag, Comp Sync

The Tektronix R148 (PAL) and R148-M (PAL-M) Insertion Test Signal (ITS) Generators provide all the test signals you need to test and measure PAL (or PAL-M) video transmission systems. Test signals are available as both full-field composite video and ITS inserted into the incoming program signal's vertical blanking interval. All timing information for ITS insertion is derived from the incoming composite video signal.

### VERTICAL INTERVAL INSERTION/ DELETION AND PROGRAM CONTROL

The R148 and R148-M insert ITS only when genlocked to an incoming composite video signal. Since ITS insertion/deletion involves active circuit elements in the program line, program line fail safe operation is provided in the event of instrument malfunction, loss of sync, or power failure. You also have access to local and remote control manual override capability.

A preview monitor output permits observation of the ITS deletion/insertion program before anything is actually done to the program signal. Preview/program operation can be locally or remotely controlled.

Provisions are made for adding an externally generated ITS to the program line.

### INSERTION SIGNAL CONTROL FEATURES Free Running Operation

A warning light indicates absence of incoming synchronizing information and ITS deletion and insertion is automatically discontinued.

### Program Level

A front panel switch lets you select a preset gain, normally adjusted for unity gain between program input and program output. Or, you can use a front panel level adjustment to normalize the incoming program signal to provide 1 volt at the program output.

### Local-Remote Control of Program and Preview

You can shift control of program or preview modes from the front panel (local) to a position remote from the generator. When operating under either local or remote control, front panel

lights indicate program line status, since the front panel program status switch position may not correspond to the operating mode selected.

### Auxiliary

A noncomposite video signal (such as a sweep generator) applied to the auxiliary input appears at the preview monitor output connector with composite blanking and sync added. A pedestal control provides a dc offset so the auxiliary signal excursion may be positioned between the black and white limits of the resulting composite video signal. Remote control is not available.

### ITS Subcarrier Phase

A recessed front-panel control adjusts phase of color subcarrier on internally generated signals to be correct in relation to the phase of incoming burst.

### Insertion Delay

A recessed front-panel control provides a fine horizontal timing adjustment for inserted signals.

### FULL-FIELD OPERATION

The Tektronix R148 and R148-M provide full-field test signals separate from program. These signals are generated with or without external synchronizing information and will be locked to the external synchronizing signal when a program signal or external synchronizing signals are present.

### FLAT-FIELD SIGNAL

The flat-field signal with VITS inserted is used primarily for system testing at discrete average picture levels.

The flat-field signal is a composite video signal that, during the active portion of each field, has a constant luminance level. The luminance level is selectable in eleven increments from 0% to 100% of white. An alternate selection provides automatic change between black and white with a period variable from 1 s to 10 s.

When operating the R148 in the flat field mode, you may select a white level preset between 85% and 100% and a black level preset between 0% and 15%. Automatic change between white and black is available and occurs at a period adjustable from 1.0 s to 10.0 s.

### FIELD SQUAREWAVE SIGNAL

The field squarewave signal is used to measure field time distortions. In this mode, the Tektronix R148 provides a composite video signal with 205 active lines at 700 mV, approximating a 50 Hz squarewave. The R148-M provides a composite video signal with 132 active lines at 700 mV, approximating a 60 Hz squarewave.

Use this signal to detect low frequency phase and gain distortions, even those passing through clamper amplifiers.

## CHARACTERISTICS

### PROGRAM CHANNEL

Input Level — Adjusted to unity gain.

Variable Input Level —  $\pm 30\%$ .

Inserted Signal Level — Within  $\pm 1\%$  of nominal.

Output Dc Level —  $< 50$  mV (no signal).

Frequency Response, Program, and Preview Channels —  $\pm 1\%$ , 50 kHz to 5 MHz.

Field Time Tilt —  $< 0.5\%$ .

Line Time Tilt —  $< 0.25\%$ .

Differential Phase Standard Input — Program Output:  $< 0.15^\circ$ . Preview Output:  $< 0.3^\circ$ .

Differential Gain Standard Input — Program Output:  $< 0.2\%$ . Preview Output:  $< 0.4\%$ .

Random Noise Output Program Channel —  $< -75$  dB RMS.

Hum, Transients on Noninserted Lines —  $-60$  dB down.

Spurious Signals During Blanking Time — Inactive line time  $\geq 40$  dB down. Active ITS lines  $\geq 60$  dB.

Signal Attenuation in "Delete" Mode — 2T Pulse:  $> -70$  dB. Subcarrier (Color Bars):  $> -60$  dB.

Crosstalk into Program Channel from Internal Signals — 2T Pulse:  $< -70$  dB. Subcarrier (Color Bars):  $< -60$  dB.

Unwanted Pedestal at Time of ITS Insertion — Program and Preview Channel:  $< 5$  mV.

Insert Delay Adjustment Range —  $\pm 0.5$   $\mu$ s front panel.

### SOURCE IDENTIFICATION CODE (R148 ONLY)

The Tektronix R148 is a source identification code generator with up to 25 pulses available in any combination on line 16 or line 329.

Pulse Width — 1  $\mu$ s.

One Level — 630 to 700 mV above blanking.

Zero Level — Within 25 mV of blanking.

### OTHER CHARACTERISTICS

Power Requirements — 90 V ac to 136 V ac or 180 V ac to 272 V ac; 48 Hz to 66 Hz, 55 W maximum at 115 V ac and 60 Hz. Factory set at 230 V ac (R148) or 115 V ac (R148-M).

Ambient Temperature — Performance characteristics are valid over an ambient temperature range of 0°C to +50°C.

### PHYSICAL CHARACTERISTICS

Dimensions	mm	in
Width	483	19.0
Height	88	3.5
Depth	499	19.7
Weights	kg	lb
Net	9.1	20.0
Shipping $\approx$	16.3	36.0

### INCLUDED ACCESSORIES

75  $\Omega$  BNC termination (011-0103-02); two each BNC-T adapters (103-0030-00); rackmounting hardware (351-0195-01); manual.

**R148 PAL Test Signal Generator ..... \$5,540**

**R148M PAL-M Test Signal Generator . \$8,700**

### OPTIONAL ACCESSORIES

Noise Measurement Filters — External filters are required with the 148 Generator when making noise measurements.

Low Pass 6.0 MHz 625/50 — Order 015-0220-00 . . . \$130.00

Noise Weighting 5.0 MHz 625/50 — Order 015-0215-00 100.00

Low Pass 4.2 MHz 525/60 — Order 015-0212-00 . . . . 155.00

Noise Weighting 4.2 MHz 525/60 — Order 015-0214-00 100.00

CCIR recommendation 568 provides for measuring signal-to-weighted random noise on all international transmissions (both 525/60 and 625/50) with a 5.0 MHz low pass filter and a unified noise weighting filter.

Low Pass 5.0 MHz — Order 015-0213-00 . . . . . \$150.00

Unified Noise Weighting Network — Order 015-0283-00 . . . . . 85.00

Rackmount to Cabinet Conversion Kit — Order 040-0573-00 . . . . . POR

# TELEVISION GENERATOR

## Digital Genlock

The TSG-300's unique digital genlock and stable internal oscillator make it suitable for either slave or stand-alone operation. After the incoming signal is digitized, a processor analyzes timing to control the TSG-300's system clock. The digital genlock works with component video or composite NTSC, PAL, or SECAM sources operating in either 525/60 or 625/50 systems. The TSG-300 automatically switches to its internal oscillator in the absence of a reference input signal. This high stability crystal oscillator, with its constant temperature oven, ensures long term frequency stability.

## Remote Control

Remote operation of test signal selection, system timing, and line and field rate selection is available by simple ground closure control through a rear panel connector.

## TSG-300 Specifications

Signal Formats	Y, B-Y, R-Y (SMPTE; Y,Pb,Pr; EBU) GBR Betacam (3 wire) MII (3 wire) Y-CTDM (Betacam 2 wire) YCTCM (MII 2 wire)
Systems	525/60 and 625/50 by jumper selection or remote control
Signal Generation	10 bit digital 13.5 MS/s Direct generation (no transcoders)
Outputs	Channel 1: 2 outputs Channel 2: 2 outputs Channel 3: 2 outputs Sync 13.5 MHz Reference Space for Betacam or MII Dub
Inputs	Genlock loop-through
Test Signals	(Unless otherwise specified) 700 mV for 100% luminance
Luminance Amplitude	± 350 mV for 100% color difference
Color Difference	
Sync Amplitude	- 300 mV on luminance channel
Blanking level	0 ± 50 mV
Amplitude Accuracy	1%
Channel Amplitude Match	0.5%
Channel Timing Match	5 ns
Frequency Response	1% to 5 MHz 2% to 5.5 MHz
Pulse Response	1% ringing on 2T pulse T = 100 ns
Line Tilt	0.5%
Field Tilt	0.5%
Output Impedance	75 Ohm
Return Loss	36 dB to 5 MHz
Y, B-Y, R-Y (Y,Pb,Pr; SMPTE; EBU) 100/0/100/0	700 mV luminance ± 350 mV color difference
100/0/75/0	700 mV luminance ± 262.5 mV color difference
GBR Bars 100/0/100/0 75/0/75/0	700 mV all channels 525 mV all channels
Betacam Bars 100/7.5/75/7.5	714 mV luminance in 525/60 53.6 mV setup ± 14.3 mV pluge ± 350 mV color difference Obtainable by applying the TSG-300 boost function (1.33 gain on color difference channels) to 75% SMPTE/EBU bars
100/0/75/0	
Y,CTDM 100/7.5/75/7.5 100/0/75/0	714 mV luminance in 525/60 700 mV luminance in 625/50 ± 350 mV color difference

## TSG-300

## TSG-300 Specifications (Continued)

MII Bars 100/7.5/75/7.5	700 mV luminance for 525/60 52.5 mV setup ± 243 mV color difference Same as SMPTE/EBU bars
100/0/75/0	
Y,CTCM 525/60 100/7.5/75/7.5	700 mV luminance ± 350 R-Y ± 250 B-Y
Y,CTCM 625/50 100/0/75/0	700 mV luminance ± 262.5 mV color difference
Luminance Reference with pluge	0, 175, 350, 525, and 700 mV Gray scale references with - 70 and + 770 mV clipping indicators ± 14 mV pluge
5 Step Staircase	700 mV luminance ± 350 mV color difference
120% Ramp	- 70 mV to + 770 mV
Valid Ramp	700 mV p-p
Shallow Ramp	± 350 mV from Pedestal 0 to 700 mV Pedestal luminance ± 350 mV pedestal color difference in 5.5 mV increments
Pulse and Bar	2T Pulse and 2T Bar luminance 3T or 5T Pulse and Bar color difference Includes 3 step or 5 step staircase to indicate pulse HAD
Pulse and Bar with 20T Pulse	2T pulse and 2T Bar luminance 20T pulse on all channels codes to modulated pulse in composite signal
Window	Pulse and Bar signal gated on during lines 72-202 in 525/60 and lines 78-234 in 625/50
Field Square Wave	700 mV luminance 350 mV color difference Vertical timing same as window
Multipulse	420 mV 60% amplitude selectable 1, 2, 3, 4, and 5 MHz luminance 350 to + 70 mV color difference 0.5, 1, 1.5, 2, and 2.5 MHz color difference
Wideband Multiburst	420 mV p-p 60% on 350 mV pedestal for luminance 1, 2, 3, 4, and 5 MHz all channels
Narrowband Multiburst	420 mV p-p 60% 1, 2, 3, 4, and 5 MHz luminance 0.5, 1, 1.5, 2, and 2.5 MHz color difference
Wideband 100% Line Sweep	700 mV p-p 200 kHz to 5.5 MHz all channels
Narrowband Sweeps	420 mV p-p and 250 mV p-p 200 kHz to 5.5 MHz luminance 100 kHz to 2.75 MHz color difference
Bowtie	500 kHz luminance 502 kHz color difference ± 100 ns delay range with markers every 20 ns
Convergence	525 mV (75%) 14 horizontal lines; 15 vertical lines
Coring	70 mV p-p 0 to 700 mV pedestal luminance ± 350 mV pedestal color difference 1, 2, 3, 4, and 5 MHz luminance 0.5, 1, 1.5, 2, and 2.5 MHz color difference
Flat Field	0 to 700 mV variable luminance ± 350 mV variable color difference
Genlock	Loop-through input Return loss 40 dB to 5.5 MHz Locks to NTSC, PAL, SECAM, or Component luminance
Genlock Timing	± 8 µs delay range

TSG-300 ..... \$8850.00

## TSG-300

### Component Television Generator

- Multiple Formats and Standards
- Y, B-Y, R-Y (Y,Pb,Pr; SMPTE/EBU)
- GBR
- Betacam®
- MII
- 525/60 and 625/50
- 10 Bit Digital Signal Generation
- New Test Signals for Component Video
- Bowtie
- Coring
- Valid Ramp
- Shallow Ramp
- User Configurable Controls
- Digital Genlock

### Digital Genlock

From news gathering to post-production, component television is providing new levels of image quality and operational flexibility. While component television solves many problems inherent in composite NTSC and PAL, it brings with it a new set of concerns. The TSG-300 Component Television Generator provides innovative solutions to the measurement problems encountered in component television systems.

### Multiple Formats and Standards

While the EBU and SMPTE are setting standards for component video, there is already a large base of installed component equipment using many different operating levels. The TSG-300 bridges this gap between formal and de-facto standards, providing signals in SMPTE/EBU standard formats as well as previously existing component formats. Signal formats supported by the TSG-300, using color bars as an example (Figure 1), are Y, B-Y, R-Y (Y,Pb,Pr; SMPTE/EBU), GBR, Betacam, and MII. The TSG-300 also supports both 525/60 and 625/50 systems by either internal jumper selection or remote control.

### Digital Signal Generation

Precision digital signal generation insures the accuracy and stability of the TSG-300 test signals. 10 bit digital to analog conversion at 13.5 MS/s, even in the color difference channels, allows full bandwidth testing of GBR systems. Digital generation of each individual format eliminates transcoding artifacts.

### New Test Signals for Component Video

The TSG-300 provides unique solutions to component measurement problems with signals such as Bowtie, Coring, Valid Ramp, and Shallow Ramp, as well as a wide range of more conventional signals

### User Configurable Controls

Operation of the TSG-300 is simplified by its user configurable controls. Many of the test signal controls access a variety of similar signals. These signals are accessed by pressing the switch repeatedly. By simply specifying which signal you want to appear first, the problem of searching for a commonly used signal is eliminated.

## WFM-300 Component Television Waveform Monitor

- Electronic graticule
- Lightning display
- Waveform display parade and overlay
- Vector display
- Bowtie timing display
- Color gamut limit indication
- Linearity measurements
- Input selectable between Y, B-Y, R-Y, R, G, B, Y, Q, I
- 625/50 and 525/60 configurations
- RGB picture monitor output

The versatile WFM-300 Component Television Waveform Monitor provides a comprehensive set of signal monitoring capabilities designed specifically for the component television environment.

The component based television equipment produces signals quite different from the composite television signals, and the WFM-300 provides new monitoring capabilities to meet this challenge. An innovative Lightning display provides amplitude and timing information for all three channels simultaneously, allowing the operator to set up equipment accurately and efficiently.

The traditional parade display of three signals provides side-by-side comparison of all signals. In addition, any combination of the three signals can be overlaid for accurate comparisons. Both horizontal and vertical magnification can be applied for detailed inspection of the signal being observed.

A vector display of the color difference signals provides the traditional color bar vector display. The new bowtie display uses the special bowtie timing test signal from the TSG-300 component television test signal generator, allowing precise timing of three wire component television systems.

The 3-channel input signals can be Y, B-Y, R-Y or R, G, B, or Y, Q, I with internal accommodation for each signal type. All of these signal types are converted to R, G, B for a dedicated picture monitor output. The valid RGB gamut limit is monitored to ensure the operator is warned if a combination of signals is not valid. The WFM-300 can be configured for both 525/60 and 625/50 signal standards.

## Specifications

**Vertical Deflection System** — Frequency Response: 1 V Full Scale; 50 kHz to 6 MHz within 2% of response at 50 kHz. X5 Gain; 50 kHz to 5 MHz within 2% of response at 50 kHz. Dif'd Step; Equal to greater than -20 dB at 14 kHz and 2 MHz. Transient Response: 1 V Full Scale; Pulse-to-bar 0.99:1.00 to 1.01:1.00. Ringing and Overshoot; 2% or less. Tilt: 1% or less; Variable Gain Range: 1 V Full Scale; Input signals between 0.7 V and 2 V can be adjusted to 1 V display. Deflection Accuracy: Within 2%.

**DC Restoration** — Attenuation of 50 Hz on Input Signal: Less than or equal to 20%. Blanking Level Shift with 10% to 90% APL Change: Less than or equal to 1%.

**Inputs** — CH 1, CH 2, CH 3, & External Reference: Return Loss (75 ohms) at least 40 dB from 50 kHz to 6 MHz. Cross Talk Between Channels: Greater than 46 dB isolation between channels. Loop-Through Isolation: Greater than 60 dB isolation between channels. Maximum Input Level for Normal Operation (CH 1, CH 2, CH 3)  $\pm 2$  V (dc + peak ac). External Reference: +2 to -4 V peak ac (compatible with comp sync).

**Horizontal Deflection System** — (Waveform and Parade Mode) Sweep will occur in all sweep rate settings with or without a reference signal. Synchronization: Sweep will synchronize to sync amplitude of 0.3 V p-p  $\pm 6$  dB. 2 FLD Sweep Repetition Rate: Equal to frame rate of selected reference. 2 FLD MAG (Magnification): Approximately X20. 1 LINE Sweep Repetition Rate: Equal to line rate of selected reference. 2 LINE Sweep Repetition Rate: Equal to half line rate of selected reference. Timing Accuracies: 1  $\mu$ s/Div; within 2%. 0.2  $\mu$ s/Div; within 2%. Linearity (1  $\mu$ s/Div and 0.2  $\mu$ s/Div): within 2%.

**Parade Mode** — Sweep Repetition Rate: Field or line rate of selected reference.

**Vector Mode** — Vertical Bandwidth: 900 kHz  $\pm 100$  kHz. Horizontal to Vertical Bandwidth Matching: No eye opening at 500 kHz or 2 MHz. Vertical Gain Accuracy:  $\pm 1\%$ . Horizontal Gain Accuracy:  $\pm 1\%$ . Electronic Graticule Accuracy:  $\pm 1\%$ .

**Bowtie Mode** — Common Mode Rejection Ratio: Greater than 40 dB.

**Calibration** — Calibrator accuracy within 1%.

**Transcoder** — Accuracy: Within 1%. GBR Outputs: Impedance 75 ohms nominal. Back porch clamped to 0 V. Gamut Limit: Preset threshold settings are nominally +735 mV and -35 mV within  $\pm 5$  mV.

**CRT Display** — CRT Viewing Area: 80 x 100 mm. Horizontal = 12.5 div. Accelerating Potential: Nominally 13.75 kV. Trace Rotation Range: Greater than  $\pm 1$  degree from horizontal.

**Power Source** — Mains Voltage Ranges: 110 V (88-132 V); 220 V (198-242 V). Mains Frequency Range: 48 Hz to 66 Hz. Power Consumption: 35 Watts maximum.

# WAVEFORM MONITORS

1710B

## 1710B SERIES WAVEFORM MONITORS

- Burst Phase Indicator
- Dual Filter Display
- Half Rack Width
- Bright CRT Display
- Internal Graticule
- DC Operation
- Available in NTSC and PAL Standards

The 1710B Series Waveform Monitors provide all of the commonly used display modes. In addition, the 1710B Series adds relative burst phase indication and dual filter display. All of this in a cost effective package for the user who wants high quality at a low price. These new monitors are mechanically compatible and retrofit into an existing system that uses half rack width, 5¼" waveform monitors.

Because of its extreme light weight, low power consumption, and DC operation (field installable kit) the 1710B Series is ideal for field production, mobile operations, and any other application where space, power consumption and/or portability are prime considerations.

**Easy Operation.** This monitor was also designed with the user in mind. Controls have clear nomenclature and are laid out in a logical order. This makes the operation of this powerful tool easier than one might expect.

**Burst Phase Indication.** The relative burst phase between inputs is displayed on the LED bar graph. The center green LEDs indicate the two signals are phase matched. The yellow ones warn the phase is slipping out of an acceptable range. Finally, the red LEDs flag an unacceptable amount of phasing error. This feature allows one instrument to do the complete job of timing and phasing in a basic television system.

**Dual Filter Display.** The dual filter display allows the user to view both the complete video signal and the luminance information at the same time using just one instrument. This eliminates the need for switching back and forth between filters and makes the instrument easier to operate. Ideal for camera setup.

**Bright CRT Display.** The bright CRT display permits use of the 1710B Series in high ambient light conditions. Brightness remains high in the magnified sweep modes enhancing the 1710B's use in system timing applications. The internal graticule is parallax-free to reduce errors and improve its monitoring and measuring capabilities.

## ELECTRICAL SPECIFICATIONS

### VERTICAL DEFLECTION SYSTEM

#### Frequency Response:

FLAT: Within 5% of the response at 50kHz from 50kHz to 6MHz. The response at Fsc is within 2% of the response at 50kHz.

L PASS: At least 97% attenuation at Fsc.

#### Transient Response:

Pulse to Bar Ratio: 0.99:1.00 to 1.01:1.00

Ringing: 2% or Less

Overshoot: 2% or Less

Tilt (Field Rate Square Wave, Vertical Window, or 25  $\mu$ S Bar): 1% or Less

#### Gain Range:

Input signals between 0.25V and 2.0V can be adjusted to 140 IRE (NTSC) or 1V (PAL) display.

#### Maximum Absolute Input Level:

+2V (dc + peak ac)

#### Deflection Accuracy:

1710B: 1V input for 140 IRE display within 2%.

1711B: 1V input displays 1V within 2%.

#### DC Restoration:

DC Restorer Clamp Time: Back Porch

Low Frequency Response at 50Hz: Attenuation of 50Hz on Input Signal 20% or less.

Blanking Level Shift with 10% to 90% APL Change: 1710B: APL changes from 50% to either 10% or 90% will cause blanking level shift of 1 IRE unit (7 mV) or less.

1711B: APL changes from 50% to either 10% or 90% will cause blanking level shift of 0.7 mV or less.

Blanking Level Shift Due to Presence or Absence of Burst: 1% or less of 100% video

### HORIZONTAL DEFLECTION SYSTEM

#### Sweep:

Sweep will occur in all Horizontal mode settings with or without synchronization.

#### Synchronization:

Sweep will synchronize to composite video 0.5V p-p to 2.0V p-p or to composite sync 143mV p-p to 8V p-p.

#### 2FLD Sweep Repetition Rate:

Equal to frame rate of applied video or external sync.

#### 2H Sweep Repetition Rate:

Equal to half line-rate of applied video or external sync.

#### Timing Accuracy:

1  $\mu$ S/div Sweep within 2%.

#### Linearity (1 $\mu$ S/div):

Within 2%

#### Differential Linearity (1 $\mu$ S/div):

Within 3% 0.1 div (0.5 minor div) or less compression or expansion of a center screen 4 div signal, when positioned anywhere horizontally.

#### POWER SOURCE

##### Mains Voltage Ranges:

115V (90-132V)

230V (200-250V)

##### Mains Frequency Range:

48Hz to 66Hz.

##### Power Consumption:

25 Watts (85.25 BTU/hour) maximum.

#### CALIBRATION SIGNAL

##### Frequency:

100kHz + 1kHz.

##### Amplitude:

1V within 1%.

## PHYSICAL CHARACTERISTICS

#### Dimensions:

5.25"H x 8.424"W x 16.875"L

(13.3 x 21.4 x 42.9cm)

Weight: Approx. 8 lbs. (3.6kg).

# VECTORSCOPIES/ WAVEFORM MONITORS

1720

1730

## 1720 SERIES VECTORSCOPIES 1730 SERIES WAVEFORM MONITORS

- Performance and economy
- Complete line select
- Simultaneous Channel A & B display
- Dual filter display
- One-button front panel recall
- Differential phase and gain measurement
- Stereo audio phase measurement
- RGB/YRGB display capability
- Vector center dot clamping
- Parallax-free internal graticules
- Portable DC power and battery available
- Remote control capability
- Available in NTSC and PAL standards

The Tektronix 1730 Series Waveform Monitors and 1720 Series Vectorscopes provide a new dimension in television signal monitoring for both NTSC and PAL applications. These versatile instruments are lightweight, half-rack width, and have bright CRTs for comprehensive video signal monitoring. Both instruments exceed normal monitoring capabilities. Their unique features make them even more powerful when operated in tandem. Each monitor has its own advanced feature set and the proven 1700 Series family performance to provide more monitor for the money.

### Portable DC power

In addition to being ideal for camera control units and video tape recorders, these instruments can be equipped with cabinet and field upgrades allowing them to operate from a 12VDC source for portable operation. They can be used with the Tektronix BP1 or other 12V supply. Coupling this DC operation with their lightweight (about 9 lbs., including cabinet), low power consumption, and compact size make these instruments well suited for use on a portable production cart.

### Remote control

Internal front panel presets, RGB/YRGB enable, along with front panel recall/setup can be accessed through the Waveform Monitor Remote Connector.

### Available in NTSC and PAL

Both the 1730 Series and the 1720 Series are available in either NTSC or PAL versions.

### 1720/1730 SPECIFICATIONS

<b>CRT Viewing Area:</b>	80 x 100mm
<b>Trace Rotation:</b>	8° range, typical
<b>Graticule:</b>	Internal scale with variable illumination
<b>Power Source</b>

1740 SERIES

## 1740 SERIES

- Two Instruments in One
- Optional Dc Power Capability
- Bright CRT Display
- R-Y (V-Axis) Mode
- VITS Monitoring
- RGB/YRGB Display Capability
- Remote Control Capability
- Available in NTSC, PAL, and PAL-M

Similar to the 528A and 1420 Series products, the 1740 Series provides all the basic waveform monitoring and vectorscope functions, but in a single, compact package. In addition, the 1740 Series adds dc power operation (optionally), single line vertical interval display which is internally preset, an R-Y/sweep mode for differential phase measurements, and remote control of waveform/vector mode and most of the front panel sweep and vertical amplifier response functions.

The 1740's half-rack width package allows easy installation where space and power requirements are important considerations. The 1740 is mechanically compatible with the 528A, 602, 1420 and 1750 Series instruments.

Typical applications include video signal monitoring in VTR bridges, camera control units, production switcher consoles, and in mobile vans and field productions.

### EXTERNAL REFERENCES INPUT

Dc Input Impedance— $>15\text{ k}\Omega$ .  
Return Loss—At least 40 dB from 50 kHz to 6 MHz.

### RGB/YRGB MODE

Will display either a 3-step or 4-step RGB/YRGB display.

Staircase Amplitude—A 10 V input will result in a horizontal display of 9 divisions  $\pm 1.4$  major divisions.

Maximum Operating Staircase Signal Voltage—12 V p-p ac component. Signal voltage not to exceed  $\pm 12\text{ V}$  dc + peak ac.

### VECTOR MODE

#### Chrominance Bandwidth

Upper: -3 dB point Fsc +500 kHz  $\pm 100\text{ kHz}$ .  
Lower: -3 dB point Fsc -500 kHz  $\pm 100\text{ kHz}$ .

Vector Phase Accuracy—Within 1.25 degrees.

Vector Gain Accuracy—1740: Within 1.25 IRE.  
1741/1742: Within 1.25%.

Quadrature Phasing—Within 0.5 degrees.

### SUBCARRIER REGENERATOR

Pull-In Range—1740: Within 50 Hz of Fsc.  
1741/1742: Within 10 Hz of Fsc.

Phase Shift with Subcarrier Frequency Change—  
1740: Within 0.5 degrees from Fsc to (Fsc +50 Hz), or  
Fsc to (Fsc -50 Hz).

1741/1742: Within 0.5 degrees from Fsc to (Fsc +10  
Hz), of Fsc to (Fsc -10 Hz).

Phase Shift with Burst Amplitude Change—Within 2  
degrees from nominal burst amplitude to  $\pm 6\text{ dB}$ .

Phase Shift with Reference Switched Between  
Internal and External References—Within 0.5  
degrees.

Phase Shift with Input Channel Change—Within 0.5  
degrees.

Phase Shift with X5 Gain—Within 2 degrees.

Phase Shift with Variable Gain—Within 1 degree as  
gain is varied from +3 dB to -6 dB.

Phase Control Range—360 degrees continuous  
rotation.

### DISPLAY CHARACTERISTICS

Differential Phase—Within 1 degree.

Differential Gain—Within 1%.

Variable Gain Range—1740: Input subcarrier signals  
between 28 IRE and 140 IRE can be adjusted to normal  
burst vector length.

1741/1742: Input carrier signals between 210 mV and  
1.0 V can be adjusted to normal burst vector length.

### CRT DISPLAY

CRT Viewing Area—80 mm x 100 mm.

Accelerating Potential—Nominally 15 kV.

### GRATICULE

Waveform—Internal, variable illumination.

Vector—External, variable illumination. Illuminated  
with VECTOR or R-Y mode selected.

### POWER SOURCE

Mains Voltage Ranges—100 V (90 V to 100 V); 120 V  
(108 V to 132 V); 220 V (200 V to 242 V); 240 V (218 V to  
250 V).

Mains Frequency Range—48 Hz to 66 Hz.

Power Consumption—50 W maximum in ac. 30 W  
nominal in dc.

### DC BATTERY OPERATION (OPTION 07)

Voltage Input Range—11 V to 16 V.

Over Voltage and Polarity Reversal Protection—Fuse  
blows if  $>20\text{ V}$  dc or opposite polarity is applied to the dc  
INPUT.

Under Voltage Protection—Instrument shuts down  
when battery voltage (under load) is below 9 V.

Battery Current—3.5 A or less at 12 V.

### ENVIRONMENTAL CHARACTERISTICS

Temperature—Operating:  $0^\circ\text{C}$  to  $+50^\circ\text{C}$ . Non-  
operating:  $-55^\circ\text{C}$  to  $+75^\circ\text{C}$ .

Altitude—Operating: 4500 m (15,000 ft). Nonoperat-  
ing: 15,000 m (50,000 ft).

1750 SERIES

## 1750 SERIES WAVEFORM/VECTOR MONITORS

- Two Instruments in One
- SCH Phase and Color Framing
- R-Y (V-Axis) Mode
- RGB/YR GB Mode
- Remote Control Capability

The 1750 Series offers comprehensive monitoring and measurement of television signals, including SCH phase and color framing, in one compact unit. While similar in appearance to the 1740 instruments, the 1750 has enhanced performance in each of its operating modes.

The unique SCH phase display presents horizontal sync timing relative to reference subcarrier (burst) for verification of signal format and color framing. This mode enables easy analysis and monitoring of these important characteristics of the television signal, a task which previously required complex techniques, highly skilled operators and/or additional instrumentation. The 1750's SCH phase and color frame displays are derived from the standard composite signals. No extra pulses or added signal details are required.

The 1750's SCH capability makes it particularly valuable in production and editing environments where maintenance of SCH phase and color frame are critical considerations. Applications include VTR bridges, camera control units, switcher consoles, master control, mobile and field production units, and in maintenance operations supporting any of these areas.

The 1750's half-rack package allows easy installation in environments where space and power requirements are important considerations. The 1750 is mechanically compatible with 528A, 602, 1420, and 1740 Series instruments.

### Waveform Mode

The waveform mode vertical response is controlled by selectable flat, chroma, and luminance (IRE) filters. A backporch slow clamp is controllable from the front panel. An internal jumper reprograms the clamp timing for sync tip operation.

The 1750 has pushbutton selection of H, 2H, V, and 2 V horizontal sweeps. A magnifier provides calibrated sweep speeds of 1  $\mu$ s/div, 0.5  $\mu$ s/div, and 0.2  $\mu$ s/div at the line display rates, and about 20X magnification of the vertical rate display. The faster sweep speeds are useful for determination of horizontal blanking, pulse widths, risetimes, and other timing details of the signal, while the magnified vertical sweep allows viewing of the vertical blanking interval.

The internal calibrator signal in the 1750 is useful for verification of both video amplitude and sweep timing calibration. Crystal control of the calibrator waveform provides an accurate 1V p-p squarewave and 10  $\mu$ s timing interval.

The sweeps may be locked to the selected signal (A or B input), or to a separate external reference input. The horizontal rate sweeps may be triggered by the selected source (which presents a stable display in the presence of sync jitter) or may be AFC controlled (which displays sync jitter for analysis). Use of the AFC sweep control can also reposition the H sweep for more convenient timing measurements.

The 1750 Series has front panel line and field selection, and LED readout of the selected line number, and a video output with a strobe pulse on the displayed line. The 1750 (NTSC) will display line 8 thru 23 of either monochrome field (color fields 1, 3 or fields 2, 4). The 1751 (PAL) will display lines 6 thru 21 or 319 thru 334. The line selection range may be extended to any line of the frame by the use of rear panel remote control input in conjunction with the front panel controls.

The line selection function is operational in waveform, R-Y, and vector modes. These features provide convenient in-service monitoring or measurement of field blanking interval test or data signals.

### R-Y (V-Axis) Mode

In this mode the display is similar to a waveform display with the demodulated chrominance signal on the vertical axis and the selected sweep on the horizontal axis. Any demodulation axis may be set with the phase control; properly setting the display of burst in the vector mode will ensure R-Y axis decoding when the R-Y mode is selected.

There are differential phase markings on the graticule for use in this mode. Resolution of differential phase error is about twice that of

# WAVEFORM/VECTOR MONITORS

vector measurement techniques, and the displayed errors may be correlated with time and luminance amplitude by using modulated staircase or modulated ramp test signals.

### SCH Phase Mode

This display is a combination of the burst vectors of the vector display and a bright dot on the outer degree circle of the vector graticule. The position of this "sync dot" around the circle represents the timing (phase) of the horizontal sync edges relative to the reference subcarrier. An individual signal may be analyzed for proper format (for proper SCH phase) without any additional reference.

Since it is possible for two signals to be properly formatted but not properly timed to each other (i.e., a color framing error exists), the 1750 has provision for using an external reference input for its subcarrier phase reference. When the external reference mode is used, the display shows the burst phase and sync timing of the selected signal relative to the burst of the reference signal, simultaneously indicating the SCH phase of the selected input signal and its color frame relative to the external reference signal.

### INCLUDED ACCESSORIES

Power cord assembly (161-0066-00); clear filter (378-0219-00); contrasting filter (378-0221-00); female remote connector, 25 pin (131-0569-00); 9 pin (131-1006-00); remote connector housing, 25 pin (200-1667-00); 9 pin (200-1170-00); strain relief, 25 pin (358-0314-00); 1.0 A fuse (159-0022-00); 0.5 A fuse (159-0032-00); instruction manual (070-4472-00).

**1485R Option 01 PAL/NTSC  
Dual Standard Waveform Monitor  
(Rackmount)**

**1480 SERIES**

## 1480 SERIES WAVEFORM MONITORS

- Bright CRT Especially Suitable for Vertical Interval Testing
- Advanced Measurement Modes
- Amplitude Measurement Accuracy Approaching 0.2%
- Digital Selection of Line and Field
- Probe Input Option
- 15-Line Display for VTR Applications

The 1480 Series waveform monitors have excellent amplitude measuring accuracy and many unique operating modes that enable you to work more precisely and accurately. The monitoring needs of CCU, VTR, control room, transmission facilities, transmitter, and special systems are met by the use of 1480 Series waveform monitors. The 1485C and 1485R PAL/NTSC dual standard monitors (see photos) represent the essentials of all seven monitors in the 1480 Series. The differences between the monitors in the series are essentially confined to what lines in the vertical interval are selectable, what filters are selectable in the response mode, and in the field selection modes. Dual-Standard Monitors recognize the signal standard in use automatically and indicate that standard with front panel indicators.

### CHARACTERISTICS

#### VERTICAL DEFLECTION

**Inputs**—Input A and B are 75Ω high impedance loop-through. Return loss is ≥40 dB from dc to 5 MHz in a 75Ω system. Aux Video Input is internally terminated in 75Ω. Return loss is ≥34 dB from dc to 5 MHz.

**Scale Factor**—A and B input calibrated 1.0 V ±7 mV, 0.5 V ±15 mV, 0.2 V ±7 mV, (0.05 V ±2.5 mV Option 06) volts full scale. Variable: Range for each scale factor at least +40% to -50%. Aux Video Input 1.5 dB gain.

**Maximum Input Voltage**—2 V p-p (ac coupled), ±1.5 V dc + peak ac (dc coupled).

#### Frequency Response

**FLAT:** 50 kHz to 5 MHz ±1% (1.0 V F.S., VAR in detent). 5 MHz to 8 MHz +2, -3%, 8 MHz to 10 MHz +2, -6%. Typically within +2, -15% to 18 MHz and typically -3 dB at 20 MHz.

**Low Pass:** Attenuation ≥14 dB, 500 kHz and above. 3.58 MHz Bandpass: Amplitude within ±1% of amplitude in Flat response position. Bandpass ≈600 kHz. 4.43 MHz Bandpass: Amplitude within ±1% of amplitude in flat response position. Bandpass ≈800 kHz. IRE: Conforms to IEEE Standard 205, 1972.

#### Linear Waveform Distortion

**Pulse/Bar Ratio:** ±1%. For NTSC or PAL 2T Pulse or NTSC T Pulse.

**Short Time:** Preshoot, overshoot, ringing ≤1% of NTSC or PAL T Pulse and Bar.

**Line Time:** Tilt or rounding ≤1.0%. Field Time: (Ac coupled) ≤1%.

**Nonlinear Distortion**—Differential Gain: ≤0.5%.

**Dc Restorer**—Keyed type, may be turned off. Clamping point: Back Porch/Sync Tip. Time Constant: FAST reduces mains hum ≥26 dB, SLOW reduces mains hum <0.9 dB.

**Calibrator**—Amplitude selected by dc Restorer switch. Sync Tip: 1 V ±0.2%. Back Porch: 714 mV or 700 mV ±0.5%.

#### HORIZONTAL DEFLECTION

**Time Base**—5 μs and 10 μs timing accuracy ±2% (center 10 divisions); 5 μs and 10 μs linearity ±1% (center 10 division).

**External Sync Input**—Two loop-through high impedance, with ≥46 dB return loss in a 75Ω system. Inputs are slaved to A and B input or to A external sync input only.

**External Sync Input Requirements**—400 mV to 2 V composite video or 200 mV to 8 V composite sync.

**Field Selector**—Positive selection of Field 1 or Field 2 in the NTSC system. Positive selection of 1, 2, 3, 4, or 1 & 3, 2 & 4 in the PAL systems.

**Line Selector**—Dig: Selects lines 9 to 22 NTSC, line 9/322 to line 22/335 PAL, line 9/272 to line 22/285 PAL-M. Var: Approx line 20 of the selected field to line 4 of the next related field. 15 lines: Identical to Var, except 15 successive lines are displayed.

**Sync**—AFC horizontal frequency range is 15.75 kHz ±200 Hz. Maximum Jitter with Respect to Input Sync: 10 ns with 4 V RMS hum (30 ns with the addition of -36 dB white noise). Direct horizontal frequency up to ≤20 kHz. Maximum Jitter with Respect to Input Sync: 12 ns with 4 V RMS hum (90 ns with the addition of -36 dB white noise).

#### OUTPUTS

**Line Strobe**—TTL amplitude pulse. Pulse coincident with line or lines selected by VAR, 15 LINE or DIG modes of DISPLAY switch.

**Picture Monitor**—Output of incoming video with Line Strobe added. Output impedance is 75Ω. Output gain adjusted to unity with respect to A and B video input.

**Aux Video**—Output of incoming video. 75Ω output impedance. Gain adjustable to unity with respect to A and B video input.

#### OTHER CHARACTERISTICS

**RGB/YRGB Staircase Input**—12 V for 12.7 divisions deflection. RGB sweep length internally selected for 1/3 normal sweep. YRGB sweep length internally selected for 1/4 normal sweep length.

**Mains Voltage**—Ranges 100 V ac, 110 V ac, 120 V ac, 200 V ac, 220 V ac, 240 V ac ±10%. Frequency 48 Hz to 62 Hz, maximum power consumption 75 W. At factory, 1480, 1482 preset for 110 V ac. 1481, 1485 preset for 220 V ac.

#### CHARACTERISTICS (OPTION 01)

**10X Probe Channel**—Scale Factor: 1 V, 0.5 V, 0.2 V full screen with 10X attenuator probe. Gain Range: ±10%. Tilt: ≤5% on 50 Hz. Squarewave High Frequency Response: ±3%, 25 Hz to 5 MHz. Referenced to 50 kHz. Input Resistance 1 MΩ, ±2%, not including probe. Input RC Product: 20 μs, ±1%, not including probe. BNC connector accepts most Tektronix probes.

**10X Probe Calibrator**—Output voltage 1,000 V ±0.005 V or 0.995 V to 1.005 V.

#### SLOW SWEEP CHARACTERISTICS (OPTION 07)

**Duration**—4 to 12 s, variable with front panel control. Linearity—±5% of full-screen over the length of the sweep.

**Indicator**—Front panel indicator on when slow sweep is operating but sweep is not running.

**Triggering Signal**—APL change ≤10% to 90% (Bump or Bounce), front panel selectable for either + or - level change.

**Sensitivity**—400 mV to 2 V p-p composite video with APL change.

**Rate**—≥0.2 Hz, free-runs at rates <0.2 Hz or with no triggering signal.

# WAVEFORM MONITORS

Input—Internal or External

**50Hz/60Hz Squarewave Triggering**—Sensitivity: 400 mV p-p minimum to 3 V p-p maximum. Input Impedance: =10 kΩ ac coupled (Rear Panel loop-through connectors not return loss compensated.)

#### INCLUDED ACCESSORIES

Two BNC right angle adaptors (103-0031-00); One pair rackmount ext DWR Slides (351-0195-01); various external graticules (see matrix below); manual.

# VECTORSCOPES

R520A NTSC VECTORSCOPE

## R520A/R521A/R522A Vectorscopes

- Luminance Amplitude
- Chrominance Amplitude and Phase
- Precision Differential Phase and Gain

The Tektronix R520A Series vectorscopes include three basic instruments. These are the R520A for NTSC, the R521A for PAL, and the R522A for PAL-M.

### DISPLAYS

The vector display shows the relative phase and amplitude of the chrominance signal on polar coordinates. To help identify these coordinates, the graticule has points corresponding to the proper phase and amplitude of the primary and complementary colors: R (Red), B (Blue), G (Green), CY (Cyan), YL (Yellow), and MG (Magenta).

Any errors in the color encoding, video-tape recording, or transmission processes that change these phase and/or amplitude relationships cause color errors in the television picture. Polar coordinate displays, such as those obtained on the R520A, R521A, and R522A CRT, have proven to be the best method for displaying these errors.

The polar display permits measurement of hue in terms of relative phase of the chrominance signal with respect to the color burst. Amplitude is expressed in terms of the displacement from center (radial length) toward the color point which corresponds to 75% (or 100%) amplitude of the particular color being measured.

The outer boxes around the color points correspond to phase and amplitude error limits ( $\pm 10^\circ$ ,  $\pm 20\%$ ). For the R520A (NTSC) the inner boxes indicate  $\pm 2.5^\circ$  and 2.5 IRE units, and correspond to phase and amplitude error limits per EIA specification RS-189, amended for 7.5% setup. For the R521A (PAL), and R522A (PAL-M), the inner boxes indicate  $\pm 3^\circ$  phase angle and  $\pm 5\%$  amplitude.

An internally generated test circle, used with the vector graticule, verifies quadrature accuracy, horizontal to vertical gain balance, and gain calibration for chrominance signal

amplitude measurements. Two methods of measuring phase shifts are provided. You can accurately read large phase shifts from the parallax-free vector graticule. A precision calibrated phase shifter with a range of  $30^\circ$ , spread over 30 inches of dial length, is provided for measuring small phase shifts.

### CHARACTERISTICS

**Graticule**—Two separate graticules provide reference for vector and line sweep displays. The parallax-free vector graticule, or the luminance graticule, is automatically selected and edge-lighted concurrent with operating mode selection.

**Z-Axis Input**—The Z-Axis Input connector accepts external trace-brightening pulses for intensifying a portion of the display during the time of interest.

**Video Inputs**—Dual BNC input connectors for each channel permit 75  $\Omega$  loop-through operation with a return loss  $>48$  dB to 5 MHz (exceeds CCIR recommendation 567, Part D and D2). Amplitude range is 0.7 V to 1.4 V Video (sync tip to peak white).

### AC POWER

**Mains Voltage Range**—90 V ac to 136 V ac or 180 V ac to 272 V ac.

**Mains Frequency**—47 Hz to 63 Hz.

**Power Consumption**—95 W maximum at 115 V ac/60 Hz (Rear panel selector provides rapid accommodation to six line-voltage ranges. Factory set at 115 V ac for the R520A and R522A and 230 V ac for the R521A).

### ENVIRONMENTAL CHARACTERISTICS

**Operating Temperature Range**— $0^\circ\text{C}$  to  $+50^\circ\text{C}$  ambient.

## 650HR Color Monitor

- High Resolution Display Plus Capability for Critical Signal Analysis
- 0.25mm Triad Pitch High Resolution Trinitron® CRT
- Variable Aperture Correction
- Precise Color Tracking Over Full Signal Range
- Two Video Inputs with Differential (A-B) Capability
- Video Inputs Isolated from Ground for Hum Rejection
- Optional Parallel Component Inputs—Internally Selected Format
- NTSC, PAL and Multistandard Decoders Available
- Precise Decoders with Outputs to Provide Vector Display on External X-Y Monitor
- Unique Monochrome (White) Display of Decoded Blue Signal for Critical Analysis of Color Noise

The Tektronix 650HR Series color picture monitors are designed for exacting applications where picture quality and signal quality analysis are particularly important. The 650HR uses a Trinitron CRT with resolution capabilities which exceed the performance of encoded television signals. The decoders have sufficient chroma channel bandwidth to pass all of the information in standard signals.

The unique blue only mode feeds the decoded blue video signal to the red, green, and blue channels simultaneously. This produces a monochrome display with a high subjective sensitivity to chroma noise, allowing better analysis of video quality.

The chrominance channel may be manually switched to either the monochrome or color modes, or activated automatically by the presence of burst.

Circuits in the Tektronix 650HR Series are designed for color stability and consistency. Outputs are provided from the precision decoders and may be used to drive an X-Y monitor for a vector display. The regulated EHT supply is not affected by extreme changes in APL even when calibrated brightness, at peak white, is set at 30 fL. Raster size is held within 1%, while excellent clamping maintains a stable black level with a 0% to 100% range of APL.

## CHARACTERISTICS

**Input Signal Level**—0.5 V p-p minimum composite video 2 V p-p maximum. (Exceeds CCIR recommendations 567, Part D and D.2)

**Impedance**—Unterminated: High Z bridging inputs loop-through compensated for 75 Ω (not internally terminated). Return Loss: ≥ 46 dB to 5 MHz, power on or off, input in use or not.

**Maximum Safe Input**—Exceeds CCIR Recommendation 451-2 (± 5 V peak).

**Hum Rejection**—Hum is ≥ 50 dB down when 4 V maximum RMS common mode mains hum signal is applied to the monitor in floating ground mode.

**NTSC Luminance Channel**—Bandwidth (notch filter removed) ≈ 6 MHz. Subcarrier notch filter automatically removed when burst is not present and Mode switch is

in Auto position. Subcarrier notch filter removed when Mode switch is in Monochrome position. Dc Restoration back porch type; not affected by burst. Mains hum reduction due to dc restorer is < 6 dB. Amplitude Linearity: Within 2%.

**NTSC Chrominance Channel**—Demodulation Axis: R-Y, B-Y. Bandpass: 1.3 MHz equiband. Gain Range: Preset at 0 dB; adjustable from -6 dB to +10 dB.

**PAL Luminance Channel**—Bandwidth (notch filter removed) ≈ 6 MHz. Subcarrier notch filter can be removed by changing internal jumper. Subcarrier notch filter normally left in circuit.

**PAL Chrominance Channel**—Demodulation Axis: U, V. Bandpass: ≈ 1.2 MHz. Gain Range: Preset at 0 dB; adjustable from -6 dB to +10 dB.

**Residual Subcarrier Detection (On Applied Signal)**—Color of displayed picture will shift due to any residual subcarrier. This feature can be inhibited by a jumper on the decoder board.

**Chrominance/Luminance**—Timer Error: < 30 ns. Gain Error: < 3%.

**Delay**—Red to green to blue < 50 ns.

**Subcarrier Regeneration**—Phase Error: Within 1° with input burst variation of ± 10 Hz from subcarrier nominal burst frequency. With Temperature Variation: Within 5° with ambient temperature variation from 0° C to +50° C; with 1° for any +10° C increment within the range 0° C to +50° C. With Input Signal Variation: Within 1° with input signal variations of ± 3 dB from 1.0 V, within 3° with variation of burst/sync ratio of -6 dB to +10 dB. Breezeway Stability: ≤ .02° for burst timing errors including burst width variance (8 to 11 cycles), and breezeway variance ± 0.28 μs. Phase Error Due to Noise: Within 1° with RMS white noise at -24 dB (0 dB = 700 mV RMS).

## PICTURE

**Height**—184 mm (7.2 in).

**Width**—244 mm (9.6 in).

**Underscan**—≈ 20% reduction in both height and width.

**Aspect Ratio**—4.3.

**Deflection Linearity**—Vertical and Horizontal: 1% of picture height within a central area bounded by a circle whose diameter equals picture height, ± 2% of picture height outside of central area.

**Convergence Error**—< 1 mm within the central area. Outside of the central area, color separation (misconvergence) is < 2 mm.

**Unblinking**—All active picture elements are displayed. (Horizontal retrace is accomplished within 10 μs.)

**Color Temperature**—6500° K. Easily adjustable to other standards.

**Calibrated Contrast**—30 fL at peak white of standard 1 V signal.

**Calibrated Brightness**—Displayed black may be preset to a level appropriate for ambient conditions.

**EHT (Extremely High Tension)**—19 kV nominal, regulated. Load variations cause < 1% picture size variation. Monitor complies, as of date of manufacture, with applicable DHHS standards under Radiation Control for Health and Safety Act of 1968.

**Kinescope Protection**—Failure of horizontal or vertical scanning shuts off the EHT. Failure of HV Regulator circuit does not cause EHT to soar excessively. EHT supply is current limited.

**Heater Voltage**—Regulated dc.

## SYNC and TIMING

**Signal Range**—Composite sync 0.5 V p-p to 8 V p-p or composite video 0.5 V p-p to 2 V p-p.

**Impedance**—Unterminated: High Z bridging inputs loop-through compensated for 75 Ω (not internally terminated). Terminated: 75 Ω. Return Loss: ≥ 46 dB to 5 MHz with respect to 75 Ω.

# COLOR MONITORS

650HR

**Synchronization**—Stable subcarrier regeneration, limited by line sync performance. Line sync white noise immunity is 20 dB. Field sync white noise immunity is 20 dB. Field sync stable with tilt equal to 100% of sync amplitude in vertical blanking. Stable with 20 IRE mains hum.

**AFC (Two Loop AFC Type)**—Phase Corrector: Corrects for phase errors due to side pincushion correction and other effects within the monitor. Slow AFC: Displays timing errors of incoming sync, particularly, 60 Hz or 240 Hz timing errors. Bandwidth is ≈ 25 Hz. Fast AFC: Largely corrects for incoming sync errors, ≈ 2 kHz bandwidth.

**Scan Delay**—Horizontal Delay: ≈ 1/4 line; displays burst. Vertical Delay: Displays the vertical blanking interval of the input signal expanded ≈ 2.5 times unless underscan is activated. If the underscan button is depressed, vertical expand is inhibited.

## AC POWER

**Mains Voltage Range**—115V: Within 10% (104VAC to 126VAC). 230V: Within 10% (207VAC to 250VAC maximum). 650HR, 650HR-C are factory set for 115V. 651HR, 651HR-1, 655HR-C and 652HR-C are factory set for 230V.

**Crest Factor**—≥ 1.3.

**Mains Current**—1.5A RMS maximum at 115V, 60Hz. 0.75A maximum at 230V, 50Hz. Current is substantially higher during degaussing.

**Degaussing Surge Current**—5A RMS.

**Power Consumption**—150W maximum, 110W typical.

**Mains Frequency**—48Hz to 66Hz.

# COLOR MONITOR

## 656HR-1

**Color Sequencing from Field Identification Signals or Line Burst**

**Precision Decoding Allows Use of R-Y, B-Y Outputs for Vector Display Measurements**

**RGB Inputs with Vector Display Outputs**

**PAL/SECAM with Front Panel Control of Decoding Standard**

**Variable Aperture Correction**

**Vertical and Horizontal Delay Display Modes**

**Reduced Chrominance Line Crawl**

**Indicates Color Sequence Error**

**Rapid Retrace — Entire Picture Area is Displayed in Reduced Scan**

**Two Switchable Inputs Isolated from Ground for Hum Rejection**

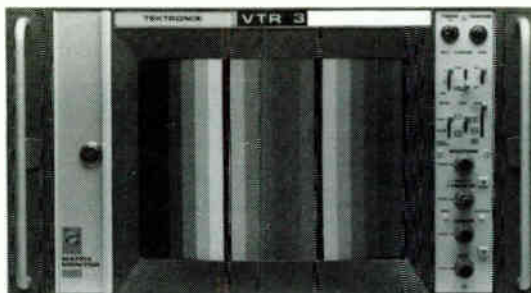

The Tektronix 656HR-1 SECAM color picture monitor is identical in function to the other 650HR Series monitors but is specifically designed for use in SECAM systems. It includes both PAL and SECAM decoders.

Color sequencing is front panel controlled by a three position mode switch. In the Field mode, field identification signals are used for color sequencing and a color display is enabled by the presence of detectable field identification signals. In the Line mode, line burst determines color sequence, and a color display is enabled whenever detectable SECAM subcarrier is present. Use of the Monochrome mode blanks the chrominance channel.

In the internally selectable Forced-Color mode, the very high limiting ratio of the chrominance channel lets you use the monitor to search for very small amounts of crosstalk or other unwanted signals. By displaying the chrominance portion of such signals on a brightened display, you can easily identify the source.

Two PROMs (Programmable Read Only Memories) are used in the monitor for generating accurate timing signals. Their use eliminates the need for many internal adjustments and possible drift related to the timing of internal signals. One of these PROMs is programmed with information corresponding to the lines containing subcarrier (including field identification lines) in 625/50 SECAM systems. The monitor then serves as a check on improper additions or deletions of lines that might possibly occur in improperly adjusted VTRs, processing amplifiers, and switchers.

Chrominance line crawl is greatly reduced by using separate acoustical delay lines; one for D'R and one for D'B. With front panel controls, you

656HR-1

can turn off luminance or chrominance, and examine each one separately. Brightness is automatically advanced for easier viewing when luminance is turned off for examination of chrominance. For purity checks, you can set up the equivalent of a flat field display by switching luminance off in a monochrome mode (chrominance off).

The monitor's chroma control has two operating modes. When the control is in, the chrominance is independent of subcarrier amplitude. When the control is out, the chrominance is proportional to subcarrier amplitude. In the first mode, the saturation will vary with incoming video level. In the latter mode, correct saturation will be maintained for varying signal levels. In either mode, both a preset (detent) position and a variable range are available. Switching between the two modes in the preset position provides an indication of abnormal chrominance or luminance amplitude.

### CHARACTERISTICS

#### SECAM PERFORMANCE-LUMINANCE CHANNEL

**Bandpass Without Chrominance Trap** — (Aperture Corrector set for 0 dB). Amplitude:  $\pm 0.5$  dB to 5 MHz. Aperture Corrector Maximum Range: 8 dB; doubled peaked at 2.5 MHz and 7 MHz;  $\leq 3$  dB between 4.0 MHz and 5 MHz.

**Chrominance Filter** — Subcarrier Rejection:  $>25$  dB at 4.250 MHz and 4.406 MHz,  $< -1$  dB at 5.5 MHz. NOTE: The chrominance filter is removed from the luminance channel whenever the display is monochrome.

**Pulse Distortion** —  $< 1\%$  tilt on 50 Hz squarewave.  $< 0.5\%$  tilt on 15 kHz squarewave.

**Dc Restoration** — Back porch type, not affected by burst. Mains hum reduction due to dc restorer is  $< 6$  dB.

**Amplitude Linearity** — Within 2%.

**Luminance Off Facility** — Displays chrominance only and automatically advances brightness.

#### SECAM PERFORMANCE-CHROMINANCE CHANNEL

**High Frequency De-emphasis** — Matching to Encoder High Frequency Pre-emphasis: Error  $\leq 0.5$  dB over the range 3.9 MHz to 4.75 MHz;  $< 3$  dB at 2.85.

**Drift (Center Frequency)** — Within  $\pm 20$  kHz.

**Luminance Rejection** —  $> 46$  dB at 15 kHz.

**Limiting Ratio** —  $> 60$  dB.

**Ultrasonic Delay Line Error** —  $< 30$  ns.

**Crosstalk at Input to Discriminators** — Between Direct and Delayed Chrominance Signals: Alternate line crawl on display is minimized through the use of separate delay lines for the D'R and D'B chrominance signals.

**Discriminator Linearity** — Overall: Within  $\pm 1\%$ . Incremental: Within 1%.

**Demodulator Center Frequency** — Clamped to crystal reference stabilized within  $\pm 0.250$  kHz.

**Chrominance Sequence and Color Enable** — Chrominance sequence and enable are statistically averaged with hysteresis for best performance under poor signal-to-noise conditions. Field Mode: Based upon field identification signals. Chrominance Amplitude: Disable when chrominance is more than 12 dB low, may be internally selected. Line Mode: normally based upon line burst with no chrominance amplitude disable. An internal jumper provides chrominance amplitude disable if required.

**Chrominance Unblinking** — Programmed internally according to 625 line 50 Hz SECAM standards. Field identification signals are displayed in vertical scan delay modes.

**Saturation** — Selectable to treat subcarrier as FM signal or to vary the saturation with incoming chrominance level. Independent of Subcarrier Amplitude: Gain Error  $< 3\%$ . Dependent on Subcarrier Amplitude: Tracking error  $< 5\%$  for signals within  $\pm 3$  dB to  $-6$  dB of normal amplitude. Chroma Control Separately Adjustable:  $\pm 6$  dB.

**Cross Talk** — Between R-Y and B-Y  $> 40$  dB attenuation.

**Chrominance/Luminance Time Error** —  $< 60$  ns with properly adjusted bell filter and low frequency de-emphasis.

**Sequence Error Indicator** — When the front panel red light indicates that the incoming SECAM signal has a chrominance sequence opposite to that indicated by an externally applied 7.8 kHz signal. Also when the monitor is used in the Line mode the light will indicate when the field identification signals are reversed with respect to the Chrominance Sequence present during the active picture.

### VECTORSCOPE OUTPUTS

**Calibrated Modes (Dots in Boxes)** — Selected by front-panel control for either 75% color bars or 25% color bars (SECAM and RGB only). Vector locations are within  $\pm 2\%$  of vector magnitude.

**Vectorscope Drive Capability** — Suitable to drive 10 ft of 75  $\Omega$  coaxial cable (unterminated) to X-Y display.

**Required X-Y Display Deflection Sensitivity** — 0.05 V/cm on both X axis and Y axis.

**Required X-Y Display Input Resistance** —  $> 100$  k $\Omega$ .

**RGB Vector Display** — R, G, and B input signals are matrixed to form R-Y and B-Y signals which are switched to the rear-panel vector output connectors when the RGB inputs are selected.

**RGB Matrix Error** — R-Y and B-Y relative output signal amplitudes are within  $\pm 2\%$  of desired values when equal R, G, and B signals are supplied.

**RGB Centering** — Black level is clamped to within  $\pm 9$  mV which corresponds to  $\pm 1$  mm in the 75% vector display.

**Other Inputs and Outputs** — 7.8 kHz input, 7.8 kHz output, and field 1 pulse output.

# OSCILLOSCOPES

2230

## 2230/2221/2220

The 2230 Option 10, 2221 Option 10 and 2220 Option 10 comply with IEEE Standard 488-1978, and use Tektronix *Standard Codes and Formats*. The 2230 Option 12, 2221 Option 12 and 2220 Option 12 feature Standard RS-232C and use Tektronix *Standard Codes and Formats*.

- 100MHz Digital Storage and Nonstorage (2230)
- 60MHz Digital Storage and Nonstorage (2220, 2221)
- 100ns Glitch Capture at any speed
- Cursors for Time and Voltage Measurements (2230, 2221)
- Point Selectable Pre/Posttriggering (2230)
- Pre/Mid/Post Triggering (2221, 2220)
- 4K Record Length
- Post Acquisition Expansion, Compression, and Positioning
- GPIB or RS-232C Optional
- 26K Battery-Backed Save Reference Memory (2230 Option 10 or 12)

### TYPICAL APPLICATIONS

Medical Equipment Servicing  
Digital Design and Troubleshooting  
Power Supply Design and Troubleshooting  
Electromechanical  
Stress/Vibration Analysis

The 2230, 2221 and 2220 are the answer for general and special purpose storage needs. These high performance portable scopes have storage and nonstorage bandwidths of 100 MHz (2230) and 60 MHz (2220, 2221).

All scopes have been designed with many features which enhance their usefulness in your applications. The 2230 and 2221 offer cursors and CRT readout enabling you to measure time or voltage differences easily and accurately. The Multiple Save Reference memories (2230) allow you to view both stored and current waveform acquisitions onscreen simultaneously. Weighted signal averaging can be used to remove random

noise from a signal and improve measurement accuracy.

Peak detection makes 100 ns glitch capture possible at any sweep speed. This mode digitizes and stores, in acquisition memory as a data pair, the minimum and maximum levels of the input signal. The resulting display can be used to catch glitches, as narrow as 100 ns, view frequency drift and amplitude modulation, or detect aliasing.

Unlimited storage time; expandable, compressible, repositionable stored traces; save reference memory; pre/post trigger viewing; roll mode; standard X-Y plotter output; and optional interfaces make the 2230, 2221 and 2220 the most sensible digital storage oscilloscopes to own.

### Option 10 GPIB Interface Option 12 RS-232C Interface

GPIB (Option 10) and RS-232C (Option 12) interfaces are available for the 2230, 2221 and 2220. Either interface can transmit and receive waveform data. Most front panel settings can be queried and any functions can be controlled via the interface.

2230 Option 10 or 12 interfaces also allow messages or computed results to be displayed on screen, and include a battery-backed reference memory (minimum lifetime 3 years) for storage of up to 26 additional waveform sets.

#### Option 10 GPIB Interface

The Option 10 GPIB interface conforms to IEEE Standard 488-1978. It is fully compatible with *Tektronix Standard Codes and Formats*.

#### Option 12 RS-232C Interface

The Option 12 RS-232C interface has both DCE and DTE connectors. It is compatible with an extension of *Tektronix Standard Codes and Formats*.

Option 12 for the 2230 also includes 26K of battery-backed reference memory for the storage of up to 26 waveform sets.

#### GPIB/RS-232C Printers and Plotters

A 2230, 2221 or 2220 equipped with either Option 10 or Option 12 interface is fully compatible with any X-Y plotter that uses Hewlett-Packard Graphics Language (HPGL). The GPIB interface also supports the HP ThinkJet 2225A printer. The RS-232C interface also supports any Epson FX-Series format printer or the HP ThinkJet 2225D printer. Plotter output is directed to the interface if its control switches are set for the appropriate plotter or printer. Otherwise, plotting is directed to the X-Y outputs.

#### IEEE Standard 488-1978 Interface Function Subsets Implemented — SHI, AHI, T6, L3, SRI, RL2, PPO, DCI, DTO, CO.

#### ORDERING INFORMATION

2230 100MHz Dual Time Base Digital Storage Oscilloscope . . . . . \$4995.00  
Includes: Two P6121 10X voltage probes; front panel cover (200-2520-00); accessory pouch (016-0677-02); operator manual (070-4998-00); user's reference card (070-5370-00).

2221 60MHz Single Time Base Digital Storage Oscilloscope . . . . . \$3995.00  
Includes: Two P6121 10X voltage probes; front panel cover (200-2520-00); accessory pouch (016-0677-02); operator manual (070-5301-01); user reference guide (070-6532-00).

2220 60MHz Single Time Base Digital Storage Oscilloscope . . . . . \$2995.00  
Includes: Two P6122 10X voltage probes; front panel cover (200-2520-00); accessory pouch (016-0677-02); operator manual (070-5301-00); user's reference card (070-5681-00).

#### Options

Option 10—(2230) GPIB IEEE-488 Interface . . . . . \$750.00  
Includes: 26K of battery-backed reference memory.

## 2246/2245

- Bright, Crisp Display with High Writing Rate
- Four Independent Channels
- 100MHz Bandwidth with 2ns/Div Time Base
- On-Screen Scale Factor Readouts
- Flexible Triggering  
Auto Level and Auto HF, LF, Noise Reject,  
TV Line and TV Field
- Delayed Sweep
- Control Status Lights
- 2% Vertical and Horizontal Accuracy
- 2mV/Div Vertical Sensitivity at Full Bandwidth
- Specially Designed Probe
- Simple, Rugged Construction
- Labeled Volts Cursors with Ground-Referenced Readings and On-Screen Readouts
- Hands-Off Voltmeter Measurements  
+ Peak and -Peak  
Peak-to-Peak  
Gated Peaks  
Gated Peak-to-Peak  
DC
- SmartCursors™ Track Voltmeter Measurements
- SmartCursors Visually Indicate Trigger Level and Ground
- Time Measurements with Cursors or Alternate Delayed Sweep  $\Delta$  Time

### TYPICAL APPLICATIONS

Logic Design and Repair  
Communications  
Power Supply Design

### Higher Performance, Lower Price

The performance/price ratio for portable oscilloscopes has been substantially upgraded. No other portable scope can offer the range of productivity enhancing features and performance characteristics at a comparably low price than the Tektronix NEW 2245 and 2246.

### Features That Promote Productivity

Four independent channels speed troubleshooting and design tasks by allowing simultaneous observation of multiple test points. Front panel set-ups are simplified by pushbutton activated functions and on-screen scale factor readouts. And with buttons that light up, settings can be verified at a glance.

### More Triggering Flexibility

Hands-free triggering, made possible by the Auto-level mode, automatically places a stable display of almost any waveform on screen. The LF, HF and Noise Reject modes, together with a 10-to-1 holdoff range, deliver stable triggering on complex waveforms. The built-in TV Line and TV Field triggering capability extends measurements to most video-related applications.

### Performance Plus

The NEW 2245 and 2246 oscilloscopes have low noise vertical systems that produce sharp, bright traces. Their 2 ns time base and 100 MHz bandwidth bring out the details on high speed signals and render measurements with good timing resolution.

Low level signal measurements are easily managed by the 2 mV/div vertical sensitivity, even at full bandwidth, and by trigger sensitivity that extends to 0.25 div at 50 MHz (0.5 div at 100 MHz).

### Voltage Measurements With The Push of a Button

A pushbutton activated measurement system on the 2246 enhances productivity even more. This scope turns out virtually hands-off measurements quickly of +peak, -peak, peak-to-peak, dc, and gated volts, all with convenient on-screen readout of values.

If more visual indication is desired, the unique cursor system can provide feedback showing

exactly where on the waveform an automatic measurement is being made. These feedback cursors, when selected, even show ground and trigger level locations.

There is also the ability to use cursors in the conventional manual mode for making point-to-point time and voltage measurements, including time interval measurements between a point on the reference waveform and a point on any of four other displayed waveforms.

### 2245 100 MHz Oscilloscope

Includes: Two 10X, 1.3 m probes with accessories (P6109); clear accessories pouch with ziploc fastener (016-0537-00); blue plastic CRT filter (337-2775-00); 2A, 250 V fuse (159-0023-00); operator manual (070-6083-00); user reference guide (070-6082-00). . . . . \$1775.00

**2246 100 MHz Oscilloscope with Voltmeter,  $\Delta$ Time, and SmartCursors™ . . . . . \$2400.00**  
Includes: Same as 2245.

### OPTIONS

- Option 02 — Protective front panel cover and accessory pouch. . . . . \$50.00
- Option 1C — C-5C Option 02 Camera. . . . . \$465.00
- Option 1K — K212 Portable Instrument Card. . . \$330.00
- Option 22 — Two additional P6109 probes. . . \$116.00
- Option A4 — Two 1X/10X P6062B, 6 ft. probes. \$350.00

## 2465A/2445A

### Option 05 Oscilloscopes

- All of the High-Performance Characteristics of Standard 2465A/2445A Oscilloscopes, plus Video Waveform Analysis Capabilities
- Auto Setup
- Save and Recall Setups
- Setup Sequencing
- 1ns/2.3ns Rise Time
- 350MHz/150MHz Bandwidth
- On-Screen Trigger Level Readout
- Volts and Time Cursors with On-Screen Readout
- Cursors After Delay
- Switchable 1M ohm and 50 ohm Inputs
- 20 ps Time Interval Resolution
- 2mV/Div Vertical Sensitivity at 350MHz/150MHz
- On-Screen Scale-Factor Readout
- Lightweight and Rugged
- 500MHz/250MHz Trigger Bandwidth
- Four Independent Channels
- 500 ps/1 ns per Div Time Base
- Selectable System-M and Non-system-M Protocols
- Selectable Triggering on any Line within a Field, with Line-Number Readout
- Compatible with Composite Video Having 13.1KHz to 77KHz Line Rates
- TV Blanking-Level Clamp (Back-Porch)
- Optimized Vertical Response Comparable to High Performance TV Waveform Monitors

Video measurement capabilities extend the 2465A/2445A's power and versatility to meet the challenges in broadcast and cable television, graphics displays and raster scan systems. The Video Waveform Measurement System (Option 05) makes quality measurements convenient during every stage of a product's life cycle: design, production, system calibration, quality assurance, maintenance and service.

With CRT readout of the line number and field selected for triggering, an operator knows precisely what the display represents. Any line can be selected from Field 1, Field 2, or Field 1 alternating with Field 2. The fourth video trigger selection is Lines, which superimposes all the lines in both fields. Systems with up to 1280 lines can be accommodated.

The back-porch clamp locks the video black level to a fixed point, so the display is stable and clean, even when the composite video contains low frequency hum or when the average picture level changes with AC coupling. Controls are provided for a wide variety of system protocols.

The set of characteristics is the same as specified for standard 2465A/2445A oscilloscopes and includes the following additions:

2465A

### VERTICAL SYSTEM (CHANNEL 1 AND CHANNEL 2)

**Frequency Response** — Applicable for Volt/Div settings between 5 mV and 0.2 V with Var Volt/Div control in calibrated detent and using a 5 div, 50 kHz reference signal from a 50  $\Omega$  or 75  $\Omega$  system.

Range	With Full BW	With BW Limiting
50 kHz to 5 MHz	$\pm 1\%$	+1%, -4%
> 5 MHz to 10 MHz	+1%, -2%	"
> 10 MHz to 30 MHz	+2%, -3%	"
> 30 MHz	"	"

\* Same as basic instrument.

**Squarewave Flatness** — 1% p-p for both 60 Hz and 15 kHz squarewaves, from a 50  $\Omega$  or 75  $\Omega$  system using a 1.0 V input with a 50 mV/Div setting and using a 0.1 V input at 20 mV/Div setting. 1.5% p-p using a 0.1 V input with 5 mV/Div and 10 mV/Div settings. Exclude first 50 ns following step transition. For signals with rise times  $\leq 10$  ns, add 2% p-p between 155 ns and 165 ns after step transition.

**Television Blanking-Level Clamp (Back-Porch) 60 Hz Rejection (Channel 2 Only)** —  $\geq 18$  dB at 60 Hz; with calibrated Volt/Div settings between 5 mV and 0.2 V, and a 6 div reference signal.

**Television Blanking-Level Clamp (Back-Porch) Reference** — Within 1.0 div of ground reference.

### TRIGGERING

**Sync Separation** — Stable sync separation from sync-positive or sync-negative composite video on systems with 525 to 1280 lines/frame, 50 Hz or 60 Hz field rate, interlaced or noninterlaced scan.

**Trigger Modes** — LINES, FLD 1, FLD 2, and ALT (FLD 1-FLD 2).

**Input Signal Amplitude for Stable Triggering** — Channel 1 and Channel 2: 1.0 div for composite video and 0.3 div for composite sync signals (dc + peak video-signal amplitude must be within 18 div of input ground reference).

2465A 300MHz Oscilloscope . . . . . \$5550.00  
2445A 150MHz Oscilloscope . . . . . 3590.00

Option 05—TV Waveform Measurement System . . . . . \$1050.00

### Other Instrument Options

Option 1R—Configured for Standard Rackmounting. . . . . \$320.00  
Option 10— GPIB . . . . . 900.00  
Option 11—Rear Panel Probe-Power Connectors (2465 Only) . . . . . 165.00  
Option 22—Two Additional P6131 Probes. . . . . 265.00

### Optional Accessories

**Rackmount Conversion Kit**—(Not compatible with Option 01.) Order 016-0691-02. . . . . POR  
**Probe Power Extender Cable for Rackmount 2445A/2465A Option 11**—Order 020-0104-00 . . . \$490.00

T-7000A

## TCG-550 SMPTE/EBU Time Code Generator

- Low cost opens up many new applications • Rugged construction
- Operates on four standards. Drop frame, 24, 25, and 30 frames per second • Color framing. Operates with both NTSC and PAL color field sequences...necessary for work requiring great precision such as animation • Auto preset to 23:58:30:00. Accommodates 1 1/2 minute pre-roll • "Lock" and "Line" indicator lights. Lets you know if you're properly sync'd to video signal or powerline • Large, bright display. LED's .6"/1.5cm high are readable at a glance • Microprocessor-design. Fewer parts; lower operating temperature; greater reliability
- Low power consumption. The TCG-550 draws only 4W from an AC source and 3W from 7 1/2-16VDC source . . . . . \$995.00

## TCR-660 SMPTE/EBU Time Code Reader

- Low cost opens up many new applications • Rugged construction for long, trouble free life • Operates on four standards. Drop frame, 24, 25 and 30 frames per second • Indicates color framed time code. Operates with both NTSC and PAL color field sequences...necessary for work requiring great precision such as animation • Time or user data display is selected from front panel • Front panel and remote Run/Hold lets you freeze a reading while the code count continues • Convenient operating range of .1 to 10 times play speed • Error light indicates absence of code • Large, bright display. LEDs .6"/1.5cm high are readable at a glance • Microprocessor design. Fewer parts; lower operating temperature; greater reliability • Low power consumption. Draws only 4W from AC source and 3W from 7 1/2-16VDC source . . . . . \$995.00

## T-5010 SMPTE/EBU Master Time Code Generator

- Generates SMPTE (drop and non-drop frame), EBU and 24 frames per second time code • 4 field NTSC and 8 field PAL color framing sequences • Jam sync and continuous jam operation featuring indicators for received time code error and received time code synchronous. All jam operations are held pending until received time code errors clear • Keyboard entry of time and user bits • High resolution 16 x 16 dot character generator. Offers boxed or uniquely bordered characters, reverse character video, continuously variable character position, frames suppression switch and two isolated video outputs • Time and user data displayed together or separately in video • Parallel input/output of time/user data • Two isolated 600 ohm time code outputs • Large, bright .8" high display with intensity adjustable to match your control room lighting • Microprocessor design and extensive use of NMOS large scale integrated circuits. Fewer parts and low operating temperature for greater reliability. 19" rackmount only 3.5" high • Versatility. Combination of function and size makes the T-5010 ideal for VTR room and mobile applications . . . . . \$2595.00

## T-6010 SMPTE/EBU High Speed Time Code Reader

- Full compatibility with any source of SMPTE/EBU time code • Drop frame indicates 25 or 30 frames per second modes • Reads 1/10 to 80 times play speed. Accommodates precise edit choices • Wide input level range accepts signal from any professional equipment source • Time or user data display is selectable from front panel. Provides time code for edit selection and user data for further identification or control purposes • High resolution 16 x 16 dot character generator. Offers boxed or uniquely bordered characters, reverse character video, two isolated video outputs, continuously variable character position, and frames suppression switch • Regenerated 600 ohm +11dBm time code output • Time and user data displayed together or separately in video • Remote and front panel Display Run/Hold control • Parallel output of time or user data • Indicates color framing in NTSC and PAL for precision editing jobs, such as animation where the odd/even color framing sequence is significant • Forward/Reverse indicator. Tells you the direction in which the tape is being read • Error indicator shows that you're not reading good code, and in the event of an error, the display will freeze on the last valid reading • Decoding delay compensation • Large .8" (2cm) high, bright LED display with intensity adjustable to match your control room lighting • Microprocessor design. Fewer parts for greater reliability. 19"/48.3cm rackmounting only 1 3/4"/4.5cm high. The low operating temperature means T-6010 can be racked immediately above or below other equipment • Versatility. Combination of size and function makes the T-6010 ideal for VTR room and mobile applications . . . . . \$2295.00

## T-7000A SMPTE/EBU Time Code Generator/Reader

- Self-powered, it weighs only ounces • This pocket calculator size time code generator/reader operates up to 8 hours on its internal rechargeable power supply; another 18 to 30 hours from the reserve supply in the book-size carrying case • It offers direct keyboard entry of time and user bits; standard 600 ohm +11dBm output; jam-sync with built-in reader; color framing; all 3 standards (drop frame 30 and 25 frames per second) as well as remote start/stop capability • High intensity display readable in direct sunlight without using the sun shield . . . . . \$1295.00

### 7932 12 x 3 AV Routing Switcher

The 7932 is a modular system that uses 4 in 1 out video cards, and 4 in 1 out audio cards. The audio and video output amplifiers are also separate plug-in cards; therefore, a system can be expanded from 4 x 1 to 4 x 2, 8 x 1, 8 x 3 etc., to a maximum of 12 x 3 in one chassis. For economy, two other chassis are available wired 12 x 1 and 12 x 2 which can be used when it is known that expansion will not be needed.

<b>7932-B1</b> (Remote control version)	
12 x 1 . . . . .	\$2,415.00
12 x 2 . . . . .	3,885.00
12 x 3 . . . . .	5,300.00

Note: Above prices include Switchcraft pushbutton panels with 50' cables.

<b>7932-B2</b> (self contained version)	
12 x 1 . . . . .	\$2,350.00
12 x 2 . . . . .	3,750.00
12 x 3 . . . . .	5,070.00

Note: Above prices include Switchcraft pushbuttons on front panel.

7932

7934

### 7934 AV Routing Switcher

- Remote controlled
- Crosspoints and latching CMOS integrated circuits provide energy efficient design
- Unlimited control versatility and computer interface with programmable switching
- < 0.1 μs switching time, 50mV max. instantaneous video change
- V.I. switching
- Stereo audio switching plus auxiliary. (Can be used for tally)
- Breakaway audio available
- Hi level tally available
- 20 x 10 standard, 400 x 400 possible
- Input sync adders optional
- Video DC restorers optional
- Accurate color timing
- Complete accessibility through modular construction
- All boards removable/insertable with power on

3713

### 3713 Stereo/Audio Demodulator

The 3713 is a comprehensive, precision testing instrument for checking the video quality of the television broadcast signal. It has its own built-in tester for self checking calibration.

<b>3713-A1</b> VHF—5mV sensitivity . . . . .	\$11,990.00
<b>3713-A2</b> UHF—5mV sensitivity . . . . .	12,490.00

### 4500 Demodulator

The 4500 accepts the broadcast signal and converts it to base band without distorting the original picture quality. It houses a plug-in VHF front end module that is selected and ordered separately for the particular VHF channel required. This VHF module is Telemet type D-xx-A1, where xx denotes the VHF channel number (e.g. D-02-A1 for Channel 2). It contains a crystal-controlled oscillator and FET mixer. Also a 2-stage AGC controlled VHF amplifier, using silicon insulated-gate field effect transistors.

<b>4500-B1</b> VHF Demodulator (off-air) . . . . .	\$2,215.00
<b>D-xx-A1</b> VHF plug-in (channels 2-13). . . . .	.710.00

4500-B1

### 4501 Broadcast Demodulator

The 4501 is for use in the measurement of the characteristics of broadcast television signals, including chrominance-luminance relative gain and delay, K rating, burst amplitude and modulation depth, differential phase and gain, intercarrier frequency stability (using an external counter) and other distortions.

<b>4501-B1</b> VHF—5mV sensitivity . . . . .	\$6,600.00
<b>4501-B2</b> UHF—5mV sensitivity . . . . .	.6,900.00

4501

# VIDEO BROADCAST TEST EQUIPMENT

## 4503 Demodulator Tester

The 4503 provides a fast sure method of determining on-going frequency response of a broadcast TV demodulator.

4503-B1 VHF . . . . . \$ 880.00

4503-B2 UHF . . . . . 1015.00

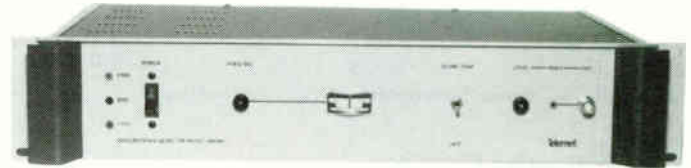

4503

## 4504-B1 Synchronous Detector

The 4504-B1 is designed to measure transmitter parameters, especially the incidental phase modulation of the visual carrier. The 4504-B1 can be used with the 4501 broadcast test demodulator and other suitable test modulators.

4504-B1 . . . . . \$2475.00

4504-B1

## 3705-A1 Envelope Delay Measurement Set

The 3705-A1 measures envelope delay over a wide frequency range. It is expressly designed for measuring the envelope delay incurred in equipment used in the transmission and reception of color television signals.

The 3705-A1 uses the split-frequency method proposed by Nyquist and Brand: a relatively low frequency, 20kHz, called a split-frequency amplitude—modulates a video or RF test frequency and the modulated test signal is applied to the equipment "under test". The split-frequency is demodulated from the output of the equipment "under test" and compared in phase with the split-frequency modulation.

3705-A1 . . . . . \$8415.00

3705-A1

## 3706-A1 Sideband Analyzer

The 3706-A1 by direct display permits thorough examination of the entire sideband response of television transmitters and sideband filters. It can also be used for the examination, evaluation, and adjustments of video circuits. Spurious emissions, low level sidebands, and frequency deviations are accurately pin pointed with the use of 7 crystal markers whose frequencies are of the most interest in a television transmitter's VSB passband. Discrete frequency marking is augmented by a 1MHz crystal comb frequency marker which provides markers at 1MHz intervals across the swept band on display.

3706-A1 Includes VHF channel element (3708-A) . . . . . \$8250.00

3706-A1

## 6910-A1 Audio DA System

The 6910-A1 is designed for distribution of audio signals in AM, FM and TV systems. The performance characteristics of the 6910-A1 are in keeping with the high standards of modern audio equipment.

Flexibility as to impedance, and expandability as to the number of single and dual channels available should fill all input and distribution requirements.

- 6910-A1 Audio DA system consisting of:
- 6001-A1 Frame . . . . . \$ 550.00
- 6101-A1 Power Supply . . . . . 550.00
- 6201-A2 Audio distribution amplifier with terminal board assembly . . . . . 500.00
- 4145-A1 Extender . . . . . 80.00
- 7300-B1 Audio Monitor . . . . . 1140.00

# CASES

## Telepak™ Cases

- Non-slip shoulder strap pad
- Adjustable shoulder strap
- Velcro secured microphone straps
- Adjustable, quick release hand strap
- Washable white balance flap
- Cable restraint loops for protecting connectors and fittings
- Velcro straps for cable routing and control
- Quick out cinch straps for easy removal of VCR
- Velcro enclosure pockets for carrying production accessories
- Bad weather hood surrounding the VCR panel
- Shock absorbing, cross-linked polyethylene foam
- Rust-proof slides
- Water repellent, 100% nylon
- Vinyl white card
- Web nylon for straps and loops (tensile strength 6,000 lbs.)
- Magic grip, non-slip shoulder pad
- Woven, nylon hook and napped looped Velcro
- Accessory compartments integrally manufactured as part of the case

Telepak carrying cases are custom-designed for portable recorders of every major manufacturer.

# MONITOR PROMPTING SYSTEMS

Telescriptor

Monitor Prompter

MPS

## The Telecuc

The compact, portable Telecuc transports prompting scripts and graphics with equal facility. To facilitate script prompting continuity and for remote location operation, 8 1/2" x 11" sheets of paper should be taped together.

## The Telescriptor

The Telescriptor transports prompting scripts and graphics via a white fiberglass belt with equal facility. Telescriptor prompting only requires that 8 1/2" x 11" sheets of paper be placed singly on the transport's belt. Over and under lapping and immediate editing by exchanging sheets is the norm.

## The "Presidential" System

### 2 Monitor Prompting System (MPS) for Public Speaking

- Telecuc with hand control and 25' cable
- Vidicon camera with mounting plate int. 2-1, 12.5mm f/1.8 1" format lens
- 2 17" monitor prompters
- 4 coax cables 50', 25', 10', 5'
- 2 mirror views for public speaking, housing for monitor prompter, panels, adj. bstr. holder and bstr.
- Workstation monitor

**Presidential System . . . . . \$5690.00**  
With C-64 (Commodore) Program . . . . . **4330.00**

#### Optional Equipment

- Video Blanking Control** 2 position or 4 position . . . . . **\$75.00-\$125.00**
- Contrast Enhancer** provides enhancement plus Video Rev. (white/black/shades of gray)
- Lightweight Carrying Cases** Foam lined, handles, latches, 2" wide straps. Fiberglass covered plywood . . . . . **\$255.00**
- 23" Monitors, 1000L** For placement in key areas for walk-about type speaking or group viewing . . . . . **\$950.00**

## 1 and 2 Monitor Prompting Systems

### Product Selections

## Video Paks

• Super-tough 1000 denier Cordura nylon • Enbazote padding, closed cell, cross-linked for the best shock absorbency possible • Crucial seams double stitched • Corners stitched four times • Carry strap of 3000 lb.-test nylon • Welded, brass-plated "D" rings • Non-slip pad sewn to shoulder pad • High-quality Velcro • Self-repairing zipper • Cordura waterproofed with Tenbalock—exceeds 40 psi—the U.S. standard for waterproofness • Compact

V1

### V1 Video Pak

• 11" x 6 1/2" x 5" • Weighs 1 lb. • For new JVC GR-C7 and GR-C9, Sony handcam and other small cameras

V1 ..... \$110.00

V8

### V8 Video Pak

• 13 1/2" x 8 1/2" x 6" • Weighs 1 lb. 7 oz. • Holds all 8mm camcorders

V8 ..... \$110.00

VP

### VP Video Pak

• 15 1/2" x 9" x 5 1/2" • Holds the new Matsushita built VHS camcorders: Panasonic, Chinon, GE, Curtis Mathes

VP ..... \$100.00

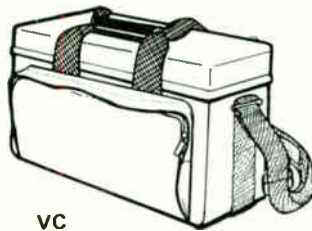

VH

### VH Video Pak

• 16 1/2" x 10 1/2" x 7" • Holds the Hitachi, RCA, Pentax, Minolta, VHS camcorder and extra batteries, tapes and recharger

VH ..... \$110.00

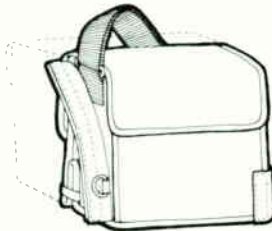

VC

### VC Video Pak

• 17" x 12" x 10" • Holds all cameras from amateur through light industrial • Four foam pads are velcro attached to a mid-divider for easily adapting the case for different cameras and accessories • Large outside pocket holds cables and connectors

VC ..... \$150.00

V212

### V212 Video Pak

• 11" x 10 1/2" x 4 1/2", expands to 9" • Weighs 1 lb. 9 oz. • Outfit bag holds newest Matsushita built and JVC VCRs with divider for extra battery or microphone or Hitachi built and older Matsushita VCRs • Front pocket expands to hold all smaller cameras and NiCad batteries, microphones or tapes • Flattens to as small as 1" when camera is removed • 1 1/2" longer version of V212 to hold Panasonic PK958 camera or equivalent

V212 ..... \$150.00

V212 1 1/2" Longer version ..... 175.00

VRPC

### VRPC Video Pak

• 14" x 16" x 4" • Weighs 1 lb. 15 oz. • Holds all VCPs and small VCRs for rental • Large front pocket holds at least 4 cassettes

VRPC ..... \$90.00

### V842 Video Pak

• 8 1/2" x 10 1/2" x 3 1/4" • Weighs 1 lb. 2 oz. • Form Fit case for newest generation Matsushita built 4 head VCRs • Front pocket holds spare batteries, tapes or NiCads

V842 ..... \$115.00

### V843 Video Pak

• 11" x 10 1/2" x 3 1/2" • Weighs 1 lb. 3 oz. • Form Fit case for Hitachi built and 2 head Matsushita built VCRs • Front pocket holds spare batteries, tapes or NiCads

V843 ..... \$115.00

### V844 Video Pak

• 9" x 10" x 2 3/4" • Weighs 1 lb. 3 oz. • Form fit case for the latest JVC 4 head VCRs • Front pocket holds spare batteries, tapes or NiCads

V844 ..... \$115.00

### V-Ski Backpack

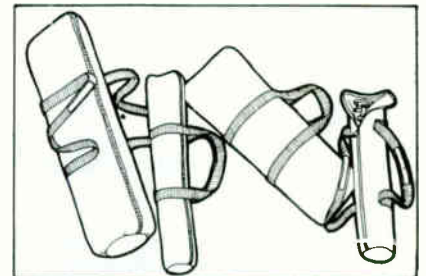

• 16 1/2" x 5" x 10 3/4" • Backpack for carrying all makes of camcorders • Padded inner bag V1 size, removes to hold full size camcorders in outer padded bag

V-Ski ..... \$150.00

### VTC Video Thermal Cover

• Insulated camcorder cover allows camcorder to function in much colder temperatures (below 32°) • Comes in nine separate models to fit specific makes

VTC ..... \$100.00

T488, T385, T388, T325

### Tri-Paks

The Tri-Pak is a professional tripod bag—to carry your light stands, umbrellas and tripods on location.

T 7010 70" x 10" dia. 2 lbs. 7 1/2 oz. . \$84.00

# SPECIAL EFFECTS EQUIPMENT

## FOG-MASTER™ FM-1/FR-1

The choice is yours: fog, smoke, or haze. The FOG-MASTER FM-1 and FR-1 are compact and lightweight, yet still produce dense, easily controlled, easily dissipated fog.

### FR-1 FOG-MASTER Remote

The FR-1 features a dismountable steel head that can be placed wherever you need it. With design and construction features making it virtually indestructible, this unit has become a favorite for remote operations.

• Weight: 16 lbs. • Dimensions: 9"H x 8 1/2"W x 12"L • Power: 115VAC • Current: 6A • Heat Coil: 700W  
FR-1 .....\$600.00

### FM-1 FOG-MASTER Manual

The FM-1 features manual operation capable of brief fogging cycles after heat-up, away from electrical power

• Weight: 7 lbs. • Dimensions: 12"H x 3"W x 15"L • Power: 115VAC • Current: 6A • Heat Coil: 700W  
FM-1 .....\$140.00

### Accessories

4-channel fog control box .....ea./\$250.00  
2-channel fog control box .....ea./130.00

## Aquafog™

A safe non-flammable fogging agent which produces dense, cool, odorless and self-dissipating clouds. In addition to the regular spice scent, Aquafog can be scented with mint, citrus, musk, rose, popcorn and pizza.

Aquafog Gallons (8 hrs. continuous fogging) .....\$48.00  
Aquafog Aerosol (20-30 minutes fogging) for Fog-Master FM-1 .....9.00

## Cobweb System T-3

• Safe, flexible blades, powerful but harmless • Lightweight—weighs less than 1 lb. • Portable—most versatile with a cordless drill, designed to fit any drill  
T-3 .....\$100.00

### Cobweb Liquid

# LIGHTING CONTROL CONSOLES

## Galaxy Series 2 Scene Preset Controller

- Five standard systems: 12, 18, 24, 30, or 36 channels • Split dipless crossfader with on/off switches • Direct bus master with on/off switch • Grand Master with on/off switch • Direct/Fader/Off control • Blinkless Direct/Fader switching • Short circuit proof • Adjustable output voltage • Cover and handle (up to 24 circuits) • Fully regulated output • Modular for expansion capability

- GXY-12** Two scene, 12 channel control console. . \$ 850.00
- GXY-18** Two scene, 18 channel control console . . .1085.00
- GXY-24** Two scene, 24 channel control console . . .1250.00
- GXY-30** Two scene, 30 channel control console . . .1525.00
- GXY-36** Two scene, 36 channel control console . . .1690.00

**Note:** The Galaxy Series Console is also available in 48, 60 and 72 channel size on special order.

Galaxy

## Apollo Control Console

- 18, 36 or 54 channels of control • Split dipless crossfader with tracking • Grand Master with on/off switch • Bump/solo with intensity control • Flash switches with indicators • 2 scene or memory group control • Group crossfading • Proportional crossfading of groups • Group pile-on • Programmable direct master • Programmable chase with speed, intensity, directional controls and preview • Time fade (0-4 minutes) • Analog output (digital available) • Battery backup (3 year minimum)

- APO-18** Two scene, 18 channel control console, analog output . . . . . \$2960.00\*
- APO-36** Two scene, 36 channel control console, analog output . . . . . 3460.00\*
- APO-54** Two scene, 54 channel control console, analog output . . . . . 4500.00\*

Apollo

## Phoenix Control Console

- 18, 36, or 54 channels of control • Non-exclusive patching with LED digital display • Split dipless crossfader with tracking • Grand Master with on/off switch • 2 scene or memory group control • Four memory pages • Bump/solo with intensity control • Flash switches with indicators • Programmable direct master • Group crossfading • Programmable chase with speed, intensity, directional controls and preview • Time fade (0-4 minutes) • Inhibit bus and master • Exam/edit of memory groups • Blind programming • Group override • Patch access/safety keyswitch • Digital output (analog available) • Battery backup (3 year minimum) • Floppy disk option • Optional auxiliary control panel

- PHX-18** Two scene, 18 channel control console with patch, digital output . . . . . \$4750.00\*
- PHX-36** Two scene, 36 channel control console with patch, digital output . . . . . 5750.00\*
- PHX-54** Two scene, 54 channel control console with patch, digital output . . . . . 6800.00\*

# DIMMER MODULES

## Star Trak I Dimmer Module

- Six channel—1200W per channel—dimmer module • Convection cooled to eliminate dust build up and overheating
- Fully filtered for quiet performance • Rackable units for high density and dimmer per circuit applications • Rackmounts in 19" x 5 1/4" space • Power line regulation eliminates annoying dips and surges • Electrically isolated power circuitry for each set of three circuits • Internal short circuit proof power supply for remote Star Trak III console • Permanent or portable applications

- ST-1-16-36 Portable dimmer module—Terminal power connector—Terminal load connector. . \$1200.00
- ST-1-17-30 Portable dimmer module—Terminal power connector—Duplex outlet panel. . . . .1200.00
- ST-1-22-30 Portable dimmer module—Terminal power connector—Pin connector outlet panel. . 1235.00
- ST-1-24-30 Portable dimmer module—Terminal power connector—Twistlock outlet panel . . . 1235.00

Star Trak I

## Star Trak II Dimmer Module

- Six channel—1200W per channel—dimmer module with Inte-Trol one scene controller with master • Inte-Trol controller masters the level of all other signals • Unique Inte-Trol switch allows master to directly operate local integral one scene controllers or external controls • Touring power plug eliminates permanently attached power cables • Solid-state power monitor indicators for each circuit • Plus all other Star Trak I features

- ST-2-16-36 Portable dimmer module with Inte-Trol terminal power connector—Terminal load connector . . . . . \$1350.00
- ST-2-17-30 Portable dimmer module with Inte-Trol terminal power connector—Duplex outlet panel. . 1350.00
- ST-2-22-30 Portable dimmer module with Inte-Trol terminal power connector—Pin connector outlet panel. . . . .1385.00
- ST-2-24-30 Portable dimmer module with Inte-Trol terminal power connector—Twistlock outlet panel. . . . .1385.00

Star Trak II

## Star Trak III Dimmer Module

- Two scene preset control of six circuits each • Two scene pile-on masters with on/off switches • Flash buttons for instantaneous effects • Main on/off switch with solid-state indicator • Direct/Master/Off switch for each control circuit • Fully regulated output voltage • Slaving connectors permit mastering of other Star Trak III controllers • No power cord • Blinkless switching • Separate optional power supply allows console to control our MDS Series dimmers

- ST-3 Two scene, six channel control module . . \$425.00
- ST-40 Dimmer module rackmount kit . . . . .50.00
- ST-50 Power supply (required when using ST-3 to control MDS Series dimmers) . . . . .40.00
- ST-75 ST-3 Slave/master cable . . . . .15.00

## Star Trak Power Input Options

- ST-X-X-32 Two 1 phase 2 wire grounded, 30A pin connectors (mating connectors provided) . . . \$115.00
- ST-X-X-33 One 1 phase 3 wire grounded, 30A twistlock inlet. . . . .120.00
- ST-X-X-34 Two 12/3 separate power cords—20A . . 60.00
- ST-X-X-35 One 1 phase 3 wire grounded, 30A power cord . . . . .60.00

# DIMMER MODULES

## RP20 High Density Dimmer Module

• Eighteen 2400W plug-in dimmer or non-dim modules, or six 6000W plug-in dimmer or non-dim modules, or six 2400W and six 6000W plug-in dimmer or non-dim modules • Primary circuit breaker • Protection against shorts and overloads—No fuses • 1 phase or 3 phase service—field adjustable • Selection of outlet panels—two outlets per dimmer (2.4kW), four outlets per dimmer (6.0kW) • Lamp and RFI filtering • Plug-in electronic control modules with diagnostics • Stackable for greater density—No top access required

## High Density Series Dimmer Modules (U.L. Listed)

### 2.4kW Dimmer Modules

RP20-200	Eighteen 2.4kW dimmers—No outlet panel . . . . .	\$5250.00
RP20-210	Eighteen 2.4kW dimmers—Blank outlet panel . . . . .	5300.00
RP20-217	Eighteen 2.4kW dimmers—Duplex outlet panel . . . . .	5750.00
RP20-222	Eighteen 2.4kW dimmers—Pin connector, outlet panel . . . . .	5750.00
RP20-224	Eighteen 2.4kW dimmers—Twistlock outlet panel . . . . .	6000.00

### 2.4kW Dimmer Module Outlet Panels

RP-210	Blank outlet panel . . . . .	\$ 50.00
RP-217	Duplex outlet panel . . . . .	500.00
RP-222	Grounded 20A pin connector outlet panel . . . . .	500.00
RP-224	Grounded 20A twistlock outlet panel . . . . .	750.00

### 6kW Dimmer Modules

RP50-300	Six 6kW dimmers—No outlet panel . . . . .	\$3995.00
RP50-310	Six 6kW dimmers—Blank outlet panel . . . . .	4045.00
RP50-315	Six 6kW dimmers—Branch circuit breaker outlet panel (4 per dimmer) . . . . .	4515.00
RP50-317	Six 6kW dimmers—Duplex outlet panel with branch circuit breakers . . . . .	4795.00
RP50-322	Six 6kW dimmers—Grounded 20A pin connector outlet panel with branch circuit breakers . . . . .	4930.00
RP50-330	Six 6kW dimmers—Grounded 50A pin connector outlet panel . . . . .	4720.00
RP50-340	Six 6kW dimmers—Combination grounded 50A and 20A pin connector outlet panel with branch circuit breakers . . . . .	5145.00

### 6kW Dimmer Module Outlet Panels

RP-310	Blank outlet panel . . . . .	\$ 50.00
RP-315	20A branch circuit breaker outlet panel (4 per dimmer) . . . . .	520.00
RP-317	Duplex outlet panel with 20A branch circuit breakers . . . . .	800.00
RP-322	Grounded 20A pin connector outlet panel with branch circuit breakers . . . . .	935.00
RP-330	Grounded 50A pin connector outlet panel . . . . .	725.00
RP-340	Combination grounded 50A and 20A pin connector outlet panel with 20A branch circuit breakers . . . . .	1150.00

### 2.4kW and 6kW Combination Dimmer Modules

RP2050-400	Six 2.4kW and six 6kW dimmers—No outlet panel . . . . .	\$5030.00
RP2050-410	Six 2.4kW and six 6kW dimmers—Blank outlet panel . . . . .	5080.00
RP2050-415	Six 2.4kW and six 6kW dimmers—20A branch circuit breaker outlet panel (6.0kW dimmers only) . . . . .	5550.00
RP2050-417	Six 2.4kW and six 6.0kW dimmers—Duplex outlet panel with branch circuit breakers . . . . .	5975.00
RP2050-422	Six 2.4kW and six 6kW dimmers—Grounded 20A pin connector outlet panel with branch circuit breakers . . . . .	6140.00

### 2.4kW and 6kW Combination Dimmer Module Outlet Panels

RP-410	Blank outlet panel . . . . .	\$ 50.00
RP-415	20A branch circuit breaker outlet panel . . . . .	520.00
RP-417	Duplex outlet panel with 20A branch circuit breakers . . . . .	945.00
RP-422	Grounded 20A pin connector outlet panel with 20A branch circuit breakers . . . . .	1110.00

RP20

## High Density Series Components and Accessories

RP-2.4kW	2400W plug-in dimmer module . . . . .	\$135.00
RP-20A	2400W plug-in non-dim module . . . . .	135.00
RP-6kW	6000W plug-in dimmer module . . . . .	260.00
RP-50A	6000W plug-in non-dim module . . . . .	260.00
RP-CM	Dimmer module analog control card . . . . .	250.00
RP-WM8	Dimmer module wall mount brackets . . . . .	Pair/100.00

Note: High density dimmer modules may be ordered with a combination of dimmer modules and non-dim modules installed.

## GDI - 2.4kW Independent Dimmer

GDI-D	2.4kW Independent dimmer module . . . . .	\$495.00
GDI-C	Remote control module . . . . .	35.00

MDS-1

MDS-5

## MDS-1 2.4kW Dimmer Module

• Six 2400W dimmers • 20A circuit breakers—recessed for durability • Full protection against dead shorts and overloads • 103 or 304 wire service • Various outlet panels available (two outlets per dimmer) • Convection cooled • Lamp and RFI filtering • Wall mounting models for permanent installation

MDS-1-0	Portable dimmer module—No outlet panel . . . . .	\$1875.00
MDS-1-1	Portable dimmer module—Blank outlet panel . . . . .	1895.00
MDS-1-2	Portable dimmer module—Duplex outlet panel . . . . .	2050.00
MDS-1-7	Portable dimmer module—Grounded pin connector outlet panel . . . . .	2095.00
MDS-1-9	Portable dimmer module—Twistlock outlet panel . . . . .	2150.00

## MDS-5 3kW Dimmer Module

• Six 3000W dimmers • Fully magnetic 25A circuit breakers—recessed for durability • Full protection against dead shorts and overloads • 103 or 304 wire service • Convection cooled • Lamp and RFI filtering • Wall mounting models for permanent installation

MDS-5-0	Portable dimmer module—No outlet panel . . . . .	\$2000.00
MDS-5-1	Portable dimmer module—Blank outlet panel . . . . .	2020.00
MDS-5-132	Portable dimmer module—Grounded pin connector outlet panel with branch circuit breakers (2 per dimmer) . . . . .	2420.00

## MDS Series Outlet Panels

MDS-116	Blank outlet panel . . . . .	\$ 20.00
MDS-117	Type 2 outlet panel (15/20A duplex) . . . . .	175.00
MDS-122	Type 7 outlet panel (15/20A pin connector) . . . . .	220.00
MDS-124	Type 9 outlet panel (3 pole, 20A twistlock) . . . . .	275.00
MDS-132	Grounded pin connector outlet panel with 12 SP20A branch circuit breakers . . . . .	420.00

Note: MDS-1 and MDS-5 dimmer modules are available in wall mount versions. Substitute -2- (or -6-) in the catalog number and add \$35.00 to the -1- (or -5-) price for wall mount option.

MDS non-dim modules, dimmer module power cords and additional outlet panel options are available on special order. Consult the factory for price and availability.

MDS-600 Series dimmer modules (six 7.2kW dimmers) are available on special order with a variety of outlet panel options.

## CASES

### Mini-Rack™ Cases

The Mini-Rack, a line of instant access, shock-mounted cases offer all the protection of Thermodyne's popular Shok-Stop™ cases as well as the convenience of the Rack-Pack™. Mini-Rack has eliminated 5" of case height and 20% of the weight from the standard Rack-Pack design for critical space and weight requirements, yet still offers accessibility and protection.

The Mini-Rack has the standard 19" EIA rack width and 20" rack depth, but the case dimensions have been reduced 5" in width and 5" in height by redesigning the shock-mount system to attach the rack frame directly to the inside of the case. The space between the rack and the inside of the case has been reduced and the Mini-Rack has eliminated the high profile exterior shock mounts of the Rack-Pack, replacing them with low profile shock-mounts.

Like the Shok-Stop and Rack-Pack cases, Mini-Rack is available in a variety of sizes, from 5.37" to 24.625" rack height and 8.75" to 18" case height. Mini-Rack has all the standard Thermodyne cases, including: inner rack frame with EIA-RETMA hole pattern in front and rear rails, recessed latches and handles, interlocking ribs for ease of stacking, and watertight gasket construction. All Thermodyne cases are corrosion and fungus resistant. A number of optional items can be specified, including: shock mounts for unusual weight, extra t-bar supports, anodized outer valances, removable casters, and custom colors.

### Shok-Stop Cases

Made of high density polyethylene, the Shok-Stop case acts as a shock absorber. When an impact occurs, the case accepts all of the force. The slight shock that reaches the interior is instantly overcome by the foam which can be custom-fitted to the exact dimensions of your equipment.

Carefully engineered channels and corner bumpers on every Shok-Stop case are designed to deliver maximum protection in high-stress conditions. Hardware includes spring-loaded handles which fit tightly during shipping, and recessed hinges and latches that are field-replaceable if necessary. By using non-invasive hardware attachment and pressure relief valves, Shok-Stop cases can be ordered completely water-tight or vapor-tight, depending upon the requirements. All Shok-Stop cases offer Electromagnetic Interference (EMI) shielding and can be panel-mounted.

Shok-Stop cases can be ordered empty, with a solid foam core, or Thermodyne can custom cut the foam to the customer's specifications. Shok-Stop is available in a variety of shapes and sizes, from 8.0" to 89.0" in length. The standard color is gun-metal gray, but custom colors are available at no additional charge. Thermodyne stocks the most common standard sizes in inventory for quick response to orders. Like all Thermodyne cases, Shok-Stop cases are corrosion and fungus resistant and are available with a variety of options, including: anodized outer valances, automatic pressure relief valve, removable casters and lift rings.

### Rack-Pack Cases

Rack-Pack transportation/operating cases now combine permanent mounting in a standard 19" rack with easy equipment access. These instant-access, shock-mounted cases offer all the protection of Thermodyne's Shok-Stop cases and increased accessibility.

Available in sizes from 5.37" rack height and 13.75" case height to 24.625" rack height and 33.0" case height, Rack-Pack features standard specifications such as: inner rack frame with EIA-RETMA hole pattern in front and rear rails, recessed latches and handles, interlocking ribs for stacking, and watertight gasket construction. Like other Thermodyne cases, Rack-Pack is corrosion and fungus resistant, high-density polyethylene.

When timing is critical, Rack-Pack allows you to set up and operate equipment in minutes, rather than hours. The equipment can be stacked and pre-wired in place, and you need only remove the front and back covers for immediate access. Every case features recessed ribbing for shock absorption and elastometric shock-mounts for vibration protection. The inner rack is constructed of 6061-T5 aluminum for durability and light weight and all latches and handles are mounted firmly without intrusive fasteners.

Mini-Rack

Shok-Stop

Rack-Pack

If your equipment requires access by means of slides, they are available by special order. This makes on-site maintenance or repairs easier and quicker. Rack-Pack cases are made to your specifications without expensive alterations: standard 19" rack width, 20" depth, and holes drilled to EIA-RETMA hole patterns, and rack heights to your specification from 5.37" to 24.625". Rack-Pack cases can stack on interlocking ribs to form a modular workstation that is secure in any environment.

Thermodyne has over 150 standard Shok-Stop cases: 11 standard Rack-Pack sizes, 11 standard Mini-Rack sizes, and a growing library of inner foam liner cutting specs. Every Shok-Stop, Rack-Pack and Mini-Rack case meets or exceeds the toughest military specifications including, ATA300-CAT 1, MIL-C-4150, and MIL-T-21200 and is constructed of high-density polyethylene for flexibility and shock absorbency.

# STAGE LANTERNS/ REFLECTORS

PAR Lanterns

### Stage Lanterns

All Thomas lighting units are quality engineered from high grade spun aluminum to combine minimum weight with maximum durability, and excellent heat dissipation properties. Stage lanterns are complete with filter frame and integral lamp safety guard, and are designed for easy lamp replacement. Black or silver are standard colors. Ceramic lampholder, cable, and connector are not included in fixture price.

PAR 64	Lantern . . . . .	\$68.68

PAR 16	MINI-PAR uses MR-16 lamp . . . . .	41.00

Raylight Reflector

### Raylite Reflectors

The Reflector is available for use in PAR 64, 56 and 46 fixtures, and in a variety of beam patterns. Using a 600W DYS lamp, the Raylight Reflector offers an alternative to the heavier and more expensive PAR lamp. The narrow reflector creates a beam comparable to an ACL without the hassle of series wiring. The leads, which are wired directly into the socket (eliminating the common problem of lost leads), are simply plugged into the PAR ceramic. A double-sided spring clip ensures good contact between the lamp and the socket, and secure lamp retention.

34-280	PAR 64 very narrow . . . . .	\$26.65
34-290	PAR 64 narrow . . . . .	26.65
34-292	PAR 64 wide . . . . .	26.65
34-300	PAR 56 . . . . .	26.65
34-310	PAR 46 . . . . .	26.65

# TRUSSING/ LIGHT FIXTURES

## Aluminum Trusses

30-130	Pre-rigged Truss (30" x 26" x 91") Designed to contain 12 lanterns on light bars which lower for use and travel inside truss. Price includes Camlocs, castors and mechanism for moving and containing light bars. Price does not include light bars or lanterns . . . . .	\$ 1105.00
30-117	Pre-rigged Truss (30" x 26" x 60") Same as system above, designed to contain 8 lanterns with two extra circuits on each truss bar. Price does not include light bars or lanterns . . . . .	\$ 975.00
30-360	2-way Corner Blocks including Camlocs and castors . . . . .	572.00
30-370	4-way Corner Blocks including Camlocs and castors . . . . .	780.00
30-395	Universal Pivot Section including Camlocs 0-270 . . . . .	780.00
30-560	Underhanging Follow Spot Chairs . . . . .	780.00
30-565	Top Mount Follow Spot Chairs . . . . .	650.00
30-566	Universal Follow Spot Chairs . . . . .	1040.00

## General Purpose Trusses (18" x 12")

30-140	5' Long Section including Camlocs . . . . .	\$ 624.00
30-150	8' Long Section including Camlocs . . . . .	728.00
30-160	10' Long Section including Camlocs . . . . .	780.00

## General Purpose Trusses (12" Square)

30-167	2'6" Long Section including Camlocs . . . . .	\$ 468.00
30-170	5' Long Section including Camlocs . . . . .	598.00
30-180	8' Long Section including Camlocs . . . . .	702.00
30-190	10' Long Section including Camlocs . . . . .	754.00
30-330	2-way (12") Corner Blocks including Camlocs . . . . .	390.00
30-340	4-way (12") Corner Blocks including Camlocs . . . . .	559.00
30-350	6-way (12") Corner Blocks including Camlocs . . . . .	780.00
30-387	Universal Pivot Section including Camlocs . . . . .	624.00

## General Purpose Trusses (20 1/2" Square)

30-200	5' Long Section including Camlocs . . . . .	\$ 650.00
30-210	8' Long Section including Camlocs . . . . .	754.00
30-220	10' Long Section including Camlocs . . . . .	806.00
30-300	2-way Corner Blocks including Camlocs . . . . .	468.00
30-310	4-way Corner Blocks including Camlocs . . . . .	650.00
30-320	6-way Corner Blocks including Camlocs . . . . .	832.00
30-390	Universal Pivot Section including Camlocs 0-270 . . . . .	728.00

## General Purpose Triangular Trusses

30-240	5' Long Section including Camlocs . . . . .	\$ 598.00
30-250	8' Long Section including Camlocs . . . . .	702.00
30-260	10' Long Section including Camlocs . . . . .	754.00

All right angle members of trussing are manufactured from 2" diameter x 1/8" wall tube.

## Truss Accessories

30-410	Camlocs (per set: 1 male, 1 female, 1-pin) . . . . .	\$ 33.54
30-420	Castors 4" (each) . . . . .	12.80
30-430	Couplers, Half with hardware . . . . .	21.80
30-440	Couplers, Swivel . . . . .	39.00
30-450	Couplers, Rigid . . . . .	36.40
30-505	Shank Hooks with pin . . . . .	16.64
30-385	PRT to 20 1/2" Adaptors . . . . .	468.00

## Spot Banks

Spot Banks are designed for punch lighting, audience blinders and other applications where a concentrated source of light is required. Constructed of lightweight aluminum, fixtures include safety wire mesh over the lamps as a standard feature. The independent movement of each row of lamps makes focusing quick and easy. Lamps are accessed through the front of the fixture and no tools are required.

25-450	Par 36 8-Lite Unit . . . . .	\$346.50
25-454	Par 36 6-Lite Unit . . . . .	300.30
25-452	Par 36 4-Lite Unit . . . . .	253.66
25-460	Par 64 6-Lite Unit . . . . .	519.75

Price does not include lamps or wiring.

# TIME LINE, INC.

270 Lafayette St., Room 1300  
New York, NY 10012  
(212) 431-0330  
FAX: (202) 966-7824

# TIME CODE MODULE

LYNX

## LYNX Time Code Module

The LYNX Time Code Module is a high performance modular time code product that is actually four independent functional units in a single enclosure:

- Wide band SMPTE time code reader
- Multi-standard SMPTE time code generator
- Audio/video tape machine synchronizer
- SMPTE 422 communications port for use with external editors

The LYNX module is available in two software versions — the LYNX/SAL (standalone) configuration, and the LYNX/VSI video editor interface.

The modules are half-rack, and only 1<sup>3</sup>/<sub>4</sub>" high, which creates an extremely small rackmounted system. A four machine controller with four independent generators uses just 3<sup>1</sup>/<sub>2</sub>" of rack space. There are no internal adjustments. Machine interfaces are made by cable change and machine selection from the front panel. Reconfiguration of all operating parameters are automatically controlled by the internal microprocessor. For each controlled machine the independent generator allows convenient local time code striping.

### Additional Features

- Nonvolatile battery backup RAM
- No internal adjustments
- Machine selection made from front panel and stored in battery backup RAM
- Employs latest VLSI components for high performance
- CMOS design for low power and heat dissipation
- Opto-isolation between machine audio, video, and communications grounds
- Worldwide transportability:
  - All time code standards
- Internal options cards:
  - RS232/422 machine control board to supplement parallel output
  - Film chain quadrature interface

### LYNX/SAL (Standalone)

- Internal crystal or external video reference input
- Selected reference resolves speed of all machines, including current master (wow and flutter are not passed through)
- Expandable up to 32 machines online
- Masterless system — any machine may be freely selected as current master
- Operates in standalone mode only

The LYNX/SAL forms a standalone synchronization system, which employs one LYNX module to each machine in the system and a minimum of two LYNX for master/slave operation. The units are interconnected with 9-pin RS422 data cables supporting up to a 32 machine system.

Front panel access is given to setting sync points, offsets, control of the generator, and basic system functions. Software compatibility is built-in for most standard tape transports.

LYNX/SAL ..... \$2559.00

### LYNX/VSI (Video Editor Interface)

- Direct plug-in to machine port of external video editor
- Supports Ampex VPR3 style serial communications
- Enables complete emulation of video transport:
  - Locks audio transport to house video reference
  - Accepts video editor commands
  - Reports transport status to editor
- Accepts all standard LYNX audio interfaces
- Interfaces with video editors only

The LYNX/VSI video editor interface software version makes the LYNX module a compatible audio machine interface to Ampex, CMX, and Grass Valley/ISC editing systems. This LYNX software also enables external computer systems to assert machine control, when transmitting Ampex VPR3 type commands.

LYNX/VSI ..... \$2879.00

# FOLLOWSPOTS

Followspots are used to follow the movement of an individual or a group of performers. With the manual control knobs, the beam can be adjusted for sharp or soft edged focusing as well as from spot to flood. The beam can also be framed off at the top and bottom by using the built-in framing shutters.

## Marc 350 Quartz Arc Followspot

- Maximum throw 200'
- Utilizing a Quartz Arc tube reflector lamp. Unit features an integral lamp transformer generating a brilliant, white light output
- Dual lens system
- Iris and shutter sharp to soft edged focusing
- Color boom with 6 colors
- Blackout dowser
- Integral fan
- Low power consumption
- Adjustable caster stand
- On/off switch
- Power cable and plug
- 18" H x 12 1/2" W x 44" L
- Height with stand before extending 53"
- Weight 132 lbs.

### Available Lamp for Marc 350

Lamp	Watts	Approx. Life
Marc 350/16T	350	50 hrs.
<b>Marc 350</b>		<b>\$3400.00</b>

IQ4ZMF

## IQ4ZMF Mini-Followspot

- Maximum throw 40'
- Zoom lens system
- Iris and shutter control
- Sharp to soft edged focusing
- Accessory holder
- Adjustable caster stand
- Power cord and plug
- Achieve extra wide beam spreads at close range projection
- Ideal for installations that have limited space and short throw requirements
- Weight 44 lbs.
- 6" H x 6 1/4" W x 19" L
- Height with stand before extending 51"

# FRESNELS/ ELLIPOSIDALS

Q8PC

Q325

Q6Z

C3

6PC

## Fresnel Spots

The fresnel spot light produces an intense, soft edged beam of light that can be adjusted from a spot position to a flood position. Widely used in theatrical productions, they are excellent for night clubs and photography.

- C3—Miniature Fresnel Spot with 3" lens. (100W through 250W lamps available). Recommended throw 5'-20' . . . . . \$70.00
- 6PC—Standard Fresnel Spot with 6" lens. (250-500-750W lamps available). Recommended throw 10'-30' . . . . . \$84.00
- Q8PC—Quartz Fresnel Spot with 8" fresnel lens. (1000W through 2000W lamps available.) Recommended throw 10'-60' . . . . . \$174.00

## Color Frames

- C3CF—Color frame filter holder for C3 . . . . . \$4.40
- 6CF—Color frame filter holder for 6PC . . . . . 4.40
- 8CF—Color frame filter holder for Q8PC . . . . . 6.00

## Snoots

- C35—Tapered snoot for C3 . . . . . \$12.00
- 6S—Snoot with 3" opening for 6PC . . . . . 20.00
- 6S5—Snoot with 5" opening for 6PC . . . . . 20.00

## Four-Door Barndoors

- C3BD4—Four-door barndoor for C3 . . . . . \$35.00
- 6BD4—Four-door barndoor for 6PC . . . . . 36.00
- Q8BD4—Four-door barndoor for Q8PC . . . . . 70.00

## Stand Adaptors

- C3SA—Stand adaptor for C3 . . . . . \$12.83
- SA—Stand adaptor for 6PC and Q8PC . . . . . 12.83

## Pipe Clamps

- PCS—Pipe clamp for C3 . . . . . \$ 8.80
- PSI—Pipe clamp for 6PC . . . . . 12.00
- PC9C—Pipe clamp for Q8PC . . . . . 12.00

## Motorized Color Wheels

- 6MW—Motorized color wheel for 6PC . . . . . \$108.00
- TB4—Table base for C3 fresnel. . . . . 8.80
- TA1—Single circuit track adaptor for C3 fresnel . . . . . 28.00
- TA3—Three circuit track adaptor for C3 fresnel . . . . . 38.00
- 6L—Pin Spot Adaptor converts the 6PC fresnel to a pin spot. It produces a sharply defined circle of light. The 6L comes with three various diameter templet drop-ins . . . . . \$64.16

## Ellipsoidals

Our line of ellipsoidals are designed for superior performance, with a hi-tech look. The ellipsoidal provides a concentrated, well-defined beam of light that can be shaped with built-in framing shutters to eliminate spill. It is engineered with a concentrated high power light source, precision reflector and lens system designed to project a sharp-edged of diffused beam of light. Each unit produces an even field of illumination without any hot spots or shadows. Various accessories are available to project design patterns and circles of light.

- Q325—Variable focal length 3 1/2" ellipsoidal. The square design of the 3 1/2" ellipsoidal is hi-tech and compact enough for most low ceiling applications. Its powerful performance makes it ideal for clubs, display lighting, and pattern projection. Uses 150-250-325W lamps. (Recommended throw 5'-25') . . . . . \$240.00

## Accessories for Q325

- 3T—Pattern Template Holder . . . . . \$12.00
- Q3CF—Colorframe Filter Holder . . . . . 4.40
- P100—Mini-pattern Template Series . . . . . 8.45

- Q4W—Variable focal length ellipsoidal with 4 1/2" lens system. Provides spreads of 32°, 40°, or 48°. (Recommended throw 5'-30') . . . . . 220.00

- Q4Z—Variable focal length Zoom Ellipsoidal combines the features of the Q4M and Q4W with a lens system that is built on a sliding track to obtain infinitely more beam spreads . . . . . 240.00

## Interchangeable Accessories— for Q4M, Q4W, and Q4Z

- 4T—Pattern Template Holder . . . . . \$12.00
- Q4CF—Colorframe Filter Holder . . . . . 4.40
- Q4I—Iris Kit . . . . . 80.00
- SA—Stand Adaptor . . . . . 12.83
- P200—Series of Pattern Templates . . . . . 8.45

## Square Style Fixed Lens Position Ellipsoidals

- Q6X9—6" Quartz Ellipsoidal—wide angle: 40°. Recommended throw—10'-30' . . . . . \$220.00
- Q6X12—6" Quartz Ellipsoidal—medium angle: 30°. Recommended throw—10'-40' . . . . . 220.00
- Q6X16—6" Quartz Ellipsoidal—medium-narrow angle: 20°. Recommended throw—20'-70' . . . . . 220.00
- Q6X22—6" Quartz Ellipsoidal—narrow angle: 12°. Recommended throw—20'-80' . . . . . 220.00
- Q6Z—6" Variable focal length Zoom Ellipsoidal. Features a sliding lens system to obtain spreads from 32° (wide angle) to 26° (medium angle) to 20° (medium-narrow angle) and an infinite number of spreads between. (Recommended throw for distance up to 70') . . . . . \$330.00

## Accessories for 6" Ellipsoidals

- 6CF—Colorframe Filter Holder . . . . . \$ 4.40
- 6T—Pattern Template Holder . . . . . 12.00
- 6I—Iris Kit . . . . . 80.00
- 6MW—Motorized Color Wheel . . . . . 108.00
- P200—Pattern Template Series . . . . . 8.45

# VHS VIDEOCASSETTE PLAYERS/ COLOR MONITORS

## TI-3000 VHS Videocassette Player

- Automatic repeat makes it ideal for sales presentations • 3-speed selection (SP, LP, SLP) plays tapes up to 8 hours long • Automatic front loading saves space, loads tapes quickly and easily • Picture search in forward and reverse • Still frame • Automatic rewind • Rotary head helical scanning system • Trim, lightweight design makes it easy to carry

TI-3000 (AC only) .....\$260.95

TI-3000

## GS-2000AC VHS Videocassette Player

- Automatic repeat makes it ideal for sales presentations • 3-speed selection (SP, LP, SLP) plays tapes up to 8 hours long • Automatic front loading • Picture search in forward and reverse • Still frame • Automatic rewind • Rotary Head Helical Scanning System • Tape protection system automatically stops machine before excess humidity can damage tape • Aluminum chassis allows safe, cool operation over long hours of continuous play • Handsome matte black exterior • Trim, lightweight design makes it easy to carry

GS-2000 (AC only) .....\$260.95

GS-3000H

## GS-3000H AC/DC VHS Videocassette Player

- Automatic repeat makes it ideal for sales presentations • 3-speed selection (SP, LP, SLP) plays tapes up to 8 hours long • Operates on AC current or optional DC car cord • Automatic front loading saves space, loads tapes quickly and easily • Picture search in forward and reverse • Still frame • Automatic rewind • Rotary head helical scanning system • Tape protection system automatically stops machine before excess humidity can damage tape • Trim, lightweight design and handle make it easy to carry • Handsome matte black exterior

GS-3000H (AC/DC) .....\$279.95

## DA-1300 13" Color Monitor

- Video and audio input make it ideal for sales training, computer programs or your favorite movies • Comb filter delivers superior picture definition • Molded-in handle for easy carrying • Operates on AC power • High-tech design in solid black • Removable anti-glare filter provides comfortable viewing

DA-1300 .....\$235.95

DA-1300

CB-1900

## CT-6000 5" Color Television/Monitor

- Miniature, high-tech picture gives you vivid color • Weighs just 7 lbs. • Audio/video in/out jacks and TV/monitor switch let you use it as monitor with your VCR and computer • Automatic fine tuning • Telescoping antenna • Precise electronic tuning easily tunes in VHF and UHF channels • Sunscreen gives you a great picture outdoors • High-impact plastic cabinet is light and strong • Earphone jack • Three power options—AC adaptor, DC car cord, 10 "D" batteries (Batteries not included)

CT-6000 .....\$270.95

## CB-7000 AC/DC VHS Videocassette Player with 5 1/2" Color Monitor

- Weighs only 20 lbs. • Can be used with AC adaptor or DC car cord • Flat, square picture tube • Highly advanced rotary helical scanning system • Forward and reverse picture search permits review and emphasis of key material • Single speed play (tape speed of 33.4mm/sec). • Still frame capability allows you to freeze the action • Playback time is up to 2 hrs., 40 min. with T-160 tape • Handsome metal case with protective, removable faceplate and carrying handle • 5"H x 16 1/2"W x 15"D

CB-7000 .....\$612.95

## CB-1900 Color Television/Monitor with Built-In VCR

- Wireless TV/VCR remote control function • Soft-touch controls located in front for easier operation • Direct-drive, front-loading system • 105-channel, cable-ready tuning (12-position electronic tuning) • Dew indicator prevents the playing of (and damage to) damp tape • Visual search (cue/review) function • Automatic rewind • Automatic playback speed selector (SP, LP, SLP record/playback) • Allows up to 8 hours of record/playback time • Tape counter with memory function • LED indicators show VCR operation • Direct-drive head drum and capstan • Equipped with all regular VCR modes except the program function

CB-1900 .....\$770.95

## Standard Coax Patching Systems

FIG. 1

## Plugs & Cable Assemblies

**PATCH PLUGS (Crimp)**  
PL1C-Δ .070 pin (RCA) A = 2.80" B = 1.57" FIG. 2  
PL1WC-Δ .090 pin (WE) A = 2.52" B = 1.29"

**ADAPTER PLUG (BNC)**  
AD1 .070 pin (RCA) A = 2.77" (Shown) FIG. 3  
AD1W .090 pin (WE) A = 2.83"

**LOOPING PLUG**  
.070 pin (RCA) A = 3.76" B = 1.55" FIG. 4  
.090 pin (WE) A = 3.50" B = 1.25"

**PATCH CORD**  
PCL-Z (50, 75, 93 ohm) .070 pin (RCA) FIG. 5  
PCWL-Z (50, 75, 93 ohm) .090 pin (WE)

**CABLE ASSEMBLY (Std Patch and BNC)**  
PCX-L-Z (50, 75, 93 ohm) .070 pin (RCA) FIG. 6  
PCWX-L-Z (50, 75, 93 ohm) .090 pin (WE)  
Designate 75 ohm BNC by prefix U.

## Jacks: Single/Dual

**PATCH JACK (Cable entry)** J3E-Δ .070 pin (RCA) FIG. 7  
J3WE-Δ .090 pin (WE)

Usable whenever cable entry is desired in place of standard connectors.

**PATCH JACK (BNC)** J3 .070 pin (RCA) FIG. 8  
J3W .090 pin (WE)

Rear mates with Trompeter PL20-N series or any standard BNC plug.

**PATCH JACK (BNC) (Self-terminating)** J13-R\* .070 pin (RCA) FIG. 9  
J13W-R\* .090 pin (WE)

Rear mates with any BNC plug. Circuit is terminated when patch plug is removed. Signal degradation increases when used above 100 MHz. See Fig. 17

**PATCH JACK (Normal Thru)** J14 Series FIG. 10

For available circuit configuration See Fig. 12 thru 16

**PATCH JACK (Dual) — Wired** J15B (BNC) .070 pin (RCA) FIG. 11  
J15WB (BNC) J15WH (TNC) .090 pin (WE)

**PATCH JACK (Dual) — No Wiring** J15BA (BNC) .070 pin (RCA) FIG. 11  
J15WBA (BNC) J15WHA (TNC) .090 pin (WE)

**REAR ENTRY CABLE** J15-Δ .070 pin (RCA) FIG. 11  
J15W-Δ .090 pin (WE)

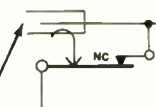

## Introduction:

Trompeter Electronic's standard coax patching systems, shown on this page, provide limitless flexibility to route signals from one place to another. Two basic versions of Standard Coax patching are available. The RCA 50 ohm with a pin size of .070" and the Western Electric (WE) 75 ohm type with a pin size of .090". Signal degradation occurs above 100 mhz. The two series are not interchangeable but can be intermixed on the same panel along with TEI's audio patch jacks and panel lites (not shown).

### COAX DATA SWITCHES:

Designed for use up to 15 MHz. Circuits are isolated from ground with shield & center conductor switched. Switched out ports are terminated in a resistive load.

BNC/TNC

SINGLE LINE BNC OR TNC

### WALL MOUNT PLATE:

Available with up to 6 BNC or TNC connectors.

### DATA DISTRIBUTION PANELS:

TEI manufactures signal distribution panels that accommodate from 12 to 52 Bulkhead Cable or Feedthru Jacks illustrated above. All panels are 19" standard rack size in insulated and non-insulated versions. Panels accommodating 24, 32, 40 or 52 lines are double row (as illustrated) and 3 1/2" high. Light gray is the standard color though other colors are available on special order.

# CAMERA/VTR SYSTEM

## Z III Professional 3-Tube Camera/VTR System

By utilization of recent advances in half-inch signal processing, component recording, and camera miniaturization the Z III sets new standards for performance, ease of operation and cost effectiveness for professional video production.

The Z III combines direct Y/C component analog recording, 20% increased white clip level, non-linear pre-emphasis, and the advantages of a fully integrated three-tube camera/VTR system while maintaining complete compatibility with composite VHS systems.

### Full Compatibility

Complete and versatile, the Z III produces high quality Y/C component recordings on high grade VHS cassettes that can be played back on any VHS VCR and yet will yield a production quality image when edited and dubbed in Y/C components.

### Quality Challenging 3/4"

Now for the first time it is possible to shoot, edit, and duplicate in Y/C component form without changing formats while maintaining full VHS compatibility and quality comparable to mastering on 3/4" tape.

### High Picture Quality

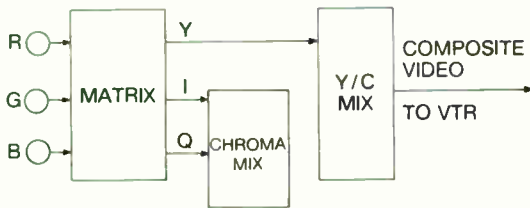

The camera achieves exceptionally sharp image quality by utilization of a middle index prism beam splitter and a 2 line vertical enhancer.

Horizontal resolution exceeds 570 lines with a high signal-to-noise ratio of better than 54dB.

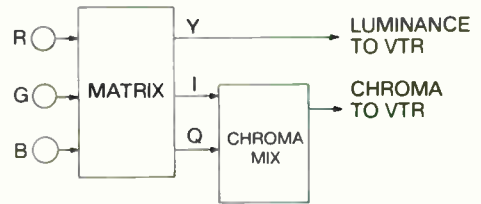

Z III ..... \$8995.00

## Component Quality, Half-Inch Economy, Fully Compatible

### Conventional Camera

### Z III Camera/VTR

## Lumachrome™ VHS Compatible Component Recording

Lumachrome is a new proprietary component recording system designed by TV Specialists for professional video applications. Conventional VHS and VHS HQ compatibility are maintained by utilizing existing 2 hour recording speeds, head drum cylinders and VHS video tapes. Lumachrome takes advantage of the latest component technology and provides the following advantages:

- True multiple-generation capability • Better than 48dB signal-to-

- noise ratio luminance • Improved depth of modulation for sharper pictures • Reduces ringing and edge noise • 80% tape cost savings compared to 3/4" • 40%-60% equipment savings compared to 3/4" • 50% reduction in weight and size compared to 3/4" portable systems • Improved color signal-to-noise ratio, typical 46dB • Reduced color smear and phase shift • Improved color band width and detail • Improved playback on conventional VHS VCRs • 6 times longer recording time per tape

# VIDEO EFFECTS SYSTEM

## The Wizard Series Type II 2-Channel Digital Video Effects System

The Wizard Series Type II is a cost effective digital video effects system that provides two channel A/B effects from its own built-in mixing switcher and dual channel TBC's. The system is the only one of its kind that offers true modular design including both effects and bandwidth expansion.

For the first time it is now possible for even a single source editing system to have the polished look of a big budget production without the usual high costs. As production needs arise the modular design of the Wizard allows upgrading.

### Modular A/B Roll Effects

#### The Wizard Apprentice Type II

A/B roll dissolve	Still frame
A/B cuts	Still field
Fade to black or color	Variable strobe
Horizontal wipe	Posterization
Vertical wipe	Variable mosaics
Editor interface	Dual proc amps
Auto transitions	T-bar or auto control
Color correction	VCR motion effects
<b>Apprentice Type II . . . . .</b>	<b>\$11,900.00</b>

#### The Wizard Type II

All of the above plus:	
Digital dissolve (breakup)	Picture compression (1/4)
Picture positioning (joystick)	Multiple pictures with overlay (5 max)

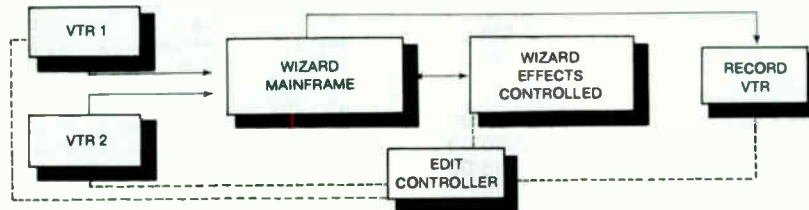

WIZARD SERIES

Slide on (4 directions)	Compression trails
Slide off (4 directions)	Mirror fold over
Picture inversion	Mirror tunnel

# TRIPODS

## TS-30T/TS-33T Tripod Stands

### Common Features

• Combines deep etched and clear anodized aluminum tubing with black polycarbonate parts • Ideal for speakers, PA systems, signs, photo studio lights, etc. • Large, easy-to-use handknobs • Waterproof nylon tote bag included • All USS lighting products can also be used with the TS-30T

### TS-30T

• Height: 3'6" to 6'7" • Max. base diameter: 47" • Load capacity: 75 lbs. • Breakdown dimensions: 41 1/4" x 6 1/2" dia. • Weight: 6 lbs. • Set up time: 2 minutes

TS-30T ..... \$100.00  
TS-30BT Black ..... 115.00

### TS-33T

• Height: 5'0" to 9'2" • Max. base diameter: 62" • Load capacity: 100 lbs. • Breakdown dimensions: 57 1/2" x 6 1/2" dia. • Weight: 8 lbs. • Set up time: 2 minutes

TS-33T ..... \$120.00  
TS-33BT Black ..... 138.00

## TS-30AT/TS-33AT Articulating Leg Tripods

### Common Features

• Enables their users to direct the sound on almost any surface • By simply adjusting a handknob located at the top of the leg, the tripod can be infinitely adjusted to the exact contours of the ground surface • Allows the tripod to be used normally on flat surfaces • Constructed of lightweight aluminum alloy tubing and glass-reinforced polycarbonate parts • Breaks down to slip into a waterproof nylon tote bag which is included • Variety of mounting adaptors are available

### TS-30AT

• Height: 3'6" to 6'7" • Max. leg extension: 11" • Load capacity: 75 lbs. • Breakdown dimensions: 41 1/4" x 6 1/2" dia. • Weight: 6 1/2 lbs. • Set up time: 2 minutes

TS-30AT ..... \$115.00  
TS-30ABT Black ..... 130.00

### TS-33AT

• Height: 5' to 9'2" • Maximum leg extension: 16" • Load capacity: 100 lbs. • Breakdown dimensions: 57 1/2" x 6 1/2" dia. • Weight: 8 1/2 lbs. • Set up time: 2 minutes

TS-33AT ..... \$135.00  
TS-33ABT Black ..... 154.00

# LIGHTING STAND/ COMPONENTS

## TS-33T Lighting Stand and Components

The on-stage professional utilizes the latest technologies to visually create the atmosphere he desires. Through the use of dimmers, barn doors, and control modules, the lighting engineer tries to transform a drab set into an exciting arena. However, due to the lack of achievements in lighting stands, these effects are limited by large, heavy tarnished steel bars which sit ominously on an otherwise aesthetic stage. This has changed by the introduction of aluminum stands; deep etched and clear anodized, to add to, instead of take away from the desired effect.

In addition to being attractive, these systems are lightweight. Through the use of aluminum alloy tubing, the entire stand as shown weighs only 12 lbs. This feature reduces shipping costs as well as physical wear and tear.

Other features include: large, convenient handknobs and easy-to-use fittings; your choice of bolt and wingnut type crossbar, or heavy walled crossbars for clamp type lights. Fittings are constructed of glass reinforced polycarbonate, one of the toughest plastics available.

The TS-33T Tripod forms the base for this versatile system and comes with a nylon tote bag. The tripod's excellent stability enables the lights to be extended over 11' when used in conjunction with the vertical extension.

This lighting stand gives you the choice as to how you want to build up your own stand. The modular design allows you to add on the additional parts as you require.

TS-33T	.....	\$120.00
TS-33BT Black	.....	138.00

Add ons to the TS-33T Tripod include:

<b>CB-48 (A)</b>	4' crossbar with bolts and wingnuts. Capacity: 8 lights. Two bolts are also provided for attaching power expanders, dimmer packs, etc. Weight: 1 1/2 lbs.

# STANDS/TABLES

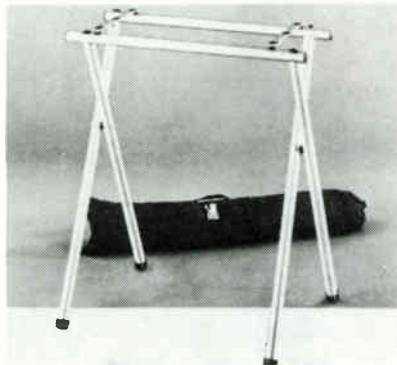

### US-22T Utility Stand

The US-22T, smallest of the Ultimate Support Systems' utility stands, weighs 4 1/2 lbs., securely holds up to 75 lbs. of equipment: 1" diameter aluminum alloy tubing construction. Features allow the entire stand to fit into a slender 33 1/2" long bag when disassembled. The US-22T, when set up, has a height of 30 1/4". The perfect stand for: keyboards, mixing boards, lighting consoles, rack equipment, etc. The two support bars can be placed in any of four positions to accommodate various equipment widths. The aluminum is deep etched and clear anodized to provide a look that complements any product it upholds. The feet are double-capped and skid resistant; all nuts are locking type; rubber pads are included to keep equipment from sliding. A waterproof nylon tote bag is included for traveling ease.

#### Specifications

Height:	30 1/4"
Tabletop Dimensions:	28 1/4" x 14 1/8"

Breakdown	
Dimensions:	33 3/8" x 4" diameter
Weight:	4 1/2 lbs.
Set Up Time:	2 minutes
US-22T .....	\$85.00
US-22BT Black .....	\$99.00

### US-44T Utility Stand

The US-44T Utility Stand is constructed of 1 1/2" diameter aluminum alloy tubing. The products' 6 1/2 lb. structure securely holds up to 75 lbs. of equipment. The tubing goes through a special etching and anodizing process to create a rich matte look to complement any piece of equipment it upholds. The top dimensions are 15 3/4" x 34 1/8". The two support bars can be placed in any of four positions for various equipment widths. When set up, the US-44T's 36" height is perfect for mounting keyboards, lighting consoles, mixing boards, etc. The entire stand disassembles to slip into a slender 40" long waterproof nylon tote bag, which is included. Additional features include: double capped skid resistant feet, locking type nuts, and rubber pads to keep equipment from sliding.

US-44T .....	\$110.00
US-44BT Black .....	\$125.00

### VT-44 Versa Table

The VT-44 is ideal for elevating large synthesizers and keyboards; mixing consoles, lighting controls, and other paraphernalia. The VT-44 is constructed of lightweight aluminum alloy tubing. The deep etch and clear anodize gives the quality appearance that complements any type of equipment that is placed on it. The VT-44 features individually adjusting legs (seven height settings). Coupled with the absence of long braces, this enables the VT-44 to straddle rows of theatre seats, sit securely on uneven ground and tilt to adjust to individual preferences. The tabletop is constructed of 1/8" oil tempered hardboard and is covered with heavy black vinyl. The edging is constructed of vinyl clad metal, providing tough protection all around. The tabletop dimensions are 22" by 44". Height can be adjusted in 2 1/4" increments between 20" and 33". A brace under the center of the tabletop gives a solid working surface capable of supporting 250 lbs. of equipment. Spring buttons and ball-lock pins make setup and breakdown a snap. Double capped skid resistant feet are glued on to stay in place. A tough waterproof nylon tote bag for easy transportation and storage is available separately.

#### Specifications

Height:	20"-33"
Tabletop Dimensions:	22" x 44"
Load Capacity:	250 lbs.

# VIDEO MATTING EQUIPMENT

Newsmatte-2

Ultimate-300

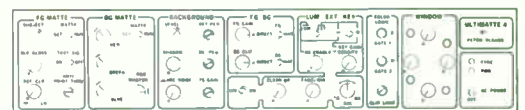

## Ultimate®/Newsmatte™ Video Matting Equipment

All Ultimattes and Newsmattes can composite transparent objects, fine detail such as hair or smoke, out of focus objects, reflections and shadows. They can all matte on blue, green or red; and all permit the foreground subject to touch the backing without causing fringing or break-up in the composite. They all remove blue spill from the foreground subject while reproducing blue foreground colors. They all have a clean up control to remove unwanted shadows or defects in the backing and a black gloss control to deal with black glossy surfaces in the foreground. All have a positive matte output.

## 200W Mini Spotlight

- Rugged spotlight
- Suited for location or studio
- Can be used as a keylight, backlight, or a kicker
- Can also be mounted on a camera as a camera light
- Focus knob is located in back, and can be flooded or spotted with an even field

## 650W Dowie Spotlight

- Easy access to globe
- Swing away door
- Cooler
- Better flood
- Rugged construction
- Baked Enamel Hi Temp finish

The Dowie is a rugged spotlight, ideally suited for location or studio work. It can be used as a keylight, backlight, or a kicker. Focus knobs are front and back, and can be flooded or spotted with an even field.

## 1000W Hot Shot Spotlight

- Small, compact 4 1/2" fresnel
- Can be used as a keylight, backlight or a kicker
- Precise gear focus movement
- Mounts on any stand or hanger with a 5/8" standard pin
- Front and rear focus knobs
- Top swings back for easy access to globe

# SOFTLIGHTS

## 750W/2000W/4000W Softlights

- Easy to use
- Easy to set up
- Rugged construction
- Hidden light trough
- Excellent ventilation
- Cooler operation
- Special diffusing paint
- Baked power finish

All three models provide virtually shadowless light with a smooth field. Their rugged construction makes them ideal for location or studio applications. The light comes indirect, using a trough system. Designed with cameramen and gaffers in mind, using additional ventilation systems, the softlights create a much cooler performing light with savings on gels, paint, and globes. Accessories include a variety of lamp configurations, gel frames, and a unique "egg crate" light control.

# STANDS/BRACKETS

T/3350/TGB

MSU-1232

## T/3350/TGB

### Heavy-Duty Single Column Stand

- Height adjustable from 38" to 55"
- 26" x 31" base with 10cm ball bearing wheels
- Shelf tilt:  $\pm 15^\circ$
- Shelf dimension: 18" x 18"
- Capacity: 120 lbs.

T/3350/TGB . . . . . \$409.02  
T/3350/TGB with braked wheels . . . . . 512.22

## MSU-1232

### Monitor Suspension Unit

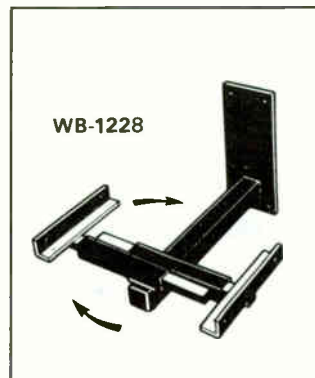

- Can be ordered for low headroom installations
- Minimum dimension of 8"
- Supports up to 150 lbs.
- Adjusts for monitors 12" to 32" wide and 14" to 24" high

The MSU-1232 has a wide range of adjustment to accommodate different sizes of television receivers and monitors. Full swivel and tilt adjustment is also provided. The unit comes complete with 77" of suspension column (or shorter lengths if required) and a standard mounting plate.

MSU-1232 . . . . . \$336.60

TCB/552/TPC/Tilt TPK

WB-1228

# CONNECTORS/DISTRIBUTION BOXES

## Pin Connectors

A quality line of heavy-duty electrical wiring connectors that are practically indestructible. Made of molded impact phenolic, XX grade laminated phenolic, and vulcanized fiber.

Our connectors have excellent dielectric, tensile, and impact strength, as well as heat resistance from 105°C to 170°C.

The electrical capacity exceeds U.L. requirements.

The flat style reduces possible accidents and allows heavy weights on the connector without breakage.

The round contact pins assure positive connections.

# PIN PLUGS

## 2P & GMCL HARJ-Plug Pin Plug

- 15/20 amp. 2 pole and ground pin plug that locks on ground pin
- Little pressure needed...just squeeze to lock and squeeze to unlock
- Exclusive HARJ-Plug feature
- Will fit all female grounded pin connectors now being used
- Will lock with all female connectors with grip design
- Will fit all 15/20 amp. receptacles i.e. branch-off flush receptacles, outlet panels
- Will lock with all receptacles that are marked HARJ
- Shipping Weight: 4 oz. each

2P & GMCL .....\$7.24

2P & GMCL

## 2P & GFCS Shielded Pin Plug

- Fits all male grounded pin plugs now being used
- High impact non-conductive housing
- Any arcing confined within the connector cavity
- Pins recessed (accidental touching impossible)
- Good chemical resistance
- Exclusive shield feature
- Fits male HARJ-plug
- Shipping Weight: 3 oz.

2P & GFCS .....\$5.60

2P&GFCS Shielded  
Pin Connector  
With Male Plug

## 2 Pole - 3 Wire Grounding Pin Plugs

- U.L. listed/OSHA acceptable
- Wire directly into pin, no soldering. Eliminates costly labor of crimping lugs
- Finger-tip locking mechanism
- Safe-all contact made within the shield of the connector, all arcing confined internally (60 amp only)
- Patented spring lock on all flush receptacles and male inlets
- Less area needed for receptacles and inlets than any single phase units made
- With dead front construction accidental touching impossible
- Compatible with all grounded pin plugs now being used
- High impact non-conductive housing

# ENCLOSURES/PANELS/ OUTLET BOXES

### 20/30/60/100RE Recessed Enclosures \*

- Inlets (male) can be mounted behind the face of panels without sacrificing space
- Eliminates damage to the pins and adds a higher safety factor during installations and when in use
- No loss of space in depth of box, minimum increase of space on centers between inlets or receptacles
- Easy to assemble
- Recessed enclosures available without inlets and receptacles

20RE .....	\$ 6.00
30RE, 60RE, 100RE .....	10.00

\*Enclosure only. Wiring device purchased separately.

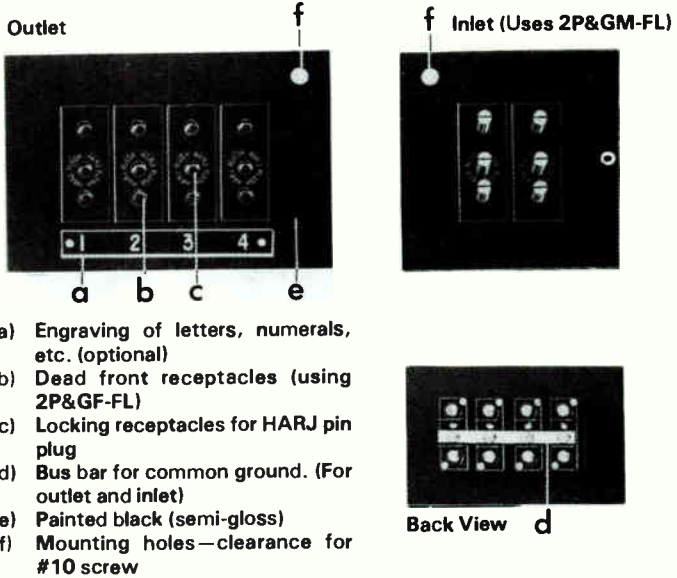

### 20PS Steel Outlet and Inlet Panels

- Engraving of letters, numerals, etc. (optional)
- Dead front receptacles (using 2P&GF-FL)
- Locking receptacles for HARJ pin plug
- Bus bar for common ground. (For outlet and inlet)
- Painted black (semi-gloss)
- Mounting holes - clearance for # 10 screw

Regular outlet/inlet panel comes in twelve standard sizes. All other outlet/inlet panels made to customer's specifications must have a minimum width of 3" for U.L. and OSHA acceptance.

Outlet Panels		Inlet Panels

# NUMERIC CONTROL PANELS

## Numeric Control Panels

- Loophrough coax control connection
- Wide variety of panels and mounting styles
- Continuous status readout
- Single-bus, multiple-bus and full-matrix models
- Optional encoding — permits addressing sources by name
- Audio and video select buttons for separate switching and statusing
- Simultaneous audio and video switching from different inputs (CSP-300R only)
- No custom components or proprietary software
- All keycap and write-in strip graphics provided

## CPD/PL Desktop Party Line Control Panel

This panel consists of an attractive enclosure mounting a pair of lever switches for input selection plus a Take button. It connects to one of the AVS-1 or AVS-1B party lines by means of a single rear-mounted connector. The CPD/DL is battery powered thus eliminating the need for an AC power cord. The CMOS and "LS" TTL circuitry consume power only when a new input selection is made. Thus, battery life of several years can be expected in normal operation.

## CSP-1 and CSP-2 Lever Switch Control and Status Panels

These panels utilize lever switches for data Preset and Take buttons for switch execution. Two-digit numeric readouts indicate crosspoint status on each assigned bus on data from the matrix refresh memory. Breakaway switching is accomplished by an Audio-Only button.

## CSP-10 10 or 20 — Bus Control and Status Panel

This panel provides an inexpensive means of controlling up to 20 buses. Ten two-digit numeric indicators provide continuous status information on ten randomly assigned buses while associated Take buttons permit input selection on each bus. New input data is entered by means of a ten-key touchpad which, with associated two-digit readout, sets up input selection data prior to being switched on one or more buses. As with other numeric panels, the addition of coding PROMs and relegendable keycaps permits addressing and statusing each device by its "familiar" name.

## CSP-10C

This panel provides the same features as the CSP-10, but mounts as a front panel on the matrix rack frame and includes a matrix card restraint bar (not pictured). It is most often used in remote van installations where matrices are typically smaller and rack space is at a premium. Mounting height, including 20 x 20 AV matrix or 30 x 10 AAV matrix, is 10 1/2".

## CSP-100 Group/Units Control and Status Panel

This panel, in its non-encoded form, permits addressing up to 100 inputs using two groups of buttons for Tens and Units data entry. With encoding PROMs added each two-button combination addresses a randomly assigned source. This allows the Tens buttons to be assigned group names so that, in combination with the numeric Units buttons, sources can be addressed by their familiar names (VTR-8, TBC-2, etc.). New selections within the same group require only a single keystroke allowing for rapid A/B comparisons such as camera matching. Breakaway buttons provide for separate audio and video switching and statusing. Mounting height is 1 3/4".

## CSP-20/CX-20 Button-Per-Source Panels

The CSP-20 Control and Status Panel with an associated CX-20 Expansion Panel provides button-per-source selection of from 20 to 140 inputs. Each new selection requires only a single keystroke and each button is identified by the source name printed on the label strip.

## SC-150 Supervisory Control Panel

The SC-150 Panel provides separate three-digit numeric displays for video and audio statusing. Data entry for up to 160 output buses and 160 sources is by lever switches. Audio and video breakaway switches plus a status-request button are also provided. The keylock switch permits disabling the panel as to switching all buses except one bus (typically a system maintenance or quality control bus) while enabling it to momentarily status any other bus. 3 1/2" rackmount.

## CSP-300R Full Matrix Control and Status Panel

This panel provides touchpad data entry and Preset and Active two-digit displays for both audio and video. Input selection data entered from the ten-key touchpad is displayed by either one or both of the preset displays until the Take button is depressed. If different data is entered for audio and video, the two matrices are each switched to their respective selected inputs when the Take button is depressed.

## ROUTING SYSTEMS

### AVS-1B Routing Systems

- 60MHz Video Bandwidth—no obsolescence with conversion to MAC or HDTV video signals
- Sync-tip clamping of video inputs and outputs
- No control buffer cards used—worst-case failure is single 10 x 10 card
- Multi-sourced, discrete components—no proprietary circuits
- Fully reprogrammable with no downtime
- 10-year memory retention of reprogrammed data and matrix status
- Single or redundant power supplies with failure alarms
- Source/destination lockout capability
- Single-motherboard design for fully operational extender card servicing
- Up to eight individually-addressable levels
- 320 inputs/unlimited outputs maximum size per level
- Secondary combining matrices not required regardless of system size
- Automatic control card switchover with alarm—No undetected failure disasters
- Redundant "Plug-In" cooling fans
- Regenerative time code matrices
- Four user ports, RS-232 and RS-422
- Loophrough coax control panel interconnection via four isolated party lines
- Control panel source names assigned by customer—not by manufacturer
- BNC video and compression-type audio connectors—interface panels not required
- SALVO switching from computer terminal

### Master Control Switching

The AVS-1B Routing Switcher is also used as the switching matrix for Utah Scientific Master Control Switchers. In this system, sources are selected by router crosspoints then processed as necessary by the master control mainframe. Some of the advantages of this approach to master control switching are:

- All sources feeding the router are available to the Master Control Switcher
- System timing is greatly simplified since all sources are normally in proper time at the router inputs and the delay of a separate master control matrix needn't be accommodated
- In automated systems additional matrix buses can easily be controlled for multiple output feeds, off-line recording, etc.
- Overall system cost is significantly reduced

### Integration with Machine Control

AVS-1B switching systems can be integrated with either of the two machine control systems offered by Utah Scientific. The PLMC-1 party line system can, in many instances, share the matrix party lines. Where the more sophisticated SMC-1 machine control system, with its high speed DYNABUS™ communications network, is used, interconnection with the AVS-1B party line is accomplished at the DYNABUS User Interface/Diagnostic panel. With either system, machine control assignments can either follow or be independent of A/V switches.

### User Control Ports

The PL-160 Control and Memory Card furnished with each system incorporates multiple user ports to allow matrices to be controlled and/or monitored by various external devices. Two ports support RS-232 protocol and are brought out to standard RS-232 connectors on the rear panel. Another port supports RS-422 protocol while a fourth port can be internally strapped for either RS-232 or RS-422 operation.

AVS-1

### System Reprogramming

The relationship between source and destination names and their associated matrix inputs and outputs is subject to change as equipment is replaced and systems are expanded.

To alleviate this problem, Utah Scientific has incorporated reprogrammable, non-volatile memories in all its recent panel designs, with the PL-160 Control and Memory Card and the system party lines acting as the reprogramming medium.

The write-cycle time for the RAM memory used in Utah Scientific panels is typically faster, by a factor of 60,000:1, than the EPROMS used by other switcher manufacturers. This permits the reprogramming data to be interspersed with party line control commands and refreshment words. The result is system reprogramming with no downtime.

While RAM memory retention (by Lithium batteries) is typically ten years, with or without AC power applied, it is still backed up by factory-programmed PROMs that down-load into RAM if a check sum error ever occurs on panel start-up or reset.

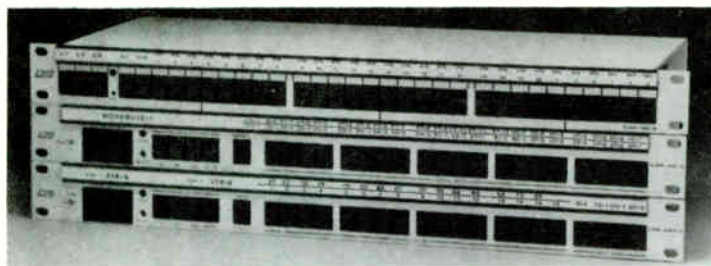

A customer-furnished "dumb" terminal is used for reprogramming. This same terminal can be used for entering and executing SALVO switch commands and source and destination lockouts.

### Power Supply Systems

Two separate power supply systems may be supplied with Utah Scientific switchers. Where space permits, one or two (for optional redundancy) diode-isolated PS-1B supplies are installed in matrix card cages. In other systems the PS-2 redundant power supply system, powering an entire rack of matrix frames, is furnished. The PS-1B system has both audible and external-contact failure alarms, while the PS-2 system offers an optional scanner/alarm panel that continuously scans 36 circuit points creating both audible and external-contact alarms while identifying the trouble source upon failure detection.

# ROUTER CONTROL PANELS

CSPD/4

## Reprogrammable Router Control Panels

- All panels are reprogrammable with no system or panel downtime
- Program-Select switch doubles bus capacity of most panels
- Sixteen group names to satisfy needs of modern TV plants
- Group names assigned by customer—not by manufacturer
- Up to 1600 possible source names provided by most panels
- Touchpad entry of source, destination or panel lockouts
- 10-year retention of user-programmed data, power on or off
- Multi-bus panels provide instantaneous status readout for each level upon selection of new bus
- Single coax party line control connection
- Industry's widest range of reprogrammable, alphanumeric, multi-level panels
- Full matrix/maintenance panel performs various system diagnostics

Reprogrammable Router Control Panels provide individual control and status of up to four switching levels (matrices). Designed to operate with either AVS-1 or AVS-1B Routing Switchers, these panels provide a high degree of user-defined flexibility. All panel operations are straightforward, requiring a minimum number of keystrokes to switch or status multiple levels. Other functions, such as source or destination lockouts and panel lock are also entered from the keyboard in a logical manner.

Panels may be reprogrammed as to source and destination names or output bus assignments. This is accomplished over the routing system's party lines in conjunction with the PL-160 Control and memory card. Reprogramming is achieved without interrupting system operation or removing the panel from service.

Panel memory is Lithium battery-supported RAM, typically providing 10-year memory retention with or without AC power applied. Nevertheless, factory-programmed PROMs are also incorporated which download into RAM if a check sum error occurs on panel start-up or reset. The write cycle time for the RAM is 60,000 times faster than that typical of the E<sup>2</sup>PROMs used by other manufacturers, permitting reprogramming data to be interspersed with party line control commands and refresh words.

Panels are reprogrammed using a customer supplied "dumb" terminal connected to one of the PL-160 Control and Memory card's user ports. This same terminal may also be used for entering and executing SALVO switch commands and source and destination lockouts.

Control panels range from simple, button-per-source, single bus units to a sophisticated full matrix/diagnostic unit that operates in either numeric or alphanumeric modes while performing a variety of switching system diagnostics.

CSPD-4

Four-level deskmount controller. Full matrix (or multi-bus or single bus as programmed). 3" H x 6 1/2" W x 6" D

CSP-30/4

Button-per-source four-level controller to select 30 randomly assigned sources. 1 1/3" rackmount

CX-30/4

30-button panel to expand CSP-30/4 to 60 sources. 1 3/4" rackmount

CSP-40/4

Button-per-source four-level controller to select 20 (or 40 by means of Program Select switch) sources. Includes alphanumeric status display. 1 3/4" rackmount

CSP-260/4

Four-level controller to select from one to sixteen sources within each of sixteen groups. Includes four direct-take buttons plus alphanumeric status display. 1 3/4" rackmount

CSP-1601/2

Two-level controller to select up to 100 sources within each of sixteen groups. 3 1/2" rackmount

CSP-1605/2

Two-level 5-bus controller to select up to 100 sources within each of sixteen groups. 3 1/2" rackmount

CSP-1610/2

Two-level 10-bus (or 20-bus with Program Select switch) controller to select up to 100 sources within each of sixteen groups. 5 1/4" rackmount

CSP-1600/4

Four-level single-bus (or 2-bus with Program Select switch) controller with separate Preset/Status displays for each level. 3 1/2" rackmount

CSP-1601/4

Four-level single-bus controller with separate Preset/Status displays for each level. 1 3/4" rackmount

CSP-1605/4

Four-level 5-bus (or 10-bus with Program Select switch) controller with separate Preset/Status displays for each level and five output bus select buttons. 3 1/2" rackmount

CSP-1610/4

Four-level 10-bus (or 20-bus with Program Select switch) controller with separate Preset/Status displays for each level. 5 1/4" rackmount

CSP-16160/4

Four-level full matrix (or multi-bus as programmed) controller with separate Preset/Status displays for each level plus output bus display. Specially programmed to perform system diagnostics. 3 1/2" rackmount

# POWER CONVERTERS

## Series 20 Inverters

- Produces full designated wattage continuously regulated 120VRMS power from idle to high RPM, and is not affected by high or low deviations in battery voltage
- Produces a pulse width modulated waveform with less than 14% harmonic distortion
- Frequency controlled by a 30 parts per million quartz crystal for 60Hz time base
- Capable of operating all types of electrical AC loads including resistive and reactive (either inductive or capacitive) without distortion. This is necessary for operating various types of medical and broadcasting equipment
- Operates on only 30W at no load, and is over 87% efficient at full load, for more usable AC power. The 24V model, ideally suited for helicopter use, provides 1500W continuously with 2200W surge and is 92% efficient
- Light weight—only 26 lbs.

- Compact size—8" x 6" x 13" for convenient installation
- Lighted remote control switch kit and quick connect battery terminals are standard equipment
- Built-in 120VAC transfer switch is also available for shore power equipped vehicles

ENG Inverters are the most advanced products designed and engineered for the inversion of electrical power from battery to line current. The high efficiency, regulated control of frequency and voltage, light weight and compact size, and undistorted waveform make it effective for use in ambulances, fire trucks, boats, mobile broadcasting, and utility vehicles. Its efficiency, current control and reliability combine to make this the most outstanding product of its type manufactured today.

Power Belts

## Power Belts

VDO-PAK offers the most complete range (from 6 to 20AH) of battery power belts for the home videophile. All belts feature auto reset circuit breaker for safety and ease of use. All belts utilize a modular design that allows upgrade of smaller belts and use of larger belts at half capacity for reduced carry weight. Power belts are supplied with regulated high output float charges. From full discharge, the belt will regain full capacity within 14 hours, and will never overcharge, regardless of how long it is connected to the charger. All VDO-PAK power belts provide comfortable, balanced 12VDC power for all applications.

## SP-650 Soft Pak

The SP-650 battery pack is a small convenient source of 12VDC power. The heart of the SP-650 is a sealed, maintenance-free 6.5AH gelled-electrolyte power cell, the same as used in the VDO-PAK Power Belts. The Soft Pak is packaged with a charger, a fused cigarette lighter cord, and a fully adjustable belt.

## Portable Power Supplies

The VP-20 and the VP-16 are compact, regulated power sources for use with camcorders and portable VCR/camera combinations. It is no longer necessary to take a large, bulky tuner/timer "on-location" to operate your portable VCR. Camcorder power supplies can be left free to charge internal batteries. With use of an optional charging clip, selected models of batteries can be recharged with the high output (2000mA) VP-20. The ultra compact VP-16 (1600mA) can power any camcorder and most portable VCRs.

VCR/Camcorder Replacement Batteries

## Camcorder/VCR Replacement Batteries

VDO-PAK covers a broad range of camcorder and portable VCR batteries with its line of replacement batteries. All batteries meet or exceed the performance of the original equipment battery. Batteries for all current model camcorders are available, including Sony 8mm and JVC VHS-C units. Batteries are also available for older camcorders and portables, and for professional cameras, monitors, and recorders.

### PH-258 Vel-Flo 8 Fluid Effect Panhead

A 3-way fluid effect panhead designed to provide smooth and continuous panning with home video cameras and camcorders for professional looking results.

The matte black finished Vel-Flo 8 features a quick release camera mounting platform, extra long (10 1/2") sure-grip pan and tilt control handle, tension adjustable panning lock knob, built-in bubble level, plus pan and tilt degree marks. The 3-way head provides 360° pan, 75° up tilt and 90° down tilt.

**PH-258** ..... \$69.95

PH-258

### PH-268 Vel-Flo 10 Fluid Effect Panhead

This fluid effect panhead is designed to give video cameras the smooth, continuous panning and tilting of professional productions.

The Vel-Flo 10 Panhead has a quick release camera mounting platform for fast, easy camera removal, a built-in leveling bubble, and an adjustable control handle that can be mounted for right or left handed operation. Vel-Flo 10 has a 360° pan, 75° up tilt and 90° down tilt. Both pan and tilt movements have adjustable tension controls.

# LINE ISOLATORS/GENERATORS/ FAULT INDICATORS

## VL-1PC Video Line Isolator

The unique "opto-coupled" video line isolator improves the overall performance of your video system by providing 80dB of isolation between input and output grounds.

Common-mode ground loop problems caused by different AC power ground potentials are eliminated. Video input and output are rear panel insulated BNC connectors. A hazard lamp on the front panel indicates dangerous ground potential voltages. Balanced audio isolation with a rear panel barrier strip is optional.

**VL-1PC** . . . . . \$278.00  
**VL-1APC With audio option** . . . . . 345.00

Front

Rear

VL-1PC

## 100 NTSC Color Sync Generator

The 100 Color Sync Generator provides subcarrier, sync, blanking, burst flag, horizontal drive, vertical drive, and black burst outputs. This NTSC unit insures that all cameras, monitors, VCRs, character generators, editing, and duplicating equipment are locked on exactly the same frequency. For increased capability a built-in VDA-2P distribution amplifier is optional (100DA). The VAC color sync generator is a 117VAC unit in a cabinet. Input and outputs are BNC connectors on the rear panel. A power indicator is located on the front panel.

**100-2PC Sync generator with black burst** . . . \$706.00  
**100DA-2PC As above with 1 in 3 out VDA** . . . 870.00

100-2PC

## PG-2PC Color Pattern Generator

The PG-2PC provides 5 test patterns: Full Field Color Bars, Split Field Color Bars, Full Field Blue Gun, Cross-Hatch, and Black Burst. Up to 64 customer specified alphanumeric characters can be switched on to any test pattern. It is genlockable and will run on 117VAC or 12VDC. It can also provide a 1000Hz audio test tone and a field 1 ID flag. Its subcarrier phase is adjustable. Options include: up to 11 additional customer specified test patterns, an additional customer specified alphanumeric screen, and an additional multi-burst or black burst output.

**PG-2PC** . . . . . \$1130.00

Front

Rear

PG-2PC

## VS-2PC Video Squelch

The Video Squelch is an automatic two input, one output video switch. If the quality of the main input signal falls below the user predefined setting on the front panel dial, the output is switched from the main input to the alternate input, a power relay trips, and a defeatable audible alarm sounds.

**VS-2PC With mono audio follow video** . . . . \$1030.00

Any or all of the following may be added to the VS-2PC:

**SA Stereo audio** . . . . . \$206.00

**AT Terminated audio** . . . . . 103.00

**XLR XLR audio connectors (3 or 4-pin)** . . . . . 52.00

**RC Remote control** . . . . . 206.00

# SWITCHES/ALARMS/ DISTRIBUTION AMPLIFIERS

## VPS-1P Video Activated Power Switch

When this failsafe unit senses a signal, it provides AC power to any device plugged into it. It is useful in remote applications, inaccessible units, and many other applications. Available as a kit for installations in existing equipment or as a complete self contained unit.

VPS-1P Assembled and tested PC board . . . . . \$108.00

VPS-1P

## APS-1P Audio Activated Power Switch

When this failsafe unit senses a signal, it provides AC power to any device plugged into it. It is useful in remote applications, inaccessible units, and many other applications. Available as a kit for installations in existing equipment or as a complete self contained unit.

APS-1P Assembled and tested PC board . . . . . \$108.00

AA-1P

## AA-1P Audio Alarm

This failsafe unit automatically monitors an audio signal. It will sound a clearly audible alarm upon any loss of audio for more than 12 seconds. Available as a kit for installations in existing equipment or as a complete self contained unit.

AA-1P Assembled and tested PC board . . . . . \$108.00

## VA-1P Video Alarm

This failsafe unit automatically monitors a video signal. It will sound a clearly audible alarm upon any loss of video for more than one second. Available as a kit for installations in existing equipment or as a complete self contained unit.

VA-1P Assembled and tested PC board . . . . . \$108.00

VDA-1

## VDA-1/VDA-2P Video Distribution Amplifiers

These distribution amplifiers provide a loopthrough input, 6 outputs, adjustable -3 to +3dB gain, and 20MHz bandwidth for reliably distributing video to a number of devices. The VDA-2PC is a 117VAC unit in a cabinet. Input and outputs are rear panel BNC connectors. Test points, power indicator and gain control are located on the front panel. The VDA-2P is the 117VAC unit without a cabinet. The VAD-1 is a 12VDC unit without a cabinet.

VDA-1 Assembled and tested PC board for 12VDC . . . . . \$182.00

VDA-2P Assembled and tested PC board for 117VAC . . . . . \$206.00

PDA-2P

## PDA-2P Pulse Distribution Amplifier

A 1 in 6 out pulse distribution amplifier with loopthrough input, and 75 ohm outputs adjustable from -3.5V to -4.5V. These output pulses are regenerated by the amplifier so that dirty input signals are actually cleaned up.

PDA-2P Assembled and tested PC board . . . . . \$206.00

## ADA-2P Audio Stereo Distribution Amplifier

A 1 in 6 out audio distribution amplifier with loopthrough input, 600 ohm isolated balanced or unbalanced outputs, 20Hz to 80kHz bandwidth, and up to +15dB output.

ADA-2P Assembled and tested PC board . . . . . \$206.00

ADA-2P

## DA 10-2PC Distribution Amplifier Assembly

Four or five of any combination of our VDA-2P or PDA-2P distribution amplifiers may be ordered in one full rack width cabinet.

DA 10-2PC With four distribution amplifiers . . . . . \$1030.00

DA 10-2PC With five distribution amplifiers . . . . . \$1288.00

# VIDEO DATA SYSTEMS

Hauppauge, NY 11788-2001  
(516) 231-4400

## CG-2000 Commander Character Generator System

The CG-2000 is a stand alone display channel providing full color displays of alphanumeric information and limited graphics. In addition, an externally supplied video signal may replace the internal color background to provide camera pictures in a selected region of the screen. The unit may be interfaced to a variety of external devices providing bidirectional information and control capabilities—e.g., inputs may be weather transducers, computers, data services, etc. and outputs can be made to control, in real time, tape recorders, switchers, etc.

### Genlock

System locks to composite video permitting internal downstream keying, even to 1/2" tape players. Internal adjustments for horizontal positioning and subcarrier phase.

### Resolution

70ns per font element provides 26 characters per row.

### Font (standard)

128 characters defined as 64 upper case ASCII letters, numbers and standard symbols.

- 26 lower case letters
- 26 special European Alphabetic characters
- 12 other special symbols

Each character in a font is defined in a 24 x 64 element box. Vertical elements are selected for display depending on height selected.

### Font (optional)

Total of 8 fonts of 128 characters each (total 1024 characters) downloadable from diskette. Customer specified fonts can be created.

### Font Height

Character heights are definable on a row basis from 4 scan lines to 252 scan lines.

### Memory

The diskette and system RAM memory are organized as files. Each file has a capacity of up to 394 lines of text.

### Diskette Capacity

Absolute maximum capacity in rows: 14,000

### Display Format

Provides mixed displays of page files, crawl files and roll files.

### Display Regions

The screen can be divided into 6 regions, each region has its own definable memory which dynamically displays its own group of files.

### Time Display

The system maintains a real time clock with battery back-up. The time of day in date, month, year, day of week, hours, minutes and seconds may be placed anywhere on a page.

In addition, either a count-down or count-up clock reporting hours, minutes, and seconds since being enabled may be placed anywhere on a page.

### Display Speeds

When sequencing the pages of a display file, each page may be assigned an individual dwell time to be from 1 to 63 seconds, or from 4 to 63 video frames, to provide the visual effect of animation.

### Palette

A 16 color palette is defined for each page: 8 colors for Background and 8 for Character.

A palette entry can define a color as any one of 512 available colors.

# CHARACTER GENERATOR SYSTEM

CG-2000

### Help

Each function key has its own Help page recallable by the operator at any time.

### Real Time Control (scheduling)

Both automatic display of text information and external event control can be determined by a single real time control file.

**External** The system provides the ability to control up to 16 external events by means of TTL logic levels. The resolution of control is  $\pm 1$  second.

**Display Selection** Selection of files for automatic display sequencing based on the hour, minute, second and day of the week is provided.

**Automatic Operation** The system can be configured by the operator to automatically start, or resume, interpreting the commands of a real time control file upon power on. This permits fully unattended operation in the event of a power failure.

**Weather Input** Optional software is available to provide interfacing to a Heathkit weather sensor package, model IDW 4001. Custom software can be supplied for other models of weather instrumentation.

**External Input** Optional software is available to interface to any one of the standard newswire services which provide RS-232 ASCII coded data interfacing.

### Machine Control

Any device or machine which could be conceivably controlled by a contact closure of TTL logic level is a candidate for the CG-2000. With this software, it becomes a master controller of automated program presentations by regulating the display sequence of a variety of sources.

### Applications

**Message** Ideal for text and message display channels in CATV, hotels, industrial facilities, SMATV operations where quality and readability are essential.

**Advertising** Easily created display ads with high visual impact can be automatically inserted into satellite delivery programs on cable or can be inter-mixed with other data to create automatic display channels for cable, SMATV or point of sale applications.

CG-2000 Commander 2000. . . . . \$3995.00

### Options

**Weather Software/Interface** . . . . . \$500.00

**Weather Instruments** . . . . . 700.00

**Standard Fonts** . . . . . each/200.00

**Custom Fonts** . . . . . each/400.00

# TITLER/DISPLAY

## VS-3000 VidStar Titler/Display

VS-3000

### System Features

- Color Background** Choose any of 512 colors for any scan line.
- Color Characters** Character and edge color separately selected from 512 color array.
- Fonts** Two fonts are standard. Up to 8 may be installed.
- Graphics** Font with basic graphic symbols available. Custom logos and graphic symbols optional.
- Resolution** 30ns character resolution assures smooth curves and clear edge definition.
- Genlock** Unique circuit design lets the VidStar lock to most NTSC video signals, even to 1/2" tape players.
- Video Output** Output is NTSC standard.
- Data Input** RS-232 serial data at up to 9600 baud.

### Display Features

- Proportional Spacing** Characters are automatically spaced according to their width.
- Line Spacing** Spacing between text lines is operator adjustable.
- Overlap** Characters, graphics and logos can be incrementally positioned on the screen and can be set to overlap for eye catching effects.
- Edging** Full control of character edging allows selection of edge width and height. Edge may be all around or shadow with variable angle.
- Character Slant** Slant is selectable on a character basis in 31 increments to the left or right.
- Video Windows** External video windows of different sizes, shapes and screen locations can be programmed and used for creative special effects.

### Applications

- Titling** The VidStar is the logical choice of industrial TV Productions, Low Power television stations, CATV, schools and institutional TV studio applications.
- Message Displays** VidStar is ideal for text and message display channels in hotels, industrial plants, SMATV operations where quality and readability are essential.
- Advertising** Easily created display ads with high visual impact can be automatically inserted into satellite delivered programs on cable or can be intermixed with news text or other data to create automatic display channels for Cable, SMATV or point of sale applications.

Whether you program the VidStar with your own computer, an Apple II with VidStar Software, or add it to a Video Data System's Microsystem II, you can have a broadcast real time titler/display that is cost effective and highly adaptable.

VS-3000 . . . . . \$3695.00

**VIDEO DATA SYSTEMS'  
ULTRA DISPLAY CHANNEL.  
It's what was missing!**

# EDITING SYSTEMS

Eagle

## Eagle I, II and III Editors

### Standard Features for all Eagle Editors:

- 250 event memory
- Auto-Edit
- Auto-Tag
- Multi-Split Edits
- Frame Accurate (Micro-Loc or SMPTE)
- Upgradeable
- Control up to 6 transports (optional)
- Printer output
- Status display generator
- On-line "Help" Functions
- Distributed Intelligence
- Animation
- Transitional data entry

### Eagle System Specifications

**System Configuration:** Distributed intelligence using independent transport control processors. Electronics, rack-mount

**Central Processor:** Z80A 8-bit microprocessor

#### Transport Control

**Processor:** Z80A 8-bit microprocessor

**Software Programs:** Contained in EPROMs (non-volatile) or optional disk operating system

#### Communication

**Format:** RS232C/serial printer; parallel to Transport Control Processor  
Serial printer

#### Edit List Output:

**Maximum Number of Devices**

**Controllable:** 5 source, 1 record

**Edit Accuracy:** Frame accurate, color framed with SMPTE or Micro-Loc; machine dependent with control track

**Time Code Standards:** SMPTE drop/non-drop frame, EBU

**Television Standards:** NTSC/PAL/SECAM/PAL-M

**Keyboard:** Remote, dedicated

**Motion Control:** Dual proportional shuttle arms

**Chassis:** 5 1/4" H x 19" W x 22 1/4" D

**Weight:** 32 lbs.

**Keyboard:** 4" H x 21" W x 11 7/8" D

**Power:** 110/220/240VAC; 48 to 62Hz

**Disk Package:** (optional) 3 1/2" H x 19" x 13 1/4" D

**Weight:** 25 lbs.

- Eagle I** 2 machine, 250 event, animation, printer output. Unit has built in sync generator with sync, 3.58 and two black burst outputs . . . . . **\$8,250.00**
- Eagle II** All the features of the Eagle I plus full list management functions including: Insert Event, Delete Event, Move Event, Index, Ripple, Auto-Clean and Slide . . . . . **\$9,500.00**
- Eagle III** A/B roll system includes all the features of the Eagle II plus a third TCP module, Z6006 multi-level transition switcher control, and Z6007 monitor switcher and GPSI unit. (Specify switcher to be used.) . . . . . **\$16,500.00**
- Eagle 900** Special edition includes 250 events, A/B roll, Z6006 switcher driver, 3 TCP modules, printer port, basic slow motion control, and list management . . . . . **\$13,750.00**
- Magnum** A/B roll, rackmount electronics, 250 event, 8" dual disk operating system, software assignable transports, CMX disk translator, expanded list management, printer output, 5 general purpose contact closures, animation, sync roll, diagnostics. Slow motion control is included, if transports specified are capable. Basic system includes serial switcher interface for all popular switchers and 3 transport control processors (serial or parallel, specify transports). System can handle up to six transports by adding additional TCP modules . . . . . **\$23,500.00**

### Eagle/Magnum Editing Options and Accessories

- Micro-Loc II** Intelligent Micro-Loc reader generator. Specify VTR type. . . . . **\$825.00**
- TCP-3** Complete set of hardware and software for serial interface of additional transports to the Magnum. (Specify type transports) . . . . . **\$2,750.00**
- TCP-SM** SMPTE/EBU time code reader option for use with TCP-3 on parallel type VTRs . . . . . **\$500.00**
- EA 100** Single 5 1/4" disk file storage and retrieval system. Includes one 5 1/4" drive, rackmount chassis, disk controller card and software. (not for the 900) . . . . . **\$1,995.00**
- EDOS-1** Dual 5 1/4" disk operating system. Includes 2 each 5 1/4" drives, rackmount chassis, disk controller board and operating software. System also includes Version 2.00 enhanced list management, assignable VTRs, slow motion control. (Eagle II or III only) . . . **\$5,000.00**
- ZDOS-1** Dual 8" disk operating system. Includes 2 each 8" drives, rackmount chassis, disk controller board and operating software. System also includes Version 2.00 enhanced list management, assignable VTRs, slow motion control and translator to CMX compatible disk. (Eagle II or III only) . . . . . **\$7,500.00**
- Z6007** Contact closure and general purpose interface. Includes audio and video monitor switcher and software control of 5 separate contact closures for use with external devices. (This unit is standard with Eagle III and 900) . . . . . **\$1,000.00**

### Upgrade or Changeout Charges

- TCP Changeout** (VTR Change) Includes software and cable swap for one VTR. If second half of TCP-3 board is ordered active, add \$900.00. . . . . **\$1,000.00**
- EA-DOS to EDOS-1 upgrade** . . . . . **1,000.00**
- Z6004 to ZDOS-1 upgrade** . . . . . **1,250.00**
- Eagle 900 to any higher model** Plus price difference in models . . **1,000.00**

# EDITING CONTROLLERS

Mickey

Controller

## Mickey 1 and 2 Editing Controllers

- "Mouse" input control • Frame accurate (using SMPTE time code)
- 50 event internal memory • 2 VTR control • Built-in video mixer with 2 channel audio follow mixer • Multiple split edit capability • Automatic external trigger for additional effects devices • Printer output port (RS-232) • Interfaces to most popular VHS, U-Matic, 1/2" and 1" type "C" VTRs • Upgradeable to Mickey 2

### Standard Features of Mickey 2

- Mickey 2 includes all of the features mentioned for Mickey 1 plus:
- 3 VTR A/B roll capability • Full auto-drive of internal audio/video mixer

All editing operations on Mickey are achieved by movement of an opto-mechanical "mouse" which will highlight various squares presented on a data display monitor.

The left-hand button of the two button "mouse" activates the function highlighted on the monitor. The right-hand button controls VTR motion (Play, Pause, Variable Speed, Jog, Shuttle, etc.)

### Distributed Intelligence

Mickey uses distributed intelligence. That means each VTR has its own dedicated computer (VSIO unit) controlling it. Distributed intelligence is the only method by which consistent frame accuracy of a system can be maintained. Mickey provides protection against obsolescence since expandability is assured by the fact that distributed intelligence is used.

### High Speed LAN

The VTRs require no modifications. Mickey's main computer communicates to all VSIO units in the system via a single BNC coax cable. A defective VTR or VSIO unit can be located, isolated and replaced or removed literally within seconds. This high speed Local Area Network (LAN) is a remarkable technological breakthrough.

Mickey's software is just as impeccably designed as its hardware. This mouse driven system is easily the fastest editor to use. Mickey can automatically find a match cut point, extend an edit and clean the edit list with one single stroke, procedures that take any other editing system countless keystrokes.

## Specifications

- System Configuration:** Distributed intelligence using independent Transport Control Processors. (VSIO Units)
- Central Processor:** Z80A 8-bit microprocessor
- Transport Control Processor:** Z80A 8-bit microprocessor
- Software Programs:** Contained in EPROMS (non-volatile)
- Communication Format:** RS232C/serial printer; Co-ax LAN Loop to Transport Control Processors
- Edit List Output:** Serial printer

- Inputs:** Mouse, Audio (2 channel, 2 source, 1 record), REF (black burst or composite sync), CF (color frame ID pulse, required only for certain VTRs), Video (2 source, 1 record)
- Maximum Number of Devices Controllable:** 2 source, 1 record
- Edit Accuracy:** Frame accurate, color framed w/SMPTE or Micro-Loc; machine dependent w/control track
- Time Code Standards:** SMPTE drop/non-drop frame, EBU
- Television Standards:** NTSC/PAL/SECAM/PAL-M
- Input Control Device:** Opto-mechanical Mouse
- Motion Control:** Full proportional speed using Mouse
- Video Dissolve:** Selectable rate 5 to 120 frames
- Audio Mix:** 2 channel stereo, same rate as Video
- Outputs:** Printer-DB9, Audio (2 channel) monitor and program, Video (monitor and program), Display 1V p-p composite

**Mickey 1** 2 machine cuts only editor with GPSI interface for external devices. Includes 50 event memory, mouse control operating system, printer port, 2 channel video dissolve and 2 channel stereo audio follow video dissolve. 2 VSIO-M distributed intelligence interface modules for serial control VTRs are included. (Specify VTR) . . . \$3,500.00

**Mickey 2** 3 machine A/B roll editing system with all features of Mickey 1 plus sync roll and A/B roll software, plus one additional VSIO-M distributed intelligence interface for serial control VTRs. (Specify VTR) . . . \$4,500.00

**VSIO-PS Option** This option must be ordered (one per VTR) for control of parallel VTRs i.e. type 5 U-Matics, JVC CR series. This option includes a SMPTE time code reader. This option may also be used with serial VTRs i.e. JVC 850s, BVUs to provide time code without the necessity of the optional VTRs internal time code boards . . . \$500.00

**PC-Link Option** PC board and software for adding any IBM (PC, XT or AT) computer to the Mickey LAN system. This allows edit list storage and retrieval to floppy disk or hard disk and direct keyboard data entry for the Mickey editing systems. This option is mandatory for use with the Mickey LM list management system . . . \$1,850.00

**LM Option** List management and EDL data basing software package for Mickey editing systems equipped with the PC-Link option. . . . \$950.00

# AUTOMATION/ANIMATION SYSTEMS

## AUTOMATION SYSTEMS

- Q-STAR II/A** Computer based 900 event, random access and/or sequential automated playback system. Includes 4 VSIO and VTR interfaces. Additional VTRs may be added by ordering additional VSIO units. Up to 20 devices may be controlled. Multiple keyboards may be added. Switcher included with system is a 10 X 1 AFV dual audio channel unit. (Call factory for other switcher possibilities). System also includes real-time clock/date generator, keyboard, electronics, serial printer port and control cables . . . . . \$ 9,250.00
- VMC-2000** Master control system includes IBM-AT compatible computer with EGA color card and color monitor, serial and parallel control ports, 20M hard disk, UPS battery backup, and high speed printer. Accepts logs from the VMC-3000. LAN software to control up to 20 Q-STARs and the VSIO master buffer. System includes 1 Q-STAR 4 machine channel. . . . . 29,000.00
- VMC-2000-2** As above but complete setup for two channel operation. Includes 2 Q-STAR 4 machine channels . . . . . 37,000.00
- VMC-2000-4** As above but complete setup for four channel operation. Includes 4 Q-STAR 4 machine channels . . . . . 49,000.00
- VMC-2000-8** As above but complete setup for eight channel operation. Includes 8 Q-STAR 4 machine channels . . . . . 78,000.00
- VMC-3000** Multi-user station management and traffic control center. Features contract generator, billing software, cuts sheet generator, log generator, sales tracking and report generator, and word processor. Maintains all data for up to 20 channels of operation. LAN System allows for up to 32 additional IBM compatible user stations. Center includes IBM AT compatible computer, EGA color card, color monitor, 20M hard disk, LAN server card and 1 LAN slave card, high speed printer, and UPS battery backup power supply . . . . . 28,500.00

### Options

- VMC-260A** FSK integrated operational software package. Stand-alone FSK encoding and verification station includes terminal, VTR interface, computer and software . . . . . \$3,000.00
- FSK-1** FSK data decoder (requires VSIO-1) . . . 500.00
- FSK-2** FSK CRT data display generator . . . 1,200.00
- SM-4** SMPTE time code reader (requires VSIO-1) . . . . . 500.00
- MDM-1** Modem and communications software. (VMC-2000, VMC-3000) . . . . . 1,695.00
- VSIO-1** Intelligent transport control interface module . . . . . 750.00

Q-Star II/A

ANI-MATE

- VMC-101V** Tone encoder for Q-STAR II or VMC-2000 systems. (Not used if FSK or SMPTE are used) . . . . . \$900.00
- LAN-1** Plug in slave card for placing any IBM compatible computer on VMC-3000 LAN network . . . . . 750.00

Control cable and connector for any U-matic or 1/2" VTR. For use with VSIO units or Q-STAR or VMC-2000 systems . . . . . 75.00

## ANIMATION SYSTEMS

- VS-5** 3/4" U-matic frame accurate animation system. Can be used stand-alone or controlled from an external computer via RS-232 interface. System includes Sony VO-5850 VTR with modifications, MICRO-LOC reader-generator, special VSIO and operating software . . . . . \$10,000.00
- ANI-MATE** Animation system for frame accurate edits on any Sony BVU, Betacam or BVH 2000 VTRs. Uses the 9-pin remote. VTR must be equipped with SMPTE time code reader . . . . . 850.00

# VIDEO EDITING SYSTEM

## DirectED Video Editing System

The system allows you to combine your favorite scenes, in any order, with special effects, graphics, titles, and backgrounds to make productions you'll be proud to show. The system contains a powerful video computer which knows the exact location of each scene and event in your home library. You can find any scene without manually searching through your tapes.

### Compatibility.

The system works with VHS, Beta, 8mm and 3/4" systems. Your VCR and camcorder (or second VCR) can use different formats.

To make a movie with DirectED, you select the scenes you want from your original tapes. DirectED can remember the names and locations of thousands of scenes. You can arrange scenes in any order. Making a movie can be as simple as marking the desired scenes and selecting which scenes to show, in which order. Then, with the press of a few buttons on the wireless remote control, DirectED will automatically place the scenes on a final production, telling you when to change tapes.

For more interesting movies, DirectED provides built-in titles, graphics, fades, and wipes. You can add titles to your scenes, in different fonts and sizes, on top of your video or on a colored background. Backgrounds and text come in 64 colors. You can add a color graphic to your movie, selecting from a set of pictures that are supplied inside DirectED. You can add text to the graphic. Finally, you can choose from 17 fades and wipes to move between scenes, backgrounds, and graphics, even fading the sound and picture separately.

DirectED is easy to learn and use. Instead of an elaborate control panel with knobs and switches, DirectED comes with a simple wireless remote control. Operating choices are presented on your television screen in a menu format. To make a movie, you simply progress down the menu. Each menu choice is explained in more detail at the bottom of the screen. When you need more, the red "Help" key on the remote control provides a full explanation.

All movies are made directly from the original tapes, not from a "working copy". The internally generated pictures, text, backgrounds, fades, and wipes are digitally generated by the built-in high-speed video computer so they're crisp, clear, and colorful. The computer accurately controls your VCR so that scenes are placed precisely and the transitions between them are as precise and clean as possible with the equipment you have.

### Expandability.

You can add inexpensive modules to your system to expand its capabilities. Like CollectED, the video jukebox. With CollectED attached to your Videonics system, the system keeps track of all your music videos for you. You won't have to remember which videos are on which tape and you won't have to search back and forth across a tape to find what you want. Instead, the names and artists appear on the screen. You use the remote control to move up and down the list, selecting the videos you want to see. Inexpensive modules such as CollectED add new capabilities to the Videonics system. They build on the system's high-speed video computer, exploiting its ability to memorize the names and whereabouts of your home entertainment materials, control your VCR, and process audio and video signals.

## Technical Information

The Videonics System uses a high-speed microcomputer, combined with custom audio-video circuitry and software.

Processor: NEC V40™ (a superset of the Intel 80186™ microprocessor). 8MHz clock with no wait states.

Software: Custom software developed using Turbo PASCAL™ from Borland International.

DirectED

Memory: 256K bytes RAM main memory.

Permanent memory: 8K bytes of non-volatile RAM with fail-safe backup power provided by dual redundant lithium cells with a minimum life of eight years. The same dual-lithium backup cells also maintain the settings of the system clock and calendar.

Digital information, including software, video library database, graphics, and storyboards are stored on videotape. The full 256K byte memory is saved in approx. 5 seconds with 16-bit CRC-16 error detection and redundant recording. Timing track on library tapes has a resolution of one frame. Each frame is uniquely identified.

Control: 50-key infrared remote control. Controls all system functions in combination with on-screen menus and Help screens. Infrared emitter attaches to VCR to control its functions. System "learns" remote control codes and characteristics of VCRs.

Audio: Four high-fidelity channels, controlled by system software over a range of 90dB in 1.5dB steps.

Graphics and video: Resolution of digitally generated graphics (using half-shift capability) is 768 x 480. Custom video circuitry combined with Motorola 1378 provides 64 colors, half-shift and shadow, ability to switch between external and internal video sources pixel-by-pixel.

Special effects hardware: Custom circuitry capable of detecting any of 64 video levels with full resolution. Cross fade between internal and external video with 64 levels.

Inter-module connection bus. Modules are connected through a bus with four video and four audio channels plus a 38K bit/sec. bi-directional serial data bus. The video and audio channels are connected through a crosspoint system—any source can be connected to any of the bus lines.

Power supply produces 26W. The system without modules uses only 5W, leaving 21W for future modules.

DirectED . . . . . \$499.00

# PROFESSIONAL RACKMOUNT COLOR MONITORS

## SYSTEM 8

**8" Broadcast Rackmount AC/DC Color Monitor With Comb Filter and Glare Shield. Includes TSM-5A Waveform Monitor and PVS-6 Switcher**

**Features Include:** Raster size regulation, de-gauss, keyed back porch clamping, A-B inputs, RGB gun switches, RGB background and drive controls, tally light, medium resolution 350 lines, comb filter, internal/external sync, anti-glare shield, rackmount accessories, selectable ACC defeat, and Service manual

**Options:** Pulse Cross, Underscan  
**Dimensions:** 8<sup>3</sup>/<sub>4</sub>" H x 19" W x 18<sup>1</sup>/<sub>2</sub>" D  
**Weight:** 40 lbs.

**Power Consumption:** 40W AC, 33W DC  
**Power Consumption/Entire System:** 95W  
**System 8** .....\$3595.00

## VM-8PRD

**Dual 8" Professional Rackmount AC/DC Color Monitor**

**Features Include:** Raster size regulation, de-gauss, keyed back porch clamping, A-B inputs, RGB gun switches, RGB background and drive controls, tally light, internal/external sync, selectable ACC defeat, rackmount accessories and service manual

**Options:** Pulse Cross, Underscan  
**Dimensions:** 8<sup>1</sup>/<sub>4</sub>" H x 19" W x 15<sup>3</sup>/<sub>4</sub>" D  
**Weight:** 57 lbs.

**Power Requirements:** 120VAC, 60Hz, 12 or 24VDC  
**Power Consumption:** 40W AC, 33W DC (ea. unit)

**VM-8PRD** .....\$2365.00

## VM-8PRW

**8" Professional Rackmount AC/DC Color Monitor with Space Provided for Videotek TSM-60 with Standard Case or VSM-60 with Standard Case.**

**Features Include:** Raster size regulation, de-gauss, keyed back porch clamping, A-B inputs, RGB gun switches, RGB background and drive controls, tally light, internal/external sync, rackmount accessories, selectable ACC defeat, and service manual

**Options:** Pulse Cross, Underscan  
**Dimensions:** 8<sup>3</sup>/<sub>4</sub>" H x 19" W x 15<sup>3</sup>/<sub>4</sub>" D  
**Weight:** 32 lbs.

**Power Requirements:** 120VAC, 60Hz 12 or 24VDC

**Power Consumption:** 40W AC, 33W DC  
**VM-8PRW** .....\$1250.00

**VM-8PRW-1** Same as VM-8PRW but with space provided for PVS-6 Switcher .....\$1260.00

## VM-8PT

**8" Professional Portable AC/DC Color Monitor**

**Features Include:** Raster size regulation, de-gauss, keyed back porch clamping, A-B inputs, RGB gun switches, RGB background and drive controls, tally light, internal/external sync, selectable ACC defeat, and service manual

**Options:** Pulse Cross, Underscan  
**Dimensions:** 9<sup>1</sup>/<sub>4</sub>" H x 8<sup>1</sup>/<sub>2</sub>" W x 16<sup>1</sup>/<sub>4</sub>" D  
**Weight:** 25 lbs.

**Power Requirements:** 120VAC, 60Hz, 12 or 24VDC

**Power Consumption:** 40W AC, 33W DC  
**VM-8PT** .....\$1265.00

## VM-8PR

**8" Professional Rackmount AC/DC Color Monitor**

**Features Include:** Raster size regulation, de-gauss, keyed back porch clamping, A-B inputs, RGB gun switches, RGB background and drive controls, tally light, internal/external sync, selectable ACC defeat, rackmount accessories and service manual

**Options:** Pulse Cross, Underscan  
**Dimensions:** 8<sup>3</sup>/<sub>4</sub>" H x 19" W x 15<sup>3</sup>/<sub>4</sub>" D  
**Weight:** 30 lbs.

**Power Requirements:** 120VAC, 60Hz, 12 or 24VDC

**Power Consumption:** 40W AC, 33W DC  
**VM-8PR** .....\$1195.00

## VM-8PRA

**8" Professional Rackmount AC/DC Color Monitor w/Speaker Cabinet**

**Features Include:** Raster size regulation, de-gauss, keyed back porch clamping, A-B inputs, dual audio inputs, RGB gun switches, RGB background and drive controls, tally light, internal/external sync, rackmount accessories, selectable ACC defeat, and service manual

**Options:** Pulse Cross, Underscan  
**Dimensions:** 8<sup>3</sup>/<sub>4</sub>" H x 19" W x 15<sup>3</sup>/<sub>4</sub>" D  
**Weight:** 32 lbs.

**Power Requirements:** 120VAC, 60Hz, 12 or 24VDC

**Power Consumption:** 40W AC, 33W DC  
**VM-8PRA** .....\$1450.00

HR-130

## Studio-13 Professional Rackmount Color Monitor

- 13" Trinitron® Plus color picture tube • 380 Lines of resolution • Selectable comb and notch filters • High voltage regulation • Separate H & V delay front panel adjustable • Split mode A-B display (front panel adjustable) • Automatic sync switchover to internal if external sync is lost, external sync indicator • Automatic degauss • Keyed back porch clamping • A-B-C looping video inputs • RGB video inputs • RGB gun switches • RGB background and drive controls • Tally light • Underscan • Presets — Chroma/Phase/Brightness/Contrast • ACC defeat (switchable) • Selectable time constant (H, AFC) • Monochrome select • Setup select • Aperture control • Rackmount slides • Service manual • Dimensions: 10 1/2" H x 19" W x 19" D • Weight: 52 lbs. • Power requirements: 120VAC, 60Hz ± 10% • Power consumption: 85W (Avg.), 120W (Max.)

Studio-13 .....\$2495.00

Studio-13

## VM-13PRO 13" Professional Rackmount Color Monitor

- Raster size regulation • Automatic degauss • Keyed back porch clamping • A-B-C inputs • RGB gun switches • RGB background and drive controls • Tally light, internal-external sync • Pulse cross • Underscan • Presets • Selectable automatic chroma control (ACC) defeat for detection of chroma loss • Monochrome-color select • Set-up switch • Selectable horizontal time constant (H, AFC) • Aperture control • Rackmount slides • Dimensions: 10 1/2" H x 19" W x 19" D • Weight: 48 lbs. • Power requirements: 120VAC, 60Hz ± 10% • Power consumption: 55W (Avg.), 80W (Max.)

VM-13PRO .....\$1695.00

VM-13PRO

## AVM-19s (19") and AVM-13s (13") Color Monitors with Audio

- Automatic degauss • Keyed back porch clamping • A-B-VTR inputs • Blue gun • Tally light • Internal-external sync selectable • Pulse cross • Underscan • External demodulator input • Internal audio speaker • 8-pin VTR cable (6") • Service manual (Switchable comb-notch filter • Power isolation transformer • B & W color switch • Sharpness control; AVM-19s only

### Specifications

**CRT:** Slot mask in-line, 90° deflection  
**Color Standard:** NTSC  
**Video Signal Level:** .8V to 1.2V p-p composite video loop through or switchable 75 ohm termination, negative sync  
**Video Inputs A-B VTR:** Switchable, better than 50dB at 4MHz isolation  
**Audio Input Level:** 350mVRMS (nominal) high impedance bridging  
**Audio Output:** 1.2W typical (10% distortion) 8 ohm internal speaker. (AVM-13s) 1.5W typical (10% distortion) 8 ohm internal speaker. (AVM-19s)  
**Connectors:** Video, external sync — BNC  
 Audio — RCA  
 VTR — 8-pin  
 External demodulator — 6-pin DIN (Direct interface with Sony TU-1110 tuner)  
**Resolution:** 280 lines horizontal. (AVM-13s) 350 lines horizontal with comb filter. (AVM-19s)  
**DC Restoration:** Keyed back porch clamping  
**Pulse Cross:** Switchable to display horizontal and vertical blanking intervals  
**Underscan:** Switchable to display 90% of full screen  
**External Sync:** 4V p-p (nominal) high impedance bridging, negative polarity  
**Power Cord:** 8', 3 wire ground  
**Options:** Rackmount adaptor (AVM-13s)  
**Dimensions:** 12 1/4" H x 14 1/2" W x 15" D (AVM-13s)  
 17 1/2" H x 19" W x 19" D (AVM-19s)  
**Weight:** 32 lbs. (AVM-13s)  
 60 lbs. (AVM-19s)  
**Power Requirements:** 120VAC, 60Hz  
**Power Consumption:** 80W (avg.) (AVM-13s)  
 100W (avg.) (AVM-19s)

# RGB MONITORS

## RGB/VM-25XB, RGB/RM-25XB

### 25" Analog and Digital RGB Monitors

- A-B inputs • External sync • Blue gun • Underscan • Switchable NTSC/RGB • Digital or analog • Sync on green (switchable)

RGB/VM-25XB 25" analog and digital RGB/NTSC combination monitor (IBM PC® Compatible) ..... \$2425.00

RGB/RM-25XB 25" Analog and Digital RGB/NTSC Combination Cable Ready Receiver/Monitor (IBM PC Compatible) ..... 2595.00

## RGB/VM-25XB/D, RGB/RM-25XB/D

### 25" Analog RGB Monitors

- A-B inputs • Automatic sync switching between RGB (Sync on green) and NTSC • Blue gun • Underscan • Increased vertical blanking time

RGB/RM-25XB

RGB/VM-25XB/D 25" Analog RGB/NTSC combination monitor (DEC® VT100 and 200 Series, Rainbow PC, Pro Series, DEC Mate 2 & 3 Compatible) ..... \$2855.00

RGB/RM-25XB/D 25" Analog RGB/NTSC Combination Cable Ready Receiver/Monitor (DEC VT 100 & 200 Series, Rainbow PC, Pro Series, DEC Mate 2 & 3 compatible) .. 2995.00

## RGB-25XBA 25" Digital or Analog RGB Monitor

- Designed to display RGB signals from computers having a scan rate of 25.745kHz • 25" Microblack Trinitron® CRT • DC restoration • Hand-held wireless remote control • Sync on green select • Underscanned raster • AT & T 6300 PC® compatible (16 color) • 25-pin D-subminiature connector for RGB inputs • Composite or separate horizontal and vertical sync—normal or inverted polarity • Internal/external sync select with looping BNC input • 2000 character display

RGB-25XBA ..... \$2995.00

RGB-25XBA

## CD-19HR 19" Analog RGB Monitor

- High resolution CRT capable of a clear display of 4,000 characters (approx. 1,000 pixels in screen center) • Black-matrix CRT Pii-Delta construction for stable, simple convergence of beam registration • Full range analog input • Video channel bandwidth, 50Hz to 25MHz (± 3dB) • 3 looping RGB inputs with selectable 75 ohm termination • Internal/external sync auto select • Multiple scan rates • Separate H and V drives • 19" rackmountable • Dynamic focusing • Multi mains input select • Selectable 3:4 or 1:1 aspect ratio

CD-19HR with cabinet (US-1 standard) ..... \$2850.00

CD-19HR

## CD-13HR 13" Analog RGB Monitor

- High resolution CRT capable of a clear display of 2,000 characters (approx. 700 pixels in screen center) • Black-matrix CRT Pii-Delta construction for stable, simple convergence of beam registration • Full range analog signal input • Video channel bandwidth, 50Hz to 20MHz (± 3dB) • 3 looping RGB inputs with selectable 75 ohm termination • Internal/external sync select set internally • Multiple scan rates • Multi mains input select

CD-13HR with cabinet (US-1 standard) ..... \$1995.00

### TSM-50 Waveform Monitor NTSC/PAL/PAL-M Standards Available

**Compact:** Mounts in 5 1/4" of vertical rack space and 1/2 standard rack width space  
525 lines, 30 frame (60Hz field rate) scan.

**NTSC (TSM-50):** 625 lines, 25 frame (50Hz field rate) scan.

**PAL, CCIR (TSM-50/P):** 525 lines, 30 frame (60Hz field rate) scan.

**PAL-M, CCIR (TSM-50/P-M):** 525 lines, 30 frame (60Hz field rate) scan.

**Vertical Frequency Response:** Flat to 6MHz

**Graticule:** Internal illuminated graticule; eliminates parallax errors

**Visibility:** High brightness CRT, non-glare contrast filter

**Inputs:** Selectable A/B video looping BNC inputs. AC or DC coupled

**Sync:** Selectable internal/external input

**Filters:** Flat, IRE, or chroma

**Time Base:** 2 line, expanded 2 line, 2 field or expanded 2 field

**Options:** Standard case, portable case, double rackmount case, blank panel

**TSM-50** ..... \$1598.00

### TSM-60 Waveform Monitor NTSC/PAL/PAL-M Standards Available

**Compact:** Mounts in 5 1/4" of vertical rack space and 1/2 standard rack width space  
Standard NTSC, 525 lines, 30 frame (60Hz field rate) scan

**NTSC:** Standard PAL, 625 lines, 25 frame (50Hz field rate) scan

**CCIR:** Standard PAL-M, 525 lines, 30 frame (60Hz field rate) scan

**Vertical Frequency Response:** Flat to 10MHz

**Graticule:** Internal illuminated graticule; eliminates parallax errors

**Visibility:** High brightness CRT, non-glare contrast filter

**Inputs:** Selectable A/B video looping BNC inputs. AC or DC coupled

**Output:** Separately buffered video out 1V p-p into 75 ohm termination

**Sync:** Selectable internal/external input

**Filters:** Flat, IRE, chroma or differential gain

**Time Base:** 2 line, 1 line, expanded 2 line, expanded 1 line, 2 field or expanded 2 field

**Line Select:** Selects lines 14 through 21 of field selected

**Field Select:** Field 1 or 2 selectable

**TSM-60** ..... \$2065.00

**YRGB/RGB:** 9-pin access connector for monitoring color processing amplifier waveforms

**DC Restoration:** Selectable

**Options:** Standard case, portable case, double rackmount case, blank panel

**TSM-60** ..... \$2065.00

### VSM-60 Vectorscope NTSC/PAL/PAL-M Standards Available

**Compact:** Mounts in 5 1/4" of vertical rack space and 1/2 standard rack width space

**NTSC:** Standard NTSC, 525 lines, 30 frame (60Hz field)

**CCIR:** Standard PAL, 625 lines, 25 frame (50Hz field)

**CCIR:** Standard PAL-M, 525 lines, 30 frame (60Hz field)

**Graticule:** Internal illuminated graticule; eliminates parallax errors

**Visibility:** Non-glare contrast filter

**Inputs:** Selectable A/B video looping BNC inputs, subcarrier A select, external subcarrier looping BNC inputs, external PAL pulse looping BNC inputs (PAL only)

**REF NTSC:** Selectable A/B and external subcarrier looping inputs

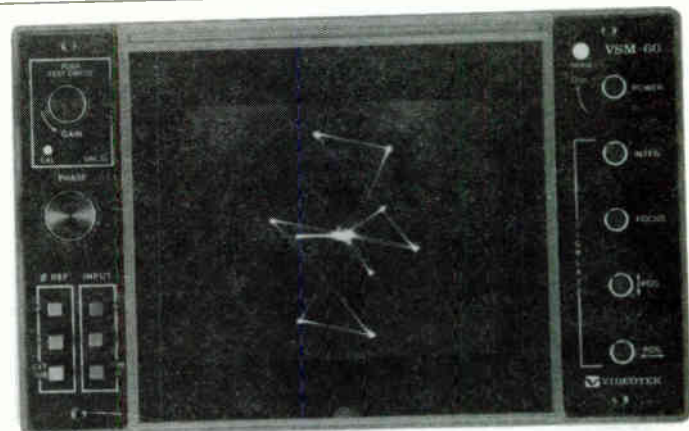

**REF PAL:** Selectable A or B and external subcarrier looping inputs

**Test NTSC:** Normal/alternate line/test circle pushbutton selectable

**Test PAL/PAL-M:** Normal/NTSC display/test circle pushbutton selectable

**Options:** Standard case, portable case, double rackmount case, blank panel

**VSM-60** ..... \$2065.00

**Options for TSM-50, TSM-60, VSM-60**

**SSC-1** Single standard case ..... \$ 39.00

**PTC-1** Portable case w/handle & sunshield ..... 135.00

**DRC-1** Double rackmount case ..... 200.00

**BLK-1** Blank panel ..... 30.00

**OPT-A** Remote change over for TSM-60 ..... 135.00

# TEST EQUIPMENT

**TVM-620**

## TVM-620 Combination Waveform Monitor/Vectorscope

The TVM-620 combination waveform monitor/vectorscope sets the standard in half rack width test equipment. Microprocessor based and featuring tactile membrane control panels, the TVM-620 produces a variety of unique display modes.

One, two or three video signals may be observed individually or in any combination of three inputs. Waveforms can be displayed in either simultaneous parade modes or overlaid for comparison of timing and amplitude characteristics. It is also possible to display any one input with simultaneous flat, low pass and chroma filters.

Vector displays can also be overlaid for simultaneous observation and comparison of the phase and amplitude of up to three signals.

Four user-defined memories permit rapid recall of frequently used modes. Diagnostic testing of the front panel controls and LEDs is built-in.

An R-Y mode displays the demodulated chrominance with horizontal sweep. When the burst phase is properly aligned in the vector mode, this mode displays the R-Y signal (V axis in PAL, PAL-M) as a processed video waveform. A graticule scale is provided to aid in measuring differential phase. This display can be viewed simultaneously in the parade mode with one or two additional filter waveforms.

Display sync can be made relative to any of the three video inputs or an external reference. The TVM-620 will automatically select a reference, in order of priority External-A-B-C, with the loss of external reference or the selected video reference signal.

The TVM-620 is available with an optional AC/DC power supply (ADC-1). An external DC power source or battery may be input via a 4-pin XLR connector for portable field use.

## Specifications

### Electrical Characteristics Vertical Deflection System (Waveform Mode)

<b>Flat:</b>	Frequency response from 25Hz to 15MHz $\pm 1\%$ of 50kHz response. 15MHz to 20MHz + 3%, -5% of 50kHz response 40dB attenuation at $F_{SC}$ , Low Pass response within 1% Flat response
<b>Low Pass:</b>	Response at 3.58MHz NTSC, 4.43MHz PAL, 3.57MHz PAL-M does not vary between Flat and Chroma by more than 1%. 7.2MHz attenuation is 25dB or greater
<b>Chroma:</b>	Flat mode using $\sin^2$ pulse bar signal 0.99:1 to 1.01:1
<b>Transient Response:</b>	$\leq 1\%$ 140 IRE units $\pm 1\%$ with 1V input $\pm 3.5V$ (DC + peak AC) 100k ohm at $< 10pF$ (unterminated) > 50dB, DC to 10MHz Input signals between 0.5V and 2.0V can be adjusted for 1V display (140 IRE)
<b>Pulse to Bar Ratio:</b>	
<b>Tilt With Field Rate Squarewave or Vertical Window or 25<math>\mu</math>s Pulse Signal:</b>	
<b>Deflection Factor 1V Full Scale:</b>	
<b>Maximum Absolute Input Level:</b>	
<b>Input Impedance:</b>	
<b>Return Loss (75 ohm)—Inputs A, B, C:</b>	
<b>Input Gain Range:</b>	

### Horizontal Deflection System (Waveform Mode)

<b>Timebase Line:</b>	Always displayed with no sync on video inputs
<b>V Timebase:</b>	Equal to x1, x2 or x3 of the field rate of applied video or external reference. (User selected Parade modes)
<b>V Sweep Magnification:</b>	x5
<b>H Timebase:</b>	Equal to x1, x2, or x3 of the H line rate of applied video or external reference. (User selected Parade modes)
<b>H Sweep Magnification:</b>	x10
<b>Timing Accuracy:</b>	Mode: 1H, HMAG (0.5 $\mu$ s/div) $\pm 2\%$ ; 2H, HMAG (1 $\mu$ s/div) $\pm 2\%$ ; 3H, HMAG (1.5 $\mu$ s/div) $\pm 2\%$ $\leq 2\%$ over complete horizontal position range excluding first and last major division
<b>Linearity:</b>	
<b>DC Restoration</b>	
<b>Restorer Clamp Time:</b>	Back porch

<b>Low Frequency Response at 60Hz:</b>	Attenuation of 60Hz added to input signal is $\leq 5\%$ . DC restoration switched from off to on
<b>Blanking Level Shift Due to Presence or Absence of Burst:</b>	$\leq 1$ IRE
<b>Blanking Level Shift with 10-90% APL Change:</b>	APL changes from 50% to either 10% or 90% will cause blanking level shift of $\leq 1$ IRE
<b>Calibrator (Waveform Mode)</b>	
<b>Frequency:</b>	100kHz, $\pm 0.1$ kHz. Synchronizes in H sweep modes providing reference for sweep and magnifier calibration
<b>Amplitude:</b>	1.0V $\pm 0.5\%$
<b>Vector Mode:</b>	Displays test circle for sweep linearity check and quadrature alignment
<b>Video Output</b>	
<b>Frequency Response:</b>	DC to 6MHz, $\pm 1\%$
<b>Differential Gain:</b>	2% at 50% APL with 140 IRE units displayed
<b>Differential Phase:</b>	3% at 50% APL with 140 IRE units displayed
<b>DC Level On Output:</b>	$\leq \pm 100mVDC$ into 75 ohm
<b>Output Impedance:</b>	75 ohm, nominal
<b>Amplitude:</b>	1V Cal input is 1V $\pm 2$ IRE for 140 IRE unit display
<b>Return Loss:</b>	> 40dB, DC to 5MHz
<b>Synchronization Requirements</b>	
<b>Internal Reference:</b>	Composite video or blackburst with sync and burst amplitudes 286mV, $\pm 6dB$
<b>External Reference Waveform Mode:</b>	Sync amplitude between 143mV and 4V will synchronize sweeps
<b>Vector Mode:</b>	Composite video at blackburst with sync and burst amplitudes 286mV, $\pm 6dB$
<b>Input Impedance:</b>	100k ohm at $< 10pF$ (unterminated)
<b>Return Loss (75 ohm):</b>	> 50dB, DC to 10MHz
<b>Vector Mode</b>	
<b>Chrominance Bandwidth:</b>	3dB points
<b>Lower:</b>	3.03MHz $\pm 150kHz$ - NTSC; 3.88MHz $\pm 150kHz$ - PAL; 3.02MHz $\pm 150kHz$ - PAL-M
<b>Upper:</b>	4.13MHz $\pm 150kHz$ - NTSC; 4.98MHz $\pm 150kHz$ - PAL; 4.12MHz $\pm 150kHz$ - PAL-M
<b>Phase Control Range:</b>	360° minimum, 400° typical. (Vector and R-Y modes)
<b>Vector Accuracy:</b>	$\leq 2^\circ$
<b>Differential Gain:</b>	$\leq 1\%$
<b>Differential Phase:</b>	$\leq 1^\circ$
<b>Variable Gain Range:</b>	12dB minimum, +6dB to -6dB typical with 1V input
<b>Gain Stability:</b>	< 2% $\Delta$ from 0°C to 50°C. AC mains varied $\pm 5\%$ from center of range
<b>Subcarrier Regenerator</b>	
(Phase locked to subcarrier on burst signal of designated reference.)	
<b>Nominal Frequency:</b>	3.579545MHz - NTSC; 4.433619MHz - PAL; 3.575611MHz - PAL-M
<b>Pull-In Range:</b>	Within 50Hz of $F_{SC}$
<b>Phase Shift with Subcarrier Frequency Change:</b>	< 0.025° per Hz deviation from: 3.579545MHz - NTSC; 4.433619MHz - PAL; 3.575611MHz - PAL-M
<b>Phase Shift with Burst Amplitude Change:</b>	< 0.5° per dB change in burst amplitude for 6dB change from nominal burst amplitude
<b>Phase Shift with Reference Switched Between Internal and External References:</b>	$\leq 0.5^\circ$
<b>Phase Shift with Input Channel Change:</b>	$\leq 0.5^\circ$
<b>Phase Shift with Variable Gain:</b>	$\leq 0.5^\circ$ as gain is varied from +6dB to -6dB
<b>Multiple Display Mode Measurement Accuracy</b>	
<b>Waveform Overlays (H Mag):</b>	$\pm 100nS$ - Relative; $\pm 1$ IRE - Relative
<b>Vector Overlays:</b>	$\pm 1^\circ$ - Relative; 1 IRE - Relative
<b>Microprocessor Control System</b>	
<b>Microprocessor:</b>	Low power, 65C02 at 4MHz
<b>Memory:</b>	1 year typical (self charging battery)
<b>Diagnostics:</b>	Built-in front panel test mode
<b>Physical Characteristics</b>	
<b>CRT</b>	
<b>Display Size:</b>	B x 10cm
<b>Graticule:</b>	Internally etched with variable scale illumination. Scales provided for Waveform, Vector, and R-Y
<b>Cabinet:</b>	5.25" H x 8.5" W x 17.75" D (13.3 x 21.6 x 46cm)
<b>Weight:</b>	16 lbs. (7.3kg)
<b>Power Requirements</b>	
<b>AC Power Source:</b>	108-132VAC or 216-264VAC at 48Hz to 250Hz line frequency. Nominal line voltage is 120VAC $\pm 10\%$ at 48Hz to 66Hz; 240VAC $\pm 10\%$ at 66Hz to 250Hz. (Internal jumper selectable)
<b>Main Crest Factor:</b>	1.41 $\pm 5\%$
<b>DC Power Source (optional):</b>	12VDC at 3.5A nominal
<b>Input Range:</b>	10 to 14VDC
<b>Power Consumption:</b>	45W typical AC; 42W typical DC

**TVM-620 . . . . . \$3995.00**

# DISTRIBUTION AMPLIFIERS

## MODULAR SERIES

### 800 Series Distribution Amplifiers

The 800 Series Distribution Amplifiers are engineered to meet critical video distribution needs in all types of applications. The 800 Series is based on the TR-800 eight bay modular tray and PS-800 power supply. Up to eight distribution amplifier modules may be mounted in the TR-800 tray, in addition to a second PS-800 power supply for backup in case of primary supply failure.

The VDA-816S is a standard video DA with one looping single ended input and six outputs. Up to 300' of Belden 8281 may be equalized via a front card equalizer adjustment.

The VDA-816 is a precision video clamping DA with one looping differential or single ended input and six outputs. An optional EQ-800 card may be added to the VDA-816 to allow front panel adjustment of equalization up to 1000' of Belden 8281.

### TR-800 Modular DA Tray

- Eight bay modular two rackmount high tray • Will accept any combination of VDA-816 precision DAs or VDA-816S standard DAs • Also permits the use of a redundant back-up PS-800 supply
- Comes standard with a single PS-800 supply

**TR-800** .....\$850.00

### PS-800 Redundant Power Supply

- Provides unregulated  $\pm 16$ VDC to the TR-800 rack tray • An additional PS-800 can be installed as a back-up supply in case of primary supply failure

**PS-800** .....\$199.00

**EQ-800** Equalizing Module for VDA-816. Equalizes up to 1000' of Belden 8281 .....65.00

**EX-800** Extender Card for Servicing DA Modules .....90.00

### VDA-816 Precision Video Clamping DA Module

- Front card output level adjustment • Front card equalizer adjustment when optional EQ-800 equalizer card is employed • Can equalize up to 1000' of Belden 8281 • Switchable clamping or DC restoration • Modular plug-in card • One looping differential or single ended input and six outputs

**VDA-816** .....\$375.00

### VDA-816S Standard Video DA Module

- Front card output level adjustment • Front card equalizer adjustment can equalize 300' of Belden 8281 cable • Modular plug-in card • One looping single ended input and six outputs

**VDA-816S** .....\$250.00

## SELF-CONTAINED SERIES

### VDA-16 Video Distribution Amplifier

- One looping video input • Six isolated video outputs • Front panel output level adjustment • Cable equalizer front panel adjustment (300' Belden 8281) • Front panel input/output test points • Front panel LED power indicator • BNC input/output connectors
- Rackmountable

**VDA-16** .....\$325.00

800 Series

VDA-16

PDA-16

ADA-16

SDA-14

### VDA-16WB Wide Band Video Distribution Amplifier

- 40MHz video bandwidth • One looping video input • Six isolated video outputs • Front panel output level adjustments • Wide band cable equalization from panel to adjustment • Front panel LED power indicator • BNC input/output connectors • Rackmountable

**VDA-16WB** .....\$425.00

### ADA-16 Audio Distribution Amplifier

- One balanced/unbalanced audio input • Six balanced audio outputs • Front panel output level adjustment • Front panel input/output test points • Front panel LED power indicator • Barrier strip input/output connectors • Rackmountable

**ADA-16** .....\$325.00

### PDA-16 Pulse Distribution Amplifier

- One looping pulse input • Six pulse outputs • Front panel input/output test points • Front panel LED power indicator • BNC input/output connectors • Rackmountable

**PDA-16** .....\$325.00

### SDA-14 Subcarrier Distribution Amplifier

- One looping subcarrier input • Four isolated subcarrier outputs • Regeneration technique removes noise & distortion from input signal • Available for NTSC, PAL, PAL-M • Front panel 0°-360° output phase adjust w/0° preset • Front panel input/output test points • Front panel LED power indicator • BNC input/output connectors • Rackmountable

**SDA-14** .....\$450.00

### Options

For all self contained distribution amplifiers

**DAT-1** Rackmount frame accommodates (3) DA's. ....\$79.00

**DAT-2** Blank panel .....25.00

# ROUTING SWITCHERS

PVS-6A

## PVS-6A 6x1

### Audio Follow Video Passive Switcher

- 100% passive—no power requirements • Low insertion loss • Low video/audio crosstalk • Six video/audio (unbalanced) inputs • One video/audio (unbalanced) output • BNC video connectors • Barrier strip audio connection • 1<sup>3</sup>/<sub>4</sub>" rackmount height • Can mount three units side by side using a Videotek DAT-1 rackmount tray

PVS-6A ..... \$190.00

## PVS-6 6x1

### Passive Video Switcher

- 100% passive—no power requirements • Low insertion loss • Low video crosstalk • Six video inputs/one video output • 1<sup>3</sup>/<sub>4</sub>" rackmount height • Can mount three units side by side using a Videotek DAT-1 rackmount tray

PVS-6 ..... \$140.00

RS-10A

## RS-10A 10x1 Routing Switcher Series

### Audio Follow Video With Breakaway Feature

- Ten video inputs, bridging two video outputs • Two audio inputs for each video channel • Video/audio latching breakaway control • Balanced/unbalanced audio inputs or outputs • Overnight channel memory • Vertical interval switching/momentary contact pushbuttons with changeable legends and "LED" audio/video indicators • 1<sup>3</sup>/<sub>4</sub>" rackmount or free standing with rubber feet

RS-10A	10x1 Vertical Interval Switcher with Two Audio Channels and Audio (or) Video Breakaway Feature .....	\$1285.00
RS-10ARC	Remote 10x1 Vertical Interval Switcher with Two Audio Channels and Audio (or) Video Breakaway Feature, includes RCT-1 Remote Connector Kit .....	1885.00
RS-10ARC-L	Local portion of RS-10ARC only, includes RCT-1 Remote Connector Kit .....	1457.00
RS-10ARC-LS	Same as RS-10ARC, but with Switching capability at the Local and Remote Locations, includes RCT-1 Remote Connector Kit .....	2100.00
RS-10ARC-L-SW	Local portion of RS-10ARC-LS only includes RCT-1 Remote Connector Kit .....	1528.00
<b>Options (RS-10ARC, RS-10ARC-LS)</b>		
RSP-1	10x1 Remote Switching Panel (May be added to RS-10ARC or RS-10ARC-LS to provide a Second Remote Switching Location) .....	\$675.00
RCT-1	Remote Connector Kit .....	30.00
CR-1	Cable for Remote .....	ft./1.99

VIS-1201

## VIS-1201

### 12x1 Video Only Routing Switcher

- 12 video inputs, bridging/2 isolated video outputs • 24 hour channel memory • Vertical interval switching • Momentary contact illuminated pushbuttons with changeable legends • 1<sup>3</sup>/<sub>4</sub>" rackmount

VIS-1201 ..... \$395.00

RS-12

## RS-12 12x1 Routing Switcher Series

### Video Only Routing Switcher

- Video inputs, bridging/two video outputs • Overnight channel memory • Vertical interval switching/momentary contact pushbuttons with changeable legends and "LED" video indicators • 1<sup>3</sup>/<sub>4</sub>" rackmount or free standing with rubber feet

RS-12	12x1 Vertical Interval Switcher, Video Only	\$ 995.00
RS-12RC	Remote 12x1 Vertical Interval Switcher, Video Only, includes RCT-2 Remote Connector Kit .....	1263.00
RS-12RC-LS	Same as RS-12RC, but with Switching Capability at the Local and Remote Locations, includes RCT-2 Remote Connector Kit .....	1332.00
RS-12RC-L	Local portion of RS-12RC only, includes RCT-2 Remote Connector Kit .....	959.00

### Options (RS-12, RS-12RC, RS-12RC-LS)

RSP-2	12x1 Video Switching Panel with Remote Rackmount Kit (RRK-2) .....	\$395.00
RRK-2	Remote Rackmount Kit .....	172.00
BLK-2	Blank Panel .....	95.00
RCT-2	Additional Remote Connector Kit .....	39.00
CR-2	Cable for Remote .....	ft./1.22

RS-183A

## RS-183A 18x1 AFV Routing Switcher With Breakaway and Computer Interface

- 18 loop thru video inputs • 18 stereo and data channel audio inputs (balanced/unbalanced) • +24dBm audio headroom • Vertical interval line 10 switching • Edit pulse for user controlled switching times • RS-422 computer control interface • Optional RS-232 computer control interface • Computer control, menu driven for ease of operation • 15 selectable communication baud rates • Single line coax remote bus control • Multi-local addressing for remote selection of different locals • FCC approved EMI filtering

RS-183A	Includes audio I/O and computer connectors . . .	\$3045.00
RS-183ARC	Remote Control RS-183A, includes Audio I/O and Computer Connectors .....	\$3820.00
RS-183ARC-L	Additional Local for RS-183ARC, includes Audio I/O and Computer Connectors .....	2965.00
RS-183ARC-LS	Same as RS-183ARC with switching at both the Remote and Local Locations, includes Audio I/O and Computer Connectors .....	3897.00
RSP-3	18x1 Remote Switching Panel (may be added to RS-183A or RS-183ARC-LS to provide a Second Remote Switching Location) . . . .	899.00

# CAMERA SUPPORT EQUIPMENT

## "Eddie-Cam" Camera Stabilizer

- Shoots 1 1/2' above or below eye level
- Shoots ground level to waist
- Film: Arri 16SR; Aatton 16; Feathercam 35
- Video: Ikegami 79; Sony BVP3; All Mini-Cams 15 lbs.

"Eddie-Cam" is a lightweight handheld camera stabilizer that allows for smooth fluid camera moves while walking, running, skating or skiing. Designed for cameras under 15 lbs.

"Eddie-Cam" .....\$675.00

Top Mounted

## Barber "Baby" Boom

- Vertical boom span: 10'
- Horizontal swing: 12'
- Approximate weight: 90 lbs.
- Boom radius: 360° +
- Camera pan: 360° +
- Camera tilt: 180° +
- Approximate 15 minute set up
- Mounts on standard flat Mitchell mount (sticks, dollies, cranes)
- The boom works with most film and video cameras under 70 lbs.
- Film: Arri BL III; Panavision; Arri 3, 2C, 16SR
- Video: Betacam; Ikegami 79

The Barber "Baby" Boom requires only the cameraman to operate and control it. The camera is mounted on the end of the boom arm. You are at the other end with your hands on the two controls. You look into the video monitor and begin to track the action...fast, slow, whatever speed you need for the shot.

Barber "Baby" Boom .....\$12,000.00

## 20' Barber Boom

- Vertical boom span: 20'
- Horizontal swing: 22'
- Approximate weight: 100 lbs.
- Boom radius: 360° +
- Camera pan: 360° +
- Camera tilt: 180° +
- Approximate 15 minute set up
- Mounts on standard flat Mitchell mount (sticks, dollies, cranes)
- The boom works with most film and video cameras under 30 lbs.
- Film: Arri 3 (400' mags, primes); Arri 2C (400' mags, primes); Arri 16 SR
- Video: Sony BVP3; Ikegami 79

The Barber Boom is a remote controlled camera requiring only one operator to boom up and down, swing left and right, pan and tilt, zoom and focus, simultaneously; all in one smooth continuous motion.

Barber Boom .....\$20,000.00

# VIDEO IMAGE ENHANCER

## H & V Video Image Enhancer

The Horizontal and Vertical image enhancer represents a significant step forward in affordable image enhancement. The manipulation of picture elements line-to-line (vertical enhancement) as well as within a scan line (horizontal enhancement) gives an improvement of picture detail and clarity unattainable with simple horizontal enhancement.

The H & V Enhancer minimizes detail loss. The visual clarity of pictures is significantly improved when used with Videotape Productions and Video Projection Systems and the editing and duplication of 3/4" and 1/2" recordings. Other applications which will benefit from the use of the H & V Enhancer include video camera taping and film-to-tape transfers.

The image enhancer features 2H processing of vertical detail, noise reduction and split screen comparison. 2H processing utilizes information from three successive lines to form a symmetrical enhancement signal. Noise usually increased by enhancement is minimized by a combination of two techniques: coring which reduces noise in all areas of the picture and a Level-Dependent circuit which suppresses enhancement in the darker areas of the picture where noise is more visible. A split screen mode allows side-by-side comparison of unenhanced and enhanced video.

H & V Video Image Enhancer . . . . . \$ 1295.00

## Specifications

### Operating Controls Enhance/ Split Screen/ Bypass

Enable/Disable enhancer circuitry for total picture comparison

### Chroma, normal/ -1H delay

The -1H (minus one line delay) feature is especially useful when dealing with systems that introduce a one line chroma delay or smear i.e. PAL decoders, single tube color cameras etc.

### Front Panel Power on/off

### Variable Controls Split-Screen position

Operates only when Enhance/ Split-Screen/ Bypass switch is in the Split-Screen mode

### Horizontal Detail

Controls horizontal enhancement of only low amplitude textural picture information

### Horizontal Aperture

Controls horizontal enhancement of high frequency picture information

### Vertical Aperture Enhancement Noise Reduction

Controls amount of vertical enhancement

### Coring

Used to minimize noise amplified by enhancement

### Black

Reduces enhancement in areas of low picture luminance which decreases the visibility of enhancement-amplified noise

### Video Input Level

### Video Output Level

### Frequency Response

Unity in reference to input  
Within +1, -3dB to 4.5MHz (NTSC). Y/C crossover 2.9MHz (all variable controls counter-clockwise, enhance switch in enhance position)

### Maximum Enhancement

NOTE:

Greater than +12dB for H. Detail, H. Aperture, or V. Detail

Excess enhancement is clipped above 20% of peak video white and below 25% of sync (referenced to back porch). Clippers will adapt to changes of video level within the limits of the video input specification. Enhancement is gated off during both horizontal and vertical blanking intervals.

### Vertical Tilt Video Inputs

Less than 2%

### Video Outputs

1 (high impedance loop-thru w/75 ohm termination switch)

### Connectors

4

### Power

1 special (enhance signal on 50% setup with sync)

### Cabinet Type

110VAC 20W—220VAC available on request

### Dimensions

Rackmount with detachable mounting brackets

Height 1 3/4"

Width 17"

Depth 11 3/8"

Weight 7 lbs.

### Shipping Weight

14 lbs.

PAL (4.43MHz)/SECAM available on request

# IMAGE ENHANCERS/ SPECIAL EFFECTS GENERATOR

## DET-300 Detailer III Image Enhancer

- Corrects for sharpness and detail losses
- Allows enhancement before recording
- Separate color and monochrome operation modes
- Level-dependent video noise (snow) reduction
- 4 selectable video/stereo-audio inputs
- 4 video/stereo-audio outputs and video/audio distribution amplifier
- Accessory-loop connection
- Enhance/bypass switching
- 12V operation
- Steel cabinets with anodized aluminum front panel and knobs
- 20-20kHz  $\pm$  1dB frequency response
- -60dB max hum and noise
- Dimensions: 2 $\frac{3}{8}$ " H x 15" W x 8 $\frac{1}{8}$ " D
- Weight: 5 lbs. 3 oz.

DET-300 . . . . . \$269.95

DET-300

## VCP-100 Video Color Processor

- Can operate with a camcorder with a composite video output and a TV; between two VCRs; between a camera and a VCR; between a VCR and a TV; and between a cable box and a TV
- Can be powered from a 110VAC or 12VDC source and used virtually anywhere
- Automatic Fade capability allows "fade to black" when editing videos and provides smooth fades without audio/video "noise"
- Corrects the side effects of "low light" shoots with camcorders (or cameras)
- Variable brightness, color and hue circuits let you control brightness and color not just on playback, but directly onto videotape
- Built-in RF modulator enables equipment operation with a standard television set
- Built-in Distribution Amplifier provides two video outputs, allowing two recordings at once without signal voltage loss; also allows permanent output connections to multiple VCRs or other video components

VCP-100 . . . . . \$219.95

VCP-100

## IVE-200 Integrated Video Enhancer

- Auto-Stabilizer controls picture roll and "jittery", "tearing", "flashing" video seen with some videotapes and television sets. The stabilizer also overcomes playback problems associated with Macrovision and copyguard-encoded tapes
- Image Enhancer improves picture sharpness and detail using two separate controls
- VN<sup>X</sup>™ video noise reduction reduces possible side-effects of enhancement
- RF Modulator allows direct connection of the IVE-200 to a television set
- Distribution Amplifier sends video information to two devices without any signal loss
- Stereo Audio inputs and outputs for best sound
- Quality Construction includes an all-metal cabinet for durability and shielding from interference, industrial-grade, double-sided circuit board for high reliability, low noise, and improved performance, and anodized aluminum control knobs

IVE-200 . . . . . \$239.95

IVE-200

## SEG-200 Special Effects Generator

- Finger-touch pattern menu for selection of effects
- Automatic or manual control over all fades, wipes, and cuts
- Effects can be retained on-screen for setup prior to using automatic mode
- Fade/wipe to color backgrounds which are variable using a simple slide control
- Standard fade-to-black is also possible
- Create soft-edge patterns and vary from a hard clean pattern edge to a soft, halo-like effect using a slide control
- Variable pattern shapes using the slant angle slide
- Automatic transition time for fades and wipes is variable from 1/2 to as long as 5 seconds
- Video sources can be either synchronous or nonsynchronous
- 20-20kHz  $\pm$  1dB
- Black burst sync
- Automatic A-B input switching
- -60dB max. hum and noise
- 2.97" H x 16.79" W x 9.88" D
- 8.44 lbs.

SEG-200 . . . . . \$529.95

# IMAGE ENHANCER/ STABILIZER/SWITCHERS

## AVP-100 Audio/Video Processor/DET-400 Detailer® IV Advanced Image Enhancer

### Common Features

- Individual sharpness and detail controls • VNX™ enhancement noise reduction system • Four buffered output tracks and four switchable inputs • Selectable Dynamic Noise Reduction (DNR™)
- Optional split screen • Audio and video are controlled with electronic digital switches

### Detailer Features

- Individual horizontal and vertical sharpness control • Black noise reduction system

DET-400 .....\$419.95

### A/V Processor Features

- Tri-color LED metering system • Luminance control • Color control adjust color saturation • Hue control makes color correction possible during playback or while taping

AVP-100 .....\$459.95

AVP-100

## PLR-100 Play-Right™ Digital Video Stabilizer

- Stabilizes video signals from any camcorder or VCR • Eliminate changes in brightness, color flashing, loss of color, picture rolls, and jittering when playing back copy-protected movies • Digital processing removes all "unwanted" information, then generates a new video signal that is clean, stable, and accurate • Corrects playback problems associated with: Copy-protected videotape/VCR playback incompatibility; VCR/television (or monitor) incompatibility; Weak control tracks found on camcorder-recorded videotapes and poorly duplicated movies

PLR-100 .....\$129.95

PLR-100

## AVS-100 A/V Switcher 4 x 4 Matrix Switcher

- Sends any one of four inputs to any or all of four outputs • Integrates all audio and video equipment • Connects up to 4 VCRs or audio cassettes at one time for multiple copying • Switches the audio and video signals from each input separately • Vertical interval switching lets you use the switcher to make clean cuts • Test mode confirms operation of switches and LEDs • Microprocessor controlled power-down memory automatically resets the audio/video switcher when it's turned on to whatever configuration was selected when it was turned off • Frequency response: flat from 20Hz to 20kHz • 790dB signal-to-noise ratio • 2.97" H x 16.79" W x 8.28" D • 8.44 lbs.

AVS-100 .....\$399.95

AVS-100

## PSW-500 4 x 4 Matrix Pro Switcher

- Combine audio console and video components for custom system integration without compromising signal quality • Digital 4 x 4 matrix design makes it possible to route any one of four inputs to any or all of the four outputs • Combine multiple switchers to expand input and output capability • Computer control from one to 16 pro switchers via RS-232 port, supported by internal software; asynchronous, ASCII format • Preselect separate stereo audio or video switching or route audio and video together • Vertical interval switching provides sync for excellent A/B roll edits • Microprocessor controlled, non-volatile memory; automatically resets to last setting upon power down or power failure • Test mode confirms operation of switches and LEDs; manual front panel and/or computer-control operation

PSW-500 .....\$529.00

PSW-500

# VID

# VIDEO

## Offers Great Flexibility & Cost Savings with the

# SHUTTLE-IB

Independent Remote Controller

**V** ID VIDEO engineers have developed a remote controller that expands the normal single-source editing capability of the RM-440 to roll a "B" VTR with the normal edit cycle. The Shuttle-IB plugs into the cue out connector on the RM-440 using an ordinary RCA-to-RCA cable.

- Shuttle-IB unit and interface kit permits the use of a VP-5000 and VO-5600 as a source VTR—save \$2000

OR

Connect the Shuttle-IB remote cable to your VO-5800 or VO-5850 and edit directly with no modification. Also, the unit can be detached from your editing system and used as a remote controller to log tapes while continuing to edit A-roll only.

- Independent control knob
- Independent Control Track Display readout with minutes, seconds, frames and a minus sign
- All cabling is supplied and additional RRC-5F interface cables not required—save \$300
- Programmable General Purpose Interface, (GPI) a pulse to start the Pyxis® or other GPI cue

- Preroll: 5-second or 10-second switch selectable
- Provides automatic re-cue for multiple previews, and a GPI command output for selection of transition point for an external switcher/effects system

also offering

### ADDRESS TRACK TIME CODE SMPTE ZERO FRAME OFFSET

- BVU Compatibility. Make your VP-5000, VO-5600, VO-5800 or VO-5850 BVU time code compatible
- Record, Playback, Edit. Record and playback time code on the address track channel
- Upgrade your Type-5 equipment to Broadcast Level and SMPTE Standard
- Save \$6000 to \$8000 while increasing editing efficiency and accuracy

### VO-6800 SMPTE

- Add third channel capability
- RCA® phono jacks (female)
- Video playback address track gating
- Switched video output
- Records and plays back BVU compatible T/C in play, fast-forward and rewind

# VID VIDEO

3919A W. Magnolia Blvd.  
Burbank, CA 91505  
(818) 845-1515 (800) 826-2035

**Shuttle I Remote Control Unit**

Make your Sony VP-5000 or VO-5600 shuttle playback equal to the VO-5800 and VO-5850.

Shuttle I also provides full remote capability for the VO-5800/VO-5850.

- Control track display readout with frames, seconds, minutes, minus sign, a reset button and a 'O' memory stop function
- Pre-roll button will cue-back to the VTR, minus 5 seconds, and pause—the O cue-back time is from 0 to 8 seconds
- Large shuttle knob that can activate the search mode with a twist of the search dial and change VTR speed and direction
- Lighted, full-function remote control buttons—fast-forward, rewind, play, stop, pause, record, and dub ch.#1, search and pre-roll
- Variable speed control from 0 to 5X play speed through forward and reverse
- Make edit decision lists for control track editing using control track display editing

Shuttle I

- Strong aluminum construction that can handle those tough assignments—plus an optional 19" rackmount panel assembly
  - Shuttle I requires the addition of a small interface board
  - PAL units available
- Shuttle I unit plus component installation. . . . . \$1200.00**

**Shuttle I-B A/B Roll Remote Control  
(For Use With Sony RM-440)**

Expands your RM-440 system to do A/B rolls. Shuttle I also provides full variable speed control over the VP-5000, VO-5600, VO-5800 and VO-5850.

- A GPI command output for selection of transition point for an external switcher/effects system (programmable switch triggers PYXIS effects)
- Independent shuttle knob
- Pre-roll is 5 or 10 seconds switch selectable
- Lighted full-function remote control buttons—fast-forward, rewind, play, stop, pause, record, dub ch.#1, search, pre-roll, reset and memory
- No extra 33-pin cables needed
- The Shuttle I-B unit and interface kit permits the use of a VP-5000 and/or VO-5600 as a source VTR—Save \$2000
- Connect the Shuttle I-B remote cable to your VO-5800 or VO-5850 and edit with no modification
- PAL units available

Shuttle I-B

**Shuttle-I unit plus installation kit . . . . . \$1500.00**

**Shuttle II Controller Interface**

- Edit with your VP-5000 or VO-5600 as a source deck
- Give your VP-5000/VO-5600 variable speed control
- Shuttle your VTR 0 to 5X play speed—forward and reverse—from your edit controller knob or joystick
- Send Bump Commands from your edit controller to your VP-5000/VO-5600 for VTR synchronization
- After simple installation, just plug your edit controller in the 33-pin remote connector of the VP-5000/VO-5600
- The Shuttle II Interfaces between your VTR and edit controller

- The Shuttle II Interface is compatible with:  
Sony RM-440  
CMX  
Paltex ABR  
Convergence ECS-90  
ECS-103  
ECS-195  
ECS-204
  - Also compatible with "Loc Box" and Fostex audio synchronizers
- Shuttle II Interface card plus component installation kit. . . . \$485.00**

### 'O' Frame Offset Address

#### Track Time Code Modification

- Totally redesigned digital time code board
- Add a third audio channel for recording and playing back address track time code
- Plays back tapes recorded on BVU-800s, BVU-110s or JVC® VCRs
- Address track indicates the presence of time code on the address track
- Make your Sony VO-5800/VO-5850 BVU time code compatible
- Playback from 1/30 speed through 10X shuttle in forward and reverse, and fast-forward and fast-rewind
- Head switch changed to 2 1/4 H/V (broadcast standard same as BVU-800)
- Time code in and out uses RCA phono jacks (F connectors)
- Video inserts do not affect the address track channel
- No more audio (channel 1 or 2) time code bleed through
- PAL versions currently available
- Time code output is switchable from channel #1 to #2 to #3 (address track). This feature allows you to use videotapes with different time code locations and switch the selector to send the time code to your edit controller with no repatching.
- For use with Sony VO-5850, VO-5800, VO-5600, VP-5000, VO-6800, VP-7000, VP-9000 and VO-9600

#### Specifications

- Playback:** Adjustable 2V p-p with controlled rise and fall times for SMPTE specs
- Output:** Impedance drive capability 600 ohms — adjustable from 0 to 6dBm (time code output is completely regenerated)
- Record Input:** Level is adjustable from 1V p-p to 5V p-p
- Input:** Impedance 50K ohms with diode limiting
- Record/Playback Offset:** 'O' offset time code compared to a BVU-800

VO-5850	.....	\$ 1300.00
VO-5800	.....	1200.00
VO-5600	.....	1200.00
VP-5000	.....	1100.00
VO-6800	.....	950.00
VP-7000	.....	1100.00
VP-9000	.....	1100.00

### Type-2 Speed Modification

For Sony VP-2260, VO-2860 and VO-2860A. Achieve 4X speed search capability with Sony RM-440 or Convergence ECS-90.

Type-2 Speed Modification .....per deck/\$250.00

### Translator I Control Unit

Your RM-440 can now control a JVC or Panasonic VHS or 3/4", or a Sony Betacam deck.

- Translates Sony 33-pin command structure to Panasonic 34-pin protocol, JVC 45-pin protocol or to Sony 36-pin protocol
- Do interformat editing with your RM-440: VHS to U-matic formats, U-matic to Betacam or any other combination
- The Translator I installs between the edit controller and the VTR with no modifications
- The cable automatically switches the internal circuitry for the proper machine configuration
- The Translator I works with the following controllers:
  - Sony RM-440
  - VID VIDEO Shuttle I and Shuttle I-B (others are currently being tested)
- The Translator I works with the following VTRs:
  - JVC CR-850, CR-8250/6650/5550, CR-8200/6600/5500 U-matic and BR-8600 VHS; Panasonic AU-700, NV-9600 U-matic and NV-8500, AG-6500/7500 VHS; Sony BVU-800/820/850/870, BVU-200/A/B U-matic and BVW-10/15/40 Betacam (new VTRs are being tested as they come into the marketplace)

Translator I

#### Specifications

- Input:** Sony 33-pin remote female connector on rear
- Output:** 37-pin "D" male connector to rear
- Translator I control unit (not incl. cable) .....\$995.00
- I/O Cable .....135.00

# VIKING CASES

A DIVISION OF THE STEMLER CORP.

10480 Oak St., NE.

St. Petersburg, FL 33716

(813) 577-1216

# CASES

COMBO CAMERA/VTR

RACK CASES

STACKER

VIDEO PROJECTOR WITH CONTROLLER

- Reel-to-reel system cases
- Triple stack 35mm projector cases
- Video tape recorder cases
- Video camera cases
- BB rack style cases
- Monitor (TV) cases
- Shock-mounted BB rack style cases
- Projector and screen cases
- Shock mounted broadcast racks

Wherever you look on a Viking case, you'll see superior strength and workmanship. Wood panels laminated with tough, scratch resistant ABS or stucco aluminum are supported by a double edged aluminum extrusion crimped at intervals for a permanent, non-yielding bond; a construction technique far stronger than conventional gluing, stapling or riveting.

Viking's heavy duty valances contribute to long life and a tight fit. And all but the smallest Viking cases are equipped with heavy duty steel recessed hardware including spring loaded handles, twist locks and corners. All Viking hardware is attached with steel rivets and backed with steel washers; your assurance of greater strength and impact resistance.

CARRYLITE CASES

The Carrylite is 25% less expensive and 30% lighter than our ATA case. Carrylite is rugged...built of dependable heavy gauge ABS for exceptional strength yet still a beautiful and versatile way to carry your valuable equipment. Carrylite is adaptable in size for audio/visual, video, computers, and musical instruments.

# PEDESTALS/CRANES

## Fulmar Extended Range Pneumatic Pedestal

- Height range: 21 1/2" to 59"
  - Suitable for loads up to 350 lbs.
  - Width at base: minimum—34", maximum—39"
- 3702 .....\$23,495.00

Fulmar

## Hawk Extended Range Pneumatic Pedestal

- Suitable for loads up to 150 lbs.
  - Height range: 24" to 59"
  - Width at base: minimum—36", maximum—38"
- 3267 .....\$17,495.00

Teal

## Teal Standard Range Pneumatic Pedestal

- Suitable for loads up to 140 lbs.
  - Height range: 30" to 51"
  - Width at base: minimum—30", maximum—35 1/2"
- 3197 .....\$10,350.00

## Tern Standard Range Pneumatic Pedestal

- Width at base: minimum—29", maximum—36"
  - Height range: 33" to 54"
  - Suitable for loads up to 290 lbs.
- 3741 .....\$11,450.00

Hawk

Tern

## MidiPed 2-Piece Lightweight Pneumatic Pedestal

- Height range: 28 1/2" to 58"
  - Suitable for loads up to 90 lbs.
  - Width at base: minimum—34 1/2", maximum—42"
  - Weight: 56 lbs.
- 3286 .....\$4,875.00

## Merlin Camera Arm

- Exceptional height ranges
  - Fits all pedestals and tripods
  - Positive camera control with precision viewfinder bracket
  - Weight (not including balance weights, viewfinder and camera): 121 lbs.
  - Capacity: 40 lbs.
- 3257 .....\$24,825.00

## Short Dolphin Crane Arm

- Can be carried by one person
  - Simplified trim weight
  - Detachable camera support beam provides alternative low angle gooseneck fitting
  - Suitable for loads up to 55 lbs.
  - Will fit TriTrack, tripods or pedestals
- 3167 .....\$7,875.00

MidiPed

Short  
Dolphin

## Long Dolphin Crane Arm

- Suitable for loads up to 55 lbs.
  - Camera arm traverse 90° each side of arm axis
  - Will fit TriTrack, tripods or pedestals
- 3067 .....\$7,875.00

## Kestrel OB Camera Crane

- Fold-over camera platform for shorter chassis storage—77 1/4"
  - 360° seat and camera mounting rotation
  - Either manual or powered jib
  - Pivoted wheel assemblies for width reduction to 28 1/2"
- 3743 Crane with manual jib arm .....\$33,355.00  
3754 Crane with powered jib arm .....\$39,065.00

# REMOTE CONTROL CAMERA SYSTEM

MicroSwift

## MicroSwift Digital Remote Camera Control Systems

- Proven in use
- Flexible in action
- Allows for custom-designed arrangements
- 2 alternative types of joysticks
- Expandable
- Remote controllable, via modems
- Controls have an exceptionally wide dynamic range
- Choice of controls
- Shot storage with a capacity of up to 1500 individual shots
- Stored parameters include pan, tilt, zoom, focus, pedestal height and CCU functions
- Shot linking
- Shot replay
- No movement on power-up
- User-defined movement limits
- Pedestal profiling
- Soft start and stops

MicroSwift is an advanced and flexible servo control system, designed for remote positioning and control of television cameras. It embodies the very latest techniques of control processing and communications to provide on-air quality movements, and to enable control of virtually any arrangement of cameras over any distance.

**Note:** All pricing is for use as a **guide only** as system pricing varies according to exact customer specifications.

## A. Typical Single-Channel Remote Control System

### 1. Mark 3 Post Head for ENG Camera without Prompting System (Capacity 77 lbs.)

Mark 3 Servo Pan and Tilt Head . . . . .	\$19,495.00
Servo Control Module with Pan, Tilt, Zoom, Focus (supplied in slim-line wall mounting case) . . . . .	9,550.00
Panel Electronics Module . . . . .	6,525.00
Operator Panel with up to 99 preset shots per page (max. 15 pages). Fitted with keypad and shot displays . . . . .	3,495.00
Replacement Lens Drive for customer supplied zoom and focus ENG servo modules . . . . .	6,485.00
<b>Single-Channel ENG System Package Price . . . . .</b>	<b>\$45,550.00</b>

### 2. Mark 2 Spring Balanced Head for Studio Camera with Prompter (Capacity 240 lbs.)

Mark 2 Servo Pan and Tilt Head . . . . .	\$30,825.00
Servo Control Module (as above) . . . . .	9,550.00
Panel Electronics Module . . . . .	6,525.00
Operator Panel (as above) . . . . .	3,495.00
Replacement Lens Drive . . . . .	6,485.00
<b>Single-Channel Studio System Package Price . . . . .</b>	<b>\$56,880.00</b>

### 3. Mark 2 Spring Balanced Head (as above) with Servo Pedestal

Mark 2 Servo Pan and Tilt Head . . . . .	\$30,825.00
Servo Pedestal (Modified 3702 Fulmar) . . . . .	50,000.00
Servo Control Module with Pan, Tilt, Zoom, Focus and Pedestal Height (Supplied in slim-line wall mounting case) . . . . .	9,550.00
Panel Electronics Module . . . . .	6,525.00
Operator Panel (as above) . . . . .	3,495.00
Replacement Lens Drive . . . . .	6,485.00
<b>Single-Channel Studio System Package Price . . . . .</b>	<b>\$106,880.00</b>

## B. Typical Double-Channel Remote Control Systems

### 1. Mark 3 Post Heads (see A. 1.)

(2) Mark 3 Servo Pan and Tilt Heads . . . . .	\$38,990.00
(2) Servo Control Modules . . . . .	19,100.00
(1) Panel Electronics Module . . . . .	7,125.00

# POWER LINE CONDITIONERS

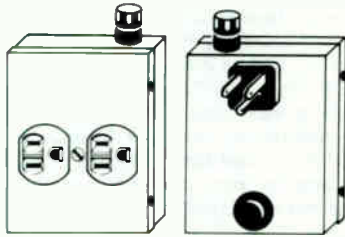

## POWER MASTER™ Line Monitor Power Conditioners

Solid-state electronic plug-in devices, a simple calculator, an expensive instrument, or a computer system, are subject to very hostile environments caused by electrical disturbances coming through the utility power lines that feed them, or generated by electrical equipment within a building. Usually, the solution to this problem has been the installation of a "dedicated" or separate power line to the wall receptacle that powers the sensitive equipment. Even with this expensive installation, equipment damage, memory failure, erroneous data input and output caused by thunderstorms, equipment switching, and other "electrical pollution", are still common occurrences.

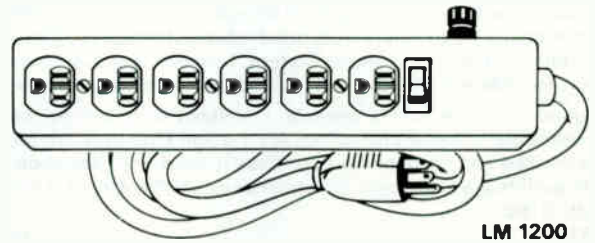

Power Master Line Monitor Power Conditioners eliminate the requirement of a separate, dedicated, branch circuit. They have the latest solid-state technology. Most models have multi-stage filter networks, continuous voltage spike protection, RFI, EMI, and EMP noise rejection, anti-ground loop design, shielded power cords, and more, all in one package.

Your equipment can work without interruption even when the power conditioner is dissipating a high voltage spike. Also, all models have an easily resettable 15A circuit breaker in the rare case of a voltage spike that exceeds the design limits of the power conditioner.

Power Master Line Monitor Power Conditioners protect against spike damage by filtering both the hot line and the neutral line. In addition, the filter is bidirectional, it dissipates both incoming spikes and outgoing spikes created by your equipment. The Power Master filter system is passive, it operates only when a voltage spike occurs. When a spike is sensed, the Power Master instantaneously clamps or reduces the over-voltage to a level that is safe for use by your equipment. The spike, depending upon its voltage and the design of your Power Master, is harmlessly dissipated, either in the form of heat, through the grounding system, or both. All noise-protected models have a three-stage passive noise filter system, a high frequency filter and a low frequency filter that operate in the transverse mode, the common mode, or both. The high and low frequency filters overlap to give double protection in the mid-range frequencies where it is needed the most.

LM 1100

LM 1200

### LM 1100 Wall Plug-In Unit

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage: 325V
- Surge Current Clamping Ratio:  $\leq 2.03:1$
- Max. Spike Current: 6500A
- Clamping Response Time:  $\leq 5\text{ns}$
- Environment: For indoor use in dry locations

Designed for use at the wall receptacle. Ready to use, just plug it in. Provides one "U" ground duplex outlet accommodating two plugs. Contains one metal-oxide varistor or spike protection. Case is steel with baked-on black finish; outlets are also black. Measures 4 1/8" x 3 1/4" x 1 5/16", Weighs 1 1/2 lbs.

LM 1100 .....\$30.95

### LM 1200 Strip Power Line Conditioner—6 Plugs

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage: 325V
- Surge Current Clamping Ratio:  $\leq 2.03:1$
- Max. Spike Current: 6500A
- Clamping Response Time:  $\leq 5\text{ns}$
- Environment: For indoor use in dry locations

3 "U" ground duplex outlets accommodating 6 plugs. Contains 3 metal-oxide varistors for isolated spike protection. Case is steel with baked-on beige finish; outlets, power cord, and illuminated master switch are also beige. Measures 11 5/16" x 2 5/16" x 1" and weighs 2 lbs. Mounts by means of keyhole slots on 10 15/16" centers. Power cord is 14/3 SJT 9' long.

LM 1200 .....\$39.95

LM 2100

LM 2200

### LM 2100 Wall Plug-In Unit

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage: 225V
- Max. Spike Current: 6500A
- Surge Current Clamping Ratio:  $\leq 1.5:1$
- Clamping Response Time:  $\leq 5\text{ns}$
- Noise Rejection Frequency Response: 150kHz to 100MHz
- Attenuation: 20 to 40dB (volt ratio)
- Noise Protection: Transverse Mode
- Environment: For indoor use in dry locations

Designed for use at the wall receptacle. Ready to use, just plug it in. Provides one "U" ground duplex outlet for two plugs. Unit contains six-stage filter network providing isolated voltage spike and noise protection for each outlet. Case is steel with baked-on black finish; outlets are black. Measures 5 1/2" x 4 1/2" x 1 5/16" and weighs 4 lbs.

LM 2100 .....\$69.95

### LM 2200 Strip Power Line Conditioner—8 Plugs

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage: 225V
- Max. Spike Current: 6500A
- Surge Current Clamping Ratio:  $\leq 1.5:1$
- Clamping Response Time:  $\leq 5\text{ns}$
- Noise Rejection Frequency Range: 150kHz to 100MHz
- Attenuation: 20 to 40dB (volt ratio)
- Noise Protection: Transverse mode
- Environment: For indoor use in dry locations

A six-stage filter network provides voltage spike and noise protection. Case is steel with baked-on beige finish; the outlets, power cord, and illuminated master on-off switch are also beige. Unit measures 20" x 2" x 1" and weighs 6 lbs. Power cord is 14/3 SJT 9' long. Mounts by means of end slots on 19 3/4" centers.

# POWER LINE CONDITIONERS

## LM 3100 SERIES POWER LINE CONDITIONERS

### LM 3100 Wall Plug-In Unit

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage: 225V
- Surge Current Clamping Ratio:  $\leq 1.5:1$
- Max. Spike Current: 6500A
- Clamping Response Time:  $\leq 5ns$
- Noise Rejection Frequency Range: 150kHz to 100MHz
- Attenuation: 20 to 40dB (volt ratio)
- Noise Protection: Transverse and common modes
- Leakage Current: Leakage to ground does not exceed 10mA
- Environment: For indoor use in dry locations

Designed for use at wall receptacle. Provides two hospital-grade outlets with isolated spike protection. A six-stage filter network provides voltage spike and noise protection. Case is steel with baked-on beige finish; outlets are also beige. Unit measures 5 $\frac{1}{2}$ " x 4 $\frac{1}{2}$ " x 1 $\frac{5}{16}$ " and weighs 5 lbs.

**LM 3100** ..... \$89.95

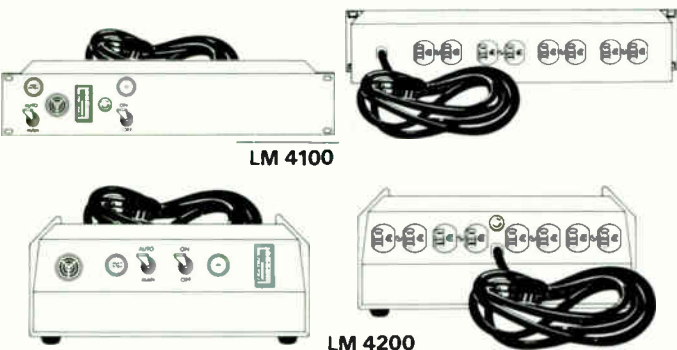

### LM 3200

#### Strip Power Line Conditioner — 8 Plugs

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage: 225V
- Max. Spike Current: 6500A
- Surge Current Clamping Ratio:  $\leq 1.5:1$
- Clamping Response Time:  $\leq 5ns$
- Noise Rejection Frequency Range: 150kHz to 100MHz
- Attenuation: 20 to 40dB (volt ratio)
- Shielded Power Cord Attenuation: Up to 20dB
- Noise Protection: Transverse and common modes
- Leakage Current: Leakage to ground lead does not exceed 10mA
- Environment: For indoor use in dry locations

A six-stage filter network provides voltage spike and noise protection. Each outlet has isolated grounding and isolated spike protection. Case is steel with baked-on beige finish; the hospital-grade outlets are ivory, shielded power cord is black, master on-off switch has black housing and amber illumination. Unit measures 20" x 2" x 1" and weighs 7 lbs.

**LM 3200** ..... \$139.95

## LM 4000 SERIES

### POWER LINE CONDITIONERS

LM 4100 and LM 4200 offer the best spike protection with the highest overvoltage handling capability and the quickest response time. The series also offers the best noise suppression in both the common and transverse modes. Both models have RFI-shielded power cords and isolated, hospital-grade, double-wipe, grounding outlets for additional protection against noise. Included in both models is an AC voltmeter with color-coded scale to visually indicate that an undervoltage condition exists. An undervoltage sensing and warning system is also included. When the incoming line voltage drops to  $\leq 105V$ , the warning system, consisting of a red light and a buzzer, will activate. If the low voltage is still within the operating range of the equipment, the operator can then choose to shut off the buzzer by means of a cutoff switch. The red pilot light, however, remains on, acting as a constant reminder until the line undervoltage is corrected.

### LM 4100

#### Rack/Panel Power Line Conditioner

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage:  $\pm 20V$  as it appears on the sine wave; 190V, max.
- Max. Spike Current: 6000A
- Surge Current Clamping Ratio:  $\leq 1.63:1$
- Clamping Response Time:  $\leq 5ns$
- Noise Rejection Frequency Range: 150kHz to 100MHz
- Attenuation 20 to 40dB (volt ratio)
- Shielded Power Cord Attenuation: Up to 20dB
- Noise Protection: Transverse and common modes
- Leakage Current: Leakage to ground lead does not exceed 10mA
- Environment: For indoor use in dry locations

Designed for rack or panel mounting with end slots on 18 $\frac{1}{4}$ " x 3" centers. Eight hospital-grade, "U" ground outlets are provided on the back of the unit. The front of the unit contains the master on-off switch, voltmeter, auto-manual switch, warning buzzer, and warning light. Case is steel with baked-on black enamel finish: front cover is spun aluminum, outlets are ivory, power cord is black, switches are black, on indicator light is green, and undervoltage indicator light is red. A seven-stage filter network provides voltage spike and noise protection with each outlet having isolated spike protection. Front plate measures 19"L x 3 $\frac{1}{32}$ "W x 2 $\frac{3}{8}$ "D; the back cover measures 17"L x 3 $\frac{1}{32}$ "W x 2 $\frac{3}{8}$ "D. Unit weighs 15 lbs.

### LM 4200

#### Console Power Line Conditioner

- Max. Spike Energy Dissipation: 80 joules one time, 40 joules with repeated usage, self-restoring
- Max. Spike Voltage: 6000V
- Clamping Spike Voltage:  $\pm 20V$  as it appears on the sine wave; 190V, max.
- Max. Spike Current: 6000A
- Surge Current Clamping Ratio:  $\leq 1.63:1$
- Clamping Response Time:  $\leq 5ns$
- Noise Rejection Frequency Range: 150kHz to 100MHz
- Attenuation 20 to 40dB (volt ratio)
- Shielded Power Cord Attenuation: Up to 20dB
- Mode Noise Protection: Transverse and common
- Leakage Current: Leakage to ground lead does not exceed 10 $\mu A$
- Environment: For indoor use in dry locations

The LM 4200 is a console type unit with sloping front and back panels; the front panel contains on-off switch, auto-manual switch, voltmeter, "on" indicator light, undervoltage indicator light, and warning buzzer. The back panel contains 8 outlets and a circuit breaker. The eight outlets are hospital-grade, "U" ground type. Each has isolated spike protection. Case is steel with woodgrain vinyl finish; outlets are ivory, power cord is black, switches are black, "on" indicator light is green, warning indicator light is red. A seven-stage filter network provides voltage spike and noise protection. Unit measures 13 $\frac{1}{2}$ "L x 4 $\frac{1}{8}$ "W x 4 $\frac{7}{8}$ "H and weighs 15 lbs.

UL800

UL25P

## The Deluxe Group

The Deluxe Group provides the user with a number of grounded outlets in a small area. All models have circuit breaker protection and master switch with built-in pilot light. The UL 25P series is ideal where individually switch controlled outlets are needed.

UL 25P series has alternative black and white switch and outlet configurations. UL 25P series has individual outlets — 800 series has 5 duplex outlets.

# MULTIPLE OUTLET STRIPS

## The Mid-Length Group

Model 15 and 17 are designed for "series stringing" with an outlet on one end and the power cord on the other. Model 15 is the control unit, with on-off switch, pilot light, fuse (or circuit breaker), and 7 outlets. Model 17, with 9 outlets, is the slave unit. Model 18 has 9 outlets; Model 24 has 6 outlets, on-off switch, pilot light, and fuse (or circuit breaker). Model 32 has four color-coded, individually switched outlet sets with circuit breaker protection; the switches on the Model 32 are illuminated to serve as pilot lights. Overall Size: 1 1/2" H x 13 1/8" L. Mounting: Type I on 12 3/4" centers. Case Color: Gray.

## Cordgard™ Electrical Cord Ducting

A quick, inexpensive way to keep people from tripping over electrical cords that must run across floors or flat surfaces. Comes complete and ready to use; includes double-faced adhesive tape to prevent sliding on smooth surfaces, or, it can be permanently attached with epoxy cement. For carpeted floors, ribbed slots on the bottom prevent movement. The ducting is made of tough, flexible vinyl and can be used indoors or outdoors. Measures 9/16" H x 3" W. Center channel will accept cords up to 7/16" diameter and is slit for easy cord insertion. The standard color is beige which will harmonize with every decor; other colors are available on special order.

## MOBILE VIDEO CABINETS

### Durastar media trolleys without extra storage unit Model No. 69054, Article No. 68051

- Monitor platform, with video recorder shelf arranged below, with optional pull-out base (article no. 68086)
- Pre-wired, with central mains supply and 3m long lead
- Standard connections for aerial and video
- 75 ohm aerial connections

### Mobile video-instant use

The media trolleys provide a firm and secure housing for monitors and video recorders without them being tied to one location. They can be moved easily and safely, and the pre-wired electrics with central mains supply ensures instant "switch-on" eliminating a great deal of "plugging in" and the usual tangle of cables. An optional telescopic base for the recorder simplifies the option of top loading machines.

### Safeguard against unauthorized access with lockable roller shutters

The lockable roller shutters safeguard the contents and also eliminate the usual hazards associated with open, sharp edged doors.

The round contours also prevent injuries. The media trolley with its clean design and color scheme fits in everywhere — as an individual unit or as part of a full Weyel system.

### Extra storage space

An "under unit" with separate lockable roller shutter is an available extra which provides spacious storage room for software, teaching aids and accessories.

Article  
68051

Article  
68021

### Durastar media trolley with "under" storage unit Model No. 69054, Article No. 68021

Same as article 68051, but with additional unit of similar design to house the software, teaching aids and accessories, complete with lockable roller shutter.

### Specifications

- Mains and aerial connections inside and outside
- Lockable roller shutter
- Removable, lockable rear panel for easy installation and service of equipment
- Stable feet with 4 free-running casters
- Color scheme: body beige melamine resin coated; handles brown; aluminum support frame brown stove-enamelled.

# VIDEO EQUIPMENT CARTS

## EFP-17 Folding All-Terrain Field Production Cart

The EFP-17 folding camera cart is the big brother to ENG-1. The EFP-17 is a larger, smoother folding vehicle designed to assemble all of the necessary portable video equipment required for field production. It features a separate shelf to support a monitor for playback or viewing as the action happens. The monitor platform is positioned forward to place the recorder controls at the fingertips of the operator. With optional elevator column and head, taping may be accomplished directly from the cart. Large 12" inflatable pneumatic wheels dampen vibration and allow basic dolly moves over general terrain. The EFP-17 folds to 15 1/2" and only the camera and monitor need be removed for storage. The equipment board is predrilled in 1" increments for quick adjustment.

### Specifications

**Equipment Platform:** 17" x 29"  
**Monitor Platform:** 41" H x 15" x 21"  
**Camera Platform\*:** 37" H x 6" x 17"  
**Folded Size:** 42" x 28" x 15"  
**Load Capacity:** 175 lbs.  
**Wheel Base:** 16"  
**Wheels (inflatable):** 12" pneumatic  
**Casters:** 5" swivel with lock  
**Straps:** 1 ea. 8", 2 ea. 5"  
**Shipping:** Assm. 57 lbs. truck

\*Note: Camera platform is predrilled for elevator column

- Low profile design
- Rugged construction
- Reliable operation
- Compatible with European standards
- Unique quick release camera mounting screw with slot to allow camera balancing
- Tilt: +90°

DG/TM/FM-15 (Includes Head and Elevator Assig) ..... \$400.00

## IFP-20 (Non-Folding) Industrial Field Production Cart

The IFP-20 is a heavy-duty industrial, non-folding camera cart designed to assemble all of the necessary video equipment required for quality industrial video production. This vehicle will accommodate camera, videocassette recorder with electric editing, monitor, camera control unit, AC adaptors, batteries and/or battery packs. Taping can be accomplished directly from the vehicle with the addition of an optional elevator column and head. The large inflatable pneumatic tires offer smooth transportation over rough terrain.

**Specifications**  
**Upper Platform\*:** 40" H x 29" x 19"  
**Center Platform:** 28" H x 29" x 19"  
**Lower Platform:** 10" H x 18" x 24"

**CAM-10**

## ENG-1 Mobile Camera Cart

The ENG-1 mobile camera cart was developed for the video industry as the ideal vehicle for transporting and employing portable video recording equipment. The unit accommodates most VTR and camera CCU's as well as their AC adaptors and battery packs. Addition of the optional elevator column and friction or cam link head converts the ENG-1 into one of the most versatile production tools available. ENG-1 folds to a slim 12" for transportation and storage. The equipment board is pre-drilled in 1" increments for rapid adjustment.

### Specifications

### Accessories

Receptacle and Cord Reel, Elevator Column, Friction Head, or Cam Head

## GR-3 Video Cart

The GR-3 is the smaller offspring of the ENG-1. This folding cart is designed to store, transport, and operate your portable 1/2" VCR equipment. This lightweight, affordable cart is ruggedly built with 8" semi-pneumatic wheels and 4" front swivel casters. The GR-3 is standard with spring head and telescoping column which will accommodate cameras up to 7 lbs. With the GR-3, there is no need to carry or set-up equipment on location; it's all there on your cart when you are ready to shoot. The cart can be folded with your equipment in place.

### Specifications

<b>Equipment Platform:</b>	13" x 33"
<b>Wheel Base:</b>	16"

## CAM-10 Videocassette Cart

CAM-10 is designed to accept all 1/2" and 1/4" portable VCR equipment as well as their AC adaptors and battery packs. The upper shelf of the CAM-10 is parallel to the ground and is large enough to accept a full size monitor or a small VCR and monitor combination. The lower shelf can be placed in a horizontal position or can be firmly locked into a slanted position to hold a recorder and/or battery pack. The CAM-10 comes complete with elevator column and anti-dumping spring head and will handle TV cameras up to 15 lbs.

# ALL PURPOSE CARTS

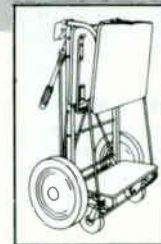

## Folding Action Series C-402/68-402P/69-22VTR All Purpose Carts

The C-402 is an all purpose utility vehicle designed for transportation of video tape equipment, audio/visual equipment, photography equipment, and business machines. The C-402 has become a particular favorite of photographers because it offers an abundant carrying capacity.

Construction of the 68-402P and 69-22 VTR is similar; however, basic differences will be found in the length of the wheel bases and the dimensions of the platforms. The upper and lower platforms are spaced so that a VT monitor and recorder can be interchanged to accommodate different viewing heights. Folded, these carts fit into most automobile trunks. Heavy-duty equipment straps are standard.

# ELECTRONIC EQUIPMENT CARTS

## Portage Series

### S-4218/4218/TV-503

#### Indoor/Outdoor Carts

The 4218 is designed for indoor/outdoor transportation of video player and monitor unit. The 5" casters and 12" rear wheels assure a smooth ride and stability over questionable terrain. The 4218 folds to a thin 12" to store in a closet or automobile trunk. As with all folding Wheelits, the platforms lock into the upright position with positive assurance. The S-4218 increases the utility and load capacity by adding a 15" x 18" bottom platform to the 4218. This bottom platform locks into a slanted position when the cart is folded.

The TV-503 is a non-folding cart that features a top platform for placement of a television monitor for the viewers' standing line of vision. The top platform incorporates two leveling screws for tilting the monitor 10°. For presentation to a seated audience, the top platform is folded down and viewing equipment is placed upon the second shelf for proper eye level.

#### S-4218 Specifications

**Upper platform:** 18" x 25" x 42" H  
**Center platform:** 18" x 25" x 30" H  
**Clearance:** 11" H x 25 1/4" W  
**Lower platform:** 15" x 18" x 8" H  
**Wheel base:** 16"

### 6000

#### Video Transporter Cart

To move a heavy 25" monitor and accompanying VCR equipment you need the super tough 6000 Video Transporter Cart.

It features a 48" high platform to hold the monitor so it is at the proper viewing angle for a seated audience.

Other features include frame member made of 1" x 15 Ga. (.065 wall) steel tubing migt-welded to 1/8" platform flanges at a 86° angle.

When the 3/4" particle board platforms are bolted to the black-enameled frame, a stable pyramid is formed. The platforms have low pressure laminated surfaces and vinyl edge molding in a neutral almond color. The casters are bolted through the bottom platform to the frame flanges.

# WORK STATION CARTS

## Folding Slim-Line Series 3628/S-3628/2916/S-2916

### Work Station Carts

The Folding Slim-Line 3628 is designed for indoor/outdoor transportation of office machines, lab equipment, and electronic monitoring hardware. The large upper platform is positioned at a convenient working height for technicians on the move. The S-3628 has an additional lower platform to handle extra pieces of equipment. Both carts fold in seconds for fast and efficient storage.

The 2916 was designed with the salesperson in mind. This rugged cart weighs only 33 lbs., folds to 10", and yet has a load capacity of 150 lbs. Its platform height of 29" makes it the ideal working desktop. The thick sound-absorbing particle board with vinyl edge molding makes it the preferred demonstration cart. The S-2916 has an additional lower platform for equipment accessories.

#### 3628 Specifications

**Top Platform:** 20" x 28" x 36" H  
**Folded Size:** 42" x 25" x 12"  
**Load Capacity:** 180 lbs.

## Transporter Series

430/4102/3302

### Indoor/Outdoor Carts

The 430, 4102 and 3302, the work horses of the Wheelit line, are designed as general purpose indoor/outdoor carts. These non-folding transporters are standard with 4" casters, large rear wheels, and two equipment straps.

The 430 and 4102 are ideal for operation of projection equipment from the back of a room, over the heads of an audience. The 430 has an extra wide top platform for larger equipment. The 3302 is best suited to operation of audio/visual equipment from a center aisle audience arrangement.

#### 430 Specifications

**Upper platform:** 30" x 20" x 41" H  
**Lower platform:** 19" x 21" x 13" H

# DEGAUSSER/ ERASING PENCIL

## 642-21/115 Degausser

- Professional bulk eraser
- Erase reels up to 10<sup>1</sup>/<sub>2</sub>" diameter, 2" thick
- Portable
- 2 locating spindles
- Simple and efficient operation

The 642-21 is designed for the same applications and usage as the 9205A except that it is equipped with a single powerful electromagnet (same type as in the 9205A) and is limited to erasure of 10<sup>1</sup>/<sub>2</sub>" reels. This unit is recommended where size and cost are primary considerations.

Construction is of heavy-duty steel, finished in gray baked enamel with a brown phenolic top panel and 2 locating reel spindles. A sturdy handle is located on the front panel of the unit.

Degaussing is accomplished by rotating the reel by hand on the top surface of the degausser. Cartridges and cassettes can be passed slowly across the field area for a clean erasure. The unit provides an audible indication when in operation. It is equipped with a high temperature rated coil for extended life under heavy use.

### Specifications

<b>Reel Size:</b>	Will handle any size reel up to 10 <sup>1</sup> / <sub>2</sub> " in diameter and 2" thick. Any size cartridges and cassettes that fit within the field area outlined on the top panel
<b>Erase Level:</b>	60 to 90dB minimum erasure below recorded level
<b>Switch:</b>	Heavy-duty, single pole
<b>Fuse:</b>	One 15A, line fuse
<b>Power Requirements:</b>	115VAC, 50/60Hz
<b>Power Consumption:</b>	1000W
<b>Dimensions:</b>	4 <sup>1</sup> / <sub>8</sub> " x 6" x 8"
<b>Net Weight:</b>	15 lbs.
<b>Shipping Weight:</b>	18 lbs.

642-21/115

## 642-21/230

Identical to the 642-21/115 except the 642-21/230 is designed to operate at 230VAC, 50/60Hz.

### Specifications

<b>Net Weight:</b>	16 lbs.
<b>Shipping Weight:</b>	19 lbs.
<b>642-21/230</b>	.....\$214.27

## 8905 Magnetic Erasing Pencil

The 8905 is an excellent tool for erasing limited, small areas of sound tracks and splices on tape and film. In program material, words, complete sentences, and even syllables may be erased. The 8905 is equally useful for demagnetizing record and play heads. A press to operate switch is located on the handle.

### Specifications

<b>Active Tip Area:</b>	0.250" diameter
<b>Switch:</b>	Single pole, press to operate
<b>Enclosure:</b>	Heavy phenolic case, complete with 6' rubber cord
<b>Finish:</b>	Matte black
<b>Power Requirements:</b>	115VAC, 50/60Hz
<b>Power Consumption:</b>	10W
<b>Dimensions:</b>	5/8" diameter by 8" long
<b>Net Weight:</b>	6 oz.
<b>Shipping Weight:</b>	12 oz.
<b>8905</b>	.....\$54.34

# DEGAUSSERS

## 9210 Degausser

The 9210 produces twice the effective output with 25% less current than previous comparable models. The unit will handle 2" tape for audio, video or digital data with ease. The 9210 may also be used to demagnetize tools or components having residual magnetism imparted into the metal being worked. The special high performance output coil is a real miser on power consumption. The heavy-duty ferro-tuned coil's secondary winding is resonated with a capacitor thereby keeping current draw to a minimum. The 9210 requires only 15 amperes at 110VAC. The heavy-duty steel case and composite plate assure many years of dependable service.

### Specifications

**Reel Size:** Will handle any size up to 16" in diameter and 2" in thickness  
**Erase Level:** 60 to 80dB minimum erasure below recorded level  
**Switch:** Heavy-duty, double pole  
**Fuses:** 2 15A fuses, one for each side of coil  
**Pilot Lights:** For monitoring power to coil  
**Power Requirements:** 115VAC, 50/60Hz  
**Power Consumption:** 1800W  
**Dimensions:** 4 1/8" x 12" x 14"  
**Net Weight:** 28 lbs.  
**Shipping Weight:** 31 lbs.

9210 (115V) ..... \$465.00  
9210A (230V) ..... 495.00

9210

## 9205A-115 Degausser

- A professional heavy-duty unit
- Erases reels up to 17" diameter, 2" thick
- Rugged and reliable
- 2 powerful electromagnets
- Portable

The 9205A is recommended for complete erasure of program and residual noise on audio, video, and data recording tape and magnetic film — in reels, cartridges and cassettes. For use with plastic, aluminum or other non-magnetic reels with any type hub and any diameter up to 17". If used with care, 19" reels may be degaussed. May also be used to demagnetize tools or components having residual magnetism imparted into the material being worked.

The degausser contains 2 powerful electromagnets which generate the erasing field, each having its individual fuse and pilot lamp located on the front panel. The top of the unit is a heavy-duty black bakelite plate with a 5/16" spindle emerging from it. It is equipped with high temperature rated coils for extended life under heavy use.

Degaussing is accomplished by rotating the reel slowly around the spindle 3 (or more) times. Continue to rotate and at the same time lift the reel slowly off and away from the degausser. For 2" tape, turn the reel over and repeat the procedure.

The 9205A is manufactured with heavy-duty, double pole switches, double-fused with dual pilot lights for individual protection and monitoring of each coil, 6' three conductor cord with 2-prong plug and ground connector, heavy steel gray baked enamel case complete with rubber feet.

### Specifications

**Reel Size:** Will handle any size reel up to 17" in diameter and 2" thick  
**Erase Level:** 60 to 90dB minimum erasure below recorded level  
**Switch:** Heavy-duty, double pole  
**Fuses:** 2 15A; one for each coil  
**Pilot Lights:** 2; one for each coil  
**Power Requirements:** 115VAC, 50/60Hz  
**Power Consumption:** 2000W  
**Dimensions:** 4 1/8" x 12" x 14"

# TIME CODE GENERATOR/READER

## TCG 112 Time Code Generator

- Microprocessor based
- Easy data entry by means of 12-key pad
- Rackmount or tabletop case
- Compact size
- Large display size

The TCG 112 is a microprocessor based device that generates SMPTE/EBU serial time code. This code contains time in hours, minutes, seconds, and frames, along with user bits. The code is recorded on film or tape so that when played back it may be used as an electronic indexing means, allowing synchronization to other machines.

## Operation

Front panel controls, a 12-key pad, pushbutton, and toggle switch, allow convenient setting of time code and user bits. The time base may be referenced to an internal crystal or external encoder signal as selected by a toggle switch. Another switch selects either drop frame or non-drop frame. The display may be held at any time by means of a momentary pushbutton. A reset pushbutton may be used to zero the time code and user bits.

## Output

The time code signal is a balanced output at 600 ohms at 0dB. Its rise and fall times are controlled so as to minimize the required band width for recording and to reduce crosstalk. When an encoder is used as the time base, the generated code will follow from 0 to 10 times speed, allowing a film machine to be locked to other machines in the system.

## Specifications

- Output:** Edit Code—SMPTE/EBU standard at 0dB, 600 balanced line  
Encoder—2400Hz, 2 phase at 0V to 5V levels
- Input:**
- Power:** 105VAC-125VAC, 50/60Hz at 12W (220VAC option available)
- Controls:** Internal/External—Selects internal crystal or external encoder; Time Code/User Bits—Selects display mode; Drop Frame—Selects drop frame or non-drop frame; Reset—Set time code and user bits to 0; Preset—Activates 12-key pad for setting time code or user bits; Hold—Freezes display as long as button is held
- Temp.:** 0-70°C operating  
-20 to 85°C storage
- Mechanical:** 3 1/2" H x 19" W x 11" D
- TCG 112** . . . . . \$2745.00

## Options

- 24 frame code as used in film industry
- Remote entry of data
- 25 and 30fps
- Parallel BCD output for time code and user bits

## TCR 114 Time Code Reader

The TCR 114 decodes serial SMPTE/EBU time code or user bits as selected by a front panel switch. Code may be read over a speed range of 1/16 to 60 times play speed. The display is a 3/8" LED display allowing easy readability. A hold button is provided which when depressed freezes the display to the current reading. An LED readout is used to indicate that the incoming code is of the drop frame format.

## Mobile Equipment Carts

Super-rugged, multi-shelf tables especially designed to support your heaviest video equipment; has been tested to securely hold more than 450 lbs. Features 1" chrome-plated tubular steel legs and 18-gauge steel shelves — 33% heavier than used for conventional tables. Shelves have rolled retaining lip that add strength and enhance safety. Has a non-slip rubber mat for top shelf.

Shelves may be adjusted to various heights. Patented corner clamps secure the shelves to the legs with a grip that's stronger than a weld. Table rolls surely and easily on 5" swivel, ball-bearing casters. Two may be locked for in-place stability.

Model No.	Description	Total Ht. (in.)	Shelf Size (in.)	Casters (in.)	Ship Wt. (lbs.)	Price

VT 2430	2 Shelf (terra cotta)	29	24 x 30	4	45	199.00

Specify "E" for electrical assembly with 20' cord, two grounded receptacles, U.L. listed. Add 3 lbs. to shipping wt; and add \$27.00. CSA approved add \$37.00.

## Mobile Video Interface Workcenter

This new heavy duty, durable, yet portable interface station is affordable yet functional. It can be used in-house or go mobile on a remote. The Terra Cotta color, enamel finish shelves are 18-gauge steel with raised edges for retaining equipment. The legs are 1" diameter chrome-plated steel tubing and the patented corner clamps secure the shelves to the legs with a grip that's stronger than a weld. 4" ball-bearing, swivel casters (two lock per section), allow easy movement. The 24" x 66" main work surface may be set up in-line, or swivel format, where the VCR section with side management tray and 4-outlet, grounded electrical assembly can be attached on either side of the 24" x 36" main console at any angle between 5° to 90°, or as a separate unit. The console section comes with a 12" x 36" monitor shelf, wire management tray, a 6-outlet, grounded, electrical assembly and a non-slip, rubber work surface mat. It is designed to carry the weight of all brands and formats of video editing systems, interactive video systems or computer systems. Available options: Model #CB90, 90° extra depth monitor retainer, price \$12.67; Model #CD0333, pedestal with tray, price \$35.33; Model #WCT, pull-out tray (reversible drawer/shelf), price \$39.99.

## MOBILE VIDEO CENTERS

### Mobile carts and consoles to organize and store your video equipment

Four new economy A/V carts with the same built-in quality you've learned to expect from all Winsted products. Choose from 34" or 54" heights. Shelves are 28 $\frac{1}{2}$ "W x 18 $\frac{1}{2}$ "D to fit most any electronics. Sturdy, strong, formed and welded steel construction for years of service. Four-inch swivel casters (two locking) for mobility. Textured baked on enamel gray finish with chrome post accents.

**A** **34" High Video Stand.** Features three shelves to fit all of your electronics. Twelve inch clearance between shelves leaves plenty of room for equipment access. Measures 34"H x 22"D x 32"W. Shpg. wt. 43 lbs.

Model R3303 ..... \$147.00

**Two Shelf Video Stand.** (Not shown.) Top shelf accommodates up to a 25" monitor. Shelf measures 28 $\frac{1}{2}$ "W x 18 $\frac{1}{2}$ "D. Stand is 34"H x 22"D x 32"W. Shpg. wt. 34 lbs.

Model R3302 ..... \$125.00

**B** **Portable Video Stand.** Ideal for setup anywhere. Three shelves makes a space for your monitor, VCR and accessories. Measures 54"H x 22"D x 32"W. Shpg. wt. 47 lbs.

Model R3353 ..... \$155.00

**54" Video Stand.** (Not shown.) Gives you four shelves to hold all of your A/V equipment. Measures 54"H x 22"D x 32"W. Shpg. wt. 54 lbs

Model R3354 ..... \$177.00

Beautifully styled, decorator consoles in a selection of attractive finishes. Ball bearing casters for total mobility on any surface. Fine furniture for your conference room, office, studio, show-room...and point of purchase displays.

V-1184

**C** **Low-Profile Video Center.** Designed for smaller groups and individual use. Monitor shelf is set back slightly to permit easy access to VTR shelf. Top shelf is 15"D x 32"W. Cabinet is 34"H x 22"D x 32"W. Wt. 68 lbs.

Model R3400 ..... \$327.00

**Full Shelf Low-Profile Video Center.** (Not shown.) Same as R3400. Top shelf is a full 22"D x 32"W. Lockable base cabinet is 17 $\frac{1}{2}$ "H x 22"D x 32"W. Overall dimensions: 34"H x 22"D x 32"W. Wt. 72 lbs.

Model R3401 ..... \$327.00

**D** **Compact Portable Video Center.** Provides complete mobility, ease of operation, and key-lock security. Top section takes most 19" (some 21") monitors and VTR units. Locking swing-away doors. Ventilated locking rear panel for full access to video equipment. Bottom section provides safe storage for your expensive video accessories. 60"H x 22"D x 32"W. Wt. 195 lbs.

Model R3601 ..... \$749.00

## Executive Conference Room Consoles

**E** **Hand Rubbed Oak VCR Cabinet.** For the VCR center where only the nicest furniture will do. An elegant VCR cabinet sculpted of oak solids with matching oak wood veneers. The look is expensive. The rolled edge design comfortable and clean. Satin smooth hand rubbed finish with uncommon attention to detail.

Offer a pull-out VCR shelf, an adjustable shelf in the lower storage area (30"W x 23 $\frac{3}{4}$ "D) and a spacious compartment (30"W x 23 $\frac{3}{4}$ "D x 25"H) for your TV monitor. Locking doors swing out of the way a full 270°. Cut-outs in rear for cabling. Rolls where you want it on hidden heavy duty casters. Inside dimensions are 57 $\frac{1}{2}$ "H x 30"W x 23 $\frac{3}{4}$ "D. Outside dimensions are 62 $\frac{1}{2}$ "H x 31 $\frac{1}{2}$ "W x 25 $\frac{3}{8}$ "D. Natural oak finish. Shpg. wt. 140 lbs.

Model 37509 ..... \$1375.00

**F** **Executive Video Console.** Rich medium oak woodgrain. Holds any 3/4" or 1/2" VTR machine and monitor of up to 25". Convenient shelf stores tapes and other video accessories. VTR shelf pulls out for easy access to controls. Accessory equipment shelf adjusts up or down. Locking cabinet doors for extra security—swing back out of the way. Rear opening provides access to cords, cables and control adjustments. Swivel casters make moving easy. 31 $\frac{1}{2}$ "W x 33"H x 28 $\frac{1}{2}$ "D. Wt. 110 lbs.

Model R3720 ..... \$598.00

**Model R3724.** (Not shown.) Same features as our Model R3720 with two pull-out shelves. Shpg. wt. 110 lbs.

Model R3724 ..... \$627.00

**Model R3722.** (Not shown.) Same features as our Model R3720 with storage drawer. Shpg. wt. 110 lbs.

Model R3722 ..... \$648.00

**G** **Large Security Cabinet.** With full length locking doors. Provides ample storage space for 25" monitors as well as front loading VTRs. Plate casters for total mobility. Pull-out shelf for accessibility to top, sides and back of your installed equipment. Adjustments and settings may be made without removal. Base compartment offers storage for extra cassettes and video accessories. Measures 63 $\frac{3}{4}$ " x 31 $\frac{1}{2}$ "W x 28 $\frac{1}{2}$ "D. Wt. 198 lbs.

Model R3740 ..... \$981.00

**Model R3742.** (Not shown.) Same features as our Model R3740 with two pull-out shelves. Shpg. wt. 198 lbs.

## SYSTEM/85 MODULAR VIDEO CONSOLES

A new generation of modular video furniture for use with Sony's front loading video machines, new 3/4" editing systems and other studio equipment.

These standard 19" EIA modular units are constructed of strong, welded and bolted heavy-gauge steel. All units assemble quickly and easily in any configuration to suit your individual needs. The basic module is expandable to any size system with add-on units. Textured baked on enamel finish in Beige and Gray.

A complete line of console accessories are available to compliment the new System/85 consoles—with rack mounting kits for both series of VTRs, panel kits for editors, heavy-duty swivel casters for mobility, multiple outlet electrical assemblies, an oversize shelf for large controllers, and blank panels.

**A. Model H8502.** For use with Sony's "Type 5" VTRs and RM-440 Controllers. Overall dimensions 41" H x 61" W x 42 1/2" D. System includes:

# MOVABLE STORAGE SYSTEMS

## MOVABLE STORAGE SYSTEMS

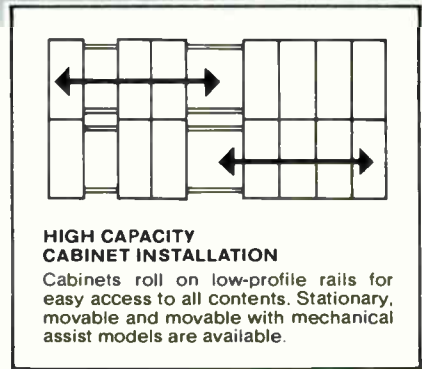

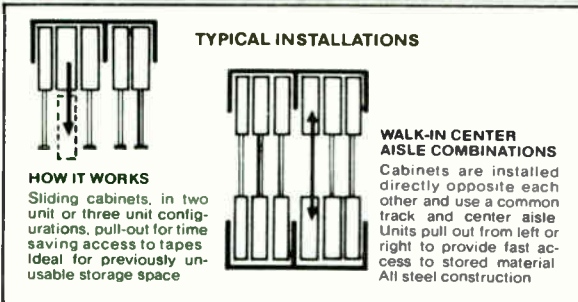

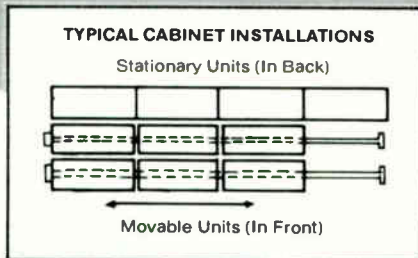

In a variety of designs and 5" to 36" depths to serve your special storage needs.

**Winsted Shelf Storage System.** Offer organization and storage for most any tape or film storage system. Choose from stock or custom shelving at affordable prices. All designs are completely flexible—can be adapted to a variety of configurations and setups to serve your special storage needs. What's more, Winsted shelving grows as your needs grow. Both stock and custom installations can be expanded, or relocated as your needs change.

**A "Super Density" Movable Cabinets.** Offered in a range of cabinet depths for maximum storage in a limited space. Front row cabinets move side to side on floor tracks for easy access to rear storage. Ideal for "VHS," "BETA," "U-matic" and broadcast tape storage.

**B Space-Saving Pull-Out Cabinets.** Ideal for "high access" tape storage. May be installed in room alcoves or set-backs. Save floor space, too, by eliminating unnecessary aisles. Gives you 100% storage space efficiency. Units bolt together for any length system. Cabinets pull-out effortlessly on a low-profile track.

**C High Capacity Tape Storage System.** Affords compact storage in a limited space. Offered in a full range of cabinet depths to meet every storage need. Cabinets move laterally on low-profile rails for easy access to all records instantly, effortlessly.

 Wt. 110 lbs. .... **\$426.00**

**Model 77080.** Extra Shelf  
 Wt. 5 lbs. .... **\$29.00**

**C Model T7600.** "Super Pak" videocassette tape storage system. Holds 207 3/4" videocassettes. For maximum capacity tapes are stored and labeled on end. Nine shelves. Overall: 88"H x 10"D x 36"W. (Inside dimensions: 34 1/2"W x 83"H).  
 Wt. 139 lbs. .... **\$459.00**

**Add-on Unit.** Model T7603. For side-to-side installation.  
 Wt. 118 lbs. .... **\$421.00**

**D Model T7800.** Quad Tape Storage System. A 16" deep cabinet that is perfect for 2" quad and holds 55 tapes. Five shelves. Overall: 88"H x 16"D x 36"W. (Inside dimensions: 34 1/2"W x 83"H).  
 Wt. 165 lbs. .... **\$519.00**

**Add-On Unit.** Model T7803. For side-to-side installation.  
 Wt. 150 lbs. .... **\$479.00**

**Model 78080.** Extra Shelf.  
 Wt. 6 lbs. .... **\$31.00**

**E Model 70300.** Locking cabinet doors provide security for valuable master tapes. Doors fit all of the Winsted "T" series tape cabinets (except T7200 and T7500 models) and can be added to any existing "T" unit. Full length door hinge and two-point locking system. NOTE: Install cabinet doors only on cabinets that are securely fastened to a wall. Dimensions: 84 1/2"H x 1 1/4"D x 34 1/2"W. Beige baked enamel finish.  
 Wt. 61 lbs. .... **\$179.00**

**F Model T7104.** Beta or VHS Storage. Holds 270 Beta tapes or 240 VHS. Ideal for 1/2" videocassette storage. Order molded plastic dividers for videocassettes separately (Model 70986). Overall: 88"H x 4 1/2"D x 36"W. (Inside dimensions: 34 1/2"W x 83"H).  
 Wt. 137 lbs. (BETA) .... **\$419.00**

**Model T7100.** (Not shown).  
 Wt. 135 lbs. (VHS) .... **\$398.00**

**Add-On Unit.** Model T7107. For side-to-side installation.  
 Wt. 127 lbs. (BETA) .... **\$399.00**

**Add-On Unit.** Model T7103. For side-to-side installation.  
 Wt. 120 lbs. (VHS) .... **\$378.00**

**A Model T7400**  
**\$439.00**

### OPTIONAL ACCESSORIES

**1 Model 70983.** Molded plastic divider insert (3/4" tapes) for use in T7400, T7600, or T7700.  
**#70983 Individual Dividers.**  
 Wt. 3 lbs. .... **\$14.00**

**2 Model 70986.** Plastic cassette holder (1/2" tapes) for use in T7100 or T7104 cabinets.  
**#70986 Individual Dividers.**  
 Wt. 2 lbs. .... **\$13.00**

**B Model T7700**  
**\$464.00**

**C Model T7600**  
**\$459.00**

**D Model T7800**  
**\$519.00**

**E Model 70300**  
**\$179.00**

**F Model T7104**  
**\$419.00**

Item	Description	List Prices
RB-1	Razor Blade (.012")	\$ 9.50/100
RB-2	Razor Blade (.009")	9.50/100
WP-1	White Editing Marker	9.00/doz.
MTD	Mag. Tape Developer	10.00/can
TB-2	32 page text on all aspects of tape editing by Mr. Joel Tall	3.00/book
20-P	Drift and flutter meter IEEE/DIN (Peak) & JIS-(RMS) Reading	600.00

MTK: Multi Track Cutting Angle; calculated for normally imperceptible time interval of less than 1/100<sup>th</sup> of a second between the top and bottom tracks.

BLOCKS: All are individually precision machined from hard aluminum alloy; P-2 is precision molded from reinforced plastic; for educational use.

KITS: Audio "KS" each contain: Precision block, 30 pre-cut self aligning Editabs, razor blade, and editing pencil. Video "KV" in addition to above items, also includes one spray can of Kyread, Magnetic Tape Developer.

MOUNTING: H—Countersunk holes  
T—Adhesive Tape Backing  
C—Non-Slip Cork Backing  
\*—Otari Replacement

\*For the complete KIT, add prefix "K" to block model no., and add \$3 for Audio KIT and \$7 for Video KIT to Basic Block Price.

# BROADCAST LARGE IMAGE OPTICAL MULTIPLEXER

770

## 770 Optical Multiplexer

- Color or monochrome
- Instant image transfer
- Self-dousing
- Audio with optical switching
- Remote control option
- Precision optical assembly
- Rigid construction

The 770 is designed to meet full broadcast requirements for a large image optical multiplexer. The optical system will accept up to three film inputs, usually one slide projector and two motion picture projectors. Optical switching between film inputs is dynamic at < 100Ms and occurs as a vertical wipe off two DC motor driven first surfaced mirrors. The DC motors provide a positive bi-directional drive which is DC braked for instant stopping without any bounce. The mirror arrangement provides a self-dousing system which permits only the selected input to reach the TV camera, even if the remaining projectors are "on". The 770 is primarily designed to work with broadcast TV cameras which include an integral field lens, but can be equipped with a field lens when applied for use with TV cameras with an objective "taking" lens.

The top cover includes dome lamps which indicate the mode of multiplexer at all times. Local controls are illuminated in colors to match the dome lamps and include power on, select Film 1, Slide or Film 2. Remote control of the multiplexer mode selection is available as an option. Follow lighting is used throughout to indicate the multiplexer mode at all control points. Operation of the multiplexer and remote control is entirely DC derived from an integral DC power supply.

## Specifications

<b>Number of Mirrors:</b>	Two
<b>Image Size:</b>	Up to 3.38 x 4.50"
<b>Mirror Action:</b>	Vertical wipe
<b>Mirror Height:</b>	3.25"
<b>Actuation:</b>	Positive bi-directional DC motor drive
<b>Image Transfer Time:</b>	< 100Ms
<b>Optical Centerline:</b>	48" ± 1/2"
<b>Mirror Surface:</b>	First surfaced aluminum silicon monoxide
<b>Film Inputs:</b>	Three
<b>Outputs:</b>	One
<b>Dimensions:</b>	53" H x 19" L x 13" W
<b>Weight:</b>	150 lbs., uncrated. 200 lbs., crated
<b>Color:</b>	Two-tone gray
<b>Finish:</b>	Baked epoxy paint
<b>Power Requirements:</b>	115VAC 50/60Hz or 230VAC 50/60Hz
<b>Power Consumption:</b>	100W

770	Optical multiplexer, large image. 3 inputs and one output. Illuminated dome lamps and local control switches. Select Film 1, Slide or Film 2. Includes level. No field lens . . . . .	\$3995.00
770-L	Same as above, except left-hand model. Use with left hand film projectors . . . . .	4295.00
RC770	Remote control for 770 series select Film 1, Slide or Film 2. 1.75 x 19" rackmounted panel . . . . .	250.00
C3	Remote control cable for 770 series multiplexer. Add cable length as dash number. (e.g., C3-50) . . . . .	ft/1.50
FL770	Field lens assembly. Mounts to camera end of 770 multiplexer. Includes 6" diameter field lens, mount, mounting brackets, cover and guides for FL770-T and FL770-SM . . . . .	1295.00
FL770-T	Alignment target, used to size and focus images. Fits FL770 assembly . . . . .	60.00
FL770-SM	Slide mount for Eastman Kodak cross step gray scale slide. Fits FL770 assembly . . . . .	175.00
KTS-1	Eastman Kodak Inconel cross step gray scale slide with instructions. Used to calibrate TV camera . . . . .	795.00
732A	Pedestal, styled to match 770 multiplexer accommodates slide projectors with max. 10" optical centerline (e.g., RCA TP7 and SS-32 series) . . . . .	795.00

# MULTIPLEXERS

4305

## 4305 Optical Multiplexer

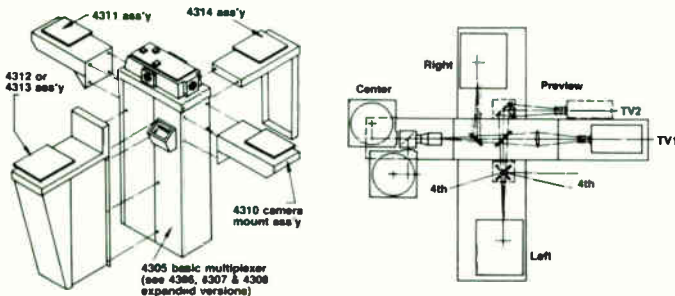

The 4305 consists of a pedestal mounted optical transfer assembly designed to the industry standard 48" optical centerline. The basic unit includes local control, neutral density filter mounts for each input, three duplex AC outlets (6) for equipment, attached 3-wire AC power cable and complete set-up and operating instructions. All options are at added cost.

TV camera and center input projector supports as well as projector side mounts include all necessary adjustable mounting hardware for item to be used. Where remote control is specified, please indicate cable footage required. Projectors include the necessary projection lenses. Remote control is 24VDC operation.

The Preview option, 2<sup>nd</sup> TV camera output provides a back-up TV camera in the event of prime output camera failure and to minimize "on-air" errors, e.g., wrong slide, improper start or restart of motion picture film, etc., since Preview enables the operator to verify subsequent inputs while "on-air" from the second TV camera which may be a relatively inexpensive monochrome camera.

Since the 4305 is in itself a fully functional and operational system, the unit may be directly applied for use with floor mounted TV cameras and pedestal mounted film projectors.

Where floor mounted TV cameras have a built-in field lens designed to suit the internal camera optical system, the 4305 field lens can simply be removed to permit direct projection through the 4305 optical transfer and onto the TV camera field lens.

### Notes:

- For the 4307 and 4308, 4<sup>th</sup> Input source must be reversible format film, e.g., 2 x 2 slides, 35mm filmstrip, and "live" Tel-Op input.
- For 1" format Vidicon TV cameras, use 50mm "C" mount lens. For 2/3" format Vidicon TV cameras, use 35mm lens.
- At time of order, please specify TV camera and projector models to be used at each input station.
- For TV cameras, which due to their design require special lenses (other than 35mm or 50mm focal lengths), Zei-Mark can supply special field lenses to work with such TV camera at added cost (usually nominal).

## Series 4300 Optical Multiplexer and Accessories

4305	Optical multiplexer, 3 inputs and 1 output. Custom model. Expandable to add Preview and 4 <sup>th</sup> options. Features custom molded top cover, illuminated dome lamps w/matching colored switches at local control console . . . . .	\$1995.00
4306	Custom optical multiplexer, 3 inputs and 2 outputs. Expanded model 4305. 2 <sup>nd</sup> output Preview . . . . .	2795.00
4307	Custom optical multiplexer, 4 inputs and 1 output. Expanded model 4305. See notes . . . . .	2995.00
4308	Custom optical multiplexer, 4 inputs and 2 outputs. Expanded model 4305, combination model 4306 and 4307 . . . . .	3495.00

### TV Camera and Projector Supports

4310	TV camera support and adjustable mount. Fits all models . . .	\$215.00
4310-SP	Same as 4310, but for TV cameras in excess of 30 lbs. . .	250.00
4311	Center input projector support . . . . .	150.00
4312	Custom fully skirted side mount for Left and Right film projectors. Fits all models . . . . .	295.00
4313	Custom side mount for Left and Right film projectors, less skirts. Fits all models . . . . .	250.00

### Projector Pedestal

KG	Custom pedestal for film projectors. Supplied to accommodate optical centerline heights ranging from 7 to 11 1/2". Equipped with adjustable mounting plate and AC outlets with attached power cable. . . . .	\$350.00
----	--	----------

### Multiplexer Remote Controls

RC4305	4305 remote control Select Left, Center or Right input. Console styled 19" rackmount for either flat or vertical mounting. 3 1/2" H. Illuminated to match 4305 dome lamp colors . . . . .	\$250.00
RC4306	4306 remote control. Same as RC4305 except includes Preview select switches . . . . .	275.00
RC4307	4307 remote control. Same as RC4305 except includes 4 <sup>th</sup> Input mode select switches. . . . .	275.00
RC4308	4308 remote control. Same as RC4305 except includes both Preview and 4 <sup>th</sup> Input switches. . . . .	300.00

### Projector RC Mounting Panels

PRC-3	3 1/2" x 19" rack panel for mounting up to three RC modules listed below . . . . .	\$90.00
PRC-4	3 1/2" x 19" rack panel for mounting four projector remote controls listed below. Custom designed to suit system requirements. . . . .	300.00

### Projector Remote Control Modules

RC-2	Slide projector remote control. Works with Ektagraphic or Ekt. Series III models. Provides lamp on/off, forward and reverse. . . . .	\$140.00
RC-2LDX	LD-4250 remote control. Includes change, rate, individual E-2 controls for forward and reverse and "hold" to repeat slides. LEDs indicate "on" projector . . . . .	200.00
RC-8EL	ELMO GS-1200 TC Remote Control. Provides fwd/lamp, rev/lamp and stop . . . . .	200.00
RC-16E	Eiki NT-0 Series remote control provides forward, forward w/ lamp, reverse, reverse w/lamp and stop . . . . .	200.00
RC-16EL	ELMO model 16FTC remote control. Projector must be factory supplied to provide for remote control functions, forward, lamp, reverse and stop. . . . .	200.00
RC-16S	Remote control for Telex 2230 16mm TV projector. Provides forward, lamp and stop. . . . .	200.00
RC-16	Remote control for 16mm projectors not listed above. Can accommodate up to 5 switches (momentary and/or p-p) Specify projector . . . . .	250.00

### Automatic Light Control Remote Modules

RC-ND510	Remote control for ND10 auto light control. AGC and manual control . . . . .	\$100.00
----------	--	----------

### Remote Control Cables

C1	Multiplexer remote control cable . . . . .	ft./\$1.00
C2	Projector remote control cable. . . . .	ft./1.00

### ND Filters

FK-6	Filter kit. Set of six (6) 3" x 3" Kodak gelatin ND filters w/values 0.1, 0.2, 0.5, 1.0, 2.0 and 3.0. Up to six may be ordered in any combination. Filter mounts and glass supplied as standard on all 4300 and 2000 series multiplexers . . . . .	\$110.00
------	--	----------

### Miscellaneous

A43	Audio-follow control PC board assy. For use with 4300 series multiplexers. Audio switches according to the multiplexer mode. Accepts up to 3 wires from 3 separate sources to a 3 wire output. Operates automatically from mult. control electronics . . . . .	\$140.00
SL-1	Slot-Lok quick disconnect. One TV camera adaptor and one baseplate . . . . .	175.00
SL-2	Slot-Lok quick disconnect. One TV camera adaptor and two baseplates. Order when studio camera is used on the film chain . . . . .	235.00
SLA	Slot-Lok TV camera adaptor only . . . . .	125.00
SLB	Slot-Lok baseplate only. . . . .	70.00

**FINALLY!!!  
A VIDEO VAN FOR  
THE CONSUMER.**

A scaled down version of the professional video cart, this Wheelit GR-3 video van fits the needs, and the pocketbook, of every consumer. A complete video system can be assembled and operated direct from the video van. The camera column elevates almost 7' and the head offers smooth tilt and pan actions. The van folds to a 12" width with equipment in place.

## DELAY EQUALIZED NTSC LOWPASS VIDEO FILTERS

We build many lowpass filters with sharp roll-offs & good passband delay linearity with cut-off frequencies from .1MHz to 10MHz. The most popular are used to attenuate the harmonics of the NTSC color sub-carrier frequency 3.58MHz. DELIVERY FROM STOCK.

### VFL & MVFL SERIES—IMPEDANCE = 75 OHMS

Standard Size. Max. Insertion Loss 1db	Miniature Size. Max. Insertion Loss 2db	Max. .25db Attenuation @ Frequency (MHz)	Max. 3db Attenuation @ Frequency (MHz)	Min. 45db Attenuation @ Frequency (MHz)	Approx. Passband Delay (Nano-Sec.)
Part No.	Part No.				
VFL2P7	MVFL2P7	2.75	3.00	3.77	1082
VFL3P2	MVFL3P2	3.20	3.50	4.40	928
VFL3P5	MVFL3P5	3.50	3.84	4.82	846
VFL3P8	MVFL3P8	3.80	4.16	5.22	781
VFL4P0	MVFL4P0	4.00	4.38	5.51	741
VFL4P5	MVFL4P5	4.50	4.93	6.19	659
VFL5P2	MVFL5P2	5.20	5.70	7.16	570
VFL6P0	MVFL6P0	6.00	6.58	8.27	494
VFL6P5	MVFL6P5	6.50	7.12	8.95	457

Max. Delay Variation = ± 3% to -.25 db Freq.  
 Max. Passband Ripple = ± .25db.  
 VFL Size: 4 x 2 x 1 1/4 in metal can with BNC Connectors.  
 MVFL Size: 3 x 1 1/8 x 1/2 in metal can with terminals for PC mounting.

## THE FAMILY OF INDUSTRIAL VIDEO DISC PLAYERS FROM PIONEER VIDEO, INC.

### LD-V6000A LaserDisc Player

The LD-V6000A videodisc player is capable of playing LaserVision videodiscs under 3 levels of control: in manual mode (level 1); as a stand-alone programmable interactive system (level 2); and under external computer control via a built-in RS-232C interface port (level 3).

### LD-V4200 LaserDisc Player

Designed for use as an economical, but high performance level 3 player, the LD-V4200 features an RS-232C interface, slimline profile, front panel player controls and player generated text overlay. Long distance frame searches are accomplished in less than 3.5 seconds, and short searches (less than 100 frames) do not produce a blanked video output. The LD-V4200 plays both 12" and 8" Standard Play (CAV) and Extended Play (CLV) discs. An optional hard wired remote control is available.

### LD-V2000 LaserDisc Player

A general purpose level 1 and level 3 player with a slimline profile and automatic disc loading system, the LD-V2000 supports both 12" and 8" discs with complete Standard Play (CAV) and Extended Play (CLV) features available during manual and computer modes.

# VIDEOSTAR

## VideoStar Means Business— Business Television... and Better Business Communications!

As a leading supplier of **business television**, VideoStar understands the strategic role of television in business communications. By providing sight and sound **connections** to locations around the country...and around the world...via satellite, VideoStar gives business leaders a powerful tool to communicate information and ideas.

VideoStar's **business television** service includes technical and applications consultation, provision of hardware and satellite capacity, network operations and maintenance. Our Tele-Meeting® Network of 200 fine hotels is used for one-time special events or to expand private networks for important meetings. Our transportable stations allow us to serve any site wherever your business meeting takes place.

VideoStar takes pride in providing high-quality service to America's leading organizations, including Eastman Kodak, Hewlett-Packard, MONY Financial Services, Coca-Cola, American Express and many others.

VideoStar is your **connection** to business television. VideoStar means business—business television.

# Switch to the brightest displays for every TV signal!

No matter what TV signal you have to analyze, the new Philips Waveform Monitors and Vectorscopes give you a new standard for bright, crisp displays. And now they can even be combined into one efficient, high performance unit to lead the industry.

■ **PM 5665 Waveform Monitor and PM 5667/68 Vectorscopes** The ultimate in measuring and monitoring. Even VITS appear sharp and easy to see. And the PM 5668 also features Sc-H phase.

■ **PM 5661 Waveform Monitor/Vector scope.** Two instruments combined into one lower-priced unit. Compact size is ideal when space and power are limited, without sacrificing performance.

■ **PM 5662 Waveform Monitor/Vector scope.** Also a combined configuration for greater efficiency, with Sc-H display for even higher performance.

A whole new range of Philips Waveform Monitors & Vectorscopes are now ready to fill all your TV-signal monitoring and measuring needs, no matter where you have to work. With, of course, worldwide Philips service guaranteed for a unit's entire product lifetime.

## Test the difference

All over the world, in broadcasting, program production and set manufacturing, Philips Professional Television instruments are used when state-of-the-art technology is needed to ensure the highest test and measuring standards. That's why we say with pride...

*Every day,  
over a billion people  
watch us work.*

**Test the difference and you'll also agree that Philips wins on price and performance!**

# Hoppmann Communications Systems.

Presenting today's most complete palette  
of information exchange options and services.

As the nation's leading developers of comprehensive MIS/telecommunications systems and components, Hoppmann Corporation is uniquely capable of satisfying your most specific needs. From basic conference

and training rooms to complete telecommunications networks... cost-effective standard modules to custom design, manufacture, and turnkey installation.

Our many series of integrated communications systems all deliver state-of-the-art display of 35 mm slides, overhead trans-

parencies, 16 mm sound motion pictures, computer data and

graphics, and video. All wall and freestanding systems come complete with projection equipment stands, operator's console, remote conference room control station, and a choice of rear projection screen sizes.

Their modular structure allows for easy operation and maintenance,

flexibility, and system expandability.

**And our new mobile FutureCom 2000 offers unprecedented flexibility in a single, low-cost package!**

Keep communications rolling with the first audio/video/teleconferencing console you can move from room to room! Expandable at any time, and operated by wireless remote control, our all-new FutureCom 2000 offers complete standalone operation; yet it can also easily interface with an external system or network.

The wideband RGB format used for all video switching and display delivers the greatest signal purity available. You get full source switching to two included color video display monitors; an integrated audio mixer/amplifier and speaker system; and an advanced

graphics/copy camera... all included!

Now's the time to make **your** move to the enhanced information exchange environment your organization demands. For additional information or a **free communications audit**, call Hoppmann Communications toll-free today:

# The first intelligent broadcast color monitors

BARCO INDUSTRIES' new CVS professional broadcast monitors are microprocessor-based to make them intelligent in operation and easy to use.

They have both a digital and an analog bus for maximum flexibility. Plus four "open" slots that let you plug in today's options and those yet to come.

As new features do come along, you'll be able to add them through software — no hardware changes!

All CVS functions are controlled from the front of the monitor or

from a remote keyboard. An optional master remote permits control of a series of monitors.

You can also store, and automatically call up, either calibrated presets or your own preferred presets.

Like your best master control monitors, the CVS has Automatic Kinescope Biasing (AKB) to maintain color and black level stability.

The CVS also generates more internal test patterns than any other monitor. Among others, the patterns include white field, cross hatch and color bars.

The CVS is available in both 14 inch and 20 inch versions, and provides outstanding quality in any TV standard.

For complete specifications, contact your local Barco Industries Dealer or Barco Industries, Inc., 170 Knowles Drive, Suite 212, Los Gatos, CA 95030. Phone: 408-370-3721.

BARCO INDUSTRIES, Inc. is a member of the ACEC group. © Barco Industries, Inc., 1986.

# The only name you need to know

No matter what kind of business you're in, when it comes to answering all your video needs, there's only one name you need to know: Panasonic. And one number you need to call: 1-800-553-7222. Once you do, you'll see that Panasonic offers you one of the largest selections of video components and accessories. But it's what's behind our product line that really sets us apart.

Take our dealer network. There are over 300 authorized Panasonic Professional/Industrial dealers throughout the country. Each with the expertise and technical know-how to help you select and design the video system that's just right for you.

Just as important and equally impressive is our nationwide service network. Each of our service centers is staffed by technicians who've gone through
