ES 580E Four Digit, 60 Minute Timer Displays minutes and seconds. Rear connector allows remote wiring of three momentary SPST controls: Start, Stop and Reset. Reset returns all displays to zero, and timer will continue to run from zero if reset while running.

# CLOCKS/TIMERS

ES 391

ES 992E/994E

80 Series slaves are also compatible with other ESE clocks and timers: ES 112E/124E, 301E, 302E and 510E. Dimensions: 4.45" H x 10.38" W x 6.58" D.

ES 580E.....\$264.00

## ES 510E Four Digit 60 Minute Timer

ES 510E is a four digit, sixty minute timer (59:59) with Start, Stop and Reset controls. If stopped, display will hold time reading and when restarted will continue with next count from last displayed figure. If reset while running, timer will continue to run. ES 510E can drive 80 Series and 90 Series Slaves. Dimensions: 2 1/2" H x 6" W x 6" D.

ES 510E.....\$174.00

## ES 232 Time Calculator

ES 232 is an eight digit, 24 hour, Up/Down Timer/Time Calculator displaying Hours, Minutes, Seconds, and Frames (30 frames per second) on bright red .4" LED's. In the Calculator mode, data may be added or subtracted, or stored in memory, or recalled from memory. There are 10 memory locations available. Data may be added or subtracted from the timer value, while the timer is counting either up or down, but not while the timer is stopped. When stopped, data moved from calculator to time serves to preset the timer. In the timer mode, ES 232 counts up or down, and can be reset while running or stopped. It can be preset to any number in the 24 hour range. While timer is running or stopped, it is possible to enter the value into memory without disturbing the operation. It is also possible to recall a value from memory and add or subtract while timer is counting up or down. ES 232 uses 24 keys, mounted on a desktop case, measuring 2" H x 5" W x 6" D.

ES 232.....\$262.00

## 90 Series 2-Inch Displays Viewable at 60 Feet

ES 391AE Presettable Up/Down Timer. 100 Minute Range, Displays Minutes and Seconds, uses Leverwheel Preset. Controls are Count Up, Count Down, Stop, Reset and Preset. Dimensions 4.45" H x 10.38" W x 6.58" D.

ES 391AE.....\$564.00

ES 590AE Sixty Minute Timer Displays Minutes and Seconds. Rear-mounted connector provides for wiring to user's single pole, momentary, push-button controls—Start, Stop and Reset. Reset returns all displays to zero, and timer will continue to run from zero if reset while counting. Dimensions: 4.45" H x 10.38" W x 6.58" D.

ES 590AE.....\$395.00

ES 992AE/994AE—6 Digit Clocks. ES 992E (12 hr.) and ES 994E (24 hr.) Hours and Minutes on Two Inch Gas Discharge Displays, Seconds on One Inch Gas Discharge Displays. Three to mounted setting controls—Fast Advance, Slow Advance, and Hold. Dimensions: 5" H x 12" W x 3 1/2" D.

ES 992AE/994AE.....\$495.00

## ES 301AE/302AE 100 Minute Up/Down Timers

ES 301E is a four digit, one hundred minute timer (99:59) with six controls: Count Up, Count Down, Stop, Minutes Advance, Seconds Advance, Reset. Counting can be activated up or down or set back to zero. When "Stop" control is pressed, the four digit display is held. Counting direction (up or down) can be changed or time can be reset to zero without stopping the count. The ES 301E can drive 80 Series and 90 Series Slaves. Displays are gas discharge .55" high.

With the ES 302E, the user can preset time much faster than with the ES 301E, because lever-wheel type switches are used for the preset feature. The ES 302E can drive 80 Series and 90 Series Slaves. Dimensions: ES 301E—2 1/2" H x 8" W x 6" D, ES 302E—2 1/2" H x 10" W x 6" D.

ES 301AE.....\$271.00

ES 302AE.....\$350.00

# CLOCKS/TIMERS

## Master Clocks

ESE Masters provide a means of keeping all time displays in the system in agreement, through the use of a Serial Time Code. Only one pair of wires is needed to distribute the time code to all remote serial input displays. An ESE Master Clock System can operate digital displays, clocks with sweep second hands, printers, and in addition, tell your computer what time it is. Twelve hours of standby battery operation is standard in ES 160 and 160/1.

**ES 160.** Mounted in a 5 1/4" relay rack panel and chassis, displays six digits of time information on .4" LED displays, in 12 hour format. The ES 160 has 3 sec. per month accuracy. Its standard output is serial BCD, CMOS compatible, and drives ES 161E, 166E, 171, 991, or 993 Remote Displays without buffering. All inputs and outputs are through rear-mounted connectors. Dimensions: 5 1/4" H x 19" W x 15" D . . . . . \$1250.00\*  
**ES 160/1.** One second per month version of ES 160 . . . . . \$1450.00\*

**ES 180.** NBS Master Clock receives and decodes the radio time broadcasts transmitted by the U.S. National Bureau of Standards (NBS). The unit provides an extremely accurate time reference that is available in several forms. These include:  
• 1 3/4" front panel, with LED display of hours, minutes and seconds  
• Serial time code output of the displayed time data • 1 PPS output (1 Pulse Per Second) • RS-232C output (1200 baud, switchable to other rates) • Audio output (speaker)

**Optional outputs available:**  
• Parallel BCD output • Relay contact closure on the hour and half hour  
The unit is supplied with a built-in battery backup supply to maintain clock timekeeping for up to 10 hours in the event of a power outage. Time Accuracy ± 10ms of UTC . . . . . \$1987.00

**ES 199.** Our most accurate Master, providing better than .5 seconds per month. It contains a 10MHz receiver, with audio output, to synchronize with WWV at the push of a button. WWV transmits a 1000Hz tone at the start of each minute, except for the first minute of each hour, when a 1500Hz tone occurs. If the button is pushed and held during this time, the seconds' counters of the clock will be reset to zero. The ES 199 is supplied with an antenna, battery and charger. An external sync input connector is provided, to allow introduction of a periodic logic "O" or contact closure at a once per second or slower rate. In order to simplify maintenance, test points are provided on the 1000Hz decoder board, to allow recalibration of the oscillator using only an oscilloscope. The serial output will drive 100 ES 161E, 166E, 171, 991 or ES 993E Remote Displays. Dimensions: 5 1/4" H x 19" W x 15" D. Electrical: 117VAC, 50/60Hz. Options: B (CMOS, 5V) J, 1 PPS Output, Relay Closure on Hour and 1/2 Hour, Impulse Driver (ES 162) . . . . . \$1687.00\*

**ES 192E/ES 194E.** The most economical Masters, ES 192E (12 Hr.) and ES 194E (24 Hr.) are constructed using ES 112 or ES 124 digital clocks and adding the ES 167B Serial Time Code Generator to provide the output needed to drive Remote Serial Displays ES 161E, 166E, 171, 991 and 993E. Displays are 6" incandescent type. Dimensions: 2 1/2" H x 8" W x 6" D . . . . . \$376.00

### Accessories

**ES 161E Remote Digital Display** decodes serial time data and displays six digits of time on .55" Gas Discharge Displays, in either 12 or 24 hour format. Dimensions: 2 1/2" H x 8" W x 6" D. . . . . \$191.00

**ES 161TZ Remote Slave Displays with Time Zone Offset.** Displays six digits of clocktime. Available in 12 or 24 hour format. Unit will be in 12 hour unless otherwise specified. To display 24 hour format master must also be 24 hour format. . . . . \$100.00

**ES 162 Impulse Driver** plugs into the ES 160 chassis, and can drive 20 Impulse Clocks. Designed so that if power fails, impulse always comes on with the same polarity when power is restored . . . . . \$232.00

ES 199

ES 160

**ES 165 Impulse Driver** was designed to provide synchronized power to the ES 168 Impulse Clocks. It is capable of driving 50 ES 168 clocks, and will keep them running accurately through 12 hours of power failure. The ES 165 derives its synchronizing pulse from any one pulse per second source, such as the ESE Master Clock, and can also accept the once per second, alternating 12 or 24V impulses from an existing impulse clock system . . . . . \$220.00

**ES 166E Jumbo 1" Clock Display** features six digits of 1" Gas Discharge Displays in 12 or 24 hour format. Receives serial time code input from any ESE Master Clock or ES 167B. Dimensions 4 1/2" H x 10 1/2" W x 6 1/2" D. . . . . \$284.00

**166ETZ Remote Slave Displays with Time Zone Offset.** Six digit display, 12 or 24 hour format. Unit will be 12 hour unless otherwise specified. To display 24 hour format master must also be 24 hour format. . . \$369.00

**ES 167B Serial Time Code Generator** is an integral part of ES 160, 190, 192E/194E and 196 Master Clocks, this unit can be added to many other ESE products, including ES 112, 124, 182, 184, 992, 994, 750, 751, 753, 754 and all 780 Series Time Programmers. Drives ES 161E, 166E, 171, 991, or 993 Remote Displays . . . . . \$169.00

**ES 168 Impulse Clock** operates from the 8 PPS output of the ES 165 Impulse Driver. As many as 50 ES 168s can be connected to a single driver, and they will continue to run during a power outage of at least 12 hours . . . . . \$149.00

**ES 171 Console Mount Remote Display** receives the serial time code generated by any ESE Master Clock, or any ESE product containing the ES 167B serial time code generator, and displays it on bright red .3" LEDs. Dimensions: 2 1/4" H x 4 1/2" W x 4" D . . . . . \$183.00

**Impulse Clock.** When a sweep second hand is desired specify the 3201 .003 "Extra Flat" Impulse Clock. It has a 12" dial protected by a glass cover and metal bezel and is approximately 1" thick. As many as twenty impulse clocks can be driven by a Master Clock which has ES 162 as an accessory . . . . . \$225.00

**ES 991AE 4-Digit Serial Input Slave** decodes serial time data and displays four digits of time on large 2" Gas Discharge Displays. Dimensions: 4 1/2" H x 10 1/2" W x 6 1/2" D, Desktop Case . . . . . \$376.00

**991TZ Remote Slave Displays with Time Zone Offset.** Four digit display, 12 or 24 hour format. Unit will be 12 hour unless otherwise specified. To display 24 hour format master must also be 24 hour format . . . . . \$100.00

**ES 993AE 6-Digit Serial Input Slave** features four digits of 2" high Gas Discharge Displays, and two digits (Seconds) of 1" Gas Discharge Displays. Receives serial time code input from any ESE Master Clock or ES 167B. Dimensions: 5" H x 12" W x 3" D (Wall Mount) . . \$520.00

**993TZ Remote Slave Displays with Time Zone Offset.** Six digit display, 12 or 24 hour format. Unit will be 12 hour unless otherwise specified. To display 24 hour format master must also be 24 hour format. . . \$595.00

\*Battery and charger are included in the ES 160, ES 160/1 and ES 199.

# TIME CODE READERS/ PROGRAMMERS

## Time Code Readers

**ES 253 SMPTE Time Code Reader** is an eight-digit SMPTE Time Code Reader displaying Hours, Minutes, Seconds and Frames . . . . . \$500.00

**ES 254 SMPTE Time Code Reader** is a bi-directional, multi-speed eight-digit reader, displaying Hours, Minutes, Seconds and Frames on .4" red LED displays . . . . . \$744.00

**ES 255** is a bi-directional, multi-speed, eight-digit SMPTE Code Reader, that can add the information to a video stream for recording time code on the video portion of a tape, or for displaying it on a monitor. Reading speed is 1/20 to 20 times playback speed . . . . . \$1095.00

**ES 256 "Smart" SMPTE Time Code Reader.** The ES 256 is a bi-directional multi-speed, eight digit SMPTE Time Code Reader which displays Hours, Minutes, Seconds and Frames on .4" red LED's. The ES 256 incorporates a digital error detection system: When a bad frame of time code is detected, the unit will switch to a frame-counting mode. . . . . \$1045.00

**ES 257 SMPTE Time Code Reader/Comparator** is capable of making two comparisons, as established by the two sets of thumbwheels located on the front panel. By specifying option "B" (four-line parallel BCD, 5V CMOS compatible), additional comparisons may be made by connecting one or more ES 258 "expander" units . . . . . \$875.00

**ES 258 SMPTE Time Code Comparator** has been designed as an "expander" for the ES 257. Two sets of eight-digit thumbwheels are located on the front panel, to allow comparison of two SMPTE code locations \$395.00

**ES 270 IRIG 8 Time Code Reader** Nine digits of time are shown on bright red LED's .4" character height. An RS232C interface (Hrs., Min., Sec. only) can be supplied as an option. ES 270 comes in a rackmounting enclosure 1 3/4" H x 19" W x 10" D . . . . . \$405.00

**ES 280 Audio Time Code Generator/Reader** is a 10 Digit Audio Time and Code Generator/Reader, capable of laying down a serial BCD time code on audio tape in the Generator Mode, and recovering and displaying it in digital form in the Reader Mode. The code has been designed by ESE. It is not a standard code, such as SMPTE or IRIG. The frequencies used to produce the code have been selected to be compatible with cartridge machines as well as other tape recording and playback equipment. Amplitude adjustment assures the right amount of signal for the particular machine being used . . . . . \$578.00

## 720 Series Programmable Clocks, Timers and Time Code Readers

10 events occur on 10 isolated output channels, in the form of momentary reed relay contact closures. Latched outputs may be specified at the time of order. When latched, the next event to occur serves to "unlatch" the previous event.

Programming is done through the front panel keyboard, or "on the fly" in the "Run" mode. As the keys are actuated, the data is displayed on bright red .4" LED's. Re-programming is accomplished by "writing" the new data over the old data.

A battery, battery charger and crystal timebase are provided, to prevent malfunction caused by a power interruption.

The 720 Series units have a 3 1/2" H front panel, 19" W, with chassis extending 8" behind the etched and clear anodized panel.

**ES 720** Contains its own 24 hour clock for comparison. . . . . \$845.00

**ES 722** Contains its own 24 Hour Presettable Up/Down timer for comparison . . . . . \$845.00

**ES 727** Contains a SMPTE Time Code Reader, similar to ES 254, for comparison. Code is received through a rear-mounted female XLR connector . . . . . \$1150.00

## Programmings

**780 Series Ram Time Programmings** are the most cost-effective way of programming more than eight events. They are flexible, easy to use, and

provide 32 events (expandable to 96). The size of the unit is 5 1/4" H x 19" W x 10" D—Relay Rack construction, totally enclosed, with a screen top. 780 Series units operate from the power line with a backup crystal time base and 72 hour battery/charger as an integral part of the equipment.

**Eight Digits of Programming Capability**  
**ES 780** 10 Days, 10 Outputs, Hours, Minutes, Seconds. . . . . \$1575.00  
**ES 781** 100 Days, Hours, Minutes, Seconds. . . . . 1433.00  
**ES 782** 16 Outputs, Hours, Minutes, Seconds . . . . . 1654.00

**Six Digits of Programming Capability**  
**ES 783** Hours, Minutes, Seconds . . . . . \$1365.00  
**ES 784** 100 Days, Hours, Minutes . . . . . 1365.00  
**ES 786** 16 Outputs, Hours, Minutes . . . . . 1600.00  
**ES 787** 16 Outputs, Minutes, Seconds . . . . . 1600.00

**Four Digits of Programming Capability**  
**ES 788** Hours, Minutes . . . . . \$1313.00  
**ES 789** Minutes, Seconds. . . . . 1313.00

**ES 790 Microprocessor-Based Programmable Timer** is a 1,000 event, 32 channel, microprocessor-based programmable clock. Events occur as reed relay contact closures (single pole, normally open). These closures may be all momentary, all latching, or 16 of each, at the user's option. A simple modification allows the use of 16 double pole relays, instead of 32 single pole relays.

1,000 time events can be programmed into the memory and they can be entered randomly, as opposed to chronologically.

An internal crystal with battery and battery charger is provided for uninterrupted operation.

The size of the unit is 5 1/4" H x 19" W x 10" D.

**ES 790** Totally enclosed in rackmounting chassis w/screen top . . \$2300.00  
**ES 790/1** 790 w/1 Sec/Mo accuracy, Master Clock Option . . . . . 2888.00  
**ES 790/3** 790 w/3 Sec/Mo accuracy, Master Clock Option . . . . . 2730.00

**750E Series Thumbwheel Programmer Comparators** are recommended when programming up to eight time events. Thumbwheel switches are set to compare the time information from an ESE Clock or Timer.

One set of thumbwheels is required for each event. The standard 750 Series units are enclosed in 3 1/2" high relay rack panel and chassis.

**ES 750E** ES 112 and one 6 Digit Program . . . . . \$364.00  
**ES 751E** ES 124 and one 6 Digit Program . . . . . 364.00  
**ES 753E** ES 112 and two 4 Digit Programs (Hrs. & Min.) . . . . . 435.00  
**ES 754E** ES 124 and two 4 Digit Programs (Hrs. & Min.) . . . . . 435.00  
**ES 756E** ES 510 and one 4 Digit Program (Min. & Sec.) . . . . . 358.00  
**ES 758E** ES 510 and two 4 Digit Programs (Min. & Sec.) . . . . . 452.00

**ES 760E ATS Clock** is a six digit, 24 hour, programmable clock designed specifically for Automatic Transmission Systems.

On the front panel are a six digit display of time, in hours, minutes and seconds, and two sets of four thumbwheels. These thumbwheels are used to program mode switching times in hours and minutes. 3 1/2" H x 19" W x 8" D.

Under normal operating conditions, the ES 760E will operate from the 60Hz power line. If, for any reason, normal power is interrupted, ES 760E will automatically switch to its internal battery and crystal time base. A built-in battery charger keeps the battery ready for such emergencies. Battery operation can continue for up to eight hours.

**ES 760E** . . . . . \$717.00

# GENERATORS/DISTRIBUTION AMPLIFIERS/ INTERFACES/AUDIO LEVEL INDICATORS

## ES 206A Video Time and Date Generator

Designed to allow the addition of Time and Date information to a video signal. Two rear-mounted video jacks permit "looping" the video information through the 206A to add the data.

ES 206A .....\$525.00

ES 206A

## ES 207/ES 208 Video Distribution Amplifiers

Controls are available through the top plate with a miniature screwdriver for video gain, DC level, and HF equalization. The amplifiers are clamped, providing a very stable output signal to the output terminals. A single pair of BNC connectors are wired for a loop-through input, although provision is made on the circuit board for a terminating resistor if desired. If operated with internal input termination, the terminal used as a loop-through input can be internally wired as a fifth output, in the case of ES-207.

These amplifiers can be used for distribution and for signal conditioning, equalizing up to 1000' of coaxial cable. A very wide range of chroma level control can be obtained with the DA. Output video is expected to be set for OVDC on the blanking or porch level, with video extending positive and sync negative. Nominal input and output signal level is 1V p-p. Typical gain control range is from 1/2V to 1 1/2V p-p.

ES 207 .....\$175.00  
ES 208 .....300.00

ES 209

## ES 209 Video/Stereo Distribution Amplifier

A 1 x 12 video distribution amplifier combined with a dual audio distribution amplifier. It was designed primarily to meet the needs of tape duplicating systems, especially the VHS and Beta Hi-Fi formats. It is housed in a rackmounted cabinet 1 3/4" H. Two BNC input connectors provide a loop-through video input signal. RCA jacks provide looped inputs for audio. Twelve outputs are provided per channel. An option is available on the circuit board to internally terminate the video input at 75 ohms, if desired. All twelve outputs will deliver identical signals, and unused outputs need not be terminated.

It may be used for signal distribution and for signal conditioning. It will equalize and compensate gain for up to 1000' of RG-59 cable (and up to 3000' of the higher grade video cables).

The audio portion of the DA package is designed to create twelve exact copies of the stereo input drive signals.

The audio DA is transformerless, and unbalanced. The input is hi-impedance, while the outputs are medium, and will drive either 600 ohm or hi-impedance inputs.

ES 209 .....\$495.00

## ES 261 SMPTE Time Code Generator

A pre-settable, eight-digit SMPTE/Time Code Generator, capable of Drop Frame or Non-Drop Frame operation

ES 261 .....\$875.00

## ES 86U Edit Control Interface "The Enhancer"

The ES 86U Edit Control Interface has been designed for "insertion" into existing VHS and 3/4" video tape editing systems. The additional features provided by ES 86U are: • Black Generator • Automatic or Manual Video Fade • External Source Editing • Stereo Mixing

ES 86U .....\$1250.00

## ES 212 Hybrid Telephone Interface "Phone Patch"

ES 212 uses a "heavy iron" transformer hybrid network, 600 ohm balanced line level inputs and outputs, switched metering, with full level and dynamics control.

ES 212 .....\$995.00

## ES 214 Dynamic Audio Level Indicator

A highly accurate audio level indicator, which is designed to simulate the action of a conventional VU meter but with superior dynamic characteristics. The LED meter is five to one hundred times faster in responding to complex waveforms than mechanical meters without sacrificing the familiar meter "movement."

The ES 212 has 14 LED Lamps in 3 colors. Scale +4, +3, +2, +1dB-Red. 0dB-yellow. -1, -2, -3, -5, -7, -10, -15, -20, -25dB-Green, with an input impedance of 2200 ohms at maximum sensitivity. 6800 ohms at +8dBm "House Level," 10,000 ohms at minimum sensitivity. The input circuit is transformer isolated, balanced bridging.

ES 214 .....\$125.00

## ES 216 Dynamic Audio Level Indicator

The unit displays audio levels in ten discrete steps using ten LED indicators. Levels of -20, -10, -7, -5, -3, -1, 0, +1, +2 and +3dB are displayed. Levels below 0dB are displayed using green LED's, 0dB is yellow and levels above 0dB are red. The ES 216 can be ordered in either the peak reading mode or in the VU response mode.

The ES 216 is designed to be console or panel mounted and can fit in the same space as many commonly used mechanical VU meters. It consists of a printed circuit board assembly mounted to a black plastic front bezel.

The audio input is balanced and presents an impedance of approximately 6000 ohms.

The input sensitivity is adjustable via a potentiometer located at the rear of the printed circuit board. Maximum sensitivity provides a 0dB reading with an input of -14dB ("Peak" mode) or -10dB ("VU" mode)

ES 216 .....\$60.00

## CASES

Camera

Shock Isolation  
Rack Case

### EXCALIBUR CASES

- Standard sizes
- All models for every application
- Tough, professional

Excalibur cases meet or exceed ATA (Air Transport Association) specifications for construction. Every case is engineered for durability, long service, maximum security for your equipment and meticulous styling. The "Excalibur Look" is smooth, polished and professional.

#### For Delicate Equipment

The skilled craftsmen at Excalibur are familiar with late model Arri and other fine cameras. They are experienced at fitting camera cases with lining designed for maximum shock isolation and years of service.

#### For Rackmount and Shockmount

Excalibur's Rack — The professional way to transport all your 19" rackmounted gear for easy access and operation.

Rack cases are configured for 19" panels with rack-mount ears and 18" rackable depth (without lids).

These top-of-the-line cases are available in either fiberglass or ABS.

Colors: choose blue, gray, black, white, red, green, orange or yellow.

#### For "All Kinds Of Stuff"

The AKS Case — the professional way to organize and pack all kinds of things that:

- You always need at your fingertips
- Won't fit easily into other cases

#### How To Order

All we need to know is what equipment will go in the case, manufacturer and model number if applicable. You may select options such as accessory compartments, casters, locks, color.

# DIGITAL EFFECTS PROCESSORS

## Computer Video Instrument

The Computer Video Instrument (CVI) is ideally suited to the economics and capabilities of 3/4" production facilities. It's also a unique tool for music video, storyboarding, video artistry, live performance, and educational and commercial applications — even some forms of video animation.

The CVI can take any video image from a live camera, tape, film, still, or slide and enhance or manipulate the image in real time through effects as well as by on-screen painting and drawing.

Still images, presets and sequences can be stored digitally onto video tape and recalled for later use.

The CVI is a computer based "real time" digital effects processor with paint, A/B wipes, keyer, sequencer and titling facilities, available in both NTSC and PAL. The CVI has a palette of 4096 colors, 54 brush shapes, and 54 textures. Since the CVI is menu driven and the control panel has "slider" controls of such functions as: Zoom, Stretch, Horizontal and Vertical Pan, Hue, Saturation, Value and Color Depth control it allows the user a "user friendly" atmosphere in which to create. Use any of the 100 factory presets or modify to your liking and store them for future use. There is an RS232 port for communications with other computers. Supplied with a 2 meter control panel cable.

CVI #32291 .....\$6,800.00  
CVI Rev 7 (Memory Module and Alphanumeric Keyboard) #32296 .....7,890.00  
CVI Rev 7 Graphics Pad #32297 .....8,790.00

## CVI Plus

The CVI Plus has all the features of the CVI and:

- Icon based menus
- The added features of the Memory Module as standard
- The Alphanumeric Keyboard as standard
- Digital and analog circuit boards
- 2 fields or 1 frame of memory
- Diagonal wipes, live picture inversions and more

CVI Plus #42291 .....\$ 9,950.00  
CVI Plus and Graphics Pad #42292 .....10,850.00

## Memory Module REV 7 and Alphanumeric Keyboard

For use with the CVI. Adds additional onboard memory to allow for storage of: 36 user defined brushes and textures, adds 72 new brushes/textures, 100 pages of title memory, and 8 fonts (1 user definable). The sequencer memory has been increased to allow for 10 sequences totaling 9000 lines of data. The encoded QWERTY keyboard allows for quick and accurate control of all CVI functions, input of titles, editing of sequences and sequencer start.

Memory Module REV 7 #32301 .....\$1,112.00

## Graphics Pad

A large drawing tablet with a 12 x 12 active area. Gives the user greater control in drawing and pixel placement. The menu area allows for complete control of menus. Comes standard with 4 button cursor, stylus and holder and cables.

Graphics Pad #32402 .....\$1,040.00

(Note: Memory Module is required for use on the CVI)

32297

## CVI Link — Amiga

Software and interface cable package to allow the CVI and CVI Plus to communicate with the Amiga Computer. Software package allows controlling of the CVI/CVI Plus from the Amiga, by using the Amiga to display the Fairlight menus. Future software updates will include SMPTE lock, IFF to/from CVI format.

CVI Link — Amiga #32602 .....\$795.00  
CVI Link — IBM .....795.00

## SMPTE Time Code Reader and Software — Amiga

A hardware and software package consisting of a SMPTE Time Code Reader, Edit Decision List Processor software, (EDLP), Time Code Window Display software (TCWD), Time Code Continuity Tester software (TCCT) and Time Code Edit Lister software (TCEL). Can be used without CVI/CVI Plus.

SMPTE Time Code Reader and Software — Amiga #32604 .....\$895.00

# ENCODER/DETAIL PROCESSOR

## CTE-N NTSC Encoder

The CTE-N pre-filters luminance and chrominance informations prior to mixing, in order to avoid spectral overlap and artifacts. It is the only NTSC encoder which generates an NTSC signal free of cross-color and cross-luminance components. If the signal generated by the CTE-N is decoded through a CFD-N decoder, the result is virtually indistinguishable from R,G,B.

Even if the CTE-N signal is observed on a home receiver, the picture quality will be noticeably improved, as cross-color and cross-luminance artifacts are much lower.

In fact, the quality of Faroudja encoding and decoding processes is such that now NTSC Video Matting is possible, under a form which defies detection and which is indistinguishable from R,G,B matting. As a result, high quality matting from 1" tape sources is now practical. Furthermore, computer graphics can be manipulated or stored under NTSC form and displayed or transmitted without loss of quality.

CTE-N

## Specifications

### Inputs — Looptthrough (High Impedance)

<b>Level</b>	
R:	0.7V p-p non-composite
G:	0.7V p-p non-composite
B:	0.7V p-p non-composite

CTE-X Extender Board	..... 150.00
CTE-DP Detail Processor	..... 1200.00

## Vertical and Horizontal Detail Processor

The Vertical and Horizontal Detail Processor (VHP), which uses the patented boost principle, improves the visibility of small details whether they are present in the horizontal or vertical direction without enhancing large outlines. This approach presents numerous advantages over the use of a conventional enhancer: the picture is more natural and acquires a certain film-look, and does not show the plastic or "cartoon" effect typical of conventional enhancers or low-cost, limited bandwidth cameras and VTRs.

Available in the PAL/SECAM or NTSC standards, VHP is equipped with detail and video level threshold controls which make its operation virtually noise-free in noisy and dark picture areas. Horizontal and vertical boost levels are separately controllable.

## Specifications

<b>Input/Output</b>	
<b>Input Signal:</b>	1V p-p composite video, 75 ohms
<b>Output Signal:</b>	1V p-p composite video, 75 ohms

### Overall Performance (Detail Boost Off)

<b>2T Sine Pulse K Factor:</b>	2%
<b>Chroma-Luminance Delay:</b>	< 20ns
<b>Frequency Response:</b>	± 1dB until 4.2MHz
<b>Differential Phase:</b>	2.5%

# DECODER/TRANSCODER

## CFD-N NTSC Decoder with Chroma Enhancer

The CFD-N is a high quality NTSC to RGB comb filter decoder for use in critical applications where high resolution and absence of artifacts are required. Among these applications are large screen projection, precision color monitoring, tape-to-film transfer, computer generated information display, color keying and standard conversion.

The CFD-N uses an active comb filtering method which leads to a much more effective suppression of color subcarrier dot crawl problem present with standard comb filter designs. In addition, the resultant image has no visible loss of resolution. The luminance bandwidth extends to 10MHz, making the CFD-N the closest thing to true RGB possible. This comb filter approach results also into an inherent improvement in signal-to-noise ratio.

Features of the CFD-N include also, a luminance enhancer to improve narrow band input signals, and chroma enhancement circuitry which eliminates ringing, chroma/luminance delay errors, and apparent loss of chroma bandwidth often associated with NTSC signals.

With a standard NTSC input signal, the CFD-N decoder provides on the back panel: Separate RGB signals, combed chroma and luminance, R-Y, B-Y, G-Y, and sync outputs. All sources drivers are capable of handling three outputs.

The CFD-N is a moderately priced professional unit, housed in a rugged mount case only one module high.

## Specifications

### Inputs (75 ohms)

**Video:** 1V p-p NTSC  
**Subcarrier:** 4V p-p 3.58MHz

### Outputs (75 ohms)

**R, G, B:** 1V p-p  
**R-Y, B-Y, G-Y:** 1V p-p  
**Luminance:** 1V p-p  
**Chroma:** 3.58MHz, 1V p-p  
**Sync:** 4V p-p

### Performances, Luminance Channel

**Bandwidth:**  $\pm 1$ dB to 5MHz, -3dB at 8MHz  
**2T Sine-Square Pulse K Factor:**  $< 1.5\%$   
**Vertical Tilt:**  $< 2\%$   
**Signal-To-Noise Ratio:** 60dB  
**Subcarrier Rejection:** 32dB

### Performances, Chrominance Channel

**Demodulated Chroma Bandwidth:** 1.5MHz  
**Demodulation Quadrature:**  $90^\circ \pm 1^\circ$   
**DP:**  $< 1.5^\circ$   
**DG:**  $< 1.5\%$   
**Chroma-Luminance Delay Error:**  $< 25$ ns

CFD-N .....\$6250.00  
CFD-1H 1H Delay Option .....375.00

## CTC-N Transcoder

The CTC-N is a high quality bidirectional (RGB to components or components to RGB) transcoder. It contains a genlock sync generator with blanking processor and sync reinsertion.

A certain amount of color correction is provided through two black balance front panel controls.

The proc-amp controls provide for a  $\pm 15$  IRE set-up control, which allows for removal of set-up from the luminance signal if required. BNC and Betacam style 12-pin connectors are provided.

An internal color bar generator is available as an option.

CFD-N

## Specifications

**Inputs:** Y/R-Y/B-Y, or R/G/B Looping BNC or 12-pin terminated  
Y .7143V p-p non-composite or 1V p-p composite (100% white)  
R-Y .7V p-p (75% saturation)  
B-Y .7V p-p (75% saturation)  
or

R .7V p-p non-composite or 1V p-p composite (100% white)  
G .7V p-p non-composite or 1V p-p composite (100% white)  
B .7V p-p non-composite or 1V p-p composite (100% white)

**Outputs:** Sync: 4V p-p or Blackburst: .3V p-p  
R/G/B or Y/R-Y/B-Y 2 BNC and 1 12-pin of each  
R .7V p-p non-composite or 1V p-p composite (100% white)  
G .7V p-p non-composite or 1V p-p composite (100% white)  
B .7V p-p non-composite or 1V p-p composite (100% white)

or  
Y .7143V p-p non-composite or 1V p-p composite (100% white)  
R-Y .7V p-p (75% saturation)  
B-Y .7V p-p (75% saturation)

## Video Performance

**Bandwidth:**  $\pm .3$ dB to 8MHz  
**T Pulse K Factor:**  $< 1\%$   
**Tilt:**  $< 1\%$   
**Signal-To-Noise Ratio:** 60dB  
**Matrix Accuracy:**  $\pm .1\%$   
**Input to Output Accuracy:**  $\pm .2\%$   
**Relative Delay:**  $< 5$ ns  
**Return Loss (Power On):**  $> 50$ dB

# TIME CODE GENERATOR/READER

F21

## F21 SMPTE Time Code Generator/Reader Generator

- Drop or non-drop frame time code
- Free run mode syncs with internal crystal
- Hours, minutes, frames presettable
- Jam sync function initializes generator to match existing code

### Character Inserter

- Time code display is superimposed on video signal for "window dubs" or "burned in" copies
- Contrast adjustable from black on white to white on black
- Selectable large or small display

### Reader

- Reads from 1/30 to over 15 times play speed, forward and reverse
- Automatic error bypass
- Regen function reads time code, regenerates the time code it is reading and sends the regenerated time code out as an audio signal

The F21 is the latest model in the SMPTE Time Code Generator/Reader Series. Based on its predecessor, the reliable and popular F200, the F21 is an effective, easy to use tool that enables you to record and read time code and create "window dub" copies.

When generating, the F21 will present the time code as an audio signal at the time code out jack (RCA type), as characters superimposed on the video signal at the video out jack (BNC type) and on the LED display on the front panel. This configuration not only allows you to record time code as an audio signal on either channel 1 or 2 of your master tape, but you can also simultaneously create a work copy with a "window dub" by running the video out to a second VCR.

While in read mode the F21 will read any longitudinal SMPTE time code and once again display the time code on the outgoing video signal and on the LED display. Here the advantage of having both a generator and a reader in one unit becomes apparent since you can not only record time code on your master tapes but you can also make an unlimited number of "window dubs" when the need arises.

Two other features that are also very useful are the jam sync and regen modes. When in jam sync, the F21 will use the reader to determine the address and then will switch to gener-

ate mode. In this way time code that has been lost can be replaced or a tape that was only partially recorded can be completed. In comparison, when using regen, the F21 will read time code and then regenerate that time code and send it out the time code out jack as an audio signal as well as displaying it on the video out. This function is handy for making copies of the master tape since both the video and the time code on audio track 1 or 2 can be transferred together.

The F21 also gives you a choice of two display sizes and the ability to position the display anywhere on the screen as well as placing it in the vertical interval. The contrast of the display can be adjusted from black on white to white on black or the background can be eliminated altogether. Finally, the hours, minutes and seconds positions can all be preset within the SMPTE specification with the exception that the hours position will go all the way to 99.

Simply stated, the F21 is a complete time code system in one easy to use package.

## Specifications

<b>Video Input:</b>	1.0V p-p 75 ohm or high impedance. BNC connector
<b>Video Output:</b>	Characters are keyed into a unity gain pass-through of the input signal. When the F200's power switch is off, the input signal is looped through BNC connector
<b>Time Code Input:</b>	High impedance, unbalanced. Signal range 500mV to 8V p-p. RCA type phono connector
<b>Time Code Output:</b>	Adjustable from 0-5V p-p into high impedance, unbalanced
<b>Characters:</b>	Size approx. 2.5 $\mu$ s wide by 24 lines high. Double height characters may be selected
<b>Display:</b>	Contrast adjustable for white characters on black background or black characters on white background. Position fully adjustable with front panel controls
<b>Power Requirement:</b>	110-120VAC 60Hz
<b>Dimensions:</b>	19" x 6 $\frac{1}{4}$ " x 1 $\frac{3}{4}$ ". Standard rackmount face plate
<b>F21</b>	.....\$1295.00

# FIBERBILT CASES, INC.

601 W. 26th St.

(800) 847-4176

# CASES

## A/V and Video Cases

Fiberbilt has designed and engineered a wide range of A/V and Video, shipping and carrying cases specifically for hundreds of commonly used pieces of equipment.

## Padded Adjustable Cases

Quick, easy, do-it-yourself partitioning methods to fit your particular needs for carrying or shipping cases.

## Padded Partitions

A patented system of thickly padded partitions interlock with each other and with the padded sidewalls of the case by means of the tongue-and-groove principle. Slots spaced 1" apart in the padding of the partitions and sidewalls provide for any compartment arrangement to cushion your equipment perfectly with shock absorbing foam padding. The partitions can be rearranged or added to at any time and the case is fully insulated against heat, cold and dust.

## Diced Foam

Diced foam full depth padding "picks out" to provide any shape or size cavity for the ultimate in equipment protection.

A practical Adapt-A-Case concept lets you "pick out" the contour areas you need from the 1" thick layers of grid pattern, partially-cut-through foam.

## Sales Aid Cases

Fiberbilt's design and manufacturing expertise can help you achieve the perfect case to display and protect your product so that it remains in tip top condition.

Our stock cases are designed to display specific products to maximum advantage. Our individually designed cases can do the same job for your product no matter what it is.

Just send us your samples, and we will submit a sketch or layout without charge. Cost estimates also submitted on any quantity—whether a single case or thousands. Whatever the product, we have the experience to custom design a case to your exact specifications.

## Protective Carrying Cases

Your product, no matter how delicate, is protected by these strong, attractive, and lightweight carrying cases.

Our stock styles can be obtained with either specially die-cut foam inserts and partitions, or with our patented adjustable partitions. Special cases in any style or size can be manufactured and customized to your specific needs...economically, even in small quantities.

## Protective Shipping Cases

Your product is protected when shipped by land, sea, or air in one of Fiberbilt's protective shipping cases...rugged, durable, lightweight.

Aluminum, Polyplex, or Fiberglass exterior bonded to plywood—to give a lightweight, yet tremendously rigid and durable shell. Or, for lower weight and cost, choose a high density polyethylene case. No matter which you select, you've got a rugged exterior designed for heavy cameras, TV monitors and other delicate equipment that you want to travel safely.

Inside choose special padding, contoured foam, partitions or trays, designed by our engineers to cushion your equipment to take the roughest knocks.

## Rack and Shock Mount Cases

Shipping trunks for rackmount electronics, with 2" deep removable covers front and back. A 2" thick layer of shock-absorbing foam between the inner shell and the outer shipping case protects valuable electronic rack units.

## Computer Hardware Cases

Fiberbilt manufactures a complete line of cases for shipping and carrying computer equipment. Call for details on a case for your particular piece of equipment.

## Adapt-A-Case

Adapt-A-Case is a uniquely versatile and secure carrying case and shipping system for the equipment of the professional photographer.

It is unusually adaptable because the interior space can be partitioned and re-partitioned to give safe, snug, protective storage to any configuration for cameras, backs, lenses, film projectors, strobe lights, tripods, film packs.

Adapt-A-Case comes in rigid handsome aluminum, sturdy fabricated, or rugged molded plastic. 65 different styles and sizes. All cases available with adjustable padded partitions or diced foam.

Call for sizes and pricing.

# BATTERY BELTS/WIDE ANGLE LENS ATTACHMENTS

## SLA12100C/12100C/L Battery Belts with Charger

Portable Energy Products battery packs and belts for video cameras, recorders, and portable lights are unique: they feature rechargeable sealed lead-acid batteries in 25 AH, 12.5 AH, 10 AH, 5 AH, and 2.5 AH cells, with custom units and solar chargers available.

The design of sealed lead-acid batteries overcomes many of the limitations of other battery systems and offers reliability, ruggedness, and long shelf and service life in performance. The sealed lead-acid battery maintains excellent voltage regulation over a wide temperature range, exceeding the performance of nicad systems in cold weather operation. The sealed lead-acid battery does not develop a memory.

All cells in the Portable Energy Products battery systems are tested and matched for each unit. Battery belts are constructed of tough, crack-resistant Naugahyde casings with convenient velcro closures. Packs are constructed of ABS.

Portable Energy Products external battery chargers offer the most desirable characteristics for battery life and recharge performance. The hysteresis loop chargers are two-step constant current chargers which automatically sense and supply battery requirements. The chargers will automatically start up at a high rate and display automatic turn-on if battery is low.

**Model SLA 12100C Battery Belt with Charger.**

## Wide Eye 1/11 Wide-Angle Lens Attachments

- Made of high quality optical glass, with multiple high-efficiency anti-reflective coatings.
- Lightweight: Wide Eye I weighs less than 8 oz. Wide Eye II weighs less than 16 oz.
- Wide-angle range extension: Wide Eye I will extend the widest angle of the video zoom lens by a factor of 0.64; Wide Eye II will extend it by a factor of 0.51.
- Filters: Wide Eye I accepts all Series 9 special effects filters, such as star filters, polarizing filters, etc.
- Front-mounted Wide Eye I & II are readily attached to most ENG/EFP video lenses which have macro and/or adjustable back-focusing capabilities.

Ideally suited for ENG/EFP applications, the Wide Eye I and Wide Eye II wide-angle lens attachments are specially designed to provide the video cameraman in the field with an extra measure of versatility.

Simple and easy to attach onto most professional ENG/EFP video zoom lenses currently in use, the front-mounted Wide Eye I & II readily convert the widest angle of video zoom lenses into ultra wide-angle fixed focal length lenses, with no loss in light transmittance. The Wide Eye I delivers a sharp wide-angle image with minimal distortion. The Wide Eye II is ideal for accomplishing "fish eye" special effects. They are compatible with most professional ENG/EFP zoom lenses such as Fujinon, Canon, Tamron, etc.

**Wide Eye I**  
wide angle attachment ..... \$445.00  
**Wide Eye II**

# SIGNAL PROCESSORS

## CVM-500 Component Video Mixer

- 8 inputs including black and color background independent for RGB, Y/R-Y/B-Y or YIQ signals
- Full bandwidth for sharp colorizing in RGB graphics applications
- Mix/effect system with 22 programmable wipes, key inputs, matte generator and auto transition
- Program mix row with auto transition between program and preset buses
- Downstream keyer for titling
- 3 independent color matte generators
- 4 auto transition modes
- 6 camera sync outputs, 3 Black Burst and 3 Composite Sync
- Control panel can be interfaced with the Extrol Effects Memory and Edit Controllers
- Y only output on program and preview line for B/W monitoring
- GPI control extends editing capabilities, increases system flexibility
- Tally interfaces have been designed into both CVM and PVM mainframes
- Edge noise is reduced to minimum during keying, matting and wipe operations
- High resolution image is produced for all modes of mixer operation
- Compact, portable, interfaces easily with existing equipment
- Optional CCK-500 Exkey Chroma Keyer and FXM-500 Extrol Effects Memory

CVM-500	.....	\$14,900.00
CCK-500	Exkey Component Chroma Keyer	..... 1,000.00

## CT-500 Component Transcoder

- Full matrix transcoding capabilities
- Simultaneous component output signals
- RGB outputs with or without sync on the green channel
- Internally adjustable gain controls to satisfy input and output interface level requirements
- High signal transparency; very flat frequency response; high S/N ratio and very low signal distortion

CT-500	.....	\$2,400.00
--------	-------	------------

PVM-600

## PVM-600 Production Video Mixer

- 4 buses—Program, Preset, A and B
- 12 inputs for effective editing capability
- Internal backcolor and black signal generator for easy title composition
- 24 wipes plus hard and soft border with modulation function
- 2 program outputs, 2 preview outputs, 2 Mix/Eff outputs for system connection expansion
- Auto transitions for effects, program, downstream keyer and fade to black; can be preset from 0 to 999 frames
- Colorizing functions for background, border and downstream keyer
- 2 key inputs can be colorized
- 3 reference black burst outputs
- Tally outputs
- GPI and serial interface ports for editor interface

PVM-600	.....	\$14,950.00
---------	-------	-------------

## PVM-500 Production Video Mixer

- 4 bus, 6 input plus black and color background
- Independent transition rates for Effects, Program, Downstream Keyer and Fade to Black
- 3 independent colorizers for Background, Effects Keyer and Downstream Keyer
- 22 wipe patterns
- Program mix row with auto transition between program and preset buses
- Downstream keyer for titling
- 6 independently adjustable camera and video source Black Burst reference outputs
- 2 Program Line outputs and Preview Monitor output
- Edge generator in the DSK
- Compact size, easy operation and easy interface with other equipment make it the ideal small switcher for field production or studio applications
- Optional CCK-500 Exkey Chroma Keyer, FXM-500 Extrol Effects Memory and Editor Interface

PVM-500	.....	\$8,950.00

## CCS-4360 Color Corrector

- Improves inferior sync and burst by consistently inserting new signals at the output when input signal disturbances occur
- Black stretch function enhances detail in low light level scenes
- Vertical blanking can be in 1 H steps within a range of 11 H to 21 H
- Independent R, G and B controls for white, black and gamma
- All operation modes (bypass, operate, off) have equal delay between input and output to eliminate system timing differences
- Differential and balance operation modes
- Rackmountable main frame and remote operation panel; can be used with up to 1,000' of multi-cable

CCS-4360	.....	\$6,950.00
----------	-------	------------

## CCS-4300 Color Corrector with Full Broadcast Processing Amp

- Full broadcast specifications
- 19" rackmounting processor and remote control unit
- Independent RGB controls for both white and black levels
- Vertical blanking set in 1H steps range 10H to 21H
- Designed for color balancing and leveling in production, post production and telecine operations

CCS-4300	.....	\$5,950.00

# DIGITAL TIME BASE CORRECTORS/ FRAME SYNCHRONIZER

FA-430

FA-440

VEC-440

## FA-430

### Digital Time Base Corrector/Image Processor

- Full feature processing for 3/4" and 1/2" VTR formats
- Includes Time Base Correction, Image Enhancement, Digital Color Correction and Noise Reduction
- System consists of the basic 19" rackmount main control unit and a compact remote controller containing controls for all correction functions
- Incorporates the major design and performance features of the Model FA-410
- Combines both H detail enhancement and selective noise reduction to provide pleasing pictures with appearance of greater bandwidth
- Color correction allows RGB correction to compensate for poorly aligned camera white and black levels as well as for camera-to-camera differences in shooting the same scene
- Special Black Stretch circuit that provides improved contrast in low light level scenes
- Allows directors to "paint" scenes to create special moods by changing overall picture hue
- Time Base Correction capabilities provide professional broadcast level performance
- Composite or non-composite video outputs, built-in sync pulse generator, and composite sync and VTR subcarrier outputs
- Dub-In, Dub-Out mode for editing and duplicating

FA-430 . . . . . \$9,950.00

## FA-440 Digital Time Base Corrector with VEC-440 Video Effects Controller

- Adjustable automatic freeze to exclude inferior signals
- Process amp controls (video level, chroma level, chroma phase, black level) easily accessible behind front panel
- Compact, lightweight unit
- Optional freeze remote control
- Multiple digital effects
- Programmable effects routines
- Built-in effects keyer with output key signal
- Full frame time base correction
- Frame memory provides field or frame freeze with adjustable strobe freeze
- Component processing
- Dropout compensator
- Compatible with a wide variety of 1/2" and 3/4" VTRs
- DOC

VEC-440 Video Effects Controller offers a selection of eye-catching special effects to make your video productions really stand out.

- Effects include negative; variable paint effect; variable mosaic; multiple images combining frozen and moving pictures; compression; invert; color background and a memory function that allows you to program up to 9 pages of 127 effects per page.

FA-440/VEC-440 . . . . . \$9,450.00

FA-450

## FA-450 Component Time Base Corrector

- Advanced 8-bit digital design providing full-frame TBC performance of the highest quality for PAL or NTSC systems
- Full color frame memory with field/frame picture freeze
- Highly versatile, with input capability for both component [RGB, YUV, Y, C685 (Y, C924) for PAL; RGB, Y, R-Y, B-Y, YIQ and Y, C688 for NTSC] and composite signals
- M-dub and Y/C dub input and output
- DOC
- Compatible with a wide range of existing and future video technology including component VTR, CVM-500 Component Video Mixer, U-matic VTR with dynamic tracking
- Compatible with both low and high band VTR (PAL only)
- M-dub connector for both YIQ and Y, R-Y and B-Y (NTSC only)

FA-450 . . . . . \$11,950.00

## FA-800 Autocor™

### Time Base Corrector/Frame Synchronizer

- Frame memory with automatic level control function which sets input video to the most suitable level
- V blanking line control to designate VITC time code, test, ID and teletext signals
- Automatic freeze function which freezes the last good video frame when the video input is interrupted
- Selectable video freeze or black signal output in automatic freeze mode
- Freeze is automatically released when video signal input starts again
- Selectable frame/field freeze in manual mode
- Top and bottom 4-bit data swap
- Automatic selection of color/black and white mode
- Built-in RS-170A standard sync signal generator with genlock capability
- Adjustable SCH of video output in the internal mode
- Full processing amp facility and optional remote control unit

FA-800 . . . . . \$8,950.00

Note: All For-A products are available in PAL standard. Call for pricing.

Prices and Specifications Subject to Change Without Notice.

# TIME BASE CORRECTORS

## FA-200 Digital Time Base Corrector

- Built-in color picture freeze function, frame or field freeze
- Full-frame time base correction
- Standard NTSC signal output: can be incorporated in almost any video system even with non-V-lock VTR
- Built-in RS-170A standard sync signal generator with genlock function
- V blanking is controlled in one-line steps over a range from line 10 to line 20
- Compact, lightweight unit
- Remote control capability (optional) to control the video level, chroma level, chroma phase, set-up and all freeze functions (same remote control console as FA-420)

FA-200 ..... \$3950.00  
FA-420RU (Remote Unit for FA-200/FA-420) ..... 950.00

FA-200

## FA-410D Time Base Corrector with DT

- PAL/SECAM, NTSC standards
- 16H wide range time base correction for a large variety of popular VTRs (such as the 3/4" U-format, VHS and Betamax) in studio and production use today
- Designed especially for ENG and field production applications
- Component encoding of luminance and color difference signals
- Either external sync referenced or non-capstan servoed VTRs are corrected
- Built-in dynamic tracking
- Portable small size and low weight
- Unbeatable low cost compared with other available equipment with less capability in many instances
- Digital luminance/chroma delay correction
- Composite and non-composite outputs
- Chroma noise reduction with comb filtering
- Built-in sync pulse generator
- LED input level display
- White clip function
- Optional digital DOC is available (standard for NTSC)
- Dimensions: 3.46"H x 16.92"W x 19.88"D (88 x 430 x 505mm) (19" rack type)

FA-410D ..... \$6950.00  
DT Cable for Sony BVU-820 ..... 100.00

FA-410D

## FA-420 Time Base Corrector with Freeze Frame

- Compact, lightweight unit
- Full feature digital time base correction
- Full color frame memory
- Capable of correcting errors in 1/2" and 3/4" VTRs, or any V-lock or non-V-lock source
- TBC processes color in either the HETERO or VTR SC modes
- Optional remote control unit allows full operation away from the FA-420
- Full processing amp allows control of video level, chroma level, chroma phase, setup and freeze operation
- Comes with built-in digital DOC and a RS-170A standard sync signal generator with genlock function

FA-420 ..... \$6950.00  
FA-420RU Remote Unit for FA-400/FA-420 ..... 950.00

FA-420

## FA-740 Parallel Effects Time Base Corrector

- Reliable dual-channel time base correction
- High quality analog component signal processing using CCD comb filter
- DOC (dropout compensation)
- Individual signal proc amp for each channel
- Program memory capability (10 events x 10 pages)
- RS-422 and GPI ports for editing and external control

FA-740 ..... \$11,950.00

FA-740

# SIGNAL PROCESSORS/ TIME CODE EQUIPMENT

DEC-100

### DEC-100 RGB Decoder

- Converts standard NTSC video signals to RGB components, primarily used to provide Chroma Key inputs on switchers or to mix with RGB Graphic Systems
- Converts composite video inputs from cameras and VTRs, etc. and provides RGB component signals as well as sync outputs

DEC-100 .....\$2000.00

DEC-110

### DEC-110 RGB Decoder

- High performance color decoder for demodulating composite video signals into separate R, G and B outputs
- Sync signal can also be provided, either as a separate output, or combined with the Green output
- Designed for use in component video systems
- Front panel controls include individual level adjustments for video, chroma, R, G and B, plus chroma phase and set up adjustments
- State-of-the-art "adaptive" comb filter circuitry

DEC-110 .....\$3000.00

ENC-110

### ENC-110 NTSC Encoder

- Specially designed to incorporate with the FVW-910, in conjunction with the CC-910, CS-710 and VTW-600 in conjunction with the CU-600, resulting in effective performance
- Encodes analog or digital RGB signals input
- Special mixing is performed providing certain and distinct superimposition
- Both NTSC and PAL standards are available

ENC-110 .....\$3000.00

ALC-4100

### ALC-4100 Automatic Level Controller

- PAL, NTSC standards
- Correction of video output level differences
- Automatic gain control
- Separate control for video, sync and burst signals

ALC-4100 .....\$3300.00

TGR-3300

### TGR-3300 Time Code Generator/Reader/Title

- PAL or NTSC standard
- Reads and generates both longitudinal and vertical interval time code
- EBU, SMPTE standard
- Reads LTC from 1/32 to 110 times normal speed, VITC from still to 10 times normal speed
- Color frame lock
- Slave lock
- Drop frame compensation
- Error bypass
- Time code display can be superimposed into the video program in black or white characters with both size and position control, plus black or white edge

TGR-3300 .....\$6500.00

TCR-3300

### TCR-3300 Time Code Reader/Title

- Reads SMPTE and EBU standard time code
- Reads user bit code
- Reads both Longitudinal and Vertical Interval time code
- Reads LTC from 1/10 to 110 times normal speed, VITC from still to 5 times normal speed
- Selectable black or white characters with black or white edge vertical/horizontal position control for time code superimposition
- Two data I/O ports available for external time code input and remote control

TCR-3300 .....\$4950.00

TCR-3500

### TCR-3500 Time Code Reader/Title

- Low cost SMPTE and EBU standards time code reader for use in precision video tape editing systems
- PAL, NTSC standards
- It reads out SMPTE or EBU time code and 32 spare bits code
- Drop-out function
- Time code display function so it is not necessary to utilize TG-160 title generator
- Video time display function with frame numbers of the TG-55B video timer is included
- Built-in real time generator: full automatic running real time can be instantly displayed on the monitor
- 2 time code memories: retrievable instantly
- Identification number for the VTR tape can be displayed on the monitor

TCR-3500 .....\$4000.00

Prices and Specifications Subject to Change Without Notice.

# CHARACTER GENERATORS

## VTW-100 Video Typewriter

- Portable, easy to connect and easy to operate
  - 32 pages of memory
  - 20 characters x 8 lines per page
  - 1 month memory backup
  - Preview function
  - 4-step proportional character size control
  - Vertical and horizontal character positioning
  - Operates on AC or 12VDC power (AC adaptor supplied)
  - Compatible with CI-10 Color Interface for characters and background color
- VTW-100 . . . . . \$950.00

## VTW-220 Video Typewriter

- Integrates easily into any video system to produce clear, legible, high quality characters in 4 different sizes
  - Ideally suited for a range of video production and information display applications including cable TV and corporate, institutional or educational networks
  - Provides 512-color selection with a working palette of 14 colors
  - Character-by-character underline in any of the 512 colors
  - 9-speed roll and crawl
  - Adjustable matte for edge and shadows as well as extensive text editing capabilities
  - A 32-page memory, expandable to 64 pages and capable of displaying up to 256 continuous lines of text, is included
  - RS-232C port is provided for computer interface
- VTW-220 . . . . . \$2950.00  
MC-220 Memory Card . . . . . 195.00  
TTL-220 TTL Cable for VTW-220 . . . . . 100.00

## VTW-400 Video Typewriter

- Character generator has clear, extremely high-resolution characters in a choice of 3 sizes and 2 resident font styles
  - Includes a 4-step character slant
  - Character flash
  - Dropshadow and edge
  - 8-page memory in standard version
  - Displays 8 lines per page with 26 characters per line
  - An optional built-in floppy disk adds 300 pages of memory
  - 64 colors available for page by page character colorizing
  - Displays modes for automatic and manual sequential page switching
  - Time interval adjustable between 1-999 seconds
  - Word processing characteristics such as line skip, line and page shifts, and line check
  - Vertical position control
  - Optional extras are also available. The MU-400 floppy disk memory which provides up to 300 pages on one diskette and fits onto the control unit of the VTW-400, and the PU-400 preview unit which allows information to be typed onto a page while another page is being displayed on the line monitor
- VTW-400 . . . . . \$4950.00  
MU-400 Floppy Disk Memory . . . . . 1900.00  
DO-400 Second Disk Drive . . . . . 1000.00  
TTL-400 TTL Cable for VTW-400 . . . . . 100.00

## FVW-300 Video Writer

- Self-contained, extremely low cost freehand writer
  - Smooth writing: same picture elements as the FVW-910 (224 x 384 for NTSC, 256 x 384 for PAL) no line intermittence
  - Line thickness selection
  - Write, partial erase, total deletion functions
  - Automatic straight line drawing function
  - Cursor can be used as an instructional pointer. (Cursor superimposition)
  - Remote control capability
  - Tabletop use or 19" rack installation use
  - Optional MU-600 and RS-232C Serial Interface Unit are compatible
  - Dimensions: 3.46"H x 16.92"W x 11.81"D (88 x 430 x 300mm)
- FVW-300 . . . . . \$3500.00  
FVW-300RS RS-232C Interface . . . . . 300.00

VTW-400

FVW-300

## FVW-910 Video Writer

- Idealized freehand writer meets broad applications
- Any information can be smoothly written directly onto the screen by using the lightpen
- Line thickness selection
- 8 different directions roll operation
- Straight line drawing
- Write/erase function
- Optional 3-page memory for the B and W mode (1-page memory for the color mode)
- Tremendous potential in broadcasting, educational, medical, instructional and informational video systems
- Optional CC-910 and AA-910 are compatible
- Dimensions: Control Unit 4.72"H x 15.35"W x 13.98"D (176 x 390 x 355mm)
- Operation Unit 4.72"H x 15.35"W x 7.87"D (120 x 390 x 200mm)
- All units combined 18.50"H x 15.35"W x 22.44"D (470 x 390 x 570mm)

Note: Monitor console not included, and black and white monitor can be used with both the FVW-910 and the FVW-300.

- FVW-910 . . . . . \$6950.00  
CC-910 Color Control Unit . . . . . 650.00  
ENC-110 NTSC Encoder . . . . . 3000.00  
AA-910 Area Address Unit . . . . . 3000.00

# GENERATOR/ FRAME MEMORY/COUNTER/ POINTER/SYNTHESIZER

LG-100

## LG-100 Logo Generator

- PAL or NTSC standard
  - Custom designed logo is written into P-ROM and superimposed onto TV picture
  - One or two logos superimposed
  - H and V position control
  - Matte control for black or white logos
  - Capability for storing up to 8 different logo styles
  - Generates an output key signal, with or without sync
- LG-100 ..... \$1700.00

FM-60

## FM-60 Frame Memory

- Excellent device for video research and video surveillance
- B/W video signal is memorized in real time and frozen instantly frame by frame, or field by field
- Compact and lightweight yet reliable performance with low cost
- Automatic freeze function with freely set time interval
- Any of Video Timers, Video Measurement Units, Video Surveillance Units are effectively incorporated
- Dimensions: 1.75" H x 16.92" W x 11.81" D (19" rack type)

FM-60 ..... \$2250.00

## FM-80 Frame Memory

- Same B/W picture freeze functions as FM-60, plus data out facility for computer interfacing

FM-80 ..... \$3950.00

VC-81

## VC-81 Video Counter

- Slim-line video terminal unit
- Up to 8 digits, which counts from 0 to 9, are superimposed onto picture
- Display character format is 7 x 9 dot matrix
- Each character includes edge for maximum legibility
- Operation is performed either manually through the front panel facilities, or remotely through BCD or TTL 5V external input signals
- Start, stop, reset, matt control, V and H display position control facilities
- Wide applications such as program editing in broadcasting stations, time and score indications for sport events, traffic monitoring and control, data insertion in video research, security systems, etc.
- Dimensions: 1.75" H x 16.92" W x 11.81" D (19" rack type)

VC-81 ..... \$1250.00

VP-380

## VP-380 Video Pointer

- Compactly designed instructional instrument allows to superimpose 4 different directions of arrow pointers and 4 different symbol pointers (0, °, + and □) onto a picture
- Each pointer can be positioned anywhere within 80% of the effective picture area by using the joystick controller
- Black/white pointer selection
- Flash function
- Excellent for educational, medical and research purposes. (Effective use if incorporated with the video measurement unit)
- Dimensions: 1.75" H x 8.46" W x 9.84" D (half 19" rack type)

VP-380 ..... \$800.00

IV-530

## IV-530 Contour Synthesizer

- Unique device for analyzing X-ray and all types of difficult-to-interpret photographic data
- Differences in density within the image are converted into differences in contour (image enhancement), so that slight details of the picture will be easily discernible
- 21-step gradient switcher plus independent differential level control
- Negative/positive modes selection
- Dimensions: 1.97" H x 16.92" W x 14.17" D (19" rack type)

IV-530 ..... \$1750.00

# FOR-A CORP. OF AMERICA

Nonantum Office Park  
320 Nevada St.  
Newton, MA 02160  
(617) 244-3223 FAX: (617) 965-5085

# VIDEO MEASUREMENT EQUIPMENT/ GENERATOR

IV-550

### IV-550 Video Micro Scaler

- Specially developed for use with the microscope
- Horizontal length of an object in a picture can be precisely measured by using 1 horizontal and 2 vertical lines whose positions are independently varied
- High resolution: maximum 1999 horizontally
- Measured data is displayed on both the picture scene and front panel of the unit
- Calibration adjuster sets the most suitable measurement length based upon size of the object in a picture
- Edge enhancer function provides clear picture quality, assisting in precise measurement
- 5 different measurement units are selective (nm,  $\mu$ m, mm, cm and m)
- Dimensions: 3.46" H x 16.92" W x 13.78" D (19" rack type)

IV-550 .....\$3000.00

VPA-1000

### VPA-1000 Video Position Analyzer

- An excellent and accurate unit for researching and analyzing human actions and motions such as in sports, medical rehabilitation, etc.
- 1 each of horizontal line, vertical line and dot whose positions are independently varied are superimposed onto the picture, and position of the dot is expressed in XY coordinate value based upon position of the H and V lines, and displayed on both the picture and front panel of the unit
- The obtained data (XY coordinate values) can be fed to external equipment such as printer either automatically (every .5 second) or manually
- Slight differences in the regular movement of the object can be digitally analyzed
- Dimensions: 3.46" H x 16.92" W x 13.90" D (19" rack type)

VPA-1000 .....\$2750.00

IV-560

### IV-560 Video Measuring Gauge

- Superimposes circle, square, crosslines around any object in a TV picture
- Gives horizontal, vertical and diagonal values in XY coordinates
- "Trackball" controller for easy positioning

IV-560 .....\$4500.00

### IV-570 Crossline Generator

- Compact and easy operation design
- Essentially designed for observing, sizing, comparing or recognizing size, length or position of an object displayed in a picture
- One each of horizontal line and vertical line is displayed in either the straight line or dotted line display modes
- In either the straight/dot modes, each display line can be variably positioned on the monitor
- Also each display line can be set to the fixed position
- Graduations are included with horizontal and vertical straight lines
- Dimensions: 1.73" H x 8.46" W x 9.84" D

IV-570 .....\$875.00

TG-160

### TG-160 Title Generator

- Fixed character data is generated and superimposed through the built-in P-ROM
- External BCD input data (7 bits ASCII code) such as Time Code is superimposed independently or together with the fixed character data
- Up to 16 alphanumeric characters (7 x 9 dot matrix) are superimposed
- Black/white/off mask display at the back of the characters
- Matte control, V and H display position control and display size control facilities
- Excellent device to use with the Time Code Generator/Reader series
- Dimensions: 1.75" H x 16.92" W x 11.8" D (19" rack type)

TG-160 .....\$1750.00

# FOR-A-CORP. OF AMERICA

# TIMERS/GENERATORS/ DISTRIBUTION AMPLIFIERS

VTG-12

### VTG-12 12/24 Hour Time Date

- Compact size, low cost and high performance
- Battery backup function
- Generates a month-day-year, hour, minute, second display
- Character format is a 7 x 9 dot matrix with a built-in black border for maximum legibility
- Includes a built-in rechargeable battery

VTG-12 . . . . . \$825.00

### VTG-22 Portable Timer w/Stop Watch

- Designed for use with a video camera in field photography
- Easily attached to a VTR
- 12V power supply or external DC battery
- Built-in rechargeable battery for continual internal counting
- Two time modes available: Calendar Mode is standard and a Stop Watch adaptor can be added as an accessory

VTG-22 . . . . . \$980.00

10-Pin Camera Cable . . . . . 130.00

VTG-55B

### VTG-55B Video Timer

- Perfect timer for broadcasting use
- TV frame number display
- Time count-up in the range from -99 to +99 hours
- Independent display on/off for hour, minute, second and frame number
- 4-step display character size control
- Time freeze function
- Optional remote control box is available
- Time display, hour, minute, second and frame number

VTG-55B . . . . . \$2090.00

RG-55B Remote box for VTG-55B. . . . . 875.00

### VDA-106 Video Distribution Amplifier

- Up to 6 video outputs from 1 input
- 75 ohm high impedance input loopthrough for parallel connection (up to 10 sets)
- Can be rackmounted (half rack size) or used as a tabletop unit
- Ideal for video security and surveillance or CCTV applications

VDA-106 . . . . . \$350.00

### CC-106 Cable Compensator

- Combined cable compensator and distribution amplifier
- Reduces signal loss and deterioration in frequency response caused by long distance coaxial cable transmission
- Up to 6 video outputs from 1 input
- 75 ohm high impedance input loopthrough for parallel connection (up to 20 sets)
- Adjustment for video level and cable length

CC-106 . . . . . \$500.00

VTG-33

### VTG-33 Video Timer

- Perfect accessory to any television system, compatible with almost any existing installation
- Precision crystal controlled IC circuitry
- Accessible to video and VTR equipment users
- Compact, full-feature generator with wide operational flexibility

VTG-33 . . . . . \$980.00

RB-33 Remote box for VTG-33 and VTG-33F. . . . . 190.00

### VTG-55 Video Timer

- High performance professional unit formats
- Up-down counting versatility with freeze control
- Full remote control capability
- Crystal controlled IC reliability

VTG-55 . . . . . \$1925.00

RB-55 Remote box for VTG-55. . . . . 550.00

VA-310

### VA-310 Video/Audio Distribution Amplifier

- Up to 10 video and stereo audio outputs from 1 input
- 75 ohm high impedance input loopthrough for parallel connection (up to 10 sets)
- 19" rackmountable
- High quality distribution amplifier particularly suitable for post production systems

VA-310 . . . . . \$800.00

# FORTEL, INC.

# TIME BASE CORRECTORS

**DHP 625**

## DHP 525S Digital Time Base Corrector

- Infinite window correction range • S-VHS compatible • Frame freeze • Field freeze (interpolated) • Drop-out compensation • High speed shuttle • Horizontal enhancement • Luma noise reduction • NTSC composite in/out • Remote control option • CCIR-601 sampling • Provides digital high performance processing of 1/2" and 3/4" NTSC composite video signals • Compatible with most of the 1/2" and 3/4" VCRs around • 1 3/4" chassis • Front panel accessible PC boards ease troubleshooting and minimize downtime • Power consumption of < 100W

### Specifications

#### Signal Processing

**Sampling:** Per CCIR-601, 13.5MHz sampling, 4:1:1  
**Bandwidth:** 2.2MHz (-3dB) composite, 5.5MHz (-3dB) Y/C  
**Differential Gain:** < 1%  
**Differential Phase:** < 1°  
**K Factor:** 5% or less  
**Horizontal Tilt:** 1% or less  
**Vertical Tilt:** 1% or less  
**S/N Ratio:** 57dB

#### Residual Time

**Base Error:** ± 15nsec luminance  
± 2° chrominance

#### Inputs

**Y/C:** 3.58  
**Composite Video:** 1.0V p-p, ± 3dB, 75 ohms  
**Composite Genlock Signal:** 1.0V p-p, ± 3dB, externally terminated  
**VTR RF:** BNC connector, 75 ohms

#### Outputs

**Y/C:** 3.58  
**Video Out 1:** 1.0V p-p, 75 ohms, BNC connector  
**Video Out 2:** 1.0V p-p, 75 ohms, BNC connector  
**Advanced Sync:** 1V or 4V p-p, BNC connector, 75 ohms, ± 1.0dB

**Dimensions:** 1.75" H x 17.125" W x 20.75" D

**Operating Voltage:** 105 to 125VAC, 60Hz

**DHP 525S** ..... \$6495.00

## DHP 625 Digital Time Base Corrector

Same as DHP 525 except:

- Available in PAL
- EBU sampling rates
- For processing 1/2" and 3/4" PAL composite video signals

### Specifications

Same as DHP 525 except:

**Sampling:** Y 13.5MHz, U 3.375MHz, V 3.375MHz  
**Bandwidth:** 3.25MHz (-3dB)  
**K Factor:** 4% or less  
**Advanced Sync:** 1V or 2.2V p-p, BNC connector, 75 ohms, .3Y p-p

#### Operating

**Voltage:** 200-260VAC, 50/60Hz

**DHP-625** ..... \$6495.00

## Turbo 2 Time Base Corrector

- Infinite window correction range • Automatic detection of SP, Hi or Lo band dub inputs • Field or frame freeze with interpolation • VTR interface for slow motion operation • Horizontal enhancement • Noise reduction • 5MHz resolution from dub inputs • 1 rack unit high (1 3/4") • Available in NTSC or PAL • EBU sampling rates • Component outputs • Remote control option • Full-featured TBC intended for high-quality processing of video signals in a 3/4" recording environment • Picture quality associated with Y-688 "Dub" processing • Compatible with all 3/4" videocassette recorders • Power consumption of < 100W • Front-panel removeable boards and built-in circuit diagnostic testing speed troubleshooting and minimize downtime

### Specifications

**Sampling:** Y 13.5MHz, U 3.375MHz, V 3.375MHz  
**Bandwidth:** 5.0MHz (-3dB) Dub mode  
3.25MHz (-3dB) Encoded mode  
**Differential Gain:** < 1%  
**Differential Phase:** < 1°  
**K Factor:** 1% or less (Dub mode)  
4% or less (Encoded mode)  
**Horizontal Tilt:** 1% or less  
**S/N Ratio:** 57dB

#### Residual Time

**Base Error:** ± 15nsec luminance  
± 2° chrominance

#### Inputs

**Composite Video:** 1.0V p-p ± 3dB, 75 ohms  
**Composite Genlock Signal:** 1.0V p-p ± 3dB, externally terminated  
**Dub Input:** 7-pin connector, automatic SP, Hi or Lo band sensing and switching

**Turbo 2**

**VTR RF:** BNC connector, 75 ohms  
**VTR Interface:** Sony 18-pin VTR interface connector

#### Outputs

**Video Out 1:** 1.0V p-p, 75 ohms, BNC connector  
**Video Out 2:** 1.0V p-p, 75 ohms, BNC connector  
**Advanced Sync:** 1V or 2.2V p-p, BNC connector, 75 ohms, ± 1.0dB

#### Y Out:

1.0V p-p, 75 ohms, BNC connector, (Betacam compatible)

#### U Out:

0.7V p-p, 75 ohms, BNC connector

#### V Out:

0.7V p-p, 75 ohms, BNC connector

#### Dub Out:

7-pin connector, SP, Hi or Lo band switchable

#### Operating

**Voltage:** 200-260VAC, 47-63Hz

**Turbo 2 NTSC** ..... \$9550.00

**TBC Control\*** ..... \$750.00

#### Turbo 2 PAL

• Offers broadcast quality processing of 1/2" and 3/4" PAL format signals

**Turbo 2 PAL** ..... \$9550.00

\* The TBC Control can be used to remote front panel functions of the Turbo 2 or DHP 525 TBC.

# TIME BASE CORRECTOR

## Y-688<sup>32</sup> Total Error Corrector

- 32-line super-wide instantaneous window Phase Comp™ One and two line digital look ahead velocity compensator and phase error corrector
- Complete image processing including horizontal and vertical enhancement and horizontal detail improvement
- Luminance noise reduction through advanced compression and combing techniques to 10dB
- Chroma noise reduction to 10dB
- Chroma crispening
- Gyro-Trac™ automatic window re-centering for extraordinary errors without hue shift or horizontal movement
- Record 1™ pilot tone compatible for automatic setting of image processing controls
- Chroma Amplitude Correction through two line look ahead providing 4.2dB short term and 6dB long term correction
- Accepts shuttle speeds up to ten times normal
- Unitec™ construction features easy access to all components without board or unit removal from operating system
- Front panel image process bypasses control with internal programmable jumpers allowing anything from super transparent time base correction through extensive image reprocessing
- High efficiency, low power, low heat
- Accepts composite or component (Y-688<sup>32</sup>) signals and outputs both types
- Adjustable H and V blanking
- Automatic chroma/luminance delay compensation
- Adjustable video position
- Drop-out compensation based upon previous line information
- Single cable genlock sync generator
- Programmable jumpers and mode switches allow tailoring to specific system objectives
- Automatic color or monochrome operation
- Full proc amp
- Chroma combing

The circuitry of the Y-688<sup>32</sup> TEC accepts component or composite signals and performs all functions of time base correction and picture improvement in the component Y-688<sup>32</sup> form. This method bypassed the root cause of most errors before they occur.

Total Error Corrector for 3/4" professional series VTRs, featuring: Y-688 (dub) component input and output, NTSC composite input and output, 32-line TBC with DYNA-TRAC™ dynamic tracking and high speed shuttle, image processing with noise reduction, and full proc amp controls.

## Applications

- Use Y-688<sup>32</sup> for time base and image correction of U-Matic masters when dubbing to other U-Matics, VHS or Beta formats
- Edit, special effects, or A/B rolls through Y-688<sup>32</sup> for third generation tapes that look like master tapes
- Use accessory adaptors or RGB switcher to do complete production in component format for final product approaching full bandwidth format
- Reprocess any color-under signal to reduce luminance noise by 10dB and chroma noise by up to 10dB
- Use in conjunction with Record 1 for completely automatic processing of the cleanest, sharpest pictures ever from U-Matic
- Remove transmission noise and distortions from satellite feeds
- Use with latest scan track U-Matics for broadcast stable pictures in slow motion
- Do field production in U-Matic format and all post production through broadcast or distribution copies for lower program costs
- Use with microprocessor controllers and U-Matics for high quality, economical, automatic program delay or remote broadcast

# TIME BASE CORRECTOR

## SuperPro 100 S-VHS Time Base Corrector

- Super VHS and  $\frac{3}{4}$ " compatible
- 5.5MHz video bandwidth
- 4xSC sampling
- Full PROC AMP controls
- H phase control
- 2 composite video outputs

The SuperPro time base corrector accepts composite or Y/C signals from Super VHS recorders—and is compatible with sub-carrier feedback  $\frac{3}{4}$ " systems. It's engineered to provide highly transparent time base correction and make the most of Super VHS performance.

### Specifications

**Sampling:** 14.318MHz sampling  
**Bandwidth:** 5.5MHz (-3dB)

**Dub Chroma**  
**Frequency:** 3.58MHz

**Differential Gain:** < 2%  
**Differential Phase:** < 2°

**K Factor:** 1% or less  
**Horizontal Tilt:** 1% or less

**Vertical Tilt:** 1% or less  
**Signal-to-Noise Ratio:** 58dB

**Residual Time**  
**Base Error:**  $\pm$  15ns luminance  
**Correction Window:** 16 lines

**Inputs**  
**Composite**  
**Video Input:** 1.0V p-p  $\pm$  3dB, 75 ohms  
**Y/3.58 Input:** Standard 4-pin connector

**Composite Genlock**  
**Signal:** 1.0V p-p  $\pm$  3dB, externally terminated (video or blackburst)

### Outputs

**Video 1 Out:** 1.0V p-p, 75 ohms, BNC connector  
**Video 2 Out:** 1.0V p-p, 75 ohms, BNC connector  
**Advanced Sync:** 1.0V or 4.0V p-p, 75 ohms, BNC connector  
**VTR Subcarrier:** 2.0V p-p, nominal, 75 ohms, BNC connector

### Controls

**Set-Up:** Pot with knob  
**Chroma Gain:** Pot with knob  
**Hue:** Pot with knob  
**Fine H Phase:** Screw adjustable pot  
**Course H Phase:** Screw adjustable pot  
**Mode Select:** Switch

### Indicators

Video Presence—Green LED  
Genlock Presence—Green LED

### Environmental Conditions

**Operating Voltage:** 105-125 or 200-250VAC RMS  
**Operating Frequency:** 47Hz to 60Hz

**Operating**  
**Temperature:** 0° to 45°C  
**Operating Humidity:** 5%-95% Noncondensing

### Mechanical Dimensions

**Size:** 1.75"H x 17.25"W x 19.00"D  
**Weight:** 12 lbs.

# COLOR CORRECTORS

CC-1

## CC-1 Color Corrector

- Individual color vector control over the three primary colors plus magenta, yellow and cyan
- Luminance, hue and saturation control over all six colors
- Black and white balance controls that let you produce pure neutral tones by balancing out the chroma
- Independent black and white gamma controls that let you stretch or compress luminance over a range of 0.3 to 3
- Enhances the colors in computer generated video (CGV), and expands the creative potential of CGV
- Matches black, white and color levels between live feeds, remote shots, and studio footage with precision
- Corrects colorimetry problems in video tapes

The CC-1 Color Corrector permits independent adjustment of Hue, Saturation, and Luminance of the 6 standard color-bar vectors. This capability provides a substantial improvement in the ease and ability to obtain precise color adjustment over systems which adjust only the primary color vectors.

### Specifications

Video In:	1V p-p, 75 ohm composite video
Video Out:	1V p-p, 75 ohm, composite video

VTR Interface Cable .....	\$250.00
CC-1 50' Cable .....	50.00

## CC-2 Color Corrector

- Provides broadcast quality control of video color in all common component formats
- Component operation is provided for RGB or Y, R-Y, B-Y and M-I-I formats
- Plug-in PC boards permit easy reconfiguration for either 525 or 625 standards
- Black, white and gray color balance adjustment
- Black and white gamma control
- Standard proc amp controls
- Independent hue, saturation and luma adjustments for each of the six color derivative vectors
- Trackball adjustment for color balance, gamma, and proc amp functions
- Store and recall functions allow the correction feature to be switched in and out for comparison with uncorrected material
- Shaft encoders and trackball can be automatically zeroed by push-button, eliminating manual reset

# BATTERY PACKS

## Frezzi On-Board™ Battery Packs "Superior To Camera-Manufacturer Supplied" FEATURES: EXTENDED LIFE WITH NO MEMORY

- Battery mounts direct to camera-manufacturer-supplied Anton/Bauer bracket or optional Frezzolini® camera battery mounting bracket.
- No cables or modification required.
- Full 4AH capacity—only premium selected nickel-cadmium cells used.
- Custom-designed mounting brackets available.
- Rugged welded aluminum case.
- Lightweight 2AH models available.
- Internal fuse & thermal protection—internal spare fuse included for field replacement.
- Complete charge compatibility with camera-factory-supplied charge systems, or Frezzolini® fast, overnight or multiple battery chargers available.

Frezzi On-Board™ BP-12 4AH, 12 volt .....	\$455.00
Frezzi On-Board™ BP-13 4AH, 13.2 volt .....	475.00
Frezzi On-Board™ BP-14 4AH, 14.4 volt .....	495.00
Frezzi On-Board™ BP-122 2AH, 12 volt .....	275.00
Frezzi On-Board™ BP-132 2AH, 13.2 volt .....	285.00
Frezzi On-Board™ BP-142 2AH, 14.4 volt .....	295.00

All battery packs have fast charge (1 Hr.) capability.

## Frezzi™ Premium-Grade Direct Replacement for Sony BP-90 Battery Packs Models: FBP-90 and Fast Charger Model FBP-90 FC

- Full 4AH capacity using premium-grade selected nickel-cadmium cells.
- Rugged & serviceable plastic case.
- Fuse & thermal protection
- Internal spare fuse for field replacement.
- High discharge capability to power 100W lighthead.
- Weight 3.5 lbs.
- Complete charge compatibility with:
  - Sony BC-210 charger.
  - Frezzi BC-124S overnight charger.
  - Frezzi MBC-5 8-battery overnight charger
  - Frezzi BC-77UB 1 hr. fast charger w/HV fast-charge adaptor cable.
  - Plus other Frezzi fast/slow multi-battery charging stations.

Model FBP-90 .....	\$275.00
Model FBP-90 FC .....	330.00

## Battery Pack Mounting Brackets

HM 90 BP90 Adaptor for on-board mount .....	\$198.00
HM90B Same as HM90 except for Betacam mount* .....	198.00
HM90BW Same as HM90B except has mount for wireless receiver* .....	248.00

\*Requires HMBVV1 Bracket

## Betacam Battery Mounting Bracket (Not Shown)

Model: HMBVV1  
Bracket mounts to the upper rear portion of the recorder, and accepts BP13/BP132 batteries or BP90 when used with HM90. Also accepts RPS-3 & RPS-40 on-board AC supply.  
Model HMBVV1 .....

## FREZZI™ SINGLE-BATTERY UNIVERSAL FAST CHARGERS

### Model BC-77U/Model BC-77UB Single-Battery Universal Fast Chargers

#### General:

The line of Frezzolini® Universal fast chargers was specifically designed to fast-charge (1 hr.) all models of Frezzolini 12V and 14.4V 2-6AH battery packs. The Frezzi chargers also have the capability to safely fast-charge Anton/Bauer 12V and 14.4V nickel-cadmium on-board battery packs. All chargers are transformer-type line-isolated and designed per European IEC-65 safety code specifications. The chargers are constructed of heavy-gauge aluminum in a compact size to withstand abuse in the field. The universal feature of this charger enables operation anywhere in the world.

**Model BC-77U/BC-77UB** . . . . . \$395.00  
**Model BC-30D** (for use with 30V batteries with fast charge capability) . . . . . 395.00

## FREZZI MULTIPLE BATTERY CHARGING STATIONS

**"We custom-design per your specific charging requirements"**

### MBC-2 (All Feature Model)

Fast-charges five (5) Frezzolini or Anton/Bauer 12-14.4V nickel-cadmium battery packs in less than one (1) hour while simultaneously charging eight (8) additional Frezzolini, Sony, JVC or Panasonic VTR battery packs overnight. Universal AC inputs. Deluxe shipping case available. Weight: 45 lbs.

**MBC-2** . . . . . \$2400.00

### MBC-4

Fast charges (1 hr.) five (5) Frezzolini or Anton/Bauer 12-14.4V nickel-cadmium battery packs while simultaneously charging eight additional Sony BP-90 type battery packs in 14 hours. Universal AC inputs. Deluxe shipping case available. Weight: 45 lbs.

**MBC-4** . . . . . \$2090.00

### MBC-4A

Fast charges (5) Frezzolini or Anton/Bauer 12-14.4V battery packs. Weight: 43 lbs.

**MBC-4A** . . . . . \$1595.00

### MBC-5, Charges Eight (8)

#### BP-90 Type Batteries Simultaneously

- Universal AC inputs
- Compact size
- Line-isolated
- Current-sensing LEDs
- Other models available for all VTR or camera battery packs

Charge eight (8) BP-90-type battery packs simultaneously in 14 hours with MBC-5 Charging Station. Universal AC inputs. Weight: 8 lbs.

**MBC-5** . . . . . \$495.00

## OVERNIGHT TRICKLE CHARGERS

- Fully charges battery packs in 14 hours
- Switchable 115-230VAC 50/60Hz input
- Miniature size
- Transformer-type line-isolated
- Current-sensing LED

# CHARGERS/POWER SUPPLIES

RPS-2

RPS-3

RPS-40

## Frezzi™ Dual Channel AC Adaptor and Fast Charger

The RPS-2 Dual-Channel combination power supply/fast charger consists of two (2) totally independent power sources. Each power source has the capability of either functioning as a precise regulated power supply for ENG Camera/VTR Power or switching over to a nickel-cadmium battery fast charger. Either one or two battery packs are simultaneously fast charged with automatic high-charge termination when the battery packs reach full charge.

### Specifications

**AC Input:** 115/230VAC  $\pm$  10% 50/60Hz  
**Regulated DC Output:** 13.25VDC (3.0A max. each channel)  
**Line Regulation:**  $\pm$  .05% for 10% line charge  
**Load Regulation:**  $\pm$  .05% for 50% load change  
**Output Ripple:** 5.0mV p-p maximum  
**Overload Protection:** Automatic current limit/foldback  
**Fast Charge Time:** 12.0V battery-75 minutes  
 14.4V battery-180 minutes

**Size:** 8 1/2" x 5" x 5 1/2"  
**Weight:** 8.5 lbs.

Model RPS-2 ..... \$895.00

## Frezzi On-Board™ AC Power Supplies Models RPS-3 and RPS-40

Ultra light weight, compact size, mounts directly to ENG/EFP professional TV cameras with on-board battery mounts. Replacing battery with either unit allows for "continuous" operation when 120 or 240VAC 50 to 60Hz is available. Easy voltage selection slide switch on unit. On-off lighted switch. Advanced switching design with full RFI/EMI suppression. Supplied as OEM and replacement equipment to major manufacturers.

# PROFESSIONAL LIGHTING KITS

### KIT MODEL SPK-1 INCLUDES:

- (3) FL-650 Lightheads
  - (3) C120-120V Cables w/In-Line Switch
  - (3) EKD or DYS Lamps
  - (2) FLBD-102 Rotating Barn Doors
  - (1) FLS-102 Scrim
  - (2) FLAH-101 Accessory Holder
  - (3) FLLS-101 Light Stands (8 ft.)
  - (1) C120EX 3-Way Extension Cable (25 ft.)
  - (1) FLCC-101 Carrying Case
- SPK-1 ..... \$975.00**

### 30 VOLT LIGHTING KITS

#### Kit Model SPK2

#### 30 Volt DC Kit Includes:

- 1—SP-650 Head Only
  - 1—C30-30V Cable, 6'
  - 1—DYG 250W Lamp
  - 1—FLH-101 Handgrip
  - 1—F-30-EC Belt
  - 1—Carrying Case
- Total ..... \$860.00**

#### Kit Model

**SPK2A** Same as SPK2 except includes "Fast-Charge" belt model F-30EXFA in place of F-30EC

**Total ..... \$910.00**

**BC30D** One (1) hour Fast Charger for F-30EXFA

**Total ..... 395.00**

# MINI-FILL LIGHTING

Single Light Configuration

Your choice of power connector

Dual Light Configuration

### Unique Mini-Fill Features:

- Extremely lightweight — only 12 oz.
- Compact size — 2" x 4 1/4"
- Operates from any 12-14.4 or 30V battery
- Utilizes the latest high efficiency multi-mirror lamps — (20-100W)
- Completely serviceable
- Field tested
- Field proven
- Mounts on camera, pistol grip or lightstand
- Dual-lighthead configuration from one power source
- Rugged construction — Built by Frezzolini® — The world leader in portable lighting and power

### Single Light Configuration (Including 100W or 75W Bulb)

MF12P	Mini-Fill w/cigarette lighter plug (Fig. D)	.....\$149.95
MF12C	Mini-Fill w/BP-90 type co-ax plug (Fig. C)	.....149.95
MF12V	Mini-Fill w/Frezzi amp connector (Fig. A)	.....149.95
MF5V	Mini-Fill w/short (18") cable and amp connector (Fig. A)	.....149.95
MF4X	Mini-Fill w/XLR-4 connector (Fig. E)	.....149.95
MF5X	Mini-Fill w/XLR-5 connector (Fig. E)	.....149.95
MF30	Mini-Fill w/2-pin amphenol connector for 30V operation (includes 80W bulb) (Fig. B)	.....154.95

### Dual Light Configuration

DMF12	Twin Mini-Fill interconnected for power from one (1) source. Choice of power connectors: Sony BP-90 In-Line, Frezzi™-Amp, XLR-4 or cigarette lighter type	.....\$295.00
DMF30	Same as DMF12 except wired for 30V operation including 2-pin amphenol connector	.....298.00

## MINI-FILL LIGHTING

### MINI-FILL KITS

#### MFK1 Includes:

- (1) MF12P Mini-Fill
- (1) VB12 Battery
- (1) VBC Charger
- (1) EYC or EXV Bulb

**MFK1** ..... \$295.00

#### MFK2 Includes:

- (1) MF12P Mini-Fill
- (1) VB-12 Battery
- (1) VBC Charger
- (1) EYC or EXV Bulb
- (1) MFDF Dichroic Filter
- (1) FLCC Carrying Case

**MFK2** ..... \$455.00

#### MFK3 Includes:

- (1) MF12V Mini-Fill
- (1) VB12V Battery
- (1) VBCV Charger
- (1) EYC or EXV Bulb

**MFK3** ..... \$355.00

#### MFK4 Includes:

- (1) MF12V Mini-Fill
- (1) VB12V Battery
- (1) VBCV Charger
- (1) EYC or EXV Bulb
- (1) MFDF Dichroic Filter
- (1) MFCC Carrying Case

**MFK4** ..... \$515.00

#### MFK5 Includes:

- (1) MF4X Mini-Fill
- (1) VB4X Battery
- (1) VBCV Charger
- (1) EYC or EXV Bulb

**MFK5** ..... \$365.00

#### MFK6 Includes:

- (1) MF4X Mini-Fill
- (1) VB4X Battery
- (1) VBCV Charger
- (1) EYC or EXV Bulb
- (1) MFDF Dichroic Filter
- (1) MFCC Carrying Case

**MFK6** ..... \$525.00

#### MFK9 Includes:

- (3) MF4X (LC) Mini-Fill
- (3) MFDF Dichroic Filter
- (3) FLCS-102 Short Stand
- (1) LPS-400 Power Supply
- (3) LS1 Stud
- (3) EYC Bulb
- (1) FLCC-104 Case

**MFK9** ..... \$1250.00

|-------|-----------|---|----------|
| #9390 | PP90      | 12V, 4AH approved NiCad replacement for Sony BP-90 battery. Powers VTRs and portable devices. Attach to ENG cameras with PAGCLIP 90 battery holders. Case comes apart for service. Exterior fuse and spare fuse . . . . . | \$249.00 |
| #9391 | MASTER 90 | All new 12V, 4AH BP-90 type NiCad battery. Same as PP90 above but has new high performance cells to extend running time . . . . .   | 299.00   |
| #9360 | PP60      | 12V, 2.5AH NiCad replacement for Sony BP-60 Lead Acid battery. (Can also be charged on Sony charger.) . . . . .   | 229.00   |
| #9387 | PP86A     | 13V, 4AH NiCad battery for use on ENG cameras with Anton Bauer/Frezzolini mount . . . . .   | 469.00   |
| #9386 | PP86      | 14V, 4AH NiCad battery similar to PP86A described above. Can be used on same cameras for a longer running time. . . . .   | 499.00   |

**MICROPROCESSOR CHARGERS**

**SPEEDCHARGE 6000**

Model #9407

- MICROPROCESSOR CONTROLLED
- FAST AND SLOW CHARGES VARIETY OF NICAD BATTERIES/BELTS (10-15V; 2-12Ah)
- REVITALIZES POOR BATTERIES
- ACTS AS AC POWER SUPPLY
- CONNECTS TO SEQUENCER 6000

Built-in microprocessor selects correct charge for any NiCad battery or belt ranging from 10-15 Volts and 2-12Ah of **any manufacture**. Fast charges 4Ah in 1 hour. Slow charges and revitalizes. Balances batteries. Automatic 110/220V switching. Also is AC power supply (12-14V at 4 amps). Detects faulty batteries. Self diagnostics. XLR-4 pin cable. BP-90 adaptor supplied. Attach SEQUENCER 6000 to accommodate 8 batteries/belts. Variety of SPEEDCHARGES in other ranges available.

#9437 SPEEDCHARGE 6000 for batteries or belts of **12-30 volts** (2-12Ah). Fast charges 4Ah battery in 2 hours.

**SEQUENCER 6000**

Model #9418

Connect to SPEEDCHARGE 6000 to sequentially fast/slow charge or revitalize any assortment of 8 NiCad batteries or belts (2-12Ah) of **any manufacture**. Status indicators for all eight channels. Eight BP-90 sockets.

*"The only battery charging system you need."*

**MASTERCHARGER**

Model #9420

- MICROPROCESSOR CONTROLLED
- ACCEPTS ASSORTMENT OF 4 NICAD BATTERIES/BELTS (12-14V; 2-12Ah)
- FAST CHARGES 4 SEQUENTIALLY
- SLOW CHARGES 4 SIMULTANEOUSLY
- ACTS AS AC POWER SUPPLY

Microprocessor controlled 4 channel universal charger. Sequentially fast or simultaneously slow charges **any ENG NiCad** 12-14V/2-12Ah, then balances and trickle charges. Also is AC power supply (12-14V at 4 amps). Automatic 110/220V switching with auto circuit breaker. Detects faulty batteries. Self diagnostics. Four BP-90 and four Anton Bauer/Frezzolini type sockets on board.

**MICROMASTER**

Microprocessor controlled single channel fast charger and balancer. Accepts NiCad ENG batteries of **any manufacture** in 12 to 14 volt range. Automatic 110/220V switching. PAG-lok connector and BP-90 socket. Charging, ready, and faulty battery indicators. Under 2 lbs.

- #9526 **MICROMASTER** for 2-12Ah batteries (fast charge 4Ah in 1 hour).
- #9527 **MICROMASTER** for 1-6Ah batteries including NP-1 (fast charge NP-1 in 45 minutes/4Ah battery in 2 hours).
- #9529 **MICROMASTER MOBILE DC** for 2-12Ah batteries. Same as #9526 but 12V DC.
- #9528 **MICROMASTER MOBILE DC** for 1-6Ah batteries. Same as #9527 but 12V DC.

**10/90 MULTICHARGER**

Model #9408

Overnight charges and balances ten PAG PP90, Master 90 or Sony BP-90 equivalent NiCad batteries simultaneously. Ten BP-90 sockets.  
**Suitable for all 4Ah NiCad batteries or belts in 12-14 volt range.**

**SOLOCHARGER**

Model #9429

Lightweight low cost overnight battery charger **suitable for all 4Ah NiCad 12-14V batteries or belts of any manufacture**. Has BP-90 socket.  
 (4Ah, 7Ah, and 10Ah versions available in 12-14V or 24-30V models.)

Prices and Specifications Subject to Change Without Notice.

**PAGCLIPS**

*PAGCLIP battery holders easily attach to ENG cameras to hold BP-90 type battery such as PAG PP90 or Master 90. Each clip model outfitted with appropriate electrical camera mating.*

- |                                       |                               |
|---------------------------------------|-------------------------------|
| #9515 Fits Cameras with PAG-lok mount | #9505 Fits Sony M3A/DXC3000   |
| #9464 Fits Hitachi Z-31 or FP-15      | #9547 Fits Sony 330           |
| #9463 Fits Hitachi SK-97 or FP-22     | #9546 Fits Sony Betacam       |
| #9459 Fits Sony M3                    | #9456 Fits cameras with       |
| #9467 Fits JVC cameras                | Anton Bauer/Frezzolini mounts |

**CAMERA BATTERY PACKAGES**

Packages contain: 1 *PAGCLIP*. Holds BP-90 type battery like PAG PP90.  
 2 *PAG PP90* (12volt/4Ah) batteries.  
 1 *PAG SOLOCHARGER* for 12-14V/4Ah batteries.

- |                                      |                               |

**CHARGER ADAPTORS**

- #9458 BP-90 plug to Anton Bauer/Frezzolini type connector (cable)
- #9455 BP-90 plug to XLR-4 male pin (cable)
- #9447 XLR-4 socket to BP-90 socket (box)
- #9468 XLR-4 socket to BP-60 socket (box)
- #9488 BP-90 plug to BP-60 socket (cable)
- #9577 BP-90 to JVC NB-P2U shoe (cable)

**PAG-lok CHARGER ACCESSORIES**

- #9514 PAG-lok to BP-90 plug (cable)
- #9518 PAG-lok to Anton Bauer convertor

**ACCESSORIES**

- #9469 Stacking bracket (stacks SPEEDCHARGE and SEQUENCER)
- #9472 Battery stand (holds four BP-90 type batteries for charging)
- #9500 Shipping case holds SPEEDCHARGE 6000 and SEQUENCER 6000
- #9501 Shipping case holds MASTERCHARGER
- #9502 Soft carrying case for MASTERCHARGER or SPEEDCHARGE or SEQUENCER

**NP-1 ADAPTORS**

- #9499 NP-1 ADAPTOR attaches to SPEEDCHARGE/SEQUENCER or MASTERCHARGER to charge four NP-1 (1.5Ah) batteries (45 min. each).
- #9576 BP-90 to NP-1 (shoe) cable adaptor for MICROMASTER #9527 and #9528 only. Accommodates one NP-1.

**LIGHTING ACCESSORIES**

**For PAGLIGHTS**

- #9801 Bulb for PAGLIGHT 100 (100 watts/12 volts)
- #9821 Bulb for PAGLIGHT 250 (250 watts/24 volts)
- #9841 Bulb for PAGLIGHT 250 (250 watts/30volts)
- #9804 Dichroic Filter (for PAGLIGHT 100 or 250)
- #9809 PAGLIGHT 100 or 250 Accessory Kit (4 leaf rotating barndoors, and clear safety glass)

**For PAGLIGHT MINI**

- #9831 Bulb for PAGLIGHT MINI (75 watts/12 volts)
- #9833 Bulb for PAGLIGHT MINI (100 watts/12 volts)
- #9837 Bulb for PAGLIGHT MINI (100 watts/14 volts)  
*Use with 13V or 14V batteries.*
- #9834 Dichroic Reflector for PAGLIGHT MINI
- #9835 Narrow Beam Reflector for PAGLIGHT MINI

**PAGBELTS**

World's only ALL LEATHER deep molded belts encasing top quality NiCad cells. With or without 14-hour internal charger (IC). Has XLR-4 socket. Fast charge all 12, 13, and 14 volt PAGBELTS with any PAG microprocessor charger. Slow charge with appropriate PAG SOLOCHARGER.

Indicate 1) Waist Size: Standard 32"-42" or Large 38"-48".  
 2) Buckle Type: Conventional Buckle or Quick Release.

WITH (IC) Charger	WITHOUT Charger		Description
#9203	#9103	12V/4Ah	Belt (runs 12V/100W light 26 min/use for microwave)
#9253	#9153	12V/7Ah	Belt (runs 12V/100W light 45 min/use for microwave)
#9283	#9123	12V/10Ah	Belt (runs 12V/100W light 65 min/use for microwave)
#9204	#9104	13V/4Ah	Belt (runs 12V/100W light 32 min/use for microwave)
#9254	#9154	13V/7Ah	Belt (runs 12V/100W light 55 min/use for microwave)
#9208	#9108	24V/4Ah	Belt (runs 12V/250W light 23 min/use for microwave)

PAGBELTS also available in 14, 24, and 30V models (4, 7 & 10Ah).

**PAGCLIP 90 BELT**

Model #9457

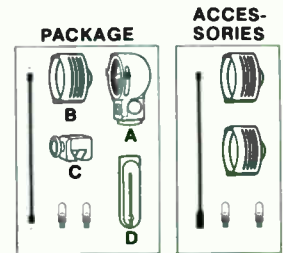

Belt mounted PAGCLIP 90 holder with adjustable quick release nylon belt. Holds PAG PP90, Master 90, or any BP-90 type battery (12V/4Ah). XLR-4 socket output for powering lights, microwave, etc.

**PAGLIGHT MINI**

Model #9832

Compact tiltable 12-14V/100 watt light with interchangeable reflectors. Designed especially for use on ENG cameras. Power by using PAGBELT, PAGCLIP 90 belt, or plug into special BP-90 socket in PAG-lok camera bracket. Specify BP-90 or XLR-4 cable. Bulbs available in 12V/75 watt, 12V/100 watt and 14V/100 watt. Use 14V/100 watt bulb in conjunction with 13V or 14V batteries.

Includes A) lamp head with focus range of 30° to 70°, B) reflector with safety glass, C) mounting clamp, D) handle, also 2 bulbs and cable.

**PAGLIGHT**

Robust but lightweight handlamps tilt on removable handle for bounce light. 1/4" screw bush provided for mounting. Spare bulb and fuses store in handle. Comes with bulb, 2 fuses, filter ring, and barndoor holder.

#9800 PAGLIGHT 100 (12V/100watts)

#9820 PAGLIGHT 250 (24V/250watts)

#9840 PAGLIGHT 250 (30V/250watts)

**PAGLIGHT KITS**

Includes PAGLIGHT indicated, PAGBELT with internal charger (IC) indicated, aluminum case, 2 bulbs, 3 fuses, barndoor holder and filter ring.

#9810 PAGLIGHT Kit (100 watt light & 12V/4Ah IC PAGBELT — runs light 26 min.)

#9811 PAGLIGHT Kit (100 watt light & 12V/7Ah IC PAGBELT — runs light 45 min.)

#9816 PAGLIGHT Kit (100 watt light & 12V/10Ah IC PAGBELT — runs light 65 min.)

#9823 PAGLIGHT Kit (250 watt light & 24V/4Ah IC PAGBELT — runs light 23 min.)

Other Kits with different PAGBELTS are available.

**OPERATING TIME FORMULAS**

$$\text{Battery Operating Time in Hours} = \frac{\text{Ah of battery/belt}}{\text{Amps consumed}}$$

If watts not amps are known:  
 $\frac{\text{watts consumed}}{\text{volts required}} = \text{amps}$   
 Put into the first formula.

# VIDEO TAPE

### H621/H621B 1" Video Tape

• Optimum performance in helical scan machines • Fine and evenly distributed Berthollide iron oxide (BERIDOX) formulation contributes to the excellent S/N ratio, less headwear, greater resistance to banding and lower jitter from the capstan and drum • Available in different lengths in both Type C and Type B formats (Type B format is for BCN VTRs) • High-density particles of BERIDOX are specially sensitized, then held together and fastened to the tape's backing material with a special U-binder • Backing material has uniform thickness and an extremely fine finish to prevent edge damage during winding, and is treated to reduce static • U-binder helps prevent dropouts normally caused by repeated fast forward, frame by frame editing, prolonged stop-action viewing, and other tape use • Strong polyester base and antifriction back coating help prevent stretching, warping, and edge damage during winding or handling • BERIDOX formula captures the signal more thoroughly, and the U-Binder secures the coating to assure lasting picture and sound quality • Provides excellent picture detail, accurate color, and high fidelity audio recording—not only in masters, but in dub after dub • Smoother tape surface makes more uniform contact with machine heads, reducing abrasion and preventing irregular wear • The superior binding of the magnetic coating to the tape base reduces head contamination. Performance is optimized, downtime for head cleaning is reduced, and head life is prolonged • Tough, flame-retardant case

H621E

### H621E/H621EB Videotape

• C and B formats • An increase of +2dB in video and color S/N • Minimal dropouts, even after repeated use • Signal deterioration is extremely limited even after repeated use or extended still playback and stand-by • Excellent tape transport, even during special types of playback, such as slow motion • Reduced incidences of print-through, even after long storage periods • Capable of over 2,000 passes • The density of BERIDOX magnetic particles has been significantly increased for a super high density magnetic layer • Smoother base has been developed • Improved backcoating technology • Binder has been improved and made stronger • Available in an optional tough flame-retardant case which protects it against dust, heat and shock during storage and shipping.

### H621 (C Format)

## H521E and H521EBR 3/4" U-Matic Videocassettes

The H521E has an increase of +1.5dB in video and color S/N, and +2.0dB audio S/N. H521EBR offers a +2.0dB improvement in video, color and audio S/N.

Superior backcoating and the low electrical resistance of the H521E/EBR tape surface, ensures minimal dropouts even after repeated use. Low electrical resistance helps prevent static electricity buildup. Ideal for field use, the H521EBR features a special anti-static shell which helps reduce dropouts to a typical value of 4. H521EBR is a broadcast version of the H521E. Improved "U" binder material significantly aids tape transport stability by maintaining the friction factor of the tape at an ideal level. Each H521E tape is packaged in a specially designed, rugged, shock resistant case equipped with a dust-proof seal.

The H521E offers reduced print-through. Designed to withstand still playback of over 3 hours, with minimal decrease in RF signal output.

The Beridox particle size has been reduced from 0.35µm, which increases the \*S-BET factor from 22m<sup>2</sup>/gm to 32m<sup>2</sup>/gm and creates a magnetic layer of much higher density.

Coercivity of the particles used in H521E tapes has also been raised from 620 to 640 Oersted.

## H421M/H321B Professional Super HG Videocassettes

In response to the introduction of 1/2" ENG and EPF video systems, Fuji offers professional-use 1/2" videocassettes: Super HG H421M (for the M-format) and H321B (for the Betacam format).

\*S-BET Factor: The value given to the specific surface area per unit of weight. The higher the value, the finer magnetic particles become.

# VIDEOCASSETTES

## M401 MII Videocassettes

Professional broadcast-quality 1/2" metal tape.

Super Fine Metallix metal magnetic particles permit ultra high-density recording for superior image quality. The particles are densely and uniformly distributed on the tape using Fuji's exclusive coating process to achieve an intrinsic coercivity 1500 Oe, with maximum retentivity of 2600 gauss. The MII metal tape also features a base which is strong and thin—with an ultra-smooth surface.

The magnetic layer, undercoating layer, and special backcoating layer are all applied to the tape base using ultra-thin coating processes. The resulting four-layer tape is only 13.5 microns thick.

Initial dropouts are absolutely minimized. Even after repeated recording, playback, and dubbing, the anti-static backcoating and tough durable binder keep dropouts extremely low.

The cassette shells are designed for maximum durability, and are constructed of impact-resistant hard resin to help maintain optimum tape tension and transport stability.

## 8mm Metal Videocassettes

These 8mm metal cassettes provide excellent performance indoors and out. Super fine Metallix particles provide a full four times the magnetic energy of standard tapes.

Static preventing backcoating and self-cleaning binder keep dropouts at a minimum even after repeated recording and playback.

# VIDEOCASSETTES

### HQ VHS/Beta Videocassettes

Renowned Fine Grain Beridox magnetic particles ensure vivid, lifelike color reproduction. HD (high density) binder technology allows for more uniform dispersion of these particles, resulting in enhanced standards for video and color signal-to-noise specifications. High-impact ABS housing.

### Super HG-VHS Video Tape

Long-playing Super HG tape with thinner tensilized polyester base film. Designed to provide sharp pictures with vivid colors at slowest speeds or when used with cameras. Tape base is back treated and undercoated for smoother running and maximum durability. Anti-static VE leader tape for fewer dropouts. Polypropylene storage case. Video signal-to-noise + 4.0dB; color signal-to-noise + 4.0dB; audio sensitivity + 2.0dB; video RF sensitivity + 2.0dB; chroma output + 2.0dB.

### Super HG Beta Video Tape

Long playing L-830 incorporates thinner yet strong tensilized polyester base film. Features treated and undercoated tape base for smooth running and maximum durability. Anti-static VE leader tape for fewer dropouts. Polypropylene storage case. Video signal-to-noise + 4.0dB; color signal-to-noise + 4.0dB; audio sensitivity + 2.0dB; video RF sensitivity: + 2.0dB; chroma output: + 2.0dB.

### VHS SHG Compact Videocassette

The Fuji Compact Videocassette Super HG is one-quarter the size of a standard VHS videocassette. Super HG is designed for an excellent video signal-to-noise ratio for a rich, clear picture and a color signal-to-noise ratio that gives bright, pure colors. A unique dust-guard VE leader tape is intended to minimize dropouts.

TC-20 0.33 hour	.....	\$9.99
-----------------	-------	--------

### Super HG Hi-Fi VHS/Beta Video Tape

Specifically designed for optimum performance with the VHS Hi-Fi VCRs. Super smooth magnetic layer with 20% greater packing density than former Super HG. Super Duroback backcoating offers reduced friction, guaranteeing stable tape transport and color reproduction even under extreme environmental conditions. Antistatic leader works with this backcoating to minimize dropouts for clear, crisp sound reproduction. "Blue Shell" cassette and precision mechanism. Video signal-to-noise + 4.0dB; color signal-to-noise + 4.0dB; audio frequency response 20-20,000Hz ± 1.0dB; audio sensitivity + 2.0dB; video RF sensitivity + 2.0dB; dynamic range + 80dB; chroma output + 2.0dB.

### Super XG Pro-VHS/Beta Video Tape

Ultra-fine Beridox video tape. Magnetic layer 27 times higher in density than Super HG; Duroback coating. SR (Super Reliable) cassette mechanism provides superior resistance to thermal changes. Highly rigid tape pad and improved vertical precision tape guide provide more stable tape transport. Video signal-to-noise + 6dB; color signal-to-noise + 5dB; video RF sensitivity + 2dB; audio sensitivity + 2dB; chroma output + 2dB.

H351 L-500 Beta	.....	14.99
H351 L-250 Beta	.....	12.99

### Pro-S, S-VHS Video Tape

Beridox particles have been reduced to an ultra-fine grain size and given a coercivity characteristic optimally suited to S-VHS performance.

Using a binder system that excels in uniform dispersion characteristics, the magnetic layer has been formed and coated with an exceptionally high density. As a result the magnetic energy level is 80% higher than that of Super XG Pro and provides high-range output characteristics.

The magnetic layer surface has been thoroughly smoothed through the use of a super calendaring technique. Modulation noise is substantially reduced as a result, and, combined with the tape's high output characteristics, provides a dramatic improvement in the Carrier/Noise ratio.

Available in 30, 60, and 120 minute lengths, as well as 20 minutes in the S-VHS-C format. . . . . **POR**

# VIDEO PRESENTATION SYSTEM

## 2200™ VHS VIDEO-CENTER w/AC ADAPTOR and WALL PLUG

- Microprocessor controls
- Swing away carrying handle
- Tape and/or accessory storage
- Earphone
- Matching 300-75 ohm transformer
- Coaxial cable with RF connections
- Built-in RF modulator
- Humidity protection device
- Color, tint and bright controls
- 1/2" VHS format
- Totally self-contained
- 5" Color monitor
- Recording: SP for two hours; LP for four hours and EP for six hours. Eight hour recording possible with T-160 tape. Playback speed is automatically selected
- Automatic alignment control removes breakup from center of picture

Built right into the front panel of the Galaxy 2200 are: Freeze action, Slow motion, Frame to frame picture advance, Forward and reverse visible search. In its own small way, it's a big help for any business. Weighing only 16 lbs., and about the size of a briefcase, it's truly portable. With its optional battery pack, it can be used anywhere in the world, or may be plugged into any car lighter, or wall socket.

Looking at its large built-in color TV screen, you can make intimate color TV presentations to small groups. With its built-in RF modular you can connect quickly to any large TV set, or multiple of sets, and give color presentations to larger groups. If you need to edit tape, the Galaxy 2200 gives you many of the options you'd get in a professional studio. It dubs audio, edits video, and does sound on sound mixing. And with any video camera, it records programs up to eight hours long, and does the same thing for on-air programming, with its optional tuner. Three industrial grade recording heads insure professional picture quality, and rugged design.

### SPECIFICATIONS

Video	NTSC color EIA standard 1/2" VHS cassette
Recording	Rotary 2 head helical scan azimuth recording
Monitor	Color 5" diameter monitor fine pitch flat face type 55° deflection
Speaker	8 x 12 cm, 16 ohm
Power	Three sources available: 1) 110V 60Hz AC wall current 2) Rechargeable battery pack 3) Car battery, DC 12V
Dimensions	16.9" W x 5.5" H x 11.0" D
Weight	16.5 lbs.
Jacks	Video and audio input and output, RCA type. Camera, microphone, headset, DC 12V connector, RF and remote
Heads	3 Video Heads—2 for SP/LP/EP, one for special effects. 1 full track audio video erase head. 1 combination head for control track, audio erase and audio record/play. 3 Heads/single housing

\* Each platform has four 5" swivel casters with combination wheel and swivel locks. 36" high steel-pipe rails (1" dia.) with midrails and galvanized grating. Overall width 30".

† Rails are removed for shipping. Full rails are recommended on 5-, 6-, 7-step units to insure compliance.

NOTE: One rail is standard. For full rails, add \$100.

# DEGAUSSERS

## Video and Computer Degaussers

Garner serves the video and computer industries with a full line of automated video tape erasers engineered for both the speed and effectiveness professionals demand.

- **Depth of Erasure:** Garner's erasure of a heavily saturated, high coercivity tape is the standard of the industry
- **Speed:** Erases high-energy tape completely in 5 to 15 seconds. Other erasers take many times that long
- **Ease of Operation:** Just touch the "on" switch and place the tape on the conveyor. There are no drawers, no spindles and no height adjustments

## Specifications

	270 (for 1/2" to 1" ** cassettes)	1200 (for 1" reels/ cassettes to 10 1/2" diameter)	1400 (for 1" reels/ cassettes to 14" diameter)	1600 (for 1" reels/ cassettes to 16" diameter)

<b>Price:</b>	\$2,990.00	\$4,890.00	\$5,790.00	\$6,590.00

## Audio/Computer Degaussers

Audio tape degaussers can completely erase audio reels, cartridges and computer tapes. Just touch the power button and place any reel, cartridge, cassette or disk on the endless belt. In four seconds it delivers a clean erasure that will meet the most stringent standards, save valuable time and do a better job of erasing. All models available in 220/240VAC/50Hz.

**Erasure Level (all models):** -80dB nominal.

**Method of Operation:** Tapes are passed on continuous belt over high flux coils and deposited at the end of the machine.

**Thermal Protection:** Overheating is prevented by automatic cut-off switch, which reactivates after cool-down period.

## 2700 Continuous Duty Degausser

Erases high volumes of video cassettes, floppy disks, computer cartridges and other magnetic media continuously, 24 hours a day. The unique dual coil design provides unmatched erasure of high coercivity media.

Window opening: 5.9" x 1.6"

## Specifications

<b>Height:</b>	18 1/2"
<b>Width:</b>	25"
<b>Length:</b>	42"
<b>Weight:</b>	485 lbs.

# VIDEO PROJECTORS

Talaria

## Talaria® Large Screen Video Projectors

- One lens "no convergence" system
- High brightness picture allows use in high ambient light
- Requires no special screen; use of flat matte screen allows viewing by those off the projection axis
- Optional lenses allow variable throw distances from 4' to 175'
- Accommodates diverse inputs: NTSC, PAL/SECAM, RGB and a wide variety of computer interfaces
- User friendly television style controls
- Glass lenses for a sharper image corner to corner
- Selection of front or rear projection at the flip of a switch
- Creates picture size from 4' wide to 24' wide and larger
- Built-in diagnostic and color bar/gray scale generator
- Continuous tilt adjustment of  $\pm 15^\circ$  pitch
- Compact, and transportable (it only weighs about 145 lbs.)
- Modular construction and smartly-engineered design
- Single optical path light valve
- Accepts a wide variety of input signals: 1/2", 3/4", or 1" video tape, live camera feed, satellite feed, video laser disc, and closed circuit television (CCTV)
- Accepts on-line computer generated graphics
- Aspect ratio (ratio of width to height) is 4 x 3

### All projectors include as standard:

- Standard 3:1 (throw distance to picture width) lens
- Instruction manual
- 2 Day Operator and 4 Day Maintenance Training Courses held monthly in Syracuse, NY. Training will be held at customer location at extra cost
- Detachable operator control unit
- Mechanical tilting mechanism

### Accessories

Screens, cases, projection stands, raster masks and dowsers available

## Talaria Multiple Valve (MLV) Large Screen Video Projector

- Two light valves and two lamps in this one unique projector results in at least 80% more brightness and 50% more contrast than our single light valve projector
- Full color images up to 30' wide
- Two piece aluminum frame for ease of transportation and setup, or you can choose a one piece frame for fixed simulation or command control applications
- All Talaria Projector lenses may be used with the MLV, allowing front or rear screen throw distances of 1.5, 3.0, 4.2, 4.9 and 7 times the width of the screen
- Optional single output lens
- Accepts a number of different input signals, including videotape, live camera feed, satellite feed, video laser disk, closed circuit television (CCTV), and on-line computer-generated graphics
- 525/625 line standard video as well as computer compatible

<b>Computer Compatible</b> 30.75kHz or 26.3 standard. <sup>4</sup> Non-standard inputs from 15.0kHz to 38.5kHz can be accommodated.*	PJ7150	1500	900	115 or 220	36,780.00
	PJ7155	3000	1100	115 or 220	52,780.00

### Notes:

1. Standard projectors are compatible with a single line rate. Other input options are available (including multiple line rates), contact General Electric Projection Display Products Operation or your nearest authorized sales agent
2. Light output given in terms of open gate minimum lumens. Modulated light output is typically 65% of open gate level
3. NTSC/PAL/SECAM switchable at line rate specified, available as option at additional cost
4. Accepts wideband monochrome video at line rate specified

\* Available at extra cost.

## Talaria Multi-Standard Large Screen Video Projector

- All the features of the Talaria professional video projector plus the ability to switch automatically between three preset scan rates
- Uses both standard video inputs and non-standard line rate inputs
- You can use any two input sources between 15kHz and 34kHz in combination with standard NTSC video
- Projects a picture from 4' to 30' wide
- With its interchangeable lenses, you can vary the throw distance anywhere from 12' to over 280'

# VIDEO/DATA PROJECTOR

## Imager 300 Video/Data Projector

The Imager 300. It's the video and computer display projector that puts total performance control in the palm of your hand.

### Digital convergence means easy set up.

First connect the necessary cables from your input sources through the Imager 300's switcher. Connect one set of cables from the video switcher to the projector.

Aim the full-function handheld remote controller at either the projector or the switcher's built-in infrared receiver, call up the test pattern and proceed to converge the line rate you've selected, just by pushing the right buttons. You'll find this remarkably easy and fast. And when you're finished, just push the store button and the Imager 300 will automatically remember the convergence settings for that line rate.

### Digital convergence means excellent picture quality.

Unlike analog convergence, which allows a projector to drift over time, digital convergence locks on to the correct settings for a chosen line rate eliminating drift. So you get an optimum picture each and every time a preset line rate is selected.

### Digital convergence means easy to operate.

In addition to the full-function remote control you'll use to converge the Imager 300, we provide a second, "Executive remote." This is a simplified version for the boss to use. So he or she can control the presentation with just a push of a button, just like a TV set.

With a full field display of 2,000 characters, excellent contrast and over 900 lines resolution RGB, 525 lines (NTSC video) and 625 lines (PAL/SECAM video), you'll get a crisp, clear picture for all your front and rear-screen presentations. Which makes this perfect for management information systems, marketing, engineering and training.

The picture quality is due to our uniquely designed 7" Hi-Resolution CRT's and the powerful, optically coupled, all glass lenses.

Imager 300

### Imager 300 PSC7135

CRT variable line rate  
data/video projector  
Screen size: 70" -120" diagonally  
Resolution: Video 600 lines

## Specifications

**Power Source:** 120VAC, 50/60Hz  
**Power Consumption:** 260W  
**Projection Tube:** 7" liquid cooled CRT's optically coupled (RGB)  
**Brightness (typical):** 475 lumens (peak white)  
**Lenses:** 6 piece glass lenses, multi-coated  
**Throw Distance:** 70" screen; requires 7'2" throw (1.8m requires 2.1m throw)  
 90" screen; requires 9'10" throw (2.3m requires 3.0m throw)  
 120" screen; requires 11'8" throw (3.0m requires 3.6m throw)  
**Resolution:** Video - 525 TV lines; 625 PAL/SECAM  
 RGB 900 TV lines  
 Full field display; 2000 characters  
**Picture Size:** 70" to 120" (diagonal measurement) (1.8m to 3.0m)  
**Projection Capabilities:** Front or rear—ceiling or floor mount  
**Input Standards:** NTSC, NTSC 4.43, PAL, SECAM, RGB (15-34kHz)  
**Video Unit Inputs:** 8 presets available  
 Horizontal—15kHz to 34kHz  
 Vertical—38Hz to 100Hz  
**Input Levels:** Video - 2 video inputs  
 0.7-1.5V p-p, 75 ohms positive (BNC)  
 Loop thru—1 video  
 0.7-1.5V p-p, 75 ohms positive (BNC)  
 RGB (1) 9-pin IBM connector  
 RGB (2) and RGB (3)  
 R: 0.7-1.5V p-p, 75 ohms positive (BNC)  
 G: 0.7-1.5V p-p, 75 ohms positive (BNC)  
 B: 0.7-1.5V p-p, 75 ohms positive (BNC)  
 H/V Sync: 0.7V p-p-2.0V p-p, 75 ohms negative or positive (BNC)  
 G Sync: 0.3-0.6V p-p, 75 ohms negative (BNC)  
**Weight:** 112 lbs. (51kg)  
**Dimensions:** 11 1/2" H x 25" W x 27" D  
 (29 x 64 x 70cm)  
**Digital Convergence:** Digitally preset for desired line rates  
 < 0.2% of V-height  
 Internal microprocessor  
 Fine tuning optimization

Storage memory to save preset data  
 Convergence done remotely whether floor or ceiling mount  
**Preset**  
**Input #1:** Composite Video (50/60Hz)  
 Quad Standard (NTSC/NTSC 4.43/PAL/SECAM)  
**Input #2:** Composite Video (50/60Hz)  
 Quad Standard (NTSC/NTSC 4.43/PAL/SECAM)  
**Input #3:** RGB via 9-pin IBM® connector with TTL and analog processor.  
 CGA 15.75kHz 320 x 200 pixels  
 EGA 21.8kHz 640 x 350 pixels  
 PGA 30.5kHz 640 x 480 pixels  
**Input #4:** RGB BNC connector (R, G, B, H Sync, V Sync)  
 Variable line rate 15-34kHz  
**Input #5:** RGB BNC connector (R, G, B, H Sync, V Sync)  
 Variable line rate 15-34kHz  
**Input #6:** NTSC Video 60Hz  
 (direct connection to video projector)  
**Full Function Infrared Remote Control:**  
 ★ On/off power control  
 ★ Brightness  
 ★ Picture contrast  
 ★ Color, hue, sharpness  
 Multiple test pattern displays  
 Video black  
 Static convergence (digital)  
 Dynamic convergence (digital)  
 Point convergence (digital)  
 ★ Infrared executive remote regulates these items  
**Test Pattern Display:** Internal generated  
 Cross hatch—fine and coarse  
 Dot pattern—fine and coarse  
**Text Color Switch (for enhanced computer display):** Red, green, blue, yellow, cyan and magenta (digital input only)  
 ★ Imager 300E (PSC7135E) 220V, 50Hz Export Version

## Imager 100/200 Projection Systems

- Easily moved using optional projection cart for inter-office use, or with optional carrying case for between local branches, schools, or libraries (30% smaller and lighter; approx. 73 lbs.)
- 48% brighter picture, with 400 peak lumens made possible with cooled CRT design
- Optional interface can talk to any computer like IBM's PC series and compatibles, NEC PC's, Apple III, IIC, IIE
- Service friendly design

Creates an affordable difference in top-of-the-line projection television for the growing education and business markets.

With the optional projection cart and its ease of use, corporate meeting centers can keep their clean, professional look...while educational centers can share the industrial projection technology from room to room...and need to need.

# TAPE HEAD CARE PRODUCTS/ ACCESSORIES

## VCR-130/135 Head Cleaners

Weekly cleaning with this time-tested video head cleaner is the safe, easy way to remove abrasive household dust, tape residue and cigarette smoke from the entire VCR tape path. The package includes a cassette with special polyester cleaning tape, pure TF cleaning spray, easy to follow instructions—and an iron-clad limited warranty that provides an absolute assurance of safety for delicate tape heads. Provides approximately 52 cleanings.

VCR-130 (VHS) . . . . . \$29.95  
VCR-135 (Beta) . . . . . 29.95

## PF-350 8mm Head Cleaner

This 8mm video head cleaner delivers the same, wet system, full tape path cleaning effectiveness offered by our proven VHS and Beta cleaners. It safely removes household dust, tape residue and cigarette smoke with no risk of damage to delicate tape heads.

PF-350 . . . . . \$29.95

## PF-150/155 Camcorder Head Cleaners

We developed this full tape path head cleaner to accommodate the requirements of both VHS and Beta camcorders. It delivers the same safe, effective wet cleaning action offered by our other video head cleaners—but with a special cleaning tape that's designed exclusively for camcorders.

PF-150 (VHS) . . . . . \$29.95  
PF-155 (Beta) . . . . . 29.95

## VCR-111 Audio/Video Cleaning Solution

The perfect replacement spray for all tape deck and VCR wet-type cleaning systems. This head cleaner is 100% pure TF so it dries quickly and leaves absolutely no residue. It's non-flammable, non-toxic—and safe for all metal, plastic, rubber, painted or elastomer VCR components. 1.9 oz.

VCR-111 . . . . . \$4.40

## VCR-300 Dust Cover

This VCR dustcover provides an extra measure of protection from household dust and surface scratches. The clear vinyl front panel displays VCR controls—and the durable, 100% cotton top, side and rear panels breathe to allow quick cooling without an unpleasant vinyl odor. Fits nearly all standard VCRs (4" H x 18" W x 15" D).

VCR-300 . . . . . \$14.95

## VCR-820 Dubbing Cables

VCR dubbing cables are designed to deliver the highest quality video cassette copies. Includes professional grade cables with gold, electroplated connections—and complete, easy to follow, fully illustrated instructions. Length, 2 meters. Nominal capacitance 17pF per foot.

VCR-820 . . . . . \$11.95  
PF-840 Stereo version . . . . . 16.99

## PF-211/212 Video/Audio Tape Erasers

It only takes a few seconds for this powerful audio/video tape eraser to eliminate previous recordings—and prepare used tapes for like new performance. The 2300 gauss field intensity is excellent for VHS and Beta video tapes, audio cassettes and reel-to-reel tapes up to 1/2" wide. Includes simple step by step instructions. U.L./CSA approved. PF-211 and PF-212 for 220-250VAC.

PF-211 . . . . . \$59.95  
PF-212 (220V) . . . . . 73.49

## PF-208 Professional Head Demagnetizer

This powerful professional head demagnetizer has 1000 gauss field intensity to quickly remove residual magnetism from multi-channel, 2" studio tape heads and guides. The probe tip is rubber covered to protect delicate head surfaces. And when the demagnetizer is not in use, a momentary switch automatically shuts it off.

PF-208 . . . . . \$56.70

PF 208

PF-380

PF-350

## VCR-205/207 Video/Audio Demagnetizer

Regular use of this video/audio demagnetizer prevents residual magnetism from downgrading audio and video performance. Easy to follow instructions allow the user to quickly and safely demagnetize the entire tape path of VCRs, reel-to-reel and cassette audio decks. 290 gauss field intensity. U.L./CSA approved. VCR-205 and VCR-207 for 220-250VAC.

VCR-205 . . . . . \$39.95  
VCR-207 (220V) . . . . . 41.80

## PF-380 Broadcast Head Degausser

This professional unit is the same size as a broadcast cartridge. When inserted into a cart machine, its 400 gauss flux intensity demagnetizes record and playback heads in seconds.

PF-380 . . . . . \$43.79

## VCR-90 Audio/Video Swabs and Spray

This compact care kit for manually cleaning all audio decks and VCRs includes a 1.9 oz. can of pure TF cleaning solution, 18 lint-free foam swabs and instructions.

VCR-90 . . . . . \$9.99

## VCR-95 Manual VCR Head Cleaning Kit

This manual VCR head cleaning kit comes complete with a 1.9 oz. can of pure TF spray, 18 lint-free foam swabs, an anti-static dust cloth, a specially designed VCR screwdriver—and fully illustrated, easy to follow instructions.

VCR-95 . . . . . \$19.20

## VCR-50 Professional VCR Care Kit

Everything necessary to perform regular manual VCR maintenance. This professional care kit includes a large, 16 oz. can of pure TF spray, 25 foam swabs, an anti-static dust cloth, 280 lint-free cellular tissues, a can of Super Blast High Velocity Air Duster—and easy to follow, illustrated instructions.

VCR-50 . . . . . \$35.28

## QM-505 25 Foam Swabs

Soft, lint-free foam swabs are completely non-abrasive, yet have excellent cleaning ability. For use with our head cleaning liquid.

QM-505 . . . . . \$9.40

## Genie Tower

- Lifts to 30'
- Rolls into position
- Lightweight for single spots or multiple light systems

The Genie Tower is a portable, telescoping lift specially designed for lifting and supporting theatrical lighting systems. Tanks of compressed air or carbon dioxide (CO<sub>2</sub>) provide low cost power to quickly and effortlessly lift your lights as high as 30'.

Aluminum construction makes the Genie Tower durable enough to support up to 350 lbs.—but lightweight enough for one person to carry. The Genie Tower's flat black anodized finish lets it "fade" into the background so that the audience isn't distracted from the performance.

Durable 6" swivel casters allow the Genie Tower and mounted lights to be moved easily when in the lowered position. Then, just press the operation button and your lights elevate in seconds. An optional leveling jack base provides up to 12" of adjustment for stability, on uneven floors or stages. Guy wires "lock" legs into the base castings for additional support.

## Super Tower

- Lifts 650 lbs. to 24'
- Easy set-up and transport
- Compact base
- Perfect for heavy lighting systems

With a 650 lb. load capacity, the Super Tower is the ideal tool for lifting and supporting lighting systems, sound systems and stage scenery. Depend on it for flawless theatrical productions and entertainment events.

The Super Tower can be used as a single unit, or two or more can be used together to support trusses large enough to span a stage.

# THEATRICAL LIFTING EQUIPMENT

Super Tower, ST-24

Genie Tower, 2125

Set up is easy. Just install the outriggers and set the leveling jacks. To ensure load stability, the hand winch locks the load in place when the handle is released. In a stowed position, the Super Tower is easy to transport—with no bulky base to get in the way.

The Super Tower is available in two models offering lifting heights to 18' or 24'. Both models come standard with a flat black anodized finish so that the unit is nearly invisible to the audience.

# MATERIAL LIFTING EQUIPMENT

## Load Lifter

### Lightweight Hand/Lift Truck

- Constructed of lightweight aluminum • Durable and extremely portable • Weighs only 45 lbs.—but lifts 200 lbs. to 55" • Comes fully assembled • Silent winch • Collapsible legs and platform • Compact storage size for easy transport

LL-4.5 .....\$595.00

## Genie Lift

### Combination Hand/Lift Truck

- Aluminum castings and extrusions • Strong, lightweight, maneuverable • Lifts 350 lbs. • Choose the model that will raise your load to the height you need: 4', 8', 10' or over 12' • Safety brake winch automatically locks the load in place whenever the winch handle is released • Legs and forks remove without tools for easy transport and storage

#4 .....\$499.00

#8 .....589.00

#10 .....669.00

#12 .....699.00

## Handy Lift

### Heavy-Duty Hand/Lift Truck

- Lifts 600 lbs. to 4 1/2' • Constructed of lightweight aluminum • Employs an extra heavy-duty cable and pulley mechanism • Safety brake winch automatically locks the load in place whenever the handle is released • Standard wheel and caster package includes 8" hard rubber wheels and dual 2" front casters • Two optional wheel kits are available

HL-4.5 .....\$599.00

#### Option\*

FP 10" full pneumatic rear tires, 3" front casters . . . \$75.00\*\*  
\*\*Price when substituted for standard tires and wheels.

## Mix-N-Match

### Heavy-Duty Lift Truck

- Lifts 800 lbs. to 5' or 9 1/2' • Available in a choice of three wheel and caster kits • Constructed with a heat treated, non-corrosive aluminum mast with removable steel forks and legs • Forks are adjustable in width from 10" to 21" • Legs lock into base sockets, eliminating the need for setup time and tools • Safety brake winch automatically locks the load in place whenever the winch handle is released • M-9.5 has a two section interlocking mast for greater lifting height, and a dual handle heavy-duty winch • Most commonly selected wheel and caster kits for each (M-5 with Kit A and Kit C; M-9.5 with Kit A and Kit B)

M-5 .....\$639.00

M-9.5 .....839.00

Be sure to specify a base kit (wheel and caster combination):

Kit A                      Kit B                      Kit C

Load Lifter

Powered Superlift

Load Handler

## Superlift Manual Material Lift

- Lifts loads maximum 650 lbs. • Choice of models offers lifting heights up to 12', 18', or 24' • Durable • One person portability • Lightweight aluminum construction includes a fully assembled telescoping mast • Safety brake winch automatically locks the load in place whenever the winch handle is released

SL-12 .....\$ 849.00

SL-18 .....949.00

SL-24 .....1149.00

#### Safety Brake System Option\*

Factory installed only

SB For SL-12 .....\$175.00

SB For SL-18 .....200.00

SB For SL-24 .....250.00

## Powered Superlift

### Powered Material Lift

- 750 lbs. to 18' or 500 lbs. to 24' • Fully assembled telescoping mast of heat treated aluminum supported by a rugged steel base • Lightweight construction and large 5" casters make it extremely maneuverable • 10" rear wheels offer one-person portability • Legs remove for compact storage • Reversible forks provide additional lifting height • Choose the electro-hydraulic power package that best suits your needs: a 115VAC motor or a 12VDC power package

PSL-12 .....\$2095.00

PSL-18 .....2295.00

PSL-24 .....2595.00

#### Power Options\*

P For 110VAC, single phase, 60Hz .....N/C

PDC For 12VDC, with charger and battery .....\$200.00

## Genie Hoist CO<sub>2</sub> Powered Hoist

- Lifts 500 lbs. to 24' • Automatic, telescoping, pneumatic jack weighs less than 70 lbs. • Constructed of heat treated, extruded aluminum • Cycles over 100 lifts on a 20 lb. charge of bottled CO<sub>2</sub> • Can be powered by a portable air compressor or in-plant compressed air system

2012M .....\$759.00

2018M .....829.00

2024M .....899.00

## Load Handler

### Powered Material Lift

- Lifts 1000 lbs. • Two models lifting to heights of 10' or 15 1/2' • Fully assembled telescoping mast of heat treated aluminum supported on a rugged steel base • Heavy-duty steering arm • Extra wide 4" casters in the rear and 5" fixed wheels in front make the unit easy to maneuver and position • Standard base is 29" wide • Optional 40" wide base is available • Reversible forks for additional lifting height (for a maximum 800 lb. load) and a choice of a 115VAC or a 12VDC electro-hydraulic power package

LH-10 .....\$2495.00

LH-15 .....2695.00

#### Power Options\*

P For 110VAC, single phase, 60Hz .....N/C

PDC For 12VDC, with charger and battery .....\$200.00

#### Option\*

WB Wide base, 40 1/2" inside width, (if not specified, unit will have standard base) .....\$125.00

\*To specify options, add appropriate letters as suffix to the model number.

# AERIAL WORK PLATFORMS

**Quik-Deck**

## Quick-Deck Stacking Work Platform

- Working heights to 13' or 19' • Rugged steel frame + plywood and aluminum platform • One Quick-Deck is a sturdy workstand offering platform heights from 13" to 6' • Two Quick-Decks stack to provide a safe, stable work tower with platform heights ranging to 12' • Set up in seconds with no loose parts • Roll easily from one site to the next on rugged 5" swivel casters with locking brakes • Folds instantly to a 10" width for storage or transport • Standard Quik-Deck unit includes one steel frame with four casters and one plywood and aluminum platform

**QD-6 x 6** . . . . . \$339.00  
**QD-6 x 8** . . . . . 349.00

## Quik-Stand Workstand

- Working heights to 11' • Platform heights ranging from 12" to 4' • Durable steel frame + 2 plywood and steel platforms means no loose parts • Rolls smoothly on sturdy 4" casters with locking brakes • Folds instantly to a 6" width • Supports up to 250 lbs. on each of two platforms • Standard Quik-Stand unit includes one steel frame with four casters and two plywood and steel platforms

**QS-4 x 4** . . . . . \$149.00

**Manual Easy-Up**

## Manual Easy-Up

- Working heights to 22', 300 lb. capacity • Constructed of corrosion resistant aluminum on a welded structural steel base • Winch-operated unit offers a platform height extending to 15' • Ground-operated safety brake winch and a sturdy interlocking ladder • Basket folds down for compact storage • Permanently installed outriggers • Passes through commercial sized doorway (36" x 80") • Option RT, rough terrain package

**EU-15M** . . . . . \$1795.00

## Powered Easy-Up

- Working heights to 26', 300 lb. capacity • Available in a platform height of 19' • Folds to a compact size for ease of storage and mobility • Ground level entry • Operator controls in the basket • Choice of 110VAC or 12VDC power packages • Permanently installed outriggers • Passes through commercial sized doorway (36" x 80") • Option RT, rough terrain package

**EU-19** . . . . . \$3195.00

# RACKS

**22" W Broadcast  
Rack Frame "FR"**  
45 Heights 5 Depths 47 Colors  
Other widths available.

**Specifications**

Basic Frame: 1/8" CR steel  
Construction: Welded  
Side Braces: 14ga CR steel  
Panel Mounting Angles: 1/8" CR steel  
Mounting Holes: For front and rear  
doors, sides, top and base  
Door: Hinged left or right

**Panel Mounting Angles "PM"**

Tapped 12-24 or 10-32

Centers RETMA or UC (EIA)

Front and rear mounting angles are adjustable. Two pair supplied with 22" frame. One pair supplied with other frames.

**20" W Monitor  
Rack Frame "MR"**

45 Heights 4 Depths 47 Colors  
Other depths available.

**Specifications**

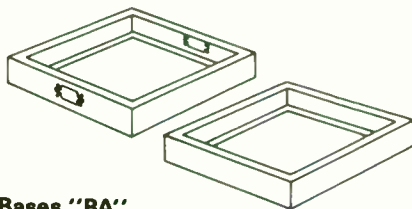

Same as 22" W Broadcast Rack Frame

**20 1/4" W Narrow  
Rack Frame "NR"**

45 Heights 4 Depths 47 Colors  
Other depths available.

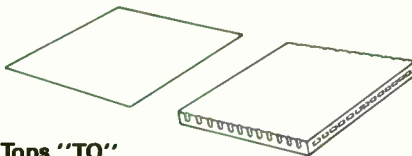

**Specifications**

Same as 22" W Broadcast Rack Frame

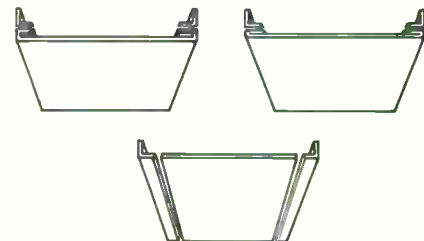

**Bases "BA"**

1/8" steel, 4" height, 22" width, 5 depths, plain or AC cutouts. Finish: Black

**Tops "TO"**

TOV-vented, 1" height, TOP-solid 1/16"H, 22"W, 5 depths. Finish: All colors.

**Side Panels "SP"**

Available in 3 types.

1. Hemmed—steel with hemmed edges, fits full depth.
2. Flush—fits between verticals
3. Pan—one inch deep, fits full depth

Finish: All colors.

**Copper Grounding  
Bars "GBA"**

Sizes to fit all GKM racks. Electrical copper alloy 110 busbar 1/16" or 3/16" thick x 1" wide. Tap holes for 10/32 screws conveniently spaced.

**Vertical  
Cable Distribution  
Bars "DBA"**

For fastening of cables inside racks. Sizes to fit all GKM racks. Multiple convenience holes for tying cables. Hard aluminum, 3/16" thick x 3/4" wide.

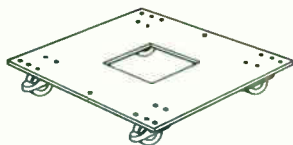

**Doors "DO"**

All doors are "universal" hinged permitting left or right handed hinging. Cup handle with 2 point latch or cup handle with magnetic strip.

## CPD or CPP Caster Base

Sizes to fit all racks. CPD 400 lb. capacity per caster, 5" height. CPP 175 lb. capacity per caster, 3 5/8" height. Both with brakes. Bolts to rack. Finish—all colors.

## BAP or BAC Gang Base

Height 4". Depths—All. Common widths 44", 66", 88", 100". Other widths available. Plain or AC cut-outs. Finish—Black.

## SP Shelf Pullout

18" deep with 1 3/4" front panel. 75 lb. capacity slides with 16" travel. All colors.

## SPW Shelf Pullout with Writing Surface

18" deep with 1 3/4" front panel. Stainless, hinged writing surface. 75 lb. capacity slides with 16" travel. All colors.

## SF Shelf Fixed

18" deep with 1 3/4" front panel. Mounts to front and rear panel mounting angles. All colors.

## TNRC Twin Nut Rack Clip

With two locking screws.

## HW 12-24 Panel Mounting Screws

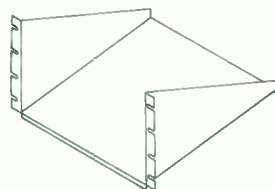

Phillips Pan Head, 12-24 x 1/2" long plus #12 nylon washer.

## RC Rack Divider Channel

Bent 1/16" steel. Fits between racks. Common widths 2", 3", 4", 6". Made in all rack heights. Other heights and widths available. All colors.

## LS Laminated Shelf

White laminated plastic bonded to plywood. Common widths 22", 44", 66". Common depth 19". Other depths, widths and colors available.

## ESA Equipment Support

Front mounting cantilevered support tray. All colors.

## DSA Desk Support

1/8" steel channel with mounting brackets for attaching desk to racks. Mounts to front and rear panel mounting angles, 36" long. Finish: Black textured.

## HRW Horizontal Wedge

Mounts horizontally between two racks allowing upper rack to be tilted 20° for easy viewing of instruments. Sizes to fit all racks. All colors.

## VRW Vertical Wedge

30° or 45° allowing wrap-around or corner designs. Removable rear panel. Sizes to fit all racks. All colors.

## BRP Blank Rack Panels

Steel or aluminum. 1/8" or 3/16" thick. Mounting holes. All colors.

## BRPS Blank Rack Panels Shimmied

Aluminum, 1/8" panel with 3/16" shims each end = total 5/16". Mounting holes. All colors.

## VRPS Vented Rack Panels

Bent 20 ga steel, .100 diameter holes, 42% open. All colors.

## RFP Rear Flush Panel

1/16" steel flat panel fits between verticals on 1/8" angle mounting brackets. Available for all racks. All colors.

## Narrow Panel Mounting Angles

2 1/32 narrow face panel mounting angles. 10-32 or 12-24, UC or RETMA, 78° or 92°. Finish: Black textured.

## SLF Slope Frame

20" welded frame with tapped holes to mount on front of standard FR or MR frames. Panel space from 7" to 29 3/4" available.

## DOVA Fully Vented Doors

Rigid construction, 1/2" square holes, magnetic strip, all heights.

## 1/2 Door

11" wide doors, vented or solid, cup handle with two point catch. Sold in sets.

## TSC Tape Storage Compartment

15 3/4"H x 19"D. Open front tape storage compartment. All colors.

## RE Rack Extender

1/16" steel, welded construction. Extends the rear of existing racks. All heights, widths and depths. All colors.

## HTB19 Horizontal Tie Bar

19" x 3/16" x 3/4" aluminum bar with mounting holes increases wire tying capacity. Finish: Caustic etch.

## 4A Horizontal Lacing Bar

1/8" x 1/2" steel with mounting holes. All colors.

## A22 Horizontal Lacing Bar

1/8" x 1/2" steel with mounting holes. Mounts between front and rear panel mounting angles, set 17 7/16" apart.

## 2B Terminal Block Mounting Bar

19" x 3/16" x 3/4" aluminum bar with mounting holes and 19 tapped holes. Finish: Caustic etch.

# VIDEO LIGHT SYSTEMS/ POWER PACKS

## QT™ Video Light Systems

QT Video Lights offer you the latest design technology in compact portable lighting for use with today's more advanced video cameras and camcorders. Featuring a convection cooling system, both the basic QT Video Light and broader use variable intensity version, remain surprisingly cool to the touch even after prolonged use.

An added feature of the variable intensity control version is a thermal sensitivity switch. If the QT Video Light is positioned in such a way that excess heat cannot properly dissipate, the unit is designed to automatically turn off until it has sufficiently cooled.

Available for the QT Video Light System, as well as for use with any other video, computer or electrical device requiring 12VDC power, are three rechargeable power packs. Other accessories include protective glass filter, four-leaf barndoor and replacement quartz halogen lamps.

### Specifications

<b>Power Source:</b>	12VDC
<b>Lamp:</b>	12V/50W BRL halogen lamp or 12V/100W FCR halogen lamp
<b>Angle of Coverage:</b>	40° horizontal and vertical
<b>Tilt Control:</b>	Up to 90° for bounce lighting
<b>Color Temperature:</b>	3300°K with 12V/100W lamp
<b>Power Cord:</b>	5' cord (straight) with 12V adaptor plug
<b>Dimensions:</b>	3.7" x 2.4" excluding mounting bracket
<b>Weight:</b>	8 oz. standard 9.6 oz. variable intensity
<b>Front Filter Thread:</b>	58mm (accepts QT protective glass filter, special effects filters, barndoor)

## QT Video Lighting Systems

- L4840** Video Lighting System I  
Includes: Video Light with 5' power cord, 12V/50W halogen lamp, Mini-SE Power Pak with battery charger . . . . . **\$119.95**
- L4842** Video Lighting System II  
Includes: Video Light with 5' power cord, 12V/100W halogen lamp, Pro-SE Power Pak with battery charger, Protective Glass Filter . . . . . **\$149.95**
- L4845** Video Lighting System IV  
Includes: Video Light with 5' power cord, 12V/50W halogen lamp, Pro-NC Power Pak with battery charger, Protective Glass Filter, Four-Leaf Barndoor. . . . . **\$199.95**

## QT Video Lighting Components and Accessories

- L4800** QT Video Light with 5' power cord and 12V/50W lamp . . . . . **\$ 59.95**
- L4801** QT Video Light with 5' power cord and 12V/100W lamp . . . . . **59.95**
- L4805** Mini-SE Power Pak with carrying case and charger. 12V/3A. . . . . **79.95**
- L4811** 110VAC Charger only (replacement). . . . . **29.95**
- L4806** Pro-SE Power Pak with carrying case and charger. 12V/6.5A . . . . . **89.95**

- L4810** Protective Glass Filter. . . . . **19.95**
- L4815** Four-Leaf Barndoor. . . . . **19.95**
- L4850** 12V/50W quartz halogen lamp (replacement) . . . . **15.95**
- L4851** 12V/100W quartz halogen lamp (replacement) . . . **15.95**

## Mini-SE Power Pak

Equipped in its own canvas case with belt loops and removable shoulder/belt strap, the Mini-SE is capable of supplying 3AH of power ...sufficient to operate a QT Video Light with 50W quartz halogen lamp for 30 minutes continuously.

Featuring an in-line safety fuse, the Mini-SE requires approximately 16-18 hours charging to achieve its maximum capacity.

Its universal "cigarette lighter" type socket allows the Mini-SE to work with virtually any video, computer or electrical device requiring 12VDC of power.

The Mini-SE is capable of running a portable VCR/camera outfit for an average of 1.5-2 hours. A camcorder system can be powered for up to 3 hours on average.

## Pro-SE Power Pak

Supplied in its own heavy-duty canvas pack with shoulder/belt strap and belt loops, the Pro-SE is designed for longer continuous use. Weighing 5.25 lbs., the Pro-SE can power a QT Video Light with 50W halogen lamp for 60 minutes continuously.

When used to power a portable VCR/camera outfit, an average of 4-5 hours running time can be expected. With camcorders requiring approximately 3/4 amp power, as much as 7 hours operating time can be expected from a single charge.

Offering the same excellent shelf storage as the Mini-SE, the larger Pro-SE can accept up to 500 recharges and requires 18-20 hours to reach maximum charged capacity.

## Pro-NC Power Pak

When used with the QT Video Light and 50W halogen lamp, an average continuous operating time of 45 minutes is to be expected. Times of 2-2.5 hours can be expected when using the Pro-NC to power portable VCR/camera outfits (requiring 1.2A). Camcorder users can expect from 3-3.5 hours continuous running time.

The Pro-NC Power Pak requires a charging time of approximately 16-18 hours for maximum efficiency. Long-term storage is also excellent with only an average 5% loss in power over a three month period.

### Specifications

	Mini-SE	Pro-SE	Pro-NC

# DIGITAL VIDEO EQUIPMENT

## X-Calibre Digital Video System

• Dual channel, multiple input DVE that, in a complete package, combines two full time base correcting frame store synchronizers with comb line NTSC decoders, full digital signal processing and a sophisticated mixer • Includes a brilliant zoom and trajectory capability, with further zoom variations combining slide, flip, tumble and spin • Other effects include vertical inversion, variable axis compression, segmented reveals and conceals between channels, variable borders and full re-entrant capability • State-of-the-art technology • Designed for compatibility with future hardware developments • Consists of three sections: Digital Effects Controller, Mainframe Unit and Zoom Processor • Digital Effects Controller is designed for desk-mounting and can be used alongside an edit controller or as a complete effects vision-mixer • Digital Effects Controller and Mainframe Unit are connected by a single cable RS-422 interface and can be located up to 1000 meters from each other • Mainframe contains one Frame Store Synchronizer, the interface logic to the Zoom Processor and houses the Digital Control Electronics, the Central Microprocessor and the Sync Pulse Generator • Zoom Processor Unit houses the second frame store, digital adaptive spatial filter and microprocessor control system • 3-axis joystick • A/B transitions may be performed automatically at any pre-programmed rate from 1 to 99 frames. Alternatively, the effect may be controlled manually with the 'T'-bar quadrant fader, which offers the unique feature of user-programmable damping • Full Edit Memory enables any combination of button push effects and joystick T-bar picture movements to be stored

X-Calibre

## Proteus Digital Effects Controller

• Dual channel multiple input, digital effects unit incorporating full time base correction, plus two full frame stores • State-of-the-art software and hardware • Designed to work with standard NTSC video inputs or any heterodyne VTR—both studio machines and portables • Comprises two sections: the Digital Effects Controller and the Mainframe Unit • Digital Effects Controller is a 7-unit panel designed to be desk-mounted either alongside an edit controller or as a comprehensive stand-alone effects vision mixer. It is connected to the Mainframe via a single cable RS-422 interface, enabling the units to be separated by a distance of up to 3000' • Full Edit Memory stores any combination of button push effects and joystick/'T'-bar picture movements • Mainframe Unit contains two full Frame Store Synchronizers each with a universal Time Base Corrector front end, and houses the Digital Control Electronics together with the Central Microprocessor and is responsible for actioning all commands received from the Effects Controller • Mainframe Unit also houses the Sync Pulse Generator which conforms to RS-170A and SMPTE four field specification for subcarrier to H phase timing with a field one ident pulse

X-Calibre Mainframe, Zoom Unit, Effects Controller, inter-connection and power cables, instruction manual . . . . . \$32,500.00

Proteus Mainframe, Effects Controller, inter-connection and power cables, instruction manual . . . . . 20,000.00

### Options and Accessories

Component output in place of dual output . . . . . NC  
Downstream luminance/linear matting keyer (third channel overlay) . . . . . \$ 750.00  
3 1/2" floppy disc storage system for X-Calibre . . . . . 1,125.00  
Sony BVU® 18-pin connector to 5-pin connector Dynamic Tracking® interface cable . . . . . 75.00  
Beta Component input cable: 12-pin connector to 6-pin DIN connector. . . . . 95.00  
Beta Component output cable: three BNC connectors to one 12-pin connector. . . . . 150.00  
Service Manual, Proteus or X-Calibre . . . . . 150.00

## System-DVP Digital Video Processor

• TBC and frame store synchronizer system • Expandable, each stage having a progressively larger repertoire • Starts with a single channel TBC which is capable of a number of digital effects including solarize, posterize, fully variable borders, false colors and one channel picture moves. This can be upgraded to a dual channel system providing reveals, conceals, push-offs, fades and a range of wipe transitions, all to frame accuracy • Dual TBC system can later be extended to a dual frame store unit which increases the effects range even further to include vertical transition, mosaics, freeze and strobe • Same mainframe housing is common to all four units and upgrading is easily and speedily effected • Mainframe incorporates a GPI for edit controller interface and is packaged in a 3U rackmountable chassis • Removable filter panel at the front of the system gives access to the processing amps controls • Operated from a compact control panel with illuminated switches and LED display connected to the main signal processing unit via a 6'6" cable

### System-DVP

#### Basic Configurations

Single Channel TBC*	\$4,575.00
Single Channel TBC/Framestore*	5,575.00
Dual Channel TBCs*	6,575.00
Dual Channel TBC/Framestores*	8,575.00
Effects Controller . . . . .	3,000.00

#### Upgrades

TBC to 2 Channel TBC**	\$2,300.00
TBC/Framestore to 2 Channel TBC/Framestores**	3,450.00
TBC to TBC/Framestore—with the return of an undamaged TBC board . . . . .	1,300.00
Refurbishing fee for damaged TBC board (when upgrading to TBC/Framestore) . . . . .	450.00

Los Angeles, CA 90038  
(213) 850-6800

## BATTERIES/CHARGERS

All G & M battery packs and belts are made of premium materials, high capacity Sanyo NiCad cells.

### GM140B/GM120B

14.4V      4AH      On-Board Battery Pack  
12V        4AH      On-Board Battery Pack

All G & M On-Board packs come with Anton-Bauer mounting plates, a solid all-metal case that is stronger, lighter and will not crack. On-Board pack charger is optional.

### GM12BP

12V              4AH BP-90      Replacement Battery

Comes in a hard case with a Sony connector and a pull strap. Case can be opened for service. Runs the Sony BVU-110 for about 4 hours. A BP Holder is available in order to power any 12V camera as an on-board. Holder comes with a built-in overnight charger.

### GM30B

30V              4AH              Sun-Gun Battery Belt

Runs a 250W light for 30 min. Comes with a built-in charger. Weighs 11 lbs. Available in slow and fast charge. Easy open Velcro closing and heavy-duty leather belt. Automatic cut-off charger is optional.

### GM12B/GM14B/GM1B

12V              4AH              Camera Battery Belt  
14V              4AH              Camera Battery Belt  
B.4-12-16.8V 4AH              Universal Battery Belt

All belts are made with high capacity Sanyo cells, heavy-duty leather belt and Velcro closing for one hand operation. All belts come with built-in overnight charger. Automatic cut-off charger is optional. Available in slow or fast charge.

### GM12X2-7P

Dual 12V      7AH              Battery Pack

Two separate 12V battery packs in one case that deliver 14AH combined. Will run any 12V camera. Ideal for Ar-riflex III high speed camera where two 12V power sources are needed. Comes with built-in overnight automatic cut-off chargers. Also available in dual 14V, 7AH.

### GM1C

One Hour Fast Charger

This sophisticated all solid-state fast charger employs both time and temperature sensing cut-off circuits for better battery protection. When battery is 90% charged, this charger switches itself to 'trickle charge mode' that keeps battery fully charged indefinitely. Available for any 4AH or 7AH packs and belts.

GM1C-OB      Same as GM1C except on board

### GM04CC-2

Dual Overnight Charger for BP-90 packs

A constant current charger that charges two BP-90's simultaneously. Lightweight, small size, connectors are recessed for protection. Also available in 4 bank model GM04CC-4.

# PRODUCTION SWITCHERS

## Model 100 Production Switcher

### Unique Three Bus Multi-Level Mix/Effects System

- Eight looping video inputs, plus black and color background
- DSK Preview, overrides look-ahead preview system
- Cut or mix key transitions with independent frame rate auto transition

### Master Fade-to-Black and Pulse Processor

- Independent frame rate auto transition for Fade-to-Black
- Preview system that shows program output when Fade-to-Black is engaged
- Pulse Processor re-inserts blanking from black burst on program output for stable output and recordings
- Standard contact closure editor interface (GPI) to each of the three auto transitions or a fourth "select" line which allows selection of any one
- Program and Preset buses for background transitions
- Video key bus for luminance keying, chroma keying, and pattern inserts, over the background transition
- Look-Ahead Preview System that shows the next effect; Wipe transition preview
- Auto transition, adjustable 0-999 frame, lever arm transition or cut button
- Ten wipe patterns, with modifiers: Hard or soft edges, Hard or soft bordered edges, Pattern reverse, Pattern aspect, Rate controlled positioner, Preset pattern size
- Independent Matte Generator for key fill and pattern borders

### Video Keyer

- Video or Matte fill
- External key input
- Optional RGB chroma keyer
- Key invert
- Key mask using pattern generator
- Preset Pattern insert filled from key bus

### Standard Downstream Keyer

- Key input from the video key bus or an external key input
- Key fill from an external video source or the independent DSK matte generator
- BORDERLINE® Generator option for black or white title borders, drop shadows, or matte filled outline
- Key invert
- Key mask using pattern generator
- Optional serial interface (RS 232/422) for external computer control
- Optional pulse regenerator for system timing

### Mechanical Specifications

- Control panel can sit on desktop (17"W x 14"D), or with rackmount adaptor, can be placed in modular rack enclosures (requires eight rack units)
  - Electronics frame requires three rack units and 20" depth
  - Single 15 conductor control cable
  - Full tally system
  - Selectable power ranges from 100 to 240V, 50 or 60Hz
- 100N NTSC Production Switcher . . . . . \$10,495.00

### Options

- 100-33 RGB Chroma Keyer . . . . . \$ 850.00
- 100-40 NTSC Digital BORDERLINE Generator . . . . . 1,500.00
- 100-41 NTSC Pulse Regenerator . . . . . 1,000.00
- 100-50 Serial Interface Adaptor . . . . . 1,500.00

## 100CV Component Video Production Switcher

The 100CV is a compact, flexible, economical component switching system with the traditional family characteristics of its older brother; quality, performance, economy and a comfortable drive. Designed for professional component video production, the 100CV has all the qualities expected by the most sophisticated user.

The 100CV features non-looping video inputs, 8 in all, and 3 sets of BNC connectors for every input. Utilizing the same control panel as the 100 Production Switchers, the 100CV Component Video Production Switcher has updated electronics that incorporates as standard equipment many of the features offered as options on the 100.

The electronics frame of the 100CV requires 6 rack units and 20" depth.

- 100CV-525B 100CV Basic System for 525 Line System — Beta Format . . . . . \$18,950.00
- 100CV-525M 100CV Basic System for 525 Line System — "M" Format . . . . . 18,950.00
- 100CV-3-525B 525/Beta Format — Frame and Maintenance Manual Only . . . . . 15,950.00
- 100CV-3-525M 525/"M" Format - Frame and Maintenance Only . . . . . 15,950.00

### Options

- 100CV-40 525 System - Digital BORDERLINE Generator . . . . . \$1,500.00
- 100-51 Key MEM Effects Memory System . . . . . 3,195.00
- AMX-100M Audio Mixer System (Mono) . . . . . 5,495.00
- AMX-100S Audio Mixer System (Stereo) . . . . . 6,695.00
- 50CV Component Video Dissolver . . . . . 5,000.00
- CV-21 Y, R-Y, B-Y to RGB Translator (for use in CV-20T Tray) . . . . . 995.00
- CV-22 RGB to Y, R-Y, B-Y Translator (for use in CV-20T Tray) . . . . . 995.00
- CV-23 Color Bar Generator (for use in CV-20T Tray) . . . . . 1,195.00
- CV-24N NTSC Decoder (for use in CV-20T Tray) . . . . . 1,500.00
- CV-25N NTSC Encoder (for use in CV-20T Tray) . . . . . 1,500.00
- CV-20T CV-20 Series 2 RU Tray with Power Supply . . . . . 895.00
- CV-20PS Backup Power Supply for CV-20T . . . . . 245.00
- CV-20EXT Module Extender . . . . . 110.00

# GRASS VALLEY GROUP

# PRODUCTION SWITCHER

## Model 200 Production Switcher

- Linear keying
- Optional Linear Borderline® Key Edger provides a variety of modes including multiple-line drop shadow, border, outline, and transparent shadows
- Pre-set wipe
- Optional multi-format chroma keyer for up to eight sources. You can use an RGB signal from a camera or color difference signal from a Beta or MII component tape source
- Luminance key
- "Over" Function Switch-layer keyer priority in each mix effect
- Auto select mode
- Accumulative latch for fill and key signals
- Six assignable external key source inputs/mix effect
- Four external key fills/mix effect
- Standard Key Masking. You can create realistic key effects with the dedicated shutter (box) mask, external key mask or either ME wipe output in any keyer—including the downstream keyer. To optimize key appearance, the mask system also features invert and forced foreground modes
- Key Memory. Key selection recalls clip, hue and gain
- Horizontal and Vertical Multipliers. Multiply a basic pattern from one to four times on the horizontal or vertical axis
- Border, soft and border symmetry modes
- Rate controlled positioner
- Normal, reverse, and flip-flop wipe direction modes
- Four Learn User Wipe Registers. Saves wipe pattern and all modifiers, so you can recreate the setup at the push of a button

## Matrix Wipe Patterns

- 32 Programmed Wipe Patterns. Six patterns are available through dedicated buttons, and 26 through user personality assignment
- 64 x 48 Pattern. You can fill the screen with over 3,000 tiles
- Pattern Mix Mode. Modulates any analog wipe pattern with the selected matrix pattern for an endless variety of effects

With 20 primary inputs and two mix effects, the 200 gives you more keying power than has ever been offered in a mid-sized production switcher.

For starters, the 200 gives you the creative freedom of five powerful keyers, two in each ME and one downstream. You can use either ME as a background for the downstream keyer, which also includes a fade-to-black and an output blanking processor.

The 200 gives you one matte generator for each keyer, one for each wipe system, and two background generators—for a total of nine—in addition to the color-black generator.

And for even more creative versatility, the background generators provide background wash.

The 200 standard effects memory system gives you the freedom to program effects with standard registers and quickly recall them on any switcher level.

Model 200

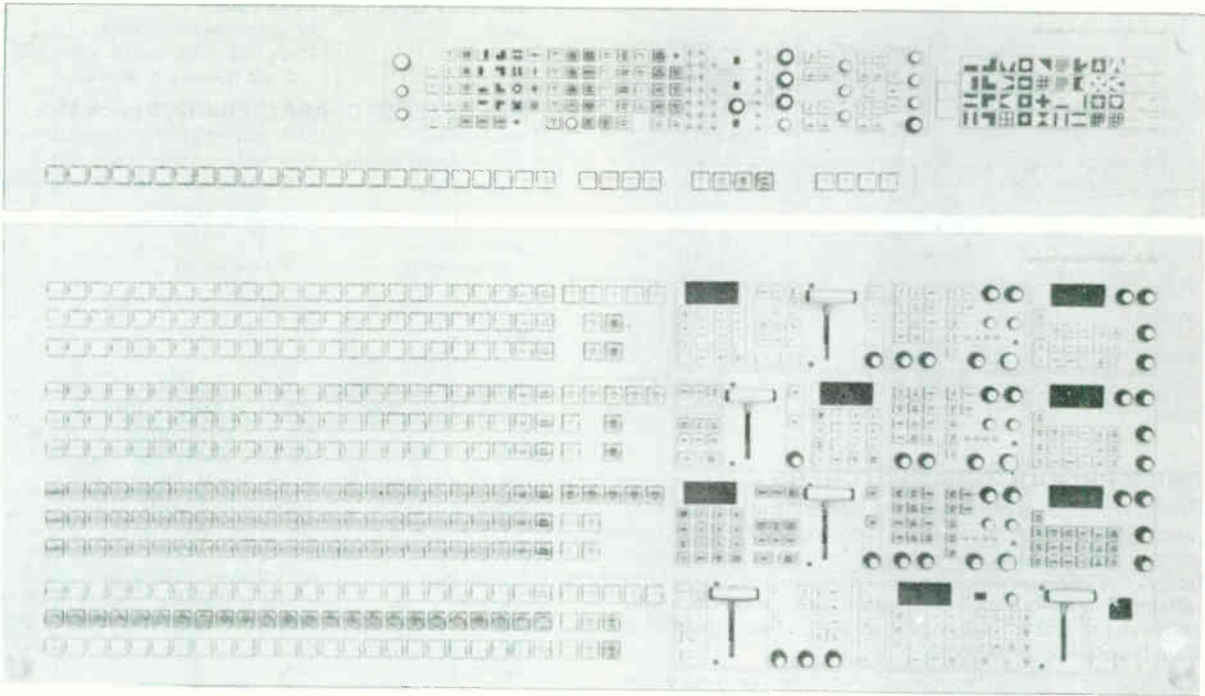

When you need to move fast, you'll appreciate the 200's easy-to-use features, including look-ahead preview, preset black mix and auto delegation. Plus display windows for mounting Horizon multi-destination routing displays.

300-3AN

### 300 Series Production Switching System

- Unlimited re-entry of effects
- E-MEM® effects memory system on each Mix/Effects (M/E) with Effects Dissolve and sequencing
- Four input buses per M/E
- Independent title mix/cut per M/E
- Lever and title auto transitions
- Multi-source title keys
- Automatic key follow
- Chroma key memory per input
- Quad split from each M/E
- Personality Programming
- Omni-Key™ system—Linear Key Mode/Key Memory/Key Invert/External Key\*

The 300 Series Production Switching System has been developed to meet the demanding requirements of both live broadcast production, and complex program and commercial production in the studio or edit suite. It is the first production system designed specifically to integrate Digital Video Effects and E-MEM effects memory control. Careful attention to the human engineering of panel controls and computer assisted operation provide unmatched production power and ease of operation.

The fully integrated E-MEM system, standard in each mix/effects system, can learn up to 20 different M/E configurations (all switches and controls). Each E-MEM effects system is independent allowing for selective recalls during live programming. E-MEM's unique "Effects Dissolve" capability allows any combination of analog controls to be treated as a transitional device for unique transitions and effects previously impossible under manual control. Sequencing allows a series of changes in control set up and effects dissolves to be linked together for animated effects and complex productions. The E-MEM effects systems can be linked with control of the other switcher functions (Flip-Flop mix, DSK, Background, Quad Split) and the KALEIDOSCOPE digital effects system by the Master E-MEM effects memory option. This distributed E-MEM system allows frame accurate control of individual elements of very complex effects frequently used in post-production.

\* Available as standard on all 300 series switcher systems beginning May, 1985. Omni-Kit available to upgrade 300 series systems to include Omni-Key™ enhancements.

Four input buses per M/E handle most common effects sequences without re-entry. Transitions from one background to another, the addition of a video key (chroma key, DVE key, self key or matte key), a title key or any combination of the above, can be accomplished with one lever movement on a single M/E. Title hierarchy is selectable over or under the video key for full flexibility. Four input buses also permit a quad split output from each M/E. Thus dissolves or wipes are now possible between quad split from different M/Es.

An automatic preview function displays the exact results of the next lever movement (including all re-entries) in the Preview monitor.

Lever and title auto transitions with independent rate programming, are provided on each M/E. Titles can be added or deleted in combination with background or video key transitions or independently from title mix (auto transition) or title cut buttons.

The preset black function permits a transition to black (mix or wipe) between the on air effect and the previewed effect. The first lever movement is a transition to black (the crosspoint is automatically selected), and the second lever movement is a transition to the previewed effect.

High performance chroma keyers ignore luminance highlights in non-key areas, due to an exclusive Luminance Annihilator circuit. Encoded chroma key with shadow can be added to each M/E. For each primary input the appropriate chroma keyer (RGB or Encoded) and last key set up is memorized for automatic recall if selected.

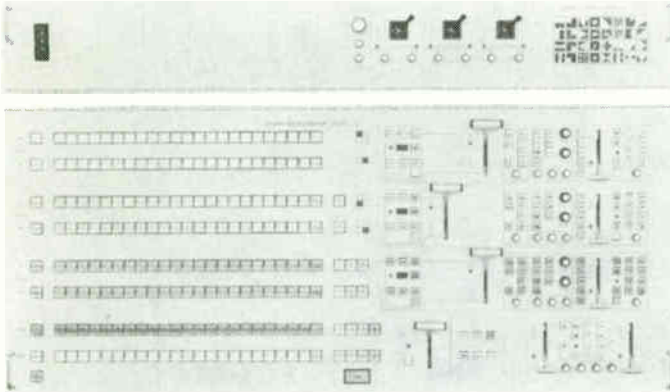

A program/preset mixer with downstream keyer feeds the Program output of the switcher. It operates just like an M/E, with the exception of wipes, non-additive mixes, and video keys. Downstream keyer functions are accomplished in the same manner as title keys in an M/E with the same sources available.

# PRODUCTION SWITCHERS

## 1680 SERIES PRODUCTION SWITCHERS

With the 1680 there is another level of possibilities available to operators worldwide. With the same familiar drive of the 1600, there is more power, more control than ever before. Whether live broadcast or post production, the 1680 provides double the production power from each mix/effects system. Plus the 1680 has the ability to interface with peripheral devices integral to modern production. So your potential to create brilliant special effects explodes.

The evolution from the 1600 has brought other standard features to the 1680—expanding your ability to create visual messages. Non-Additive Mix greatly improves how supers look on the screen. Soft Bordered Wipes allow control of border width and degree of softness. And the Downstream Keyer is standard in every 1680. The Standard Title Keyers, Non-Additive Mix, Soft Bordered Wipes, and Downstream Keyer all add up to the production power needed to meet today's heavy demands.

### E-MEM® System

Although standard on the 1680-10X, the E-MEM System is an option on all other 1680 switcher models. The system provides effects memory for all switcher functions, plus the sequences created with the Post Production System. The system allows individual elements of complex effects to be adjusted and previewed separately, giving you precise control and effect repeatability.

### Serial Interface Adaptor

The serial interface adaptor expands the switcher/editor interface beyond the edit decision list to total switcher control. It is the central hub that allows the switcher to connect all peripheral devices, such as the E-DISK™ Effects Storage System, post production audio, your computer editing system, and many other external production tools.

### Post Production Audio

This integrates the control of audio sources with your system by placing your audio sources under computer editor control.

### E-DISK Effects Storage System

With the E-Disk floppy disk system, favorite effects can be stored permanently for future use. This allows effects to be created off-line then used in live programs with perfect repetition. The E-Disk System is particularly useful in fast-paced formatted programs, where visually exciting effects are consistently repeated.

### Peripheral Interface

The Peripheral Interface expands production capabilities by allowing your computer editor to control other intelligent devices, such as Digital Video Effects or character generators.

### Preliminary Specifications

#### INPUT CHARACTERISTICS

Video Input Level: 1V p-p composite or .714V noncomposite.  
 Pulse Input Level: 4V p-p ±6dB.  
 Subcarrier: 2V p-p ±6dB.  
 Input Hum Attenuation: ≥26dB (reference; 1V p-p hum).  
 Maximum Input  
 Hum Level: 1.5V p-p.

#### OUTPUT CHARACTERISTICS

Level: 1V p-p composite (nominal).  
 Available: Three; 75Ω ±1%, source terminated.  
 DC on Output: ±50 mV blanking to ground.

#### MIX/EFFECTS CHARACTERISTICS (each M/E)

Mix Tracking: ≤1% gain error. ≤10mV p-p DC error.  
 Chrominance Linearity  
 During Mix: ≤1.5% amplitude error. ≤2° p-p phase error.

#### VIDEO SYSTEM CHARACTERISTICS

Short Time  
 Waveform Distortion: ≤1% unweighted.  
 Line Time  
 Waveform Distortion: ≤0.5%.  
 Field Time  
 Waveform Distortion: ≤0.5%.  
 Frequency Response  
 (reference; 1MHz): 300kHz to 5MHz: ±0.2dB.  
 5MHz to 8MHz: +0.2dB to -0.7dB.  
 8MHz to 20MHz: 0dB maximum.  
 Differential Phase: ≤1.5° (10-90% APL).  
 Differential Gain: ≤1.5% (10-90% APL).  
 K Factor: 0.5% (2 T Pulse).  
 Chrominance/Luminance  
 Inequalities: ≤ 10ns delay. ≤0.2dB gain.  
 Crosstalk: ≥52dB at 3.58MHz; 50dB at 4.43MHz.  
 Signal-to-Noise Ratio: ≥65dB p-p signal/RMS noise to 5MHz.  
 Path Length Deviation: ≤1.5°.  
 Gain Stability: ≤1%.  
 Gain Uniformity: ≥0.1dB.  
 DC Stability: ≤30mV.

#### POWER

Input Power: 95-125 or 190-125 VAC, 48-62Hz.  
 Power Consumption: 450VA approx. (1680-24K/16K).  
 275VA approx. (1680-10X).  
 225VA approx. (1680-16F/24F).  
 200VA approx. (1680-10V).

# EDITING/ PRODUCTION SYSTEMS

## VPE-141 Editing System

- Computer electronics including drive controllers, memory, processor, I/O ports, and XGPI on a single PC board layout
- DEC LSI 11/73 high speed processor
- 512K bytes of RAM memory
- Ability to boot the operating program from battery backed up CMOS memory
- Edit decision list information is automatically saved in the event of power failure
- Control of GVG switchers, audio mixers, and the ability to store E-MEM (effects memory) information on the edit decision list disk is also standard with the 141
- Control of up to 7 SMPTE RS-422 VTRs is included in the price of the system. VTR transport control is enabled through a touch sensitive "Jog-Pad™" which allows the user to invoke VTR transport functions by sliding a finger along the surface area of the pad
- The user may select from two types of menu displays, TTL color or RS-170 monochrome

<b>Base Models</b>	
VPE-141	NTSC . . . . . \$25,000.00

IPS-100

## IPS-100 Integrated Production System

- Full capability post production system
- Single chassis design
- Will control most RS-422 machines including 3/4", Beta and M-II 1/2" formats, and type "C"

The unit includes a 100 video switcher, Editor and edit keyboard with Jog-Pad, a sophisticated audio mixer called the AMX-170, a powerful edit controller with full list management capabilities, sync and pulse distribution with test signals, and an optional character generator. Also optional are shock mounted transport cases.

The compact unit can handle the post production needs of a small facility or efficiently add an economical suite to a larger production facility. Because of its single chassis construction it is also ideal for mobile applications.

IPS-100		\$54,500.00
IPS-100B	As above—excludes AMX-170 and 100 Control Panel. System is capable of video and audio cuts, transitions, and limited video wipes . . . . .	\$45,500.00

# VIDEO TAPE EDITING SYSTEMS

## Systems 31/41M/51EM Video Tape Editing Systems

### Modular

Each editing system, while uniquely designed for specific applications, permits "personal tailoring" to satisfy individual editing needs.

### Expandable

As your demands increase for additional editing features and equipment, GVG editing systems expand to accommodate your growth by adding hardware of software modules.

### Flexible

GVG Editing systems have the industry's most flexible interfacing capabilities. Examples include RS-422 and RS-232 VTR Control as well as the ability to control a wide variety of switchers and other equipment.

### Help File

Sometimes an editor needs a quick solution to a complex editing request. Help File with sub-categories insures easy access to definitive help—help you will remember and repeatedly use.

## System 31

- DEC 11/23 CPU • 64K bytes of memory • Dual 0.5M byte floppy disk drives • Distributed processing control • 8 control ports for VTRs and switchers • 4 accessory ports • Sync interface • 132 column printer • DEC RT/11 operating system • Exclusive super edit • Assignable VTRs, video, audio • Video, dual audio editing • Edit list display, input-output • Multiple edit list disk files • Auto-track dissolve setup, anywhere in edit list • Match any edit, both sides of dissolves • Unique-timed action modes — XGPI, expanded switcher control, log in edit list • Full preview, edit functions • Sequential, checkerboard, and cue-ahead auto-assembly • Real-time edit mode • Replay any edits, with auto-scroll • Six-character alphanumeric reel ID • Multiple-record, synchronous replay • Help file • Event numbers to 999 • Notes in the edit list, with individual add, delete • User-bit time reference • Powerful edit list management, with/without ripple insert, delete groups, recall, replace, move groups, shift groups

The System 31 is an editing system of unusual functional dimension. With eight I/O ports, and exceptional features such as Super-Slave and Cue Ahead, the System 31 provides exceptional performance at an outstanding performance/cost ratio.

## System 41M

- Faster DEC 11/23 CPU • 64K bytes of memory • Dual 0.5M byte floppy disk drives • Distributed processing control • 8 control ports for VTRs and switchers • 4 accessory ports • Color-lock sync interface • 132 column printer • Jogger motion control • DEC RT/11 operating system • Exclusive super edit • Assignable VTRs, video, audio • Video, dual audio editing • Edit list display, input-output • 10 macro functions, with nesting • Multiple edit list disk files • Powerful edit list management, with/without ripple insert, delete groups, recall, replace, move groups, shift groups • Single-Keystroke dissolve • Auto-track dissolve setup, anywhere in edit list • Three freeze modes • Help file • Match any edit, both sides of dissolves • Auto-clean removes overlaps • Full preview, edit functions • Match to freeze, variable-speed • Replay any edits, with auto-scroll • Six-character alphanumeric reel ID • VTR speedometer • Event numbers to 999 • Notes in the edit list, with individual add, delete • Unique timed-action modes — XGPI, expanded switcher control, log in edit list • Fill mode computes VTR speed • User-bit time reference • Real-time edit mode • Multiple-record, synchronous replay • Super-slave — Slave 1 to 6 VTRs, easy slave setup, positive offset lock, easy offset change, slaves in edit list • Precise programmed motion control • Sequential, checkerboard, and cue-ahead auto-assembly

The System 41M has a faster CPU than System 31. It also has features which make variable-speed VTR control and editing precise and easy. System 41M software and hardware features permit full exploration of the professional's creativity.

System 51EM

## System 51EM

### Standard Equipment

- V3.0 Super Edit™ Software • 32 contact XGPI • 409™ list clean-up software • Trace™ software for film style rough cuts mode • Comprehensive diagnostics package

### System Capabilities

- "Effects-Jog" ability to move KALEIDOSCOPE™ Effects through key-frame sequences by utilizing the "Jogger" motion controller • Preview preselect, using the TEN-XL®, true record re-assign (audio and video paths follow the control path) and preview is possible • Start up menu is easy to use, yet provides rapid access to editing programs, EDLs, diagnostic programs, and utility files • Enhanced diagnostics package provides for ease in installation and self-check trouble shooting • Effects Memories are written to EDL Disk and restored to 300 and 100 Switchers • Film mode capability in 24 and 30 film frames/SEC and NTSC and PAL tape frames • Over 200 software improvements including: auto-match, assemble edit, "slaves" stored and recalled • 4 level highlighted display format, improves clarity and operational ease • High speed list display and scroll capability

### Interfaces

- KALEIDOSCOPE DPM-1 Digital Effects • AMX-100 • Dubner "Page" control for Texta and CBG • Abekas A-62 • Panasonic AU-600 MII format • Time line "Lynx" Synchronizers • Graham Patten 616 Audio Console • Harrison Pro-7 Audio Console • Improved Lexicon Dynamic Pitch Audio Pitch control

### Manuals and Installation Guides

- Super Edit Manual • Installation Guide • Video tape on installation and operations

The System 51EM gives you extraordinary control over the most complex editing tasks. Its performance, ease of operation, and unequalled complement of software functions allow full expression of your creativity. A DEC 11/23 CPU and large memory capacity make your work fast and flexible. System 51EM interfaces with virtually all of the industry's leading equipment, and its 16 ports permit unrestricted control.

### Pricing

<b>51EM-8</b>	System 51EM - one 8" Disk Drive/ 10M Byte Fixed Drive . . . . .	<b>\$46,900.00</b>
<b>41M-8</b>	System 41M - two 8" Disk Drive . . . . .	<b>35,900.00</b>

# SYNCHRONIZATION GENERATORS

## 9500 SERIES

### NTSC REFERENCE SYNCHRONIZING GENERATORS

The 9500 Series Synchronizing Generators represent moderately priced sync generator systems. The SPG Gate Array IC, designed exclusively for the 9500 Series, has made accuracy, stability and reliability available in an affordable system.

With over 2,100 logic gates in a 44-pin package, the SPG Gate Array contains all critical circuitry for exact SC/H phase, regardless of external conditions.

Hybrid integrated circuits allow improved performance, manufacturability and reliability. Servicing can be kept to a minimum, since troubleshooting is done at the functional block level.

### 9505 Source Synchronizing Generator

The 9505 is a single module system available for either encoded subcarrier or color black reference. SC/H Phase is always correct. No adjustment is necessary.

Input Power: 100-125VAC or 200-250VAC, 50/60Hz

Power Consumption: 15W maximum

<b>9505-ES</b>	NTSC Source Synchronizing Generator . . .	<b>\$1,800.00</b>
	Encoded Subcarrier Reference	
<b>9505-ESX</b>	9505-ES with TCXO . . . . .	<b>2,000.00</b>
<b>9505-CB</b>	NTSC Source Synchronizing Generator . . .	<b>2,000.00</b>
	Color Black Reference	
<b>9505-CBX</b>	9505-CB with TCXO . . . . .	<b>2,200.00</b>
<b>9505-TCXO</b>	Temperature Compensated Crystal Oscillator (TCXO) . . . . .	<b>350.00</b>
<b>9505-TSG</b>	Test Signal Generator Module . . . . .	<b>800.00</b>
<b>9505-SID</b>	Source Identification Submodule for TSG . . .	<b>300.00</b>

### 9510 Reference Synchronizing Generator

The 9510 is designed for use when space requirements allow only a single rack unit, or a deluxe source sync generator is required, providing genlock to video or encoded subcarrier. Two color black and encoded subcarrier reference outputs are standard.

Power Consumption: 20W maximum

<b>9510</b>	NTSC Reference Synchronizing Generator . . . . .	<b>\$2,900.00</b>
<b>9510-TSG</b>	Test Signal Generator Module . . . . .	<b>800.00</b>
<b>9510-SID</b>	Source Identification Submodule for TSG . . .	<b>300.00</b>
<b>9510-PPC</b>	Phase Preset Control Module . . . . .	<b>350.00</b>
<b>Dual 9510</b>	Dual 9510 NTSC Sync Generator System . . . . .	<b>7,600.00</b>

### 9520 Master Reference Synchronizing Generator

The heart of the 9500 Series, this two rack unit master provides two outputs each of pulse and subcarrier. Two color black and two encoded reference outputs are standard. The 9520 will genlock to video or encoded subcarrier signals.

The input power for the 9510 and 9520 are the same.

Input Power: 105-125VAC or 210-250VAC, 50/60Hz

Power Consumption: 30W maximum

<b>9520</b>	NTSC Master Reference Synchronizing Generator . . . . .	<b>\$3,500.00</b>
<b>9520-HS</b>	9520 with Ovenized Crystal Oscillator . . . .	<b>3,800.00</b>

<b>Dual 9520-HS</b>	Dual 9520-HS NTSC Sync Generator System . . . . .	<b>9,400.00</b>

### 9550 Sync Pulse Generator Changeover Switch

The 9550 will monitor both the on-line and backup generators with visual and audible alarms in the case of failure, and has an LED status display to assist in identifying the faulty signal. The 9550 is mounted in a one rack unit tray with removable modules for easy servicing. It has automatic and manual switching, ten signal channel capability, and crosstalk suppression greater than 65dB.

<b>9550</b>	NTSC/PAL Automatic Changeover Switch . . . . .	<b>\$2,000.00</b>
<b>9550-RCK</b>	9550 Remote Connector Kit . . . . .	<b>35.00</b>

# VIDEO PROCESSING/ TIMING SYSTEMS

3240-20

## 3240 Video Processing Amplifier

- SC/H phasing • Full regeneration of sync and burst • Adjustable blanking width • Soft and hard clippers • Cable equalization option
- Selectable line deletions: 10-21 • Sin<sup>2</sup> pulse edges • Color black output option • Optional accessories

The 3240 Video Processing Amplifier is a high performance sync and blanking regenerative amplifier designed for signal processing in studio, master control, remote, and transmitter locations.

The basic 3240-10 system is a fully functional processing amplifier, available in one rack unit (RU = 1.75") height. Controls are available on the card edge or at a remote control point.

The compact and rugged construction, coupled with low power consumption and wide supply voltage range, make it ideal for remote van applications. All active components are accessible from the front of the rack.

Conservative ratings, and a sealed air design that keeps contamination out, will assure years of trouble-free service.

The expandable 3240-20 system in the two-RU frame contains four additional cells for accessories. The accessories are plug-in modules that complement the basic processor. The frame has been prewired to accept the accessories, and power is supplied from the 3200A Power Supply.

3200-PS1	Backup Power Supply Module for 3240-20	.....245.00

## 3258 SC/H Phase Meter

The 3258 SC/H Phase Meter is a measurement instrument specifically designed to aid in establishing and maintaining an SC/H phased video system. It has two video inputs plus a color frame pulse (VI) input, which are used to measure absolute SC/H phase of either video input, the difference between the two video inputs, and absolute SC/H phase of either video input with respect to an externally applied house reference color frame pulse (VI).

The 3258 SC/H Phase Meter comes with a power supply, module extender and two instruction manuals.

3258 .....\$2995.00

3274A

## 3274A Borderline Generator

- External matte • Complete downstream keyer • Matted inserts
- Three modes of caption enhancement • Insert fade-in and fade-out operation • Optional matte colorizer • Optional non-sync detector

The 3274A Borderline Generator is a caption inserting device normally installed at the output of studio production switching systems.

3274A-10 Borderline Generator in 1-RU tray, power supply, AC line cord, module extender, two instruction manuals, and a 1.75" H x 19" W (4.45 x 48.3cm) control panel with 8m (26') of control cable.

3274A-10 .....\$3995.00

3274A-11 Borderline Generator in 1-RU tray, power supply, AC line cord, module extender, two instruction manuals, and a 2.25" H x 6.95" W (5.72 x 17.6cm) control panel with 8m (26') of control cable.

3274A-11 .....\$3995.00

3274A-101 Nonsynchronous Detector Submodule .....255.00

3274A-102 Matte Insert Colorizer Module .....925.00

3274A-001 Extra Cable/Meter for 3274A .....6.00

STM-85N

## STM-85N NTSC Source Timing Module

- Decodes the encoded subcarrier signal output of SPG generators, producing discrete sync, blanking and subcarrier, V1 and color black
- Output phase relative to that of the driving SPG is adjustable over the range of +27/-35µs, using front mounted controls
- Further adjustment of 2H advance and 1H delay is possible with internal dipswitch settings
- When phase is adjusted, subcarrier and H sync move together, ensuring accurate SC/H phase at all settings

STM-85N .....\$850.00

SCB-100N

## SCB-100N NTSC Sync/SMPTE

### Color Bar/Audio Tone Generator

- One rack unit • Fully SC/H phased • Sync generator provides four color black outputs, two outputs each of sync, blanking and subcarrier, and one each of V1 and encoded subcarrier, two outputs of SMPTE color bars and one balanced Lo-Z output for audio tone

SCB-100N .....\$1500.00

# DISTRIBUTION AMPLIFIERS

## 8500 Series Audio/Video Distribution Amplifiers

The 8500 Series is a range of video and audio distribution amplifiers. The DA's feature both high performance and low cost as a result of innovative engineering coupled with advanced manufacturing techniques.

All 8500 Series models feature differential inputs with six outputs. Circuit building blocks such as input amplifiers, output amplifiers, and voltage regulators have been reduced to individual hybrid integrated circuits which provide improved performance, better unit-to-unit consistency, and ease of maintenance over conventional discrete designs.

Video DA's include the 8501, a basic non-equalizing DA; the 8502, an equalizing DA with dual range (0-500' and 500'-1000') variable equalizer; the 8503, an equalizing DA with precision stepped equalization (0, 100', 200', ...1000') plus vernier trim (0-125'); the 8504, a delay DA capable of up to 300ns delay (up to 1.1µsec. with optional plug-ins); and the 8505, a field DA which combines long cable eq (up to 3000' of 8281) and a two speed clamp. The line also includes the 8520, a pulse DA.

The 8551 is a high performance voltage-mode audio DA. It has an active, balanced Hi-Z input (input Z > 40K ohms) and six active, balanced Lo-Z outputs (output Z > 50 ohms). The 8551 will accommodate signal levels to + 24dBu; SNR is > 110dB.

The 8560 Stereo Audio Distribution System is a series of audio distribution amplifiers. Each amplifier handles two channels of audio, manipulated by a single gain control and a balance trim.

A two-rack unit frame of the 8560 Series houses up to four DAs, a meter board and power supplies. The meter board, with PPM and VU ballistics, allows monitoring of all DA inputs and outputs.

## 8500 Series

Model	Description	Price
8501	Video DA	\$160.00
8502	VDA with variable cable EQ (for 8281-type cables)	.260.00
8502-598	VDA with variable cable EQ (for "RG-59B/U" cable)	.260.00
8502-59	VDA with variable cable EQ (for "RG-59/U" cable)	.260.00
8502-SPL	VDA with variable cable EQ (for special cable types: 8500-EQ network required)	.260.00
8500-EQ	Custom equalizer network for special cable types (cable technical data required; contact factory for further information)	
	Setup charge	.125.00
	Unit price	.75.00
8503	VDA with step/vernier EQ (for 8281-type cables)	.375.00
8503-598	VDA with step/vernier EQ (for "RG-59B/U" cable)	.375.00
8503-59	VDA with step/vernier EQ (for "RG-59/U" cable)	.375.00
8504	Delay DA (with cable EQ for 8281-type cables)	.475.00
8504-598	Delay DA (with cable EQ for "RG-59B/U" cable)	.475.00
8504-59	Delay DA (with cable EQ for "RG-59/U" cable)	.475.00
8504-D300	300ns Delay submodule	.200.00
8504-D500	500ns Delay submodule	.250.00
8504-D800	800ns Delay submodule	.275.00
8505	Field VDA (with cable EQ for 8281-type cables)	.595.00
8505-59	Field VDA (with cable EQ for "RG-59/U" cable)	.595.00
8505-11	Field VDA (with cable EQ for "RG-11/U" cable)	.595.00
8506	Clamp VDA (with cable EQ for 8281-type cables)	.425.00
8506-598	Clamp VDA (with cable EQ for "RG-59B/U" cable)	.425.00
8506-SPL	Clamp VDA (for special cable types: 8500 EQ network req.)	.425.00
8510R	Remotely-controlled VDA (with cable EQ for 8281-type cable)	.525.00
8510R-598	Remotely-controlled VDA (with cable EQ for "RG-59B/U" cable)	.525.00
8510R-59	Remotely-controlled VDA (with cable EQ for "RG-59/U" cable)	.525.00

8560 Series

Model	Description	Price
8520	Pulse DA	\$ 250.00
8520-8281	Pulse DA with 8281 EQ	.375.00
8520-598	Pulse DA with "RG-59B/U" EQ	.375.00
8520-R	Pulse DA with regenerator	.350.00
8520-EQ1	8281 EQ submodule only	.125.00
8520-EQ2	"RG-59B/U" EQ submodule only	.125.00
8520-RGEN	Pulse regen. submodule only	.100.00
NOTE:	Loss characteristics vary considerably among cables with "RG-xx" designations. EQ networks on 8500 Series VDA's are optimized for the following specific cables:	
	"RG-59B/U": Belden 8263	
	"RG-59U": Belden 9259	
	"RG-11/U": Belden 8238	
	Exact loss curves are available upon request.	
8500T1-120	1 RU video tray with 120V PS (holds 4 DA's)	.650.00
8500T1-240	1 RU video tray with 240V PS (holds 4 DA's)	.650.00
8500T2-120	2 RU video tray with 120V PS (holds 8 DA's)	.795.00
8500T2-240	2 RU video tray with 240V PS (holds 8 DA's)	.795.00
8500T2R-120	2 RU video tray with 120V PS (holds 8 standard or remotely-controlled DA's)	.895.00
8500T2R-240	2 RU video tray with 240V PS (holds 8 standard or remotely-controlled DA's)	.895.00
8500PS-120	Backup PS for 8500T2-120 or 8500T2R-120	.250.00
8500PS-240	Backup PS for 8500T2-240 or 8500T2R-240	.250.00
8500EX	Extender card	.75.00
<b>AUDIO DISTRIBUTION EQUIPMENT</b>		
8551	Audio DA	\$ 250.00
8552R	Remotely-controlled Audio DA	.375.00
8553	Audio tone generator	.325.00
8550T1-120	1 RU audio tray with 120V PS (holds 4 DA's)	.725.00
8550T1-240	1 RU audio tray with 240V PS (holds 4 DA's)	.725.00
8550T2-120	2 RU audio tray with 120V PS (holds 8 DA's)	.895.00
8550T2-240	2 RU audio tray with 240V PS (holds 8 DA's)	.895.00
8550T2T-120	2 RU audio tray with taper pin connectors and 120V PS (holds 8 DA's)	.1475.00
8550T2T-240	2 RU audio tray with taper pin connectors and 240V PS (holds 8 DA's)	.1475.00
8550PS-120	Backup PS for 8550T2-120 or 8550T2T-120	.365.00
8550PS-240	Backup PS for 8550T2-240 or 8550T2T-240	.365.00
<b>STEREO AUDIO DISTRIBUTION EQUIPMENT</b>		
8561	Stereo audio distribution amp	\$495.00
8561-CS	Stereo ADA with channel switching	.620.00
8561-PCS	Stereo ADA with phase adjustable channel switch	.695.00
8561-RG	Stereo ADA with remote gain control	.695.00
8561SM-CS	Channel switching submodule	.125.00
8561SM-PCS	Phase adjustable, channel switch submodule	.200.00
8561SM-RG	Remote gain control submodule	.200.00
8562	Stereo audio metering module	.995.00
8560T2-120	2 RU (4 cell) tray with 120V PS	.995.00
8560T2-240	2 RU (4 cell) tray with 240V PS	.995.00
8560EX	Module extender	.125.00

# ROUTING SWITCHERS

TEN-XL

## TEN-XL 10 x 1 Routing Switcher

- Breakaway stereo audio comes with every unit
- Both local and remote control panels are available
- Binary control system
- Differential inputs for both video and audio
- Video inputs are DC restored and switching is done in the vertical interval line (line 10)
- Built-in expansion capability lets the TEN-XL be a 19 x 1, 28 x 1 or more
- 12-hour minimum crosspoint memory in case of power failure

The TEN-XL encompasses video, stereo audio, optional RS422/232 serial interface module, relay module, and dual power supply, all in a one rack unit frame.

TEN-XT

## TEN-XT Monitoring Station

- Combines the capabilities of the TEN-XL with the Tektronix 1740 or 1750, as well as the 528 and 1420 waveform/vector monitors.

## TEN-XTM Routing Switcher

- Designed to reside in a half-rack frame next to waveform and vector displays
- Incorporates all the features of the TEN-XT plus providing audio VU/Peak metering along with a built-in audio monitor/speaker combination
- Stereo audio monitoring is available via a front panel headphone jack
- Audio metering can be set to provide VU, Peak power, or both

TEN-XTM

All TEN-XL options can be used including serial interface, tally relay matrix, dual power supplies and the widest variety of useful remote control panels.

## TEN-XL and TEN-XT Routing Switchers Complete Units

TEN-XL	10 x 1 video/stereo audio switcher with local control panel . . . . .	\$1495.00
TEN-XLV	10 x 1 video only switcher with local control panel . . . . .	1195.00
TEN-XLVA1	10 x 1 video/single audio switcher with local control panel . . . . .	1345.00
TEN-XLRC	10 x 1 video/stereo audio switcher for remote control use (does not include remote control panel) . . . . .	1460.00
TEN-XLRCV	10 x 1 video only switcher for remote control use (does not include remote control panel) . . . . .	1160.00
TEN-XLRCA1	10 x 1 video/single audio switcher for remote control use (does not include remote control panel) . . . . .	1310.00
TEN-XLA	10 x 1 stereo audio switcher with local control panel . . . . .	1270.00
TEN-XLA1	10 x 1 single audio switcher with local control panel . . . . .	1120.00
TEN-XLARC	10 x 1 stereo audio switcher for remote control use (does not include remote control panel) . . . . .	1235.00
TEN-XLA1RC	10 x 1 single audio switcher for remote control use (does not include remote control panel) . . . . .	1085.00
TEN-XLCV	10 x 1 component video/stereo audio switcher with local control panel . . . . .	3950.00
TEN-XLCV-V	10 x 1 component video only switcher with local control panel . . . . .	3650.00
TEN-XLCVA1	10 x 1 component video/single audio switcher with local control panel . . . . .	3800.00
TEN-XT	10 x 1 video/stereo audio switcher for half rackmount with local control panel . . . . .	1650.00
TEN-XTV	10 x 1 video only switcher for half rackmount with local control panel . . . . .	1350.00
TEN-XTA1	10 x 1 video/single audio switcher for half rackmount with local control panel . . . . .	1500.00
TEN-XTM	10 x 1 video/stereo audio switcher for half rackmount with VU/peak meters and audio monitor . . . . .	2100.00

(For 220/240V operation add -2 to model number)

## Control Panel Options

TNX-RCP	Standard breakaway remote control panel . . . . .	\$ 150.00
TNX-CPL	Standard breakaway local control panel . . . . .	200.00
TNX-SMP	3" x 4" AFV escutcheon mount control panel . . . . .	525.00
TNX-AFV	AFV remote control panel with relegendable buttons . . . . .	525.00
TNX-2AFV	AFV dual remote control panel with relegendable buttons . . . . .	1050.00
TNX-AFV19	10 x 1 AFV remote control panel with relegendable buttons . . . . .	1050.00
TNX-TCP	Remote control panel, 3 RU half-rack . . . . .	200.00
TNX-SCP	Serial breakaway control panel . . . . .	1200.00

## Connector Kits/Cables

TNX-RCC	Remote control cable with connectors . . . . .	\$ 35.00 + 3.00/M
TNX-CON	Remote control connector kit . . . . .	25.00
TNX-ICC	Interconnect cable to Model 100 . . . . .	100.00
TNX-ICS	Interconnect cable to Model 300 . . . . .	100.00
TNX-IRS	RS-232 computer/terminal interface cable . . . . .	100.00
TNX-IEC	19 x 1 expansion cable . . . . .	100.00
TNX-CC8	RGB interconnect cable . . . . .	135.00
TNX-RYC	Remote control "Y" cable . . . . .	135.00
TNX-MIC	RS-232 modem I/F cable to TEN-XL . . . . .	100.00
TNX-CPS	Serial control panel interface cable . . . . .	135.00
TNX-CTM	RS-232 computer to modem cable . . . . .	100.00
TNX-AAD	Audio connector adaptor . . . . .	80.00
TNX-AIC	Audio interconnect cable (For TNX-AAD) . . . . .	60.00

## Options

TNX-RXP	Tally relay module . . . . .	\$ 125.00
TNX-SIO	RS-422/RS-232 serial interface module . . . . .	400.00
TNX-EXTV	Module extender, video . . . . .	350.00
TNX-EXTA	Module extender, audio . . . . .	165.00
<b>TNX-IES Input expansion hardware. (Includes cables and circuit board)</b>		
TNX-IES28	28 x 1 requires 3 TEN-XL's . . . . .	385.00
TNX-IES37	37 x 1 requires 4 TEN-XL's . . . . .	485.00
TNX-IES46	46 x 1 requires 5 TEN-XL's . . . . .	650.00
TNX-IES55	55 x 1 requires 6 TEN-XL's . . . . .	750.00
TNX-IES64	64 x 1 requires 7 TEN-XL's . . . . .	850.00
TNX-IES73	73 x 1 requires 8 TEN-XL's . . . . .	950.00
TNX-IES82	82 x 1 requires 9 TEN-XL's . . . . .	1050.00
TNX-IES91	91 x 1 requires 10 TEN-XL's . . . . .	1150.00
TNX-IES100	100 x 1 requires 11 TEN-XL's . . . . .	1250.00

## Spares/Replacements

TNX-VXP	Video crosspoint module . . . . .	\$575.00
TNX-AXP	Audio crosspoint module . . . . .	250.00
TNX-CTL	Control module (audio only) . . . . .	250.00
TNX-PSM	Power supply module . . . . .	185.00
TNX-8FC	Blank front cover for TEN-XL . . . . .	95.00
TNX-SPK	Spare parts kit . . . . .	150.00

# ROUTING SWITCHERS

## TEN-20™/20-TEN™ Compact Routing Switcher Systems

- TEN-20 switcher ten input-by-twenty output
- 20-TEN switcher twenty input-by-ten output
- 4-level control, with numerous matrices per level
- Control via twisted shielded pair cables, for simple and cost-effective installation
- PC boards remove from the front for easy access
- "PROTECT" and locked panel features, standard on all control panels, guard your destinations against unauthorized intervention
- All systems available in component as well as composite versions
- Battery protected RAM saves your data for as long as 30 days

Choose from these versatile panel configurations:

- 20 input button per source—controls any combination of four levels
- 10 input button per source—controls any combination of four levels
- 4-level X-Y—controls all inputs and destinations

Each switcher is contained in a single rack unit frame, with both video and audio matrices available. Either may be configured video only, audio only or video plus multiple audio. A component video version is also available.

TEN-20 and 20-TEN video and audio routers feature high density, multi-layer boards with excellent bandwidth and signal-to-noise ratio.

These single crosspoint modules give you increased reliability and full functionality.

Options include the flexibility of an RS232/RS422 serial interface and the extra reliability of dual power supplies.

### Video Performance Specifications

**Differential Gain:** 0.1% at 1V p-p output, 10-90% APL  
**Differential Phase:** 0.1° at 1V p-p output, 10-90% APL  
**Frequency Response:** ±0.1dB, 100kHz-5.5MHz  
 ±0.5dB, 5.5MHz-10MHz  
 30V/μsec

**Slew Rate:**  
**Total Delay (Typical):** 20ns

**Crosstalk (worst case; all inputs and outputs driven):**  
 -60dB at 5.0MHz  
 -50dB at 10.0MHz

**Signal-to-Noise Ratio:** 75dB, 5.0MHz low pass

### Audio Performance Specifications

**Crosstalk (rel to +24dBu) (Worst case, all inputs and outputs hostile and synchronous):**

20Hz-2kHz: 90dB  
 20Hz-20kHz: 80dB

**Frequency Response:** ±0.1dB: 20Hz-20kHz

**Total Harmonic Distortion:** 0.05% at +24dBu, 20Hz-20kHz

**Signal-to-Noise Ratio (ref. +24dBu):**  
 120dB: 20Hz-20kHz  
 110dB: 20Hz-80kHz

# ROUTING SWITCHERS/ DATA MATRICES

## HORIZON Routing Systems

HORIZON is designed as a versatile, affordable, high-performance audio/video distribution routing switcher suitable for a wide variety of applications including composite and component video, HDTV, stereo or even multiple audio, plus time code.

HORIZON is offered in a variety of frame sizes and configurations from 128 x 128 multi-level systems through 16 x 16 frames and all are intermixable. 64 x 64, 48 x 32, and 32 x 16 sizes provide intermediate steps; each size available with the number of modules to meet your needs. Plug-in modules transfer from frame to frame without causing downtime or system interruption.

### HX-16/HX-32

HX-16 and HX-32 are the most compact routing systems in the HORIZON family. Flexibility in control level selection makes HX-16 or HX-32 the ideal solution to component routing and stereo audio applications.

HX-16 or HX-32 frames may be used as part of larger HORIZON systems. So you can configure exactly the system you need.

Available in video and audio mixtures to suit your needs.

### HX-48

48 Input by 32 output video and audio capability are available in just 18 rack units—including power supplies. Also, space for optional dual power supplies and system controllers is part of this no-compromise, high efficiency package.

Despite its compact nature, video-to-audio crosstalk is not a consideration.

For multiple audio or component video applications, simple interlevel cable allows the HX-48 to drive one or more smaller systems. The same cable also allows you to use the HX-48 as part of a larger system.

Start with as few as 16 inputs by 16 outputs and build to frame capacity in 8 input/16 output steps. Available in video/video, video/audio and audio/audio frame capability.

### HX-64

Each HX-64 matrix may be structured up to 64 inputs by 64 outputs—with unlimited matrices in as many as four control levels. Each matrix is self-contained in an 18 rack-unit frame, including power supply, with space for an optional dual power supply and optional back-up controller.

The size of each matrix is fully independent from the rest of the system. Composite video matrices may be full size, for example, while audio and time code or component matrices are smaller.

### HX-128

The HX-128 is the largest member of the HORIZON family. Building block frames allow one-time system structuring for all your needs so you can grow at your own pace without retiming or rewiring.

Each matrix frame, video or audio, occupies just 12 rack units. Power for up to two matrix frames of the same type is supplied by a single 6 rack unit frame. As many as 128 inputs x 32 outputs are housed in 18 rack units. An extra-compact, 128 x 64 format is also available in 30 rack units, without adding extra frames for dual controllers or video/audio monitoring. Matrix frames may be stacked in 128 x 32, 128 x 64, 128 x 96 or 128 x 128 systems. Smaller matrices may be structured within each configuration.

You can expand your system and plug-in modules without system interruption.

### Options

- 35 standard control panels • Dual power options • Dual controller option without adding frames • On-line programmability and real time system diagnostics
- Unlimited RS-232/422 control capability with HX-GPI • Interface option, including output exclusion • E-MEM™ Interface, with full 4-level breakaway capability for GVG production switchers • Full-time, real time video status display
- Source tally for production/master control • Status displays for in-panel readout of HORIZON sources selected to GVG production or master control systems • Integrated machine control • RS-422 matrix

## Specifications

### VIDEO

Diff. Gain:	< 0.1% at 1V p-p out, 10%-90% APL
Diff. Phase:	< 0.1° at 1V p-p out, 10%-90% APL
Frequency Response:	± 0.15dB, 100kHz to 5.0MHz, +0.15, -0.5dB to 8MHz
2T Pulse/Bar Response:	Pulse 0.25%; Bar 0.25%, Pulse/Bar 0.25%
Tilt:	< 0.5%
X-Talk:	-60dB at 5MHz (all inputs hostile and synchronous)
SNR:	> 75dB

<b>Output Char.:</b>	One bal. output per bus, Z < 30 ohms
<b>Recommended Load:</b>	600 ohms or greater; 150 ohm available
<b>System Level:</b>	± 24dBu (12.28VRMS) max.
<b>Stereo Phase Acc.:</b>	< 0.72 = L to R diff. at 20kHz
<b>Gain:</b>	Unity, adj. ± 1.0dB

## HORIZON Data Matrices

HX-RS Data Matrices eliminate the complexity of data patching encountered when using sophisticated editing systems, graphics devices and VTRs.

Systems may be configured in sizes from 16 inputs x 16 outputs up to 64 x 64 and from 2-wire to 8-wire capability. The 64 x 32 4-wire size takes just 18 rack units of space and has the capacity to double in size with the addition of a simple 12 rack unit frame.

Reliable, low current relays switch bi-directional paths. Additional software allows the system to function traditionally or as an "exclusive" system, which allows any source to be taken to only one destination at a time.

HX-RS matrices may be used as stand-alone systems, or as one level in a larger HORIZON system. More than one HX-RS may also be used to simplify complicated intercom systems.

## Specifications

4 pole bi-directional switching	
9-pin "D" connectors for data paths, pin #9s at chassis ground	
<b>Max. End-to-End Resistance:</b>	2 ohms
<b>Max. Voltage Signal to Chassis:</b>	100V
<b>Max. Contact Current:</b>	1A
<b>Operate Time:</b>	< 20µs
<b>Release Time:</b>	< 10µs

# COMPONENT VIDEO TERMINAL EQUIPMENT

## CV-20 Series Component Video Terminal Equipment

The CV-20 Series is a growing family of products providing component video system designers with signal generation and format conversion capability.

Whether the need is conversion between various component formats or conversion between the composite and component world, the CV-20 Series is an economical solution.

### CV-11/85 Translator

The CV-11/85 Translator is a simplified version of the CV-21. It may be used in any application where "straight through" conversion from Y, R-Y, B-Y to RGB is required, such as displaying the component output of a Betacam\* system on an RGB monitor. The CV-11/85 is designed to mount in a standard 8500 Series video DA tray, and may be used in conjunction with 8500 Series amplifiers to provide multiple RGB feeds.

### Specifications

**Inputs:** Y, R-Y, B-Y (75 ohms terminating)  
 Y = 1V p-p including sync; R-Y, B-Y =  $\pm 350\text{mV}$  (75% saturation)

**Outputs:** RGB (one each)

**Frequency Response:**  $\pm 0.2\text{dB}$  to 6MHz

**Gain Adjust:** Unity  $\pm 1\text{dB}$

CV-11/85 Y, R-Y, B-Y to RGB translator (mounts in 8500 Series DA tray) . . . . . \$385.00

### CV-21 Translator

The CV-21 converts Betacam or SMPTE standard Y, R-Y, B-Y signals to RGB. The CV-21 features full blanking processing which enables the user to delete sync on the RGB outputs, if desired, and to compensate for setup on the Y input signal.

### Specifications

**Inputs:** Y, R-Y, B-Y (75 ohms terminating)  
 Y = 1V p-p including sync; R-Y, B-Y =  $\pm 350\text{mV}$  (75% saturation)

**Outputs:** RGB (two each); Y

**Frequency Response:**  $\pm 0.2\text{dB}$  to 6MHz

**Gain Adjust:** Unity  $\pm 1\text{dB}$

**Setup Adjust:**  $\pm 15\text{ IRE}$

CV-21 Y, R-Y, B-Y to RGB translator (mounts in CV-20T tray) . . . . . \$995.00

### CV-22 Translator

The CV-22 converts RGB signals to Betacam or SMPTE standard Y, R-Y, B-Y. Full blanking processing and sync add/delete capability is provided to accommodate the large degree of variability which exists in RGB environments.

### Specifications

**Inputs:** RGB (75 ohms terminating) 700mV video with or without sync.  
 Sync/color black (looping) required if input video is non-composite

**Outputs:** Y (three); R-Y, B-Y (two each); Y = 1V p-p including sync; R-Y, B-Y =  $\pm 350\text{mV}$  (75% saturation)

**Frequency Response:**  $\pm 0.2\text{dB}$  to 6MHz

**Gain Adjust:** Unity  $\pm 2.5\text{dB}$

**Setup Adjust:** 0 to + 10 IRE

CV-22 RGB to Y, R-Y, B-Y translator (mounts in CV-20T tray) . . . . . \$995.00

### CV-23 Color Bar Generator

The CV-23 is a component color bar generator which generates full-field color bars in both RGB and Y, R-Y, B-Y formats. It requires comp sync or color black as a timing reference and is capable of operating in either 525/60 or 625/50 systems.

### Specifications

**Output Signal:** Full field color bars switch selectable to 75% or 100% saturation

**Outputs:** One set each RGB and Y, R-Y, B-Y

**Reference Input:** Composite sync or color black

**Timing Adjust:** Output timing may be adjusted to  $\pm 2\mu\text{s}$  with respect to the input timing reference

CV-23 Component color bar generator (mounts in CV-20T tray) . . . . \$1195.00

CV-20

### CV-24N NTSC Decoder

The CV-24N is a variable-Q notch filter design. Front panel controls are provided for input level, setup adjust, chroma phase and chroma gain. The output matrix may be strapped to provide RGB, Betacam, SMPTE, or YIQ outputs.

### Specifications

**Input:** NTSC video (75 ohms terminating), 1V p-p nominal, adjustable  $\pm 3\text{dB}$

**Outputs:** Two sets, strappable to any one of the following: RGB (700mV video/300mV sync); SMPTE-standard Y, R-Y, B-Y; Betacam; or YIQ

**Luminance Bandwidth:** DC to 6MHz  $\pm 0.2\text{dB}$  with 3.58MHz notched out to approximately -30dB

**S/N Ratio:**  $> 60\text{dB}$  (6MHz bandwidth)

**Propagation Delay:** Approximately 850ns

CV-24N NTSC Decoder (mounts in CV-20T tray) . . . . . \$1500.00

### CV-25N NTSC Encoder

The CV-25N produces high quality NTSC video (2 outputs) from composite or non-composite RGB. The CV-25N has a unique, onboard pulse regenerator which derives blanking from input sync, eliminating the need for separate blanking input, sync timing on the output may also be adjusted. An alignment test generator is also included.

### Specifications

**Inputs:** Number and Type: One each R, G, B video (internally terminated), sync, subcarrier (looping)  
 Levels: 700mV RGB video with or without sync, with  $\pm 1\text{dB}$  gain trim; 4V p-p sync  $\pm 6\text{dB}$ ; 2V p-p SC,  $\pm 6\text{dB}$ ; 2V p-p SC,  $\pm 6\text{dB}$   
 CMRR (RGB inputs):  $> 40\text{dB}$  at 60Hz  
 (75 ohm source terminated) Number and Type: Two each NTSC composite video; Level: 1V p-p nominal (714mV video, 286mV sync and burst)

**Outputs:** (75 ohm source terminated) Number and Type: Two each NTSC composite video; Level: 1V p-p nominal (714mV video, 286mV sync and burst)

**Frequency Response:**  $\pm 0.2\text{dB}$  to 5MHz (luminance)

**Black/White Balance:**  $< 0.5\text{ IRE}$  residual subcarrier

**I/Q Quadrature:**  $> 0.5^\circ$  of subcarrier

**Electrical Length:** 810ns  $\pm 40\text{ns}$  (RGB in NTSC out)

**Adjustments:** (Card Edge) H Phase, Fine Chroma Phase, Test Mode Enable, Green Tie Enable, I Black Balance, Q Black Balance, Setup

**Mounting:** Fits in CV-20T tray

**Power:** Provided by CV-20PS power supply

CV-25N NTSC Encoder (mounts in CV-20T tray) . . . . . \$1500.00

### CV-20 Tray

The CV-20T tray is a 2RU tray which will accept up to four CV-20 Series modules in any mix. It comes with one power supply; a second (backup) supply and module extender are available as options.

CV-20T 2RU tray with power supply (holds up to 4 CV-20 series modules) . . . . . \$895.00

CV-20PS Backup power supply for CV-20 tray . . . . . \$245.00

CV-20EXT Module extender for CV-20 series modules . . . . . \$110.00

\*Betacam is a trademark of Sony Corporation.

# SMPTE EDIT CODE PRODUCTS

## DR-107B SMPTE Data Receiver and Character Generator

The DR-107B offers an unusual number of capabilities in a minimum space at an economy price. All controls are on the front panel. In addition, there are internal selectors for drop frame status on the monitor, choice of monitor up-date change, and free running of time in the absence of code.

Reads and displays SMPTE, EBU or 24 frame time code or user bits on video monitors. Has restored output for dubbing.

Character heights may be varied from 8 to 64 lines in four increments, and the widths may be adjusted to the preferred aspect ratio. The characters may be plain or boxed. Characters may be inserted in the vertical interval, offering greater versatility to recording or transferring of tapes. Lines 12 through 19 are used in the vertical interval mode so no interference will occur. Size: 1<sup>3</sup>/<sub>4</sub>" high; standard 19" relay panel x 9<sup>1</sup>/<sub>2</sub>" deep excluding plugs.

DR-107B .....\$2795.00

## DT-113 SMPTE Time Code Transmitter

SMPTE edit code is generated from a master clock which may be selected for drop frame count by a front panel switch. Transmits code at 30, 25, or 24 frame counts, color frame sync mode. User bits may be inserted from a parallel 32 line input. Time or user bits can be displayed on an 8-digit hexadecimal readout. The master clock may be reset or loaded to a time on an 8-digit thumbwheel switch. The clock can be stopped by a hold button. The clock and transmitted code can be synchronized to the 60Hz line or to video/sync frames. Code start is within the ANSI spec. (1 H-line in the vertical interval). The clock can be synchronized to the color burst phase for odd or even frame count when the sub-carrier is in phase. Size: 1<sup>3</sup>/<sub>4</sub>" high; standard 19" relay panel x 9<sup>1</sup>/<sub>2</sub>" deep excluding plugs.

DT-113 .....\$2995.00

## Code Readers and Video Character Generators

DR-103A Data Receiver and Character Generator. Reads and displays edit code and equivalent film-frames on video monitor and has three switchable code inputs . . . \$4550.00

DR-115 Data Receiver and 4 Channel Character Generator. Provides four separate video character displays from one edit code input for Iso-Camera productions. . . . .4250.00

DR-120 Data Receiver, Character Generator, Identifier, and Demultiplexer. Reads and displays time code, multiplexed user bits, and video source identification on video monitors. . . . .3150.00

DR-122 Data Receiver and Dual Character Generator. Allows simultaneous video displays of both time code and user bits with video source identification capability and complete independent adjustment of character positioning. . . . .4450.00

## Code Readers and Local Displays

DR-109B Data Receiver, Display and Demultiplexer. Reads and displays time code or multiplexed user bits on an 8-digit hex readout. Has dub output . . . . . \$2795.00

DR-109P EBU version of DR-109B . . . . .2795.00

TBC-117 Edit Code Time-Base Corrector. Converts wide-band erratic code input to a truly regenerated "ANSI" spec code output. Used for dubbing and distribution . . . . .3900.00

TCR-119 Time Character Reader. Reads the video characters generated by a Gray DR-107, DR-115, DR-120, or DR-122 from freeze to play speed and converts to longitudinal time code output for automatic computer editing . . .3950.00

## Special Equipment

ACO-238 Automatic Change-Over. With inputs from two independent SMPTE time code generators, this unit will automatically sense failure of one generator unit and switch to the other to allow resumption of code output . . . \$5750.00

DT-113

DR-107B

## Code Comparator

CC-114 Code Comparator. Compares a preset time with an incoming time code to produce an editing signal on coincidence. Must be used with a Gray time code reader. . . . . \$2330.00

CC-114A Reader Code Comparator. Same as CC-114 except unit incorporates a wideband reader. . . . .2750.00

## Code Generators

DT-104F Data Transmitter. Transmits code at 30, 25, or 24 frames/sec., has advanced slave decoding, color frame sync, a variable code simulator/generator, NTSC/PAL compatibility, field or frame rate time code selection plus many more functions . . . . . \$5950.00

DT-213 Data Transmitter and Character Generator. Transmits code at 30, 25, or 24 frames/sec., color frame sync mode in either frame or field rate time code. Sets and displays time code, and user bits in hex format. Slaves to incoming code and has a built-in character generator for both time code and user bits . . . . . \$3495.00

DTG-236 Dual Time Code Generator. Transmits two separate SMPTE format codes: 24 frames/sec. and 30 frames/sec. The two codes have a synchronous start every five frames on the 30 frame code. . . . .5750.00

## User Bit Equipment

MC-110 User Bit Modifier and Combiner. Combines time codes serially from two independent sources using user bits for the second time code . . . . . \$2595.00

MD-111 User Bit Modifier, Display and Demultiplexer. Modifies multiplexed user bits on incoming edit code from a 32 line parallel input . . . . .3295.00

UBE-118A User Bit Encoder. A 10 channel multiplexer that encodes user bits from parallel inputs. Encoder for VID-225, DT-104F, DT-113, DT-113P, or MD-111. A real time clock is provided for insertion into one channel of user bits. . . . . \$2550.00

## Safe Area Generators

VR-116 Video Reticle Generator. Allows precise positioning of titles and graphics from dead center to the edge of the vertical and horizontal blanking . . . . . \$2595.00

VR-216P PAL version of VR-116. . . . .2995.00

VR-121 Video Reticle Generator. Similar to VR-116 with the addition of monitor linearity check, variable reticle size and position with memory and recall and a keying switch to set the reticle areas from white to black . . . . .3950.00

## Code Phase Measurement Equipment

CPI-123 Code Phase Indicator. Measures and displays the phase difference between an actual code frame start on VTR versus ANSI spec to determine computer compatibility. . . . . \$2100.00

TCA-143 Time Code Analyzer. Measures, displays, and corrects the phase difference between the cue-track frame code and the video to allow computer acceptance. It also displays the code level and indicates phase error, bit count, sync word, and count error faults with memory. . . . . \$2595.00

## CPC-700 Series Code Phase Corrector

The CPC-700 Series equipment measures the difference between the actual SMPTE code start and the ANSI specification, displays this difference, re-phases and re-transmits the corrected code to specification and computer acceptance. This equipment will also correct drifting or unlocked time code caused when the video is recorded to a different sync source than the longitudinal code.

The basic 700 series rack comes equipped with the power supply module pair 701-1/701-2 and the frame pulse generator module pair 702-1/702-2. Space in the rack is provided for one or more code phase corrector module pairs 703-1/703-2. One of these pairs is required for each playback VTR machine in the edit bay.

**CPC-700** . . . . . \$1395.00  
**703-1** Code phase corrector module . . . . . pair/995.00  
**703-2** Code input-output rear module . . . . . pair/995.00

## VID-225 Vertical Interval Decoder

The VID-225 is a microprocessor based instrument which performs a dual function by decoding both an incoming Longitudinal Time Code (LTC) on a cue track and a Vertical Interval Time Code (VITC) present on a composite video signal.

A SMPTE longitudinal code is outputted at a rate proportional to either input. This allows the VITC input to be used from freeze frame to full wind speed and be automatically interfaced to most existing edit controllers, code readers/character generators, and other equipment that requires proportional LTC into their inputs.

The longitudinal decoder incorporates "The McFadin Window"® with wide range digital decoding from 1/100 to 100 times the VTR play speed. (Machine dependent).

Selection of the two codes can be automatic or manual, allowing the maximum advantage of both codes in various editing situations. At tape speeds below 1/4 play speed, the unit outputs longitudinal data at a 1/4 rate when VITC is present, and will squelch if an absence of time code is required by the edit controller when the tape is stopped.

Demultiplexing circuitry is provided to decode the display user bits that have been encoded using a time code generator in conjunction with the UBE-118A, FCM-227A or similar multiplexing devices.

The eleven position thumbwheel is used to instruct the demultiplexing circuitry which one of the ten frames of data to display, or to display all frames. This multiplexing scheme allows 10 times the normal 32 bits to be encoded.

The VITC data is extracted from the incoming video, and made available for use in re-encoding with other video equipment such as the DSI-126, in an editing room environment.

**VID-225** . . . . . \$3950.00

**UBE-118A** User Bit Encoder. A 10 channel multiplexer that encodes user bits from parallel inputs. A real time clock is provided for insertion into one channel of user bits . . . \$2550.00

**DSI-126A** Data Selector and Inserter. Accepts up to eight channels of serial VITC data from VID-225's and selects one of these channels by tally information from a video switcher, to modulate the composite video with VITC information . . . . . \$2595.00

**FCM-227A** Film Counter, Multiplexer, and Character Generator. With tach and 3/2 inputs from a telecine system, an ASCII RS-232 terminal that provides scene, take, and reel information and a DT-104F SMPTE edit code generator that provides field rate time code, this unit will output vertical interval time code containing this data for inserting on one or more video lines. It will also output encoded parallel user bits to the SMPTE edit code generator. A character generator is included, which displays time code, user bits, and the multiplexed scene, take, and reel information . . . . . \$4950.00

CPC-700

VID-225

VIE-224

**DET-129** Data Entry Terminal. Provides data entry of edge numbers/starting footage count, scene, take, and reel numbers into the FCM-227A film counter/multiplexer . . . . . \$5450.00

**FC-142** Film Counter and Character Generator. Counts film feet and frames from a film projector or Telecine to precisely identify all film frames in a 3/2 scan transfer by inserting information in a window dub for viewing with complete video field accuracy. The information displayed can be feet and frames or edge numbers and frames for 16mm or 35mm . . . . . \$2995.00

## VIE-224 Vertical Interval Encoder

The VIE-224 modulates a composite video signal with VITC from an external incoming SMPTE LTC. A front panel display presents the time code or user bits by selection from a panel switch.

This unit is particularly useful when a facility that has a SMPTE LTC generator needs to encode video tapes with VITC. It is also useful when converting tapes with LTC to VITC for editing precision or freeing an audio track for stereo.

The incoming time code is updated before modulating the video to maintain real time. The user bits may be updated by a front panel switch whenever a secondary time code is transmitted in the user bits.

The incoming SMPTE longitudinal code is demodulated by a wide band decoder incorporating The McFadin Window and processed through microprocessor-based circuitry to provide time base correction. This assures that the same data is encoded on both fields of each TV frame, regardless of incoming edit code speed or phase.

VITC transmission can be programmed to modulate on any combination of vertical interval lines from 10 through 20 on either or both fields. Any signal that is on a selected line is erased before the VITC is encoded.

**VIE-224** . . . . . \$3450.00

# HAMEG, INC.

# OSCILLOSCOPES

## HM203-6 20MHz Standard Oscilloscope

• Y: 2 channels, DC-20MHz, max. sensitivity 2mV/div. • X 0.2s-20ns/div incl. 10X magnification. Component tester • Triggering DC up to 40MHz • Active TV-sync-separator

The HM203-6 is an excellent oscilloscope. Both vertical amplifiers incorporate variable gain controls and maximum input sensitivity is 2mV/div. over the full bandwidth of the oscilloscope. A further feature permits display of the sum and difference of two signals.

Triggering facilities have also been extended. In addition to line and TV triggering, HF and DC triggering is possible. The HM203-6 will trigger reliably with a 0.5 div. display height up to at least 40MHz. Using the manual level control combined with the variable hold-off control, even relatively complex signals can be stably triggered. The time resolution has now been increased to max. 20ns/div including 10X magnification.

An 8x10 cm internal graticule permits parallax-free viewing over a wide angle. The effect of the earth's magnetic field upon horizontal trace position can be compensated for, externally, with a trace rotation control.

The HM203-6 has a built-in component tester, which is particularly useful in maintenance and service work. Among other applications, this device enables rapid in-circuit testing of semiconductors. Test voltage and current are rated so that normal semiconductors or other components cannot be damaged. Test results are displayed on the scope screen.

The HM203-6 was designed for general purpose applications in industry and service. Its many operating modes, front panel layout, and ease of operation also make it an ideal oscilloscope for training engineers and technicians.

**HM203-6 . . . . . \$590.00**

## HM205-2 20MHz Digital Storage Oscilloscope

• Y: 2xDC-20MHz, max. 2mV/div. • X: 0.2s-20ns/div. (Mag. 10X incl.) • Triggering: from DC up to 40 MHz

This HM205-2 combines a general purpose oscilloscope with a digitizing oscilloscope. In addition to its feature-packed analog operating modes, it provides very practical digitized waveform processing for signals and events with 5MS/s digitizing rate and dual channel acquisition. An 8-bit vertical resolution digital storage 1K record length per channel are great enough to store and display even the most minute waveform details. A dot join feature improves waveform recognition by linear interpolation between the sample points. X-Y plotter output for Hameg Graphic-plotter is standard. The HM205 also offers an active TV sync separator, jitterless triggering up to at least 40MHz, hold-off control, X-Y mode, Y-output and a built-in component tester. The IEEE-488 bus interface is optional.

**HM205-2 . . . . . \$888.00**

## HM604 60MHz Multifunction Oscilloscope

• Y: 2 channels, DC-60MHz, max. 1mV/cm, delay line • X: 2.5s/cm-5ns/cm incl. 10X magnification, delayed sweep • triggering up to 80MHz • Var. hold-off time • Component tester.

The HM604 is a truly versatile scope satisfying a wide variety of exacting requirements in laboratory, production, and service. The maximum input sensitivity of 1mV/div. facilitates the display of extremely low-level signals. Despite their high sensitivity, the HM604's vertical amplifiers are of excellent stability and low drift design with not more than 1% overshoot.

The built-in delay line permits viewing of the trigger edge at all times. The overscan feature indicates if any part of the trace passes the vertical limits of the CRT screen. An analog Y-output, switchable to Channel I or II, allows further processing of the signal.

Reliable triggering is ensured up to at least 80MHz, and trigger facilities include vertical mode alternate triggering, line trigger and single sweep operation. Other trigger features are variable hold-off time. RF-and LF-filters at any sweep speed for TV frame and line displays, as well as normal and automatic peak-value triggering. An LED indicates when the sweep is triggered. Sweep ranges from 5ns/div. to 2.5s/div. ensure optimum resolution of slow and fast signals. The variable sweep delay facility enables any section of the waveform to be expanded by 1000 and more for detailed signal analysis. A rectangular 14kV CRT with illuminated graticule provides exceptionally bright and sharp displays.

A special feature for scopes in this price range is the built-in switchable 1kHz/1MHz squarewave generator providing 0.2V and 2V calibration signals with a risetime < 5ns. It is now possible to self-test instantly the transient response of the vertical amplifiers and compensation of modular attenuation probes for utilization of the full bandwidth of scope and probe.

A component tester is also incorporated. The HM604's outstanding price performance capability is not likely to be matched by similar products in the near future.

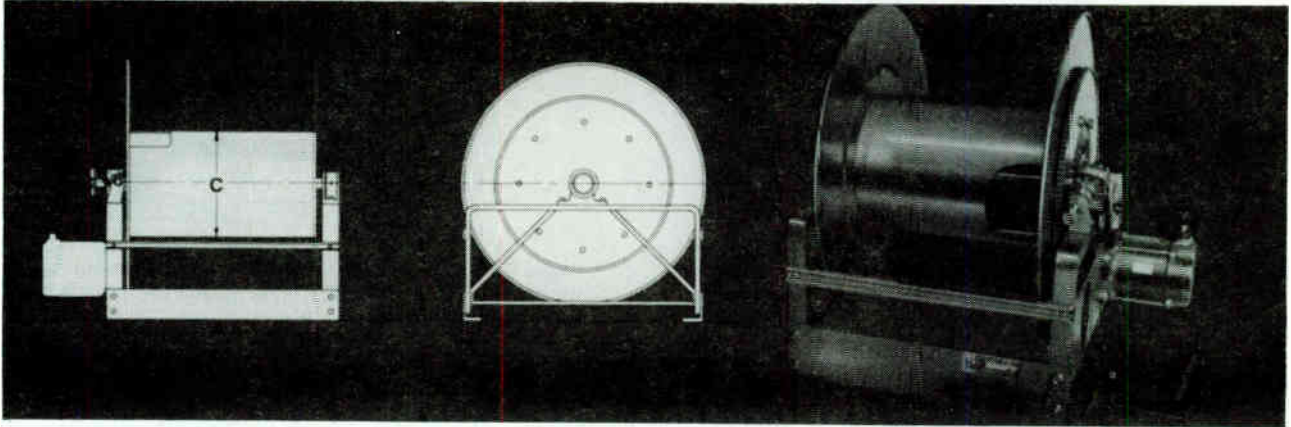

**HM604 . . . . . \$888.00**

**SERIES C Manual and Power Rewind Reels for Cable Storage**

These heavy-duty reels are designed for storage of all types of electric cable. A 4 1/2" x 5 1/2" opening in the drum permits end of cable to be inserted to initiate winding.

**Rewind:** Choose gear-drive crank rewind, or chain and sprocket drive powered by AC or DC electric motor, compressed air motor or hydraulic motor.

**Options:** Upon request, reels can be supplied with "B" dimension other than shown and with disc sizes ("E" dimension) in other diameters.

Divider discs, can be placed at almost any point on the drum you specify. Specify spacing of discs on your order.

A 15 1/2" diameter drum, in place of the standard to accommodate a bending radius of 7 3/4" or less, is available on all models. With this option the reel cable capacity is reduced.

**To Order:** Specify complete model number and include proper prefix for rewind wanted. Specify size, length, type and weight of cable. Specify AC or DC voltage and phase for electric rewind models. Specify standard or 15 1/2" diameter drum. Give spacing for divider discs, if required. Indicate how reel will be installed and used.

**Note:** Be sure to specify all options you require when ordering.

## REELS

### Series C-3200

Series C-3200 reels are designed for storage of long lengths of electric cable. A 4 1/2" x 5 1/2" opening in the reel drum is provided for insertion of the cable to initiate winding. Equipped with a spring-actuated pin lock.

**Rewind:** Direct crank rewind. Crank attaches to reel axle and is removable.

**Options:** Upon request, reels can be supplied with "B" dimension other than shown and with disc sizes ("E" dimension) in other diameters.

Divider discs can be placed at almost any point on the drum you specify. Specify spacing of discs on your order.

### Series C-1500

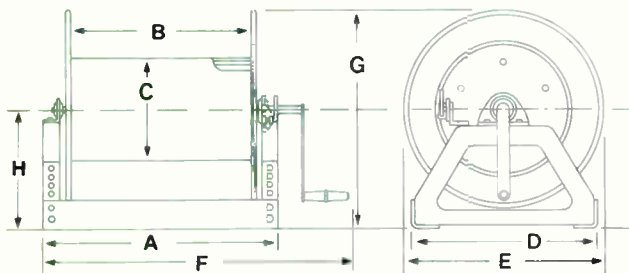

Series C-1500 reels are designed for storage of shorter lengths of electric cable. A 1" x 1 3/4" opening in the reel drum is provided for insertion of the cable to initiate winding.

**Rewind:** Direct crank, permanently attached to axle, is standard. Also available with chain and sprocket rewind, powered by 12VDC or 110/120V, single phase, AC electric rewind motor.

**Options:** Upon request, reels can be supplied with "B" dimension other than shown.

Divider discs can be placed at almost any point on the drum you specify. Specify spacing of discs on your order.

The standard color for these series is dark blue.

#### POWER REWIND OPTION

The frame design on the C-3200/C-1500 Series enables us to offer it with a chain and sprocket drive powered by a 12-volt non-explosion-proof electric motor or air motor.

**NOTE:** Weights and dimensions shown in the chart are for crank rewind models. **ADD** these weights for power rewind models:

## REELS

### PORTABLE REELS

#### Series 1900 Portable Manual Rewind Reel

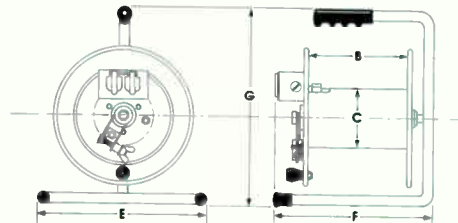

A rugged, lightweight portable reel for handling electric cord. Steel carrying handle and rewind knob are permanently attached. Rubber pads in base plates provide firm footing. Receptacle box is fitted with a strain-relief elbow for the feed line and a weather-resistant cover plate with

spring-actuated caps to protect the outlets. A duplex receptacle for 3-prong plugs is standard. A duplex twist-lock receptacle is available at no extra cost, when specified. Or, you may order a hybrid set-up with one of each.

### PORTABLE WIRED CABLE REELS

#### LC16-10-11 To Handle Wired Electrical Cable.

The LC16-10-11 portable wired cable reel is a compact, lightweight and durable unit designed to handle long lengths of **wired** electrical cable. The LC16-10-11 reel has a waterproof, covered duplex receptacle for 3

pronged plugs and can be connected to up to 275' of 16/3 cable. (A twist-lock duplex receptacle is available at no additional cost when specified on order.) The reel is also outfitted with a spring drag device which is used to brake the reel.

The standard color for this model is red.

Prices and Specifications Subject to Change Without Notice.

## PORTABLE REELS

### SCR 10-17-19 Spring Rewind Reel

A compact, spring rewind reel to handle live 2 or 3-conductor cable. Rewind spring and collector rings are housed inside the drum. A 6-ft. power source lead of type SO cable, with 3-prong plug attached, is pre-wired to the reel. Wires from collector ring terminals extend

through grommets opening in the drum for accessibility. Available with pre-drilled mounting holes for permanent installation, or with steel carrying handle and rubber pads for portable use. 4-way rollers guide cable on and off reel.

Cable Capacity of Reel in Feet			Model Number	Reel Dimensions in Inches E, F and G are overall Dimensions						Approx. Wt. Lbs.

100	100	80	SCR10-17-19 W/O Handle	9¼	5	10½	18	11	17¼	38	46

To Order: Specify Model Number and indicate if reel is to be equipped with handle. Specify Gauge/No. of Conductors, length and type of cable for factory installation.

### CR-10-17-19 Crank Rewind Reel

Compact manual rewind reel to handle 2 or 3-conductor cable. Collector rings are housed inside the drum. Rewind knob is permanently attached to disc. A 6-ft. power source lead of type SO cable, with 3-prong plug attached, is pre-wired to the reel. Wires from collector ring terminals extend through grommets opening in the drum for accessibility. Available with pre-drilled mounting holes for permanent installation, or with steel carrying handle and rubber pads for portable use. 4-way rollers guide cable on and off reel.

# FRAME SYNCHRONIZERS

634

## HVS 634 Component RGB Frame Synchronizer

- Component RGB mode • Digital noise reduction • 3-cable or 4-cable RGB inputs • Freeze field or frame • Heterodyne time base corrector

The most recent synchronizer to join the Harris family—based on the reliable and proven HVS 632 synchronizer.

The 634 will synchronize and time base correct both Component RGB and Composite NTSC video sources, making it a versatile tool in most broadcast and production environments.

RGB component input capability, combined with DNR (Digital Noise Reducer) design makes the HVS 634 ideal for film to tape transfer applications.

Chrominance and luminance noise reduction is independently variable up to 10dB—without motion artifacts. RGB 3-cable (sync on Green) or 4-cable (separate black burst) operation is switch-selectable.

Full-bandwidth picture freeze increases production versatility by providing front panel selectable field or frame freeze. The 634 locks non-synchronous video sources—satellite, camera, studio feed, or heterodyne VTR—to station sync with precise accuracy. Hysteresis compensation is standard.

The component-coded architecture of the 634 results in a TBC that is inherently immune to color phasing problems and vertical or horizontal picture shift. The four-field NTSC color sequence is always correctly maintained.

**HVS 634 . . . . . \$28,000.00**

642

## HVS 642 Digital Frame Synchronizer

- High performance time base corrector • Exceptional noise immunity • Automatic noise reduction • High quality freeze field or frame • Audio synchronizer control • Separate, clean-switching TBC/synchronizer inputs • Full plug-in boards and power supply • Built-in diagnostic and troubleshooting aids • Optional full function remote

A proprietary input sync detection circuit maintains signal lock-up to 20dB in both synchronizer and TBC modes (patent pending). This feature enables the 642 to lock on noisy feeds, then reduce noise.

Smart Noise Reduction (SNR) provides true, automatic, frame recursive noise reduction up to 12dB. Depending on the amount of noise in the picture, noise reduction may be automatically switched off or reduced, to avoid the common motion artifacts from 3-dimensional filtering. (Patent pending).

The built-in Time Base Corrector (TBC) operates with any non-segmented, heterodyne 3/4" or 1/2" VTR that employs subcarrier feedback and advanced sync inputs. The TBC features picture-in-shuttle, slow motion for dynamic tracking VTR's, and dropout compensation (DOC) from RF or TTL signal.

The HVS 642 synchronizes a multitude of today's remote feeds, including networks, satellites, microwave and cable systems. The 642 is equally at home timing and synchronizing internal video signals in your production and post-production studios.

**HVS 642 Basic . . . . . \$7,900.00**  
**HVS 642 With Freeze and SNR . . . . . 9,495.00**

Add-on Freeze and SNR . . . . . \$2,000.00  
Remote panel . . . . . 975.00  
BVU cable . . . . . 250.00

VW-3

## VW-3 TBC/Frame Synchronizer

- Exceptional degree of transparency in either TBC or synchronizer mode • Multiple source hot switching without video roll or breakup • Full frame "infinite window" TBC for direct or heterodyne signals. Superior time base corrector for 1", 3/4" and 1/2" format video tape machines • Electronic frame or field freeze for production applications • DOC: TTL or RF inputs • Velocity compensation in both direct and heterodyne TBC mode • Selectable freeze on loss of video—last good field or system black • High performance in a small package (only 1 3/4" high) • Remote control of all function switches, plus proc amp controls with presets • Match frame edit option

The VW-3 provides simultaneous time base correction and synchronization, making it possible to take random feeds from tape machines, microwave links, or satellites and "hot" switch them synchronously with program materials.

The VW-3 is a refinement in time base corrector/frame synchronizer technology. It is designed to provide the highest performance for a wide variety of time base correction and synchronization applications.

**Basic VW-3 . . . . . \$11,700.00**  
**VW-3 With Match Frame Edit option . . . . . 12,700.00**

# TIME BASE CORRECTORS/ DIGITAL STILL STORE

## Time Base Correctors

### HVS 560

- High performance at an economical price
- Versatile heterodyne TBC
- 8-bit component architecture with separate chroma and luminance processing
- 16-line correction window
- RF or TTL DOC

The HVS 560 is a practical and hard-working member of the signal processing family. The 560 (Vision) is an economical, wide-application heterodyne TBC that provides time base correction for all 1/2" and 3/4" non-segmented video tape recorders which accept advanced sync.

**HVS 560 . . . . . \$2,995.00**

### HVS 550VT

- Wideband subcarrier feedback mode
- Heterodyne process mode
- 8-bit, 4Xfsc architecture provides virtually transparent signal performance
- 16-line correction window
- Automatic vertical advance
- Built-in proc amp
- RS-170A sync output circuitry
- Complete operator control of video signals and genlock of external equipment
- Dropout compensation, RF or TTL
- Full remote panel option (only 1/2 rack width)

The Variable Tracking (VT) feature allows the 550VT to be used with slow-motion heterodyne VTRs such as the Sony BVU 820 with its Dynamic Tracking mode. The 550VT will dynamically track from 1X reverse play speed to 3X forward play speed, and will hold color lock to  $\pm 5X$  shuttle speed. In addition, the 550VT will enable the VTR to present a stable picture in "Pause" as well as present a viewable picture in forward and reverse modes ( $\pm 40X$  normal speed).

**HVS 550VT . . . . . \$5,595.00**

**Remote Control Option . . . . . 975.00**

**Sony BVU Interface Cable . . . . . 250.00**

**HVS 560**

**HVS 550VT**

### HVS 540

The HVS 540 is a low-cost alternative to the 550VT TBC. The 540 offers many of the features of the 550VT, but operates in the 3.58MHz (subcarrier) feedback mode only and does not feature Variable Tracking.

**HVS 540 . . . . . \$4,325.00**

**Remote Control Option . . . . . 975.00**

## ESP II Digital Still Store

- Easy to learn, simple to operate
- Single independent user
- Single channel output, expandable to dual channel
- Digital effects transitions on separate output
- 1/2 second recall of stills
- On-line capacity up to 1700 stills (frames)
- Excellent for mobile and studio environments

The ESP II provides quality and versatility on a budget, combining still store features with digital effects.

With the ESP II, graphic artists can use multilayer art techniques as successive generations of stills. Up to 15 generations may be produced without degradation in picture quality.

Multilayer graphics can be built in a single memory channel. For future use, stills can be stored to disk at random or in a sequence. A five-digit identification/address number identifies both the still and the disk on which the still is stored.

ESP II can function as two independent freeze frame synchronizers, with a separate third channel for digital effects transitions: horizontal and vertical wipes, fades and dissolves, pushes and pulls. Transitions may be selected at four preset rates: 16, 24, 32, or 48 frames.

With a single channel ESP II, you can transfer slides, still photos, art-cards, titles and other graphics to digital frames for video production or special display. The freeze frame feature allows you to "grab" stills from live camera or tape productions. The single channel model is easily upgraded for dual channel operation.

The ESP II dual channel still store has sophisticated microprocessor control of sequence and stored image display, and a variety of digital effects transitions for on-air production or graphics generation.

With two independent channels, switching may be made between two still stores, two live pictures, or one of each. Dedicated pushbuttons for all key commands are incorporated for operational simplicity and accuracy.

**ESP II**

The modular architecture consists of two freeze frame synchronizer boards and a system genlock, control and transition effects board. These are housed in a mainframe that requires only seven inches of rack space.

Proc amp controls and mainframe and system timing adjustments are on the mainframe front panel or on an optional engineering remote panel. The engineering remote panel is only one rack unit high and is powered by the mainframe. Operation control of the system is afforded by a separate control panel measuring only 3 1/2" x 19".

**ESP II Single channel with 80M byte RSD . . . . . \$26,333.00**

**ESP II Single channel with 340M byte FSD . . . . . 32,666.00**

**ESP II Dual channel with 80M byte RSD . . . . . 30,995.00**

**ESP II Dual channel with 340M byte FSD . . . . . 35,995.00**

### Options and Accessories

Single channel remote panel . . . . . \$ 3,200.00

Dual channel remote panel . . . . . 3,500.00

# DIGITAL STILL STORE SYSTEMS

IRIS II

IRIS C

## IRIS II

- Up to 6 simultaneous users
- Up to 6 input channels
- Up to 12 output channels (6 with transitions)
- Digital graphics composition with up to 6 simultaneous user stations (ICS)
- Aurora interface (up to 5 Aurora systems on one IRIS)
- Over 20,000 picture storage
- On-line library
- Heterodyne TBC/synchronizer inputs
- NTSC, PAL, RGB

The IRIS II is a powerful and flexible system designed to meet modern demands.

Built with component-coded framestores and designed to evolve as the needs of the industry change, IRIS II accommodates up to 6 simultaneous users and can provide on-line access for 260 to 21,440 stills stored on 1 to 8 drives respectively.

Each user has capabilities for preview/program output, library management, production graphics, transition effects, and field-to-frame interpolation.

The modularity of the system gives maximum flexibility and easy expandability.

## IRIS C

- Up to 2 simultaneous users
- Up to 2 input channels
- Up to 4 output channels (2 with transitions)
- Digital graphics composition with IRIS Composition System (ICS)
- Aurora interface
- Over 20,000 picture storage
- On-line library
- Heterodyne TBC/synchronizer inputs
- NTSC, PAL, RGB

The IRIS C Still Store is a compact, cost-effective system that affords IRIS II quality and performance. The customer has the flexibility to install the IRIS C system and later upgrade it to an IRIS II configuration.

IRIS C supports 2 simultaneous users with dual channel operation, including preview and program capabilities, for each.

Because IRIS C occupies less than 24" of rack space, it's ideal for mobile van installation. IRIS C's stored picture data is compatible with IRIS II. Pictures stored by IRIS C are perfectly interchangeable with those stored by IRIS II.

## Common Features

### • User Stations

Keyboards provide dedicated keys for easy operation. Minicontrollers have an interactive user menu. May be freestanding or slaved to a keyboard or other minicontrollers.

### • 654 Framestore Synchronizer

The component-coded HVS 654 is available as a 2- or 4-output unit (field expandable). The 654's Transitions option provides dissolves

and left/right, up/down wipes with programmable transition frame rates between pairs. Transitions can be programmed into sequence lists.

### • IRIS Composition System (ICS)

With this option an artist can compose complex multilayer graphics quickly and easily, using the familiar joystick control and dedicated pushbuttons. This digital graphics option provides a wide range of effects:

- |   |                                     |
|---|-------------------------------------|
| Variable compression                          | Cut and paste                       |
| Variable expansion                            | Digital key                         |
| Variable aspect ratio                         | Field/frame interpolation           |
| Continuously variable border width/color      | Removable on-line memory of effects |
| Variable border/matte generator with softness | Transparency                        |

### • Storage Media Flexibility

IRIS is compatible with media storage drives from Control Data Corporation. Drives currently available are 80M byte RSD, 340M byte FSD, and 800M byte XMD

### • On-Line Library System

Stills are cataloged by a 6-character numeric or alphanumeric ID and a description (IRIS II only) of up to 20 characters. Up to 66 stills can be linked together in a sequence list, and more than 75 sequence lists may be linked. Sequence lists may be run manually or automatically

### • Interface Capability

Computer Port: (RS-232) For switcher or computerized station automation  
Aurora Videographics Interface: Links the graphics creation capability of the Aurora AU75 or AU220 directly with the Harris IRIS system  
Printer Port: For hardcopy capability. Centronix and TI-compatible parallel interface

### • Multiple Drive Access Capability

IMAC (IRIS Multiple Access Controller) allows two or more IRIS still store systems to share DCU's and drives. Up to six IRIS systems (IRIS II and IRIS C in any combination) may be interconnected with an IMAC

### • Troubleshooting and Diagnostics

## GITZO VIDEO EQUIPMENT

### 100% Fluid Heads

380	Fluid Head 3 with 100% fluid panning and 100% fluid vertical tilt, quick release plate, 15" handle, supports 5-15 lbs. . . . .	\$ 699.95
	Same, with 2 15" handles . . . . .	add 50.00
380/2	Additional quick release plate for 380 . . . . .	add 10.00
380/L	Additional quick release plate 2 x 2 1/2 for 380 . . . . .	39.95
382	Additional quick release plate 2 x 5 for 380 . . . . .	49.95
383	Fluid Head 4 with 100% fluid pan, 100% fluid vertical tilt, quick release plate, 15" handle . . . . .	1399.00
480	Same w/14-18" handles . . . . .	add 100.00
480/2	Fluid Head 5 with 100% panning, 100% fluid and counterbalanced vertical tilt, with 3 x 8" quick and shift release plate, extensible handle 14-22", supports 10-50 lbs. . . . .	2499.00
579	Same, with 100% fluid panning, counterbalanced vertical tilt, supports 10-50 lbs. . . . .	1899.00
680	Fluid Head 6: Same as 580 w/stronger counterbalance, supports 50-100 lbs. . . . .	2699.00
679	Fluid Head 6: Same as 579 w/stronger counterbalance, supports 50-100 lbs. . . . .	2099.00
586	580, 579, 680, 679, with second extensible handle 14-22" . . . . .	add 159.95
	Additional quick release plate for 580, 680, 579, 679 . . . . .	add 69.95
EM 580	Metal trimmed carrying case for 580, 579, 680, 679 . . . . .	179.95

### Leveling Balls With Locking Grip, Headlock, For Rapid Adjustment Of Fluid Heads, Without Or With Center Column For Height Adjustment

121 BR	Leveling ball with rapid column sport . . . . .	\$ 179.95
221 BR	Leveling Ball 2 w/Rapid column for Reporter . . . . .	189.95
221 BC	Leveling Ball 2 w/Cremalliere gearlift column for Cremalliere 2 . . . . .	189.95
321 BR	Leveling Ball 3 w/Rapid column for Studex . . . . .	199.95
321 BC	Leveling Ball 3 w/Cremalliere gearlift column for Cremalliere 3 . . . . .	199.95
421 B	Leveling Ball 4 for Super Pro Tele Studex, platform 3 1/4" diameter . . . . .	219.95
421 BR	Leveling Ball 4 w/Rapid column for Super Pro Tele Studex . . . . .	299.95
421 BC	Leveling Ball 4 w/Cremalliere gearlift column for Super Pro Tele Studex . . . . .	449.95
621 B	Leveling Ball 6 for Super Pro Tele Studex, platform 4 1/4" diameter . . . . .	319.95
621 BC	Leveling Ball 6 w/Cremalliere gearlift column 18" for Super Pro Tele Studex . . . . .	599.95
621 BCL	Leveling Ball 6 w/Long Cremalliere gearlift column 32" for Super Pro Tele Studex . . . . .	699.95
622 BF	Leveling Ball 6 F w/flat base 4 1/4" diameter, 3/8" socket . . . . .	419.95

	Same w/594 5" Wheel Dolly, Metal Shoes, Stirrups, Traveling Fixings . . . . .	3978.00
800 B6F-680	Video 8T/Ball 6F w/680 100% Fluid Head 6, w/4" dia. Column for Extra Support, 5" Wheel Dolly, Traveling Fixings . . . . .	5147.00

### Fluid Action Head, Base

180	Fluid Action Head 1 w/Rapid Adaptor, supports 2-7 lbs. . . . .	\$219.95
285	Fluid Action Base for 360° Panning of Non-Fluid Heads, supports 2-20 lbs. . . . .	169.95

### Video-Cine Heads, Spring Balanced

155	Video-Cine 1S for Weekend, Total/Sport, Cremaillere 0/1, supports 2-7 lbs. . . . .	\$ 99.95
252	Video-Cine 2S for Total/Sport, Reporter, Cremaillere 1/2, supports 5-10 lbs. . . . .	169.95

### Video Head, Not Counterbalanced with Quick Release

251	Video 2 for Total/Sport, Reporter, Cremaillere 1/2, supports 5-10 lbs. . . . .	\$119.95
-----	--	----------

### Simple Video-Cine Heads, Not Counterbalanced

050	Video-Cine 0 for Loisir, Weekend, Cremaillere 0, supports 2-5 lbs. . . . .	\$ 79.95
150	Video-Cine 1 for Total/Sport, Cremaillere 1, supports 2-7 lbs. . . . .	89.95
250	Video-Cine for Reporter, Cremaillere 2, supports 2-10 lbs. . . . .	99.95
350	Video-Cine 3 for Studex, Cremaillere 3, supports 5-15 lbs. . . . .	109.95
450	Video-Cine 4 for Super Pro Tele Studex, supports 10-20 lbs. . . . .	129.95
450L	Video-Cine 4L with longer handle 15', supports 10-20 lbs. . . . .	149.95
450LL	Same with 2 longer handles 15' . . . . .	169.95
585	Side tilt attachment for more than 90°, also suited for Monopods . . . . .	69.95

### Quick and Shift Releases for Cameras to 20 lbs.

385	With 2" x 3" Plate, 1/4" Screw (3/8" on request) . . . . .	\$79.95
386	With 2" x 6" Plate (2) 1/4" Screws (3/8" on request) . . . . .	89.95
387	2" x 3" Plate only with (2) 1/4" Screws (3/8" on request) . . . . .	29.95
388	2" x 6" Plate only with (2) 1/4" Screws (3/8" on request) . . . . .	39.95

### Video Combi Tripods with 2 Leg Sections, Fluid Action, or Counterbalanced Video Head

03-180	Weekend Eco/Fluid Action Head 1, supports 2-5 lbs. . . . .	\$329.95
103-180	Sport Eco/Fluid Action Head 1, supports 2-7 lbs. . . . .	339.95
203-180	Reporter Eco/Fluid Action Head 1, supports 2-7 lbs. . . . .	359.95
03-155	Weekend Eco Video Combi w/155 Video 1S, supports 2-5 lbs. . . . .	199.95
103-155	Sport Eco Video Combi w/155 Video 1S, supports 2-7 lbs. . . . .	209.95
103-252	Sport Eco Video Combi w/252 Video 2S, supports 2-7 lbs. . . . .	289.95
203-252	Reporter Eco Video Combi w/252 video 2S, supports 5-10 lbs. . . . .	319.95

### Video Combi Tripods with 2 Leg Sections, Non-Counterbalanced Video or Simple Video-Cine Heads

103-251	Sport Eco Video Combi w/251 Video 2, supports 2-7 lbs. . . . .	\$239.95
203-251	Reporter Eco Video Combi w/251 Video 2, supports 5-10 lbs. . . . .	259.95
03-150	Weekend Eco Video Combi w/050 Video-Cine 0, supports 2-5 lbs. . . . .	189.95
103-150	Sport Eco Video Combi w/150 Video-Cine 1, supports 2-7 lbs. . . . .	209.95
203-250	Reporter Eco Video Combi w/250 Video-Cine 2, supports 5-10 lbs. . . . .	239.95
303-350	Studex Eco Video Combi w/350 Video-Cine 3, supports 10-15 lbs. . . . .	289.95
400/2-450	Super Studex Giant Eco Video Combi w/450 Video-Cine 4, supports 10-20 lbs. . . . .	399.95
410/2-450	Pro Studex Giant Eco Video Combi w/450 Video-Cine 4, supports 10-20 lbs. . . . .	469.95
500/2-450L	Tele Studex Giant Eco Video Combi w/450L Video-Cine 4L, supports 10-20 lbs. . . . .	559.95
500/2-450LL	Same w/2 handles . . . . .	579.95

### Video-Cine Tripods with 2 Leg Sections

## STAGE TRACKS

Individual stage tracks are normally ordered on a per foot basis and supplied with a standard group of components for normal operation. This group includes track channel, carriers supplied on 12" (305mm) centers, one pair of master carriers, double and single end pulleys, 1 set of overlap clamps, clamp hangers, floor block, 1 pair of end stops, and operating line. This is called a "complete" track. Model numbers for complete tracks are indicated by the model number of the carrier supplied. All steel components except galvanized track channel zinc plated to resist corrosion.

101, 116, 118

### No. 100 Series Standard Duty Straight Track

#### No. 101 Specifications

Track constructed of galvanized roll-formed steel (or extruded mill finish aluminum) with continuous slot in bottom. Carriers 12" (305mm) on center constructed of two polyethylene wheels fastened to steel body by steel rivet. Carrier body with hook for attachment of curtain snap or "S" hook. Adjustable end pulleys of silent ball bearing 2 1/2" (63mm) nylon wheels enclosed in steel housing. End stops and adjustable floor block provided to maintain proper tension on stretch-resistant 1/4" (6.4mm) braided black polypropylene operating line.

### No. 300 Series Standard Duty Curved Track

#### No. 301 Specifications

I-beam track constructed of .125" (3.2mm) extruded mill finish aluminum with top, intermediate, and bottom flanges. Carriers 12" (305mm) on center constructed of two nylon wheels fastened parallel to steel body by steel rivet. Nylon insert and neoprene bumpers attached to carrier body to reduce noise. Carrier body with heavy-duty hook for attachment of curtain snap or "S" hook. Adjustable end pulleys of silent ball bearing 4" (102mm) nylon wheels enclosed in steel housing. End stops and tension spring floor block provided to maintain proper tension on stretch-resistant 1/4" (6.4mm) braided black polypropylene operating line. Track rigidly supported using ceiling or hanging clamps. Curved tracks formed at jobsite or factory and equipped with required number of ball bearing spindles and idlers to properly guide operating line around track.

## 400 Series Heavy-Duty Straight Track

### 401 Specifications

Track constructed of 14 gauge (2mm) galvanized roll-formed steel (or extruded mill finish aluminum) with continuous slot in bottom. Carriers 12" (305mm) on center constructed of two polyethylene wheels fastened parallel to nylon ball bearing body by steel rivet. Neoprene bumper provided to reduce noise. Carrier body with heavy-duty swivel eye, hook, and trim chain for attachment of curtain snap or "S" hook. Adjustable end pulleys of silent ball bearing 4" (102mm) nylon wheels enclosed in steel housing to prevent operating line from escaping groove. End stops and adjustable floor block provided to maintain proper tension on stretch-resistant 3/8" (9.5mm) braided black polypropylene operating line. All steel components except galvanized track channel zinc plated to resist corrosion.

## 500 Series Heavy-Duty Curved Track

500 Series tracks are engineered for use with gym divider curtains, stage curtains, and motion picture screens. Heavy-duty carriers and masters provide trouble-free operation. 500 Series is ideal for straight, curved, and serpentine layouts. Curves are formed at the factory to any minimum radius of 2' (610mm). A 4' (1.22m) radius is recommended for ease of operation and for long or complex curves.

Track is most often motorized or may be manually operated for short runs and light weight curtains. A variety of curtain machines are available for use with the 500 Series.

### 501 Specifications

I-beam track constructed of .187" (4.7mm) extruded mill finish aluminum top, intermediate, and bottom flanges. Carriers 12" (305mm) on center constructed of two neoprene tired ball bearing wheels fastened parallel to steel body by steel rivet. HDPE insert and rubber bumper attached to carrier body to reduce noise. End pulleys constructed of 6" (152mm) cast iron wheels with precision sealed ball bearings enclosed in steel housing to prevent operating line from escaping groove. Nylon ball bearing cable guides furnished to properly guide operating line

around factory curved track channel. 3/16" (4.7mm) diameter braided mahogany colored wire centered cable provided for motorized operation and 3/8" (9.5mm) braided black polypropylene supplied for manual operation. Track rigidly supported using proper ceiling or hanging clamp. All steel components zinc plated to resist corrosion.

## 600 Series Cyclorama Track

600 Series Cyclorama Tracks are designed for medium weight theatrical use where track channel must span a longer distance between supports. Available only as a walkalong track, the channel may be used in both straight and curved layouts. Channel is normally curved to a minimum radius of 2' (610mm). For ease of operation, a 4' (1.22m) radius is recommended.

### 601 Specifications

I-beam walkalong track constructed of .187" (4.7mm) extruded mill finish aluminum with top, two intermediate, and bottom flanges. Carriers 12" (305mm) on center constructed of two nylon wheels fastened parallel to steel body by steel rivet. Nylon insert and neoprene bumpers attached to carrier body to reduce noise. Carrier body with heavy-duty hook for attachment of curtain snap or "S" hook. Track rigidly supported using ceiling or hanging clamp. Curved tracks formed at factory or at jobsite. All steel components zinc plated to resist corrosion.

## 700 Series Light Duty Curved Track

700 Series tracks are designed for light duty theatrical and industrial curtain use. Available only as a walkalong track, the channel may be used in both straight and curved layouts. Channel is normally curved at jobsite to a minimum radius of 1' (305mm). For ease of operation, a 3' (915mm) radius is recommended.

## 701 Specifications

I-beam track constructed of .094" (2.4mm) extruded mill finish aluminum with top, intermediate and bottom flanges. Carriers 12" (305mm) on center constructed of two nylon wheels fastened to extruded aluminum body by steel rivet. Nylon insert attached to carrier body to reduce friction and noise. Carrier body with heavy-duty hook for attachment of curtain snap or "S" hook. Track rigidly supported using ceiling or hanging clamp. Curved tracks formed at factory or at jobsite. All steel components zinc plated to resist corrosion.

## 801 Cyclorama Track

801 Cyclorama Track is especially suited for use in television studios. Equipped with neoprene tired ball bearing carriers and neoprene bumpers to insure quiet operation. Track available curved to a minimum radius of 4' (1.22m) and in straight sections. Standard lengths are in 10' and 20' (3.05m, 6.1m) sections.

## 801 Specifications

Walkalong track constructed of two 16 gauge (1.6mm) galvanized roll-formed 1" x 5/8" (25.4mm x 15.9mm) "C" channel carrier rails suspended from 2" (50.8mm) O.D. tubing backbone at 2'-0" (610mm) intervals. Carrier rails parallel with 3/4" (19mm) continuous slot for passage of carrier body. Carriers 12" (305mm) on center constructed of two neoprene tired wheels fastened parallel to nylon ball bearing body by steel rivet. Body with integrally molded glides to keep carrier aligned at all times. Neoprene bumper inserted into carrier body to reduce noise. Carrier body with heavy-duty swivel eye, hook, and trim chain for attachment of curtain snap or "S" hook. Support rigidly to roof structure or ceiling at intervals not exceeding 8' (2.44mm).

## 1001 Heavy-Duty Straight Studio Track

1001 Heavy-Duty Straight Track was developed especially for use in television studios where an exceptionally quiet, heavy-duty track is desired. Equipped with neoprene tired ball bearing carriers and neoprene bumpers to insure the quietest operation available in a stage track. Track also furnished with rear fold guides which enable curtain to fold at offstage edges during operation. Track sections available in 10' and 20' (3.05m, 6.1m) standard lengths.

## 1001 Specifications

Track constructed of two 16 gauge (1.6mm) galvanized roll-formed 1" x 5/8" (25.4mm x 15.9mm) "C" channel carrier rails suspended from 2" (50.8mm) O.D. tubing backbone at 2'-0" (610mm) intervals. ## CASES

### Cases

Each case is a custom order; no additional charge for special design requirements.

Unless otherwise specified,  $\frac{3}{8}$ " AC grade exterior plywood is used in all cases to afford greater strength and durability.

Each case is inspected during every step of construction to insure proper fit and longer lasting structural integrity.

All cases receive a final personal inspection while being dressed out and cleaned.

- Exterior laminates per customer request: Aluminum, Formica, or ABS plastic
- $\frac{3}{8}$ " AC grade exterior plywood
- Edging is an extruded aluminum angle secured with pneumatically driven rust-proof aluminum rivets, spaced as required
- Aluminum tongue and groove built to Hines' specifications provides secure closure
- SESSIONS recessed handles and latches are standard on all larger cases
- Piano-type continuous hinge
- Steel corner clamps
- Steel ball corners which raise the case  $\frac{1}{4}$ " above a flat surface to prevent excess wear of case covering and protect corners from direct hits
- Double-woven nylon lid straps, secured with  $\frac{3}{8}$ " carriage bolts to outlast conventional fasteners
- Interiors lined with esther foam or heavier etha foam, as required

### Options Available

- Weatherproofing seal
- Padlock and combination latches
- Casters with up to 1200 lbs. per wheel capacity
- Free stenciling, logo silkscreening
- Fabric, duck cloth or velvet linings

### Video Cases

Designed to provide maximum protection for delicate cameras, recorders, monitors or any other components. Also available in combination cases for greater portability.

### Audio-Visual Cases

Custom-built to your specifications or from those supplied by your equipment manufacturer. These cases will guarantee that equipment will arrive at a presentation ready to perform. We also offer complete system packages for motion, multi-image, strip and overhead projection including amplification and speakers.

### Computer Cases

CRT's, printers, keyboards and peripherals are costly to repair. Hines computer cases are the best insurance against demolition by the common carrier. Packed individually or in combination cases, sophisticated electronic hardware will reach its destination intact.

# PORTABLE COLOR CAMERAS

## Z-31A 3-Tube Portable Color Camera

The Z-31A can be used in full studio configuration with remote operation panel, in mobile units with triax, and ENG configuration for field shooting of all types including news and commercial production.

In addition to a wide choice of lenses, the Z-31A is offered with composite output and with modules for component output for use with any type small format VTR. The Z-31A features twist field type LOC MS Saticon tubes. These tubes offer 800 lines resolution and 60dB signal-to-noise.

This high resolution, auto setup camera features updated circuitry for improved registration, accuracy, and superior performance.

Even slight registration errors due to prism temperature changes are now corrected by a real-time correction circuit using a microcomputer to provide a stable picture at all times.

The 2H contour corrector with comb filter assures picture sharpness with minimal noise.

The horizontal contour signal is composed of both green and red signals.

With the built-in pre-set masking circuit even subtle color tones can be adjusted without affecting white balance.

The built-in automatic beam optimizer suppresses the comet-tails and expands the dynamic range to facilitate the highlight shooting.

The built-in shading correction circuit ensures a complete flat picture regardless of the pickup tubes and bias light shading.

The frame shading at the corners of the screen is corrected to offer a flat picture.

### Other functions include:

- Character display function
- Built-in color bars
- Microphone circuit
- Test pulse

The basic camera can be purchased and accessory kits such as studio panel, triax/coax digital adaptors, 4.5" viewfinder, and component module, can be added at any time.

## Specifications

**Color System:** NTSC, PAL-B  
**Camera Tubes:** Three 2/3" Twist Field type M-S Saticon tubes  
**Optical System:** f/1.4 prism (with bias light)  
**Encoding System:** IQ (NTSC), UV (PAL-B)  
**Sync System:** Internal sync or genlock (operation with composite video signal or black burst signal)

**Horizontal Resolution:** 800 lines (G-ch at center)  
**Sensitivity:** 2,000 lux (200fc), f/4 (89.9% reflection factor)  
**Min. Illumination:** 40 lux (f/1.6 + 18dB)  
**Signal-to-Noise Ratio:** 60dB (NTSC), 57dB (PAL-B) (typical)  
**Gamma Correction:** 0.35 to 1.0  
**Optical Filter:** 3200°K, 5600°K + 1/8ND, 5600°K, cap  
**Lens Mount:** Bayonet  
**Auto Functions:** Auto white balance  
 Auto black balance  
 Auto iris  
 Automatic beam optimizer (ABO)  
 Auto centering  
 Auto setup  
 Auto black set  
 Auto registration correction  
 Automatic fault diagnosis  
 Auto black level

Z-31A

### Standard Configuration:

Z31A — Camera  
 J15X9.5B4KRS (by Canon) — 15X power zoom lens  
 GM-6 — 1.5" viewfinder  
 AP-40 — AC adaptor  
 TA-Z31 — One touch tripod adaptor  
 CL-Z31 — Carrying case

Z-31AC With ASU and lens . . . . . \$9,700.00  
 Z-31AB Without lens . . . . . 8,240.00

## Z-31P ENG/EP Camera

This camera offers all the outstanding features of the basic Z-31A, but incorporates three 2/3" MS type low capacitance Diode Gun Plumbicon tubes.

## Specifications

**Horizontal Resolution:** 660 lines at center (G. ch)  
**Signal-to-Noise Ratio:** 57dB (NTSC)  
**Pickup Tube:** 2/3" LOC DG PbO tube  
**Optical System:** f/1.4 prism (with bias light)  
**Scan Standards:** NTSC 525/60 field/s or IQ (NTSC)  
**Encoding System:** IQ (NTSC)  
**Minimum Illumination:** 30 lux, f/1.6 + 18dB on  
**Sync System:** Internal sync or genlock  
**Gamma Correction:** Variable 0.35 to 1.0  
**Optical Filters:** 3200°K, 5600°K, + 1/8ND, 5600°K, cap  
**Lens Mount:** Bayonet  
**Auto Functions:** Auto white balance  
 Auto black balance  
 Auto iris  
 Automatic beam optimizer (ABO)  
 Auto centering  
 Auto setup  
 Auto black set  
 Auto registration correction  
 Automatic fault diagnosis  
 Auto black level

### Standard Configuration:

Z-31P Camera body, 15X power zoom lens, 1.5" viewfinder, tripod adaptor, AC adaptor, carrying case

Z-31PC With lens . . . . . \$13,900.00  
 Z-31PE Without lens . . . . . 12,950.00

# CCD COLOR CAMERAS

## FP-C1/FP-C2 3-Chip CCD Color Cameras

### Features Common To Both Models

- Since the high sensitivity and low lag  $\frac{2}{3}$ " CCD 3-chip is used, the sensitivity is one stop higher than that of a 3-plumbicon camera, making the FP-C1/FP-C2 ideally suited to use in low light conditions
- Auto knee and flare correction functions
- Subtle color differences among cameras can be controlled by the preset masking circuit
- Computer-controlled auto functions and self-diagnostics improve operational flexibility
- High resistance to shock and vibration
- Immune to magnetic field interference
- Adoption of the image sensor and highly stable design provides high reliability
- Bayonet mount
- Auto white balance
- Auto black balance
- Auto iris
- Auto knee
- Auto black set
- Auto black level
- Self-diagnosis display

### FP-C1

- Over 280,000 picture elements offers a superb picture quality of 580 lines horizontal resolution
- Sensitivity: 2000 lux, f/6.7 (89.9% reflection factor)
- Auto white balance (2 memories)—Two kinds of memories for two different white balance data are available for the first time in a camera of this class
- Computer-controlled auto iris—The computer-controlled auto iris function offers a clear and natural picture. The auto iris operating point is adjustable for about  $\pm 1f$ /stop
- Masking (with preset on/off switch)
- Test pulses
- Warning indicator
- Status display
- Character display function
- Min. Illumination: 20 lux, f/1.7 (+ 18dB)
- Signal-to-Noise Ratio: 56dB (NTSC), 53dB (PAL)
- Sync System: Internal (conforming to RS-170A) or genlock

The FP-C1 is a 3-chip CCD color camera employing the high density and high sensitivity image sensor with over 280,000 picture elements packed onto a chip.

The adoption of the latest image sensor leads to a superb picture quality of high resolution, a high sensitivity and a high signal-to-noise ratio. The operational flexibilities are greatly improved by the various automatic functions and the self-diagnostic functions controlled by the microprocessors.

Since various accessories are available, the FP-C1 is usable as an EFP/studio camera in conjunction with a remote operation panel.

- FP-C1UC with 12 to 1 lens . . . . . \$6950.00
- FP-C1UD with 15 to 1 lens . . . . . 7300.00

FP-C1

FP-C2

### FP-C2 (Preliminary)

- Professional ENG camera is dockable to a Betacam VTR
- 620 line horizontal resolution
- High sensitivity 2000 lux with f/5.6
- Since there is no need for registration adjustment, the FP-C2 is ideal for ENG camera use
- Besides the ENG combo application, the FP-C2 can be used as a self-contained EFP studio camera with an optional camera adaptor
- Minimum illumination 16 lux with f/1.4 (+ 18dB)
- Signal-to-Noise Ratio: NTSC—57dB typ.; PAL 54dB typ.
- Sync system: Internal (conforming to RS-170A) or genlock (operation with composite video signal or black burst signal)

The FP-C2 is a 3-sensor CCD ENG dockable camera using a high density and high sensitivity image sensor for which precision special offset technology is utilized. Operational flexibility is greatly enhanced by superb picture quality with high resolution, high sensitivity and high signal-to-noise ratio, coupled with computer-controlled auto functions and self-diagnostic. Various accessories are available, making the FP-C2 usable as an EFP/studio camera in conjunction with an operational panel.

- FP-C2 . . . . . \$9950.00

## DK-5050/5053 3-TUBE COLOR CAMERA

The DK-5050/5053 is a 3-tube color camera with an ultra-compact size, light weight and high performance. It is composed of a camera head and camera control unit, and is ideal for combination with surgical microscopes, endoscopes, biological and metal microscopes. It has horizontal resolution of 550 TV lines (NTSC).

When an f/1.6 lens is used, a signal-to-noise ratio of 53 dB (NTSC) can be attained minimum 16 lux (1.6 fc) illumination by a high-sensitivity pick-up tube and a low-noise pre-amplifier.

The camera sensitivity can be increased to 3 times or 8 times; usable picture is obtained under the illumination of 16 lux (1.6 fc) without changing the lens. A built-in contour correction circuit ensures clear and crisp pictures.

The DK-5050/5053 is used with an optional viewfinder and a zoom lens. A compact and high-performance prism and ICs make it possible to reduce the size and weight of the camera.

### ABO (Automatic Beam Optimizer) (only DK-5050)

The built-in ABO circuit ensures the dynamic range from dark portion to highlight portion.

### Built-in auto black and white balance controls with digital memory/color correction

Automatic light control is incorporated to activate the automatic light control device for a microscope and the auto-focusing device of the zoom lens.

An optical automatic setup unit using a microprocessor facilitates a correction of the deviation of the setting during operation.

This function has never been used in cameras of this class.

Video level is indicated by the level meter on the operation panel, and the video waveform is displayed on the viewfinder screen (option). Therefore, the adjustment of illumination and lens iris is facilitated even when the ALC is not used.

The color bar signal is used as a color reference signal and facilitates the inspection of color monitor.

### Remote control (only DK-5050)

Though the standard distance between a camera head and a CCU is 20m, the distance can be extended up to 300m by using a remote operation unit (option). Inter-communication between a remote operation unit and a CCU are available by headsets (option).

### STANDARD CONFIGURATIONS:

**DK-5050** Camera head (2m cable) x 1, camera control unit x 1, camera cable (18m) x 1

**DK-5053** Camera head (2.5m cable) x 1, camera control unit x 1

### ADAPTORS FOR SURGICAL OPERATION MICROSCOPES

These adaptors are used for combining a surgical operation microscope with a television camera.

Applicable camera Model	DK-5050	
	ME-901 (CZ)	ME-902 (CZ)
Exterior		
General	This adaptor is designed for use on CARL ZEISS surgical operation microscopes. It is provided with automatic aperture control and also the aperture can be controlled remotely. The television field is about 70%.	This adaptor is the same as that of the ME-901 (CZ)* with the addition of a photography function. By simply pressing the foot switch, it is possible to take unblurred pictures without interrupting the operation in progress. For a still camera, we recommend the separately available (at cost) Contax 137MD. Television field is about 70%.

## DK-3000/3300 SINGLE TUBE COLOR CAMERAS

Compact, easy-to-operate cylinder type camera head suitable for combination with surgical microscopes, endoscopes, and biological microscopes. They are approximately 1.5" (38mm) in diameter and weigh approximately 0.8 lb. (370g).

Resolution of 350 lines, minimum illumination of 25 lux (2.5 fc), f/1.6, and SN ratio of 50 dB. A special circuit enables independent adjustment of red and green color phases and color saturation for the finest color reproduction. A compensation circuit is also built in for sharper pictures.

Special color bar for easy color adjustment of color monitor. LEDs are used for indication of the video level. ALC (automatic light control) and AGC (automatic gain control) detect the amount of light at the center of the screen, enabling a continuously stable picture. Auto to white, ALC, AGC and ABO (automatic beam optimizer) are provided.

### STANDARD COMPOSITION

Camera head with 10' (3m) camera cable (for DK-3000); with 10' (3m) + 23' (7m) camera cable (for DK-3300); camera control unit.

The DK-3300 has a very unique feature, the title generator, which superimposes title, date, patient name, etc. onto the picture screen.

# MONOCHROME CAMERAS

## KP-180/181 Solid-State Shutter Camera

- Electronic shutter provides superb sensitivity and high reliability
- Shutter speed of  $1/600$  second  
A blur of a moving object is reduced to  $1/20$ , comparing with a conventional TV camera
- Small in size and light in weight
- With an imaging device in which imaging elements are precisely arranged in an order of microns, there is no picture distortion on photo receiving area
- After image is greatly reduced and burning does not occur even when incident light is excessively strong

The KP-180/181 are solid-state black and white TV cameras employing a high sensitivity imaging device and a unique electronic shutter.

The KP-180/181 are most suitable as image processing cameras, since they can shoot moving objects clearly without any blur.

The all solid-state cameras feature no picture distortion, no burning, low after image, in anti-vibration and anti-shock and no need of pickup tube replacement. The KP-181 is activated only by supplying a commercial AC voltage, since it contains an AC power circuit. There is no need for an AC adaptor or a camera control unit.

The KP-180 does not contain a power circuit and 12VDC must be supplied.

The camera unit is smaller and lighter than the KP-181.

# VIDEO FLOPPY SYSTEM/ COLOR PRINTERS

VY-50A

## VX-52A Video Floppy System

• Records and plays back video floppy disks • Accepting an NTSC input signal, it can be connected directly to a source of video signals—video camera, video recorder, TV, etc. • Simply pressing a button activates the recording mechanism and a single field is recorded on the floppy disk • After recording, the disks can be played back and still pictures seen on the TV or printed by either printer • Fast forward and reverse at four pictures per second • Automatic playback is possible at speeds of 0.5, 1.0 and 5.0 seconds per picture • Full-function remote control is provided as standard

VX-52A . . . . . \$1195.00

## VY-50A Color Video Printer

• Instantly receive color prints of any recorded color picture • Built-in IC memory memorizes last video frame • High resolution prints • Thermal transfer process • NTSC composite video • Wireless remote control • Prints in 80 seconds • Time/date display available • 100 prints per film pack

### Make Prints From:

• TV • Camera • VTR • Video disk player • Computer • Video floppy recorder

The VY-50A Color Video Printer is ideal for applications in which pseudo-frame pictures are acceptable. While maintaining the same ease of operation as the VY-100A, this has TTL RGB inputs and 32-gradation color

VY-50A . . . . . \$2495.00

## VY-100A Color Video Printer

• 2 NTSC composite video input terminals • Analog RGB and sync terminals for connection to a professional standard personal computer or 3-tube video camera • 64 color gradations • Frame memory

VY-100A

When used for the recording of individual fields, 2 different pictures can be held in memory; either of these can then be printed whenever required. For easy identification, the date and time are held in battery backed up memory and can be superimposed on the prints. Replacement of the ink cartridge is simple through a door in the side of the printer, while 100-sheet sets of cut paper are inserted in a front panel drawer.

A remote control is provided with the VY-100A for operations of the memory and printer; for convenience in remote operations, this is equipped with all required indicators. The remote control terminal of the VY-100A can be connected directly to a personal computer and the computer can then control printer operations, in an automated instrumentation system, etc.

VY-100A . . . . . \$3495.00

## Accessories

### VX-F50 Video Floppy Disk

• (60 x 54 x 3.6mm) • Standard video floppy disk records 50 field images . . . . . \$99.95

### VY-S100A Paper/Ink Set

• Contains everything necessary for 100 color prints . . . . . \$99.50

### VY-T50A Transparency/Ink Set

• With special inks and mylar film necessary for 50 transparencies . . . . . \$99.50

# TEST EQUIPMENT

## V-069 Vectorscope (NTSC System)

- Guaranteed vector phase accuracy of  $\pm 1^\circ$ . This high measurement accuracy is unsurpassed in its class
- Two loop-thru inputs and a loop-thru external sync input are provided. The chrominance signal and sync signal may be independently selected and vector measurement of the input. A sub-carrier signal is also possible
- Input sensitivity can be calibrated to the 1V full scale, 75% saturation or 100% saturation and may be variable controlled over the range 0.5 to 5 times. The UNCAL lamp lights when variable controlled has been made
- The chrominance signal applied to an input may be used to display a non-synced circle to enable a self-check of gain balance and quadrature phase
- Differential gain and differential phase can be measured
- Differential gain is a change in color subcarrier amplitude as a function of luminance level. Differential phase is a phase modulation of the chrominance signal caused by change in the luminance level

V-069 ..... \$ 1950.00

## V-079 Waveform Monitor (NTSC System)

- A line selector function is provided to enable selection of any displayed line of lines 9 thru 22 or either field 1 or 2. This enables observation of VIR and VITS signals, as well as Teletext signals
- Guaranteed flat response ( $\pm 1\%$  over the range 25Hz to 3.6MHz and  $+1\% -2\%$  over the range 3.6MHz to 6MHz). This wide bandwidth ensures high-accuracy waveform observation and measurement
- Frequency response may be selected as FLAT, IRE, CHROMA, DIFF GAIN. The horizontal-axis sweep may also be selected as 2V, 2V MAG (X20 magnified), 2H or  $1\mu\text{s}/\text{div}$ , enabling measurements on a wide variety of video signals
- By applying signals to a 9-pin connector on the rear panel, it is possible to display RGB. Optionally, YRGB display is also possible
- DC restore ensures a stable display even in the presence in the amplitude, APL and burst variations
- Two loop-thru inputs are provided
- Horizontal-axis position may be fine adjusted using a 10-turn potentiometer
- Two units may be mounted side-by-side in a 19-inch rack (the V-069 Vector Scope is the same size)

V-079 ..... \$ 1750.00

### VC-6020 Digital Storage Oscilloscope

- One M Sample/S dual channels • 1024 words/channel
- Standard GP-1B • Send data to a host computer via a standard built-in GP-1B (IEEE488) interface • Compact size makes it invaluable in maintenance and inspections • 2 channels can be sampled at once by the 2 A-D converters, at a max sampling rate of 1 MS/S • An analog output connector provides output of stored data to drive a chart recorder or X-Y recorder • In the Non-Store mode, the VC-6020 can be used as a 20MHz dual channel oscilloscope

VC-6020 .....\$1950.00

VC-6050

### VC-6050 Digital Storage Oscilloscope

- High speed sampling up to 40M samples/s • CRT readout • 2 channels • Roll mode • X-Y display • Cursor displayed on the CRT can be used in the storage or non-storage mode to measure voltage difference, time difference and frequency with direct reading of these values • Panel settings value display
- Storage of single shot event is possible up to 10MHz (4 samples/cycle) or 5MHz for simultaneous 2-channel storage
- Storage of repetitive event up to 60MHz • Large capacity memory 4000-word/channel • Setting of the position of pre-triggering is possible in 1/10 div steps • Ability to sample with the B sweep enables you to set up any desired delay after the trigger point before storage is actually begun • Summation averaging up to 256 times can be performed to achieve an improvement in signal-to-noise ratio, enabling the extraction and observation of signals buried in noise • Ten-times digital magnification of a stored waveform or a 100-times magnification on the screen • Analog output • GP-1B (IEEE488) interface provided as standard • A plotter interface (option) can be used to create a hardcopy on an HP-GL type plotter • Usable as a real-time, 60MHz, 3-channel oscilloscope with delayed sweep and CRT readout

# OSCILLOSCOPES

## V-222 Dual Trace Oscilloscope

- CRT = 6" square with internal graticule • Vertical Deflection = Sensitivity: 5mV/div to 5V/div  $\pm$  3%, Max. Sensitivity: 1mV/div to 1V/div  $\pm$  5% at x 5 Magnifier extends, Bandwidth: DC to 20MHz (-3dB) DC to 7MHz (-3dB) at x 5 Magnifier extends, Modes: CH1, CH2, ALT, CHOP, ADD • Horizontal Deflection = Sweep Time: 0.2 $\mu$ s/div to 0.2s/div  $\pm$  3%, Max. Sweep Rate: 100ns/div at x 10 Magnifier extends • X-Y Operation (CH1: X, CH2: Y) = Phase Error: 3° from DC to 50kHz • Dimensions = 5.2"H x 12.3"W x 14.6"D (130 x 310 x 370mm) • Weight = 14.4 lbs. (6.5kg)

V-222 .....\$660.00

V-422

## V-422 Dual Trace Oscilloscope

- CRT = 6" square with internal graticule • Vertical Deflection = Sensitivity: 5mV/div to 5V/div  $\pm$  3%, Max. Sensitivity: 1mV/div to 1V/div  $\pm$  5% at x 5 Magnifier extends, Bandwidth: DC to 40MHz (-3dB), DC to 7MHz (-3dB) at x 5 Magnifier extends, Modes: CH1, CH2, ALT, CHOP, ADD • Horizontal Deflection = Sweep Time: 0.2 $\mu$ s/div to 0.2s/div  $\pm$  3%, Max. Sweep Rate: 20ns/div at x 10 Magnifier extends • X-Y operation (CH1: X, CH2: Y) = Phase Error: 3° from DC to 50kHz • Dimensions = 5.2"H x 12.3"W x 14.6"D (130 x 310 x 370mm) • Weight = 14.4 lbs. (6.5kg)

V-422 .....\$925.00

## V-212 Dual Trace Oscilloscope

- CRT = 6" square with internal graticule • Vertical Deflection = Sensitivity: 5mV/div to 5V/div  $\pm$  3%, Max. Sensitivity: 1mV/div to 1V/div  $\pm$  5% at x 5 Magnifier extends, Bandwidth: DC to 20MHz (-3dB) DC to 7MHz (-3dB) at x 5 Magnifier extends, Modes: CH1, CH2, ALT, CHOP, ADD • Horizontal Deflection = Sweep Time: 0.2 $\mu$ s/div to 0.2s/div  $\pm$  3%, Max. Sweep Rate: 100ns/div at x 10 Magnifier extends • X-Y Operation (CH1: X, CH2: Y) = Phase Error: 3° from DC to 50kHz • Dimensions = 5.2"H x 12.3"W x 14.6"D (130 x 310 x 370mm) • Weight = 13.3 lbs. (6.0kg)

V-212 .....\$560.00

V-223

## V-223 Dual Trace Delayed Sweep Oscilloscope

- CRT = 6" square with internal graticule • Vertical Deflection = Sensitivity: 5mV/div to 5V/div  $\pm$  3%, Max. Sensitivity: 1mV/div to 1V/div  $\pm$  5% at x 5 Magnifier extends, Bandwidth: DC to 20MHz (-3dB), DC to 7MHz (-3dB) at x 5 Magnifier extends, Modes: CH1, CH2, ALT, CHOP, ADD • Horizontal Deflection = Sweep Time: 0.2 $\mu$ s/div to 0.2s/div at x 10 Magnifier extends • X-Y Operation (CH1: X, CH2: Y) = Phase Error: 3° from DC to 50kHz • Dimensions = 5.2"H x 12.3"W x 14.6"D (130 x 310 x 370mm) • Weight: 15.5 lbs. (7.0kg)

V-223 .....\$795.00

## V-423 Dual Trace Delayed Sweep Oscilloscope

- CRT = 6" square with internal graticule • Vertical Deflection = Sensitivity: 5mV/div to 5V/div  $\pm$  3%, Max. Sensitivity: 1mV/div to 1V/div  $\pm$  5% at x 5 Magnifier extends, Bandwidth: DC to 40MHz (-3dB), DC to 7MHz (-3dB) at x 5 Magnifier extends, Modes: CH1, CH2, ALT, CHOP, ADD • Horizontal Deflection = Sweep Time: 0.2 $\mu$ s/div to 0.2s/div  $\pm$  3%, Delay Time: 1 $\mu$ s to 100ms, Max. Sweep Rate: 20ns/div at x 10 Magnifier extends • X-Y Operation (CH1: X, CH2: Y) = Phase Error: 3° from DC to 50kHz • Dimensions = 5.2"H x 12.3"W x 14.6"D (130 x 310 x 370mm) • Weight = 15.5 lbs. (7.0kg)

V-423 .....\$995.00

V-425

## V-225/V-425 CRT Readout Oscilloscopes

- V-225 DC to 20MHz, 2-channel, panel setting display, cursor readout • V-425 DC to 40MHz, 2-channel, panel setting display, cursor readout • Digital CRT readout of voltage/time differences and panel setting • Panel setting display function provides a digital CRT display of the CH1 sensitivity and the sweep time • Measuring 130 x 310 x 370mm and weighing 7.0kg these scopes have achieved a dramatic level of compactness and light weight • Large (8 x 10cm) CRT display with an internal graticule provides high-resolution with freedom from error causing parallax. In addition, convenient 0, 10, 90 and 100% scale markings have been provided to simplify pulse measurements • DC offset function provides up to  $\pm$  100V of DC offset, enabling high-accuracy vertically expanded measurements of any desired portion of a waveform • Simultaneous observation is possible of the X 10 magnified waveform and the original (non-magnified) waveform using a display mode which alternately displays the magnified waveform and the non-magnified waveform once each sweep • VERT mode triggering • Both voltage and time accuracy are guaranteed to be within  $\pm$  3% over the entire temperature range of 10°C to 35°C • Vertical sensitivity of 1mV/div • 8 divisions of dynamic range provides accurate, distortion-free waveform observation • Dedicated TV sync separation circuit provided to speed up measurements of video signals • Built-in signal delay line makes possible the measurement of the leading edge of even fast risetime signals, (V-425 only) • X-Y mode provides a convenient method of measuring the phase difference between two waveforms

# COLOR TELEVISIONS

## CT-1371 13" Color Television

- Tinted picture tube
- Signal tracker system

CT-1371 ..... \$219.95

## CT-1955 19" Remote Color Television

- VHF/UHF/36 cable channels
- 19 button random access electronic tuning with infrared remote control
- Signal tracker system
- Off timer
- On screen volume and channel indicator
- Earphone and record jacks
- Last channel recall
- Cabinet finish is wood-grain vinyl over wood products
- 18<sup>7</sup>/<sub>16</sub>" H x 23<sup>1</sup>/<sub>16</sub>" W x 18<sup>3</sup>/<sub>4</sub>" D
- Weight 48.5 lbs.

CT-1955 ..... \$369.95

## CT-2066 W/B 20" Flat Square Color Television

- VHF/UHF/49 cable channels
- Random access electronic tuning with infrared remote control
- Signal tracker system
- Channel on screen
- Input jacks
- Volume on screen
- Off timer
- 100% solid-state video system consists of miniaturized, high performance integrated circuits (IC's)
- Special optically tinted picture tube glass face reduces reflected glare from room light and improves contrast
- 20" flat square tube (FST) provides a flat picture with square corners that looks more natural
- Picture distortion in corners is reduced and there is much less reflection of room light
- The comfortable viewing angle is increased due to the flat tube surface
- The touch of a button on the remote hand unit instantly switches to the previous channel viewed
- 18<sup>3</sup>/<sub>4</sub>" H x 20" W x 19<sup>7</sup>/<sub>8</sub>" D
- Weight 62 lbs.
- Comes complete with antenna connections providing for a conventional 300 ohm connection and for a 75 ohm connection used for cable television or master antenna distribution systems

CT-2066W With Walnut Cabinet ..... \$419.95

CT-2066B Black Cabinet ..... 419.95

## CT2268W 22" Square VU Color Television

- 125 cable channel capability • Built-in multi TV sound
- Component TV 22" square corner tube • Distortion-free circuit • Volume on screen • ABLC circuit • Channel on screen
- Input-output jacks • Comb filter + wide band video amplifier • Signal tracker system • Random access electronic tuning with infrared remote control • Dual RF • 30 button TV/VCR unified remote

CT2268 ..... \$659.95

\*Local cable companies may require special adaptors for receiving regular or "premium programs"

CT-1955

CT-2066

- VHF/UHF/125 cable channels
- Random access electronic tuning with infrared remote control
- Comb filter
- Channel and volume on screen
- Wide band video amplifier
- A/V input jacks
- Signal tracker system

CT-2660 ..... \$629.95

## CT-2667W/B 26" Color Television

- Built-in multi TV sound
- VHF/UHF/125 cable channels
- Random access electronic infrared remote control
- Channel and volume on screen
- Comb filter plus wide band video amplifier
- Video and audio input jacks
- Dual speaker system
- 30 button TV/VCR unified remote

CT-2667W Wood Grain ..... \$819.95

CT-2667B Black ..... 819.95

## CT3170 31" Square VU HS Color Television

- 31" aspherical high-performance square tube • 600 lines horizontal resolution • MTS built-in TV/monitor • Built-in surround sound • Retractable speakers • Full on screen picture/sound control • AV input jack and TV out jack • Signal tracker system • S input connector • 36-button TV/VCR unified remote control • VHF/UHF/125 cable channels • Dual RF • Off-timer • Last-channel recall • On screen volume control • On screen channel numbers

CT-3170 ..... \$2199.95

## CT3175 31" Square VU HS Color Television

- Same features as CT3170 except: • Double feature digital 2TV • 39-button TV/VCR unified remote control

CT3175 ..... \$2499.95

# CAMERA/RECORDERS

## VM-C30A Compact VHS Movie Camera/Recorder

- 2/3" Metal Oxide Semiconductor (MOS) Image Sensor contains 300,000 picture elements • 10 lux f/1.6 x 6 zoom • Horizontal resolution 350 lines • Tape Tracker and Cylinder Stabilizer design with a 50-micron bulge on the head cylinder surface prevents the tape rolling
- HQ circuitry • Detail Enhancer circuit emphasizes the electronic signal to make faint lines within the image sharper and bolder • White Clip Extender raises the white clip level of the luminance signal, for sharper results, with enhanced depth and vividness • State-of-the-art, highly rationalized IC circuitry, a slim direct motor, a streamlined mechanism, and a cube-type body • High sensitivity infrared auto focusing system • Auto white balance • Iris adjustment is automatic • Self Timer with two settings—30 seconds or unlimited • Electronic Viewfinder shows battery condition, tape counter, current mode (REC, FF, REW), and gives a 5-minute tape remaining warning • Recording Check • Synchro Edit • SP and LP Modes • Wind Noise Cut • Playback on TV or VHS VTR • Standby Slide Cap • Weight 3.08 lbs.

VM-C30A

VM-C30A . . . . . \$1399.95

## VM-3000A VHS Movie Camera/Recorder

- 2/3" MOS Image Sensor contains 300,000 picture elements • 7 lux at 50 IRE • Horizontal resolution 380 lines • Tape Tracker and Cylinder Stabilizer design with 50-micron bulge on the head cylinder surface prevents the tape rolling that degrades recording and playback quality
- Maximum record time: 160 minutes • Quick Shot High Speed Shutter provides five different shutter speeds (1/60 to 1/2000 sec) • HQ circuitry • Detail Enhancer circuit emphasizes the electronic signal to make faint lines within the image sharper and bolder • White Clip Extender raises the white clip level of the luminance signal, for sharper results, with enhanced depth and vividness • Through the lens auto white balance • High sensitivity infrared auto focusing system • Iris adjustment is automatic • Self timer with two settings—30 seconds or unlimited • Electronic viewfinder shows battery condition, tape counter, current mode (REC, FF, REW), and gives a 5-minute tape remaining warning
- Date recording • Recording review • Playback on TV or VHS VTR • Power Zoom: 6:1 • AV In, Out • Weight 6.2 lbs. with battery

VM-3000A

VM-3000A . . . . . \$1399.95

# VIDEOCASSETTE RECORDERS

## VT-2000A with HQ

- Front load, 107 channel VS tuner • Auto power on/play • 4 program/14 day timer
- Special effects • Needs less than 4" of shelf space • Local VHF and UHF stations, plus 26 cable channels • Mode display
- Built-in tuner/timer allows preset recording of as many as four different programs up to two full weeks in advance • Instant Recording Timer (IRT) with a start button lets you set the length of recording in simple 30-

minute increments totaling up to 4 hours

- Wireless 23-function remote control unit is provided as standard equipment • Digitally "combs" the incoming signal to separate the black and white from the color signal • Fine edit • Auto power on/play • Auto rewind/shut-off • Repeat play mode • 10 key direct channel access remote control • Frame by frame mode • Rotary 2 head helical scanning azimuth recording

VT-2000A . . . . . \$349.95

VT-2000A

## VT-1320A with HQ

- Front load, 3 head • 4 prog./2 week timer • VS tuning, 107 channel • IRT, fine edit • 26 function, 23 button IR remote • SP and EP recording modes • Needs less than 4" of shelf space • Digitally "combs" the incoming signal to separate the black and white from the color signal. This results in 25% more picture producing lines • Memory rewind/stop—tape rewind halts automati-

cally when counter returns to the "0000" setting • Repeat play mode • Auto rewind/off at end of tape • Large-scale integrated circuit (LSI) logic controls • Tape-in indicator to confirm loaded cassette is in place • Auto playback speed selector • Rotary 2-head helical scanning azimuth recording, one head for special effects on playback

VT-1320A . . . . . \$379.95

VT-1320A

## VT-1350A HQ

- Front load • 3 head • 4 program/14 day timer • 107 channel cable ready • Touch N' View remote (30 function) • Slow motion, Frame advance, Repeat Play • IRT-fine edit • Mode display, auto power on

VT-1350A . . . . . \$399.95

## VT-1410A HQ

- Front load, 2 head • 4 program/14 day timer • 107 channel cable ready • IR remote (23 function) • Direct access • Special effects • LIN stereo rec/play Dolby NR • MTS jack • Auto power-on

VT-1410A . . . . . \$379.95

## VT-1430A HQ

- Front load, 2 head • 4 program/14 day timer • 107 channel cable ready • IR remote (23 function) • Direct access • Special effects • LIN stereo rec/play Dolby NR • MTS built-in • Auto power-on

VT-1430A . . . . . \$429.95

## VT-1450A HQ

- Front load, 3 head • 4 program/14 day timer • 119 channel cable ready • IR remote (35 function) • LIN stereo rec/playback Dolby NR • Touch N' View remote • IRT-fine edit • Mode display, auto power on • MTS built-in

VT-1450A . . . . . \$529.98

## VT-2500A HQ

- Front load, VHS Hi-Fi • 4 head high performance video 8 program/1 year timer • Special effects OSD • Touch N' View LCD remote • MTS broadcast stereo • Auto channel-memory tuner • All VHF/UHF + 125 cable channels

VT-2500A . . . . . \$749.95

## VT-2600A HQ

- Front load, VHS Hi-Fi • 4 head high performance stereo sound • 8 program/1 year timer • Digital special effects OSD menu • Touch N' View LCD remote • MTS broadcast stereo • Auto channel-memory tuner • All VHF/UHF + 125 cable channels • Auto play/rewind

VT-2600A . . . . . \$849.98

## VT-2700A HQ

- Digital XSE, OSD • PNP picture in picture • 12 picture-multi channel scan • 12 picture multi strobe • TV still • Mosaic/painting digital special effects • MTS broadcast stereo • Auto channel memory tuner • All VHF/UHF + 97 cable channels

VT-2700A . . . . . \$1299.00

## VT-1370A HQ

- Front load, 3 head • 4 program/14 day timer • 107 channel cable ready • IR remote (36 function) • Slow Motion, Frame Advance, Repeat Play • IRT-fine edit • Mode display, auto power on

VT-1370A . . . . . \$529.95

## VT-1570A HQ

- Front load, 3 head • 4 program/14 day timer • 119 channel cable ready • Auto programming • LIN stereo rec/playback Dolby NR • Digital interface unified (36 function) remote • Slow Motion, Frame Advance, Repeat Play • IRT-fine edit • Mode display, auto power on • MTS built-in

Assembly Charge is \$25.00 Per Unit.

### ERB Series Pedestals

- Panel mounting hardware is supplied with all units
- All units will be painted gray hammertone unless specified
- Units marked K.D. will be shipped Knockdown unless specified
- All writing surfaces will be finished in walnut unless specified

Material — 18 Ga. CRS of welded construction

Panel Mounting — Flanges recessed 9/16" and punched with 9/32" holes on standard E.I.A. spacing

Back Panel — Removable with 2 rows of 6" louvers

Knockouts — Five 7/8" knockouts provided in each pedestal

Knee Panel — Provided between each pedestal

Levelers — Four leg levelers provided

Top Surface — Available in two standard, attractive finishes with stainless steel edge trim

Louvers — 2 rows of 6" louvers in back and bottom panels

Color — Your choice of 20 standard baked enamel colors

### CR-1004 19" Modular Cabinet Console

Material — 14 Ga. CRS frame and base with 11 Ga. CRS mounting angles and 16 Ga. CRS rear door and front panel

Panel Mounting — Angles tapped for 10-32 screws on standard E.I.A. spacing

Slope — Upper panel space on 30° slope

Casters — 2 1/2" diameter with load capacity of 200 lbs. each

Rear Door — Provided with center support channel, 4 groups of six 6" louvers, spring hinge and 2 point chrome flush lock

Top Panel — Made of perforated metal

Writing Surface — Included; available in two standard finishes

Color — Your choice of 20 standard baked enamel colors

# REAR PROJECTION SCREEN/TAPE-MENDER

117

620

## 117 Video Tape-Mender Repairs VHS and Beta Format Cassettes

A unique, patented system for repairing damaged or broken video cassettes in either format, Beta or VHS.

The Video Tape-Mender holds a Beta or VHS Cassette in repair mode with the cassette door fully open. Guide pins built into the Tape-Mender guide the tape from the video cassette to the repair area with base side up. The tape can be shuttled left or right via a Hub Drive Unit.

Hold-down clamps position the tape in an alignment track where it may be cut. The clamps are then used to position the pre-cut adhesive backed splice tape. The tape supplied is very thin and strong so that the repair, once made, is permanent. The adhesive has high tack and will not bleed or change with age or use.

Hudson's Video Tape-Mender includes orientation pins, alignment track and clamps, sheers, cutting blade, Hub Drive Unit, Quik Splice pre-cut adhesive tabs and instructions. All tools are stored within the Tape-Mender Work Station. . . . . **\$43.00**

## 620 Video Transfer Screen

Easy video transfer is made possible from slides, motion pictures and filmstrips using this folding rear projection screen.

It can be used with existing slide, motion picture and filmstrip projectors for video transfers.

A video camera focused on the 8" x 8" screen surface of the Groupshow Mini Rear Projection Screen will allow the user to transfer still or moving images to a VCR or video tape recorder. Zooms, pans and close-ups are easy to do and allow the user to create special effects including motion from slides.

It is equipped with a "first surface" Mirrorlite Mirror and a grainless acrylic rear projection screen for high quality image transfers. It includes a top cover to exclude ambient light and measures just 1" x 9<sup>5</sup>/<sub>8</sub>" x 12<sup>1</sup>/<sub>4</sub>" when folded for storage.

Any type of film projector may be used with this rear projection screen. No special lenses are required. When not in use as a video transfer screen the Groupshow may be used for tabletop viewing or editing of slides and movies. Hudson also makes additional rear projection screens with larger screen dimensions . . . . . **\$64.00**

## 1000 Color Projector

- 1000 lines resolution
- 3 projection lenses converged at screen
- Front or rear projection
- Digital convergence
- Electronic keystone correction
- Computer terminal available as option

## Specifications

**Light Output:** 800 lumens in the useful area using standard lens

**Contrast:** At least 50:1 full range white-field to dark-field

### Color

**Registration:** Maximum offset of red and blue with respect to green:

0.1% of picture height of a square raster, inside a circle whose diameter equals 0.8 times the picture height.

0.2% of picture height of a square raster, outside a circle whose diameter equals 0.8 times the picture height.

**Picture Linearity:** ± 1% maximum error, measured along major axes

### Projection

**Geometry:** Aspect ratio 4:3, 1:1, 3:4 or special, as ordered

Throw ratio (image diagonal to throw distance):

1:2.25 ± 5% standard lens

1:1.13 ± 5% wide angle lens

Projection Distance: 8'-75'

Maximum projector tilt angle from horizontal:

0° at 8' projection distance

12° at 20' projection distance

15° at 75' projection distance

**Resolution:** 1000 TV lines minimum at center of each RGB primary image using standard lens

**Raster Rates:** Horizontal: 15kHz to 75kHz

Vertical: 25Hz to 120Hz

Maximum Raster: 1225 lines, 60Hz non-interlaced  
 1 RGB video channel, analog, composite or non-composite, 0.5V p-p to 1.5V p-p, 75 ohms

### Signal Inputs:

1 RGB video channel, digital, 2 bits per color, 1.0V p-p to 5.0V p-p

Composite sync input, 1.0V p-p to 5.0V p-p

Separate sync inputs, H and V, 1.0V p-p to 5.0V p-p

### Video Specifications

**Bandwidth:** DC to 100MHz at -6dB

DC restored, selectable at sync tip or back porch

### Mechanical:

Projector console

50" H x 25" W x 40 1/2" D

Weight: 500 lbs.

Convergence and control unit

30 1/4" H x 23 1/8" W x 24" D

Weight: 200 lbs.

### Power

**Requirements:** 115VAC, 50/60Hz, 2.5kW

Dedicated 30A circuit required

125V 30A twist-lock connector standard

220-240VAC, 50/60Hz, 2.5kW, optional

1000 . . . . . \$145,000.00

1000

800

## 800 Large Screen Monochrome Projector

- High light output display gives a bright image in ambient light, does not require darkened viewing area
- Inherent properties of the liquid crystal light valve completely eliminate image flicker
- Quick setup, simple master controls, and convenient remote control make operation easy
- Solid-state design totally eliminates warm-up periods, provides quiet, trouble-free performance
- Raster shaping eliminates keystone effect, permits alternate room arrangements
- 80MHz bandwidth provides instant compatibility with today's higher performance computer systems, makes small text sharper, easier to read

This unique computer graphics projector combines high intensity illumination with the exclusive Hughes liquid crystal light valve to generate bright, high resolution, real-time projected displays in normal room light.

When combined with your computer, it becomes a complete information presentation system for learning or decision-making environments.

A special feature of the 800 graphics projector is its remote control operation, which gives the user greater flexibility in moving around. And with the standard RS-232 link, the remote unit provides truly effective interactive conferencing; in addition to controlling the computer's information, the projector functions can also be controlled by the computer.

The sleek simplicity of the projector's solid-state design results in a lightweight yet durable unit with long life and low maintenance cost. The unit can be positioned at the optimum distance from any screen, depending on the size of the audience and room area, and project an image as wide as desired.

# ROUTING SWITCHERS

## SRB 8/1 Video Switcher

- 8 Video Inputs
- Broadcast Quality
- LED Indicators
- Single RU Frame
- Remote Option
- Meets AVR-1 Specs

**SRB-8/1 Video Only Routing Switcher** is our plain vanilla unit. Frame houses one VSM-9 and one VPS-153 module with front panel access for maintenance. Local front panel displays video status on LEDs. Compact rackmounting with excellent performance.

**Rear Panel** shows loopthrough BNC video inputs which exhibit  $> 50\text{dB}$  return loss. Dual video outputs have  $> 0.1^\circ$  diff.  $\phi$ . 0.1% diff G and 0.1dB response. Equipped with captive AC cord and remote plug for parallel control.

**RCP-100 Remote Panel** has 8 LED switches mounted in 19" single RU panel. Single wire per crosspoint control.

### Ordering Information

**SRB 8/1** 8 input, video only

#### Options

**RCP-100** Remote 8/1 Panel

**CAB-1** Cable for RCP-100

**SRX-162** Extender Module

**LCP-100** Local Control Panel

## SRB-182 AFV Switcher

- 8 Video Inputs
- 8 Audio Inputs
- AFV Operation Only
- One RU Frame
- Remote Option
- Meets AVR-1 Specs

The **SRB-182 AFV Switcher** frame construction is identical to the SRB 8/1 above except for the rear panel. Audio Follow Video operation is standard and controlled locally by LED switches mounted on the front panel. Audio response of 0.1dB from two outputs with  $< 0.1\%$  THD at levels up to  $+24\text{dBm}$  over the range of 20Hz to 20kHz.

**Rear Panel** of the SRB-182 AFV Switcher shows loopthrough BNC video inputs and dual video outputs. Audio inputs and outputs are through an RDI terminal block for ease of wiring. Equipped with captive AC cord and remote plug for parallel AFV control.

### Ordering Information

**SRB-182 AFV** Complete 8 Input AFV

#### Options

**RCP-100** Remote 8/1 Panel

**CAB-1** Cable for RCP-100

**SRX-162** Extender Module

**LCP-100** Local Control Panel

## SRB-481 Dual Video Switcher

- Dual Video
- 8 Input Groups
- Separate Control
- Vertical Interval
- Two Remote Panels
- Meets AVR-1 Specs

**SRB-481 Dual Video Switcher** provides two independent 8 input, dual output video switchers in a single RU frame. Frame houses one VPS-151 power supply and two VSM-9 video modules with fold down front panel access. Independent vertical interval switching on last video.

**Rear Panel** of the SRB-481 show an independent set of BNC looping inputs and dual outputs for each video group. Contact closure to ground on a single wire per crosspoint through the individual rear mounted connectors provides parallel remote control. Equipped with a captive AC cord and fuse protection.

### Ordering Information

**SRB-481** Dual Video, 8 + 8 Inputs

**SRB-381** Equipped as one channel

### Options

**RCP-102** or Remote Dual 8 + 8 Panel

**RCP-100 (2 ea.)** Remote 8/1 Panel

**CAB-1 (2 ea.)** Cable for above

**SRX-162** Extender Module

**LCP-100** Local Control Panel

**LCP-102** Local Control Panel

## SRU-YRGB Video Switcher

- YRGB or RGB Switching
- Single Control Panel
- Dual Outputs per Bus
- Two RU Frame
- Complements UltiMatte®
- Meets AVR-1 Specs

SRU-YRGB Video Switcher consists of four individual 8 input, one bus VSM-900 switchers in a two RU frame. Outputs are simultaneously controlled by one RCP-100 panel to provide Y, R, G, B switching. Dual outputs on each bus allow monitoring and direct feeds. Unit may be used for 3 channel RGB switching by removal of one VSM-900 module.

Back Panel Shows four groups of 8 loophrough BNC inputs for Luminance (Y), Red (R), Green (G), and Blue (B). Each channel has dual outputs. Equipped with a standard AC connector and a 1A Circuit Breaker/Switch.

RCP-100 Control Panel provides 8 LED switches for singular control of all channels. Panel is single RU high and mounts in a standard 19" rack.

### Ordering Information

- SRU-YRGB 4 Channel YRGB Video Switcher
- SRU-RGB 3 Channel RGB Video Switcher
- RCP-100 Control Panel for 8 Inputs
- CAB-1 Cable for RCP-100

### Option

- SRX-162 Extender Module

# ROUTING SWITCHERS

## MRA/MRB-8/8 Audio and Video Switchers

- 8 Inputs • Up to 8 Output Buses • Up to 4 Channels • Audio, Video, AFV • Dual Power Supplies • Vertical Interval Switch • Differential Audio In/Out • Meets AVR-1 Specs

MRA/MRB 8/8 Audio and Video Routing Switchers provide 8 buses which can select from 8 buffered inputs. Each bus including control logic, transparent switches and output amplifier is contained on one module. A separate buffer module feeds signals through a motherboard to each crosspoint module. Frame has space for redundant power supply and all modules are removable from the front.

MRA Rear Panel shows the eight looping inputs and dual outputs on each bus. Frame space for two redundant VPS-154 power supplies, one VBMB buffer module and eight VCM8 crosspoint modules. Individual connectors for looping and bus control. Separate AC inputs.

RCP-104 Control Panel controls up to eight buses using individual rotary pushbuttons plus take pushbuttons for selections. Panel is standard 19" width and requires only one RU of space. LED indicators.

### Ordering Information

Size	Video	Audio
8 Inputs/1 Out	MRA 8/1	MRB 8/1
8 Inputs/2 Out	MRA 8/2	MRB 8/2
8 Inputs/3 Out	MRA 8/3	MRB 8/3
8 Inputs/4 Out	MRA 8/4	MRB 8/4
8 Inputs/5 Out	MRA 8/5	MRB 8/5
8 Inputs/6 Out	MRA 8/6	MRB 8/6
8 Inputs/7 Out	MRA 8/7	MRB 8/7
8 Inputs/8 Out	MRA 8/8	MRB 8/8

MRB Rear Panel shows the RDI terminal blocks for audio differential inputs and outputs. Frame contains space for two APS-155 power supplies, one ABM8 buffer and eight ACM8 crosspoint modules. Individual connectors for bus control plus looping connectors. Separate AC inputs.

RCP-100 Control Panel is equipped with LED switches for control of 8 inputs on one bus. Up to eight panels may be used at separate locations for video, audio or AFV operations. Single wire per crosspoint.

### Control Panels

- RCP-100 Panel, 8 Inputs, 1 Bus
- RCP-102 Panel, Dual 8 In for 2 Buses
- RCP-104 Panel, TW/Take for 8 Buses
- CAB-1 Cable for RCP-100, RCP-102
- CAB-3 Cable for RCP-104 (2 RQD)

### Options

- REX-161 Extender Module
- VPS-154 Redundant Video P.S.
- APS-155 Redundant Audio P.S.

## IRS 48 x 48 AUDIO/VIDEO INTERMEDIATE SIZE ROUTING SWITCHER IRS 24 x 24 VIDEO AND 3 CHANNEL AUDIO INTERMEDIATE ROUTING SWITCHER

- No fans or blowers are required. Thermal design provides for efficient heat removal. All integrated circuits are state-of-the-art, require very little power and are mounted in high quality I.C. sockets. All components are off-shelf and most dual sourced, available from an electronic parts house near your location.
- All modules are identified by matrix card slot for the computer software, not by individual module. Permits total type interchange.
- Back-plane inputs and outputs (signal I/O) modules are direct plug-in, with no intervening cables or wires to cause signal degradation or timing changes which complicate future maintenance problems.
- Each module has close tolerance on-board voltage regulators for maximum isolation characteristics. The input to each regulator is fused and its output is protected by automatic thermal shutdown and current limit.
- The video buffer has Differential Inputs to assure a high degree of common mode or hum rejection.
- The video channels use vertical interval switching featuring back porch clamping to assure bounce-free switching between signals with widely different APLs. No SC traps are used. The circuit is designed to clamp only when there is a difference in DC levels, thus helping to maintain excellent system transparency.
- Audio input is balanced differential for either balanced or unbalanced sources, has input impedance greater than 50K ohms and operates at levels up to +24dBm.
- Dunker circuit gives "pop free" on-line audio switching.

### IRS 48 x 48

System can start as small as 12 x 12, single channel, and expand to 48 inputs by 96 outputs with up to four channels of Audio, Video and Time Code in any combination.

The IRS is available as individual Video, Audio 1, Audio 2, and/or Time Code Matrices with a maximum capacity of 48 inputs by 48 outputs in just 17 rack units, (29.75").

### IRS 24 x 24

Can start as small as 12 x 12, single channel, and expand to 24 inputs by 24 outputs with up to three channels of Audio.

### IRS CONTROL PANELS

This series of control panels can be used on all HEDCO microprocessor based routing switchers. Control is via shielded twisted pair (balanced) using RS 422 protocol, MPU 6803 based.

**RCP-301:** Basic single bus control panel. Keypad entry, Audio follow Video.

**RCP-302:** Single bus control panel. Keypad entry, separate Audio and Video selection.

**RCP-303:** X-Y control panel. Keypad entry for control of all buses. Audio follow Video.

**RCP-304:** Single bus control panel. Keypad entry, separate Video and two channel Audio selection.

**RCP-311:** 1 R.U., 16 pushbutton "shot box" panel. Buttons can be easily programmed to access any 16 inputs of 24, all levels.

**RCP-306:** X-Y control panel. Keypad entry for control of all buses. Separate Video and two channel Audio selection.

**RCP-307:** Single bus control panel. Keypad entry, separate Video and three channels of Audio.

**RCP-310:** 2 R.U. 48 pushbuttons. (IRS 48 x 48 only)

**RCP-305:** 1 R.U. 24 pushbuttons. (IRS 24 x 24 only)

IRS 24 x 24

### IRS FRAMES

Both Models' Switchers are contained in 17 rack units 29.75".

### IRS MODULES

#### IVI-611 Video Input Buffer

- Back porch clamp
- Differential inputs
- Equalization for 200' of 8281 or equivalent cable
- On board power supply regulation
- 6 buffers per module

#### IXP-144 Audio or Video Crosspoint

- 12 x 12 array
- Crosspoints are transistor arrays in IC sockets
- Vertical interval switching (refer to house sync)
- On board power supply regulation

#### IVO-612 Video Output Amplifier

- On board power regulation
- 6 output amplifiers per module
- Two separate full level outputs per amplifier
- Output gain unity,  $\pm 3$ dB adjustable

#### IAI-601 Audio Input Buffer

- Accepts balanced or unbalanced audio lines
- Differential inputs
- S/N ratio > 90dB
- On board power regulation
- 6 buffers per module

#### IAO-602 Audio Output Amplifier

- 600 ohms or 150 ohms outputs
- 6 output amplifiers per module
- Two separate full level outputs per amplifier
- +24dBm max. at 600 ohms; +27dBm max. at 150 ohms

#### ICL-412 Computer

- One required for each 12 buses
- On board diagnostics
- Non-volatile E<sup>2</sup> RAM for unlimited memory retention
- MPU 6803 based at 76.8 Kbaud

#### ICI-401 Bus Interface

- One required for each 12 buses
- Uses RS-422 bi-directional controls
- Change module for RS-232-C

# ROUTING SWITCHERS/ DISTRIBUTION AMPLIFIERS

## HD-12 Routing System

- 12 X 12 Audio and video in one 2RU frame
- 12 x 12 Stereo audio in one 2RU frame
- Serial control card included in each frame, RS232 and RS422 ports
- High definition performance
- Multi level control-breakaway or AFV

The HD-12, 12-input, 12-output audio and video switcher series is designed to fill the requirements for routing switchers between the HEDCO's SR and MR series small switchers and the IRS, intermediate size switchers.

The HD-12V Video Switcher is housed in a two rack-unit frame, complete with power supply and RS232/RS422/RS485 serial control card. The HD-12A audio frame will house either single 12 X 12 audio or stereo 12 X 12 audio. A 12 X 12 video with stereo audio switcher is available in four rack units including power supplies and serial control. Also, a 12 X 12 Video and 12 x 12 Audio Switcher is available in one 2 rack unit frame. Since each switcher frame, either audio or video, has its own serial control card, the frames may be remotely controlled, together or separately, on the same common party line. Front panel local control is available as an option.

## HD Series Distribution Amplifiers

Any mixture up to twelve HDA modules or power supplies can be included in the HD series frame.

### AUDIO

**HDA-201** Audio line amplifier, 8 outputs, gain adjustment per output. (Available in configurations of 1 X 4 stereo, 1 X 8 stereo unbalanced, 1 X 16 unbalanced) . . . . . \$335.00

### Option:

**HDR-200** Remote gain cell (two cells maximum per HDA-201) . . . . . \$85.00

### VIDEO

**HDA-101** Video distribution amplifier, 8 output . . . . . \$295.00  
**HDA-102** Equalizing DA, 8 outputs (equalizes 1000 ft. of 8281 type cable) . . . . . \$355.00  
**HDA-103** Equalizing DA, 8 outputs (equalizes 2000 ft. of 8281 type cable) . . . . . \$355.00

### Frames and Power Supplies

**HDF-100** Distribution frame complete with single power supply, 3RU . . . . . \$615.00  
**HPS-100** Redundant power supply (120V or 240V) . . . . . \$335.00

## 600 Series Distribution Amplifiers

### VIDEO

**VDA-601** Video distribution amplifier, 6 outputs . . . . . \$175.00  
**VDA-602** Equalizing DA, 6 outputs . . . . . \$215.00  
**VDA-605** NTSC subcarrier DA, 6 outputs . . . . . \$205.00  
**VDA-606** PAL subcarrier DA, 6 outputs . . . . . \$205.00  
**VDA-608** Linear DA, 6 outputs . . . . . \$125.00  
**VDA-609** Regenerative pulse DA, 6 outputs . . . . . \$185.00

### AUDIO

**ADA-600** Audio line distribution amplifier, 6 outputs . . . . . \$185.00  
**ADA-601** Ultra low noise line amplifier, 12 unbalanced outputs . . . . . \$130.00  
**RAD-600** Remote gain line DA, 6 outputs . . . . . \$245.00  
**ADA-602** Audio line distribution amplifier 6 outputs 150/600 ohm . . . . . \$185.00

### Frames and Power Supplies

Frames are complete with a single power supply; redundant power supplies can be added to any of the 6000 series frames.

**ADF-6000** 10-DA Audio frame with one power supply, 2RU . . . . . \$675.00  
**ADF-6400** 4-DA Audio frame with one power supply, 2RU . . . . . \$540.00  
**VDF-6000** 10-DA Video frame with one power supply, 2RU . . . . . \$675.00  
**VDF-6400** 4-DA Video frame with one power supply, 1RU . . . . . \$540.00  
**AVF-6400** Combined 2 audio, 2 video DA frame with one power supply, 1RU . . . . . \$540.00  
**VPS-180** Redundant power supply (120V or 240V) . . . . . \$265.00  
**DEX-160** Extender . . . . . \$45.00

# COLOR CAMERA

## CCD-770

### Compact 3-Chip ENG Color Camera

#### Preliminary

- Vertical smear problem is greatly reduced
- Free of panning distortion
- Moire, ringing and return distortion are greatly reduced
- Electronic shutter captures bodies in motion in a fraction of a second
- Highlight compression circuit and wide dynamic range CCD accommodate scenes with wide contrast range (600%)
- Free of sticking
- Free of microphone noise
- Not influenced by earth magnetics
- After image is greatly reduced
- Registration accuracy of within 0.05% (whole picture area)
- Small size, lightweight, well balanced on the shoulder for ease of operation
- Low power consumption; operates at least 2 hours using a 2.5AH battery
- CCD has long life span, regular CCD replacement is not required
- Registration adjustment not required

The CCD-770 is a high performance, lightweight, compact 3-chip CCD camera incorporating the latest advances in charge-coupled device (CCD) technology.

While turning to best advantage the salient features of CCD, such as freedom from sticking, light weight, miniature size, and long life, the CCD-770 incorporates significant improvements over conventional CCD cameras relative to vertical smear, panning distortion, moire, and other problems.

Also featuring incredibly enhanced operation, the CCD-770 lends itself especially to ENG applications.

#### Specifications

<b>Optical System:</b>	f/1.4, RGB prism beamsplitter
<b>Lens Mount:</b>	Bayonet type (same as ITC-730A)
<b>Color Temperature Filter:</b>	3200°K/5600°K/5600°K + ND (12.5%)/BLIND
<b>Transducer:</b>	TSL system MID
<b>Effective Picture Elements:</b>	649(H) x 491(V)
<b>Scanning System:</b>	2:1 interlace, 525 lines, 60 field/sec., 30 frame/sec.
<b>Sync System:</b>	Internal sync: sync signal generator built in External sync: Genlock system (Automatically switched to internal sync mode when external sync signal is not supplied.)
<b>Encoder System:</b>	I/Q
<b>Aspect Ratio:</b>	4:3
<b>Horizontal Resolution (G ch):</b>	480 TVL or better (whole picture area)
<b>Signal-to-Noise Ratio:</b>	≥ 53dB (p-p/rms, Isig 0.2μA, encoder output, with gamma and detail off)
<b>Illumination:</b>	a) Minimum 40 lux, f/1.6/3200°K (89.9% reflectance, + 18dB gain) b) Standard 2000 lux, f/4.0/3200°K (89.9% reflectance)

<b>Gain Switch Position:</b>	0dB/ + 9dB/ + 18dB
<b>Shading Correction:</b>	Black and white shading correction for both H and V
<b>Video Matrix:</b>	Built-in (with on/off switch)
<b>Flare Compensation:</b>	Built-in
<b>Highlight Compression:</b>	600%
<b>Detail Correction:</b>	H: balance (with comb filtering) V: balance (2H system)
<b>Color Bars:</b>	Split Field type (RS-189A)
<b>Registration:</b>	Within 0.05% (whole picture area)
<b>Automatic Function:</b>	Auto white balance Auto white balance memory Auto black balance and level Auto iris Auto knee (highlight compression)
<b>Shutter Function:</b>	1/100, 1/125, 1/250, 1/500 sec.
<b>Microphone Input:</b>	-60dBm, 600 ohms
<b>Audio Output:</b>	Balanced (-60dBm, 600 ohms) or Balanced (-20dBm, 600 ohms, with AGC) switchable
<b>Intercom:</b>	Mike on/off switch provided switchable between Carbon/Dynamic
<b>Video Output:</b>	VBS 1.0V p-p/75 ohms
<b>Monitor Output:</b>	VBS 1.0V p-p/75 ohms or VS 1.0V p-p/75 ohms R/G/B/R-G/B-G/ENC switchable)
<b>Power Requirement:</b>	DC + 12V nominal
<b>Stability:</b>	Stable when the DC input voltage fluctuates 11V ~ 32V
<b>Power Consumption:</b>	9W approx.
<b>Ambient Temperature:</b>	+ 14°F ~ + 104°F (-10°C ~ + 40°C)
<b>Dimensions:</b>	10.59" H x 3.74" W x 12.32" D (269 x 95 x 313mm)
<b>Weight:</b>	8.6 lbs. (3.9kg) approx.
<b>CCD-770-1</b>	Camera head only ..... \$ 5,545.00
<b>CCD-770-2</b>	Camera head, 1.5" viewfinder, 6' cable, case ..... 6,000.00
<b>CCD-770-3</b>	Same as CCD-770-2 plus A 12X 10F Fujinon lens ..... 7,130.00
<b>CCD-770-4</b>	Studio-4, EFP version CCU, 5" viewfinder, 25 meter camera cable, remote module, A12X10F Fujinon or choice of Canon J12X10B3 or Fujinon A13X10F lenses ..... 11,000.00

# COLOR CAMERA

## ITC-735 ENG/EFP Color Camera

- High-speed f/1.4 prism optical system produces quality color reproduction, high sensitivity, excellent resolution and low shading
- Three Saticon® IV tubes with high voltage operation, and low-noise preamplifiers offer excellent picture quality with 750 TV lines resolution and 58dB S/N ratio
- 2:1 interlaced 525 lines, 60 fields/30 frames/sec. (NTSC)  
2:1 interlaced 625 lines, 50 fields/25 frames/sec. (PAL)
- Dramatically sharp pictures are achieved with a 2H detail corrector (standard) and a built-in comb filter, with crisp and level dependent circuits which maintain optimum setting for best picture quality
- A built-in switchable highlight compression circuit automatically enables reproduction of scenes, and contains up to 600% video level
- Operates under lighting conditions as low as 40 lux, using the high gain position (+ 18dB)
- Black shading circuit corrects for frame shading as well as sawtooth and parabola effects, so that the black level will be optimal throughout, even with + 18dB gain
- Sawtooth and parabola white shading correction is provided for each channel
- Employs a video matrix circuit for accurate color reproduction
- Dynamic focus compensates for R, G, and B tubes independently for sharper pictures in the corners
- Individual flair correction circuits correct flare generated in lens optical system, pick-up tubes, etc., thereby ensures satisfactory black levels
- Saticon IV tubes further improves LAG and high-light sticking characteristics
- Compact and lightweight camera head (4.7kg) is balanced to reduce operator fatigue during extended operation
- Furnished with advanced micro-computerized automatic functions required in an ENG camera
- Full range of character display functions, visible on the VF screen, contain overall condition of the camera, to minimize the risk of operational errors. Character displays can be switched off
- In the Auto Iris mode, a unique system allows shooting scenes with high luminance, such as the sky background, where peaked average values can be selected
- Automatic iris close protects tubes from damage wherever the power is off
- Tubes are also protected by a delay circuit, which opens the iris after the beam has stabilized
- Filter settings are:  
Indoors—3200°K, outdoors (cloudy weather), 5600°K, outdoors (sunny weather) 5600°K + 1/8ND, CAP (when not in use) BLIND
- For optimum matching of video levels, an easy-to-read zebra pattern indicator is displayed in the VF
- Power consumption can be reduced by using Standby mode (during Standby: approx. 2W)
- Memory of auto white, auto black and auto centering is retained with a 10-year lithium battery
- External switches and controls are functionally positioned to minimize operational errors

ITC-735

- Built-in stable genlock circuit makes external sync operation possible. Switching between external and internal sync operation is automatic
- Horizontal and vertical blanking widths are adjustable. For vertical blanking width, a 3-position switch is provided (18H/19H/20H)
- VTRs supplied with component signals can be connected by adding an optional module in the camera for the appropriate format
- The CCU can be operated from the camera head to a distance of up to 100 meters
- Optional remote unit connects directly to camera using a single coaxial cable for control
- The TCU-735 (option) is especially designed for teleconferencing applications. Four cameras can be controlled and powered simultaneously via coaxial and DC power cables
- Plug in modules
- Electronic rotation adjustment makes back focus much easier
- A monitoring switch is provided on the outside of the camera for convenience
- Bayonet mount
- Minimum 40 lux illumination at f/1.6/3200°K (+ 18dB gain)  
Standard 2000 lux at f/4.0/3200°K, 89.9% reflectance
- Automatic camera tube protection is provided in case of sweep failure of either horizontal or vertical scanning

## Accessories

- CCU-735 Camera Control Unit
- TCU-735 Tele-Conference Unit
- VFM-152 1.5" Viewfinder
- VFM-572 5" Viewfinder
- ACP-735 AC Power Pack
- RCU-735 Remote Control Unit

## CCU-735 Camera Control Unit

- Add the CCU-735 and a variety of remote control functions are possible
- Cable length: 300m maximum
- 2-wire/4-wire/RTS intercom system available, common/private selectable

ITC-735 ENG version ..... \$ 8,895.00  
ITC-735 EFP version ..... 12,320.00

## HL-379A

### Compact, Lightweight, ENG Camera

- Compact, lightweight, 3.1kg with VF
- Low power consumption, 13W
- Dynamic detail incorporated for correction of lens corner resolution
- White shading correction circuitry in lens extender use incorporated
- Auto highlight compression
- Knee aperture correction
- SMPTE color bars incorporated
- Genlock circuitry incorporated
- High grade picture quality obtained by horizontal three DTL
- Auto iris permits easy shooting of backlighted scenes
- External remote control using digital commands. The following functions can be remotely controlled: R/B Gain, R/B/M Ped, Iris, DTL Level, Iris Auto/Manual, VTR Start/Stop, Call, Auto White
- A built-in sound monitor speaker

The HL-379A is a broadcasting quality CCD ENG camera which has high-performance and high-stability despite its compactness and light weight. Besides its usefulness with various types of VCRs, it can be used as a multi-purpose camera with the host of various accessories.

This camera belongs to the UNICAM family which is compatible with all HL-95B accessories.

## Specifications

### Mechanical

**Dimensions:** 9.8" H x 3.7" W x 6.5" D  
 (250 x 95 x 165mm)  
**Weight:** 3.1kg (with 1.5" VF)  
**Lens Mount:** Bayonet (interchangeable with HL-95B/79EAL)  
**Optical Filter:** 1 2 3 4  
 3000°K 5600°K 5600°K OPTION  
 + 1/4ND

### Electrical

**DC Input Signal:** 12V (11 ~ 16V)  
**Power Consumption:** 13W  
**External Sync Input Signal for Genlock:** VBS 1V p-p or BBS 0.45V p-p  
**Return Video Signal:** VBS or VS 1V p-p  
**MIKE Input:** -20dBm, 600 ohm, balanced (with CA-95C)  
**Tally Input:** Power/Contact (with CA-95C)  
**Intercom:** 2-wire/4-wire/RTS (with CA-95C)  
**Sensitivity:** f/5.6  
**Gain Up:** •0, + 12, + 24dB  
 •0, + 6, + 12dB  
 •0, + 12, + 18dB (STD)  
 •0, + 6, + 18dB  
 \*Selectable by internal switches

### Signal-to-Noise Ratio:

> 58dB  
**Resolution:** H: 650 TVL  
 V: 380 TVL

### Video Output

**Signal:** VBS 1V p-p, 75 ohms, 1 output  
 Component output 1 CH  
 RGB output 1 CH  
**VF Video:** R+G+B (normal) or monitor output signal selected by the monitor switch

### Monitor Output

**Signal:** R, G, B, R-G, B-G, Y, ENC

# COLOR CAMERA

HL-95B

## HL-95B Unicam™

- High sensitivity: Max. 24dB
- Small size: 250H x 95W x 165D mm
- Weight: 3.0kg (Camera + 1.5" VF)
- Full shading correction: Black and white
- Dynamic focus correction
- Flare correction
- Geometry correction
- Color video matrix
- Knee aperture correction
- Viewfinder:
  - White balance indication
  - Battery warning indication
  - Tally (Red) indication
  - Gain up indication
  - Stand-by indication
  - Audio level indication (CH1, CH2)
  - Tape remaining time indication
  - Filter position indication
- Color bars: Split field, in accordance with RS-189
- Sync generator: RS-170A, adjustable H. V Blanking
- Automatics:
  - Auto iris
  - Auto iris close
  - Auto iris waiting
  - Auto white balance — A/B/Off (preset)
  - Auto beam, control
  - Auto highlight compression

The HL-95B Unicam provides handheld color camera flexibility, versatility, as well as higher performance, lower weight and power consumption than obtained with previous cameras based on three  $\frac{2}{3}$ " Plumbicon® pick-up tube configurations.

Utilizing a unique building-block concept, the HL-95B is available as a standalone camera, as well as in many other configurations, accommodating on-board professional  $\frac{1}{2}$ " and  $\frac{1}{4}$ " cassette format VCRs, as well as separate  $\frac{3}{4}$ " and 1" VTRs, and remote triax or multicore cable control units.

A  $\frac{2}{3}$ " Plumbicon (electrostatic focus/magnetic deflection) is incorporated into the HL-95B. This tube's photoconductor size, combined with a diode gun electron tube, results in a high sensitivity and high resolution for the camera.

By taking advantage of the low input capacity of the tube, circuit components and advanced circuit technology, a S/N ratio of -60dB is obtained. This allows video gain of up to +24dB for a maximum sensitivity of under 15 lux (using an f/1.6 lens).

**SC-500/SC-500P Studio Camera**

- Three  $\frac{2}{3}$ " Saticon or Plumbicon pickup tubes available
- Dynamic focus to ensure superior corner resolution
- Deflection distortion corrector for extremely low registration error
- Detail corrector for crisp, sharp images
- Black and white full shading correction
- Video matrix to provide accurate color matching between cameras
- Servo-controlled filter disc
- +6/+12dB video gain switch
- Dynamic beam stretch
- Return video
- Level suppression to accommodate high-contrast scenes
- Horizontal resolution (at G channel)—700TVL at center, 600TVL at corners
- S/N ratio—57dB/NTSC, with Gamma, DTL off
- Automatic centering control
- Automatic iris with weighting system
- Auto cap for tube protection
- Auto white and black balance
- Auto black level
- A non-volatile memory retains all the automatic correction data for several years, even when power is removed

The SC-500 is an economical professional studio color TV.

The SC-500/SC-500P viewfinder camera employs three  $\frac{2}{3}$ " pickup tubes and a prism-optics system to produce pictures of superb clarity and color fidelity. The sturdily built, easy-to-service camera can be relied on to keep performing under the most demanding studio conditions. A zebra-pattern video signal indicator in the 7" viewfinder ensures optimum matching of video signals, and a built-in split-field color-bar generator is provided. A character display in the viewfinder permits easy monitoring of camera status while the camera is being used.

Fully modular construction is employed to simplify service and maintenance. Plug-in printed-circuit boards, divided according to circuit function, are utilized. All major controls are located in front of each unit to facilitate adjustments.

<b>SC-500</b> Saticon Tubes (less lens and cable) . . . . .	<b>\$25,009.00</b>
<b>SC-500P</b> Plumbicon Tubes (less lens and cable) . . . . .	<b>29,998.00</b>

# COLOR CAMERA

HL-79EAL

## HL-79EAL Color Television Camera

Although it is smaller and lighter than its HL-79 Series predecessors, the HL-79EAL uses the same proven 2/3" pick-up tubes, while achieving important performance improvements in the areas of sensitivity, signal-to-noise ratio, registration accuracy, resolution and RFI immunity. Picture quality is further enhanced by employing chroma aperture correction, dynamic detail correction, automatic highlight compression, which improves picture quality in highlight areas (particularly effective in exterior operations involving high dynamic light areas), and knee aperture correction.

The HL-79EAL is designed for ease of maintenance with a micro computer to carry out self diagnostic functions. The micro computer assesses the camera's operating condition and makes any necessary corrections in a short time.

The ADC-79E incorporated in the system prints out a statement of the camera's condition via an RS232C port, thus control of the camera can easily be made for the long term.

### Performance Parameters

Various fundamental performance parameters have been emphasized to achieve the superior performance desired by today's program originators.

**Sensitivity** Standard sensitivity is 2000 lux at f/5.0. Maximum sensitivity at +18dB video gain is 20 lux at f/1.4 (using 89.9% reflectance chart).

**Signal-to-noise Ratio** -59dB is achieved with low input capacitance tubes using conventional measuring techniques (0dB video gain).

**Registration** Deviation of Red and Blue with respect to Green is within 0.05% in Zone 1, 0.1% in Zone 2, and 0.3% outside of Zone 2 as a result of the Quadrant Geometry Correction Circuit used.

**Resolution** By operating the pick-up tube in a high voltage mode, center resolution of 650TVL limiting and corner resolution of 500TVL limiting is achieved (using Diode Gun pick-up tubes, measured at 2000 lux illumination on a standard RETMA resolution chart).

**Viewfinder Resolution** Crisp, high contrast pictures are assured by the use of an improved cathode-ray tube.

**Output Signal Characteristics** In accordance with EIA Standard RS-170A, blanking pulse widths and SC-H phase relationship adjustable.

### Performance Features

**RFI Immunity** Up to 10V per meter (140dB) from 100kHz to 600MHz for the entire camera surface (not including lens port).

**Chroma Aperture Correction** Generates aperture correction signal when Green information is absent from the signal, results in improved sharpness of picture in Red and Blue content areas.

**Dynamic Focus** Parabolic modulation of electrostatic focus voltage improves corner resolution.

**Dynamic Detail Correction** Parabolic modulation of detail correction signal improves corner picture sharpness.

**Knee Aperture Correction** Expands horizontal video frequency response in highlight areas of picture to compensate for aperture correction fall-off due to gamma compression of correction signal.

### Operational Conveniences

The HL-79EAL is provided with all the elements necessary to support the sophisticated user operationally:

- Selectable white balance corrections
- Dual concentric filter wheels
- Selectable video gain
- SC/H phase adjustment
- Adjustable blanking widths
- Viewfinder indicators

Numerous readouts available to assist the camera operator:

White Balance Mode (A, B, Preset)

Tally

Battery Warning

Auto white balance

Auto black balance

Video level (Zebra)

Gain mode

Standby mode

Lens extender On

• RGB outputs

• Color bar signals

• Gen-lock input

### Automatic Features

The HL-79EAL is a fully automatic camera configured to permit the camera operator to concentrate on artistic aspects with minimum attention required by the camera operators. The automatic features provided are:

Auto iris control

Auto white balance (2 modes)

Auto black balance

Auto iris closure

Auto iris waiting

Auto highlight compression

Auto beam control

# COLOR CAMERA/MONITOR

## HDK-1125P High Definition TV Camera

- Top priority is given to picture quality; 1" high resolution tubes are used and a S/N ratio of 44dB (Y signal) is achieved
- Compact and lightweight. Size and weight are minimized without sacrificing a variety of functions typical of the new generation cameras; the size is smaller than that of the Ikegami 1 1/4" color camera and the weight is about 43kg
- Due consideration is given operational ease; a host of automatics are incorporated and the F-7 28-core camera cable with a maximum length of 200m is employed to increase camera mobility
- Automatic setup functions are provided to greatly reduce the setup time required for daily operation. To achieve labor saving purposes and enhance ease of operation, the camera has various computer control functions, such as filing functions, using preset memories for instant data retrieval
- High-resolution pick up tubes of 1" MS type are used providing 35% response with 800+ TVL at center
- An automatic geometric corrector circuit is incorporated to improve registration which constitutes a very important factor in camera performance. Further, zoom lens aberration correction (real-time dynamic lens distortion correction) and registration adjustment through zoom lens replacement are made to upgrade performance in the area of registration
- The viewfinder employs a 7", high brightness, high-resolution CRT. The image in the viewfinder may be overscanned enlarging the entire picture so the lens can be focused sharply. Further, this viewfinder allows complete black level clamping by the feedback method
- CCU consists of the following components:
  - 1) CCU rack
  - 2) 19" B/W picture monitor (DM-516H)
  - 3) Waveform monitor (1480HD)
  - 4) Control panel
  - 5) BAY-1  
(Main video and pulse system modules are accommodated.)
  - 6) ENC (option)
  - 7) Optical fiber cable adaptor (option)
  - 8) Power supply

## • Automatic functions

- 1) Automatic setup
  - a. Level
  - b. Registration
  - c. B/W shading
- 2) Auto beam control
- 3) Auto white balance
- 4) Auto black balance
- 5) Auto iris
- 6) Auto centering
- 7) Real time dynamic lens distortion correction
- 8) Auto geometric correction

HDK-1125P Camera Head (less lens) . . . . . \$559,405.00

## TM-751H 30" Color Monitor

- Designed to monitor the HDTV video program
- 30" high-resolution delta gun, black matrix type CRT produces sharp color image. An aspect ratio of 5:3 is most ideal for High Definition TV
- The majority of control circuits are of the DC control type
- The luminance is adjusted through the addition of the blanking gate luminance pulse. For this reason, the linearity of the circuit is not adversely affected
- The DC component in the video output is restored by the feedback gate clamping circuit. The black level is thus clamped, leading to a high-fidelity reproduction of the input signal
- The pulse cross operation consists of 3 functions, i.e., V Delay, H Delay, and V.H. Delay. Observation of the sync signal is thus facilitated
- Pincushion distortion is inconspicuous even on a laterally long screen with an aspect ratio of 5:3 because the pincushion distortion corrector is of the quadrant geometric type
- The 9-point geometric system convergence control circuit is incorporated. Unlike the conventional models, the TM-751H permits the adjustment of the left and right halves of the screen independently of each other
- An RGB signal and the encoded signal input may be applied to the TM-751H when a decoder unit is incorporated
- Two sets of the RGB signals may be applied to the TM-751H in the absence of the decoder unit

TM-751H Monitor . . . . . \$56,862.00

# COLOR CAMERA

## HK-323 Fully Automatic Color Camera

Suitable for outdoor and indoor applications, the HK-323 is a small, lightweight, high quality and flexible color camera. The camera head itself can be used for self-contained application. For systems flexibility, the base station is provided.

### HK-323 Control System

- Maintenance Control Panel (MCP) and Operation Control Panel (OCP) can be included in the HK-323 system
- Up to 40 cameras can be controlled by one MCP using Camera Selection Units (CSU)
- The camera head and the base station can be connected via triax cable, multicore cable, or fiber cable
- The HK-323P portable camera is available, which may be connected to the HK-323 base station
- Using RS-232C interface the camera conditions can be printed out so that records can be maintained
- Various correction files available for ease of operation

### HK-323 Color Camera

- 1" Diode Gun Plumbicons® are utilized. Upon request 2/3" Diode Gun Plumbicon tubes are also available
- Full auto-setup function for easy operation
- By changing modules, triax cable, multi-core cable, and fiber cable can be used

Type of camera and extension:

Triax cable Belden 9267 (9.14mm dia.) . . . . .	750m
Belden 9232 (13.2mm dia.) . . . . .	1500m
Fujikura (8.5mm dia.) . . . . .	.900m
Fujikura (14.5mm dia.) . . . . .	1800m
Fiberglass cable Fujikura G2 80/125 . . . . .	3000m
Multicable TV24/TV39/TV36 . . . . .	.600m

- Size and weight are minimized for operability. The camera head is 410H x 230W x 390Dmm. 1" type camera head weighs 26kg. 2/3" type weighs 25kg
- High performance prism optics are used. Quartz filter is employed to improve polarization characteristics
- Broad contrast range provided by Highlight Compression circuitry
- Video Matrix is built-in for color correction and matching
- Comet tail is eliminated by Auto Beam Control (ABC)
- Chroma Aperture Function provides sharp pictures of the object regardless of scene color content or special color lighting
- The camera person's name can be indicated on the monitor at the base station
- Viewfinder indications include:  
 Box Cursor, Crossover Cursor, Safe Title Area, Center Cross (HK-323 only), Auto-Setup, Filter Position, R and G Tally, Lens Extender, Gain Up, Video Level (Zebra)
- In the event of camera head or base station trouble the self-diagnosis system alerts the operator, prompting him to take corrective action

## Specifications

### Construction

#### HK-323 Camera Head

<b>Pick-up Tubes:</b>	1" diode gun or equivalent (2/3" diode gun or equivalent)

## HK-322-Broadcast Color Camera

The HK-322 is a fully automatic television camera system. The Master Control Panel contains a computer to perform all of the setup functions automatically.

Several other TV cameras have computerized automatic setup controls—but it takes a lot more than just a computer to produce top quality color.

Ikegami has that extra something: color technology. So, when you get an HK-322, you're not just getting a fully automatic camera — you're getting excellent picture quality, superior craftsmanship, and many non-computerized, automatic correction functions.

### Camera head

Camera setup functions are performed by the digital control system contained within the MCP. This information is stored in a camera memory system. The camera becomes a "black box", requiring essentially no internal adjustments.

Among the design highlights included are:

- Precise geometry of less than 0.1% distortion
- Superior registration accomplished digitally resulting in minimal errors, maintained with 0.05% throughout the entire picture area
- Independently adjustable bias lights for R, G and B channels
- 8 pre-programmable zoom lens and diascope error correction modes
- ND and Color Correction filter wheels quickly removable "CASSETTE fashion" for easy maintenance or special effects filter insertion
- Zoom lens heater power is available when the head power is turned off
- Video and power is provided for a video prompter system
- Dual tally system
- Two channel return video
- Dual Mic amplifiers
- S/N ratio of 56dB
- Horizontal resolution — 60% performance response at 400 TV lines, center

### Camera Control Unit

Similarly to the camera head, the CCU's memory system retains the setup control data from the MCP. The "black box" concept permits the mounting of the CCUs out of the control area. Several features are to be noted:

V-558

- Totally automatic cable compensation for up to 600m of small diameter multicore cable
- Plug in FM Triax system with an operational range of 1500m
- Digitally controlled automatic shading correction
- R/G/B Detail corrector employs a novel design. Picture detail is no longer lost in red or blue picture content as is common with the "contour out of green" principle
- Chromakey (option)
- Negative video (option)
- Color Corrector (option)

### Automatics

Basic automatics, other than CPU setup, include:

- Auto White Balance/Black Balance
- Auto Iris Control
- Auto Cable Compensation
- Auto Pedestal Control
- Auto Detail Level Control/Selection Control
- Auto Optical Cap
- Auto Highlight Compression

### Special Effects

- H and V deflection reversal, with stored linearity correction
- Negative video permits RGB video polarity reversal
- Horizontal deflection modulation for "dream scenes"
- Scene compression and expansion for improving high contrast and/or hazy scenes
- Various effects may be stored in a data file. Up to 8 presets may be retrieved on command

The Operation Control Panel controls the camera during normal "on air" operation

After initial setup, each camera may be operated by its individual OCP, independently of the MCP.

One Master Control Panel can control up to 24 cameras directly by using a Camera Switching Unit (CSU). By the addition of a Studio Selector Unit and other CSUs, up to 10 camera groups or a total of 100 cameras may be controlled by a single MCP. For backup purposes, a second MCP may be connected in parallel.

In addition, to provide up to 10 studio parallel Automatic Setup capability, additional CPUs may be added for each of the studios.

HK-322 Camera Head (less lens and tubes) . . . . . \$76,250.00

Prices and Specifications Subject to Change Without Notice.

TKC-970

## TKC-970 Color Telecine Camera

- Top-quality picture, faithful color reproduction
- By adopting a pre-preamplifier system employing high S/N FETs, the S/N ratio has been greatly upgraded to 56dB
- Registration has also been further enhanced by employing yoke assemblies and a registration corrector
- Thanks to adopting dynamic focus, resolution at the corners has been improved. (700 lines at center; 600 lines at corners)
- The TKC-970 is provided with a black shading correction circuit
- White shading correction is available in three modes
- A bias light incorporated in the TKC-970 reduces lag in dark picture areas
- A crisp, high-quality picture is attained by employing an optical black and a flare compensation circuit
- A horizontal/vertical detail corrector with an auto-edge circuit constantly provides appropriate corrected pictures

### Various Automatic Systems

Added to the conventional automatic systems (ALC, AWL, ABL, optical black, etc.) are these additional automatic systems.

- The edge circuit in the detail corrector circuit is provided with auto level control for assuring constant, most rational correction
- Auto Light Control (ALC) is incorporated in the TKC-970's optical system
- Auto Color Balance functions—Auto White Balance (AWB), Auto Gamma Balance (AGB), and Auto Black Balance (ABB)—are provided. These balance controls maintain the best color-balance pictures during On-Air

### Highly Reliable Control System

- Since all controls from the exterior are stored in the camera, an abrupt power failure does not require readjustment
- A digital semiconductor in the control system, including a monitor circuit, greatly enhances reliability
- Multiplexer control is possible from the camera thanks to the multiplexer select switch on the control panel

### Easy-To-Operate Monitor System

Selection is made from the following items through piano-key-touch operation.

- PM Select: R, G, B, R-G, B-G, -G and ENC
- WFM Select: Pre Sup, Pre Seq, Proce Sup, Proce Seq, Proce RG, Proce BG, ENC
- When the camera power supply is turned Off and then turned On again, PM Select is automatically set to 'ENC', while 'Proce Seq' is automatically selected on the WFM Select
- The SEQ indication employs a horizontal system
- Preamp as well as proc amp waveforms can be monitored

### Combinable With Other Equipment

Two types of field lenses are available, and the projection direction (right and left) for the TKC-970 can be selected, enabling a combination with various projectors. For 16mm film projectors, an aplanatic TV film lens (67mm, f/2.5) is available.

### Easy Operation and Maintenance

- A test chart, test pulse, and color bar are incorporated respectively in the optical system, amplifier system, and encoder
- Preamp and process-amp are composed of separate R, G, B amplifiers of the same structure, greatly facilitating replacement and maintenance
- Since all dual-in-line IC's are socket types, replacement and maintenance of semiconductors are facilitated
- The target voltmeter employs digital display
- The ND filter position is indicated by LED
- Various check meters for power supply voltage are provided
- Two timers (camera operation time display and tube operation time display) are provided
- The registration corrector circuit is incorporated for easy registration control
- Beam discharge at 150% can be easily set with the Beam Set switch

### Various Protective Circuits

- Camera Tube Protection: Automatic camera tube protection is provided in case of sweep failure either horizontal and vertical scanning
- Camera tube heater voltage is lowered during Beam-Off
- Should short-circuiting occur, the power supply is restricted by internal protection, preventing hazards

The TKC-970 employs a prism splitting system with 86 x 115mm image size. Thanks to the adoption of space focusing on an object, any dust adhering to the lens seldom appears as such on the picture. When a telecine camera with the same image size is replaced by the TKC-970, related equipment previously used can be employed without modification. By selecting a field lens, the TKC-970 can be freely combined with various projectors. Further, equipment layout planning can be effected with due regard to operability.

### TKC-970 Package

Consisting of—Camera head with: • 3VFK-7 optical system • Vidicon tubes 8507 • Yoke and assembly • Pre amp unit • Shading unit • Proc. unit • Masking unit • V. detail unit • H. detail unit • Auto black level on auto B unit • Auto white on auto B unit • Pulse unit • Sync. generator with SC/Sync genlock • Monitor unit • Deflection unit (hand V) • Geometric distortion corrector • Multi board • Encoder 1 • Encoder 2 • ALC assembly • Power supply • Interface • Control Panel • Monitor select panel • Set up panel • Module extender • Test slide • Lamps • Tool • Service manual . . . . . \$58,750.00

### Accessories

- Module extender • Test slide • Lamps • Tool • Service manual • Remote Control Panel w/30' Cable • Automatic Color Balance Module • Color Corrector w/Remote Control • Negative Video Module • Optical Axis Tester

# IKEGAMI ELECTRONICS (U.S.A.), INC.

37 Brook Ave.  
Maywood, NJ 07607  
(201) 368-9171

FAX: (201) 569-1626 Tellex: 21-9034 ITCNJ UR

# COLOR TELECINE CAMERA

- Color separation is accomplished by a prism beam-splitter, with high transmission efficiency, minimum color shading, minimum ghosting and color errors
- Bias lighting to reduce pickup tube lag at low light levels is introduced via the prism. RGB bias lights, individually adjusted, automatically or manually, are utilized
- Yoke is mounted directly on the optical block to minimize registration errors
- An IR filter is provided to assure correct colorimetry

#### Pickup Tubes

- Vidicon or Saticon® tubes, operated in the high voltage mode are usable to provide high resolution (700 TVL at center)
- An improved coil assembly together with dynamic beam focus (DBF) to reduce beam landing errors, results in improved corner focus and resolution (typically 600 TVL in corners)
- Digital deflection and shading circuitry optimizes overall registration geometric distortion and shading performance and also assures ease of tube replacement. The registration is within 0.05% and is stored in digital memory
- Low noise FET pre-amplifier to establish a video signal with a minimum of -58dB S/N ratio

The TKC-990 is capable of automatically correcting the video signal generated to reduce or correct problems due to various film errors. Without prior programming, electronic analysis and adjustment of the R/G/B video signals developed by the camera accomplish auto color balance by correcting white, gamma, and black. The automatic White Balance (AWB), Automatic Gamma Balance (AGB), and Automatic Black Balance (ABB) functions are coordinated with auto level compensation functions which are Auto Light Control (ALC), Auto White Level (AWL), and Auto Black Level (ABL).

## TKC-990

### The High-Performance Telecine Camera With Computer Control

The TKC-990 is a multipurpose broadcast telecine camera suitable for "on-line" applications, such as local viewing or direct on-air broadcast and "off-line" applications, such as tele-production and video tape recording. For on-line applications, film characteristics can be uncorrected, manually corrected or automatically corrected.

For off-line applications, detailed operator scene-by-scene corrections can be established and stored for retrieval during subsequent playback of the film and transfer to video tape.

Outstanding performance and stability characteristics have been incorporated into the TKC-990. Setup, operation and maintenance controls for the camera, as well as color corrections for film types and corrections to normalize projector characteristics are microcomputer controlled and stored.

A 6-vector adjustable color matrix permits colorimetry setting to user preferences and match between cameras. The camera's built-in test pattern projector assures standardized setting of geometry and level parameters; simple centralized control of multiple cameras is made feasible by digitally addressing the memories built into each camera's body.

A sequential manual setup mode, fully automatic setup mode, as well as a rapid pre-operational auto check of user selected set-up parameters is available.

#### Optical System

- A built-in pattern projector permits computer control
- Large image field lens built into camera body assures long-term stability of optical alignment
- Built-in neutral density wheel with fast attack rate for automatic light control (ALC)

To simplify manual camera check-out, the TKC-990 is provided with the following:

- For monitoring purposes, the camera provides 2 sets of picture monitor (PXM) signals, 2 sets of waveform monitor (WFM) signals and the necessary keying signals for type 528 (or equivalent) waveform monitor
- For precision pickup tube adjustment, a synchronized focus wobble circuit is employed for the beam alignment procedure
- For accurate raster positioning, deflection overscan is available
- A SMPTE color bar is built-in

#### Specifications:

<b>Camera tube:</b>	1" Vidicon tube or 1" Saticon® tube
<b>Optical system:</b>	Dichroic prism system (Bias light for RGB built in) (Pattern projector built in) Image size: 86 x 115 (mm)
<b>Input signal:</b>	
<b>BBS</b>	0.45 Vp-p, 75 ohm or high impedance
<b>Sync</b>	4 Vp-p (negative), 75 ohm or high impedance
<b>SC</b>	2 Vp-p (sinewave), 75 ohm or high impedance
<b>Output signal:</b>	
<b>Line output</b>	4 channels (VB or VBS), 75 ohm
<b>Video monitor</b>	2 channels, 75 ohm
<b>Waveform monitor</b>	2 channels, 75 ohm
<b>Power requirements:</b>	AC 100V, 117, 200, 220, 240V; 50/60Hz
<b>Power consumption:</b>	600VA approx. (incl. picture monitor and waveform monitor)
<b>Tally input:</b>	DC 24V or contact closure
<b>Ambient temperature:</b>	0°C - +40°C
<b>Weight:</b>	220kg (approx.) (incl. picture monitor and waveform monitor)

# PROJECTORS/MULTIPLEXER

## FPH-16 Self-Threading 16mm Telecine Film Projector

The FPH-16 is a 16mm telecine projector for use with either the Ikegami TKC-970, TKC-990 or similar professional telecine cameras. It is designed to meet the requirements of direct on-air broadcast and off-line teleproduction. Provided are quick start and quick stop of picture and sound, still projection, fast forward run and fast reverse run, as well as the functions that a regular telecine projector provides. Film loading is accomplished quickly and accurately through use of the FPH-16's self-threading system. A common mechanism driven by a single motor operates both the shutter and the pull down claw, resulting in a simple, reliable mechanical system with a minimum number of parts.

### Options

- Analyzing projection at the speed of 3 frames/sec
- Frame counter
- Frame pulse generator
- Frame search
- Air jet to remove dust on the film
- Automatic film rewinder
- On air tally
- Take-up reel positioning
- Inching knob

**FPH-16** . . . . . \$78,958.00

FPH-16

SPR-35

MPK-3V (R/L)

## SPR-35 35mm Slide Projector For Professional Applications

- Dual drum operation—32 slides per load, 16 slides per drum
- All slides illuminated for easy re-check  
A complete check on every slide in the drum can be accomplished quickly by pushing the Skip switch
- Easy maintainability  
Two covers at the top are easily removed for easy access to all the optical components. Two doors at both left and right sides may be opened providing easy access to all electrical components
- Remote control  
The lamp on/off, slide skip, slide change functions may be controlled remotely
- Built-in spare projection lamp with automatic replacement system
- Shade free illumination
- Slide cooling system  
Temperature rise at the slide surface is limited to 10°C above ambient

The SPR-35 35mm Slide Projector is for use in combination with the Ikegami TKC-970 or TKC-990 and similar professional telecine cameras. The SPR-35 is a dual drum type accommodating a total of 32 slides. Optical lap dissolve between slides is accomplished within 0.6 second.

**SPR-35** . . . . . \$24,432.00

## MPK-3V (R/L) Multiplexer

The MPK-3V (R/L) is a sturdily constructed professional quality 3 input 1 output optical multiplexer for photoconductive telecine camera systems. The front-surface mirrors have negligible light loss and are motor driven in a vertical plane; a switching cycle is accomplished in approximately 0.1 sec. Mirror motion is timed to avoid spurious light input to the camera from the center projector during mirror motion.

Contactless controls for motors and brakes eliminate glitch interference in the video signal.

Switching identification is provided from the multiplexer to the telecine cameras so that camera adjustments appropriate to the projector "on air" are facilitated. The multiplexer can be controlled remotely or locally from illuminated switches on the top of the unit.

Standard mirror orientation is for 16mm projectors that load from the left side (R Type) looking in the direction of projectors; an alternate version for projectors that load from the right side can be obtained as an option (L Type).

## MK-309C

### Color Camera for Medical Applications

The MK-309C is an extremely compact television camera developed solely for the special requirements of the medical fields. In order to provide high-fidelity color reproduction, the MK-309C employs three pick-up tubes and prism optics with high sensitivity.

The color splitting prism and circuitry, such as the quality video amplifier and detail correction, provide for faithful color reproduction, unlike less expensive single tube cameras. Furthermore, an adoption of highly sensitive CdSe tubes assures quality color pictures even in low light conditions.

The lightweight compact camera head can be used for various medical requirements such as microscopic, endoscopic, or other special applications.

The MK-309C provides superior results with simple operation by using various automatic functions.

#### • Super Compact Camera Head

The camera head of the MK-309C with three pick-up tubes is small and lightweight in order to permit easier system connection with other apparatus and reduces the space required. The camera head weighs only 1.2kg

#### • Faithful Color Reproduction

The specially designed circuitry of the MK-309C always reproduces faithful color. The highly sensitive CdSe tubes enable beautiful color pictures, even in low light level conditions, especially in red, which is important since the interior of the human body is primarily red in color. The red reproduction of the MK-309C is finely tuned to a precise red shade, and built-in detail correction circuit gives a sharp and clean picture

#### • High Sensitivity with Low Light

The beam splitting system and sensitive pick-up tubes give a clear picture in low light levels. The +18dB/9dB gain switch can increase the sensitivity 8X/3X, electronically, which is important for both microscopic applications and endoscopic applications

#### • Easy Direct Input to Video Recorder

Since the MK-309C incorporates a color encoder and sync signal generator, the output signal of the MK-309C can be directly recorded on video tape. In this way, important and valuable information can be stored and replayed later with a clean and clear color picture.

#### • Simple and Easy Operation

The operation of the MK-309C is simple. Various automatic functions offer very smooth handling with no special training for operation necessary. Anyone can use this camera system with microscope, endoscope or fiberscope. The only control is the power on-off switch

#### • Simple White Balance Control

With the built-in white balance control, the camera operator can obtain well-balanced, faithful color reproduction by pushing the white balance button on the camera control unit

#### • Automatic Light Control

For microscope application, the MK-309C provides the automatic light density control system. A uniform brightness can be obtained automatically without any manipulation by the camera operator

#### • Built-In Test Pulse Generator

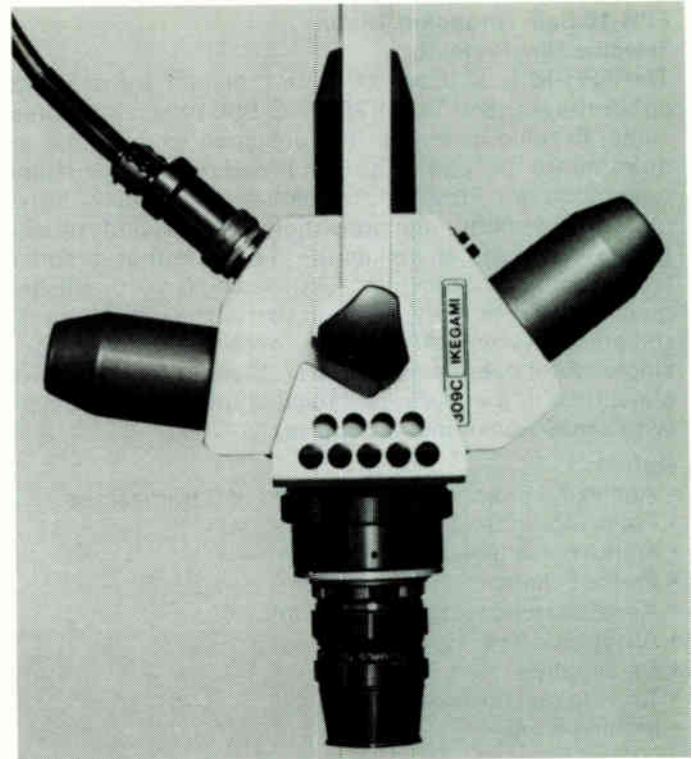

When the power switch is turned on, the pulse for setup testing automatically comes on to check the camera operation and monitors

#### • H and V Detail Corrector

Detail correction circuits are incorporated for both Horizontal and Vertical contours, giving improved clarity to picture information

#### • Color Painting

To facilitate color adjustment, and R&B color painting control is provided at the CCU

## Specifications

### Rating

Optical System: R/G/B prism beamsplitter

Pick Up Tube: 2/3" Chalnicon

Scanning System: 2:1 interlace, 525 lines, 60 fields 30 frames/sec or 2:1 interlace, 625 lines, 50 fields 25 frames/sec

Sync System: Internal sync operation with built-in sync generator or external sync drive (genlock)

Lens Mount: P mount

Dimensions: Camera Head 261H x 74W x 169Dmm  
Camera Control Unit 250H x 180W x 430Dmm

Weight: Camera Head 2.6 lb. (1.2kg)  
Camera Control Unit 19.8 lb. (9kg)

Ambient Temperature: 32°F ~ 104°F (0°C ~ 40°C)

Power Supply: 110VAC, 220V/240V ± 10%, 50-60Hz

Power Consumption: 70VA

### Output Signal:

(1) Color composite VBS 1.0V p-p; 75 ohms: 2 outputs

(2) RGB video V 0.7V p-p; 1 output

(3) Monitor out VS 1.0V p-p; 1 output

Genlock Input Signal: VBS 1.0V p-p, 75 ohms or BBS 0.45V p-p, 75 ohms

### Shading

Compensation: Standard provision

Gamma Correction: Standard provision

### Performance

Resolution: ≥ 500 lines at center (horizontal)

Signal-to-Noise Ratio: 54dB or better (NTSC) 52dB or better (PAL)

Sensitivity: 250 lux at f/2.0/6000°K

Registration: Max. 0.1% inside a circle having a diameter of 80% of picture height

MK-309C ..... \$24,200.00

## TPP-1125 HDTV Video Projector

The TPP-1125 video projector projects a high definition HDTV video on the big screen, offering realism with a feeling of presence.

Required input signals are R/G/B video signals and external sync signals of HD and VD or composite sync signal. Power supply accepts 117VAC, single phase.

Projection screen size is 100" diagonal with an aspect ratio of 5:3. Horizontal direction of the screen is flat.

In spite of its high brightness, the projector offers natural and distortion-free pictures.

### Specifications

#### TV system

- (1) Scanning Line: 1125-line HDTV system
- (2) H. Frequency: 33.75kHz or 33.716284kHz
- (3) V. Frequency: 60Hz or 59.940Hz

#### Projection Video

- (1) Aspect Ratio: 5:3
- (2) Screen Size (mm): 2,180(W) x 1,310(H)
- (3) Projection Distance: 4.15m (lens to screen center)
- (4) Projection Angle: 12° (screen inclination 3°)

**Input Signals:** R/G/B 0.7V p-p, positive, 75 ohm HD, VD or Sync 1 ~ 4V p-p, negative, 75 ohm

**Input Power:** 117VAC single phase, 60Hz, 600VA or less

#### Operating Condition

- (1) Temperature: 50°F ~ 86°F
- (2) Humidity: 20% ~ 80%
- (3) Room Illumination: 3 lux or less (on the screen)

**Resolution:** H: 800 TVL (single tube, center)  
V: 800 TVL (single tube, center)

**Brightness:** 50fL or more (Screen gain 10)  
**Linearity:** ± 1% or less (within a circle having a diameter of 60% of screen height)

**Convergence:** 0.1% or less (within a circle having a diameter of 60% of screen height)

**Video Adjustment:** Controls provided for contrast, brightness, sharpness, white balance, black balance

**Test Signal:** Crosshatch, staircase, color bar generator built-in

#### Protection

- (1) Warning on power/sweep failure
- (2) High-voltage power protection, CRT over current protection
- (3) ABL

#### Dimensions, Weight

- (1) Projection Head: 452H x 820W x 945Dmm, 125kgs
- (2) Power Supply: 218H x 477W x 447Dmm, 30kgs

TPP-1125 .....\$85,795.00

### Options

#### DSC-1050 Digital Scan Converter

Incorporating the latest digital technology, Ikegami's Digital Scan Converter DSC-1050 performs digital processing and scanning line conversion for NTSC standard video signals to produce fine and beautiful visual images.

This converter doubles the number of NTSC color video signal scanning lines to provide RGB signals of 1050 TV-line, 30Hz frame frequency, interlace or 525 TV-line, 60Hz frame frequency, non-interlace.

TPP-1125

This converter produces high-brightness, fine pictures with little line flickering. When used in conjunction with the TPP-1125 and the TSW-502 this converter enables such images as TV camera and VTR pictures to be reproduced on a wide screen.

Two types of Y/C separation are employed to prevent picture fineness from degrading due to dot crawling or cross colors frequent in conventional Y/C separation. For motionless input signal, frame-to-frame Y/C separation is made that makes use of the frame correlation. For motion input, the Y/C separation is made by a 2H comb filter that takes advantage of line correlation. Besides the two NTSC encoded inputs, RGB input is optionally available.

**Input Signal:** NTSC VBS 1.0V p-p, positive, 75 ohm, 2 inputs  
bridge connection possible

**Output Signal:** RGB 0.7V p-p, positive, 75 ohm, 1 output (G-ch, sync on/off switchable)  
Switchable between 525 TVL, 60Hz frame frequency, non-interlace or 1050 TVL, 30Hz frame frequency, interlace

**Sync Output Signal:** H: 4V p-p negative 75 ohm  
V: 4V p-p negative 75 ohm  
Composite: 4V p-p negative 75 ohm

**Adjustable Range:** Chroma level 0 ~ +12dB (3 step)  
**Detail Enhancer:** H, V 0 ~ ±6dB (3 step)

**Power Requirements:** 117VAC, ±10%, 50/60Hz

**Power Consumption:** 450VA approx.  
**Ambient Temp.:** 0°C ~ 40°C  
**Relative Humidity:** 10% ~ 90% (non-condensing)  
**Dimensions:** 249H x 420W x 382Dmm  
**Weight:** 27kg approx.

#### TSW-502 Source Selector

The TSW-502 Source Selector switches the TPP-1125 projector input signals among 2 analog signals and 2 TTL signals.

**Input Signal:** TTL 2 inputs, 1K ohm or more, Hi 2.4-5V, Lo 0-0.4V  
Analog 2 inputs, 75 ohm terminated, 0-1V p-p

**Output Impedance:** 75 ohm  
**Power:** Supplied from TPP-1125 control unit

# COLOR MONITORS

## 10-Series

### High Resolution Delta Gun Color Monitors

#### TM14-10RH/TM20-10RH

The 10-Series of high resolution color monitors were developed specifically for higher image quality in TV production and are available in 13V and 19V versions. The high resolution delta-gun CRT has realized high resolution, high brightness, and the convergence circuit greatly facilitates convergence adjustment and operation.

#### Functions include:

- 3 video inputs each with bridging BNC connectors
- External sync input with a bridging BNC connector
- Pulse cross for examination of horizontal and vertical blanking interval
- Underscan/overscan selection switch
- Switchable AFC time constants for 2msec, 0.5msec, and 7msec
- Pushbutton control for degaussing CRT Shadow Mask
- Blue phase verification—The Blue Gun On/Off switch facilitates chroma level and hue adjustments
- Preset controls for contrast, brightness, chroma level, and hue
- Residual sub-carrier verification, for evaluation of input signal condition
- Color/monochrome selection switch, to facilitate white balance adjustment
- Trap/Comb selection switch
- Corrective Matrix permits rotation of color decoding vectors towards NTSC aim points
- Multi-turn potentiometers are used for RGB Background controls, GB Gain control, Preset controls, and Height/Width controls for easy operation
- A tally lamp is provided

TM20-10RH . . . . .	\$6970.00
TM20-10RH/N/RGB . . . . .	7740.00
TM14-10RH . . . . .	6500.00
TM14-10RH/N/RGB . . . . .	7295.00

#### 19" Rackmountable

TM14-10RH's are available in cabinet or rack configurations occupying 10<sup>1</sup>/<sub>2</sub>" height. The TM20-10RH configurations are available in cabinet or rack configuration occupying 15<sup>3</sup>/<sub>4</sub>" height.

#### Remote Controls

- Video A/B/C
- Sync INT/EXT
- Color/Monochrome
- Tally On/Off
- V-VS Control

TM14-10RH

TM20-10RH

#### Controls found in pull-out drawer

##### TM14-10RH

- Operate-Setup Select
- Tally Int/Ext Power Select
- Height/Width (Wide and U-Scan)
- H/V Centering
- G/B Gain
- R/G/B Background
- Convergence

##### TM20-10RH

- Height/Width (Wide and U-Scan)
- Delay Bright
- Aperture
- H/V Centering
- Convergence
- R/G/B Background
- G/B Gain
- Video Front Selector Cross Hatch
- Video Local or Remote Select
- AFC Select 2ms or VAR (0.5ms or 7ms)
- Residual Subcarrier Verification on/off
- Trap-Comb Select
- Operate-Setup Select
- Matrix In-Out Select
- Tally INT/EXT Power Select
- Hue/Chroma/Brightness/Contrast Preset

## COLOR MONITORS

### 15-Series Color Monitors

- Fine Dot Pitch Shadow Mask results in high resolution
- In-Line Self Converging Electron Gun assures convergence stability
- Controlled Phosphors (to American Broadcast Standards) provide consistent colorimetry
- Black Matrix surrounding Phosphor Dots assures high contrast under bright ambient lighting
- To simplify monitor set-up, the 15-Series uses a Digital Control System (DCS)
- Preset level modifications
- Two operator memories
- To insure long-term black level stability, the 15-Series monitor incorporates Beam Feedback System (BFS) which detects CRT current deviation and eliminates brightness changes due to changes in CRT emission.

By providing an optional Auto Set-up Probe, the 15-Series is menu driven, user friendly, with all instructions shown on the screen. An optional Remocon Box provides for remote control operation.

The 15-Series high resolution color monitors are available in 13V and 19V configurations.

TM14-15RH units are available in cabinet or rack configurations, occupying 10<sup>1</sup>/<sub>2</sub>" height. The TM20-15RH configurations are available in cabinet or rack configuration occupying 15<sup>3</sup>/<sub>4</sub>" height.

### TM20-16R/TM14-16R (Preliminary)

#### 16-Series High Performance In-Line Gun Color Monitors Cathode Ray Tube:

- 500 Lines resolution
- In-line self converging electron gun assures convergence stability
- Black matrix surrounding CRT face assures high contrast under bright ambient illumination

#### Circuitry:

- Comb filter provides wide band luminance, switchable to notch filter at front panel varying APL
- Pre-set operating controls (hue, chroma, brightness, contrast)
- Sweep failure protection circuits prevent phosphor burns

#### System Conveniences:

- 3 Video inputs (A/B/RGB), with front panel switchable
- 13V can be rackmounted in 10.5" height
- 19V can be rackmounted in 15.25" height
- Horizontal Time Constant can be selected either 0.5msec or 2msec

#### Test Facilities provided:

- Underscan Switch to permit observation of picture corners
- Pulsecross Switch for sync signal verification

TM20-16R

TM14-16R

16 Series are high performance, low cost monitors. The units are specifically designed for production or broadcast applications and produce high-fidelity video reproduction with easy operation by utilizing In-Line Gun CRT technology. Comb Filter and A/B/RGB video inputs.

# COLOR MONITORS

## 9-Series Color Monitors — In Line Gun CRT Type

- **In Line Electron Gun:** The CRT has an in-line electron gun; thus eliminating the need for convergence adjustments
- **High-Resolution CRT:** The display produces crisp, precise images because the monitors use a fine-pitch, dot-mask CRT. A black matrix effect is provided on the CRT screen, enabling pictures to be displayed with a high contrast ratio even under bright lights — more than 600 TV lines at center
- **Pulse Cross Circuit:** For observing sync signals, a pulse cross circuit with three functions has been included V. Delay, H. Delay, and V.H. Delay
- **Protective Circuits:** The power supply and high voltage circuits are equipped with excess-current and excess-load protection, to prevent the CRT from being damaged. Sweep failure detection circuits are also utilized for CRT protection
- **Signal Generator:** Internal cross-hatch signal generator facilitates a convenient means of checking deflection linearity
- **Video Input System:** A 3 video input system is used with a selector switch located on the front panel
- **Signal Demodulation:** The IQ standard is used for color signal demodulation; remarkably faithful color signals are reproduced
- **Automatic Frequency Phase Control:** Extremely accurate color locking is possible with AFPC system
- **Keyed Back-Porch Clamp System:** A keyed back-porch clamp system is used, to prevent black level fluctuation
- **Comb Filter:** The monitors have a comb filter for maintaining high-resolution in color images. Color trap/comb filter selection is possible
- **Degauss Circuit:** Internal degaussing circuit is provided. In addition, the CRT is equipped with a magnetic shield to prevent interference from external magnetic fields
- **Residual Subcarrier Test:** A switch is provided for checking if residual subcarrier is present on the incoming signal
- **Matrix Switching:** A matrix switching circuit is provided to reproduce color similar to a TV receiver or NTSC standard
- **Selectable Time Constants:** Three types of horizontal-AFC time constants are selectable
- **Optional Functions:** RGB operation, Switching between RGB and NTSC operation

Now, broadcasters have a second line of high-resolution color monitors to choose from; Ikegami's 9-Series Color Monitors. Like the RH-Series, these monitors were built to serve the professional. The 9-Series offer you in-line gun CRT's that do away with the bother of always having to adjust the convergence. You'll find the 9-Series easier to maintain with convenient pull-out panels on the front of the monitors. And to put you in step with the 80's, the 9-Series have a streamlined look coupled with the merit of low power consumption.

TM14-9RH

TM20-9RH/N/RGB 20" NTSC/RGB Rackmount (less case and chassis tracks) . . . . .	5880.00

## 10" Series RH Monitors

The TM10-9RH portable professional color monitor complements Ikegami's broad range of 14" (13V), 20" (19V) and 25" (23V) broadcast color monitors. Using a 10" (8.5V) high resolution shadow mask cathode ray tube with a self-converging in-line gun, the TM10-9RH can be operated from AC or DC Power and is available in cabinet or rackmountable versions. The rackmountable versions are 8<sup>3</sup>/<sub>4</sub>" high and are furnished in single, dual, single with adjacent WFM space or single with adjacent Vectorscope space configurations.

American standard matched phosphors are utilized in NTSC versions of the TM10-9RH. Features including pulse cross, keyed back porch clamp, pre-set contrast/hue/saturation/brightness controls, on-demand degaussing, aperture correction, dual video inputs, sync mode selection, color/monochrome selection, individual electron gun cut-off switches, remote control capability, etc. are standard.

# MONOCHROME MONITORS

## 3HD-Series Monochrome Monitors

- Keyed back porch clamp, switchable to DC restorer
- Dual (A/B) inputs, front panel selectable
- Internal/external sync, front panel selectable
- Notch filter on/off, front panel selectable on 14"
- Tally light
- Remote control (Video Select, Sync Select, Tally On/Off)
- Cross-Pulse

The 3HD-Series range of professional monochrome monitors provide the features and high performance necessary for sophisticated broadcast studio applications. 9" configurations are available as A) Bare chassis, B) Cabinet with handle and C) for 19" rackmounting in an 8<sup>3</sup>/<sub>4</sub>" height for single, single with WFM space, single with Vector-scope space, and dual unit uses. 14" configurations are for cabinet use or for 19" rackmounting in a 10<sup>1</sup>/<sub>2</sub>" height, slides are optional for the rackmount version.

PM9-3HDP 19" Dual Rackmount

PM9-3HDP Cabinet Type

PM9-3HDP Single with WFM

PM14-3HDP Cabinet Type

An illuminant-D phosphor, as well as pre-set controls for brightness and contrast are also standard on the 14" unit. Pulse delay is optional on the 14" monitors; pulse delay and/or an illuminant-D phosphor are available on special order with the 9" monitors.

Series-3HD monochrome monitors provide high resolution at high brightness, low geometric and differential gain distortion and excellent stability over a wide temperature, input voltage and APL range.

 PM14-3HDP . . . . . 1810.00

## SPECIFICATIONS

### GENERAL

**Power:** AC 100, 120, 220, 240V  
 10% 50/60Hz, 55VA approximately

**Ambient Temperature:** -15°C ~ +50°C  
 (Rack type)  
 -15°C ~ +40°C  
 (Cabinet type)  
 90% or less relative humidity (non-condensing)

**External Dimension:** PM9-3H: 222W x 213H x 308Dmm  
 PM14-3H: 483W x 265H x 386Dmm

**Weight:** PM9-3H: approximately 6 kg (without case); approximately 7 kg (with case)  
 PM14-3H: approximately 13.5 kg (without case); approximately 15 kg (with case)

**Connector:** Video input: BNC type (2 systems)  
 Sync input: BNC type (1 system)

**Front Panel Controls:** Remote input; Tally input  
 Video A/B; Sync INT/EXT; Size NOR/WIDE; Contrast; Brightness; Power ON/OFF; Notch filter ON/OFF for 14-inch unit

**Optional Function:** H and V delay switches (single switch for PM9-3H)

**Standard Accessories:** Remote connector, power cord and manual are provided

**Optional Accessories:** Rackmounting slide bracket for 14" type

**Input Level:** 1 Sync input  
 Video signal: VS 1.0V p-p or V 0.7V p-p positive  
 Sync signal: 1 4V p-p

**Input Impedance:** Video input: High impedance, bridge connection [Return loss: 46dB (100Hz ~ 4.2MHz)]  
 Sync input: High impedance, bridge connection [Return loss: 40dB (5MHz)]

**Output Level:** 30Vp-p (at CRT drive voltage)

**CRT:** PM9-3H: M22JEA5WW  
 PM14-3H: 340CEB4

**Phosphor Colorimetry:** P4 phosphor, 9300°K [Option: 6500°K]

**Brightness:** 60 Ft-L (at rated output level)

**Operation:** Continuous

**Video Display Screen:** NOR/UNDER switching system, pulse cross circuit provided

### PERFORMANCE

**Mechanical Vibration:** No disturbance picture by shock, i.e. microphonic, etc., when dropped spontaneously from 50mm height

**Resolution at Brightness of 30 Ft-L:** Center: 800 Lines or more  
 Corner: 500 Lines or more

**Power Voltage Fluctuation:** Should the power voltage fluctuate in the range of ± 10% against the rated input voltage, monitor is operated stable and picture quality does not deteriorate

**VIDEO CIRCUIT**

**Maximum Gain:** Maximum contrast: 38dB or more

**Frequency Response:** 100kHz reference, 50Hz

**Waveform:** 10MHz ±1/3dB (at 30V p-p of output level)  
 (When square wave of rise time 0.05 sec is supplied at video input connector)  
 Rise time: 250kHz, 0.1 μsec or less  
 Over shoot: 250kHz, 8% or less

**Linearity:** Sag: 60Hz, 5% or less  
 Less than 5% DG (at rated output 30V p-p)

**Noise:** Coherent noise: -46dB  
 Hum noise: -55dB  
 Others: -55dB  
 (except blanking period)  
 Above measured at output terminal in condition of terminating video input 75 ohm and contrast VR max.

**DEFLECTION CIRCUIT**

**Sync Stability:** The stability of operation shall be met for the following conditions:  
 Internal sync: Video input level changed against rated value: -10dB; For video amplitude changes of 0 to 120% and sync levels greater than -8dB (0.15 to 0.3V sync)  
 External sync: Sync signal input level: 1~4V p-p, negative

**Horizontal AFC Time Constant:** Approximately 2 msec

**Deflection Distortion:** Less than 2% of picture height

**HIGH VOLTAGE CIRCUIT**

**High Voltage:** 18kV

**High Voltage Fluctuation:** ± 2% in range of 0 ~ 200μA as 100μA reference

# MONOCHROME MONITORS

## PM-580

- Triple rackmountable • X-ray protection circuit • Various performance options are available • Horizontal resolution > 600 lines at center • S/N ratio is  $\leq$  -60dB—hum and noise  $\leq$  -40dB—sync noise • Power consumption approximately 18W • 6.59" H x 5.78" W x 8.70" D • 7.72 lbs.

This 5" black and white video monitor provides stable performance despite fluctuations in power or temperature. Solid-state electronics means years of reliable operation.

PM-580 ..... \$ 428.00  
 PM-580/R3 (Triple rackmount version) ..... 1451.00

PM-580

PM9-5

## PM9-5

- 9" Broadcast Monochrome Monitor • 800 lines • D6500°K phosphor • Keyed back porch clamp, switchable to DC restore • Dual (A/B) inputs, front panel selectable • Internal/external sync, front panel selectable • Normal/wide scan, front panel selectable • Scan delay/normal • Tally light • Remote control (video select, sync select, tally on/off)

The PM9-5 provides the features necessary for professional broadcast studio applications, and combines high reliability, ease of maintenance, and superior picture quality, low power consumption. 9" configurations are available as cabinet and 19" rackmounting in an 8<sup>3</sup>/<sub>4</sub>" height, single with WFM space, single with Vectorscope space, and dual units.

PM9-5 ..... \$350.00

PM-930

## PM-930

- Horizontal resolution  $\geq$  600 lines at center • S/N ratio is 55dB (Except sync noise) • Power consumption < 25W • 8.64" H x 8.61" W x 9.45" D • 10.78 lbs.

A surveillance video series 9" black and white monitor built with the latest solid-state electronics. The unit offers front access to main operating controls, implosion-protected picture tube, VTR playback image stability and exceptionally low maintenance requirements.

PM-930 ..... \$308.00  
 PM-930/R2 (Dual rackmount version) ..... 757.00

PM-127

## PM-127

- Horizontal resolution  $\geq$  650 lines at center • S/N ratio matches that of the PM-580 • Power consumption is approximately 25W • 11.2" H x 12.6" W x 12.00" D • 16.98 lbs.

A low cost 12" black and white video monitor featuring X-ray protection circuit, VTR playback image stability, rackmountability and solid-state electronics.

PM-127 ..... \$439.00  
 PM-127R (Rackmounted) ..... 563.00

PM-175A

## PM-175A

- Resolution of > 800 lines • Video frequency of 15MHz • Linearity of 2%

The PM-175A is a monochrome monitor of excellent picture quality. Regular-use controls are conveniently arranged and located on the front panel below the escutcheon. The tube employed is a first-quality, integrally implosion protected 17" CRT, and the video chassis is a printed-board module.

PM-175A ..... \$768.00  
 PM-175/R (Rackmounted) ..... 939.00

PM-205A

## PM-205A

- Same as the PM-175A offering higher resolution and a 20" black and white monitor • 1,000 lines resolution • Low noise • Sharp picture quality

PM-205A ..... \$879.00

PM-206

## PM-206

- 1,200 lines horizontal resolution • Composite sync, underscan and overscan by switch selection

The PM-206 is a high resolution 20" black and white video monitor. It can be used as a high resolution precision TV monitor or as a high definition character display for computer terminals.

PM-206 ..... \$1719.00

## Ultra-Vision 4000

### 8' Large Screen Video Projector with MTS Stereo Sound

- 330 lines resolution, NTSC video
- 320 lumens peak output
- 10<sup>1</sup>/<sub>4</sub>" H x 31" W x 25" D, cabinet size
- 100% modular chassis
- Two 5" oval speakers
- Advanced color sentry
- Peak Resolution Picture (PRP) Circuit (comb filter)
- Quartz-controlled electronic tuning
- Magic-Touch tuning
- Phase-Lock loop tuning
- Electronic power sentry voltage regulator
- Picture control
- Sharpness control
- Video filter
- Digital True-Lock picture hold
- Automatic Fringe-Lock circuit
- Provision for CATV/MATV antenna connection
- Provision for remote antenna switch accessory
- Power source—120V (nom.), 60Hz AC

**Optical-Coupling**—Increases contrast and brightness by reducing the number of reflecting surfaces within each tube.

**Liquid-Cooled Tubes**—Enhance picture brightness. A liquid-cooling process in each tube allows them to be driven harder, providing even greater picture brightness.

**Viewing Options**—The projector comes factory set for floor location, front projection. Ceiling mounting for front projection or rear projection is also possible.

**Viewing Surface Requirements**—The viewing surface can be a white wall painted with a flat (non-gloss) paint, a good quality front projection screen with a flat white (matte) finish, or a rear projection screen. (Note: Screen is an optional accessory.)

**Viewing Distance Requirements**—The TV requires a minimum distance of 13' from the back of the TV to the viewing surface. Use the range finder control to determine optimum viewing distance. The TV should be placed in a room that can be darkened easily, as picture quality will be directly affected by lighting conditions. The product can be mounted onto an optional floor stand with casters or a ceiling mount.

**Stereo Sound System**—Reproduces Multi-channel Television Sound (MTS), when broadcast, in true stereo sound. Plus, second language or other second audio (non-stereo) programs being telecast.

### Stereo Amplification Sound System:

**Stereo Power Amplifier**—With output of 5W minimum continuous RMS power per each channel from 100Hz to 10,000Hz into 8 ohms with 2% or less total harmonic distortion, measured from auxiliary input to load.

**Stereo Controls**—Separate bass, treble and balance controls. Extended stereo control electronically increases apparent separation of speakers so that an "extended," more spacious stereo effect is perceived with stereo broadcasts.

**On-Screen Audio Display**—Shows whether stereo, monaural or second audio (second language) program is being broadcast. Audio modes can be selected by remote control.

4000

**178 Channel Tuning Capability**—All VHF/UHF and 122 cable channels. Select most available CATV channels without an external converter (except scrambled programs). Includes 110 midband, superband, hyperband and ultraband channels plus 12 VHF band channels. Band selector for VHF/UHF, CATV or CATV special frequency: Harmonically Related Carrier (HRC). Note: Cable systems vary. Check your cable company for compatibility.

**Remote Control**—Turn TV on/off, select channels, scan favorite programmed channels, adjust volume, mute sound, recall channel number and time, select TV stereo, monaural or 2<sup>nd</sup> audio sound.

**Flashback**—Pushbutton instant return to last channel viewed. Use to watch two programs alternately during the same viewing period.

**Parental Control**—Use your own secret code to lock-out for 12 hours any unwanted TV channels that could be viewed in your absence.

**Timed Entry Channel Selection**—2-second automatic channel change after selection. For instant change, press number, then Enter.

**Programmable Favorite Channel Scanning**—Can be programmed to scan up or down through locally available or favorite channels.

**On-Screen Channel Number/Time Display**—Visible each time change is made or Enter pressed.

### Video Monitor Capability:

**Auxiliary Jack Panel**—Permits you to use your TV as a monitor for various audio/video devices. Input jacks allow connection of a video camera, video disc players, or video cassette recorders. Output jacks provide a source of video and audio signals for recording purposes, or permit you to feed stereo TV sound to a stereo VCR or external speakers. You can even route the TV's stereo signal into your stereo amplifier and use the TV's remote control to adjust the volume.

4000	Video Projector; set for 8' diagonal image (4.8'H x 6.5'W), front projection, table mount	\$2850.00
4000 Opt. 01	Configuration changes: screen size (6' to 15' diagonal); front to rear projection; table to ceiling mt.	170.00

# VIDEO PROJECTOR

## Ultra-Vision 3000

### Professional Color Video Projector

**Optical Coupling**—Increases contrast and brightness by reducing the number of reflecting surfaces within each tube.

**Liquid-Cooled Tubes**—Enhance picture brightness. A liquid-cooling process in each tube allows them to be driven harder, providing even greater picture brightness.

**Viewing Options**—The projector comes factory set for ceiling-mounted, front projection viewing. Floorstand, front projection or rear projection are also possible.

**Program Source**—The projector uses any program source supplying a composite video and audio signal, such as a Video Cassette Recorder, TV tuner, video camera, or video disc player. Check Technical Specifications to insure the compatibility of a particular source. Use the projector Video Out jack to run the incoming video signal to a second optional accessory, like a VCR.

**Viewing Surface Requirements**—The viewing surface can be a white wall painted with a flat (non-gloss) paint, a good quality front projection screen with a flat white (matte) finish, or a rear projection screen. (Note: Screen is an optional accessory.)

### Viewing Options

The Monitor adapts to fit your viewing area.

**Viewing Distance Requirements**—The Monitor requires a minimum distance of 13' from the back of the Monitor to the viewing surface. Use the range finder control to determine optimum viewing distance. The Monitor should be placed in a room that can be darkened easily, as picture quality will be directly affected by lighting conditions. The product can be mounted onto an optional floor stand with casters or a ceiling mount.

**Video Filter**—When on, it reduces picture noise and snow effect in color picture, automatically.

**Picture Control**—Keeps brightness level and color saturation in balance simultaneously as you adjust this control.

**Sharpness Control**—Permits adjustment of picture detail to desired sharpness.

**Electronic Range Finder**—Shows where monitor should be positioned for optimum viewing.

**5" Oval quality speaker.**

### Specifications

#### Inputs

**Video:** 1V p-p composite video, sync negative, 75 ohm unbalanced termination, phono input jack

**Audio:** 437mVRMS input for 1.5W output, input impedance 100K ohms, phono input jack. Maximum input voltage, 1.0 RMS

**Power:** 120V, 60Hz

#### Outputs

**Picture Size:** At 10' distance from screen: 4' 10" high, 6' 5" wide, 8' diagonal

# VIDEO PROJECTOR

## Ultra-Vision 2000 Professional Color Video Projector

Ultra-vision 2000 is a high performance large screen color video projector capable of delivering bright outstanding picture definition on any flat or curved screen.

Designed for consistent performance and high reliability, this projector is especially well suited for large screen video applications.

- Screen sizes from 6' to 15' diagonal
- Projects onto flat or curved screens
- Front or rear projection
- Floor or ceiling mounting
- Electronic range finder facilitates set-up
- Electronic border generator surrounds the picture with a black frame
- Comb filter NTSC decoder with enhancement circuitry provides crisp imaging
- Internal audio amplifier with 5" speaker

- Lenses:** Three Delta IID-OC Optical-coupled, flat field, f/1.0 high resolution, 3-element acrylic
- Focus:** Adjustable lens barrel rotation with mechanical lock
- Resolution:** Min. of 3 line pairs/mm across 5" image diagonal
- Display:** 8' diagonal (4.8'H x 6.5'W); projector throw distance 10' front projection; table mounting

Note: Dealer can reconfigure projector for screen sizes from 7' up to 12' diagonal; and can change to rear projection and/or ceiling mount

- Throw Distance:** Approx. 1.5 times image width
- Brightness:** 320 lumens peak output
- Resolution:** 330 lines
- Width:** 24"
- Length:** 23" cabinet, with lens mounted in full focus extension, 30.5"
- Height:** 12.5"
- Weight:** 80 lbs. net; 90 lbs. shipping
- Color:** Pecan finish with black and metallic accents

2000

Model	Description	Price
2000	Video Projector; set for 8' diagonal image (4.8'H x 6.5'W), front projection, table mount	\$2250.00

1463	Mounting kit for concrete or steel beam ceilings	60.00
1465	Mounting kit for rafter or plaster ceilings	65.00
1445	Extension column; specify length (2' min.)	ft./10.00
2000SM	Technical Service Manual for 2000	50.00
CV 512	Electronic TV Tuner; 157 channels; cable-ready; IR remote controlled	395.00

### VIEWING OPTIONS

The 2000 adapts to fit your viewing area...

Floorstand front projection viewing

Ceiling mounted front projection viewing

Floorstand rear projection viewing onto rear projection screen.

NOTE: Floorstands, ceiling mounts, and screens are optional accessories.

### 2000 SYSTEM COMBINATIONS

Monitor/VCR  
System Capability: Use the VCR's tuner to get big screen enjoyment of either broadcast TV signals or prerecorded tapes. Add a TV Tuner to record one program while viewing another.

Monitor/Stereo VCR/Stereo Amplifier/ Speakers  
Produce stereophonic sound in combination with the big picture for a large room, commercial application, or when stereo sound is simply a preference.  
NOTE: Other combinations are possible. Consult with your dealer to insure the compatibility of a particular system.

# SWITCHERS/DISTRIBUTION AMP

## MPS-50H Professional EFP/Studio 2 Input Production Switcher

- Studio Grade Performance
- Built-in test circuit adjust H-phase and subcarrier phase without need of a waveform monitor or vectorscope
- Two channel mix/dissolve, horizontal wipe, vertical wipe, A/B reverse/cut
- Portable small size, lightweight
- Battery operation + 12VDC with power loophrough
- AC operation with IL-AC12 AC adaptor included
- Comes with carrying handle

The MPS-50H is a miniature two-input vertical interval production switcher with studio grade performance. The switcher accepts two inputs that are genlocked and horizontally timed and subcarrier phased. The MPS-50H allows horizontal and vertical wipes, mix (dissolve) between video A and B and a vertical interval cut between video A and B.

### Specifications

**Frequency Response:** 50Hz-6MHz  $\pm$  0.5dB  
 6MHz-10MHz +0.5dB/-2dB  
**Signal to Noise:** 60dB  
**Gain In/Out:** Unity  $\pm$  1% (into 75 ohm load)  
**Gain Balance CH A vs CH B:**  $\pm$  0.5%  
**Differential Gain:** < 0.5%  
**Differential Phase:** < 0.5°  
**Inputs:** Two inputs-CH A and CH B (4xBNC)  
 Input Level-CH A 1V p-p nom.  
 CH B 1V p-p nom.  
 Input Impedance-CH A and CH B  
 > 10K ohm bridging loophrough  
**Outputs:** Two Outputs—Out 1 and Out 2 (2xBNC)  
 Out Level-1V p-p nom. (Into 75 ohm)  
 Output Impedance—75 ohm  $\pm$  2%  
**Power Requirements:** Voltage + 10.7 to + 17VDC  
 Current draw 150mA max.  
**Size:** 27/8" H x 8 1/2" W x 9 1/2" D

**MPS-50H** ..... \$844.00

### Accessories

IL-AC12 AC power adaptor  
 Input Voltage: 120VAC + 10/-15%  
 Output: + 12VDC at 400mA

## MPS-55H Professional EFP/Studio 2 Input Production Switcher with Automatic Changeover

- Local/remote automatic control
- Capable of being activated by camera trigger
- Includes adjustable soft edge capability
- Automatic is adjustable

**MPS-55H** ..... \$979.00

FDA 30 Front

FDA 30 Back

## FDA 30 Flexible Video Distribution Amp

- Unit has 3 separate amps that can be configured to distribute 1, 2 or 3 different video signals
- Rackmount up to 3 units in a rack with connectors facing the rear or the front
- When connectors are mounted on front, unit can be used in conjunction with a patch panel for added flexibility
- 12VDC or battery operated

### Specifications

**Inputs:** 3 loophrough (high impedance)—  
 AC coupled 6xBNC connectors  
**Input Level:** 1V p-p nominal  
**Return Loss:** > 38dB at 3.58MHz each amplifier  
**Outputs:** 2 outputs per amplifier—AC coupled 6xBNC connectors  
 75 ohm  $\pm$  2%  
**Output Impedance:** 75 ohm  $\pm$  2%  
**Isolation Between Amplifiers:** > 50dB at 3.58MHz  
**Gain:** Unity nominal into a 75 ohm load  
**Gain Adjustment:** Internal adj. + 3dB/-1dB to compensate for cable loss  
**Frequency Response:** Flat 30Hz to 10MHz  $\pm$  .25dB  
**Frequency Compensation:** Internal adjustment approx. 3dB boost at 10MHz available to compensate for cable loss  
**H Rate Tilt:** < 1%  
**V Rate Tilt:** < 2%  
**Differential Gain:** < .5% each amplifier  
**Differential Phase:** < .15° each amplifier  
**Propagation Delay:** < 15ns each amplifier  
**Power:** Voltage 10.8VDC—17VDC  
 Current consumption: < 100mA at 12VDC

**FDA 30** ..... \$410.00

# IMAGE VIDEO, LTD.

# MACHINE CONTROL SYSTEMS

## 4100 MACHINE ASSIGNMENT SYSTEM

- Handles up to 160 Machines • Up to 24 Control Panels • Up to 25 Machines per Panel • Up to 35 levels of switching • Master start of preset functions • Tally of Remote/Local control • Communication via coaxial cable • Plug-in modules for flexibility and easy maintenance • Status generator and printer facility

### System Controller

The organization is built around the System Controller which is made up of two sections; the Assignment Controller, and the Machine Controller. Each section contains a microprocessor and they communicate with each other via a multi-conductor cable in parallel format.

The Assignment panels all contain a microprocessor and communicate with the Assignment Controller via coaxial cable. The Assignment Controller handles the assignment of control panels and machine interfaces.

The control panels also all have a microprocessor and communicate with the Machine Controller via coaxial cable. The Machine Controller handles communications between the control panels and the machine interfaces.

### Machine Assignment Panel

The machine assignment panel permits the assignment of any control panel to control any machine (VTR, Telecine) through the machine interface unit. It effectively interconnects the various control panels and the machine interfaces.

Assignment is made by simply entering the machine number and then the control panel number. Pressing ASSIGN completes the assignment. A machine cannot be assigned to more than one control panel. The communications link between a machine and a control panel is broken by entering the machine number and pressing CANCEL.

The machine and control panel numbers are three characters and do not have to be in any specific order.

### Machine Interface

The machine interface is a two rack unit assembly capable of remotely controlling the functions of a machine. It consists of five Relay Tally Boards, a DIP Switch Board, a Line Driver Tally Board, and a Microprocessor Board.

Each Relay Tally Board is capable of seven levels of relays and seven return tallies. Pushbutton functions, e.g. Fastforward, are associated with each relay.

The Microprocessor Board communicates with the outside world and operates the relays etc.

The DIP Switch Board has DIP Switches for machine number assignment, relay close time, and baud rate etc.

The Line Driver Tally Board controls the remote tallies and confirms the presence of the power supplies.

Five 38-pin connectors at the rear of the frame interface between the relay boards and the actual machines being controlled.

VTR interfaces normally consist of 7 levels of control and Telecines normally have 21 levels. However, up to 35 levels may be controlled. The control is buffered via floating (form C type) relay contacts and the tally from the machine with an optical isolator.

Control Panel

Machine Assignment Panel

### Control Panel

This desk mount panel provides control of the machines assigned to it. The number of machines to be controlled varies depending on specific customer requirements. The standard configuration is 3 VTRs with 7 levels of control and 2 Telecines with 21 levels of control each. Special control panels with up to 25 machines and 35 functions per machine may be specially ordered.

A three character alphanumeric display shows which machine is assigned to the bus. The machine numbers do not have to follow any specific order and there can be a total of 160 machines in a system. The numbers assigned to the machines should be specified at the time of ordering. A blank machine number indicates that no machine is assigned.

Operations may be preset on all of the busses of the control panel and with one button, the MASTER START, all the selected functions will be taken. Functions are preset by holding down the PRESET button and depressing the desired functions. Preset functions can be cleared by holding down the PRESET button and depressing the function button again. Presets can also be cleared when they are initiated by the MASTER START button.

A coaxial cable is used to interconnect the control panel and the System Controller. Clare Pendar or Shadow type pushbuttons are available.

# MASTER CONTROL SWITCHER

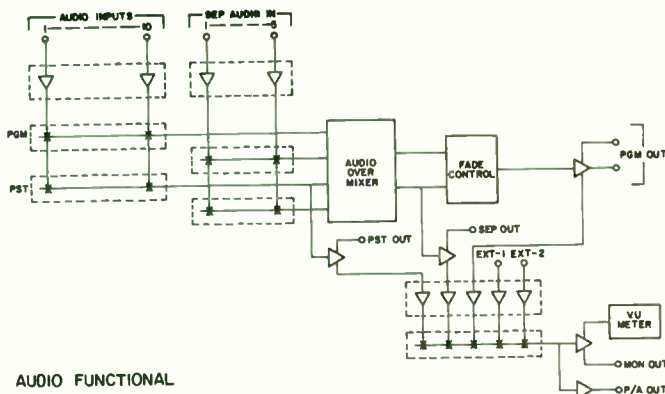

## 8010 MASTER CONTROL SWITCHER

- 10 input Program Bus
- 10 input Preset Bus
- Separate Audio on Program and Preset
- Audio Follow, Separate Audio, or Audio Over Modes
- 5 input Key Source Bus
- Matte Generator
- Auto Take (Cut) or Manual fader
- Monitor Bus with VU meter
- Manual Start for the Preset Bus
- Cart Start facilities on Program and Separate Audio Buses
- Open Collector Tallies on Program Bus
- Optional Stereo Audio

Introducing the 8010, a compact version of the new 8000 line of Master Control Switchers. The 8010 Master Control is now the obvious answer for small installations in search of both economical sophistication and simplistic operation.

A major criterion in the design and development of the 8010 Master Control Switcher has been to incorporate our traditional values of ease of maintenance and reliability. These values have not only been integrated into the 8010 Master Control Switcher but have also been refined to provide the superior dependability that smaller installations demand.

# MASTER CONTROL SWITCHER

## 8020 MASTER CONTROL SWITCHER

- Program and Preset Buses with 20 inputs of video and 20 inputs of audio each and operational in the audio follow video mode or breakaway audio mode
- Optional Stereo Audio
- Preview Bus with 20 AFV inputs
- Take function
- Preroll
- Manual Mix
- Auto Mix with selectable rate
- Audio Over Bus with manual cart start facility on Preset Bus and auto cart start on Program Bus
- ON AIR TALLY Connector (open collector type) at rear of matrix
- Downstream Keyer with 5 Key Sources and a manual key fader, Matte Generator color pushbutton, level control, and 6 mode selection buttons for the key signal
- Fade-to-Black and Silence with selectable rate
- VU meter for the Preview and Preset Bus
- VU meter for the Program Bus with remote gain control potentiometer

The Model 8020 is one in the 8000 series of sophisticated new master control switchers built to accommodate the varying requirements of a myriad broadcast industry.

Various essential features have been added to the recognized reliability and dependability of our previous master control switchers.

The 8020 is designed for medium size television stations. It maintains all the essential features of a large master switcher while remaining economical, compact, and easy to operate. Features that give the 8020 the power of a full scale master.

## Control Panel

- Coax Cable Control Line
- Audio Cable Control Line Optional
- Multipanels per Line
- Large selection of control panel configurations
- Audio and Video may be selected married or unmarried on some panels
- Multilevel unmarried control panels available
- Standard 8 bit word serial communications
- Alpha numeric entry and display available on some panels
- Single or multi destination control panels available on some models
- Will operate the switcher up to 2000 feet using coax
- Multi source electronic components used, no hybrids, custom I.C.'s or mask programmable ROMs
- Custom panel requirements easily accommodated
- Milled plate aluminum used on front panels
- All front panels are brushed, deep etched and clear anodized
- Legends custom engraved and filled black

CP-1 DESK TOP PANEL

### IV CP-1/X

The CP-1/X is either a full matrix or restricted Keypad control panel. The "X" designation indicates full matrix control panel. If a digit is substituted for "X" then this digit identifies the total number of destinations which the panel controls. These destinations must be specified when ordering, but may be changed later by recoding a PROM. The panel is complete with 7 segment LED readouts for BUSS, VIDEO PRESET, AUDIO PRESET, VIDEO STATUS and AUDIO STATUS. Selection of new source may be 1 of 4 modes; Audio follow Video, Audio only, Video only or Audio/Video unmarried. The unit is built in a desk top configuration.

### IV CP-1/CX

This panel is similar to the CP-1/X, except the Keypad is coded for alpha input selection instead of numeric.

### IV CP-1/XK

This panel is similar to the CP-1/X, except the TAKE function is disabled by the use of a lock and key.

### IV CP-1/CXK

This panel is similar to the CP-1/X and also includes the features of the CP-1/CX and the CP-1/XK.

CP-2 RACK MOUNT PANEL

The CP2/X, XK, CX, CXK, are similar to the CP-1 but rack mounted. In addition, the CP-2 Panel can be restricted to any nine destinations, selected by DIP switches (provided) or may control the full matrix.

# ROUTING SWITCHER CONTROL PANELS

CP-4/3 CONTROL PANEL

### IV CP-3/1

Single thumbwheel control panel with access to all inputs on one destination. Complete with TAKE pushbutton and 7-segment LED status readout. Simultaneous audio and video selection. Desk top mounted box.

### IV CP-4/X

Rack mounted control panel. Thumbwheel input selection with TAKE pushbutton and numeric status display. Simultaneous audio and video selection.

A number (1 through 9) substituted for X indicates the total number of destinations the panel controls. Separate thumbwheel selection and status readout for each destination.

### IV CP-5

Shadow pushbuttons with gold contacts and relegendable caps. Mounted in a brushed anodized aluminum panel. Pushbuttons available in multiples of 10 to a maximum of 50.

### IV CP-6

Same as CP-5/X but with Clare Pendar S180 series illuminated pushbuttons.

### IV CP-7

Salvo panel capable of 10 presets. MASTER TAKE pushbutton for simultaneous take of preset inputs. Status, and preset numeric displays. Simultaneous or separate audio and video.

### IV CP-7/C

Same as IV CP-7 but with coded (alphanumeric) keypad.

CP-7800 CONTROL PANEL

### IV CP-7800

Controls one destination only. Has four overrides and four breakaway levels. Alphanumeric thumbwheel selection and alphanumeric display.

### IV CP-9/1, IV CP-9/2

Similar to IV CP-4/1, IV CP-4/2 but with alphanumeric thumbwheel and numeric status display

## 6030 10X1 BROADCAST ROUTING SWITCHER

### With Full Three Level Breakaway

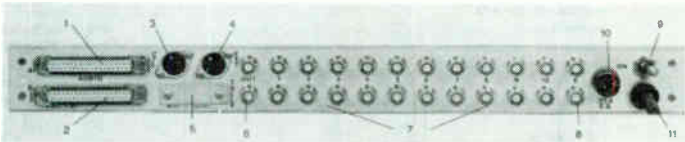

The 6030 is a self-contained high quality 10X1 switcher ideally suited for use throughout the television and radio industry. A flexible configuration and control system permits its use from production to monitoring applications and eliminates the need for customized equipment. The design for the 6030 is based on the established reliability and uncompromised quality of the 6010...the 10X1 switcher with a proven track record.

### FEATURES

- Relegendable pushbuttons with gold contacts and dual, two-color LED indicators for Audio/Video identification. A steady-on Audio LED indicates the first channel, flashing indicates the second
- Simultaneous selection of units when the control is in parallel mode (for RGB application, etc)
- Two outputs per bus, video and audio
- Loop through video inputs
- Bridging audio inputs
- Vertical interval switching
- Hinged front panel for easy access to plug-in modules
- Low power consumption
- Second audio channel may be retrofitted
- All electronic switching
- Crosspoint retention during power failure (optional)

### CONFIGURATION

- Basic switcher is 10X1, video only, mono or stereo audio only, or AFV with mono or stereo audio in one rack unit, with individual Audio Breakaway
- One or both audio channels may be replaced with time code or control bus
- Basic switcher may be field expanded to 20X1 or more with additional 6030's
- Remote control via shielded audio pair may be factory installed or field installed later (no soldering or adjustments required)
- Tally is optionally available (one open collector per input)
- RS232, RS422, or Image Video (Coax bus) control optionally available for automation interface
- Remote and local controls may be paralleled

### REAR PANEL FACILITIES

# ROUTING SWITCHER

6010

## 6010 10 x 1 ROUTING SWITCHER

The 6010 self-contained switcher is a high quality 10 x 1 suitable for use throughout the television or radio plant, from production to monitoring applications. The flexible configuration and control system frees the engineer from handbuilt or customized equipment procurement.

- Releasable pushbuttons with gold contacts and LED indicators
- Two outputs per bus, video and audio
- Loop through video inputs
- Bridging audio inputs
- Vertical interval switching
- Hinged front panel for easy access to plug-in modules
- Low power consumption
- Second audio channel may be retrofitted
- All electronic switching
- Crosspoint retention during power failure (optional)

### CONFIGURATION:

- Basic switcher is 10 x 1, video only, mono or stereo audio only or AFV with mono or stereo audio in one rack unit
- One or both audio channels may be replaced with time code or control bus
- Basic switcher may be expanded to 20 x 1 or more with additional 6010's
- Remote control via shielded audio pair may be factory installed or field installed later (no soldering or adjustments required)
- Tally is optionally available (one open collector per input)
- Parallel BCD control optionally available for automation interface
- Remote and local controls may be paralleled

# ROUTING SWITCHER

Custom Control Panel

Switcher Matrices

## 6000 Broadcast Routing Switcher

- Solid state vertical interval switching.
- Compact expandable modular construction used throughout.
- Excellent video and audio specifications for full color broadcast use.
- Video only, audio only, audio follow married or unmarried control available.
- Crosspoint retention during power interruption optional.
- Tally LED on each video crosspoint indicates exact switcher status at all times.
- Conservatively rated, overload protected power supplies for trouble free operation.
- One pushbutton per crosspoint or thumb-wheel control panels available.

The 6000 Series Switchers are specifically designed for small and medium audio/video routing systems. These versatile switchers are ideally suited as high quality electronic patch panels, delegate switchers or in any application where remote controlled switching is needed.

Compact 5 x 1 or 10 x 1 crosspoint modules plug directly into the motherboard assembly which also accommodates the input and output amplifier modules. This flexible configuration allows up to 24 outputs per 19-inch rack.

# ROUTING SWITCHER

## 6200 BROADCAST ROUTING SWITCHER

The 6200 Series Switchers are designed for medium to large Routing Systems and are available in any combination of video, audio and timecode/control (SMPTE/EBU, I<sup>2</sup>) matrices.

Compact 10x1 crosspoint modules, input and output modules and control modules plug into a backplane assembly. This flexible configuration allows unlimited expansion.

A wide variety of microprocessor based control systems are available including button per crosspoint, X-Y, thumb-wheel, keypad or combinations of these. All systems may be equipped with interrogation, numeric only or alpha-numeric displays on the control panels, CRT status displays and rack mount alphanumeric displays.

- Expandable, modular construction
- Separate or married control of video, audio or multiple audio available
- Crosspoint retention during power interruption available
- Automatic switch to backup power supply available
- Tally indicators on all audio and video crosspoints for ease of maintenance
- Excellent video and audio specifications
- All bus related modules interchangeable—no proms or DIP switches to change
- In-service maintenance disables only 10 crosspoints on one bus (video) or two buses (audio)
- Readily available components—no custom LSI or hybrids
- Parallel interface available for automation control
- Extra audio or timecode matrices may be added at a future date without system modifications
- 8 bit word format used in serial control system

# ROUTING SWITCHERS

## 9600 High Density Routing Switcher

- Accurate indication of crosspoint status (true tally)
- Comprehensive diagnostics package
- Infinite number of levels
- Full breakaway capability

The 9600 is compatible with both MAC and high definition television standards. Compact design enables 40 x 40 video and 2 audio channels in just 16 rack units of space, or 80 x 80 video and 2 channels of audio in 48 rack units. The versatility of the system will allow both field expansion up to 320 x 320 and modification without disruption of normal operation.

External distribution amplifiers are not required for matrices. The 9600 is completely compatible with all existing Image Video control panels and operates in conjunction with the Image Video 10K Control System.

9600

### Specifications

 THD ..... < .02% 20Hz-20KHz, +18dBm  
 ..... < .2% 20Hz-20KHz, +24dBm  
 Max. Signal to Noise Ratio ..... > 96dB, typical 105dB  
 Output Gain Range ..... ± 3dB  
 Crosstalk @ 20KHz ..... > 75dB, typical 82dB

#### ELECTRICAL

Power ..... 120/240 VAC, 50/60Hz

#### MECHANICAL

40x40 Video Only ..... 8 rack units  
 40x40 Dual Audio ..... 8 rack units

## 9400 RGB (Y) Routing Switcher

The 9400 RGB (Y) is a fully self-contained switcher featuring built-in power supply and all necessary control circuitry.

The 9400 RGB (Y) is a DC-in, DC-out, full transparent unit with 3 x 20 inputs (4 x 20 optional) into 3 x 20 outputs (4 x 20 optional). Inputs are standard loopthrough, with no clamping or DC restore circuitry (all input signals should be on the same DC circuitry).

### Specifications

**Input**  
 Level: 1V p-p nom., 2V p-p max.  
 Impedance: > 10K ohm loopthrough ext. term.  
 Ret. Loss (5MHz): > 46dB loopthrough

**Output**  
 Level: 1V p-p nom., 2V p-p max.  
 Impedance: 1 x 75 ohm/bus  
 Frequency Response: DC—10MHz + 0, -0.2dB  
 10—20MHz + 0, -1dB

Hor. and Vert. Tilt: < 0.25%  
 Signal-to-Noise: > 75dB RMS  
 Crosstalk: < 65dB (5MHz)  
 Diff. Gain: < .1°  
 Diff. Phase: < .1%  
 Diff. Path Length: 45.7ns (59° ± 1°)  
 (NTSC)

Electrical Power: 120/240VAC, 50/60Hz

Mechanical: 9 rack units

# BORDER GENERATOR

8105

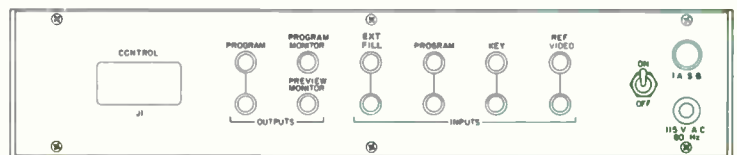

## 8105 Border Generator

The 8105 provides bordering facilities controlled from a remote control panel. One special feature is the elimination of bothersome dither associated with camera originated graphics.

- Built-in color fill generator locks in the incoming video
- Borders graphics or character generators
- Eliminates dither when bordering camera originated graphics
- Built-in linear keyer provides cut or auto-mix of key into program video
- Remote control panel with facilities for border, outline, color fill key, drop shadow, invert key, and variable key threshold control
- Master fade to black
- Advanced technology incorporating CCD delay lines
- External key fill

# AUDIO/VIDEO COMPONENTS

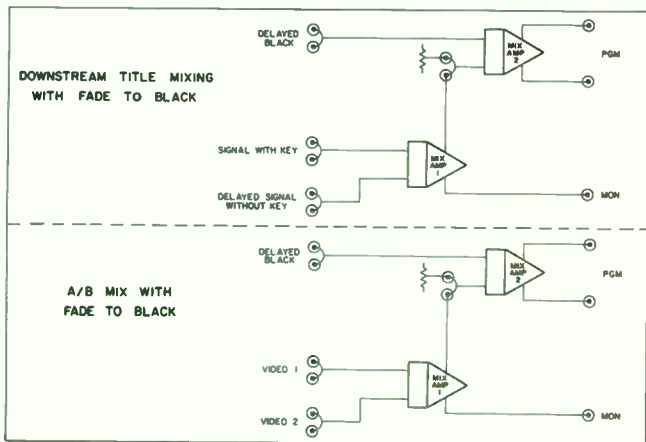

7001C

## 7001C — DUAL VIDEO MIX AMP

- Two separate video mixing amplifiers housed in a single rack unit
- Remote control panel
- Mix amps may be independently operated or cascaded
- Operates on synchronous video source — no external sync requirements
- Control and tally output on same connector on rear panel
- Standard AUTO-MIX permits variable rate and automatic mix on amp 1
- Easily conformed to existing system
- Audio-follow-video option available
- Manual fader on amp 2

The Dual Video Mix Amp — Model 7001C incorporates two independent video mixing amplifiers housed in a single rack unit and controlled from a remote panel.

The Model 7001C meets all broadcast specifications and is ideal for use in downstream title mixing and A/B mixing applications.

TYPICAL APPLICATIONS

## SPECIFICATIONS

Video Inputs .....	Four, 1V p-p, 75 ohms terminating
Video Outputs .....	Four, 1V p-p, (2 outputs per amp)
Frequency Response .....	$\pm 0.2\text{dB}$ to 5MHz, $\pm 0.5\text{dB}$ to 8MHz
Diff. Phase .....	$< 1.5^\circ$ (10-90% APL)
Diff. Gain .....	$< 1.5^\circ$ (10-90% APL)
Crosstalk .....	$> 55\text{dB}$ at 3.58MHz
Tilt (Vert & Horiz) .....	$< 1\%$
Signal to Noise .....	$> 60\text{dB}$
Path Length .....	25ns (through one amplifier)
Path Length Differential .....	$< 1^\circ$
Tally Output .....	Open Collector pull down
Electrical .....	117/230V, 50/60Hz
Electronics Frame .....	1 rack unit (1-3/4" x 19" x 10")
Control Panel .....	7" x 3" x 3-1/2"
Video Connector .....	BNC
Control and Tally Connector .....	D-Sub miniature

## 7707 — UNIVERSAL UNDER MONITOR DISPLAY

The basic system consists of 2 components: the monitor display driver and the monitor status display.

7707K DRIVER AND DISPLAY UNITS

### Driver Frame

- Two rack units high
- Will drive up to 9 displays
- Connects to displays by 37 pin flat ribbon cable
- Connects directly to the Routing Switcher or to an RS232 interface unit (7707 only)
- On Air Tally inputs connected by 25 pin D type connector—the user supplies the contact closures only
- Internal Power Supply
- Alphanumeric Keypad for message update (7707K only)

### Display Unit

- Single rack unit high
- Available in both rack and wall-mounted design
- Rack mounted units are available in a number of formats to accommodate the picture monitor layout: displays can be located in the center, to the left or right side, or two displays per panel

There are two types of systems available — the model 7707 and the model 7707K. Both systems use the same kinds of monitor status displays; only the display drivers are different.

The model 7707 system can be driven directly from Image Video routing or master control switchers or with an optional RS232 interface, can be driven directly from any routing or master control switcher that has a tally output. Each driver frame can handle up to nine display units and multiple drivers may be connected via the control inputs to accommodate requirements for more than nine displays.

The model 7707K system has a built-in alphanumeric keypad used to update message data on the display units. Up to nine display units may be driven from one 7707K driver, however, multiple drivers may be connected together to facilitate additional display units. Only one of these drivers requires a keypad. Each display output is internally assigned a display number (1 to 225) via a dip switch.

## 601, 602 10X1 PASSIVE ROUTING SWITCHERS

### Video 601 AFV Switcher

Transparent signal path ensures the integrity of the audio/video signal.

Video signal is fed through the switcher with excellent crosstalk specs and high stability with no noise interference. And, there is unity transmission gain. Input video is via isolated BNC connectors and is terminated with built-in 75 ohms 1% resistors. Selected input is indicated by an orange strip on input pushbuttons.

Crosstalk .....

Better than 40dB at 4.2MHz  
 (All other inputs hostile)

Physical Dimensions .....

19" x 1-3/4" x 4"

### 602 Dual Audio Switcher

Each audio input is terminated with built-in 600 ohms resistors. The inputs and outputs are brought to the panel via two 25-pin D-type connectors for wiring convenience. There is no degradation of the input signal.

Crosstalk .....

Better than 70dB at 20kHz  
 (All other inputs hostile)

Physical Dimensions .....

19" x 1-3/4" x 4"

### Ordering Information

# TRIPODS/HEADS

## ITE-T20A ELEVATION TRIPOD

Camera/Head Load Capacity	20 lbs. (9 kg)
Minimum Height	34 in. (86 cm)
Maximum Height	68 in. (170 cm)
Elevation Adjustment	16 in. (40 cm)
Minimum Folded Length	32 in. (80 cm)
Minimum Folded Width	9 1/2 in. (23.75 cm)
Maximum Leg Angle	15°
Tilt Angle	60°
Pan Rotation	360°
Weight	8 lbs. (3.6 kg)
Finish	Anodized Aluminum and Black Wrinkle

**\$145.00**

## ITE-H2 CAM HEAD

Camera Load Capacity	120 lbs. (54 kg)
Tilt Angle	up to ±50°
Pan Rotation	360°
Height	7 1/2 in. (18.75 cm)
Width	9 in. (22.5 cm)
Length	10 in. (25 cm)
Weight	25 lbs. (11.25 kg)
Base	Mitchell Type

**\$1575.00**

### Optional Accessories:

Dual handles;  
wedge adaptor;  
telescopic handles

## ITE-H8 MICROWAVE PAN/TILT HEAD

Camera Load Capacity	250 lbs. (112.5 kg)
Tilt Angle	±45°
Pan Rotation	360°
Height	7 in. (17.5 cm)
Width	8 in. (20 cm)
Length	9 in. (22.5 cm)
Weight	19 lbs. (8.55 kg)
Base	Mitchell Type

Mounting plate designed for standard L-bracket attachment

**\$1225.00**

### Optional Accessories:

Control Handle

## ITE-H6 HYDROCAM HEAD

Camera Load Capacity	130 lbs. (58.5 kg)
Tilt Angle	up to 50°
Pan Rotation	360°
Height	8 in. (20 cm)
Width	9 in. (22.5 cm)
Length	9 1/2 in. (23.75 cm)
Weight	23 lbs. (10.35 kg)
Base	Mitchell Type

Includes dual handles and wedge adaptor (requires wedge plate)

**\$2875.00**

## ITE-H10 HYDRO HEAD

Camera Load Capacity	40 lbs. (18 kg)
Tilt Angle	±60°
Pan Rotation	360°
Height	6 1/2 in. (16.25cm)
Width	6 1/2 in. (16.9cm)
Length	6 1/2 in. (16.9cm)
Weight	9 lbs. (4.05kg)
Base	1 1/4 in. (4.4cm) Clamp or Claw Ball

Camera Mounting Plate/Quick Release:  
4 in. (L) x 2 in. (W) (10 cm x 5 cm) with 3/8 in. (.94 cm) slot for mounting cameras with 1/4 in. (.625 cm) or 3/8 in. (.94 cm) screws

### Optional Accessories:

**\$1900.00**  
Dual handles

## ITE-H11A FLUID HEAD (Miller Super "8" Model)

Camera Load Capacity	10 lbs. (4.5 kg)
Tilt Angle	±80°
Pan Rotation	360°
Height	5 in. (12.5 cm)
Width	3 1/2 in. (8.75 cm)
Length	4 in. (10 cm)
Weight	2 lbs. (.9 kg)
Base	Flat

Optional Accessories:  
Claw Ball leveling

**\$275.00**

## ITE-MT1 TRIPOD

For Camera and Microwave Applications

Camera/Head Load Capacity	250 lbs. (112.5 kg)
Minimum Height	25 in. (62.5 cm)
Maximum Height	43 in. (107.5 cm)
Minimum Folded Length	34 in. (85 cm)
Minimum Folded Width	9 1/2 in. (23.75 cm)

Maximum Leg Angle	38°
Weight	33 lbs. (14.85 kg)
Finish	Aluminum and Black Wrinkle

Includes spreader; foot pad/spike/spherical ball set; Mitchell base

**\$1275.00**

## ITE-T45 PNEUMATIC TRIPOD

Camera/Head Load Capacity	28 lbs. (12.7kg)
Minimum Height	24 1/2 in. (62.25cm)
Maximum Height at 40° Included Angle	78 in. (198cm)
Leg Angle (adjustable)	90° included (max)
Elevator Column Adjustment	12 in. (30.5cm)
Minimum Folded Length	32 in. (81.3cm)
Minimum Folded Width	7 in. (5.22kg)
Weight	11 1/2 lbs. (5.22kg)
Finish	Black Wrinkle

**\$570.00**

<b>ITE-T705 Tripod—ENG with Ball Leveling (Baby)—For H70</b>	..... \$1150.00

## ITE-H17 Fluid Head

The H17 is a lightweight compact fluid head designed for low cost ENG/EFP cameras.

This system utilizes four step drag adjustment (dial-in type) with free wheeling in both pan and tilt modes, for smooth, effortless and trouble free control.

The H17 is equipped with a counterbalance mechanism that provides variable compensation for center of gravity adjustments for camera loads to 15 lbs. (6.8kg) and C.G. up to four inches.

The H17 directly interfaces with the T17 ENG/EFP tripod and other ITE claw ball base tripods.

<b>Camera Load Capacity:</b>	15 lbs. (6.8kg)
<b>Tilt Angle:</b>	± 90°
<b>Pan Rotation:</b>	360°
<b>Height:</b>	6" (153mm)
<b>Width:</b>	4" (100mm)
<b>Length:</b>	5" (127mm)
<b>Weight:</b>	5 lbs. (2.3kg)
<b>Base:</b>	75mm claw bowl
<b>Camera Attachment:</b>	1/4-20 & 3/8-16 camera screws
<b>Finish:</b>	Black wrinkle
<b>Optional Accessory:</b>	Second control handle
<b>ITE-H17</b>	..... \$1030.00

## ITE-H60 Fluid Head

This system provides counterbalancing of camera loads to 25 lbs. (11.4kg) by use of adjustable, toggle lever controlled helical springs and sliding quick release camera plate. Drag control (in both pan and tilt) can be dialed in for eight different levels of personal feel — from freewheeling to maximum drag. The H60 directly interfaces with the T60 ENG/EFP tripod and other ITE claw ball base tripods.

<b>Camera Load Capacity:</b>	30 lbs. (13.6kg)
<b>Tilt Angle:</b>	± 90°
<b>Pan Rotation:</b>	360°
<b>Height (incl. ball base):</b>	8" (20.3cm)
<b>Width (incl. handle brackets):</b>	6 1/2" (16.5cm)
<b>Length (incl. handle brackets):</b>	6 3/4" (17.2cm)
<b>Weight:</b>	9.2 lbs. (4.2kg)
<b>Base:</b>	110mm claw ball
<b>Camera Attachment:</b>	1/4-20 & 3/8-16 camera screws
<b>Finish:</b>	Black wrinkle
<b>ITE-H60</b>	..... \$2950.00
<b>ITE-RH60T Telescopic handle</b>	..... \$155.00

## ITE-H70/H90 Fluid Heads

Designed for remote and studio applications. These heads provide unsurpassed smoothness of pan and tilt action for heavy camera loads. Perfect counterbalance is obtained by simply preloading three groups of reactive spring elements and fine tuning by adjusting the sliding camera platform. This complete setup procedure can be accomplished with the camera mounted (on quick release plate) and ready to shoot.

Drag control is simple and precise. By dialing in one of 8 selections in pan and 7 selections in tilt, the camera person can obtain desired level of drag, from freewheeling (pan only) to maximum, with unmatched smoothness and precision.

<b>ITE-H70</b>	
<b>Camera Load Capacity:</b>	65 lbs. (28kg)
<b>Tilt Angle:</b>	± 90°
<b>Pan Rotation:</b>	360°
<b>Height (incl. ball base):</b>	9" (22.9cm)
<b>Width (incl. handle brackets):</b>	8 1/2" (21.6cm)
<b>Length (incl. handle brackets):</b>	7 3/4" (19.7cm)
<b>Weight:</b>	19 lbs. (8.63kg)
<b>Base:</b>	150mm claw ball
<b>Camera Attachment:</b>	1/4-20 & 3/8-16 camera screws
<b>Finish:</b>	Black wrinkle
<b>ITE-H70</b>	..... \$4875.00
<b>ITE-H70A Mitchell base adaptor</b>	..... \$285.00
<b>ITE-RH70T Telescopic handle</b>	..... \$155.00
<b>ITE-H90</b>	
<b>Camera load capacity:</b>	100 lbs. (45kg)
<b>Tilt Angle:</b>	± 90°
<b>Pan Rotation:</b>	360°
<b>Height:</b>	10" (254mm)
<b>Width:</b>	9" (206mm)

# HEADS/PEDESTALS

## ITE-H12A FLUID HEAD (Miller Senior "F" Model)

Camera Load Capacity	20 lbs. (9 kg)
Tilt Angle	±80°
Pan Rotation	360°
Height	5 in. (12.5 cm)
Width	4 in. (10 cm)
Length	4 1/2 in. (11.25 cm)
Weight	5 lbs. (2.25 kg)
Base	Flat

Optional Accessories: **\$575.00**

Claw Ball leveling;  
dual handles;  
quick-release assembly

## ITE-H14A FLUID HEAD (Miller Light Pro Model)

Camera Load Capacity	30 lbs. (13.5 kg)
Tilt Angle	±80°
Pan Rotation	360°
Height	5 1/2 in. (13.75 cm)
Width	6 1/2 in. (16.25 cm)
Length	5 1/2 in. (13.75 cm)
Weight	8 lbs. (3.6 kg)
Base	Flat

Optional Accessories: **\$895.00**

Pro Claw Ball leveling;  
dual handles;  
quick-release assembly

## ITE-H15A FLUID HEAD (Miller V.G. 50 Model)

Camera Load Capacity	40 lbs. (18 kg)
Tilt Angle	±75°
Pan Rotation	360°
Height	6-3/4 in. (16.9 cm)
Width	6 in. (15 cm)
Length	7 in. (17.5 cm)
Weight	8 lbs. (3.6 kg)
Base	Flat

Optional Accessories: **\$1,040.00**

Pro Claw Ball leveling;  
dual handles;  
quick-release assembly

## ITE-H100 FLUID DRAG HEAD

Camera Load Capacity	250 lbs. (112.5 kg)
Tilt Angle	±53°
Pan Rotation	360°
Height	8 1/2 in. (21.25 cm)
Width (less handles)	12 in. (30 cm)
Length (less handles)	14 in. (35 cm)
Weight	31 lbs. (13.95 kg)
Base	Mitchell Type

Includes telescopic control handle; zoom stub  
handle; quick-release, lever-action wedge  
adaptor (requires ITE-WP100 wedge plate)

**\$3,450.00**

Optional Accessories: Right-hand  
telescopic handle

## ITE-P3 ELEVATION PEDESTAL

Camera/Head Load Capacity	60 lbs. (27 kg)
Minimum Height	31 in. (77.5 cm)
Maximum Height	49 in. (122.5 cm)
Elevation Adjustment	18 in. (45 cm)
Caster Radius	19 in. (47.5 cm)
Wheel Diameter	4 1/2 in. (11.25 cm)
Weight	36 lbs. (16.2 kg)
Finish	Black Wrinkle

Optional Accessories: **\$1,650.00**

Cable guards

## ITE-P2 ("LOW BOY") PNEUMATIC STUDIO PEDESTAL

Camera/Head Load Capacity	290 lbs. (130.5kg)
Minimum Doorway Clearance	30 in. (75cm)
Wheelbase	28-1/2 in. (71.25cm)
Dual Wheel Diameter	8 in. (20cm) (cast aluminum; polyurethane tires)
Steering Wheel Diameter	30 in. (75cm) (vinyl coated)
Steering Mode	Crab and Tricycle
Cable Guard	Adjustable from 1/8 in. (.31cm) to 1 in. (2.5cm) above floor
Air Pressure	Pressure relief valve opens at 200 PSI representing equivalent overload condition of 300 lbs. (135kg)
Construction	Cast aluminum structure with steel tank and outer column to ASME Pressure Vessel Safety Code; aluminum center column
Weight	180 lbs. (81kg)
Mount	Modified Mitchell Type
Finish	Black Wrinkle

Optional Accessories: Air Supply Charging System

## ITE-P2 ("LOW BOY")

Minimum Height	24-1/2 in. (62.25cm)
Maximum Height	45-1/2 in. (113.75cm)
	<b>\$10,700.00</b>

ITE-H30

ITE-D30

ITE-H40

## ITE-H30 Fluid Head

Provides smooth pan and tilt control. Its counterbalanced design eliminates camera "nose dives." It features a quick-release camera mounting plate, a spirit level and is equipped with a single, adjustable control handle. Dual handles are optional. The ITE-H30 is compatible with other ITE Tripods.

Capacity: 10 lbs. counterbalanced for 2" vertical C.G.

Dimensions: 4" H x 5" W x 4" L

Weight: 2 lbs.

ITE-H30 . . . . . \$195.00

ITE-RH30 Right hand zoom handle . . .50.00

## ITE-T30 Tripod

Features 3-section legs with radial locks for extension and contraction. Its elevator column adjusts to 14". An adjustable, lockable spyder provides structural stability. The ITE-T30 is equipped with a spirit level and combination rubber leg tips and metal spikes.

Camera/Head

Load Capacity: 15 lbs.

Min. Height: 24"

Max. Height at 40°

Included Angle: 69"

Weight: 6 1/2 lbs.

ITE-T30 . . . . . \$230.00

## ITE-D30 Dolly

Completing the system is the ITE-D30 Dolly which provides a stable platform with sufficient radius for proper structural support.

A tripod attachment affords quick set-up and tear-down. Quiet movement is assured by bearing mounted casters with step-on brakes. A center-locking device offers excellent stability and allows the dolly to easily fold and lock in place.

Load Capacity: 20 lbs.

Folded Length: 19 3/4"

Folded Width: 6 1/2"

Height: 6"

ITE-D30 Dolly . . . . . \$195.00

## ITE-H40 Fluid Head

Counterbalanced for smooth, effortless control. It features separate controls for pan and tilt lock and is lightweight. The ITE-H40 utilizes a quick-release camera mounting platform. It comes equipped with a spirit level and

one control handle. Dual handles are optional. The ITE-H40 is compatible with other ITE Tripods.

Capacity: 30 lbs.  
Dimensions: 6 1/2" H x 7 1/2" W x 6 1/2" L

Weight: 7 lbs. (without handle)

ITE-H40 . . . . . \$495.00

ITE-RH40 Right hand zoom handle . . .50.00

## ITE-T40 Tripod

Lightweight, heavy-duty system that features 2-section, positive cam locked legs that are indexed for easy length adjustment.

An adjustable, lockable spyder for structural stability, the elevator column adjusts to 16" Spirit level and rubber-tipped legs are provided. The ITE-T40 will accommodate other ITE Fluid Heads.

Camera/Head

Load Capacity: 40 lbs.

Min. Height: 20 1/2"

Max. Height at 40°

Included Angle: 66"

Weight: 10 lbs.

ITE-T40 . . . . . \$420.00

## ITE-D40 Dolly

Completing the system is the ITE-D40 Dolly. It shares the same features as the ITE-D30 except:

Load Capacity: 50 lbs.

Folded Length: 22"

Folded Width: 8"

Height: 6"

Diameter: 40"

Wheel Diameter: 4"

Weight: 9 lbs.

ITE-D40 . . . . . \$225.00

## ITE-H50 Fluid Head

The H50 Fluid Head is a compact lightweight unit with a load capacity of 30 lbs.

Load Capacity: 30 lbs.

Tilt Angle: +90°

Pan Rotation: 360°

Dimensions: 7 1/2" H x 6 1/4" W x 5 3/4" L

Weight: 6 1/2 lbs.

Finish: Black Wrinkle

ITE-H50 . . . . . \$1150.00

ITE-T40

ITE-T30

ITE-H50

ITE-T50

## ITE-T50 Tripod

The T50 Tripod is a rugged lightweight all metal unit which provides outstanding rigidity and stability at an extremely low price.

Load Capacity: 40 lbs.

Min. Height (at max. leg spread): 17"

Max. Height: 56"

Min. Folded Height: 35"

Min. Folded Width: 7 1/4"

Weight: 7 1/2 lbs.

Finish: Black Anodize

ITE-T50 . . . . . \$800.00

# ACCESSORIES

## Quick Release Assemblies

The ITE Quick Release Assembly provides for rapid attachment and removal of cameras from pan/tilt heads. Positive attachment of plate to adaptor is accomplished by rotating a spring-loaded lever. Inadvertent disengagement is impossible.

Assemblies are used in conjunction with all models of torsion, fluid and hydro heads.

ITE-QR

## Wedge Adaptor Assemblies

The ITE Wedge Plate and Adaptor combination provide for rapid attachment and removal of cameras from pan/tilt heads. Positive attachment of wedge plate to adaptor is accomplished by rotation of a locking screw which makes inadvertent disengagement impossible.

Assemblies are used in conjunction with ITE-H2 Cam Head.

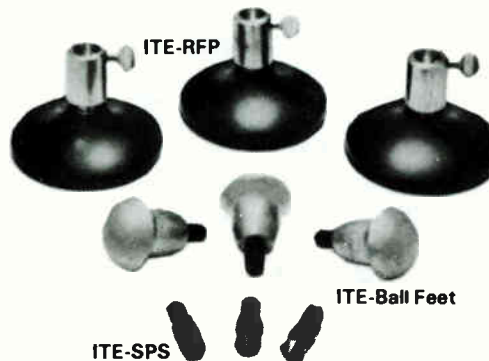

## Handles

A wide variety of handles and adaptors is available for all ITE heads.

## Tripod Accessories

Rubber foot pads. Ball feet and leg spikes are available for various ITE tripods. Contact ITE for availability.

ITE-RFP

ITE-Ball Feet

# IMAGE TRANSLATOR/RECORDER/ PLAYERS

## 32/4096 Digital Color Image Translator™ Standards Converter

- Better immunity to dropouts and tape damage • Separate RGB controls • Flicker cancel circuitry • Bright, clear colors • Color correction possible • High resolution (.31mm) digital monitor • 32 color pattern generator • Includes the Image Translator RGB VHS Hi-Fi VCR for playback of NTSC, PAL or SECAM tapes

32/4096 . . . . . \$3995.00

## Image Translator VHS Hi-Fi RGB

- Industrial wireless remote • 4 heads • Headphone jack • No noise • Still frame (NTSC), sharpness control • World's only VCR that plays PAL, SECAM or NTSC Hi-Fi. Multiplex included in model 618 • RGB and surround sound optional • Plays back on most standard TVs or monitors

615 IT3 . . . . . \$1595.00

618 IT3 Multiplex included . . . . . \$1795.00

RGB . . . . . \$100.00

Surround Sound . . . . . \$399.00

## Image Translator Multistandard VCR

- Plays all PAL and NTSC tapes in color • SECAM in black and white • 3 speeds • Records NTSC in color—PAL and SECAM in black and white • 3 speeds • Wireless remote control • 4 event, 14 day programmer • HQ circuitry • Front load • Fast scan and preview • Still frame and pause • Sharpness control • NTSC based unit for better performance and ease of servicing

610 IT3 2 Head . . . . . \$ 859.00

611 IT3 4-Head . . . . . \$1075.00

## Image Translator World Traveler RGB

- Plays PAL and NTSC in color on an NTSC, RGB or PAL TV • Records NTSC, PAL, MESECAM, French SECAM in color • Includes tuners and modulators for PAL B/G/PAL I-NTSC-MESECAM plus RGB color out for modulators for use on RGB monitors for highest quality color playback • Wireless remote • 4 event, 14 day programming • Still frame • Pause • Fast scan • Forward and reverse • 4 head • 105 to 245V 50/60 cycle operation • VCR goes anywhere and records and plays any VHS tape on any kind of monitor-receiver • Weighs only 9.5kg • Optional carry case available • Fits in overhead aircraft luggage rack

World Traveler . . . . . \$1995.00

## Caption Master™ VCR

- World's only caption equipped VCR • Ideal for hearing impaired (replaces standard caption decoder) • Perfect learning tool for studying English, improving spelling, writing and comprehension • Great for late night or news viewing • Captions controllable via remote • Multistandard version available • Special price for certified deaf

610 Caption Master 2 Head . . . . . \$795.00

611 Caption Master 4 Head . . . . . \$995.00

32/4096

615 IT3

610 IT3

## Super VHS Multistandard VCR

- Records on regular VHS tape • 420 line resolution in S-VHS mode • VHS Hi-Fi with new switching circuits for even better VHS Hi-Fi • Digital index and address search • On screen programming • 183 channel direct access remote control and it is the only Super VHS VCR that will play both PAL and NTSC tapes, standard and VHS Hi-Fi, on most regular NTSC TV's or monitors with RGB inputs • "S output" 400 + line S-VHS signal on any standard RGB input available on most monitors or better TV's • "Tape economy" switch which allows use of most regular VHS tapes in the S-VHS recording mode with only a slight increase in S/N ratio • Now you can enjoy the advantages of S-VHS without the high cost for S-VHS tapes

77 IT5S . . . . . \$1995.00

# TELEPHONE LINE VIDEO COMMUNICATIONS

## FASTSCAN™ 200 Multipoint Freeze-Frame Transceiver and Image Processor

- A true communicating image processor
- Can accept future transmission/compression programs
- Easy to use
- Compact
- Microprocessor-based
- Remote control
- Full color
- High resolution - 640 by 480 pixels
- Fast transmission - initial image in 4 seconds (V2.3)
- Automatic error detection/correction
- Compatible with other members of the DISCON family
- Upgradeable

FastScan 200 is the entry level member of the DISCON™ family. Both affordable and upgradeable, it allows users to transmit to multiple locations any image that can be captured by a video camera or created by a video compatible professional computer. FastScan 200 systems can be used in a stand-alone network or as part of a DISCON 700 or 1000 network.

FastScan (with Image Processor Program 2.3) transmits the initial image over ordinary telephone lines to multiple sites in 4 seconds. As users discuss the image, the system adds color and detail. High resolution allows decision-makers to review such complex images as blueprints, mechanical parts, circuit boards, molded pieces, financial documents, seismic charts, typewritten copy, and photographs. Advanced Image Processor Programs can be installed as they are made available.

**FASTSCAN 200 ..... \$14,000.00**

## IMAGE FILE™ II Video Image Storage System

- Easy to use
- "Help" menu
- Remote control
- Instant image storage and retrieval
- Automatically generated menu of images, including record of date and time of storage
- Automatic display mode
- Automatic send mode
- Tape drive for image backup and restore
- Capacity expandable from 200 to 1400 full-color high resolution images

A significant addition to DISCON™ 1000, 700, or FastScan™ 200, Image File allows storage and retrieval of any image that can be captured by a video camera or created by a video compatible professional computer. With expansion modules, up to 1400 full-color high resolution images can be stored, any of which can be called up on DISCON display terminals in less than three seconds.

Using FastScan, images can be transmitted over ordinary telephone lines and remotely stored in Image Files at all locations. Users can then call up any of these images simultaneously at all sites for fast, effective problem-solving and telepresentations. Images can also be sequenced for automatic display at all sites to create a remote electronic slide show.

Discon 725

Telestrator 100

Telestrator 440

## DISCON® 1000 Integrated Videographic Teleconferencing System Camera Station/Control Center

DISCON 1000 is the most powerful member of the DISCON family. A fully integrated videographic teleconferencing system, DISCON 1000 offers all features inherent in other DISCON systems and more. Using ordinary telephone lines, users can touch a stylus to the DISCON Interactive Graphics Display to transmit and annotate any image that can be captured by a video camera or created by a video compatible professional computer. DISCON 1000 is the ideal communications tool for decision-making, problem solving, crisis management, and education.

DISCON 1000 provides a 19" interactive graphics display, separate video outputs for operator and audience, the ability to have two separate FastScan transceivers, and substantial expansion capability. A typical DISCON 1000 configuration includes a Document Station and Control Center. Custom features, packaging, operating software, and room design are available.

The Control Center mounted graphics processor features multi-point communications controller, digitizing sensor surface with switching control for video input and output, seven color graphics option and color background image displayed on 19" RGB monitor.

**DISCON 1000 Control Center . . . . . \$62,475.00**

The Camera Station includes viewfinder monitor, Bogen lighting (high resolution color camera is extra).

**DISCON 1000 Camera Station . . . . . POR**

## DISCON 725 Compact Videographic Teleconferencing System

DISCON 725 is a compact, modular, integrated teleconferencing system designed for the small conference room, desktop, or even the plant floor. DISCON 725 combines the full-color, high resolution transceiver capabilities of FastScan with the seven color annotation capabilities of the DISCON 500.

Any image that can be captured by a video camera or created by a video compatible professional computer can be shared by decision-makers at remote locations. With a touch of the stylus to the DISCON Interactive Graphics Display, users can draw directly onto the video image and instantly transmit graphics over ordinary telephone lines. The DISCON display can also be used as a color display terminal for a professional computer.

**DISCON 725 . . . . . \$44,000.00**

## DISCON 500 Videographic Annotation System

The DISCON 500 is designed to operate in conjunction with a customer's own pre-installed freeze-frame video conferencing system and provides the same interactive graphics capability as the DISCON 1000. It also operates as a stand-alone audiographics system utilizing the same unique color and symbol characteristics as described with the DISCON 1000. The DISCON 500 consists of a display unit including a stylus-controlled sensor surface, a color monitor and an electronic microprocessor module. While the DISCON 500 does not provide error correction and network control of the background images supplied by

the customer's freeze-frame system, it does retain these features for the superimposed graphics which conference participants add to such images. The DISCON 500 offers the same ability to annotate in multiple colors and symbols as the DISCON 1000. The DISCON 500 can also be used as an "electronic blackboard" in which there is no background image. Principal blackboard applications are expected to be in tele-teaching and as an added component to ordinary voice-only telephone conferences.

**NTSC System . . . . . \$19,600.00**

## TELESTRATOR® 440

- 13" diagonal color monitor • Stylus selection of modes and symbols
- Symbol and mode indication in upper right corner of screen on local display only • Local stylus-selectable crosshair for exact stylus positioning • Moving symbol mode ("write-thru" cursor) • Eraser with exact-size symbol • Adjustment-free stylus calibration • Digital accuracy and repeatability • Color options • Variable symbol size option • Variable symbol orientation option • Symbol animation option • Customized menu selection with personality modules • Remote control options • High resolution (1024 x 480) for smooth graphics

Basic system including 12 customer-specified standard symbols and expansion capability.

The 440 includes all of the 100 capabilities plus an ability to work in seven colors. The 440 also permits the use of a large number of standard and custom symbols for specialties, such as sports, weather, current events and business news, together with many other functions, such as automatic straight line-connect, automatically sized and shaped rectangles, and other drafting aids. In addition, the 440 can be supplied with custom software capable of producing animated effects. This system is designed for pre- and post-production settings, as well as for "on-air" use.

**NTSC System . . . . . \$13,995.00**

**PAL System . . . . . 15,995.00**

## TELESTRATOR 100

### Monochrome Graphics (colorizable)

- 13" diagonal color monitor • All symbol and mode selection by stylus • Symbol and mode indication in upper-right corner of screen on local display only • Local crosshair (stylus selectable) for exact stylus positioning • "Write-thru" cursor mode—moving symbol • Eraser with exact size symbol • Automatic stylus calibration—no adjustments required • Digital accuracy and repeatability • High resolution (1024 x 480) for smooth graphics

The TELESTRATOR systems allow television commentators and others communicating with video audiences to instantly add explanatory markings, annotations and symbols to live scenes, instant replays and pre-recorded video materials. The 100 is a simple to operate monochrome system that is a natural for use during live coverage of events, i.e., news, sports, presentations.

**Complete NTSC (525 line, 60Hz) system . . . . . \$9,500.00**

## IMAGEPHONE

- Simple one-touch controls
- 12" monochrome screen
- Viewing of full 8 1/2" x 11" documents
- Scrolling for 8 1/2" x 14" documents
- Very high resolution images
- Mouse-activated controls/pointer
- Floppy storage disk, standard
- Hard disk storage option
- Flexible input/output
- No special installation required
- Compatible with other members of the DISCON family
- Compact and practical

Now you can Show and Tell with precision, using instantaneous video "snapshots" of objects, documents, plans, parts, drawings, or people. With the compact DISCON® IMAGEPHONE, you send high quality video images over the phone, using everyday voice-grade lines.

IMAGEPHONES are for people who make decisions: From engineers, planners and corporate trainers, to physicians, brand managers and sales reps. They cost much less than typical large-scale video conferencing systems, while offering day-to-day operational support, improved communications, and decisive action at the touch of a phone.

The unit is designed with the latest 32-bit computer technology. Easy installation and simple, one-touch controls have been combined with a flexible, mouse-activated video pointer and a high resolution camera. You and your co-workers can store multiple images on hard or floppy disks—both built-in. And, with IMAGEPHONE'S 12" monitor, you see every detail, even the text on a complex, legal sized document. This versatile unit is self-contained, portable, very easy to use, and compatible with larger DISCON systems.

Furthermore, IMAGEPHONE will grow as your grow. Thanks to its advanced 32-bit architecture, new features and capabilities can be added at will.

- 9410E Video Production Switcher—Illuminated Pushbuttons (10 inputs) . . . . . 21,300.00

## 9310E Production Switcher

• 10 inputs • Blackburst/color background generator • 4 buses • 2 mix/effects with shared pattern generator • 14 patterns • Program/preview mixer • Combination mix • Wipe • Key • Internal • External • Normal/reverse wipes • Hard, soft or bordered wipes • Modulation • Rate controlled positioner • Pattern preset • Spotlight • Master fade-to-black • Blanking processor • Microprocessor controlled • Serial editor interface • Diagnostics • Technical manual • Extender card(s) • 25' (7.6m) cable • Illuminated pushbuttons

- 9310E . . . . . \$11,900.00

## 8001 Master Control Switcher

• 8 AFV inputs • Colorblack generator • 2 audio breakaway inputs • Audio over • Autotransitions • Machine control • Black hold • Serial interface • Diagnostics • TBC bypass • Technical manual • Extender card • 25' (7.6m) cable

- 8001 . . . . . \$7,400.00

## 8012/8020/8030 Master Control Switchers

• 12 to 30 AFV inputs • 5 audio breakaway inputs • Black/color background generator • Autotransitions • Audio over/under • DSK/edger with 4 input preselect • Monitor amplifiers • Blanking processor • Master fade-to-black • Technical manual • Extender cards • 50' (15m) control cable

- 8012 Master Control Switcher (12 inputs) . . . . . \$21,500.00
- 8020 Master Control Switcher (20 inputs) . . . . . 24,500.00
- 8030 Master Control Switcher (30 inputs) . . . . . 29,500.00

1616

## 1616 Series Video Only Routing Switchers

• 16 video inputs • Vertical interval switching • Loopthrough inputs • Self-contained • Basic • Effects and component versions

- 1616B Basic 16 X 1 Video Only . . . . . \$ 850.00
- 1616E Effects (Preset/Take, Chop) . . . . . 1,350.00
- 1616R Remote Control Kit for above models [25' (7.6m)] . . . 180.00
- 1616C Component (16 X 3, RGB or M Format) . . . . . 2,950.00
- Additional Cable/Per Foot . . . . . 1.25
- Additional Cable/Per Meter . . . . . 4.13

## 982 Series 10 X 1 AFV Routing Switchers

• 10 input • AFV system • Vertical interval switching • Loopthrough inputs • Self-contained • Remote controllable

- 982 Routing Switcher 10 X 1 Audio Follow Video . . . . . \$930.00
- 972 Two Additional Channels . . . . . 650.00
- 992 Remote Control, Includes 25' cable . . . . . 280.00
- Additional Cable/Per Foot . . . . . 1.25
- Additional Cable/Per Meter . . . . . 4.13

## 1100 Series (BCD Controlled) or 1100C Series (Microprocessor Controlled) Routing Switchers

• Available in NTSC, PAL, and PAL-M • Vertical interval switching • Field expandable • Multiple audio channels • BCD controllers • Microprocessor controller • Modular construction • Audio breakaway capable • Individual frame power supplies • Various controllers available • Technical manuals • Extender card • 50' (15m) controller cable

# PRODUCTION SWITCHER ACCESSORIES

908-4S

9026

## 640 Downstream Key Edger

- Built-in colorizer • Outline, drop-shadow, border and normal keys (external cut with video fill) • 4 input selector • Remote control • 3 1/2" self-contained unit

640 Downstream Keyer/Edger . . . . . \$2980.00

## 4001 Digital Pattern Generator

- 30 creative digital patterns • Frame accurate auto transition (0-99) • 4 input key source selector • Normal/reverse wipe directions • Remote control via RS-422 • Self-contained • Field installable • Desktop mounted • NTSC/PAL/PAL-M • Optional oak side panels

4001 Digital Pattern Generator . . . . . \$1650.00

## 660, 660-4 RGB Chroma Keyer

- Saturation selective • Soft keying • Full remote control • Full 360° hue selection • 660 uses one (1) module space in 5010 rack frame; 660-4 uses four (4) module spaces in 5010 rack frame

660 RGB Chroma Keyer . . . . . \$1410.00

660-4 RGB Chroma Keyer (4 inputs) . . . . . 2080.00

640

## 1240, 1240-4 Encoded Chroma Keyer

- Wide range of encoded video sources • Minimum chroma crawl • Uses one (1) module space in 5010 rack frame [two (2) with input selector]

1240 Encoded Chroma Keyer . . . . . \$2870.00

1240-4 Encoded Chroma Keyer (4 inputs) . . . . . 3150.00

## 924 Blanking Processor

- Self-contained unit with fade-to-black • Insert new blanking intervals into program output

924 Blanking Processor with FTB . . . . . \$1500.00

## 9026 Autotransition/Event Storage Unit

- Autotransitions on M/E's Mix, FTB and DSK • General Purpose Interface (GPI) • 100 event storage/recall • Chaining of events for longer sequences • Editor interface built-in RS-232 or RS-422 • Stores entire switcher setup • Operated with 9300 or 9400 switchers

The 9026 offers both autotransitions for the 9300 or 9400 Production Switchers and Event Storage and Recall of 100 different panel "snap shots." The autotransitions may be triggered through the GPI with either a momentary closure or TTL active low to ground. Multiple events may be sequenced to perform complex series of events. A Serial Editor interface allows either RS-232 or RS-422 editor control in concurrent operation.

9026-3 9300 Switcher only . . . . . \$2800.00

9026-4 9400 Switcher only . . . . . 2800.00

## 908 Audio Follow Video

- 10 audio follow inputs • 5 audio breakaway inputs • Auto or manual control • Follows M/E1, M/E2, or mixer • VU meter for program out • Level adjust for program out • Linear fader for manual control • Stereo version available

4001

The Audio Follow Video package gives you the ability to mix audio sources concurrent with Fader movement on either the 9400 or 9300 Production Switchers. In addition to audio follow the 908 has 5 separate audio inputs for breakaway. Stereo operation is also available.

908-4 9300/9400 Switchers only . . . . . \$3700.00

908-4S Stereo Version 9300/9400 Switchers only . . . . . 5600.00

### Special Function Options:

5010 Rack Frame . . . . . \$ 250.00

5050 Power Supply . . . . . 200.00

924 Blanking Processor with Fade-to-Black . . . . . 1500.00

4001 Digital Pattern Generator . . . . . 1650.00

**NOTE:** Certain options require the use of a 5010 rack frame and 5050 power supply. This frame will accommodate up to seven (7) modules of options or audio/video terminal processing equipment.

# TERMINAL PROCESSING EQUIPMENT

## 5000 Series Distribution Amplifiers

The rack frames which house the electronics used in Intergroup products are constructed so that different models can be mixed in one frame. A 5010 rack frame will house a power supply like the 5050 and seven card spaces for terminal equipment and/or options. Each option or piece of terminal equipment when ordered will include:

1. A rear assembly with connections for inputs and/or outputs wired to one or more card edge connectors.
2. One or more printed circuit boards.
3. Front handles or shields (where applicable) attached to each PC board.

## 5010 RACK FRAME

With 5050 (Video) and 7050 (Audio) Power Supply.

- Rugged steel construction
- Modular design to customize rack
- Seven plug-in modules
- Audio and video modules may be intermixed providing both power supplies are installed

The 5010 Rack Frame, equipped with our 5050 Video Power Supply and 7050 Audio Power Supply is our basic.

The 5050 Video Power Supply provides a source for the distribution of pre-regulated 10V and -10VDC to an entire rack frame of seven modules. The 7050 Audio Power Supply provides a distribution source for 15V and -15VDC to the rack of seven modules.

5010 .....	\$250.00
5050 .....	200.00
7050 .....	200.00

## 5130 Video Distribution Amplifier

- Specifically designed for NTSC and PAL standard color video systems
- Six isolated outputs
- Flat frequency response
- Minimum chroma-luminance delay (less than 10ns) minimal phase and gain distortion

5130 .....	\$.180.00
------------	-----------

## 5160 Video Equalization Amplifier

- Six isolated outputs
- Continuously variable equalization and t-15 phase adjustment at 3.58MHz
- Feedback, sample and hold clamp circuit for stable DC reference
- Common mode rejection greater than 60dB at 60Hz
- Self-regulation of incoming DC voltages
- Uses one (1) module space in 5010 rack frame

5160 .....	\$.250.00
------------	-----------

## 5190 Pulse Distribution Amplifier

- Four outputs, each individually driven
- Total regeneration of pulses allow any of the outputs to be operated unterminated
- Circuits or regenerative devices sensitive to hum or other low frequency disturbances are not utilized
- Shaped rise times (less than 100ns)
- Self-regulation of incoming DC voltages

5190 .....	\$.190.00
------------	-----------

## 5220 Quad Pulse Delay Distribution Amplifier

- Four outputs, each individually driven
- Variable delay range of 0.25 to 2.25 microseconds
- Self-regulation of incoming DC voltages

5220 .....	\$.230.00
------------	-----------

## 5250 Subcarrier Distribution Amplifier

- Subcarrier output level independent of input level
- Two step continuously variable 0-170° and 170-340° phase control
- Self-regulation of incoming DC voltage

5250 .....	\$.290.00
------------	-----------

## 7070 Audio Distribution Amplifier

- 20dBm maximum output level
- Six outputs, 600 ohms balanced
- Flat frequency response
- Self-regulation of incoming DC voltage

7070 .....	\$.230.00
------------	-----------

## 7200 Five Watt Monitor Amplifier

- Delivers up to 5W into a 4 ohm load
- Bridging input design
- Integrated circuit driver
- Discrete output stages
- Direct coupled fuse output

7200 .....	\$.270.00
------------	-----------

## FEATURES

- Superb Picture Quality
- Noiseless Slow Motion and Stills
- Dolby® C Noise Reduction
- FM Audio
- Tape Speed Override
- Automatic Editing
- Built-in TBC
- Built-in Time Code Generator/Reader
- Time Code Data Display
- Confidence Heads
- Remote Control of Source VTR
- 9-Pin Serial and 45-Pin Parallel Remote Connectors
- Clean and Accurate Edits
- Preroll
- Confidence Heads
- High Speed Search and Jog Mode

KR-M860U

## KR-M860U VIDEOCASSETTE EDITING RECORDER

The KR-M860U is an extremely sophisticated editing recorder built to the MII format and is the end of a production chain, which makes it possible to maintain a single format from the initial field recording right up to broadcasting, with quality that rivals the 1" C-format.

The CTCM (Chroma Time-Compressed Multiplex) recording system with its exclusive time code track and the built-in Time Base Corrector make the KR-M860U suitable for a full range of editing and broadcasting functions. The 1/2" metal particle cassette tapes used in the MII format, with maximum recording times of 90 and 20 minutes, offer further advantages in terms of improved operability and station automation.

**Superb picture quality.** Through the use of the MII format with CTCM, the pictures recorded and played back maintain full broadcast quality over several generations, for a performance that rivals the 1" C-format.

**Noiseless slow motion and stills.** AT (Automatic Tracking) heads incorporate piezoelectric elements and use microprocessor-controlled actuators for

noiseless still and slow-motion playback in both directions, as well as in forward search at up to twice normal speed.

**Dolby® C noise reduction.** For an improved audio signal-to-noise ratio, Dolby® C noise reduction is provided to eliminate the tape hiss inherent in magnetic recording.

**FM audio.** As well as the longitudinal audio tracks, the KR-M860U has two FM audio channels (channels 3 and 4) which are recorded embedded in the chroma track.

**Tape speed override.** In playback, the standard tape speed can be overridden by pressing the + and - trim buttons.

**90-minute recording.** The higher recording density of the metal particle tape and CTCM recording in the MII format make possible a continuous recording and playback time of 90 minutes with a single cassette.

**Ideal for archival purposes.** As 90-minute MII cassettes are approximately the size of VHS cassettes, they are ideal for tape libraries which are required to hold many hours of

broadcast-quality material.

**Cassette flexibility.** In addition to the standard 90-minute cassettes, the smaller 20-minute cassettes designed for ENG applications can be loaded without an adaptor.

**Automatic editing.** Automatic insert and assemble edits are possible with the KR-M860U either using it as a stand-alone editor or with an optional controller. Edit In/Out, Trim, Go To, Preview and Review are also provided, for a comprehensive range of editing features.

**Built-in TBC.** To synchronize the components of the signals in playback, the KR-M860U incorporates a TBC with a correction capability of 32H; with this, it is also possible to genlock with a base-band video signal in a multi-component configuration.

**Built-in time code generator/reader.** The KR-M860U incorporates an SMPTE Time Code Generator/Reader and the MII format provides a dedicated time code track for the recording of time codes. VITC (vertical interval time codes) can also be recorded.

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

**Time code data display.** SMPTE time code addresses can be superimposed on the video signal from the Video Out 3 connector. A front-panel switch can be used to change over the display between the time code or user bits.

**Remote control of source VTR.** The KR-M860U has a 9-pin serial connector for the connection of a source VTR; this makes possible the configuration of a complete editing suite without providing a separate editing controller.

**9-pin serial and 45-pin parallel remote connectors.** For flexible combination in editing systems, both serial and parallel remote control units can be connected.

**Clean and accurate edits.** A frame synchronization capability with vertical interval switching and capstan motor speed override makes possible clean and accurate edits.

**Preroll.** A preroll button is provided to reverse the tape to predetermined cue points (set internally to 5, 7 or 10 seconds) before entering the standby mode.

**Confidence heads.** The KR-M860U is equipped with confidence heads for video and audio (channels 1 and 2); as the signals being recorded can be monitored in real time, it is possible to correct any problems as soon as they occur.

**Comprehensive character display.** The fluorescent display shows the current address, edit in/out point and other information in an easy-to-understand format.

**Front loading mechanism.** For convenience and to make rack-mounting possible, the KR-M860U has a front loading tape mechanism.

**High speed search and jog mode.** High speed search is possible at up to 32 times normal speed in either direction while a quick-response jog control is provided for access to the required frame.

**Tiltable operating panel.** For convenience, the operation panel can be tilted by up to 90°; it can also be detached and used as a remote control.

**Waveform adjustment.** The waveform output signal can be adjusted internally as well as from an external controller.

**Encoder adjustment.** The TBC encoder can be adjusted internally or from an external controller.

**Tape transportation system.** The tape transport system was designed for optimum operation with a front loading system, so that the extremely thin metal particle tape runs stably in the still, jog and high-speed search modes in both forward and reverse directions. To ensure this level of stability, there are four brushless direct-drive motors, for the head drum, capstan and both reels. The KR-M860U has a total of ten heads arranged around the head drum—a pair of record/play heads for the Y signal, a pair of record/play heads for the C signal, a pair of Auto-Tracking playback heads for the Y signal, a pair of Auto-Tracking playback heads for the C signal and a pair of flying erase heads.

# MII EDITING RECORDER

## SPECIFICATIONS

### GENERAL

**Tape:** 1/2" metal particle (MP) tape  
**Recording System:**  
Rotary 4-head, 2-track helical scanning  
**Recording Time:** 90 min. with MPL90  
**Tape Speed:** 67.693mm/sec.  
**Search Speed:** Shuttle: Still  $\pm 32X$   
Slow: -1—+2X with AT (Automatic Tracking)  
Jog: with AT  
**Weight:** 95 lbs. (43kg)  
**Power Consumption:** 300W

### VIDEO

Test and measurements shall be made under following conditions.

1. 1st generation transfer.
2. Component input and composite output.

### Television System:

NTSC system, 525 lines, 60 fields

### Modulation System:

Y: Frequency modulation

C: Time-compressed multiplexing (R-Y, B-Y)

### Bandwidth:

Y: 30-4.5MHz + 0.5/-3dB

C: 30-1.5MHz + 0.5/-3dB

### Signal-to-Noise Ratio:

Y: Better than 49dB (Hpf 100kHz, Lpf 4MHz) component

Better than 47dB (Hpf 100kHz, Lpf 4MHz) composite

C: Better than 50dB (Hpf 10kHz, Lpf 1MHz)

**K factor:** Less than 2%

**Differential Gain:** Less than 2%

**Differential Phase:** Less than 2°

**Y/C Delay:** Within 20 nsec.

**Sag:** Less than 2%

### AUDIO

#### Longitudinal Track

#### Frequency Response:

50-15,000Hz + 1.5dB/-2.0dB

#### Signal-to-Noise Ratio:

Better than 55dB at 3% distortion (NR off)

#### Distortion:

Less than 1% at 1kHz standard input level

**Wow & Flutter:** Less than 0.15RMS

**Erase:** -70dB

**Crosstalk:** -50dB

**Phase Difference:** Within 30° at 15kHz

#### FM Track

#### Frequency Response:

20-20,000Hz + 1.0dB/-2.0dB

**Dynamic Range:** More than 80dB (w/dbx)

**Distortion:** Less than 0.6% (1kHz, 0VU)

**Wow & Flutter:** Less than 0.005% WRMS

**Crosstalk:** Less than -60dB (1kHz)

#### Dimensions:

17<sup>3</sup>/<sub>16</sub>" (W) x 10<sup>7</sup>/<sub>16</sub>" (H) x 23<sup>1</sup>/<sub>4</sub>" (D)  
(436 x 265 x 590mm)

## MII EDITING RECORDER

### FEATURES

- High Quality Picture
- CTCM/Component Switchable Output and Y/C Output Connectors
- CTCM/Component/Composite Switchable Input
- Dolby\* C Noise Reduction
- High Speed Search and Jog Control
- Clean and Smooth Edits
- Separate Audio and Video/Tracking Meters

KR-M800U

### KR-M800U VIDEOCASSETTE EDITING RECORDER

The KR-M800U editing recorder uses the same component video recording system employed by an increasing number of broadcasters; it makes it possible to maintain the same high video quality from the initial field recording right up to studio editing in video production applications. The Chroma Time-Compressed Multiplex recording system and 1/2" high recording-density metal particle cassette tapes used in the MII format make possible maximum recording times of 90 minutes (with standard tapes) and 20 minutes (using the special compact ENG/EFP tapes). So that it can be used conveniently in post-production, the KR-M800U editing recorder is packed with features that improve operability together with advanced circuitry for an extremely cost-effective performance.

**High-quality picture.** Through use of the MII format with CTCM (Chroma Time-Compressed Multiplexing), pictures maintain high quality over several generations of recording and playback.

**Improved S/N and pulse response.** The preamplifier circuitry has especially good RF characteristics for an improved video signal-to-noise ratio while noise is cancelled in both luminance and chrominance circuits, minimizing any

degradation in pulse response; this better video performance maintains a higher signal quality that you can actually see.

**CTCM/Component switchable output and Y/C output connectors.** The output can be switched between CTCM (with Y and time-compressed color difference signals, for MII equipment) and component (Y and independent color difference signals); a Y/C output is also provided for dubbing to a VCR which accepts separate luminance and chrominance signals.

**CTCM/Component/Composite switchable input.** The input can be switched to accept three signal formats for greater flexibility in systems configuration.

**Dolby\* C noise reduction.** For an improved audio signal-to-noise ratio, Dolby C noise reduction is provided to eliminate the tape hiss inherent in magnetic recording.

**High-speed search at up to  $\pm 32X$  normal speed.** High speed search is possible at up to 32 times normal speed in either direction. The speed is continuously variable from  $\pm 1/32X$  to  $\pm 2X$  normal speed, with fixed search speeds of  $\pm 4X$  normal speed with both types of

cassettes and  $\pm 32X$  normal speed with a standard cassette and  $\pm 20X$  normal speed with compact ENG cassettes.

**Color search at up to  $\pm 4X$  normal speed.** A Y/C timing adjustment circuit makes color search possible at up to  $\pm 4X$  normal speed without using a time base correction circuit. The Y signal follows the timing of C signal so the relative jitter between components is compensated within  $\pm 20ns$ .

**Capstan servo control system.** This has an extremely high-speed response so that it can handle sudden speed changes.

**Tiltable operation panel.** For ease of use, the operation panel can be tilted by up to 90°, in 7 steps.

**Jog control.** The jog control on the front panel makes possible fast access to any required edit point.

**Clean and smooth edits.** The KR-M800U has a comprehensive range of editing features when used either as a stand-alone editor or with an optional controller.

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

**Separate audio and video/tracking meters.** Illuminated meters with level controls are provided for audio channels 1 and 2 and for video/tracking. During playback, the Video/Tracking meter shows the level of the video carrier; in the stop and record modes, it shows the level of the input video signals.

**Fluorescent display.** This single-line display shows the current address, the next edit in/out point and other information in an easy-to-understand format.

**45-pin parallel remote connector.** For combination in editing systems, a remote control unit can be connected via the 45-pin connector.

**SMPT E time code input/output.** SMPT E time codes can be input from an external generator and the addresses can be recorded on the exclusive time code track.

**XLR line audio connectors.** To avoid possible interference, the KR-M800U is equipped with professional-standard XLR line audio connectors.

**RF output for DOC.** An external dropout compensator can be connected to this RF output.

**EXT sync/sub-carrier input, REF sync output.** This is necessary when the system in which the KR-M800U is used is synchronized with signals from an external source, while a reference sync output is available for the synchronization of other components.

**Microphone input connectors.** For the connection of microphones for audio dubbing.

**Digital drum servo.** This improves reliability and ensures accuracy because no adjustment is required.

**More accurate tension detection.** The sensitivity of the tension detection mechanism to external disturbances is minimized because it uses a contactless, differential magnetic resistance device and pivot bearings.

**Die-cast chassis.** All components are mounted in a rugged die-cast aluminum chassis; this protects the precision-engineered mechanical part and delicate electronic circuitry, for enhanced reliability.

**Direct-drive system.** Direct-drive motors are used throughout, for the head drum, the capstan and the reels; these rotate at precisely the correct speed, ensuring years of trouble-free operation.

**Switching regulator power supply.** This delivers stable power to all sections of the recorder while weighing much less than conventional power supplies.

**Hour meter.** The hour meter provided on the sub-panel shows the accumulated head running time up to 1000 hours for convenience in scheduling maintenance.

\*Dolby and double-D symbols are trademarks of Dolby Laboratories Licensing Corporation.

# MII EDITING RECORDER

## SPECIFICATIONS

### GENERAL

**Format:** MII standard  
**Power Requirement:** 110-127VAC, 50/60Hz  
**Power Consumption:** 190W (200W with remote control unit)

**Tape Speed:** 1/2" metal particle tape  
**Recording Time:** 90 min. (with JVC KC-MPL90)  
**Rewind/Fast Forward Time:** Within 3.5 min. (with JVC KC-MPL90)

**Search Speed:** Shuttle search:  $\pm 1/32$  to  $1/4X$  (8 steps),  $\pm 32X$ , Jog: Still to  $\pm 1X$

## MII PORTABLE RECORDER

### FEATURES

- Superb Picture Quality
- Dolby® C Noise Reduction
- FM Audio
- 90-Minute Recording with Cassette Flexibility
- Confidence Playback
- Automatic Backspace Editing
- TBC Connector
- Built-in Time Code Generator/Reader
- Rugged Construction
- Search Function
- Field Color Playback
- Warning Indicators
- Camera Connector

KR-M460U

### KR-M460U PORTABLE VIDEOCASSETTE RECORDER

The revolutionary MII format solves one of the biggest problems of broadcasters involved in field production; it allows them to maintain the same format from the initial recording, through editing, to broadcasting. The KR-M460U Portable Videocassette Recorder is an essential link in this chain. It uses full-size MII videocassettes to record over 90 minutes of material that's so good that the signals can be used for broadcasting without changing formats and also accepts compact 20-minute ENG cassettes without an adaptor. In MII, this is done with high-density metal particle tape and CTCM (Chroma Time-Compressed Multiplex) recording system. The KR-M460U is designed for action; weighing less than 14 lbs., it's rugged, it has all the features that professionals need—and using these features is no problem, even when working under pressure in real-life conditions.

**Superb picture quality.** Through use of the MII format with CTCM, picture recorded by the KR-M460U maintain full broadcast quality over several generations so that tapes can be transferred directly to editing and broadcasting equipment without any format transfer.

**Dolby® C noise reduction.** For an improved audio signal-to-noise ratio, Dolby® C noise reduction is provided to eliminate the tape hiss inherent in magnetic recording.

**FM audio.** As well as the longitudinal audio tracks, the KR-M460U has two FM audio channels (channels 3 and 4) which are recorded embedded in the chroma track.

**90-minute recording.** The higher recording density of the metal particle tape and CTCM recording in the MII format make possible a continuous recording time of 90 minutes with a single cassette.

**Cassette flexibility.** In addition to the standard 90-minute cassettes, the smaller 20-minute cassettes designed for ENG applications can be loaded without an adaptor.

**Automatic backspace editing.** Automatic backspace editing with an accuracy of  $3 \pm 2$  frames results in edit points that are almost undetectable, a great convenience when working on location.

**TBC connector.** The KR-M460U has a

socket for the connection of an external time base corrector, giving its playback output the quality and accuracy required for broadcasting.

**Built-in time code generator/reader.** The KR-M460U incorporates an SMPTE Time Code Generator/Reader and the MII format provides a dedicated time code track for the recording of time codes. VITC (vertical interval time codes) can also be recorded.

**8-digit LCD display.** This low power consumption display shows the SMPTE time code and the charging condition of the battery.

**Rugged construction.** The KR-M460U was designed for use in the field; it's light, compact and sturdy. Enclosed in a die-cast aluminum chassis that can take rough handling, its high-precision mechanism and direct-drive motors are reliable however it's used. For further enhanced field operation, the cabinet of the KR-M460U is sealed so dust and moisture cannot interfere with operations.

**Confidence heads.** The KR-M460U is equipped with confidence heads for video and audio (channels 1 and 2); as the signals being recorded can be

FAX: (201) 523-3601

monitored in real time, it is possible to correct any problems as soon as they occur.

**Search function.** The KR-M460U enables search at  $\pm 5$  times normal speed in either direction for quick and easy access to the required segment.

**Color playback.** The KR-M460U incorporates a color playback circuit with a simplified dropout compensator so that results can be checked in full color.

**Battery compartments.** This allows the insertion of two battery packs; continuous operation is possible as one battery pack can be replaced during operation.

**3-way power supply convenience.** In addition to battery operation, power can be supplied from an external DC source or an optional AC adaptor.

**Audio dubbing capability.** Audio dubbing is possible onto either of the longitudinal audio tracks.

**Warning indicators.** A variety of indicators are provided in the camera

viewfinder and on the recorder to ensure that recordings are always in the best possible condition.

**Built-in RF modulator.** This allows direct connection of a regular TV for monitoring; the RF modulator can be tuned to VHF channel 3 or 4.

**Camera connector.** For wider applicability, the 26-pin camera connector will accept both component and composite signals.

\*Dolby and double-D symbols are trademarks of Dolby Laboratories Licensing Corporation.

KR-M260U

### KR-M260U CAMERA RECORDER

With the KR-M260U Camera Recorder, tapes recorded in the field can be used directly for broadcasting with no change in format. The secret is the MII format which makes it possible to maintain the same format from recording, through editing, to broadcasting. Using high-density metal particle tape and the CTCM (Chroma Time-Compressed Multiplex) recording system, signals recorded using an EFP/ENG camera have the high quality required in broadcasting. The KR-M260U records 20 minutes of video on cassettes which can be post-processed for broadcasting using the KR-X800U studio unit. With the MII format, the signals maintain their broadcast quality for several generations, making the system ideal for news gathering and other on-location applications.

**High picture quality.** Through use of the MII format with CTCM, pictures recorded by the KR-M260U maintain full broadcast quality over several generations so the tapes can be transferred directly to editing and broadcasting equipment without any format transfer.

**Dolby® C noise reduction.** For an improved audio signal-to-noise ratio, Dolby® C noise reduction is provided for the longitudinal audio tracks.

**FM audio.** As well as two longitudinal audio tracks, the KR-M260U has two high-quality audio channels (channels 3 and 4) which are recorded embedded in the chroma track to record a high-quality stereo soundtrack in the field.

**Rugged construction.** The KR-M260U was designed for demanding ENG/EFP applications. Enclosed in a rugged die-cast aluminum chassis, its high precision mechanism with direct-drive motors is reliable wherever it's used. For further enhanced field operation, the cabinet is sealed to protect the mechanism from dust and moisture.

**Maximum recording time of 20 minutes.** 1/2" metal particle tape and CTCM recording make possible a continuous recording and playback time of 20 minutes using a cassette that's specially designed for ENG applications. In the MII

system, studio VCRs are designed to accept these smaller cassettes directly, without an adaptor.

**B/W playback through viewfinder.** A B/W playback circuit that works with the chroma confidence circuits is provided so that recorded material can be reviewed in the field.

**Speaker.** A speaker is provided for the monitoring of the audio level.

**Power supply flexibility.** For greater flexibility in power supply, the KR-M260U has a terminal for the connection of an external DC input.

**3-way power supply.** Power can be supplied from a battery pack held in an inboard compartment, from an external DC power supply or via the optional AC power adaptor.

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

**Confidence heads.** Video confidence heads are provided for both the luminance and chrominance channels; the off-tape B/W picture can be displayed in the viewfinder of the camera while the off-tape mode is indicated by an LED.

**Automatic backspace editing.** The KR-M260U has an automatic backspace editing capability with an accuracy of  $3 \pm 2$  frames, a boon when recording in the field.

**Built-in Time Code Generator.** An SMPTE Time Code Generator with an 8-digit LED display is provided; the MII format includes a dedicated time code track for convenience in editing.

**External time code input terminal.** A rear-panel terminal accepts time codes from an external generator for synchronization in multi-component configurations.

**Warning indicators.** Various warning indicators that assure correct recording are provided, both LEDs on the recorder itself and indicators in the camera viewfinder.

\*Dolby and double-D symbols are trademarks of Dolby Laboratories Licensing Corporation.

## COLOR CAMERA

### FEATURES

- High Resolution/High Signal-to-Noise Ratio
- Compact and lightweight with Rugged Design
- Wide Dynamic Range
- SSG Circuit Conforming to RS-170A
- f/1.4 Prism Optical System
- Auto-Shift Registration Circuit
- 2H Vertical Contour Correction Circuit
- Split-type Color Bar Generator
- Color Matrix Masking Circuit
- Full Remote Control

KY-950BU	3-tube color camera head
KY-900U	3-tube color camera less lens (ENG)

### PROCAM™ KY-950BU/900U COLOR PRODUCTION CAMERAS

**Resolution 700 lines, S/N 59dB.** The initial amplification of the very low level signals from the LOC diode gun Plumbicon tubes is critical in determining the overall S/N ratio of the camera. For this reason, JVC uses a preamp circuit board with three preamps for the initial amplification of the R, G and B tube signals. In combination with the preamplifiers, the f/1.4 prism optical system and the LOC diode gun Plumbicon tubes make possible the high resolution of 700 lines and an S/N of 59dB.

**Registration circuit.** Registration accuracy has been improved to 0.05% for Zone I, 0.1% for Zone II and 0.3% for Zone III. This has been done by providing separate horizontal and vertical pin and trapezoidal distortion correction circuits, an improved linearity circuit and an additional electrical rotation circuit. V-Shift variations when there are changes in temperature are improved by the prism temperature compensation circuit.

**SSG circuit.** The SSG is incorporated in a JVC-designed IC with excellent stability. This fully conforms to the RS-170A standard and is equipped with a color framing pulse output which can be switched on and off. A digital H/V variable blanking width circuit is also provided.

#### **Rugged body and easy maintenance.**

The aluminum die-cast body combines the strength needed to protect the precision internal components with compact size and light weight. For convenience, controls which are used most frequently—the gain switch, preset white balance switch and color bar switch—are on the front of the camera. So that the camera cable does not get in the way, it plugs in at an angle. To simplify routine adjustments without using extension boards, adjustment points are on the edges of the PCBs.

**Automated functions.** For greatly simplified operation, the auto-shift registration, auto-white balance and auto-black balance circuits are all activated by single-action switches. The automated circuits use 8-bit digital

memories; backed-up by batteries, the setups are stored even when the camera is switched off. For convenience, two auto-white balance settings are held in these memories as well as the preset 3200K setting. The auto-black balance circuit uses an auto-black setting circuit for the improved stability of black when the gain is switched between 0dB, 9dB and 18dB.

#### **2H vertical contour correction circuit.**

For improved picture sharpness and an even better S/N, the 2H vertical contour correction circuit is equipped with a comb filter, a level dependent circuit and noise slice circuit.

**Color matrix masking circuit.** The accurate reproduction of color is further improved by the color matrix circuit.

**Wide dynamic range.** Pictures are sharp and details are clear even when shooting high-contrast subjects through the use of state-of-the-art technology including an upper section weighting circuit, a NAM-type auto-iris circuit and a processor circuit with a wide dynamic range that can accept signals with a 300% level.

**System versatility.** Using the RS-500U multi-core type remote control unit, RS-T900U triaxial unit, KA-3U component adaptor, etc., systems based on the KY-950BU can be used for ENG/EFP, OB van and studio applications.

## OTHER FEATURES

- H/V dynamic shading correction circuit
- Frame shading correction circuit
- Auto dynamic shading correction when X2 extender is used (specific lenses only)
- ABL (Auto Black Level) On-Off Switch
- R/G/B flare correction circuits
- ABC (Auto Beam Control) circuit
- Master black level control potentiometer
- Optical turret filter (3200K, 5600K, 5600K + 25% ND)
- Zebra display video level indicator (on/off switchable)
- Video recorder triggering mode select switch (with 3 positions)
- VTR start/stop switch
- Video Recorder power-save/camera preheating circuit
- Audio monitor jack
- Hot-shoe type microphone connector incorporating power supply terminal (for the M-K50U microphone)
- Test signal generator
- Scan-failure protection circuit
- Focus wobbling circuit

## SPECIFICATIONS (KY-950BU)

**Optical System:** f/1.4 3-tube R/G/B prism system (with quartz filter)

**Focusing/Deflection System:** Electromagnetic focusing, electromagnetic deflection

**Pickup Tubes:** 2/3" LOC diode gun Plumbicon\* (XQ3427) X3

**Encoder:** NTSC (IQ encoder)

**Synchronizing System**  
Internal: Built-in SSG (conforming to RS-170A)  
External: VBS or BB

**Lens Mount:** Bayonet

**Sensitivity (typical):** f/4.5 at 2000 lux, 89.9% reflectance

**Minimum Illumination (typical):** f/1.7, 38 lux (3.6fc) (+ 18dB On, 89.9% reflectance)

**Signal-to-Noise Ratio (typical):** 59dB (contour correction Off, gamma 1, bandwidth 4.2MHz, Matrix Off, I/Q Off)

**Horizontal Resolution:** 700 lines (G CH center)

**Registration:**  
Zone 1: Within 0.05% (circle 80% of picture height)  
Zone 2: Within 0.1% (circle of picture width)  
Zone 3: Within 0.3% (area outside Zone 2)

**Colour Correction:**  
Horizontal: Dual-edged  
Vertical: 2H, with comb filter

**Color Bar Generator:** Split bar (100% white) / full field (75% white) switchable

**Optical Filters:** Closed, 3200K, 5600K, 5600K + 25% ND

**Gain Boost:** 0dB, +9dB, +18dB

**Variable Blanking:**  
H: 10.6µs/10.8µs/10.9µs switchable  
V: 18H/19H/20H switchable

**Input Signals:**  
Return Video Signal (VBS): 1.0V p-p, 75 ohm  
Genlock Signal: VBS (1.0V p-p, 75 ohm) or BB (0.43V p-p, 75 ohm)  
Microphone Signal: -52dBm, 600 ohm balanced

**Output Signals:**  
Composite Video Signal (VBS): 1.0V p-p, X2 (BNC/14-pin connector)  
Test Signals (VS or VBS): R, G, B, -G, ENC  
Audio Signal: -52dBm, 600 ohm balanced/-20dB, unbalanced or balanced (switchable)  
Audio Monitor Signal: 8 ohms, -20dB  
VCR Control Signal: Contact or 4V supply (switchable)

**Power Supply:** +12VDC (10.5 to 17V)

**Power Consumption:** 1.95A

**Ambient Temperature:** -20°C to +50°C (-4°F to +122°F)

**Weight:** 9.9 lbs. (4.5kg)

**Dimensions:**  
4 9/16" (W) x 10 3/4" (H) x 11 13/16" (D)

## PROCAM™ KY-320BU 3-TUBE COLOR VIDEO CAMERA

With its newly-designed circuits, the KY-320BU gives further high performance, reliability and stability.

**S-M PbO\* Tubes.** The electrostatic-focus, electromagnetic-deflection Plumbicon\* tubes achieve extremely high stability while they operate at high voltage with a lower power consumption.

**Resolution 650 lines, S/N 57dB.** The PbO tubes, the f/1.4 prism optical system and independent R/G/B preamplifiers give a 650 TV line resolution and 57dB signal-to-noise ratio.

**Registration Circuit.** Registration accuracy has been improved to 0.1% for Zone I, 0.2% for Zone II and 0.3% for Zone III. This has been done by providing separate horizontal and vertical pin and trapezoidal distortion correction circuits, an improved linearity circuit and an additional electrical rotation circuit. V-Shift variations when there are changes in temperature are improved by the prism temperature compensation circuit.

**Easy access for maintenance.** To simplify routine adjustments without using extension boards, adjustment points are on the edges of the PCBs.

**Automated functions.** For greatly simplified operation, the auto-shift registration, auto-white balance and auto-black balance circuits are all activated by single-action switches. The automated circuits use 8-bit digital memories; backed-up by batteries, the setups are stored even when the camera is switched off. For convenience, two auto-white balance settings are held in these memories as well as the preset 3200K setting. The auto-black setting circuit combined with the auto-black balance circuit improves the stability of black when the gain is switched between 0dB, 9dB and 18dB.

**Wide dynamic range.** Pictures are sharp and details are clear even when shooting high-contrast subjects through the use of state-of-the-art technology including an upper-section weighting circuit, a NAM-type auto-iris and a processor circuit with a wide dynamic range that can accept signals with a 300% level.

**Rugged body design.** The aluminum die-cast body combines the strength needed to protect the precision internal components with compact size and light weight. For convenience, controls which are used most frequently—the gain switch, preset white balance switch and color bar switch—are on the front of the camera. So that the camera cable does not get in the way, it plugs in at an angle.

**SSG circuit.** The SSG is incorporated in a JVC-designed IC with excellent stability. This fully conforms to the RS-170A standard and is equipped with a color framing pulse output which can be switched on and off. A digital H/V variable blanking width circuit is also provided.

**2H vertical contour correction circuit.** For improved picture sharpness and an even better S/N, a 2H vertical contour correction circuit with a comb filter, a level dependent circuit and noise slice circuit are provided.

**RS-189A color bar circuit.** Together with this SSG circuit, the KY-320BU is equipped with a split-type color bar generator which conforms to RS-189A; these features allow the camera to be incorporated in an existing broadcast camera system.

**Color matrix masking circuit.** The accurate reproduction of color is further improved by the color matrix circuit.

## OTHER FEATURES

- H/V dynamic shading correction circuit
- Frame shading correction circuit
- Auto dynamic shading correction when X2 extender is used (specific lenses only)
- ABL (Auto Black Level) On-Off Switch
- R/G/B flare correction circuits
- ABC (Auto Beam Control) circuit
- Master black level control potentiometer
- Optical turret filter (3200K, 5600K, 5600K + 25% ND)
- Zebra display video level indicator (on/off switchable)
- Video recorder triggering mode select switch (with 3 positions)
- VTR start/stop switch
- Video recorder power-save/camera preheating circuit
- Audio monitor jack
- Hot-shoe type microphone connector incorporating power supply terminal (for the M-K50U microphone)
- Test signal generator
- Tube heater protection circuit

\* Registered trademark of N. V. PHILIPS

## Accessories

- A-22x12.5** 22:1 with
- BERM** 2X extender
- A-14x9** 14:1 zoom lens with
- BERM** 2X extender
- A-16x9.5** 16:1 teleconferencing
- BMD-D9** lens
- A-18x8.5** 18:1 zoom lens with
- BERM-9** 2X extender
- AA-C50U** AC adaptor/charger
- CB-95** Molded shipping case
- DC-C50U** Rechargeable NiCad battery (3.5AH)
- ECM-025F** 25' lens cable (A16x9.5BMD-D9 to RMD-2)
- ECM-050F** 50' lens cable (A16x9.5BMD-D9 to RMD-2)
- ECM-100F** 100' lens cable (A16x9.5BMD-D9 to RMD-2)
- FM-ZS14U-II** Studio conversion kit A14x9 BERM-9
- HZ-510U** 10:1 zoom lens
- HZ-516U** 16:1 zoom lens
- HZ-CA23U** C-mount adaptor
- HZ-E512U** 12:1 zoom lens with 2X extender
- HZ-FM12U** Cable drive manual focus control
- HZ-NK23U** Nikon lens adaptor
- HZ-ZS12U** Cable drive servo zoom control
- KA-3** Component adaptor
- KA-500U** Tripod mounting plate (3/8" or 1/4")
- KA-D50U** Battery adaptor (DC-C50U)
- KM-2000U** Special effects generator
- KA-M50U** Pistol handgrip for M-K50U
- M-K50U** "Hot Shoe" microphone
- PK-C320BU** Board kit for KY-320B
- PK-C950BU** Board kit for KY-950B
- Q-95** Battery bracket for B-20 battery
- RM-D2** Remote control unit (A16x9.5BMD-D9 Lens)
- RS-500U** Camera remote control
- RS-L501** Local control panel for RS-500U
- RS-T900U** Triax unit with chroma key out
- UC-1003U** Rackmount adaptor
- UM-P1004U** Rackmount for RS-L501
- VC-511BU2** 14-pin to 10-pin camera cable (2m)
- VC-512BU** 14-pin to 14-pin camera cable (4m)
- VC-544U** RCU cable (65')
- VC-545U** RCU extension cable (160')
- VC-582BU** 10-pin to 10-pin extension cable (33')
- VC-586U** 12V power extension cable (16')
- VC-589BU** 14-pin to 14-pin extension cable (33')
- VC-454U** 26-pin cable to KA-3
- VF-P915U** 1.5" electronic viewfinder
- VF-550U** 5.5" studio viewfinder

# COLOR CAMERA

## SPECIFICATIONS (KY-320BU)

- Optical System:** f/1.4 3-tube R/G/B prism system (with quartz filter)
- Focusing/Deflection System:** Electrostatic focusing, electromagnetic deflection
- Pickup Tubes:** 2 2/3" S-M Plumbicon\* (S4803) X3
- Encoder:** NTSC (I/Q encoder)
- Synchronizing System:** Internal: Built-in SSG (conforming to RS-170A) External: VBS or BB
- Lens Mount:** Bayonet
- Sensitivity (typical):** f/4.5 at 2000 lux, 89.9% reflectance
- Minimum Illumination (typical):** f/1.7, 38 lux (3.6fc) (+ 18dB On, 89.9% reflectance)
- Signal-to-Noise Ratio (typical):** 57dB (contour correction Off, gamma 1, bandwidth 4.2MHz, Matrix Off, I/Q Off)
- Horizontal Resolution:** 650 lines (G CH center)
- Registration:** Zone 1: Within 0.1% (circle 80% of picture height) Zone 2: Within 0.2% (circle of picture width) Zone 3: Within 0.3% (area outside Zone 2)
- Contour Correction:** Horizontal: Dual-edged Vertical: 2H, with comb filter
- Color Bar Generator:** Split bar (100% white) /full field (75% white) switchable
- Optical Filters:** Closed, 3200K, 5600K, 5600K + 25% ND
- Gain Boost:** 0dB, +9dB, +18dB
- Variable Blanking:** H: 10.6µs/10.8µs/10.9µs switchable V: 18H/19H/20H switchable
- Input Signals:** Return Video Signal (VBS): 1.0V p-p, 75 ohm Genlock Signal: VBS (1.0V p-p, 75 ohm) or BB (0.43V p-p, 75 ohm) Microphone Signal: -52dBm, 600 ohm
- Output Signals:** Composite Video Signal (VBS): 1.0V p-p, X2 (BNC/14-pin connector) Test Signals (VS or VBS): R, G, B, -G, ENC Audio Signal: -52dBm, 600 ohm balanced/-20dB, unbalanced or balanced (switchable) Audio Monitor Signal: 8 ohms, -20dB VCR Control Signal: Contact or 4V supply (switchable)
- Power Supply:** +12VDC (10.5 to 17V)
- Power Consumption:** 1.45A
- Ambient Temperature:** -20 to +50°C (-4 to +122°F)
- Weight:** 9 lbs. (4.1kg)
- Dimensions:** 4 7/16" (W) x 10 3/4" (H) x 11 13/16" (D) (115 x 271.5 x 299mm)

## COLOR CAMERA

### FEATURES

- LOC Diode Gun Plumbicons\*
- Modular Docking Camera for Wide Variety of ENG, EFP and Remote Van Applications
- Component Video Output, Including the MII Format as well as Composite Video Output

KY-80U

### KY-80U THREE-TUBE PLUMBICON CAMERA FOR DOCKING VCR

The KY-80U three-tube Plumbicon camera was designed to dock with the MII component recorder. By installing a camera adaptor or triaxial cable adaptor, it can be used as a system camera for use in EFP applications.

Pickup tubes are LOC diode gun M-S Plumbicons with improved picture quality through component signal processing, 700 lines of resolution and a signal-to-noise ratio of 59dB.

**User Friendly Features for ENG, EFP and OB Van Applications.** Ease of operation during shooting is enhanced for the professional camera person thanks to the extensive incorporation of microprocessors specifically designed for controlling registration, auto-iris, auto-shift, auto-black, and auto white functions.

Inside the viewfinder, a safety area is clearly marked for ease of shooting, while the entire scene can still be viewed in the underscanned picture. This information is displayed by the built-in character generator which includes self-diagnostics, status and mode displays.

Also new to ENG cameras for camcorder applications is a power-operated dual

filter system (ND and color) which provides simplified operation when the camera is used with a remote control unit.

### High Performance Audio Capabilities.

To provide the high level of audio performance required to complement component video, the KY-80U incorporates as standard a variety of advanced audio features, including two-channel audio input at the camera adaptor.

\*Plumbicon is a registered mark of N.V. Philips.

### MI-F30U Automatic Fader

#### FEATURES

- 3-Bus Crosspoint Matrix System
- 2-Channel Gang Operation
- Over and Preset Transition Rates Are Variable From 0 to 999 Frames and Able to Settle  $\pm 1$  Frame Tolerance
- Transition From Program-Bus to Preset-Bus Has 4 Modes: V Cut, Cross Fade, Fade Cut, Cut Fade
- States of Cross Point, Over and Preset Transition Rate and Transition Mode are Able to be Memorized to 100 Patterns and Each State is Easily Able to Play Back
- 3 Kinds of General Purpose Interface (GPI) Mode (Over Trans/Preset Trans/Preset Cut)
- GPI and Serial Interface is Standard

### SPECIFICATIONS KY-80U

**Pick Up Tubes:** MS, DG  $\frac{2}{3}$ " P60 xQ 3457 (KY-80)  
**Optical System:**  $\frac{2}{3}$ " f/1.4 prism  
**Optical Filter:** 1) ND

## COMPONENT POST PRODUCTION SWITCHER

### FEATURES

- Eight Component Video Inputs
- 23-Wipe Patterns
- Hard/soft Edges and Borders
- Chroma Keyer
- Luminance Keyer
- Color Matte Generator
- Color Bar Generator
- RS-422 Serial Interface

KM-3000U

### KM-3000U COMPONENT POST PRODUCTION SWITCHER

The KM-3000U Component Post-Production Switcher answers the industry's demand for switchers which can process component signals for improved picture.

The KM-3000U has eight Y/R-Y/B-Y component video inputs. Three of these can be switched to accept R/G/B signals for the DSK (downstream keyer) input. There are 23 wipe patterns, hard/soft edges and borders. Manual or auto dissolve is possible, and four of the wipe patterns can be positioned as required.

A chroma keyer, luminance keyer, color matte generator (background color, border color, DSK color) and color bar generator are standard. The built-in sync generator conforms to the RS-170A standard. In auto-transition, the Mix/Wipe, DSK and Fade timing can be set between 0 and 255 frames, using either a rotary dial or numeric keypad.

The program buses and preset/preview buses are flip-flop buses making possible

smooth scene transitions. For greater efficiency in editing, up to 16 panel setups can be stored in memory using the numeric keypad. The hue, saturation, luminance, duration and border width can also be input using the numeric keypad, the joysticks, or the switches. Connection to the editor can be made through the GPI interface as well as the RS-422 serial interface.

### SPECIFICATIONS

#### Video Inputs:

8 Program: Y/R-Y/B-Y, 0.7V p-p, 75 ohms. Input 6.7.8 can accept R/G/B signal by selection  
3 Key: VB, 0.7V p-p, 75 ohms. Input 6.7.8 has key input.  
2 DSK: RGB/Y/R-Y/B-Y  
Ext Wipe: VB, 0.7V p-p, 75 ohms

#### Video Outputs:

2 Program: Y/R-Y/B-Y 0.7V p-p, 75 ohms, program-2 is selectable between key bus output  
Preview: 1 switchable VBS, 1.0V p-p, 75 ohms, Y/R-Y/B-Y, 0.7V p-p, 75 ohms  
Y/C Dub: Y-1.0V p-p, 75 ohms.  
C-0.3V p-p, 75 ohms  
Composite: VBS, 1.0V p-p, 75 ohms  
Chroma Key: VB, 0.7V p-p, 75 ohms

#### Wipe Patterns: 23

**Signal-to-Noise:** 60dB (100kHz-4.5MHz) measured by Rohde Schwarz noise meter

**TV Standard:** NTSC RS-170A

**Power:** 120VAC, 50-60Hz, 40W

**Dimensions:** 482mm(W) x 176mm(H) x 350mm(D)

## FEATURES

- Single Frame Memory
- Compatible With a Number of Different Formats Including MII
- Time Base Correct 1", Component, 3/4", and 1/2" Recorders

**KM-F250U** Multiformat Frame Synchronizer  
**RM-P250U** Remote Control Unit

# MULTIFORMAT FRAME SYNCHRONIZER

## KM-F250U MULTIFORMAT FRAME SYNCHRONIZER

The KM-F250U Multiformat Frame Synchronizer incorporates a single frame memory, and is fully compatible with a number of different formats, including MII. It is designed for use with the RM-P250U Remote Control Unit which provides for a variety of special effects.

The multiformat transcoder in the KM-F250U is most useful for editing various formats with a variety of VCRs, and the KM-3000U Component Switcher with its RS-422 serial interface for VCR editing controllers.

The KM-F250U utilizes a 1M byte memory chip as its 1 frame memory, and can time-base correct errors in 1", 3/4", 1/2" and MII VCRs. Its inputs include composite, Y/C, and component inputs. With its multiformat transcoder function, the corresponding outputs are provided. If the composite signal is input, then composite, Y/C and component signals are output.

The signal processing method complies with CCIR 601 (4:2:2) using an 8-bit 13.5MHz sampling. The sync generator conforms to the RS-170A standard. Dropout compensator, field and frame freeze functions are provided as standard.

The RM-P250U Remote Control Unit is designed for use with the KM-F250U, providing special effects such as negative/positive inversion, frame freeze, field freeze, and strobe.

## SPECIFICATIONS (KM-F250U)

### Video Input Signals:

Composite Video Signal (VBS) x1 (1.0V p-p, 75 ohms)  
Component Video Signal (Same Phase) x1 (Y: 1.0V p-p, 75 ohm/R-Y, B-Y: 0.7V p-p, 75 ohm 100% Color Bar R-Y, B-Y: 0.525V p-p, 75 ohm 75% Color Bar)  
Y/C Dub Signal (C=688kHz) x1 or separate Y/C signal (C=3.58MHz) x1 (Y: 1.0V p-p, 75 ohm/C: 0.286V p-p, 75 ohm)

### Video Output Signals:

Composite Video Signal (VBS) x1 (1.0V p-p, 75 ohms)  
Component Video Signal (Same Phase) x1 (Y: 1.0V p-p, 75 ohm/R-Y, B-Y: 0.7V p-p, 75 ohm 110% Color Bar R-Y, B-Y: 0.525V p-p, 75 ohm, 75% Color Bar)  
Y/C Dub Signal (C=688kHz) x1 (Y: 1.0V p-p, 75 ohm/C: 0.85V p-p, 390 ohm) or Separate Y/C Signal (C=3.58MHz) x1 (Y: 1.0V p-p, 75 ohm/C: 0.286V p-p, 75 ohm)

### Genlock Input Signal:

BB x1 (0.43V p-p, 75 ohm or high)

### Genlock Output Signals:

Advanced sync (4H or 8H advanced) x1 (4.0V p-p, 75 ohm)  
BB x1 (0.43V p-p, 75 ohm)  
Reference composite sync x1 (4.0V p-p, 75 ohm)  
SC x1 (1.0V p-p, 75 ohm)

### DOC Input Signal:

RF Signal x1 (0.2 ~ 1.0V p-p, 75 ohm)

### Signal Format:

NTSC (Conforms to the RS-170A)

### Frequency Response:

Composite Mode Y: 4.0MHz-3dB  
Component Mode Y: 5.5MHz-3dB/R-Y, B-Y: 2.5MHz-3dB  
Y/C Mode Y: 5.5MHz-3dB

### Signal-to-Noise Ratio:

58dB p-p/rms (100kHz ~ 4.0MHz)

### TBC Range:

525H

### Genlock Jitter:

Less than 2° p-p

### Input Select:

3 positions selectable (composite, component, Y/C)

### Field Freeze:

Provided with the non lock illuminated push switch

**Frame Freeze:** Provided with the non lock illuminated push switch

**Video Level Control:** Variable more than  $\pm 35$ IRE

**Chroma Level Control:** Variable more than  $\pm 35$ IRE

**Hue Control:** Variable more than  $\pm 20^\circ$

**Set-Up Level Control:** Variable more than  $\pm 10$ IRE

**Video Timing:** Variable more than  $\pm 1.5\mu s$

**External Genlock Mode:** H Phase: Variable more than  $\pm 2\mu s$

SC Phase: Variable more than 360°

**Power Requirement:** 120VAC, 50/60Hz

**Power Consumption:** 40W

**Operating Temperature:** 5°C to 40°C

**Storage Temperature:** -20°C to 60°C

**Dimensions:** 487(W) x 52(H) x 438(D)mm

**Weight:** 6.8kg

**Video Level Control:** Variable more than  $\pm 35$ IRE

**Chroma Level Control:** Variable more than  $\pm 35$ IRE

**Hue Control:** Variable more than  $\pm 20^\circ$

**Set-Up Level Control:** Variable more than  $\pm 10$ IRE

**Strobe Time Set:** Variable

**Nega/Posi Select:** Provided with non lock illuminated push switch

**Input Select:** 3 positions selectable (composite, component, Y/C)

**Operate/By Pass Select:** Provided with the non lock illuminated push switch

**Field Freeze:** Provided with the non lock illuminated push switch

**Frame Freeze:** Provided with the non lock illuminated push switch

**Max. Distance:** 30m between the KM-F250U and the RM-F250U

**Power Consumption:** 12VDC, 70mA/-12VDC, 5mA (Supplied from the KM-F250U)

**Dimensions:** 113(W) x 61(H) x 198(D)mm

**Weight:** 0.9kg

# TIME BASE CORRECTOR/ TIME CODE GENERATOR

## SA-T300U DIGITAL TIME BASE CORRECTOR FEATURES

- The SA-T300U digital TBC uses component input signals (Y/R-Y/B-Y) to output both component (Y/R-Y/B-Y) and composite signals
- Wide range correction -32H p-p time base correction of the base bands of the Y and C (R-Y/B-Y) signals

- The reproduced signal is A/D converted by 8-bit sampling at 858 fH for almost imperceptible bandwidth and S/N degradation due to quantization noise
- Compact and lightweight, the SA-T300U occupies only one unit in an EIA 19" rack

## SPECIFICATIONS (SA-T300U)

Digital Sampling: 8-bit/13.5MHz  
Bandwidth (Y): +0/-3dB at 4.5MHz  
(C): +0/-3dB at 1.5MHz  
Correction Window:  $\pm 16$  lines  
Signal-to-Noise Ratio: More than 56dB  
Differential Gain: Less than 2%  
Differential Phase: Less than 2°  
K factor (2T pulse): 2%  
Y/C delay: Less than 20 nsec  
**Input Video Signal**  
Y: 1.0V p-p, 75 ohms unbalanced  
R-Y: 0.7V p-p, 75 ohms, unbalanced  
B-Y: 0.7V p-p, 75 ohms, unbalanced  
**Output Video Signal**  
Y: 1.0V p-p, 75 ohms unbalanced  
R-Y: 0.7V p-p, 75 ohms, unbalanced  
B-Y: 0.7V p-p, 75 ohms, unbalanced  
**Composite Video:** 1.0V p-p, 75 ohms, unbalanced

## SA-K11 TIME CODE GENERATOR/READER MODIFICATION KIT FEATURES

- Generation and readout of SMPTE (NTSC)/EBU (PAL) time codes
- Generation and readout of time code data, generation of user's bits
- Jam sync for recording by splicing time code
- Superimposition of time code on monitor (video output 2 only)
- Switching of counter function between time code base and control (CTL) signal base
- Time code readout from  $\frac{1}{5}$  to 20 times normal tape playback speed. When the tape speed is below  $\frac{1}{5}$ , the time code counter is switched automatically to the control (CTL) signal counter

SA-K11

The SA-K11 Time Code Generator/Reader Modification Kit has been designed for the modification of the JVC CR-850U/CR-600U NTSC  $\frac{3}{4}$ " VCR or PR-900E PAL  $\frac{3}{4}$ " high-band VCR.

# MULTIFORMAT COLOR MONITOR

## FEATURES

- Accepts Composite Video Signals
- Video Signals of MII Format
- RGB Analog and TTL Signals
- Front Panel Service Adjustment
- Mountable in an EIA Standard Rack

VM-R190SU

## VM-R190SU 19" V COLOR VIDEO MONITOR

Featuring tremendous convenience and versatility, the VM-R190SU from JVC accepts composite video signals, component video signals of MII format and both RGB analog and TTL signals, in addition to giving front-panel service adjustment controls and being encased in a heavy-duty metal cabinet—all promoting superior performance to satisfy the essential monitoring requirements for broadcast stations and professional video production houses.

**19" V in-line gun.** Medium-high-resolution CRT with a dot pitch of 0.4mm, realizing clearer-than-ever images.

**Comb filter.** Minimizes cross-color distortion for an improved resolution of more than 600 lines.

### Multi-format compatibility accepting a variety of video inputs:

1. Composite video signals (BNC/8-pin)
2. RGB analog signals (BNC)
3. RGB TTL signals (9-pin compatible with IBM PC CGA 8/16 color mode), and
4. Component video signals of:  
MII (12-pin)  
Betacam (12-pin) and  
Other component video signals (BNC)

**Internal/external sync.** Bridged connection is also featured.

**Pulse-cross circuit.** The sync phase can be shifted  $\frac{1}{4}$  horizontally and  $\frac{1}{2}$  vertically so that the required portion of the sync signal can be observed.

**Front panel service adjustment controls.** Easy adjustment after installation.

**Notch filter.** Substantially reduces horizontal noise, or "dot-interference" resulting when a video signal is applied.

**Underscan switch.** Enables full-screen check by switching between overscan and underscan.

**Tally lamp.** Remote-controlled, and is provided.

**Remote controls.** Input, scan, sync (internal/external) and color (monochrome/color) switchings, and lighting of the tally lamp are possible.

**Horizontal AFC select switch.** Fast/Slow

**Disc switch.** Auto/50Hz/60Hz

**RGB select switch.** TTL/Analog

**Mountable.** EIA standard rack (rack-mount adaptor optionally available)

**Metal cabinet.** Minimizes effect of various interferences, while assuring durability.

\* IBM is a registered trademark of International Business Machines Corporation.

## SPECIFICATIONS

### Type:

Color video monitor

### Color System:

NTSC system

### CRT:

19" V (diagonally measured), in-line gun medium-high resolution CRT, tri-dot pitch 0.4mm

### Power Requirement:

120VAC, 60Hz

### Power Consumption:

100W max.

### Horizontal Resolution:

More than 600 TV lines

### External Input Terminal

#### Composite Video:

(2 inputs) BNC/8-pin connector, 1.0V p-p, bridged output possible

#### RGB Analog:

BNC, 0.7V p-p, bridged output possible

#### RGB TTL:

9-pin D sub connector

#### Component Video:

(3 inputs) 12-pin connector (for MII), 12-pin connector (for Betacam), BNC (for R-Y/B-Y/Y)

#### Sync:

BNC, internal/external, sync on green, 1-4V p-p, bridged output possible

#### External Dimensions:

16 $\frac{1}{2}$ " (W) x 17 $\frac{1}{2}$ " (H) x 18 $\frac{5}{8}$ " (D)  
(418 x 449 x 473mm)

#### Weight:

TBD

## FEATURES

- Extends Broadcast Cameras up to 4,920' (1,500M)
- Links up to 12 Separate TV Network Studios to a Master Control Room
- Separate Chroma Keying Outputs for Each Camera
- Separate Intercoms for Engineer and Producer
- Automatic Phase Control

RS-T900U

## RS-T900U TRIAXIAL ADAPTOR

The RS-T900U Triaxial Adaptor for extending ENG, EFP and outside broadcast van cameras up to 4,920' (1,500m) away from their base stations, or for linking up to 12 separate TV network studios to a master control room in the same building.

In addition to extending mobility with lightweight cable while maintaining a S/N ratio of 55dB, the RS-T900U offers separate chroma keying outputs for each camera. Separate intercoms for engineer and producer, and automatic phase control are standard features.

**Prevents Signal Loss and Provides Chroma Key Capability.** Each camera that is connected to a triaxial adaptor automatically becomes a chroma key camera with individual monitor and chroma keying outputs on the back of the RS-T900U.

**Intercom That Links Producers, Engineers, and Talent.** The RS-T900U generates two intercom outputs so that engineers and producers may use separate channels. By allocating the production channel to the RS-500, the intercom operates on a two-wire or four-wire system for both channels.

**Complete Camera Set-up and Remote Control Package.** When combined with the RS-500 remote control unit, the RS-T900U provides everything needed for field production camera set-up and remote control operation at your fingertips. The two are compact and lightweight (10.6 lbs. for RS-T900U), mounting together in a standard EIA rack, and fully compatible with the Procram® line of cameras, including the KY-950B, KY-320B.

**Safety and Simplicity of Operation.** The RS-T900U has a safety feature which will automatically shut down the power once the cable is disconnected from the KA-9 camera connector. Also, a built-in safety feature is provided to prevent overloads by unintended operation.

FAX: (201) 523-3601

## FEATURES

- HQ (High Quality) circuit incorporated for operation in the VHS mode
- Rugged construction using aluminum die-cast body
- AEF (Automatic Editing Function) for clean assemble edits
- Audio level meters and LCD electronic counter
- Independent inputs for Hi-Fi and normal audio
- Hi-Fi audio recording can be defeated
- Input switching between Camera/Line/YC
- Four audio recording level controls, allowing control of both Hi-Fi and normal audio for each channel
- Two standard 6mm microphone jacks
- Dolby\*\* noise reduction system for normal audio
- Switchable between VHS and S-VHS modes (SP mode only)
- Long pause/still mechanism
- Comprehensive warning system

# S-VHS PORTABLE RECORDER

BR-S410U

## BR-S410U

### S-VHS Portable Recorder

With its superior picture quality realized by the S-VHS format, and for its mobility and flexibility, the BR-S410U is sure to be appreciated by telejournalists, production houses, businesses, institutions, schools and other organizations. The BR-S410U can be integrated with a specific camera and used as a camcorder, or used separately as a portable VCR. For systems flexibility, it also functions as a feeder in S-VHS editing systems through use of an exclusive editing control unit.

### More than 400 Lines of Horizontal Resolution.

Conforming to the S-VHS format, the BR-S410U offers a picture with well over 400 lines of horizontal resolution which renders dramatic improvements in detail, clarity and presence, and fully justifies professional applications.

### As a Camcorder or a Portable.

The BR-S410U forms a compact camcorder in combination with a specific camera, or can be used as a separate portable recorder together with an existing camera.

### Systems Flexibility.

Equipped with input/output connectors for both the composite and separated Y/C signals\*,

the BR-S410U flexibly interfaces with other video equipment. High quality software programs can be produced using the BR-S410U as the master player and a current VHS or 3/4" U-VCR editing recorder (with or without Y/C 358 connectors), together with an optionally available editing controller. Upcoming S-VHS editing recorders will further simplify editing.

\* A Y/C filtering technique incorporated under license from Faroudja Laboratories, Inc.

\*\* Dolby noise reduction system manufactured under license from Dolby Laboratories Licensing Corporation. Dolby and the Double-D symbol are the trademarks of Dolby Laboratories Licensing Corporation.

## SPECIFICATIONS

**Format:** VHS/S-VHS standard

**Signal System:** NTSC

**Record/Play Time:** 120 minutes (with T-120/ST-120 cassette)

**FF/REW Time:** Within 4 minutes (with T-120 cassette)

**Power Source:** 12VDC

**Power Consumption:** 14W

**Dimensions:** 13<sup>1</sup>/<sub>8</sub>" (W) x 9<sup>1</sup>/<sub>16</sub>" (H) x 5" (D)

(248.4 x 352 x 127mm)

**Weight:** 10.4 lbs. (4.7kg) (12.3 lbs./5.6kg with NB-G1)

### VIDEO

**Input:** 0.5—2.0V p-p, 75 ohms, BNC

**Output:** 1.0V p-p, 75 ohms, BNC

**Y/C Input:** Y: 1.0V p-p, 75 ohms

C: 0.286V p-p, 75 ohms (7-pin)

**Y/C Output:** Y: 1.0V p-p, 75 ohms

C: 0.286V p-p, 75 ohms (7-pin)

**Horizontal Resolution:** > 240 lines (VHS color)

> 400 lines (S-VHS color)

**Signal-to-Noise Ratio:** 45dB

**RF Out:** Channel 3 or 4 (VHF)

### AUDIO

**Line Input:** -6dB, 10K ohms, unbalanced (Hi-Fi and normal) RCA

**Line Output:** -6dB, < 1K ohm

**Microphone Input:** -67dBs, 3K ohms, unbalanced, 6mm dia.

### Hi-Fi Audio

**Frequency Response:** 20Hz-20,000Hz

**Dynamic Range:** > 80dB

### Normal Audio

**Frequency Response:** 40Hz-12,000Hz

**Signal-to-Noise Ratio:** > 44dB (with NR off)

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

## FEATURES

- Heavy-duty mechanism using direct-drive motors and an aluminum chassis
- Separate Hi-Fi and normal audio inputs for recording independent soundtracks
- Automatic video head cleaning mechanism
- Independent meters for channel 1/channel 2 audio levels and video level/tracking
- Centralized indications for tape running, recording mode and warning
- Erasure prevention tab override
- Large tape guides
- Dolby® noise reduction for two-channel linear audio track

- Cleaning window provided in top panel for easy servicing
- Installation in a 19" EIA rack is possible

BR-S711U

## BR-S711U Hi-Fi Stereo S-VHS Recorder/Duplicator

The BR-S711U S-VHS recorder was developed to meet professional video requirements with its high picture quality. In addition to the high horizontal resolution of more than 400 lines, achieved by S-VHS picture improvement technology, the BR-S711U employs a separate Y/C input/output system which reduces luminance and chrominance signal interference and improves color reproduction. To complement its superlative picture, two-channel Hi-Fi and two-channel normal audio tracks are provided for flexible audio programming. In terms of reliability, systems flexibility and durability that professionals require, the BR-S711U more than fits the bill. Moreover, for its compatibility with conventional VHS, the BR-S711U will be appreciated by users as a dependable recorder, or duplicator in a dubbing system.

**High Picture Quality.** In addition to recording and playing back regular VHS signals in the SP (standard play) mode, the BR-S711U is capable of S-VHS recording and playback in the SP and EP (extended play) modes. S-VHS makes possible the recording and playback of video signals with higher resolution and better quality. When used in a serial code remote control system, switching between S-VHS SP, S-VHS EP and VHS SP

can be remote controlled.

**Hi-Fi Audio.** A pair of rotary heads is provided exclusively for the recording and playback of Hi-Fi audio signals with an extended frequency response and dynamic range as well as minimal wow and flutter. The Hi-Fi audio recording feature can be switched on and off locally or by using the serial remote control.

**Dual Remote Control Systems.** Parallel and serial remote controls can be used. The parallel model has a VTR information feedback function and uses a 34-pin connector, while the serial model is connected using an RCA pin plug for easy setting up of dubbing systems. (Both remote controls are optional.)

**Front Panel Test Points and Hour Meter.** To facilitate testing and maintenance, test points for Hi-Fi audio head output, video head output, Hi-Fi audio output and normal audio output are provided on the front panel together with an hour meter showing the total running time up to 2000 hours.

## SPECIFICATIONS

### GENERAL

**Format:** S-VHS/VHS standard  
**Power Consumption:** 55W (Max. 67W with remote control unit, 12VDC, 550mA)

**Power Requirement:** 120VAC, 50/60Hz

**Dimensions:** 16<sup>15</sup>/<sub>16</sub>" (W) x 7<sup>7</sup>/<sub>16</sub>" (H) x 20<sup>5</sup>/<sub>16</sub>" (D)  
(429 x 188 x 515mm) (Excluding protrusions)

**Weight:** 48.4 lbs. (22.0kg)

**Fast Forward/Rewind Time:** < 4 min. for 120 min. tape

### VIDEO

**Video Signal System:** NTSC-type color signal/NTSC-type Y/C signal

**Input Line Video:** 0.5 ~ 2.0V p-p, 75 ohms, unbalanced

**Output Line Video:** 1.0V p-p, 75 ohms, unbalanced

**Signal-to-Noise Ratio:** > 45dB (SP)

**Horizontal Resolution:** > 400 lines (S-VHS)  
> 240 lines (VHS)

**External Sync Input:** 0.5 ~ 4.0V p-p, 75 ohms, unbalanced

### AUDIO

**Input (line):** -6dBs, 10K ohms, unbalanced

**Output (line):** -6dBs, 10K ohms, unbalanced (Normal/Hi-Fi)

**Signal-to-Noise Ratio:** > 44dB (NR-off) (Normal) (with 3% distortion)

**Frequency Response:** 40 to 12,000Hz (Normal) 20 to 20,000Hz (Hi-Fi)

### CONNECTORS

**Video Input/Output:** BNC-type connector

**Y/C Input/Output:** 7-pin connector

**Audio Input/Output:** RCA-type pin connector

**Audio Monitor:** RCA-type pin connector

FAX: (201) 523-3601

# MULTIFORMAT MONITORS

## 14" Color Video Monitor

- Internal/external sync is possible. Bridged connection is also featured
- Pulse-cross circuit; the sync phase can be shifted  $\frac{1}{4}$ " horizontally and  $\frac{1}{2}$ " vertically so that the required portion of the sync signal can be observed
- Notch filter substantially reduces horizontal noise, or "dot-interference" resulting when a video signal is applied
- Scan size switch enables full-screen check by switching between widescan and narrowscan
- Tally lamp provided
- Remote control of input, scan and switchings, and lighting of the tally lamp is possible
- Horizontal AFC select switch
- Optional EIA rackmounting

VM-R140SU

**Multi-Format Compatibility.** In addition to accepting a composite video input (BNC/8-pin), the VM-R140SU also accepts the following signals:

- 1) Component video signals of: R-Y/B-Y/Y; 12-pin connector (for MII); 12-pin connector (for BETACAM); BNC; Y/C; 7-pin connector (for S-VHS)
- 2) RGB analog signals (BNC)

**High-Quality Pictures.** The VM-R140SU incorporates a 14" medium-high resolution CRT with a 0.43mm dot-pitch.

## SPECIFICATIONS

**Type:** Color video monitor  
**Color System:** NTSC system  
**CRT:** 14" (diagonally measured), in-line gun medium-high resolution CRT, stripe-dot pitch 0.43mm  
**Power Requirement:** 120VAC, 60Hz  
**Power Consumption:** TBD  
**Horizontal Resolution:** > 500 lines  
**External Input Terminal:** Composite Video: (2 inputs) BNC/8-pin connector; 1.0V p-p, bridged output possible  
**Component Video:** (4 inputs)  
1) R-Y/B-Y/Y  
**RGB Analog:** BNC; 0.7V p-p, bridged output possible  
**Sync:** BNC; internal/external, separate sync, 0.3V p-p  
**External Dimensions:** TBD  
**Weight:** TBD

## TM-91SU

### 9" COLOR VIDEO MONITOR

- Multiple input terminals include:
  - 1) Composite video signals: BNC (bridged-connection possible)/8-pin
  - 2) Y/C separate video signals: 7-pin (for S-VHS)
  - 3) Audio input terminal: RCA (bridged-connection possible)/8-pin
- An 8cm round speaker provided
- Metal cabinet minimizes interference
- Two TM-91SU units can be mounted in an optional EIA-standard rack

**Ready for S-VHS.** The TM-91SU employs a Y/C separate input terminal to accommodate S-VHS, the high-quality video format. This video signal separation reduces crosstalk and dot-interference between the Y and C signals, resulting in improved picture quality in terms of color.

TM-91SU

**High-Quality Pictures.** The TM-91SU incorporates a 9" CRT with a 0.47mm dot-pitch. In addition, a host of advanced circuitry including a comb filter that reduces cross-color distortion assures high-fidelity color reproduction. As a result, superior horizontal resolution of more than 300 lines is achieved.

## SPECIFICATIONS

**Type:** Color video monitor  
**Color System:** NTSC system  
**CRT:** 9" (diagonally measured), in-line gun medium-high resolution CRT, stripe-dot pitch 0.47mm  
**Power Requirement:** 120VAC, 60Hz  
**Power Consumption:** TBD  
**Horizontal Resolution:** > 300 lines  
**EXTERNAL INPUT TERMINAL**  
**Composite Video:** (2 inputs) BNC/8-pin connector; 1.0V p-p, bridged output possible  
**Y/C Separate Video:** 7-pin connector  
**Audio:** RCA; 390mVRMS (-6dBs), high impedance, bridged output possible  
**Audio Output:** 1W  
**Speaker:** 8cm round x 1  
**External Dimensions:** 223(W) x 227(H) x 343(D)mm  
**Weight:** TBD

# CCD COLOR CAMERA

## FEATURES

- Three CCD's Housed in Lightweight, Die-cast Aluminum Body Designed to Resist the Rigors of Field Production
- Self Contained, Full Function Component or NTSC Camera for ENG or Studio
- Large Viewfinder and Remote Control
- MII Docking VCR can be Attached with Optional MII Format Adaptor

KY-20U

## KY-20U CCD COLOR CAMERA

KY20-U series of solid-state cameras incorporates three charged couple devices (CCDs) housed in a lightweight, die-cast aluminum body designed to resist the rigors of field production.

At the heart of this series is a CCD camera which reaches a level of performance higher than that previously available to video professionals.

The KY-20U is a self-contained, full function component or NTSC camera for ENG or studio applications requiring a large viewfinder and remote camera control. An MII docking VCR can be attached to the KY-20U by replacing the standard camera adaptor with an optional MII format adaptor.

Included are such features as an IQ encoder, RS-170A type SSG, 2H vertical contour circuit, color matrix circuit, genlock circuit, and most important, the component output signal.

A S/N ratio of 56dB, a resolution of more than 530 lines for all channels, and a registration error of less than 0.5% in all zones, these cameras feature performance that makes them ideal for

VCR recording as well as providing RGB input for image processing systems. The minimum illumination required is 23 lux (2fc) using the standard 13X lens when gain is boosted to +18dB.

Auto-setup and self-diagnostics make these cameras easy-to-operate and user-friendly. Stereo audio inputs are provided for use with portable VCRs from JVC, including the MII portable recorder.

## SPECIFICATIONS

**Optical System:** f/1.4 RGB prism system  
**Pickup Device:** 2/3" interline-transfer CCD, 3-chip  
**Encoder:** NTSC (component R-Y/B-Y system, wide band)  
**Synchronizing System:**  
Internal: Built-in SSG conforming to RS-170A  
External: VBS or BB  
**Lens Mount:** Bayonet  
**Sensitivity:** f/5.6 at 2000 lux (186fc)  
**Minimum Illumination:** f/1.7 23 lux (2.1fc) at +18dB switch on  
**Signal-to-Noise Ratio:** 56dB typical  
**Horizontal Resolution:** 530 TV lines  
**Registration:** All area less than 0.05%  
**Input Signals:**  
Aux Video Signal: VBS  
Genlock Signal: VBS or BB  
Audio: -52dB (stereo selectable)  
Audio Monitor Signal: 8 ohm, -20dB  
**Output Signals:**  
Composite Video Signal: R/G/B, Y/R-Y/B-Y or Y/C 358 selectable  
Test Video Output Signal: Composite, R, G, B, Aux selectable (Internal switch)  
Audio Output Signal: -52dB balanced or -20dB unbalanced switchable  
**Electrical Shutter:** Built-in  
**Contour Correction:**  
Horizontal: Dual edged  
Vertical: 2H (with comb filter)  
**Color Bar Generator:** Full-field  
**Optical Filter:** Close, 3200K, 5600K, 5600K +25%ND  
**Gain Boost:** +9dB, +18dB  
**Diagnostic:** Built-in  
**Power Requirement:** +12VDC 1.4A (16.8W) (including 1.5" viewfinder)  
**Weight:** 3.0kg (camera head)

FAX: (201) 523-3601

## FEATURES

- Outstanding Picture Quality: 750 Lines Resolution, 58dB S/N
- Excellent Low Light Performance: 32 Lux 93.8 fc0 at +18dB
- Compact and Lightweight Diecast Construction
- High Quality Prism Optical System
- Full RS-170A SSG with Color Framing Output
- 2H Vertical Enhancement with Level Depend Circuit
- Split-Field Color Bars (RS-189A Standard)
- Built-In Genlock Circuit
- "Hot Shoe" Adjustable Viewfinder with Diopter
- Numerous Auto Circuits and Functions
- Full Complement of Studio Options

KY-210BU

## KY-210BU COLOR VIDEO CAMERA

**Excellent Picture Quality.** Utilizing three H4101 Saticon tubes (the same tubes used in popular KY-1900U cameras), JVC engineers have incorporated a high quality f/1.4 prism beam splitter to achieve a high resolution of 750 TV lines (G channel, center).

Picture sharpness is further improved through the use of a 2H vertical enhancement circuit. As with any enhancement circuit, a certain amount of noise is also enhanced. To eliminate this under low light conditions, a level depend circuit is incorporated which controls the enhancement, so that the pictures produced are sharp and well defined, yet quiet even under gain boost situations. At +18dB boost, the minimum illumination required is only 32 lux (3.8 fc) using the standard lens, which makes the KY-210BU one of the most sensitive three tube cameras available today.

To provide the most natural color reproduction possible, a linear matrix masking circuit is employed. Briefly, what it does is adjust the pickup characteristics of the camera to be identical to the human eye, compensating for the negative energy portion of the ideal color characteristics. (Without this circuit the camera cannot "perceive" the color picture the way the

human eye does). Camera performance in bright light is just as important as in low light, and the KY-210BU contains several circuits which achieve performance not equalled by other cameras in its class.

With the processing circuitry, the slope circuit compresses 300% video level to 110% so that the gradation in highlight sections is greatly improved.

An automatic black level (ABL) circuit always offers a sharp, black image even when shooting outside under bright lighting conditions.

A NAM-type servo iris circuit including a weighted detection circuit improves pictures taken outdoors in bright sunlight by placing greater emphasis on the illumination of the subject in the lower part of the frame.

### Compact, Light & Rugged Construction.

The KY-210BU incorporates a diecast aluminum body. Extensive use is made of miniaturized components, and the entire camera head weighs only 7.8 lbs. (3.5kg). Controls are logically placed, and protected from damage and mis-operation.

**RS-170A Color Framing.** The sync signal generator (SSG) in the KY-210BU conforms

to RS-170A specification. A color framing pulse, required in some editing systems, is output through the VCR connector. This assures the widest range of compatibility today, and with post-production systems in the future.

**Genlock Circuit.** To genlock the KY-210BU, simply plug-in a stable composite video signal to the genlock input on the camera. The camera will then be locked to the external source. To control the phase (color shift) of the camera, an adjustment is provided inside the camera to match it with the external source.

**Split Field Color Bars.** The KY-210BU has a built-in split field color bar generator, meeting the RS-189A standard. Color bars are useful for checking and making adjustments to color monitors and provide a consistent reference for checking the performance of the videocassette recorder. The advantages of split field bars (as opposed to full field) are as follows: Both 75% white and 100% white are displayed, making it easier to check these levels; The I & Q signals of the encoder are provided and easily displayed on the vectorscope; Virtually all broadcast and high-end production systems use the split field bars.

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
 Elmwood Park, NJ 07407  
 (201) 794-3900  
 FAX: (201) 523-3601

**1.5" Electronic Viewfinder.** The VF-515BU is unique in that it combines the adjustability of the cable-connect type of viewfinder, with the advantages of the direct connect (Hot Shoe) system. The VF-515BU connects directly to the KY-210BU camera head without cables, thus eliminating cable related problems (such as RF interference, bad connections, etc.) It is also unique in that it is adjustable both horizontally and vertically and has both a flip-up eyepiece and a diopter. The diopter allows the eyepiece to be adjusted for people who wear eyeglasses.

Indications provided by the viewfinder are: Front tally lamp; Video recorder/camera battery warning; High sensitivity indication; Tape run/tape end warning; Peaking (with on/off switch).

## Wide Range Of Automatic Functions Auto-Shift Registration (Auto Centering).

Provides automatic adjustment of vertical and horizontal alignment (shift) of blue and red channels. Adjustment is accomplished by simply flipping a switch on the front panel. The circuit is digital, and registration data is stored in the camera's memory (battery back-up provided).

**Auto White Balance Circuit.** White color balance can be adjusted automatically by flipping a switch, or the camera can be operated on the "preset" position (3200K). White balance data is stored in the camera's memory circuit.

**Auto black balance circuit.** Flipping a switch automatically closes the iris and adjusts pedestal balance of the individual channels.

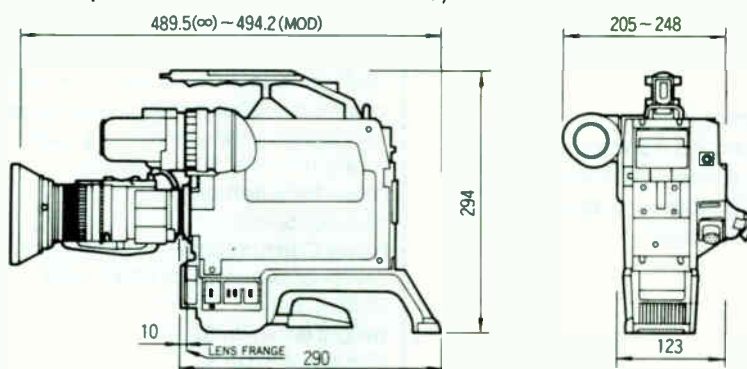

**Auto Beam Control Circuit.** Reduces or eliminates comet tails in most cases.

**Auto black level circuit.** The ABL circuit offers sharp black images even when shooting outdoors under bright conditions.

**Auto (Servo) Iris Circuit.** The iris responds quickly to objects with varied contrast and slowly for those with little contrast for natural automatic iris operation. The weighting detection circuit compresses the video signal level of the upper screen for smooth iris operation, with the NAM system (which controls the iris by separate R, G, and B signals) guaranteeing the correct response. The iris level can be switched to over (0.5/f-stop open) the normal setting.

To protect the pickup tubes, the iris closes automatically when the Operate switch is off, or when the color bar switch is on.

## Dimensions (with VF-515BU and HZ-E512U)

Unit: mm

# COLOR CAMERA

## SPECIFICATIONS

### COLOR VIDEO CAMERA KY-210BU

#### Optical System:

f/1.4 three-tube RGB prism system

#### Focusing/Deflection System:

Electrostatic focus/electromagnetic deflection

#### Pickup Tubes:

2/3" Saticon\* (x3) (H4101)

#### Encoder:

NTSC (IQ encoder)

#### Synchronizing System:

Internal: Built-in SSG conforming to

RS-170A with color framing pulse output

External: Composite video or black burst

#### Lens Mount:

Bayonet

#### Sensitivity:

f/4.0 at 2000 lux (186 fc)

#### Minimum Illumination:

f/1.6 32 lux (3.8 fc)

(+ 18dB switch On)

#### Signal-to-Noise Ratio:

58dB (Contour correction Off, Gamma 1, Bandwidth 4.2MHz, matrix off, I/Q off)

#### Horizontal Resolution:

750 lines (G ch center)

#### Registration:

Zone 1: Within 0.1% (circle 80% of picture ht.)

Zone 2: Within 0.2% (circle of picture width)

Zone 3: Within 0.4% (area outside Zone 2)

#### Input Signals:

Return video signal: VBS, 1.0V p-p, 75 ohms

Genlock Signal: Composite video (VBS, 1.0V p-p, 75 ohms) or black burst (B.B., 0.43V p-p, 75 ohms)

Microphone: -52dBm, 600 ohms unbal.

#### Output Signals:

Composite Video Signal: 1.0V p-p, 75 ohms (x2 from BNC and 14p connector)

Test Signal: R, G, B, -G, ENC

Audio Signal: -52dBm, 600 ohms unbalanced -20dBs, unbalanced (switchable)

Audio Monitor Signal: 8 ohms, -20dB

VCR control signal: Contact or 4V supply (switchable)

#### Contour Correction:

Horizontal: Dual-edged

Vertical: 2H (with comb filter)

#### Color Bar Generator:

Split bar

#### Optical Filters:

Closed, 3200K, 5600K, 5600K + 25% ND

#### Gain Boost:

0dB, +9dB, +18dB

#### Power Requirement:

+12VDC (10.5 to 17V), 1.45A

#### Ambient Temperature:

-20°C to +45°C (-4°F to 113°F)

#### Weight:

7.8 lbs. (3.5kg)

FAX: (201) 523-3601

**VF-550U 5.5" Viewfinder.** A large-screen viewfinder for studio and EFP applications, incorporating a high-resolution CRT. Pan and tilt mechanisms are provided so that the position can be set according to the scene being shot and for the ease of the camera operator.

**HZ-E512U 12:1 Servo Zoom Lens W/Extender.** 9-108mm Fujinon lens. Motorized zoom and iris. Bayonet mount (B type). With 2X extender built-in.

**RS-L501 Local Remote Control.** The RS-L501 Local Remote Control is used for the operation of the RS-500 Remote Control Unit so that the required images can be created while watching the picture. Up to four RS-L501 units can be mounted in the optional UC-P1004 Unit Case which fits in a standard EIA rack.

- Single-Knob Control of Iris, Master Black Level and Preview Switching (make-contact supply)
- Control Select Switch
- "Iris Preset Mode" Enables Fine Adjustment of Preset Iris Value By Up To  $\pm 2$  f-stops
- On-Air/Tally Indicator

**HZ-516U 16X Power Zoom Lens.** The HZ-516U is a power zoom lens for use with the KY series cameras. A high zoom range of 16:1 (9.5 to 152mm) and max. aperture of f/1.8 will capture any object, precisely and sharply.

**HZ-CA23U C-Mount Adaptor For KY Series Cameras.** This adaptor fits the bayonet mount of the 3-tube prism cameras (KY series) and permits use of standard C-Mount lenses.

**HZ-NK23U Nikon Lens Adaptor For KY Series Cameras.** This adaptor fits the bayonet mount of the 3-tube prism cameras (KY series) and permits use of 35mm Nikon camera lenses.

**M-K50U "Hot Shoe" Microphone** Mounts to side of camera without cable. Power is provided by the camera. Uni-directional. Windscreen. For handheld use, use KA-M50. Can also be used with BY-110U.

## CAMERA ACCESSORIES

**KA-3 Component Adaptor.** The KA-3 Component Adaptor is to be used when component signals (Y/R-Y/B-Y or Y/I/Q signals) are required to be output from a KY series color video camera.

- Easy Attachment Onto the Rear of Camera Head
- DC-C50 Mount Shoe and 4-Pin (Cannon) Power Supply Connector Provided
- Output Selector Switch for Y/R-Y/B-Y Signals or Y/I/Q Signals

### ACCESSORIES

<b>AA-C50U</b>	AC Power Adaptor—can be used as an AC power adaptor for the camera as well as a battery charger for the DC-C50U
<b>DC-C50U</b>	Battery Pack—can be attached to the rear of the camera, 3.5AH
<b>HZ-E512U</b>	12:1 Servo Zoom Lens (w/ Extender) (9-108mm)
<b>HZ-516U</b>	16:1 Servo Zoom Lens for KY Cameras (9.5-152mm)
<b>HZ-FM12U</b>	Manual Focus Unit for 12X/16X Lenses
<b>HZ-ZS12U</b>	Zoom Servo Unit for 12X/16X Lenses

## FEATURES

- Extremely Compact & Lightweight—8.2 lbs. with Lens and 1" Viewfinder
- Low Power Consumption—15.0 watts with 1" Viewfinder
- f/1.4 Prism Optical System
- 3 Newly Designed 1/2" Hi-Voltage Saticon Tubes
- Hi-Resolution of 600 Lines
- Excellent Signal-to-Noise Ratio of 54dB
- Genlock Input (through AC power connector)
- Auto-Shift Registration
- Auto White/Black Balance
- Auto Beam Control (ABC)
- Auto Black Level Circuit (ABL)
- Servo Iris Control Circuit with Auto Iris Close
- Color Bar Circuit
- + 6dB/ + 12dB Gain Boost For Low Light
- Built-in Color Temperature Filter Wheel
- "Hot Shoe" Viewfinder, Lens and Optional Microphone
- Extended Life Memory Backup Battery

**BY-110UL 10A** 3-Tube ENG Package with 10:1 Lens

**BY-110UL 16A** 3-Tube ENG Package with 16:1 Lens

## BY-110U COLOR VIDEO CAMERA

**Extremely Compact, Extremely Light.** Computer aided design and manufacturing techniques have made possible drastic reductions in size and weight without reducing performance and features. Strength and protection are provided by an aluminum die-cast body. Total weight of the camera including lens and 1" viewfinder is only 8.2 lbs. (3.7kg).

**Low Power Consumption.** Power consumption is a low 15.0 watts when the 1" viewfinder is used. When a fully-charged DC-C11U battery pack is used, the camera will operate for approximately 60 minutes at normal temperatures (about 77°F). The camera may be powered from a range of 10.5 to 15VDC. The BY-110U has a quick warm-up time and is stabilized sufficiently for normal use about 40 seconds after switching the power on. (Perfect stabilization will require 10 minutes or more.)

**Excellent Picture Quality.** Three 1/2" Saticon (SM) tubes assure accurate color

reproduction and 600 lines of horizontal resolution. The BY-110U has a superb signal-to-noise ratio of 54dB. The new 1/2" tubes (H9392) were chosen because of their excellent reproduction quality and compact size. A fast f/1.4 glass prism assures superb resolution and accurate color separation.

### Wide Range of Automatic Functions

#### Auto Shift Registration (auto centering).

Provides automatic adjustment of vertical and horizontal alignment (shift) of blue and red channels. Adjustment is accomplished by simply flipping a switch on the front panel. The circuit is digital, and registration data is stored in the camera's memory (battery back-up provided).

**Auto White Balance Circuit.**...white color balance can be adjusted automatically by flipping a switch, or the camera can be operated in the "pre-set" position (3200K). White balance data is stored in the camera's memory circuit.

**Auto Black Balance Circuit.** Flipping a switch automatically closes the iris and adjusts pedestal balance of the individual channels.

**Auto Beam Control Circuit.** Reduces comet tails in most cases.

**Auto Black Level Circuit.** The ABL circuit offers sharp black images even when shooting outdoors under bright conditions.

**Auto (Servo) Iris Circuit.** The iris responds quickly to objects with varied contrast and slowly for those with little contrast for natural automatic iris operation. A weighting detection circuit controls the video signal level of the upper part of the screen to optimize the over-all brightness when the sky is very bright, etc. To protect the pickup tubes, the iris closes automatically when the Operate switch is off, or when the color bar switch is on.

**Extended Life Back-Up Battery.** To retain the memory of the digital auto circuits, a back-up battery is employed. This allows the camera to retain its white balance, black balance, and auto-shift settings even when the power is turned off. A new long-life battery is utilized for this function and has a rated life of approximately 4 years.

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

**Excellent Operability.** Good human engineering went into the placement of switches and other camera controls. Switches are "touch coded" and some are protected from accidental mis-operation. The auto centering and auto white/black controls are located on the front panel behind a small door. A diopter is provided in the 1" electronic viewfinder for people who wear eyeglasses. An optional adjustable chest rest is available which improves stability and comfort. The chest rest, model KA-111, is similar to the one provided with the KY-210U cameras.

**"Hot Shoe" Connection System.** To eliminate problems with cables and connectors, the camera head and its portable accessories are designed to connect together without the use of cables. Direct connection is provided for: 10:1 zoom lens; 1" electronic viewfinder; M-K50U microphone; DC-C11U NiCad battery pack. When in operation, the only exposed cable is the VCR cable. This feature not only solves the usual problems associated with cables, it greatly enhances the appearance of the camera, giving it a very "solid" look.

**Genlock Circuit.** The BY-110U has built-in genlock facilities for locking up to other cameras in multi-camera operations. Instead of the usual genlock connector on the camera, to save space the genlock input and external power inputs are provided through the AA-C11U AC adaptor. Connection between the camera and AC adaptor is provided by the VCR cable (VC-511BU-2). The BY-110U will lock to any stable composite video signal or black burst (B.B.).

**Built-in Color Bars.** The BY-110U has a built-in full field color bar generator. Color bars are useful for checking and making adjustments to color monitors and they provide a consistent reference for checking the performance of the videocassette recorder.

**Gain Boost For Low Light.** The BY-110U has a +6dB and +12dB gain booster for operation in low light conditions. Also provided is a level-depend circuit which adjusts the starting point of

enhancement, according to the light level. Together, these circuits enable maximum low light performance with a minimum of noise in the picture. The minimum illumination required is 65 lux (70% video level) with +12dB of gain. Even at this light level, the picture is quiet, with well defined images and natural colors.

**Wide Choice Of Lens Options.** The BY-110 is available in a variety of configurations and offers a wide choice of lens options. For ENG/EFP applications, the 10:1 HZ-110U (f/1.4, 7-70mm) and 16:1 HZ-116U (f/1.4, 7-112mm) are recommended.

## SPECIFICATIONS

### COLOR VIDEO CAMERA BY-110UCH

#### Optical System:

f/1.4 three-tube RGB prism system

#### Focusing/Deflection System:

Electrostatic focus/electromagnetic deflection

#### Pickup Tubes:

1/2" Saticon \* (x3)

#### Encoder:

NTSC type (R-Y, B-Y)

#### Synchronizing System:

Internal: Built-in SSG

External: Composite video or black burst

#### Lens Mount:

Special mount

#### Sensitivity:

f/2.8 at 2000 lux (186 fc)

#### Minimum Illumination:

f/1.4, 65 lux (6 fc)

#### Signal-to-Noise Ratio:

54dB

#### Horizontal Resolution:

600 lines (G ch center)

#### Registration:

Zone 1: Within 0.1% (80% of picture ht.)

Zone 2: Within 0.4% (picture width)

Zone 3: Within 0.8% (outside Zone 2)

#### Input Signals:

Return video signal: VBS, 1.0V p-p, 75 ohms

Genlock Signal: Composite video (VBS

1.0V p-p, 75 ohms) or black burst (B.B.,

0.43V p-p, 75 ohms)

Microphone: -60dBm, 600 ohms unbal.

#### Output Signals:

Composite Video Signal: 1.0V p-p, 75 ohms

Test Signal: R, G, B, R-G, B-G, ENC

Audio Signal: -20dB unbalanced

Audio Monitor Signal: From video

recorder used

Video Recorder Control Signal: Contact

or 4V supply (switchable)

#### Contour Correction:

Horizontal: Dual-edged

Vertical: 1H, single-edged

#### Optical Filters:

Closed, 3200K, 5600K, 5600K + 25% ND

#### Gain Boost:

0dB, +6dB, +12dB

#### Power Requirement:

+12VDC (10.5 to 15V), 1.05 A (camera head only)

#### Ambient Temperature:

-5°C to +45°C (23°F to 113°F)

#### Weight:

5.3 lbs. (2.4kg)

#### Dimensions:

4 1/8" (W) x 10 1/16" (H) x 10 7/8" (D)

(104.5 x 254.5 x 276mm)

# JVC PROFESSIONAL PRODUCTS COMPANY

## RS-110U Remote Control Unit For BY-110U.

Despite its surprisingly low price, the RS-110U offers a full range of features and capabilities. Using only one standard rack space (1 $\frac{3}{4}$ " ), the RS-110U may be used to power and control many of the functions of the BY-110UP. In addition, the RS-110U provides individual red, green, and blue channel outputs from the camera.

## HZ-NK11U Nikon Lens Adaptor For

**BY-110U.** This adaptor was designed to enable a wide variety of photographic lenses to be used with the BY-110U. Using a standard Nikon mount, literally hundreds of special effects lenses become available. Extreme wide angle and extreme close-up lenses are the most popular of this type.

## HZ-CA11U C-Mount Adaptor For BY-110U.

Because the BY-110U uses  $\frac{1}{2}$ " pick-up tubes and a prism optical system, conventional lenses would not normally be able to be used on it. For this reason, the HZ-CA11U was designed. Actually a lens itself, this adaptor enables most any standard C-Mount lens to be used on the BY-110U.

**HZ-TCL11U Teleconversion Lens For BY-110U.** This adaptor screws onto the front of the BY-110U lens to increase the focal length by 1.5 times.

## HZ-FM11U, HZ-FM12U Manual Focus

**Control.** Rear focus and zoom controls are essential for most studio operations. The HZ-FM11U (for HZ-110 lens) and HZ-FM12U (for HZ-116 lens) are manual focus units which attach to the lens and to the tripod.

## HZ-ZS11U, HZ-ZS12U Servo Zoom Control.

The HZ-ZS11U (for HZ-110 lens) and HZ-ZS12U (for HZ-116 lens) are electronic zoom units which plug into the lens and attach to the tripod. Use the HZ-FM11U/ HZ-FM12U, VF-400 and RS-110U to make a complete studio package.

## TE-1000 & 3000 Telecine Attachments.

The TE-1000 & 3000 Telecine Attachments can easily be attached on the front of the lens of the KY-210 or BY-110 for the transfer of film images onto videotape. The amount of light is adjusted by the automatic iris of the lens and, as it is mounted on the front of the lens, it takes up only a small space and makes it easy to use the cameras for both normal shooting and telecine operations. It can be used with a wide range of projectors using 8mm, 16mm and 35mm film.

# CAMERA ACCESSORIES

**HZ-WCL11U Wide Angle Converter For BY-110U.** This adaptor screws onto the front of the BY-110U lens to decrease the focal length by 0.7 times.

**HZ-M110 Microscope Attachment.** The HZ-M110 Microscope Attachment is designed exclusively to use the BY-110 in combination with a microscope made by Olympus, Nikon, etc. for applications such as analysis, research, education, process control and inspection.

**HZ-110MDPU 10X Motorized Zoom Lens & Remote Control Unit.** The HZ-110MDPU 10X Motorized Zoom Lens was developed specially for the BY-110. Included with it is a Remote Control Unit; zooming, focusing and iris operation can be controlled from a distance of up to 1970' (600m). The HZ-110MD is ideal for surveillance, teleconferences, computer graphics stands, etc.

**VF-400U 4" Viewfinder.** A large-screen viewfinder is desirable for studio and EFP applications. The VF-400U incorporates a high resolution CRT (more than 500 TV lines), pan-tilt mechanism, and tally lamps.

# JVC PROFESSIONAL PRODUCTS COMPANY

## FEATURES

- **Excellent Picture Quality:** 360 Line Resolution, 48dB S/N
- **Ultra-Low-Light Performance:** 30 Lux (2.8fc) (+ 12dB)
- **C-Mount 10X Variable-Speed Servo Zoom Lens**
- **2 Line Enhancement Circuit**
- **Built-In Genlock Circuit**
- **Built-In Color Bar Generator**
- **Built-In Character Generator with Time/Date Function**
- **Auto Fade In/Out Circuit**
- **Computerized On-Screen Read-Out Warning System in VF**
- **Stereo Microphone Provided**
- **Snap-On Battery Power System**
- **Simple Operation with Variety of Automatic Functions**

GX-S700U

## GX-S700U COLOR VIDEO CAMERA

**Excellent Picture Quality.** Featuring a  $\frac{2}{3}$ " high-band Saticon tube with a multiplex crystal filter between the lens and tube. The result is a clear, sharp picture, 360 lines and 48dB S/N. Picture sharpness is further improved by the use of a 2H vertical enhancer circuit. For operation in low lighting conditions, a +6dB/+12dB gain booster is provided.

**10:1 Variable Motorized Zoom Lens.** The f/1.8 lens has a zoom range of 10.5mm to 105mm, making it ideal for telephoto operation. In addition, a macro feature is included.

**Built-In Color Bars.** The GX-S700U has a built-in full field color bar generator. Color bars are useful for checking and making adjustments to color monitors. The lens iris is automatically closed, if it is in the Audio mode.

**Built-In Character Generator w/Lap Time/Date.** A 12-key character generator with 8-hour memory backup time enables titles, dates, and lap time to be recorded over the scene being shot.

**Modular Power System.** As it is packaged, the camera can be powered from the VCR's battery using the standard VCR cable (provided). Power consumption is 9.2 watts (peak at 12VDC). (Under normal operation, power consumption will be around 8.0 watts.)

The GX-S700U can be used with either the NB-P3U (0.7AH) or the NB-P4U (1.4AH) NiCad battery packs which snap directly onto the rear of the camera.

### 1.5" Electronic Viewfinder w/Computerized Warning System.

Warning/status system displays, in alphanumeric characters, various indications on the screen. These include iris, pause, tape run, battery alarm, white balance, filter setting, gain switch, etc.

### ACCESSORIES

<b>AC-P3U</b>	Snap-On AC Adaptor
<b>AP-P3U</b>	Snap-On Car Battery Cord
<b>BB-P3U</b>	Battery Charger for NB-P3U/NB-P4U
<b>NB-P3U</b>	.7AH NiCad Battery Pack
<b>NB-P4U</b>	1.2AH NiCad Battery Pack
<b>VC-235-10U</b>	33' Camera Ext. Cable (10p-10p)

## SPECIFICATIONS

### Color System:

Frequency separation color system  
5MHz chrominance carrier frequency

### Scanning System:

30 frames, 525 lines, 2:1 interlaced

### Video Output:

1V p-p, 75 ohms, NTSC

### Horizontal Resolution:

Better than 360 TV lines

### Video Signal to Noise Ratio:

Better than 48dB (contour off)

### Minimum Illumination:

30 lux with +12dB gain

### Audio Output:

CH-1 and CH-2, -20dB, 1K ohm

### External Microphone Input:

CH-1 and CH-2, -72dB/low impedance,  
3.5mm stereo jack

### Headphone Output:

-6dB/low impedance, 3.5mm stereo jack

### White Balance:

Preset and automatic

### Viewfinder:

1.5" Electronic, detachable

### Genlock Input:

BNC; 1.0V p-p composite (NTSC)

### Color Bar Generator:

Built-in; full field

### Power Requirement:

+12VDC from VCR or battery pack

### Power Consumption:

9.2 watts

### Weight:

2.95kg with lens, VF, mic, shoulder pad

### Dimensions:

415(D) x 190(W) x 238mm(H) w/lens hood, VF & shoulder pad

## FEATURES

- Eight Inputs (VBS), Three Buses
- Two Fader Levers
- Non-Synchronous Input
- Built-In RGB Chroma Keyer
- 13 Wipe Patterns with Soft Edge
- Built-In Color Background Generator
- Adjustable Background Color
- Color Downstream Keyer
- B/W Superimpose Circuit
- External Key Input
- Built-In S.S.G. with Genlock
- Intercom and Tally Circuits Provided
- Auto Fade-to-Black
- Auto Take

KM-2000U

The JVC KM-2000U Color Special Effects Generator is designed to meet the needs of users of professional and industrial video systems.

**Two-Piece Design.** The KM-2000U actually consists of two components: a control unit and an electronics unit. The control unit is compact (only 3<sup>5</sup>/<sub>8</sub>" deep and 6 rack units high) and is connected to the main electronics unit by two ribbon cables. The electronics unit houses the primary electronics and all connections to peripheral equipment.

**Eight Inputs.** There are eight synchronous video inputs, each with loop-thru BNC connectors. In addition, a non-synchronous input is provided, which can be routed to the program line via a pushbutton on the control panel.

**Downstream Keyer.** The KM-2000U's downstream keyer (DSK) has a built-in color background generator (adjustable). The polarity of this circuit can be switched so that a reversal of the key effect may be obtained. The circuit also allows the user to manually fade the effect in and out—independently of the fader controls.

**RGB Chroma Keyer.** Utilizing the RGB signals obtained from most 3-tube cameras, this feature allows the user to selectively replace any color in the picture with a signal from another camera.

**Three Buses, Dual Faders.** The KM-2000U's three bus system allows an effect to be created and previewed before actually putting it "on-line". The effect can then be inserted into the program output with a dissolve, using the second fader. The 13 built-in wipe patterns, together with joystick positioning and soft edge control provide most popular effects.

### ACCESSORIES AR-2000 Auto Ramp Generator—

Allows a Video Tape Editor—The PALTEX/ABNER to trigger the KM-2000U with a GPI command during an A/B roll edit sequence. The AR-2000 has thumb wheel switches that provide up to a 299 frame dissolve or wipe in either direction.

## SPECIFICATIONS

### Video Inputs:

x8, VBS, 1.0V p-p, 75 ohms or high (BNC)

### Aux Input:

x1, VBS, 1.0V p-p, (non-synchronous) 75 ohms or high (BNC)

### Chroma Key Inputs:

RGB, VB, 0.7V p-p 75 ohms or high (BNC)

# SPECIAL EFFECTS GENERATOR

## FEATURES

- RGB Chroma-Keyer
- Low-Cost, Economical
- 8-Color Generation
- 6 Wipe Patterns
- Smoother Fades and Dissolves

KM-1200U

## KM-1200U SPECIAL EFFECTS GENERATOR

The KM-1200U is designed for mounting in a standard EIA rack and has 4 video inputs, a chroma key input, a background color generator and a DSK input. It incorporates an SSG and genlock operation is possible using composite video or blackburst signals. With its Autotake switch, the signal selected to be previewed can be supplied to the program line with a single operation. Both AC and DC power supplies can be used so that use on locations is possible.

**RGB Chroma Keyer/External Keyer.** By the use of 3 discrete signals the RGB Chroma Keyer allows for an extremely sharp key. These individual signals allow the decoder circuit to more easily distinguish subtle color differences, thus producing a more accurate and clean key.

An external keyer is also supplied for Black and White key sources, usually a CCTV type camera. This mode is selected by a back panel control, which switches between Background Color and external key. The external key circuit can also be used with a color character generator. The character generator supplies a B/W signal to cut the key hole and a color video signal to 1 of the 4 video inputs, which is in sync with the key hole.

**D.S.K. — Down-Stream Keyer.** The D.S.K. circuit is identical to the External Key circuit except for its electronic position in the flow of the video signal path.

The D.S.K. circuit has the capability of colorizing itself. This internal generator has the ability to make the following 8 colors: Black, Blue, Red, Magenta, Green, Cyan, Yellow and White.

**Sync Generator and Genlock.** The sync generator in the KM-1200U is multi-faceted because of its many modes and outputs. It is capable of generating RS-170 sync or Genlock to any source, including a VCR.

The KM-1200U also supplies the following signals: Two Black Burst outputs. Composite Sync; Horizontal Sync; Vertical Sync; Blanking (Switchable as third Black Burst output).

**Auto Take.** The purpose of Auto-Take is to allow for preselection and confirmation of cuts, before they go to air.

**Background Generator and External Input.** The Background and External position is input 5 on the KM-1200U. These two sources are selectable from a back panel switch.

When in the Background position the following 8 colors are available: Black, Blue, Red, Magenta, Green, Cyan, Yellow and White.

## SPECIFICATIONS

### Video Inputs:

x4, VBS, 1.0V p-p, 75 ohms or High (BNC)

### Chroma Key Inputs (EXT. KEY):

RGB, VB, 0.7V p-p, 75 ohms or High

### DSK Input:

x1, VBS or BB, 1.0/0.45V p-p, 75 ohms or High

## 3/4" EDITING RECORDER

### FEATURES

- 4-Heads
- Front Loading
- Direct Drive Reel Servo
- SMPTE Time Code Track (3rd Audio)
- Diagnostic Warning System
- Front Panel Test Points
- S/N 47dB Video
- Vertical Interval Head Switching
- Improved Drop-Out Compensation
- Die-Cast Chassis
- LED Indication for Fuse Condition Status
- Record, Playback and Editing Capabilities

CR-850U

### CR-850U 3/4" EDITOR

The CR-850U is a very high quality 3/4" editing VCR with characteristics that make it suitable for a wide variety of applications. It was designed with the following objectives in mind:

It should have a picture reproduction quality second to none.

It should be easy to use.

It must adapt to a wide variety of systems and applications. Above all, it must be reliable.

The CR-850U achieves all of these goals and more. It incorporates a variety of innovations in VCR technology and will certainly set new standards of performance.

**Signal Quality, Performance.** The most important attribute of a 3/4" editor is its picture quality. Design engineers made every effort to see to it that the CR-850U would have absolutely the best picture reproduction quality of any 3/4" VCR on the market.

Through the use of a variety of circuits, the CR-850U has exceptionally low noise — 47dB signal to noise ratio in the color mode. And the less noise produced by a VCR, the cleaner the picture. This is especially important in the editing process, since noise is usually compounded as multi-generation dubs are being made.

**Y-688 Dubbing System.** Normal tape-to-tape transfers result in deterioration of the video signal. To minimize this, the CR-850U employs a Y-688 dubbing system, utilizing a standard 7-pin cable (provided).

**Convenience.** Line Input Switcher. On the CR-850U there are two video inputs labeled "Line A" and "Line B". These inputs are selectable by pressing a pushbutton on the front panel. An LED lights to indicate which input is active.

When switching from Line A to Line B, the CR-850U performs the switching in the vertical interval. If the signals are genlocked together, then the transition is glitch-free, even when it is recorded. To further this benefit, a connector is provided on the rear panel for remote operation of this function. Contact closure of this connector causes the VCR to switch from Line A to Line B. The VCR can actually be used as a "mini-switcher."

**Built-In Editing Control Functions.** In many instances, a separate editing controller is not necessary to perform editing functions. The CR-850U has a built-in Z-80 microprocessor which controls these functions. A close look at the control panel on the CR-850U shows many of the same functions found on

popular editing controllers: Preroll, Preview, Entry In, Entry Out, Assemble, Insert, Edit Start, Edit Stop.

**Digital Tape Counter.** The LED digital tape counter on the CR-850U displays Hours, Minutes, Seconds, and Frames. Its count is based on the FG pulse from the capstan circuit, and will continue to read even if control track is lost. If the control track reference is desired, a DIP switch can be flipped internally to make this selection. In addition to displaying tape travel, the counter in the CR-850U has another function unique to a VCR: it has a built-in Lap Timer. This is like having a separate tape timer working independently of the normal counter. It can be used to measure tape travel distance from a given point. It is especially useful when doing fixed length edits.

**Visible Picture Search.** The front panel search dial on the CR-850U provides a convenient way to shuttle the tape with a viewable picture at speeds from 1/30<sup>th</sup> to 15 times normal in forward and reverse.

**Jog Mode.** In addition to visible picture search, another function is provided, which can be accessed when using a serial editing controller. "Jog" is a feature

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

which allows the picture to accurately follow the movement of the search dial on the controller, as it is turned to the right or left.

Full Capstan Control In All Modes. When the cassette is inserted into the CR-850U, mechanism fully loads the tape around the head drum. The tape remains threaded in this fashion until the eject button is pressed. This permits much faster cueing times, as well as more positive control over the tape. A special "standby" mode is provided which stops the head drum and disengages the pinch roller after 10 minutes in still. This permits rapid drum-up to full picture while protecting the tape and vital components.

Independent Audio Limiters. Besides adjusting the audio levels manually, the CR-850U can adjust levels automatically with its built-in limiter circuit. Separate on/off switches are provided for each channel, a JVC exclusive feature.

Flexibility. It is fitting that an editing VCR as advanced as the CR-850U be able to adapt to a wide variety of systems and applications. For this reason, JVC incorporated a number of features which are explained below.

Front Loading Design. Besides saving space the front loading design permits mounting in a standard 19" rack, with an optional rack slide kit. All operational controls are mounted on the front panel.

Serial (RS-422) Control. A 9-pin "D" type connector is located on the rear panel for connection to editing controllers and other components. Using the serial port permits connection to a wide variety of sophisticated controllers. The serial connector is also used for the JVC RM-G850U controller.

Parallel Control. A 45-pin connector is located on the rear panel for connection to existing JVC editing controllers. Direct connection can be made to the RM-86U or VE-90AT/VE-93 controllers.

SMPTE Time Code Capability. SMPTE time code is a digital code which can be recorded on one of the VCR's audio channels, to provide accurate indexing

of the tape and to provide an accurate reference for editing. The CR-850U is equipped with a 3rd audio track (address track) for SMPTE code. A front panel LED illuminates when a signal is present on this track.

Balanced XLR Audio. The audio inputs and outputs on the CR-850U are balanced, and utilize standard 3-pin XLR connectors. The inputs can be switched for three levels, depending on the audio source.

Reliability, Diagnostic Warning System. Advanced microprocessor technology was applied to a sophisticated array of sensors and detectors throughout the CR-850U. If a problem occurs the VCR will immediately detect it and go into the "warning" mode. All functions will immediately be terminated so as to protect the tape and the machine. A digital readout on the front panel will display a code number from 01 to 99. This code number corresponds to the type of problem detected.

Front Panel Test Points. To aid in troubleshooting and preventive maintenance, test points were placed onto the front panel. A technician would normally connect test gear to these points and analyze the machine's performance. Adjustments can be made by opening the top or side panels.

Direct Drive Motors. The CR-850U uses a fully direct drive reel servo system (separate motors for the supply and take-up reels), which keeps tape tension constant during all modes. In addition, the head drum and capstan are also directly driven. There are no belts, pulleys, or idlers to require maintenance.

Die-Cast Chassis. All critical components are mounted into a heavy-duty die-cast chassis. This assures stability, even when the machine is moved around a lot. Circuit boards are easy to access, and can be unplugged from the machine if necessary.

## 3/4" EDITING RECORDER

### SPECIFICATIONS (CR-850U)

#### GENERAL

**Format:**

U-VCR

**Video Signal System:**

NTSC

**Power Requirements:**

85-135V/170-270V (switchable)

**Dimensions:**

17<sup>9</sup>/<sub>16</sub>" (W) x 11<sup>3</sup>/<sub>16</sub>" (H) x 21<sup>1</sup>/<sub>8</sub>" (D)  
(446 x 284 x 535mm)

**Weight:**

73 lbs. (33kg)

**Operating Temperature:**

5°C-40°C (-4°F to 140°F)

**Storage Temperature:**

-20°C to 60°C (-4°F to 140°F)

**Operation Position:**

Horizontal

#### VIDEO

**Input:**

0.5 to 2.0V p-p, 75 ohms BNC x2

**Output:**

1.0V p-p, 75 ohms BNC x2

**Resolution:**

(B/W) 340 line, (Color) 260 lines

**Signal-To-Noise Ratio:**

47dB (Color)

**Video Input Select:**

Line (A or B)/DUB

**H-Phase Adjustment:**

Auto

**Dubbing Systems:**

Y-688

**RF Out for DOC:**

0.5V p-p, 75 ohms

**Audio Output:**

+4/-20dB (Low impedance) balanced XLR

**Monitor Output:**

4dB (Low impedance) balanced XLR

**Headphones:**

-46 ~ -24dB variable, 6.3mm jack, 8 ohms

**Frequency Response:**

50 to 15,000Hz

**Rec. Level Adjustment:**

Manual with meter, Limiter On/Off

#### OTHER

**FF/REW Time (w/KCA-60):**

4 min. (FF), 3 min. (REW)

**Wow/Flutter (by JIS):**

0.15% RMS

**Search:**

1/30 to 15 times

**Jog Mode:**

Yes (with RM6-850U Serial Controller)

**Tracking Adjustment:**

Yes

## 3/4" RECORDER/PLAYER

### FEATURES

- Superb Picture Quality
- Front Loading
- Direct-Drive Reel Servo
- SMPTE Time Code Track
- Diagnostic Warning System
- Front Panel Test Points
- S/N 47dB Video
- Vertical Head Switching
- Improved Drop-Out Compensation
- Die-Cast Chassis

CR-600U

### CR-600U

#### 3/4" VIDEOCASSETTE RECORDER

The CR-600U shares the same technology as the JVC CR-850U, making the perfect match in an editing system and a superior machine in a recording situation.

**Superb Picture Quality, Performance.** A full range of noise canceling and correction circuits are provided to eliminate distortion from every possible source including interference from time-code signals, resonance of the video heads, channel switching and the deterioration of differential gain inherent in playback and recording. Drop-out compensation after the off-tape signal has been demodulated reduces picture noise considerably. These features are important in editing, where noise from any source is compounded in multi-generation dubbing.

Circuits used in this system include:  
Improved DOC (Drop-Out Compensator)  
Direct APC (Automatic H-Phase Control)  
Separate channel FM equalizer  
Channel switching noise canceler  
Side-band equalizer  
Line correlation noise canceler  
Current-drive recording amp for each channel  
Time code noise canceler  
Differential gain canceler  
Linearity corrector  
Luminance/chroma delay adjustment circuit

**Vertical Interval Head Switching.** The head switching line has been moved to the vertical interval so that it is never visible in the picture.

**Y-688 Dubbing via 7-pin DUB connectors.** This allows cleaner transfers with minimum discoloration. Y-688 dubbing eliminates the conversion of the chrominance signal necessary in other systems. By transferring the demodulated luminance (Y) signal and unconverted 688kHz chrominance signal separately using multiconductor cable, superior results can be obtained.

**Y-Frequency Response Control.** The level of the luminance signal in the 3MHz range can be controlled by a 7-position dial to adjust detail for sharper or softer pictures.

**Video output processing switch.** This switch allows for optimum monitor playback or machine-to-machine dubbing. Circuits like APC and the noise cancelers, when turned on, are designed for final viewing. When turned off, they allow for a smarter signal for dubbing.

**Convenience**  
**Built-in preroll function and backspace editing (assembled recording).** For seam-free edits, the CR-600U automatically prerolls the tape at edit points.

**Audio Dubbing.** This allows for channel 1

soundtrack to be replaced, so that a narration, etc. can be added to a previously recorded tape.

**Digital Tape-Time and Frame Counter.** The 7-digit counter indicates the tape running time in hours, minutes, seconds and frames, taking cues from the capstan FG pulse so that counting continues even if the control signal is lost. The counter also has a lap mode, to indicate time from the last edit point. This is a convenient feature when using the CR-600U in an editing configuration.

**Variable-Speed Visual Search.** The CR-600U's Search dial makes search possible at any speed between 1/30 and 15 times forward + up to 20 times in reverse.

**Jog Mode.** The CR-600U can be used in the jog mode when connected to a serial editing controller; the picture movement will respond responsively to the Jog dial on the controller.

**Full Capstan Control in All Modes.** The tape is threaded when the cassette is inserted and stays in this condition until it is ejected: This provides accurate control of the tape position and shorter cueing times. In the Standby mode, the head drum rotates and the pinch roller is engaged so a picture can be obtained extremely quickly. If left in the Standby mode for about 10 minutes, the CR-600U enters the Stop mode to protect the tape.

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

## Separate Audio, Video/Tracking Meters.

Three meters are provided, for audio channel 1 and 2 and for video/tracking. The audio meters have independent concentric controls allowing the recording level to be adjusted as required. During recording, the Video/Tracking meter shows the level of the FM carrier; in other modes, it shows the level of the input video signal. Tracking and video level controls are provided with switchable AGC for the automatic control of the video level.

**Independent Audio Limiters.** The CR-600U utilizes limiter circuits which prevent distortion by clipping the incoming signal. Manual adjustment can be achieved by switching off the limiters and trimming the front panel controls.

**Electronic Skew Control.** To control bending or flagging at the top of the picture usually due to minor differences between the recorder used for playback and the recorder on which the recording was originally made, the Skew control provides slight adjustment of tape tension. The electronic skew corrector in the CR-600U provides smoother, more precise control than the mechanical system used in most other  $\frac{3}{4}$ " VCRs.

**Large Illuminated Pushbuttons.** The large, illuminated pushbuttons that control the tape functions are easy to see from a distance.

## Flexibility

**Front Loading.** The front-loading feature of the CR-600U makes it possible to mount in a standard 19" rack. All operation controls are conveniently placed on the front panel.

## Serial and Parallel Edit Control

**Connectors.** A 9-pin "D" connector is provided for connection to editing controllers using an RS-422 serial interface, while a 45-pin parallel connector allows connection to JVC editing controllers.

**SMPT E Time Code Channel.** The CR-600U uses an independent address-track for the recording of time codes.

## Balanced XLR Line Audio Connectors.

To eliminate the hum and interference of an electrically noisy environment such as a broadcasting station, the CR-600U has

balanced line audio inputs and outputs using standard XLR connectors.

**Video/Audio Monitor Outputs.** An 8-pin TV connector on the rear panel provides for the connection of a monitor TV. The monaural audio signal selected with the front-panel audio monitor selector (audio 1, audio 2 or mixed) is available from an RCA pin jack, the headphone jack and the 8-pin TV connector, so that the audio can be monitored without an external mixer.

**RF Output for External DOC.** A rear-panel BNC connector provides the RF output for an external dropout compensator.

**External Sync and Subcarrier Inputs.** So that a variety of time base correctors can be connected, the CR-600U is equipped with external sync and subcarrier inputs.

**Switching Regulator Power Supply.** The CR-600U will accept a wide range of power supply voltages (90-132V, 50/60Hz).

## Reliability

**Diagnostic Warning System.** With sophisticated sensors and detectors used wherever trouble could develop, providing input signals to an advanced microprocessor, this system provides a wide range of warnings. Any problems in the drum servo system, the tape path, the loading mechanism, etc. are detected by this system which sets the recorder to the alarm mode.

**Front Panel Test Points.** To facilitate troubleshooting and preventive maintenance, test points for the connection of test equipment are provided on the front panel.

**External Hour Meter.** An hour meter is provided on the rear panel. This indicates the cumulative running time of the head drum cylinder, in order to help in determining cleaning and maintenance schedules.

## Complete Direct-Drive Transport System.

Reliable and high-precision direct-drive motors are used in the CR-600U to keep the tape tension constant in all modes.

**Die-Cast Chassis.** The components of the CR-600U are given extra reliability because they are mounted in a heavy-duty die-cast chassis.

# $\frac{3}{4}$ " RECORDER/PLAYER

## SPECIFICATIONS (CR-600U)

### GENERAL

**Description:**  $\frac{3}{4}$ " Recorder/Player, deck type

**Video Signal System:** NTSC

**Recording and Playback System:**

Rotary two-head, helical scanning

**Luminance:** FM recording

**Color:** Down-converted, sub-carrier direct recording

**Cassette Loading:** Front loading

**Tape Speed:** 95.3 mm/s

**Recording Time:** Max. 60 minutes with KCA-60K

**Fast Forward/Rewind Time:** 4.0/3.0 minutes

**Wow and Flutter:** Less than 0.15% RMS

**Power Requirement:** 120VAC

**Dimensions:** 17 $\frac{9}{16}$ " (W) x 11" (H) x 22 $\frac{3}{16}$ " (D) (446 x 279 x 562mm)

**Weight:** 66 lbs. (30kg)

**Operating Temperature:** 5°C to 40°C (40°F to 104°F)

**Storage Temperature:** -20°C to +60°C (-4°F to +140°F)

**Operating Humidity:** Less than 80%

### VIDEO

**Input:** 0.5 to 2.0V p-p, 75 ohms, unbalanced

## FEATURES

- SMPTE Address Channel
- Balanced Line Audio
- Vertical Interval Head Switching
- Full Metering (CR-6650/CR-8250)
- H-Phase Control
- Full Capstan Control with Standby Mode
- Real-Time Electronic Tape Counter
- Professional Quality Editing Functions (CR-8250 only)
- FM-FM Dubbing System for High Quality Copies
- Color Dubbing Switch
- Automatic Pre-Roll (CR-6650, CR-8250)
- Capstan Servo System with External Lock Function
- Automatic Search Mechanism
- Automatic Repeat Mechanism

CR-8250

## CR-8250U/CR-6650U/CP-5550U 3/4" TAPEHANDLERS

JVC's full-featured Tapehandler series is a proven alternative to higher priced 3/4" production VCRs. These models offer features and capabilities that far exceed other decks in their price range, yet offer the simplicity and reliability JVC machines are famous for. The flagship of the series, the CR-8250U, is a 3/4" editor with flying erase heads. The CR-6650U is a recorder-player version of the same machine without flying erase heads, and without insert editing capability. The CP-5550U is a player-only model.

**Wide Editing Flexibility.** When used with an appropriate editing controller, such as the RM-86U, the JVC Tapehandlers offer a wide range of editing options. For maximum flexibility, CR-8250U editors can be used as both source and record decks. A more economical alternative is to use the CR-6650U recorder-player as the source along with a CR-8250U as the recorder. For maximum economy, the CP-5550U player can be used as a source. Regardless of which of these combinations is used, the same quality, reliability, and performance is assured.

**45-Pin Parallel Editing Control.** All three models have 45-pin connectors for editing controllers, compatible with other JVC VCRs, such as the BR-8600U VHS editor. This makes it easy to configure a 3/4" editing system using VHS as a source,

or a VHS editing system using 3/4" as a source. The Tapehandlers are also perfect upgrades for existing JVC VHS editing systems.

### Professional Quality Editing Functions.

The CR-8250U has flying erase heads and a blanking switcher which make possible assemble and insert editing with virtually no distortion at the edit points. Editing flagging is minimized by use of a framing servo and extremely stable horizontal phase lock. A manual H-phase control also allows the CR-8250U to be accurately synchronized with the horizontal phase of the player.

**Direct-Drive Reel Servo System.** Using separate direct-drive motors for supply and take-up reels, these decks are capable of variable picture search speeds of up to 15 times in both directions. This advanced drive system, similar to the one used in the top-of-the-line CR-850U, keeps tape tension constant during all modes and at all speeds. Operation is smooth and very quiet, with none of the "clickety-clank" sounds found on other 3/4" editors. In addition, the rotary head drum and capstan are directly driven. There are no belts, pulleys, or idlers to require maintenance.

**Die-Cast Chassis.** The advanced mechanisms used in the Tapehandlers are supported by a rugged durable aluminum die-cast chassis. A two motor

gear-driven tape loading mechanism and powered cassette eject mechanism are used to further assure reliability.

**Variable Search Speeds.** Unlike the "stepped-speed" search mechanisms used in most VCRs, the Tapehandler series has a continuously variable search range from still to 15 times, in both forward and reverse. Operation is extremely quiet. Even when changing tape direction in the high speed mode, tension remains smooth and constant. This excellent tape handling capability makes these models ideal for use with synchronizers in audio systems. To access the variable speed search capability, it is necessary to use the RM-70U remote control, or an appropriate editing controller.

**Full Capstan Control with Standby Mode.** The tape remains threaded in all modes except load and eject, permitting faster cueing times as well as better control. A special mode is provided which stops the head drum and disengages the pinch roller after 2 1/2 minutes in still. This permits rapid drum-up to full picture while protecting the tape and vital components.

**Real-Time Electronic Tape Counter.** The electronic tape counter has an easy-to-read fluorescent display that shows elapsed time up to 59 minutes, 59 seconds, facilitating indexing. It

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

operates at search speeds, even while winding through blank tape.

**FM-FM Dubbing System, Color-Dub.** All three models incorporate a true FM-FM dubbing system. In FM-FM dubbing, the signals are transferred in the form of FM signals without modulation and demodulation; this greatly reduces the degradation of picture quality. For situations where FM-FM dubbing is not suitable, a "Color-Dub" switch is provided. When this feature is activated, some of the color processing circuitry is bypassed, resulting in cleaner tape-to-tape transfer.

**Capstan Servo with External Sync and SC.** All three models have inputs for external sync and subcarrier (SC) signals. This permits connection to a wide variety of time base correctors, including the direct color type.

**SMPTE Address Channel.** A "third" audio or "address" channel is provided for recording SMPTE time code. Inputs and outputs (outputs only on the CP-5550U) are used for connection to time code generators and readers. When using time code, appropriate editing controllers can offer frame accurate editing, as well as provide random access to any tape location. Since the code is permanently recorded on the tape, tapes can be logged and edit lists prepared, making it easy to later access specific frames. A front panel LED illuminates when a time code signal is present on the address track.

**Balanced Line Audio.** Because of their high resistance to hum and interference, balance audio lines are used on most professional audio gear. For line and monitor inputs and outputs, JVC's Tapehandlers use balanced audio lines with XLR connectors.

**Vertical Interval Head Switching.** The head switching line, sometimes visible in the picture area, has been moved out of the picture area completely.

**Full Metering.** For demanding professionals, a video level meter

(CR-8250U, CR-6650U) and adjustments are provided to allow the video recording level to be optimized. A tracking meter is provided on all models for precise playback adjustment. Independent audio level meters (CR-8250U, CR-6650U) are provided for channels 1 & 2. The audio recording levels can be adjusted according to the meters, or automatically using the audio limiter. The limiter can be switched out on either or both audio channels as needs require. An external hour meter is also provided on all three models.

**Skeletal Construction for Ease of Maintenance.** To make the Tapehandlers easier to service and maintain, the top and bottom, front, rear, and side panels can be detached independently, giving easy access to all circuit boards. For easy maintenance, the circuit boards use plug-in connectors.

**Optional RF Modulator (CR-6650U, CP-5550U).** For connection to standard television receivers, these models have provisions for a plug-in RF modulator. The optional KR-234 (channels 3-4) and KR-256 (channels 5-6) plug into a side compartment on the CP-5550U and CR-6650U.

## 3/4" RECORDER/PLAYER

### FEATURES

- Remote Control Option
- Timer Start Capability
- Dubbing Switch
- Audio Level Control w/Limiter
- Two Audio Channels
- Auto Replay Feature
- Solenoid Operation
- Still Frame
- Optional RF Converter

CR-6060U

### CR-6060U 3/4" RECORDER/PLAYER

The CR-6060U proven 3/4" U-Format performer.

The CR-6060U is a basic 3/4" recorder/player offering excellent economy, simplicity, and reliability.

**Sharp, Clear Pictures.** Highly stable, sharp images and well defined colors are provided by the AGC and double function Automatic Color Control circuits.

**Dubbing Facility (CR-6060U).** A feature normally found on more expensive 3/4" VCRs, the CR-6060U provides a dubbing switch which allows some of the color processing circuitry to be bypassed, thus improving the quality of machine-to-machine transfers.

**Still Frame Playback.** During playback, you can stop the action to analyze individual pictures. The CR-6060U is equipped with this capability.

**Timer Start Capability.** By plugging the deck into an external timer (not

included), unattended recording can take place. In the timer start mode, the machine automatically enters the record mode (CR-6060U) when the AC power is supplied.

**Audio.** Dual audio channels are provided. On the CR-6060U, recording levels can be adjusted using the meters, or automatically with the built-in limiter circuit. In addition, the CR-6060U is equipped with an audio-dub feature which allows the audio on channel-1 to be re-recorded, if desired.

**Auto-Repeat.** Tape playback can be repeated from beginning to end as many times as desired using the auto-repeat feature. An auto-search feature also lets you fast forward or rewind to counter "0000."

**Solenoid-Control.** Solenoid operation not only provides easier operation, but enables an optional remote control to be used. The RM-60U provides remote control of most tape transport functions and has tally indication.

**Optional RF Converter.** The CR-6060U can be connected to an ordinary TV receiver through the use of an optional RF converter, KR-234 (Ch 3-4) or KR-256 (Ch 5-6).

#### ACCESSORIES

RM-60U	Remote Control for CR-6060U

## 3/4" PORTABLE RECORDER/PLAYER

### FEATURES

- **Video Confidence Heads**
- **SMPTE Time Code Capability** makes Possible Edits with Single-Frame Accuracy
- **Automatic Backspace Editing** for Assemble Edits in the Field
- **Real-Time Tape Counter**; for Convenience, Shows Tape Running Time in Minutes and Seconds
- **Microprocessor-Based Logic Controls** All Tape Operations for Precise Control
- **Full-Function Remote Control** (optional); Useful when the Recorder is Operated by the Cameraperson
- **Shuttle Search** at about 10 Times Normal Speed in either Direction

CR-4900U

### CR-4900U VIDEOCASSETTE RECORDER

**Lightweight.** Complete with its rechargeable NB-P2U battery pack and KCS-20 videocassette, the CR-4900U weighs only 19.6 lbs. (8.9kg). This is less than similar machines; lighter weight makes it more portable so that it can be used on more demanding assignments.

**Low Power Consumption.** The CR-4900U has a low power consumption, only 12 watts, an important advantage when it is used on location. The optional multi-charger/AC adaptor can charge the NB-P2U battery pack; four battery packs can be connected to this multi-charger and charged either in sequence (taking 90 minutes per battery pack) or simultaneously in a total of 10 hours.

**Video Confidence Heads.** The CR-4900U is the first 3.4" U-format recorder to be equipped for real-time monitoring of the signal immediately after it has been recorded while recording is taking place. This allows instantaneous detection of unsatisfactory sections so that they can be rerecorded immediately. This gives the CR-4900U an impressive advantage over competing machines.

**Recording Current Adjustment.** While recording is taking place, the level of the video signal recorded on the tape is measured; this is displayed so that the

video recording current can be optimized. By turning a control on the bottom, the recording current can be adjusted. When the meter makes its biggest deflection, the recording current is optimum.

**Microprocessor-Controlled.** All tape operations are controlled by a microprocessor. This makes it possible to use feather-touch operation buttons; when these buttons are touched lightly, they generate electrical signals which are fed into the microprocessor, which analyzes the feasibility of mode changes and the necessity of entering other modes during the changeover process before issuing the appropriate signals.

**Remote Control.** Microprocessor control also facilitates remote control using the optional remote control unit. All functions of the recorder can be controlled using this except audio dubbing and videocassette eject; this flexible remote control is particularly useful when the CR-4900U is operated by the cameraperson.

**SMPTE Time Code Capability.** With the optional TG-P47U Time Code Generator connected, the SMPTE time code—an eight-digit address—can be recorded on the tape so that the exact frame can be accessed for precise editing.

**Frame Servo Mechanism.** The frame servo mechanism allows accurate frame-to-frame editing.

**Automatic Editing.** Whenever the recorder enters the pause mode by use of the front panel pause button, the remote control unit's pause control or the camera's start switch, the tape is backspaced. Then, when recording starts again, the control track previously recorded on the tape is read so that the subsequent recording is correctly synchronized.

**Real-Time Tape Counter.** The 4-digit LCD tape counter shows the amount of tape that has run in minutes and seconds. This is a convenient way to indicate the amount of tape that has run and allows the required section of the tape to be accessed with a fair degree of precision. An identical 4-digit LCD tape counter is provided on the optional remote control.

**Shuttle Search.** In playback, the picture can be seen on the screen with the tape running in either direction at about 10 times normal speed. This is convenient when you want to locate any section of the program quickly.

#### ACCESSORIES

AA-P47U	AC Adaptor/Charger

- Record Monitor Control (REC-EE)
- Monitor Audio Volume Controls
- VCR Interface Cables Provided
- Can be used with JVC 3/4" V format or VHS VCR's

## EDITING CONTROL UNIT

RM-86U

### RM-86U VIDEO EDITING CONTROLLER

With the introduction of JVC's BR-8600U VHS editing recorder, JVC engineers saw fit to design an economical editing controller—one that would offer the convenience and ease of operation necessary for a VHS system, yet one that would also provide a degree of sophistication applicable to JVC's 3/4" TapeHandler Series. The RM-86U, a highly sophisticated micro-processor based automatic editing controller, offers features previously not found on units in its price range.

**Dial Search Controls.** Two Dial Search knobs provide tape shuttle control (visible picture search) for each VCR. Defent positions give indication as to machine speed, depending upon which VCR is being used. Tape search speeds are variable, forward & reverse.

**Independent LED Indicators.** Two large, easy to read LED displays show the tape location in Hours, Minutes, Seconds, and Frames for both recorder and player. In addition, these indicators provide, "lap time" indication, edit in point locations, edit out point locations, and computed edit duration.

**Preview/Perform/Review Buttons.** Edits may be rehearsed (previewed) prior to actually erasing any tape. This "preview" function allows the operator to make any corrections or adjustments to the edit points prior to doing the edit. The Perform button actually initiates the editing process which continues until the edit is completed, or until the Edit Stop button is pressed. The Edit Stop button can be used to manually end the edit, or to abort an unwanted edit in progress. The Review button replays the just completed edit.

**Automatic Edit Computation.** When any three edit points are entered, the fourth point is automatically computed. This controller allows you to enter two out-points and one in-point. The controller will compute the other in-point. This is a very important feature because it permits automatic back timed edits.

A back timed edit is one in which two events must end simultaneously at the edit out-point. Other edit controllers in this class don't have this feature.

**Frame By Frame Trim Feature.** Edit in and out-points can be trimmed one frame at a time by holding down "shift + " or "shift -" and touching In or Out once for each frame to be trimmed. (A computer edit point cannot be trimmed.)

**"Go To" Button.** With edit points set, pressing "Go To" and In or Out will command the respective VCR search to that edit point and stand-by. This is convenient when the operator wants to make corrections without using the trim feature.

**Edit Lap Time Indication.** When an edit point is entered, the lap timer is reset to zero, automatically. This timer indication can be viewed by pressing the Lap button next to the digital readout. The purpose of the lap timer is to allow the operator to use the tape counter with a zero reference during each edit, without disturbing the normal counter reading, which is used as a program timer and for locating segments on the tape.

**Record Monitor Control (REC-EE).** This alternating pushbutton switches the recorder's video and audio circuits to the player's signals. This permits an editing set-up using only one monitor.

# JVC PROFESSIONAL PRODUCTS COMPANY

## EDITING CONTROL UNIT

### FEATURES

- Controls 2 Source Decks
- RS-422 Serial Control
- LED Indicators
- Lap Time Function
- Automatic Back-Timed Edits
- Monitor Audio Volume Controls
- Audible Alarm Warning
- Dial Search with Jog Mode
- Automatic Edit Control
- Switchable Total Time/Lap Time Counter
- "Go To" Edit-Point Location
- Preview Perform/Review Functions
- Auto-Tag Operation
- Frame-by-Frame Correction
- For use only with the CRU-850

RM-G850U

### RM-G850U AUTOMATIC EDIT CONTROLLER

The RM-G850U controller uses a built-in microprocessor to automatically produce edits from any three In/Out points entered—especially convenient for fixed-length and back-timed edits. Smooth editing accuracy is provided by twin Search dials for the master and slave recorders, jog capability and frame-by-frame edit correction.

#### "Conversational" Operation.

Self-illuminating control buttons light in proper sequence to guide operators naturally through editing procedures.

**Audible Warning.** An electronic alarm confirms activation of key functions including tape-transport, Preview, Perform, Review, etc. The alarm will also sound to indicate tape-transport abnormalities.

**Dial Search with Jog Mode.** Twin dials control recorder and player search at several different speeds between  $\frac{1}{30}$  and 15 times normal playback. The jog mode, which can be entered directly from any other, provides the fine adjustment for exact edit-point location.

**Automatic Edit Control.** This system allows entry of edit points in the still mode or on the fly (while the tape is running),

and will automatically determine the fourth point in a set of edit locations.

**Switchable Total Time/Lap Time Counter.** Independent counter displays are provided for the player and the recorder. Memorized edit points or the duration of an edit can be displayed in hours, minutes, seconds and frames. Elapsed time indication is also available.

**"GOTO" Edit-Point Location.** Edit points can be called up directly from the player or recorder for on-screen checks.

**Preview and Review.** Programmed edits can be previewed (rehearsed) without actual recording, and then reviewed after completion at the push of a button.

**Auto-Tag Convenience.** After completion of an edit, the recorder returns to the edit-out point and enters the Still mode. Pressing the Perform or Preview button automatically makes it the starting point for the next edit.

**Frame-by-Frame Correction.** Correction of edit locations to single-frame accuracy is provided using the Shift button.

**Variable Pre-Roll Time.** 3, 5, 7, 10 or 15 seconds.

#### 9-Pin Remote Control Terminal (RS-422)

**Audio Monitor Level Adjustment.** Permits audio level reduction in high-speed search modes.

#### 25-Frame and 30-Frame Compatibility

### SPECIFICATIONS

#### Power Source:

120VAC, 50/60Hz

#### Dimensions:

<b>ABNER-R</b>	A/B Roll Edit Controller (Rack Style)
<b>ABNER-RC</b>	A/B Roll Edit Controller (Rack, w/TCR)
<b>ABNER-T</b>	A/B Roll Edit Controller (Tabletop)
<b>ABNER-TC</b>	A/B Roll Edit Controller (Table, w/TCR)

## ABNER BY PALTEX A/B ROLL EDITOR

The ABNER by PALTEX is a low cost A/B roll microprocessor based video editing system using either SMPTE/EBU Time Code or Control Track and is available in a 19" rack/desk mount or slim line tabletop configuration.

Ease of operation has been the main goal of ABNER's design and with individual rotary controls and transport functions for each of the 3 VTR's, anyone that has operated a two machine controller can operate the ABNER without experiencing the complexity of time-sharing machines with one joystick.

To perform an A/B roll edit, all you need to do is park the 'A' and 'B' decks at the visual frame that you want the dissolve or wipe to occur, park the 'R' deck at the visual frame that you want the new material and press either 'Preview' or 'Edit', at this point the ABNER takes control.

It will automatically load the 'In' times, roll the VTR's, trigger the switcher at the transition point and after the 'Out' has been depressed, compute the duration of the event and enter it into memory.

That's A/B roll editing made simple, the ABNER way. Remember, ABNER like all other A/B roll systems does require the 'A' and 'B' VTRs to have a time base corrector on their output and a video

switcher to allow wipes and dissolves.

The system includes a video display output that can be connected to any monochrome or green/orange phosphored monitor and provides four screen pages of information. These display all the relevant editing data, user adjustable parameters, edit, memory list and diagnostics menu.

ABNER interfaces to most modern low cost VTRs including 1/2" VHS and BETA, 3/4" U-matic and 1/2" Broadcast Component Formats.

Our special interface software allows any type of machine to be used with the system by simply connecting its relevant remote cable, this allows any mix of VTR to be used i.e. different formats from different manufacturers can be inter-mixed. The system only requires the addition of an inexpensive cable when you change or add VTR's, no costly interfaces with ABNER.

By selecting the user adjustable Executive Menu, various alternate methods of editing become available, including, Animation both from camera and VTR, 'Off-line' Edit Decision List compiling with Reel Number changes, Wipe/Dissolve codes, Duration, etc.

ABNER's edit event memory can be transferred to a printer, PALTEX floppy disk drive or paper tape in either PALTEX or other formats.

## SPECIFICATIONS (ABNER)

### Edit Modes:

Insert and Assemble; Split Video and Audio Edits; Manual and Auto Animation; A/B Roll; Sync Roll

### Search Modes:

Fast Forward; Forward Play; Forward Variable Speed; Still Frame; Stop; Reverse Variable Speed; Rewind; Cruise; Go to Any Programmed Point

### Event Set Up:

On-The-Fly Marking; Park and Perform; Park and Enter; Numerical Entry; Trim Frame by Frame or a Programmed Value; Auto Tag, Auto Next; Extended Edit; Recall any Edit in Memory

### Edit List:

PALTEX or 340; Edit Decision List Format; Printer Output (RS-232C)

### Operating Configurations:

JVC-8200, 8250, 6400, 8600, 8800, 850, 900; PAN-8500, 9600, 9240, AU-700; SONY-5 Series, BVU, SLO-383, BVW-10/40

### Electrical

#### Power:

- Optional Comments Keyboard
- Vertical Interval Time Code (VITC) Option

## MULTISOURCE EDIT CONTROLLERS

ELITE

### ELITE, EXCEL AND EDITSTAR BY PALTEX

The following describes many aspects of the PALTEX style of Editing. Each model has its own level of sophistication.

The PALTEX concept allows you to expand and enhance the System as your needs grow, from the ELITE to the EXCEL to the EDITSTAR while maintaining system compatibility.

**Keyboard** Each system has all major Key Groups in the same position using the same terminology, the number of keys depend upon the number of VTR's interfaced, the level of List Management, etc. All frequently used functions fall easily to hand with the minimum amount of movement and key strokes. Where complex or repetitive tasks are encountered the User Definable Facility allows the operator to simply set-up a chosen routine and access this each time by depressing one key. The Rotary VaraScan™ Control provides variable Manual Speed Control from High Speed Shuttle to Freeze Frame in both directions with Frame Jog Capability (VTR dependent).

**Display** Again, system familiarity is maintained by uniformity of the CRT display, variations being the number of VTR's interfaced, Facilities within the Scratch Pad area and the number of SFC's.

A full page of the Edit Decision List (EDL) can be displayed, allowing a review of the list in either direction. A Split EDL feature enables the operator to reference the List while keeping current event data available, the number of Split Events displayed being System dependent.

**User Keys** The Keyboard includes conveniently grouped User Definable Keys which allow the operator to program key sequences of up to 20 Keystrokes into each User Key. After a User Key is programmed, pressing that key automatically executes the entire sequence. Pauses can be placed in the User Key to allow the operator to enter time code values or other manually required data during User Key execution.

User Keys can include other User Keys allowing chained command strings. As an added convenience, User Key sequences may be saved to disk for future use. A User Key abort function allows the system to terminate a sequence at the end of the current function.

**Special Function Cells** SFC's allow control of external devices by triggering Relay Contacts/TTL Logic Levels or by serially communicating with Switcher Register's, Switcher Memory's, Audio Consoles, etc. A number of SFC's may be

tied to any event, each having a device type, trigger code and trigger time. All pertinent SFC data is automatically stored with the relevant event in the EDL and moves with it during List Management changes. SFC's are used for controlling Digital Effects, Character Generators, Computer Graphics and any other device whose operation must be controlled on a specific time code and frame basis.

SFC's can be enabled through the Effects Rehearse function, whereby trigger data is available for previewing Switcher Set-Ups etc. without the need to roll VTR's. SFC data occurs automatically during normal Preview and Edit. After the event is completed and stored in the EDL the SFC Registers are re-set ready for the next application.

**Auto C/F Adjust** The operator has various methods available for maintaining the correct 4 or 8 field (PAL) relationship when marking Edit 'In' Points. These can be manually trimmed, allowing correction in either the Record or Play Marks or by using 'Auto C/F' the system will adjust all selected 'In' Points to the nearest correct position on an Edit by Edit basis with a single Key Stroke or automatically when an Edit/Preview is performed.

# JVC PROFESSIONAL PRODUCTS COMPANY

- EDL Sort List Management
- Programmable Split Screen Display
- EDL Block Move Routine
- Continuous Sync Roll Auto Assembly (D)
- All Extra Sources in EDL with Recall
- EDL-DOS PC Listing Software
- Optional Comments Keyboard
- Vertical Interval Time Code (VITC) Option

# MULTISOURCE EDIT CONTROLLERS

EDITSTAR

## ELITE, EXCEL AND EDITSTAR BY PALTEX (cont'd)

When the system is controlling a serial switcher, a specific 'switcher type' Help Menu indicates the additional secondary functions, Register Recall for example, available with that particular type of switcher and how it can be accessed by the system.

**Switcher Control** The system controls an RS-422 interfaced switcher (Parallel optional) and provides selection of Play VTR's, two External Feeds and Video Black.

The operator can reassign any source to any Crosspoint of a serial switcher through the crosspoint reassignment routine.

Cut, Wipe, Wipe Code, Dissolve, Effect Duration, Key and Delayed Effect and Standard Facilities and Switchers with built-in Memory Registers can be accessed with SFC Codes.

Effect Rehearse allows any Switcher or SFC Effect to be previewed without having to roll the source materials.

The ESPRIT PLUS provides Switcher Memory Data Storage together with the EDL, allowing various operational choices: Auto Store—creates a file tied to each Event that contains Switcher Data. Manual Store—prompts operator to create a file. M/E Map—allows stored registers to be redefined between M/E Banks.

**Learn-Mode Motion Control** The ES/D and ESPRIT PLUS can perform many enhanced Speed Control Functions on up to 2 VTRs simultaneously. The Exclusive SmartScan™ Calibration Mode compares actual VTR variable play speeds both forward and reverse to a precise internal clock, allowing the system to develop the speed calibration look-up tables required to allow the various SmartScan functions to be totally repeatable and interchangeable between different systems and different VTRs including older style 1" machines.

**FreezeScan:** Will freeze the VTRs at any designated frame during Previews and Edits.

**SpeedScan:** Allows the operator complete freedom to select a constant forward or reverse speed from 1/100 to 10 times normal play speed (VTR dependent) using either the VaraScan Control or by entering the desired speed from the keyboard as a percentage of normal play.

In addition, the ESPRIT PLUS includes: SmartScan FIT™ (Expansion/Compression) which automatically computes the Play VTR speeds needed to Fit, Squeeze or Stretch, a marked Play VTR segment into a marked Record VTR time.

**Total Learn-Mode:** Allows the system to memorize complete variable motion sequences in real time without any System limitation as to the speed range. The operator has total flexibility to move

the VTR Forward, Reverse, Freeze, etc., with the System learning to the frame each change.

During any event that a Play VTR has had a variable speed function, the system will compute a 'Real' Out-Time allowing Match Frame 'pick-ups' from Non-Real Time sequences.

All SmartScan Data is automatically tied to the appropriate event in the EDL and stored for future use.

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

## FEATURES

- 3 Machine Capable, any mix 1", 3/4", 1/2"
- 3 SFC's per Event in EDL
- 3 User Definable Keys
- 326 Event Non-Volatile EDL Memory
- *Includes Elite Features Plus:*
- Switcher Crosspoint Reassignment
- Animation Assembly
- Active List Trac of EDL
- Auto List Match of EDL
- Sync Roll Effects Listed in EDL
- Disk Store of User Key Data
- 3 Line Split Screen Display
- Print CRT Display
- Recall of Sync Roll Effects From EDL
- Comments Only Event Search
- Optional Comments Keyboard
- Vertical Interval Time Code (VITC) Option

# MULTISOURCE EDIT CONTROLLERS

EXCEL

## ELITE, EXCEL AND EDITSTAR BY PALTEX (cont'd)

**Time Code** A Longitudinal Time Code Reader is included with each VTR Interface in the System and optional Vertical Interval Readers (VITC) can be added at any time.

Intermixing source tapes with 'Drop Frame' and 'Non-Drop Frame' SMPTE Code will not effect Editing accuracy, all systems are 8 field PAL EBU code compatible.

Non-Time Coded Tapes or those with defective code can still be edited, as the system allows the operator to individually select Time Code or Control Track operation at any time on a per VTR basis. Code breaks are no longer a problem, as that VTR can be 'toggled' into Control Track during the Pre-Roll Synchronization period and 'toggled' back to Time Code once Lock has been achieved.

To assist the operator in identifying the Clocking System in use, a continuous indication is provided in the display for each VTR of LTC, VTC (when fitted) or CTR.

### Time Code Phase Adjustment

Synchronization failures caused by Time Code Phase errors commonly found with cassette format VTR's are now eliminated by activating the Auto Phase Compensation System that is part of the Standard Software. This automatically monitors Off-Tape Phase relative to

System Reference Black and continuously compensates for Off-Tape errors, thereby allowing all 'foreign' material to successfully synchronize and be edited frame accurately, without the need for additional external units.

**EDL Storage** The EDL is stored in Non-Volatile Memory, allowing all EDL data to be 'held' overnight or protected in case of 'power hits' etc. The system, when equipped with a suitable disk drive, can accept Edit Lists from 3 1/2", 5 1/4" or 8" floppy disks in either PALTEX High Speed Binary Format or the 'interchange' RT11 ASCII Format. The EDL can be transferred to disk using either the PALTEX EDL-DOS Software on a PC or an RT11 8" drive. Edit Lists can be saved to disk or printer as a complete List or as a block of Events. Systems rolling more than three VTR's in one edit will automatically enter data from the additional sources—Reel No's, 'In' Time etc. into the EDL Comment Area. When an Event is recalled with this data, the Event can be restored to the Active Display with a single key stroke.

**BACKTRAC™** The PALTEX 'Backtrac' Facility included in the ES/P version allows total freedom in 'Off-Line' Editing, you can now create Multi-Generation Edit Lists and Backtrac through the information to find the original material. An Edit Master can be used as Source Material in

subsequent program changes thereby saving the need to reassemble another 'Workprint.' The Backtrac function is extremely powerful in that it can find the common thread through up to 13 generations of Edit Lists and produce a final back-tracked Edit List for Auto-Assembly.

**List Management** Text Edit: Allows insertion, deletion and modification of Events in the Edit Decision List (EDL) with the capability of Rippling the Effects of the changes through subsequent Events.

Clean Up: Trims portions of Events which are listed in the EDL, but which have been modified or eliminated later by the operator, for example 'over records.'

EDL Sort: Analyzes the EDL and Sorts by Record 'In' Time to produce an EDL of sequential continuity.

Block Move: Allows Blocks of Events to be moved to any location within the EDL with or without Ripple, thereby allowing complete sequences of action to be repositioned for better artistic effect.

**Help** The unique PALTEX 'Help' Facility is included in each system, this provides immediate access to Menu's that summarize the Functions of the majority of Keys on the Keyboard. The Help command displays on the CRT a list of facilities that the key in question can accomplish, along with the Key

BR-8600U

## BR-8600U VIDEOCASSETTE EDITING RECORDER

Engineered for professionals, a full-function VHS editor with the features, styling, and feel of advanced  $\frac{3}{4}$ " systems.

The VHS format, now the most popular videocassette format in the world, has grown immensely popular within the professional video community. As the originator of the VHS format, JVC is totally committed to its success and has responded to the demand for a full function editing recorder.

The BR-8600U is a VHS editor based on JVC's advanced heavy-duty technology. It incorporates 6 video heads. One pair is used for standard 2-hour recording and playback. Another pair is for still and search functions. And two rotary erase heads provide perfect insert edit capability. System configurations are flexible: a choice of professional VHS and  $\frac{3}{4}$ " recorders and players are available as a playback source. For a complete automatic editing system, a choice of editing controllers is also available.

### Professional-Quality Editing Functions.

The BR-8600U has a pair of rotary erase heads and a blanking switcher which make possible assemble and insert

editing with virtually no distortion at the edit points. Edit flagging is minimized by use of a framing servo and extremely stable horizontal phase lock.

### Preroll Function for Automatic Editing.

An independent Preroll button is provided on the control panel to automatically backspace the tape by about 3 seconds of program time. When no edit controller is being used, reasonably accurate editing can be accomplished with two BR-8600U's utilizing the Preroll buttons on the recorder and source. After locating the edit-in points using the convenient dial search controls, the machines are each prerolled. When Edit Start buttons are pressed simultaneously, the edit takes place at the predetermined edit points.

### Heavy-Duty Mechanism with

**Direct-Drive Motors.** The head drum is directly driven by a servo-controlled brushless DC motor, while the capstan and reels are also directly driven by independent DC motors. This assures highly stable pictures as well as greatly improved reliability. To add further to reliability and durability, the mechanism is supported by an aluminum die-cast chassis.

### Variable-Speed Dial Search. A

convenient, easy-to-operate control dial is provided for fast and accurate location of edit points. Turning this rotary dial varies the tape speed from still to 10 times normal, in both forward and reverse directions. The sensitivity of the control is dependent on the selected speed, so that fast, positive control of the tape is always maintained.

**Video Processing Circuit.** VHS picture quality is improved due to a video signal processing circuit. The BR-8600U conforms to the standard VHS format and a single cassette (T-120) provides 2 hours of quality recording and playback.

### Video Recording Adjustment—Video Level/Tracking Meter.

Normally the Automatic Gain Control (AGC) circuit optimizes the video recording current depending on the input video signal. For demanding professionals, however, this circuit can be defeated and the video level can be manually adjusted referring to the video level meter. During playback, the meter functions as a tracking meter and helps in precise playback adjustment together with an independent tracking control.

# JVC PROFESSIONAL PRODUCTS COMPANY

FAX: (201) 523-3601

## Two-Channel Audio for Stereo

**Recording and Playback.** Independent audio level meters are provided for channels 1 and 2. The audio levels of the two channels can therefore be separately adjusted. Independent audio limiters are provided and can be switched in and out as needs require.

## Dolby® B Noise Reduction

**Incorporated.** To further improve sound quality by reducing tape hiss. Dolby B noise reduction circuitry is incorporated in the audio recording and playback circuits.

**Improved Color Dubbing Quality.** The playback video signal is normally subjected to compensation so that the picture quality on the monitor is improved. However, non-compensated color signals are more suitable for dubbing and result in higher-quality color copies. In order to make this kind of signal available at the Video Out terminals, the BR-8600U is equipped with a switch labeled Color Process. When the BR-8600U is used in a copying system, set this switch to Off; the resulting tape will have a significantly improved color quality.

**Three Video Inputs Selectable.** Three video inputs (Line-1, Line-2, 8-Pin TV) are provided and the input select switch on the front panel makes it possible to incorporate signals from a tape, a camera or a TV monitor onto an edited tape by simply operating the switch.

## Field-Still and Slow-Motion Playback.

The BR-8600U has two pairs of video heads: one pair for recording and normal-speed playback, the other pair (extra video heads) for still and slow-motion playback. This is in keeping with JVC policy; recording of the highest possible quality is assured and stable pictures can be obtained even in still and slow-motion modes. Ease of locating edit points is considerably enhanced.

**External Sync Capability.** The BR-8600U is equipped with all terminals and connectors required by video professionals for editing; the Sync In connector enables external

synchronization so that the BR-8600U can easily be incorporated in an existing video system. By use of the Sync In connector, a time base corrector (TBC) can also be connected.

**Total Front Operation.** As well as the front cassette loading system, all switches and controls are accessible from the front. Conforming to the 19" rackmount standard, the BR-8600U presents no problem at all when it is to be installed in your existing production house.

**Electronic Tape Counter/Lap Timer with Fluorescent Display.** A 4-digit counter provides a convenient means of addressing tape segments. The display doubles as a 5-digit lap timer showing tape running time in hours, minutes and seconds. The fluorescent display used assures easy readability.

**Tape End Warning.** About 5 minutes before the end of the tape, the electronic tape counter starts flashing, indicating that the tape is coming to an end.

**Shuttle Search at About 10 Times Normal Speed.** Run the tape at about 10 times normal speed either forward or in reverse while watching the speeded-up picture. You can scan through a whole 2-hour program in about 12 minutes.

**Automatic Search and Repeat.** In conjunction with the tape counter, the automatic search mode enables any section of the program to be located automatically. In the automatic repeat mode, the entire tape is automatically played back any number of times.

# VHS RECORDER/PLAYER

BR-6400U

BP-5300U

## BR-6400U VIDEOCASSETTE RECORDER BP-5300U VIDEOCASSETTE PLAYER

These machines embody the latest and best of JVC's VHS technology. They are designed to offer every possible user-oriented convenience. The BR-6400U and BP-5300U can be used as source decks with JVC's VHS and 3/4" editing systems.

**Direct-Drive Motors.** The motor used to drive the head drum is a direct-drive, servo-controlled, brushless DC motor, while the capstan and reels have independent direct-drive DC motors. This system keeps jitter down to an absolute minimum, assuring stable pictures and more reliable operation.

**Rugged Die-Cast Aluminum Chassis.** Robust and durable, the die-cast aluminum chassis gives the firm support that the mechanism requires for years of trouble-free operation in a demanding professional environment.

**Motorized Front Cassette Loading.** Simply insert the edge of the videocassette into the front panel slot

and the loading motor moves the cassette gently so that it is positioned for correct operation. With all controls on the front panel, this loading mechanism allows the machine to be mounted in a stacked configuration to save space.

**4-Head System.** Both these machines have two pairs of video heads; one pair for recording (BR-6400U only) and normal speed playback, the other pair for search and variable-speed playback. This is in keeping with JVC policy; as well as assuring that recording is of the highest possible quality, this system gives stable pictures in any playback mode.

**Microprocessor Full-Logic Control.** Feather-light touch operation and highly reliable tape transport control are made possible by advanced full-logic electronics.

**Shuttle Search at up to 10 Times Normal Speed in Either Direction.** No more guesswork in locating the particular section you want to view; you can scan through a whole 2-hour program in about 12 minutes. Run the tape at about 10 times normal speed either forward or in reverse while watching the

speeded-up picture on the screen. This takes you to the scene you want quickly and accurately.

**Playback at any Speed from Still to 5 Times Normal Speed in either Direction.** When controlled from either of the optional remote control units, the playback speed can be varied continuously from still to 5 times normal in both forward and reverse directions. This is a great help in editing; you can accurately and quickly locate any required frame. It also allows more detailed analysis of action.

**Capstan Servo and External Sync Capability.** Because of its capstan servo mechanism and the fact that it can accept external sync signals to which playback is synchronized, these machines can easily be incorporated in an existing video system.

**Two-Channel Audio.** Two audio channels make the system more versatile and increase the range of applications. Either of the two channels can be played independently; stereo playback is also possible.

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

**Remote Control and Random Access Options.** A choice of cable and infrared full-function remote control units using microprocessors are optionally available; choose the one which meets your needs best. As well as giving control over tape operations, they also control high-speed picture search and variable-speed playback. An optional random access unit equipped with a digital fluorescent display allows you to input any tape address for quick retrieval of any scene.

**Electronic Tape Counter/Lap Timer with Fluorescent Display.** 4-digit tape counter provides a convenient means of addressing tape segments. The display doubles as a 5-digit lap timer showing tape running time in hours, minutes and seconds.

**Audio Level Control with Meters (BR-6400U only).** To prevent over-level recordings, an audio limiter circuit is provided in each of the audio channels. These limiter circuits can be switched on and off. In either condition, manual level control referring to the meters is possible.

**Two-Channel Selectable Audio Dubbing (BR-6400U only).** For greater flexibility and better control over sound, either of the two audio channels can be selected for dubbing.

**Editing Control Interfacing.** For more elaborate editing, direct interfacing with JVC's Automatic Editing Control Units is possible, enabling  $\frac{1}{2}$ " to  $\frac{3}{4}$ " or  $\frac{3}{4}$ " to  $\frac{1}{2}$ " edits to be made quickly and accurately.

**Easy Serviceability.** Main circuit boards can be checked conveniently by connecting an extension board. This makes a major contribution to dependable operation throughout the unit's long service-life.

# HI-FI VHS DUPLICATOR

BR-7000UR

## BR-7000UR HI-FI VHS DUPLICATOR

JVC, the originator of the world's most popular video format—VHS, has designed and built a VHS Hi-Fi recorder specifically for tape duplication. The BR-7000UR was conceived with the anticipation of a large consumer demand for pre-recorded VHS Hi-Fi tapes during the next few years. And it was conceived with the idea that people duplicating the video cassettes would be expecting the very highest quality video and audio reproduction from a machine designed for such a purpose.

### Why A Video Recorder Just For Duplicators?

JVC engineers visited a number of major duplication facilities throughout the world, and it became apparent that the needs of duplicators were unlike those of any other user of video tape products. There was the temptation to design an "all purpose" recorder/player that would incorporate some of the features the duplicators needed—and many features that were not needed. But there were already such machines on the market, and that's not what the duplicators were asking for. Instead, JVC engineers took the ideas and suggestions of the engineers and

technicians specializing in duplication, and came up with a VCR that was designed Inside and Out especially for them. Complete with punch-outs on the rear panel for user modifications, and front panel test points, the BR-7000UR was designed for one application: continuous duty tape duplication in the VHS Hi-Fi format at the Standard Play tape speed.

**Durability.** The BR-7000UR is based on the most advanced electronic tape transport system available today. The transport, mounted on a solid die-cast aluminum chassis, has been designed to give continuous, trouble-free use for years. Servo-controlled direct-drive motors not only ensure greater viewing stability, but they are also more reliable.

**Ease Of Maintenance.** Despite its low maintenance design, JVC engineers wanted a recorder that technicians could keep in peak operating condition with utmost ease. It is for this reason that several innovations were incorporated: Front panel test points. Provided are the following: Ground; Drum Pulse; Video RF (FM Carrier); Hi-Fi Audio RF (FM Carrier); Normal Audio RF-Out

Plug-in circuit board construction. Most circuit boards are designed for quick replacement and can be swung out or unplugged. In addition, a replaceable fuse is located on the rear panel.

Front panel hour meter and serial number. Most people wouldn't want these items on the front of the machine, but the BR-7000UR wasn't designed for most people. Duplication houses want the ability to quickly identify a machine and its operating hours. The plug-in hour meter indicates up to 5000 hours of head drum operation, and can be reset by simply un-plugging and turning around. Window for tape path cleaning. On the top cover of this front load machine is a trap door. Inside, there is access to the head drum and tape path components.

**Duplicator-Friendly Operation.** The following features were asked for by the professional duplication houses:

1. Wide opening for accepting the cassette with a guide for easy loading and unloading of the cassette.
2. At-a-glance large recording indicator (possibly the largest LED recording indicator in the industry.)

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
 Elmwood Park, NJ 07407  
 (201) 794-3900  
 FAX: (201) 523-3601

3. Recording capability of a cassette with the safety-tab off. (Bulk duplication tape is shipped and recorded with the safety tab already broken off. This eliminates the need for the duplicator to remove the tab.) The BR-7000UR goes one step further: A front panel LED tells the duplicator whether the tab is in the cassette or not.

4. Large video/tracking and audio meters.

5. A cover for operational buttons is provided which prevents accidental misoperation. Since all transport functions are normally remote controlled, there is no need for the person loading and unloading tapes to have access to these controls.

6. Video AGC on/off switch. Provided as a convenience, the video recording level can be adjusted manually or automatically, using the AGC. The BR-7000UR is equipped with a video level meter.

**Outstanding Performance.** The performance of the BR-7000UR is second to none. With no compromise either electronically or mechanically, JVC engineers built the very best VHS machine possible.

Improved video processing circuitry including: A pulse response improvement circuit; Signal-to-noise improvement circuit; Improved filter response; Improved head resonance characteristics.

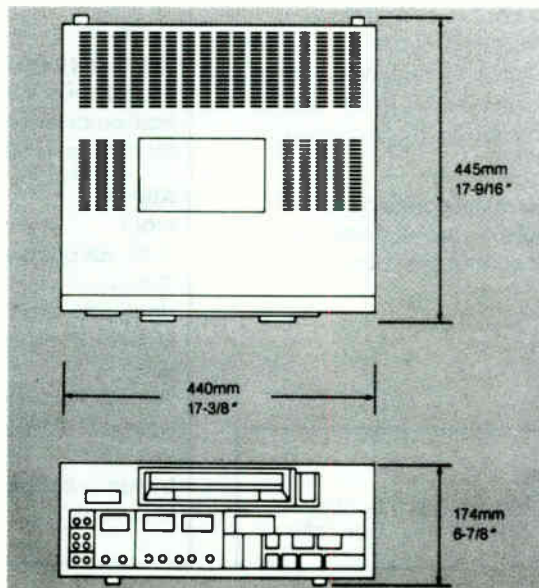

Dolby B noise reduction circuits on the normal audio channels.

Utilization of the "VHS Hi-Fi" audio format, incorporating two rotary audio heads. Audio dynamic range is more than 85dB with a frequency response of 20 to 20,000Hz.

**Serial Or Parallel Control System.** Thanks to the BR-7000UR's built-in serial coding system, you can create a whole professional system carrying out hi-fi dubbing operations with matchless efficiency. Dubbing operations are further simplified by the BR-7000UR's remote control capability, covering Record, Play, FF, REW, Stop, Pause, Rec. Pause, Eject, plus Hi-Fi Record on/off functions. Simply interconnect any number of BR-7000UR units using an RCA pin cable. Each unit is supplied with a cover over the control buttons and switches on the front panel, which prevents the BR-7000UR from operating accidentally when under serial coded remote control.

For installation into duplication facilities using parallel control, the BR-7000UR is equipped with a 34-pin connector, which gives access to most machine functions.

- Audio limiter search
- Video AGC ON/OFF Switch
- Frame Servo ON/OFF Switch

BR-7700U

## BR-7700U HI-FI STEREO VIDEOCASSETTE RECORDER/PLAYER

Yet another demonstration of JVC's commitment to the VHS system, the BR-7700U is a full-function VHS recorder built to professional standards with the added advantage that it can be used as a Hi-Fi feeder in VHS editing systems. It incorporates a variety of functions including a blanking switcher which minimizes distortion of the video and audio signals at the edit points. Edit flagging is minimized by the framing servo circuit. Therefore, the BR-7700U makes it possible to expect the quality required by video professionals.

**2-channel normal audio with Dolby B Noise Reduction.** So that the BR-7700U can be used in a wider range of applications, it is equipped with two-channel Dolby B noise reduction circuitry.

**Variable-speed dial search.** An easy-to-operate rotary control dial is provided for fast and accurate location of editing points. Speed can be varied from still to 10 times normal in both forward and reverse.

**Vertical-Interval Switching.** Featuring AEF (Automatic Editing Function), smooth,

seamless edits can be performed. Channel switching is done in the vertical blanking without noise interfering with picture quality.

**Video level/tracking meter.** Usage of this meter doubles as a tracking meter during playback and a video level meter during recording. It is possible to optimize tracking for best video signal when the BR-7700U is used as a source deck and the level of video signal when used for recording.

**45-pin remote control connector.** To give greater flexibility in editing, our RM-86U can be connected. When used as a feeder it can be remote controlled for fast accurate location of edit points.

**7-pin remote control connector.** The RM-P53U Remote control unit can be connected for control over basic functions.

BR-3100U

## BR-3100U VHS VIDEOCASSETTE RECORDER/PLAYER

The smartest buy in any class, office, or institutional system. Designed to handle a wide range of applications, the BR-3100U is a flexible video system built for reliable, trouble-free operation, and is so easy to use. Features like HQ, (High Quality) circuits, a Luminance Signal Comb Filter, and more, make it a first-class performer that is cost-efficient too. With Extended Play, up to 8 hours of recording can be programmed on a single cassette. That's three times the normal amount.

**HQ Delivers More Information to the Screen.** With a 20" higher white clip level and a Detail Enhancer, images are reproduced with improved sharpness.

**Luminance Signal Comb Filter.** The BR-3100U employs a delay line comb filter in the luminance signal path to completely isolate the chrominance signal. This makes the bandwidth of the signal wider and reduces color crosstalk resulting with 10% more information.

**Recording Options.** The Input selector allows for switching between Line, Tuner and TV for selectable recording of broadcast or audio/video.

### Automated Play Functions

Easy operation is a definite plus for a VCR in any classroom, particularly with children who are likely to be having their very first hands-on encounter with a video recorder. With the BR-3100U, you need only insert a cassette to turn the power on, engage the proper video mode and speed (EP, LP or SP) and enter PLAY (if the safety tab of the cassette is off) automatically.

Inserting the cassette does it all. Also, ejection is possible even when the power is off. What's more, the BR-3100U has a MEMORY PLAY function that lets you return to any important point on the tape and start playback automatically, wherever the counter zero position is indicated, or from the beginning. An indispensable convenience when teaching, lecturing or giving a smooth presentation with video.

## SPECIFICATIONS

### Format:

VHS NTSC standard

### Recording System:

Rotary, slant azimuth two-head helical scan system with two pairs of video heads, one pair exclusively for the SP mode and one pair for the EP mode

### Tape Width:

1/2 inch (12.65mm)

### Tape Speed

SP: 33.35 mm/s (1<sup>5</sup>/<sub>16</sub> ips)

EP: 11.12 mm/s (7<sup>1</sup>/<sub>8</sub> ips)

### RF Output Signal:

Channel 3 or 4

### VIDEO

#### Signal-to-Noise Ratio:

45dB (Rohde & Schwarz noise meter)

#### Horizontal Resolution:

240 lines

### AUDIO

#### Signal-to-Noise Ratio:

More than 40dB

## PORTABLE VHS RECORDER/PLAYER

BR-6200U

### FEATURES

- Two-Channel Audio Track
- BNC Video Connectors
- Shuttle Search
- Full-Function Wireless Remote Control
- Automatic Backspace Editing
- Extended-Time Recording Capability

### BR-6200U PORTABLE VHS RECORDER

In sales, education, medicine and all types of business communication, the 1/2" VHS video format has earned extensive acceptance for its cost-effective, high-impact communications capability. JVC's portable BR-6200U possesses the technological features and the rugged, reliable construction to provide years of trouble-free service in the widest variety of professional and institutional applications.

**Easy Connection to Professional Equipment.** Professional-type BNC video input and output jacks are provided on the BR-6200U for direct connection to other professional video gear.

**Power Economy.** The low power-consuming design of the BR-6200U is enhanced by a unique REC LOCK power economy switch. This feature allows the operator to shut down power for indefinite periods and return to the record mode, with smooth edits.

**Full-Logic Operation.** Microprocessor control over all functions allows direct changeover between modes and feather-touch pushbutton operation.

**Two-Channel Audio Track and Dolby Noise Reduction.** This two-channel system enhances production flexibility, allowing the recording of "voice-over" narration, bilingual sound-tracks or full stereo sound. Dubbing can be performed independently

onto the left channel only, or simultaneously onto both.

**Extended-Time Recording and Playback.** In addition to normal-speed operation (two hours of recording or playback with a T-120 cassette), the BR-6200U functions in an extended play mode to give you extra recording time in those situations where your supply of tape is limited but the subject matter is not.

**Advanced Editing Functions.** During recording, backspace editing prerolls the tape between takes so that the end of the previous segment is neatly synchronized to the beginning of the next one, thereby eliminating distortion at the edit points in assembled recordings. The BR-6200U's improved editing capabilities permit program segments from different video and audio sources to be edited into a previously recorded tape with minimum distortion at the start and end of the new material.

**Shuttle Search.** This JVC-developed high-speed visual scanning system lets you view the tape at 7 or 21 times normal speed (depending on the playback mode) in either direction, for quick easy access to any desired portion of a video program.

**Flexible Power Supply System.** Rechargeable NiCad battery packs (NB-P1) are the basic power source for the BR-6200U; their compact yet high-capacity design makes it easy to carry extras for on-location applications. Power can also

be supplied from regular household AC outlets or a car battery, via appropriate adaptors.

#### Also Included:

Built-in RF converter for connection to the antenna terminal of any TV receiver; LCD (Liquid Crystal Display) 4-digit tape counter with memory function; LED tape running, insert editing and audio dubbing indicators; Battery depletion and moisture condensation warning indicators; Automatic quick review function

BR-1600U

## BR-1600U PORTABLE VHS RECORDER

### Four Heads For A Crisp, Sharp Picture.

Pictures are crisp and sharp at any speed because the JVC BR-1600U uses one pair of heads exclusively for the Standard Play mode, and another for the Extended Play mode. A choice of two tape speeds also means economy: use the tape-saving EP mode to file away less important documents and visual presentations, while saving the high-resolution SP mode for documents and presentations of top importance.

**It's Portable, Lightweight So It Can Be Used Almost Anywhere.** Whenever sales and deals are made, indoors or out, the BR-1600U is extremely compact (8<sup>1</sup>/<sub>16</sub>" x 3<sup>3</sup>/<sub>16</sub>" x 8<sup>7</sup>/<sub>8</sub>") and weighs only 5.3 lbs. Its remarkable small size and weight give it flexibility to be used almost anywhere. For full versatility, it connects to most video cameras without an adaptor.

### Operable On Three Power Sources.

Enhancing the mobility of the BR-1600U is its ability to operate on any of three power sources.

Outdoors, it can receive its power from an optional battery pack. Indoors, it operates from standard household AC through an optional AC pack. And in and around the car, it taps into the car's 12VDC power supply by means of an optional car battery adaptor. So wherever you go, just select the most accessible power source.

**Clean Scene Changes.** All recordings you make on the BR-1600U are clean and free of annoying "streaking." The backspace editing function assures clean transitions from scene to scene. The automatic recording lock provides an uninterrupted transition between two recording sessions even if the power has been turned off after the first.

**Easy Operation.** Using the BR-1600U is very simple. A memory counter lets you quickly review a specific segment of the tape. The counter panel serves as a tape counter and also as a dew indicator and a battery condition indicator. There's a built-in jack that accepts an optional earphone so you can monitor the audio on playback. Playback speed automatically matches the speed at which a tape was recorded, either SP or EP.

## ACCESSORIES

- AC-P3U** AC Adaptor for BR-1600U/TM-P3U/GX-S700U
- AP-P3U** Car Battery Cord for BR-1600U/GX-S700U

- Instant recording
- Shuttle search
- 3-pin AC power supply and outlet sockets

BR-3500U

## BR-3500U

### Videocassette Recorder

#### 4-Head, 8-Hour Recording/Playback.

With independent pairs of heads for the SP and EP modes, the BR-3500U has a total of four heads; this head system, plus a comb filter for greater accuracy in the separation of the luminance signal.

**HQ Circuitry.** JVC's HQ circuitry means higher quality pictures in both modes without sacrificing compatibility with other VHS recorders. This important feature means superior performance with any tape.

**Remote Control Unit.** The remote control provided with the BR-3500U can be used for power switching, its keypad can be used for direct channel selection, and it controls all tape operations.

**Microphone Mixing Facility.** With a microphone connector and level control, it lets you add your own commentary to any video presentation. In playback, you can switch between or mix sound recorded on the tape and sound from the mike; in recording, you can record the line input sound, the microphone sound or a mixture of the two so that, when the tape is played back, it has your customized sound track. By connecting an earphone, the mixed audio can be monitored while it is being recorded.

#### Full-Repeat and Counter-Repeat

**Playback.** For demonstration tapes and educational programs, the BR-3500U has added flexibility when it comes to which segments of the tape can be repeated. As well as repeat playback of the whole tape, it allows continuous, automatic loop viewing of any program segment from the start to the point where the counter was reset to zero or from this point to the end of tape.

#### 14-Day, 4-Program timer, with Interlocked Rear-Panel AC Outlet.

**111-Channel Frequency Synthesizer Tuner.** The BR-3500U can tune to all broadcast channels and, in addition, its frequency synthesizer tuner can receive all unscrambled CATV channels.

## SPECIFICATIONS

**Format:** VHS NTSC standard  
**Video Signal System:** NTSC-type color signal

**Tape Width:** 1/2" (12.65mm)

**Antenna:** 75 ohms, unbalanced

**Channel Coverage (VHF):** Channel 2—13

(UHF): Channel 14—83

(Cable): 29 channels

**RF Output Signal:** Channel 3 or 4

- TM-63U 5" Color Monitor
- Self-Contained Battery Power only on TBR-160U

TBR-160U

## TBR-160U VHS PRESENTATION SYSTEM

A complete VHS video system in a briefcase, the TBR-160U is ideal for sales presentations, training programs—any one-on-one video application. The TBR-160U consists of a super-small VHS recorder (BR-1600U) and a 5" color monitor (TM-63U), battery system and accessories—all wired and ready to go in an attractive briefcase.

**Compact 2-6 Hour VHS Recorder/Player.** The BR-1600U is the smallest and lightest 2-6 hour videocassette recorder JVC has ever offered. It uses standard VHS cassettes (available everywhere) and can playback tapes recorded in the 2, 4, or 6 hour modes. Its 4 video heads assure top picture quality. Connections are provided for not only the system's 5" monitor, but also for an ordinary TV receiver. A plug-in remote control is also included.

**5" Color Monitor.** As a complement to the compact video deck, JVC engineers developed a companion monitor that is not only compact in size, but has excellent picture quality. The TM-63U monitor contains a flat-surface 5" (diagonal) in-line picture tube for high resolution and vivid, true-to-life colors. Audio signals are reproduced clearly through a built-in 3<sup>1</sup>/<sub>8</sub>" speaker.

**Exclusive Power System.** One key to the convenience of JVC's briefcase system is the exclusive power pack which supplies power to both the VCR and to the monitor. Termed the BBTR-160U, this 2 ampere hour NiCad pack is designed to power both units for about 1 hour continuously, before recharging. A micro charger is supplied with the system. In addition, an optional AC adaptor (AA-P1663U) is also available.

**Attractive Briefcase.** All components are housed in an attractive briefcase. Also there's a compartment provided which is designed for papers, literature, etc. All necessary cables are provided, and the system is fully wired and ready to go.

## VCR ACCESSORIES

### RM-G68J EDITING CONTROL UNIT

- The RM-G68J is designed to form an electronic editing system with the BR-6200U portable VHS recorder as a source player and the BR-8600U VHS editing recorder as a recording deck
- BR-8600U of this system includes an electronic editing mechanism, making it possible to do insert or assemble editing
- By using the memory function of the BR-8600U, it is possible to specify both edit-in and edit-out points while insert editing

### RM-G80U REMOTE CONTROL

- Remote control unit for VCRs with 45-pin remote control connector
- Dial search for locating required edit points using speeds from still to the maximum speed available with each VCR
- Jog function for quick location of required scene
- CTL-signal-based counter displays hours, minutes, seconds and frames
- Preroll function for source feeding. (The preroll period depends on the setting of the VCR with which it is used)
- Applicable models KR-Z800U, CR-8500U/CR-600U, BR-8600U/BR-7700U

### RM-70U REMOTE CONTROL

- Full Remote Control of most Tape Operations
- Variable-Speed Tape Shuffling
- Pre-Roll Editing Possible (when combined with the CR-8250U)
- Dimensions: 5<sup>3</sup>/<sub>4</sub>" (W) x 2<sup>1</sup>/<sub>16</sub>" (H) x 9<sup>3</sup>/<sub>8</sub>" (D)
- Weight: 4 lbs. (1.8kg)
- Applicable models CP-5550U, CR-6650U, CR-8250U, BR-6400U, BP-5300U

### RM-P500U RANDOM ACCESS CONTROL

- Information Recorded on the Tape Into Up to 64 Segments As Required
- Applicable Models BR-6400U, BP-5300U.

### RM-P53U WIRED REMOTE CONTROL

- Dial Search Knob Varies Tape Speed to 10X Forward and Reverse
- All Tape Functions Provided
- 16' Cable Provided
- Applicable Models BR-6400U, BP-5300U

### RM-P54U WIRELESS REMOTE CONTROL

- Infrared Transmitter and Receiver
- All Tape Functions Provided
- Operating Distance Up to 22'
- Requires Four "AA" Batteries
- Applicable Models BR-6400U, BP-5300U

## FEATURES

- 5" in-line black stripe picture tube
- 12VAC/DC power supply or optional rechargeable NB-P1 battery pack
- 3" built-in speaker
- Two video and two audio inputs
- Front panel switching
- Power/Battery warning indicator
- Earphone jack
- Line input select switch
- VTR input select switch
- Tint, Color, Contrast and Brightness controls on front panel
- Power on-off/volume control
- Includes Hood, Power Cord, Earphone

## TM-22U 5" PORTABLE COLOR VIDEO MONITOR

The TM-22U is a portable monitor with a lot going for it. Its 5-inch in-line black stripe picture tube gives sharp images with accurate color reproduction. It can be used with power supplied from an AC wall outlet, an external 12VDC power supply or the optional rechargeable NB-P1 battery pack. For improved

flexibility, the battery pack can be recharged without removing it from the monitor.

A built-in speaker lets you monitor sound together with the picture. Two video and two audio inputs are provided with front panel switching; these signals can be terminated or fed to other equipment.

## COLOR MONITOR

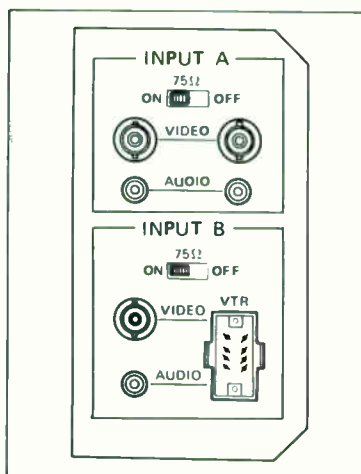

TM-2084UM

### FEATURES

- 350 Lines Resolution
- Comb Filter
- Two Video Inputs (loop through)
- 8-Pin EIAJ & BNC Connectors
- 4" Round Speaker (1 channel)

### TM-2084UM 19" COLOR VIDEO MONITOR

People are increasingly using 1/2" videocassette recorders for applications in which only a few years ago they would have used 3/4" U-format equipment; this is because of the ease of use of 1/2" recorders and the wide range of applications that they are suitable for, achieved with lower running cost and no loss in signal quality. However, the high-quality multi-function 1/2" equipment uses connectors with a different standard; this is why JVC has developed the TM-2084UM, a high-performance 19" video monitor with BNC as well as 8-pin EIAJ input terminals.

**A special comb filter.** Provided in the TM-2084UM to separate the chrominance and luminance components more fully for greater detail and better color than a conventional monitor.

**Two pairs of bridge-connected video input terminals.** One pair with BNC terminals and one pair consisting of a BNC terminal for output and an 8-pin EIAJ exclusively for input. Selection between the sources is done using front-panel pushbuttons with LED indicators showing which input is being used.

**Bridge-connection of video component.** Using both pairs of terminals is possible, with switchable 75 ohm terminal resistors built into the TM-2084UM; this is convenient, making it possible to connect to a multi-monitor system.

**Controls are provided.** For adjustment of picture sharpness, color density and tint as well as brightness, contrast and V-hold.

### SPECIFICATIONS

**Type:**  
Color Video Monitor

**Color System:**  
NTSC System

**Power Input:**  
120VAC, 60Hz

**Power Consumption:**  
Max. 108W; Avg. 82W

**CRT Dimensions:**  
19" diagonally measured

**Audio Output:**  
3W

**Speaker:**  
4" (10cm) round type x1

**Input A Terminal:**  
Video terminal (BNC-type) x2  
Signal level/1.0V p-p, 75 ohms  
Audio Terminal (RCA-type) x2  
Signal level/390mV rms (-6dBs), high impedance

**Input B Terminal:**  
VTR terminal (EIAJ 8-pin) x1  
Video signal level/1.0V p-p, 75 ohms  
Audio signal level/775mV rms (0dBs), high impedance

**Exterior Dimensions:**  
20<sup>5/8</sup>" (W) x 19<sup>1/8</sup>" (H) x 19<sup>1/4</sup>" (D)  
(52.2 x 48.3 x 48.8cm)  
Height including legs

**Weight:**  
53.1 lbs. (24.1kg)

## COLOR MONITOR

### FEATURES

- Two Selectable Video Inputs
- 310 Lines Resolution
- Internal/External Sync, Comb Filter
- Underscan, Pulse Cross
- Blue Check Switch
- Tally Lamp
- Remote Control of Front Panel Switches
- AC or 12/24VDC Power Supply
- .47mm Dot Pitch In-Line Picture Tube
- Carrying Handle
- Double Rackmount Option

TM-R9U

### TM-R9U 9" COLOR MONITOR

The TM-R9U is a multi-purpose monitor designed for a wide variety of applications and suitable for use in even the most demanding broadcast environments. Whether in a rackmount studio installation, or in a portable configuration, the TM-R9U offers the features that professionals demand in a high-performance, modestly priced monitor.

**Excellent Picture Quality.** A color demodulator and comb filter provide accurate color reproduction along with excellent definition. The TM-R9U boasts a high resolution of more than 310 lines. Variations in black level are suppressed by a pedestal clamp system.

**Dual Video Inputs, Sync Input.** Separate loop through video inputs/outputs are provided for two separate video sources. These may be switched either from the front panel, or from an external remote control switch (customer provided) connected to the remote terminal on the rear panel.

A loop through input is also provided for Ext. Sync. Termination (75 ohm) are provided for all loop through inputs.

### Pulse Cross, Under Scan, Blue Check.

The pulse cross switch shifts sync phase so that the blanking portions of the video signal (horizontal and vertical) can be viewed on the screen.

For more accurate monitoring, the scan size can be switched to the underscan mode—either from the front panel, or by remote control. In addition, a blue check circuit facilitates adjustment with a color bar signal.

**Metal Cabinet, Compact Size, Rackmount.** The TM-R9U is the most compact 9" studio-type monitor offered to date. It is housed in a rugged, metal cabinet which can be mounted in a standard 19" rack, using the optional RK9U rackmount kit. With this kit, two TM-R9Us can be mounted side by side, or one TM-R9U can be mounted next to a waveform monitor (by adding the ADP9U adaptor).

### SPECIFICATIONS

#### Input Signal:

Video x2: VS 1.0V p-p or V 0.7V p-p (positive). Audio x2: S 1-4V p-p or VS 1.0V p-p

#### Input Impedance:

Video signal: 75 ohm or high impedance (switchable)  
External sync: 75 ohm or high impedance (switchable)

#### CRT:

9" stripe flat-face sharp-corner medium-high resolution tube

#### Active Screen Size:

Horizontal 6<sup>13</sup>/<sub>16</sub>" (173)  
Vertical 5<sup>3</sup>/<sub>8</sub>" (136)

#### Power Supply:

120VAC, 60Hz; 33W (typical) 12VDC/24V; 26W (typical)

#### Dimensions:

8<sup>13</sup>/<sub>16</sub>" (W) x 8<sup>3</sup>/<sub>4</sub>" (H) x 13<sup>5</sup>/<sub>16</sub>" (D)  
(223 x 222 x 348mm) (except rubber stand, connectors and power plug)

#### Weight:

23.8 lbs. (10.8kg)

#### Resolution:

More than 310 lines at center

#### Frequency Response:

Up to 5MHz more than -3dB with 100kHz as reference (including aperture correction)

#### Signal-to-Noise Ratio:

Better than 50dB (except sync noise)

## COLOR MONITOR

### FEATURES

- 14" Flat Face, In-Line Sharp Corner Picture Tube
- 2 Composite Video Inputs (BNC Loop Through)
- Separate RGB Analog Inputs (BNC Loop Through)
- Under Scan
- Notch Filter with On/Off Switch
- Internal/External Sync
- Color/B & W Switch
- 400 Line Horizontal Resolution
- Remote Control Function
- Tally Light on Front Panel
- Degaussing Switch on Front Panel
- Comb Filter
- Metal Cabinet (Rackmount Option)

TM-R14U

### TM-R14U 14" COLOR VIDEO MONITOR

The TM-R14U is a compact, high quality multi-function color video monitor designed for a wide variety of broadcast and professional applications. Its two composite video inputs and RGB analog inputs allow it to be connected to almost any video installation.

**Excellent Picture Quality.** The TM-R14U utilizes a flat face, in-line sharp corner CRT with a dot pitch of 0.43mm for exceptional resolution. Picture sharpness is further assured through the use of a high quality comb filter which separates luminance and chrominance components. A notch filter (switchable) effectively eliminates chrominance interference, thus further improving picture quality. Horizontal resolution is greater than 400 TV lines.

**RGB And Composite Video Inputs.** Two pairs of loop through composite video inputs are provided, each with 75 ohm termination switches. In addition, non-composite analog inputs are provided for the individual red, green, and blue channels using BNC connectors. Signals from many graphics units and three-tube color cameras may be connected to the RGB inputs. When viewing composite video signals, the color circuits can be de-selected with the Color/B & W switch.

**Internal/External Sync.** A BNC connector is provided for an external sync signal. (External sync must be used in the RGB mode.) Switching between internal and external sync can be done either from the front panel, or remote control (not included).

**Underscan, Blue Check.** For more accurate monitoring, the scan size can be switched to the underscan mode—either from the front panel, or by remote control. (Remote control not included.) In addition, a blue check circuit allows viewing of only the blue portion of the composite signal. This is useful when adjusting the monitor with a color bar signal.

**Remote Control Function.** A multi-pin (XLR-type) connector is provided on rear panel for connecting an external remote control unit. Many front panel switches (input select, int/ext sync, notch, color on/off, blue check, scan size) can be remotely controlled by contact closures through this connector. (Remote control unit is not included.)

**Metal Cabinet, Rackmount Option.** The TM-R14U is housed in a very compact, rugged, metal cabinet which can be mounted in a standard 19" rack, using an optional rack mount kit. AC power connections are made using a detachable grounded power cord.

### SPECIFICATIONS

**Type:**

Color video monitor

**Color System:**

NTSC system

**Power Requirement:**

120VAC, 60Hz

**Power Consumption:**

60W

**Horizontal Resolution:**

More than 400 lines

**Video Input Terminal:**

2 inputs (BNC type) VS 1V p-p, 75 ohms negative sync or V 0.7V p-p, 75 ohms positive. Bridged connection possible. Termination switch provided.

**External Sync Signal Input Terminal:**

1 input (BNC type) S1-4V p-p, 75 ohms negative or VS 1V p-p, 75 ohms negative sync. Bridged connection possible. Termination switch provided.

**RGB Input Terminal:**

1 input each (BNC type) analog, V0.7V p-p, 75 ohms positive. Bridged connection possible. Termination switch provided.

**Remote/Tally Terminal:**

7-pin cannon connector

**External Dimensions:**

14<sup>3</sup>/<sub>16</sub>" (W) x 12<sup>3</sup>/<sub>4</sub>" (H) x 16<sup>1</sup>/<sub>8</sub>" (D)  
(36.0 x 32.4 x 41.0cm)

**Weight:**

40.5 lbs. (18.4kg)

# JVC PROFESSIONAL PRODUCTS COMPANY

41 Slater Dr.  
Elmwood Park, NJ 07407  
(201) 794-3900  
FAX: (201) 523-3601

In terms of sound and picture quality, the initial series of VHS videocassette recorders was fully adequate for general-purpose household entertainment. However, a market was also recognized among those who owned or planned to purchase high quality stereo audio systems.

The VHS Hi-Fi system was therefore developed for enhanced audio performance along with outstanding picture quality. Special rotating audio heads increase the relative tape to head speed to 5.8 meters per second, thereby providing true high fidelity frequency response in the audio range of from 20Hz to 20,000Hz, as well as dynamic range exceeding 90dB.

The audio signal is frequency modulated at 1.3MHz for the left channel and 1.7MHz for the right channel. Maximum deviation is + 150kHz.

Recording is performed by a "depth multiplex" (D-MPX) system, whereby both sound and picture are recorded on the same portion of the tape. The audio signal is recorded at a deeper level than the video, while the azimuth angles of the audio and video heads differ sufficiently to prevent cross-interference.

## HQ (HIGH QUALITY)

Advances in circuit technology and television receivers provided impetus to further improve the picture quality of VHS equipment. This led to the HQ series, which incorporates the following technical features.

- Increased white clip level
- Detail enhancer
- Luminance noise reduction (YNR)
- Chrominance noise reduction (CNR)

Increasing the white clip level improves the picture edge sharpness. The detail enhancer functions by increasing the level of the high-frequency-low-amplitude component of the signal, which is often lost during the recording/playback process. More detailed pictures are then obtained during playback.

YNR reduces noise at the picture edges and flat portions, while CNR contributes to reducing color smear.

HQ technology offers overall picture improvement and increases the recording and playback qualities of home video recorders.

V-662

## S-VHS OBJECTIVES

The trend in color television receivers is continuing toward larger screens and higher picture quality. Nearly all of the new-generation TV sets are connected to home videocassette recorders.

Demand is thus increasing for ever more detailed and realistic video reproduction. The S-VHS system was developed to meet this goal and provide picture quality that approaches a 1-inch professional video tape recorder at a cost accessible to the consumer.

## S-VHS FEATURES

- Horizontal resolution exceeds 400 lines. This is fully adequate to accommodate presently broadcast programs (about 330 lines) without degradation in picture quality.
- Vivid realistic reproduction gives video program artists more freedom for expression and promotes higher quality software.
- Color video cameras and VideoMovie systems compatible with S-VHS are becoming available. Self-made video programs will be able to rival broadcast television quality.
- The high picture quality and economical cost of S-VHS enable a broad range of commercial uses, such as video publishing, travel guides, sales manuals, etc.

S-VHS cassettes can be used in the SP and EP modes in the same manner as normal VHS cassettes.

### SP mode

#### Tape speed

3.3 cm/second

#### Recording time

360 minutes

(T-120 or equivalent tape)

### EP mode

#### Tape speed

1.1 cm/second

#### Recording time

360 minutes

(T-120 or equivalent tape)

## 5. VIDEO SIGNAL RECORDING

Video inputs and outputs: NTSC or separate Y and C signals based on the NTSC system

In addition to conventional NTSC signal video inputs and outputs, the provision for separated luminance (Y) and chrominance (C) signals eliminates cross-interference and improves overall picture quality.

# S-VHS FORMAT

Luminance signal recording frequency modulation recording.

## FM carrier frequencies

**100% White:** 7.0MHz

**Sync tip:** 5.4MHz

**Frequency deviation:** 1.6MHz

## Clip levels

**White clip:** 210%

**Dark clip:** 70%

## Emphasis

Main emphasis

Sub-emphasis

VHS emphasis

Non-linear emphasis

## Frequency allocation

a. S-VHS recording signals at video heads

b. VHS recording signals at video heads

**Color Carrier:** Down-converted direct recording

FM recording is used for the S-VHS luminance signal, as in the normal VHS format. However, the frequency band has been shifted from 3.3 to 4.4MHz for the normal VHS format to 5.4 to 7.0MHz in the case of S-VHS. This provides 1.6MHz deviation (compared to 1.0MHz for normal VHS) and allows increased horizontal resolution, which exceeds 400 lines.

## 6. AUDIO SIGNAL RECORDING

Linear track recording: Based on the VHS format

FM recording system: Based on the VHS format

Sound is recorded on the linear track by using the AC bias system employed with normal VHS. The Hi-Fi audio is also recorded by the FM deep layer system used by VHS Hi-Fi models.

Comes with 15' cable to switcher.</p>	1,700.00	<p><b>P9009S</b> PALTEX INTERFACE FOR BOSCH BCN50/51 EDIT-STAR, EXCEL, ELITE, PALTEX, BOSCH Interface for Paltext serial controllers to parallel VTR. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00	<p><b>P9019</b> PARALLEL INTERFACE (JVC BR-8600U) EDITSTAR, EXCEL, ELITE, PALTEX, BR8600U Interface for Paltext serial controllers to parallel VTR. THIS PRICE APPLIES ONLY WHEN ORDERING CONTROLLER. Use one for each VTR.</p>	800.00
<p><b>P9001</b> PALTEX PARALLEL INTERFACE (SONY BVH1100) EDIT-STAR, EXCEL, ELITE, PALTEX Interface for Paltext serial controllers to parallel VTR. THIS PRICE APPLIES ONLY WHEN ORDERING CONTROLLER. Use one for each VTR.</p>	800.00	<p><b>P9010S</b> PALTEX INTERFACE FOR BOSCH BCN52 EDIT-STAR, EXCEL, ELITE, PALTEX, BOSCH Interface for Paltext serial controllers to Bosch BCN52. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>P9019S</b> PALTEX PARALLEL INTERFACE FOR BR-8600U EDITSTAR, EXCEL, ELITE, PALTEX, BR8600U Interface for Paltext serial controllers to JVC BR-8600U. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00
<p><b>P9001S</b> PALTEX PARALLEL INTERFACE (SONY BVH1100) EDIT-STAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to parallel VTR. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00	<p><b>P9011S</b> PALTEX INTERFACE FOR CR-850U EDITSTAR, EXCEL, ELITE, PALTEX, CR850U Interface for Paltext serial controllers to JVC CR-850U. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	\$1,700.00	<p><b>P9020S</b> PALTEX SERIAL INTERVACE FOR JVC M-II EDITSTAR, EXCEL, ELITE, PALTEX, M-II Interface for Paltext serial controllers to JVC M-II(serial) THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00
<p><b>P9002S</b> PALTEX INTERFACE FOR SONY BVH2000 EDIT-STAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to Sony VTR. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>P9012</b> PARALLEL INTERFACE (JVC CR-8250U) EDITSTAR, EXCEL, ELITE, PALTEX, CR8250U Interface for Paltext serial controllers to parallel VTR. THIS PRICE APPLIES ONLY WHEN ORDERING CONTROLLER. Use one for each VTR.</p>	800.00	<p><b>P9021</b> PARALLEL INTERFACE (JVC M-II) EDIT-STAR, EXCEL, ELITE, PALTEX, M-II Interface for Paltext serial controllers to parallel VTR. THIS PRICE APPLIES ONLY WHEN ORDERING CONTROLLER. Use one for each VTR.</p>	800.00
<p><b>P9003</b> PALTEX PARALLEL INTERFACE--AMPEX VPR2/2B EDIT-STAR, EXCEL, ELITE, PALTEX, AMPEX Interface for Paltext serial controllers to parallel VTR. THIS PRICE APPLIES ONLY WHEN ORDERING CONTROLLER. Use one for each VTR.</p>	\$ 800.00	<p><b>P9012S</b> PALTEX PARALLEL INTERFACE FOR CR-8250U EDITSTAR, EXCEL, ELITE, PALTEX, CR8250U Interface for Paltext serial controllers to JVC CR-8250U. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00	<p><b>P9021S</b> PALTEX PARALLEL INTERFACE FOR JVC M-II EDITSTAR, EXCEL, ELITE, PALTEX, M-II Interface for Paltext serial controllers to JVC M-II VTRs. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00
<p><b>P9003S</b> PALTEX PARALLEL INTERFACE--AMPEX VPR2/2B EDIT-STAR, EXCEL, ELITE, PALTEX, AMPEX Interface for Paltext serial controllers to parallel VTR. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00	<p><b>P9013</b> PARALLEL INTERFACE (SONY VO-5850) EDIT-STAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to parallel VTR. THIS PRICE APPLIES ONLY WHEN ORDERING CONTROLLER. Use one for each VTR.</p>	800.00	<p><b>P9022</b> PARALLEL INTERFACE (AMPEX VPR80) EDIT-STAR, EXCEL, ELITE, PALTEX, AMPEX Interface for Paltext serial controllers to parallel VTR. THIS PRICE APPLIES ONLY WHEN ORDERING CONTROLLER. Use one for each VTR.</p>	800.00
<p><b>P9004S</b> PALTEX INTERFACE FOR AMPEX VPR3 EDIT-STAR, EXCEL, ELITE, PALTEX, AMPEX Interface for Paltext serial controllers to AMPEX VTR. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>P9013S</b> PALTEX PARALLEL INTERFACE (SONY VO5850) EDITSTAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to SONY VO-5850. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00	<p><b>P9022S</b> PALTEX PARALLEL INTERFACE (AMPEX VPR80) EDITSTAR, EXCEL, ELITE, PALTEX, VPR80 Interface for Paltext serial controllers to AMPEX VPR80. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	2,700.00
<p><b>P9005S</b> PALTEX INTERFACE FOR AMPEX VPR6 EDIT-STAR, EXCEL, ELITE, PALTEX, AMPEX Interface for Paltext serial controllers to AMPEX VPR6. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>P9014S</b> PALTEX INTERFACE FOR SONY BVU800/820 EDITSTAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to SONY BVU800/820. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>RM-51U</b> 18' REMOTE CONTROL (CP5000, CP5200) CP5000, CP5200 CONTROLS PLAY, STOP, REWIND, AND FAST FORWARD FROM A DISTANCE OF 18 FEET.</p>	130.00
<p><b>P9006S</b> PALTEX INTERFACE FOR AMPEX VPR80 EDIT-STAR, EXCEL, ELITE, PALTEX, AMPEX Interface for Paltext serial controllers to AMPEX VPR80. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>P9015S</b> PALTEX INTERFACE FOR SONY BVU850/870 EDITSTAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to SONY BVU850/870. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>RM-60U</b> REMOTE CONTROL (CR6060U) CR6060U PROVIDES CONTROL OF PLAY, STOP, REW, FF, REC, AUDIO DUB, PAUSE/STILL, &amp; FRAME ADV AT A DISTANCE OF 16 FEET.</p>	\$ 200.00
<p><b>P9008S</b> PALTEX INTERFACE FOR HR230 EDIT-STAR, EXCEL, ELITE, PALTEX, HR230 Interface for Paltext serial controllers to HR230. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>P9016S</b> PALTEX INTERFACE FOR PANASONIC AU650 EDITSTAR, EXCEL, ELITE, PALTEX, PANA Interface for Paltext serial controllers to PANASONIC AU650. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>RM-70U</b> REMOTE CONTROL (CP5550, CR6650, CR8250) CR8250, CR6650, CP5550 PROVIDES FULL REMOTE CONTROL, PLUS VARIABLE SPEED SEARCH (0-15X) TO THE DECKS. ALSO HAS A "PREROLL" BUTTON FOR SIMPLE EDITING W/8250.</p>	440.00
<p><b>P9017S</b> PALTEX INTERFACE FOR SONY BVW10/20 EDITSTAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to SONY BVW10/20. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>P9017S</b> PALTEX INTERFACE FOR SONY BVW10/20 EDITSTAR, EXCEL, ELITE, PALTEX, SONY Interface for Paltext serial controllers to SONY BVW10/20. THIS PRICE IS FOR ADDING TO EXISTING CONTROLLER. Use one for each VTR.</p>	1,700.00	<p><b>RM-86U</b> VIDEO EDITING CONTROLLER Microprocessor control; Preview/Perfrm/review; LED indication of tape/lap time, volume contrl auto log, duration computation, cables incl.</p>	1,620.00

<b>RM-D2</b> REMOTE CONTROL UNIT FOR TELECONF. LENSES BY110U, KY210U, KY210BU, KYM280U Controls focus/zoom/iris functions up to 500' from camera head. Has rocker arm for zoom and knob for servo focus. Use ECM-xxx cables.	675.00	<b>SA-F900U</b> SERIAL/PARALLEL INTERFACE UNIT RMGB50U, BR8600U This unit adapts serial controllers (like the RM-G850U) to accept JVC 45-pin parallel VCRs such as the BR-8600U, & 3/4" TapeHandlers	1,345.00	<b>TG-P49U</b> TIME CODE GENERATOR FOR CR4900 CR4700U, CR4900U EQUIPPED WITH SPECIAL PLUG FOR CR4900. GEN- ERATES A TIME CODE, WHICH IS RECORDED ON THE TAPE. REPLACEMENT FOR TG-P47U	1,995.00
<b>RM-G6BJ</b> EDITING CONTROLLER FOR BR-6200U/BR-8600U BR-6200U, BR-8600U A simple but effective way of starting a VHS editing system. Uses the BR-6200U portable as a source with the BR-8600U.	350.00	<b>SA-W700U</b> AUDIO/VIDEO ROUTING SWITCHER FOR RMG850U RMG850U This switcher connects to the RM-G850 and sends the audio/video/dub signals from either of 2 source VCRs to the record VCR.	1,830.00	<b>TM-13U</b> 13" COLOR MONITOR Built-in audio circuitry w/speaker Loop-thru BNC video input (1) Excellent Picture Quality. Basic monitor.	360.00
<b>RM-G850U</b> VIDEO EDITING CONTROLLER Serial (RS-422) interface. Works w/CR-850U & 8VU-800. Two source decks, external trigger, dial search w/jog, machine status.	3,320.00	<b>SS-M208U</b> PROFESSIONAL PORTABLE AUDIO MIXER Portable AC powered mixer with slide level controls, fluor. meters, 8 inputs, 2 grp outs pan pots, XLR mic, 1 echo input	860.00	<b>TM-2084U</b> 19" COLOR MONITOR 350 LINE RESOLUTION, COMB FILTER. SAME CHASSIS AS C-2082UM BUT W/O TUNER. ONE AUDIO CHANNEL. BNC & 8-PIN INPUTS.	680.00
<b>RM-P280U</b> LENS CONTROL UNIT FOR KY-M280U HZM110U, HZM310U, HZ110MDPU, KYM280U This is a control sub-panel for KYM280U's CCU which permits remote focus and zoom of HZ-M110U, HZ-M310U, HZ-110MDPU.	100.00	<b>T-120EM</b> EDITING MASTER VHS TAPE--120 MINUTES This tape is extremely high quality, designed for editing. Much better than standard and HG/SHG. Comes in a shielded Magne Proof case.	\$ 13.00	<b>TM-22U</b> 5" PORTABLE COLOR MONITOR AC/BAT POWER, built-in charger, 2 video loop- thru inputs/outputs, 8-pin jack, audio amp, handle, front panel controls	510.00
<b>RM-P47U</b> REMOTE CONTROL FOR CR4900U CR4700U, CR4900U FULL MICROPROCESSOR CONTROL OF ALL TAPE FUNCTIONS. EQUIPPED WITH LCD DIGITAL TAPE COUNTER SHOWING MINUTES AND SECONDS.	299.00	<b>T-30EM</b> EDITING MASTER VHS TAPE--30 MINUTES This tape is extremely high quality, designed for editing. Much better than standard and HG/SHG. Comes in a shielded Magne Proof case.	40.00	<b>TM-63U</b> 5" PORTABLE COLOR MONITOR one set loop thru video & audio inputs (RCA) super compact 5" ideal for sales presentation AC adaptor optional. Charger optional.	465.00
<b>RM-P500U</b> RANDOM ACCESS CONTROL FOR BR6400/BP5300 BR6400U, BP5300U ACTUALLY A SMALL COMPUTER. STORES TAPE LOCA- TIONS IN MEMORY THEN TELLS THE DECKS TO GO FIND THEM (UP TO 16 SEGMENTS).	230.00	<b>T-60EM</b> EDITING MASTER VHS TAPE--60 MINUTES This tape is extremely high quality, designed for editing. Much better than standard and HG/SHG. Comes in a shielded Magne Proof case.	11.00	<b>TM-9U</b> 9" COLOR VIDEO MONITOR Metal cabinet, flat face sharp corner tube, Audio w/speaker, front panel controls, BNC loop-thru, 3 prong AC cord	470.00
<b>RM-P53U</b> WIRED REMOTE CONTROL FOR BR6400/BP5300 BR6400U, BP5300U PLUGS INTO FRONT PANEL OF DECKS. HAS A DIAL WHICH PROVIDES VARIABLE SPEED SEARCH IN ADDI- TION TO FULL REMOTE CONTROL CAPABILITY.	\$ 115.00	<b>TBR-160U</b> 5" PORTABLE BRIEFCASE SYSTEM Briefcase system includes: BR-1600U VHS port. TM-63U color 5" Monitor, 2.0 Ah battery and charger, connecting cables, and briefcase.	1,620.00	<b>TM-R14U</b> 14" COLOR STUDIO MONITOR Composite/RGB (analog), underscan, notch fltr in/exit sync, remote control function, tally, comb filter, metal cabinet, rack mount option	995.00
<b>RM-P54U</b> WIRELESS REMOTE CONTROL (BR6400/BP5300) BR6400U, BP5300U INFRA-RED RECEIVER PLUGS INTO FRONT PANEL OF DECK. PROVIDES REMOTE CONTROL OF ALL FUNCTIONS INCLUDING SEARCH.	130.00	<b>TBR-160AC</b> 5" PORTABLE BRIEFCASE SYSTEM--AC POWERED Briefcase system includes: BR-1600U VHS port. TM-63U color 5" Monitor, AC power pack, connecting cables, and briefcase	1,425.00	<b>TM-R9U</b> 9" PROFESSIONAL COLOR MONITOR Comb Filter, underscan, pulse cross, blue chk in/exit sync, remote option, tally lamp, dual rackmount option, AC/DC power supply	695.00
<b>RS-110U</b> CAMERA REMOTE CONTROL UNIT FOR BY-110U BY110U This 19" rack mountable unit provides power to the camera and enables many remote control functions, as well as providing RGB outputs.	780.00	<b>TCR-U</b> TIME CODE READER FOR ABNER CONTROLLERS ABNER CONTROLLERS Time code reader board for ABNER A/B editing controllers. Reads time code from three VCRs simultaneously. Requires the ABNER controller	1,400.00	<b>UC-1003U</b> RACK MOUNT ADAPTOR FOR TWO RS-500U'S KY-310U, KY-900U, KY-950U, RS-500U USE THIS ADAPTOR FOR MOUNTING ONE OR TWO RS-500U'S IN A STANDARD 19" EIA RACK. BLANK PANEL IS PROVIDED.	\$ 145.00
<b>RS-500U</b> REMOTE CONTROL UNIT--KY210/320/900/950U KY210U, KY310U, KY900U, KY950U, KY320U PROVIDES POWER AND COMPLETE REMOTE CONTROL OF CAMERA FUNCTIONS UP TO 1,050 FEET AWAY. FOR STUDIO OR REMOTE VAN. REQUIRES VC-544 CABLE.	2,260.00	<b>TD-V66JBK</b> DISCRETE 3-HEAD AUDIO CASSETTE DECK SA head, two motor, Dolby B/C, index scan 3-head design for off-tape monitoring, digital peak displays.	595.00	<b>UC-P1004U</b> RACK MOUNT ADAPTOR FOR RS-L501U RSL501U Permits mounting of up to four RS-L501U local remote control units in a standard EIA rack. Uses 4 rack spaces.	140.00
<b>RS-L501</b> REMOTE OPERATION PANEL FOR RS-500U RS500U, KY210, KY320, KY900, KY950 This panel permits easy operation when the RS500 is centralized in rack installation. Use one RSL501 for each RS500U.	840.00	<b>TD-V66SET</b> 3-HEAD AUDIO CASSETTE DECK W/RACKMOUNT SA head, two motor, Dolby B/C, index scan 3-head design for off-tape monitoring, digital peak displays.	710.00	<b>VC-202U</b> 8 PIN TO 8 PIN MONITOR CABLE CRB50U, CR8250U, CR6060U, BR8600U 9.75 FEET LONG. PROVIDES AUDIO AND VIDEO CONNECTIONS BETWEEN VCR AND MONITOR/RECEIVER.	65.00
<b>S16X7CMD-D9</b> 16:1 TELECONFERENCING LENS FOR BY-110U BY110U This is a 16:1 Fujinon lens designed for remote operation with the RMD-2 control unit. Control is provided for focus, zoom, & iris.	2,010.00	<b>TE-1000U</b> TELECINE ATTACHMENT FOR 3-TUBE CAMERAS BY110U, KY210U Attaches to existing camera lens and enables use of 8mm, 16mm, & 35mm projectors. Light level is controlled by the lens iris.	585.00	<b>VC-235-10U</b> 33" CAMERA EXTENSION CABLE (10P-10P) GXS700U, GZS5U This cable attaches to the existing 10p VCR cable to lengthen the distance from the camera to the recorder.	45.00
		<b>TE-3000U</b> MULTIPIXEL TELECINE ADAPTOR FOR BY110U BY110U Attaches to camera in place of lens. Accepts 3 projectors (8mm, 16mm, 35mm) simultaneously. Auto/manual iris control provided.	\$ 2,310.00	<b>VC-426-35Y</b> 10-PIN TO 14-PIN ADAPTOR GXS700U, CR4900U This adaptor is used to convert a 10-pin camera cable (GX-S700U) to a 14-pin VCR like the CR-4900U or VO-4800 (Sony).	180.00

## Battery/Battery Belt Accessories for

### KY/BY Series Camera and VCRs

<b>B20</b>	Anton-Bauer 12V, premium grade NiCad 4AH battery. Universal snap-on design . . . . .	<b>\$485.00</b>
<b>B95</b>	Anton-Bauer 14V. Premium grade NiCad 4AH for battery for ProCam/KY series cameras. Universal snap-on design . . . . .	<b>500.00</b>
<b>CA-30 Cable</b>	Fast charge cable connects 30/13 or power strap to FC20 charger . . . . .	<b>56.00</b>
<b>CC-88 Cable</b>	4-pin XLR female video cable . . . . .	<b>80.00</b>
<b>DBH Holder</b>	Dual battery holder-allows use of 2 B95 or any 13.2 or 14.4V battery and provides 8AH of power. When the first battery is depleted, the second battery is automatically switched on. Meanwhile, the first B95 may be replaced for interrupted power. CC-88 or comparable cable is required . . . . .	<b>\$265.00</b>
<b>Power Strap</b>	12V, 4AH mounts onto CR4900U shoulder strap. Complete with microcharger. Can be fast charged with CA-30 cable and FC20 charger. CC-88 cable or comparable is required . . . . .	<b>\$495.00</b>
<b>PPSA-D Belt</b>	Perpetual power belt-allows use of 2 B95 or any two 13.2 or 14.4V snap-on batteries. When the first battery is depleted, the belt automatically draws from the second. Meanwhile, the first B95 may be replaced for uninterrupted power. CC-88 cable or comparable is required . . . . .	<b>\$335.00</b>
<b>30/13 Battery Belt</b>	30V, 4AH or 13.2V 8AH. Built-in microcharger. May be fast charged with CA-30 cable and FC20 charger. Must use CC-88 cable for KY cameras and CR-4900 Decks . . . . .	<b>\$895.00</b>

## Chargers for Battery and Battery Belt

<b>C20</b>	Microcharger for B20 battery. Trickle charges B20 in 14-16 hours. Good for travel. FC20 is recommended as primary charger . . . . .	<b>\$ 85.00</b>
<b>C95</b>	Microcharger for B95 battery. Trickle charges in 14-16 hours. Good for travel. FC20 is recommended as primary charger . . . . .	<b>.85.00</b>
<b>FC20 (LSFC)</b>	Anton-Bauer fast charger for B20/B95 or any Anton-Bauer 4AH snap on battery. Charges in one hour . . . . .	<b>565.00</b>
<b>LSQC</b>	8 hour single position 4AH quick charger . . . . .	<b>365.00</b>
<b>LSQ4</b>	8 hour 4 position 4AH battery quick charger . . . . .	<b>995.00</b>
<b>MFC</b>	Mobile fast charger-1hr. fast charger. Operates from most vehicles with or without engine running. Accepts all universal snap-on NiCad batteries . . . . .	<b>\$565.00</b>
<b>WRMC</b>	World-Wide 16 hr. microcharger can be plugged into any power source worldwide . . . . .	<b>\$265.00</b>

## Misc. Accessories for KY/BY Series Cameras

<b>ADM</b>	Coupled with Data-Tap, provides a diagnostic system that automatically discharges 12-14V NiCad batteries, while providing an accurate calibration of AH capacity . . . . .	<b>\$295.00</b>
<b>DATA-TAP</b>	Accurately measures and displays NiCad battery remaining run-time. Calibrates battery capacity while on camera or, if used with ADM, can test for shorted or low capacity cells . . . . .	<b>\$345.00</b>
<b>Q11</b>	B20 battery bracket for BY-110UP (K-AD 50U must be used) . . . . .	<b>45.00</b>

## Misc. Accessories for KY/BY Series Cameras (cont'd)

<b>Q19</b>	B95/B20 battery bracket for KY-1900 . . . . .	<b>\$75.00</b>
<b>Q21</b>	B95/B20 battery bracket for KY-210. . . . .	<b>75.00</b>
<b>Q27</b>	B20 battery bracket for KY-2000/KY-2700 . . . . .	<b>.90.00</b>

## RGB Adaptors for JVC Cameras

<b>BY-RGB</b>	RGB adaptor for BY-110U camera includes AC adaptor. RS100U no longer required . . . . .	<b>\$400.00</b>
<b>KY-RGB</b>	Snap-on unit for RGB from KY-210B/KY-320B/KY-950B Series cameras without requiring the RS-500U CCU. Not for use with the KY-20U . . . . .	<b>870.00</b>

## ENG Lighting System and Accessories for KY-Series/BY-Series Cameras

<b>ULS</b>	Anton-Bauer portable light system which can be used in fill, spot or flood light situations. Powered by B20/B95 battery . . . . .	<b>\$ 195.00</b>
<b>BRSHOE</b>	Bracket for mounting KYUL-1 and ULD onto KY/BY cameras . . . . .	<b>45.00</b>
<b>ULDC</b>	Dichroic filter converts bulbs to match 6000°K (daylight) . . . . .	<b>98.00</b>
<b>ULHM</b>	Head module for quick changes and storage of bulbs . . . . .	<b>75.00</b>
<b>ULPA</b>	Power adaptor allowing B20/B95 battery to power KYUL-1 or ULD and camera together . . . . .	<b>130.00</b>
<b>ULWA</b>	Wide angle adaptor to convert spot and medium flood bulbs into full flood patterns . . . . .	<b>65.00</b>
<b>ULD</b>	Ultra light dual-portable light system includes 2 BAB 25W flood bulbs. Dual base with two head modules, two switches and single power input . . . . .	<b>350.00</b>
<b>ULTRA KIT</b>	Complete 12V lighting kit includes 12V U12VCO 4AH NiCad battery and power cable. Microcharger 12V BAB 25W flood bulb. Custom shipping case . . . . .	<b>single 595.00</b> <b>dual 750.00</b>

## Serial Remote Controls for BR7000UR

<b>SRC-100</b>	Serial remote control for up to 100 BR-7000URs.-2 outputs (50/output). Controls eject, stop, play, rec start, rec pause, rewind, FF, Hi-Fi on/off . . . . .	<b>\$895.00</b>
<b>SRC-400</b>	Serial remote control for up to 400 BR-7000URs.-8 outputs (50/output). Controls eject, stop, play, rec start, rec pause, rewind, FF, Hi-Fi on/off . . . . .	<b>\$1250.00</b>

## Accessory for BR-6200U Portable VHS VCR

<b>CAR6200U</b>	Card cord for BR-6200U . . . . .	<b>\$45.00</b>
-----------------	----------------------------------	----------------

## Angenieux Lens and Accessories for PROCAM/KY-210U/KY-20U Cameras

<b>14 x 9 Ang</b>	Broadcast quality 14X lens with 2X extender, focal length 9-126mm. Aperture f/1.6 . . . . .	<b>\$5670.00</b>
<b>Studio Ang</b>	Rear controls for studio application-servo zoom, manual focus . . . . .	<b>1215.00</b>
<b>Retro Ang</b>	.8X retro zoom for wider angle (63°) closer focusing distance (0.50M-18.5") without aperture reduction . . . . .	<b>2135.00</b>
<b>Tele Ang</b>	1.66X tele attachment for longer focal length and no aperture loss with 2X extender on. F30-420mm f/3.2-f/4 . . . . .	<b>2135.00</b>

## Schneider Lens and Accessories for PROCAM/KY-210U/KY-20U

### Cameras

- TV-44, 16** Broadcast quality 14X lens with 2X extender focal length 9-126mm. Aperture f/1.7 . . . . . \$4990.00
- Pistol Sch** Servo zoom pistol grip . . . . . 785.00
- Studio Sch-E** Rear controls for studio application. Servo zoom, manual focus. Includes pistol grip. . . . . 1600.00
- Studio Sch-G** Rear controls for studio application. Servo zoom and positional servo focus. Includes pistol grip. . . . . 2825.00
- Super Wide Lens** 52°-70° horizontal angle of view . . . . . 595.00

## Duplication Remotes for BR-3500U/BR-3100U/BR-6400U/ BR-7700U/CR-600U/CR-850/Tape Handlers

- DubMaster** Full function remote control of master playback deck and as many VCRs as desired. (With optional rack boxes and control cable). . . . . \$1195.00
- RB-6 P** Allows Dubmaster control of 6 BR-6400U or BR-7700U or CR-6650U or CR-8250U or CR-600U. Control cables are required for each VCR, including the source deck. . . . . 395.00
- RB-12 P** Allows Dubmaster control of 12 BR-6400U or BR-7700U or CR-6650U or CR-850U or CR-600U. Control cables are required for each VCR, including the source deck. . . . . 495.00
- P Control Cable** 12' cable connecting RB-6/RB-12 to BR-6400U or BR-7700U or CR-6650U or CR-850U or CR-600U. Specify model. . . . . 75.00
- RB-121R** Allows Dubmaster control of 12 BR-3100U or BR-3500U. Only 1 RB-121R is required per installation. Additional VCRs may be added with the SB-121R. IR control cables are required for each VCR, including the source deck . . . . . \$315.00
- SB-121R** Sub-Box takes signal from RB-121R and controls up to 12 additional BR-3100U or BR-3500U . . . . . 200.00
- IR Control Cable** Connects the BR-3100U or BR-3500U to the RB-121R/SB-121R. Specify model . . . . . 12.00

## Rack Kits for VCRs and Monitors

- WF1730** Waveform adaptor for Tektronix 1730 Series and similar product. . . . . \$100.00
- BP9U(A)** Custom blank panel for RK9U(A). . . . . 25.00
- ADP9U** Waveform adaptor for Earlier Tektronix 528 Waveform, Vectorscope and similar products . . . . . 95.00
- RK9U(A)** Rack kit for up to two TM-R9U 9" color monitors. (6 rack spaces) . . . . . 120.00
- RK9UM9** Rack kit for up to two TM-9U 9" color monitors (6 rack spaces). . . . . 120.00

## Rack Kits for VCRs and Monitors (cont'd)

- RK13U** Rack kit for TM-13U color monitor (9 rack spaces) . \$ 70.00
- RK14U** Rack kit for TM-R14U 14" color monitor (7 rack spaces). . . . . 85.00
- RK850U** Rack slide kit for CR-850U/CR-600U . . . . . 200.00
- RK3500U** Rack kit and cover plate for BR-3500U/BR-3100U (3 rack spaces) . . . . . 65.00
- RK6400U(A)** Rack kit for BR-6400U/BP-5300U VCRs (5 rack spaces) . . . . . 95.00
- RK8600U(A)** Rack kit for BR-8600U/BR-7000UR/BR-9000U/BR-7700U (5 rack spaces) . . . . . 95.00
- RKSL64** Sliding rack shelf for BR-6400U/BP-5300U (6 rack spaces) . . . . . 120.00
- RKSL86** Sliding rack shelf for BR-8600U/BR-7000UR/BR-7700U (6 rack spaces) . . . . . 120.00

## Accessories for TBR-160U and THR-63U Presentation Kits

- AAP1663U** AC adaptor for TBR-160U/THR-63U. Powers TM-63U with BR-1600U or HR-C3U . . . . . \$125.00
- ATTAC-10** Brief case for TBR-160U . . . . . 130.00
- BB16** Battery for TBR-160U (2AH). Powers for approximately 1 hr . . . . . 210.00
- BBTR160U** 2AH battery kit for TBR-160U consists of BB16, CB16, SBB16. Approx. 1 hr. playback capability . . . . . 310.00
- BBTR200U** Super 4AH battery kit for TBR-160U. Allows playback of approx. 2 hrs. Includes battery, charger, and shoe adaptor. . . . . 380.00
- CAR1663U** Car battery cord for TBR-160U/THR-63U . . . . . 65.00
- CB16** Charger for BB16. Fully charges battery in 14-16 hrs. . . . . 70.00
- DC12** Charger for SD12R. Fully charges battery in 14-16 hrs. . . . . 85.00
- SBB16** Shoe cable adaptor for TBR-160U system. . . . . 50.00

## Edit Controller and Accessories

- BL-90** Fade-to-Black module for VE-90/VE-93/ECS-90 series . . . . . \$ 925.00
- CCA-5** Interface between VE-90/VE-93/ECS-90 Series and Type V VTRs . . . . . 750.00
- CCA-8250** Interface between VE-90/VE-93/ECS-90 Series and JVC VTRs . . . . . 750.00
- CI90** Character inserter for displaying time code for VE93 . . . . . 1340.00
- TCR-85(A)** Time code reader kit for CR850U. Includes RF shield . . . . . 1590.00
- VE93** Joystick control. Key pad entry. Auto edit-in/ edit-out, time code capability, with BL-90 installed. . . . . 6900.00

# CARRYING CASES

KVP-25

## Kangaroo Video Pack™ Recorder Packs

The Kangaroo Video Pack provides efficient organization and convenient access for all the gear you need to carry. Designed by a news photographer to meet the rugged demands of ENG field use, the original Kangaroo Video Pack was the first recorder bag to provide straps and pockets to hold tapes, batteries, cables, microphones—everything you need to get the job done. Even white-balancing is easy with built-in white balance panels.

Compact enough for one-man operation, versatile enough for two-man crews, with the Kangaroo Video Pack you can pick up and go, knowing that you have everything you need for a simple interview or an all-day SWAT operation.

## Recorder Packs

All packs come complete with pockets, hand and standard shoulder strap.)

Semi-Tough

## Kangaroo Semi-Tough™ Camera Cases

The original side-loading camera case, the Kangaroo Semi-Tough is ideal for airline travel, or those limited space situations where having your camera with you is a must. The Semi-Tough has a rigid frame of tough aircraft aluminum completely surrounding the camera, while a convenient detachable pocket holds batteries, tapes, and cables. The Semi-Tough comes complete with hand strap and heavy-duty padded shoulder strap for over-the-shoulder carrying.

<b>KCC-SEMTGH</b>	Ikegami HL-79A, HL-79D, HL-79E, ITC-730A, Sony BVP-250, BVP-300, BVP-330, DXC-M3A, Thompson 501, 601, 701, Hitachi FP-10, FP-21, FP-22, SK-81, SK-91 . . . . .	<b>\$265.00</b>

Super Tough

## Kangaroo Super-Tough™ Camcorder Cases

The Kangaroo Super-Tough meets a variety of carrying needs for users of the following camcorder combinations: Sony BVP-3, BVP-30, BVW-3, BVW-30 and the BVW-3 and BVW-30 with DC-100 battery.

This smart-looking, top-loading case has a triple-hemmed, U-shaped aluminum frame to maximize equipment protection while dense Evazote foam helps insulate the camera's most sensitive components from the bumps of daily use. Inner pockets on both sides hold extra batteries, tapes, headset and tripod plate. A three-way zipper system makes top-loading easy and ideal for access from the back of car or remote van.

Raincover

## Kangaroo Raincover

The Kangaroo Raincover means technically designed protection for expensive portable television cameras and camcorder combinations which are sensitive to virtually any environmental hazard. Rain, sleet, snow, wind and dust are sealed out while the user has freedom of access to all equipment controls.

Also available is a special design to block RF interference in congested urban areas or near radar and transmitter sites.

## Kangaroo Gripper™ Strap

Gripper Strap

The Kangaroo Gripper Strap is a heavy-duty shoulder strap that won't slide off nylon parkas, ski jackets, or other slippery material. Padded with our durable Eva-zote closed-cell foam, the Gripper Strap's three-way action gives you important shock-absorbing capability to carry even the heaviest equipment more safely and comfortably than ordinary shoulder straps.

The Gripper Strap comes with two sliders for easy attachment and adjustable length. It's available in brown, blue, green, rust and gray. It fits all Kangaroo Video Products carrying cases, and many other bags and cases.

KAC-Gripper . . . . . \$30.00

Nagra Pack

## Kangaroo Nagra Pack

The Kangaroo Nagra Pack, designed for Nagra recorders with 5" or 7" tops, provides the same basic convenience and protection that has gone into all of our video packs. The Nagra Pack has detachable pockets to hold tapes, batteries, wireless microphone and cables, while the front pocket holds four 7-inch tapes or eight 5-inch tapes. A convenient back flap provides quick access to batteries, while the clear rain flap allows use of controls while still providing protection from inclement weather. There's even a front sleeve to hold a clipboard.

The Kangaroo Nagra Pack gives Nagra users the secure, lightweight convenience needed for field recording.

# VIDEO/DATA PROJECTOR

## VPM500 Video Projection Monitor

- Continuously adjustable f/1.0 glass/acrylic hybrid lenses
- 7" diagonal high light output projection tubes
- All picture alignment controls on 1 swing-out PC board
- Rigid "bulkhead" for stable tube and lens alignment
- Infrared wireless remote control
- 10W/channel audio amplifier
- Control panel for operation without remote commander
- Inputs: 2-Video; 1-RGB
- Audio line out
- External speaker terminals
- High performance video circuitry with comb filter
- High efficiency switching power supply (only draws 100W)

The VPM500 has three heavy-duty picture tubes capable of generating tremendous amounts of light output, while maintaining an operating temperature low enough for long term reliability. Our commercial grade tubes each measure 7" diagonally (about 70 square inches of total phosphor area). Our closest competitor's tubes measure only 2.5" diagonally (a total of 9 square inches of phosphor, approximately 1/8<sup>th</sup> as large as ours). Because these competitive tubes are so much smaller, they operate at dangerously high temperatures, which can lead to premature tube burnout and very costly repairs.

The heavy-duty red, green and blue picture tubes and state-of-the-art video circuitry deliver accurate color registration across the spectrum. Even "noisy" reds and difficult yellows are clear, bright and true-to-life. The VPM500 employs a four-stage quality glass/acrylic hybrid lens assembly. With two stages for magnification (screen size) and two stages for focus (one for center sharpness and one just for the edges and corners).

The precision optical system has four elements, three of which are continuously adjustable. This optical system allows accurate focusing, both in the center and at the edges and corners, at any screen distance from 5' to 24'. You get a sharper, brighter picture at any screen size, without expensive add-on lens kits.

To further ensure high resolution and precise color registration in actual use, the VPM500 lens system has improved temperature stability. Through the use of glass and acrylic lens elements, each having equal and opposite temperature coefficients, the VPM500 stays in focus hour after hour.

The VPM500 produces a clear, sharp picture all the way out to the extreme edges, with a screen size that can be varied continuously from 4' to a phenomenal 20' diagonally. It can also be changed from a flat to a curved (parabolic) screen configuration at the flick of a switch.

The VPM500 changes quickly and easily from a floor-mount to a ceiling-mount configuration.

The VPM500 has two video inputs and an RGB input (with selectable sync). It is capable of handling all of your video sources, including most personal computers, for larger-than-life graphics and games. There's a built-in stereo amplifier and speakers. For even more flexibility, audio outputs (variable from the remote control) are also provided for connection to your high fidelity audio system.

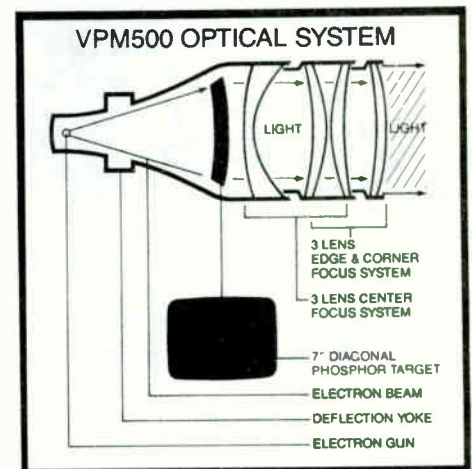

The VPM500 is supplied with a 31-function remote control which handles all of its operations. Input selection, volume up/down, color, tint, contrast, brightness, detail, convergence, even a built-in stereo synthesizer are all available at the touch of a button.

# VIDEO CASES

## Porta-Brace Video Recorder Cases

Designed to provide custom-fitted protection in the field while allowing immediate access to controls, connections, and batteries through weather-protected openings.

Your choice of our heavy-duty contoured suede leather strap HB-40 or 2" webbed strap HB-20 is supplied with purchase of recorder case. Comes with sewn-on front pockets for cassettes, batteries, mikes, etc., two white balance cards (one removable). "Piggin Strings"™ available for organizing cables.

Time code, wireless, and all-purpose accessory pouches available from . . . . . \$16.00

C-150

**IMPORTANT: Please designate HB-20 or HB-40 when ordering.**

Your choice of heavy-duty shoulder strap, the HB-20 or HB-40 included with purchase of recorder case.

## TRIPOD MUMMY CASE

► A new sort of case for professional tripods with fluid heads from Porta-Brace®. A soft, lightweight, thickly padded Cordura® Case that is waterproof and durable. There are pockets for many accessories; handles, tripod platforms, fish poles and mics. Also will carry a lighting kit with light stands. Comes with maple wooden handle and shoulder strap.

..... from \$226

## Porta-Brace "Grip" Heavy-Duty Carts

Versatile, heavy-duty carts for studio or field use. Optional light stands, tripod quivers, and carry-all cases available ..... \$575.00-\$598.00

## Porta-Brace Rain Covers

Help protect against dust as well as moisture damage ..... \$122.00  
 Easy access to all controls

These waterproof covers are not loose-fitting, all purpose jackets; they are tailored to fit individual 3-tube camera models, with access openings positioned for each model's adjustments and connections. So even in the worst rainstorm, you can use your camera with ease and security.

### RAIN COVERS

for all popular 3-tube cameras. Specify camera model number.  
 RC—(No. your camera\_\_\_\_\_)

## VIDEO CARTS/CASES

### Porta-Brace Monitor Cases

Protection and glare reduction guard with adjustable pedestal, also easy access to battery, switches, controls and cable connections.

*Lightweight Field Monitors (stays in protective case)*

# 16mm PROJECTOR

## FP-18 TV PROJECTOR

For use in TV, film to tape transfers, and special studio systems.

- Rack Mounting with adjustable Pedestal, 24V Control System, Control Panel, built-on Proximity Sensor (Auto Stop)
- Film Run Mechanism Forward/Reverse
- Crown Groove Intermittent 5 Blade Shutter
- Picture Dowser/Change Over, Still/Step Frame
- Curved Gate
- SMPTE Specs for Jump and Weave
- 5000 foot Film Capability, Remote Control for all Functions
- 24 Frames per second
- Audio: Pre-amplifier/Line Amplifier Module built-in with +8dBm Output Level into 600 ohm Load B + Power Supply
- Light Source: Halogen Light Source, 2 Lamp Turret System with Automated Change 250W, 24V
- Drive Motor: 110-250V, 60Hz Synchronous
- Reel Drives: Friction Drive, 5000' capacity
- Optical Playback: Sound Drum Damping Assembly, Sound Drum Accelerator, Solar Cell, Exciter Lamp, Exciter Lamp Power Supply

### Precision Projection

The projector's extremely high picture stability, less than .19% jump and weave, is achieved by the unique Philips grooved disk mechanism, curved gate, and ceramic film edge guides. The intermittent mechanism was developed especially for 16mm film systems using a 12 tooth sprocket for film control and protection. This combined with the rotating 5 blade disk shaped shutter, dual halogen lamp with automatic lamp change, provides a highly efficient projection system compatible with 25 or 30 frame TV systems.

### Optimal Sound Quality

The sound reproducing system follows the pattern of professional standards used in 35 or 70mm reproducers. A rotating sound drum machined to high standards, fitted with a split damping drum and flywheel accelerator provides for a fast stabilization time and provides for less than .2% wow and flutter. The scanning optics can be adjusted (by lever) to compensate for standard or non-standard recordings. A manual switch will shift the system from optical to magnetic if so equipped.

### Audio

The pre-amplifier module is located within the cabinet. It provides for pre-amplification of selected signals with plug-in equalization boards for optical or magnetic signals. The output provides for a +8dBm signal into a 600 ohm load. Each input is individually controlled for balance, with an overall master and a bass/treble boost circuit.

FP-18 .....\$24,937.50

75mm f/1.7 .....	331.25

FP-30 TV

**FP-30 TV PROJECTOR**

The FP-30 TV Projector utilizes the basic film transport and system as found in the professional 35mm systems widely used for exhibition, and studio applications. The high speed intermittent movement with 5 blade shutter renders the system compatible with 25 or 30 Frame operation. The system meets all SMPTE specifications.

- Equipped with Column and adjustable Pedestal
- 35mm Film Transport
- Fast Pull Down Intermittent 5 Blade Shutter
- Step Frame
- Proximity Sensor (Auto Stop)
- Sound Reproducer, Optical with Solar Cell Pick-up and Exciter Lamp
- DC Exciter Lamp Power Supply
- Sound Drum Accelerator
- Picture Change-Over Relay, Dowser Control
- Electrical Control System 24V DC
- SMPTE Spec on Jump and Weave
- Spool Shafts and Frictions: 6000' capacity
- Drive Motor: Synchronous 115V, 60Hz, 24 p/s
- Lens Support: Vernier Focus, Lensholder, Set of Aperture Plates
- Light Source: Halogen Lamphouse 250W, 36V, 2 Lamp System, Automatic Lamp Change

**Precision Projection**

The FP-30 TV Projector utilizes a single piece, curved gate of self-lubricating delrin material. The gate, with delrin runner strips and ceramic guides, provides a film path exactly controlled with minimal pressure, providing high picture stability with minimal stress on the film.

**Optimal Sound Quality**

The optical reproducer follows all of the state-of-the-art designs, resulting in low wow and flutter. The rotating sound drum and the flywheel accelerator provides fast sound stabilization. The high quality slit lens and scanning system provides for high quality sound reproduction.

**Audio**

The FP-30 TV System is normally provided without Pre Amplification. The solar cell output being easily coupled to Station audio systems. Where a 0 level signal is required, an audio system can be provided as an accessory.

## 500W Minuette Fresnel Spotlight

- 4 1/2" diameter
- Finned aluminum extrusions and sheet steel construction
- Lightweight
- Compact

The Minuette Fresnel Spotlight provides a variable soft-edged beam and the rotatable 4-leaf barn door provides additional beam shaping.

This theatrical luminaire is highly versatile whether it's used in large theaters, schools or to illuminate displays. The finned aluminum extrusions provide maximum heat dissipation and the matte black epoxy coating is highly resistant to knocks and abrasions. The beam spread can be controlled over a 6.5° to 43° range. The barn door restricts halation as well as being used to shape the beam.

All fixtures include C-clamp, safety cable, color frame and connector.

Minuette Fresnel

## 500W Minuette Profile Spotlight

- Finned aluminum extrusions
- Formed aluminum and sheet steel
- Two independently moveable 3 1/2" and 4" diameter plano convex lenses
- Shutters are removeable
- Gate is for drop-in iris or pattern holder
- Thermally insulated rear handle
- Lenses are independently adjustable for zoom control
- Lightweight
- Compact

The Profile Spotlight optical system can be adjusted to give precise beam shaping by built-in thermally insulated stainless steel shutters or a drop-in iris, the gate for which can be used for patterns. The zoom lens system, with both lenses individually adjustable—gives hard or soft edges over a 9° to 15° range (field angle 19° to 37°). The Minuette Profile is also available in a wide angle unit and a narrow angle unit. The luminaire is compact and sturdy using lightweight finned aluminum construction.

All fixtures include C-clamp, safety cable, color frame and connector.

### Recommended Lamps: (Minuette Fresnel and Profile Spotlight)

	Watts	Life/Hrs.	Color Temp.	Lumens	Socket
EHC/EHB	500	200	3200K	13,000	Med. Pin
EHD	500	2000	3000K	10,000	Med. Pin
EHT	250	2000	2900K	4,850	Minican
EVR	500	2000	2900K	10,450	Minican

## Silhouette Zoom Profile Spotlights

The range of Profiles is a system of interchangeable zoom lens fronts for high efficiency beam shaping. The lamp is mounted axially with a unique moving reflector which quickly gives a wide range of field adjustment. The lamphouses are primarily constructed of extruded aluminum for high strength and good thermal qualities. Lens tube design has been considerably improved. The front plate supporting the color frame and lens guard grooves can be field adjusted for top or side entry and the lens knobs can be set by the user for bottom or top operation. Tubes offer a wide range of beam angles from 9° to 47°.

Minuette Profile

Silhouette Zoom

As standard and built-in, are four tempered stainless steel framing shutters and slot for drop-in iris or pattern holder. All fixtures include C-clamp, safety cable, color frame, and connector. The yoke support can be attached to either the lamp-house or lens tube to achieve desired balance. The large diameter heat resisting knob and clamping disc ensure rigid locking without movement. Yoke may be set for hanging or for stand mounting. All Silhouette Profiles are completely compatible with existing Silhouette lenses and accessories.

- Silhouette 1994 Zoom Profile, 40° axial
- Silhouette 1993 Zoom Profile, 30° axial
- Silhouette 1992 Zoom Profile, 25° axial
- Silhouette 1991 Zoom Profile, 15° axial
- Silhouette 1990 Zoom Profile, 10° axial

### Recommended Lamps:

## HMI FRESNELS

### Kliegsun 575 HMI Fresnel and Ballast System

Lightest weight system available in its class—57 lbs. The .040" reinforced aluminum housing has the strength needed for rugged location use. System may be started from either lamp head or ballast. Accidental ignition cannot happen if door is open. The fresnel lens is 5" (150mm) diameter and the reflector is 5" (150mm) diameter aluminum-spherical optics. The compact ballast operates on 115VAC nominally. Unique Varitap circuitry will accept inputs of  $\pm 20\%$  from this level.

### Kliegsun 1200 HMI Fresnel and Ballast System

High strength double-wall .040" aluminum housing for location handling and efficient heat transfer. System may be started from lamp head or ballast; accidental start with door open is prevented by safety interlock. The fresnel lens is 10" (250mm) diameter and the reflector is 7<sup>3/4</sup>" (197mm) diameter aluminum-spherical optics. The compact ballast is rated at 20A (max) at 115VAC. Unique Varitap circuit can be set to accept any inputs  $\pm 20\%$  of 115VAC. System weighs 95 lbs.

### Kliegsun 6000 HMI Fresnel and Ballast System

System employs the same proven construction materials and design features as in other Kliegsuns, with added convenience. The 20" (500mm) fresnel lens and the 12<sup>1/2</sup>" silicate beaded finish spherical aluminum reflector are the industry's most advanced optical system, giving high light output with flatness of field. The housing is of .063" high strength, reinforced aluminum, sturdy enough for the most demanding use. The unique Varitap circuitry may be accessed through a door. The input voltage is nominally 208/240 or 277VAC. The ballast will operate on any input between 200VAC and 290VAC. An auxiliary 120V/10A outlet is readily available for power lifter hookup. Pneumatic tires (8" diameter) permit easy moveability on location.

# STUDIO LIGHTING

Lighting Fixtures

Distribution Equipment

Lighting Control System

## Six Studio Lighting Packages

These packages have been designed and engineered to cover a broad spectrum of studio lighting applications as they apply to most commercial, educational, and industrial users. Each package has been carefully laid out to ensure that the complement of lighting fixtures, distribution equipment and the lighting control system will prove adequate in the area for which it is designed.

**Lighting Fixtures**—A varying complement of Key, Back, Base, Fill and Set lights, including their accessories, are provided in every package. Pattern Projectors and special Cyc lighting instruments are included in certain packages. All fixtures are provided with 39" leads, C-clamp, safety cable and pin connector.

**Distribution Equipment**—Wireway connector strips and wall outlet boxes are provided in various quantities for each package in order to ensure proper power distribution throughout the specified studio. Cyc drop boxes are also used in the three larger packages for powering the cyc lighting units.

**Lighting Control System**—An SCR multiplexed digital dimming system utilizing the "dimmer-per-circuit" concept has been designed for each of the studio packages. Each system consists of an SCR digital dimmer rack (or pack) and an ENTERTAINER portable, microprocessor-based control console. The digital dimming system uses bi-directional, multiplexed data streams between the console and the dimmer rack. A single 4 conductor, shielded cable replaces the large multi-conductor control cables required in older systems. The accuracy of the system is unaffected by electrical noise, temperature or aging of the components.

In addition to the above, each of the studio packages contains a studio layout and a system riser (flow) diagram. The packages are listed as follows:

Catalog Number	Package Description	Price
851520	15' x 20' (300 sq. ft.) . . . . .	\$ 26,200.00
851825	18' x 25' (450 sq. ft.) . . . . .	37,100.00
852030	20' x 30' (600 sq. ft.) . . . . .	51,000.00
853040	30' x 40' (1200 sq. ft.) . . . . .	84,000.00
853650	36' x 50' (1800 sq. ft.) . . . . .	122,200.00
854060	40' x 60' (2400 sq. ft.) . . . . .	163,400.00

## LIGHTING CONTROL CONSOLES

### Entertainer™ Portable Digital Dimming Control Console

- Use up to 48 memories or a sophisticated two-scene preset
- Proportionally patch up to 1,000 dimmers to 12, 24, 36, or 48 control channels
- Assign channels to any or all group masters at separate levels
- Flash buttons and latch and chase functions with level controls
- Split dipless crossfader with adjustable fade rate

- 9012** One Ind/Group Module, One Master Control Module  
**9013** One Ind/Group Module, One Master Control Module, One Options Module  
**9024** Two Ind/Group Modules, One Master Control Module  
**9025** Two Ind/Group Modules, One Master Control Module, One Options Module  
**9036** Three Ind/Group Modules, One Master Control Module  
**9037** Three Ind/Group Modules, One Master Control Module, One Options Module  
**9048** Four Ind/Group Modules, One Master Control Module  
**9049** Four Ind/Group Modules, One Master Control Module, One Options Module  
**9050** Hard copy printer for print-out of patch assignments and cues, complete with power cord and control cable  
**9051** Carton blank computer paper, one part, 9 1/2" x 11", 3500 sheets

All consoles are furnished with 32' (10M) control cable, power cord with power supply, and gooseneck console light

Entertainer

### Command Performance Memory Lighting Control System

- 20 Submasters with flash buttons
- Back-up system
- VDU channel display
- VDU patch display
- ASCII keyboard
- Grand Master
- A-B split fader
- X-Y time faders
- Display keyboard
- Auxiliary control panel
- Library storage
- Cue keypad
- Channel/Dimmer keypad
- Portable remote
- 32-288 channels to control up to 3000 dimmers
- Storage capacity of 600 average sized cues
- Does not require any peripheral devices to function
- Read-only Memory
- Electronic patch
- Two-color graphic monitors
- Designed for theatrical use and television studios

Command Performance

### Performer IV® Computerized Lighting Control Console

- A separate 13", high resolution, color monitor with direct-etched anti-glare screen, on a tilt/swivel base
- A 3 1/2" micro floppy disk drive for library storage
- LAN (local area network) capability allows multiple units to be connected in either a master/slave configuration or a 100% redundant back-up configuration
- Designed for theatre, television and film
- 72 hour memory retention without the use of batteries or extra power supplies
- "PERFORM" commands allow multiple part cues and the flexible control of cue sequencing
- A real time clock/calendar on screen
- High speed CPU
- System can control up to 350 channels and 960 blocks of cue storage

### KLIEGLKIT 4Q-TV/5Q-TV LIGHTING KITS

The KLIEGLKIT 4Q-TV and 5Q-TV provide the ideal solution to the lighting requirements encountered in the remote TV and film location applications of today. In addition to portability, these kits contain the types of lighting fixtures the lighting professional needs in equipping an O.B. van for Electronic News Gathering.

The two kits are identical except for the inclusion of an additional SPOT head, with accessories, in the 5Q-TV kit. The carrying cases for either kit are the same. This allows one to start with a 4Q-TV kit and later add an additional SPOT or FLOOD head, with accessories, as required.

#### Contents of 4Q-TV

- 2 — #1720-UG 1000W Focusing SPOTS with Switch 10' Cord
  - 2 — #11720 Diffuser Frames
  - 2 — #21720 4-Way Barn Doors
  - 2 — FBY 1000W Quartz Lamps
  - 2 — #1750-UG 1000W FLOODS with Switch, 20' Cord & Integral 4-Way Barn Doors
  - 2 — #11752 Diffuser Frames
  - 2 — FHM 1000W Quartz Lamps
  - 4 — #14360 Folding Stands
  - 2 — #25E16/3UG Extension Cables, 25'
  - 1 — #1700 Carrying Case
- PRICE ..... \$1550.00

#### Contents of 5Q-TV

- 3 — #1720-UG 1000W Focusing SPOTS with Switch, 10' Cord
  - 3 — #11720 Diffuser Frames
  - 3 — #21720 4-Way Barn Doors
  - 3 — FBY 1000W Quartz Lamps
  - 2 — #1750-UG 1000W FLOODS with Switch, 20' Cord & Integral 4-Way Barn Doors
  - 2 — #11752 Diffuser Frames
  - 2 — FHM 1000W Quartz Lamps
  - 5 — #14360 Folding Stands
  - 3 — 25E16/3UG Extension Cables, 25'
  - 1 — #1700 Carrying Case
- PRICE ..... \$1960.00

4Q-TV Power Requirements: 120V AC/DC at 33.3 Amps. Weight: 64 lbs. 5Q-TV Power Requirements: 120V AC/DC at 41.66 Amps. Weight: 75 lbs.

Prices and Specifications Subject to Change Without Notice.

# PORTABLE LIGHTING KIT

## Mini Kit

### Portable Lighting Kit for 100 Sq. Ft. Area

The Mini Kit is a portable lighting kit that contains everything the lighting professional needs for a television broadcast. It can be used for color or black and white, film or TV and will handle an area up to 100 sq. ft.

The Mini Kit has three 600W focusing lights. Two are focusing spot lights for key and back lighting. Both these fixtures have spot-to-flood settings of over 5 to 1 providing smooth, even light in all positions. Each weighs only  $\frac{3}{4}$  lb.

The third fixture in the kit is a focusing flood light, the only type of its kind for fill lighting. This unit has built-in barndoors for sharp light cutoff. The fill light uses the same lamps and power cable as the key lights.

Besides the three fixtures, the kit includes all the accessories a working professional will need to do a location shooting assignment or a news event. Not for studio use. The accessories include three specially made lighting stands for the fixtures. The stands have extendable, adjustable legs, allowing the stands to be set up on uneven surfaces.

Other accessories are rotatable barndoors for the spot lights (they are integral on the fill light); three 10' cord and switch assemblies; three 15' extension cables, three scrims and a large gaffer grip. The total power load is 15A and the fixtures and accessories may be plugged into an ordinary wall socket without danger of circuit overload.

The fixtures and accessories are packaged into an aluminum carrying case which, filled with all the equipment, weighs less than 30 lbs. It is compact enough to slide under an airplane seat or fit easily in the trunk of a small car.

Note: Kit includes a 600W lamp for each fixture. Power load: 15A. Total weight, including case: 29 lbs.

Mini Kit . . . . .POR

1. 600W focusing spot light
2. 600W focusing flood light
3. 4-way barndoors
4. 10' cord-and-switch assemblies and 15' extension cables
5. Gaffer grip
6. Set of 3 scrims
7. Aluminum carrying case
8. Folding stands, 8' extension

# VIDEO/DATA PROJECTION SYSTEMS

## VideoBeam® VB3000 Color Projection Data Monitor

- Uses 3 Novatron II® projection tubes
- Has up to 4 inputs that may be switch-selected
- Each input module has height and width adjustments
- Horizontal retrace time is less than 5µs
- Designed for 120V 50/60Hz operation
- Power consumption is 140W
- Weighs 70 lbs. (31.8kg)
- RGB resolution is over 1000 lines
- Data resolution is 3300 characters; 132 columns x 25 rows
- Aluminum carrying case with metal handles
- Optional accessories available

The VB3000 is engineered for group viewing of large screen, ultra-high resolution computer generated displays. It offers automatically varied horizontal and vertical scan frequencies, allowing it to be used with such video controller boards as the IBM Enhanced Graphic Adaptor and Professional Graphics Controller, the AT&T 6300 monochrome and color controllers, the Apple Macintosh, Macintosh XL, and various other boards running at scan frequencies well in excess of "standard" video rates. Unlike other professional projectors, the VB3000 supports popular graphic work stations as well.

The VB3000 is available in 3 versions: 6 1/2' diagonal image for use with the high-gain curved screen, 7' diagonal for use with a flat screen, and a 10' diagonal version for use with a flat screen. Each can be floor or ceiling mounted, and rear projection is available with minor adjustments.

The VideoBeam VB3000 senses the scan frequency of incoming signals, locks automatically to those frequencies, and displays a rock stable image; no other adjustments are needed. It is not necessary to preset frequencies in advance nor are accessory "black boxes" needed. Lock-up is automatic and occurs virtually instantaneously. With a high frequency capability of 34kHz, there is more than adequate latitude for 60Hz, noninterlaced signals for medium resolution computer images.

The VB3000 has up to 4 inputs that may be switch-selected either on the projector itself or on the optional remote control. Each input module has height and width adjustments which the user presets once. Horizontal retrace time is less than 5µs, further guaranteeing compatibility with higher scan rate systems.

Optional accessories include a ceiling mount kit and a projection cart. The cart raises the VB3000 to the correct position for use of the 6 1/2' high gain curved screen on the extended height legs, recommended when large groups are to view the display, or to tabletop height for projection on a flat screen.

## VideoBeam VB4000 Rear Screen Projection System

The VB4000 incorporates the design and the features of the VB3000 benefiting from ongoing research of high resolution display technologies. The 60" screen is optimized for superior horizontal and vertical viewing angles. The use of Fresnel field lens allows maximum resolution.

<b>69-6600</b>	VB3000 Projection Monitor for 6.5' Curved Screen (Automatic multiscan) . . . . .	<b>\$ 8,600.00</b>

# CHARACTER GENERATOR/ TITLING UNITS

## K20 Titler

- Self-contained single 58-key keyboard unit • 16-page internal memory, expandable to 64 pages • One complete upper and lower case font—Helvetica • Second upper case font—Eurobold • NTSC or PAL operation (specify) • Internal sync generator • Separate preview output with cursor • 8-color palette • Title and 4-speed roll modes • Computer interface • Non-volatile memory

**K20** ..... \$1395.00  
**K12** Monochrome version of K20 ..... 1095.00

K20

## K50/K60 Titling Units

- Self-contained requiring only AC power and sync pulse train • Used as a video source or downstream keyer-inserter • Allows entry of information at any location or page • Independent program/preview channels • 4 full pages of memory • Display format: 64 characters—26 upper case, 10 numerals, 27 typewriter symbols, 1 space • Character resolution: 7 x 9 dot matrix • Input: full interlace composite video-sync per EIA RS-170, RS-330, EIAJ, or similar standards • Nominal character height: K50—36 scan lines, K60—18 scan lines • Page format: K50—16 characters/line, 8 lines/page K60—32 characters/line, 16 lines/page

The K50 and K60 are keyboard entry devices used for generating white alphanumeric information in video form.

The K50 provides the larger type size of the two machines. A single page consists of eight lines of 16 characters each. For this reason, the K50 is the likely choice for silent paging systems, posting schedules and other public displays that call for legibility at a distance.

The K60, with its format of 32 characters in each line of a 16-line page, affords the user a greater density of information. This has been found most useful in some medical applications and other systems that employ extensive titling over video pictures.

**K50** Character Generator with 4 pages of memory, independent edit channel, flash. 16 Characters by 8 lines per page ..... \$1295.00

**KS50** All features in K50 plus crystal controlled internal sync. . 1550.00

## K40 Microfont™ Character Generator

- Self-contained single 58-key keyboard unit with small external power unit • 16-page internal memory, expandable to 64 pages • 2 complete upper and lower case fonts: 20 and 32-line Helvetica • Complete foreign language set in large size • Double size font expander key • NTSC or PAL operation (specify) • Internal sync generator • Separate black and white preview output with status line • 32-color palette • Roll, crawl and title modes • Italics by line • Computer interface • Non-volatile memory

The K40 Microfont offers an array of features in a low cost color character generator: finely resolved fonts, wide choice of colors, broad capture genlocking and mixing, full range rolls and crawls, and automated display sequences.

Easy to use, the K40 is ready to title from the moment you turn it on. Its entire instruction set is printed on the keyboard.

Each line may be individually colored in background and striping, and character colors may be completely intermixed on every line.

The Microfont is housed in a single 58-key unit complete with an internal sync generator. A standard NTSC video input is also provided for synchronizing the K40 to an external video source. An internal mixer

K40

adds the K40's output to the incoming video signal, a separate preview output carries the character generator output together with an additional line of characters showing the current system status.

**K40** ..... \$2395.00

64-page memory upgrade ..... 275.00

Optional four-font upgrade ..... 275.00

# CHARACTER GENERATORS

## K200 Chromafont II™

### Color Character Generator

- Eight included fonts, each in two sizes
- 128 color groups organized into eight palettes
- 512 color selection
- 10-speed roll and crawl modes
- Underlining and pinstriping
- Italics, superscript, and subscript
- 8000 character memory

The Chromafont II offers the small studio another step forward in quality production capability. Fully resolved, proportionally spaced fonts and rich variation in color and style of display make this character generator a standout in its price range.

Combining very low power digital technology with pipeline architecture, the Chromafont II puts a fine finish on your productions without the usual price-to-performance tradeoff. It genlocks to almost any signal, keys automatically, and can fade to title, fade to picture, and fade to black.

Incredibly easy to use for a machine with such a variety of fonts, colors, and positioning abilities, the Chromafont II has all the important operational essentials printed on the cover of its keyboard. A complete technical manual is included for those wishing to explore the finer points of display making.

The Chromafont II is equally at home as a stand alone unit, downstream in a simple editing suite, or upstream through a sophisticated production switcher. A unique execute mode allows a long sequence of display operations to be programmed ahead of time and then executed hands-off after a single keystroke.

**K200** ..... \$4450.00  
**K200EX** 500 page extended disk drive ..... \$5990.00

K200

K100 Option C

## K 100 Chromafont Option B

### Color Character Generator

- Four fonts: two upper and lower case, two upper case only — all in two sizes (eight 32-character font blocks)
- Full range color control (512 color palette) of background and character, organized as 16 selectable combinations. Color palette includes transparency
- Second 512 color palette for fade/cut/dissolve effects
- Character-by-character color control
- Individual character background color control
- Character-by-character underlining and pinstriping
- Horizontally and vertically adjustable shadow edging
- Flexible non-volatile 8000-character memory. Can be organized as up to 256 lines or up to 64 pages
- Multi-speed roll and crawl
- Fade Control: allows fade to and from black, dissolves from color to color
- Italics: two forward and two backward slants
- Variable line height
- Superscript and subscript
- Serial interface for computer control or extra keyboards
- NTSC or PAL-B compatibility
- Portable, detachable keyboard

The full color character generator of choice when the budget is limited, the K 100 Chromafont represents a unique approach to character generator design.

Advanced high speed pipeline architecture puts sophisticated display capability in your hands at minimal expense.

Compact and versatile, the K 100 is equally at home in the EJ van or in the studio. Its superior display adds elegance to routine titling such as schedule changes or weather alerts.

The K 100 also offers the small studio or production house a true alternative to costly and inconvenient outside titling services.

**K 100** ..... \$3890.00

Screen Display Composed on a Chromafont Option B, Including One Extra Font

### Chromafont Option C Upgrade

Option C adds to the capabilities of the K 100 Chromafont:

- Four new type fonts: one upper and lower case and numerals, two upper case and numerals, one upper case only — all in two sizes
- Unlimited floppy disk storage: frees K 100 internal memory space
- Automated timed display sequences
- Pre-cued displays with built-in pauses

**Option C Upgrade** ..... \$5780.00  
**Upgrade Only** ..... \$1890.00

## Kodak Video Cassettes 1/2" VHS/Beta

Kodak Video Cassettes are for use with 1/2" VHS and Beta format video recorders, and for the new generation of 8mm video systems.

Each Kodak Video Cassette is designed and manufactured to meet exceptionally high standards of quality, performance, reliability, and consistency.

- For beautifully accurate images
- Excellent picture sharpness, color brilliance sound clarity
- Quality that lasts even after repeated use

## Kodak Video Cassettes (High Grade)

For use with 1/2" VHS and Beta format video recorders. Designed for excellent picture sharpness, color brilliance, sound clarity, and reliability.

## Kodak Video Cassettes, XHG (Extra High Grade—Broadcast Quality)

Extra High Grade video cassettes in both VHS and Beta recorder formats. For use at extended playing speeds and for repeated recording and playback. High-density particle packing has excellent capability for re-recording, erasure, and signal stability.

VS-38E

VS-38E Back Panel

**VS-38E  
 Production Switcher/SEG**

A professional production switcher and special effects generator designed for small studio use. The VS-38E is a vertical interval color SEG providing features usually found on expensive "broadcast" switchers. Three composite inputs on three buses allow the operator the unique ability to mix a third input into a selected special effect. The inclusion of an RGB camera input for superimposing one picture into another via a Blue Key Effect, a Downstream Keying input for a character generator or genlockable camera, a Key input for use with a Black and White camera, a separate control for fade-to-black and dual 110V and 12VDC operation, rounds out this superb SEG.

- An (A-B)/C video bus structure
- Eight wipe patterns with soft and hard control
- Chroma keying effect with separate blue shade control
- A colorizer for adding color to either the light or dark areas of the picture during use of downstream keying input or as a source in combination with any of the mix, wipe, or blue key effects. A luminance control is included for adjusting color brightness

- A downstream keyer for keying in either a character generator or a DSK camera. The downstream keyer includes a brightness level, pos/neg and a slice control for adjusting the luminance contour
- Separate preview bus able to display inputs, color generator, downstream keyer, black output of black and white camera, special effects and program out
- A separate 10-pin camera socket tied to input one, for supplying power to a camera and genlocking other inputs to that camera through the two black burst outputs. An audio breakout is included for the on-camera microphone audio
- Looping inputs with Hi-Z/terminate switches allowing inclusion of other video processing devices in system
- A built-in black burst sync generator

**Specifications**

**Signal-to-Noise Ratio:** > 60dB  
**Crosstalk:** > 56dB at 3.58MHz  
**Frequency Response:** > 10MHz  
**Dimensions:** 19.2" x 10.5" x 4.8"  
 Rackmountable on 19"

# VIDEO ENHANCER/ COLOR ENCODER

## VS-2EII Active Video Enhancer/Splitter

The VS-2EII integrates a high quality video gain circuit and an audio mixer. This unit includes video enhancer with a video gain control with fade to black and 10dB boost, high resolution video enhancer with definition control, color improvement circuit with control for color saturation. It features "Automatic Noise Limiter" to reduce video noise, and incorporates three independently amplified and isolated video outputs along with a two-input/three-output audio mixer, allowing conversion of stereo videotapes for monophonic recording with proper channel balances.

### Specifications

<b>Video Input:</b>	1 input, 75 ohms, 1V
<b>Audio Input:</b>	2 stereo inputs, 10K ohms, 1V
<b>Video Outputs:</b>	3 processed outputs, 75 ohms, 1V, 1 bypass loophrough output, 75 ohms, 1V
<b>Audio Outputs:</b>	3 stereo parallel outputs, 100 ohms, 1V
<b>Video Gain/Fade Control:</b>	+ 10dB to full fade of composite video
<b>Audio Mix:</b>	+ 3dB to 0dB on two inputs
<b>Video Bandwidth:</b>	8MHz
<b>Video Non-Linearity:</b>	> 5%
<b>Video Bandwidth:</b>	20-20,000Hz

<b>VS-2EII</b>	..... \$299.00

VS-2EII

VM-11E

## VM-11E Video Screen Splitter

This unit allows to display vertically, a part of two videos on a single video monitor if both video signals are running on the same sync. A practical application will be to show parts of a signal, one with corrections and the other without, both on the same picture screen. The VM-11E is also very useful with genlocked video cameras and can be used in studio or security applications.

### Specifications

<b>Video Inputs:</b>	2 video synchronized, 75 ohms Hi-Z with termination switch, 1V p-p
<b>Video Outputs:</b>	1 video, 75 ohms, 1V p-p
<b>Controls:</b>	Screen splitter, vertical line (A-B)
<b>Video Non-Linearity:</b>	< 3%
<b>Video Bandwidth:</b>	6MHz (± 3dB)
<b>Dimensions:</b>	6" x 2 1/10" x 5 1/10"
<b>VM-11E</b>	..... \$199.00

KCP-180

## KCP-180 RGB-NTSC Color Encoder

• Accepts TTL computer or analog RGB inputs and converts these standard NTSC/RS-170A composite video output for recording on VCR mixing or display on standard video monitor • Controls for: Color phasing, chrominance level, luminance contrast, reference set-up • BNC inputs for RGB, sync, and sync on green • 9-pin connector for TTL (RGB) input with H and V sync • TTL nine loophrough connector • Color bar generator for reference signal • Signal-to-noise ratio: 58dB • 110VAC fused power supply with off/on switch

Allows you to use your computer or RGB signals in a standard video system. Accepts both TTL and analog video inputs and converts these to standard NTSC, RS-170A composite video. The encoder strips non-standard sync and replaces it with clean RS-170A sync. Interlaced input will create an interlaced output; non-interlaced input will create a non-interlaced output. It will even encode RGB video without subcarrier reference by internally generating the proper SC-H phased subcarrier. Works with any standard color graphics adaptor. (EX.: IBM PC, XT, Zenith XT, etc.) Accepts either positive or negative sync.

# SWITCHER/VIDEO PROCESSOR

VS-15EII

## VS-15EII Vertical Interval 12 x 2 Matrix Switcher

The VS-15EII was designed for professional use, providing in a single compact unit a high quality video/audio stereo distribution amplifier and an advanced video/audio stereo switching center. Digital video input control, state-of-the-art design utilizing the latest IC technology and compact size make the VS-15EII ideal for high quality video/audio stereo switching and distribution. All inputs and outputs are fully buffered and isolated eliminating crosstalk between channels, making the VS-15EII the superior switching system. In addition, the VS-15EII utilizes vertical internal electronics for glitch free switching.

### Specifications

**Video Inputs:** 12 video, 75 ohms, 1V  
**Audio Inputs:** 12 audio-stereo 47K ohms, 1V  
**Video Outputs:** 2 x 2 video, 75 ohms, 1V

**Audio Outputs:** 2 x 2 audio-stereo, 100 ohms, 1V  
**Connectors:** Video: BNC  
Audio: RCA  
**Video Non-Linearity:** < 1%  
**Video Bandwidth:** 10MHz  $\pm$  3dB extended to  $\pm$  15MHz  
**Audio Bandwidth:** 20-20,000Hz  $\pm$  1dB  
**Video/Audio Gain Errors:**  $\pm$  1dB  
**Dimensions:** 17" x 7" x 2"  
**Power Consumption:** 6W maximum, 110V  
**Vertical Interval Switching:** May be looped from a 12 x 4 to a 12 x 12 configuration

Also available in 12 x 4, 12 x 6, 12 x 8, 12 x 10 and 12 x 12 formats.  
VS-15EII . . . . . \$1395.00

VS-11EII

## VS-11EII Active Composite Video Processor

The VS-11EII incorporates a full-function screen splitter allowing to compare all the corrections made on the video picture and displayed on the same picture tube. The vertical splitter line can be moved into any part of the picture allowing to compare sensitive areas of the video information. A video camera can be directly hooked up on the rear side of the VS-11EII, feeding 12V directly to the camera. The video and audio signals obtained can further be routed to "break out" or to be connected to input "C" of the input switcher. A color "Phase" control allows to shift the chroma balance to red or blue allowing to cope with improper colors. A 3-way video/stereo audio distributor is also incorporated in this unit. 19" rackmounting is made possible by means of adaptors delivered with this machine.

### Specifications

**Video Input:** 3 inputs, 75 ohms, 1V  
**Audio Input:** 3 stereo inputs, 40K ohms, 1V  
**Video Outputs:** 3 outputs, 75 ohms, 1V  
**Audio Outputs:** 3 stereo outputs, 1K ohm, 1V  
**Definition Control:**  $\pm$  10dB above 2MHz with automatic noise gate  
 $\pm$  10dB at subcarrier frequency  
**Color Saturation Control:** 0-350° burst phase rotation  
**Phase Control:** + 3dB to full fade (95% black)  
**Video Gain Control:** 8MHz  $\pm$  3dB  
**Video Bandwidth:** 20kHz  
**Audio Bandwidth:** 3%  
**Video Non-Linearity:** 3%  
**Dimensions:** 17" x 7" x 2"

# DISTRIBUTION AMPLIFIERS/ SWITCHER

## VM-6A Video/Audio Distribution Amplifier with Five Outputs

A broadcast quality distribution amplifier providing up to five amplified and isolated video and audio outputs feeding from one video and audio source. State-of-the-art design and compact size, it is excellent for multi-tape copying. The VM-6A is compatible with all the existing TV and video standards (VHS, Beta, PAL, SECAM, and NTSC).

### Specifications

Video Input:	1 input, 75 ohms, 1V, BNC female connector
Audio Input:	1 input, 25K ohms, 1V, RCA female connector
Video Outputs:	5 outputs, 75 ohms, 1V, BNC female connectors
Audio Outputs:	5 outputs, 100 ohms, 1V, RCA female connectors
Video/Audio Non-Linearity:	> 1%
Gain Error (Video and Audio):	< 1dB
Maximum Video Input:	2V p-p into 75 ohms
Signal-To-Noise Ratio (Video):	> 55dB
Power Source:	115VAC, 5W nominal
Dimensions:	2 1/4" H x 6 1/8" W x 4 1/8" D

VM-6A .....\$229.00

## VM-10A Video/Audio Distribution Amplifier with Ten Outputs

A wide-band professional video and audio (stereo) one-to-ten distribution amplifier. A bandwidth of 10MHz allows any professional user an outstanding "workhorse" for any distribution problem. This unit can be cascaded by means of its "loop" outputs allowing it to be used in large distribution configurations. Usable in PAL, SECAM, or NTSC.

### Specifications

Video Input:	Switchable 75 ohms/Hi-Z, 1, 5V maximum, 1 BNC female connector
Audio Inputs:	25K ohms, 1V, 2 RCA female connectors
Video Outputs:	75 ohms, 1V, 10 BNC female connectors
Audio Outputs:	100 ohms, 1V, RCA female connectors
Video/Audio Non-Linearity:	> 1%
Gain Error (Video and Audio):	< 1dB
Maximum Video Input:	2V p-p into 75 ohms
Video Bandwidth:	10MHz $\pm$ 3dB. Internally adjustable to 15MHz
Audio Bandwidth:	20KHz

VS-6EII

## VS-6EII Video/Stereo Audio 4x4 Matrix Switcher

The VS-6EII is a broadcast quality high tech switcher which does all of its switching on microchips. This unit is an advanced video and stereo audio switcher and distribution amplifier in a single compact unit. Parallel switching of four video and stereo audio inputs to four video and stereo audio outputs in any matrix combination to serve as an efficient video/audio control center for routing, monitoring, and splitting signals. All inputs and outputs are isolated and buffered, eliminating channel crosstalk and interference.

### Specifications

Video Input:	4 inputs, 75 ohms, 1V
Audio Input:	4 stereo inputs, 1V, 47K ohms
Video Output:	4 outputs, 75 ohms, 1V
Audio Output:	4 stereo outputs, 100 ohms, 1V
Video Non-Linearity:	< 1%
Video Bandwidth:	8MHz $\pm$ 3dB
Audio Bandwidth:	20-20,000Hz $\pm$ 1dB
Video/Audio Gain Error:	1dB
Connectors:	Video: BNC Audio: RCA
Power:	120VAC, 60Hz

## 1500 Character Generator

### SYSTEM FEATURES:

#### Resident Memory

- Internal text memory and font memory are size interactive • Variable page length

#### Fonts

- 35ns resolution • Multiple resident font capability • 96 characters per font • Multifont library (70 fonts included) • Proportional spacing • Character cell adjustment • 12-56 scan-line character sizes

#### Display Editor

- Instant italics (forward or backward with choice of multiple angles)
- Auto centering (line and page) • Underline • Insert and delete character • Insert and delete row • Seven edge modes: no edge, outline, full border, and 4 quadrants of drop shadow • 8 edge intensity levels

#### Color

- 65,536 colors resident • RGB encoder required for color

#### Dual 3 1/2 Disk Memory

- Loadable operating system software • System initialization user defined by auto-sequence • Page, font, and auto-sequence loadable from disk

The 1500 is a high quality television broadcast character generator system with some graphics capability. It is capable of displaying multiple font styles and sizes in a single message. Custom logos and symbols can be included in the font styles. Each character style and size is created from an entirely different high-resolution font file. None of the fonts is stretched, squashed, or otherwise distorted to achieve multiple effects, which assures consistent quality and legibility in each display.

The 1500 is essentially a two channel system. One channel is the Preview/Status Channel and the other is the Program Channel. All message information is entered into the Preview/Status Channel and then transferred to the Program Channel, allowing editing while on-air.

The 3 1/2" dual disk drive system and the logic system are both in one chassis. The single chassis unit can be used as rackmount or an attractive desktop unit.

<b>1500</b>	Character generator—includes 1500 chassis with two 3 1/2" disk drives, keyboard and 70 standard fonts. Requires color encoder. . . . .	<b>\$ 7,695.00</b>

# CHARACTER GENERATORS

## 1450 Color Character Generator

- 35ns resolution • Capable of producing 65,000 different colors • Six resident fonts • 100 pages of memory and a keyboard • Built-in color encoder • Features enhancements such as italics, edging, outline, four quadrants of drop shadow, and eight intensity levels • Vertical and horizontal flip • Inverted video • Flash and underline • Capable of roll up or down at any of nine speeds • Crawl left or right at any of six speeds • Can be used either downstream or as a stand-alone system • Encoder modulates RGB signals into composite NTSC • Encoder also allows signal to be phased or timed, vertically or horizontally

The 1450 character generator stores in a compact case and can be used in a desktop configuration or as a rackmount unit. The 1450 has 35ns resolution and can produce over 65,000 different colors.

The standard configuration of the 1450 includes six resident fonts, 100 pages of memory, and a keyboard. Built-in is a color encoder with the same high quality and specifications as the popular 1032 Color Encoder.

The 1450 features: Italics (at one of seven angles from 12° to 56°), Edging (with full edge, Outline, four quadrants of Drop Shadow, and eight intensity levels), vertical and horizontal flip, inverted video, flash and underline. The 1450 also has the ability to roll up or down at any of nine speeds and crawl left or right at any of six speeds.

The 1450 can be used "upstream", "downstream", or as a "stand-alone" system. The video signal can be "phased" or timed, both vertically or horizontally, with the primary video source.

## CG-7000 Color Character Generator

- Vertical scroll in four speeds • Full editing capability • Simplified line and page centering • Optional remote control gives random access to first 15 pages or manual sequencing through all pages • Flashing effect available on any character, word, line or page • Drop shadow, lower right, with 0—100 IRE level control shadow • Characters can be filled in or colorized by any external video signal. Allows multicolored or special texturing effects • Key output permits interface to any SEG • Text will only appear within SMPTE safe title area • Special highlight window can surround any line; can be colorized • Manual unit will auto start and run without keyboard. Permits text to be programmed in advance and run later at trade shows, meetings, point-of-purchase displays, etc. • Internal battery protects memory up to three years • Automatic bypass of video during power loss • Will automatically switch to internal sync if genlock source is lost • Crystal controlled sync generator • 80 pages or 12,160 characters of memory space • Proportional spacing • Character special effects • Optional rackmount with slide for main unit • Optional fonts • Auto page sequence in four speeds • Auto sequence of all lines on all pages at any screen position in four speeds, replaces horizontal crawl • 33ns or 42° subcarrier

The CG-7000 is simple and user-friendly. Unlike most other models, the CG-7000 was made for video people, not computer operators. Many complex operations have been made easy by removing them from the keyboard, and are performed with simple, ordinary controls and switches on the front panel of the main unit.

# MULTIPLEXERS/ UNIPLEXERS

## 5300 Optical Multiplexer

The 5300 Optical Multiplexer provides as many as three separate film images projected for televising by a single camera. First-surface mirrors and precision optics ensure excellent results in color TV applications. An integral field lens provides an intermediate image plane upon which both camera and projector lenses are focused. The field lens mounting is designed to permit insertion of a special screen for alignment purposes. The mirrors are shifted by individual electric gear motors through a unique torsion-bar/pitman coupling and produce an "instant" vertical wipe image transfer. The optical transfer assembly is supported for a 48" optical center by a bench pedestal.

\* **5300** For three input sources (small image). Includes optical transfer assembly with field lens and cover, bench pedestal and local control . . . . . \$2095.00

\* **5330** For three input sources (large image). Includes optical transfer assembly and cover, bench pedestal and local control . . . \$3680.00

**5040** Large image field lens and mounting assembly for 5330 Multiplexer. (Required for camera without integral field lens.) . . \$1105.00

## Shelves and Stands

(For 5300, 5330 Multiplexers)

**5104** Stand for cameras or projectors with optical center height between 8 1/4" and 12 1/4". Includes mounting adaptor. (Specify camera or projector model when ordering) . . . . . \$425.00

**5107** Shelf for small camera or projector. Includes mounting adaptor. (Specify camera or projector model when ordering) . . . . . \$310.00

5300 Optical Multiplexer

**510B** Stand for camera or projector with height of less than 8 1/4" from mounting base to center of optics. Includes mounting adaptor. (Specify camera or projector model when ordering) . . . . . \$425.00

\* Does not include camera or projector mounting shelves or stands.

## 5100 Series Optical Diplexer/Uniplexer

The 5100 provides two separate film images that may be selectively projected for televising by a single camera. The 2-input projector complement may include either 16mm or Super 8 motion picture film in combination with 35mm 2" x 2" slides.

**5116** Assembly with first surface mirror and field lens. Includes shelves and adaptors for camera and 16mm film projector. (Specify camera and projector when ordering). Requires 50mm camera lens with 3/8" extender and 3" projection lens. (Lenses not included) . . . . . \$1200.00

**5116 + 35** Diplexer Assembly—for two input sources. Includes first surface mirror, field lens, bench assembly and shelves (desktop mount) for 35mm slide projector and 16mm film projector. (Specify camera or projector, dedicated or dolly-up) . . . . . \$1790.00

**5135** Uniplexer Assembly same as above for one 35mm slide projector. (Less mirror) . . . . . \$1075.00

## Lens Accessories

**5015** Lens Extender—for "C" mount lens: 3/16" for 2/3" format camera. 3/8" for 1" format camera . . . . . \$ 21.00

**5017** 50mm f/1.4 Lens—for "C" mount camera, includes lens extender: 3/16" for 2/3" format camera. 3/8" for 1" format camera. . . . . 240.00

**5019** 55mm lens with Bayonet mount for prism optic 2/3" tube cameras . . . . . 1515.00

**5023** Variable Focusing Kit—for use on 4320 projectors, with 7" lens, when full projected slide image is preferred, from all slide formats. (Normal projected image is overscanned to SMPTE standards) . . . . . 395.00

**5035** 35mm Lens with Bayonet mount for WV-555 1/2" tube camera . . . . . 890.00

5100 Series Optical Diplexer/Uniplexer

## Multiplexer Accessories

**5021** Test Slide/Loop Kit—includes Resolution, Registration, and Flesh Tone slides and Resolution 16mm film loop . . . . . \$ 225.00

**5021A** Test Film, 6' loop, Resolution 16mm film . . . . . 42.00

**5021B** Test Slides, includes Resolution, Registration and Flesh Tone slides . . . . . 200.00

**5036** Neutral Density Filter Kit—assortment of 6 filters, 2 pieces of glass and mounting hardware supplied. (For small image. One kit for each projector recommended) . . . . . 110.00

**5037** Neutral Density Filter Kit—assortment of 6 filters, 2 pieces of glass and mounting hardware supplied. (For large image. One kit for each projector recommended) . . . . . 235.00

**5050** Neutral Density Light Wheel & Automatic Light Control—maintains output from camera at 1V composite video. (Uses 2550 Remote Control) . . . . . 2150.00

# FILM PROJECTORS/ REMOTE CONTROLS

## Film Projectors

- ST-180(R)** ELMO Regular 8mm 15fps Projector. Includes 25-50mm zoom lens, silent only. (Requires 5107 shelf, uses 2551 remote control and 3510 remote adaptor.) . . . \$ **800.00**
- ST-180(S)** ELMO Super 8mm 20fps Film Projector. Includes 25-50mm zoom lens, silent only. (Requires 5107 shelf, uses 2551 remote control and 3510 adaptor.) . . . . . **800.00**
- HD-1500** Pitch Controller (Super 8 sound) . . . . . **625.00**
- GS1200TC** ELMO Super 8 24fps TV Film Projector. Includes 25-50mm zoom lens, optical and magnetic playback, and magnetic record. (Requires 5108 stand, uses 2553 remote control and 3522 adaptor for remote control.) . . . . . **1875.00**
- 16-CLLTI** ELMO Slotload 16mm TV Film Projector. Includes 75mm lens, optical and magnetic playback. (Requires 5108 stand, uses 2551 remote control and 3518 adaptor for remote control.) . . . . . **2640.00**
- ENT-OTLTI** Eiki Autoload 16mm TV Film Projector. Includes 3" lens, optical playback and remote adaptor. (Requires 5108 stand, uses 2554 remote control.) . . . . . **2373.00**
- ENT-2LTI** Eiki Autoload 16mm TV Film Projector. Includes 3" lens, optical and magnetic playback, and remote adaptor. (Requires 5108 stand, uses 2554 remote control.) . . . . . **2924.00**
- ENT-3LTI** Eiki Autoload 16mm TV Film Projector. Includes 3" lens, optical and magnetic playback, magnetic record and remote adaptor. (Requires 5108 stand, uses 2554 remote control.) . . . . . **3475.00**

**Note:** It is recommended that one neutral density filter kit, 5036 or 5037, be ordered for each projector in the system.

## Slide Projectors

- 4300** Eastman Single Drum Slide Projector. With Kodak III E Projector, holds 80 35mm slides. Includes modified 7" lens and adjustable mount. (Requires 5107 shelf or 5108 stand, uses 2543 remote control and 3504 adaptor for remote control.) . . . . . \$ **590.00**
- 4320** Dual Drum Dissolve Slide Projector, with Kodak III E Projectors, holds 160 35mm slides. Provides a large capacity projector with a time controlled dissolve transition. The dissolve time and the dwell time can be programmed to run automatically. The 4320 dual offers the alternate sequencing of up to 160 glass, metal, plastic, or paper-mounted 2" x 2" slides. Image transfer between successive slides is accomplished by a means of a stationary optical beam splitter, thus slides selected from either of the two storage drums share a single, high-quality projection lens. This, together with the use of a quartz halogen light source, makes the projector ideal for color television applications. The single-chip, programmable microcomputer based electronics allow for user computer interface, an unlimited number of remote inputs, and a real time sequencer. Includes modified lens and adjustable mounting hardware. (Requires 5107 shelf or 5108 stand, uses 2545 remote control and 2546 tone generator/decoder.)  
With 7" lens for small image system . . . . . **4200.00**  
With 7 1/2" or 9" lens for large image system . . . **4700.00**

## Remote Controls

- (All modules use 1/3 remote control frame width unless otherwise specified.)
- 2540** Remote Control Frame. Accepts up to three remote control modules. Blank filler panels provided, if necessary. Frame: 1 3/4" H x 19" W x 1 1/4" D . . . . . \$ **60.00**
  - 2541** Remote Control for 5300 or 5330 Multiplexer. Controls input sources 1, 2 and 3. (Not required when LTI projector remote controls are furnished.) . . . . . **120.00**
  - RC50-2541** 50' cable . . . . . **46.00**
  - RC100-2541** 100' cable . . . . . **75.00**

- 2543** Remote Control for 4300 Single Drum Slide Projector. Controls "Off," "Ready," "Forward," and "Reverse" slide change . . . . . \$ **150.00**
- RC50-2543** 50' cable . . . . . **62.00**
- RC100-2543** 100' cable . . . . . **105.00**
- 2545** Remote Control for 4320 Dual Drum Dissolve Slide Projector. Includes all local control functions. Full width remote frame furnished . . . . . **515.00**
- RC50-2545** 50' cable . . . . . **80.00**
- RC100-2545** 100' cable . . . . . **125.00**
- 2546** Tone Generator/Decoder for 4320/2545 Dissolve Projector System . . . . . **350.00**
- 2549** 24V Power Supply for Uniplexer Remote Control. (Required only on uniplexer with stationary mirror.) . . **190.00**
- Remote Control for 5050 ND Light Wheel. . . . . **80.00**
- RC50-2550** 50' cable . . . . . **47.00**
- RC100-2550** 100' cable . . . . . **75.00**
- 2551** Remote Control for film projectors. Controls "Off," "Ready," and "Show" modes. . . . . **120.00**
- RC50-2551** 50' cable . . . . . **49.00**
- RC100-2551** 100' cable . . . . . **80.00**
- 2553** Remote Control for ELMO GS1200TC Projector. Controls "Off," "Ready," "Show," "Forward," and "Reverse." . . . . . **150.00**
- RC50-2553** 50' cable . . . . . **73.00**
- RC100-2553** 100' cable . . . . . **115.00**
- 2554** Remote Control for Eiki ENT-2LTI and ENT-3LTI Projectors with LTI modification. Controls "Off," "Ready," "Show," "Forward," and "Reverse." . . . . . **150.00**
- RC50-2554** 50' cable . . . . . **73.00**
- RC100-2554** 100' cable . . . . . **115.00**

## Adaptors for Remote Control

- 3504** Remote Adaptor for 4300 Slide Projector . . . . \$ **115.00**
- 3510** Universal Remote Adaptor with AC power cord for all projectors without remote provisions. Includes local controls, "Off," and "Ready." (Used with 2551 Remote Control.) . . . . . **155.00**
- 3518** Remote Adaptor for 16-CLLTI ELMO Projector . . . **155.00**
- 3522** Remote Adaptor for GS1200 TC ELMO Projector. . **150.00**

**Note:** One Instruction/Service Manual supplied with each Multiplexer and both Dual Drum Slide Projectors.  
Extra Manual . . . . . \$ **25.00**  
Service Manual for Eiki and ELMO Projectors . . . . . **45.00**

# DISTRIBUTION AMPLIFIERS

## DA-5030 and DA-5040

### Audio and Video Distribution Amplifiers

- Each DA has 6 outputs • Broadcast quality video specs • VHS and Beta Hi-Fi quality audio specs • DA-5030 will distribute SMPTE time codes • DA-5040 also functions as video equalizing amp • External power supply • Rackmountable, 4 per space • Front panel level and compensation controls • Front panel test points • Signal-to-noise ratio: DA-5030: 90dB, 0dBm in/out, 600 ohm load; DA-5040: 75dB peak video to RMS noise, weighted • Connectors used: DA-5030: RCA; DA-5040: BNC

#### DA-5030 Audio DA

This product is equally useful for distributing audio signals for SMPTE time codes. The DA-5030 has one looping audio input and six outputs. This DA is mono only, but its input can be looped to additional DA inputs to increase the total number of outputs. The compensation adjustment can be used to offset the poor frequency response of 1/2" and 3/4" VCR audio tracks.

Accessories included: Service info, power loop cable  
Options: PS-20 power supply, RM-4 rackmount

#### DA-5040 Video DA

This product is equally useful as either a distribution amplifier or a video equalizing amplifier. The DA-5040 has one looping input and six outputs. The input can be looped to additional DA inputs to increase the total number of outputs. The compensation adjustment can be used to equalize or compensate for high frequency loss on long cable runs. Up to 1500 feet of RG-59/U can be compensated.

Accessories Included: Service info, power loop cable  
Options: PS-20 power supply, RM-4 rackmount

#### DA-5030/5040 Power Supply

Both DAs are powered from an external power supply. Power can come from the optional PS-20 Power Supply which furnishes 18VDC, 9W. As an alternate, any regulated 12VDC power supply can be used. (Any hum or noise present on a 12VDC power supply may not be fully filtered by the DA. Therefore, use special care in selecting a 12VDC supply.) The DAs have looping DC power connectors which allow multiple DAs to be powered from a single power supply. Each PS-20 Power Supply will operate two DA-5040 or four DA-5030.

DA-5030 .....	\$220.00
DA-5040 .....	220.00
RM-4 Rackmount adaptor .....	25.00
PS-20 Power supply, AC adaptor .....	24.00

### DA-5020 Video and Audio Distribution Amplifier

- Video and stereo audio DA combined into one unit • Broadcast quality video specs • VHS and Beta Hi-Fi quality audio specs • Rackmountable • More outputs per rack space — 12 video, 12 audio • Front panel level and frequency compensation controls • Front panel test points • NTSC and PAL operation • Signal-to-noise ratio: Video: 75dB peak video to RMS noise, weighted; Audio: 90dB, (0dBm in/out, 600 ohm load)

The DA-5020 is a versatile distribution amplifier that combines video and stereo audio into one cabinet. Twelve matched, isolated video outputs are provided from a single video input. Twelve stereo audio outputs are provided from each of the two audio inputs. The inputs are looping or bridging so that additional DAs can be stacked to provide more outputs, such as 24, 36, 48, etc. The compensation control on the audio DA is designed to help offset the loss of frequency response encountered on 1/2" and 3/4" VCR audio tracks. The video compensation control will compensate for the loss of high frequencies on long cable runs. Up to 1500 feet of RG-59/U can be compensated.

Accessories Included: Rackmount hardware, service info  
Options: 230VAC version, specify DA-5020-PAL

DA-5020 .....	\$590.00

DA-5020

1032

### 1032 NTSC Color Encoder

- High quality, low cost R-Y, B-Y axis encoding • Ideal for non-broadcast, industrial applications • Allows the RGB source to have H and V phase matching • Contains a complete, RS-170A genlocking sync generator • Internal sync generator has stand-alone crystal mode • Operates in both upstream and downstream configurations • RGB source must be able to genlock to NTSC sources

The 1032 changes RGB video, the 3-wire output of many character generators, cameras, etc., into composite NTSC video. The 1032 also allows the RGB signal to be "phased" or timed both vertically and horizontally with primary video. The 1032 encoder is an ideal mate to the 1500 character generator, and can also be used equally well with many other television products and systems.

The 1032 incorporates a high performance, single chip encoder which modulates on the R-Y and B-Y axis. Because the 1032 encodes in this manner, it cannot be used for broadcast television applications. It is, however, ideal for virtually any non-broadcast application.

The 1032 contains a complete genlocking, RS-170A sync generator that will readily lock to stable or unstable sources. It further has the ability to automatically switch over to a temperature-stabilized, internal, crystal-controlled sync generator in the event the program material is lost. Internal jumpers can be programmed to allow the unit to operate in various modes including upstream, such as an input to a switcher, or downstream, such as utilizing the 1500 character generator built-in keyer.

The capability of the 1032 can be further enhanced by the addition of the optional 1034 keyer/fader module. This adds the ability to fade and dissolve keyed RGB video to and from the program material.

The 1032 will not allow encoding of non-standard, non-NTSC, or computer-generated signals. The RGB source must be 525 line, 60 field, analog, and capable of genlocking.

1032 .....	\$1325.00
1034 Keyer/Fader .....	600.00

(801) 972-5900

## VIDEO PROCESSORS/ ROUTING SWITCHERS

### VC-2000 Professional Video Enhancer/Processor

- Ideally suited to 1/2" and 3/4" videotape correction
- Copy-guard stabilizer
- Fade to black control
- Four audio and video outputs
- Rackmountable
- Automatic regeneration of all sync signals
- Image enhancement and noise reduction
- Signal-to-noise improvement-luminance: Up to 6dB with "Noise Level"
- Useful as a remote camera control unit
- Optional plug-in RF modulator
- Signal-to-noise ratio: 60dB
- Connectors used: Video: BNC; Audio: RCA, RF-F

The unit automatically generates sync and blanking signals, both horizontal and vertical, plus color burst signals. The insertion of synchronizing signals plus back porch clamping permit the VC-2000 to solve a variety of stability problems. Jitter, flicker, bending, and rolling are automatically corrected in most cases.

VC-2000

Accessories included: Rackmount hardware

VC-2000 ..... \$860.00  
VC-2000/PAL PAL version, 230VAC ..... 860.00

### VC-2500 Automatic Video Processor

- Automatically maintains correct video levels
- Automatically maintains stable, regenerated sync
- Ideal for driving RF modulators
- Ideal for video tape duplicating
- Clamp circuit removes hum and flicker
- Four video and audio outputs
- Available in NTSC or PAL models

The VC-2500 is ideal for applications where it is necessary or desirable to provide technically correct levels and stable video at all times, automatically and unattended. The VC-2500 is a video processor and as such it completely regenerates all horizontal and vertical sync and blanking signals. The sync regeneration along with an active back porch clamp circuit will

VC-2500

correct most of the stability problems encountered with video. Problems such as jitter, satellite receiver flicker, bending and rolling are corrected automatically in most cases.

VC-2500 ..... \$560.00  
VC-2500/PAL PAL version, 230VAC ..... 560.00

### RS-400, RS-410, and RS-420 Passive Routing Switchers

#### RS-400 Passive Routing Switcher

- 12 video inputs, 1 output, 12 stereo audio inputs with output for each channel
- Unbalanced
- Audio follows with video or switches
- Pushbuttons have self-indicator feature
- Suitable for desktop mounting
- Rackmount hardware

#### RS-410 Passive Routing Switcher

- Six stereo audio inputs with output for each channel
- Unbalanced
- Suitable for desktop mounting
- Four switchers can be rackmounted in optional RM-6 rackmount
- Pushbuttons are non-indicating

#### RS-420 Passive Routing Switcher

- Six video inputs, one video output
- Pushbuttons are non-indicating
- Suitable for desktop mounting
- Four RS-410/RS-420 switchers can be rackmounted in optional RM-6 rackmount

These three switchers can be used in general purpose audio or video routing applications where selection from multiple sources is required. They should not normally be used when the switching must occur "on line" or during a program in process, because they could introduce a glitch at the switching point.

RS-410

RS-420

RS-400

The switchers contain no active electronics and consume no power. High quality switches with gold contacts are used for high reliability operation. Gold plating is also used on all the audio input and output connectors to improve reliability. All unselected inputs are internally terminated to help minimize crosstalk. All pushbuttons are interlocking.

RS-400 12x1 video/stereo audio ..... \$300.00  
RS-410 6x1 stereo audio ..... 100.00  
RS-420 6x1 video ..... 100.00  
RM-6 Rackmount for RS-410/420 ..... 60.00

# OSCILLOSCOPES

## LBO-5825 Digital Storage Oscilloscope

The LBO-5825 is a versatile 35MHz, 2-channel digital storage oscilloscope. Packed with features that are not normally found on DSOs of its class, it has a true 5MHz digital sampling rate, allowing detailed observation of relatively short transients. Also, individual A/D converters for each channel ensure that a point-by-point comparison of channels may be made. The 1K word by 2-channel memory allows over 1000 points per channel to be stored. The Memory Protect features allows storage of reference waveforms. For example, the upper and lower limits of an amplitude adjustment may be stored in memory. Also, a battery back-up of the memory is provided, so the scope may be transported while retaining the content of the memory for up to two weeks. X-Y recorder outputs are provided for hard copy of waveforms. Up to 9 div. of pre-trigger view allows observation of critical pretrigger events that often gives clues in determining the causes of transients. The Storage mode is used so that the screen may be automatically updated, and the Roll mode provides the 5825 with a chart-recorder capability.

In addition, the LBO-5825 is a 2-channel, 35MHz Real Time Oscilloscope. With many of the features of Leader analog oscilloscopes, its 500µV sensitivity, coupled with channel 1 output and complete triggering facilities allows this scope to be used in a number of conventional applications. Backed by Leader's outstanding reputation, the LBO-5825 is the perfect scope for research and development, service, and production environments.

**LBO-5825** ..... \$2850.00

**LBO-5825**

**LBO-325**

**LCD-100**

## LCD-100 Digital Multimeter Storage Oscilloscope

The LCD-100 is a compact, lightweight battery-powered combination digital multimeter and storage oscilloscope ideally suited for field service applications. Weighing just over 2 lbs., and small in size, it easily fits into a tool kit or briefcase.

The DMM section measurement functions include AC/DC voltage, AC/DC current and resistance. The auto-ranging mode automatically selects the range with the greatest accuracy and resolution. Function readout, visible from any angle, is enhanced by its large, 3200-count, 3½ digit display and high contrast LCD.

The LCD-100 offers a 200kHz bandwidth which allows monitoring and evaluation of slow voltage changes and transients. The pre-trigger view, which allows observation of pre-trigger events, is extremely helpful in troubleshooting the causes of transients. Also the roll mode allows it to display slowly occurring transients. For optional display of waveforms, the time base can be automatically set by the auto-range function. And, up to three waveforms, including setting conditions, can be stored in memory. There's also battery back-up of the memory, and a low-power alert.

**LCD-100** ..... \$850.00

## LBO-518 100MHz, 4-Channel, Dual Time Base

The LBO-518 is a versatile 100MHz quad channel alternate time base oscilloscope. It features front panel 4-channel operation, individual or simultaneous display of main and delayed time bases and alternate channel triggering for simultaneous viewing of asynchronous signals. Separate, independent comprehensive triggering facilities for both main and delayed time bases include HF reject, LF reject, video sync separator, alternate channel triggering and trigger level control with preset. Also included are variable trigger hold-off, line triggering and auto, normal and single sweep modes.

A dome mesh PDA CRT with 20kV accelerating potential allows critical observation of fast rise time signals at low repetition rates, events which are often difficult to observe due to limited trace intensity.

The vertical input section features 0.5mV sensitivity, a 20MHz bandwidth limiter, beam finder and add/subtract modes. Even with all these capabilities, the LBO-518 is still small enough to stow under your airline seat.

**LBO-518** ..... \$1995.00

## LBO-516 100MHz, Dual Time Base

The Dual Time Base Oscilloscope LBO-516 features full 3-channel capability, alternate triggering for simultaneous display of two asynchronous signals, alternate time base and eight trace capability. Excellent triggering sensitivity, along with HF reject, video sync separators, alternate channel triggering and trigger slope and level controls with preset make obtaining a jitter-free display a simple task. The LBO-516 also features variable trigger holdoff, line triggering for observation of line related signal components and auto, normal and single sweep modes. The vertical input section of this scope offers 500µV sensitivity, and add, subtract and X-Y modes. The dome mesh PDA CRT with 20kV/2kV accelerating potential provides a bright, crisp trace, even at high sweep rates. And, a CH-1 output is provided on the front panel so that an additional instrument, such as a frequency counter, may be easily connected.

**LBO-516** ..... \$1495.00

## LBO-325 60MHz/LBO-323 20MHz

### Attache Case Oscilloscopes

The LBO-325 and LBO-323 are ultra compact portable oscilloscopes with big scope features and performance. Perfect for field service engineers and technicians, the Attache Case Oscilloscopes are small and light enough to be taken on every service call, every time, saving time-wasting, repeat visits and trips to the shop. Weighing only 9 lbs., each is compact enough to fit inside a 3" attache case with plenty of room for a multimeter, manuals and tools.

The LBO-325 is a 60MHz, 2-channel, dual time base oscilloscope. Its 3½", 12kV PDA CRT with illuminated graticule makes critical waveforms easy to see. A calibrated delayed time base with alternate sweep mode permits viewing the main signal and magnified details at the same time.

For less demanding applications, the LBO-323 offers 20MHz, 2-channel operation. And both scopes can display two asynchronous signals stably at the same time because of the alternate triggering mode and the complete triggering facilities found on all Leader scopes.

The Attache Case Oscilloscopes are rugged enough to go anywhere, anytime—bringing full featured scope quality into the field. (Attache case is not included).

**LBO-323** ..... \$1200.00

**LBO-325** ..... \$1500.00

**LBO-315 60MHz, 2 channel, battery-powered** ..... \$1850.00

# OSCILLOSCOPES

## LBO-526 60MHz 2-Channel Dual Time Base

The LBO-526 is a simple-to-operate 60MHz 2-channel oscilloscope that still offers all of the flexibility and advanced features required for critical applications.

The LBO-526 has a true calibrated delayed time base with both run after A and trigger after A modes for jitter-free operation. 500 $\mu$ V maximum sensitivity and 20ns maximum sweep speed allow analysis of low level and high frequency signals, while still offering a maximum input rating of 600VDC (plus AC peak).

The LBO-526 has an illuminated internal graticule for precise measurements and photography and 12kV CRT accelerating potential for maximum trace intensity even when observing transients at high sweep speeds.

**LBO-526** ..... \$1195.00

## LBO-524/524L 40MHz, Dual Trace, Dual Time Base

The LBO-524 is designed to meet a broad range of applications in design, testing and servicing of both analog and digital circuits and equipment. Its large 8 x 10cm PDA CRT provides sharp bright displays even at highest sweep rates. Comprehensive triggering controls including holdoff, alternate triggering and delayed sweep triggered functions permit stable displays for even the most complex signals. With 0.5mV sensitivity, extremely low level signals can easily be observed. A channel 1 output is available on the rear panel to drive other less sensitive instruments such as a frequency counter with an input level as low as 500 $\mu$ V. The dual time base permits accurate observation and time internal measurements of complex waveforms. The LBO-524L is also equipped with signal delay lines to allow observation of pretrigger information.

**LBO-524** ..... \$ 995.00  
**LBO-524L** Same as 524 Plus Signal Delay ..... 1050.00

## LBO-523 40MHz, Dual Trace, 0.5mV Sensitivity

The LBO-523 is a 40MHz oscilloscope economically designed for applications requiring medium bandwidth and extensive triggering facilities where costly features such as delayed sweep and signal delay lines are impractical. Trigger controls include variable hold-off, alternate channel triggering, HF reject, vertical and horizontal TV coupling and line source triggering. The vertical input sensitivity of 0.5mV, add and subtract modes and a CH-1 output connector add to the unit's total capability. Complex waveforms can be viewed easily even at highest sweep rates without readjusting the front panel controls due to its bright PDA CRT with 7kV accelerating potential and an autofocus feature. The LBO-523 is well suited for many design, production, repair and educational test requirements.

**LBO-523** ..... \$895.00

## LBO-522 20MHz, Dual Trace, 0.5mV Sensitivity

The LBO-522 is an economical 20MHz oscilloscope versatile enough for almost any lab or field work within its frequency range. The input sensitivity of 0.5mV allows observation of extremely low level signals easily on its 8 x 10cm rectangular CRT equipped with an internal graticule. Alternate triggering provides a stable display of two waveforms, unrelated in frequency, simultaneously. The unit features a full range of triggering controls including HF reject to filter unwanted noise from the display and line triggering for the observation of line frequency related signal components. A CH-1 rear panel output is standard which permits using the LBO-522 as a sensitive, accurate preamplifier to drive other less sensitive instruments. The units "human engineered" front panel ensures easy, error-free operation.

**LBO-522** ..... \$695.00

LBO-524/524L

LBO-522

## LBO-513A 15MHz, Single Trace, 1mV Sensitivity

## LBO-514A 15MHz, Dual Trace, 1mV Sensitivity

The single trace LBO-513A and the dual trace LBO-514A are compact 5" oscilloscopes that offer maximum performance at low cost. Equipped with both vertical and horizontal magnifiers, they have 1mV sensitivity with X5 magnification and a maximum sweep speed of 0.1 $\mu$ s/cm (0.2 $\mu$ s/cm to 0.5 $\mu$ sec in 18 calibrated steps plus X5 magnification). Rise time of both oscilloscopes is 23ns with normal and automatic, + or - triggering. The LBO-514 provides both chop and alternate dual trace displays.

The LBO-514AP is available with a higher intensity CRT and internal graticule.

**LBO-513A** ..... \$495.00  
**LBO-514A** ..... 595.00

## LBO-310A 4MHz Recurrent Sweep

The LBO-310A is a compact, general purpose instrument designed to provide long, reliable service in production test, repair, and educational applications. Its simple front panel with a minimum of controls makes it ideal for use by production personnel, students, and non-technical operators. Its low cost opens up many applications where waveform monitoring might otherwise be economically prohibitive. Sensitivity is 20mV/division. Sweep frequencies range from 10Hz to 100kHz.

**LBO-310A** ..... \$325.00

## LOC-7005 Oscilloscope Calibrator

The LOC-7005 is an oscilloscope calibrator which combines the functions most needed to test, repair, and calibrate oscilloscopes into one compact instrument. The LOC-7005 provides three outputs:

An amplitude output to calibrate the vertical axis, a time marker output to calibrate the time base (sweep speed), and a fast rise time square wave to check the pulse response and rise time

The LOC-7005's small size and versatility make it the ideal instrument for service and calibration facilities which must maintain their own field service and general purpose oscilloscopes.

**LOC-7005** ..... \$1395.00

# OSCILLOSCOPE GLOSSARY SELECTION CHART

## OSCILLOSCOPE GLOSSARY

**Accelerating Potential**—The potential applied to the CRT to accelerate the electrons emitted from the cathode. As a general rule, the higher the accelerating potential, the brighter the display. This is especially important at fast horizontal sweep speeds and multiple traces or to observe rapid transients.

**Add/Subtract**—These modes allow the displaying of the algebraic sum or difference of two signals. The subtract mode is especially useful in measuring signals not referenced to ground and eliminating unwanted signals common to both inputs such as hum.

**Alternate Channel**—A function that allows more than one channel to be displayed by alternately switching the vertical input to the CRT between two (or more) input channels at the end of each sweep. Used at sweep speeds of 0.2mS/div or faster, this mode will result in a flickering display at slower sweep speeds. In this case, the Chop function should be used.

**Alternate Time Base**—A feature that allows the main and delayed time base to be displayed simultaneously.

**Alternate Trigger**—A function that allows the sweep to be triggered alternately by two different triggers, which, in conjunction with an alternate channel function, allows the display of two signals asynchronous.

**Auto Triggering**—A feature that allows the sweep circuit to free run and display a base line in the absence of an input signal. Automatically switches to triggered sweep mode when a signal is applied.

**Bandwidth**—The frequency range of signals that an oscilloscope will display with less than a 3dB rolloff in amplitude.

**Chop**—The Chop function switches the vertical channel input to the CRT, usually at a rate of approximately 250kHz, to simultaneously display more than one channel. Used for sweep speeds of 0.5mS/div or slower, the alternate channel function should be used at faster sweep speeds.

**Common Mode Rejection**—The attenuation of a common signal (in dB) that appears between the signal high input and ground and the low input and ground.

**Coupling**—The manner in which a signal or trigger is connected to the oscilloscope's internal circuitry. DC coupling allows all components of the signal to pass; AC coupling blocks any DC component. HF reject and LF reject insert high or low frequency rejection filters in the input circuitry.

**Deflection Coefficients (Sensitivity)**—The signal amplitude required for a vertical deflection of 1 division; adjusted by the vertical volts/division control. Sensitivity is the smallest amplitude signal that yields one major division of deflection.

**Delay, Signal**—The amount of time (usually nanoseconds) between the beginning of the horizontal sweep and the vertical input signal; allows viewing of pre-trigger phenomena. This is accomplished by inserting a delay line in the signal channel.

**Delayed Sweep**—A second time base (sweep) that can be started after a variable delay from the start of the main (undelayed) time base. This allows any selected portion of the main time base signal to be expanded and displayed over the entire CRT.

**Dual Time Base**—A feature that allows the sweep speeds of the two calibrated time bases to be set independently.

**Graticule**—A grid or scale either etched or overlaid on the CRT face for making amplitude and frequency measurements. An internal, illuminated graticule is parallax-free and required for precise measurements. It is also ideal for photography.

**Hold-Off**—Allows the operator to choose, by altering the dead time between the end of one horizontal sweep and the start of the next, on which trigger to synchronize in a complex trigger signal.

**Jitter, Delay Time**—The term used for describing the horizontal instability of a waveform displayed in the delayed sweep mode.

**Lisajous Pattern**—This pattern results when using external horizontal and vertical input signals in the X-Y mode. When the X and Y input controls are properly adjusted, the size and shape of the pattern allows phase shift to be measured.

**Rise Time**—The time it takes for an oscilloscope display to rise from 10% to 90% of the amplitude of an applied step voltage.

**Trigger**—The signal that starts the horizontal sweep. The trigger can be either derived from the vertical input signal or from a variety of external sources, either directly or harmonically related to the vertical input signal frequency.

**Trigger View**—A function that displays the signal being used for triggering the sweep.

**TV-H, TV-V Triggering**—Coupling modes that insert sync separators in the trigger circuitry to allow triggering at the vertical or horizontal sync rates of a composite video signal.

**X-Y Mode**—Instead of using the oscilloscope's internal circuitry to generate the horizontal sweep signal, an external signal is applied. This allows phase and swept frequency response measurements to be made.

**Z-Axis Modulation**—Also known as intensity modulation, an externally applied signal is used to blank or intensify the trace. Typically used in video applications, in the X-Y mode, for time or frequency marking.

# TEST EQUIPMENT

## LBO-5860B/H Waveform Monitor

The LBO-5860B is an economical half-rack Waveform Monitor. The unit has an internal graticule and a 7kV (16kV "H" model) accelerating potential for bright, easy-to-read displays. Total RGB and YRGB (optional) capability is available and horizontal sweep speeds of 2H (2 lines), 1 $\mu$ s/div (expanded 2 lines), 2V (2 fields) and 2V Mag (expanded 2 fields) are standard.

The LBO-5860H Waveform Monitor offers all these features in addition to allowing the Vertical Internal Test and Reference signals to be displayed by a front panel line selector. Lines 7 through 21 can be selected from field one or two without interference from the active portion of the video signal. The instrument also has a blanking output to blank the companion Vectorscope during the active portion of the video signal allowing differential gain and phase measurements to be accomplished easily.

The LBO-5860B/H are half-rack mountable and can be mounted side by side with the LVS-5850B Vectorscope. The LBO-5860H is also available in a PAL/SECAM version as the LBO-5861A.

LBO-5860B NTSC . . . . . \$1740.00

LBO-5865 NTSC (full line select). . . . . 2200.00

LBO-5860B

## LVS-5850B Vectorscope

The LVS-5850B Vectorscope provides a convenient method for observing and measuring the relative phase and amplitude of chrominance signal components. It utilizes a unique technique which electronically displays the "inner boxes" which represent error limits of  $\pm 2.5^\circ$  and  $\pm 2.5$  IRE units. This improves the accuracy of phase and amplitude adjustments by eliminating errors due to CRT non-linearities. The LVS-5850B includes three loop-through inputs including a dedicated external subcarrier reference input which is front panel selectable. Either of the two composite video loop-through inputs can also be selected as the reference signal and all three inputs can be displayed individually.

The unit is also equipped with a Z-axis blanking input to provide blanking during the active portion of the video signal and unblanking during the VITS signal for a stable, jitter-free display. A test circle pattern is also selectable for a quick calibration check of the instrument. Another front panel pushbutton provides for either 100% or 75% amplitude levels. A gain control, with a detented calibrated position, provides for continuous amplitude adjustment. A phase control permits rotating the display through 360°. The LVS-5850B is supplied in a protective carrying case or in a 1/2" rack width configuration.

LVS-5850B . . . . . \$1995.00  
LVS-5851A PAL Vectorscope . . . . . 2420.00

LVS-5850B

## LVM-5863A EFP Monitor

The LVM-5863A Monitor has full monitoring capabilities for video cameras, VCRs and audio recorders. Its 2H/2V waveform monitor provides the most useful displays an operator can have. A switchable IRE filter facilitates lens-opening checks. And the 1V/0.25V selector acts as a 4X magnifier to simplify setup level and black-balance checks. Yet, the LVM-5863A is easy to use since controls are kept to a minimum. And, it makes field productions as technically and artistically correct as they can be.

LVM-5863A . . . . . \$1990.00  
LBO-5864 EFP Waveform Monitor . . . . . 1300.00

LVM-5863A

## LFC-945 CATV Level Meter

The LFC-945 CATV Level Meter is a rugged, accurate instrument for measuring signal levels in CATV and MATV Systems. It covers the two frequency ranges 40 to 300MHz and 470 to 890MHz with accuracies of  $\pm 1.5$ dB and  $\pm 2$ dB respectively. Tuning of individual channels is facilitated by large dials marked with both frequency and channel, an electronic fine tuning control and a built-in sound amplifier and a loud-speaker which enables separate field strength measurements of the audio and video signals.

Three 20dB switchable attenuators and a 25dB meter scale provide an input signal range of -35 to +60dBm (0dBm = 1mV).

The LFC-945 will also measure AC voltages on the cable system from 0 to 50VAC with an accuracy of  $\pm 5\%$  fs.

Power is supplied by rechargeable NiCad cells and the power switch is automatically set to off when the protective cover is closed.

The LFC-945 weighs just 8.8 lbs. and is supplied with a battery charger, rechargeable batteries, 300:75 ohm balun and nylon web carrying/operation strap.

LFC-945 . . . . . \$875.00

## LFC-944B VHF/UHF Field Strength Meter

The LFC-944B is a portable battery operated field strength meter designed for testing and measuring the performance of CATV and MATV systems. It provides for measuring levels of -40 to +60dBmV on VHF channels and -30 to +40dBmV on UHF channels. The meter scale is also calibrated to make measurements in microvolts. An accurate attenuator provides up to 70dB attenuation in 10dB steps. Accurate detent tuning is provided for VHF channels and UHF tuning for channels 14 to 83 is with a continuous control. The LFC-944B is supplied with a sturdy carrying case.

LFC-944B . . . . . \$595.00

LCG-420

## LCG-420 NTSC Sync/Test Signal Generator

The LCG-420 main frame features a precision sync generator, color bar generator, convergence generator and routing switcher. Up to three modules can be accommodated; a multiburst/video-sweep unit, linearity generator and a pulse-bar unit.

The sync generator features full RS-170A compliance using the internal reference. The sync generator will lock to externally-supplied sync/subcarrier, or will genlock to composite video or blackburst.

The color bar generator provides full field, EIA or SMPTE bars as well as split-field color bars with Y reference, solid red or reversed color bars in the lower half. Full raster displays of primary and complementary colors at 75% amplitude are also available.

The convergence section of the main frame provides a combined dot crosshatch pattern set up for use with the Ball chart. The convergence pattern is also available with larger squares (fewer intersections) superimposed over the window and as a border on the color bar pattern.

The multiburst/sweep module offers standard multiburst signals with the frequency of the last burst variable. A three digit readout shows the last burst frequency, as well as the frequency of a variable drop-out marker in the sweep mode, and the frequency of the CW video signal in the manual mode. The sweep signal repeats at the field rate and reaches 10MHz.

## LCG-400 NTSC Video Sync/Test Generators

The LCG-400 provides both genlock and internal synchronization with the full range of video signals needed for testing and adjusting monitors, cameras, VCRs and overall performances of color and B & W TV systems. It is available with either multiburst (LCG-400M) or sweep-marker (LCG-400S) generators. The LCG-400 will sync with all standard composite video and blackburst signals including those from quad head and helical scan VTRs. Patterns include EIA and full field color bars, 5-step modulated staircase, 8 color rasters, crosshatch and dot convergence, circle and corner marker with on/off control of chroma and luminance. Both interlace and progressive scanning are provided. Outputs include composite video, subcarrier, blackburst, selectable vertical or horizontal drive, and CH 3/4 RF. Units are supplied for either bench-top or rackmounting (rails included).

LCG-400M	.....	\$2195.00
LCG-400S	.....	2195.00

## LCG-396 NTSC Color Bar Pattern Generator

The LCG-396 is a versatile NTSC video generator suitable for testing, servicing and evaluating a broad range of video systems including video tape recorders, CATV and MATV systems, video monitors and television receivers. It provides 11 test patterns including the standard NTSC color bars for measuring and adjusting color purity, white balance, luminance, chrominance, and convergence. Outputs include compos-

ite video, H or V scope trigger, subcarrier and RF (CH3 or 4). Other features include variable chroma, luminance and set-up levels, and selectable interlaced or progressive scanning. Also available as an option are RGB outputs on the rear panel for testing color computer display systems and video game color circuitry. The LCG-396 is supplied with a comprehensive user's manual including detailed VTR, TV and monitor application data.

## LCG-409 Battery Powered NTSC Pattern Generator

A fully portable, battery-operated NTSC pattern generator, the LCG-409 provides video test patterns specified in the service literature for consumer and industrial VCRs, VTRs, video monitors, TV receivers, projection models, and other video components and systems. Patterns available into a 750 ohm video load are crosshatch, dots, full-field NTSC color bars, full raster signals of white (100%), yellow, cyan, green, magenta, red, blue and black (set-up). Chroma may be switched off at the front panel for a luminance gray scale. An RF modulator covering all U.S. broadcast VHF and UHF channels facilitates receiver checks. In addition, an internal 1kHz audio tone frequency modulates a 4.5MHz sound carrier to provide sound and tuning checks of receivers and tuners. A front-panel switch permits the sound carrier to be switched off. The unit is powered by four "C" cells for complete portability, as well as isolation from the power line.

LCG-409	.....	\$499.00
---------	-------	----------

## LSW-333

### All-Channel Sweep/Marker Generator

The LSW-333 is a complete test and alignment instrument for the RF and IF tuned circuits of VHF and UHF television receivers and FM radios. It is used in production testing and aligning, and in servicing. Front-panel displays of ideal IF and chroma response curves with marker positions permit fast and precise alignment in accordance with manufacturers' recommendations. The LSW-333 has three bias supplies, selectable marker tilt (vertical or horizontal), and vertical and horizontal polarity reversal.

LSW-333	.....	\$925.00
---------	-------	----------

## LBO-51MA Display Monitor

For special low-cost applications — The LBO-51MA is driven by R-Y and B-Y video signals, from a precision chroma decoder or a Tektronix 650 HR series picture monitor equipped with R-Y and B-Y outputs. The LBO-51MA has the added capability of displaying individual VITS and VIRS lines\* when used with LBO-5860 waveform monitor.

The unit's CRT display area is 8 x 10cm. Combines 3MHz bandwidth on X and Y axes, with 4MHz on Z axis. Phase shift between X and Y axes is less than 3° at 1MHz (R-Y and B-Y signals are approximately 600kHz).

The absolute accuracy of the LBO-51MA display is dependent upon the accuracy of the precision chroma decoder being used to drive it.

\*VITS and VIRS lines may be observed only when the signal delay inherent to the chroma decoder being used is not excessive (10 to 15 μs).

LBO-51MA	.....	\$1125.00
----------	-------	-----------

## LMS-238 TV Stereo Generator

The LMS-238 is a TV stereo generator designed to test and align MTS stereo decoders. Test signals are provided for both stereo and SAP operation. Outputs at CH-3/CH-4, VIF, SIF and composite, facilitate rapid troubleshooting to the area of circuit malfunction.

On-screen character displays (L+R, L, R, L-R) indicate the selected mode of generator operation. The four selectable, internal modulation frequencies (300Hz, 1kHz, 3kHz, 8kHz) at 14.1% modulation (-17dB) are supplied. The unit features low distortion, excellent stereo separation and frequency stability.

LC-2028	Two Single Banana Plugs to Miniature Alligator Clips; 1m Cable . . . . . 13.00
LC-2043	Double Banana to BNC; 1m Cable . . . . . 19.00
LC-2067	GPIB Cable, 1m Length . . . . . 126.00
LC-2068	GPIB Cable, 2m Length . . . . . 143.00
BNC-BP	BNC to Single Binding Post Adaptor . . . . . 7.00
LT-1551	BNC 75 ohm In-Line Terminator . . . . . 37.00
LT-2049	BNC 50 ohm In-Line Terminator . . . . . 40.00
215-U01	Plug-In ROM Unit with Type 2716 ROM for LSG-215A, 216 . . . . . 80.00

**LT-2049**  
BNC 50 ohm in-line terminator.

**CC-851 Carrying Case**  
For LDM-853A, LDC-831.

**LC-19 AC Current Clamp Adaptor**  
For LDM-853A.  
Measurement Range: 0.1-200A AC, 50-60Hz.  
Accuracy:  $\pm$  3%.

**LP-11Y Three Point Probe**  
For LTC-906, LTC-906A.

**LPS-1908U AC Adaptor**  
For LDM-853A, LDC831

**LPS-169A AC Adaptor**  
For LTC-906, LTC-906A, LCR-740.

## Reporterlight Kits—HMI Portable/Location Lighting

### 270W Reporterlight Kit I

#### Kit includes:

- 310-002 Lamphead, manually operated focusing
- 118-101 4-Leaf Barndoor
- 171-052 Electronic ballast to operate on mains, including mains cord
- 130-102 Diffusion filter in pouch
- 130-202 Conversion filter in pouch
- 148-202 Kit I Carry Case
- 476-655 HMI lamp 270W, single ended socket

320-002 .....\$4700.00

### 270W Reporterlight Kit III A

Same as Kit I with the following exceptions:

- 310-003 Lamphead with motor-driven focusing (for remote control – alternative to 310-002)

320-004/A .....\$5015.00

### 270W Reporterlight Kit III B

Same as Kit II with the following exceptions:

- 310-003 Lamphead with motor-driven focusing (for remote control – alternative to 310-002)

320-004/B .....\$5265.00

Reporterlight

## Production Kit—Film/ENG Lighting

Designed to illuminate a 10'H x 15'W x 10'D area.

Applications include news, sports, weather, commercials, instruction, etc. Total connected load 45.8A at 120V.

#### Kit includes:

- (3) 100-515 1000W Fresnel
- (3) 118-013 8 Leaf Barndoor
- (3) 142-101 25' Extension Cable
- (3) 152-053 Compact Stand w/Casters
- (1) 142-215 Outlet Box w/2 Outlets 25' Cable
- (3) 176-097 1000W Lamp
- (2) 104-031 Broad
- (2) 152-053 Compact Stand w/Casters
- (2) 176-022 1000W Lamp
- (1) 104-041 Multi-Broad
- (2) 120-007 Diffusion Frame
- (1) 142-101 25' Extension Cable
- (1) 152-053 Compact Stand w/Casters
- (1) 176-024 500W Lamp
- (2) 148-001 Case

150-062 .....\$4500.00

Production Kit

## Location Lighting Kit—Complex Lighting Set-Ups

One case carries all equipment. Channel leg stands for reliable support. Draws 41.6A at 120V and 14.5A at 220V.

#### Kit includes:

- (2) 100-301 Multi-10
- (2) 118-013 8-Leaf Barndoor
- (1) 122-147 Scrim Set—Single Half Single
- (2) 176-012 1000W, 120V Lamp (150-056 Kit)
- (2) 176-015 800W, 220V Lamp (150-057 Kit)
- (2) 104-051 Mini-King
- (2) 118-003 4-Leaf Barndoor
- (1) 148-001 Case
- (2) 152-051 Mini-Stand with 5/8" Stud
- (2) 152-052 Compact Stand
- (2) 176-022 1000W, 120V Lamp (150-056 Kit)
- (2) 176-027 800W, 220V Lamp (150-057 Kit)

150-056 (120V) .....\$1900.00

150-057 (220V) .....1900.00

Location Lighting Kit

## Flight Kit Fast, Simple Set-Up

Accessory holders on Multi-6 for simple set-up.

Draws 27.5A at 120V and 15A at 220V.

#### Kit includes:

- (2) 100-151 Multi-6
- (2) 118-013 8-Leaf Barndoor
- (1) 122-147 Scrim Set—Single, Half Single
- (2) 176-002 650W, 120V Lamp (150-058 Kit)
- (2) 176-007 800W, 220V Lamp (150-059 Kit)
- (2) 104-051 Mini-King
- (2) 118-003 4-Leaf Barndoor
- (1) 148-007 Case
- (3) 152-051 Mini-Stand with 5/8" Stud
- (1) 156-001 Gaffer Grip
- (2) 176-022 1000W, 120V Lamp (150-058 Kit)
- (2) 176-027 800W, 220V Lamp (150-059 Kit)

150-058 (120V) .....\$1800.00

150-059 (220V) .....1800.00

## Color Beam 800—Fast Set-Up

Uses three cool touch Color Beam 800 units. Total connected load 16.3A at 120V and 11A at 220V.

- Kit includes:**
- (3) 400-201 Color Beam 800 • (1) 122-147 Scrim Set—Single, Half Single • (1) 148-007 Case • (3) 152-051 Mini-Stand with 5/8" Stud
  - (3) 118-013 8-Leaf Barndoor • (3) 126-027 Accessory Holder • (3) 176-002 650W, 120V Lamp (150-060 Kit) • (3) 176-007 800W, 220V Lamp (150-061 Kit)
- 150-060 (120V) .....\$1540.00  
150-061 (220V) .....1540.00

Color Beam 800

## Pro-Kit IV—Foreign Location Work

Designed for use with 120V or 240V lamps for foreign location work. Draws: 20A at 120V and 11A at 220V.

- Kit includes:**
- (2) 100-091 Mini-Pro • (2) 104-341 Mini-Broad • (3) 118-016 4-Leaf Barndoor • (1) 142-011 25' Extension Cable • (1) 148-030 Metal Case • (3) 152-050 Mini-Stand with 1/2" Stud • (1) 156-012 Gaffer Grip • (2) 176-002 650W, 120V Lamp (150-052 Kit) • (2) 176-092 600W, 120V Lamp (150-052 Kit) • (2) 176-007 800W, 220V Lamp (150-053 Kit) • (2) 176-094 650W, 220V Lamp (150-053 Kit)
- 150-052 (120V) with metal case .....\$1280.00  
150-053 (220V) with metal case .....1280.00

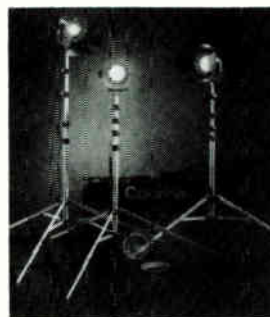

Pro-Kit IV

## Mini-Pro Kit

Designed for use with 30V battery power, 120V, or 220V. Draws 15A at 120V and 8A at 220V.

- Kit includes:**
- (3) 100-091 Mini-Pro • (2) 118-016 4-Leaf Barndoor • (1) 122-137 Scrim Set—Single, Half Single • (1) 142-011 25' Extension Cable • (1) 148-030 Metal Case • (3) 152-050 Mini-Stand with 1/2" Stud • (3) 176-092 600W, 120V Lamp (150-050 Kit) • (3) 176-094 650W, 220V Lamp (150-051 Kit)
- 150-050 (120V) with metal case. ....\$1100.00  
150-051 (220V) with metal case .....1100.00

Mini-Pro Kit

## Cameraman's Lighting Kit

All equipment fits in one case. High output lighting equipment for optimum production lighting. Draws 27A at 120V and 14.5A at 220V.

- Kit includes:**
- (2) 400-201 Color Beam 800 • (2) 126-027 Accessory Holder • (2) 118-013 8-Leaf Barndoor • (1) 104-341 Mini-Broad • (2) 118-016 4-Leaf Barndoor • (1) 122-137 Scrim Set—Single, Half Single • (1) 148-007 Case • (2) 152-050 Mini-Stand with 1/2" Stud • (2) 152-051 Mini-Stand with 5/8" Stud • (4) 176-002 650W, 120V Lamp (150-054 Kit) • (4) 176-007 800W, 220V Lamp (150-055 Kit)
- 150-054 (120V) .....\$1595.00  
150-055 (220V) .....1595.00

Cameraman's Lighting Kit

## Battery Belt Kit

Batteries are rechargeable NiCad Cells. Belt comes complete with 14-hour overnight charger and an integrated cable. Charger designed for 120 and 240V input power.

- 150-063. ....\$1500.00

- Kit includes:**
- (1) 100-091 Mini-Pro • (1) 140-003 30VDC Cord • (1) 140-021 Battery Belt w/Charger unit (120/240V) • (1) 148-030 Carry Case (Metal) • (1) 156-005 Mini-Pro Handle • (1) 176-090 250W, 3400°K, 30V Lamp, 25 hours

- 150-063. ....\$1550.00

Battery Belt Kit

Mini-Pro With Handle

## Optional

- 140-022 Battery Belt with fast charge capability in place of 140-021 .....Add \$100.00

- 140-023 For High Speed Charger .....Add 820.00

Theater Fresnel

Mini-Pro

## Mini-Pro®

- Utility yoke contains finger operated on/off switch • Recessed power receptacle permits use of detachable 120 or 30V power cord • Completely portable. Designed for stand mounting or handheld operation • Operates at 30V, 120V, or 240V AC/DC • Safety lock prevents accidental loss of accessories from mounting clips • Smooth field. No hot spots • Variable focus produces 3:1 range • Dichroic Filter available for daylight shooting • "Quartz" Lamps for high efficiency • Applications: key, back, kicker, side lighting • Maximum wattage: 650W

100-091 .....	\$140.00
---------------	----------

## Ellipsoids

- Designed to frame areas, project patterns and create special effects • For throws of 14' to 140' • Rugged diecast housing assembly • High performance optical train with plano-convex lenses permits greater light transmission, fewer aberrations, improved field control and higher efficiency • Lenses are fabricated of low expansion borosilicate glass • Easily field modified to create 40°, 30°, or 20° field angle in one unit • Lenses are shock mounted • Joy stick design assures fast, precise filament alignment without tools • Lens barrel design permits you to easily focus to a hard or soft field edge • Framing shutter concept enables you to create nearly any three or four sided shape • Solves keystone problem • Each shutter travels in its own plane eliminating interference problems • Equipped with a built-in pattern slot • Available with an optional iris without the loss of other beam shaping capabilities

### 40° and 30° Ellipsoid

- Incorporates a single 4.5" and 6" diameter plano-convex lens • Outperforms 750W and 1kW 6" x 9" and 6" x 12" existing spotlights • Designed for throws from 14' to 55'

213-055* 40° .....	\$340.00
213-065* 30° .....	340.00

### 20° Ellipsoid

- Single 6" x 9" plano-convex lens • Outperforms 750W and 1kW 6" x 16" existing spotlights • Designed for throws from 30' to 67'

213-075* .....	\$340.00
----------------	----------

### 12° Ellipsoid

- Single 6" x 12" plano-convex lens • Equivalent in performance to higher priced generic 8" spotlights • Designed for throws from 45' to 80'

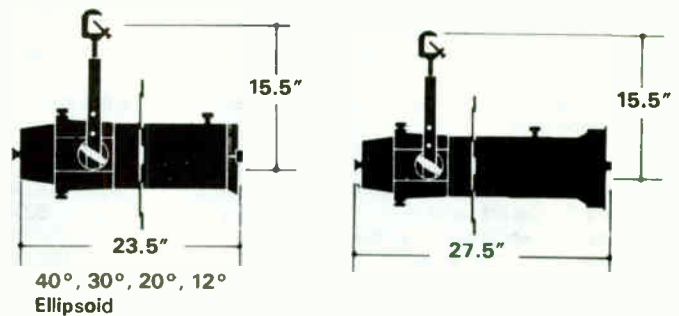

213-095* .....	\$340.00
----------------	----------

### 10° Ellipsoid

- Incorporates a single 8" diameter plano-convex lens • 8" unit is equivalent in performance to existing 10" and 12" spotlights • Designed for throws from 55' to 108'

213-105* .....	\$540.00
----------------	----------

\*Hanging fixtures are listed without terminations but priced with connectors. When ordering, please specify termination required. If you are ordering fixtures with bare wire leads, please deduct \$8.00 from price.

### 5° Ellipsoid

- High transmission from 10" diameter plano-convex lens • With its reflector design, single lens optical system and with optional iris assembly it actually outperforms many followspots • Suited to long-throw applications and is effective from 110' to 140'

213-115 .....	\$700.00
---------------	----------

### Mini-Ellipse

- Designed for throws from 6' to 40' • Accepts a range of high output Tungsten-Halogen Lamps from 250W to 500W at 120V and 500W at 240V.

213-155* 30°, 40°, 50° .....	\$215.00
------------------------------	----------

### Zoom Mini 40/65, 25/50, 15/30

- For any application from a 9' circle at a 7' throw to a 9' circle at a 35' throw • A 600W lamp increases light output by nearly 50% over conventional 500W screw-based systems • Lamp house design allows constant orientation of the filament support bridge for a more compact light source

213-305* 40/65 .....	\$235.00
213-315* 25/50 .....	235.00
213-325* 15/30 .....	235.00

# TV LIGHTING

## 6" and 8" Fresnels

- Lamp sockets are U.L. recognized, medium bipost 6" units, and mogul bipost 8" unit
- Easy handling, lightweight aluminum construction
- The combination of diecast and extruded aluminum promotes heat exchange and rapid dissipation. Combine this with flow through ventilation and you have a cooler operating unit with longer lamp and gel life
- An improved rack and pinion design with Torlon® insulators for a smooth focusing action
- Lens door is diecast with removable beefed-up gel clips and a spring loaded safety clip for rugged trouping requirements
- All operating controls are thermally insulated for cool handling operations
- The ultimate fresnel performance...high intensity spot with a smooth even flood field

## Studio Lighting

A complete line of "Made in America" production equipment, for your television studio requirements. Ellipsoidal effects projectors with field angles from 5° to 40° for throws up to 100'. Lightweight and efficient, Focusing Scoops, Soft Lights, Cyc Strips for fill and cyclorama lighting requirements. Plus variable load suspension units and distribution equipment custom built to your needs.

# DIMMING

## DIMENSION 192-000 SERIES

### Dimmer Module

- The Dimension 192 dimmer module represents an elegant design
- Using conservatively-rated, fully proven components, we have packaged 2—2400W dimmers into minimum space. This is partly achieved by the rack bus design, and partly by the unique control and power connector systems
- Each dimmer is independently cooled with adjacent dimmers being separated by a cooling air flow of 400 ft./min. of ambient air
- State-of-the-art solid-state relays and chokes are used to achieve broadcast-quality filtration

### Rack

- 192—1.2 or 2.4kW dimmers per rack. The most in the least amount of space
- Each dimmer is independently cooled with ambient air from the front of the rack. This accounts for a lack of temperature gradient in the rack
- Top and bottom access panels for line and load runs
- Plug-in dimmer and control modules make the Dimension 192 fully serviceable
- The Dimension 192 contains auxiliary functions as a standard and built-in feature. The need for an "aux cabinet" is eliminated in most systems
- Dimmers of different ratings (1.2, 2.4, 6.0, and 12.0kW) may be located anywhere in the rack
- Three identical control modules display system status with LEDs
- Plug-in electronic system controls up to 192 dimmers. Each module controls up to 64 dimmers
- Spare module provided per system for emergency backup
- Maintenance—fully front accessible, no side or back access required

166-300	Dual 1.2kW Dimmer Module, 120VAC	Price on Application
166-302	Dual 2.4kW Dimmer Module, 120VAC	Price on Application
166-304	6.0kW Dimmer Module, 120VAC	Price on Application
166-306	12.0kW Dimmer Module, 120VAC	Price on Application
166-307	Dual 2.4kW Non-Dim Module, 120VAC	Price on Application
166-308	6.0kW Non-Dim Module, 120VAC	Price on Application
166-309	Dual 2.0kW Dimmer Module, 240VAC	Price on Application
166-310	5.0kW Dimmer Module, 240VAC	Price on Application
166-311	10.0kW Dimmer Module, 240VAC	Price on Application
166-312	Dual 2.0kW Non-Dim Module, 240VAC	Price on Application
166-313	5.0kW Non-Dim Module, 240VAC	Price on Application
166-314	12.0kW Non-Dim Module, 120VAC	Price on Application
166-315	10.0kW Non-Dim Module, 240VAC	Price on Application

### Control Module

- Fully plug-in, the module controls all 64 dimmer locations in a vertical column. There are three control modules per rack
- The module controls all functions of dimmer access, timing, and ramping as well as deciding which channels are digital, which are analog, which channels are on panic and does it all with reliability
- Front panel indicators show status of feeder bus bars and power supply, signal status, and rack overtemp

166-341	Analog	\$750.00
166-342	Multiplex	900.00

### Wall Pack

- Plug-in Dimmer Modules
- Plug-in Electronic Control Modules
- Single or three phase power
- Ambient cooling with front-to-rear air flow
- All electrical connections, both incoming and outgoing power and control, are made to factory labeled terminal strips
- Multiple packs may be installed in various configurations, each requiring minimum wall space
- The Pack has a lockable door, together with an electrostatic filter system
- Instant change from analog to digital control signal (RS422)
- Lightweight—easy to mount—only 65 lbs.

200-715	12-2.4kW Dimmers with Terminal Connection	Price on Application
200-725	6-6.0kW Dimmers with Terminal Connection	Price on Application

Both Terminal versions include door.

Rack

Wall Rack

### 192 Pack

- Plug-in Dimmer Modules
- Plug-in Control Module
- Completely front access
- Half the size of other products
- High reliability—proven with thousands of dimmer modules already in use
- Instant change from analog to digital control signal (RS422)
- Lightweight—only 57 lbs.
- Single or three phase power
- Ambient cooling with front-to-rear air flow

200-712	12-2.4kW Dimmers with 24-20A, 3-wire, Pin Connectors	\$3355.00
200-714	12-2.4kW Dimmers with 12-20A, Duplex Receptacles	3355.00
200-716	12-2.4kW Dimmers with 12-20A, Twistlock Receptacles	3355.00
200-717	12-2.4kW Dimmers with 24-20A, 3-wire, Pin Connectors and special 5 Pole, 100A, Union Inlet Receptacle	3655.00
200-722	6-6.0kW Dimmers with 6-60A, 3-wire, Pin Connectors	3685.00
200-726	6-6.0kW Dimmers with 6-50A, Twistlock Receptacles	3685.00

### 192 Pack Master

- Reliable
- Compact
- Blackout switch
- Super lightweight
- Dimmer Overheat Indicator
- Exclusive Independent Scene
- Bump switches with level control
- 2 scene operation, 12 or 24 channel
- Scene, independent and Grand Masters
- High resolution LED fade progress bar graph

200-171	Pack Master 12 Channel	\$1195.00
200-172	Pack Master 24 Channel	1595.00
200-173	Pack Master 36 Channel	1995.00
157-144	Plastic Cover for Pack Master 12	83.00
157-146	Plastic Cover for Pack Master 24	105.00
157-148	Trouping Case for Pack Master 12	345.00
157-150	Trouping Case for Pack Master 24	470.00

# LIGHTING CONTROL

## Scene Master™ 60 Lighting Control System

- Clarity of operation
- 60 manual controllers are available for setting scenes and recording rapidly up to 60 pile on overlapping submasters
- Console stores up to 120 cues which can be recorded from manual or memory
- In standard format the Scene Master will handle up to 120 dimmers and has options to control up to 512 dimmers
- Optional disk drive
- Printer and handheld remote
- High resolution CRT with clearly defined information areas
- Extensive built-in effects program
- Bump keys and more

The Scene Master 60 represents an ideal marriage of manual and memory systems.

The Control Console is a microprocessor based lighting control system, specifically designed and constructed for the control of theatrical and television dimming systems.

The Control Console does not require the use of any peripheral device such as disk drive or cassette to function. The system operating program is stored in a programmable read-only memory.

The Control Console consists of a portable console, approximately 37" long and 14" deep and one detached 12" amber CRT with integral tilt and swivel bases. Color monitor is optional.

The CRT is a graphics quality amber monitor with a minimum of 1000 dots per line horizontal resolution and 360 lines vertical resolution.

The Console is equipped with non-volatile memory for cue storage with optional 3 1/2", industry standard disk drive used for library storage utilizing environmentally protected, high reliability diskettes with hard plastic cases.

- 168-760 Scene Master 60, 120V, digital output.  
Amber monitor, controls 200 dimmers with 60 manual channels . . . . . \$5775.00
- 168-764 Scene Master 60XL, 120V, digital output.  
Amber monitor, controls 500 dimmers with 60 manual channels . . . . . 6775.00
- 168-768 Scene Master 60XLC, 120V, digital output.  
Color monitor, controls 500 dimmers with 60 manual channels . . . . . POR
- 28426 Scene Master 60 operating manual . . . . . 20.00

Options available: 240V, analog output

## Patchman™ Portable Lighting Control System

- 10 scenes preset — 2 live plus 8 in memory
- Hardwood end caps
- System on/off keyswitch
- Patch control keyswitch
- LED over temp indicator
- LED display; dimmer, channel, intensity
- Memory select switches (Scene X)
- Chase on/off switch
- Chase rate controller
- Memory select switches (Scene Y)
- Channel controllers; Manual section, 2 rows of 12 each — expandable to 96
- Scene Y submasters
- Fade rate controllers
- Crossfader with LED bargraph progress meters
- Scene X submasters
- Softpatch keypad; 0-9, clear, and, thru, channel, dimmer and store to patch up to 512 dimmers

Patchman

Scene Master 60

Patchman offers ten scenes, each with its own submastering assignments. Patch at levels, so every channel can be a groupmaster. There's a split dipless crossfader for timed or manual control variable rate chase, memory back-up and a host of other control functions.

- 168-700 Patchman, 12-channel . . . . . \$3985.00
- 168-701 Patchman, 24-channel . . . . . 4675.00
- 168-702 Patchman, 36-channel . . . . . 5375.00
- 168-703 Patchman, 48-channel . . . . . 6050.00

### Accessories

- 157-142 24-channel plastic cover . . . . . \$ 95.00
- 157-143 48-channel plastic cover . . . . . 139.00
- 168-660 6' cable . . . . . 79.00
- 168-661 25' cable . . . . . 110.00
- 168-666 100' cable . . . . . 170.00
- 168-667 50' cable . . . . . 140.00
- 168-668 150' cable . . . . . 240.00
- 168-669 200' cable . . . . . 290.00
- 168-670 Flush control connection wall plate — Fits standard single gang box . . . . . 69.00
- 168-680 Blank wall plate — cover unused gangs in surface back box . . . . . 17.50
- 168-681 Six-gang surface back box . . . . . 240.00
- 168-698 3' slave cable — connects between dimmer packs . . 58.00

## Control Junction Box and Wall Plate

### Control Junction Box

- Permits plug-in control connection of up to 30 dimmers and 6 non-dims
- Three 6-channel control packs and one 12-channel master/control pack may be plugged into the master junction box via prewired control cables
- Junction box is prewired for contractor's field connections

Control Junction Box . . . . . POR

### Wall Plate

- Designed to fit standard single gang switchbox
- Permits connection of 6 control channels
- Wires color coded for contractor identification
- Brushed stainless steel cover plate

Wall Plate . . . . . POR

# LIGHTING CONTROL

Prestige 3000 Series

Designer's Remote Magic Sheet

## PRESTIGE SERIES LIGHTING CONTROL SYSTEMS

### Prestige 1000 and 2000 Features:

- 24 pile-on submasters provide for annual control of complete "stage looks." 12 bump buttons allow instantaneous activation of associated submasters. Submasters 1-12 may be selected as inhibitive faders
- Four timed faders provide for timed or manual execution of cues or cue parts
- Playback controls allow an operator to start an entire cue including cue parts and follow-on cues with a single button. Running cues may be stopped, reversed, speeded up, slowed down, or taken over manually
- Record/Cue functions and "soft" screen keys allow simple, straightforward recording and editing of cues, groups, submasters, effects, patch, and setup with a minimum of console "clutter." The screen keys focus the user's attention on commands which are useful in a particular display and allow for easy software upgrades to the console. Numeric keypad allows rapid construction of unlimited combinations of channels, groups, cues, submasters, and effects for digital level setting or adjustment on the wheel
- Position keys allow the user to move up, down, left, or right in various displays
- Wheel provides a continuous rotation device for setting and adjusting levels
- Power keyswitch and overtemperature indicator
- High resolution color CRT provides the following user selectable displays: Stage, Cue, Group, Submaster, Effect, Cue sheet, Track Sheet, Playback, Patch, and Setup
- 3.5" disk drive provides library storage for shows.

The Prestige 1000 controls up to 200 dimmers, on up to 100 channels, and up to 200 cues and groups may be recorded.

- 168-340 Prestige 1000 Series, 120V, Digital Output . . . . .P.O.A.
- 168-341 Prestige 1000 Series, 240V, Digital Output . . . . .P.O.A.
- 168-342 Prestige 1000 Series, 120V, Analog Output . . . . .P.O.A.
- 168-343 Prestige 1000 Series, 240V, Analog Output . . . . .P.O.A.

NOTE: All Prestige 1000 Series consoles come with amber monitor only 168-329 (120V) or 168-330 (240V).

Prestige Series 2000 controls up to 400 dimmers on up to 200 channels, and records up to 300 cues or groups. The operating program is stored in programmable read-only memory. In case of power failure, random access memory shall be retained by an automatic battery backup power supply.

The Prestige 2000 console has all the user functions listed in the Prestige 1000 text with exceptions. A color monitor is standard and the following peripheral options are available: Designer Remote, Handheld Remote, and a hard copy Printer.

- 168-344 Prestige 2000 Series, 120V, Digital Output . . . . .P.O.A.
- 168-345 Prestige 2000 Series, 240V, Digital Output . . . . .P.O.A.
- 168-346 Prestige 2000 Series, 120V, Analog Output . . . . .P.O.A.
- 168-347 Prestige 2000 Series, 240V, Analog Output . . . . .P.O.A.

NOTE: All Prestige 2000 Series consoles come with amber monitor 168-329 (120V) or 168-330 (240V).

- 168-348 Prestige 2000C Series, 120V, Digital Output . . . . .P.O.A.
  - 168-349 Prestige 2000C Series, 240V, Digital Output . . . . .P.O.A.
  - 168-350 Prestige 2000C Series, 120V, Analog Output . . . . .P.O.A.
  - 168-351 Prestige 2000C Series, 240V, Analog Output . . . . .P.O.A.
- NOTE: All Prestige 2000C Series consoles come with color monitor 168-331 (120V) or 168-332 (240V)

### Prestige 3000 Features:

- Key Switch—powers up the system and activates the backup
- Dual Display Screens—provide a choice of ten different displays containing precise information for specific tasks (i.e. Set up, Stage, Playback, Preview, Patch)
- Screen, Record and Cue Keypads with 8 Soft Keys—store cue groups and submasters into the Prestige 3000's electronic memory
- Control Keypad—allows the user to write out and enter commands for the Prestige 3000, revise a channel or dimmer list, and create subsets of channel groups or existing cues
- Position Keypad—makes it effortless to move up, down, right, and left through the system's displays
- Level Wheel—adjusts channel levels or fade rates
- Alphabetic Keyboard—allows the user to label designs and write notes or names onto submasters and groups
- Submaster and Bump Buttons—permit manual adjustment of submaster fades
- Playback Controls—permit the manual altering of the light system to fit the show in progress

The Prestige Series of control consoles, the 1000, 2000, and 3000 are as practical as they are powerful. No matter which you choose, from the remarkable Prestige 1000 all the way up to the feature packed Prestige 3000, you get a microprocessor based lighting control system that gives you speed and flexibility.

The Prestige 1000 is our state-of-the-art base model, the 2000 adds a package of advanced features, and our top of the line 3000 unit, takes you to the farthest advance of technology.

# LIGHTING CONTROL

## Magic Disk Writer™

The Magic Disk Writer is a self-contained unit which allows an operator, lighting designer, or student to use the Magicsheet option independently of the Prestige lighting console. The Magic Disk Writer may be used to cue a show from scratch or to modify cues in an existing show in a remote location such as a hotel room or drama lab. The unit will also fully simulate playback of a show, except that it will not actually drive dimmers. The capability of driving a printer is also provided.

The system has a standard IBM keyboard port and will fully support all standard IBM PC software provided it is supplied on 3.5" disks. This system serves as a low cost teaching device for lighting design as well as a standard IBM PC. Lighting programs written on the Magic Disk Writer may be transferred via a disk to any Prestige system for operation, for example, by the designer after entering his own pick up notes to the show, or by the student to display and critique his homework in the theater.

The Magic Disk Writer consists of a Summagraphics MM1201 digitizer tablet overlay and stylus, a Taxan KX12 monochrome CRT, and a processor unit. The processor unit contains a Faraday 6413/256 computer card, a Teac FD35B disk drive, and a Power General 3050-1 power supply. All major components are identical to those used in the Prestige 1000 except for the addition of memory to the processor card. A power switch is located on the front of the unit, the disk drive and IBM keyboard connector are located on the right side, and the Magicsheet, printer and AC connectors are located on the rear. During normal operation, the CRT is placed on top of the processor unit and the Magicsheet is placed in front. The Magicsheet software is loaded automatically on powerup from disk. An optional IBM keyboard may be placed to the side of the Magicsheet for operation of standard software.

The Magic Disk Writer operates identically to a Magicsheet on a Prestige 2000 or 3000 console. A special set-up option is provided to allow the operator to select whether show disks are created with Prestige 2000 or 3000 format. A special write protected disk is provided with the system which contains both MSDOS and the Magicsheet operating program. The Magicsheet program is automatically loaded and started when AC power is applied to the system. If the IBM keyboard option is installed, the operator may interrupt the Magicsheet program and load other IBM compatible software by inserting the appropriate 3.5" disk. Since the system is not used in live performance situations, no battery backup is provided.

**168-750 Magic Disk Writer (Amber CRT Only)**  
.....**\$6100.00**

## Magicsheet

The Magicsheet is the lighting designer's easel. With its stylus and your lighting plot attached to the "smart" pad you can enter your plan directly into the Prestige system. Then with the touch of your stylus you'll be able to access a variety of the extensive features of the control board, from the level wheel, to playback, to cueing. Once entered, touching your symbols with the pen can call up cues and fades, trigger effects, and run through lighting sequence as quickly as you can brush the symbols. Linking up the Magicsheet/Designer's Remote with the main console gives you the ultimate features of the Prestige system from a variety of vantage points. You can review your designs as fast as you create them from the perspective of actor or audience. With the monitor attached to the Magicsheet you can call up the same displays you would in the booth.

# STUDIO LIGHTING PACKAGE

## 20' x 30' Studio (6.1m x 9.1m) Standard Television Package

Designed to meet the requirements for television production lighting, each package presents fixtures, power distribution, dimming and control on the basis of one circuit for approximately every 15 square feet of studio area and one dimmer for every circuit.

The 20' x 30' (6.1m x 9.1m) Studio Package consists of the following major components:

### Lighting Fixture Package

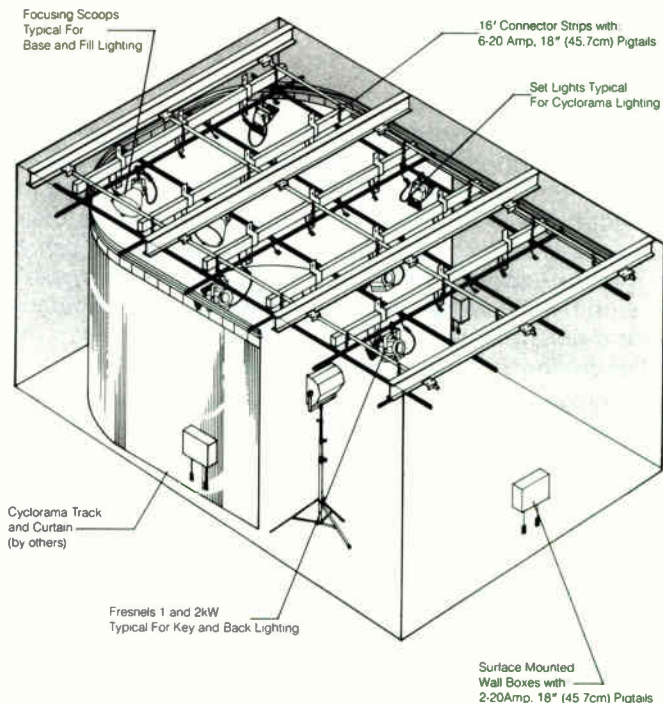

• **Fixtures**—Fresnels for key and back lighting. Focusing Scoops for base and fill, and set lights for cyclorama lighting are all part of the basic package and are supplied with all required accessories • **Accessories** • Barndoors • Color frames • Safety cables • C-clamps, and lamps are supplied by Colortran as required by the bill of materials

### Dimming and Control System

• Wall mounted dimmer packs with plug-in power modules and plug-in analog control modules • Memory Control Console—24 channels with 2 active scenes plus 8 record scenes, 25' control cable, wall plate and receptacle

### Distribution System

• Connector strips are completely prewired at the factory with terminal access by an easily removable cover. Finished matte black enamel with 3" white graphics on front and back for circuit identification • All connector strips are supplied with 18" pigtail receptacles in standard NEMA twistlock termination 20, and 50A capacities. Alternates are available if specified, such as flush mounted receptacles and termination variations (pin connector or U-ground types) • Plugging boxes are available in three basic configurations: surface, recessed, or pipe mounted. Unless otherwise specified boxes are supplied in a surface mounted style with required pigtails

	Qty.	Model No.	Description
<b>Fixture Package</b>			
<b>Key and Back Lighting</b>	10	100-516	6" Fresnel
	10	118-013	8 Leaf Barndoor
	10	120-005	Color Frame

# COLOR MEDIA

## The Lee Rainbow

A spectrum larger and brighter than ever, with brilliantly pure colors on an almost totally transparent "Melinex" base. Filters that are so optically clear they allow you to combine colors as never before to create a nearly infinite array of colors while still retaining their high quality of transmittance...a quality standard beyond that of any other filter.

Here is a rainbow that is as tough as it is pretty...with colors that cut down on fading, won't crack, peel or tear. Colors that will remain the same from job to job and year to year...always. The flame resistant filters are always a consistent .003 gauge and will stand up to the toughest and hottest lights.

Product	Effect Colors	
101	Yellow	Sunlight and window effect—pleasant in acting areas
102	Light Amber	Lamp light effects—dawn sun effects—pleasant in acting areas
103	Straw	Pale sunlight through window effect—warm winter effect
104	Deep Amber	Mood effect on backings. Backlighting of floor and color effect
105	Orange	Mainly light entertainment functions. Fire effect if used with 106, 166, 104
106	Primary Red	Strong red effect
107	Light Rose	As for 104
109	Light Salmon	Interesting back lighting
110	Middle Rose	Good for cycloramas
111	Dark Pink	Good for cycloramas
113	Magenta	Very strong—used carefully for small areas on set
115	Peacock Blue	Pleasing effect on sets, cyclorama cloths backlighting (Ice rinks, galas, etc.)
116	Medium Blue Green	Pleasing effect on sets, cyclorama cloths backlighting (Ice rinks, galas, etc.)
117	Steel Blue	Night effects on sets—cycloramas
118	Light Blue	Strong night effect
119	Dark Blue	Mood effects, jazz clubs, etc. Back projection. Traveling matte blue
120	Deep Blue	Mood effects. Back projection. Traveling matte blue
121	Lee Green	Cycloramas
122	Fern Green	Cycloramas—good for mood effect
124	Dark Green	Cycloramas—good for backlighting
126	Mauve	Cycloramas—good for backlighting
127	Smoky Pink	Cycloramas—set lighting, discos
128	Bright Pink	Cycloramas—good for backlighting—strong effect
130	Clear	Used in animation and projection work
132	Medium Blue	Set Lighting—Traveling matte blue
134	Golden Amber	Set Lighting
135	Deep Golden Amber	Theater, TV, Film effect lighting
136	Pale Lavender	Set Lighting
137	Special Lavender	Set Lighting
138	Pale Green	Set Lighting
139	Primary Green	Set Lighting
141	Bright Blue	Set Lighting
142	Pale Violet	Set Lighting
143	Pale Navy Blue	Set Lighting
144	No Color Blue	Set Lighting
147	Apricot	Set Lighting
148	Bright Rose	Set Lighting

Product	Effect Colors	
151	Gold Tint	Set Lighting
152	Pale Gold	Set Lighting
153	Pale Salmon	Set Lighting
154	Pale Rose	Set Lighting
156	Chocolate	Cyclorama cloths—3/4 Back for dark skin tones
157	Pink	Dance sequences. (Useful for softening white costumes without affecting skin tones)
158	Deep Orange	Fire effect
159	No Color Straw	Warm effect
161	Slate Blue	Set Lighting
162	Bastard Amber	Set Lighting
164	Flame Red	Disco effect
165	Daylight Blue	Set Lighting—Keylight for Moonlight effect
166	Pale Red	Good for light entertainment
170	Deep Lavender	Set Lighting—Discos and theatres
174	Dark Steel Blue	Set Lighting—Creates good Moonlight shadows
176	Loving Amber	Set Lighting
179	Chrome Orange	Combination of 1/2 CTO and double strength 104
180	Dark Lavender	Set Lighting—Discos and theatres
181	Congo Blue	As for 120
182	Light Red	Theatre and TV Effect Lighting
183	Moonlight Blue	Theatre and TV Effect Lighting
184	Cosmetic Peach	Pale tints complementary to Key lighting
185	Cosmetic Burgundy	Pale tints complementary to Key lighting
186	Cosmetic Silver Rose	Pale tints complementary to Key lighting
187	Cosmetic Rouge	Pale tints complementary to Key lighting
188	Cosmetic Highlight	Pale tints complementary to Key lighting
189	Cosmetic Silver Moss	Pale tints complementary to Key lighting
190	Cosmetic Emerald	Pale tints complementary to Key lighting
191	Cosmetic Aqua Blue	Pale tints complementary to Key lighting
192	Flesh Pink	Theater, TV, Film effect lighting
193	Rosy Amber	Theater, TV, Film effect lighting
194	Sunrise Pink	Theater, TV, Film effect lighting
195	Zenith Blue	Theater, TV, Film effect lighting
196	True Blue	Theater, TV, Film effect lighting
197	Alice Blue	Theater, TV, Film effect lighting
230	Light Yellow	Converts yellow carbon arc (of low color temperature) to tungsten

# SYNC GENERATORS

SPG-102N

## SPG-102N NTSC Master Sync Generator

Top-of-the-line RS-170A Master Generator. Includes automatic digital genlock, 100SD color black output module and 100LD Pulse Shaper. Many options to match virtually any pulse system concept. High stability master color standard, frequency converter and resolver for external reference, remote control, color bars, grating/dot signals, and much more.

<b>SPG-102N</b> .....		<b>\$3995.00</b>
<b>100CS</b>	Master color standard .....	<b>720.00</b>
<b>100FC</b>	Freq. converter and resolver (5MHz) .....	<b>610.00</b>
<b>100LD</b>	Pulse shaper and line driver .....	<b>280.00</b>

	Extra instruction manual .....	<b>55.00</b>

ACO-131

## ACO-131 NTSC/PAL Auto Change-Over

Maintain pulse system security with two sync generators and this high quality, automatic switching device. Monitors color black and/or pulses/subcarrier. Activates switch-over on 3dB drop of any signal.

<b>ACO-131</b> .....	<b>\$2485.00</b>	
<b>131PM</b>	Pulse monitor (2 modules) .....	<b>460.00</b>
<b>131RP</b>	Remote control panel .....	<b>485.00</b>
<b>100ME</b>	Module extender .....	<b>65.00</b>
	Extra instruction manual .....	<b>35.00</b>

## SPG-1300N NTSC Sync Pulse Generator

- Low cost, modular 1RU design
- Adjustable blanking widths and bright burst flag position
- NTSC digital genlock
- RS-170A zero SCH sync/subcarrier, black and test signal outputs
- Independent timing for pulses, black and test signals
- No warm-up, high stability TCXO

The SPG-1300N is an advanced, modular design for master or slave operation. The basic generator has two plug-in modules (genlock, power supply) which are housed in a 1RU mounting frame. Three module options can be included to suit specific requirements. Slots are normalized for the Pulse Generator, Black and Tone and Test Signal modules. However, each slot can accept any option and provide the primary outputs.

The high-stability, no warm-up TCXO has a horizontal phasing range of more than 12µs advance and 4µs delay. Three phasing controls allow fine, medium and coarse adjustments.

The optional 1300PG Pulse Generator module has two outputs of sub-carrier and one output each of sync, blanking, H drive, V drive, burst flag and color frame ident. Level controls for subcarrier and pulse outputs are provided. Vertical can be advanced 1 line. H blanking start and finish, as well as burst flag position are adjustable in 16 steps of 70ns. V blanking can be set to 18, 19, 20, or 21 lines. A switch allows color frame ident to start coincident with the vertical block or line 10/field 1.

The optional 1300BT Black and Tone module has two 75 ohm outputs of RS170A zero SCH color black. Fine, medium and coarse phasing of the outputs is independent of Genlock phasing.

The low impedance, balanced stereo tone output can be switch selected as color frame-locked 400Hz or 1kHz. Level is adjustable from 0 to +8dBu. In addition, a left channel ident tone can be selected.

The optional 2600TG Test Signal Generator modules represent the latest technology in 12-bit (4096 steps) digital test signal generator on a single card.

The dual BNC outputs can be level adjusted and conform to RS-170A zero SCH at all times.

In addition, the 2600TG modules are available in various 525-line standards, such as NTSC, RGB, YIQ, B-MAC, M2 etc., so this means two formats can be mixed within the same mounting frame. Custom test signals can optionally be requested and are subject to a one-time programming charge.

<b>SPG-1300N</b>	With 1300PG pulse generator and 1300BT black and tone boards .....	<b>\$2495.00</b>
<b>2600TG</b>	Test Generator Module .....	<b>895.00</b>
<b>100ME</b>	Module extender .....	<b>65.00</b>
	Extra instruction manual .....	<b>55.00</b>

## SPG-110P PAL Master Sync Generator

Extremely stable, broadcast quality source of all pulses, subcarrier and a variety of video test signals for PAL systems B, G, H and I. Automatic or manual genlock modes include crash and slow lock. Modular design with several options permits customized configurations.

<b>SPG-110P</b>	(Includes 110LD Line Driver, 110SB-3 Color Black Output, 250GD Grating and Dot and 250CB Color Bar Generator .....	<b>\$4995.00</b>
<b>110CS</b>	Color standard .....	<b>735.00</b>
<b>110SI</b>	Subcarrier input .....	<b>90.00</b>

	Extra instruction manual	55.00

## CBG-230N NTSC Encoded Color Bar Generator

• Low power consumption • Low heat dissipation • Requires only one unit of rack space

The CBG-230N NTSC Encoded Color Bar Generator is a completely new design, featuring the SMPTE ECR-1 alignment color bar test signal. It is specifically intended for dedicated use in the alignment of control room, studio and VTR picture monitors.

CBG-230N	.....	\$2,395.00
230GD	Grating and dot generator	300.00
100ME	Module extender	65.00
	Extra instruction manual	50.00

CTG-240N

## CTG-240N NTSC Calibration Test Generator

Stand-alone, RS-170A source of most commonly used video test signals, NTSC system pulses, subcarrier and trigger signals. Unit features separate test signal outputs and one switched output.

CTG-240N	.....	\$7,550.00
100ME	Module extender	65.00
	Extra instruction manual	55.00

## DTG-1110N NTSC Digital Test Generator

Single rack unit, one generator version of the DTG-1010N. Ideal for small fixed or mobile installations. Includes outputs of sync blanker, and subcarrier.

DTG-1110N	.....	\$5,995.00
1010RP	Remote control panel	740.00
1000ME	Module extender	225.00
	Extra instruction manual	65.00

## DTG-1010N NTSC Digital Test Generator

Guaranteed accuracy and stability. Unit contains RS-170A genlock SPG and 5 digital test generators with 40 test signals each. Independent remote control for each generator allows simultaneous test procedures. Includes CCIR 473-3 VITS and outputs of sync, blanking, subcarrier and trigger signals.

DTG-1010N	With 5 data store modules	\$11,500.00
DTG-1010N-1	With 1 data store module	7,195.00
1000DS	Data store module	1,450.00
1010RP	Remote control panel	740.00
1000ME	Module extender	225.00
	Extra instruction manual	65.00

## ITG-3400N NTSC Insertion Test Generator

The ITG-3400N allows simple and reliable insertion of eight standard, internal vertical interval test signals into program video. These digitally generated, 12-bit precision waveforms conform to CCIR (NTC-7) and FCC specifications. One external, user-supplied signal source can also be selected.

The application of microprocessor control and digital technology in general, together with the latest analog circuit components, results in a unit with previously unavailable features and high quality video specifications.		
ITG-3400N	.....	\$5,895.00
1101ME	Module extender	150.00
100ME	Module extender	65.00
	Extra instruction manual	65.00

STG-2500N

## STG-2500N NTSC Studio Test Generator

The STG-2500N provides 22 computer-generated video test signal types specifically designed for baseband video studio equipment and general in-plant applications. Where applicable, the signals are also available at low APL, high APL and luminance only for a total of 56 different test signals. Additional signals include three VITS packages (FCC, CCIR (NTC-7), CCIR with VIRS) and a full range of trigger signals. Test signals are stored in EPROMs and may be adapted to changing industry standards. Conversion to analog form occurs with 10-bit precision. Test signals are directly selectable with front panel push buttons.

STG-2500N	.....	\$5,995.00
-----------	-------	------------

## TTG-2500N NTSC Transmission Test Generator

The compact TTG-2500N NTSC Transmission Test Generator provides 22 computer-generated video test signal types specifically designed for FM transmission link measurements. Where applicable, the signals are also available at 10%, 50% and 90% APL for a total of 60 different test signals. Additional signals include three VITS packages (FCC, CCIR (NTC-7), CCIR with VIRS) and a full range of trigger signals. Test signals are stored in EPROMs and may be adapted to changing industry standards. Conversion to analog form occurs with 10-bit precision. Test signals are directly selectable with front panel push buttons.

TTG-2500N	NTSC Transmission Test Generator (FM)	\$5,995.00
XTG-2500N	NTSC Transmitter Test Generator (AM)	5,995.00
2500RP	Remote control panel	870.00
1000ME	Module extender	225.00
	Extra instruction manual	65.00

# SWITCHERS/ DISTRIBUTION AMPLIFIERS VIDEO PROCESSING

AVS-481

## AVS-481 Audio/Video Switcher

Wideband, low crosstalk switcher for critical applications. Frame accepts one 8 x 1 video and one or two 8 x 1 audio matrices. Accurate delay matching, married or separate switching.

AVS-481 (Includes 481VS) . . . . . \$895.00

<b>AVS-481-1</b>	Audio/video switcher mounting frame without front panel control. Requires the 481RP remote control panel . . . . .	<b>.695.00</b>
<b>481A8</b>	8 x 1 audio switching matrix . . . . .	<b>.150.00</b>
<b>481RP</b>	Remote control panel . . . . .	<b>.365.00</b>
<b>481ME</b>	Module extender for 481VS . . . . .	<b>.145.00</b>
<b>100ME</b>	Module extender for 481AB . . . . .	<b>.65.00</b>
	Extra instruction manual . . . . .	<b>.45.00</b>

## 680 Series Video Distribution Amplifiers

Comprehensive range of DAs for signal distribution and processing, such as equalization, clamping and delay. Universal mounting frames accept any type of amplifier in any slot.

<b>FR-681</b>	Video DA mounting frame 1 RU, flat front panel. Accepts any mix of up to four 680 series modules. Includes one 664PS . . . . .	<b>.495.00</b>
<b>FR-681-C</b>	Video DA mounting frame Same as FR-681 but with fold-down, casting front panel in place of flat front panel . . . . .	<b>.545.00</b>
<b>FR-682</b>	Video DA mounting frame 2 RU, flat front panel. Accepts any mix of up to ten 680 series modules. Includes one 664PS . . . . .	<b>.745.00</b>
<b>FR-682-C</b>	Video DA mounting frame Same as FR-682 but with fold-down, casting front panel in place of flat front panel . . . . .	<b>.795.00</b>
<b>VDA-680</b>	Video distribution amplifier . . . . .	<b>.175.00</b>
<b>VEA-680</b>	Video equalizing amplifier without sub-module . . . . .	<b>.250.00</b>
<b>VEA-681</b>	Video equalizing amplifier with clamping . . . . .	<b>.270.00</b>
<b>VEA-682</b>	Video equalizing amplifier with sub-module . . . . .	<b>.300.00</b>
<b>PDA-660</b>	Pulse distribution amplifier . . . . .	<b>.230.00</b>
<b>VCA-660</b>	Video clamping amplifier . . . . .	<b>.275.00</b>
<b>SVD-680</b>	Switchable video delay amplifier . . . . .	<b>.475.00</b>
<b>SVD-600/160</b>	160ns passive video delay . . . . .	<b>.240.00</b>
<b>SVD-600/320</b>	320ns passive video delay . . . . .	<b>.410.00</b>
<b>SVD-600/640</b>	640ns passive video delay . . . . .	<b>.650.00</b>
<b>664PS</b>	Power supply . . . . .	<b>.395.00</b>
<b>100ME</b>	Module extender . . . . .	<b>.65.00</b>
	680 Series instruction manual . . . . .	<b>.40.00</b>

## 880 Series Audio Distribution Amplifier

Very low noise (100dB S/N), virtually transparent, DA. Input over-voltage protection. Two mounting frame sizes available.

<b>FR-881</b>	Audio DA mounting frame 1 RU, flat front panel, screw terminal back. Accepts any mix of up to four 880 Series modules. Includes one 860PS . . . . .	<b>.520.00</b>
<b>FR-881-C</b>	Audio DA mounting frame Same as FR-881 but with fold-down, casting front panel in place of flat front panel . . . . .	<b>.545.00</b>
<b>FR-882</b>	Audio DA mounting frame 2 RU, flat front panel, screw terminal back. Accepts any mix of up to twelve 880 Series modules. Includes one 860PS . . . . .	<b>.695.00</b>

<b>FR-882-C</b>	Audio DA Mounting frame Same as FR-882 but with fold-down, casting front panel in place of flat front panel . . . . .	<b>.750.00</b>
<b>ADA-881</b>	Audio Distribution Amplifier Eight low impedance outputs. Very low noise (100dB S/N), +30dBu maximum output level, gain range -6 to +33dB, input over-voltage protected and excellent output isolation . . . . .	<b>.230.00</b>
<b>ATG-880</b>	Audio Tone Generator Switch selectable 400 and 1000Hz audio tones. Available on four dual outputs at levels of +8, +4, 0 and -10dBm.  The ATG-880 is particularly suited for stereo installations as it provides four sets of stereo outputs, each at a different level. A feature of the tone generator in this application is the Ident switch which causes one of the output channels in each set to pulse off and on . . . . .	<b>.225.00</b>
<b>860PS</b>	Power supply . . . . .	<b>.420.00</b>
<b>100ME</b>	Module extender . . . . .	<b>.65.00</b>
	880 Series instruction manual . . . . .	<b>.30.00</b>

VPA-310P

## VPA-310P PAL Video Processing Amplifier

• Automatic lock mode • Constant sync and burst output • Programmable VITS retention • For systems B, G, H and I

This VPA version, with its high stability SPG, satisfies the most critical user requirements. Pulse outputs and remote control are optional.

<b>VPA-310P</b>	Remote control panel . . . . .	<b>.675.00</b>
<b>310RP</b>	Line driver . . . . .	<b>.250.00</b>
<b>110LD</b>	Module extender . . . . .	<b>.65.00</b>
<b>100ME</b>	Extra instruction manual . . . . .	<b>.65.00</b>

VPA-330N

## VPA-330N NTSC Video Processing Amplifier

• RS-170A front panel SC/H indication • H and V blanking width adjustable • Selectable VIT retention • Video gain control • Fade to black • Soft white clip • Hard white clip • Soft black clip • Hard or soft clamping • Input video lock • External reference lock • Video and/or chroma AGC • Total bypass • Differential input (optional) • Equalizing (optional) • Cue dot (optional)

<b>VPA-330N</b>		<b>.4850.00</b>
<b>VPA-331N</b>	NTSC video processing amplifier Same as 330N except has chroma gain control and auxiliary video input . . . . .	<b>.4995.00</b>

<b>Options (for VPA-330N and VPA-331N)</b>		
<b>330CD</b>	Cue dot generator . . . . .	<b>.265.00</b>
<b>330PE</b>	Processor equalizer (factory installed) . . . . .	<b>.335.00</b>
<b>330RP-1</b>	Main remote control panel . . . . .	<b>.725.00</b>
<b>330RP-2</b>	Aux. remote control panel . . . . .	<b>.700.00</b>
<b>330RP-3</b>	Cue dot control panel . . . . .	<b>.550.00</b>
<b>100ME</b>	Module extender . . . . .	<b>.65.00</b>
	Extra instruction manual . . . . .	<b>.65.00</b>

## DFS-3000N NTSC Digital Frame Synchronizer

Sophisticated digital circuitry and engineering advancements have produced a frame synchronizer that eliminates "frame grabbing" or picture "freezing" due to noisy video signals. Available in both two-field and four-field versions. With the four-field version the DFS-3000N is able to deal with the four color fields of the NTSC system and eliminate the horizontal shift of the picture that is associated with two-field operation.

The compact frame synchronizer's output is RS-170A zero SC/H at all times. The unit has RS-232C ports for remote control operation and interface with audio delay synchronizers. The remote control panel has the same functions as the front panel of the DFS-3000N. Other features include field or frame freeze, three modes of trouble-free hot switching, VIR corrector, auxiliary video input and four programmable output system phase presets. The programmable presets and the field or frame freeze functions can be activated through the remote control RS-232C port.

The DFS-3000N NTSC Digital Frame Synchronizer is available in an 8-bit or 9-bit version, (2-field memory), complete with detachable 3-pin power cord and instruction manual.

		B-Bit System 256 levels	9-Bit System 512 levels
DFS-3000N	NTSC Digital frame synchronizer with one 3000FM (two-field version)	\$10,995.00	\$12,500.00
3000CF	Comb filter	1,665.00	1,995.00
3000FM	Frame memory	1,665.00	1,995.00
3000RP	Remote control panel	1,195.00	1,195.00
3000RA	Remote control assignment	1,195.00	1,195.00
3000ME	Module extender	225.00	225.00
1000ME	Module extender	225.00	225.00
	Extra instruction manual	65.00	65.00

## DSF-3100N NTSC Digital Still File System

• Capacity of 650 fields/325 frames (upgradable to 10,000) • Single or dual channel (configurable for preview/on air or A/B operation) • High quality video specifications • Compact control panel with back-lit 20 x 1 LCD display and tally LEDs • Uses standard personal computer with SCSI Interface • Integrated library database

DSF-3100N .....\$29,900.00

### Includes the following items:

• 3100CU Control unit (accepts optional second disk drive) • 3101DD Second disk drive (1200 fields storage) • 3100FB Frame buffer • 3100RP Remote control panel • 3100KB Keyboard • 3100ZX System software • 3101ZX Configuration and diagnostics software • 3100MAN Technical manual • 3101MAN Operations manual • 3100SD Status display (monochrome)

Options		
3100FB	Second channel (with input)	.....\$15,000.00
3100FB-1	Second channel (output only)	.....10,000.00
3100SD	Status display (color)	.....895.00
3100RP	Extra remote control panel	.....2,495.00
3000RA	Remote control assignment	.....1,195.00

CDD-5400

## CDD-5400 Clock Distribution Driver with One 5400ID Impulse Driver Board

The CDD-5400 not only increases the impulse clock load capacity of your Master Clock System Driver, it also provides load isolation and overload protection. The compact, 1RU mounting frame comes with a plug-in power supply and will accept one or two distribution driver modules, depending on your expansion or distribution requirements. LED status indicators and fault alarms keep you informed. Also features power back-up and rear panel connections.

<b>CCD-5400</b>	(Includes one 5400ID impulse driver) .....	<b>\$1495.00</b>

## VCD-5600 Video Character Display

• Keys SMPTE/EBU time code (HH:MM:SS) into program video • Simultaneous display of time and text • Three character sizes • RS-232/422 input • Time window can contain EEPROM-stored source ident

The VCD-5600 is a 1RU, stand-alone device, designed to key SMPTE/EBU time code derived real time (HH:MM:SS) into program video. No input selection or switching is needed for either type of code. Time can be displayed in 12-hour format with AM/PM indication, or in 24-hour format. Local time-offset can be added in 30 minute increments. The unit is also compatible with a user-defined auxiliary offset when it is driven from the CSD-5300 Clock System Driver. A second line under the time numerals can be used for source identification. The characters appear white on program background or on a black matte. The time/ident window can be positioned anywhere in the picture area.

<b>VCD-5600N</b>	.....	<b>\$1895.00</b>

	Extra instruction manual .....	<b>.35.00</b>

## DTD-5200 Series Digital Time Displays

The DTD-5200 Series are microprocessor controlled devices and accept standard serial time code in SMPTE or EBU format. No input selection or switching is needed for either type of code. The decoded signal drives a 6-digit, 7-segment real time (time of day) display in hours, minutes and seconds (HH:MM:SS). Either the 24-hour format or the 12-hour format with AM/PM indication can be selected.

The time displays are available in rackmount, console mount or desktop versions. Readout digits are 0.8" H. The brightness of the readout can be set to one of four levels with a rear panel DIP switch.

The time display units are compatible with a user-defined time offset when driven from the CSD-5300N Clock System Driver.

<b>DTD-5200</b>	Digital time display .....	<b>\$ 875.00</b>

5012

## DAC-5000 Series

### Self-setting Analog Clocks

The DAC-5000 Series clocks are designed to combine the advantages of large, easily understood analog time displays and the self-setting capability of digital SMPTE/EBU serial time code readers. This advanced automation is made possible by a unique, digitally controlled drive mechanism. A microprocessor is used to decode the digital time code information and precisely position each hand via three independent motors.

TRIAx VIDEO CONNECTORS

WITH PROTECTIVE SHEATHS

## VIDEO TRIAX

LEMO's Video Triax Connectors are built to meet the rigorous demands of the television industry. The close tolerances and superior craftsmanship assure consistent, reliable transmissions.

### Technical Characteristics:

- Nominal impedance: 75 ohms
- Operating frequency: 2.5 GHz
- VSWR: 1.01 + 0.076f (GHz)
- Insertion loss: < 0.4 dB
- Contact resistance:
  - center contacts ≤ 3m ohms
  - internal ground ≤ 1m ohms
- Breakdown voltage:
  - center contact/internal ground: 4kVrms
  - internal/external ground: 9.5kVrms
- Operating temperatures: -50°C + 260°C (-58°F + 500°F)
- Connector retention force, engaged: min. 28N
- Cable retention force: min. 500N
- Recommended cables:
  - Triax Felten & Guillaume Part No. 127657 and 127664
  - Triax BIW Part No. 10069-C-G20 and 10070-C-G14
  - Triax Belden types 9232, 8233, 9267 and 8232 (accepts size 9.2 thru 13.2mm)

## TELEMANIPULATOR-ROBOTIC CONNECTORS

### FEATURES

- Hermaphroditic insulators
- Multi-range contacts
- Higher pin density model with keyed polarization

## PLUGS—TRIAxIAL

### F STRAIGHT PLUG WITH CABLE COLLET

## 300 SERIES TERMINAL EQUIPMENT

### PFM-300 Mainframe and Power Supply

The PFM-300 Mainframe is the heart of the 300 System. It consists of a power transformer, the PPS-302 Power Supply, and nine cells with connectors mounted on a "mother board". The PPS-302 supplies the power buses in the frame with  $\pm 15\text{VDC}$  and  $+8\text{VDC}$ .

### PSG-310 Digital Color Sync Generator W/RS-170 Genlock

The PSG-310 Digital Color Sync Generator exemplifies the latest in design techniques of digital engineering. The unique circuit allows us to offer an ultra-stable and trouble-free generator, with exclusive features not normally found in broadcast quality equipment.

PSG-310 Digital color sync generator . . . . . \$ 1238.00

Option 1 Variable blanking width assembly . . . . . 170.00

PMG-312

### PSG-311 Digital Color Sync Generator

The PSG-311 Digital Color Sync Generator incorporates the same unique design techniques that are found in the PSG-310 Sync Generator. The only exception is in the genlock circuitry. The PSG-311 was engineered to operate with helical VTR's or other equipment that supplies unstable time base signals.

PSG-311 Digital color sync generator . . . . . \$ 1238.00

Option 1 Variable blanking width assembly . . . . . 170.00

### PMG-312 Master Sync Generator

The PMG-312 is a professional Master Color Sync Generator designed to meet the most demanding specifications for performance and stability. The design criterion was to provide a high quality master color sync generator that includes all the features desired by the discerning engineer. Utilization of the latest state-of-the-art techniques are incorporated in the PMG-312.

PMG-312 . . . . . \$ 2575.00

PFT-314

### PSG-313A Frame Resident, Genlocking, RS170A Digital Sync Generator

Developed to meet the advanced technology demands of the Broadcast, Industrial and Computer Graphics video markets.

**Features:** RS170A specification, Digital Design, Multifunction genlock with exclusive PC lock, Panel status lights, Full 360° Sch phasing, Full  $\pm 5\mu\text{s}$  H phasing, Fail safe mode for loss of burst, Broadcast spec. TCVCXO (Temperature Controlled, Voltage Controlled, Crystal Oscillator).

PSG-313A . . . . . \$ 1535.00

### PFT-314 Frame Timing Module

The PFT-314 basically has the same system responsibility as its sister unit, the PGS-315 Generator Substitute unit. That is, its primary function is to receive an external signal and supply the PFM-300 frame mother board with all the six drive signals. The PFT-314 has major differences: The input signal is a Composite Reference Signal (CRS) instead of individual drive signals; provides a complete set of output signals for use external to the frame; has advanced timing capabilities instead of just delay, and subcarrier is phase locked to H Sync.

PFT-314 . . . . . \$ 1095.00

# TERMINAL EQUIPMENT

## 300 SERIES (cont'd)

### PGS-315 Sync Generator Substitute Module

The PGS-315 Sync Generator Substitute module is a valuable member of the overall 300 System concept. It has the primary function of replacing the PSG-310 or PSG-311 Sync Generators when external drive sources are available to the PFM-300 Frame. The PGS-315 accepts Sync, Blanking, H-Drive, V-Drive and Subcarrier from an external source, processes these signals and distributes them to the proper buses in the frame. The identical digital delay circuits, as described in the PSD-340 System Delay Module, are also in the PGS-315 Module, providing the system timing capabilities for the frame. Because the PGS-315 is not a generator, although in this application it is performing the same function, the pulses supplied to the frame are absolutely jitter free and can be perfectly timed.

**PGS-315** ..... \$663.00

### PFI-316 Frame Interface Module

The PFI-316 Frame Interface Module is a unique and inexpensive way of allowing an external generator to supply signals to the PFM-300 Frame. It has the primary function of replacing the PSG-310 or PSG-311 when external drive pulses are available to the PFM-300 Frame. The PFI-316 accepts Sync, Blanking, H-Drive, V-Drive, Subcarrier, and Burst Flag from an external source for proper distribution to the mother board buses in the frame. There are no delay circuits in the PFI-316. Its function is simply to apply the proper level and impedance of each signal to the frame.

**PFI-316** ..... \$413.00

### PCO-317 Automatic Sync Changeover Switch

The PCO-317 Automatic Sync Changeover Switch is a remarkable state-of-the-art device designed to instantly recognize the failure of any synchronizing signals and immediately switch to an alternate source. Signal sensing circuits monitor each input for the level and timing of the Sync, Blanking, Horizontal Drive, Vertical Drive, Burst Flag, and Subcarrier signals. Upon loss of the primary generator, the PCO-317 will supply the frame buses with the alternate source only if their signals are acceptable to the changeover module's parameters. It will not switch to a faulty generator.

**PCO-317** ..... \$655.00

**PCO-318 Automatic Sync Generator Changeover with Black Burst (for PFM-301 frame only)** ..... \$922.00  
**Option 1 Black Burst Generator, (for PCO-318 only)** ..... \$275.00  
**Option 2 Remote Control for PCO-318** ..... \$220.00

### PCB-320 Encoded Color Bar Generator

The PCB-320 Encoded Color Bar Generator is a precision test signal generator engineered to conform to the EIA RS-189-A and NTSC specifications. Reflecting the progressive concept of the 300 System, the PCB-320 includes the new SMPTE Alignment Color Bar Test Signal with chroma and black set signals. The encoder is a true NTSC standard as evidenced by the precise filtering of the I and Q channels shown by the waveform.

One of the exclusive features of the PCB-320 is the single control composite video delay circuit which, for the first time, allows system timing of test signals.

**PCB-320** ..... \$1082.00

### PBB-321 Black Burst Generator

The PBB-321 Black Burst Generator is a precision professional broadcast quality Black Burst Generator that provides a "Color Black" video signal composed of composite sync, set-up and color burst. This signal is used as the black reference input to switching systems, cameras or may be used as a signal source to genlock remote sync generators to "House" sync.

**PBB-321** ..... \$655.00

PGS-315

PFI-316

PCO-317

PCB-320

PBB-321

PBD-322

### PBD-322 Bar Dot/Visual Reference Generator

The PBD-322 Bar Dot/Visual Reference Generator is one of the 300 System's most technically advanced signal generators. It is two separate and independent generators providing the standard dot grading signals, and a new linearity test signal, including a "Safe Title" signal.

The Bar Dot Generator digitally produces EIA standard horizontal and vertical bars, cross hatch, and dot signals used in the testing for convergence of color monitors and camera sweep circuits. Horizontal and vertical position controls, plus pattern selection, are located on the front panel.

**PBD-322** ..... \$922.00

## 300 SERIES (cont'd)

### PMB-323 Multiburst/Sweep Generator

The PMB-323 Multiburst and Sweep Generator is a combination of two precision test signal generators which are required for overall system frequency response measurements. A front panel switch provides for selection of either the Multiburst signal, the Sweep signal, or both (on alternate lines). Other switches allow for the selection of full or reduced amplitude and burst on-off. The multiburst frequencies are preset to EIA standards but burst frequencies can be adjusted to 10MHz if required. Stability of both amplitude and frequency is assured by a precision function generator operating within a feedback loop. The burst levels are fixed and cannot change as are the sync and setup levels. The Sweep Generator provides a linear sweep at a horizontal rate from 0.5MHz to approximately 12MHz with overall flatness of 0.2dB. Fixed markers are provided at 2.0MHz intervals.

PMB-323 ..... \$1025.00

### PSS-324 Stairstep/Ramp Generator

The PSS-324 Stairstep/Ramp Generator provides a precision test signal for measuring differential phase and gain, luminance linearity, and burst phase error of a video system. An exclusive feature of the generator is a negative signal for all combinations of test signals. This is a very important function for the testing of differential phase and gain in the burst region. Strict conformity to the standards of IEEE 206 is adhered to, as well as a true video bounce test that conforms to standard APL definitions.

PSS-324 ..... \$1133.00

### PPB-325 SIN<sup>2</sup> Pulse Window Generator

The PPB-325 Sin<sup>2</sup> Pulse Window Generator is another in the series of fine, precision, state-of-the-art signal generators. Unique engineering and packaging techniques have provided the following nine precision test signals in a one module width plug-in unit: Modulated 12.5T and 20T, T, 2T, or T/2 pulses, window or bar signals and the exclusive "pluge" pulse. The PPB-325, with a combination of front panel switches and internal strapping options, can provide almost any combination of the nine signals. This feature was designed to allow the user to determine the proper test signals which are best suited for his particular system application.

PPB-325 ..... \$1334.00

### PFF-329 Black Burst/Background Generator

The Black Burst section of the PFF-329 provides a "Color Black" video signal composed of composite sync, setup, and color burst. This signal is used as the black input to switching systems, or may be used as a signal source to genlock remote sync generators to "House" sync.

The Color Background section produces a solid field of color and, when connected to the input of a special effects generator or video insert keyer, provides color backgrounds for titles and other inserts. A standard feature of all 300 System Generators is a composite delay which provides for delaying the output signal up to 1.5µs to assist in system timing.

PFF-329 ..... \$700.00

### PSD-340 System Delay Module

The PSD-340 System Delay Module has completely changed the traditional system timing techniques as they are now used. This unique system concept obsoletes the use of pulse and subcarrier distribution amplifiers, as well as excessive cable or other external delay devices used in system timing. The PSD-340 will supply all drive signals to any video source, including subcarrier, with the unique capability of timing these signals to your system requirements. This jitter-free device can be compared with having an individual genlock sync generator driving each camera, switcher, VTR, etc.

PSD-340 ..... \$605.00

PMB-323

PSS-324

PPB-325

PST-341

PBT-342

### PST-341 System Timing Module with Optional Black Burst Output

The PST-341 System Timing Module is a new generation of system timing equipment added to the "300 System". It not only has delay, but advance as well. The PST-341 requires the Composite Reference Signal (CRS), from the PMG-312 Master Sync Generator via the PFM-300 Frame mother board. This Composite Reference Signal supplies Master Sync Generator timing information to the PST-341 for the purpose of system distribution and timing.

PST-341 ..... \$1095.00

### PBT-342 Black Burst Timing Module

The PBT-342 Blackburst Timing Module not only has delay, but advance as well. The PBT-342 requires the Composite Reference Signal (CRS) from the PMG-312 Master Sync Generator via the PFM-300 Frame mother board. This Composite Reference Signal supplies Master Sync Generator timing information to the PBT-342 for the purpose of system distribution and timing of blackburst required devices.

PBT-342 ..... \$1095.00

### PPA-343 Pulse Distribution Amplifier

The PPA-343 Pulse Distribution Amplifier is an important module in the overall concept of the 300 System. Although the PSD-340 System Delay Module is the modern method of pulse distribution and system timing, there are still many applications where the standard methods of individual pulse distribution are required.

PPA-343 ..... \$314.00

Option 1 Pulse Delay Assembly for PPA-343 ..... 214.00

## 300 SERIES (cont'd)

### PFO-344 Fan-Out Pulse Distribution Amplifier

The PFO-344 is a universal fan-out amplifier consisting of six separate and independent DA cells. Each cell has one input and one output with unity gain. Each cell can be programmed by changing connector positions to select any combination of drive pulses. The pulses are made available on the frame mother board by any of the 300 Series sync generators or an interface module.

**PFO-344** .....\$413.00

### PSA-346 Subcarrier Distribution Amplifier

The PSA-346 Subcarrier Distribution Amplifier was designed to supplement the versatile 300 System's unique concept and incorporates the same state-of-the-art design techniques found in all of the 300 System modules. The PSA-346 is a precision, ultra-stable, regenerative subcarrier amplifier whose advanced circuitry provides a pure, distortion-free 3.58MHz sine wave.

**PSA-346** .....\$435.00

### PVA-350 Video Distribution Amplifier

The PVA-350 Video Distribution Amplifier reflects a new concept in engineering techniques, bringing to the 300 System a versatile state-of-the-art video amplifier with outstanding performance characteristics. The PVA-350 is flat to 15MHz, has a unique automatic DC offset control, and offers low noise, excellent stability, and virtually no distortion. A differential amplifier on the input is standard in the PVA-350, and provides 70dB of common mode rejection.

**PVA-350** .....\$319.00

**Option 1 Feedback Clamp Assembly** .....121.00

**Option 2 Cable Equalizer Assembly** .....99.00

**Option 3 Sync Adding Assembly** .....66.00

### PVA-351 White Clip Video Amplifier

The PVA-351 Video White Clip Distribution Amplifier has a differential high impedance looping input that is standard and provides more than 60dB of common mode rejection for reduced ground loop hum pickup. Gain is front panel adjustable over a  $\pm 6$ dB range. Frequency response is flat to 10MHz. The PVA-351 offers low noise and excellent stability with virtually no signal degradation. Four 75 ohms source terminated DC coupled outputs are provided with excellent low frequency transient response and 40dB of isolation.

**PVA-351** .....\$424.00

### PVA-352 Utility Video Distribution Amplifier

The PVA-352 provides the quality-conscious as well as cost-conscious user the features and performance expected by broadcasters and video production houses.

Dependable video distribution within a television facility is critical. The front mounted power status LED remains lighted when the PVA-352 is correctly powered. A front mount gain control provides precise adjustments of each distribution amplifier for a variety of applications. The front mounted video test points allow critical system analysis without removing the module from the frame.

**PVA-352** .....\$197.00

### PVD-354 Variable Delay Video Amplifier

The PVD-354 Variable Delay Amplifier is a precision device that has widespread system applications when quality and accuracy of video timing is desired. Most passive video display devices have a very sharp frequency roll-off above 5MHz and show an insertion loss of about 6dB. This requires the use of a video distribution amplifier with enough gain to bring the signal up to normal. The PVD-354, however, is a wideband device that has no insertion loss, and will provide up to 1,051 $\mu$ s of equalized video delay, with infinite resolution of delay setting.

**PVD-354** .....\$1095.00

PVA-350

PVD-354

PRC-365

PSW-367

### PRC-365 Processing Amplifier with Sync Generator

The PRC-365 is a high performance video processing device. It is designed for use in studios, master control facilities or transmitter locations. It features standard or helical lock, differential video input, luminance only black clip, a soft white clip, internal digital sync generator, vertical interval line select, front panel controlled pedestal, genlock capability and a front panel LED that indicates the presence or absence of video. The PRC-365 requires only the PFM-300 Frame and Power Supply for operation.

**PRC-365** .....\$2079.00

### PSW-367 6x1 Vertical Interval Switcher

The PSW-367 6x1 Test Switcher was designed to provide a unique and economical method of selecting the various output signals from the test signal generators that may be installed in the PFM-300 Frame. In addition to the six test module signals, provisions have been included to allow the PSW-367 to switch to either the "Genlock Video" or one other external video source. The PSW-367 will switch during the vertical interval and the LED display will constantly monitor the switch status.

## THE 400 SYSTEM

### PSG-412 Master Sync Generator with Genlock, RS170A\*

The PSG-412 is a Master Sync Generator with genlock. This unit meets the proposed RS-170A specifications. It maintains an accurate SC/H phase condition. There are 2 outputs of each drive pulse plus blackburst, video, CRS, burst flag and color field identification. CFI is programmed for field 1 line 10. An ovenized crystal is used to maintain an accurate internal timebase. All pulse widths are adjustable except VD and field ID. Vertical blanking is selectable between line 17 through 21. Also converts the genlock video to RS-170A by inserting a regenerated blackburst signal.

PSG-412 ..... \$3502.00  
PBL-400 1<sup>3</sup>/<sub>4</sub>" x 19" Blank Panel\* ..... 43.00

### PCO-418

#### Automatic Sync Pulse Changeover for PSG-12\*

The PCO-418 Automatic Changeover Switch instantly recognizes the failure of any of nine pulses and immediately switches to an alternate generator. There are nine LEDs metering each generator. A nine position DIP switch allows the lock-out of any of the nine generator pulses. A front panel switch selects GEN-1 or GEN-2 or Auto. The unit switches on failure of HD, VD, SY, SC, BL, CRS, BF, BB and CFI.

PCO-418 ..... \$1995.00

### VNM-428 Video Noise Meter\*

The VNM-428 is a Video Noise Meter that offers the in-service capability of making accurate real time signal-to-noise measurements. It has a built-in calibrator that insures an accuracy of 1% through its range of 28.5dB to 76dB. The signal-to-noise ratio is shown directly on a large LED display. The VNM-428 can be calibrated to read directly in either the EIA or PAL-M system standards.

VNM-428 ..... \$2145.00

### PVS-430 Videoscope

The PVS-430 provides a true method for certifying the correct SC/H phase relationship. The PVS-430 will measure very accurately the SC/H phase relationship and compare the video input of a switcher or mixer for precise and accurate system timing. In an editing system, the Videoscope provides a useful method of determining off-tape SC/H phase.

PVS-430 ..... \$3245.00  
PVS-435\* Videoscope with video display and LED readout ..... 4153.00

### TBC-450 Digital Time Base Corrector

The TBC-450 high performance unit is sophisticated in its techniques yet its simplistic design allows unparalleled performance in a wide range of professional broadcast applications.

At less than 15 lbs. and only 1 rack unit tall, this digital device with its remarkably low power consumption requires no external cooling. The TBC-450 is engineered to be ultra reliable to keep downtime to a minimum, yet its totally digital design allows for quick and easy servicing. An essential part of any professional editing system, this compact unit has been constructed to be rugged enough to withstand the toughest applications.

With its state-of-the-art components, the TBC-450 is the answer to today's requirements for space-saving design, superior quality and unbeatable economy for the professional video user.

TBC-450 ..... \$5995.00

\*Indicates availability for PAL System also

### PRC-465 Processing Amplifier

The PRC-465 is a self-contained stand alone processing amplifier. The unit features chroma processing, a 10MHz luminance band pass, luminance only black clip, white clip, and a line by line VIT-VIR pass or delete selector. The unit has its own built-in sync generator, but may be set up to run off of an external video reference source such as blackburst. An internal switch allows the unit a greater lock range and enables the device to process the output of a helical scan VTR. Front panel controls provide adjustment of Burst Phase, Horizontal Phase, White Clip, Set Up, Video Gain, Chroma Gain, and Proc On/Off switch.

PRC-465 ..... \$2525.00

### PCE-466 Color Encoder\*

The PCE-466 Encoder produces an NTSC/EIA color signal from either a three or four channel video source. The fourth, or luminance channel, is optional. The encoder requires red, green, blue, sync, SC and blanking input. Split field color bars meeting RS-189A are standard. Full field or split bars are selectable internally. Front panel switches allow the selection of operate, color bars, black burst or mono. All inputs are 75 ohm loopthrough. Two video outputs.

PCE-466 ..... \$3450.00  
PCE-4661\* Plug-in luminance channel ..... 795.00  
PCE-4662 Plug-in genlock option ..... 747.00

### PSW-467 Vertical Interval Bridging Switcher\*

The PSW-467 is a 12 x 1 vertical interval bridging switcher. It is designed to efficiently and economically route or delegate video signals.

PSW-467 ..... \$1150.00

### PAF-467 Audio Follow Bridging Switcher\*

The PAF-467 is a 12 x 1 Audio Follow Video Switcher designed as a companion to the PSW-467 Video Switcher.

PAF-467 ..... \$940.00

### PSR-467 Remote Control\*

The PSR-467 Remote Control is a self-contained rackmounted unit that can be located up to 1000' from the switcher location. It requires no external power source because it receives its power from the PSW-467 or PSW-468 Video Switcher.

PSR-467 ..... \$604.00  
PSR-4673\* Remote control P.C. board assembly ..... 289.00

### PSW-468 Remote Vertical Interval Video Switcher\*

The PSW-468 is a 12 x 1 remotely controlled, vertical interval video switcher. This switcher has no push buttons. All input switching is controlled by the companion PSR-467 remote control unit or PSW-467 vertical interval switcher.

PSW-468 ..... \$985.00

### PCD-473 NTSC Component Decoder

The PCD-473 is a self-contained chroma demodulator. The unit provides outputs of red, green, and blue signals or Y, R-Y, B-Y, signals, or I, Y, Q signals. Selection of outputs is internal to the unit through a jumper system. The unit features a comb filter which is switchable in and out of service through a lighted front panel switch. The front panel controls provide adjustment of Hue, Saturation, and Video level. A regenerated composite sync output is standard on the PCD-473.

PCD-473 ..... \$3190.00

**CSL-710**

**CCE-850**

**700 SERIES EQUIPMENT**

**CSL-710 Digital Color Sync Generator**

The CSL-710 Digital Color Sync Generator is a professional broadcast piece of equipment that meets several applications. The generator has a complete complement of NTSC pulses meeting EIA RS-170 specifications.

Two genlock modes of operation are provided by the CSL-710. The Standard genlock mode for RS-170, and Helical genlock mode for unstable time base signals. The genlock circuit has a unique noise immunity circuit which makes the generator highly insensitive to noise or extreme changes in input levels. The incoming video is sensed by an extremely fast video presence detector, processed and locks the generator automatically to the 50% point of the sync pulse. The Helical genlock mode will lock to most helical scan video tape recorders. It will lock to the unstable time base signal and ignore the fact that information is missing during the head drop out period of the VTR. In the Helical mode, it does not require a coherent burst input to achieve lock. Input level for genlock is automatically compensated to maintain genlock on various input signal levels.

A temperature compensated crystal oscillator operating at 14.318180 MHz provides the stable master frequency source from which all pulses and subcarrier are derived. All pulse widths and levels are fixed per EIA standards.

Two sets of output are provided on the rear panel including Horizontal Drive, Vertical Drive, Blanking, Sync, Subcarrier and Burst Flag. The modern design front panel provides test points for pulse measurements. Adjustments for Horizontal Frequency, Horizontal and Vertical Phase and Subcarrier Phase as well as the selection of Standard or Helical genlock is located on the front panel. The unit is self contained, operating on 100 to 130 VAC and drawing only 24 watts.

<b>CSL-710</b>	Digital Color Sync Generator w/Genlock, RS170.....	<b>\$1678.00</b>
<b>MOD-1</b>	Special Scan Rates 655/48.....	<b>.385.00</b>

**800 SERIES EQUIPMENT**

**CCE-850 Color Encoder**

The CCE-850 is a complete NTSC compatible color encoder with a built-in color reference bar signal. The system is a self contained unit measuring only 1-3/4 inches high and 17 inches wide. It can be used as a table top unit or mounted in a standard 19" equipment rack.

It is a wide band high resolution encoder primarily for the use with RGB color graphic generated information from a computer processor unit. The unit will encode most of the scan and resolution rasters presently offered by computer terminals. The output of the CCE-850 can be fed to any standard NTSC color monitor or video tape recorder.

The required signal input is RGB with or without the presence of sync. An external sync input is available if the computer RGB signal is non-composite (without sync.). The unit does not require an external GEN locking sync generator to interface with the RGB graphics computer. An automatic sync input detector selects between video sync or external sync to generate blanking and burst. A video gating circuit automatically matches black levels and inserts new blanking. Blanking regeneration automatically adjusts to line lengths and field lengths to closely simulate NTSC specification.

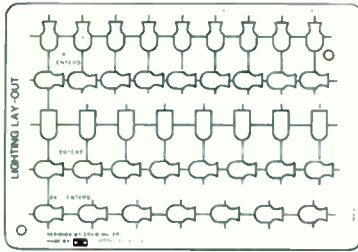

In addition to the two composite NTSC type outputs, in order to reduce system timing problems, the CCE-850 features a very short signal delay (250ns).

An image detail control on the front panel allows the operator to continuously compensate for high frequency losses in the system. A color reference pattern is switch selectable to aid in the adjustment of the NTSC color monitor.

Front panel controls are AC On/Off, Brightness, Color, Contrast, Detail, and Color Reference. Rear panel connections are high impedance looping RGB and sync input, two NTSC type composite video outputs source terminated 75 ohms.

The unit operates on 115/230 volts AC, 50/60 Hz. Power approximately 10 watts.

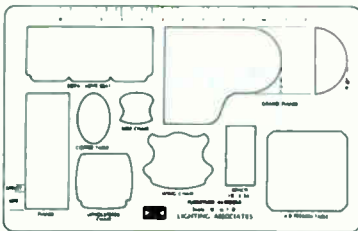

<b>CCE-850</b>	RGB to Composite Video Encoder .....	<b>\$2095.00</b>
<b>CCE-8501</b>	Adapts to 10µs Sync Pulse .....	<b>.209.00</b>

### The Lighting Lay-Out Template

The Lighting Lay-Out Template is intended as a time-saving device for lighting designers who draw light plots frequently. Its primary goal is to free designers from the tedium of constantly re-measuring the spacing between lamps. Instructions included for use on towers, booms and perspectives. Half-inch scale.

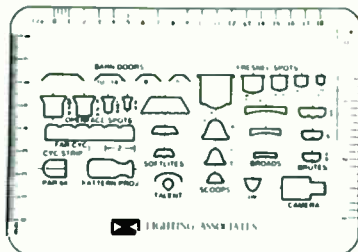

**Broadway Lighting Layout Template, \$5.50 each**

### Furniture Templates

The first furniture template scaled  $1/2" = 1'0"$  is now available for theatrical and interior designers as well as architects. Four pianos (including the 9'0" concert grand), three major chairs, bench, sofa, love seat and two tables are all included on a single template.

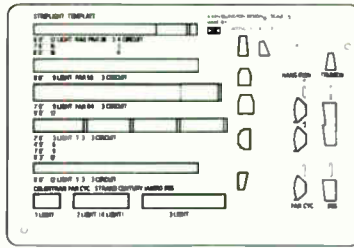

**Half-inch Furniture Templates, \$3.50 each**

### Television Lighting Templates

A specialized template created for advanced film and television production includes symbols for instruments not used in the theater. These templates service the need for a uniform set of symbols to be used for television lighting. Available in  $1/8"$  and  $1/4"$  scales.

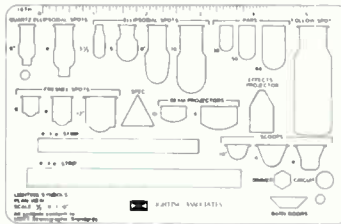

**Television Lighting Templates, \$4.50 each**

### The Striplight Template

The template includes all of the Quartz and standard incandescent striplights currently in use on Broadway, in television and in large spectacle touring productions. Half-inch scale.

**Professional Striplight Template, \$5.50 each**

### Theatrical Lighting Templates - Plan View

All symbols conform to USITT Scenographic Standards.

Our revised, twenty-five symbol template is available in  $1/2"$ ,  $1/4"$ , and  $1/8"$  scale. Included are six Ellipsoidal Spots, three PAR's, Fresnels, Striplights, three Beam Projectors, Scoops, Effects Projector and more.

**All Plan View Templates, \$4.75 each**

### USITT Lighting Graphics Chart

This handy laminated reference chart features all of the approved USITT Lighting Graphic Standards. Designed to hang near your drafting table, it is a perfect complement to the graphic standard templates.

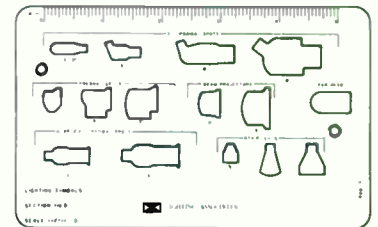

**Net proceeds contributed to USITT Lighting Graphics Chart, \$2.00 each**

### USITT Approved Scenic Graphic Template

All of the symbols for scenery construction plus useful scales for measure and angle are included on the scene design template, featuring keystones, corner blocks, hinges, lash cleats and more. Complete instructions included.

**Scenic Graphic Template \$5.50 each**

### Theatrical Lighting Templates - Section View

Lighting symbols in the Section View template include the usual symbols plus all the Quartz Units. These templates are also available in  $1/2"$ ,  $1/4"$  and  $1/8"$  scale.

**All Section View Templates, \$4.50 each**

Lighting Associates templates are used by a majority of the Broadway designers, including the Tony Award Designers, and have been adopted as a standard by both equipment manufacturers and the educational theater.

CH-200-48	48 channel, two scene . . . . .	4100.00

CH-200

## Designer® Control Console

- Proportional dimmer to channel patch
- 512 dimmer capacity
- 24, 36 or 48 control channels
- Two scene or memory master operation
- Key pad data entry
- Manual or timed fades
- Eight group masters
- Dimmer level and assignment display
- Bump buttons with solo
- User programmable chase
- DMX-512 control signal

The Designer combines the simplicity and reliability of a two scene preset, the electronic sophistication of a memory system and the capabilities of an effects controller to provide flexible, economical and creative lighting control.

# TIMERS

## CHRONTRON TIMERS

### Wall Mount Timers

- Ideal for commercial buildings, parking lots, schools, churches, restaurants, industry and agriculture
- Energy management: load allocation, scheduling and duty cycle
- Inside/outside lighting control
- Traffic lights and school crossings
- Security system timing
- Illuminated sign or display controls
- Irrigation systems
- Industrial Process Control
- HVAC, air handling system control
- Laboratory equipment control
- 10 (optionally 40) programs
- 2 or 4 independent SPDT outputs
- Settable and accurate to the second
- Cycle times from 2 seconds to 192 hours
- Separate On and Off time settings and cycle times on each program
- Directly replaces multiple mechanical timers
- Tamper-resistant locking keyboard
- Weekly cycle with day omission
- Microprocessor controlled
- Completely field programmable
- Battery backup keeps time even during power outages
- Continuous digital time of day display
- Field-proven dependability
- Easy to set and operate

### Wall Mount Models

#### Standard Equipment:

- 10 programs
- Lead acid battery backup with built-in recharger
- Crystal time-base backup system
- Independent 20A dry contact SPDT relay with each circuit

#### Non-Expandable Models

CD-W2	2 Circuit	\$369.00
CD-W4	4 Circuit	419.00

#### Expandable Models

Expandable models include 40 programs and mechanical key locking as standard equipment.

CD-W8	8 Circuit (includes 2 Expander Modules)	\$ 919.00
CD-W12	12 Circuit (includes 3 Expander Modules)	1119.00
CD-W16	16 Circuit (includes 4 Expander Modules)	1319.00
EX4	Circuit Expander Module	200.00

### Rackmount Timers

- Ideal for broadcast stations, theaters, music systems, studios, communications systems, instrumentation systems
- Video recorder control for satellite program delay
- Sampling control of air and other fluids
- Lighting control
- Security system timing
- Chart recorder sequencing
- Remote data collection/transmission control
- Laboratory equipment control
- 10 (optionally 40) programs
- 2, 4, 8, 12 or 16 independent SPDT outputs
- Settable and accurate to the second
- Cycle times from 2 seconds to 192 hours
- Separate On and Off time settings and cycle times on each program
- Directly replaces multiple mechanical timers
- Tamper-resistant locking keyboard
- Weekly cycle with day omission
- Microprocessor controlled
- Completely field programmable
- Battery backup keeps time even during power outages
- Continuous digital time of day display
- Field-proven dependability
- Easy to set and operate

### Rackmount Models

#### Standard Equipment:

- 10 programs (40 programs with 8, 12, or 16 circuit models)
- Lead acid battery backup with built-in recharger
- Crystal time-base backup system
- Independent 20A dry contact SPDT relay with each circuit

Tabletop

Rackmount

CD-R2	2 Circuit	\$ 359.00
CD-R4	4 Circuit	409.00
CD-R8F	8 Circuit (includes 40 programs)	869.00
CD-R12F	12 Circuit (includes 40 programs)	1069.00
CD-R16F	16 Circuit (includes 40 programs)	1269.00

### Tabletop Timers

- Ideal for laboratories, businesses, hospitals, universities and homes
- Laboratory experiment cycling
- Sampling control of air and other fields
- General lighting control/Photoperiodic simulation
- Display or illuminated sign control
- Furnace cycling
- Animal feeding and stimulus
- Security system timing
- Chart recorder drive control
- Tape control
- HPLC
- 10 (optionally 40) programs
- 2 or 4 independent circuits, AC receptacles or dry contacts
- Settable and accurate to the second
- Cycle times from 2 seconds to 192 hours
- Separate On and Off time settings and cycle times on each program
- Directly replaces multiple mechanical timers
- Tamper-resistant locking keyboard
- Weekly cycle with day omission
- Microprocessor controlled
- Completely field programmable
- Battery backup keeps time even during power outages
- Continuous digital time of day display
- Field-proven dependability
- Easy to set and operate during power outages

### Tabletop Models

#### Standard Equipment

- 10 programs
- Crystal time-base backup system
- 9V alkaline battery backup system
- Independent 15A SPST relay with each circuit

CD-2	2 Outlet	\$239.00
CD-4	4 Outlet	269.00
CD-2S	2 Circuit Dry Contact	249.00
CD-4S	4 Circuit Dry Contact	279.00

#### Optional Equipment

F	40 Programs (Standard on Expandable Models)	\$150.00
B	Interval Button	40.00
N	Interval Input	40.00
K	Mechanical Key Locking (Standard on Expandable Models)	10.00
R	Raintight Enclosure (Not available on Expandable Models)	40.00
240V	240VAC Power Source	10.00
50Hz	50Hz Time Base	10.00

## Ultra I

Consists of: Ultra I Fluid Head and Claw Ball Assembly, JRA-83M Tripod with Spider Assembly, MQR-84S Quick Release with 2" adjustment and safety lock, Dual Handles

### Specifications

**Load:** Up to 30 lbs.  
**Weight:** Head and tripod—17½ lbs.  
**Size:** 7" H x 7½" W  
**Height:** Head and tripod—closed 45" / extended 59" / at rest 40½"  
**Pan:** 360°  
**Tilt:** 90°  
**Base:** Ball or flat  
**Finish:** Black vinyl  
**Accessories:** Reversible feet, strap, Sta-Sets, case

Ultra I . . . . . \$2137.31

## Ultra II

Consists of: Ultra II Fluid Head and Claw Ball Assembly, JRA-74 Tripod with Spider Assembly, LQR-84S Quick Release with 2½" adjustment and safety lock, Dual Handles

### Specifications

**Load:** Up to 50 lbs.  
**Weight:** Head and tripod—22 lbs.  
**Size:** 8" H x 8" W  
**Height:** Head and tripod—closed 45½" / extended 59" / at rest 42"  
**Pan:** 360°  
**Tilt:** 90°  
**Base:** Ball or flat  
**Finish:** Black vinyl  
**Accessories:** Reversible feet, strap, Sta-Sets, case

Ultra II . . . . . \$2463.43

## Ultra 250

Consists of: Ultra 250 Fluid Head and Integral Aluminum Tripod with Handle

### Specifications

**Load:** Up to 18 lbs.  
**Weight:** Head and tripod—11 lbs.  
**Size:** 5" H x 5¼" W  
**Height:** Head and tripod—closed 42" / extended 59" / at rest 45"  
**Pan:** 360°  
**Tilt:** 90°  
**Base:** Flat  
**Finish:** Black vinyl  
**Thread Size:** ¼"-20" or ⅜"  
**Accessories:** Quick release, strap

Ultra 250 . . . . . \$1538.05

## Ultra 500

Consists of: Ultra 500 Fluid Head and Claw Ball Assembly, JRA-83M Tripod with Spider Assembly.

### Specifications

**Load:** Up to 25 lbs.  
**Weight:** Head and tripod—15 lbs.  
**Size:** 7½" H x 5" W  
**Height:** Head and tripod—closed 44½" / extended 60" / at rest 42"  
**Pan:** 360°  
**Tilt:** 90°  
**Base:** Ball or flat  
**Finish:** Black vinyl  
**Accessories:** Reversible feet, strap, quick release

Ultra 500 . . . . . \$1650.00

## Ultra Classic

Consists of: Ultra Classic Fluid Head and Claw Ball Assembly, JRA-74 Tripod with Spider Assembly

### Specifications

**Load:** Up to 50 lbs.  
**Weight:** 28 lbs.  
**Size:** 14" H x 11¼" W  
**Height:** Head and tripod—closed 51" / open 64"  
**Camera Platform Dimensions:** 5½" W x 6" L  
**Elevation:** Approximately 2"  
**Pan:** 360°  
**Base:** Ball or flat  
**Finish:** Black vinyl  
**Tilt:** 90° depending on camera position and platform elevation. Five pre-set drag adjustments  
**Accessories:** Extra handle (attaches to camera base), Sta-Sets, case

Ultra Classic . . . . . \$3560.45

## Heavy-Duty Tripod Dolly

- 5" deluxe rubber tired swivel wheels
- Individual wheel locks
- 46" spread
- 10" in depth, folded
- Available in screwdown and springlock systems

Heavy-Duty Dolly . . . . \$508.00—\$566.00

## Video Tripod Dolly

- Smooth, silent
- Heavy, ⅛" wall aluminum tubing
- 4" diameter swivel wheels
- Folds up
- 10" in depth, folded
- 46" spread
- Locking configuration optional

Video Dolly . . . . . \$459.00-\$541.00

# TRIPODS/ACCESSORIES

## JRA-83M Tripod System

- True fluid action maintains a smooth regulated motion by a sensitive system without brake shoes, bands, or other mechanical parts to interfere with its operation. Separate positive locks and drag are featured on the pan and tilt. Tilt achieves a full 90° vertical position
- Sealed leak-proof chamber
- Adjustable quick release will counterbalance camera and lens requirements (optional)
- Spider assemblies available
- Versatile control—use right, left or dual handles
- Reversible foot, rubber-tipped for interiors and standard metal points for outside use, can be ordered with either of the JRA tripods (optional)
- Tripods come with various top castings to accommodate existing systems
- Tripod weighs 7 lbs., 16 lbs. with head

JRA-83M ..... \$517.16—\$558.21

JRA-83M Tripod and Fluid Head

## JRA-74 Junior Motion Picture Tripod

- Finely machined tubular aluminum legs and stainless steel parts and nylon bushings. Rustproof and noiseless
- Regular, intermediate and baby versions
- Adjustable from 39" closed to 60" open. Flexible leg adjustment
- Adjustable spider assembly
- Weight: 9 1/2 lbs.

JRA-74 ..... \$550.00—\$599.25

## LST-80 Heavy-Duty Tripod

- Built for cinema and video weighing
- Only 22 lbs. complete with built-in spider assembly
- Aluminum legs and stainless steel parts and nylon
- Will support 200 lbs.
- For studio and location use
- Available in standard, regular, intermediate and baby versions

LST-80 ..... \$1017.91—\$1050.75

LST-80

## LQR-84S Quick Release System

- Safety lock feature
- Two parts to the system
- Lower section mounts to tripod with 1/4" or 3/8" threaded thumbscrew
- Upper section mounts to camera tripod socket
- For most movie, television press and view cameras
- All aluminum except latch

LQR-84S ..... \$229.00

## MQR-84S Medium Duty Quick Release System

- Rapid mounting
- Lightweight, only 9 oz.
- Quick release plate
- Durable and accurate
- Stands up to all conditions

MQR-84S ..... \$221.00

LQR-84S

## The Re-Inforcer Tripod Adaptor

The Re-Inforcer is a unique accessory for the Sony tripod adaptor which is supplied with the Sony line of industrial CCD color cameras such as the DXC-3000 and the Sony line of broadcast portable cameras and camcorders.

The Re-Inforcer is an aluminum plate which attaches to the two sliding devices on the bottom of the tripod adaptor and is then screwed into any head. The unit will allow the user to move the tripod adaptor forward and backward in order to obtain the best center of gravity for proper balance, but when tightened down, gives a very rigid base. The adaptor, as it is originally supplied, is not as rigid as when the Re-Inforcer is attached.

Re-Inforcer ..... \$40.00

## A-5000T Prompter Display Device (PDD)

- Infinite speed resolution
- Multiple character sizes
- Proportional spacing
- Printer output
- Optional international characters
- Time remaining display
- Holds up to 9600 lines of text
- Stores up to 255 stories
- Optional color backgrounds
- Intelligent control box separate with speed control
- Driven from any computer with word processing
- Rackmountable or desktop unit
- 3 1/2" H, 16" D
- Video output 1V p-p compatible with standard B/W NTSC color monitors

The PDD is a stand-alone display device providing formatted prompting text from standard text created on a host computer or a newsroom computer system. Connection from the host computer to the PDD can be direct for local situations or by means of a telephone modem for remote operation. Display of prompting text may be controlled by either the host computer or the optional remote control box. Control functions available include speed, reordering of run-down and other functions.

Word integrity i.e. wrapping, is maintained automatically. Commands may be embedded in the text to enable the display of Underline and Flash. These functions are on a per word basis.

Four fonts are provided with proportional widths so that each line can hold a different amount of characters, depending on the particular letters used. From four to six lines of text will be visible on the screen at a time, depending on font selection.

Color option allows the selection of color background for each story. There are eight possible background colors: black, blue, red, magenta, green, cyan, yellow and white. For all selected background colors except white, the monochrome video output always presents white characters on a black background except for cueing instructions which appear in inverse.

All parameters, color, font, and forced uppercase are normally given default values on power up. The host computer can assign new default values to any parameter per story.

The PDD may be connected to any host computer which has the capability to edit plain text files, send ASCII text files to a serial port at a data speed up to 9600 baud and for optimum integrity support the Xmodem protocol. This feature allows the host computer to request prompter display to return catalog of stories in memory.

A-5000T

<b>A-5000T</b>	Stand alone prompting device, providing formatted text from host computer running standard word processing. Accepts commands and returns information from host or standard terminal . . . . .	<b>\$4995.00</b>

# VIDEO CAMERA CASES

## Low Pro Video Bags and Packs

- **Fabrics:** 11 oz. 1000 denier nylon Cordura® or Endura™ rugged and abrasion resistant with a 1 1/2 oz. urethane coating.
- **Foams:** Ethylene-vinyl acetate or a cross linked polyethylene. Closed-cell foams are used for their shock absorption and thermal properties.
- **Hardware:** ITW Nexus (Fastex) Ladderbloc buckles and side release buckles for fail-safe, quick service. Welded D-rings are nickel-plated steel.
- **Webbing:** 100% nylon web will not rot or stiffen with age.
- **Thread:** All seams are stitched twice with rot-resistant #69 bonded nylon thread and then bound with nylon tape to protect the fabric edged from raveling. Stress points are sewn a total of nine times.

## Vidcam

Designed for carrying and protecting the camcorder-type video systems (camera with a built-in recorder). The large interior has removable dividers that may be arranged to form compartments separating extra batteries and cassettes from the camcorder. The dividers may be set up for left or right hand storage of the camcorder.

**Size:** 9" H x 8" W x 17" L

**Colors:** navy or gray

**Vidcam (Kodavision)** .....\$ 99.00

## Vidcam II

This large bag keeps its shape when it is wide open with an aluminum stiffener into the top edge of the Vidcam II to keep the bag open for quick access to your camera. Designed to carry the VHS and Beta camcorders, the Vidcam II comfortable carries the load on a curved and padded shoulder strap with a Duragrip™ fabric cover. The outside features a zippered side pocket for storage of extra tapes and batteries, and a front zippered pocket to keep a notebook handy.

**Size:** 9 1/2" H x 7" W x 15" L

**Colors:** navy or gray

**Vidcam II** .....\$ 108.00

## Trimtech Vidcam

Video bag for half-inch VHS and Beta camcorders features the new pull-over lid design that seals against the weather yet still allows quick access to equipment. Carried on a curved padded shoulder strap with a Duragrip™ fabric cover, the TrimTech will not slip off your shoulder.

Backpack style shoulder straps and waistbelt pull out from a zippered back pocket. Additional storage capacity for tapes and batteries is in the front pocket, and side web loops provide for tie-ons. An aluminum stiffener in the top edge keeps the bag open for easy access to your camera.

**Size:** 9 1/2" H x 7" W x 15" L

**Colors:** navy or gray

**TrimTech Vidcam** .....\$ 120.00

## Silhouette Maxi Vidcam Camera Bag

The rigid bottom made from a hard stress resistant polypropylene protects gear from bumps and knocks. Bellow front pocket is the perfect place for accessories and extras. There is a zippered panel on the back for instructions and papers. The panel is made from waterproof nylon packcloth for protection. A mesh pocket in the lid stores up to four tapes.

**Size:** 9 3/4" H x 5" W x 13" L

**Maxi Vidcam** .....\$ 90.00

Maxi Vidcam

Mini Vidcam

Vidcam

Trimtech Vidcam

Vidcam II

## Silhouette Mini Vidcam Camera Bag

The fashionable slimline design of this case protects your equipment with a padded, sculptured lid and allows easy access to the contents. It has a polypropylene stiffened bottom and adjustable shelf. The hidden compartment is ideal for extra batteries and adaptors. The stiffener protects and helps the Mini Vidcam keep its shape. The comfortable padded shoulder strap is covered with Dura-grip so it won't slip off. There is a padded carrying handle on top of the case. A large divided mesh pocket in the lid will carry up to four tapes. It is perfect for most VHS Compact and 8mm Camcorders.

**Size:** 9" H x 5" W x 16" L

**Mini Vidcam** .....\$ 70.00

# LIGHTING

Lowel systems and kits have been in use since 1959 for video, film and still photography. They are a successful combination of innovative design, high strength materials, and careful workmanship. As a result, the lights and accessories are extremely efficient, lightweight and

durable. Their versatility is unequalled. We have received eight United States patents, an Academy Award Certificate and International acclaim.

## Tota-Light

- Interchangeable 1000, 750 and 500 watt tungsten halogen lamps—120 volts • 800 watt lamp—220/240 volts • Patented gull-wing reflector produces remarkably efficient output • Exceptionally wide, smooth beam angle. One unit can provide even illumination of four walls from the corner of a room • Basically non-focusing, however, reflecting doors offer some intensity and spread control • Light control system: umbrella, gel frame, gels, small flags, and others • Mounting system: stand, wall/door mount, clamps • Weighs only 2 1/4 lbs. (1.02 kg). Closes up compactly for storage/travel • Patent #3,852,582

**T1-10 Head** ..... \$112.00

## Omni-Light

- Interchangeable 650, 600 and 420 watt tungsten halogen lamps—120 volts • 650 watt lamp—220 and 240 volts • 250 watt lamp—30 volts (battery operation) • 100 watt lamp—12 volts (automobile and battery operation) • Unprecedented spot/flood focusing range • Interchangeable, special purpose reflectors • Uses many Tota-light accessories • Light control system: four way expandable barndoors, high intensity and other reflectors, umbrella, gel frame, gels, snoot, scrims, dichroic filter, cookaloris and others • Mounting system: stand, clamps, wall/door mount • Weighs only 2-5/8 lbs. (1.19kg) • Patent #4,187,531

**O1-10 Head** ..... \$135.00

## DP Light

- Interchangeable 1000, 750 and 500 watt tungsten halogen lamps—120 volts • 1000 and 650 watt lamps at 220 and 240 volts • Wide smooth beam pattern with continuous focusing to intense spot • Quick change, special purpose reflectors • Convenient, fast, one-hand tilt control • Light control system: four way expandable barndoors, high intensity and other reflectors, large umbrella, gel frame, gels, scrims, dichroic filter, snoot, cookaloris and others • Mounting system: famous KS stand, clamps, wall mount, and others • Weighs only 3-7/8 lbs. (1.76kg) • US Patent #D210927

**D2-10 Head** ..... \$150.00

## Softlight 2

- 2000 watt maximum capacity. Uses two 1000, 750 or 500 watt lamps at 120 volts or two 800 watt lamps at 220/240 volts • Unit folds in half, nearly flat, for storage/travel • Large, soft-shadow source utilizes aluminized Nomex reflecting surface which will not scorch or discolor • Light control system: adjustable and fixed barndoors for flare control, subject shading and gel mounting; gels • Mounting system: stand, clamps • Weighs only 8 lbs. (3.63kg) • Both lamps can be switched on and off individually • US Patent #3,712,978

**S2-10 Head** ..... \$285.00

# LIGHTING

V-light (ViP System)

i-light (ViP System)

## ViP System

The ViP System is both a practical and sophisticated system designed to take advantage of fast films, lenses and video cameras. ViP consists of three very small, highly compatible, professional lights. The ViP System also includes a wide range of unique light control and mounting components, most of which can be used interchangeably among the three fixtures. Many Tota-light and other Lowel accessories (already in the field) can also be used with the three ViP lights.

A distinguished collection of ViP and other existing Lowel accessories position all three lights on stands, on cameras, on walls, on doors, on sets, in hand, in seconds. This unprecedented component integration provides maximum versatility and economy.

### V-light

The V-light is a broad, efficient 500W halogen source with a protective glass shield. It is bright enough to light a small room, small enough to fit in a large pocket.

V1-10 V-light .....\$95.00

### i-light

The tiny, focusing i-light uses an inexpensive 12V, 100V or 55W halogen lamp. Whether handheld or camera mounted it can provide that essential fill light, eye-light, highlight, and contrast control, without overwhelming the available, natural light.

i-110 i-light .....\$110.00

### Pro-light

The focusing Pro-light uses various voltage lamps: 250W, 120V; 200W, 30V, 100W, 12V. It has interchangeable special purpose reflectors, unique barndoors, five swing-away accessories, plus a gel frame and brella. All of these components are shared with the i-light.

ViP Kits

P1-10 Pro-light .....\$105.00

### ViP Kits

All ViP kits are unusually compact and ideal for many video, film and still photography assignments ranging from basic to sophisticated, from soft to dramatic, from studio to remote locations.

ViP Kits .....POR

### Light-Array

The Light-Array uses six standard 4' fluorescent tubes. It travels in one portable case with its own boom, ballast, barndoors and stand. It is ideal for shoots where existing fluorescent illumination is photographically unacceptable without some fill or side modeling light. The tubes for the Array can usually be borrowed at the supermarket, office, school or showroom location to assure perfect color balance with the prevailing fluorescents.

This 8 sq. foot, cool, lightweight, super-soft location or studio source can be rotated horizontally, vertically or diagonally, even boomed over the subject. The Array is available with a 120V, efficient electronic ballast, which also serves to counterbalance its boom.

# LIGHTING CONTROLLERS DIMMERS/CABLES

## CONTROLLERS

### CS-60A 6 Channel Single Scene Controller

Features linear long-throw 90mm faders with channel and master "bump buttons." Sequencer has speed and audio level controls, forward/reverse chase switch, 3 chase patterns, and audio level indicator. Each channel has sequence on/off switch. Designed for clubs, bands, and portable DJ light shows.

**CS-60A** ..... \$415.00  
**C-60** Same as CS-60A less sequencer. .... 215.00

CS-60A

### FC-1 6 Channel 4 Scene Foot Operated Controller

Features include two sequencers, black-out and timed fade-out switch. All channels for each scene are pre-set and activated by momentary footswitches. Scenes and effects can be combined and controlled manually or automatically with audio level control. Designed for clubs or bands for operation "on stage" by performers.

**FC-1** ..... \$545.00

FC-1

### C-1200 12 Channel 2 Scene Controller

Features include linear long-throw 90mm faders with channel and X and Y "bump buttons." Split X and Y crossfade allows for pile-on capability. Designed for clubs and rock groups.

**C-1200** ..... \$525.00

C-1200

### CS Series 2 Scene Professional Consoles

Available in 12, 18 and 24 channels. Features linear long-throw 90mm faders with "bump buttons" for each channel and major level controls. Includes grand master, independent master and scene master, black-out and split dipless X and Y crossfade. Each channel has master, independent on and off select switch with status LED indicator. Sequencer section includes speed, intensity and audio level controls, with sequencer on-off select switch with status LED indicator for each channel. All consoles are equipped with adjustable output voltage trims (0-2 and 5-20VDC) and gooseneck mount for work light. Designed for professional use in small theaters, studios, clubs and touring groups.

**CS-1200** 12 channels ..... \$ 975.00  
**CS-1800** 18 channels ..... 1225.00  
**CS-2400** 24 channels ..... 1495.00

CS-1200

## DIMMERS

### M-3000 3 Channel 1000W Per Channel Dimmer

• U-ground/duplex output • Compact design with hanging bracket for tree mounting • Heavy duty filtering • Adjustable input control voltage • Male/female control connectors for "daisy-chaining"  
 Power requirement: 120VAC at 20A, wall outlet. Designed as a starter pak for small groups or "paired" for multiple use in larger systems.

**M-3000** ..... \$325.00

M-3000

### LC-4A 6 Channel 1200W Per Channel Dimmer

• U-ground/duplex output • 19" rackmount design • Heavy duty filtering • Magnetic circuit breakers for channel protection • Adjustable input control voltage • Male/female control connectors for "daisy chaining" paks.

Power requirement: 2 120VAC at 20A wall outlets. Designed for small theaters, studios, clubs and touring groups.

**LC-4A** ..... \$895.00

**LC-4AX** Features U-ground/duplex output with 120/240VAC or 12/208VAC at 30A/terminal strip input. Same specs as LC-4A ..... 849.00

**LC-48X** Features (6) stage pin outputs with 120/240VAC or 120/208VAC at 30 amps/terminal strip input. Same specs as LC-4A ..... 995.00

LC-4A

### MX-2400 6 Channel 2400W Per Channel Dimmer

• 19" rackmount design • Heavy duty toroidal filtering • Professional-grade magnetic circuit breakers • Adjustable control voltage • Male/female control connectors • Over voltage protection • Full-on "push to test" buttons • Exclusive fan and convection cooling

MX-2400/UG

Power requirement: 120/240VAC or 120/208VAC at 60 amps/terminal strip input. Designed for theaters, clubs and touring companies.

**MX-2400/UG** U-ground, 12 outputs ..... \$1275.00  
**MX-2400/SP** Stage pin, 6 outputs ..... 1375.00  
**MX-2400/TL** Twist lock, 6 outputs ..... 1425.00

## CABLES

100' control cable ..... \$90.00  
 50' control cable ..... 60.00  
 25' control cable ..... 40.00  
 6' control cable ..... 30.00  
 CCYC Y cord/2 controllers ..... 50.00  
 Gooseneck light 12" ..... 40.00

# QUARTZ LIGHTING

## Pepper Series — Miniature Quartz Lighting

- Compact, lightweight design facilitates location lighting
- Sturdy, cast-aluminum construction
- Full range of accessories, designed for fast and easy attachment and adjustments
- Unique miniature lighting system

The Pepper Series is the first set of quartz lights designed for use with today's advanced electronics and faster film emulsions. Low Light Level Photography means smaller lighting units. It still takes the same number of brush strokes to "paint" a masterpiece, but with Peppers, Cinematographers and Lighting Directors can use smaller brushes.

The Pepper line consists of four focusing fresnel units, one open face and one soft light. Together they make a complete package for all types of photographic lighting situations.

The Pepper 100, Pepper 200, Pepper 420 and Pepper 650 are all fresnel focusing luminaires designed to be used as key lights, back lights, eye lights, kickers and for effects. The Pepper Flood is a small, durable focusing quartz open faced light designed to provide an extremely clean, smooth field in all positions from flood to spot with maximum lighting efficiency. The Soft Pepper is a small, compact soft light designed for use as a fill light or as a shadowless key light. Small enough to be easily mounted on Motion Picture or Television cameras.

# HMI LIGHTING

## HMI LIGHTING SERIES

### 200W HMI Lights

#### Luxarc 200 (4" Fresnel)

- Compact fresnel daylight source
- 2A or 120V power consumption
- Great for interior daylight motion picture filming and video production
- Highest efficiency output (equivalent to a 2K open face)
- Portable AC HMI light
- Great for closeups and where space is limited
- Can be used with inverters for car shots
- Dimensions: Head — 7" W  
Yoke — 8" W  
Length — 10<sup>1</sup>/<sub>2</sub>"  
Height — 12"

- Complete with head, ballast, 15' mains cable, 4-leaf barndoor and gel frame

**Luxarc 200** ..... \$2,583.00

#### Ambiarc 200 (5" Clear Lens)

- Open face focusable fixture with parabolic reflector
- Ideal for direct or indirect lighting
- Low cost daylight source for limited space
- 2A power consumption at 120V
- Dimensions: Head — 7" W  
Yoke — 8" W  
Length — 10<sup>1</sup>/<sub>2</sub>"  
Height — 12"

- Complete with head, ballast, 15' mains cable, 4-leaf barndoor and gel frame

**Ambiarc 200** ..... \$2,400.00

### 575W HMI Lights

#### Luxarc 575 Mark III (7" Fresnel)

- Compact and lightweight, excellent for interior daylight source
- With inverter, it also can be used for car shots without external power
- Focusing ratio gives versatility for motion picture filming, video production and news application
- 6A power consumption at 120V
- Small yoke fits baby stands, also mounts from scissor mounts
- Dimensions: Head: 7<sup>1</sup>/<sub>2</sub>" W  
Yoke: 10<sup>3</sup>/<sub>4</sub>" W  
Length: 14<sup>1</sup>/<sub>8</sub>"  
Height: 14<sup>1</sup>/<sub>2</sub>"

- Complete with head, ballast, 15' mains cable, head to ballast cable 33', 4-leaf barndoor and gel frame

**Luxarc 575 Mark III** ..... \$3,457.00

#### Cinepar 575 (4 Lens Rings)

- Compact, smallest HMI using 575W HMI sealed in a PAR 46 reflector
- 8<sup>1</sup>/<sub>2</sub> lbs. and features 360° rotatable housing
- 6A power consumption at 120V
- Excellent for interior/exterior applications: concerts, parades, sports, filming and TV remotes
- Produces narrow and very narrow spot, wide or medium flood
- Dimensions: Head: 8<sup>1</sup>/<sub>2</sub>" W  
Yoke: 9<sup>1</sup>/<sub>8</sub>" W  
Length: 14<sup>1</sup>/<sub>2</sub>"  
Height: 13<sup>1</sup>/<sub>2</sub>"

- Complete with head (4 lens rings), ballast, 15' cable with U ground Hubbell, head to ballast cable 33'

**Cinepar 575** ..... \$2,962.00

### 1200W HMI Lights

#### Luxarc 1200 Mark III (10" Fresnel)

- Compact and lightweight
- Excellent interior daylight source
- Suited for locations where space is limited
- Versatile for motion picture location filming and video productions

Luxarc 200

Luxarc 575 Mark III

Cinepar 575 w/Ballast

Luxarc 1200W Mark III

- 12.5A power consumption at 120V
- Dimensions: Head — 13" W  
Yoke — 14<sup>1</sup>/<sub>2</sub>" W  
Length — 17<sup>5</sup>/<sub>8</sub>"  
Height — 16<sup>1</sup>/<sub>8</sub>" W

- Complete with head, ballast, 15' mains cable, head to ballast cable 33', 4-leaf barndoor and gel frame

**Luxarc 1200 Mark III** ..... \$4,812.00

#### Cinepar 1200 (4 Lens Rings)

- 360° rotatable housing
- Versatile for all lighting applications
- PAR 64 reflector
- Long range lighting for day and night exteriors
- Lens changes produce narrow and very narrow spot, medium, wide, or super wide flood
- 12.5A power consumption at 120V
- Dimensions: Head — 11" W  
Yoke — 11<sup>3</sup>/<sub>8</sub>" W  
Length — 18<sup>3</sup>/<sub>4</sub>"  
Height — 15"

- Complete with head, (4 lens rings), ballast, 15' mains cable, head to ballast cable 33'

**Cinepar 1200** ..... \$3,900.00

# TV/MONITOR MOUNTS

ACM-2030

The Lucasey concept features a common projection and tilt arrangement that lets you interchange locking and nonlocking units with the option of sizing to fit your set—exactly. Ideal for service or viewing requirement interchange. No need to reattach the set once it becomes part of the Lucasey system.

- **Complete Flexibility** is assured with Lucasey Monitor Mounts. By engineering a systems approach to bracket requirements, Lucasey fulfills all of your equipment needs—locking and nonlocking standard and heavy-duty plates for every ceiling and wall application. Each mount is furnished in 16 gauge steel with high tech, wrinkle black baked epoxy finish and pin tumbler security on locking units.
- **Double Stud Dependability.** Built to accept the largest monitor, non-locking wall brackets offer sliding plates to secure at exactly the width desired.
- **Heavy-Duty Versatility.** Lucasey ceiling unit—available in two basic sizes—allows vertical and horizontal expansion. Ceiling flange accepts various pipe lengths.

# MOBILE VIDEO TABLES

## Endura® 32" W x 24" D Models

An integral handle, designed for pushing (never pulling) the table, offers the best stability when moving. A built-in 20' long 3-wire, electric cord (U.L. and C.S.A. listed). The Cable-Track™ cord management system keeps cords tucked neatly out of the way for maximum safety when being moved. Equipment safety belt included with all video tables.

Greater safety is provided with the Cable-Track cord management system.

Integral safety push handle

Built-in 20' power assembly is U.L. and C.S.A. listed. Safety belt is included on all Video Tables.

Safety belts are not included with Video Consoles but are recommended if equipment is to be on top shelf – order separately.

#LS8 ..... \$18.00

# MOBILE VIDEO CONSOLES

Strength and durability of these one-piece welded consoles are unmatched. All models ship fully assembled. Locking wood doors provide security for valuable video equipment and tapes. Compartments are louvered for ventilation. Designed for most 19" monitors and 1/2" or 3/4" recorders. Heavy-duty 4" casters, two with brakes provide high mobility. Wire pass through channels between all shelves.

## PS-762 70" CONSOLE

PS-762 70" Video Console Our best seller. Locking rear door for easy access to input/output jacks and power cords. 169 lbs.

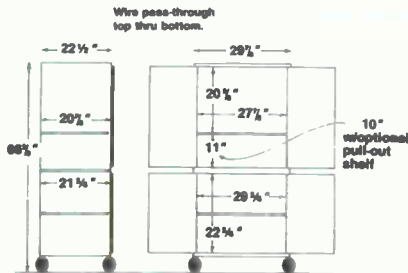

PS-762 .....\$914.00

**Pull-Out Shelf Option (as shown)** This shelf reduces recorder compartment height to 10". 15 lbs.

PSS .....\$61.50

**Accessory Push/Pull Handle**

SSH .....\$41.50

## Prestige Series Video Consoles

Preferred by most Industrial, Library, Educational, Medical and Office Buyers.

## PS-500 56" CONSOLES

PS-500 Series Video Consoles Compact, economical cabinets that accept the new mid-size TV monitors and up to three video recorders. Certain Sony TV monitors can be accommodated with PS-500-S.

PS-500 Video Console with a fixed monitor shelf, a roll-out shelf and a fixed bottom shelf.

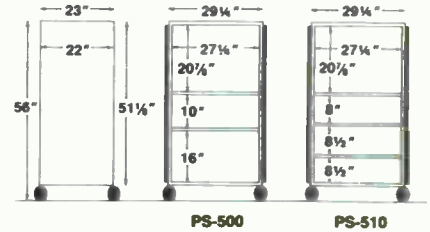

PS-500 .....\$708.00

PS-510 Video Console with a fixed monitor shelf, a roll-out shelf and two fixed lower shelves.

PS-510 .....\$736.00

PS-500-S Video Console with a fixed monitor shelf 26 1/2" clearance height, a rollout shelf with 8" clearance and a fixed shelf with 16" clearance.

PS-500-S .....\$708.00

## Studio Series

80" Video Editing Center Secures your 25" receiver and up to four recorders. Shelves glide out for easy access. 77" H x 34" W x 22" D. Compartments are 31 7/8" W x 25" D. Receiver shelf 21 3/4" H. Top compartment base shelf is 9 5/8" H. Includes 2 power cords. Locking doors. Shipped in 2 sections.

SS-780, with two 15" H shelves in

bottom compartment, 340 lbs.

.....\$1108.00

SS-800, with three 9 5/8" H shelves in bottom compartment, 350 lbs.

.....\$1270.00

**SS Series Accessories**

SST Walnut Laminate Top...\$54.75

SSH Push/Pull Handles.....\$41.50

40" 3-Shelf Video Editing Center Designed to accommodate as many as three 1/2" or 3/4" video recorders. Shelves glide out for easy access. Cabinet is 40" H x 34" W x 26" D. Compartments are 31 7/8" W x 25" D with 9 5/8" between shelves. Includes a 3-outlet, 3-wire 15' power cord. Locking doors. 175 lbs.

SS-403 .....\$736.00

40" Video Center Accommodates most 25" receivers. Bottom shelf holds 1/2" or 3/4" video recorders and glides out for easy access. Cabinet is 40" H x 34" W x 26" D. Compartments are 31 7/8" W x 25" D with 9 5/8" between bottom and middle shelf and 21 3/4" between middle shelf and top. Includes a 3-outlet, 3-wire 15' power cord. Locking doors. 164 lbs.

SS-402 .....\$602.00

## Executive

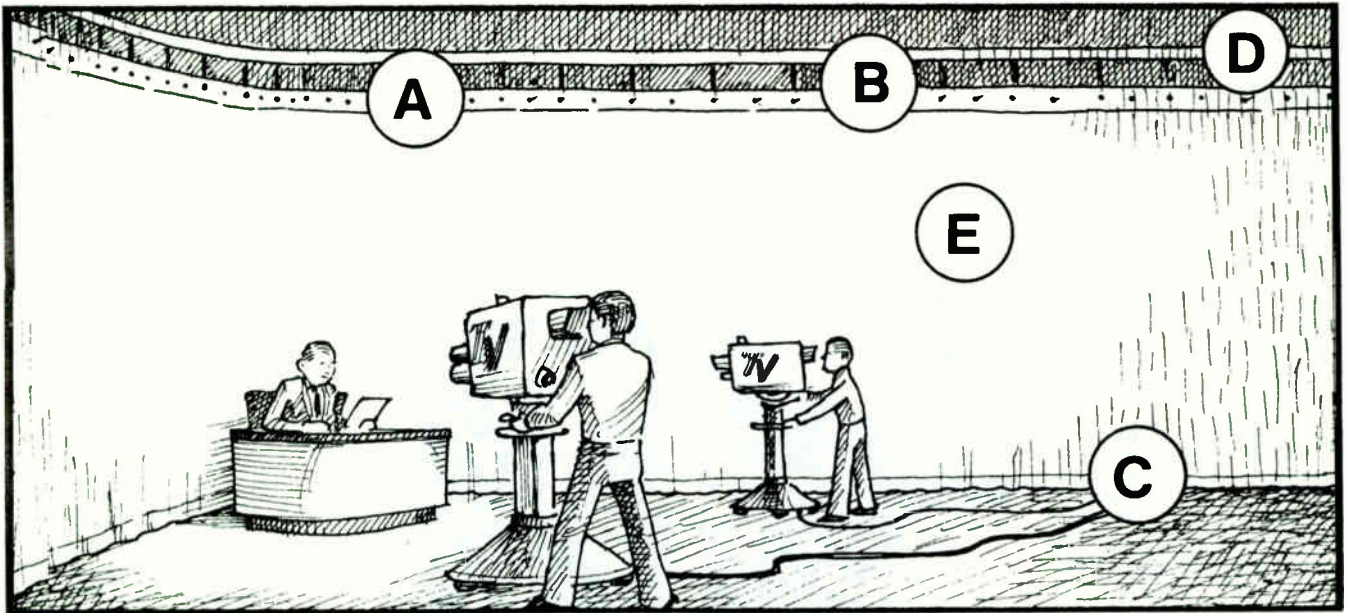

45" Wood Door Console Provides security with locking doors and mobility. Designed for applications where high mobility is not required. 50" H x 29 3/4" W x 21 1/4" D. Monitor compartment is 22" H x 27 1/8" W x 20" D. Recorder compartment is 9 7/8" H x 27 1/8" W x 20" D with roll-out shelf. Storage compartment is 9" H x 27 1/8" W x 20" D. 4" ball bearing casters, two with brakes. Includes U.L. listed 15' power cord. 142 lbs. Assembly required.

ES-45W .....\$541.00

ES-45WC, with 2" chrome ball casters .....\$541.00

# STUDIO BACKDROP CURTAINS

## STUDIO STRENGTH TOP HEMS

These are not the usual burlap or jute one-layer top hems, but a **TRIPLE-LAYER** combination of 18-oz. vinyl coated nylon (permanently flame resistant), **AND** vinyl-impregnated 10-oz. heavy buckram, **AND** the curtain material. Three layers lock-stitched together with nylon thread into a heavy-duty **STUDIO STRENGTH** heading that will withstand years of pulling and tugging without having grommets tear out. Looking for trouble-free service? This is it.

## YOUR CHOICE: PLEATS OR FLAT. EASY CHANGEOVER.

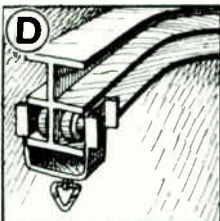

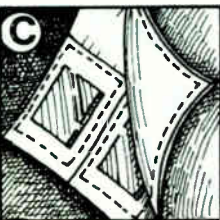

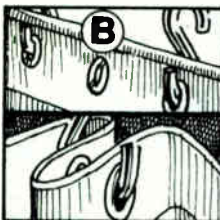

Sometimes you want a flat curtain without pleats, other times you need part of it with nice round pleats. LuXout's unique grommet arrangement allows the curtain to be flat, no pleats; **OR** with 6" pleats every 12"; **OR** with 6" pleats every 6". Round pleats are formed, when and where desired, by S-hooks and grommets, and are easily removed. (A lacing flap can be sewed into each curtain end to allow tensioning of flat curtains, if desired.)

## RUST-FREE BOTTOM HEMS — NO CHAINS

Tired of seeing studio curtains with rust and corrosion at the bottom hem, caused by the chain most others use for weighting? Never with LuXout: we use lead weights in individual pockets, which fold neatly, take up less room, never rust, never corrode, never fall out. Looking for trouble-free service with attractive appearance? This is it.

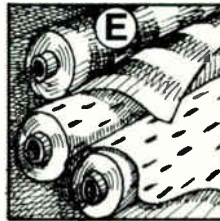

## TRACKS FOR MOVABLE CURTAINS

Anodized extruded aluminum I-beam tracks can be suspended from the ceiling or the wall, and curved to shape by the installer on site. Noiseless ball-bearing carriers and all necessary accessories are supplied with each track. Our tracks fit all grommet-type curtains; any curtain works on our tracks.

## ONE YEAR FULL WARRANTY

LuXout makes the following warranty to consumers of its studio curtains: We will repair or replace without charge any item which displays defective materials or workmanship within one year of the date of purchase; provided a written claim is made within the warranty period addressed to: LuXout Products Division, P.O. Box 1118, Richmond, VA 23208. If you require assistance in making a claim you should contact: Warranty Manager, (804) 644-2355. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

## MATERIALS

Your studio curtains can be made of any material you specify, but the most usual materials are:

**Velour:** 100% cotton, 20-oz., 25-oz. or 16-oz. weights in a variety of colors: blues, black, reds, greens, beiges—ask for a complete color sample booklet.

**Commando:** 100% cotton, lighter weight and less expensive than velour. Black, chroma key blue, grey, beige. Opaque.

**PE100:** 100% polyester. chroma key blue, eggshell, white, day gray, black.

**Scrim:** 100% cotton, seamless up to 36' high. Either Sharktooth in white, light blue or black, or Leno (filled) in white or black.

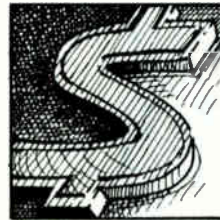

**Skydrop Muslin:** 100% cotton in skydrop blue, 110" wide, horizontal or vertical seaming.

*(All cotton materials are treated to be flame resistant.)*

**Colordrop:** rayon/acetate with opaque vinyl back, flame-resistant, opaque, in a wide range of inexpensive colors.

## PRICING

Because each curtain is custom made for you, there is no standard price list. All prices are quoted per job by our office, within minutes of your request. Our prices include all delivery charges.

## DELIVERY

You tell us when you need your curtains; we'll tell you at once if we can do it. We stock many standard materials, and are quite accustomed to emergency requirements. No curtain is too big or too small for our workroom.

# FOLLOW SPOTS

## 1206 Midget— 1000W Quartz Follow Spot

- Ultimate quartz follow spot • Up to 30% brighter than its nearest competitor
  - The smallest, lightest, quietest, electrically dimmable unit available • 3200°K FEL 1000W, quartz (300 hr.) lamp • 120' throw • Projects from the smallest pin spot to the largest full stage flood • Spread lens system • Automatic, internal 5-frame self-cancelling color boom • Nichrome steel iris, douser and shutters
- 1206 .....\$1235.80

1206

## 1209 Midget — H.P.

- High performance metal halide version of 1206 • More than 3 1/2 times as bright as the standard Midget • Long-life (750 hr.), 5600°K 575W metal halide lamp • 150' throw • Created specifically for those on a strict budget who must have maximum output • Highest ratio of light output for dollar input • Spread lens system • Automatic internal 5-frame self-cancelling color boom • Nichrome steel iris, douser and shutters • Telescoping, 3 legged fold-up base with locking casters
- 1209 .....\$3116.00

1266

## 1266 SuperArc-400 Standard Throw

- World accepted standard for on-stage, close range, high intensity follow spotting • Appropriate for touring musical groups and theater • Smokeless, carbonless and quiet, utilizing the HTI-400/24 metal halide lamp • 250 hours average at 5600°K • Consistent color rendition • 50% brighter than all previously manufactured compact follow spots • One handle zoom spot size control automatically increases brightness with decreasing spot size • Exclusive externally operable continuously variable, peak/flat field adjustment • Automatic internal 7-frame self-cancelling color boom • Nichrome steel iris, douser and shutters • Elapsed time meter • Recommended throw 15-150' • Improved version of the 1262A
- 1266 .....\$4531.50

1275

## 1267 SuperArc-400 Long Throw

- The successor to the carbon arc Front Light • Increasingly found on original Broadway productions and their touring subsidiaries • Utilizing the HTI-400/24 metal halide lamp for consistent color rendition • Same features and controls as 1266 • Automatic internal 7-frame self cancelling color boom • Nichrome steel iris, douser and shutters • Elapsed time meter • Recommended throw 100-450' • Improved version of the 1264-A
- 1267 .....\$5126.50

## 1275 SuperStar-1.2

- Extra heavy-duty high intensity follow spotlight for large theaters and arenas utilizing the 1200-HB metal halide lamp for long life (750 hours) • Consistent daylight color temperature (5600°K) • Superb color rendition • Continuously variable focal length lens optical system • Nichrome steel iris, douser, shutters, and template slot • Six frame color boom • Folding three-legged base with locking casters and leveling jacks • Balanced for perfect weight distribution at any operating angle • Unit features adjustable brakes for pan and tilt • Easily carried by two persons • Draws only 15A at 120VAC • Equally at home in a theatrical projection booth or over an arena floor • Recommended throw: 100-450'
- 1275 .....\$6500.00

# LYON LAMB VIDEO ANIMATION SYSTEMS, INC.

4531 Empire Ave.  
Burbank, CA 91505  
(818) 843-4831

# HIGH RESOLUTION CONVERTER

## HRC High Resolution Converter

- Conversion from 1280 x 1024, 60Hz, non interlaced (RS-343) to standard NTSC (RS-170A) video
- High-quality image conversion
- Selectable form factor to conform to NTSC aspect ratio
- Internal sync generator with genlock and NTSC encoder
- Composite NTSC video and component RGB (low resolution) outputs
- Simple RGB connection to computer graphics source
- Self-contained rack-mountable package
- Compatible with Lyon Lamb video animation controllers

The HRC converts up to 1280 x 1024 60Hz non-interlace RGB video to NTSC video or low resolution 525-line RGB with no loss of graphic information. For the first time, users of high resolution display devices will be able to directly record or display their images in a standard video format. Rather than throwing away line and pixel information or simply providing a low resolution window, the HRC performs complex compression operations on the full 1280 x 1024 image. A high quality NTSC output is achieved in a typical conversion time of  $1/10^{\text{th}}$  of a second. The HRC can interface to a range of high resolution formats including 1280 x 1024, 1024 x 1024 and 1024 x 768. As inputs, the device accepts RGB with H drive and V drive, RGB and Composite Sync or RGB with Sync on Green. Additional features include: Operator selection of picture aspect ratio, either square or 4:3, full remote control with a standard RS-232 interface allowing for direct use with all Lyon Lamb animation controllers, selectable outputs of composite video or low resolution RGB (RS-170A).

### High Resolution Inputs

Red, Green and Blue Video: 1V p-p, 75 ohms  $\pm$  volt maximum DC component; Sync Source: VD/HD composite sync or sync-on-green; Vertical Drive/Horizontal Drive, or Composite Sync: 2V p-p nominal, 75 ohms  $\pm$  2V maximum DC component

### Other Inputs

Genlock Sync Reference: Either 1V p-p RS-170A video or 4V p-p composite sync 75 ohms; Subcarrier Reference Input: 1-4V p-p, 75 ohms; Time Delay from Reference Sync to Output Sync:  $\pm 8\mu\text{s}$  in 70ns steps; Start Conversion Signal: TTL level, 75 ohms termination

### RS-232/422 Serial Remote Control Interface

9600 Baud

### Output

NTSC/RS-170A Composite Video: 2 outputs, 1V p-p into 75 ohms; Red, Green and Blue: 2 outputs, 1V p-p into 75 ohms; Composite sync on all three outputs

Note: NTSC and RGB outputs are not available simultaneously

### Output Frequency Response

$\pm 3\text{dB}$  0-5.0MHz  
-46dB at 7.1MHz

### S/N Ratio

46dB

### NTSC Output Resolution

H x V: 754 x 448 or 754 x 512, selectable

### Pulse Outputs

Composite Sync, Composite Blanking: 4V p-p into 75 ohms. Nominally 500ns advanced of composite output. Synchronous with RGB outputs.

### Subcarrier Output

Continuous subcarrier in phase with burst in composite output. 2V p-p into 75 ohms.

### Input Subcarrier Phase Adjustment

Approximate  $\pm 180^{\circ}$  switched adjustment.  $\pm 100^{\circ}$  continuous adjustment.

HRC

### Output Subcarrier to Sync Phase Adjustment (SCH)

Approximate  $\pm 180^{\circ}$  switched adjustment.  $\pm 100^{\circ}$  continuous adjustment.

### Conversion Time

0.1 sec, nominal. Still frame to be converted must be present for entire conversion time.

### Dimensions

7"H x 19"W x 18.1"D

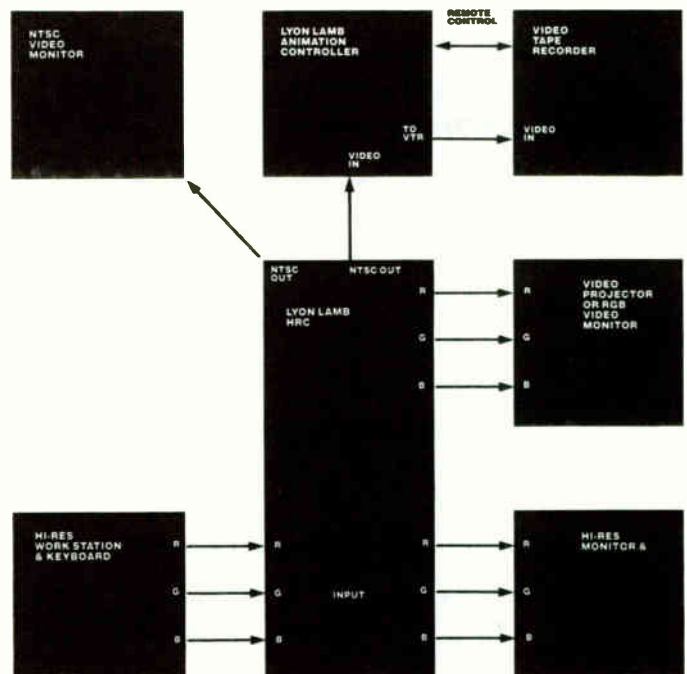

### Weight

35.2 lbs.

### HRC Workstation Interfaces Currently Available For:

Tektronix 4115, 4120 Series; Hewlett Packard 320 SRX; Silicon Graphics; Apollo DN580, DN590; Calcomp Vistagraphic 4500; Ramtek 4225, 4229; Imagraph AGC 1024 Series; Sun Microsystems 3100 Series; Megatek; Calma; Chromatics; Custom interfaces available.

HRC ..... \$21,950.00

Surbank, CA 91505  
(818) 843-4831

## VAS-DELTA Animation Controller

- Auto pre-black of videotape • Exclusive vertical interval frame code • Two-machine control • Auto frame or field search • Selectable scene playback from scene file memory • Frame grab output to frame store or still store devices with selectable advance • Simultaneous display of frame code or SMPTE time code • Updating data display • RS-232 at 9600 baud for remote control • Expanded time lapse speeds • Multiple frame recordings in Delta Step mode • User selectable title matte

The VAS-DELTA is an animation controller specifically designed to interface with the Sony BVH-2500 Delta Time 1" VTR. The intelligent features of the VAS-DELTA and the instantaneous single-frame recording capabilities of the BVH-2500 provide a means to create highly complex animation sequences easily, quickly, and efficiently.

A unique feature of the VAS-DELTA is the frame-by-frame playback control of a Source VTR, either a BVH-2500, BVH-2000 or BVU-820. In addition to remotely controlling all Delta functions of the BVH-2500, users can program recording, editing, and frame grabbing in sequential, cycle, or skip (non-sequential) modes at 24 or 30 frames, or 60 fields per second. The VAS-DELTA generates and reads user-selectable individual scene and frame numbers that are displayable along with pre-recorded SMPTE time code.

Computer graphics systems interface directly to the VAS-DELTA via an RS-232 port. The functional controls emulate all tape movement functions of the BVH-2500 for full remote control of both the record VTR and the source VTR.

The combination of the VAS-DELTA and BVH-2500 provides access to 108,000 still frames for direct display or user selectable output of any non-sequential group of frames to external still store devices. Operators can input frame numbers or SMPTE time code data to the memory in any order for recall of single frames.

VAS-DELTA . . . . . \$12,500.00

## MINIVAS Animation Controller

- RS-232 interface at 9600 baud • Works with all VTRs from same package • Programmable for 1 or more frames per recording • Frame grabbing with programmable offsets • Frame grab trigger programmable from 0 to 9 fields in advance of frame to be grabbed • Auto or preselectable time-outs • Programmable in either vertical interval frame code or SMPTE time code • Accurate search to any frame using VIFC or SMPTE time code • Programmable playback of recorded segments for easy review • Status information available through RS-232 with handshaking • Remote VTR controls including Jog and Shuttle

The MINIVAS is an animation controller specifically designed to perform precise single frame recording and frame grabbing (capture) from PC based computer graphic systems to standard videotape recorders. Operations are performed over an RS-232 interface allowing for automated animation recording, grabbing, searching, and all VTR control functions. Field accuracy is achieved by the use of Lyon Lamb's proprietary vertical interface frame code. Additionally SMPTE time code is used interchangeably with VIFC for VTRs that have time code output available. An LED readout on the front panel displays frame code or SMPTE time code for positioning and location confirmation.

# ANIMATION CONTROLLERS

VAS-DELTA

The MINIVAS interfaces automatically to a wide range of VTR formats, from industrial 3/4" U-matic to broadcast Betacam® and 1" Type C machines. All VTR interfaces reside in MINIVAS software so that the user may select or change VTRs at any time. Playback functions are performed directly from the computer keyboard and include operation of VTR controls with Jog and Shuttle, Search to a Frame, and Playback Frames.

MINIVAS . . . . . \$4,980.00

## VAS IIIB Video Pencil Test System

- Switchable recording speeds of 24 or 30 frames-per-second • Selectable frames per recording • Frame counter monitor display • Playback in forward and reverse • Four slow motion speeds • Freeze frame • Single-field advance • Automatic search in forward and reverse • 5:1 zoom lens

The VAS IIIB is a versatile, offline VHS videocassette animation system designed for precise frame-by-frame recording. The system, comprised of a specially modified VTR, high resolution camera with zoom lens, and monitor with high speed horizontal AFC circuits, satisfies the requirements of immediate testing of animation, special effects, stop-motion, time lapse, pixilation, and the shooting of storyboards.

Utilizing concepts first introduced in 1977 by the Academy Award-winning Lyon Lamb, the VAS IIIB incorporates additional features and microprocessor control for extremely accurate and efficient operation. A video-generated frame counter is recorded and displayed on the monitor for accurate frame count.

VAS IIIB Black and White System . . . . . \$5,995.00  
 VAS IIIB Color System . . . . . 7,850.00  
 Audio Option . . . . . 450.00

# ENCODER/SYNC GENERATOR

## ENC-VI Encoder/Sync Generator

- Video outputs:
  - RS-170A composite video
  - R-Y, B-Y, Y + sync component video
  - Optional PAL composite video
- Internal sync generator with standard outputs:
  - Composite sync
  - Blanking
  - Burst flag
  - Subcarrier
  - Horizontal drive
  - Vertical drive
- Internal color bar and black burst generator
- Separate sync input accepts either composite sync, composite video or sync on green (of RGB)
- Separate subcarrier input with 360° phase adjustment for matched color framing with other video sources
- Accepts RGB with setup, or if needed, adds setup to video output
- Selectable loopthrough outputs or 75 ohm termination
- Horizontal phase adjustment

The ENC-VI is an advanced design full NTSC bandwidth encoder/sync generator for computer graphics to video applications. Outputs include both RS-170A composite and R-Y, B-Y, Y + sync component video. The internal sync generator allows for genlock of RGB devices or the ENC-VI operates as a slave to incoming sync from the RGB source. The ENC-VI also accepts a subcarrier input for phase locked color framing to external video. Internal video switch allows for selection of EIA standard color bars or black burst.

- **Video Inputs: Red, Green, Blue**  
Impedance: Switchable 75 ohm or high impedance for bridging.

Setup not included in RGB source (encoder's internal NTSC setup optional jumper out, encoder adds setup):  
Input level: 0.661V p-p (100% level); 0.496V p-p (75% level).

Black level required during NTSC blanking intervals. Allowable range of DC black level: -2V to 2V.

Setup included in RGB source (encoder's internal NTSC setup option jumper in, encoder does not add setup):  
Input level: 0.714V p-p (100% level); 0.549V p-p (75% level).

Blanking level required during NTSC blanking intervals. Allowable range of DC blanking level: -2V to 2V.

ENC-VI

- **Sync Genlocking Input**  
Impedance: Switchable 75 ohm or high impedance for bridging.  
  
Input level: 0.3V p-p to 5V p-p negative composite sync or 0.3V p-p to 1.5V p-p negative sync on composite video.  
  
Genlocking is to external sync input if present, otherwise to .3V p-p negative sync on green if green input is present. Sync switch must be in external position for genlocking.  
  
Time delay from genlock sync to composite video sync: Internally adjustable from 350ns to 1950ns in 70ns steps.
  - **Video Outputs: NTSC Composite Video**  
Level: 1.0V p-p into 75 ohm termination, sync negative.  
DC level on blanking: 0.0V.  
Time delay from video input: 1050ns nominal.
  - **Component Video Outputs:**  
**R-Y, B-Y, Y + Sync**  
Levels (factory set, internally adjustable):  
Y + S: 1.0V p-p into 75 ohm termination, sync negative.  
R-Y: 0.7V p-p into 75 ohm termination.  
B-Y: 0.7V p-p into 75 ohm termination.  
DC level on blanking: 0.0V.  
Time delay from video input: 120ns nominal.
  - **Video Internal/External Switch**  
Selects Red-Green-Blue inputs or internal patterns for video.
  - **Bars/Black Switch**  
Select EIA color bar pattern or black burst when video is switched internal.
  - **Chroma On/Off Switch**  
Allows excluding subcarrier component (including burst) from Composite Video output.
- ENC-VI . . . . . \$4500.00

## Snap Cap™ Hanger Bar System

- Allows maximum storage density (280 videocassettes in a 4' x 8' area)
- Adapts to many locations and space requirements
- Provides maximum protection of videocassettes without additional packaging
- Allows easy and uniform labeling
- Locks firmly onto videocassette but is easily removed
- Locks onto the hanger bar but is easily detached and transported
- Features light high strength aluminum bar
- Installs easily and inexpensively
- 40 units per carton

The Snap Cap Hanger System efficiently protects and stores your valuable videocassettes in a minimum of space. Whiel allowing you to transport and quickly access the tape.

# 1" VIDEO TAPE/ACCESSORIES VIDEOCASSETTE HANGERS

## 1" Helical Open Reel Video Tape

No. 479 — #479-1" Helical video tape is a special application tape that can only be used with type "C" video recorders.

No. 480 — #480-1" Helical video tape is an improved broadcast video tape providing better signal-to-noise, color-noise qualities and virtually eliminates head stiction. For use on all recorders capable of using 479 mastering/broadcast video tape (type "C" recorders).

	Cat. No.	Playing Time	Reel Size	Price

### Tape Accessory Descriptions

- B** At the end of a catalog number indicates box  
**R179** Flat flange reel, 1" x 8", 9" and 10 1/2"  
**C129** Fire retardant shipping case for 1" x 10 1/2" flat flange reels  
**C132** Fire retardant shipping case for 1" x 9" flat flange reels  
**C134** Fire retardant shipping case for 1" x 11 1/2", 12 1/2", 14" flat flange reels

## Hanger System

A videocassette case design that's triggered a revolution in 3/4" and 1/2" videocassette storage and handling. The shipper/storage case (patents applied for) represents a design concept based upon the idea that hanging your videocassettes not only is the best way to protect them from damage, but it will organize your storage area and simplify the way you transport videocassettes.

### Shipper/Storage Case

This sturdy shipping box can be labeled and mailed with no other packaging needed. Its unique hanging hook and slide-snap latch are only two of the features of this case that opens to reveal a recess for storing the record-lockout button when you are not using the record mode. The stabilizer bars on the box bottom and the expandable, spine-handle simplify storage and retrieval in any situation.

### CHB-1 Case Hanger

This extruded aluminum bar comes in 4' lengths and can be cut to fit doors, desk backs, cabinets, shelves, walls, etc. Standard screws or bolts anchor them securely to concrete, wood, plaster or metal surfaces, and when properly mounted, the bars can maintain weights of up to 240 lbs.

### 6 PH Six-Pack Hanger

A sturdy, aluminum frame that easily totes up to 6 videocassettes, with the case or without.

# CHARACTER GENERATORS

## D-5000 Character Generator

- Multi-font library 4 resident fonts • Dual 3.5" disc drive
- Proportional character spacing • Full editing capability
- High resolution character definition • 35ns • Multi-speed roll, crawl, reveal, and billboard dynamics • Auto centering, line and page • 512 color palette • Built-in sync and genlock
- 9 speeds roll and crawl • 100 page internal memory • Programmable roll, crawl, and roll masking • Built-in clock
- Built-in italics, all fonts • Internal colorizer • Background color in 4 line increments • Nonvolatile data storage • Split screen displays • Character kerning and overlap • Multi-color logos • Word flash and color change flash • Mix rolls and/or crawl with static displays • Slow reveal—7 speeds
- Billboard—9 speeds • Vertical roll, 9 rates plus pause (blanking to blanking), five different masks are selectable
- Horizontal crawl, 9 rates plus pause (blanking to blanking), position selectable

<b>D-5000</b> .....	<b>\$10,995.00</b>
Built-in keyer (factory retrofit) .....	<b>.800.00</b>

(Greater on line storage and disc duplication capability)	
4 Font RAM memory .....	<b>1,150.00</b>
(Down load 4 of 100 fonts from font library disc)	
Font library disc set .....	<b>.800.00</b>

## D-3600 Character Generator

- 4096 color palette • 3.5" dual disc drives • 1000 pages of text can be stored on each diskette • 100 speeds roll and crawl
- Keyer genlock • 35ns • 16 heights • 16 widths • Single channel NTSC • 5 upper/lower case fonts, each 92 characters
- 256 sizes, row-by-row selectable • Characters may be inverted • Automatic proportional spacing • Formatting
- Duplication • May be rackmounted

<b>D-3600</b> .....	<b>\$6,995.00</b>
---------------------	-------------------

## D-3602 Character Generator

- Dual channel version of the D-3600 • Remote "next page" function • Preview/program, off line/on line and two independent program channels

<b>D-3602</b> .....	<b>\$8,995.00</b>
Dual channel upgrade kit for D-3600 .....	<b>2,000.00</b>

# GRAPHICS EQUIPMENT

## D-6000 Panther Graphics Generator

- Advanced character generator/graphics/paint system
- Camera grab • Painting and logo animation • 15 font faces
- 35ns • Proportional spacing • 20M byte hard drive • 5" disk removable storage • Word processor text editing, dynamics, and paint software • 1024 colors • B/W camera load • Sync and genlock • Keyer • RGB and NTSC outputs • Single channel

D-6000 . . . . . \$15,995.00

### Accessories/Options

- Font library disk set . . . . . \$800.00
- Instruction manual D-6000 . . . . . 50.00
- Operator training video tape (VHS) . . . . . 50.00
- Extra cable lengths for keyboard . . . . . per ft./2.60

D-6000

## Silver Video Production Workstation

### Digital Video Effects:

- Compression and Mosaics • Wipes, slides, spirals, zooms, inlays

### Animation:

- Real time animation over video • Cell by cell • Frame by frame VCR controller • 16 cell per screen

### Font Generator:

- Anti-aliased fonts • 3M font library, disk, loadable • Automatic digitizing of logos, fonts and symbols • 16 levels of anti-aliasing

### SEG Switcher:

- 4 input composite switching—cuts, wipes, DVE • Mirrors • Quad effects • Programmable rate control

### Business Graphics:

- Pie charts • Bar graphs • Input data by keyboard

### Paint System:

- 65,000 colors • Multiple brushes—airbrushing and transparencies • Multi-plane editing and undo function • Cut and paste • Continuous tone shading • Instant RGB color frame grab from VTR • Instant composite grab, black and white or color

The Silver consolidates 6 functions into a single video production workstation. It combines power and reliability with an easy-to-use icon menu. Designed for post production and corporate installations.

The Silver offers literally hundreds of creative applications. It can "grab" images from moving videotape and input information from either black and white or color video cameras. With the Silver, you can create your own fonts and special effects, and control multiple video inputs from VTRs—all from a single workstation that's menu driven.

The Silver has dual expansion capabilities through software and hardware. It is available as a modular machine to expand your hardware system as needed; and, Silver's application software is expandable through the use of software cartridges.

Silver . . . . . \$12,000.00

### Fader/Decoder

Decodes incoming composite video into RGB, has internal keyer and mixer . . . . . \$5,600.00

### Decoder

Decode incoming composite video into RGB. Not needed if above fader/decoder is used. . . . . \$3,500.00

Silver Video Production Workstation

### NTSC Saturation Controller/Encoder

Converts RGB output from the Silver into NTSC with controlled output saturation to comply with National Television Standards Codes . . . . . \$5,600.00

### VTR Controller

Controls single frame VTRs for field accurate editing and cell by cell animation. Sony 5850 version . . . . . \$3,900.00  
 JVC CR8250U/CR850U version . . . . . 3,900.00

### Personal Computer Interface

For complete two way communication, file transportation or storage to IBM or compatible personal computer  
 PC version . . . . . \$3,500.00  
 AT version . . . . . 3,500.00

### Accessories/Options

#### Memory Extension

Three planes of memory for DVE effects 3 1/2" disk drive for storage and recall . . . . . \$9,000.00

#### Software Expansion

Airbrush, smoothing brush, gradations, 16 frame logo animation 5-30fps, business charts and graphs, live video compression integration, 4 input SEG/DVE . . . . . \$5,600.00

# ROUTING SWITCHERS

## 15X SERIES ROUTING SWITCHERS

The Series 15X Routing Switcher offers an inexpensive method of eliminating patch panels and providing selectable distribution of audio and video signals. Any output channel can be independently programmed to select any input signal. The 15X Series offers very flexible control options which are divided into two categories—local and remote which can be intermixed within the same frame. Units are available in sizes: 2 outputs, 6 outputs, and 12 outputs. Also available with Audio Breakaway.

Plug-in input and output amplifiers are used for video and audio. The audio input amplifiers incorporate balanced inputs with common mode rejection for canceling hum on input lines. The video inputs have looping BNC connectors and terminating switches.

Local Control	Remote Control
15 in x 3 out . . . . . \$3,300.00	15 in x 3 out . . . . . \$ 4,300.00
15 in x 4 out . . . . . 3,600.00	15 in x 4 out . . . . . 4,800.00
15 in x 5 out . . . . . 4,000.00	15 in x 5 out . . . . . 5,700.00
15 in x 6 out . . . . . 4,300.00	15 in x 6 out . . . . . 6,300.00
15 in x 7 out . . . . . 4,800.00	15 in x 7 out . . . . . 7,500.00
15 in x 8 out . . . . . 5,100.00	15 in x 8 out . . . . . 8,500.00
15 in x 9 out . . . . . 5,400.00	15 in x 9 out . . . . . 9,300.00

<b>Remote Control Cable</b> (Assembled and Tested) . . . . .	50.00
	add per ft./1.00

15X-2

15X

## 15X Series Video/Audio Routing Switchers

- Bridging crosspoints • Choice of local or remote controls
- Modular—field expandable • 3 frame sizes • Low crosstalk • Second audio level (optional) • LED status indicators • Input and output amps
- Terminating switches on inputs • Audio breakaway

### Local Control

Mechanically interlocked pushbutton switches are used to select and switch the audio, video and tally signals.

Each video crosspoint is isolated from feeding back through the switch to the newly selected signal eliminating the glitch on other monitors. Each output has a separate plug-in tray containing the mechanical switch as well as the audio and video output amplifiers which are also separate plug-in units. LED status indicators above each pushbutton illuminate when the corresponding switch is depressed.

### Remote Control

Standard remote controls are available for momentary pushbuttons. Remote control pushbutton trays are interchangeable with the local modules. Only DC voltages are used for control. Switch module assemblies are available in 12 x 1 and 15 x 1 sizes.

101

## 101 Series Vertical Interval Bridging Switcher

A 10 x 1 bridging switcher with built-in video and audio DAs featuring vertical interval switching on all inputs, lighted pushbuttons, and switch position memory. The switch position memory is effective for at least 30 seconds, and longer when connected to an external battery source (terminals provided).

101 Vertical Interval Bridging Switcher . . . . . \$1,255.00

### Accessories/Options

Remote Control . . . . .	\$450.00
Instruction Manual (one supplied with each unit) . . . . .	30.00

## ROUTING SWITCHERS

### Series H Routing Switcher

Compact size, excellent mechanical and electronic integrity, and circuit redundancy give the 3M Series H switching equipment the best product performance per dollar of any Routing Switcher on the market.

The Series H Routing Switcher offers a number of other benefits as well. They include:

- No internal maintenance or service adjustments
- DC coupled inputs to outputs allow analog switching circuits to handle certain data signals without DC-restoration circuitry
- Bi-directional, parallel control bus with positive feedback from crosspoint latches gives immediate and positive confirmation of crosspoint latching
- Pre-tested and pre-adjusted hybrid circuits
- Microprocessor control system simplifies design, maximizes dependability
- Single line coax control capability simplifies wiring and connections
- Separate plug-in video and audio output amplifier cards to assure that failures are isolated to one point and disable only one output if removed
- Each video path can have multiple associated audio paths (i.e., stereo, SMPTE time code, multi-lingual applications)
- The microcontrol system can provide one video with up to 5 audio levels with separate control for each level
- Audio-follow-video, video only, audio only, and audio breakaway for easy adaptation to any switching application
- I/O ports for RS232 computer terminal control, and standardized I/O protocol to allow for external CPU control by a variety of devices
- Improved temperature uniformity, hybrid ceramic substrates have stable and predictable dissipation characteristics
- Easy and cost-effective switcher expansion through modular building block design with full expansion compatibility
- Control circuits are distributed by card, another valuable circuit redundancy feature

### Hybrid Circuits

A hybrid circuit consists of a high purity alumina ceramic substrate on which various alloys and resistive materials are printed to form conductor paths and resistive circuit elements.

Miniature leadless discrete components are attached directly to the substrate. Adjustments are made to screened resistors and capacitors by laser trimming. Each microelectronic hybrid substrate contains an entire circuit function. These centralized, modular functions include video and audio crosspoints, video and audio input amplifiers, and video and audio output amplifiers. Seven building block hybrid circuits make up the Series H system. They are:

- 16 x 2 video crosspoint
- 16 x 2 audio crosspoint
- Quad audio input amplifier
- Quad video input amplifier
- Block control logic
- Video output amplifier
- Audio output amplifier

### 16 x 16 Audio/Video Matrix Card

The 16 x 16 audio/video matrix card is the basis of the Series H, model 128 x 32 audio/video switching system. It provides up to 16 inputs and 16 outputs of audio and video switching on an 11 1/2" x 15 1/4" circuit board. The audio/video matrix card is simply a carrier card for the hybrid circuits. All switching matrix functions are contained on this single card, demonstrating the packaging density that can be achieved using hybrid circuit design. This allows crosspoint densities never before attained.

The 16 x 16 Audio/Video Matrix Card consists of the following hybrid circuit devices:

- 16 x 2 video crosspoint
- 16 x 2 audio crosspoint
- Quad video input amplifier
- Quad audio input amplifier
- Logic control for the 16 x 16 A/V matrix card

Series H 64 x 64

### Video and Audio Output Amplifiers

The Series H Routing Switcher employs individual hybrid video and audio output amplifiers. These amplifiers are placed on separate output amplifier carrier cards. An example, the Model 128 x 32 uses five output amplifier motherboards. Two of the boards have 7 plug-in audio and video output circuits, and the remaining 3 boards have 6 audio and video output circuits, for a total of 32 outputs. Individual video and audio outputs are used for ease of maintenance and card changing. This technique also restricts malfunctions to no more than one video or audio output circuit.

### 32 x 32 Routing Switcher Matrix

- No internal maintenance or service adjustments
- I/O parts for RS232 computer terminal control, and standardized I/O protocol to allow for external CPU control by a variety of devices
- The switchers are controlled by the 6600 microprocessor controller or a 6500 controller

The Series H 32 x 32 Routing Switcher provides 1 video and 1, 2 or 3 audio switching levels in the same enclosure. The switcher is designed for studio and remote truck applications.

The switcher design allows a user to install a frame configured to meet initial needs such as a 20 x 20 1 video, 2 audio and provide room for expansion to 32 x 32 1 video, 3 audio within the metal frame by means of plug-in modules. This ensures expansion without obsolescence of previously purchased hardware.

Because video switching demands absolute freedom from signal interruptions, Series H equipment is designed using redundant circuits for all critical functions.

The compact matrix frame is only 19 1/4" H (11 rack units) x 19" W x 17" D. The switcher represents 372 video and audio crosspoints per rack unit (1 3/4").

The 32 x 32 also is available in a video-only switcher or audio-only at 1, 2 or 3 levels. Each audio level is independently addressable, and the system can be configured to switch the audio levels with the video or each separate level independently.

### 64 x 64 Audio/Video Routing Switcher

The Series H 64 x 64 routing switcher allows a user to install a frame configured to meet initial needs and provides room for expansion by means of plug-in modules.

The switcher provides 2 levels of switching, 1 video and 1 audio, in a matrix frame 22 3/4" H x 19" W x 17" D. The unit also is available with a companion 64 x 64 2 level audio only Series H frame, thus providing 64 x 64 1 video and 3 audios in two frames. The system can control up to five independent levels of audio.

The 64 x 64 routing switcher matrix is controlled by the 6600 microprocessor controller or a 6500 microprocessor-based control system.

## P-50 Video Processing Amplifier

• Front panel control of 6 video signal parameters • Accepts most sync formats • Input AGC for maintaining proper signal level automatically • Generates a pulse-cross format with automatic picture brightening to allow the use of a standard monitor for VTR skew and tension adjustments • Rackmounting kit and instruction manual provided • Feet provided for tabletop use

The P-50 accommodates a wide range of sync formats and provides adjustment for all signal parameters including sync, video, pedestal, burst level, burst phase and chroma level. In addition to the processed output, a pulse cross output is provided enabling the operator to adjust skew and tracking controls on a video tape recorder for optimum performance.

### Specifications

#### Video Input

Level: 1.0V p-p,  $\pm 6$ dB, composite video

#### Video Outputs (2 each)

Level: 1.0V p-p,  $\pm 6$ dB, composite video  
Output No. 1 works in conjunction with the front panel Operate/Bypass switch  
Output No. 2 can be strapped to provide a non-composite video signal

#### Monitor Output

Level: 1.0V p-p,  $\pm 6$ dB, composite video  
Impedance: 75 ohms,  $\pm 5\%$ , source terminated  
Output mode selectable by the front monitor/pulse cross switch

P-50

#### Sync Output

Level: 4.0V p-p  
Impedance: 75 ohms,  $\pm 5\%$ , source terminated  
Sync signal is separated from the incoming video signal

Frequency Response:  $\pm 0.5$ dB to 5MHz, down  $< 3.0$ dB at 8.0MHz

Differential Gain: 1.0% maximum (10-90% APL)

Differential Phase: 1.0° maximum (10-90% APL)

#### Low Frequency Noise and Hum

Reduction:  $> 30$ dB

#### AGC (Sync Tip Detector)

Input: 1.0V p-p,  $\pm 6$ dB

Output:  $< 0.5$ dB change with  $\pm$ dB change on the input

#### Controls (referenced to Nominal Video Levels):

Video level:  $\pm 6$ dB; Sync level:  $\pm 6$ dB; Chroma level:  $\pm 6$ dB; Burst level:  $\pm 6$ dB; Burst phase:  $\pm 45^\circ$ ; Pedestal level:  $\pm 40$  IRE units

#### Power

Requirements: 100-135VAC, 50-400Hz, 16W nominal

Size: 1.75" H x 17.0" W x 9.30" D

Weight: 6 lbs.

P-50 ..... \$1700.00

## 720 Video Distribution Amplifier

• Three sections; 1 input, 4 outputs per section, with common power supply • Front panel gain adjustments • Cable equalization adjustments up to 1000' of cable • Front panel test points • High impedance, loopthrough inputs • Feet provided for tabletop use • 1 3/4" rackmounting, kit provided

The 720 has been designed for flexibility in almost any situation. It's ideal for studio, mobile, or duplication applications, where quality signal performance and reliability are mandatory.

Used independently, the 720 accepts up to three different sources with four outputs for each source. Multiple sections may be looped together to provide 4, 8 or 12 outputs from a single video source.

### Specifications

Input Impedance: Bridging,  $> 40$ dB, 75 ohm return loss, 0-10MHz

Max. Input DC:  $\pm 25$ V

Gain:  $\pm 6$ dB (front panel adjust)

Outputs: 4 each, 75 ohm source terminated

Max. Output: 2.2V p-p into 75 ohms

Output Isolation: 35dB at 3.5MHz between outputs

Frequency Response:  $\pm 0.25$ dB, 100Hz-5MHz;  $\pm 0.5$ dB, 5MHz-10MHz;  $< 3$ dB down at 15MHz, 50Hz tilt  $< 1^\circ$

720

Differential Phase: 0.5°

Differential Gain: 0.5%

Y/C Delay Error: 10ns

Cable Equalization: Capable of 1000 RG59U to 10MHz, unity gain through system

Isolation Between Amps: 50dB at 3.58MHz

Power Requirements: 103-135V, 50-400Hz, 10W nominal

Size: 1.75" H x 17.0" W x 9.30" D

720 ..... \$835.00

# TEST SIGNAL GENERATORS

## 1510A Test Signal Generator

- High performance package at an affordable price • A 10-bit, digital test signal generator with over 32 precision test signals: Multiburst, NTC-7 composite, SMPTE color bars, matrix, modulated ramp, convergence, field squarewave, window, NTC-7 combination, multipulse, red field, bars/Y, modulated staircase, modulated bar, 50 IRE lum, 0 IRE lum • Field sweep signal to 6MHz, standard • Custom test signals available • Genlocks to external reference or internal oscillator • 12 character source ID and audio tone outputs—standard with every unit • Sized to share side-by-side rack with waveform monitor • 16 signal 1510S also available • Choice of rackmount or portable configurations

- 1510A Test signal generator . . . . . \$3,490.00
- 1510S Same as 1510A with 16 test signals . . . . . 2,490.00
- Option 03 Adds black burst and drive signal outputs . . . . . 600.00
- Option AT Adds audio tone (2-channel) output . . . . . 350.00

1510A

## 1515 Component + Composite Test Signal Generator

- Multiple formats: Composite NTSC, RGB and Y/B-Y/R-Y, standard on all units • Betacam, SMPTE, M-II and S-VHS formats available • Unique signals for testing distortions peculiar to component analog video: "Dual Timing Pulse" signal for setting Y/C delay and gain, color sweep for encoder/decoder tests, crosstalk test, noise coring test, bowtie test for delay matching, linearity test, clamping test • 12-character source ID standard with every unit • Optional black burst and pulse outputs

- 1515S Component TSG (SMPTE format) . . . . . \$5,300.00
- 1515B Component TSG (Betacam format) . . . . . 5,300.00
- 1515M Component TSG (M-II format) . . . . . 5,300.00
- 1515U Component TSG (SMPTE, Betacam, M-II and S-VHS formats) . . . . . 6,300.00
- Option 03 Adds black burst and drive signal . . . . . 600.00

1517

## 1517 Component (625/50) Test Signal Generator

- Supports RGB and the following CAV formats: EBU (M-II™), Betacam™, Y/CTCM, Y/CTDM • Sized for side-by-side rackmounting with a waveform monitor or vectorscope • 12-character source ID • Drive pulse outputs • Synclock (V and H) • Dual Timing Pulses and Timing Bowtie test signals to guarantee precise interchannel timing and amplitude measurements in CAV • Specific signals to ensure optimum CAV performance. Custom signals also available • Digital signal storage for greater precision and reliable replication • Modular design allows easy testing and maintenance

With Component Analog Video (CAV) test signal capability for 625/50 standards, the 1517 makes many of the features of the popular 1515 Test Signal Generator available to the non-NTSC broadcaster, studio or post-production house.

Designed for maximum flexibility, this unit allows the performance of equipment in either format to be measured easily with the CAV and RGB signals provided.

The more than 32 test signals configured into the 1517 are selectable from 16 front panel buttons. Commonly-used signals, such as color bars, are available in several formats to verify the performance of encoding/decoding equipment.

The 1517 may be sync-locked to external reference signals or operated from its own internal oscillator. This horizontal delay timing can be adjusted from 45µs of advance to 15µs of delay, and overlaid on the test signal for viewing on a picture monitor and setting.

The reference input is switch-selectable, loopthrough or 75 ohm internally terminated. This reference input is selected when the front panel Genlock control is activated.

2015

Signal source identification may also be displayed on a picture monitor through a programmable 12-character overlay.

In Average Picture Level (APL) Mode, test signals of 12.5% or 87.5% APL are provided by inserting 0% or 100% luminance level on three out of every four lines.

Each instrument provides three signal sources, with each available on two isolated BNC connectors. Adaptor cables for connection to a Betacam or M-II 12-pin connector are available.

- 1517 Component (625/50) . . . . . \$6,930.00
- Option 02 Drive signals output . . . . . 350.00
- Option 10 Single wide cabinet with handle . . . . . 65.00
- Option 30 Rackmount (for two units) . . . . . 180.00

## 2015 Programmable Test Signal Generator

- Broad library of test signals in many formats including: Analog: NTSC, PAL, SMAC, CAV, HDTV, and film-to-tape — Digital: Composite and 4:2:2 component • Capability of generating signals from 525/60 (NTSC) to 1125/60 (HDTV) and beyond • Custom signal capability: The user can create custom test signals, or can create "known-bad-signals" for testing correction circuits • 10-bit digitizing yielding 30MHz flat analog bandwidth • Utilizes IBM (or compatible) personal computer as controller • Software selectable clocks: 114.5MHz (32 x 3.58MHz) or 108.0MHz (8 x 13.5MHz) • Up to 3 channels are available, to be used independently or for 3-channel CAV signals

- 2015 Programmable test signal generator (Single channel) . . . . . \$9,950.00
- 2015 With 3 channels . . . . . 14,950.00
- 2015PL 3-channel 2015 with digital encoder flat to 10MHz for PAL output with 25Hz offset subcarrier . . . . . 17,450.00
- Optional Non-volatile memory (single channel) . . . . . 550.00
- Optional Non-volatile memory (three channel) . . . . . 1,450.00

# WAVEFORM MONITORS/ VIDEO GRAPHICS CARD

## 500 Series Waveforms and Vectorscopes

The 500 Series offers the flexibility to accurately monitor component analog signals as well as composite video. The WFM560 Waveform Monitor provides 6 inputs, enabling you to run two complete channel sets in component format, or to tailor a combination of the two standards for your particular requirements. Switching between formats (SMPTE, Betacam, M-II) and displays (Alternate, Parade, A-B) is accomplished from the front panel, as is front panel memory storage of up to 18 switch position settings for later recall. Front panel status is recalled and restored in the event of a power down and repowering.

Basic component monitoring is available on the WFM530, with three inputs which can be dedicated to a single component train. Supporting either NTSC or PAL environments, the VS560/561 (with six inputs for composite video, color-difference and RGB signals) and VS530/531 (with three inputs for reliable composite vector display) expand their functionality through a serial interface allowing the operator to use line select and memory features through interconnection with one or more waveform monitors. Composite video and stereo audio displays are standard, as are graticule readouts in the VS560/561.

Graticule readouts, synchronously multiplexed with the video signal to ensure accuracy, provide an on-screen display of such parameters as input format, line selection and sweep speed, and are a standard feature of most 500 Series instruments.

### WFM530 Waveform Monitor

- Three inputs for composite monitoring • Advanced features for basic component capability • Supports NTSC, PAL, SECAM, 525/60 component and 625/50 component standards • Front panel memory • CRT readouts • Optional cursors • VITS display and line readout

**WFM530** 3-channel NTSC/PAL/SECAM/CAV Waveform Monitor. . . . . \$2245.00

### VS530/VS531 Vectorscopes

- Three inputs • Composite video and stereo audio displays • Alternate display and remote control • Supports NTSC (530) or PAL (531) standards

**VS530** 3-channel NTSC Vectorscope . . . . . \$2245.00  
**VS531** 3-channel PAL Vectorscope . . . . . \$2470.00

### WFM560 Waveform Monitor/Vectorscope

- Six inputs for full component and composite measurements, plus component vectorscope functions • Component format switching for SMPTE (EBU), Betacam, M-II • Supports NTSC, PAL, SECAM, 525/60 component and 625/50 component standards • Front panel memory • Time and voltage cursors, including risetime • Graticule readouts • VITS display and line readout • Built-in transcoder to feed RGB monitor

**WFM560** 6-channel NTSC/PAL/SECAM/CAV Waveform Monitor, CAV Vectorscope . . . . . \$3600.00

### VS560/561 Vectorscopes

- Six inputs—composite and component vector displays • Switch selection of composite video and component standards • Stereo audio display • CRT readouts • 560 NTSC and 525/60 component standards; 561 switchable between NTSC, PAL, 525/60 and 625/50 component standards

**VS560** 6-channel NTSC/CAV Vectorscope . . . . . \$3600.00  
**VS561** 6-channel PAL/NTSC/CAV Vectorscope . . . . . \$3960.00

### 1527 Combined Waveform Monitor, Vectorscope, Test Signal Generator with SC-H Phase Measurement Capability

- Waveform and Vectorscope monitoring with a built-in test signal generator in one package • Simplified differential gain and differential phase measurements • SC-H phase measurement • May be used to measure the absolute SC-H phase of a single video signal even on "Demod Out" of type C recorder, relative SC-H phase of 2 signals, or incorrect color frame matching between 2 video signals even at points where the signals are not matched in time • A 10-bit, 4Xfsc test signal generator with 8 proven test signals: Multiburst, field squarewave, SMPTE color bars, matrix modulated

WFM560

VS561

4030

ramp, convergence, NTC-7 composite, calibration signal • Optional black burst output for master sync reference • Displays either of 2 external signal sources or built-in test signal generator. Display can be switched between output of device under test for easy comparison • 12-character source ID standard with every unit • Custom test signals available • Unique "auto" mode: matches test signal most often associated with each monitoring mode • Audio tone output standard • Choice of rackmount or portable configurations

**1527** Combined waveform monitor, vectorscope, test signal generator with SC-H phase measurement capability . . . . . \$7250.00  
**1527-20** Combined waveform monitor, vectorscope, test signal generator . . . . . \$5750.00  
**Option 03** Adds black burst and drive signal outputs. . . . . \$600.00

### 4030 Video Graphics Card

- Three modes: graphics, broadcast bandwidth composite video and full bandwidth composite video. Versions available for either NTSC or PAL • Full genlock with correct color framing • Black burst reference • Software selectable resolution • External key input • Software controlled fades and keying • Next frame control output • Supports locked or unlocked subcarrier • Broadcast mode display enhancement optionally available

The 4030 lends your PC graphics program exceptional speed, resolution and color quality. When operating outside of "broadcast quality" mode, very high resolution is available for high-resolution RGB monitors with a 1024 x 768 pixel display. Up to 256 of the 16.7 million colors available may be displayed at one time, and a refresh rate of 60Hz, non-interlaced, virtually eliminates flicker. Drawing speeds range from 10 million pixels per second for solid-line vectors to 60 million pixels per second for solid object fills, so that your displays move dynamically over the screen.

The 4030 supports a wide range of IBM-compatible software packages in the graphics, CAD and CAE areas. Appropriate sync, burst, blanking and timing instructions are inserted by the 4030 for the video output of the system to meet transmission standards.

The video output is switchable between three different modes: fading, internal keying and external keying, as well as being switch-selectable at the input between video and graphics. Fading or switching is software-controlled for different speeds. The key level of the graphics can be manipulated and faded, and an external video input is provided.

This high-resolution system adds plug-in color graphics and genlock/encoder cards to an IBM-compatible PC to offer true broadcast quality video direct from a PC graphics program.

**4030** IBM Bus Video Graphics Card with RGB, Genlock, Luminance Key, Sync and Black Burst Generator and NTSC Encoder supplied with Advanced Graphics Co-Processor . . . \$3750.00  
**4031** As 4030 above but with PAL encoder . . . . . \$4345.00

# CONNECTORS & ADAPTORS

## COAXIAL CONNECTORS/BNC/UHF/N

### BNC 2-pc. FASTFIT

- 2 pc. construction
- **ULTRA-FAST Assembly** — Just strip cable, push-on and crimp shield
- Built-in center contact locks on conductor without solder or crimping
- Crimp tools available

Model No.	Cable Type
CP 88-2-59	22 Ga. RG/59, 62
CP 88-4-59M	20 Ga. RG/59
CP 88-1-58	20 Ga. RG/58

### BNC 3-pc. CRIMP

- Crimp or solder center contact
- Strain relief ferrule crimps shield

Model No.	Cable Type
CMC 88-59	22 Ga. RG/59
CMC 88-59M	20 Ga. RG/59
CMC 88-62	22 Ga. RG/62
CMC 88-58	RG/58
CMC 88-174	RG/174

### BNC 1-pc. TWIST-ON

- Twists directly onto stripped cable
- No solder or tools required
- Built-in energizing contact locks on center conductor

Model No.	Cable Type
CPFI UG88-2	22 Ga. RG/59, 62
CPFI UG88-4	22 Ga. RG/59
CPFI UG88-3	9841 Broadcast
CPFI UG88-10	TFE RG/59
CPFI UG88-1	20 Ga. RG/58
CPFI UG88-5	MATV 6/u

### UHF CRIMP TYPE

- Fast assembly
- Just crimp center pin and shield, comes with attractive 1/2" ferrule

Model No.	Cable Type
CPL 259-14	RG/59

### UHF 1-pc. TWIST-ON

- Twists directly on to stripped cable with excellent holding power
- Center contact may be crimped or soldered

Model No.	Cable Type
CPFI 259-11	RG/59, 62
CPFI 259-21	8281 Broadcast

### UHF SOLDER TYPE

- For RG/59 cable
- No adaptor required

Model No. CPL 259-9

### UHF PUSH-ON ADAPTOR

- Adapts UHF male cable end to quick on/off use

Model No. A-2121

### UHF 2-pc. CRIMP CABLE JACK

- One step assembly
- Just push on stripped cable and crimp shield

Model No.	Cable Type
CPF 249-14	RG/59, 62

## N CONNECTORS & ADAPTORS

**N2157**  
(Mil. No. UG-57B/u) Double male adaptor.

**N-2129**  
(Mil. No. UG.29B/u) Double female adaptor.

## ADAPTERS BETWEEN SERIES

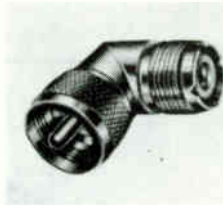

Precision adaptors provide an easy means of using existing cables and connectors to interconnect all types of video and audio equipment. 'F' adaptors allow the use of standard 'F' 59, 75 ohm cable assemblies supplies with most home video equipment to be converted to UHF, BNC or RCA type cables.

Description of adaptors are listed by male (plug) and female (jack). Parts listed as phono are the RCA type used for direct video lines on home video equipment.

## VIDEO CABLES

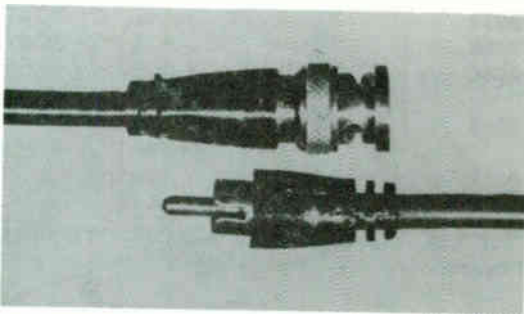

### 75 Ohm Video Cables

These extra-flexible RG-59/u Cables with heavy-duty, densely Braided Copper Shields meet the requirements of professional, industrial and consumer video equipment for 75 ohm cable; and they meet MIL-C-17 specifications. The dense, Braided Copper Shield provides 95% coverage for optimum conductivity and maximum shielding. The non-contaminating Glossy Black Jackets prevent signal degradation which can be caused by plasticizers migrating into the cable dielectric, as happens with non-MIL type jacket materials.

### 10-Pin Industrial Color Camera Cables

Precision-made connectors with silver plated contacts meet the highest professional standards.

Directly interchangeable with Panasonic and Sony Industrial 10-pin EIAJ cables.

**Series A (For use with Panasonic, RCA, JVC, Quasar, Hitachi, G.E., Sharp)**

- 2622 1.5' 10-pin male—10-pin female
- 2624 16' 10-pin male—10-pin female
- 2626 33' 10-pin male—10-pin female
- 2627 53' 10-pin male—10-pin female
- 2629 100' 10-pin male—10-pin female

**Series B (For use with JVC-71)**

- 2604 5' 12-pin male—10-pin male

**Series C (For use with JVC-71)**

- 2605 33' 12-pin male—12-pin female

### 10-Pin Color Camera Cable by Mogami

Designed for light weight consumer camera extensions. This cable has all pins wired to new-type black 10-pin connectors. Rated for cameras drawing up to 10W or 950mA.

2725AS	25'
2733AS	33'
2750AS	50'

### 14-Pin Sony Type Color Camera Cable by Mogami

Designed for extension cable use with Sony consumer cameras and matching equipment.

2630	33'
2631	50'

### Custom Cables

Custom lengths or colors can be ordered to meet your exact specifications or needs, as well as imprinting on custom connector boots. Choose from Blue, Red, White, Gray or Purple Cable. For Gold-plated contact BNC please specify #BNC-1789 Connectors. Custom Cables can be produced quickly and economically.

## "F" 59 HEAVY-DUTY CABLES

- Low loss, flexible  
RG 59/u 75 ohm cable
- New advanced technology, 100% bonded aluminum shield
- 20-AWG center conductor
- High reliability connectors
- Impervious to moisture

Our most popular "F" 59 Jumper Cables for MATV, TV & VCR hook-ups feature heavy-duty flexible RG 59/u 75 ohm Cable with 20-AWG Center Conductor protected by a 100% bonded Aluminum Shield which is surrounded by a woven aluminum braid to provide the highest quality shielding for maximum picture fidelity.

Select Jumper Cables with Black Jacket and Golden Chromate Connectors; or White Jacket with Silver Cadmium Connectors.

PART NO. (Black)	PART NO. (White)	CABLE LENGTH
8800-B	8800-W	12-In.
8801-B	8801-W	18-In.
8803-B	8803-W	3-Ft.
8806-B	8806-W	6-Ft.
8810-B	8810-W	10-Ft.
8825-B	8825-W	25-Ft.
8850-B	8850-W	50-Ft.
8875-B	8875-W	75-Ft.
8899-B	8899-W	100-Ft.

## "F" 59 STANDARD CABLES

- White jacket
- Hex-type crimp rings
- 22-AWG Center conductor. Custom lengths available

Our most popular "F" 59 Jumper Cables for MATV, TV and VCR hook-ups.

PART NO.	LENGTH
883	3-Ft.
886	6-Ft.

## "F" 59 PUSH-ON CABLES

This connector eliminates twisting standard type cables. Just push the cable directly onto the female jack. Excellent where cable set ups are always changing. Heavy-duty center conductor holds up under continual usage. Right Angle Plug on one end allows easy installation.

PART NO.	LENGTH
8903	3-Ft.
8906	6-Ft.
8912	12-Ft.

## STANDARD 8-PIN MONITOR CABLES

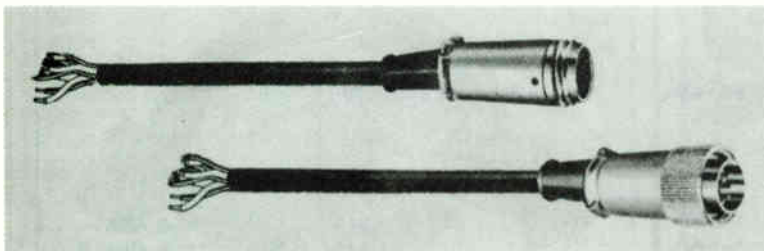

This standard 8-Pin Monitor Cable utilizes a universal 8-Pin Rectangular Connector to connect U-Matic and other Industrial Video Recorders to TV Monitors, on either end of a rugged, heavy-duty cable.

PART NO.	LENGTH	DESCRIPTION
2601	9-Ft.	8-Pin Male-Both Ends
2603	25-Ft.	8-Pin Male-Both Ends

## CAMERA CABLE ENDS

For breakouts and custom wiring. 12" long.

PART NO.	DESCRIPTION
5133-17	10-Pin Male Metal Connector All Pins Wired.
10MMR	10-Pin Male Plastic Connector All Pins Wired.
10F12	10-Pin Female Plastic Connector All Pins Wired.
14 MSC	14-Pin Beta Male Connector 7, 8, 11, 12 Not Wired.
14 FSC	14-Pin Beta Female Connector 7, 8, 11, 12 Not Wired.

## CAMERA CABLE

Precision video cable for color cameras and high resolution CCTV systems not requiring external sync. Has one precision video coaxial cable, 2 shielded audio cables and 2 #16 AWG hook-up wires for power and control functions. All wires are color coded. Overall diameter is .360 inches.

**Part No. 9404**

## 5 CONDUCTOR

U.L. LISTED

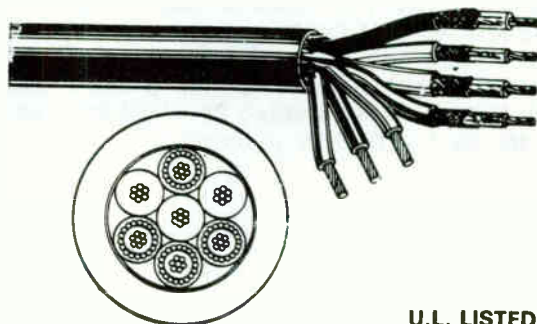

## CAMERA & MONITOR CABLE

An extremely flexible and compact cable for use with color or black and white cameras used in home and industrial video systems. Most often used with 10 pin round camera connectors and 8 pin rectangular monitor connectors. Has 4 specially designed compact video coax cables and 3 #22 AWG hook-up wires for power and control functions. Each video cable is of identical construction and is also used for sync and audio signals. All wires are color coded. Overall diameter is .270 inches.

**Part No. 9402**

Part No. 2566 is identical to 9402 but with 6 video coax and 3 #22 AWG wires. O.D. is .330 inches.

## 7 CONDUCTOR

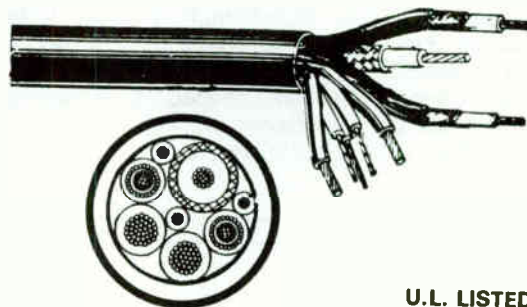

U.L. LISTED

## CAMERA CABLE

This superflexible cable is designed for use with color cameras in professional and industrial video systems. It contains 1 precision video coax, 2 shielded cables for audio and sync., 2 17 Ga. heavy-duty power leads, and 3 25 Ga. control leads. All wires are color coded. Overall diameter is .350 inches.

**Part No. 2722**

## 8 CONDUCTOR

U.L. LISTED

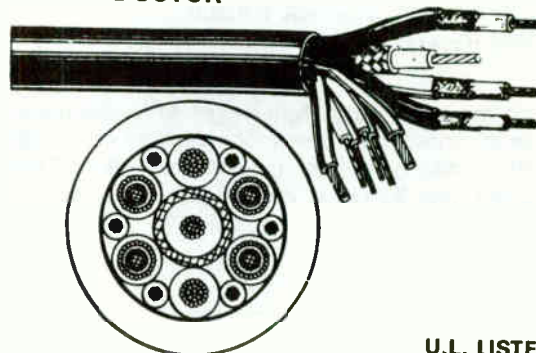

## CAMERA CABLE

Precision video cable for professional and industrial applications. Extremely flexible construction makes handling easy. Has one precision video coax, 4 shielded cables for audio and sync., 1-17 ga. and 20 ga. power leads and 6-28 ga. control leads. All wires color coded. Overall diameter is .390 inches.

**Part No. 2610C**

**2610D** (Same as above but with overall braided tinned shield.)

## PROFESSIONAL VIDEO CAMERA CABLE (With Overall Braided Shield)

Designed for professional applications requiring balanced audio line and overall braided shield. This cable is compatible with 14-Pin inputs on professional VHS, Beta and U-Matic portable equipment. Contains: 2 precision 75 ohm 28-AWG Coax; one 28-AWG Balance Audio Pair; one 28-AWG 50 ohm Coax; three 26-AWG Control Wires; one 24-AWG Twisted Pair; two 18-AWG Power Lines; and an Overall Braided Shield.  
**Part No. 9411** O.D. .433" (10.6mm)

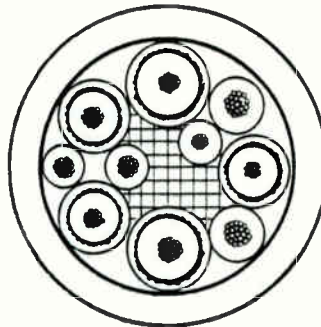

11-CONDUCTOR

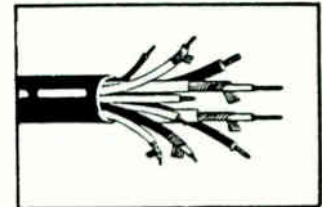

PART NO. 9411

## MINIATURE VIDEO/AUDIO CONTROL CABLE

Extremely flexible Multi-Conductor Cable designed for internal or external wiring of Electronic Equipment requiring transmission of Audio and Video or Data Signals. Contains: Two 28-AWG Video Coax; three 28-AWG Shielded Cables; three 28-AWG Control Lines; and two 24-AWG Control Lines.  
**Part No. 2687** O.D. .255" (6.5mm)

10-CONDUCTOR

PART NO. 2687  
 U.L. LISTED

## SUPERFLEXIBLE MONITOR CABLE

This extremely flexible, high-strength Miniature Cable has 4 identical 28-Gage Mini Coax Cables. It is ideally suited for monitor applications from U-Matic Recorders where two audio and two video signals are needed. It is also used for microphone and communications systems.  
**Part No. 2326** O.D. .235" (5.96mm)

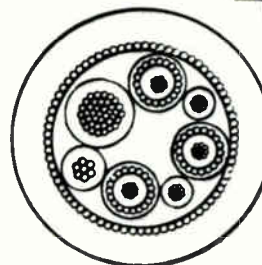

4-CONDUCTOR

## MINIATURE CAMERA CABLE (With Overall Shield)

This extremely small, light-weight Multi-conductor Cable is for use in various applications for video and audio signals. It is only .288 inches in diameter, but contains 1 Video Coax, 2 Shielded Cables, one 22-Gage, one 26-Gage and one 28-Gage Hook-Up Wires. Overall served shield is 18-Gage.  
**Part No. 2673**

# VIDEO FURNITURE

## MVC Series 2-Door/4-Door Video Consoles

### Common Features

- Made from solid hardwoods and selected hardwood veneers
- Each set of doors is equipped with a brass plunge lock system
- Each console is built to meet your requirements, standard interior can be fitted with shelves positioned to suit your equipment exactly
- 4" heavy-duty casters
- 3-outlet power assembly with a 15' cord
- Fabric covered side speaker openings are available for video consoles with side mounted speakers
- Ample ventilation and service access is provided through the rear service opening
- The rear of each interior shelf is cut out to provide for cabling
- Complete enclosure

# DOLLIES/LIGHTING CONTROL

**DOORWAY DOLLY**

**LIGHTING CONTROL**

**42 x 42 REFLECTOR**

## Doorway Dolly

The Doorway Dolly was designed to be an inexpensive camera dolly narrow enough to fit through most standard doorways. Over the years, Doorway Dollies have been used not only for this purpose, but also as efficient equipment transporters for camera cases, lighting fixtures, cables, etc.

Pneumatic tires are standard, but the doorway can be fitted with track wheels for use on straight dolly tracks.

Steering is accomplished by use of a pull handle (like a wagon). A steering feature has been added which allows the operator to steer from on board the dolly. This is accomplished by inserting the pull handle through the push bar on dolly front.

A recent addition available for the push bar is an angled fitting to allow the bar to tilt down 34° for more clearance between the dolly and dolly operator.

## Tube Dolly

A specialized dolly originally designed to ride on sections of straight standard dolly track or tubing. The Tube Dolly was created to serve as a tracking platform for the older conventional type crab dollies (which were not capable of being adapted for track use). The crab dolly would be physically loaded onto the Tube Dolly. The rear carriage of the Tube Dolly is adjustable back and forth to compensate for differing wheel length of crab dollies.

Another application of the adjustable rear carriage is to serve as an outrigger platform for lighting or sound when camera is riding on the main platform.

## Star Track Dolly™

The latest addition to the Matthews family of dollies, the Star Track is a versatile, portable dolly that travels in a bag. Even with the compact, lightweight design, the Star Track is as sturdy as a rock.

The unit offers creative camera control in the most remote or restricted locations.

## Butterflies and Overheads

Butterflies and Overheads are portable, light-weight tubular frames that are designed to support any lighting control textile material, such as "silk" (diffusion), "net" (reduction), "solid" black (cutting), or "griffolyn" (reflective). The perimeters of all textile materials are color coded for easy identification (white/single scrim; red/double scrim; gold/silk/black/solid, etc.) The frames are designed to break down into easily assembled components for transportation and storage.

## Reflectors

A Reflector is designed to redirect natural or artificial light. The two faces (sides) offer a choice of intensities. The "hard" side can be compared to the spot position of a studio lighting fixture. The "lead" or "soft" side yields a more diffused pattern of light. Similar to that of a fill light.

# CRANES

## Tulip Crane™

The Academy Award winning Tulip Crane is a portable, professional camera crane system ideally suited for film and video commercial and feature applications. At home on rough terrain, studio floor, or standard dolly track, the Tulip Crane with its full range of accessories offers economy and portability without sacrificing creative versatility. The Tulip Crane folds to 8' for easy transport. The unit allows for fast set-up and strike time, offering a maximum height of 16.5' with a negative drop of minus 3'. The Crane was computer designed and is constructed of lightweight aerospace alloys. When totally assembled, the system weighs approximately 600 pounds. The Tulip Crane is certified to be mechanically safe.

## Tulip Crane™ and Accessories

Cat. No.	Description	Metric Weight	Weight	List
725051	Tulip Crane™ Arm — Complete With: 2 - #5058 Seats, 2 - #5059 Seat Brackets, 2 - #5060 Seat Offset Arms, 1 - Seat Turret Assembly, 1 - Main Bearing Arm Adapter, 2 - Horizontal Stabilizing Bars, 1 - Fine Tune Adjustment Weight, and Hardware.	188,70 Kg	416 lb	\$29,600.00
725054	Pedestal - Complete With: Vertical Post, Leveling Struts, 2 - Level Gauges, 1 - set (4) #5057 Feet, and Hardware.	84,37 Kg	186 lb	7,400.00

725055	Pneumatic Conversion Kit 2 Fixed Axle; 2 with Self-Contained Steering Mechanism. Used for Exterior Transportation.	59,88 Kg	132 lb	1,790.00

## Cam-Remote™

The Cam-Remote is a sophisticated electronic pan and tilt head, designed by Ernst "Bob" Nettmann (two-time Academy Award winner/Technical & Scientific Category), in conjunction with Matthews' engineers. This system allows a camera to be completely operated without any artistic compromise from any distance as required.

The unit facilitates shooting from a limitless array of unusual, precarious, or tightly confined camera positions. In addition, the Cam-Remote brings a new element of safety to action and special effects photography, since it now allows cameramen and crews to capture dangerous shots or angles from a safe distance.

## Cam Remote™

Cat. No.	Description	Metric Weight	Weight	List
759852	Pan/Tilt Head	22,68 Kg	50 lb	POR
759853	Control Desk	5,44 Kg	12 lb	POR
759854	Power Supply	4,54 Kg	10 lb	POR

## Mini-Jib Arm™

A portable, versatile offset jib arm that is compatible with all dollies, the Mini-Jib may also be mounted on to its own heavy duty tripod. The Mini-Jib is capable of rotating 360 degrees with a minimum diameter of 2 feet and a maximum diameter of 7½ feet.

The mounting configuration of the Mini-Jib is compatible with Elemack and may be adapted for use with Mitchell.

Additional arm length may be achieved with the use of one or more extension arms. The camera mounting elbow on the end of the arm may be attached at various heights, upright or inverted, to provide a multitude of camera positions.

## Mini-Jib Arm™ & Accessories

# MOUNTING EQUIPMENT/ ACCESSORIES

## French Flag

The French flag is a small metal, opaque flag (used to shade the camera lens) mounted on the end of an articulating arm. The joints are spring-tensioned ball, and the arm terminates in a screw locking "U" clamp (3/4" inner diameter)

## Articulating Arm (Flex-Arm)/French Flag

Cat. No.	Description	Metric Weight	Weight	List
209077	Articulating Arm/French Flag Camera Lens Shade (Spring Ball Joint)	4.82kg	1 lb/1 oz	\$63.50
209167	French Flag Only	.28kg	10 oz	13.50
209771	Articulating Arm (Flex-Arm) Spring Clamp	.62kg	1 lb/6 oz	85.00
209631	Mafer Clamp/Snap-in (Clamps to diameters from 1/2" to 1 7/8") (Clamps to flat surfaces from 0" to 2")	.43kg	15 oz	31.00
209632	5/8" Diameter Male Pin/Snap-in (For #9631)	.14kg	5 oz	4.00
209633	3/8" Diameter Male Pin/Snap-in (For #9631)	.05kg	2 oz.	4.00
209637	1/2" Pin/Snap-in (For #9631)	.11kg	4 oz	4.00
209634	* Articulating Arm/Snap-in Set	4.68kg	10 lb/5 oz	231.00
209635	Swivel/Snap-in (for #9631) (Joins Two Mafer Clamps Together)	.06kg	2 oz	4.00
209636	2 1/2" Grip Head/Snap-in (For #9631)	.60kg	1 lb/5 oz	35.00
209638	4" x 4" Mounting Plate/Snap-in (For #9631)	.23kg	8 oz	17.50
209639	Offset Arm/Snap-in (For #9631)	.57kg	1 lb/4 oz	29.50
209640	Weld On/Snap-in (For #9631)	.06kg	2 oz	4.50
349557	Mini-Extension Arm/Snap-in (For #9636)	.77kg	1 lb/11 oz	28.50

\*Set represents one Mafer Clamp and one each of all Snap-in accessories. Set list price reflects a savings of 5%

## Sandbags

Sandbags are employed on a set to provide additional ballast to objects, tall stands, or large surfaced units subject to wind (e.g., reflectors, butterflies, silks, etc.) Sandbags are also used as counter-balance weights for "boom arm" type configurations.

Weight descriptions (15 lbs., 25 lbs., 35 lbs., and 50 lbs.) refer to their capacity when filled. "Empty" refers to Sandbag shells that are sewn completely except for one inch in the seams, to accommodate filling the shells with sand. The seams are then to be sewn closed by the purchaser. This allows a savings in one-time shipping charges.

## Sandbags

Cat. No.	Description	Metric Weight	Weight	List
299550	15 lb	6.80kg	15 lb	\$23.50
29955E	15 lb (Empty)	.11kg	4 oz	16.00
299552	25 lb	9.50kg	25 lb	31.50
29952E	25 lb (Empty)	.15kg	6 oz	23.50

299168	50 lb (Empty)	.34kg	12 oz	35.50
299555	15 lb Fly-A-Way (Velcro)	.11kg	4 oz	31.00
299607	Matth Gag (Double Zipper)	.20kg	7 oz	30.00

## Century Stand Accessories

### Grip/Gobo Heads

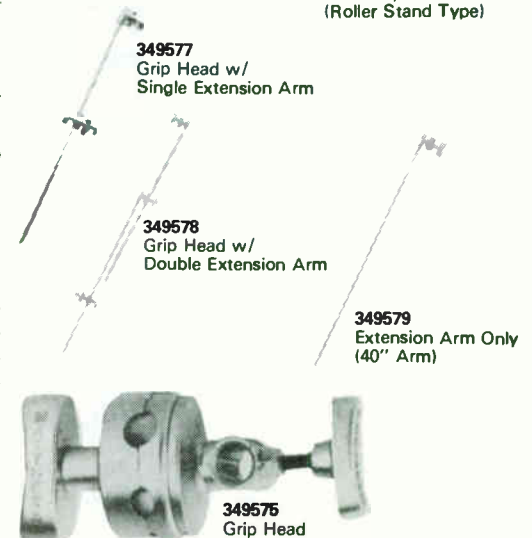

The term "Grip Head" refers to a head which seats onto or into a stand. "Gobo Head", on the other hand, is the mounting head on the end of an extension arm.

There are two sizes of Grip Heads available: the 2 1/2" or the 4 1/2". The 2 1/2" Grip Heads mount onto a standard 5/8" pin, similar to that found on Century Stand and "Baby" stands and other related mounting hardware.

The 4 1/2" Grip Head is intended for use with "Junior" (1 1/8" receiver) and other heavy-duty stands.

## Century Stand Accessories

Cat. No.	Description	Metric Weight	Weight	List
349577	Grip Head w/Single Extension Arm	1.47kg	3 lb/4 oz	\$54.00
349578	Grip Head w/Double Extension Arm	2.47kg	5 lb/7 oz	83.50
349575	Grip Head only 2 1/2" (Century Stand Type)	.48kg	1 lb/ 1 oz	24.50
349576	Grip Head 4 1/2" (Roller Stand Type) w/1 1/8" Male Pin and Receiver for 1 1/8" Pin	2.35kg	5 lb/3 oz	90.00
429614	Matth Gag	.51kg	1 lb/2 oz	28.50
349579	Extension Arm Only (40" Arm)	.99kg	2 lb/3 oz	34.00
349557	Mini Extension Arm (20" Arm)	.54kg	1 lb/3 oz	28.50

## Video Delay Boxes (Variable), DV Series

• Impedance: 75 ohms • Frequency Response:  $\pm 0.05$ dB Ripple up to 5.5MHz (0.1dB p-p) • Return Loss: 27dB • Temperature Range: 0-70°C • Max. Input Voltage: 2VDC • Performance of box and 19" rack units is a function of the delay line combinations used

Small metal boxes with BNC connectors provide infinitely variable video delay either with switches (type 180 or 360) or taps (type 097) over a range of 10-665ns. A  $\pm 1$ ns trim achieves precise timing at installation and will compensate for temperature and aging variations during subsequent maintenance. For longer delay requirements, these variable boxes may be cascaded with lump delay boxes (type DV 0100-1000) for a maximum delay of 2500ns. The prefix DV identifies boxes which can be used as "stand-alone" units or can be mounted on a 19" rack panel (Type 5) which accommodates 15 separate boxes. The prefix DN refers to similar boxes which are not rackmountable.

Adjustment of time delay in TV signal routes is important in all countries of the world. 75 ohm delay units are suitable for use in all TV systems including NTSC, PAL, SECAM, and all variations.

The Smaller Video Delay Units are designed to make the fullest use of the miniature DIP video delay line modules, and retain feature important to TV engineers.

### Passive Delay Boxes

Rackmounted—V Series or Stand Alone N Series

Boxes with Switches and  $\pm$  Vernier

Delay Range-ns	Part Number	Price
3-9	UN 3/9	\$ 78.00
10-165	VU 180	205.00
	DV or DN 180	219.00
10-330	DN, DV or VU 360	394.00

Boxes with Taps and  $\pm$  Vernier

Delay Range-ns	Part Number DV	Price

1210-1530ns	P	\$916.00	\$ 935.00
1310-1630ns	R	958.00	978.00
1410-1730ns	S	982.00	1001.00
1510-1830ns	T	995.00	1015.00

### Zero Loss Delay Video Delay Line

• 1 Input 1 Output • 1V p-p 'in' — 1V p-p 'out' • 75 ohm active • Delay selection 10-1830ns • Delay trim at front 5ns (8° Ø PAL) 6.4 Ø NTSC

The Zero Loss Delay unit is designed to delay a composite color TV signal without significant distortion. The printed circuit card selected will determine the delay time available. If additional delay is subsequently required, the user may add more Matthey DIP delay modules in spaces provided.

Gold plated switches or "handbags" ensure a long lifetime of very low noise operation.

The Zero Loss Delay unit can be fitted into any rack frame equipped with  $\pm 15$ V nominal DC power supply and an Amp-Blade 23-pin socket (such as the 3400 Series made by Grass Valley Group Inc.)

Features accessible without removing the PC card:

1. 5ns adjustment via 2 x 2ns switches and  $\pm 1$ ns fine trim screwdriver adjust.
2. Optional gain variation by screwdriver adjust  $\pm 0.7$ dB. (Note: gain is automatically compensated for each delay step switched).
3. Optional DC offset by screwdriver adjustment over the range  $\pm 750$ mV.

Items 2 and 3 are normally not necessary but can be fitted if stated on the order.

Part Numbers	Delay Times	Price
ZL 170	10-170	\$ 598.00
ZL 330	10-330	710.00

RX Pro L-500 Beta	19.99

## MP Metal Particle 8mm Videocassettes

- Coated with an exclusive anti-oxidant known as Magnetite
- Coating prevents the oxidation which ordinary metal particle tapes are subject to
- Maintains outstanding dependability
- Bonded to the base film by HED process, these 8mm videocassettes are more durable

MP6-15	\$ 9.99
MP6-30	11.99
MP6-60	14.99
MP6-90	16.99
MP6-120	19.99

## VHS C TC-20 Compact Videocassette

- Designed for use with VHS-C recording systems
- Crafted to exacting tolerances for unfailing compatibility
- With the appropriate adaptor, TC-20 videocassettes can be played through a conventional VHS VCR
- In every other respect, it is the quality and performance equal of HGX Gold HiFi videocassettes

EX TC-20	\$ 9.52
HGX Gold TC-20	9.99
RX Pro TC-20	10.99

# VIDEOCASSETTES

## HS (High Standard) VHS Videocassettes

- Picture clarity (SN) is improved by +1.5dB and color reproduction (CN) by +2.0dB
- An ideal tape for general purpose video recording

**HS T-120** ..... \$4.99

## Pro HG (High Grade) VHS Videocassettes

- Professional quality video reproduction for the home video user
- Permapass™ binder system provides ultra low head wear and high tape durability
- Includes Safeguard™ Storage Case. More compact, improved locking system and durable plastic construction for maximum protection against the harmful effects of dust, dirt and debris

**Pro HG T-120** ..... \$5.99

## Pro VHS-C High Grade Videocassettes

- Superb clarity, color, sharpness
- High density magnetic tape coating for exceptional picture quality even at the longest (SLP) recording speed
- Convenient, compact size—great for camcorders and video correspondence

**Pro VHS-C TC-20** ..... \$5.99

## Pro Hi-Fi VHS Videocassettes

- Developed specifically to capture the extraordinary sight and sound of VHS Hi-Fi or PCM digital systems
- Optimum Hi-Fi performance even after 1,000 plays
- Permapass binder system eliminates oxide shedding and extends tape life
- Anti-static cassette mechanism reduces electro-static attraction of dropout-causing dust and debris
- Includes the see-through version of the Safeguard Storage Case

**Pro Hi-Fi T-120** ..... \$6.99

## Pro Cam VHS Videocassettes

- Designed to meet the demanding quality needs of portable recording
- Heavy-duty base film is 20% more resistant to environmental hazards such as excessive heat, cold and humidity
- Cassette shell is molded in high impact ABS plastic, 20% stronger to withstand the rigors of portable video recording
- Anti-static cassette mechanism reduces electro-static attraction of dropout-causing dust and debris
- Includes the see-through version of the Safeguard Storage Case

**Pro Cam T-120** ..... \$7.99

**Pro Cam T-30** ..... \$5.99

## Standard Beta Format Video Tape

- Ideal for every day recording needs
- Rich, vivid color reproduction and long-term reliability

**Standard L-750** ..... \$4.99

HS T-120

Pro HG T-120

Pro Cam T-120

MP-120

Pro VHS-C TC-20

## Pro Series 8mm Videocassettes

- Rich, vivid color reproduction
- Ultra-fine metal particle formulation for outstanding image quality
- Specially designed cassette mechanism has fewer moving parts for maximum reliability
- Double-lid locking system helps protect the tape from dropout-causing dust and dirt

**MP-30** ..... \$4.99

**MP-120** ..... \$9.99

## MAINTENANCE/CARE

### Safeguard™ VHS and Beta Head Cleaners

- Convenient, non-abrasive wet head cleaning system
- Safely cleans video recorder heads and all tape contact points to extend the life and enhance the performance of the VCR

Usage: Every 20 hours of VCR use or when dirty or clogged heads are suspected due to bad picture quality. . . . . \$15.99

### Safeguard 8mm Head Cleaner

- Safe, effective cleaning tape and solution will not damage delicate VCR heads, capstan, guides, etc.

Usage: To clean video heads and all tape contact points . . . . . \$15.99

### Safeguard VCR Head Cleaning Solution

- Safe, effective, non-abrasive solution will not damage delicate surfaces in VCR heads, guides, capstan, etc.
- Thoroughly dissolves dust, smoke, and oxide particle buildup

Usage: As replacement solution for Memorex Safeguard System Head Cleaners . . . . \$1.99

### Safeguard Dust-Away Spray

- Safely sprays away dust and dirt that can degrade equipment performance
- Flexible 6" nozzle tube pinpoints spray focus for cleaning accuracy

Usage: To help clean delicate audio and video instruments . . . . . \$2.99

### VHS Dry Head Cleaner

- Convenient, one-step, dry head cleaning system
- Safely and effectively cleans all VHS video recorder heads in 30 seconds

Usage: Every 20 hours or when experiencing loss of video performance . . . . . \$6.99

### VCR Dust Covers

- Soft and pliable vinyl
- Available in three sizes to fit virtually all VHS and Beta machines

Usage: To keep VCR heads, guides, connectors, and switches free of dust, dirt, and debris.

Small; 17" x 3 1/2" x 12" . . . . . \$5.99

Medium; 17 1/4" x 5" x 14 1/2" . . . . . 5.99

Large; 19 1/4" x 5" x 15" . . . . . 5.99

### Safeguard Storage Case

- Consumer pack with label included
- Custom engineered locking system assures maximum protection of videocassettes from the damaging effects of dust, dirt, and debris
- Improved compact design fits into a wider variety of cassette storage systems

- Also available in bulk (no label set) for professional/industrial use

Usage: To protect and store videocassettes. . . . . \$1.49

### Video Label Set

- Relabel videocassettes with these easy peel on/off labels
- 10 Label sets, each with multiple labels for videocassette face and spine

Usage: Identify video recordings . . . . \$1.99

## CABLES/CONNECTORS

### VCR Dubbing Cable

- Push on "F" connectors, 60" long cable is easy to use

Usage: When dubbing a videocassette or to connect VCR to Memorex splitters, switchers, amplifiers, and separators . . . . \$5.99

### Deluxe VHS Dubbing Cable

- Individual audio and video cables
- Easy to use, RCA phone type connectors

Usage: When dubbing between VHS VCRs . . . . . \$11.99

### Deluxe Stereo VHS Dubbing Cable

- Left and right audio channels can be connected for maximum audio/stereo output
- 60" coaxial cables with RCA phono type connectors

Usage: When dubbing between stereo or Hi-Fi VCRs . . . . . \$15.99

### VCR to Audio Connector Cable

- Connects the one audio channel of a VCR to both the left channel and right channel inputs of a stereo audio system for excellent VCR sound quality
- Easy to use RCA phono type connectors

Usage: To connect VCR audio to stereo system . . . . . \$7.99

### Video "F" Coaxial Cable

- Professional quality 95% shielding to minimize external signal interference
- 75 ohm cable impedance matches all video components
- Threaded "F" plugs for secure connection

Usage: For connecting VCR to TV, splitters, antenna input, auxiliary TV, video control switching box, cable channel converters, etc.

3' . . . . . \$4.99

6' . . . . . 5.99

12' . . . . . 7.99

24' . . . . . 9.99

### Two Way Splitter

#### UHF/VHF/FM/Cable

- For interference-free distribution of antenna, cable or VCR signals to up to two destinations
- Rugged zinc diecast housing resists corrosion

# VIDEO ACCESSORIES

Usage: For connecting multiple TV sets, VCRs, cable channel converters, switches, and games . . . . . \$3.99

### Four Way Splitter UHF/VHF/Cable

- For interference-free distribution of antenna, cable or VCR signals to up to four destinations
- Provides high isolation between outputs for lower insertion and return losses
- Rugged zinc diecast housing resists corrosion

Usage: Connects multiple TV sets, VCRs, cable channel converters, switches and games . . . . . \$4.99

### Coaxial Signal Separator

- Coaxial 75 ohm antenna signal separates to twin-lead 300 ohm UHF, coaxial 75 ohm VHF, twin-lead 300 ohm FM inputs
- Use with VCR, TV, and FM stereo

Usage: To separate UHF, VHF, and FM signals when using coaxial input . . . . . \$4.99

### Twin-Lead Signal Separator

- Twin-lead 300 ohm antenna signal separates to twin-lead 300 ohm UHF, coaxial 75 ohm VHF twin-lead 300 ohm FM inputs
- Use with VCR, TV, and FM stereo

Usage: To separate UHF, VHF, and FM signals when using twin-lead antenna input . . \$4.99

### Video A-B Switch

- High isolation — helps eliminate interference between inputs
- Easy pushbutton switch for two video sources
- Rugged diecast construction with threaded "F" type jacks for secure connections

Usage: To choose between two video inputs. . . . . \$9.99

### Video Selector Switch

- Convenient, pushbutton switching system
- Rugged, diecast construction
- Coaxial, high isolation helps prevent interference/ghosting

Usage: To select up to 3 video inputs . . . . \$10.99

10dB Signal Amp . . . . . 14.99

10dB Four Output Amp . . . . . 19.99

Remote Power Amp . . . . . 19.99

Matching Transformer . . . . . 2.99

Matching Univ. Transformer . . . . . 3.99

"F" Cable Coupler . . . . . 1.99

VHS to Beta Adaptor . . . . . 2.99

75 Ohm Terminator . . . . . 1.99

"F" Connectors 4-Pack . . . . . 4.49

# VIDEO PROCESSOR

## ME-888B Digital Video Processor and Standards Converter

- Merlin ME-888B accommodates all world standards, including PAL-N used in Argentina, Uruguay and Paraguay
- Two modes of motion interpolation are now provided, selectable by front panel control
- SECAM output encoder
- Eight-bit resolution — luminance and chrominance
- International television standards conversion
- Time base correction and color correction
- Noise reduction and detail enhancement
- Multistandard synchronization and freeze frame
- Genlock, Doc, Lum/Chrom Delay and Output Fade

In addition to being a bidirectional television standards converter, the ME-888B is also a synchronizer, noise reducer, color corrector, image enhancer, field and frame store and time base corrector.

Designed to the highest multistandard broadcast signal specifications, the ME-888B is capable of handling "worst-case" conditions found in converting standards via videocassette—unstable VTR's disturbed sync, noise generated by "available light" shooting and even multi-generation recordings.

The full range of signal processing controls provides for correction of marginal signals...not only for transfer between standards, but for signal correction within a single standard.

### Specifications

<b>Frequency Response:</b>	(PAL, SECAM, NTSC, 4.4NTSC) $\pm 0.5\text{dB}$ 0 to 3.3MHz, -3dB at 3.5MHz
<b>Input Line Frequency:</b>	$\pm 6\%$
<b>Tolerance:</b>	All SPG outputs are derived from the subcarrier (except 4.4NTSC)
<b>Signal-to-Noise Ratio:</b>	52dB CCIR weighted, flatfield. (Rhode and Schwarz UPSF2 meter) Output luminance stability $\pm 15\text{ns}$
<b>Luma/Chroma Displacement:</b>	Horizontal: 600ns chroma advance, 100ns delay. Continuous adjustment. Vertical: 6 lines chroma advance, 1 line retard
<b>Black Level:</b>	$\pm 150\text{mV}$ continuous adjustment
<b>Noise Reduction:</b>	Temporal recursive filtering with eight selectable threshold levels. Separately selectable coefficients: Luma 0, 6, 9dB Chroma 0, 6, 9, 12dB
<b>Power Supply:</b>	Voltage 99-132V/187-264V (47-440Hz) Consumption Approx. 180W
<b>Weight:</b>	Approx. 42 lbs. (19kg)
<b>Dimensions:</b>	10.5" H x 17.5" W x 16" D (267 x 445 x 406mm) Cabinet is suitable for rackmounting when fitted with side lugs (supplied)
<b>Inputs (75 ohm terminated)</b>	
<b>Composite Video (A &amp; B channels)</b>	
<b>PAL, PAL-M, SECAM, NTSC, 4.4NTSC:</b>	Monochrome 525/60 or 625/50. Level: 1V p-p $\pm 6\text{dB}$ . Continuous adjustment. High and low indicators
<b>D.O.C. (A &amp; B channels):</b>	RF or digital (switch). Levels: RF—0.1V p-p to 1V p-p. Digital—2V p-p pos or neg (switch)
<b>Reference:</b>	Black burst or composite video, 0.3V p-p syncs. PAL, PAL-M, SECAM, NTSC, 4.4NTSC

ME-888B

<b>Outputs (75 ohms)</b>	
<b>Video, Video Monitor:</b>	1V p-p composite. PAL, PAL-M, NTSC, 4.4NTSC
<b>Y-U-V (optional RGB):</b>	0 ~ 1V p-p constant (fully adjustable)
<b>SPG (2V p-p pulses):</b>	Burst gate; mixed blanking; mixed syncs; PAL indent; vertical drive; horizontal drive; black burst (0.3V p-p sync; subcarrier 1V p-p)

T-220 FIT

## T-220 FIT™/Time Base Corrector

The T-220 FIT component digital TBC allows multiformat input selection with simultaneous multiformat outputs from:

- 1/2" or 3/4" heterodyne VTRs • 1/2" professional type M (component) format • 3/4" U-Matic® (Dub) Y688, or Composite Mode

The T-220's input processing control architecture permits standard outputs to be integrated with future developments, such as digital effects. This gives you a clean versatile TBC ready to interface with your component studio.

- Freeze: Vertical interpolator provides clean, crisp pictures • Vari-Trak™: Color to 3X forward and 1X reverse when used with Sony BVU-820 in Dynamic Tracking® mode • Search Performance: A full 40X forward and reverse • Infinite Window TBC: Allows operation with nonservo'd VTRs or Remote VTR feeds • DOC Detector: TTL/RF Selectable with automatic AGC • Plug compatible with Sony U-Matic Series • Also available in PAL B and PAL M

T-220 FIT Format Interchange TBC	\$11,900.00
Interconnect Cable (8') for BVU-820	.250.00
Extender Card	.500.00
Remote Control with 75' cable	1,295.00

Tx2

## Tx2 Time Base Corrector

- Color field identification pulse • RS-170A output in NTSC • Proc-amp controls with presets • Optional remote control • Shuttle to ±40X • 13.5MHz sampling • Available as single or dual TBC • Available in NTSC, PAL B and PAL M • Infinite window TBC • Frame freeze • Interpolated field freeze (field 1 or field 2) • Dub and composite inputs • Component and composite outputs • Noise reduction • Vari-Trak • Drop-out compensator • Standalone sync generator • Genlock

Single Component TBC	\$ 8,995.00
Dual Component TBC	14,995.00
Upgrade from Single to Dual	6,995.00
Extender Card	.500.00
Remote Control	1,295.00
(Dual TBC Controls with 75' cable)	
RGB Output Option	.495.00

# TIME BASE CORRECTORS/ SYNCHRONIZERS

## 300 Series

### Features Common To All Three TBCs

- Wide window • Genlock or standalone operation • Constant RS-170A output in genlock, regardless of reference changes • LED to indicate optimum SCH calibration • Proc-amp controls with presets • Sync and blanking derived digitally for stability and repeatability • Composite or noncomposite outputs • Top access to all circuitry — no extender board required

## T-300 Time Base Corrector

- 35 line memory—handles large gyro errors • Pictures in shuttle to ±5X for rapid editing and previewing of tapes • 3.58MHz subcarrier feedback for wideband video processing • 8 bit 4X subcarrier sampling for transparent performance • Averaging velocity correction for best color performance • Lightweight, low profile, and low power consumption—ideal for mobile or ENG applications

T-300	\$4,995.00
Remote Control with 75' cable	1,295.00
Additional cable	.ft./2.00
Rack Slide Mounting Adaptor	.95.00

## T-320D Time Base Corrector

- Freeze, field 1/field 2 selectable • Vertical interpolator to minimize flicker in freeze • Digital comb filter for improved separation of luminance and chrominance • RF sensing drop-out compensator • Pictures in shuttle to ±40X • Optional Vari-Trak (factory installed) for Dynamic Tracking operation with BVU-820 and BVU-870 • Heterodyne and 3.58MHz feedback modes

T-320D	\$6,995.00
Vari-Trak option (factory installed)	.500.00
Remote Control with 75' cable	1,295.00
Rack Slide Mounting Adaptor	.95.00

## T-320 Time Base Corrector

- 35 H-line window • RF sensing drop-out compensator • Pictures in shuttle to ±40X • Heterodyne and 3.58MHz feedback modes

T-320	\$5,995.00
Remote Control with 75' cable	1,295.00
Rack Slide Mounting Adaptor	.95.00

S-230

## S-230 TBC/Frame Synchronizer

- Selectable field 1, field 2, or full frame freeze • Infinite window heterodyne TBC handles large gyro errors • 8 bit, 4X subcarrier digital design • Steering signal interfaces with optional audio delay corrector • Selectable response to fading signals • Auto mode switching selects TBC or synchronizer mode

S-230	\$13,950.00
Remote Control with 75' cable	1,295.00
Additional cable	.ft./2.00

## S-130 Full Frame Synchronizer

- Full frame storage processes VITs, VIRs and Teletext • Selectable response to fading signals • Excellent hot cut performance • Available in NTSC, PAL B and PAL M TV standards • Internal microprocessor controlled troubleshooting • Manual selection of field 1, field 2 or full frame freeze

S-130 NTSC	\$10,990.00
Remote control with 75' cable	1,295.00
Additional cable	.ft./2.00

# GRAPHICS SYSTEMS

## Ani-Maker and Image Maker Graphics Systems

High resolution 3D graphics, animation and paint—all fully integrated. The user interface is designed by artists, for artists, to help you master this sophisticated graphics system and, whether you are an expert or a beginner, you will create stunning, complex images, in next to no time.

The Ani-Maker is a full feature graphics workstation incorporating 32-bit full color paint, real time RGB frame grab, 3D modeling and animation, internal VTR controller and font generator software

The Image-Maker has all of these features and includes an off-line rendering station.

The standard Ani-Maker and Image-Maker are based on a PC-AT compatible CPU with 80386 microprocessor and math co-processor for optimum rendering speed. Lower cost systems based on the 80286 CPU are also available.

### 3D Modeling and Animation

Simple or complex models can be constructed quickly and easily, with a minimum of keyboard entries. The menu system guides you through the process from sketches, line art or free hand drawing to the finished model. After defining the models, create the paths (trajectories) for the models to follow. Several models can be on a single path, or each model can have its own unique path. Initially, the camera is fixed, but for more complex animation, you can program the camera position, and its point of attention. The result is models, camera and lights, all changing independently during the animation.

### Texture Mapping and Shaders

Phong, Gouraud, metals, reflectance maps, texture maps, solid and transparent surfaces are all standard. Texture maps can be created from scratch in paint, or from a frame grabbed image. All or part of an image can be mapped onto all or part of a model. Anti-aliasing to eliminate the "jaggies" is standard. Select horizontal, vertical, horizontal and vertical, or none, depending on the model.

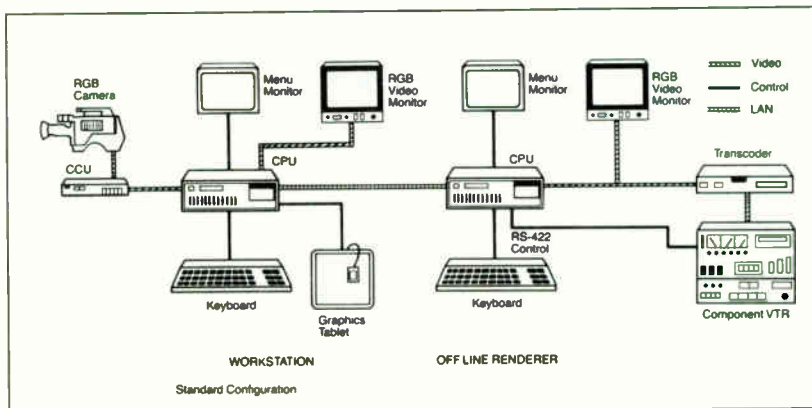

### Metamorphosis

3D shapes, color and transparency can all undergo metamorphosis during an animation. Just define the starting model and the finishing model, and let the system do the in-betweening. Turn a pumpkin into a vase, create a beating heart, or any number of unique transformations.

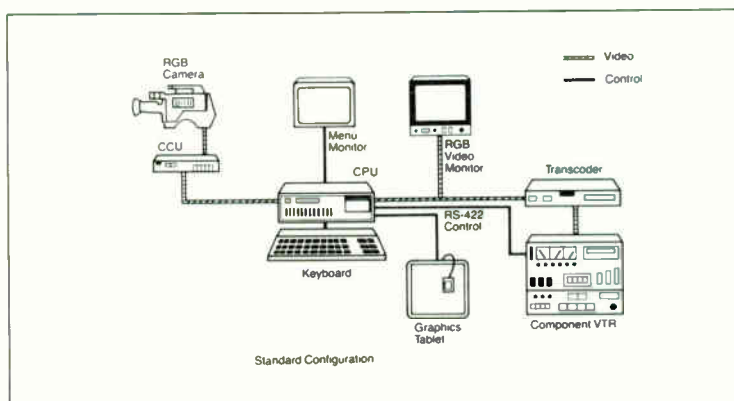

### Preview

You want client approval of a preview, before final rendering is started. Use wireframe preview to check the position and orientation of the models. Or use the fast rendered preview to check lighting and surfaces. You can even afford to try several "what if" previews before committing to final rendering.

## Typical Image-Maker System

## Typical Ani-Maker System

### Off-Line Rendering

With an Image-Maker, your overall productivity at the creative workstation is increased significantly. Completed designs are transferred on the Local Area Network (LAN) to the off-line renderer, freeing up the workstation for the next design. The LAN can also be used to link various combinations of workstations and rendering stations for special applications. An Ani-Maker can be upgraded to an Image-Maker at any time by adding the rendering station.

Each frame is normally rendered to the internal disk drive, and then edited to tape as a sequence. This avoids tying up the VTR during the entire rendering process and eliminates unnecessary wear and tear on the tape deck.

### 3D Fonts and Font Generation

6 vector based fonts are standard with all 3D systems (the paint-only Ani-Maker AM-3 and AM-4 do not have this feature). Use these fonts to create text for subsequent 3D modeling and animation or use the font generator to scale and modify them. You can even create your own custom fonts from a frame grabbed input, or create them free-hand.

### Paint

The 32-bit paint system allows you to create or modify images with the full 16.8 million color spectrum. A complete set of brushes, including variable air brushes, and tools for cut, paste and move, etc. are provided. A set of 2D fonts for titling is standard in the paint system, and anti-aliasing can be turned on or off as required.

# MICROTIME, INC.

FAX: (203) 242-9876

# GRAPHICS SYSTEMS

## Ani-Maker and Image Maker (Cont'd)

### Frame Grab and Video Interface

Hardware and software for real time RGB frame grab are standard. You can capture flat art, stills from a slide chain, or live video from a camera for use as a background, texture map or model outline. Digital matting is also standard. Create a model, matte it over a background and save the composited picture as a new background (all digitally). Keep adding new layers until your project is complete. In addition to frame grabbing, the paint system can matte an image over a live background for post production.

Ani-Maker and Image-Maker video inputs and outputs are RGB. If you have a Betacam or MII video system, just add a component transcoder (available from Sierra Video Systems and other suppliers). If your system is composite NTSC, you will need to add an NTSC encoder, and possibly a decoder (available from Faroudja Labs, and other suppliers).

Serial remote control of a VTR for frame-accurate editing of the finished animation is also standard. The RS-422 controller is built into the system software. The Sony, BVW-40®, BVH-2500®, VO-5850®, and other VTRs can be controlled.

### Film Interface

If your application calls for film output (transparencies, separations, etc.), Ani-Maker and Image-Maker can optionally give you high resolution rendered images. Frames can be rendered by the resolution independent software at standard TV resolution, or up to 8000x8000 pixels, without re-drawing the input. The Matrix PCR/QCR digital film recorder is currently supported for these high resolution formats, with aspect ratios of 2048 x1536 and 4096 x 3072.

### Disk Storage Options

The standard disk drive provides you with the capacity to store backgrounds, texture maps, rendered images, etc. For advanced applications, you may wish to add more storage. A Bernoulli box with removeable 20M byte cartridges allows you to transport data from one site to another. Conventional hard drives can also be added to suit your requirements.

### Specifications

#### Video:

NTSC compatible,  
525 lines per frame,  
30 frames per second, interlaced

#### Inputs:

RGB analog component video 700mV p-p  
Composite sync 4V p-p (75 ohm termination selectable)

#### Outputs:

RGB analog component video 700mV p-p  
Composite sync 4V p-p into 75 ohms

#### Genlock:

If a sync input is provided, the system will genlock to it. In the absence of a sync input, standalone mode is automatically selected

### Hardware Configuration

The hardware supplied will depend on the model ordered as shown below.

Description	IM-1	IM-2	AM-1	AM-2	AM-3	AM-4
80386 CPU, Co-processor and Keyboard	2		1		1	
80286 CPU, Co-processor and Keyboard		2		1		1
1.2M byte Floppy Disk Drive	2	2	1	1	1	1
20M byte Hard Drive*	4	4	2	2	2	2
Graphics Tablet and Puck	1	1	1	1	1	1
32-Bit Frame Buffer	2	2	1	1	1	1
12" RGB Video Monitor	1	1	1	1	1	1
12" Menu Monitor	2	2	1	1	1	1
RS-422 VTR Controller	1	1	1	1	1	1

\* In some systems, a single 40M byte drive may be partitioned into two logical drives.

# VHS-C CAMCORDER

## Master™ Series-C 3300 VHS-C Camcorder With Multi-Dimensional Autofocus System

- Ultra-compact design with easy operation
- Multi-Dimensional Autofocus System
- Dual-area autoexposure system
- Advanced automatic white-balance system, RGB Sensor
- Built-in 6X power-zoom lens
- Playback capability—visual search with memory and still
- CCD high-resolution, color pictures with quick starts and excellent color rendition with no burning
- AE lock
- White-balance lock
- Also features powered manual focus control
- Built-in calendar/clock
- White fade control
- On-screen display
- .7" B/W electronic viewfinder
- Instant review
- SP/EP
- HQ circuitry
- 3-way power
- Compact VHS-C system
- Connects directly to TV sets and dubs any other video source

### Compact VHS-C System

The 3300 is totally compatible with full-sized VHS. Simply record with a VHS-C cassette, then slip into the Cassette Adapter AD-1 to enjoy playback on any full-sized VHS VCR.

### Multi-Dimensional Autofocus System

The Multi-Dimensional Autofocus System is the only autofocus system that can focus from the lens surface (at wide setting) to infinity automatically. Whether your subject moves closer to you or farther away, the system instantly adjusts the focus. Focusing worries are over.

### Built-In 6X Power-Zoom Lens

This wide autofocus range is achieved with a zoom lens controlled by a microcomputer. The zoom lens is so compact that it fits into the body of the camera/recorder. The zoom range is 9mm to 54mm (about 50mm to 300mm in the 35mm SLR format) and you can select two power-zooming speeds for creative versatility. With the tele or wide converters attached, the zoom range is extended and autofocus continues to operate normally. You can easily operate this feature with the zoom/focus control in front of the camera body.

### Standard Accessories

- AC-3300S AC Adaptor/Charger
- AD-1 Cassette Adaptor
- BP-3301 Battery Pack
- EP-2 Earphone
- IC-3000 Video/Audio Input Cord
- OC-3000 Video/Audio Output Cord
- RF-3000S RF Output Adaptor
- SS-M3000 Shoulder Strap
- TC-20SHG VHS-C Videocassette (60 minutes)

Master Series-C 3300

### Options

- AB-3300 Accessory Base—Mounts Tele and Wide Converter Lenses
- BC-2S Car Battery Cord
- CK-3300S Soft Camera Case
- CS-3300S System Case, Hard Molded
- DM-2 Super Directional Microphone
- LT-3300 1.5X Tele Converter (up to 81mm)
- LW-3300 0.65X Wide Converter [5.85mm focal length]
- RC-M3000 Remote Controller

# VHS CAMCORDER

## Master™ Series-V 1400 VHS Camcorder

- High-resolution MOS image sensor—300,000 pixels
- Variable-speed electronic shutter—up to 1/2000 sec.
- Low-light recording down to 7 lux
- Full automatic operation
- 6X power-zoom lens with macro
- Compact and lightweight—just 4.4 lbs.
- Advanced HQ circuitry
- 7 lux
- Dubbing and TV recording
- Instant review and playback
- On-screen display in viewfinder
- Versatile viewfinder—slides to view from either eye
- Self-timer function
- Date recording
- 3-way power source
- Automatic white-balance

The Master Series-V 1400 is a versatile VHS video camera/recorder that gives superior recording quality with its MOS image sensor. It captures movement and action in clear, blur-free detail with its variable-speed electronic shutter—up to 1/2000 sec. Compact and lightweight, the 1400 comes with fully automatic features that make it easy to use. It offers full-size VHS recordings of up to 160 minutes.

### Variable-Speed Electronic Shutter—Up to 1/2000 sec.

The 1400 gives you versatility with five shutter speeds: normal (1/60), 1/120, 1/250, 1/1000 and a high-speed 1/2000 sec. The faster shutter speeds let you record fleeting moments—movement and details that appear as blurs to the human eye and on recordings with conventional camera/recorders. When you record a scene at a fast shutter speed and play it back in slow-motion or still-frame, the details of even the briefest moments are clear and sharp.

### Infrared Autofocus

The active infrared autofocus system makes constant focus adjustments to keep your subject sharp and clear, even in low light. You can choose either continuous autofocus for moving objects or instant autofocus set in manual mode. You can also use powered manual focus in manual mode for great creative effects.

### Autoexposure Control

With fully automatic exposure control, the 1400 continuously adjusts to changes in picture lighting. Exposure compensation is also possible for special lighting conditions, and for fading in or out.

### 6X Power-Zoom Lens with Macro

Select focal lengths from 12mm to 72mm (about 50-300mm in the 35mm format) with the 6X power-zoom. A macro setting gives you sharp focusing of subjects as close as 3/8" from the front of the lens.

### Standard Accessories

- AC-1400S AC Adaptor/Charger
- BP-1001 Battery Pack
- IA-1000 Video/Audio Input Adaptor
- OC-1000 Video/Audio Output Cord
- RF-1400S RF Output Adaptor
- SS-1400 Shoulder Strap
- VA-1 Video/Audio Cord

Master Series-V 1400

### Optional Accessories

- AC-1000S AC Adaptor/Charger
- BP-1002 Battery Pack 2-hour
- CS-1400S System Case
- DM 1 Unidirectional Microphone
- DM-2 Super-Directional Microphone
- OC-1400 Video/Audio Dubbing Cord
- Car Battery Cord

# 8MM CAMCORDER

## Master™ Series-8 8100 8mm Camcorder

- Slim and lightweight design—just 2.4 lbs.
- 1/1200 sec. high-speed electronic shutter
- Low-light recording down to 7 lux
- 1/2" CCD image sensor
- Clean still and slow playback using double-azimuth 3-head system
- Flying erase head
- FM audio recording
- Easy 3-step recording
- Infrared autofocus
- Autoexposure and auto white-balance

## CCD Image Sensor

The 8100's solid-state CCD (Charge-Coupled Device) image sensor gives this camera/recorder high-resolution pictures and excellent color rendition without after-image or burning—plus low-light recording down to 7 lux.

## High-Speed Shutter

The 8100's 1/1200 sec. high-speed electronic shutter lets you capture fleeting moments as never before. So now you can enjoy the briefest moments without the picture being blurred.

## 6X Power-Zoom Lens with Macro

The 8100's zoom lens is a 9-54mm f/1.4 design with macro capability. Two fingertip control buttons let you adjust zoom from wideangle to telephoto. Use the macro setting for incredible close-ups as near as 3/8" from the lens surface.

## Versatile Viewfinder

The 8100's 2/3" black-and-white electronic viewfinder lets you see the scene you're recording, while the on-screen display keeps you informed of important recording information. You can also adjust the viewfinder to a variety of positions, especially useful for low-angle shooting.

## Built-In Calendar

The 8100's built-in quartz calendar lets you record the month/day/year along with your video.

## Instant Review

Push the instant-review button and the 8100 automatically rewinds and replays the last few seconds of your recording in the viewfinder.

## Playback/TV Recording

You can connect the 8100 directly to your TV set for playback. Or use it as a VCR to record from other video sources, like a video-ready TV or another VCR.

## Standard Accessories

- AC-8000S AC Adaptor
- BB-8100 Charger Base
- BP-8001 Battery Pack
- P6-60 8mm Videocassette
- RF-8000S RF Adaptor
- SS-8000 Shoulder Strap
- VA-1 Video/Audio Cord
- Earphone

Master Series-8 8100

## Optional Accessories

- BA-8000S Car Battery Adaptor
- BB-8000 Holds Charger Base
- BP-8002 Battery Pack, 2 hours
- CS-8100S Hard Molded System Case
- DM-1 Unidirectional Microphone
- DM-2 Super-Directional Microphone
- OC-8000 Video/Audio Output Cord
- P6-120 8mm Videocassette, up to 120 minutes
- RC-1000 Remote Controller
- SA-8100 Shoe Adaptor

## Specifications

## VIDEO PRINTER/ COPY PROCESSORS

### P-50U Video Printer and P-61U/P-70U Video Copy Processors

- Instant response • Good image quality • Useful sizes
- Low cost prints • Positive or negative prints • Contrast (light, medium or dark) • Copy button for unlimited copies
- Copies from TVs, VCRs, video cameras, video games and computer screens

P-50U

### P-50U Industrial Video Printer

- Low-cost 57' rolls of thermal printing paper • Print direction can be normal or reverse • Pocket size pictures 3 1/4" x 4" • Can be used with Videotex system • Optional wired remote control • Prints in only 15 seconds • 280 dots (horizontal) • 234 dots (vertical) • Color: gun metal gray

P-50U .....\$390.00

P-51U Same as above except beige and does not print Mitsubishi logo under the photograph .....\$425.00

### P-61U Video Copy Processor

- 3 direction printing (side normal and reverse) • 16' wired remote control from front or rear • Prints in only 17 seconds • 640 dots by 512 lines • AC power receptacle • AC power outlet, unswitched • Sharpness control • PAL full frame • 64 level gray scale • 8-bit parallel Centronics® interface • Print size: 4.3"H x 4.1"V • Image size: 3.9"H x 2.9"V • Underscan • 8 function dipswitch • Color: beige

P-61U .....\$1200.00

P-61U

### P-70U Video Copy Processor

- Print direction (normal, reverse or sideways) • 16' wired remote control • Prints in only 21 seconds • 640 dots by 512 lines • Quasi 64 level gray scale • 8-bit parallel Centronics interface • Print size: 8.5"H x 8.6"V—8.5"V x 11"H • Image size 7.8"H x 5.8"V • Color: beige

P-70U .....\$1400.00

## CONVERTIBLE SOFTLIGHTS

Rugged frame constructed of lightweight high stress aircraft tubing. Convertible design with non-removable soft reflector facilitates instant set up and knock down of fixture. High performance soft reflector coated with easy to clean, ultra high temperature white reflecting surface that resists color temperature shifts associated with conventional painted softlights. Rotating light bar provides ultimate control of light intensity and direction. Lamp reflectors designed for maximum lamp cooling. Wiring operates inside ventilated heat sink channel. Switches removed from lamp housing for cooler operation. Complete line of accessories.

### 2111H 1000W Handy Light

21" 1000W convertible softlight for multiple purpose location or studio operation. Supplied with inline switched 12.5' power cord and choice of plug.

- **Size:** 21" x 18"
  - **Weight:** 11.5 lbs. with cable
  - **Rating:** 8.3A maximum at 1000W. 120/240VAC or DC operation
  - **Cable:** 12.5' 3 conductor #16 AWG SO power cord with choice of plug
  - **Switching:** Single inline switch
  - **Lamp:** Single Tungsten-Halogen lamp
- 2111H .....\$329.00

### 2121H 2000W Handy Light

21" 2000W convertible softlight for multiple purpose location or studio operation. Supplied with inline switched 12.5' power cord and choice of plug.

- **Size:** 21" x 18"
  - **Weight:** 11.5 lbs. with cable
  - **Rating:** 16.6A maximum at 2000W. 120/240VAC or DC operation
  - **Cable:** 12.5' 3 conductor #14 AWG SO power cord with choice of plug
  - **Switching:** Single inline switch
  - **Lamp:** Single Tungsten-Halogen lamp
- 2121H .....\$349.00

### 2111S 1000W

21" 1000W convertible softlight for multiple purpose location or studio operation. Supplied with inline switched 25' power cord and choice of plug. Includes rotating light bar feature.

- **Size:** 21" x 18"
  - **Weight:** 18 lbs. with cable
  - **Rating:** 8.3A maximum at 1000W. 120/240VAC or DC operation
  - **Cable:** 25' 3 conductor #16 AWG SO power cord with choice of plug
  - **Switching:** Single inline switch
  - **Lamps:** Single Tungsten-Halogen lamp
- 2111S .....\$389.00

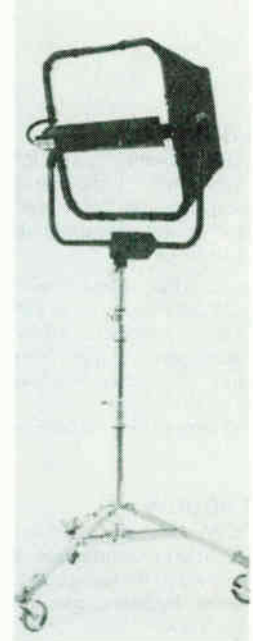

### 2121S 2000W

21" 2000W convertible softlight for multiple purpose location or studio operation. Supplied with inline switched 25' power cord and choice of plug. Includes rotating light bar feature.

- **Size:** 21" x 18"
  - **Weight:** 18 lbs. with cable
  - **Rating:** 16.6A maximum at 2000W. 120/240VAC or DC operation
  - **Cable:** 25' 3 conductor #14 AWG SO power cord with choice of plug
  - **Switching:** Single inline switch

### 2821S 2000W

28" 2000W convertible softlight for multiple purpose location or grid operation. Supplied with inline switched 25' power cord and choice of plug. Includes rotating light bar feature.

- **Size:** 28" x 24"
  - **Weight:** 21.5 lbs. with cable
  - **Rating:** 16.6A maximum at 2000W. 120/240VAC or DC operation
  - **Cable:** 25' 3 conductor #14 AWG SO power cord with choice of plug
  - **Switching:** 2 inline switches
  - **Lamps:** 2 Tungsten-Halogen lamps
- 2821S .....\$555.00

### 2841G 4000W

28" 4000W convertible softlight with rotating light bar for multiple purpose location or studio operation. Single 60A flush mount grounding pin plug provided for single circuit operation. Requires 0083 or 0083P header cable. Header cable not included in base price.

- **Size:** 28" x 24"
  - **Weight:** 18.5 lbs. without cable
  - **Rating:** 33.3A maximum at 4000W. 120/240VAC or DC operation
  - **Cable:** 1 25' 3 conductor #8 AWG SO header cable attachable to 60A flush mount grounding pin plug at switch box required.
  - **Switching:** 2 switches mounted in permanent switch box attached to pivoting yoke
  - **Lamps:** 2 lamps, individually switched
- 2841G .....\$745.00

### 2842G 4000W

28" 4000W convertible softlight with rotating light bar for multiple purpose location or studio operation. Two 20A flush mount grounding pin plugs provided for two circuit operation. Requires two 0143 or 0143P header cables. Header cables not included in base price.

- **Size:** 28" x 24"
  - **Weight:** 18.5 lbs. without cable
  - **Rating:** 33.3A maximum at 4000W. 120/240VAC or DC operation
  - **Cable:** 2 25' 3 conductor #14 AWG SO header cables attachable to 2 20A flush mount grounding pin plugs at switch box required
  - **Switching:** 2 switches mounted in permanent switch box attached to pivoting yoke
  - **Lamps:** 2 lamps, individually switched
- 2842G .....\$769.00

# SOFTLIGHTS

## 3541G 4000W

35" 4000W convertible softlight with rotating light bar for multiple purpose location or studio operation. Single 60A flush mount grounding pin plug provided for single circuit operation. Requires 0083 or 0083P header cable. Header cable not included in base price.

- **Size:** 35" x 30"
- **Weight:** 22.5 lbs. without cable
- **Rating:** 33.3A maximum at 4000W. 120/240VAC or DC operation
- **Cable:** 1 25' 3 conductor #8 AWG SO header cable attachable to 60A flush mount grounding pin plug at switch box required
- **Switching:** 2 switches mounted in permanent switch box attached to pivoting yoke
- **Lamps:** 2 lamps, individually switched

**3541G** ..... \$850.00

## 3542G 4000W

35" 4000W convertible softlight with rotating light bar for multiple purpose location or studio operation. Two 20A flush mount grounding pin plugs provided for two circuit operation. Requires two 0143 or 143P header cables. Header cables not included in base price

- **Size:** 35" x 30"
- **Weight:** 22.5 lbs. without cable
- **Rating:** 33.3A maximum at 4000W. 120/240VAC or DC operation
- **Cable:** 2 25' 3 conductor #14 AWG SO header cables attachable to 2 20A flush mount grounding pin plugs at switch box required
- **Switching:** 2 switches mounted in permanent switch box attached to pivoting yoke
- **Lamps:** 2 lamps, individually switched

**3542G** ..... \$875.00

## 3561G 6000W

35" 6000W convertible softlight with rotating light bar for multiple purpose location or studio operation. Single 60A flush mount grounding pin plug provided for single circuit operation. Requires 0063 or 0063P header cable. Header cable not included in base price.

- **Size:** 35" x 30"
- **Weight:** 22.5 lbs. without cable
- **Rating:** 50A maximum at 6000W. 120/240VAC or DC operation
- **Cable:** 1 25' 3 conductor #6 AWG SO header cable attachable to 60A flush mount grounding pin plug at switch box required
- **Switching:** 2 switches mounted in permanent switch box attached to pivoting yoke
- **Lamps:** 3 lamps with center lamp switched independently of two outboard lamps

**3561G** ..... \$960.00

## 4281G 8000W

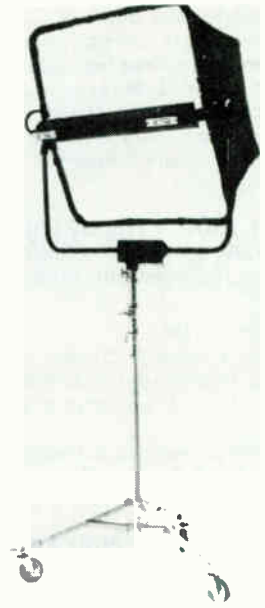

42" 8000W convertible softlight with rotating light bar for multiple purpose location or studio operation. Single 100A flush mount grounding pin provided for single circuit operation. Requires 0043 or 0043P header cable. Header cable not included in base price.

- **Size:** 42" x 36"
- **Weight:** 27 lbs. without cable
- **Rating:** 66.6A maximum at 8000W. 120/240VAC or DC operation
- **Cable:** 1 25' conductor #4 AWG SO header cable attachable to 100A flush mount grounding pin plug required
- **Switching:** 4 switches mounted in permanent switch box attached to pivoting yoke
- **Lamps:** 4 lamps, individually switched

**4281G** ..... \$1395.00

3561G

4281G/4282G

## 4282G 8000W

42" 8000W convertible softlight with rotating light bar for multiple purpose location or studio operation. Two 60A flush mount grounding pin plugs provided for two circuit operation. Requires two 0083 or 0083P header cables. Header cables not included in base price.

- **Size:** 42" x 36"
- **Weight:** 27 lbs. without cable
- **Rating:** 66.6A maximum at 8000W. 120/240VAC or DC operation
- **Cable:** 2 25' 3 conductor #8 AWG SO header cables attached to 2 60A flush mount grounding pin plugs required
- **Switching:** 4 switches mounted in permanent switch box attached to pivoting yoke
- **Lamps:** 4 lamps, individually switched

**4282G** ..... \$1449.00

## 4284G

Similar to 4282G except 4 20A flush mount grounding pin plugs provided for four circuit operation. Requires four 0143 or 0143P header cables (not included).

**4284G** ..... \$1469.00

# LIGHTING EQUIPMENT

Designers and manufacturers of specialized lighting equipment for motion picture, still and television studios. Products include: Solarspots®, HMI Solar-Arcs, HMI Solar-Arc Solarspots® and Brute Molarcs®, Molequartz® Molefays®, Molecools®, Molepars®, Softlites, Nooklites, Broads, Cyc-

Strips, Scoops, Pattern and Spot Projector Lighting Equipment, AC and DC Generators, Power Distribution, Microphone Booms and Perambulators, Grip Equipment, Special Effects, AC/DC Dimmers, Globes, Carbons, Acetate, Gelatine and Supplies.

## 2801 Mini-Mole Solarspot

A small, rugged Solarspot that can be focused from spot-to-flood with an even field. Used in the Motion Picture and Television Studios and Still Photography as a key-light, back-light or kicker.

Its small size makes the Mini-Mole adaptable to mounting on a camera as a camera light.

Quartz Tungsten-Halogen or Incandescent globes, available from 50 to 250W. The top of the fixture opens up and back for easy access to the globe.

2801 Head . . . . . \$143.00  
 2801 (Stg. Plug) Head . . . . . 165.60

4691

2801

## 4691 Litewate Brute Molearc

Designed to be used with the 9" and 6¾" negatives.

A lightweight high intensity arc light with matchless performance, designed for quick moves and ease of handling, especially in locations.

Unsurpassed as a daylight booster and a single source light. For use as a keylight or fill light with a smooth even field from spot-to-flood.

Carbons are available for matching daylight (white flame carbons) and for studio or night location shooting (yellow flame carbons).

4691 Head . . . . . \$13,895.00

## 5541 Molequartz Nine-Light Molefay

Designed for daylight booster when using the new quartz tungsten-halogen Dichroic FAY globes.

Lightweight and compact. Ideal for exterior fill light and for hard to get to or confined areas. By directing this lamp through a windshield or window, boosting of daylight can be achieved. Pivoted globe modules permit varied beam coverage. Converged for maximum light intensity of overlapping beams, or diverged for a broad, smooth field.

Individual globe switches are provided for intensity control without changing color temperature.

Each globe individually held in a globe retainer which mounts directly to the modules. Equally as useful indoors or at night when used with 3200°K quartz globes.

5541 Head . . . . . \$659.00

5541

4411

## 4411 Eight-Tube Molescent

The Molescent light fixture is a must for adding front fill light to the overhead fluorescent lighting while filming in color.

The Molescent fixture was designed to accept a wide variety of fluorescent lamps to match the available light in a store, schoolroom, office or factory.

There are two switches that control the light to half or full intensity. Available in kits.

4411 Head . . . . . \$597.50

4023

## 4023 Molegator Grip with Socket

Multipurpose fixture for studio, location, or remote use.

Lightweight and compact, it can be used as a fill light or floodlight in interiors of cars, buses or airplanes or any area where there is a minimum of space and a clamp-on-light is needed.

Fixture can be rotated or tilted to any position desired.

4023 . . . . . \$64.25  
 4023 (Stg. Plug) . . . . . 86.85

- 2 4022 Molegator Grip
- 2 5603 Molepac Litewater Stand
- 1 5567 Carrying Case (empty weight 14 lbs.)  
(Globes not included in kit)

7471 .....\$1206.75

## 1391 Baby Size Low Stand

A sturdy but shorter version of the standard size Baby Stand, except with one extension.

- Mounting: 5/8" dia. standard spud • Extensions: 1 • Low: 20" • High: 33" • Folded for Storage: 18 7/8" • Weight: 11 1/2 lbs. • Finish: Baked maroon enamel • Caster Size: 3"

1391 .....\$145.00

## 3431 Double Riser Junior Size Stand

All aluminum heavy-duty low location stand. Extension leg extends to a level position on uneven ground.

- Mounting: Accepts 1 1/8" dia. yoke pin • Extensions: 2 • Low: 30 1/4" • High: 57 1/2" • Folded for Storage: 39 3/4" • Weight: 9 3/4 lbs. • Finish: Clear anodized aluminum • Caster Size: None

3431 .....\$272.00

## 500403 Adjustable Hanger

A streamlined and rugged hanger available in a variety of lengths for hanging Scoops, Broads or Spots in TV studios or other pipe hung applications.

Easily adjustable from minimum to maximum length from pipe grid. A variety of adaptors are available for hanging fixtures one at a time or in multiple.

500403 (3') .....\$108.15

Note: The 500403 is available in lengths to 16'.

## 1971 Windmachine Moleffect®

The Windmachine was designed to create maximum air-flow with minimum noise for Hollywood sound stage use. A rheostat control varies the speed of the fan to produce wind effects from a light zephyr to a stiff breeze. This Moleffect is useful not only for routine wind effects, but also for dispersing snowflakes, creating a localized dusty breeze, etc. Radial vanes columnate air-stream; vanes may be removed for wide dispersion. At high speed the fan may be used to cool or ventilate a set or to clear smoke. The unit sets on the floor or mounts on a stand.

1971 .....\$1825.00

## 3851 Molepower® Wet Cell Battery Pack and Charger Kit

A truly portable power supply for the cameraman or lighting man on the run. Designed to give you up to 4,000W of power at 120VDC.

Comes in two separate cases for portability and ease in handling.

Jumper cable connects the two battery cases in series electrically. Special Molepower battery charger for convenience in recharging battery pack. For use in car, trucks, buses or the out of the way locations where there is no power and booster lighting is needed.

3851 .....\$3372.20

## 19619 Fog Juice (Water Type)

Used with the 1963 Fogmaker Moleffect to create the effects of fog, smoke, haze and mist. Adds a realistic element to a scene depicting a room of dense smoke from a fire, or a room of haze from cigarette smoke. Low lying fog obtained when using the 1967 Cooler with dry ice. Available in 55 gallon drum, case of 6 gallons, gallon or quart.

19619 .....gal./\$29.80

## VERTICAL RACK SYSTEM

### SERIES 100 Vertical Rack System

The Series 100 Vertical Rack System is designed to house 19" rack mounted equipment up to 24" in depth. Rack openings are 19-3/16" with 17-25/32" clearance between rails to handle slightly oversized equipment which does not adhere to the EIA RS-310-C rack standard. All rack rails are manufactured from heavy duty 10 gauge steel and are fully drilled and tapped for 10-32 screws eliminating the need for captive nuts and clips. Decorative black rack screws and protective washers are also available.

The Series 100 is based on our rugged 16 gauge tubular steel framework covered in a tough polyester resin-based substrate and finished in durable plastic laminate. All front and rear edges are trimmed in solid hand-selected oiled oak or walnut giving the look and feel of fine hand-crafted furniture with a contemporary styling.

Removable rear doors with top and bottom black anodized ventila-

tion screens are optionally available. Rear rack rails are also available for cabinets that will house large pieces of equipment which require rear support or rack slides. These rack rails are the same high-quality black anodized tapped steel rails that are used in the standard rack cabinets. The addition of rear rack rails also includes our adjustable mounting system so the depth of the rear rails can be easily changed.

Optional flat or sloped counter assembly may be added to these rack systems at the time of order. Counter is covered in matching plastic laminate with solid oak or walnut trim and has 14" of rack space per bay. The flat counter consumes 2 rack spaces in vertical height while the sloped counter requires 4 rack spaces. The standard knee clearance for either countertop is 25-9/16". 24-1/2" of rack space is available below the counter of each bay. Counters must be installed at the factory and can be retrofitted to existing vertical racks at an additional charge.

Consult factory for details regarding special configurations, pricing and delivery.

#### COUNTER ASSEMBLY

	1 BAY	2 BAY	3 BAY	4 BAY
Flat Counter	\$249.90	\$326.55	\$404.25	\$480.96

# PRODUCTION CONSOLE SYSTEM

## SERIES 500 Production Console System

The Series 500 Production Console Systems are ergonomically designed for user comfort and are suitable for most editing and production requirements. Flat console countertop is 19-1/2" deep and 28-3/16" above the floor for comfortable desk height seating. The Series 500 features 14" of rack space (8 rack units) per bay above countertop and can house equipment up to 24" deep. Rack openings are 19-3/16" with 17-25/32" clearance between rails to handle slightly oversized equipment which does not adhere to the EIA RS-310-C rack standard. All rack rails are manufactured from heavy duty 10 gauge steel and are fully drilled and tapped for 10-32 screws eliminating the need for captive nuts and clips. Decorative black rack screws and protective washers are also available.

The Series 500 is based on our rugged 16 gauge tubular steel framework covered in a tough polyester resin-based substrate and finished

in durable hand-selected oiled oak or walnut giving the look and feel of fine hand-crafted furniture with a contemporary styling.

Removable rear doors with top and bottom black anodized ventilation screens are optionally available. Rear rack rails are standard for consoles that will house large pieces of equipment which require rear support or rack slides. These rack rails are the same high-quality black anodized tapped steel rails that are used for front mounted equipment. The rear rack rails also feature our adjustable mounting system so the depth of the rear rails can be easily changed.

Up to 24-1/2" of rack space (14 rack units) is optionally available below countertop to house switcher power supplies, etc. Adjustable rear rack rails are optional for rack space below countertop.

Custom consoles can be manufactured to almost any desired size and configuration. Consult factory for details regarding special configurations, pricing and delivery.

# VCR HOUSING SYSTEM

## SERIES 1000 Portable VCR Housing System

The Series 1000 Portable VCR Housing System meets the need for 1/2" and 3/4" VCR editing systems by providing space efficient, aesthetically pleasing mobile cabinetry. The Series 1000 is available in two configurations. The Type A housing system was designed for front loading rack mounted 3/4" VCRs up to 24" deep while the Type B system is oriented to house top loading 1/2" and 3/4" VCRs in a configuration that facilitates easy access during editing sessions. Front surface is sloped back to allow viewing VCR controls and to change cassettes. Each Type B VCR tray is 28" wide by 18" deep and is mounted on velvet-glide slides rated at 100 pounds per tray. The Series 1000 comes complete with four heavy duty casters for mobility and rear cabling access.

Rack openings for the Type A System are 19-3/16" with 17-25/32" clearance between rails to handle slightly oversized equipment which does not adhere to the EIA RS-310-C rack standard. All rack rails are

manufactured from heavy duty 10 gauge steel and are fully drilled and tapped for 10-32 screws eliminating the need for captive nuts and clips. Decorative black rack screws and protective washers are also available.

The Series 1000 is based on our rugged 16 gauge tubular steel framework covered in a tough polyester resin-based substrate and finished in durable plastic laminate. All front and rear edges are trimmed in solid hand selected oiled oak or walnut, giving the look and feel of fine hand-crafted furniture with a contemporary styling.

Removable rear door with black anodized ventilation screen is optionally available. The Type A system also features rear rack rails to secure rack slides common to most rack mounted VCRs. Rear rails also include our adjustable mounting system so the depth of the rails can be easily changed.

Consult factory for details regarding special configurations, pricing and delivery.

### SERIES 1000 TYPE A PORTABLE VCR RACK SYSTEM

SIZE RACK SPACES	BASE UNIT	REMOVABLE REAR DOOR

# VERTICAL DUPLICATION SYSTEM

## SERIES 1100 Vertical Duplication System

The Series 1100 Vertical Duplication System fulfills the need for space efficient aesthetically pleasing duplication racks. The Series 1100 features sliding trays 19" wide and 16" deep, mounted on 14" velvet-glide slides rated to carry 100 pounds per tray. The standard vertical spacing between trays is 10-1/2 inches.

Standard 19" rack space is optionally available to house time base correctors, monitors, etc. in the same duplication rack. Rear rack rails are also available for rack-furnished systems that will house large pieces of equipment which require rear support or rack slides. The addition of rear rack rails also includes our adjustable mounting system so the depth of the rear rails can be easily changed. Rack openings are 19-3/16" with 17-25/32" clearance between rails to

handle slightly oversized equipment which does not adhere to the EIA RS-310-C rack standard. All rack rails are manufactured from heavy duty 10 gauge steel and are fully drilled and tapped for 10-32 screws eliminating the need for captive nuts and clips. Decorative black rack screws and protective washers are also available.

The Series 1100 is based on our rugged 16 gauge tubular steel framework covered in a tough polyester resin-based substrate and finished in durable plastic laminate. All front and rear edges are trimmed in solid hand-selected oiled oak or walnut giving the look and feel of fine hand-crafted furniture with a contemporary styling.

Optional removable rear doors with top and bottom black anodized ventilation screens are also available.

Consult factory for details regarding special configurations, pricing and delivery.

# VIDEO PRESENTATION SYSTEMS

## 710 7" Color Monitor/Receiver with VHS Player

• 2-head VHS player (HQ) • 3-way power AC/DC • 19 lbs. • 3-speed playback 2, 4, 6 hour • Forward and reverse visual search • Automatic rewind • Programmable replay function • Earphone jack • Wireless remote control • 12" H x 11" W x 11<sup>3</sup>/<sub>4</sub>" D • NTSC color, 250 lines resolution

710 ..... \$1275.00

## 718-MM 7" Color Monitor/Receiver w/8mm Recorder/Player

• Integrated 8mm player/recorder • 250 lines resolution • Visual search, freeze frame • Color monitor/receiver offers VHF/UHF reception • LP (playback only), SP • 3-way power • Audio/video, RF out • AC, DC and car battery • Automatic tracking • 14.8 lbs. — 10<sup>1</sup>/<sub>2</sub>" H x 9<sup>1</sup>/<sub>2</sub>" W x 10<sup>1</sup>/<sub>2</sub>" D

718-MM ..... \$1450.00

1018-MM Same features as 718-mm except 10" ..... \$995.00

## 784LW 7" Color Monitor/Receiver w/VHS Recorder/Player

• 4 head VHS recorder/player • Freeze Frame, Search, and Slow Motion • AC/DC operation • Audio/video and RF output for hook-up to external monitor or TV • UHF/VHS reception • 19 lbs. • 11<sup>1</sup>/<sub>2</sub>" H x 8" W x 12" D

784LW ..... \$1450.00

## 984S 9" Color Monitor/Receiver w/VHS Recorder/Player

• 4 head VHS recorder/player • Freeze Frame, Search, Slow Motion • Remote control • Audio/video and RF output for hook-up to external monitor or TV • AC/DC operation • UHF/VHF reception • 24<sup>1</sup>/<sub>2</sub> lbs. • 15<sup>1</sup>/<sub>2</sub>" H x 10<sup>1</sup>/<sub>2</sub>" W x 12<sup>3</sup>/<sub>4</sub>" D

984S ..... \$1425.00

## 1010 10" Color Monitor w/VHS Player

• 2 head VHS deck, with HQ (High Quality) feature • 3 speed playback — 2, 4 and 6 hour play speeds • SP, LP-SLP • Forward and reverse visual search • Automatic repeat • Wireless remote control • 250 lines resolution • RF out • Audio/video out • 24 lbs. • 14<sup>1</sup>/<sub>2</sub>" H x 11" W x 11<sup>1</sup>/<sub>4</sub>" D

1010 ..... \$1140.00

## LDV-1208 12" Monitor w/8" Laser Disc Player

• High resolution • Full function remote control • Uses one or two sided 8" laser discs • Unit controls and laser disc loading slot are concealed behind a flip-down door for protection • Operates on a 117/120VAC current • May be connected to an external monitor or television

LDV-1208 ..... \$1795.00

## 1310 13" Color Monitor w/VHS Player

• Automatic front load VHS player • 250 lines resolution • Automatic rewind • Continuous run • 3-speed automatic playback (SP, LP and EP) • Forward and reverse search function in play mode • Front door to conceal controls • RF and composite video outputs • 42 lbs. • 19" H x 15" W x 15<sup>1</sup>/<sub>4</sub>" D

1310 ..... \$895.00

MPOP 1300 Monitor, playback only, continuous run electronic message generator ..... \$1095.00

MPOP 1300T Monitor, playback only, continuous run electronic message generator w/timer ..... \$1115.00

## VHS-1990R

### 19" Color Monitor/Receiver w/VHS Recorder/Player

• Front load VHS recorder/player • Wireless remote control • UHF/VHS reception (cable ready) • 4 program, 2 week programmable recording • 79 lbs. • 21<sup>1</sup>/<sub>2</sub>" H x 19<sup>3</sup>/<sub>4</sub>" W x 19" D • Continuous run

VHS-1990R ..... \$1045.00

# DISTRIBUTION AMPLIFIER/REMOTE CONTROLLER/TRANSMITTERS

## DA-108 Distribution Amplifier

- Compact single-rack-unit brushed metal housing • 8-out video, 8-out stereo audio • Solderless jumpers provide additional flexibility in selecting nominal gain settings and input/output configurations • High signal-to-noise ratio 115dB, 20Hz-20kHz • High input impedance 100K ohm balanced • Low output impedance, 75 ohms  $\pm$  0.5% allows for extended unbalanced low-level cable runs • Entire chassis assembly slides out to allow ready access • Convenient front panel test points or trims • Frequency response (audio):  $\pm$  0.1dB, DC to 30kHz, -3dB at 100kHz • Frequency response (video):  $\pm$  0.1dB, 10Hz-5MHz, +0.1dB, -0.2dB, 5MHz-8MHz, +0dB, -0.5dB at 10 MHz

The DA-108 is a high quality video/stereo audio distribution amplifier designed to drive up to eight duplication VCRs or slave DAs. It provides each with separate 75 ohm video and 33 ohm audio outputs. The audio circuitry provides extremely low noise and distortion signal paths for use with high fidelity recorders and digitally mastered audio sources.

DA-108 . . . . . \$1150.00

DA-108

## SUC-408 Duplicon 8 Serial VCR Remote Controller

- Eight isolated serial outputs for command and control communication to the recording VCRs • Single status feedback interconnection to the initial VCR in the system • Eight pushbuttons on the front panel allow selection of the operating modes for the VCRs • Sets all recording machines to identical functions simultaneously • Illuminated buttons • Daisy-chain expansion capability option • Loop-through capabilities

SVC-408 includes OC-D8 cable . . . . . \$960.00

Duplicon 8 Controller

Rear Panel

## Transmitters

### DRC-120-12 Transmitter

- 20 illuminated and relegendable pushbuttons • Functions as the operator's control panel in the machine control environment • Eight function buttons on the front panel directs operating commands (play, stop, fast forward, rewind, pause, hi-fi, record, eject) to the other system tributaries down line • 12 numerically identified buttons are used to select the banks of VCRs which will receive and respond to the operating commands • Illumination patterns of the pushbutton lamps (unlit, lit or flashing) indicate processing status to the operator

DRC-120-12 . . . . . \$2150.00

### DRC-120-20 Transmitter

- 20 buttons used for bank delegation in the machine control system • PRC-138 permits entering the function commands to the delegated banks

DRC-120-20 . . . . . \$2150.00

### PRC-138 Passive Remote Control Panel

- Accessory for the DRC-120-20 transmitter • Expands the number of pushbuttons by eight, thus allowing the delegation of up to 20 banks of VCRs from the front panel of the DRC-120-20 transmitter • Connects via a 25-pin D-connector cable to its corresponding DRC-120-20 transmitter and is enabled through DIP switch settings on the transmitter's IOB • DRC-120-20 supplies the operating voltage for its ancillary PRC-138

PRC-138 . . . . . \$460.00

### DRC-120Q Controller

- 20-button transmitter used in the quality control system • Provides VCR functions and individual bank and VCR select • Allows the operator five rack selects and eight machine selects for both switching and control • Six transport function controls (stop, play, rewind, fast forward, eject, hi-fi) and auto • Automatic sequencing option

DRC-120Q . . . . . \$2500.00

# MYCOMP TECHNOLOGIES CORP.

Telex: 85-5065 FAX: (714) 545-3487

# RECEIVERS/EXPANSION BOX/ BUS CONTROLLER/INTERFACE

## DRC-202 Two Channel Receiver

- Three-fold purpose in a machine control system environment:
  - Receives commands sent by the transmitter
  - Acts upon those commands by applying the appropriate signals to its output pins to directly or indirectly control the slave VCRs
  - Relays confirmation back to the controlling transmitter that the commands were received
- Equipped with 2 machine control output connectors on back panel, both of which may be independently addressed and controlled
- Each output connector is normally attached to one or more EB-308 expansion boxes, each of which may be connected to as many as eight VCRs
- May control two banks of machines, each bank consisting of one or more racks
- Housed within a single rack unit high brushed metal package
- Standard back panel connectors
- Four thumbscrew disconnects for access to the dual-board electronics assembly
- No front panel operator controls on these modules
- Illuminated power switch on the rear panel functions as a power-on indicator

**DRC-202** ..... \$1480.00

## DRC-208 Modular Receiver

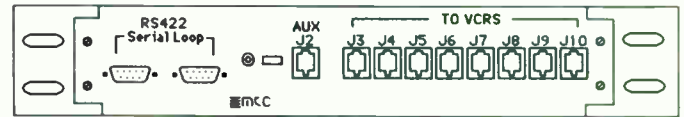

- Used within the Bidrex machine control system
- Accepts command transmitted over the RS422 line from the transmitter, acts upon those commands by sending the appropriate messages to the attached VCRs and relays operating status back to the controlling transmitter
- Eight separately addressable and independently controllable output connectors on the backplane are designed to be connected directly to the eight VCRs which they will control
- Modular receivers return full machine status to their respective transmitters and also provide full error reporting via their digital displays and alert lamps
- Digital display
- Two recessed incremental/decremental pushbuttons used for bank identification
- Illuminated fault/reset button

**DRC-208** ..... \$1120.00

## EB-308 Expansion Box

- Contains the circuitry to allow a single input signal from the two-channel receiver within the machine control environment to fanout into eight output signals
- Serves to prevent an electrical overload of the system lines
- Through eight 15-pin D connectors on its rear panel, each EB-308 in the system can be interfaced to eight duplicating VCRs/
- Can also be daisy-chained together thereby permitting a command to be issued to several racks of VCRs simultaneously
- Housed in a single rack unit high brushed metal case
- Powered by the system but a dedicated power connector is available on the rear panel should an auxiliary power supply be necessary
- To control the operating functions of 1/2" and 3/4" parallel remote control VCRs with Dupicon 8 requires adding expansion boxes to the duplicating system
- One single rack unit high expansion box can interface to a maximum of eight parallel VCRs of the same type through the 15-pin male D connectors on its back panel

**EB-308** ..... \$525.00

**MODULAR RECEIVER REAR PANEL**

**MODULAR RECEIVER FRONT PANEL**

## DRC-001A Bus Controller

- Regulates all communication traffic on the RS422 network by continuously polling all other connected devices within the system and forwards messages between them
- Polling sequence is able to identify any new receivers brought online since the last polling and to download the operating program to those units automatically
- Performs various housekeeping tasks
- Issues status reports on system activity to the optionally installed personal computer within the Bidrex system
- Two separate boards, a central processor board (CPB) and a memory expansion board, contained within a single rack unit high brushed metal housing comprise the bus controller's circuitry
- No operator controls on the unit except for an illuminated power switch on its rear panel which also functions as the power-on indicator

**DRC-001A** ..... \$1160.00

## DRC-301A Routing Switcher Interface

- Serial-to-serial translator which resides on the machine control system's RS422 line
- Accepts and encodes bank delegation commands as well as operating instructions from specially configured transmitters into crosspoint closure commands to the online routing switcher
- Central Processor Board (CPB) and a Serial I/O board (IOB) contain the on-board logic and I/O circuitry necessary to establish and maintain communication between the routing switcher and the machine control system
- Operating programs for the routing switcher interface can be custom designed for each system and are resident on EPROM within the device
- Allows for program signals to be routed automatically to VCR banks through the DRC-120 20-button transmitter. DRC-600 required

**DRC-301A** ..... \$1400.00

## Cables

### General Use Machine Control Cables

**IC-201/205** 1' and 5' interconnect cables used in all MTC machine control systems between receivers and controllers. 9-pin DF to 9-pin DM sericon cable . . . . . \$55.00  
**IC-301/305** 1' and 5' interconnect cables used to interconnect expansion boxes. 15-pin DM to 15-pin DF sericon cable . . . . . 55.00  
**IC-338/25P** Used to interconnect remote control panel to its complementary transmitter. 25-pin DM to 25-pin DF. . . 65.00  
**IC-338/15P** Used to interconnect a remote control panel or a duplicon 8 to an expansion box in parallel VCR systems. 25-pin DM to 15-pin DF . . . . . 55.00

### QC Switcher System Cables

**AICQ-108-RH/LH** Input cable assemblies for right and left channel hi-fi audio, 8 standard lengths to accommodate for VCRs positions in rack . . . . . \$55.00  
**AICQ-108-RN/LN** Input cable assemblies for right and left channel normal audio. . . . . 55.00  
**ICA-101/105** 1' and 5' video interconnect cables, used to interconnect audio switcher modules and the audio in port of the first VCR . . . . . 45.00  
**ICV-101/105** 1' and 5' video interconnect cables, used to interconnect video or RF switcher modules and the video in port of the first VCR. . . . . 15.00  
**MIC-3XX/#** 20-pin Hirose to 20- or 34-pin Hirose parallel cable used to connect VCRs to the multi-channel receiver in each QC rack. 8 standard lengths accommodate for VCRs position in rack (#). XX signifies VCR model number. For installation convenience, this cable is also available as a harness assembly . . . . . \$55.00

### Bidrex Serial Machine Control System Cables

**CK368/370** Cable kit allowing internal wiring of Bidrex boards in specific VCR models (Sony SLO1800, Panasonic AG6810S, JVC BR7000UR). . . . . \$20.00  
**BMU-CKA, CKB** Analog monitoring cable kit for video, RF, audio signals and framing pulse  
**BMU-CKA** 1 RF, 2 audio, 1 FG pulse . . . . . 20.00  
**BMU-CKB** 2 RF, 4 audio, 1 FG pulse. . . . . 25.00  
**OC-200/#** Shielded, 6 conductor modular telephone type cables in 8 standard lengths to accommodate VCRs position in rack (#): connects slave VCRs to 8-channel modular receiver outputs . . . . . 10.00  
**OC-200/H** Harness of 8 above cables designed to facilitate installation . . . . . 90.00  
**IC-232/XX** Connects customer's PC to Bidrex Computer Interface module; XX = length to 50' maximum. . . . . 60.00

### Special Purpose Cables

**OC-D8** 25-pin D to 34-pin Hirose cable provides power and status connection between Duplicon 8 and the initial VCR in a serial VCR system; included with unit at shipment . . . \$65.00  
**EBYC-D8-34P/20P -A "Y"** cable used with parallel VCRs to interconnect the Duplicon 8, the expansion box and the initial parallel VCR control and status reporting . . . . . 95.00  
**OCA-100/H** or **OCV-100/H** Audio or video output cable harness assemblies used with distribution amplifiers to permit audio or video signals to be sent to 8 VCRs in rack. . . . . 85.00  
**ICA-10X-1** Audio interconnect cable for DA-108 provides 9-pin DM connector at DA and dual RCA or XLR connectors to VCRs for balanced audio signals . . . . . 45.00

## ACC-01 Automatic Cassette Changer

- Individual cassette change cycle completes in less than 15 seconds
  - Single motor driven mechanism with electronic monitoring of applied torque to prevent damage to machines and cassettes
  - Fault/Reset button permits local fault reset when the changer is installed within Bidrex machine control system
  - Monitors VCR recording with front panel illuminated record indicator
  - Cycle lamp remains steadily lit during normal operation; a malfunction during loading or unloading triggers a flashing signal on this indicator, instantly alerting the operator to a problem
  - Eject button allows local control of eject function for maintenance purposes
  - VHS format
  - Mounts on the face of the duplicating VCR
  - Allows automatic loading and unloading of up to four video cassettes
  - Variable sized upper and lower hoppers, there is no need to reconfigure your facility to meet a static sized changer
  - Installation requires no modifications to the VCR, however, minor modifications to the VCRs machine control cable may be necessary
  - 9-pin male D connector on the changer's side panel has flexible pinouts permitting multi-purpose interconnects
  - Power: 12VDC, supplied by VCR
- ACC-01** VCR mounting bracket included . . . . . \$425.00

# CONTROL SYSTEMS

## Sericon Parallel Machine Control System

With Sericon, MTC offers a basic building block machine control system that allows you to get started economically...but with the potential to expand quickly and effortlessly when you're ready. The MTC packaging simplifies maintenance and the controls are easy to learn by even inexperienced operators.

With a Sericon System you can easily delegate the banks required for a job and reconfigure them quickly for the next pass from the convenient front panel pushbuttons of the transmitters.

During system operation the bus controller continuously polls all the modules on the Sericon line and forwards all necessary messages between the appropriate devices. The polling sequence begins with a query to the transmitters for their function and delegation keypresses. A built-in software feature prevents any keypresses from being lost should two transmitters respond simultaneously which, because of the finite time element involved, is unlikely. A delegation command causes the bus controller to update its delegation tables, to alert the transmitters to make the delegation assignments and to inform the optional routing switcher interface to change the audio and video crosspoints in the routing switcher to reflect this activity.

An active receiver returns to an immediate response to the bus controller confirming its receipt of the delegation command. No response alerts the bus controller that the receiver is not online. Each of these eventualities is immediately reflected in the illumination patterns of the transmitter's pushbutton lamps. If an operating command is sensed, the Bus Controller sends this message to the appropriate receivers for the delegated banks which then relay the command to the VCR's under their control. In the interim, the bus controller looks for any delegation

DIAGRAMS ABOVE SHOW THE VARIOUS MTC MODULES WHICH CONSTITUTE THE SYSTEM. IF REQUIRED, A ROUTING SWITCHER INTERFACE MAY BE ADDED TO THE LOOP.

changes or alterations in the status of transmitters which could affect delegation. It then triggers messages to these devices to update their lamps to reflect these changes for easy operator referral. The bus controller's polling routine next checks the receivers sequentially through their bus addresses to ascertain which banks are online. The polling sequence concludes with the bus controller's determining which transmitters are online by addressing each in turn until reaching the maximum number set by the system. The bus controller then loops back to the beginning to repeat the polling sequence. An entire polling sequence of the Sericon machine control system takes less than 150ms to complete.

## Unicon Multiple Control/Distribution System

The Unicon System combines the features of three of MTC's most popular products...Bidrex Machine Control, QC switcher and audio/video distribution amplifier...to create a universal control package for the cost-conscious video duplicator. MTC designed and built Unicon to provide maximum control in minimum space.

The heart of the Unicon System is the MCDS833 console, a compact two-rack unit high device housing a distribution amplifier, video and audio switcher modules, a modular receiver and a power supply module. The MCDS833 console offers universal control with integrated signal distribution, remote machine control and automated quality control and switching built-in. One console is installed in each eight-machine rack. Each MCDS833 package interfaces to eight Bidrex modified VCRs via the modular receivers separately addressable and controllable output connectors which permit individual machine control, analog signal monitoring and status feedback. Front panel LEDs and a digital display keep the operator apprised of on-going system activity. The distribution amplifier circuitry within the MCDS833 console provides each VCR with 75 ohm video and 33 ohm audio outputs. Front panel test points and trims allow adjustment of audio output signal levels, video quality and high frequency signals.

Local monitoring stations at each bank permit automated quality control checking of all completed tapes at the end of each recording pass, precluding the need to relocate the completed tapes to a separate QC area.

The auto QC sequencing option, cycles through all machines under control of the monitoring station, permitting even more efficient quality control. Selecting the pass check button on the local controller initiates an analog monitoring sequence at the end of the recording pass to assure all cassettes meet established signal levels. This 30-second test occurs simultaneously in all machines within the bank and any failing tapes are automatically ejected.

MCDS833 (Front Panel)

(Rear Panel)

The flexible Unicon System is expandable to 60 banks of five 8-machine racks...2400 VCRs.

The single master control station within the Unicon System requires an IBM PC, used for machine delegation and continuous status reporting. The bus controller is responsible for monitoring all communication traffic on the system's RS422 lines. The transmitters/controllers, system assigned to specific source VTRs, are used to input function commands to the delegated banks. A universal pass check can be implemented for all completed tapes from the front panel of the transmitters. The E-E check permits the technician to measure the signal levels being received by the individual VCRs to assure maximum quality in the completed tapes.

# CONTROL SYSTEMS

## Quality Control Switching System

The QC Switcher system can supervise up to five racks or eight VCRs and comprises four units, any of which are available also as standalones:

### Switching Frame (QCS-XX)

In addition to the power supply, each frame can hold up to six switching modules of any configuration selected to meet the user's needs. The individual switching modules include:

- 8 x 1 stereo audio module (QAM-01)
- 8 x 1 video/RF module (QVM-01)

The versatile design allows mixing and matching of these modules for customizing of the QC station. There are no operator controls on the switching frame except for the power switch on the rear panel. The front panel features power-on indicator lamps for both the audio and video power supplies. The audio and video levels are internally trimmable and are adjusted to unity at the factory prior to shipment. Looping output connectors on all modules within the frame create a possible 128 x 8 matrix with negligible signal deterioration. MTC's design assures high module-to-module isolation necessary for low level signals. One switching frame resides in each QC rack.

### Multi-Channel Receiver (DRC208A3)

The Multi-channel Receiver offers eight parallel output connectors to allow separate assignment and control of VCRs from the front panel of the system controller. Switching can be done in the vertical interval or randomly. One Multi-channel Receiver is required for each QC rack. The system also requires one Modular Receiver (DRC-208) at the monitoring station. A digital display on its front panel gives instant verification of machine selection and on-going QC operation and also provides failure statistics to the operator.

### QC Controller (DRC1200)

This twenty-button controller allows the operator five rack selects and eight machine selects for both switching and control, six transport function controls (stop, play, rewind, fast forward, eject, hi-fi) and auto, an automatic sequencing option. Installed in the monitoring station, a single controller provides the control panel for the entire QC system.

### Bidrex Serial Machine Control System

- Delegates, controls and monitors from 1 to 60 banks of duplication VCRs assigned to a maximum of ten source VTRs from a single command center
- Provides ongoing status feedback to the system and the PC which displays constant updates during system operation
- Monitors up to seven analog signals from the slave VCRs and during the post-duplication pass check (performed simultaneously on all completed tapes) ejects any cassettes failing to meet predefined standards
- Automatically rewinds all cassettes at insertion
- Monitors each VCR's E-E signals to check the video and audio signal levels being received by each individual machine

QC Switcher Front Panel

Back Panel

- Expandable...once the basic system is in place, additional modules may be very easily added as production increases
- Flexible...machine delegation patterns can be assigned different pass numbers, stored in memory and retrieved as necessary, allowing for instant changeover in machine assignments to meet varying requirements

In the Bidrex System, the PC screen gives the technician instant data on the delegation information and on the progress of the recording pass.

The innovative component responsible for the unique aspects of the Bidrex System is the Bidrex modular board itself. Connected directly to the modular receiver, one of these PCBs interfaces to each VCR in the system and performs complete remote transport function control and status feedback. It also acts as a data acquisition device for monitoring and analyzing all audio and video analog signals including the RF waveforms from the scanning heads as well as any stereo audio phase errors. This data is sent to and compiled by the receiver which acts appropriately upon any error report and relays the information to the computer for status updating.

# ALL PURPOSE CARTS

## TK-150 Travel Carrier

- Large 11 1/2" x 9 1/2" steel base
- Ideal for soft luggage
- Patented "one-motion" opening and closing feature
- Double telescopic self-locking rods
- Can be pushed or pulled when loaded
- Weighs 4 1/2 lbs., supports up to 150 lbs.
- Extended height 41", collapses to 18 5/8"
- Carry-aboard feature
- High quality 4" rubber wheels
- Elastic cords permanently attached
- Wheel guard for added protection
- Handsome carry case included

TK-150 .....\$ 79.50

TK-154 with extra rear wheels .....102.50

## TK-300 Travel Carrier

- Heavy-duty model for large loads
- Sturdy, double telescopic self-locking rods
- Large 12 1/2" x 16" steel base
- Patented "one motion" opening and closing feature
- Load can be pushed or pulled
- "Step Glide" feature for easy access over stairs and curbs
- Weighs only 12 lbs., supports up to 300 lbs.
- Extended height 49", collapses to 20 1/8"
- Fits easily under airline seat
- 6" ballbearing wheels with solid rubber tires
- Elastic cords permanently attached
- Wheel and Mud guard for added protection
- Optional zippered carrying case available

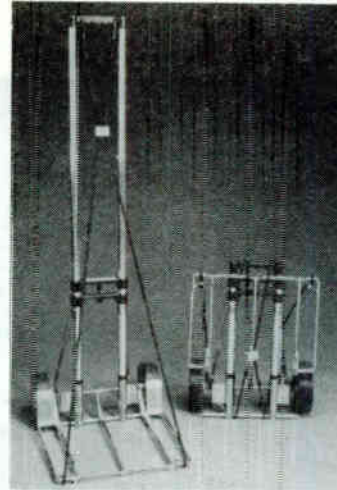

TK-300 .....\$ 115.95

## TK-400 Travel Carrier

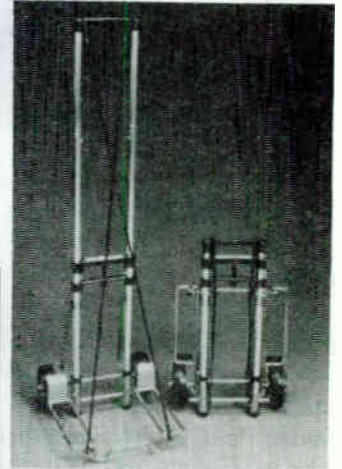

- Big 300 lbs. load capacity
- Can be used as a 2 or 4 wheel cart—all weight is on the wheels, no load on the arms, just push or pull
- Patented design back-support swivel-bearing caster wheels for added stability
- Sturdy 6" pneumatic rubber rim front wheels
- Sturdy, double telescopic self-locking rods
- Large 12 1/2" x 16" steel base
- Patented "one-motion" opening and closing feature
- Back-support caster wheels easy to extend and close
- "Step-Slide" feature for easy access over stairs and curbs
- Mud guards for added protection
- Weighs only 17 lbs., and supports up to 300 lbs.
- Extended height 49" collapses to 20 1/8"
- Fits easily under an airline seat
- Elastic cords permanently attached
- Optional zippered carrying case available

TK-400 w/extra rear wheels .....\$ 126.95

CB-100/200 carry bag .....24.95

TK-300

TK-150

TK-400

## TK-500 Production/Travel Carrier

- Upper removable platform 18" x 15" expands to 18" x 33" — 70 lb. capacity
- Lower platform with adjustable tilt—12 1/2" x 16"
- Total load capacity — 300 lbs.
- Sturdy 6" pneumatic rubber rim wheels
- Patented "one-motion" opening and closing feature
- "Step-slide" feature for easy access over stairs and curbs
- Mud guard for added protection
- Locking rear wheels
- Extended height 49" — collapses to 20 1/8"
- Elastic cords permanently attached
- Includes additional equipment straps
- Shipping weight fully assembled — 26 lbs.

Across town or across country the TK-500 will handle that special production job with ease.

Easily removable upper platform allows the TK-500 to be converted to a 300 lb. capacity luggage carrier and yet this beauty folds easily to fit under an airline seat.

TK-500 w/removable shelf .....\$236.00

AC-500 accessory basket .....33.00

# TEST CHARTS/SLIDES

Accu-Slides

Accu-Chart

## Accu-Chart™ Set

Video Test Chart System for Field and Studio use includes: Color Chart, Logarithmic Reflectance Chart, Resolution Chart, Registration Chart, Linearity Chart.

**ACC-2** Set of 5 charts with cover and pouch . . . \$117.50

## Individual 9" x 12" Charts

### Gray Scale Chart

Basic standard for setting light response characteristics of cameras. Essential for balancing R, G and B channels in 3-tube color cameras. Chart consists of 2 sets of 9 neutral gray patches on uniform gray background. Reflectances vary from 3% to 60% according to EIA Logarithmic (2) Law. Dead black (R 0.5%) patch establishes black level.

**AC-GS** Gray Scale . . . \$34.95

### Color Reference Chart

A subjective reference chart for checking color rendition. Consists of three primary (Red, Green, Blue) and three secondary (Yellow, Cyan, Magenta) plus 4 gray levels. In color bar format, but not intended for quantitative use. Use to evaluate overall system color reproduction by comparing transmitter image with original chart. Also for use as a field standard; record image of chart at beginning of each tape and adjust monitor on playback for proper color rendition.

**AC-CR** Color Reference. . . \$34.95

### Linearity Chart

Standard EIA "Ball Chart" for adjustment of camera and monitor linearity. Use with electronically generated grating test pattern for quantitative measurements as specified in EIA RS-170

**AC-LN** Linearity . . . \$19.95

### Resolution Chart

For evaluation of frequency response of video systems. Adapted from EIA standard chart, includes resolution targets for 200 to 800 TV lines in center and at four cor-

ners. Also, test objects to detect ringing and streaking. Continuous neutral gray background for shading adjustments.

**AC-RS** Resolution . . . \$19.95

### Registration Chart

Similar to EIA standard chart, used primarily for registration of 3-tube color cameras. Black square grid on white background includes 200-600 line resolution wedges and circular targets for evaluation of linearity.

**AC-RG** Registration . . . \$19.95

### Mini-Charts

Includes: Color Reference, Registration and Logarithmic Reflectance Chart. All charts are 4 1/2" x 6" pattern size

**MCS-1** . . . \$59.95

### Accu-Slides™

Provides the same accuracy for use with Telecine set-up and alignment as the standard Accu-Chart system. Accu-Slides are available in either a positive or negative image. They are mounted in a 2" x 2" glass protected format which is supplied with approved pin registered television mounts and anti-Newton ring optical glass. The Accu-Slideset consists of the same five test patterns as the Accu-Chart set and comes in a custom designed wooden box. Accu-Slides are also available individually.

### Accu-Slides

**Test Slides, available as positive or negative**

**AS-ST** Set of 5 slides complete with wooden box . . . \$80.00

### Individual Slides

**AS-RG** Registration . . . \$11.00

**AS-RS** Resolution . . . 11.00

**AS-LN** Linearity . . . 11.00

**AS-CR** Color Reference . . . 11.00

**AS-GS** Gray Scale . . . 11.00

**WB-1** Wooden Box, holds total of 7 slides . . . \$39.00

# MEDICAL VIDEO CASSETTE RECORDER

## NVS-6255 Wideband Video Cassette Recorder

- Provides every functional convenience for Medical Imaging Procedures
- Automatic Noise-Bar Elimination Circuit  
When going from the play mode to pause the noise-bar automatically positions itself into the vertical blanking for a perfect still frame picture
- Interchangeability  
The recordings made on this machine can be played back on any other  $\frac{3}{4}$ " cassette U-matic player. Of course, there will be loss of resolution
- Tape Transport  
A specially patented system has been developed to allow the recorder to remain in the stop mode indefinitely without head or tape wear; yet the recorder is available for data recording in less than 300ms. This results in a minimum amount of picture disturbance between scans. It also minimizes the patient exposure to the X-rays
- Electronic Counter  
An electronic counter, which counts in minutes and seconds, is included. The counter retains its memory even when power is turned off. Automatic rewind to "0" is standard if so selected
- Video Bypass  
In any mode except play, video is routed through a special bypass circuit so that the full bandwidth of the X-ray system is available for real time diagnostic work. The bypass circuit activates when power is removed from the machine as well

## Specifications

### Power

Requirement: 120V, 50/60Hz, 140W

Dimensions: 22.1H x 56.4W x 47.1Dcm

Weight: 67.3 lbs. (30.6kg)

Operating Temp.: 40°F to 104°F (5°C to 40°C)

Tape Type:  $\frac{3}{4}$ " standard cassette KCA-60

### Video:

Record Time: < 300ms

Playback Time: < 500ms

Signal-to-Noise

Ratio: > 46dB

### Horizontal

Resolution: 3dB at 400 lines (5MHz)

### Limiting

Resolution: > 450 lines

### Audio:

2 Channels

Input Line: -20/0dBs, 10K ohms, balanced

Input Line: -20dBs, 600 ohms, load, low impedance, balanced

Signal-to-Noise

Ratio: > 48dB (at 3% distortion level)

Frequency

Response: 50 to 15,000Hz

Options:

Full function remote control including variable search forward or reverse

Scan Rates: 525, 875, 1023 and 1049 Line System

NVS-6255 . . . . . \$11,500.00

**Transmitter**

**Receiver**

**DFP-840 Telephone Video System**

- Accepts and transmits a component signal from Betacam VTR without picture degradation
- No picture degradation even for standard NTSC signal by way of direct encoding system
- Built-in data modem which meets CCITT Rec. V29 and V27 ter. to transmit the data in 9600/7200/4800/2400 bps
- Automatic selection of data transmission speed in accordance with the quality of a transmission line being used—Automatic fall back system
- Free from data error by adopting HDLC standard protocol
- Transmission of high quality picture in a short time by way of the NEC exclusive information reduction system called HO-DPCM
- Two field memory in transmitter to send first picture while loading second picture
- Standard two field memory at receiving end can be expanded up to four field memory
- Built-in freeze processing circuit at receiving end to output complete NTSC signal which has four field sequence, even if input signal at transmitting end is composite

The DFP-840 Telephone Video System captures and stores field or frame information of a component video signal from Betacam VTR or a standard NTSC signal from color camera, and transmits it via the Direct Distance Dialing (DDD) network or a leased line. The picture quality at the receiving end is so excellent that this system is suitable even for broadcast application.

Electronic News Gathering (ENG) in the broadcasting industry is getting popular and indispensable with the introduction of Camera-VTR combo systems. The DFP-840 makes it possible to transmit the ENG material obtained from any remote area to central broadcast station via any existing telephone line.

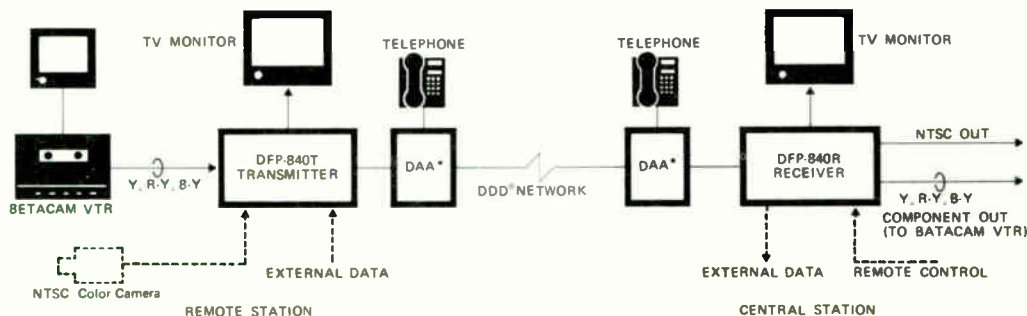

Security/Surveillance means keeping an eye on a multitude of on-site locations. The DFP-840 provides economical monitoring of plants, power stations, traffic control areas, airports—anywhere that visibility is vital and in-person patrolling is difficult and costly. Medical communications demand quick examination of X-rays, microscopy, specimen image transmission and other live camera data. The DFP-840 handles vital remote diagnosis, often in minutes or seconds. Manufacturing is a visual process. From blue prints on the drawing board to full-color images of finished products or parts, the DFP-840 can give you profitable, eye-to-eye 3-dimensional communication throughout your manufacturing operations.

**Specifications**

<b>Transmitter</b>	
<b>Input Video Signal:</b>	Composite NTSC Signal: 1V p-p, 75 ohm or Component Analog Signal Y: 1V p-p, 75 ohm; R-Y/B-Y: 0.7V p-p, 75 ohm

DT-2680A

## DT-2680A 26" Digital Monitor/Receiver

- PIP—Picture in a Picture feature lets you watch two TV programs at once or freeze any picture you see on the inset screen at the touch of a button. As many as three different still pictures (together with a live one) can be displayed and shifted to the desired corner at one time • Black-stripe "Square 90" CRT with 110° deflection • Full range of picture controls • Digital comb filter for more than 500 lines horizontal resolution • Full function remote control • On-screen display • Quick view function for switching between channels • Sleep timer • Return function • RGB input for personal computer • Cable ready tuner with 142-channel capability • Complete set of input/outputs

DT-2680A .....\$1799.00

## KX-2750A 27" Console TV/Monitor

- 27" square planar screen • Comb filter for 500 lines of horizontal resolution • 166-channel cable-capable quartz PLL synthesizer tuner • MTS decoder for stereo TV and SAP sound • Comprehensive on-screen display • Total remote control, complete with picture controls • Connection for 3 video inputs and 1 video output • "Quick View" function to shuttle between two channels • Two built-in timers • Stereo amp with 10W + 10W power output • "Sound Wide" for simulated stereo • 2 antenna inputs for VHF and cable • 1 antenna input for UHF • Switching regulated power supply ensures a perfectly centered, steady picture • Automatic "kine" bias control for optimum white balance

KX-2750A .....\$1299.00

## CT-3000S 30" Square Tube Component TV with MTS

- Jumbo 30" square tube with tinted screen • Comb filter—horizontal resolution of 560 lines • Fully cable-capable tuner • Built-in MTS decoder for stereo sound and SAP • Stereo amp, stereo speakers and "sound wide" • Multi-function "system" remote control • Comprehensive on-screen display • Connections for 3 video inputs and 1 video output • "Quick view", 24 hr. on-timer, 180 minute sleep timer • S-input for S-VHS VCR • Switching regulated power supply • Automatic kine bias control for best white balance

# TIME BASE CORRECTORS

## NOVA Series Digital Time Base Correctors

All NOVA time base correctors give you optimum performance for a wide variety of applications using 3/4" and 1/2" video tape recorders. Each of the 1 3/4" high extruded aluminum packages includes the following features:

- Presets for the front panel controls
- Digital, full color dropout compensation (DOC)
- Twenty times forward and reverse shuttle operation
- A test mode which applies a color bar signal to the video output
- Black burst output from a built-in sync generator for locking up SEG's, character generators, etc.
- Remote control capability that provides all front panel controls except power on/off and phasing controls found behind the adjusting slot. Dimensions: 3 1/2" H x 8 1/2" W x 4" D
- 8-bit, 4X subcarrier sampling for maximum transparency
- Perfect RS170A relationship regardless of reference SCH
- Digital clamp for the most stable performance
- Low power consumption for long, trouble-free operation

### NOVA 620

#### Full Frame of Memory

Offers full frame of video storage to instantly freeze a field or frame for special effects. Time base correct even non-capstan servo type VTRs. Also includes a comb filter for maximum picture quality.

NOVA 620 ..... \$5990.00

### NOVA 620S Full Frame S-VHS TBC

Same as 620 with S-VHS input processing

NOVA 620S ..... \$6490.00

### NOVA 511

#### 32 Line Memory

Offers 32 line memory and heterodyne or direct operation. Designed for time base correcting both 3/4" and 1/2" capstan servo VTR's. Also includes a comb filter to heighten picture quality.

NOVA 511 ..... \$4990.00

### NOVA 501

#### 32 Line Memory

Offers 32 line memory and direct operation (subcarrier feedback). An ideal time base corrector for VTR's which accept a derived subcarrier input. Also provides maximum picture bandwidth.

NOVA 501 ..... \$4490.00

### NOVA 700 Time Base Corrector

• 32 line video memory for twice the "window" of conventional time base correctors

- Fifteen times forward and reverse shuttle operation
- Heterodyne picture processing
- 8-bit, 4X subcarrier sampling for maximum transparency
- Perfect RS 170A output with digitally generated SCH
- Digital processing amplifier and clamp for stable, repeatable operation
- Low power consumption for long, trouble-free operation

NOVA 700 ..... \$3490.00

### NOVA 700S Time Base Corrector

Same as 700 with S-VHS input processing.

# VIDEO/AUDIO DIGITAL MIXER

VAM2000

## VAM2000 Digital Video/Audio Mixer

The PPD VAM2000 is the first video mixer to let you combine any three video sources to do dissolves and wipes without special VTR's or the need for any other units.

Previously, to wipe or dissolve between two VTR's (Video Tape Recorders), you needed special VTR's, Time Base Correctors for each machine, and a common sync generator connected to all the units and the SEG (Special Effects Generator). The VAM2000 accepts three unsynchronized video inputs from VCR's, cameras, or any other combination of video sources, and combines them with each other without the need for sync generators or TBC's.

The VAM2000 uses custom high-speed digital IC's to do glitch-free digital freezes, spectacular variable rate "strobe freezes", and it can "freeze to the beat" of audio from any one of its 4 stereo audio inputs.

A large, long throw "T-Bar" allows complete user control for clean dissolves and wipe patterns, including vertical, horizontal, and corner wipes. These can be a combination of any one of the three video inputs with another, or with a background of white, black, or a color chosen by joystick from an almost infinite palette of hues.

Stereo balance and gain controls for each of four audio inputs are on the front panel along with an A/B audio bus fader, illuminated mono, stereo, manual fade, and "audio follow video" select switches which are conveniently located for easy single-user operation. In the "audio follows video" mode, the A and B buses for the audio—as well as the video—are smoothly faded as the large "T-bar" style lever is moved from A bus to B. Separate external video and audio effects loops are front panel switchable for maximum flexibility.

Three video inputs, with three corresponding preview monitor outputs, and three main video outputs, all with BNC connectors, are located on the back panel along with all audio input and output jacks. It is housed in a 19" rackmountable enclosure.

The PPD VAM2000 is designed for video nightclubs, video post production work, A/V production houses, Veejay (Video Jockey) systems, cable TV stations, college, industrial and private TV studios.

# THEATRICAL MAKE-UP

**Face Powders** Light textured, yet ultra-absorbent. Less powder is required to "set" and absorb excess oil since our creme makeups feel "non-oily". The convenient shaker bottles make application easy and economical.

**Fair Translucent** General Purpose powder to complement fair and olive skin tones for straight, beauty, or old age makeups.

**Neutral Set Translucent** A special powder to set bright colors or special effect designs. It retards perspiration where applied.

**Coco Tan Translucent** 1 3/4 oz. 3 1/4 oz. A golden-rust tint designed for black actors.

**Super White Powder** Use this powder to set any type of white makeup. It contains white pigment to make whites brighter.

- |                      |        |
|----------------------|--------|
| TP 1 3/4 oz. . . . . | \$3.25 |
| TP 3 1/4 oz. . . . . | 4.75   |

**Clown White** Amateur and professional clowns alike love our formula. It is very opaque, easily applied and resists wear caused by heat and perspiration. Set with Super White Face Powder. Removes easily with Makeup Remover.

- |                        |        |
|------------------------|--------|
| CW-1 .65 oz. . . . .   | \$1.75 |
| CW-3 2 1/4 oz. . . . . | 3.00   |
| CW-4 8 oz. . . . .     | 6.50   |

**Rainbow Wheel** .1 oz. Six brilliant creme lining colors essential for designing clowns, animals, or fantasy.

- |          |        |
|----------|--------|
| Fire Red | Black  |
| Green    | Blue   |
| Orange   | Yellow |

**RW** . . . . . \$6.50

**Red White & Black** .1 oz. Perfect for mime or clowning. The Creme White base is light textured, but opaque. The red has a tint of blue, and the black ideal for outlining or shading.

**RB** . . . . . \$6.00

# BEN NYE CO., INC.

For Special Effects: Liquid Latex, Stage Blood, Silver Gray Hair Color, Nose & Scar Wax, Spirit Gum, Stipple Sponges, FX Color Kit: Bruises.

FK-1 . . . . . \$59.95

**Stage Blood** Realistic "arterial" color and viscosity. Peppermint flavored, and safe to digest. Completely cleans from most costumes.

SB-4 2 oz. . . . . \$ 3.50  
SB-5 8 oz. . . . . 8.00  
SB-6 18 oz. . . . . 12.00  
SB-7 32 oz. . . . . 20.00

**Thick Blood**

TB-1 1 oz. . . . . \$ 4.00  
TB-2 6 oz. . . . . 15.00  
TB-3 1 lb. . . . . 27.50

**Gelatin Blood Capsules** Fill this extra large capsule with our Stage Blood for release in mouth.

GB-1 10 Pack . . . . . \$1.95  
GB-2 35 Pack . . . . . 4.95

**Bronzing Body Tint** Designed for an instant natural looking tan. The color is ruddy-golden. Water-resistant.

BT-1 2 oz. . . . . \$ 3.50  
BT-2 8 oz. . . . . 8.50  
BT-3 18 oz. . . . . 15.00

**Makeup Remover** Light liquid quickly removes any type of makeup. It has an orange peel scent.

MR-3 2 oz. . . . . \$ 2.75  
MR-4 8 oz. . . . . 7.00  
MR-5 18 oz. . . . . 10.00

**Brush Cleaner** Fast drying cleaner instantly removes any "oil" base makeup from brushes, and dries in seconds. One ounce cleans 75 brushes.

BC-1 2 oz. . . . . \$ 3.00  
BC-2 8 oz. . . . . 7.00  
BC-3 16 oz. . . . . 10.00

**Latex Sponge Applicators** For any creme or "grease" style makeup. Each 3" x 4" foam rubber block can be divided into eight sections. Keep fresh in an airtight bag.

LF-1 . . . . . \$ 1.25  
LF-2 Dozen Pack . . . . . 13.50

# THEATRICAL MAKE-UP

**Bald Cap Stipple Wheel** A special four color palette of basic shades to texture the bald cap for extreme realism.

EW-9 . . . . . \$8.50

**Nylon Stipple Sponge** 3" x 4" Block. Use to simulate capillaries, pock marks, bruises, sunburn, beard stubble or old age stippling. Can be divided into eight sections.

NS-1 . . . . . ea./\$ 1.00  
NS-2 Dozen Pack . . . . . 10.00

**Velour Powder Puff** Large 4" diameter puffs made of soft velour, and padded so makeup won't be disturbed.

VP-1 . . . . . \$ 1.25  
VP-2 . . . . . 13.50

**Custom Flat Brushes** Works like red sable, but costs a lot less. Professional length handles are easy to grasp and store.

FB-2 No. 2 - 1/8"                      FB-7 No. 7 - 1/4"  
FB-3 No. 3 - 3/16"                      FB-10 No. 10 - 11/32"  
FB-5 No. 5 - 5/32"                      FB-12 No. 12 - 3/8"  
FB . . . . . \$2.75 - 4.25

**Red Sable Round Brushes** The two smaller sizes are excellent for applying our water-color Cake Eye Liners. The larger brushes make application of the Pressed Eye Shadow, and Pearl Sheens easy.

No. 1 - Fine Point                      No. 4 - Medium Point  
No. 2 - Small Point                      No. 6 - Wide Point  
RS . . . . . \$3.00 - 5.00

**Lash/Eyebrow Comb** Combination brush to separate the eyelashes after applying mascara, and to comb the eyebrows.

EC-1 . . . . . \$2.75

**Dry Rouge Brush** Excellent for spreading dry rouge easily. Professional size can be used to remove excess face powder.

RB-1 Short handle . . . . . \$2.00  
RB-2 Professional Camel hair . . . . . 6.00

**Duster Brush** Brush designed to dust away excess face powder. May be used to apply dry rouge.

PA-1 . . . . . \$12.00

# CAMCORDER/ VIDEOLITES

### VX-802 Movie 8, 8mm Camcorder

- Two-speed 1/500 sec. and 1/1000 sec. electronic high-speed shutter
- Advanced Piezo auto focus system • Improved 1/2" CCD imaging device • Sleek construction • Easy-to-use • 2.6 lb. • Record two full hours of colorful, picture-perfect videos on a single, pocket-size 8mm cassette • Playback directly through a TV set or through the camera's 2/3" black and white electronic viewfinder • Autofocus can be overridden manually • Two user selectable autofocus zone modes, manual focus, and focus lock for further creativity • 6X power zoom lens has a focal length range of 9mm to 54mm at the touch of a button. This is the equivalent of a 35mm to 210mm zoom on a 35mm camera • Macro setting allows effective close-ups • Auto exposure • Automatic white balance and two programmed white balance positions • Low light shooting capability of 7 lux • Three video heads reproduce colorful, detailed images in standard playback, and jitter-free stills when the frame is frozen, or when advanced frame by frame • Flying erase head produces smooth, clear transitions between scenes or when editing in special effects • Insert button makes editing in scenes from another video source as easy as pressing a button • High resolution pictures • High-fidelity sound reproduction • Two rotary audio heads (FM system) produce a wide dynamic range with minimum interference • Uni-directional microphone is switchable to normal or high sensitivity • External microphone jack is provided

**163-802** VX-802 Movie 8, 8mm Camcorder with CCD Image Sensor, Autofocus 6X f/1.2, Power Zoom Lens, High Speed Electronic Shutter, VF-BA82 AC Adaptor, VF-RM7 Remote Control, VF-BP81 Battery Pack, Shoulder Strap . . . . . \$1750.00

## Omnimount Mounting Systems

- Capacity to 225 lbs. in six series
- Wall or ceiling mounting
- Omni-directional movement
- Through the assembly wiring (except 25 series)
- Can be mounted to the back, bottom, top, or sides of object
- Unlimited versatility

Omnimount products have been specified and installed safely and productively for many years. Laboratory data from structural testing has been combined with field experience to set weight range guidelines. And with the extraordinarily varied applications and installations you have with Omnimount products, it is important to be fully aware of those guidelines. Further, since the uses are "limited only by your imagination," creatively unexpected applications are being added all the time. The more familiar you become with Omnimount assemblies, the more uses you're likely to find for them.

The heart of the Omnimount System is a patented ball and clamp assembly. It works with a variety of tube lengths and bend configurations, brackets, mounting plates, pipe adaptors, and accessories—all in very many sizes and load handling capabilities.

## Model Number Information

The series number and code numbers combine to make a model number as shown below.

Series Numbers tell the weight range

- Series 25** 0-12 lbs.
- Series 50** 6-20 lbs.
- Series 75** 15-40 lbs.
- Series 100** 35-70 lbs.
- Series 300** 50-125 lbs.
- Series 500** 95-225 lbs.

First letter code identifies the type of mount

Wall mount assemblies

- WA-Single Bend Tube
- WB-Double Bend Tube
- WBX-Extended Double Bend Tube

Ceiling mount assemblies

- CA-Single Bend Tube
- CB-Double Bend Tube
- CBX-Extended Double Bend Tube

Straight Mount Assemblies

- ST-Straight Tube
- STX-Extended Straight Tube

Second letter code identifies mounting hardware

- BC-Bracket and Cover
- MP-Mounting Plate
- SM-Strut Member
- LN-Locknut
- PA-Pipe Adaptor
- TA-Threaded Rod

Shelf Accessory

50ST-MP

### Shelf Accessories

The shelf accessories are made from select all Birch plywood. There are no voids, and 13 cross grained inner ply veneers make up the core. This is the strongest plywood construction available.

The shelves are finished in black. Four large "T" nuts are secured into pre-drilled holes at the center. Quick and easy attachment of the shelf to the clamp plate is provided with four mounting bolts (included).

Part No.	Size	
ACC-1218SA	12" x 18"	\$25.95
ACC-1222SA	12" x 22"	27.95
ACC-1424SA	14" x 24"	29.95
ACC-1520SA	15" x 20"	29.95
ACC-1818SA	18" x 18"	32.95
ACC-1822SA	18" x 22"	32.95
ACC-1827SA	18" x 27"	36.95
ACC-1830SA	18" x 30"	36.95

Hole centers vary with clamp assembly sizes.  
When ordering, specify for the appropriate Series 300 or 500 clamp assemblies.

## Quartz Tele-Packs

For • TV • ETV  
• Cable • Closed Circuit

### Quartz Tele-Pack No. TP/C/1 (For 20' x 30' Studio)

- 12 6" Quartz Fresnel Spotlights
- 6 6" 4-Wing Barndoors
- 2 6" Quartz Ellipsoidal Spotlights
- 14 6" Diffuser Frames
- 6 8" Quartz Fresnel Spotlights
- 4 8" 4-Wing Barndoors
- 2 8" 2-Wing Barndoors
- 6 8" Diffuser Frames
- 6 14" Quartz Scoops
- 6 14" Diffuser Frames
- 4 3 1/2" Quartz Ellipsoidal Spotlights
- 4 4" Diffuser Frames
- 2 4' Quartz Strip-Lites
- 26 CC-500 C Clamps
- 4 CC-1 C Clamps
- 22 650W FAD Quartz Lamps
- 12 1000W FER Quartz Lamps
- 4 325W EHV Quartz Lamps
- 1 Roll 3' x 25' Spun Glass Diffuser

### Tele-Pack No. TP/A/100 (For 20' x 30' Studio)

Includes all items in No. TP/C/1 plus the following Dimming System, Power Grid, Distribution and Wiring Equipment:

- 2 SM2-824 Dimmer Packs (38.4kW)
- 1 SM2-CP16 Control Console, 16 channels
- 2 25' Control Cables
- 1 SM2-ER 19" Equipment Rack
- 6 16" Power and Rigging Tracks, each with 8-15A independent receptacles
- 1 35' Electrical Raceway
- 8 Raceway Fittings
- 1 Lighting Patch Panel with 48-6' 3-wire #12 rubber cables and male connectors
- 48 Pr. Home Run Cables (from grid receptacles to patch panel)
- 1 Power Distribution Box
- 2 Sets Power Cables—4 per set

### Quartz Tele-Pack No. TP/C/2 (For 15' x 20' Studio)

- 6 6" Quartz Fresnel Spotlights
- 6 6" 4-Wing Barndoors
- 6 6" Diffuser Frames
- 6 650W FAD Quartz Lamps
- 6 14" Quartz Scoops
- 6 14" Diffuser Frames
- 12 CC-500 C Clamps
- 6 1000W FER Quartz Lamps
- 1 Roll 3' x 25' Spun Glass Diffuser

### Tele-Pack No. TP/A/200 (For 15' x 20' Studio)

Includes all items in No. TP/C/2 plus the following Dimming System, Power Grid, Distribution and Wiring Equipment:

- 1 SM2-824 Dimmer Pack (19.2kW)
- 1 SM2-CP8 Control Console, 8 channels
- 1 25' Control Cable
- 3 16" Power and Rigging Tracks, each with 8-15A independent receptacles
- 1 25' Electrical Raceway
- 5 Raceway Fittings
- 24 Pr. Home Run Cables (from grid receptacles to dimmers)
- 1 Single Dimmer Pack Power Distribution Box with 4 Power Cables

### Quartz Tele-Pack No. TP/C/3 (For 30' x 40' Studio)

- 18 6" Quartz Fresnel Spotlights
- 18 6" 4-Wing Barndoors
- 18 6" Diffuser Frames
- 8 8" Quartz Fresnel Spotlights
- 8 8" 4-Wing Barndoors
- 8 8" Diffuser Frames
- 18 14" Quartz Scoops
- 18 14" Diffuser Frames
- 2 6" Quartz Ellipsoidal Spotlights
- 4 4" Quartz Strip-Lites
- 46 CC-500 C Clamps
- 36 650W FAD Quartz Lamps
- 26 1000W FER Quartz Lamps
- 2 Rolls 3' x 25' Spun Glass Diffuser

### Tele-Pack No. TP/A/300 (For 30' x 40' Studio)

Includes all items in No. TP/C/3 plus the following Dimming System, Power Grid, Distribution and Wiring Equipment:

- 3 SM2-824 Dimmer Packs (57.6kW)
- 1 SM2-CP24 Control Console, 24 channels
- 3 50' Control Cables
- 1 SM2-ER 19" Equipment Rack
- 8 20" Power and Rigging Tracks, each with 12-20A independent receptacles
- 1 50' Electrical Raceway
- 10 Raceway Fittings
- 1 Lighting Patch Panel with 48-6' 3-wire #12 rubber cables and male connectors
- 48 Pr. Home Run Cables (from grid receptacles to patch panel)
- 1 Power Distribution Box
- 3 Sets Power Cables—4 per set
- 1 12 Circuit Plugging Box with switches for non-dim application

### Quartz Tele-Pack No. TP/C/5-R (For 40' x 60' Studio)

- Lighting Instruments**
- 24 14" Quartz Scoops
- 24 8" Quartz Fresnel Spotlights
- 24 6" Quartz Fresnel Spotlights
- 2 6" Quartz Ellipsoidal Spotlights
- 2 6" Quartz Ellipsoidal w/Iris
- 2 Quartz Photo Floods

### Accessories

- 12 14" 2-Wing Barndoors
- 12 8" 4-Wing Barndoors
- 12 6" 4-Wing Barndoors
- 24 14" Diffuser Frames
- 24 8" Diffuser Frames
- 24 6" Diffuser Frames
- 3 SG-25 Rolls Spun Glass

### Lamps

- 48 1000W FER Quartz Lamps
- 28 650W FAD Quartz Lamps
- 2 250W ENH Quartz Lamps

### Dimmer Control Equipment

- 4 SM2-824 Dimmer Packs (76.8kW)
- 1 SM-CP32TF1 Control Console, 32 Channels with Time Fade
- 4 50' Control Cables
- 1 SM2-ER 19" Equipment Rack

### Prewired Grid System and Hanging Equipment

- 20 16" Power and Rigging Tracks, each with 8-15A independent receptacles
- 6 20 lb. Deluxe Pantographs
- 6 20 lb. Standard Pantographs

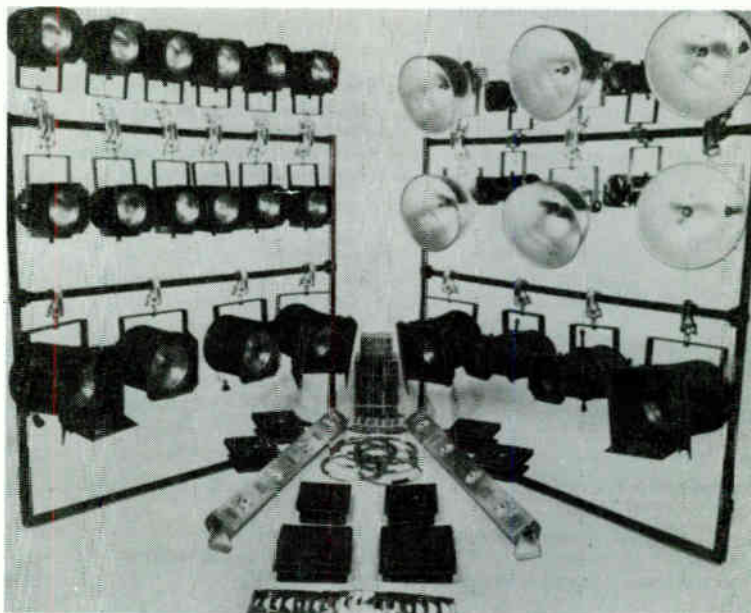

### Quartz Tele-Pack No. TP/A/500

Includes all items in No. TP/C/5R plus the following Distribution and Wiring Equipment:

- 75' Electrical Raceway
- 12 Raceway Fittings
- 1 Lighting Patch Panel with 80-6' 3-wire #12 Rubber Cables and male connectors
- 80 Pr. Home Run #12 wires (from grid receptacles to patch panel)
- 1 Power Distribution Box
- 4 Sets Power Cables, 4 per set
- 2 12 Circuit Plugging Boxes with switches for non-dim application

### Deluxe Quartz Tele-Pack No. TP/A/600 (For 40' x 60' Studio)

- Lighting Instruments**
- 24 14" Zoom (pole) Focusing Quartz Scoops
- 24 8" Deluxe Pole Focusing Quartz Fresnel Spotlights

TP/C/1

- 24 6" Deluxe Pole Focusing Quartz Fresnel Quartz Spotlights
- 2 6" Deluxe Pole Focusing Quartz Ellipsoidal Spotlights
- 2 6" Deluxe Pole Focusing Quartz Ellipsoidal w/Iris
- 2 Quartz Photo Floods

### Accessories

- 12 14" 2-Wing Barndoors
- 12 8" 4-Wing Barndoors
- 12 6" 4-Wing Barndoors
- 24 14" Diffuser Frames
- 24 8" Diffuser Frames
- 24 6" Diffuser Frames
- 3 SG-25 Rolls Spun Glass
- 2 Giraffe Poles

### Lamps

- 48 1000W FER Quartz Lamps
- 28 650W FAD Quartz Lamps
- 2 250W ENH Quartz Lamps

### Dimmer Control Equipment

- 4 SM2-824 Dimmer Packs (76.8kW)
- 1 SM-CP32TF1 Control Console, 32 Channels with Time Fade
- 4 50' Control Cables
- 1 SM2-ER 19" Equipment Rack

### Prewired Grid System and Hanging Equipment

- 20 16" Power and Rigging Tracks, each with 8-15A independent receptacles
- 6 20 lb. Deluxe Pantographs
- 6 20 lb. Standard Pantographs

### Distribution and Wiring Equipment

- 75' Electrical Raceway
- 12 Raceway Fittings
- 1 Lighting Patch Panel with 80-6' 3-wire #12 Rubber cables and male connectors
- 80 Pr. Home Run #12 wires (from grid receptacles to patch panel)
- 1 Power Distribution Box
- 4 Sets Power Cable, 4 per set
- 2 12 Circuit Plugging Boxes with switches for non-dim application

### WV-555/B ENG/EFP/Studio Color Camera

- Horizontal Resolution: 600 lines
- S/N Ratio: 54dB
- Three 2/3" Saticon tubes using 1/2" scanning
- Minimum illumination 8fc (80 lux) at f/1.4, + 12dB gain on
- Built-in EIA RS-170A sync generator with genlock
- Two line vertical aperture correction
- Feedback beam control (FBC)
- Knee circuit for improved visible dynamic range
- Lightweight diecast chassis with 1.5" viewfinder
- Optional remote control, WV-RC32

#### Standard Composition

**ENG Color Camera WV-555B . . . \$6,100.00**

- WV-555BH: Camera head (w/o lens)
- WV-VF32: 1.5" Electronic viewfinder
- WV-PS37: Battery Pack (2AH)
- WV-BC32: Battery charger
- WV-Q37: Tripod mounting adaptor
- WV-CC32: Carrying case
- Rain coat
- Registration and white balance chart
- Color sheet
- PCB extender

**ENG Color Camera WV-555A\* . . . \$4,900.00**

- WV-555AH: Camera head (w/o lens)
- WV-VF32: 1.5" Electronic viewfinder
- WV-Q37: Tripod mounting adaptor
- WV-CC32: Carrying case
- Rain coat
- Registration and white balance chart
- Color sheet
- PCB extender

#### ENG Color Camera Head

**WV-555BHQ . . . \$5,300.00**

- WV-555BH: Camera head (w/o lens)
- WV-Q37: Tripod mounting adaptor

WV-555/B

#### Studio Configuration

**WV-555BST\* . . . \$7,200.00**

- WV-555BH: Camera head (w/o lens)
- WV-VF37: 5" Electronic viewfinder
- WV-RC32: Remote control unit
- WV-Q37: Tripod mounting adaptor
- 32A-25: Studio cable
- Registration and white balance chart
- Color sheet
- PCB extender

\*WV-555A and WV-555BST are not available in Canada.

### WV-888 Professional ENG/EFP/Studio Color Camera

- High performance middle index prism optical system with three 2/3" Saticon II tubes
- NTSC and Y/IQ output
- Horizontal Resolution: 650 lines
- S/N Ratio: 57dB
- Feedback beam control, digital automatic white, automatic-black and pulse cancel controls
- Automatic centering
- +9 and +18 high gain selection switch
- Genlock
- Switchable audio output level of -20dB or -70dB
- EIA, IQ color bar generation with 7.5 IRE setup
- Operates from four different power sources: body-integrated NiCad battery, body-integrated AC power supply, optional RCU or VTR, or any other power source
- Gamma correction adjustable from .45 to 1.0

- Diecast chassis
- Lightweight and well balanced design
- Standby switch reduces power consumption during idle modes
- Studio adaptability with optional studio viewfinder and RCU, WV-RC31

#### ENG Standard Composition

**WV-888 . . . \$8,900.00**

- WV-BBBH: Camera head (w/o lens)
- WV-VF32: 1.5" Viewfinder
- WV-CC34: Carrying case
- WV-Q35: Tripod mounting adaptor
- Rain coat
- Registration and white balance chart
- Color sheet
- PCB extender
- UM-3/AA size battery for microphone
- Operating instructions

WV-888

#### Studio Standard Composition

**WV-888ST\* . . . \$10,500.00**

- WV-BBBH: Camera head (w/o lens)
- WV-VF37: 5" Viewfinder
- WV-RC31: RCU
- 32A-25: Studio cable
- WV-Q35: Tripod mounting adaptor
- Registration and white balance chart
- Color sheet
- PCB extender
- Operating instructions

\*WV-BBBST is not available in Canada.

### WV-890 Plumbicon (P3) ENG/EFP/Studio Color Camera

- Three 2/3" Plumbicon tubes
- Auto centering
- Horizontal Resolution: 600 lines
- S/N Ratio: 59dB
- White/black automatic balance
- Compact and lightweight
- Easy access control
- NTSC and Y/IQ output
- +9/+18dB high gain selection switch
- 2-line vertical aperture correction
- Genlock
- Single cable connection for use in video production in mobile and field situations as well as studio production
- Optional RCU, WV-RC31

#### Standard Composition

**ENG Color Camera WV-890 . . . \$12,500.00**

- WV-B90H: Camera head (w/o lens)
- WV-VF32B: 1.5" Electronic viewfinder
- WV-CC34: Carrying case
- WV-Q35: Tripod mounting adaptor
- Rain coat
- Registration and white balance chart
- Color sheet
- PCB extender

#### Studio Configuration

**WV-890ST . . . \$14,200.00**

- WV-B90H: Camera head (w/o lens)
- WV-VF37B: 5" Electronic viewfinder
- WV-RC31: Remote control unit
- 32A-25: Studio cable
- WV-Q35: Tripod mounting adaptor

## WV-6000 (S1)

### Professional Single Tube Camera

- One 2/3" 6MHz high band Saticon™ tube
- Horizontal resolution—420 lines
- Color bar generator—Feedback beam control
- Built-in genlock circuit—2 line vertical enhancer
- 12X servo zoom, f/1.6 and macro
- 2 position auto white circuit
- 50dB S/N—requires only 20 lux illumination
- Character and time/date generator
- VTR remote capability
- +6, +12dB gain up and AGC system
- 1.5" electronic viewfinder
- Stereo microphone
- Optional CCU WV-RC60
- Audio video fade in/out
- Adjustable diopter with 1.5" viewfinder (B/W only)

- Color temperature conversion filter turret
- -20dB/-60dB switchable audio output
- Stereo audio monitor output
- H, SC phase controls
- R.B. gain and R.B. and Y. Pedestal control
- Optional color electronic viewfinder
- Rugged aluminum diecast chassis

### Standard Composition

- **ENG Color Camera WV-6000 . . . \$3700.00**
- WV-6000H: Camera head
- WV-VF60: 1.5" B/W electronic viewfinder
- WV-LZ12/12: 12:1 servo zoom lens
- WV-CC60: Carrying case
- WV-Q40A: Shoulder pad
- WV-MC60: Stereo microphone
- **Camera Head WV-6000H . . . . \$2300.00**
- WV-6000H: Camera head

- WV-6000ST . . . . . \$4600.00
- WV-6000H: Camera head
- WV-RC60: Remote control unit
- WV-FV65: 5" B/W electronic viewfinder
- WV-LZ12/12: 12:1 servo zoom lens
- WV-LK11: Lens conversion kit
- 14C-30: Studio cable

## WV-V3

### Three-Tube Video Camera

- Three 1/2" Newvicon tubes
- Horizontal resolution: 570 lines
- S/N Ratio: 54dB
- Minimum Illumination: 35 lux f/1.4 (100% full video)
- ATW (Auto Tracing White Balance System)
- Auto centering function
- Built-in color bar generator
- Automatic audio/video fade in/out
- Gain control (0 + 6 + 12dB)
- Negative/positive picture reversal
- VHS/VTR compatibility switch
- 2 position white balance memory
- Optional title generator
- Internal sync (external sync option)
- Compatible with 555 series lens
- Optional remote control, WV-RC33

### Standard Composition

- **WV-V3 . . . . . \$4900.00**
- WV-V3H: Camera head
- WV-VF34: 1.5" electronic viewfinder
- WV-MC34: Microphone
- WV-CC35: Carrying case
- WV-PS33: 2-hour battery
- WV-BC30: Battery charger
- **WV-V3L Includes standard composition packaging with 10:1 power servo, zoom lens . . . . . \$5500.00**

### Studio Configuration

- **WV-V3ST . . . . . \$6200.00**
- WV-V3H: Camera head
- WV-VF65AP: 5" Electronic viewfinder
- WV-RC33: Remote control

WV-V3

- WV-AD33: Genlock adaptor
- 14C-30P: Studio cable (30')
- WV-Q36: Tripod mounting adaptor

## WV-555BN (N3)

### ENG/EFP/Studio Color Camera

- Three 1/2" Newvicon tubes
- Horizontal Resolution: 600 lines
- S/N Ratio: 56dB
- 2-line vertical enhancer with comb filter
- Feedback beam control
- Auto-centering circuit
- Built-in full field color bar
- Auto white and auto black
- Y, I/Q encoder can be connected with recam system
- Vertically installed plug-in circuit board
- Knee circuit
- Built-in genlock
- Iris weighting circuit
- Low burn-in
- Optional remote control unit, WV-RC32

about with the Remote Control Unit. In addition, standard NTSC genlock sync generator makes the camera compatible with most professional VTR systems. And the Y/IQ component output lets you connect the WV-555BN with component recorders like the Panasonic 1/2" M-Format VTRs.

Color reproduction on the WV-555BN is controlled by precise prism optics for fresh, true skin tones. The WV-555BN is built for mobility. Its compact lightweight body with magnesium alloy side panels facilitates on-location shooting. An aluminum diecast chassis makes the camera sturdy enough for rough field use. It also has special RF protection to keep video signals free from interference.

### Standard Composition

- **ENG Color Camera WV-555BN . . \$6100.00**
- WV-555BNH: Camera head (w/o lens) with WV-Q37
- WV-VF32B: 1.5" Electronic viewfinder

WV-555BN (N3)

**Nite Hawk**

- WV-PS37: Battery pack (2AH)
- WV-BC32: Battery charger
- WV-CC32: Carrying case
- Registration and white balance chart
- Color sheet
- PCB extender
- **Camera Head WV-555BNH . . . \$5300.00**
- Camera head (w/o lens) with tripod mounting adaptor (WV-Q37)

Get the advantages of the first 3-Newvicon tube camera in your studio with professional options for the WV-555BN. A 5" electronic viewfinder gives you a wider view of your subject. Camera operators are free to move

# COLOR CAMERA SYSTEM

**WV-D5000 Camera Head  
with WV-S050 ENG System Kit**

**WV-D5000 Camera Head  
with WV-S060 EFP System Kit**

### WV-D5000 Video Camera (Camera head only)

The WV-D5000 is a component video camera that offers great flexibility in system configurations. So it can handle a wide variety of video applications. A full range of available accessories can tailor this camera system to meet your specific needs, and provide considerable system potential for the future.

- Integrated color mosaic filter single chip CCD System
- 2/3" CCD insures high quality and virtually eliminates burn-in and after image. And 286,000 pixels assure superior reproduction quality
- Signal-to-noise ratio — 46dB
- Minimum illumination — 7 lux at f/1.4
- Auto Tracing White Balance (ATW) or Manual Setting (AWC)
- 2 line vertical enhancer
- Strobe effect shutter
- Fade-in/fade-out
- Nega-posi picture reversal
- Record review
- VTR remote control
- TTL auto focus (Magic Window) optional 8/AF
- Automatic intermittent recording — optional WV-CR12
- Multi-purpose modular systems makes the WV-D5000 ideal for education, industrial training, research, motion analysis (sports), film/slide transfer installations, photography, color monitoring, botanical/zoological observation, tele-conference, telecommunication input for videography and many other uses

WV-D5000 (camera head only) . . . . . \$1375.00  
 WV-D5000 RGB camera . . . . . 1535.00  
 WV-D5010 Same as WV-D5000 less strobe effect shutter . . 1275.00

### WV-S050 ENG System Kit

The S050 is the kit for users who demand versatility and convenience for their Electronic News-Gathering applications.

#### WV-S050 Standard Configuration

WV-LZ 14/12A 12X Power Servo Zoom Lens  
 WV-VF01 1" Electronic Viewfinder

# COLOR CAMERA/TITLERS

### WV-CD500 3 Chip Solid-State Color Camera

- Middle index prism optical system
- Three interline CCD image sensors
- Compact and lightweight due to separate optional power supply and optional remote
- Optional remote lenses, pan tilt and controls available
- All solid-state components and a metal enclosure case for long life and high reliability
- Free of image burn-in, almost no blooming and very short lag
- Distortion free picture due to a precise alignment of elements on image plates
- Solid-state 510(H) x 492(V) image sensor array and 360 lines horizontal resolution (green channel)
- Convenient RGB non-composite output for medical and image processing applications
- Virtually no effect from magnetic fields
- Solid-state sensors: no tubes, deflection or focusing coil assemblies
- 50dB signal-to-noise ratio
- Auto tracing continuous white balance
- 80 Lux minimum illumination
- All customer adjustments on the camera head can be set by using the optional remote control unit (WV-RC60)
- Internal sync generator (equivalent to RS-170) with genlock
- Suitable for medical, scientific, and surveillance applications. It can also be optimally used in image processing applications and in manufacturing and production systems

### WJ-3500 System Switcher, Titler, Special Effects Generator

- Superimposition of titles and graphics on color camera and other line video source with key level control
- Seven different color selection for titles/graphics or background. White/red/yellow/green/cyan/blue/magenta
- 2 wipe patterns, horizontal/vertical and mix (with wipe/mix lever)
- Three video inputs; background color, line video, slave camera (genlockable)
- Program and effect output
- Negative/positive pattern selector
- Audio mixing for line and microphone inputs
- AC/DC operation
- 42dB signal-to-noise (S/N) ratio
- Video output: X1 (BNC connector)

WJ-3500 .....\$1375.00

WJ-3500

### WV-J10 Video Titler

- Superimposition of titles and graphics on color camera or video tape recorder video signal
- Seven different color selections
- Super auto fade in/out
- Two separate (switchable) video outputs
- Key level control
- Soft/sharp select for VTR playback picture tone
- Pattern (picture) reversal between input signal and title camera signal
- VTR remote control
- Four audio inputs
- Audio fade in, fade out
- 2X variable focus zoom lens for title camera (supplied)

# COLOR PRODUCTION SYSTEMS

WJ-5600

### WJ-5600 Color Special Effects Generator

- Two built-in mixing amplifiers allow three-channel mixing
- 8-channel inputs
- Three black burst outputs
- Mixing in fade-in, fade-out and dissolve modes
- Switch-over in normal; normal-reverse; and reverse
- Wipe waveforms in three stages: soft, sharp, and color border
- Switchover by self-collating non-locking button during the vertical interval
- A built-in positioner circuit
- Two color generators for the matte key and border wipe, and for downstream keying and background
- Color generators adjusted independently for hue, saturation and luminance
- The matte key has a negative/positive selection switch
- Downstream keyer has a built-in edge on/off switch
- Color matte key and RGB chroma-key are independent
- Chroma-key creates key signals in full hue, and controls key delay levels
- Downstream key signals capable of color/monochrome switch-over
- Input signals in both the VBS composite and VB non-composite modes. VBS genlock is also possible
- AC or 12VDC power operation available
- Rackmountable

WJ-5600 .....\$7260.00

WJ-5500B

### WJ-5500B Deluxe Color Special Effects Generator

- Vertical interval switching of 8 program inputs, 1 auxiliary input for VTR, 1 super input, and 1 external key input (monochrome)
- Downstream mixing of up to three cameras, including super
- Nine wipe patterns with soft/sharp edges; normal, normal-reverse, and reverse wipe modes; wipe positioner
- Wipe key, internal key, external key
- Built-in EIA RS-170A sync generator (HD, VD, Sync, BL, BFP, SC and black burst outputs) plus genlock capability
- Genlock circuitry for non-synchronous video signal mixing
- Subcarrier phase and horizontal phase adjustments for genlock
- Color bar generator with subcarrier phase control
- Black burst (program output only) 3 outputs
- Can mix composite and non-composite video inputs
- Effect, preview and two program outputs
- "Cut" pushbutton transfers program and preview buses
- 2-step illuminated, non-locking pushbuttons: light dimly when pressed to indicate selected preview inputs; light brightly when pressed to indicate selected program inputs
- Illuminated lock release buttons light up when pressed to show function selected
- Supplies intercom power to eight cameras and level adjustable
- Supplies tally light on/off switching to all ten inputs
- BNC connectors
- Audio amplifier for intercom with level control
- Rackmountable

WJ-5500B .....\$5060.00

WJ-4600C

### WJ-4600C Color Special Effects Generator

- DC operation for EFP use
- Vertical interval switching of 6 program inputs
- Fades, dissolves, and six wipe patterns
- Super, external key (monochrome); internal key

- Built-in EIA RS-170A sync generator (HD, VD, Sync, BL, BFP, SC, and black burst outputs) plus genlock capability
- Genlock circuitry for non-synchronous video signal mixing
- Subcarrier phase and horizontal phase adjustments for genlock
- Black burst (program output only) 3 outputs
- Can mix composite and non-composite video inputs
- Effect, preview, and two program outputs
- "Cut" pushbutton transfers program and preview buses
- 2-step illuminated, non-locking pushbuttons: light dimly when pressed to indicate selected preview inputs; light brightly when pressed to indicate selected program inputs
- Illuminated lock-release buttons light up when pressed to show function selected
- Supplies intercom power to six cameras and level adjustable
- Supplies tally light on/off switching to all eight inputs
- BNC connectors
- Audio amplifier for intercom with level control

# 3/4" RECORDERS/PLAYERS

### NV-9450A

#### 3/4" Portable Video Cassette Recorder/Player

- Real time monitoring with video confidence heads • SMPTE time code capability • TBC connection capability • Professional-standard connectors (Video/BNC, Audio/XLR)
- Automatic backspacing for assemble editing • Microprocessor controlled operation • Remote control facility • 3-way power supply • 2 audio meters • 10X picture search capability • Lightweight 19.6 lbs. (including battery) • Supplied with handle and shoulder strap

NV-9450A ..... \$5000.00

NV-9450A

### NV-9400

#### 3/4" Portable Video Cassette Recorder/Player

- 3-way power: Rechargeable Panaloid battery (included); 12V battery power with optional car/boat battery cable, NV-C24; or optional AC adaptor/battery rechargers, NV-B50 and HV-B50R (NV-B50R for use with AK-750) • NV-9400 has a capstan servo system with a crystal reference signal generator to help insure precise head-to-tape speed and high picture stability • Automatic Assembly Editing (AAE) from Stop mode. AAE features assembles the record segments without tear or roll • Dropout/noise compensator • Automatic Phase Control (APC) for stable color signal • Dubbing mode turns off APC to maintain luminance/chroma relationship when dubbing
- Pause control stops tape travel in Record mode, and features a still frame in Playback • Two audio channels; audio dubbing on channel 1; balance control for channels 1 and 2 during Playback • Five function meter: Monitors video level, audio channel 1, audio channel 2, battery voltage and servo lock
- Optional RF modulator NV-U956 plugs into VCR for playback on TV channels 5 or 6 (switchable) • 3/4" cassettes recorded on NV-9400 can be played on other U-format VCRs • Mates with Panasonic ENG/EFP color cameras, such as AK-750 and WV-3800

NV-9400 ..... \$3500.00

NV-9400

## S-VHS EDITING SYSTEM/ PORTABLE RECORDER

### AG-7500 Pro Series S-Video

#### Component Analog Hi-Fi S-VHS Editing VCR

- Excellent picture quality • Digital decoder for complete Y/C separation • Separated S-Video input/output terminals (4-pin) • 7-pin dub-in/dub-out terminals for superior dubbing quality • Edit switch • 4-channel audio (linear 2-channel, hi-fi 2-channel) with Dolby NR • Insert and assemble editing • Jog/shuttle dial (17-step) • Auto-promoting illuminated switch system • Framing servo circuitry for clear editing • Digital servo circuitry (10 bits) for jitter reduction • Improved audio editing accuracy • Rotary erase heads • Automatic backspace function • External SC input for TBC connection • External sync input • SMPTE time code rec./play capability • Built-in sync generator • DOC output terminal • LED tape counter for frame display • VHS mode selector

AG-7500 ..... \$5900.00

AG-7500

### AG-A750 Pro Series Editing Controller

- Edit point setting with large jog and search dial • Frame trim for simple revision of edit in and out points • Auto-promoting illuminated switches • Preview of programmed edit prior to actual editing • Easy, automatic review • LED frame counter (Green) readout in hours, minutes, and seconds • Free choice of editing mode • Preroll for both source machine and editor • Lap time display • Audio monitor level adjustment for both source machine and editor • Trigger output • On-line connection of up to three machines (using optional NV-J500 Multi-Source Switcher and NV-A505 Remote Search Controller)

AG-A750 ..... \$1950.00

AG-A750

#### Options:

##### NV-J500 Multi-Source Switcher

Equipped with 3 input and 1 output terminals each for video, audio

NV-J500 ..... \$600.00

### AG-7400 Pro Series S-Video

#### Component Analog Hi-Fi S-VHS Portable VCR

- Excellent picture quality over 400 lines • Y/C comb filter • Digital servo circuitry (10 bits) for jitter reduction • Framing servo circuitry for clear editing • Ball-bearing equipped tape posts (P1, P2, back tension for jitter reduction) • Rotary erase heads • 14-pin camera connector for use of professional 3-tube camera • Battery alarm and tape-end alarm indication possible in viewfinder • 4-channel audio (linear 2-channel, hi-fi 2-channel) with Dolby NR • Auto backspace function • Camera-in switch (ENC/YC) • Camera selector (14-pin/10-pin) • Camera trigger ( $\pm$ ) • SMPTE time code recording and playback • Separated S-Video terminals (4-pin) • External battery connector for long time operation • XLR 4-pin DC input • Audio dub selector (ch. 2 or ch. 1/ch. 2) • Detail switch • Picture adjustment VR • Mike jack (1/4" phone) • VHS mode selector • Frequency band 5.4MHz - 7.0MHz

AG-7400 ..... \$2900.00

AG-7400

### NV-A505 Remote Search Controller

Bi-directional search dial, step-shift, pre-roll

NV-A505 ..... \$990.00

# S-VHS PLAYER/RECORDER/ DUPLICATOR/VIDEOTAPE

### AG-7100 S-VHS Video Cassette Player

- Excellent S-VHS system picture quality • Digital-servo circuitry (10 bits) for jitter reduction • S-VHS/VHS playback LED indicator • 14-step dial search • Noiseless slow (forward) • Random auto repeat function • External timer play • 19" rackmountable with optional adaptor

The AG-7100 provides excellent video playback quality, plus the durability and flexibility needed for a multitude of industrial and professional video playback applications.

The AG-7100 automatically selects for S-VHS or VHS playback and has a random auto repeat feature, which along with its loopthrough function facilitates segmented and/or extended length presentations in multi unit systems. Two channel linear audio is provided with Dolby B noise reduction for clear sound reproduction.

AG-7100 .....POR

AG-7100

### AG-7300 S-VHS Video Cassette Recorder

- Excellent S-VHS system picture quality • Y/C comb filter • Separate S-Video input/output connectors (4-pin) • Rotary erase head • Edit switch • Video sensor recording (line-in only) • External SC input • Y/C filter circuitry • 17-step dial search • Forward (noiseless) and reverse slow and noiseless frame shift • Random auto repeat function • Real time counter • Loopthrough recording for dubbing • External sync • 19" rackmountable with optional adaptor

The AG-7300 S-VHS VCR might well be considered the "workhorse" of the family. Its excellent performance and high durability lend it to use in a wide range of industrial through professional video applications. From basic S-VHS or VHS record and playback to an alternative, editing source deck for the AG-7500/AG-A750 editing system.

The AG-7300 provides composite, plus S-Video (4-pin), input and output connections. Two channel audio with Dolby B noise reduction and SMPTE time code record/playback capability on track 2 are also provided. Internally, the AG-7300 has a diecast aluminum

AG-7300

chassis, direct drive reel motors, ball bearing based tape guide posts and a 10-bit digitally controlled servo circuit, that all contribute to the reduction of tape jitter.

AG-7300 .....POR

### AG-7800 S-VHS Hi-Fi Duplicator

- Excellent S-VHS system picture quality • Digital-servo circuitry (10-bit) for jitter correction • Y/C comb filter • 2/6-hour recording/playback (S-VHS mode) • 2-hour recording/playback (VHS mode) • 4-channel audio (2-channel Hi-Fi, 2-channel linear with Dolby NR) • Separate S-Video input/output terminal (4-pin) • 34-pin remote control terminal • Serial remote control receiver unit • Auto cassette changer connection • 19" rackmountable with optional adaptor

The AG-7800 provides the durability and heavy-duty construction needed for the extended periods of operation required in the tape duplication field. The AG-7800 adds the flexibility of both S-VHS (2 and 6 hr.) and VHS (2 hr.) record and playback. Also included is a built-in serial remote receiver unit that allows centrally actuated transport control for large or small multiple unit systems.

Preventive maintenance is aided by front panel test terminals, an hour meter and an easily removable top cover panel (for periodic head and tape path cleaning).

AG-7800

A diecast aluminum chassis and ball bearing based tape guide posts are incorporated to insure jitter-free operation and reliability.

AG-7800 .....POR

### NV-ST120P/ST60P S-VHS Videotape

- NV-ST120P 2-hour S-VHS Videotape .....\$20.00
- NV-ST60P 1-hour S-VHS Videotape .....16.00

# VHS EDITING VCR/ PORTABLE VCR/ACCESSORIES

AG-6500

### AG-6500 VHS Editing Video Cassette Recorder/Player

- High picture quality with wide video heads: more than 240 lines (color) horizontal resolution—white clip level raised 20%
- Built-in timing and memory circuits let you specify in advance the in-point and out-point for an edit

- 8-Digit tape counter including an error display in case of abnormal operation
- Hi-Fi sound reproduction with high definition circuitry
- Framing servo circuitry for clear editing results
- Durably constructed for studio and production use
- Jog/search dial
- Front loading, 19" slide rackmountable
- Insert and assembly editing
- High-speed search
- SMPTE
- Time code record/playback
- Dub in/dub out terminals
- In-point/out-point controls with auto-start/auto-stop
- Counter displays for in-point/out-point and lap time

The AG-6500 is a VHS video cassette recorder specially developed for editing and post production. The High Quality Picture System, extra-wide video heads and the chroma IC produce extremely clear, stable images, all the way up to 3<sup>rd</sup> generation dubbing. Complicated editing is made easy, with the rotary erase head, framing servo circuitry, and advanced jog/shuttle dial mechanism.

**AG-6500 . . . . . \$4395.00**

AG-6400

### AG-6400 VHS Hi-Fi Portable Recorder/Player

- High picture quality with wide video head—more than 240 lines (color) video horizontal resolution
- Hi-Fi sound reproduction with high definition circuitry
- S/N Ratio—Video: better than 45dB (color); Audio: better than 70dB (Hi-Fi sound) better than 48dB (normal)
- Framing servo circuitry for clear editing results
- High power capacity for professional camera connection
- XLR 4-pin external DC input connection

- Time code record/playback capability
- Stereo headphone jack with level adjustment
- Remote controllable from camera or remote control unit (when used with a Panasonic camera having VCR remote control capability)
- Full logic control transport and loading system
- Multi-function display with 4-digit tape counter, tape loaded indication and battery indication
- Memory stop at "0000" position in fast-forward and rewind modes
- Switchable illumination for display and meters
- Tracking and slow tracking adjustment
- Noiseless slow/still
- Condensation/tape-end indication LED
- Soft carrying case supplied

The AG-6400 Portable Video Recorder is light and quick in the field, but big on professional features, starting with superb picture quality. The extra-wide GW 4 video heads and High Quality Picture System guarantee clear and stable images. The sound is excellent, too: 2-channel Hi-Fi audio and 2-channel linear audio with Dolby NR. Advanced framing servo circuitry executes clean, nearly invisible edit points, and the applicable camera range extends up to 27W.

**AG-6400 . . . . . \$2195.00**

### Optional Accessories

#### AG-B640 AC Adaptor

Provides a maximum power supply of 48W and enables simultaneous charging of up to two battery packs. Weighs 2.9 lbs. . . . . \$420.00

# VHS RECORDER/PLAYERS

### AG-2500 VHS Video Cassette Recorder/Player

- GT4W Super 4-head video system
- Double fine slow motion
- Field still/double speed playback/cue and review
- Linear time counter (in hours, minutes, seconds)
- DD cylinder motor with oil film suspension system
- High quality picture system
- One month, 8-event program timer with built-in calendar (up to the year 2002)
- Multi-function display
- 3-speed playback: standard (SP), long (LP), and super long (SLP)
- Programmable remote control
- Auto operation: Auto power on; auto play; auto rewind; auto eject; power off eject
- Super OTR (One-Touch Timer Recording)
- 93-channel/16-position cable compatible TV tuner
- One-button recording
- Picture sharpness control
- Counter memory
- Fine editing (automatic backspacing)
- TV/monitor output connector (8-pin) video input/output connector (BNC)

AG-2500

The AG-2500 is ideal for use in corporate offices for recording technical documentation, and as a valuable sales and training tool

High schools, colleges and universities can open up whole new worlds of creative instructional applications with the AG-2500

Government offices can use the AG-2500 for planning and program development, implementation, and monitoring

**AG-2500 . . . . . \$795.00**

### AG-2400 VHS 4 Head System with Quartz-Servo Direct Drive Cylinder

- 2/4/6 hour playback; 2/6 hour record
- 4 head system with quartz-servo direct drive cylinder
- 5-speed search/variable slo-mo playback
- Multi-function LCD display
- Diecast aluminum chassis
- Wired remote control enables variable slo-mo playback
- Video adding for basic insert editing
- Audio dubbing capabilities
- Memory function
- Auto-rewind

AG-2400 is ideal for use with a portable video camera and is also perfect for stationary VCR applications when connected to the matching AG-V340 Video Tuner/Timer (optional). There are four precision video heads mounted on the cylinder. Two heads are used for conventional recording and playback, while the other two enable clear STILL, FRAME ADVANCE, and SLOW playback modes. In addition, a SPEED SEARCH mode is included, making it easy to locate any desired point on the tape. Recording is possible in the 2-hour and 6-hour VHS modes and playback is possible in all 2/4/6 hour modes.

With liquid crystal display (LCD), this single panel can transport speed modes (LP, SLP), cassette status, tape counter, remaining tape time, battery charge level, audio dubbing, and video adding. By simply connecting a single 20-pin cable, the AG-V340 can be added to provide you with the capabilities of a full-size conventional VCR. In addition, a standard 10-pin connector on the AG-2400 allows the unit to be used with most conventional video cameras. Weight: 4.84 lbs. (without internal battery pack). Dimensions: 8 7/16" x 2 3/4" x 10 3/8".

**AG-2400 . . . . . \$1095.00**

# DUBBING SYSTEM/ VHS RECORDER/PLAYERS

## AG-A100 Dubbing Controller

- Either one or two master VTRs can be connected • From one to ten slave VTRs can be connected • Remote control of the start and stop of the playback mode of the master VTRs (one or two units) • Remote control of slave VTRs (one to ten units) recording, playback, fast forward, rewind, forward and reverse search, stop, pause/still and cassette ejection • As many as 40 slave VTRs can be connected by using the multi-connection system (with four Dubbing Controllers, AV Distributors and Switchers) • Remote control possible with any master VTR which has an RCA-type record remote jack • Mountable in 19" rack

AG-A100 .....\$880.00

## AG-DA100 Audio Video Distributor

- Two inputs, A and B, selectable for two outputs. A (1-5) and B (2-10)
- Because loopthrough type input terminals are used, video/audio distribution can be further expanded by using an additional AV Distributor
- Video and audio output levels can be adjusted while monitoring the level meter • Distribution to as many as 40 slave VTRs is possible by using the multi-connection system (with four Dubbing Controllers, AV Distributors and Switchers)

AG-DA100 .....\$880.00

## AG-SW100 Switcher

- Video/audio selection of one from as many as 10 input signals for monitoring • Manual and automatic modes can be selected for the output signal • Selection timing for the automatic mode ranges from about 1 second to 30 seconds • Selection timing can be set according to the external pulse • Audio monitoring selectable as either audio channel 1, mixed, or audio channel 2 • Mode lock function for inhibition of remote control input (normal side) and front panel control (remote side) • Automatic skip function makes selection quicker by skipping terminals with no input signal • Interval switching function makes it possible to switch within the synchronized signal of the video signal if a video input signal is present at input terminal 1 • Mountable in 19" rack

AG-SW100 .....\$990.00

## AG-6810 Hi-Fi VHS Video Cassette Recorder/Player

- 2 Hi-Fi audio channels and 2 conventional audio channels with separate level controls and level meters • Loopthrough recording for dubbing • Oversized auto-off/eject LED indicator • Forward and reverse search • Test terminals on the front panel • Hour meter up to 5000 hours for scheduling maintenance work • 19" EIA rack compatibility and convenient 3-part cover panel • Remote control connectors • Precision DD cylinder motor • One-piece aluminum diecast chassis • Short FF function can automatically advance the tape past the transparent leader tape (internal on/off switch) • Special function allows recording on cassettes with record protect tab out (internal on/off switch) • SMPTE time code recording and playback are possible. For use with synchronizers and edit controller • Headphone jack and headphone level control on front panel • Picture sharpness control • 34 pin remote control connector for versatile remote connections, including use of full-function editing consoles • All indicators use LEDs for longer service life • Mode lock switch with indicator lamp prevents accidental misoperation

The AG-6810 is a Hi-Fi Video Cassette Recorder designed for a wide range of professional applications. It is equipped with virtually all the functions and features required for professional applications such as tape dubbing facilities, discos, demonstration and promotional activities, and a variety of educational uses. The picture and sound quality meet the stringent quality requirements of professional use. The 2-channel Hi-Fi Audio HD system with 2 rotational audio heads makes it possible to obtain sound recordings with the following outstanding audio specifications:

- 1) Wide dynamic range: more than 85dB
- 2) Extended flat frequency response: 20Hz-20kHz
- 3) Low wow and flutter: 0.005% or less

# VHS EDITING/PRESENTATION SYSTEMS

### AG-1950 Editing Recorder/Player

- Jog and shuttle search knob • Automatic assembly editing
- Insert editing and audio dubbing functions • Edit switch
- Editing controller (AG-A95 available) • GX4 video head system • Flying erase head • LDD cylinder and double DD reel motors • High picture quality system • High definition (HD) audio: Dynamic range of more than 90dB with rotary audio heads and HSS (high-speed switching) Hi-Fi system • Quality sonics • Multi-function FL display: Realtime counter (hr. min. sec.) wide 16-segment L/R level meters, tracking meter, remaining tape time, edit position, edit in/out points, mode (rec/play/pause/etc.), dew warning, tape speed, VCR/TV, audio track, memory/search, and insert/audio dub • Automatic tape program search • Automatic functions: Auto power on, auto play, power off eject, auto tape canceller, auto rewind, and search lock • One shot recording • Automatic intermittent recording • Simulcast recording • 30-function wireless remote control • 8-hour recording with NVT-160 (EP mode) • Dual video input/output terminals • 5-pin terminal for optional editing controller • 16-station preset cable compatible TV tuner • Stereo microphone inputs (mini)

AG-1950 . . . . . \$1650.00

AG-1950

### AG-A95 Editing Controller

- Usable with a variety of recorders including AG-1950, AG-6400, AG-2400, NV-8420 • Direct tape search • 8 programmable memory inset and outset points • Assemble/insert/audio dub • +7, -4 frame accuracy with AG-1950 • Built-in jog/shuttle search dial • Preview and edit stop functions • LCD multi-function display

The A95 editing controller now makes VHS editing extremely affordable. Equipped with 8 programmable memory inset-outset points, the A95 is an excellent way to get into the world of editing. In addition, the A95 will work with a variety of console and portable VHS recorders.

AG-A95 . . . . . \$440.00

AG-A95

### AG-500R Integrated Monitor/VHS Player

- Built-in 3-heads • Built-in infrared receiver • Auto-repeat playback • 10" color monitor with comb filter—better than 300 lines resolution • Audio and video in/out terminals • Clear still freeze-frame. Slow-motion and search • Headphone jack • Folding carrying handle • Timer assisted auto-start and auto-stop • Covered frontal controls include V-hold, sharpness, contrast, bright, tint and color control • Memory stop and search lock • Dew indicator • Tracking control and slow tracking control • Can play VHS video cassettes at all three speeds: SP/LP/SLP

The AG-500R is no larger than a portable TV set and has a fold-up handle for easy carrying. Use it in the office, as an educational tool, for employee training, in the rental business, for demonstration and promotional or as a video guide service in a hotel lobby.

# VIDEO FLOPPY RECORDER

## AG-800 Video Floppy Recorder

- Uses standard 2" floppy disk
- High resolution 350 lines
- Recording capacity of 50 pictures/disk (in field mode)
- Automatic field/frame playback
- Forward/reverse manual playback
- Automatic playback/auto advance
- Auto repeat playback
- On-screen display
- Optional wireless remote controller

### Applications:

Point-of-Purchase Display, Public Information Services, Educational Institutions, Medical/Research Applications, Travel Agencies, Forensic, Story-boards for movie producers, Industrial, Museum and Exhibition Halls.

With the AG-800 you can store up to 50 color pictures on a single, tiny, 2" floppy disk, and use any TV set or monitor to present high-resolution color stills. The AG-800 is designed to provide all the flexibility and quality demanded for business and industrial applications.

### • Super-Compact 2" Floppy Disk

The AG-800 uses a metal particle formulation in a disk that is just about 2" square. If storage space is already at a premium, you'll appreciate being able to keep so much information on these compact, lightweight disks. And for some business applications, these features can add up to significant savings in postage and handling costs. In addition, a specially designed plastic case and shutter protect the contents of each disk.

### • Fast, Direct Information Supply

The 2" disks for the AG-800 are easy to dub, so you can send your images and data to many different audiences, wherever there is an AG-800 and a TV monitor.

### • Record Images from Many Sources

Any standard NTSC video signal can be used to record an image on the AG-800. Record your scenes using a video camera, camcorder, VCR, or cable/broadcast TV signal. And you can even record graphics from computers or video games.

### • Switchable Frame/Field Recording

A video picture "frame" on your TV screen is made up of two "fields". With the AG-800, you can record each picture as a field or as a frame. This means you can record up to 25 high-quality frames, or as many as 50 sharp, clear field pictures on a single disk.

### • Automatic Field/Frame Playback

Field pictures and frame pictures can be mixed on the same disk. And the AG-800 automatically plays them back in the field mode, or frame mode, as appropriate.

### • Automatic Recording Verification

The AG-800 offers you the convenience of checking a picture automatically, as soon as you've recorded it.

### • Easy Disk Updates

You can record images on any one of 50 different disk tracks by choice. And you can replace one picture with another at anytime. In fact, you can replace one frame of video with two fields of video whenever you wish.

### • Direct Duplication Circuitry

When you need additional dubs of a disk, the AG-800 maintains high image quality through the direct connection facilities of its Y/C separate 5-pin terminal.

AG-800

### • Automatic Playback/Auto Advance

The AG-800 will play back your entire video "slide show" automatically, one picture at a time. Each picture will be displayed for about four seconds. Or you can use the optional Wireless Remote Control Unit (AG-A80) to set the pause time at anywhere from 1 to 8 seconds.

### Specifications

Power Source:	120VAC, 50/60Hz
Power Consumption:	Approx. 24W
Recording System:	Still video floppy format standardized by the electronic still camera conference
Rotational Speed:	3,600 rpm
Disk Used:	2" (47mm)Ø still video floppy disk
Recording Capacity:	Frame mode: 25 pictures/disk Field mode: 50 pictures/disk
Television System:	EIA standard (525 lines, 60 fields) NTSC color signal
Modulation System:	Luminance: frequency modulation Color: line sequential frequency modulation
Input	
Video Input:	1.0V p-p, 75 ohm (BNC)

# COLOR MONITORS/ RECEIVERS

CT-2000M

### CT-2000M

#### 19" Color Video Monitor w/4-System Capability

- 4-system capability enables display of CCIR or EIA standard signals in PAL/SECAM/NTSC color formats including M-NTSC videotape playback with 4.43MHz subcarrier • LEDs • Video impedance switch for termination or bridging • Quick-on CRT uses no current when unit is off • Automatic AC power source compensation from 80V to 260V, 50/60Hz • Headphone jack and built-in speaker

CT-2000M ..... \$995.00

### CT-1400MG 14" Video/Data Color Monitor

- Designed for a wide variety of applications • 8-pin VCR connector, RGB linear (Teletext, etc.) and RGB (TTL), allows direct connection and easy switching • Composite video and audio inputs allow you to hook up your VCR or other video devices easily • Square corner data grade picture tube • Built-in audio amplifier and speaker

CT-1400MG ..... \$799.00

### MT-1340G 13" Medical Video Monitor

- RGB linear and composite monitor for medical applications • Resolution more than 400 lines (RGB) • .52mm dot pitch data grade tube for crisp, fine detail • U.L.-544 rating for critical environments • 1.5V p-p linear RGB input for true rendition of subtle color tones • Built-in audio amp and speaker

MT-1340G ..... \$660.00

### CT-1301M 13" Color Video Monitor

- CompuFocus CRT • 280 lines resolution • BNC video in/out with automatic termination • 8-pin VTR connector • Headphone jack • Suitable for fleet sales, educational use, corporate communications, visual presentation

CT-1301M ..... \$500.00

### CT-1380V 13" Color Monitor/Receiver

- CompuFocus system • 94 channel capable tuner • 14-position electronic tuner • Panalock audio inputs • Panabrite control • Audio/video out

CT-1380V ..... \$399.00

### CT-1030M 10" Color Video Monitor

- Solid-state IC chassis • Automatic termination • Comb filter • Metal cabinet • Front panel push controls • BNC video/8-pin VCR connectors (selectable) • RCA audio connector • Rackmountable with optional brackets • 300 lines resolution

CT-1030M ..... \$450.00

BA-100 Rackmount brackets ..... pr./50.00

### ST-1000M 10" CCTV Color Monitor

- 100% solid-state IC chassis • 300 lines resolution • BNC video in/out with automatic termination • Comb filter • Metal cabinet and magnetic shield ring (for the deflection yoke) to reduce interference • B/W color mode switch • Front panel controls • Optional rack angle brackets for easy mounting in standard EIA 19" rack • No audio • Use in security, medical, scientific/industrial process observation, fiberoptic and studio monitoring, closed circuit TV applications

ST-1000M ..... \$450.00

BA-100 Rackmount brackets ..... pr./50.00

CT-2580VY

### PRO SERIES S-VIDEO COMPONENT ANALOG VIDEO MONITORS

#### CT-2580VY 25" Pro Series Color Monitor/Receiver

- High quality performance with a 25" 110° tint face screen • 420 lines resolution • 155 channel tuning capability • Programmable channel scan and S-Video input/output terminals for compatibility • 20-function remote control unit with off-timer and last channel/alternate channel one button viewing • Ideal variety of professional applications • Input source selection • Pushbuttons located on the front panel • Two line inputs/VCR input—8-pin • Green LEDs

CT-2580VY ..... \$995.00

#### CT-2010Y 20" Pro Series Color Monitor

- Ideal for business and educational applications • Comb filter and advanced video circuitry • 450 lines resolution • 20" square-corner screen • Source selection can be made using the three pushbuttons located on the front panel • Two line inputs/VTR input • Color, tint, brightness, contrast, sharpness, volume, and vertical hold can also be controlled via the front panel • Audio can be monitored through the built-in speaker or headphones, and up to four video (and audio) inputs can be connected to the rear panel facilities • Includes two sets of line input/output jacks, one set of S-Video input/output terminals and one 8-pin VTR terminal

CT-2010Y ..... \$795.00

CT-1331Y

#### CT-1331Y 13" Pro Series Color Monitor

- Direct compatibility with the S-VHS format, for superb picture quality • Ideal for a wide variety of educational, professional and corporate applications • Interfaces with a wide variety of equipment • 8-pin VCR input, line A/B video input/output (BNC), RCA audio input/output S-Video input/output connectors with bridging capability, for direct compatibility • Input source is switch selectable from the front panel for line A/B, VCR, or Y/C • Front panel controls also include color, tint, brightness, contrast, sharpness, volume, and vertical hold • More than 420 lines resolution for NTSC inputs • Headphone jack • Front mounted speaker • No termination switch—automatic 75 ohm termination

CT-1331Y ..... \$595.00

# COLOR MONITORS

### BT-S700N 7" AC/DC Color Monitor

- Single lever selector for normal scan, pulse cross, under scan and blue-only operation • AC/DC operation • Built-in folding carrying handle • Selectable BNC/VTR inputs via front panel pushbutton • Audio monitoring facilities with built-in speaker

**BT-S700N** . . . . . \$715.00

BT-S700N

### BT-S701N 7" Color Video Monitor

- Line A/B selectable by front panel pushbutton • External sync switch • Front panel controls (concealed behind door) • Single level selector for normal scan, pulse cross, under scan and blue-only operation • Desktop construction design

**BT-S701N** . . . . . \$660.00

BT-702N

### BT-S702N Dual 7" Color Monitor

- Line A/B selectable by front panel pushbuttons • External sync switch • Rackmountable in standard 19" EIA rack • Single lever selector for normal scan, pulse cross, under scan and blue-only operation • Front panel controls (concealed behind door)

**BT-S702N** . . . . . \$1375.00

BT-S1000N

### BT-S1000N 10" Diagonal AC/DC Color Monitor

- Normal/underscan switch • Built-in pulse-cross circuit • Blue-only capability • 300 lines of resolution with comb filter • AC/CD operation • Line/VCR selectable • Automatic 75 ohm termination • External sync switch • Rackmountable

**BT-S1000N** . . . . . \$660.00

BT-S1300N

### BT-S1300N 13" Color Video Monitor

- High resolution CompuFocus picture tube with overlapping field lens gun • Line/VTR selectable • Normal/underscan switch allows viewing of picture corners • Blue-only switch defeats red and green signals and makes hue and chrominance adjustment simpler • Pulse-cross display for easy observation of sync detail

**BT-S1300N** . . . . . \$750.00

BT-M1310Y

### BT-S1900N 19" Color Video Monitor

- High resolution CompuFocus picture tube with overlapping field lens gun • Line 1/2/VTR selectability • External sync switch for use with non-composite video signal • Normal/underscan switch • Chroma switch for black and white display • Blue-only switch defeats red and green signals and makes hue, chrominance adjustment easier • Pulse cross switch (H-delay, V-delay) • Audio monitoring facilities w/built-in speaker

**BT-S1900N** . . . . . \$935.00

BT-D1910Y

### BT-M1310Y 13" Pro Series S-Video Component Analog Color Monitor

- More than 560 lines of horizontal resolution • 0.39mm dot pitch and in-line gun CRT • A/B split, pulse cross, and underscan • Preset selector for contrast, brightness, chroma, phase and aperture • Blue only display • Switch selectable AFC fast/slow, comb/trap filter, RGB cutoff, color/auto/mono mode internal/external sync • BNC connector with automatic termination • Manual degaussing • Front access white-balance adjustment • Tally light • A, B, or RGB selectors with loopthrough; VTR selector • S-Video input with loopthrough • Optional component input (R-Y, B-Y, Y) • 19" EIA rackmountable, metal cabinet • Commercial U.L. listing

### Standard Accessories

- AC power cord • Rackmount handles • Service and operations manual

**BT-M1310Y** . . . . . \$1895.00

### BT-D1910Y 19" Pro Series S-Video Component Analog Color Monitor

All the features of the BT-M1310Y above except for a 0.55mm dot pitch

**BT-D1910Y** . . . . . \$2195.00

# VIDEO/DATA PROJECTION SYSTEMS

### PT-101Y/PT-301Y

#### Color Video/Data Projection Systems

With the PT-101Y and PT-301Y you can throw a clear, bright video image on the screen of your choice, from 50" diagonal to 300" diagonal (PT-101Y: 50"-120"; PT-301Y: 150"-300").

For teleconferencing, business, entertainment and education, Panasonic's advanced electronic and optical expertise gives you a big, bright outlook.

Panasonic's 4-element hybrid lens and dual focus configuration contribute directly to higher resolution, not only at the center, but around the edges as well. So you get better clarity all throughout the image. Liquid cooled CRTs and an improved QPF (Quadra-Potential Focus) gun design produce a brighter, better focused image. (When compared with the PT-101Y.)

#### • Output of More Than 650 Lumens and High 1000-Line Resolution (RGB)

The 7" CRTs have an additional glass plate enclosing a liquid coolant to reduce heat and permit greater power for higher luminous output. A fluorescent coating enhances color quality while doubling the life of the CRT. And Panasonic has improved its QPF electron gun by adding an electrode that results in sharper focus.

Both the PT-101Y and PT-301Y have a 4-element glass/polymer hybrid lens. They also feature an unusual dual focus configuration with separate adjustment for the edges and the full screen. These innovations improve focus accuracy, overall resolution, and raise the contrast level. It also enhances blue display clarity, and reduces loss of detail in bright white areas.

Improved circuitry widens the video bandwidth for better picture clarity. Dynamic-Focus circuitry helps keep the image sharp and clear at the edges of the picture.

#### • Compact, Lightweight, Easy-to-Install

These video projection systems are versatile enough for use in all kinds of locations, from small conference rooms to big department store displays. Either system can easily be moved from one location to another using the PC-101 Carrying Case or the ET-CR101 Custom Adjustable Cart. Both upright and ceiling mount are possible, and you can use front or rear projection. The lightweight, compact chassis and special mounting plate simplify ceiling installation.

Choose the model that meets your range of screen size requirements. The PT-101Y throws an image of 50" to 120" diagonally, while the PT-301Y attains 150" to 300".

#### • 4-System Capability: PAL/SECAM/NTSC 3.58/M-NTSC 4.43

The PT-101Y and PT-301Y let you avoid the delay and expense of format conversion when you're picking up video programs from international sources. These advanced projection systems are compatible with CCIR or EIA standard signals in PAL, SECAM, and NTSC color formats, including M-NTSC 4.43 videotape playback. Let the projector adapt to the input signal automatically, or you can select the format manually.

#### • Line/Video/RGB (TTL/Linear) Selectable

Designed for a broad range of applications, the PT-101Y and PT-301Y can each accommodate three different inputs: Line, Video, and RGB. Select any of these sources instantly with the touch of a button on the control panel. And you have other input options as well. Most RGB cameras and analog RGB computers connect directly to the projector. RGB signals from many IBM PC-type computers can be accepted via the ET-10G RGB Interface (optional). There's also a selection of optional computer connector cables available, so you can project data and images in full color using popular computers. A pair of S-Video/BNC conversion adaptors is available as an option.

PT-101Y

#### • 2,000 Character Display and Blue Mode Selector

Let the PT-101Y and PT-301Y bring the persuasive power of full color large-screen projection to your computer data and graphics. When using the RGB input, you can view up to 2,000 characters, the same number as on a typical 80-column by 25-line computer display. A special Blue Selector circuit lets you choose Fine Blue for enhanced visibility of the blue portions of RGB data displays. Or Blue Mono will produce white characters on an attractive blue background.

#### Additional Features:

- S-video input
- Built-in cross-hatch generator
- Sync inversion switch broadens computer signal compatibility
- Four-corner independent dynamic convergence controls for fast calibration
- Separate high voltage circuit for stabilized raster size
- The PT-101Y projector which is adjustable from 50"-120" diagonal will come factory preset in the following configurations

PT-101Y/72	Preset for 72" diagonal; ceiling mount . . . . .	\$7040.00
PT-101Y/72F	Preset for 72" diagonal; floor mount . . . . .	7040.00
PT-101Y/120	Preset for 120" diagonal; ceiling mount . . . . .	7040.00
PT-101Y/120F	Preset for 120" diagonal; floor mount . . . . .	7040.00
PT-301Y	Video/data projector for 150" to 300" screens . . . . .	7800.00

#### Optional Accessories

ET-10G	PC/RGB interface (cable required) . . . . .	\$495.00
PC-101	Custom carrying case with wheels . . . . .	440.00
ET-CR101	Heavy-duty adjustable cart . . . . .	275.00
ET-721S	Semi-curved 72" screen . . . . .	990.00
ET-SS101	Screen stand . . . . .	440.00
ET-11C15	15 meter remote control cable (approximately 50') . . . . .	185.00
ET-11C30	30 meter remote control cable (approximately 98') . . . . .	275.00
ET-11C50	50 meter remote control cable (approximately 164') . . . . .	385.00
ET-100C	Interface cable for IBM, IBM compatibles, Panasonic PCs . . . . .	65.00
ET-101C	Interface cable for Apple PCs . . . . .	65.00
ET-102C	Interface cable . . . . .	40.00
ET-100YC	Studio Cable . . . . .	POR

## BT-P4500D

### 45" HIGH RESOLUTION VIDEO PROJECTOR WITH COMPUTER INTERFACE AND STEREO AUDIO

This self-contained, rear projection, portable unit is perfectly computer-compatible for use with small groups or for impromptu meetings. Easily set-up or stored, it is an excellent choice for sales meetings, board rooms, school rooms, exhibits, point-of-sales presentations and forms an essential component for management information systems.

The 45" diagonal color picture provides 5 times the viewing area of an ordinary 19" TV set, and features an 80° horizontal viewing angle and a brightness level of 120 foot-Lamberts. The high resolution is attained through the use of 5 element glass lenses and special long persistence phosphors. These features enable a highly viewable display to be produced under normal room illumination so the audience can take notes or refer to written materials during the presentation.

The many modes of the BT-P4500D allow it to be used as a general purpose display device suitable for a wide variety of applications in business, education, entertainment, government and TV or film production. It can display computer generated, real time or stored, data and graphic displays, as well as standard or RGB video. It can demonstrate medical techniques, be used as a VCR or videodisc display or for teleconferencing. As a data display it can operate in a monochrome green mode or in full color.

The unit's height of 5 feet is high enough for seated audiences in many applications and a matching base will be available for larger standing groups. Both the projector and matching base provide casters for easy transport.

The BT-P4500D incorporates interface circuitry and connectors which allow it to be fully compatible with most personal, business and industrial computers. A direct connection is usually all that is required. A total of 27 connectors and 7 mode switches give the projector unmatched interface capabilities. The unit also comes complete with stereo audio amplifiers and high quality speakers.

#### 45" High Contrast Video Image for Presentation Impact

You can reach more people with greater impact when you use the BT-P4500D. The picture size is five times that of an ordinary 19" television and it has a viewing angle of  $\pm 40^\circ$  horizontally. The image has very high contrast and is clearly visible in a well-lit room.

#### 2000-character Compugraphic Display

The superior resolution enables it to display computer graphics with up to 640 x 240 pixels on a non-interlaced display. 80 column, 2000 character displays in full color are sharp and clear. The 7" cathode ray tubes using a P1 phosphor for the green tube, provide a significant improvement in flicker reduction and image clarity as compared to competitive 5" tubes.

#### Multiple Input/Output Jacks Featured as well as 20-pin Computer Terminal

The BT-P4500D offers extensive connection facilities. At the top are standard 8-pin VTR, stereo audio (RCA) and video (BNC/RCA) connectors. In the lower section are RGB inputs used for high resolution video displays. Horizontal/vertical composite or separate sync signals can also be connected or the sync may be superimposed on the green signal. The G-MONO input is used for a monochrome computer data display. A unique 20-pin input connector allows direct connection to IBM, Apple and most other small business and personal computers. Cables are optionally available.

#### Additional Features

- 2-way, 4-speaker system (two 6-1/2" woofers and two 2-3/8" tweeters) and two 8.5W amps for stereo reproduction
- Through-out jacks for RGB, SYNC, VIDEO and AUDIO
- Two AC outlets (150W max. each, unswitched)
- Walnut grain finish
- Space-saving design has front panel controls
- Built-in cross-hatch test pattern generator

# VIDEO/GRAPHICS PROJECTOR

- Optional Cables: ET-100C (IBM)  
ET-101C (APPLE III)  
ET-102C (NEC, PANASONIC)

NOTE: When using the BT-P4500D with an RGB (Computer) input, reduce the brightness level to eliminate the spaces : the top and bottom of the screen. This may be caused by timing differences between computer systems.

#### Specifications

<b>Projection Tube</b>	7" specially developed high-brightness CRT
<b>Inputs</b>	
<b>Computer Interface</b>	eg. APPLE III, IBM, NEC, PANASONIC personal computers
<b>Composite Color</b>	1Vp-p, 1,000 characters (75 ohm)
<b>Composite Monochrome (Green)</b>	1Vp-p, 2,000 characters (75 ohm)
<b>RGB TTL</b>	Separate or composite SYNC (TTL)
<b>RGB Linear</b>	1Vp-p, separate or composite SYNC (TTL) or SYNC-on-GREEN (75 ohm)
<b>Audio</b>	Stereo/Mono, 0.4Vrms
<b>VTR</b>	Direct 8-pin connector
<b>Power Input</b>	120VAC, 60Hz
<b>Power Consumption</b>	215W (average)
<b>Dimensions</b>	57.7"H x 38.2"W x 23.4"D (1,466 x 970 x 595mm)
<b>Weight</b>	204.6 lbs. (93kg)
<b>Computer Compatibility:</b> (partial listing)	
IBM 3101, 3279 (+R.G.B. OUT), 5292, personal computer	
IBM display writer 6580-25L	
APPLE II, IIE, III	
TEKTRONIX 4027	
CHROMATICS 1999	
RAMTEK 6211-1	
DEC Rainbow, professional	
NEC personal computer	
Most 80 character by 25 line terminals	

**Rear Panel:** 27 connectors and 7 mode switches permit any of the following connections:

- RGB plus SYNC inputs with both BNC and RCA jacks
- SYNC can be switched from Linear to TTL
- SYNC can be composite-external, SYNC-on-GREEN or separate horizontal and vertical SYNC
- Loop-through is possible with an additional set of 7 BNC connectors for all above functions
- 8-pin VTR connector — EIAJ
- 20-pin computer input
- Monochrome data input — BNC and RCA
- Stereo audio inputs — RCA
- Two 117VAC convenience outlets, 150W

**BT-P4500D** ..... \$5495.00

**WV-CD50 Solid-State Closed Circuit Camera**

A single CCD chip is employed in the Panasonic WV-CD50 Closed Circuit TV camera to provide a wide array of benefits to the user. Since the Charged Coupled Device (CCD) image sensor eliminates bulky tubes, the camera is extremely compact and lightweight. This gives it a broad scope of applications, including use in installations too small for standard tube-type cameras. In addition, the CCD chip provides consistently crisp images even in limited light. These characteristics make the WV-CD50 ideal for security work, pattern recognition systems, automated inspection, robotic vision systems and all kinds of exacting applications.

**High Sensitivity and Resolution**

The CCD system incorporates approximately 250,000 image elements to virtually eliminate distortion over the entire picture. A very low noise level and wide dynamic range add to image quality. Resolution is a high 380 (H) x 350 (V) lines. Requiring a minimum illumination of only .5FC, the WV-CD50 is an excellent choice for low light situations. Bright lights also pose no problem since there is no possibility of burn-in.

**Built Compact for Convenience**

Solid state CCD chip technology has made a camera small enough to fit into the palm of your hand. The WV-CD50 weighs in at only 200 grams, so it can be used to reduce the size and weight of any equipment which requires a video camera. For example, build the WV-CD50 into robots when unrestricted movement and speed are important considerations. The camera is so compact, it can even be mounted easily on microscopes.

**Easy to Operate**

The power supply unit placed by the monitor is used to operate the WV-CD50. All

major camera functions including power, automatic gain control, gamma and aperture can be controlled from the power supply. You can set the camera and its power supply up to 325 feet apart.

**Withstands Rough Conditions**

The WV-CD50 is virtually unaffected by the vibrations and magnetic fields that can put tube cameras out of business. Thus it keeps working even in locations where large amounts of electricity are used.

**Long Life**

The use of a CCD semi-conductor element in the WV-CD50 means stable performance for many years, easy maintenance and a low power consumption.

\*Built-in lens C-mount adaptor: WV-AD20

**Specifications**

**Camera Head WV-CD51**

- Pick-up Element:** 510 (H) x 492 (V)
- Scanning Area:** 6.83 (V) x 9.07 (H)mm
- Lens Mount:** Special (built-in C-mount adaptor)
- Synchronization:** Internal/External 2:1 Interlace
- Scanning Frequency:** Horizontal: 15.737kHz  
Vertical: 59.9Hz
- Video Output:** 1.0Vp-p Composite/75 ohms (BNC connector)
- Resolution:** Horizontal: More than 380 lines at center  
Vertical: More than 350 lines at center
- Minimum Illumination:** 5 lux (with F1.4)
- Recommended Illumination:** 100 lux
- Light Control:** Depending on optional lens used
- S/N Ratio:** More than 46dB

**The length between Camera head and Power Supply:**

Maximum 328 ft. (100m)  
 (With optional extension cable: WV-CS150 2pcs)

**Ambient Temperature:**

+ 14°F to + 122°F (- 10°C to + 50°C)

**Dimensions (excluding lens):**

1-5/8" (W) x 1-5/8" (H) x 2-3/16" (D)

41 (W) x 41 (H) x 55 (D)mm

**Weight (excluding lens):**

approx 0.5lbs (200g)

**Power Supply WV-CD52**

**Power Source:**

AC 120V 60Hz

**Power Consumption:**

12W

**Gamma on/off:**

on: 0.6

**AGC (Automatic gain control) on/off:**

on: + 10dB

**Dimensions:**

5-1/2" (W) x 2" (H) x 5-1/16" (D)

140 (W) x 51 (H) x 129 (D)mm

**Weight:**

approx 2.6lbs (1.2kg)

WV-CD50 . . . . . \$ 1690.00

# CCD COLOR CAMERAS

## WV-CD110A/KT

### Color Mini Camera with Camera Drive Unit

- The WV-CD110A color CCTV camera features a single cable connection to the WV-PS10A camera drive unit. The CCD (charge coupled device) used in the WV-CD110A camera creates a high resolution picture with virtually high image burning resistance, no geometric distortion, with low lag and longer life
- The Automatic tracing White-Balance (ATW) through the lens sensor in the WV-CD110A camera, ATW continuously adjusts the picture during changes in lighting conditions for the best possible color reproduction. The camera can also be switched for manual white balance setup when required
- With the use of the optional WV-AD20 C-mount lens adaptor a variety of auto iris and manual iris lenses can be used with the WV-CD110A camera (\*Note: recommended for use with lenses with neutral density filters)
- For multi camera systems the WV-PS10A camera drive unit delivers VD signal for system synchronization
- With its full line of features, coupled with its excellent color reproduction and small size, the WV-CD110A/KT color CCTV camera and camera drive unit offers an excellent choice for surveillance, medical and industrial applications

WV-CD110A  
(Lens Optional)

WV-PS10A

## Specifications

### WV-CD110A Solid-State Color Camera

<b>Power Supply:</b>	To be supplied from the camera drive unit WV-PS10A
<b>Pick-up System:</b>	Sequential color difference
<b>Pick-up Device:</b>	One integral stripe filter CCD 422(H) x 489(V)
<b>Resolution:</b>	Horiz.: > 280 lines at center Vert.: > 350 lines at center
<b>Recommended Illumination:</b>	35fc (350 lux)
<b>Min. Illumination:</b>	1fc (10 lux) at f/1.4, at high gain
<b>Luminance S/N:</b>	46dB
<b>White Balance:</b>	Auto (Auto tracing white-balance)/Lock (Manual) switchable
<b>Gain Control:</b>	Normal/high (+ 6dB) switchable
<b>ALC Lens Select:</b>	Standard (STD)/Option switchable
<b>Ambient Operating Temp.:</b>	14°F to 104°F (-10°C to +40°C)
<b>Dimensions:</b>	2 <sup>5</sup> / <sub>16</sub> " H x 2 <sup>1</sup> / <sub>16</sub> " W x 4 <sup>7</sup> / <sub>16</sub> " D (58 x 74 x 112mm)
<b>Weight:</b>	0.9 lbs. (400g)

WV-D5010 (With Optional Lens)

<b>WV-CD110A/KT</b>	Consists of WV-CD110A Color Camera/Mounting Bracket and WV-PS10A Camera Drive unit . . . . . \$1335.00
<b>WV-CD110A</b>	Camera head only . . . . . 1025.00
<b>WV-CMS1A</b>	Consists of WV-CD110A mounting bracket, WV-CM110A 10" Color Monitor . . . . . 2185.00
<b>WV-PS10A</b>	Camera drive, external drive in/out, VP/Sync not rackmountable . . . . . 290.00
<b>WV-PS10</b>	Camera drive unit same features as WV-PS10A except it is rackmountable . . . . . 260.00

## WV-D5010 Video Camera (Camera head only)

The WV-D5010 is a component video camera that offers great flexibility in system configurations. A full range of available accessories can tailor this camera system to meet your specific needs, and provide considerable system potential for the future.

- Integrated color mosaic filter single chip CCD System
  - 2/3" CCD insures high quality and virtually eliminates burn-in and after image. And 286,000 pixels assure superior reproduction quality
  - Signal-to-noise ratio — 46dB
  - Minimum illumination — 7 lux at f/1.4
  - Auto Tracing White Balance (ATW) or Manual Setting (AWC)
  - 2 line vertical enhancer
- WV-D5010** . . . . . \$ 1275.00

### WV-CD130 Series Solid-State CCD Color Cameras

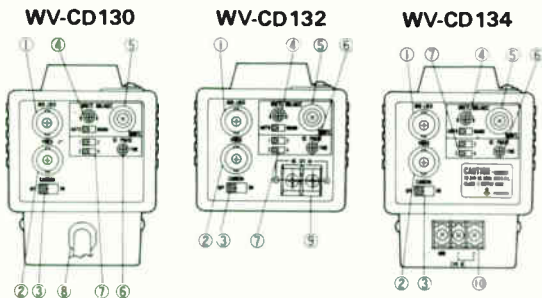

- Pick-up element is a  $\frac{2}{3}$ " CCD 510(H) x 492(V) color pixel 330 lines of horizontal resolution and 350 lines vertical resolution
- Long life and high reliability from the use of all solid-state components and a metal camera case
- Genlock feature for multi camera system
- The unique ATW (automatic tracing white balance) sensor in the WV-CD130 camera series continuously adjusts the picture during changes in lighting conditions for the best possible color reproduction. The camera can also be switched for manual white balance setup when required
- High sensitivity 1fc (10 lux) at f/1.4 minimum illumination
- Clear images from low contrast subjects using built-in Automatic Gain Control (AGC) circuit
- Low sensitivity to image burn and negligible lag
- Precise image geometry through the use of solid-state processing
- Compact and lightweight construction with protection against shock and vibration
- Built-in selectable camera identification generator offers numbers from 0 to 999 for camera ID in systems operations

The WV-CD130 CCTV surveillance camera series are high quality picture and compact color cameras that offer some of the most advanced features available today.

Incorporating innovative Charge Coupled Device (CCD) single-chip sensors, these cameras perform superbly and offer improved maintenance-free operation.

# WALL MONITOR MOUNTS

042-356-02

## Single Arm Style Wall Mounts

Peerless Wall Swivel Mounts conserve valuable floor space and provide a perfect viewing angle. The universal, random perforated mounting trays and a wide range of available sizes assure you of getting the right mount for the job.

All of the single arm style wall mounts offer 120 degrees of swivel. Tilt can be specified to meet your requirements: flat tray (no tilt); fixed 10° tilt; or adjustable tilt, up to 15°

Locking security trays allow for easy removal of the set for servicing, as well as adding security.

Brackets are finished in solar black baked enamel.

Model	Description	Tray Size	Tilt	Locking	Price
042-354-02	Wall swivel for 20" cube style set	20" W x 11" D	Flat	Yes	\$50.00

2176-000	Wall swivel for larger 16" sets	19" W x 15" D	Flat	No	32.60

2121-000

## Double Arm Style Wall Mounts

Where maximum head clearance is an important concern, and where a locking tray is not required, Peerless double arm style wall swivel is an excellent choice. Almost all the bracket is hidden by the TV or monitor, giving your installation a clean, unobtrusive appearance.

Swivel is 15° in either direction. Finished in solar black baked enamel.

Model	Description	Tray Size	Price
2121-000	Non-locking universal wall swivel	24" W x 13 1/2" D	\$37.60
2121-010	Non-locking universal wall swivel, fixed 10° tilt	24" W x 13 1/2" D	39.60
2116-000	Non-locking universal wall swivel	19 1/4" W x 15" D	35.00

## Yoke Style Wall Mounts

Peerless sturdy yoke style wall mounts give a professional, high-tech look to any TV/monitor installation. They are especially suited for medium and larger sets, and feature unlimited swivel and tilt.

Both height and width of the yoke bracket can be adjusted, and the 13" deep mounting tray is randomly perforated to accommodate virtually any make and model monitor, up to 27" screen size. Unit is finished in solar black baked enamel.

The yoke style mount is also available with cabinet mounting plates in place of the perforated tray. These attach at the bottom edge on each side of the monitor cabinet.

The yoke style bracket is also available as a ceiling mount.

Model No.	Description	Height	Width	Price
1469-170	Small yoke wall mount for 16" set	12" to 18"	13 <sup>3</sup> / <sub>4</sub> " to 22"	\$157.00
1469-128	Small yoke wall mount for tall 19" set	18" to 24"	13 <sup>3</sup> / <sub>4</sub> " to 22"	169.00
1470-171	Yoke wall mount for 19" set	12" to 18"	22" to 36"	162.00
1470-173	Yoke wall mount for 21" to 27" set	18" to 24"	22" to 36"	166.00
1471-234	Large yoke wall mount for 25" -27" set	24" to 30"	22" to 36"	173.00

## Small Monitor Wall Mounts

For TV receivers and monitors 9" to 16" select one of Peerless' small monitor wall swivels. All of the models below offer 120 degrees of swivel and adjustable tilt. All are equipped with a security tray using a key-type lock.

Finished in solar black baked enamel.

## CEILING MOUNTS

Yoke Style Bracket

Structural Ceiling Box

Suspended Ceiling Assembly

Extension Column

Escutcheon Plate

### Yoke Style Mounts

Sturdy construction and high-tech good looks make the yoke style ceiling mount a favorite choice of professionals for TV and video monitor installations.

These brackets feature unlimited swivel and tilt. Also, both width and height of the bracket are adjustable, so that virtually any size monitor can be accommodated. The yoke bracket comes equipped with a randomly perforated 13" deep mounting tray for easy attachment of the set. Top bar of bracket has a 1/2" mounting hole as standard, or a 3/4" mounting hole if specifically ordered. Unit is finished in solar black baked enamel.

Note: Yoke bracket may be ordered with cabinet mounting brackets, which attach to the bottom edge on each side of the monitor, in place of the perforated mounting tray.

Yoke style ceiling mounts are ideal for suspended ceilings, as well as structural and finished ceilings. Simply order the appropriate mounting kit along with the yoke bracket for your application.

### 1433-460 Structural Ceiling Kit

In the structural ceiling assembly, a ceiling box, finished in white baked enamel, bolts directly to structural ceiling or beam. Yoke bracket is then bolted through center hole of ceiling box. Dimensions of ceiling box are 2 5/8" H x 11" W x 8" D.

### 1433-450 Suspended Ceiling Kit

An assembly for installing monitors, receivers, or audio speakers in areas where false ceilings, with a typical 2' x 2' or 2' x 4' grid pattern, are in place.

A metal box is set into a grid system itself, replacing one of the ceiling tiles. Support bars over 8' long are laid on top of the box section and attached to it with brackets. The support bars cross at least 3 main runners, where the grid systems' tie wires are placed. These elements, along with five additional tie wires, will spread a concentrated load over a large area. The need to bolt the yoke bracket directly to the structural ceiling has been eliminated and installation is greatly simplified.

### 1433-465 Finished Ceiling Kit

Where a finished structural ceiling exists, use the almond baked enamel Finished Ceiling Plate to complete a neat, clean installation. (May also be ordered in black).

### 1445-000 Extension Column

Can be used in either of the above installations in order to lower the level of the installed set. The extension column is finished in woodgrain vinyl and has a 1/2" threaded rod running through the center. Order in 1' increments (minimum billing 2'). May be cut to exact size on the job.

### 1418-000 Escutcheon Plate

When using the extension column to come through a false ceiling, use this escutcheon plate, or finishing ring to give a neat, trim appearance to your installation.

### Small Monitor Ceiling Mounts

Model 052-307-02 offers an easy, attractive way to ceiling mount a small monitor. It features both swivel and tilt, with a universal locking security tray measuring 9" x 9". Standard clearance to ceiling is 12". If additional clearance is required, order extension column 1445-000. This extension column replaces the bracket's standard column and should be measured to provide the total desired clearance.

Model 052-310-02 has the same design and features as 052-307-02, but provides a tray measuring 11<sup>1</sup>/<sub>2</sub>" W x 9<sup>1</sup>/<sub>2</sub>" D, or 9<sup>1</sup>/<sub>2</sub>" W x 11<sup>1</sup>/<sub>2</sub>" D. Standard clearance to ceiling is 15".

Model 052-314-02 is ideal for most monitors in the 10" to 16" range. Tray is 13" W x 12" D. Has swivel, tilt, and locking tray. Includes white ceiling box. Capacity limited to 35 lbs.

Model 052-334-02 has same design and features as 052-314-02 with 17" W x 12" D tray.

Model	Description	Tray Size	Price
052-307-02	Small monitor ceiling mount	9" W x 9" D	\$66.00
052-310-02	Small monitor ceiling mount	9 <sup>1</sup> / <sub>2</sub> " W x 11 <sup>1</sup> / <sub>2</sub> " D	79.00
052-314-02	Small monitor ceiling mount	13" W x 12" D	87.00
052-334-02	Small monitor ceiling mount	17" W x 12" D	93.00

# CAMERA MOUNTS

## Camera Mounts

CCTV camera mounts, both light duty and heavy-duty, are available in a wide range of styles and capacities. Our light-weight camera mounts, in diecast aluminum or plastic, are ideally suited for use with today's small cameras.

For camera installations where a drop ceiling is in place, false ceiling camera scissor clamps quickly and easily to the ceiling's T-bar supports. This mount is available in 5" or 9" length, finished in either black, with aluminum pan/tilt, or almond with plastic pan/tilt.

# A/V EQUIPMENT CARTS

1542-000

1542-500

## Jumbo Carts

Mobility, stability, and safety are what professionals look for in an equipment cart, and that is why Peerless has developed the Jumbo line of carts.

Jumbo carts feature flared profile design for maximum stability, heavy gauge steel construction, with absolutely no spot welds, and heavy-duty 8" pneumatic wheels.

Now available in four sizes, as listed below, each jumbo cart can be ordered with an electrical outlet box offering 4 grounded receptacles and a heavy-duty 15' extension cord. Outlet box mounts to the side of cart.

Jumbo carts are finished in solar black baked enamel. Completely MIG welded at the factory. They ship fully assembled and ready for immediate use.

Model	Description	Height	Base	Price
1540-000	Jumbo cart	54"	39 x 27	\$ 395.00
1542-000	Jumbo Junior cart	47"	34 x 24	355.00

1503-200	8" dia. pneumatic rigid caster			43.00

Style A

Style C

Style B

## Educational Television Carts

In addition to the Jumbo line, Peerless offers three distinct tubular frame ETV carts, all 50" high and all featuring 4" solid stem casters.

The style A cart has three shelves and measures approx. 23" x 33" at the base.

The style B cart has two shelves, with 13" of clearance between, and measures approx. 26" x 36" at the base.

The style C cart has two shelves, with 26" of clearance between, and measures approx. 23" x 33" at the base.

Any of these three cart styles may be ordered with a metal top shelf, as shown, or an adjustable tilt, ventilated and insulated top shelf.

## PV-C66A VHS Camcorder

- Weighs only 4.4 lbs. • Recording time of up to 2 hours and 40 minutes • High speed shutter control—variable settings • Four high speed settings, up to  $\frac{1}{2000}$  second, provide blur-free action shots during slow motion or still playback • HQ circuitry • Auto-focus (with manual control) • Continuous auto white balance • Auto iris • Electronic self-timer • Manual iris control •  $\frac{2}{3}$ " (B/W CRT) electronic viewfinder for constant playback capability • Viewfinder adjustable for left-eye viewing, also displays vital information such as: battery condition, low light level warning, high speed shutter setting and the date, which can be recorded on the tape • When used with

the audio/visual adaptor it can record television programs directly from any monitor/receiver equipped with A/V output jacks • Powered by battery, AC or with a car battery adaptor in a car's cigarette lighter • Playback through a conventional television set or another VCR •  $\frac{2}{3}$ " MOS Image Sensor pickup tube • NTSC 525 lines, 2:1 interlace • 7 lux minimum illumination (at 50 IRE) • 7-100,000 lux automatic sensitivity control • f/1.6 special mount lens, 6X zoom macro function • Unidirectional microphone • 350 lines horizontal resolution

PV-C66A . . . . . \$1899.00

## PV-C800A Camera/Recorder "Movie 8"

- 8mm format • Horizontal resolution—350 lines •  $\frac{2}{3}$ " MOS pickup • 7 lux minimum light level • f/1.2 lens • Auto-focus • 6:1 power zoom • Up to 2 hours recording time • Electronic viewfinder • Search/still frame • Audio/video output • Audio video input • RF compatible • Microphone jack • Earphone jack • Constant/manual auto-white balance • Review feature • Detachable carrying handle • Date switch • Auto/manual control • 5.3" H x 4.9" W x 12.0" L • Weight: 3.2 lbs. (without battery)

PV-C800A (No. 8103070) . . . . . \$1749.00

PV-C800A

## PV-C850A 8mm Video Camera/Recorder

- Compact size • Lightweight 2.4 lbs. (or 2.8 lbs. with a PV-BT810 battery pack and a P6-30 cassette) • Designed extra slim • High-performance  $\frac{1}{2}$ " CCD image sensor • Fully automatic system—infrared focusing, white balance and iris control • High-speed shutter mechanism employs a shutter speed of  $\frac{1}{2000}$  second • Three-head system incorporates an extra special effects head • Full video-deck capability • Flying Erase (FE) head • Hi-Fi recording • Adjustable  $\frac{2}{3}$ " electronic B&W viewfinder with indicators for recording status, battery level, tape counter/remaining time, shutter and date • Power assisted 6X (9mm-54mm) f/1.4 zoom lens with macro function • Required minimum illumination: 7 lux • Power assisted cassette load/eject mechanism • High sensitivity unidirectional electret microphone • 3-way power source (battery pack, AC and DC car battery) • Tape counter memory function • Earphone jack • Mike jack • Camera remote jack • Accessory shoe

PV-C850A . . . . . \$1849.00

## ON-BOARD Camera Power

<b>H12</b>	ON-BOARD battery, 4 AH 12 volt	<b>\$400.00</b>
<b>H14</b>	ON-BOARD battery, 4 AH 14.4 volt	<b>\$440.00</b>
<b>H77</b>	ON-BOARD battery, 4 AH + 7.2 volt for HL77 Camera	<b>\$450.00</b>
<b>HAC3</b>	ON-BOARD AC Adaptor, 40 watts 13.5 volts	<b>\$495.00</b>

## BRICK Pack Batteries

<b>B12G</b>	BRICK Pack battery for 12V Sun Gun, 4 AH 12 volt with 3-pin amphenol connector	<b>\$395.00</b>
<b>B12</b>	BRICK Pack battery, 4 AH 12 volt with 5-pin XLR	<b>\$395.00</b>
<b>B14</b>	BRICK Pack battery, 4 AH 14.4 volt with 4-pin XLR	<b>\$425.00</b>

## FAST Charge Nicad VTR Batteries

<b>V90</b>	FAST Charge VTR battery for BVU 50/110, a direct replacement for Sony BP90—will also charge from the BC 210 Nicad charger or overnight charge	<b>\$295.00</b>
<b>V90N</b>	Standard Charge VTR battery for BVU 50/110, a direct replacement for Sony BP90—will charge from the BC 210 Nicad charger or overnight charge	<b>\$275.00</b>
<b>V60</b>	VTR battery for V04800 etc., FAST charge Nicad	<b>\$210.00</b>

## Universal FAST Charger

<b>UF1</b>	Universal Safety Charger, 100/120/220/240 volt 50/60 Hz, FAST charges all PEP batteries* *ON-BOARD models H14 and H12 as well as Anton/Bauer 4 AH Nicad "Snap-on" batteries mount directly on charger battery bracket for charging. All other batteries require charge adapter cable for connection	<b>\$450.00</b>
<b>HL</b>	Charge adapter cable for 2 AH ON-BOARD batteries L12 and L14 to UF1 charger	<b>\$30.00</b>
<b>HS</b>	Charge adapter cable for 4 AH BRICK Pack batteries B12G, B12 and B12S and for FAST charge VTR batteries V20, V44 and V60	<b>\$30.00</b>

<b>HC</b>	Charge adapter cable for V90 FAST charge BVU 50/110 battery	<b>\$30.00</b>
<b>HX</b>	Charge adapter cable for B14 BRICK Pack	<b>\$30.00</b>

## Battery Charging Stations

<b>BCS 5</b>	Simultaneously FAST charges up to five (5) PEP ON-BOARD or Anton/Bauer "Snap-on" 4 AH Nicad batteries in less than one (1) hour	<b>\$1595.00</b>
<b>BCS 90</b>	Simultaneously Overnight Charges up to eight (8) PEP V90 N or Sony BP90 batteries	<b>\$395.00</b>
<b>BCS 5/90</b>	Simultaneously FAST charges up to five (5) PEP ON-BOARD or Anton/Bauer "Snap-on" 4AH Nicad batteries in less than one (1) hour, and at the same time, overnight charges eight (8) PEP V90 or Sony BP90 batteries in twelve (12) hours	<b>\$2090.00</b>

## Overnite Trickle Chargers

<b>N12H</b>	Overnite (14 hr.) trickle charger with H connector for 4 AH 12 volt ON-BOARD battery H12	<b>\$75.00</b>
<b>N14H</b>	Overnite (14 hr.) trickle charger with H connector for 4 AH 14.4 volt battery H14	<b>\$75.00</b>
<b>N122L</b>	Overnite (14 hr.) trickle charger with L connector for 2 AH ON-BOARD 12 volt battery L12	<b>\$75.00</b>
<b>N142L</b>	Overnite (14 hr.) trickle charger with L connector for 2 AH ON-BOARD 14.4 volt battery L14	<b>\$75.00</b>
<b>N12S</b>	Overnite (14 hr.) trickle charger with SEN connector for 4 AH BRICK 12 volt batteries B12G, B12 and B12S	<b>\$75.00</b>
<b>N122S</b>	Overnite (14 hr.) trickle charger with SEN connector for 2 AH VTR batteries V20, V44 and V60	<b>\$75.00</b>
<b>N12C</b>	Overnite (14 hr.) trickle charger for V90 and V90N VTR battery	<b>\$75.00</b>
<b>N14X</b>	Overnite (14 hr.) trickle charger for B14 BRICK battery	<b>\$75.00</b>

## 30 Volt DC Portable Battery Packs

- F-30-EC** "Frezzi-Belt" battery pack. 30 volt. 4 AH output capacity. Includes internal battery charger (14 hours) **\$545.00**
- F-30-EXFA** "Frezzi-Belt" battery pack. 30 volt. 4 AH output capacity. Re-charges in 1 hour or less with "Frezzi-Fast" Charger (see below). Also includes internal battery charger (14 hours). **\$595.00**
- BC-30C** Fully charges 30 volt "Frezzi-Belt" Model F30-EXF Battery Pack (above) in 1 hour or less. Requires 120/240 volt, 60hz AC input **\$450.00**

## Battery Mounting Brackets

- HM300** Battery Mounting Brackets for BVP 300/330 and Thompson MC601. Mounts ON-BOARD batteries H12, H14, L12, and L14 **\$105.00**
- HM76B/C** Battery Mounting Bracket for RCA TK76B and TK76C. Mounts ON-BOARD battery H14 **\$155.00**
- HM77** Battery Mounting Bracket for HL77. Mounts ON-BOARD battery H77 **\$145.00**

## Six (6) AMP-HR Power Belts

- F-12-EXF** (12V) 6 AH Recharges in 1 hour or less with PEP model UF1 Universal Safety Charger also includes internal battery charger (14 hours) **\$475.00**
- F-14-EXF** (14.4V) 6 AH Recharges in 1 hour or less with PEP model UF1 Universal Safety Charger also includes internal battery charger (14 hours) **\$495.00**

## 12 Volt OB Lights

- FL12V** Lighthead with cable terminated in 2-pin amp connector for use with PEP model V90 FAST charge VTR battery. Includes FAV 100 watt bulb, 1/4 - 20 TV camera mount stud and removable handle **\$195.00**
- FL12C** Lighthead with cable terminated in Sony VTR plug in-line connector for use with V90N standard charge battery. Includes FAV 100 watt bulb, 1/4 - 20 TV camera mount stud and removable handle **\$195.00**

## FL12G

Lighthead with cable terminated in 3-pin amphenol connector for use with B12G battery. Includes FAV 100 watt bulb, 1/4 - 20 TV camera mount stud and removable handle **\$195.00**

## FL12S

Lighthead with 24" cable terminated in XLR4 rt. angle connector for use with PEP model B12S BRICK battery. Includes FAV 100 watt bulb, 1/4 - 20 TV camera mount stud and removable handle **\$195.00**

## Belt Holsters

- BHV** Belt Holster for V90 battery, use with FL12 light **\$35.00**
- BHC** Belt Holster for ER6/V90N battery with retainer for in-line DC plug and mate, use with FL12C light **\$45.00**
- BHG** Belt Holster for ER6/V90N battery to 3-pin amphenol output, use with FL12 G light **\$55.00**
- BU** Belt, 2" Leather, cut to length **\$25.00**

## Lamps

- FAV** 100 watts/11.5 volts DC **\$30.00**
- FBT** 150 watts/30 volts DC **\$37.00**
- FBV** 250 watts/30 volts DC **\$39.00**

## Model FL Portable Light

- FL30** Lighthead with 30 volt DC 150 watt. Model FBT lamp, handle, power cable with plug. (Lighthead accepts 150 or 350-watt lamps — see below) **\$195.00**
- FLDF-101** Dichroic Filter (swing away) **\$88.00**
- FLS-101** Scrim (swing away) **\$44.00**
- FLCM-101** 1/4 - 20 Video Camera Mount Stud **\$12.00**
- FLCM-102** Dove-Tail Film (cine) Camera Mount **\$45.00**
- FLSS-101** Lightstand **\$68.50**
- FLH-101** Replacement Handle **\$12.00**

# GAFFER'S TAPE

## GAFFER'S TAPE

### Application

Popular matte-surface cloth tape used throughout the photography/motion picture/television industries for a wide range of holding and sealing applications—temporary mounting of lighting fixtures and reflectors; moisture and dust-proof sealing of equipment cases and film containers; protecting and positioning of floor cables. The versatile product preferred by photographers, cameramen and grips whenever an extra-strong, waterproof and easy-to-use cloth tape is needed.

### Features/Benefits

Gaffer's Tape is conformable to odd-shaped and irregular surfaces. Provides a positive, waterproof and dirt resistant seal...yet permits easy, clean removal. Easy hand tear. Performs well over a wide range of temperatures...indoors or outdoors. Excellent shock resistance...and, abrasion resistant.

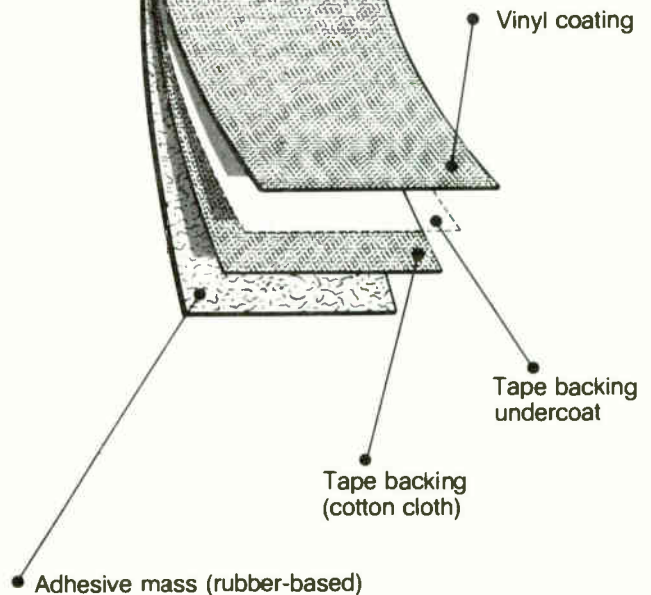

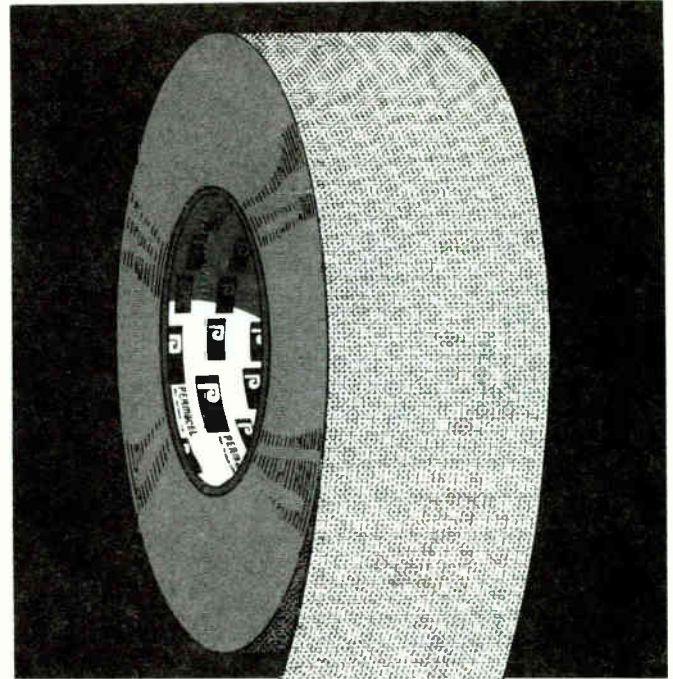

### Technical Data

<b>Backing Material:</b>	Vinyl coated cotton cloth
<b>Adhesive:</b>	Rubber-based
<b>Colors:</b>	Gray, Black
<b>Total Tape Thickness:</b>	14.0 mils/0.356mm
<b>Tensile Strength:</b>	50 lbs. per in./8.94kg per cm
<b>Unwind at 150FPM:</b>	30 oz. per in./335gm per cm
<b>Adhesion to Steel:</b>	40 oz. per in./446gm per cm
<b>Gov't. Specification:</b>	None applicable

# SURGE SUPPRESSORS

PD-200

## Surge Suppressors/Extended Life Surge Suppressors

Protection from power line noise and surges with fail-safe automatic shutdown.

### Surge Suppressors

- Suppression on all 3 power line conductors
- Low let-through voltage
- High single-surge energy rating
- Fail-safe Automatic Shutdown\* Duplex receptacles

Surge Suppressors feature single-stage filtering, provided by three heavy-duty metal oxide varistors, to provide protection on all three conductors in a typical 120VAC circuit.

### Extended Life Surge Suppressors Additional Features

- High steady-state (repetitive surges) power rating
- Lower let-through voltage
- High pulse lifetime
- Reduced RF/EMI "noise"

Extended Life Surge Suppressors have a 2-stage circuit which uses heavy-duty metal oxide varistors to protect you against high-voltage lightning-induced surges, and high-speed semiconductor devices to protect against frequent fast surges. Only this kind of hybrid circuit can provide the necessary high power dissipation while still providing fast response time and low let-through voltage.

## Specifications

	Perma Power Surge Suppressors 1875W	Extended Life Surge Suppressors 1875W
<b>Electrical Rating:</b>	15A	15A
<b>Resettable Circuit Breaker:</b>	Normal (line-to-neutral) Common (line-to-ground) Common (neutral-to-ground)	Normal (line-to-neutral) Common (line-to-ground) Common (neutral-to-ground)
<b>Protection Modes:</b>	1ns	5ps
<b>Response Time<sup>1</sup>:</b>	70 joules each mode (210 total)	70 joules each mode (210 total)
<b>Energy Dissipation:</b>	225VDC	225VDC
<b>Clamping Threshold: (Nominal):</b>	156VRMS	156VRMS
<b>Let-Through Voltage<sup>2</sup>:</b>	400V	270V
<b>Pulse-Life<sup>3</sup>:</b>	10 <sup>6</sup> cycles	10 <sup>6</sup> cycles
<b>Pulse Life<sup>4</sup>:</b>	10 <sup>4</sup> cycles	10 <sup>6</sup> cycles
<b>Steady-State Power:</b>	0.8W	5.0W
<b>Max. Transient Voltage<sup>5</sup>:</b>	> 6000V	> 6000V
<b>Noise Filtering:</b>	More than 10dB, 5-50MHz	More than 20dB, 2-100MHz

### Test Waves

1. Manufacturer's specification for the intrinsic component material
2. U.L. Std. 1449, Revisions effective July, 1987; 1.2 x 50μs, 6000V; 8 x 20μs, 500A
3. ANSI Std. C62.41 (IEEE 587-1980); 0.5μs, 100kHz, 6000V, 200A, ringwave
4. 5kW peak, 10 x 1000μs, exponential. (Accepted industry test impulse for inductive load switching transients)
5. Limited in 120VAC distribution systems by wiring devices arc-over to 6000V peak (ANSI Std. C62.41)

## PD-200 Tele-Line™ Surge Suppressor

The Tele-Line Surge Suppressor protects your modem, computer, terminal or electronic telephone equipment from power surges on your phone line. This wall plug-in unit provides complete protection, even if the primary telephone service entry surge arrestor is non-functional. Tele-Line Surge Suppressors employ a 3-element gas tube and three metal oxide varistors (MOV) in a coordinated 2-stage circuit. Let-through voltage is 350V max.

The Tele-Line Surge Suppressor connects to the power line earth ground through your power receptacle. An indicator lamp confirms the existence of a positive earth ground connection.

A separate Tele-Line Surge Suppressor is required for each line in a multiple-line system.

## Specifications

<b>Connectors:</b>	2 RJ-modular Tele-Line jacks; 7' jumper wire included
<b>Indicator Light:</b>	Earth ground
<b>Dimensions:</b>	4 <sup>3</sup> / <sub>4</sub> " H x 3 <sup>1</sup> / <sub>8</sub> " W x 2 <sup>1</sup> / <sub>4</sub> " D
<b>Protection Modes:</b>	Normal/metallic (line-to-line) Common/longitudinal (lines-to-ground)
<b>Clamping Voltage:</b>	180V
<b>Let-through Voltage<sup>1</sup>:</b>	350V peak
<b>Response Time:</b>	1ns
<b>Pulse Life<sup>2</sup>:</b>	10,000 cycles

### Test Waves

1. FCC Docket 19528 (Part 68, Subpart D)
2. IEEE Standard 587 (8 x 20μs, 500A, unipolar current wave)

# MULTIPLE OUTLET STRIPS

## Sockets Plus™ Multiple Outlet Strips

**Convenient.** Sockets-Plus multiple outlet strips are the quickest, most convenient way to provide electric power when and where it's needed, with convenient control and complete safety. Conventional cube taps and extension cords can result in overloaded circuits and chaotic stacking of plugs into existing wall outlets. Sockets-Plus multiple outlet strips provide orderly power distribution, as well as control and safety.

**Extra features.** On/off switches and indicator lights are extra features that put the user in complete control of his local power use. See at a glance what's on, what's off. Save steps; easily control power to any machine, computer, or lamp with handy on/off switch options.

**Safe.** All Sockets-Plus multiple outlet strips come with 3-wire U-ground outlets, and are housed in electrically-grounded steel cases. Because they have built-in circuit breakers, there's no danger of overloading one of the main circuits. If the power drain is too great, they shut off the power here, not in a fuse box somewhere down the line. The line is guarded, so users can relax.

High abuse/hospital strips are designed for applications with special safety requirements, or where equipment is exposed to fumes from corrosive chemicals or liquids. Their plugs and receptacles are "Hospital Grade"—verified by Underwriters Laboratories to have passed a series of torturous tests assuring the user of continuous, safe operation, even in the face of human negligence and corrosive environments.

## General Specifications

Rugged steel construction, tough silver and black industrial finish—Top is electrostatically painted silver enamel over a zinc phosphate undercoating, resulting in a hard, corrosion-resistant surface. Sides of conventional-length strip models (K case) are zinc chromated and then covered with thick (14 mil) black vinyl panels, providing added protection, plus handsome appearance. Sides of "J" unit long strips are painted black. Rack-mount strips have black or silver front, and silver back. Easy mounting—All strips are provided with two screws and cross-slots on the bottom for rapid mounting.

PM 5539

### PM 5539 TV Color Analyzer

- First practical solution to the problem of 'objective setting' of color monitors
- The three LED bars mounted over each other ensure quick and accurate reading of the color levels and balance
- High sensitivity allows accurate setting of the color white at low luminance levels

The PM 5539 has been developed to meet the increasing demand for measurement and adjustment of the 'color' white of color TV-sets and color monitors.

The light emitted by a color picture tube consists of the three primary colors: red, green and blue. White is obtained by additive mixing of these colors in the appropriate proportions. The PM 5539 has three independent LED displays so that the intensities of the three primary colors can be measured simultaneously.

To cope with different white standards or different brands of picture tubes, the PM 5539 has four matrix circuits which can be adjusted to give correct readings. The white level is normally adjusted at both high and low brightness levels, but the ratio of the three primary colors should also stay the same at gray levels. To permit this gray scale tracking, the PM 5539 has a wide sensitivity range (1 to 300 NIT full scale).

PM 5539 . . . . . \$3695.00

PM 5565

### PM 5565 Waveform Monitor

- Designed for use in broadcast studios and OB vans
- Input at the front for a standard oscilloscope probe
- Internal graticule for accurate level readings
- Low power consumption
- Compatible with other brands of waveform monitors

PM 3055

### PM 3055

#### Dual Time Base Oscilloscopes

- 50MHz bandwidth; 5ns timebase
- Design concept for more performance at an unbeatable cost
- Front-panel layout promotes simple, secure operation
- One-touch autoset for instant signal display
- LCD panel gives at-a-glance display of settings, status and error messages
- Fast action up/down controls and menu-driven softkeys
- Versatile triggering functions up to 100MHz
- IEEE interface option

The PM 3055 sets standards in ease of operation and price/performance for 50MHz oscilloscopes. This breakthrough in scope technology introduces well-accepted principles like microcomputer control for simple, secure operation, plus cost-effective manufacturing techniques. The auto-set function automatically sets amplitude, timebase and triggering, for instant display of any connected signal. Significant front-panel features include an LCD panel for direct information readout; fast-action fingertip up/down controls for ranges and settings; and menu-driven softkeys for timebase and trigger settings with a step-through function sequence. All modular construction reduces cost and simplifies service; each module is individually tested to eliminate zero-hour defects and guarantee long, trouble-free service.

PM 3055 . . . . . \$1395.00

The PM 5565 was designed for use in television studios, VTR and telecine centers and OB vans. The main application of the instrument is to set up and check the signals of B/W and color cameras, videotape recorders, film and slide scanners etc.

As a unique feature for an instrument of its price class, the PM 5565 has a probe input at the front. This enables the PM 5565 to be used for fault finding in the equipment to which it is allocated, thus eliminating the need for an extra oscilloscope for servicing purposes.

The PM 5565 has two video inputs and a monitor output at the rear plus the facility for synchronization from a third video or composite sync input. The vertical sensitivity is 1V p-p or 2.0V p-p full screen size. Filters for display of luminance only or chrominance only are provided. Differential gain measurement is also possible with one separate button.

Horizontal deflections are one or two lines as well as one or two fields, full screen size. Also 20 times magnification is possible. For the convenience of adjusting color cameras, the PM 5565 accepts the signals from a 'parade display' switcher.

PM 5567

### PM 5567 Vectorscope

- Designed for use in broadcast studios and OB vans
- Internal graticule for accurate vector readings
- Low power consumption and high reliability
- Very easy access to servicing
- Compatible with other brands of vectorscopes
- Easy to operate because of logic ergonomy

The PM 5567 was designed for use in television studios, VTR and telecine centers and OB vans. The main application is for setting up and checking the color content of signals from color cameras, video tape recorders, film- and telecine scanners etc.

The colors of the selected signal are displayed as vectors.

PM 5567 . . . . . \$2395.00

# MONITOR/

# TEST EQUIPMENT

PM 5625

## PM 5625 Color Monitor

- Low cost, high performance color monitor with 14" In-Line, "HiBri", self-converging CRT
- Two inputs for encoded signals and one for RGB signal
- Split-screen display of the two encoded signals
- User controls easily accessible from the front, test and set-up controls behind front panel door
- Pulse cross display mode
- Reduced picture size display mode
- Internal and external synchronization
- Available for NTSC, PAL and SECAM

The PM 5625 has been designed to meet all monitoring needs in television systems where high quality is required. The color monitor has a modern 14" In-Line picture tube with a fine pitch of 0.65mm which gives an excellent resolution and color quality.

The extensive range of features includes:

- Two inputs A and B for encoded signals
- RGB input
- Internal/external synchronization
- Pulse cross
- A split-screen display of A and B
- Color subcarrier notch (switchable)
- Switchable 75 ohm termination resistors on the A and B inputs

These convenient features which are complemented by advanced, up-to-date circuitry design make the PM 5625 very suitable for broadcasting studios, outside broadcasting vans (EFP) and video production

**PM 5625 . . . . . \$1890.00**

## PM 5630 Color Generator, PO (Parallel Outputs)

- Generates six different video signals on parallel outputs
- All video signals are generated digitally
- Provides all synchronization signals necessary for TV studios and OB vans
- High stability through the use of TCXO as reference oscillator

The PM 5630 is a combined color sync pulse generator and color test signal generator. "PO" indicates that all test signals are available simultaneously at separate outputs.

The sync pulse generator is in conformity with the latest EBU and RS-170A standards for broadcasting, and it supplies all necessary synchronization signals for driving television studios and other television systems. Special custom-made integrated circuits are carefully selected crystal oscillators ensure unsurpassed accuracy and stability.

The signal generator works digitally, i.e. all test signals are stored in programmable read-only memories as digital information. This information feeds digital to analog converters in such a way that the required analog waveforms are obtained. This principle guarantees very accurate and stable output signals. The signals comprise the following important studio alignment signals:

- Color bars (several versions)
- Pluge with gray scale
- Convergence pattern (grid-dots-checker board, several versions available)
- Red pattern
- Gray scale (5 or 10 riser)
- Window (10%-100% white) in steps of 10%
- Black burst

**PM 5630 . . . . . \$5250.00**

PM 5631

## PM 5631 Color Generator, MP (Multi Pattern)

- Generates up to 99 different video signals selectable from the front panel
- Provides all necessary synchronization signals for TV studios and OB vans
- All main functions remotely controllable via optional IEEE bus interface
- Color field reference pulse available
- Can be genlocked to other video sources

The PM 5631 is a combined color sync pulse generator and color pattern generator. "MP" indicates that a large number of signals can be selected on a single output.

The sync pulse generator is in conformity with the latest EBU and RS-170A standards for broadcasting, and supplies all necessary synchronization signals for driving television studios and other television systems. Special custom-made integrated circuits and carefully selected crystal oscillators ensure unsurpassed accuracy and stability.

The signal generator works digitally. All test signals are stored in programmable read-only memories as digital information. This information feeds digital to analog converters in such a way that the required analog waveforms are obtained. This principle guarantees very accurate and stable output signals. The generator has a standard library of some 90 pre-programmed patterns that include:

- Color bars
- Composite color patterns
- Color test signals
- Monochrome signals

In the manual mode, pattern selection is done with pushbuttons (up/down counter with display) and modifications are available for testing purposes. The instrument can also be controlled remotely via an IEC/IEEE interface (optional).

The PM 5631 is recommended where a number of test signals are needed on a single output, by manual or computer control, such as in broadcast studios, CCTV and CATV studios, outside broadcast vans, factories for manufacturing of high quality consumer TV products and professional color equipment.

**PM 5631 . . . . . \$6500.00**

## PM 5633 Color Generator, RGB

This generator is an RGB I Y; R-Y, B-Y version of the PM 5631. All test signals and features are essentially identical to those of the PM 5631. The generator has three output sockets for either RGB output or Y, R-Y, B-Y output as selected internally on the instrument.

**PM 5633 . . . . . \$6700.00**

# PHILIPS TEST & MEASURING INSTRUMENTS

Everett, WA 98206  
(206) 356-5400

# TEST EQUIPMENT

PM 5646

## PM 5646 TV Test Signal Generator

- Low cost and lightweight
- Ideal for video production centers and small TV studios
- Perfect for professional and consumer TV repair

The PM 5646 is a universal test signal generator with a built-in sync pulse generator (SPG) and auxiliary RF modulator for Band I.

The PM 5646 delivers a variety of signals useful for lining up monitors, cameras, waveform monitors, vectorscopes and other equipment.

Moreover, the PM 5646 generates test signals for checking video tape recorders, mixers and all types of transmission equipment. For final testing, the PM 5646 provides a composite test pattern.

Since the PM 5646 has a text captioning option, it can also deliver a standby pattern. Light in weight, the PM 5646 is perfect in situations where portability is paramount.

PM 5646 . . . . . \$3595.00

PM 5651

## PM 5651 Studio VITS Generator

- Self-contained unit with insertion and generation of the CCIR or NTC 7 specified VIT signals
- Program path is protected via by-pass relay
- Insertion of VIT signals selectable by internal matrix from line 8 to line 22 (321-335)

- Optional source code generator available

The PM 5651 is designed for application in broadcasting studios, video tape recording and telecine centers.

The PM 5651 offers professional EBU and NTC 7 signals at an attractive price such that it is now economically feasible to introduce a VITS generator/ inserter/deleter at each video source. In addition, the PM 5651 has an optional source code generator which makes the identification of signal-source or program material easy or even automatic. The EBU source code is standard in the European version, other codes on request.

The generator has extreme accuracy and stability due to its digital generation principle, where the signals are stored in a digital format in PROMs and turned into analog waveforms by means of a high-speed precision D/A converter. By-pass relay protection, easy programming and serviceability are self evident features of this type of equipment.

PM 5651 . . . . . \$4500.00

PM 5654

## PM 5654 VITS Generator and Inserter

- Full-performance VITS generator and inserter with extensive full-field capabilities
- Using PROMs and D/A converters, test signals are digitally generated for high accuracy and stability
- Built-in security features prevent unauthorized access to programming; e.g. line selection from protected front panel for storage in non-volatile memory
- Program protection with by-pass relay included as standard
- Generates NTC-7 + FCC VITS and VIRS
- Inserts 4 (or 6) Ext. Signals, such as teletext, data and special test signals

- Remote control of all main functions, insertions and full-field signals
- Full-field signals include 60Hz and 250kHz as well as color signals (Ext. Inp. 1)
- Automatic substitution of missing program signal with black burst/ internal or external signal
- Optional module with VITS detector circuit and data detector circuit
- Lines can be deleted without VITS or VIRS insertion
- Insertion and deletion from line 10 to line 21 in both fields

The PM 5654 inserts digitally generated test signals to guarantee high accuracy and stability.

The instrument is available in 525-line as well as 625-line versions.

PM 5654 generates VITS (Vertical Interval Test Signals) and inserts signals for TV transmitters, satellite links and terrestrial microwave links. PM 5654 also inserts teletext and data. In transmitter as well as other applications, the instrument has automatic program signal substitution.

With built-in security measures to prevent unauthorized access to programming, the PM 5654 permits line selection directly from its front panel for storage in a non-volatile memory.

The instrument has special features like Red, color bar and 60Hz and 250kHz squarewaves.

From the VITS panel, a substitution signal can be selected and programmed.

Without inserting VITS or VIRS, line content can still be deleted with the PM 5654.

The PM 5654 is realistically designed for the demands of actual applications. The instrument contains no unnecessary features. This allows the PM 5654 to be priced without charges for unwanted extras.

PM 5654 . . . . . \$7990.00

# TEST EQUIPMENT

## PM 5661/ PM 5662 Waveform/ Vector Monitors

The PM 5661 supplies all essential waveform monitoring and vectorscope capabilities. The unit's compact size—only a half-rack wide—makes it absolutely ideal when power and space are limited.

This all-in-one waveform/vector monitor always delivers highly cost-effective performance. A benefit that can be yours in NTSC and all PAL-system versions.

As for portability, you just pick up the PM 5661 and carry the unit with ease almost wherever you have to work. Out of the studio and into the field, with no loss in quality.

Of course, wherever you work, the display remains bright and crisp. This is true whether you're monitoring waveforms, VITS, or viewing a signal's chrominance characteristics on the vectorscope. And to switch from one function to the other, all you do is press a button.

For an enhanced range of signal monitoring and measuring capabilities, including Sc-H phase display, Philips now has the PM 5662 Waveform/Vector Monitor. Available for NTSC and all PAL-system versions.

Having all the measuring facilities and cost-effectiveness of PM 5661, the PM 5662 also provides horizontal sync timing, relative to the reference subcarrier (burst), to verify color framing and signal format. This Sc-H phase display capability now greatly simplifies a previously complex monitoring and analyzing task.

And all these advantages are yours, while allowing you to operate with the ease you've come to prefer. A front panel ergonomically designed for ease of use, and carefully geared to your working habits, is the crucial difference you get with all the instruments in the new Philips range of waveform monitors and vectorscopes.

Perhaps most attractive of all is that, regardless of your monitoring and measuring needs, you can now have

the Philips waveform monitor and vectorscope, or a combination unit, at the most competitive price available.

Devoting a significant percentage of annual turnover to R&D, Philips is dedicated to maintaining its technological leadership. That explains the crucial difference that's always yours with test and measuring equipment from Philips.

These new instruments deliver all the display modes you need. And with control panel formats clearly designed for your convenience. So you can continue to work in the way you've learned to work best.

Like all the instruments in the new Philips waveform and vector monitoring group, these units give the brightest, crispest displays. The instruments' capabilities work for you even in high ambient light conditions, thanks to a CRT with the highest acceleration voltage available. The internal gratitudes are parallax-free for optimized accuracy.

PM 5661 . . . . . \$3900.00

PM 5662 . . . . . 5900.00

## PM 5665 Waveform Monitor

The PM 5665 Waveform Monitor has full line selection, allowing you to select any line, using a strobe facility. This instrument also lets you subtract the A-B input signals from each other. So you can now detect timing differences more easily.

The PM 5665 dual filter display shows a complete video signal simultaneous with luminance information. Your camera set-ups will be much easier now that you don't have to switch back and forth any longer.

No matter what TV signal you have to analyze, Philips Waveform Monitor and Vectorscope will do the job best.

Simply select the instruments—or combination instrument—from the comprehensive Philips range now ready to fill all your monitoring and measuring needs. The Philips units are all consistently accurate and versatile. Certain to please even the most de-

manding users.

And of course every instrument in this waveform and vector monitoring group is available in NTSC and all PAL versions.

At the top of the line are the PM 5665 Waveform Monitor and PM 5667 and PM 5668 Vectorscopes. High in cost/performance value, low in power consumption and weight. And extremely easy to operate.

PM 5665 . . . . . \$2100.00

## PM 5667/PM 5668 Vectorscopes

The PM 5667 and PM 5668 Vectorscopes measure chrominance signals with a higher degree of precision. Perfect companions to the PM 5665 Waveform Monitor, these Philips vectorscopes are ideal for measuring chrominance amplitude and phase, differential phase, and other distortions.

Safeguard the quality of your television color picture by using the PM 5667 or PM 5668 vector displays to readily detect errors in recording and playback, color encoding, and even transmission processes that can negatively affect chrominance, phase or amplitude. With the parallax-free graticule, you can easily spot significant phase shifts.

Far better resolution in measuring differential phase is another benefit you get when using one of the Philips Vectorscopes with the PM 5665 Waveform Monitor.

And, the PM 5668 Vectorscope comes equipped with Sc-H phase measurement—an absolutely essential tool for matching color frames when editing or when working with animation.

PM 5667 . . . . . \$2100.00

PM 5668 . . . . . 4250.00

**Ultra Arc Series II Long Throw Followspots**

Series II Long Throw is designed for Broadway theaters, arenas, and larger facilities where the highest output is essential at long distances. A competitor to followspots using 1000-2000W discharge lamps, Series II features the Osram HTI 400W 250 hour color balanced light source. Universal 120/240V operation, draws less than 8A. Recommended throw 100'-300'.

- Ultra Arc Series II Long Throw . . . . . \$5218.00
- Ultra Arc Series II Long Throw with auto zoom . . . . . \$5848.00

**Ultra Arc Series II Short Throw Followspots**

An identical Series II, the Short Throw delivers the same performance and efficiency at shorter distances. This model is designed for midsized theaters and halls, and is also excellent for use on stage or close to the stage. Recommended throw 25'-150'.

- Ultra Arc Series II Short Throw . . . . . \$4594.00
- Ultra Arc Series II Short Throw with auto zoom . . . . . \$5224.00

**Mighty Arc II Followspots**

A narrow beam, very high output followspot designed to compete with the fixture intensive lightplots of today's concert tours. Features the Osram HTI 400W, 250 hour color balanced lamp, coated optics, auto zoom, and solid-state ballast for 120/240V operation. Available with overhanging yoke. Recommended for throws from 35'-150'.

- Mighty Arc II without stand . . . . . \$4599.00
- Mighty Arc II with ultra quartz stand . . . . . \$4767.00
- Mighty Arc II with ultra arc stand . . . . . \$5171.00

**Ultra Arc Long Throw Followspots**

The Ultra Arc competes with the strongest (and heaviest) followspots on the market, and it does this with a Marc 350 lamp, drawing only 5A at 120V, and weighing only 143 lbs. Now available with simmer switch to dramatically increase lamp life. Recommended for throws from 100'-300'.

- Ultra Arc Long Throw . . . . . \$4441.00
- Ultra Arc Long Throw with auto zoom . . . . . \$4966.00

**Ultra Arc Short Throw Followspots**

An identical Ultra Arc designed for use at shorter distances. In concert lighting the Short Throw has proven very effective as an onstage followspot. Years of service in rental shops and on tour attest to its ruggedness and durability. Recommended for throws from 25'-150'.

- Ultra Arc Short Throw . . . . . \$3985.00
- Ultra Arc Short Throw with auto zoom . . . . . \$4510.00

**Mighty Arc Followspot**

A high intensity followspot designed to be super compact and inexpensive while still featuring most of the performance characteristics of larger followspots. Utilizes the Marc 350 lamp, and features auto zoom, coated optics, DIC, and solid-state ballast. Excellent as an onstage or trussmounted followspot. Recommended for throws from 25'-150'.

- Mighty Arc . . . . . \$2695.00

Series II Long Throw

Series II Short Throw

Ultra Arc Long Throw

Ultra Arc Short Throw

Mighty Arc

Mighty Arc II

**Ultra Quartz Followspots**

The professional's quartz followspot. The compact and economical Ultra Quartz is brighter at 360W than comparable 1000W units. The ENX high output quartz lamp is quick to change and comes in its own reflector. Ultra Quartz has simple to operate controls, and rugged construction that will hold up over the years in nightclub or school use. Recommended throw 25'-75'.

- Ultra Quartz . . . . . \$1247.00
- Ultra Quartz 220/240V . . . . . \$1362.00

Note: All fixtures include lamp and ballast.

**Accessories**

- Long Throw Roadcase . . . . . \$757.00
- Short Throw Roadcase . . . . . \$671.00
- 220/140V Step-Down Transformer . . . . . \$160.00
- Marc 350 Ballast — Replacement . . . . . \$727.54
- HTI Ballast — Replacement . . . . . \$827.00

# DIGITAL EFFECTS SYSTEMS

## 2010 Software Based Effects System

- "Pipelined" architecture with multiple frame buffers • Uses 4:2:2 component video processing in the digital domain • Full frame manipulation • Full manipulation of frozen pictures • No inter-field flicker in freeze-frame mode • Graphics creation (montage) capability • Full manipulation of live video over the montage • Second live background behind montage, creating 3 layers of video • Proportional borders outside the picture • Borders work with all functions including splits and crops • Advanced pre-programmed effects such as transpose, blinds, mirrors, jumble and multi-image • Processes non time-base-corrected video • Over 2,500 keyframe on-line storage • Over 6,000 keyframe offline storage per micro-diskette • Variable axis smooth compressions and expansions • Smooth positioning • Cropping from any or all sides • Proportional border of any size and color • Full manipulation of frozen, cropped or bordered pictures • Automatic flips and tumblers • Large number of pre-programmed transitions, including pushes, pulls, splits, transpositions and blinds • Continuous posterization • Continuous tinting • Continuous variable aspect ratio mosaics • Continuous blinds • Continuous multi-images • Continuous jumble • Variable aspect ratio • Random multi-freeze • Field accurate variable duration • Variable time acceleration • Powerful sequencing capabilities • Linear or variable trajectory motion with or without trailing • Fine adjustment control • A/B video switching • Built-in digital keyer keys live images over the graphics buffer • Built-in analog keyer keys manipulated images over the second video input • Key input and key output • External control: RS422, RS232, and contact closure are standard • Status menu screen • Built-in diagnostics

### Options

- Upgrade to Pinnacle's System 2020 • Component (Y, R-Y, B-Y) In and Out • Multiple channels • A/B Video Switching

2010's user interface consists of a menu driven interface system that works with a high resolution RGB monitor or a composite monochrome monitor. The menus are controlled from the 2010's control panel. The panel integrates a 3-axis joystick, a control bar, cursor keys, numeric pad and several dedicated function keys in a light, compact package. The user interface is designed to provide easy access to any function with minimum key strokes. A large number of popular effects are pre-programmed thus facilitating "on-air" use. Sophisticated custom sequences can be created easily with "help-screens" guiding the user through various steps.

2010's software-based architecture allows easy hardware and software upgrades at the customer site. In addition to the Data Disk Drive, a second 3.5" disk drive (the Program Disk Drive) is provided to facilitate software upgrades and enhancements in the field by simply mailing a new micro-diskette to the user. Additionally, 2010's modular architecture provides spare "expansion slots" to allow future hardware upgrades and enhancements at the user site.

## 2010 Video WorkStation with Software-based Digital Effects

Includes Video WorkStation chassis, control panel, effects system software, montage frame buffer, key processing channel, and 25' control panel interconnect cable and 2010 software . . . . . \$23,500.00

## 2020 WorkStation with FreezeFile™

Includes all the features and electronics of the 2010 plus a single channel still store. Standard system stores 150 frames or 300 fields. Stills can be stored and recalled randomly and can be arranged in a stack or sequence play list. Digital effects and transitions between stills are possible using 2020 software . . . . . \$32,800.00

## 2020-2 WorkStation with Preview Channel

All the features of the 2020 with the addition of a preview channel output frame buffer and integration software. Output is full bandwidth RGB for preview before encoding . . . . \$39,900.00

## 2030 WorkStation with Paint

All the features of the 2020-2 plus Pinnacle Painter full-color 32 bit paint software, digitizing tablet, pen with cancel button, keyboard, extended paint memory package, 2030 software and component digital video integration package for Paint, FreezeFile and Effects. . . . . \$49,200.00

## 2033 WorkStation with 3-D Modelling

All the features of the 2030 plus Pinnacle 32 bit Sculptor 3-D modelling, lighting, texture mapping software package, 8 Standard stream fonts, floating point processor, extended 3-D memory package, 2033 software and component digital video integration package for 3-D, Paint, FreezeFile and Effects . . . . \$57,950.00

## 2040 WorkStation with 3-D Animation

All the features of the 2033 plus frame-by-frame animation and machine control, including motion scripting, lighting, choreography, real-time wireframe preview, in-betweening, trajectory calculations, VTR control, and 2040 software and component digital video integration package for animation, 3-D Modelling, Paint, FreezeFile, and Effects . . . . \$67,850.00

# LASERDISC PLAYERS

## LD-V2000 LaserDisc Player

A general purpose level 1 and level 3 player with a slimline profile and automatic disc loading system, the LD-V2000 supports both 12" and 8" discs with complete Standard Play (CAV) and Extended Play (CLV) features available during manual and computer modes.

The LD-V2000 performs frame searches to any of the CAV disc's 54,000 still frames in less than 8 seconds and will also time search to the nearest second on CLV discs. A wireless remote control is included.

### Specifications

<b>Output Video Level:</b>	NTSC composite, 1V p-p (75 ohm terminated)
<b>Horizontal Resolution:</b>	400 lines
<b>Output Audio Level:</b>	650mVRMS (100% mod. 50K ohm terminated)
<b>Computer Control Port:</b>	8-pin DIN connector
<b>Power Requirement:</b>	120V, 50/60Hz
<b>Power Consumption:</b>	35W

LD-V2000

<b>Dimensions:</b>	100H x 420W x 387Dmm
<b>Weight:</b>	18.9 lbs.
<b>LD-V2000</b>	.....\$635.00

## LD-V3000 8" LaserDisc Player

The LD-V3000 is a compact, portable player designed to play 8" LaserVision videodiscs exclusively. It can be controlled manually (level 1) via a hard-wired remote control; used as a standalone programmable interactive system (level 2); or controlled by an external computer (level 3).

The player includes an internal 1K programmable memory and utilizes a programming language compatible with existing Pioneer players.

Random access search to any of up to 25,000 video frames is performed in 4 seconds or less. The player features front loading disc access, rugged components and a semi-conductor laser diode light source.

The LD-V3000's compact size, light weight and extensive level 2 capabilities make it ideal for a wide variety of "on-the-road" demonstrations, training and educational applications, or in installations with especially tight space limitations.

### Specifications

<b>Output Video Signals:</b>	NTSC composite
<b>Output Audio Signals:</b>	2 channels (L, R)
<b>Interface Port:</b>	8-pin DIN type
<b>Max. Search Time:</b>	< 4 seconds
<b>Dimensions:</b>	5.2" H x 9.9" W x 12.2" D
<b>Weight:</b>	11.7 lbs.
<b>LD-V3000</b>	.....\$1075.00
<b>RU-V3000T Remote Control</b>	.....\$45.00

LD-V3000

## LD-V4200 LaserDisc Player

Designed for use as an economical, but high performance level 3 player, the LD-V4200 features an RS-232C interface, slimline profile, front panel player controls and player generated text overlay. Long distance frame searches are accomplished in less than 3.5 seconds, and short searches (less than 100 frames) do not produce a blanked video output. The LD-V4200 plays both 12" and 8" Standard Play (CAV) and Extended Play (CLV) discs. An optional hard wired remote control is available.

### Computer Control

<b>Port:</b>	RS-232C, 15-pin D-sub connector
<b>EFM Signal Out:</b>	5-pin DIN connector
<b>Max. Search Time:</b>	< 3.5 seconds
<b>Power Requirement:</b>	120V, 50/60Hz
<b>Power Consumption:</b>	36W
<b>Dimensions:</b>	100H x 420W x 395Dmm
<b>Weight:</b>	19.8 lbs.
<b>LD-V4200</b>	.....\$1065.00
<b>RU-V101 Remote Control</b>	.....\$55.00
<b>CC-03 RS-232C Cable (Male DB-15 to male DB-25DTE)</b>	.....\$30.00

## LD-V6000A LaserDisc Player

The LD-V6000A videodisc player is capable of playing LaserVision videodiscs under 3 levels of control: in manual mode (level 1); as a standalone programmable interactive system (level 2); and under external computer control via a built-in RS-232C interface port (level 3).

The LD-V6000A provides external sync and subcarrier inputs with loopthrough terminals, and has the ability to communicate with computers using ASCII character codes or 8-bit binary commands.

The LD-V6000A offers a front loading design, rugged components and a semiconductor laser diode light source. An optional remote control unit is available.

The LD-V6000A has all the powerful functions found in the LD-V6000, plus several upward compatible performance improvements.

Maximum search time is less than 2 seconds. Level 1 control functions have been expanded to include Chapter Search, and CLV functions have been included. The LD-V6000A also features a "track jump" capability which allows almost instant access to nearby video frames.

### Specifications

<b>Output Video</b>	
<b>Signals:</b>	NTSC composite, 1V p-p, 75 ohm; RF, channel 3/4
<b>Horizontal Resolution:</b>	370 lines

LD-V6000A

<b>Output Audio Signals:</b>	2 channels (L, R), 20-20,000Hz, $\pm$ 3dB

## LD-V6010A LaserDisc Players

The LD-V6010A is identical to the LD-V6000A, except that it utilizes a video circuit which eliminates the external sync and subcarrier inputs, which are not required by most standalone or single-player applications. The RS-232C interface and other performance and design features are unchanged from the LD-V6000A.

The LD-V6010A has all of the new features found in the LD-V6000A, including 2 second search time, "track jump" and CLV functions.

### Specifications

## LD-V6200A LaserDisc Players

The LD-V6200A maintains all the functions and performance of the basic LD-V6000A videodisc player, while substituting the IEEE-488 parallel interface port for the RS-232C interface found in the LD-V6000A and LD-V6010A players. The IEEE-488 interface is particularly well suited for multiple player control from a single external computer.

# LASER DISC PLAYERS

**LD-838D**

### **LD-838D LaserVision Player with Digital Sound**

- Random access or scanning up to 45X normal speed
- Slows down to one frame every three seconds
- Freeze frame
- Broad band amplification circuit
- 400 lines resolution
- Constant-distance tilt servo monitors disc position and adjusts to keep on track
- Digital sound
- Sampling frequency of 88.2kHz twice the normal
- 98dB S/N audio, digital
- 70dB S/N audio, analog
- Separate power sources
- Front loading
- Remote controllable
- 10-selection random programming
- 4-way repeat
- Fast access time—Six seconds for CAV discs and 10 seconds for CIV discs

LaserVision discs are encoded with billions of bits of information, arranged in spirals like the grooves of a record. But instead of a needle, a laser beam reads the encoded information and translates it into video and audio signals. To precisely and accurately read such high density information is an ultra-precise objective lens. Its incredibly fine focal ability drastically reduces crosstalk and almost totally eliminates beats and video noise.

CCD IC acts as a time base corrector to correct time variations in the video signal caused by disc curvature or eccentricity. Maintaining top-level signal quality from the very beginning ensures a clear image on the TV screen.

From the laser, the disc signals are converted to RF electrical signals and processed into video and audio images. Since this RF signal is the basis for what you see and hear, maintaining signal quality is of paramount importance. Since the signal is very weak, and therefore susceptible to external interference, a broad-band amplification circuit is built into the laser pickup unit to instantly boost it, reducing the effect of external noise for clear reproduction.

**LD-838D . . . . . \$550.00**

### **CLD-1010 LD/CD/CDV Player**

- Capable of playing 5" CD videodiscs (CDV) compact discs and 8" and 12" LaserVision discs
- Standard front panel controls are as follows: open/close, play/pause, scan (forward and reverse) chapter skip/track search
- 400 line resolution
- 46dB S/N, video
- Audio features include two-times oversampling digital filter
- 96dB S/N, audio
- 95dB on CD/s and LaserDiscs™ with digital soundtracks
- Remote controllable with noise reduction switch, digital analog switch and a TV/LVP button
- CDs and LDs can be programmed to play back up to 10 tracks or chapters
- Editing features
- Front loading, auto disc size detectors, time search
- Full random access and special effects
- Five mode repeat

**CLD-1010 . . . . . \$800.00**

# LASERDISC INTERACTIVE VIDEO SYSTEM

LD/VS 1

## LD/VS 1 LaserDisc/Video System

- Superimpose capability • Stereo sound mixing • RS-232C interface
- Built-in system switcher • Digital video signal processing • 720K byte 3.5" floppy disk drive and MSX2 type ROM cartridge expansion slot

The UC-V102 LaserDisc Controller is the core of the LaserDisc/Video system. Equipped with MSX2 Basic programming, three internal expansion slots can be used to extend its functional capability. There are also provisions for real-time computer graphics and digitized video input.

Besides extensive input capability, the UC-V102 also offers multiple audio/video output versatility. With appropriate expansion controllers (such as dual RS-232C multiplexers), up to five LaserVision players can be connected, expanding communication potential and capability.

Computer graphics can be superimposed on the LaserVision playback video signal, allowing the user to create graphics and text information screens. Personalized presentations and messages are easy to create and non-permanent information such as prices and sales news can be easily updated. And for even greater flexibility, the superimposed signal can be provided with either composite video or analog RGB signals.

For increased versatility and application flexibility, input can be easily selected from three composite audio/video systems. For example, three LaserVision players could be connected to the UC-V102, allowing almost limitless access capability and interactive versatility. Output is equally flexible, consisting of both a discrete audio/video output system and an analog 21-pin RGB audio/video system.

Through the RS-232C interface, the UC-V102 can control the LD-V4200 LaserVision player. The standard one-channel interface can also be expanded to five channels by adding two of the optional UK-V104 RS-232C Expansion Boards, making it possible to control up to five LaserVision players for comprehensive multi-image presentations and demonstrations. The high-speed communication rate of 19,200 bps also makes the system useful in a variety of other control applications. A variety of application programs can be written using the built-in MSX2 Basic. The created programs can be stored on either a 3.5" floppy disk or in a ROM cartridge that can be inserted in the ROM cartridge slot on the front panel. The optional UK-V107 Floppy Disk Drive permits simultaneous use of a second floppy disk.

Computer generated sound can be mixed with the stereo audio signal from the LaserVision player for a variety of audio applications.

The UK-V103 Digitizer Board offers real time video mosaic imaging, which can be used for switching between pictures from different LaserVision players, or for other visual effects.

### Type A (Without Touch Screen)

LD-V4200 LaserDisc Player  
TVM-1300 13" RGB Monitor  
UC-V102 LD Controller  
UK-V101 Keyboard  
UK-V103 Digitizer Board  
CC-03 LD-V4200 RS-232C Cable ..... \$3535.00

### Type B (With Touch Screen)

Includes all Type A components plus UK-V105TS Touch Screen ..... \$3995.00

## UC-V102 (VideoDisc Controller)

<b>CPU</b>	Equivalent to Z80A (3.58 MHz clock)
<b>Memory</b>	
Main memory	64 KB (expandable up to 256 KB)
V-RAM	128 KB
BASIC ROM	48 KB (MSX 2 BASIC)
DISK BASIC ROM	16 KB
RS-232C BASIC ROM	8 KB
<b>Screen display</b>	
Text display	40 characters x 24 lines, 32 characters x 24 lines, 80 characters x 24 lines
Graphic display	256(W) x 212(H) dots, 512(W) x 212(H) dots
Color display	2, 4 or 16 colors among 512 colors, 256 colors
Sprite	Can be set up to 256 types
Video output	Video output (pin jack), analog RGB (multi-connector)
<b>Screen control</b>	
Superimpose function	This function superimposes the computer pictures onto the external video signals.
<b>Sound output</b>	
Sound source	(1) 8 octaves, 3 VOICES+1 noise
Output	(2) Stereo audio input (4 channel) Stereo audio output (pin jack, multi-connector); mixing between sound sources (1) and (2) possible
<b>Floppy disk drive</b>	35-inch 720 KB 1 drive mounted. The 2nd drive can be added
<b>RS-232C interface</b>	300, 1200, 2400, 4800, (9600) bps
<b>AV source switching function</b>	1 video/audio input channel can be selected from among 3 video/audio input channel and 1 RGB multiconnector system
<b>Audio output switching function</b>	Built-in switch for selecting monaural or stereo for audio output
<b>Clock function</b>	Year, month, day, hour, minutes, seconds
<b>Other interfaces</b>	Printer interface, controller (joystick) interface, keyboard interface provided
<b>Expansion functions</b>	(1) Up to 3 expansion boards can be mounted in the unit (2) 1 ROM cartridge slot provided on front panel (compatible with MSX specifications)
<b>Keyboard (UK-V101 option)</b>	Keyboard with 10 keys Built-in Z-level tilt mechanism
<b>Power requirements</b>	AC 120 V, 60 Hz Input current: 0.65A
<b>Operating temperature</b>	+ 5°C to + 35°C
<b>Dimensions (W x D x H)</b>	16-9/16 x 15-3/8 x 5-1/8 in. (420 x 390 x 130 mm)
<b>Weight</b>	20 lbs. 4 oz. (9.2 kg)

## UK-V105TS (Touch Screen)

<b>PERFORMANCE</b>	
<b>System</b>	AD conversion with sheet resistance
<b>Resolution</b>	X: 256, Y: 256 (typical) X: 1024, Y: 1024 (max.)
<b>Data conversion speed</b>	100 ms/point max.
<b>INTERFACE</b>	
<b>System</b>	Connected to UC-V102 expansion I/O bus
<b>Addresses</b>	054H to 057H
<b>Power supply</b>	5 V ± 5%, 200 mA max.

# VIDEO REELS/CASES

## Video Tape Reels/Cases

Plio-Magic's quality of endurance gives you precision reels that last and last for long-term dollar savings. There's a reel for all types of tape systems: 1" and 2" video tape reels with NAB centers. For shipping, transporting or storage, Plio-Magic® custom designed cases are available for video tape reels and cassettes. All offer the unparalleled protection of PRC's super tough material assuring dust resistant, safe protection for your valuable programs. We maintain large inventories in four centralized locations, assuring you of products when your requirements dictate.

# CASES

## Make Your Own Case Multi-Purpose Cases

The **Make Your Own Case** carries just about everything that can be carried.

These cases carry calculators, computers, typewriters, adding machines, copiers, dictating and test equipment, tools, measuring instruments, video recorders and cameras, photography equipment, cassette recorders, and CBs to name a few.

The versatility comes from its unique interior of pre-cut shock absorbent polyfoam cubes in the body and convoluted foam in the lid. The cubes are easily removed to firmly house and protect your equipment. The lid foam adds to the protection by firmly securing the products inside.

There are two basic styles:

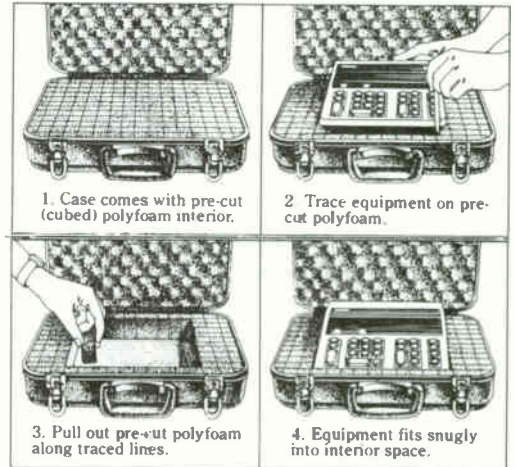

### 1. Molded Case

Features tough, lightweight, ABS Thermoplastic exterior, steel core handle, positive closure drawbolt key locks and aluminum frame for maximum strength. 2000 Series has cast chrome locks and golf grip handle. Color: black.

### 2. Deluxe Soft/Molded Case

It has a unique, patented soft/molded construction. A skin of rich reinforced expanded vinyl is sewn through a thick layer of ABS Thermoplastic. It combines the rugged lightweight qualities of the molded case with the rich good looks of a softside case. Cast chrome side catches, combination lock and golf grip handle complete the deluxe hardware package. Color: oxford brown.

**Note:** No. combination lock on 2207-S/M

# VIDEO IMAGE RECORDER

FreezeFrame

## FREEZEFRAME VIDEO IMAGE RECORDER

- Delivers T339 autofilm prints. Perfect 3 x 4 aspect ratio with remarkable color fidelity
- 35mm adaptor gives user ability to use Polaroid Instant slide film or conventional 35mm film to make enlargements of copies
- Digital freeze field capture capability allows user to capture images off air or from other standard video devices
- Accepts NTSC input; compatible with wide variety of video sources such as VCR, laser disc player or video camera
- Accepts RGB TTL and Analog inputs; compatible with computer hardware with a 15.75kHz horizontal sweep frequency (IBM PC)
- Color preview capability allows user to preview image and adjust color, tint, contrast, sharpness and brightness before making print or slide
- Raster fill capability allows user the option of eliminating annoying raster lines for a more pleasing print

The Polaroid FreezeFrame Video Recorder delivers, at the touch of a button, high quality instant color prints or slides from video images. The recorder features digital freeze field capture, advanced raster fill technology, color preview capability, NTSC signal acceptance and RGB computer input. Polaroid instant film selections for the recorder included AutoFilm Type 339 color prints, Polachrome 35mm color slides and PolaPan 35mm black and white slides. The system also accepts conventional 35mm slides and negative films.

The system consists of: the image recorder, a separate user control panel, autofilm camera back, NTSC video input/output cables, power cord and a control unit cable.

## Markets

Business, broadcasting, medicine, education, government and law enforcement.

## Applications

Presentation, documentation, training, editing, reviewing with clients.

## SPECIFICATIONS

<b>Power Source:</b>	115VAC + 15%-10% 60Hz
<b>Power Consumption:</b>	Approximately 40W
<b>Dimensions:</b>	5.7" H x 9 1/2" W x 17" D
<b>Weight:</b>	14.3 lbs.
<b>Video System:</b>	EIA Standard (525 lines, 60 fields/sec.) NTSC Color Signal or RGB Inputs — RS170 Standard 15.75kHz 60Hz
<b>Video Input Signal Level:</b>	NTSC or Analog RGB: 1.0V p-p, 75 ohms; neg sync Digital RGB: Standard TTL levels (IBM PC standard levels) composite neg sync into "Video In"
<b>Monitor Output Level:</b>	1.0V p-p, 75 ohms, +0 to 1dB
<b>Film Formats:</b>	Polaroid 3" x 4" integral color print 35mm film
<b>Film Types:</b>	Polaroid 3" x 4" AutoFilm, Type 339 integral color print, Instant 35mm film — Polaroid Polachrome, Polapan ISO 100 and 200 color transparency film
<b>Horizontal Resolution:</b>	More than 350 lines — NTSC only, 50% MTF More than 700 lines at center — RGB input More than 650 lines at corners — RGB input (RGB at 5% MTF)
<b>Vertical Resolution (Measured at CRT):</b>	250 lines (field — no fill) 500 lines (frame — no fill)
<b>Print Overscan:</b>	10% maximum (as measured linearly in H and V directions) for Type 339 No overscan for 35mm
<b>Exposure Method:</b>	Intensity modulation
<b>Exposure Time:</b>	Less than 8 sec. for Type 339 film
<b>Image Quality:</b>	5% geometric distortion maximum as per EIA RS-375A specifications
<b>Image Format:</b>	4:3 aspect ratio
<b>Freeze Field (NTSC only):</b>	Luminance: 7 bits (128 gray levels) Chroma sampling: 10.74mHz (3 times subcarrier frequency)
<b>Certification:</b>	U.L., CSA, FCC, Class B Certified

# MESSAGE GENERATOR/CONTROLLER

## KBD-6100 Series Message Generator/Controller System

- 50 pages of display memory
- Programmable order of page display by time and by day up to 7 days a week in advance
- Six background colors programmable by page
- Selectable roll, crawl, flow or static display; programmable by page
- Insert/Delete capability
- Any character or word may be programmed to flash
- Direct page for urgent messages
- Automatic line centering
- Two-line heading includes fixed message, plus time, day and date
- Internal NiCad "lifetime" battery to protect and save memory
- Lockout key to prevent unauthorized use
- Control capability for up to six of any combination of the accessory units
- Single keyboard for control of up to four completely independent channels

The KBD-6100 electronic time-managed message generator/controller system is designed specifically for multi-channel use with single keyboard simplicity.

A display memory of fifty pages is available for each channel plus a fixed two-line heading with time and date display. Each page may be programmed to display on one of six background colors, in one of four display modes and all may be pre-programmed to appear at any time on any day of the week with each day completely independent.

The KBD-6100 series system has capability for up to four channels, each separately controlled by one keyboard that is supplied with a 25' cable. The keyboard is fitted with an eight-position pushbutton switch permitting display on an adjacent monitor of each channel's "edit" (black/white) output or "run" (color) output.

The standard PREVIEW capability allows the operator to view all pages programmed at a glance and any changes may be made easily via the Insert/Delete capability. Dual output for editing is provided as standard.

Each microprocessor-controlled unit contains programming pages for each day of the week and the schedules may be displayed on an edit monitor so that it is very simple to revise a schedule. Program outputs may be fed to dedicated monitors at strategic locations: lobby, restaurant, convention center, etc., and may also be routed to an MATV system for distribution to guest rooms.

The memory of each channel of the KBD-6100 system is protected by an internal NiCad "lifetime" battery back-up. Thus, even if there is a complete loss of power, the KBD-6100 system will retain all of the display and programming information stored in the memories of each of the units. The battery back-up is good for the "shelf-life" of the battery itself which is approximately 2 to 3 years.

### Specifications

- Video Output:** Internally generated RS-170 1V p-p NTSC compatible composite video terminated with 75 ohm. Sync 0.3V, Video 0.7V
- Video Input:** 0.75–1.5V p-p composite video into 75 ohm termination.
- Connectors:** F (F-61) and BNC (UG-1094) for each video output. RCA audio jacks.
- Display Format:** 12 x 14 dot-pattern characters. 8 lines of 32 characters per line.

**KBD-6100**

### Power

# CHARACTER/MESSAGE GENERATORS

**KBD-2**

## KBD-2 Keyboard Character Generator

- 12 pages of memory
- Selectable roll, crawl, flow or static display. Programmable by page
- Programmable order of page display
- Insert/Delete editing mode
- Any character may be programmed to flash
- Full cursor control
- Direct page for urgent messages
- Internal battery to save memory
- BNC and F connectors
- Automatic line centering
- Lockout key to prevent unauthorized use

Memory is essentially "non-volatile" during power failure. Memory retention during power failure is chiefly limited to the shelf life of the internal battery which is in excess of one year.

**KBD-2 Keyboard Character Generator . . . . . \$3175.00**

### Options

- "-A" Automatic Audio Changeover. Feeds "background" audio with internally generated video background for messages — switches over to VTR audio when VTR video is used. (Only available with "-X" option) . . . **\$250.00**
- "-C" Provides for pre-programming each page to one of six background colors (red, green, blue, orange, violet, neutral). Message characters appear in white or black . . . . . **\$430.00**
- "-D" Dual output for editing. Provides output signals on two connectors — one, for local "edit" use shows editing data during set-up. The main output shows a test bar pattern during editing . . . . . **\$230.00**
- "-F" Spanish Font. Special keytops with accents . . . **450.00**
- "-H" "Heading" option. Shows fixed message plus time, day and date above normal display. . . . . **550.00**
- "-H2" Two Line Heading without time, day and date . . . **260.00**
- "-P" Permits Pre-programming Order of page display by time and day. . . . . **820.00**
- "-P2, -P3, -P4" Multiple -P Page option to allow for two, three, or four programming pages per day by time and day . . . **1080.00**
- "-S" External audio cassette recorder storage to provide extended memory capability. . . . . **845.00**
- "-T" Provides for addition of one page to show time, day and date. This page may be inserted in the display sequence to show time between pages. . . . . **\$365.00**
- "-X" Superimposes an external video (VTR) signal with auto changeover to internal sync generator if external signal fails or is turned off. (Specify -X1 to superimpose characters on external video; -X2 to blank characters when external video is used; -X3 will blank heading (-H option) only when video is used . . . . . **\$375.00**
- "-X1/X2" Switches between X1 and X2 options. (Requires -X option) . . . . . **25.00**
- "-24" Added storage options. Increase display storage capability to 24 . . . . . **370.00**
- "-56" or 56 pages . . . . . **1280.00**

Note: Any number of options may be added to the basic KBD-2.

**KBD-2000 w/VCU-4**

## KBD-2000 Keyboard Message Generator/Controller

- Up to 50 message pages
- Fixed two-line heading with time and date display
- Six color backgrounds
- Can be pre-programmed for the entire week with each day completely independent
- U.L. listed

The microprocessor controlled keyboard contains timing pages for each day of the week and the schedules for each day can be displayed on an edit monitor so that it is very simple to revise a schedule. Program outputs can be fed to dedicated monitors at strategic locations: lobby, restaurant, convention center, etc., and then routed to an MATV system for distribution to guest or patient rooms.

The KBD-2000 when combined with the VCU-4 video control unit, can control four pre-loaded video tape players. Movies or educational videotapes may be scheduled to be shown at various times throughout the day or week and will pre-empt any messages. At the end of the program, the system will automatically resume message display and the tape player will rewind. The system gives the user complete control over what is to be displayed between videotape programs and the time at which those programs are to be turned on, 24 hours a day. VCU-4s can be stacked for increased program capability and/or multiple channel operation.

**KBD-2000 Keyboard Character Generator/Controller . . . \$6425.00**  
**KBD-2000S With external audio cassette recorder storage for extended memory . . . . . 7270.00**

### Accessories

- ECU-4** Equipment control unit for pre-programmable A/B switching. Uses four dry-contact low current relays that are connected to screw terminals . . . . . **\$1200.00**
- PCU-4** Power Control Unit for pre-programmable control of AC power. Has four AC receptacles and four dry-contact relays connected to screw terminals . . . . . **1440.00**
- RFSCU-4** RF signal control unit for pre-programmable RF signal switching . . . . . **1650.00**
- SCU-4** Signal control unit for pre-programmable video switching. BNC connectors. . . . . **1200.00**
- VCU-4** Video control unit for pre-programmable control of up to twenty-four video players, both 1/2" and 3/4" . . **1470.00**

# TEST CHARTS

## TEST CHART SYSTEM

The PORTA-PATTERN Test Chart System is a convenient, portable 9" x 12" chart package for studio or field use. The system has been designed to offer maximum versatility and protection for the Test Charts, thus providing faster, easier camera set-up and alignment.

The light weight self-standing aluminum Chart Holder provides three point positional alignment. A spirit level is an integral part of the unit's design for horizontal alignment accuracy. Optional Microphone and Light Stand Mounting Adaptors allow the system to be stand mounted with the same alignment capabilities.

The system contains one each Resolution, Linearity, Registration and Logarithmic Reflectance Charts. The charts are mounted in recessed, high-impact plastic frames for chart surface protection. Each chart frame is color coded for ease of location in the holder. Charts are placed in order of usage. After use the front chart can be reversed so all chart surfaces are protected.

001-10*	Four Chart System with NO adaptors	\$320.00
001-11*	Four Chart System with microphone stand adaptor	335.00
001-12*	Four Chart System with light stand adaptor	345.00
001-13*	Four Chart System with mic and light stand adaptors (*Includes Charts indicated)	360.00
001-15	Microphone stand adaptor	35.00
001-16	Light stand adaptor	40.00
001-17	Aluminum frame assembly, complete w/o adaptors	200.00
001-50	Dual system carrying case	85.00
001-51	Single Chart carrying case	60.00
001-24*	Resolution Chart	75.00
001-25*	Linearity (Ball) Chart	75.00

001-46	RCA P-200 Resolution Chart	85.00
001-47	RCA P-300 Resolution Chart	85.00
001-48	BBC #62 High Saturation Color Bar Chart	180.00

## ELECTRONIC FIELD PRODUCTION THREE CHART SYSTEM

In order to provide a greater range of available test patterns in a package better adapted to the portability of EFP camera systems, PORTA-PATTERN has developed a Three Chart System which will accept any combination of three charts presently available in the PORTA-PATTERN catalogue.

The system consists of three protective plastic frames, similar to those used for all individual PORTA-PATTERN Test Charts, uniquely hinged end-to-end which allows the frames to be folded upon themselves, thus providing complete surface protection for all three charts, and, when closed, takes up no more space than a single PORTA-PATTERN Test Chart.

The entire system is held closed by a Velcro™ closure system, and a vinyl coated nylon case is included to provide a complete Three Chart System in a package 15" high x 18" wide x 1 1/2" thick.

014-10	EFP Three Chart System with three Black & White Geometric Test Patterns, including case	\$230.00
014-11	EFP Three Chart System with two Black & White Geometric & one Nine-Step Log Chip Chart, including case	260.00
014-12	EFP Three Chart System with one Black & White Geometric, one Log Chip & one of either Color Bar, BBC #61P Flesh Tone or Pulse Bar Chart, including case	290.00

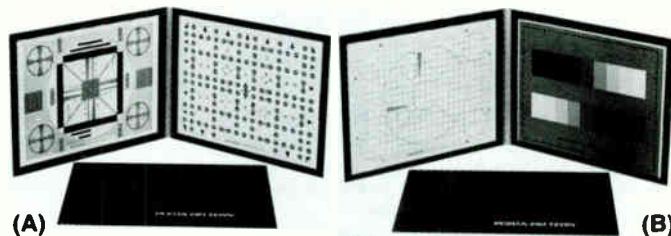

## DUOCHART™ SYSTEMS

The PORTA-PATTERN DUOCHART System is a lightweight, durable portable video test chart package in the convenient PORTA-PATTERN 9" x 12" image size. Each chart is recess-mounted on lightweight, heavy-duty expanded PVC Foamex™ and hinged to fold face-to-face when not in use. Black Velcro™ provides a light and dirt seal when the system is closed. Each system includes a black vinyl case for carrying and storage. There are three DUOCHART systems to provide the right information for the required set-up and evaluation.

**(A) RESOLUTION/LINEARITY.** This system contains the standard Resolution and Linearity Charts. The Resolution Image is designed as a standard reference for measuring and evaluating overall camera resolution as well as testing for camera streaking, ringing, interlace and aspect ratio. The Linearity Image is designed for measuring and adjusting scan linearity. The image is a matrix of circles that provide reference when combined with the proper electronically generated grating signal.

**(B) REGISTRATION/LOG GREY SCALE.** This system contains the standard Registration and Log Grey Scale Charts. The Registration Image is designed for adjustment of scan timing (registration) in multiple tube color cameras. The Log Grey Scale contains two rows of nine paint chips each, providing the range of reflectance from TV white (60%) to TV black (3%), scaled in increments to approximate the transfer characteristics of the color picture tube.

**(C) MULTI-BURST/FLESH TONE REFERENCE.** This system contains the Multi-Burst Chart and the BBC #61P Color Flesh Tone Chart. The Multi-Burst Image is a dual range grouping of bursts. The full scan range is from 1 MHz to 8 MHz in 1 MHz steps. The half scan range is from 0.5 MHz to 4 MHz in 0.5 MHz steps. The bursts are spaced by a solid black bar for separation of burst information on a waveform monitor. The BBC #61P Color Flesh Tone Image has been developed to provide a standard color reference for matching and evaluating cameras after normal color balance is achieved. The image is manufactured in close cooperation with the Research Department of the BBC with advanced electronic color separation to assure spectral characteristics and long lasting chromaticity.

020-10	Resolution/Linearity	\$130.00
020-11	Registration/Nine-Step Log Grey Scale	160.00
020-12	Multi-Bursts/BBC #61P Flesh Tone Reference	195.00

## ENG TWO CHART SYSTEM

The PORTA-PATTERN ENG Chart System has been designed to provide basic alignment, registration, color balance and Auto-White balance information for fast electronic news gathering or field camera set-up.

The system consists of a Registration Chart and a specially designed Color Balance Chart, mounted on durable white acrylic. The two acrylic frames are hinged together, and the charts are folded face-to-face when not in use. Black Velcro™ provides a light and dirt seal when the system is closed, and the white acrylic has a non-reflective surface for Auto-White balance use.

## SPHERICAL TRANSPARENCY ILLUMINATOR

The PORTA-PATTERN Spherical Transparency Illuminator provides a laboratory-type test standard in a practical, video-oriented test package. It is a unique approach to 8" x 10" format transparency illumination for testing, set-up and evaluation of color television camera systems.

A wide range of ultra-stable color temperatures and illumination levels are easily achieved by the use of two front panel controls. The modified 20" integrating sphere produces a flat illumination field throughout a cone angle of greater than 20 degrees without any additional adjustments.

The light source is a low-voltage, regulated DC controlled quartz iodine lamp that assures a constant color temperature independent of AC line variations. This light source illuminates the interior of the sphere, which is coated with high efficiency Eastman BaSO4 sphere coating.

The illumination level is varied by adjusting the light source position inside the sphere, employing the principle of the inverse square law. A precision lamp position assembly, controlled by a numerically calibrated, vernier knob, enables the selection of established illumination levels without the use of a light meter.

Constant color temperature is achieved by the regulated DC power source, which is controlled by a front panel adjustment and is calibrated by an easily read meter.

The PORTA-PATTERN Spherical Transparency Illuminator mounts on any light stand that will accept an 1 1/2" stud. The unit includes a yoke, hood and transparency holder and 10-foot power cord.

**010-10** Spherical Transparency Illuminator, including Hood, Yoke and spare lamp, 117 Volt, 60 Hz ..... **\$2825.00**

## 8" x 10" ILLUMINATOR TRANSPARENCIES

The PORTA-PATTERN 8" x 10" Transparencies represent advanced state-of-the-art technology using emulsions high-impact acrylic. The Geometric Images are direct reading to the camera. There is no glass between the Camera Lens and the Image to cause distortion or light loss. The elimination of the normal "sandwich" type of construction prevents buckling of the image surface and moisture collection.

This all acrylic construction eliminates the danger and high cost of breakage under normal operating conditions. Neither image emulsion nor acrylic base is subject to heat distortion or damage under usual operating conditions.

Highest quality photographic reproduction insures accurate resolution and maximum and minimum density stability. Dimensional stability and resolving power are in excess of 0.010 percent. All Geometric Image transparencies include tube scan information to aid in camera set-up. Geometric Images are available in standard positive image transparencies or negative image transparencies for lower Average Picture level.

# VHS VIDEOCASSETTE PLAYER/ VIDEO PRESENTATION SYSTEM

VP-3100

VP-7700/7700A

## VP-3100 VHS Videocassette Player

- Portable—The structurally integrated handle on the tamperproof hardcase allows the VP-3100 to be carried like a briefcase
- Compact design—Saves space and is small enough to fit under an airline seat
- Lightweight—Allows user to carry without fatigue
- Vidclear—Eliminates noise bars and distortion in the still mode for jitter free picture quality
- Automatic rewind—Automatically rewinds at the end of the tape
- Tape counter and reset button
- Soft eject mechanism
- Dew and power indicator lamps
- Soft touch controls
- Video and audio outputs

## Vented Protective Hardcase

The VP-3100 is designed and engineered to be played inside the protective case. The vent slots located on the top and bottom of the case will prolong the life of the player by allowing it to remain cool during operation. Connection, operation and troubleshooting instructions are printed on the hardcase making operation simple for rental and business users.

## Unique Quick Connector

The exclusive quick connector (patent pending) system makes connection to a television or monitor a snap. No screwdriver is necessary for screw terminal installations. Simply squeeze the metal prongs together, slip them between the posts, release, and the hook up is complete.

## Applications

Rental Stores  
 Seminars  
 Conventions  
 Schools  
 Libraries  
 Sales Presentations

Training  
 Recruitment  
 Internal Communications  
 Point of Purchase  
 Self-Improvement Programs  
 Do-It-Yourselfers

## Specifications

<b>Playback System:</b>	Twin heads, Helical Scanning System
<b>Video Signal:</b>	525 lines, 60Hz standard TV signal
<b>Tape Width:</b>	1/2" (12.7mm)
<b>Tape Speed:</b>	33.4mm/sec.
<b>Playback Time:</b>	Up to 2 hours, 40 minutes/T-160 tape
<b>Usable Tape:</b>	VHS pre-recorded videocassette
<b>RF Output:</b>	VHF ch-3 or 4
<b>Video Output:</b>	1V p-p, 75 ohm unbalanced
<b>Horizontal Resolution:</b>	240 TV lines for VHS standard recorded tapes
<b>Video S/N:</b>	43dB
<b>Audio Output:</b>	Line output; -5dB (1K ohm)
<b>Audio Frequency Response:</b>	100Hz to 10kHz
<b>Audio S/N:</b>	40dB
<b>Operating Temperature:</b>	40°F to 106°F (5°C to 40°C)
<b>VP-3100</b>	<b>\$299.00</b>

## VP-7700/7700A Portable VHS Videocassette Player With 5" Color TV/Monitor

- Portable: Designed to be carried/handled as easily as a briefcase
- Compact Design: For presentations around the corner or around the world, the VP-7700 allows easy carry on to any airline
- Lightweight: Easy to carry without fatigue/strain
- Color Tuner: Fully functional monitor allows crisp, clear high quality video or use video output to 5" screen and/or to larger screen TVs and monitors
- Videocassette Player: Plays standard 1/2" VHS tapes
- Protective Hardcase: Engineered and vented to withstand industrial applications and wide temperature variations
- Vidclear: Eliminates noise bars and distortion in still mode for jitter free picture quality
- Automatic Rewind
- Still Frame
- Soft Eject Mechanism
- Video and Audio Outputs
- Soft Touch Microprocessor Controls
- Built-in RF Modulator

# BATTERY PACKS

## Rechargeable Video Battery Packs

- Suspended Electrolyte
- Leak Proof
- Easy Handling
- High Discharge Rate
- Compact and Rugged
- Extended Shelf Life

Power-Sonic rechargeable batteries are lead dioxide systems. The dilute sulphuric acid electrolyte is suspended and thus immobilized. Should the battery be accidentally overcharged producing hydrogen and oxygen, special one-way valves allow the gases to escape avoiding excessive pressure build-up. Otherwise, the battery is completely sealed and is, therefore, maintenance-free, leak proof, and usable in any position.

Replaces Panasonic LCR3012 VPB  
and JVC PBP1

**PS-1230/L**  
Nominal Voltage: 12V  
Nominal Capacity: At 150mA (20 hr. rate) 3.0AH  
At 500mA (5 hr. rate) 2.5AH  
At 1800mA (1 hr. rate) 1.8AH  
Weight: 2.9 lbs. (approx.)  
Dimensions: 9.37" x 2.56" x 1.26"  
Termination: 2.5mm I.D. DC power plug on 4" lead  
**PS-1230/L** .....\$45.00

**PS-1260PBR (12V-6AH)**  
Case: Leatherette (brown)  
Dimensions (approx.): 4.48" x 2.75" x 9.25"  
Weight (approx.): 6.5 lbs.  
Output: 12VDC, 6.0AH  
Through standard cigarette lighter receptacle  
Input (Charger): 120VAC at 60Hz  
Charger with cigarette lighter termination is rated at 500mA and is U.L. and CSA listed  
Safety Feature: 10A circuit breaker automatically resettable  
**PS-1260PBR** .....\$55.00

# TIME BASE CORRECTORS

## TBC+ /TBC•Sync+ Time Base Correctors

- True color lock — full reverse, 5X forward, stop scan and slow motion
- Full 16 line, 8 bit system
- Compatible with dynamic tracking VTRs
- Front panel set up adjustments
- RF and TTL dropout correction
- Advanced vertical steering
- Genlock — stand alone operation
- Corrected output meets full RS-170A specs
- Super efficient construction constructed of steel
- Incorporate a unique air intake and cooling system
- Occupy only 1<sup>3</sup>/<sub>4</sub>" vertical rack space
- Weighs only 16 lbs. (TBC+) and 18 lbs. (TBC•Sync+)
- Requires only 50-55W

## Plus—Digital Effects

Standard operator selectable, in channel digital effects for variable mosaic, posterization, and sepia tone enhancement of the video image. These effects may be used individually or in any combination and are adjustable over the full picture level range.

## TBC•Sync+

Incorporates all of the features of the TBC+, plus provides for frame or field synchronization between synchronous and asynchronous sources. TBC•Sync+ also provides for non-V locked recorders to be edited or mixed with camera or recorder inputs.

## DUB•TBC+ DUB Mode Corrector

The DUB•TBC+ provides up to twelve generations of clearer, crisper video tape copies for all commonly used dub mode video tape recorders having Y/C688 or R-Y/B-Y type capabilities. The DUB•TBC+ removes time base error and avoids degradation due to excessive signal processing—avoids up to four major encoding-decoding degrading processing steps for each generation of copying.

## Specifications

### Interface

TBC+ and TBC•Sync+ systems are designed to work with NTSC type 525 line, 60Hz field inputs. Corrected outputs conform to EIA RS-170A requirements and may be referenced to external genlock sources.

**Video In:** 1V p-p, 75 ohms, BNC  
**Genlock In:** High impedance, looping, 2 BNCs  
**DOC In:** RF or TTL, 100mV min., BNC  
**Vertical Sync In:** Composite sync, 300mV min., BNC  
**Video Out 1:** 1V p-p, 75 ohms, BNC (output may be bypassed)  
**Video Out 2:** 1V p-p, 75 ohms, BNC (monitor output)  
**Advance Sync Out:** 1V p-p, 75 ohms, BNC (not required for TBC•Sync+)

### Performance

**Window:** 16 horizontal lines (TBC+)  
**Bandwidth:** 4.2MHz  
**Signal-to-Noise Ratio:** 56dB  
**Differential Phase:** 2°  
**Differential Gain:** 2%  
**K Factor:** 3%  
**Sampling:** 8 bit Luma; 8 bit Chroma  
**Residual Timebase Error:** ± 15nsec

## TBC•Sync+ Only

**Window:** Full TV frame  
**Operational Controls & Indicators**  
**Power Switch (on/off):** 2 position rear panel rocker  
**Video Level (Preset Switch):** ± 3dB  
**Color Level (Preset Switch):** ± 3 to -60dB  
**Setup Level (Preset Switch):** ± 10 IRE units  
**Hue (Preset Switch):** ± 45°  
**Video Level Indicator:** 7 LEDs (4 yellow, 1 green, 2 red)  
**Genlock Indicator:** LED (green)  
**Posterization Control:** Pull-on, rotate for magnitude  
**Sepia Switch:** Pull-on/push-off  
**Mosaic Control:** Pull-on, rotate for magnitude  
**Bypass Switch:** 2 position, push-on/push-off  
**Horizontal Phase Adjust:** ± 1µsec, trimpot  
**Burst Phase Adjust:** ± 120nsec, trimpot  
**TBC•Sync+ Only**  
**Freeze Switch:** Select "off/freeze frame/freeze field"  
**Strobe Control:** Variable strobe rate up to 5 sec intervals

## Environmental

**Operating Temp.:** +32°F (0°C) to +113°F (45°C)  
**Operating Humidity:** 10% to 95% RH, non-condensing  
**Power Supply:** 117VAC, ± 10%, 60Hz  
**Power Dissipation:** 50W (TBC+)  
 55W (TBC • Sync+)  
**Height:** 1.75" (4.45cm)  
**Width:** 19" (48.3cm)  
**Depth:** 15" (38.1cm)  
**Weight:** 16 lbs. (TBC+)  
 18 lbs. (TBC•Sync+)

# TAPES

## Pro-Gaffer™ Gaffer Tape

Pressure sensitive vinyl cloth tape. Applications include: securing and holding overhead lighting, stage blocking and spiking, set and stage decoration, audio wire hold-down. Comes in silver, black, white, brown, blue, green, red, yellow.

Product	Std. Roll Size	Price Per Roll
Pro-Gaffer	1 x 60	\$ 5.11
	2 x 60	10.22
	3 x 60	15.35
	4 x 60	20.44
	6 x 60	30.66
Short Lengths	2 x 12	2.19
	2 x 30	5.18

## Gaffer Tape

Vinyl impregnated, premium cloth tape. Non-reflective, non-skid backing. Hi-temp adhesive. For holding overhead lights. Other holding and securing applications. Silver and black.

Product No. & Description	Roll Length	Width Inches	Price Per Roll
Gaffer Tape Silver, Black, Permacel	60 yds.	3/4	\$ 6.53
		1	7.98
		2	15.95

		4	31.91
Gaffer Tape Silver, Black	*30 yds.	2	12.15
Short Lengths	*12 yds.	2	4.54

## P68 Colored Gaffer Tape

13 brilliant colors. Used for color coding cable, stage blocking, set and stage decoration, repairs and mending.

Product No. & Description	Roll Length	Width Inches	Price Per Roll
Colored Gaffer Tape, P68	60 yds.	1/2	\$ 6.80
Colors: Brown, Blue, Green		3/4	9.27
Red, Olive Drab, Orange, White		1	11.56
Yellow, Black, Burgundy		2	23.13
	*30 yds.	2	15.67

\*Short Length Rolls of Gaffer Tapes Available in 2" Width Only

## Pro-Sheen™ Metallic Film Tapes

A highly decorative tape designed for stage and set decoration, high visibility, metallic finish. Durable adhesive system, 6 colors.

Product	Std. Roll Size	Price Per Roll
Pro-Sheen,	1/2 x 72 yd.	\$ 5.19
Silver, Gold,	3/4 x 72 yd.	7.34
Copper,	1 x 72 yd.	8.63
Metallic Red,	2 x 72 yd.	17.26
Metallic Blue,	3 x 72 yd.	25.89
Metallic Green	6 x 72 yd.	51.78

## Camera Tape

Waterproof, premium vinyl cloth. Printable with marker or grease pencil. Used to seal and protect, label film cans.

Product No. & Description	Roll Length	Width Inches	Price Per Roll
Camera Tape White Waterproof	60 yds.	1/2	\$ 7.56
		3/4	9.27
		1	11.56
		2	23.13

## Glow Tape

Glow in the dark phosphorescent vinyl tape. Used to mark dark areas in theaters and darkrooms.

*Standard Roll Size	Price Per Roll
1 x 5	\$ 4.54
2 x 5	9.09
3 x 5	13.63
1 x 10	9.09
2 x 10	18.18
3 x 10	27.26

\*Special Sizes and Shapes Available Upon Request.

# MONITORS/ MONITOR/RECEIVERS

## 625 25" Stereo Color Monitor/Receiver

- Built-in MTS Stereo/SAP Decoder • 139-channel tuning capability • On-screen channel display • 16-color RGB input
- Dual speakers • Full function remote control • Multiple audio and video inputs and outputs • Last channel recall feature
- On/off sleep timer • 3.58MHz trap • Video noise reduction system • Horizontal resolution in excess of 380 lines • Low overscan (5%) • Black level compensation • High (95%) DC restoration • Comb filter • 85-140VAC power supply • Compact design with black cabinet

**625** .....\$1099.00

625

## 602M 25" NTSC Color Video Monitor

- Low overscan (typically 5%) for up to 15% more of the image • Stable power supply and DC restoration for truer blacks and brilliant whites • Geometric linearity (typically 99.3% accurate) for straighter lines and more precise shapes • Deflection yoke assures excellent convergence • Video bandwidth greater than 4.7MHz for horizontal resolution in excess of 380 lines • Pure black cabinet for enhanced picture quality • High performance comb filter • Automatic shutdown • Separate video/audio inputs • RGB input • 10W stereo amplifier • Video output

**602M** .....\$899.00

602M

## VT-210 20" Stereo Flat Screen Monitor Receiver

- High contrast flat square picture tube • 500 lines of resolution • Video noise reduction (VNR™) • High frequency double-differential video peaking circuit • Highly regulated power supply • High fidelity stereo sound • MTS stereo/SAP decoder • RGB input • 3.58MHz trap defeats RGB "Chroma Beat" interference • Remote control • 3 sets of A/V inputs/outputs • Sculptured all black cabinet

**VT-210** .....\$899.00

VT-210

## 619A 19" Stereo Color Monitor/Receiver

- Horizontal resolution in excess of 370 lines • Built-in MTS Stereo/SAP Decoder • 139-channel tuning capability • Last channel recall feature • Full-function infrared remote control for random channel access, dual direction channel scanning or channel step up/down selection • Two RF input sources • Two composite video inputs • Noise reduction system • High frequency double differential video peaking • Comb filter • Black level compensation • Automatic brightness and contrast limit • Two sets of audio, inputs/outputs • Compact design with black cabinet

**619A** .....\$749.00

## 600M 19" Color Monitor

- Horizontal resolution—370 lines for greater depth • More clarity • Low overscan • Black level stabilization • Automatic brightness and contrast limit • Optimum Picture Control (OPC) • Defeatable automatic color control • Built-in stereo amplifier • Built-in volume control • Video and audio inputs and outputs • Standby mode • High frequency double-differential • Video peaking circuit • Highly regulated power supply

**600M** .....\$549.00

# VIDEO SOURCE IDENTIFIERS

## BG-308/BG-316 Color Bar Generators

- 1kHz audio test tone
- Internally switchable for either constant display or flashing mode
- Split-field NTSC bars patterns

BG-308 is a split-field color bar generator with a field programmable 8 character video source identifier positioned in the black block of the split-field pattern. The BG-308, one rack unit high, is perfect for the microwave equipped ENG truck.

### Specifications

<b>Video Output</b> (color bar with 8 character ID):	1V p-p, 75 ohm source terminated, BNC connector
<b>Blackburst Output:</b>	75 ohm source terminated, BNC connector
<b>Pulses:</b>	Within RS-170 specifications
<b>Subcarrier:</b>	3.579545MHz $\pm$ 10Hz, 0-50°C
<b>Vector Accuracy:</b>	Within 1.5°
<b>Audio Output:</b>	Internally adjustable 0 to 8dBm, 600 ohms balanced, transformer isolated, male XLR
<b>Tone:</b>	1kHz sinewave, distortion < 3%
<b>Power:</b>	117VAC, 2W
<b>Size:</b>	1 $\frac{3}{4}$ " H x 19" W x 12" D. Rackmount
<b>BG-308</b> .....	\$1695.00
<b>BG-316</b> Same as BG-308 but with 16 character ID .....	1895.00

## VSID-82 Video Source Identifier

- Switch selected 5 x 7 or 7 x 9 matrix
- Eight easily programmed alphanumeric characters
- Adjustable mattes
- Switchable background delete
- Line by line vertical positioning
- Adjustable horizontal and vertical size

Developed for security, broadcast, medical and industrial applications, the VSID-82 provides an efficient and effective visual indicator of video signal's identity. The VSID-82 generates eight alphanumeric characters and inserts them into a composite video signal. The ID is movable anywhere on-screen or into the vertical interval, with separate controls for character and background matte levels. It can also be adjusted for several sizes.

Switches on the board allow the user to select either a 5 x 7 or a 7 x 9 character matrix and, if desired, to delete the full-surround background. Because the ID is programmed with DIP switches, it can be easily changed at any time, even in the field.

### Specifications

<b>Power:</b>	5VDC at 500mA per card
<b>Size:</b>	$\frac{5}{8}$ " H x 4 $\frac{1}{2}$ " W x 9" D
<b>Video Input:</b>	1.0V p-p nominal, on board termination
<b>Video Output:</b>	Adjustable to 1.0V p-p, 75 ohm source terminated
<b>Frequency Response:</b>	$\pm$ .5dB to 8MHz
<b>Differential Gain:</b>	< 0.5%
<b>Differential Phase:</b>	< 0.5°
<b>Display Size:</b>	Horizontally adjustable from $\frac{1}{4}$ to full screen. Vertically adjustable, three sizes per matrix. Character heights of 14, 28, and 42 raster lines in 5 x 7; 18, 36, and 54 raster lines in 7 x 9.

# COLORBAR GENERATOR/ VIDEO SOURCE IDENTIFIERS

## CB-2440 SMPTE Colorbar Generator/Video Source Identifier

• SMPTE colorbar pattern • Genlockable • Automatic switchover to internal synchronization upon loss of genlock signal • 24 character ID • 40 separate IDs in memory with minimum 72 hours battery back-up • ID inserted in VBI of input program video • Switchable 1kHz stereo test tone, locked out in live mode • 2 blackburst outputs and 1 isolated colorbar output • LED status indicators for genlock, ID programming and tone generators • 1 rack unit high

### Specifications

**Colorbar**  
**Output:** 1V p-p, blanking at 0VDC, 75 ohm source terminated  
**Pattern:** SMPTE  
**Pulse Widths:** Within RS-170 specifications  
**Subcarrier Frequency:** 3.579545MHz  $\pm$  10Hz from 10° to 50°C ambient, front panel adjustable  
**Vector Accuracy:** Within 1.5°

**Blackburst**  
**Outputs:** 2, 75 ohm source terminated, blanking at 0VDC  
**Pulse Widths:** Within RS-170 specifications  
**Subcarrier Phase:** Adjustable  $\pm$  30° to match colorbars

**Genlock**  
**Input:** Front panel switchable  
**Input:** 75 ohm terminated, composite video  
**H Phase:** Front panel adjustable  $\pm$  1 $\mu$ s minimum  
**Subcarrier Phase:** Front panel adjustable over 360° range  
**Indicator:** Red LED

**Audio**  
**Tones:** Left and right 1000Hz tones 600 ohm balanced, transformer isolated, individually switchable from front panel  
**Indicators:** Red LEDs  
**Tone Levels:** Internal jumper selection of 0, 4, or 8dB attenuation on each tone, adjustable to +10dB, factory set at +8dB

**Inputs:** L and R balanced, relay switched to outputs with BARS/LIVE switch in LIVE mode

**Identifier**  
**Input:** 1V p-p nominal, internal 75 ohm termination  
**Display Length:** 24 characters maximum  
**IDs in Memory:** 40 maximum  
**Display Modes:** Two, active area over internal colorbars, and vertical interval over external video, selected with BARS/LIVE switch

CB-2440

**Character Display — Active area:** ASCII 64 character, 7 x 9 matrix, full surround black background  
**Display Size:** Vertically and horizontally adjustable within the active area  
**Character Matte:** Internally adjustable from 60 to 110 IRE. Factory set at 78 IRE

**Character Display — Vertical Interval:** ASCII 64 character, 5 x 7 matrix insert horizontally adjustable, vertically fixed at 7 lines with adjustable start selection  
**Character Matte:** Internally adjustable from 30 to 70 IRE. Factory set at 45 IRE

**Output:** Selection between colorbars or external video with the BARS/LIVE switch 75 ohm source terminated, 1V p-p nominal  
**Differential Gain:** < 0.5%  
**Differential Phase:** < 0.5°  
**Frequency Response:**  $\pm$  0.5dB, to 8MHz  
**Tilt and Overshoot:** < 1%  
**Hum and Noise:** -60dB below 1V p-p

**Mechanical**  
**Video Connectors:** BNC  
**Audio Connectors:** Output—3 pin male XLR, input—3 pin female XLR  
**Size:** 3/4" H x 19" W x 16" D  
**Weight:** 9.5 lbs.  
**Power:** 117VAC  $\pm$  15%, 50/60Hz, 22VA

CB-2440 . . . . . \$3495.00

## 2400 Satellite Video Identifier

• No decoder required • Convenient, quick change numerics • Locking toggle switch for mode selection • Front panel numeric readouts • Excellent video transparency • Only one rack unit high

### Specifications

**Display Size and Position:** **In Active Area** 7 x 9 matrix, 18 lines per field, positionable within the active area  
**Video Input:** 1V p-p nominal, 75 ohm internal termination  
**Video Output:** Unity gain, 75 ohm source terminated  
**Differential Phase:** < 0.5°  
**Differential Gain:** < 0.5%  
**Frequency Response:**  $\pm$  0.5dB to 8MHz  
**Tilt and Overshoot:** < 1%  
**Hum and Noise:** -60dB below 1V p-p

**In All Modes**  
**Video Display:** 24 characters in a 10 numeric, 12 alphanumeric and 2 numeric format  
**Character Programming:** Numeric: 3 front panel touch buttons. Alphanumeric: one internal switch bank per character.  
**Automatic Bypassing:** Direct relay bypassing from video input to video output on power loss  
**Front Panel Controls:** Locking toggle switch for Active Area/Vertical Interval. Touch buttons for Cursor, Count and Access.  
**Front Panel Displays:** 10 digit numeric LEDs for Telephone Number, 2 digit numeric LEDs for Code  
**Internal User Controls:** 2 16-position rotary switches (Fine and Coarse) for vertical positioning. 12 6 bit Dip switches for alphanumeric character programming.

**Power:** 117VAC, 50/60Hz, 13VA. Rear panel mounted power switch and fuseholder  
**Mechanical:** Size 1 3/4" H x 19" W x 12" D, rackmountable

**In Vertical Interval** 5 x 7 matrix, 7 lines per field, fixed on lines 10 through 16  
1V p-p nominal, Hi-Z looping to video output  
Hi-Z looping to video input  
< 0.1°

# SWITCHER/IDENTIFIER COLOR BAR GENERATOR

## SW-402 Mini-Production Switcher

- One rack-unit high • Four video inputs • Two switchable buses • Dissolve between buses • Two program and two preview outputs • Tally contacts (dry closure)

The SW-402 is a four input, two output mini-production switcher with a simple dissolve feature between the two selected signals. Designed originally to augment the QSI AF-1000 autophasing blackburst generator, the SW-402 can easily be integrated into other systems. The SW-402 is a compact, easy to operate, mini-production switcher—ideal where space and dollars are limited.

### Specifications

- Inputs:** 1V p-p composite, internal termination, BNC  
**Outputs:** 1V p-p, adjustable, two preview, two program, BNC  
**Dissolve:** Between buses  
**Power:** 115VAC ± 10%, 230VAC optional  
**Size:** 1 3/4" H x 19" W x 12" D  
**Tally:** Dry contacts on program bus, 9-pin connector, supplied
- Frequency Response:** ± 0.5dB to 8MHz  
**Differential Gain:** < 0.5%  
**Differential Phase:** < 0.5°  
**Switching:** Vertical interval  
**Sync Source:** Video or black on input #1  
**Weight:** Net weight: 6 lbs.
- SW-402** ..... \$1895.00

SW-402

## PSF-777 Color Bar Generator

- 1kHz audio test tone output • Can be powered by most common camera/VTR—11VDC to 15VDC batteries • Internally selectable for either flashing ID or constant display

PSF-777 is a battery operated split-field colorbar generator with 8 character user programmable video identification in the black block of the split-field bar pattern.

The PSF-777 is perfect for the remote engineer when testing temporary microwave links or long cable runs.

### Specifications

- Video Output (with 8 character ID):** 1V p-p, 75 ohm source terminated  
**Pattern:** Split-field NTSC bars  
**Pulses:** Within RS170 specifications  
**Subcarrier:** 3.579545MHz ± 10Hz, 0-50°C  
**Vector Accuracy:** Within 1.5°  
 Video bypass with power switch off
- Audio Output:** Front panel switchable (transformer isolated)  
 -56dB, 150 ohm balanced; 0dB, +4dB +8dB at 600 ohm balanced
- Tone:** 1kHz Sinewave; distortion < 3%  
**Power:** 11VDC to 15VDC, 120mA
- External Controls:** Power switch; LED indicates power on and low battery (flashing); and 4 position audio level switch
- Mechanical:**  
**Video Connector:** 2 BNC for video in/out  
**Audio Connector:** XLR  
**Power Connector:** 2.1mm coaxial power jack  
**Size:** 3" H x 4.6" W x 8.6" L  
**Weight:** 3.5 lbs. (less battery)

Optional transistor battery pack (2) with 115VAC power adaptor.

- PSF-777** ..... \$1295.00  
**PSF-BAT** Battery board option for PSF-777 ..... .89.95

PSF-777

Vertical Interval ID

PCID-864

## PCID-864 Portable (ENG) Camera Identifier

- 8 characters • Reduces the risk of airing your competitors' signal
- Labels the unit instantly (in the field if desirable) to identify every EJ camera and VTR you have in use—a real time-saver in identifying signal sources • Identifies live news feeds from each helicopter or van when you have more than one crew sending to a steerable antenna • Battery (not included) • Provides at least 32 hours of continuous operation
- ID is internally selectable for active picture area or VBI display
- Weighs 12 oz. with battery • Also has external DC input connector
- Clips on camera operator's belt or pocket • 8" H x 4" W x 1 1/2" D • 9VDC

- PCID-864** ..... \$595.00

# COUNTDOWN GENERATOR/ VIDEO DISTRIBUTION AMPLIFIER

## VT-7 7 SEGMENT VIDEO LEADER COUNTDOWN GENERATOR

- Selectable expanding size
- Selectable fixed sizes; any one of eight
- Set: Places "10" in screen, no audio
- Count: Countdown starts with "9" and 1/2 second tone burst
- Count video deleted after "2" displayed
- Video bypass on power-down
- Switch selectable 1/2 second flashing characters
- Hold: Stops countdown on last number and silences audio
- Remote inputs for all control functions
- 400Hz Counting Audio, 200Hz Black Cue
- Accepts any composite video input
- Numerals generated in any display area
- Pulse out at "5", "3" and terminal count

The VT-7 Video Leader Countdown Generator provides video and audio tape cueing information at the head end of each program segment. Video cueing is a 1 second interval numerical countdown for 10 seconds, consisting of 8 seconds of displayed numbers and 2 seconds of terminal or no numeral video. Audio cueing is 0.5 second of 400Hz tone burst during the first half display of each new video numeral. The first half second of "2" count contains a 200Hz tone burst, indicating that the terminal video has been reached.

All electronics are rack mounted with Size Flash, Set, Count, and Hold front panel controls. Remote contact closures may be input through the rear panel. Remote inputs are priority.

VT-7

### SPECIFICATIONS

#### MECHANICAL

Size: 19"W x 1-3/4"H x 12"D, Rack Mount

#### CONNECTORS

Video: BNC

Audio: XLR

Remote Control: Terminal Strip

#### ELECTRICAL

Power: 115VAC, 60Hz, 10 watts

Controls: Toggle switches, pushbuttons and external dry closures

#### VIDEO

Input: 1.0Vp-p, 75 ohm terminated

Output: Adjustable to 1.0Vp-p, 75 ohm source terminated

Audio Output: 600 ohm balanced, transformer isolated

## 6 x 1 UTILITY VIDEO DISTRIBUTION AMPLIFIER

- 1 in x 6 out
- Looped-through input
- Excellent transparency
- Output source terminated in 75 ohms
- Front panel gain and equalization controls

The 6 x 1 DA Video Distribution Amplifier is designed to handle standard utility video distribution for your television system. The 6 x 1 DA is a desk top type distribution amplifier with looped-through video input and six isolated video outputs. The compactness and self-contained power supply makes the VDA highly portable for those tight quarters in your operations.

### SPECIFICATIONS

Size: 4-1/2"W x 2"H x 4-1/2"D

Power: 115VAC, 50/60Hz 5 watts

Optional: 230VAC, 50/60Hz 5 watts

#### VIDEO

Input: Hi-Z looped-through 1.0 VPP

Outputs: 75 ohm source terminated

Frequency Response: 0.5dB to 10MHz

Differential Gain: Less than 0.5%

Output Isolation: 40dB

Equalization: Utility — Single control, approximate compensation of 200-1000 ft. of RG59U coaxial cable.

6 x 1

Noise: Less than 60dB, below 1 VPP

Differential Phase: Less than 0.5°

Propagation Delay: Approximately 10 ns.

Gain: Adjustable from less than unity to greater than +10dB

6 x 1 DA Portable 1 in, 6 out distribution amplifier with front panel control for gain and equalization . . . . . \$350.00

# VIDEO PROMPTER SYSTEMS

Q-TV's/SC Monochrome Video Monitors are 100% solid-state with professional quality features which make them ideally suited for use in high quality display applications. The equipment is designed for operation from either composite video sync signals, or from systems in which external sync is provided. Monitor cabinet construction is steel with a baked, vinyl finish.

A compact, economically priced prompting system that is unmatched in performance, versatility and reliability.

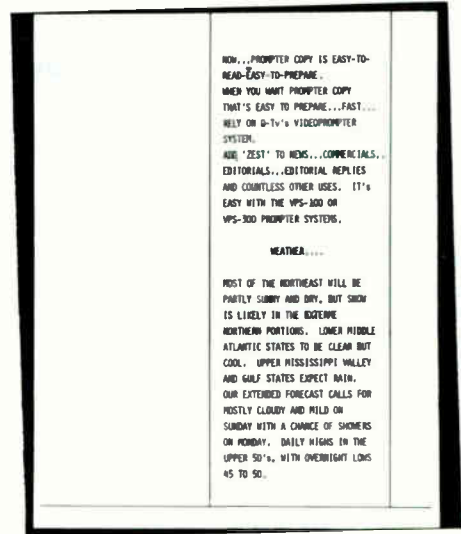

Successful speech presentation starts here with Q-TV's "Speech-Cue" System. Step behind it and you're in total command of your speech material...in total command of your audience. The "Speech Cue" System provides you with the most favorable conditions for "Face-to-Face" communications.

### Executive Speech

#### Prompter Package Includes:

- 1 VPS-100 Console Transport
- 1 Vidicon Camera with lens
- 2 15" Hi-Resolution Prompter Monitor
- 1 25' Coaxial Cable
- 1 10' Coaxial Cable
- 2 Executive Speech Prompter with  
Hi-efficiency transparent two-way glass, aluminum base, matching side panels, locking cap and adjustable rod
- 1 Instruction Manual

**ESP Package . . . . . \$6100.00**

No special prompter paper required...No special prompter ribbons necessary...No special typewriter needed...It all means savings. Use any standard wide bond paper or handy "snap-packs" for typing prompter scripts.

## Mini-Q II Prompter

- Hi-efficiency optical reading surface for easy-to-read copy
- Copy reading surface: 9 1/2" x 9 5/8"
- 7 lines of text in reading area for "complete thought" preview
- Shadow-free lighting illuminated by two 50W hi-intensity lamps
- Script capacity: 30'
- No special paper required. Uses standard 8 1/2" wide bond paper
- The compact miniaturized motor is "sound-take" silent
- Miniature variable speed hand control measures 4 1/2" x 1" with 25' cable
- Universal camera mount
- Solid-state circuitry
- Power: 12V battery-pack belt, 5A; or AC to DC power converter
- Weight: 9 lbs. less mount

### Mini-Q II Prompter System includes:

- 1 Mini-Q II Prompter
- 1 Hand Control with 25' Ext. Cable
- 1 Camera Mount
- 1 Power Cable (unterminated)
- 1 Equipment Case
- 1 Instruction Manual

## MVP-9 Mini Video Prompter

- Meets the requirements of the small professional studio
- Simple to operate
- Compact and realistically priced
- Variable speed forward/reverse script drive
- Vidicon pick-up camera
- Can be located in the control room or studio floor
- Houses a lightweight 9" prompter monitor and over-the-lens beam-splitter
- Readable from distances up to 8-10'
- Mounts with adjustable bracket onto the camera pan and tilt head

### MVP-9 System includes:

- 1 VPS-100 Console Transport
- 1 Vidicon Camera with lens
- 1 9" Prompter Monitor with eye-line
- 1 Remote Hand Control
- 1 Prompter Camera Mount
- 1 Instruction Manual

# PROMPTER SYSTEMS

## VPS-100 Console Transport/ VPS-300 Conveyor Transport Prompter Systems

The VPS-100 and VPS-300 prompting systems offer the broadcast industry and its allied fields a versatile, efficient and rapid method for providing prompter copy through a video signal.

Prompter copy is prepared on standard 8 1/2" x 11" single sheets of paper using any manual or electric typewriter. The prompter script is conveniently fed through the aperture of the VPS-100 by means of taping the individual sheets into a continuous roll; or by placing the individual sheets of copy on the conveyor belt of the VPS-300.

Prompter copy is scanned by the Vidicon camera and transmitted to one or more prompter/monitor readouts mounted on or off camera. The prompter script appears as clearly defined copy. Both units are equipped with a remote hand control for easy operator control.

When used with the VPS Eye-Line, prompter copy is superimposed directly over the taking lens of the television camera for direct "eye-to-eye" contact with the viewing audience. The high brilliance image is clearly visible to the speaker but in no way detectable by the camera lens.

### One VPS-100 Prompter System

## QCP Mark I Computerprompter Program

• IBM PC, XT, and AT compatibility • True variable-speed, bi-directional, smooth scrolling • Four fonts: two full upper- and lower-case fonts as well as two all uppercase fonts • Proportional spacing—for the most easy-to-read prompter copy • Comprehensive Word Processor for text creation and last-minute changes. Highlights: Automatic Wrap, dynamic Insert and Delete Modes, Transfer Text, Search-for Text, and more • Compatibility with any PC-DOS ASCII file. Use your own word processor and QCP Mark I will prompt the text by employing its unique "Convert" mode. Additionally, Convert enables you to prompt any ASCII file sent via telephone lines and other transmission schemes • Easy-to-understand menu of special functions, displaying such choices as: Character Size, All Upper-Or-Lower-Case, Eight Character and Background Colors, Position of Speaker Arrow, and more • Unlimited use of Special Markers to pinpoint specific areas of text to jump to • Text Underlining and Coloration to highlight any section of script • Large selection of international characters. The QCP Mark I is multilingual, allowing you to prompt such languages as Spanish, French, German, Italian and Portuguese • Printing in three convenient formats. Also, with a single keystroke, the program will automatically paginate your text so that pages end only between sentences • Compatibility with both Floppy and Hard Disk Drive systems. Once "booted up," the entire QCP Mark I is loaded in and you may remove the program disk • Thorough PC-DOS Disk Functions, available without having to leave the program. They include: Format and Copy Disk, Copy, Erase and Rename File

QCP Mark I is an innovative computerprompter program offering multipurpose applications. It fully answers today's prompting requirements, be it in news, public speaking, commercials, or corporate television.

The QCP Mark I Computerprompter program allows you to compose a prompter text on an IBM compatible computer. Crisp, clean letters are displayed on a monochrome or color prompter monitor giving a speaker exceptional legibility of prompter text.

### QCP Mark I includes:

- 1 QCP Mark I Computerprompter Program
- 1 Limited Backup Program
- 1 Composite Video Board
- 1 Variable Speed Script Control
- 1 Instruction Manual . . . . . \$4975.00

## VPS-500 II Computerprompter™

• Word processing • Clear, crisp copy • Quick access to all copy • Memory up to 1 hour, 45 minutes • Optional printer for hard copy • Smooth scrolling • Variable speed control • Various colors, underlining • Positive or negative display

The VPS-500 II is a fully self-contained program, written entirely in super fast machine code. It sets up, automatically, in 25 seconds flat. Everything you'll need to do your work is stored right inside the computer.

You don't even have to know what a computer looks like to operate the VPS-500 II.

It takes a minimum amount of instruction to learn. So even the first time you use it, you can be prompting quickly and confidently.

The VPS-500 II creates, edits, saves, erases, and prompts to an astounding 1 hour and 45 minutes.

What's more, it can assemble as much as 32 separate text files for prompting. Plus keep you informed of where they are with an easy-to-read run order list.

You can also highlight points and separate speakers with 10 color combinations and a handy underlining feature.

The VPS-500 II can provide you with immediate hard copy printouts of your prompter text, complete with emphasis and underlining indications. And, in 3 convenient styles: Prompt, Script, Draft.

### VPS-500 II includes:

- 1 Computerprompter Keyboard
- 1 Disk Drive
- 1 VPS-500 II Computer Software
- 1 Variable Speed Script Control
- 1 Interconnecting Cable
- 1 Manual
- 1 Equipment Case . . . . . \$4200.00

# ELECTRONIC VIDEO PAINT SYSTEMS

## QVP-100/QVP-200 Series

### Quantapaint™ Electronic Paint Systems

• 640 x 486 NTSC (768 x 576 PAL-I) pixel resolution • Pixel-keying • 16.7 million available colors • RGB camera capture, a unique "undo" function allowing the artist to erase his/her last operation • Text mode with five font selection • Seven levels of zoom for picture magnification • Offers NTSC, composite downstream keying, simultaneous RGB out, graphics chassis, bit pad and stylus • Optional business graphics and animation software • Pop-up menu • Sixteen predefined brushes or patterns • Windows and slide shows • Drawing tools • Painting and display effects • Quantapaint QVP-200 is exactly like the QVP-100 but includes an IBM XT-compatible computer • Complete stand-alone system • Computer comes with a floppy disk controller, realtime clock chip, IBM-PC XT-compatible BIOS, video display card, 640K, and 1M byte of above board RAM

<b>QVP-100</b>	Computer Required* Rackmount chassis with encoder, composite keying, and graphics card, sync/genlock/NTSC/RGB (PAL available), bit pad and stylus, rackmount kit with slides, Quantapaint software with RGB camera capture, operator manual . . . . .	<b>\$ 9,995.00</b>
<b>QVP-115</b>	QVP-100 with business graphics software. . . . .	<b>11,495.00</b>
<b>QVP-120</b>	QVP-100 with animation software and animation machine controller. Specify VTR: BVH 2000 Betacam™ Series, BVU-800, BVW-15/40, VPR3, VPR6, and VPR-80. (Requires VTR with time code reader). . . . .	<b>13,495.00</b>
<b>QVP-125</b>	QVP-100 with business graphics and animation software with animation machine controller. Specify VTR: same as QVP-120 above. (Requires VTR with time code reader) . . .	<b>14,995.00</b>

## QVP-200 Series

<b>QVP-200</b>	QVP-100 with 100% IBM™ XT-compatible computer with: One 5 1/4" floppy drive (360K per diskette), monochrome green screen with swivel base, two RS-232 serial ports and one parallel port, 640K RAM and Intel above board RAM, 8088-2 microprocessor and keyboard. . .	<b>\$13,995.00</b>
<b>QVP-210</b>	QVP-200 with 30M byte hard disk . . . . .	<b>15,995.00</b>
<b>QVP-215</b>	QVP-210 with business graphics. . . . .	<b>17,495.00</b>
<b>QVP-220</b>	QVP-210 with animation software and animation machine controller. Specify VTR: BVH 2000 Betacam series, BVU-800, BVW-15/40, VPR3, VPR6, and VPR-80. (Requires VTR with time code reader) . . . . .	<b>19,495.00</b>
<b>QVP-225</b>	QVP-210 with business graphics and animation software with animation machine controller. Specify VTR: BVH-2000, BVW-15/40, Betacam series, BVU-800, VPR3, VPR6, VPR-80 . . . . .	<b>20,995.00</b>

\*Minimum requirements for your computer to work with Quantapaint QVP-100  
8MHz processor, 100% IBM compatible, 640K bytes of RAM, Intel above board with 1M byte of RAM, one 5 1/4" floppy disk drive, One 20M byte hard disk and controller, keyboard, CRT display screen (monochrome) and controller, available slot for Quantapaint interface board, Com1 serial port available for bit pad, Com2 serial port available for animation control or character generator interface options, LPT1 parallel port available for ink jet printer option, DOS version 3.1 or later

## QVP-2500 Series

### Quantapaint Electronic Paint Systems

• Basic automatic drawing functions with individual enhancements • Dynamic painting functions • Illustration aids • Incorporates a powerful microcomputer with 3 1/2" floppy disk drive and may include a 53M byte fixed disk, a graphics tablet with pushbutton stylus, control keyboard and CRT (computer) monitor • Execution of all commands is fast and simple by means of "touching" the appropriate area of the menu on the graphics tablet with the tip of the stylus • Palette of 16.7 million colors may be called upon to create individual page palettes of 256 colors each

Quantapaint 32

<b>QVP-2500</b>	Rackmount chassis with microcomputer and graphics card, Quantapaint II software, rackmount kit with slides, sync/genlock/encoder/NTSC (PAL available), monochrome digitizer, operator manual, dual 3 1/2" disk drive, computer monitor, bit pad and stylus, keyboard . . . . .	<b>\$17,995.00</b>
<b>QVP-2501</b>	All QVP-2500 features, plus: additional RAM board, RGB 256 color digitizer (camera capture) . . . . .	<b>19,995.00</b>
<b>QVP-2502</b>	All QVP-2501 features, plus: 30M byte hard disk, business graphics, animation software (requires QVP-AMC) . . . . .	<b>24,995.00</b>

## QVP-3000 Series

### Quantapaint 32 Electronic Paint Systems

• Complete stand-alone system • Powered by Texas Instruments' 34010 dedicated 32-bit graphics processor that runs at a clock rate of 49MHz • System includes 4M bytes of onboard CMOS video RAM, a single floppy disk drive, and a graphics tablet with stylus, control keyboard and status monitor • 720 x 486 NTSC (720 x 576 PAL) broadcast-quality resolution and a total of 16.7 million colors • Outputs include RGB and, with the optional encoder, NTSC or PAL • 32-bits per pixel allows every pixel on the screen to be a different color, each with a transparency level from invisible to opaque—256 increments in all • All painting, drawing, and special effects can be selected from the graphics tablet and executed with the tip of the stylus from the on-screen, pop-up menu • Fourteen natural drawing tools • Variety of electronic brushes ranging from 1 pixel in diameter up to 50 pixels • Numerous "tricks" effects • Screen clear command • Quick save function • Paint mixing palette • Penstroke animation

<b>QVP-3000</b>	Rackmount Electronics Chassis with: 32-bit graphics board, processor, 1M byte of RAM, RGB video in/out, single 3 1/2" floppy disk drive, 720K, single 30M byte hard disk, 2 RS-232 serial ports, 1 parallel port, Quantapaint 32 software with full-color gamma corrected camera capture, DOS version 3.1, software enable module, computer monitor, monochrome, keyboard, bit pad and stylus, installation/operator manual . . . . .	<b>\$29,995.00</b>
<b>QVP-3015</b>	QVP-3000 with business graphics software (16-bit mode) . . . . .	<b>31,995.00</b>
<b>QVP-3020</b>	QVP-3000 with animation software (16-bit mode) and animation machine controller. Specify VTR: BVH-2000, Betacam Series, BVU-800, BVW-15/40, VPR-3, VPR-6, VPR-80 (requires VTR with time code reader) . . . . .	<b>33,495.00</b>
<b>QVP-3025</b>	QVP-3000 with business graphics and animation software (16-bit mode) and AVC. Specify VTR: BVH-2000, Betacam Series, BVU-800, BVW-15/40, VPR-3, VPR-6, VPR-80 (requires VTR with time code reader). . . . .	<b>34,995.00</b>

# TELEPRODUCTION TITLERS

## Microgen™ MG-100 Teleproduction Titler

- 2 sets of proportioned characters designed specifically for television graphics, and selectable by row
- 50-Page RAM with battery back-up
- Automatic page sequencing
- Full range of editing and display functions
- Roll and crawl at 9 speeds
- Complete system flexibility—upstream or downstream
- 256 color palette capability for row by row coloring of characters or background
- Dual channel capability
- RS-232 Data I/O Port optional
- Dimensions: 4 1/4" H x 15 3/4" W x 14 3/4" D

The Microgen MG-100B standard features have made it the best value in low cost television production titlers. Quality character display, color, real-time editing and optional dual channel are just some of the reasons thousands of Microgens are creating titles in almost every conceivable television application.

- MG-100-S** Single channel, self-contained chassis, English keyboard. Includes sync/color generator, NTSC, 256 colors, 50-page memory . . . . . **\$2295.00**
- MG-100-D** Dual-channel, self-contained chassis, English keyboard. Includes sync/color generator, NTSC, 256 colors, 50-page memory . . . . . **\$2995.00**
- MG-100-D/RS** Dual-channel, self-contained chassis, English keyboard. Includes sync/color generator, NTSC, 256 colors both channels, 50-page memory with RS-232 data I/O Port. . . . . **\$3495.00**

## Microgen MG-100/PLUS Teleproduction Titler

- 50ns horizontal resolution
- Four face styles, upper and lower case
  - Helvetica Medium with border
  - Rockwell Bold with border
  - Souvenir Light with border
  - Serpentine Bold with shadow
- 50-page RAM with battery back-up
- Automatic page sequencing
- Full range of editing and display functions
- Roll and crawl at 9 speeds
- Complete system flexibility—upstream or downstream
- 256 color palette capability for row by row coloring of characters or background
- Dual channel capability
- RS-232 data I/O Port optional
- Dimensions: 4 1/4" H x 15 3/4" W x 14 3/4" D

- MG-100/PLUS-S** Single-channel, self-contained chassis, English keyboard. Includes sync/color generator, NTSC, 256 colors, 50-page memory. . . . . **\$2995.00**
- MG-100/PLUS-S/RS** Single-channel, self-contained chassis, English keyboard. Includes sync/color generator, NTSC, 256 colors, 50-page memory, with RS-232 Data I/O Port. . . . . **\$3495.00**
- MG-100/PLUS-D** Dual-channel, self-contained chassis, English keyboard. Includes sync/color generator, NTSC, 256 colors both channels, 50-page memory . . . . . **\$3995.00**

MG-100

MG-200

- MG-100/PLUS-D/RS** Dual-channel, self-contained chassis, English keyboard. Includes sync/color generator, NTSC, 256 colors both channels, 50-page memory, with RS-232 Data I/O Port. . . . . **\$4195.00**

## Microgen MG-200 Teleproduction Titler

- Instant sizing allows keyboard selection of 8 different font sizes from one type face at the touch of a key
- Built-in 3 1/2" disk drive provides 400-page memory; 800 pages with optional second drive
- 512 background and character colors available; maximum 28 colors per page
- Red, green, blue, cyan, yellow, magenta, black and white are accessed by depressing the appropriate key(s)
- Variable size graphic blocks may be created from the keyboard
- Full surround border in either black or white may be defined on a row-by-row basis
- Easy edit
- Dynamic displays—roll, crawl, flash can be repeated continuously
- Automatic page sequencing
- Sync generator with genlock, NTSC or PAL-T encoder, and full studio timing/phasing adjustment built-in at no additional cost
- Dimensions: 4 5/8" H x 17 1/2" W x 17 1/2" D

- MG-202/SD** Tabletop, self-contained chassis with both serif and sans serif faces, single 3 1/2" disk drive built-in . . . . . **\$4995.00**
- MG-202/DD** As above but with dual 3 1/2" disk drives built-in . . . . . **\$5490.00**

# TELEPRODUCTION TITLERS

## QCG-34/QCG-38 Teleproduction Titling Generators

- Resolution of 25ns at 32 scan lines
- Instant sizing—8 to 64 scan line heights plus incremental extend/condense for both resident face styles—keyboard accessed
- 512 colors—easy RGB palette selection of background and character colors
- True proportional spacing—upper and lower case, two faces
- Edge selection—full surround border, 8 colors row selectable per page
- Easy edit—real time composition and editing capability—Quanta's exclusive text editing package
- Roll—260 rows, 9 speeds plus pause, edit in roll compose, roll to fixed title
- Crawl—260 rows, 9 speeds plus pause, edit in crawl compose
- Automatic page sequencing—random or sequential, date/time generator for real time sequences—dwell time selectable 1/4 to 99 seconds per page
- Manual page sequencing—random or sequential, forward or reverse, 0 second dwell time
- Built-in 3 1/2" Disk Drive—400 pages—second drive optional
- Built-in full terminal complement—sync/genlock RS170, NTSC or PAL Encoder full studio timing
- Graphic blocks/graphic separators—variable size and color
- Real time clock and date generator
- Full battery back-up
- RS-232 Data I/O Port—optional

The QCG-34 is a real time professional teleproduction titling system for use in broadcast or non-broadcast applications.

Fully self-contained, the QCG-34 provides for either stand alone operation or may be integrated into a full television production studio. The proportionally spaced type face styles provide over 40 resident fonts per face style instantly on-line with Quanta's exclusive instant sizing. Ease of operation, real time functions and dependability make the QCG-34 a versatile, multi-feature low-cost character generator.

## Specifications

### PERFORMANCE

#### Horizontal

Resolution: 25ns at 32 scan lines

#### Resident Type

Faces: (QCG-34) Four face styles, upper and lower case  
Helvetica medium with border  
Serif with border  
Cooper Black with border  
Bolt Bold with shadow

#### Resident Type

Faces: (QCG-38) Eight face styles, upper and lower case  
Helvetica medium with border  
Serifa with border  
Cooper Black with border  
Bolt Bold with shadow  
Optima Bold with border  
Rockwell Bold with shadow  
Bookman Bold with border  
Helvetica Bold with border (caps only)  
Graphic symbols

Faces proportionally spaced with upper and lower case. 40 sizes per face with 8 to 64 scan line heights plus widths of normal, condensed and extended

#### Color:

512 colors for colorizing characters by row or page and backgrounds by row or page. Maximum 34 colors per page (13 each characters and backgrounds, 8 each edges—available simultaneously)

#### Character

Edge: Full surround border, 8 colors per page selected by row. See-through characters through edge selection/background selection

#### Editing

Functions: Cursor up, down, right, left, home; line feed; return; key repeat; erase row, page; center row, page; justify row or page—right or left; move up, down; insert/delete character, word, row; variable size graphic separators; variable size graphic blocks; scan line pair adjustment of top or bottom leading, or both (row tuck); caps lock; 4 columnar tab settings per page; color palette selection of RGB colors

QCG-38

**Memory:** Single 3 1/2" disk; 400 pages (max. 40 characters per row, 13 rows per page). Second disk available (optional)

**Display Functions:** Flash by character; recall page by number; recall next page, prior page; matte characters in/out of Program output; sequential or random page sequencing; real time clock and date generator displayable any size, color or location on page

**Dynamic Functions:** Automatic or real time sequencing of any combination of pages; dwell time, 1/4-99 sec., selectable by page. Roll 260 rows max.; crawl 260 rows max.; position on any row, any size/color and mix with static text as required. Roll/crawl at 9 speeds plus stop with programmed speed changes imbedded in message or manual keyboard adjustment. All dynamic displays may be one time or continuous

### ELECTRICAL

#### Battery

Back-Up: System has NiCad battery for RAM and real time clock. Automatic program restoration including dynamic displays after power failure

#### Video

Standards: Built-in RS170 Sync Generator with Genlock. Built-in NTSC or PAL encoder. Subcarrier phase and horizontal phase adjustment accessible from rear panel. Upstream or downstream operation. Chromalock plus regeneration of sync for proper genlock to non-time base corrected signals

#### Inputs:

1 composite video in, looping

#### Outputs:

2 program, 1V p-p composite at 75 ohms

1 edit, 1V p-p composite at 75 ohms

1 key, 1V p-p composite monochrome at 75 ohms

#### Data I/O

Ports: RS-232 (optional)

### ELECTRICAL

#### Power

Requirements: 105-110/210-270VAC, 48/70Hz

### MECHANICAL

#### Dimensions:

4 5/8" H x 17 1/2" W x 17 1/2" D

#### Color:

Almond and Black

**QCG-34/SD** Tabletop, self-contained chassis with 2 faces (serif and sans serif), upper and lower case, proportional spacing, single 3 1/2" disk drive built-in . . . . . \$6995.00

**QCG-34/DD** As above with dual disk drives . . . . . 7490.00

**QCG-38/SD** Tabletop, self-contained chassis with 2 faces (serif and sans serif), upper and lower case, proportional spacing, single 3 1/2" disk drive built-in . . . . . \$7995.00

**QCG-38/DD** As above with dual disk drives . . . . . 8490.00

## Options

**DD-34** Second disk drive—customer installed . . . . . \$495.00

**RS-232/34** RS-232 Data I/O Port—Factory installed, plus shipping both ways (page transfer only) . . . . . 500.00

**OM-34** Operating manual . . . . . 50.00

**FD-3.5** 10-pack of 3 1/2" diskettes . . . . . 150.00

**Note:** The QCG-34 and QCG-38 series are available with French, French QWERTY, German-Nordic, or Spanish-Portuguese keyboards. Contact Quanta pricing and delivery.

# TELEPRODUCTION TITLERS

## QCG-400 TELEPRODUCTION GRAPHICS AND TITLING GENERATOR

- 7 resident type faces — 56 fonts on-line
- 30 topical graphics display symbols
- Instant sizing — true proportional spacing
- 128 colors — each page is palette assignable
- Built-in 3-1/2" high density disk drive (400 pages) — second drive optional
- Built-in full terminal complement—sync/genlock and NTSC or PAL-I encoder—full studio timing adjustments standard
- 224-row RAM with battery back-up — dynamic displays and automatic sequencing
- Patented NANOLOG™ character smooth & fill refinement—high resolution average rise times
- LED front-panel operator prompting
- RS-232 data I/O port option

The QCG-400 Teleproduction Graphics and Titling Generator is designed for real time, easy operation in a wide variety of titling applications.

Incorporating the Easy Edit and quick, versatile composition features which have made Quanta the preferred standard of mid-range character generators world-wide, the QCG-400 is a modern, low-profile, ultra-portable self-contained unit.

### Specifications

#### Performance

<b>Resident Faces</b>	7 faces at 6 vertical sizes each (from 8 to 64 lines high) Face #1 Helvetica Medium, proportional upper and lower case Face #2 Bolt Bold, caps non-proportional, lower case proportional Face #3 Serifa, proportional upper and lower case Face #4 Cooper Black, proportional upper and lower case Face #5 Helvetica Medium Italic, proportional upper and lower case Face #6 Grotasque 9, proportional upper and lower case Face #7 Upper Case: Helvetica Bold, (all caps) proportional Lower Case: 30 selected symbols
<b>Graphic Symbols</b>	Weather, sports, transportation, medical, communications, miscellaneous
<b>Face Selection</b>	By character, maximum of two faces can be mixed on a row. All 7 faces may be used on a page
<b>Character Color</b>	Select any of 16 pre-defined palettes of 8 colors each. Palette is stored with page. Character color by word
<b>Background Selection</b>	Select either of 2 pre-defined palettes of 8 colors each or external video. Palette is stored with page. Background color by row
<b>Edge Styles</b>	Selectable by row: Fine border, bold border, 4-quadrant drop shadow positionable
<b>Edge Luminance</b>	Eight levels black to white, stored with page
<b>Page Size</b>	16 rows (max.) 32 characters on a row available with Grotasque 9
<b>System Parameters</b>	Stored within a block: tabs, memory protect, roll/crawl pointers and speeds, shadow quadrants, status line size, user-defined center of screen, last selected face description, flash speed
<b>Roll Message Length</b>	224 rows
<b>Crawl Message Length</b>	6,110 characters
<b>Roll Speed</b>	9 plus pause (start and re-start). Programmable roll to stop function provided
<b>Crawl Speed</b>	4 plus pause (start and re-start)
<b>Roll/Crawl Display Areas</b>	Blanking to blanking. Crawl displays can include static text area
<b>Character Flash</b>	By word. Flash speeds: 2
<b>Special Display Elements</b>	Graphic separators, graphic blocks, underline accents, special symbols (optional on international language versions)
<b>Clock Displays</b>	Real time clock (hours, minutes) or event timer (minutes, seconds)
<b>Tab Positions</b>	8 Columnar tabs with vertical tabbing
<b>Editing Functions</b>	Insert row or character; delete row or character; center row or page; justify row or page left or right; row move left or right;

reduce top leading; reduce intercharacter spacing (selected characters); erase row or page; capture character attributes; Get, Save or Exchange row or page. Applicable editing functions operate right of the cursor on a row or from the cursor to end of page

<b>Resident Memory</b>	224 Rows (RAM) with battery back-up for non-volatile retention. Battery will last in excess of 24 hours
<b>Automatic Sequencing</b>	Full 14-page resident memory
<b>Disk Memory</b>	400 pages plus 2 blocks per disk
<b>Page Access</b>	Random or sequential
<b>Disk Access Time</b>	Page: average .4 sec: max. 1.2 sec. Block: average .6 sec: max. 1.5 sec.
<b>Electrical:</b>	
<b>Television Standards</b>	Built-in RS-170 sync generator with gen lock. Built-in NTSC or PAL encoder. Gen lock/Color lock; built-in 360° subcarrier; horizontal drive phase adjustable ±1.5 usec. on back panel
<b>Stand-Alone Operation</b>	Yes
<b>Input</b>	One, external video in, looping
<b>Edit Output</b>	One, 1.0V p-p composite at 75 ohms
<b>Program Output</b>	Two, 1.0V p-p composite at 75 ohms:
<b>Key Output</b>	One, character plus edge, 1.0V p-p composite at 75 ohms
<b>Power: (PC Card Selectable)</b>	117VAC, 60Hz, 150W max 220VAC, 50Hz, 150W max
<b>Data I/O Port</b>	One, RS-232 Optional

#### Mechanical:

<b>Dimensions</b>	Self-Contained Chassis: 18"W x 5"H x 17-1/2"D
<b>Ventilation</b>	Filtered, forced-air cooled
<b>Color</b>	Dark brown and almond
<b>QCG-400/SD</b>	Tabletop, self-contained chassis with 7 resident faces, 30 graphic symbols, upper & lower case, proportional spacing, single 3 1/2" disk drive built-in ..... \$6595.00
<b>QCG-400/DD</b>	As above but with second 3 1/2" disk drive built-in ..... 7090.00
<b>QCG-400/RM/SD</b>	Rackmount chassis with single 3 1/2" disk drive built-in and remote keyboard. Includes 7 faces, 30 graphic symbols, upper and lower case, proportional spacing ..... 8995.00
<b>QCG-400/RM/DD</b>	As above but with second 3 1/2" disk drive built-in ..... 9690.00
<b>OPTIONS</b>	
<b>DD-400</b>	Second 3 1/2" disk drive for QCG-400 units customer installed ..... \$ 495.00
<b>RS-232/400</b>	RS-232 Data I/O port for QCG-400 units factory installed ..... 500.00
<b>KBD-400</b>	Remote keyboard for "daisy-chain" operation with QCG-400 rackmount chassis ..... 1995.00

# TELEPRODUCTION TITLERS

## QCG-500 Professional Teleproduction Graphics and Titling System

- Instant sizing in single scan line increments
- 16 million color palette
- Color menu allows positive color matching and key-in of RGB values
- Font-Flex™
- Easy edit
- Built-in sync/genlock and encoder
- Full studio timing for simple system integration
- Base resolution of 29ns
- Optional second disk drive
- 24 face styles

The QCG-500 is a fully disk loadable, broadcast quality character generator and graphics system designed for cost effective teleproduction titling and text efficiency.

A powerful software intensive system, the QCG-500 offers real time speed and convenience. No slow, time consuming menu selections are required—all functions are immediately accessible from the keyboard and happen as the operator commands them.

A low profile remote keyboard accesses the rackmounted electronics with built-in 3 1/2" disk. The entire electronics chassis requires only 7" of vertical rack space. Big system features provide a degree of professional flexibility never before attainable in the QCG-500 price range. Disk compatibility with the Q8 Teleproduction Graphics System also makes the QCG-500 an ideal remote unit or addition to an existing Q8 graphics production facility.

Graphics enhancement accessories provide for a full paint system and digital effects, all conveniently controlled from the QCG-500 tri-level keyboard permitting interaction between text, paint or effects operations.

### Specifications

<b>Disk Loadable:</b>	Program, faces, pages
<b>Rackmount:</b>	Chassis includes electronics, single drive, power supply
<b>Number of Keyboards:</b>	One standard
<b>Disk:</b>	Single 3 1/2" double density, double sided; second drive optional 600 maximum
<b>Pages per Disk:</b>	600 maximum
<b>Power Requirements:</b>	150W power supply; 110/120VAC switchable
<b>Stand-Alone Operation:</b>	Yes
<b>Encoder:</b>	Built-in, NTSC RS-170 or PAL
<b>Genlock/Colorlock:</b>	Built-in, horizontal and subcarrier phase adjustments
<b>Phasing:</b>	External, 360° subcarrier, horizontal drive ± 1.5µs
<b>System Integration:</b>	Keyboard selectable upstream/downstream, or jumper selectable
<b>Edit Output:</b>	One, 1.0V p-p composite at 75 ohms
<b>Program Output:</b>	Two, 1.0V p-p composite at 75 ohms
<b>Key Output:</b>	One, character + edge or full page, 1.0V p-p composite at 75 ohms
<b>Sync Output:</b>	4.0V p-p composite
<b>External Video Input:</b>	One, looping
<b>Options:</b>	2nd 3 1/2" disk drive
<b>Electronic Video Paint:</b>	Yes, addressed by QCG-500 keyboard
<b>Digital Video Effects:</b>	Yes, addressed by QCG-500 keyboard
<b>Camera Capture Digitizer:</b>	Yes, addressed by QCG-500 keyboard
<b>QCG-500 includes:</b>	Rackmount Electronics Chassis, Remote Keyboard English, Single 3 1/2" Disk Drives, Styles at 64 and 32 Scanlines, 16 Million Colors, NTSC, Operating Manual, Service and Maintenance Manual, Single Scanline Fontflex™, Sync/genlock, 24-Face Library Disk, System Software (License Required), Color Menu, Operator Training Diskette, Rackmount Kit and Slides, 2 Maintenance Extender Boards. . . . . \$11,995.00

**QCG-500**

<b>QCG-500/50 RGB</b>	As above with one 3/4" Rackmount, RGB/NTSC Encoder . . . . .	<b>13,995.00</b>
<b>QCG-500/DD/RGB</b>	As above with dual drives. . . . .	<b>14,490.00</b>
<b>QCG-500/SD/PVM/ENC-RGB</b>	QCG-500 with Rackmount Chassis, includes: Preview Channel with RGB Edit Out and Frame Grab providing Encoded Program and RGB Program Outs and Encoded and RGB Key Outs. (No simultaneous preview and program of dynamic displays such as roll and crawl.) . . . . .	<b>\$16,995.00</b>
<b>QCG-500/DD/PVW/ENC-RGB</b>	As above with dual drives . . . . .	<b>17,490.00</b>
<b>Options</b>		
<b>DD-20/500</b>	20M byte Hard Disk, includes: 3 1/2" Rackmount Chassis, Power Supply, Host Adaptor, Controller Board (not available with RS232-500 or clock option) . . . . .	<b>\$3,995.00</b>
<b>QCC-1/500</b>	Camera Capture Font/Logo Compose (Card mounts in chassis) . . . . .	<b>495.00</b>
<b>DD-500</b>	3 1/2" Disk Drive Expansion Kit (Customer Installed) . . . . .	<b>495.00</b>
<b>RS232-500</b>	RS232 Data I/O and Protocol, includes: 2 Port Serial I/O Boards (unavailable with DD-20) . . . . .	<b>795.00</b>
<b>CLK-500</b>	Clock and Up/Down timer, includes 2 Port Serial I/O Boards (unavailable with DD-20/500) . . . . .	<b>795.00</b>
<b>KB-500</b>	Keyboard, English (Multiple keyboards require external switch, customer supplied) . . . . .	<b>1,995.00</b>
<b>FD-3.5</b>	10-Pack of 3 1/2" Diskettes . . . . .	<b>150.00</b>
<b>PVW-500</b>	Preview update kit, includes: Rackmount chassis with Frame Grab Board, NTSC Encoder, Interface Board, Power Supply, Ribbon Cable, Software, Rackmount Kit with Slides (No simultaneous preview and program of dynamic displays such as roll and crawl) . . . . .	<b>\$5,495.00</b>
<b>RGB-500</b>	RGB Encoder Update Kit, includes: Power Supply, Word/Word Board (exchange) Palette RAM Board (exchange), Rear Panel RGB/NTSC Encoder, One 3/4" Rackmount Chassis Rackmount Kit with Slides . . . . .	<b>\$2,995.00</b>
<b>QST-500</b>	Automated Subtitling System via Time-code Input. Includes: Plug-in Time Code Reader Board, Audio Connector, Software and Manual. Indicate language and standard. Dual Disks are required. (Not available with RS232 or clock options.) . . . . .	<b>\$1,995.00</b>
<b>OM-500</b>	Operating Manual . . . . .	<b>50.00</b>
<b>SMM-500</b>	Service and Maintenance Manual . . . . .	<b>300.00</b>

# TELEPRODUCTION TITLERS

## Q8 Teleproduction Titler

• **FONT-FLEX™**: Exclusive Instant Sizing, Instant Extend/Condense, Instant Italics—Left or Right • 16 Million Colors: Interactive Menu Selection, Positive Color Matching, Characters/Backgrounds/Edges • Automatic Page Sequencing: Program up to 800 pages for automatic display • Automatic Keystroke Sequencing: Build animated or special editing sequences assigned to single keystrokes • Pop-On Animation: Sophisticated keystroke sequencing—reveal characters, words or rows at selected frame rates programmable • Easy Edit: Expanded text manipulation—real • Selectable Edge Styles & Colors • "Unlimited" Roll: Total disk (400 time in any composition mode • Character "Tuck" • Vertical Row "Tuck" • Type Faces Disk Loadable • Fade/Matte/Key • Built-In Sync/Genlock with Full Studio Timing • Built-In Color Encoder plus RGB Outputs • 26ns Base Resolution • Dual 8" Disk Drives—Standard: 800 pages combined capacity • RS-232 Data I/O Port • Multiple Keyboard Operation: Up to 5 • Dual Channel Version: 2 independent or interactive channels—Program/Preview; A/B Mix • Expanded Dual 5-Megabyte Memory Option: Removable media memory—greatly increases system access speed and page storage capacity

Q8 is a broadcast teleproduction graphics and titling system, microprocessor driven, incorporating high technology circuitry and the simplicity of real time operation. Employing quality components and user-oriented design considerations, Q8 provides a complete complement of video typography, graphics display, character generator effects and animation, text handling and composition functions.

### Q-8S Single Channel System, NTSC, Includes:

- Single-channel chassis, 117VAC/60Hz ± 10% with sync/color lock, NTSC color encoder, RGB output, RS-232 data I/O port
- System software (license required)
- 1 floppy disk chassis—dual 8" disk drives
- 1 keyboard—English, 117VAC power supply, 25' cable
- QCC-1 camera capture font/logo compose—PC card
- 2 Rackmount kits with slides
- 1 Face library—all styles at 64 and 32 scanlines
- 2 Maintenance extender boards
- 1 5-Pack 8" floppy diskettes
- 1 Operating manual
- 1 Operator training diskette
- 1 Service and maintenance manual

**Single-Channel System . . . . . \$19,495.00**

### Q-8D Dual-Channel System, NTSC, includes:

- 2 Single-channel chassis, 117VAC/60Hz ± 10% with sync/color lock, NTSC color encoder, RGB output, RS-232 data I/O port
- System software (license required)
- 1 Floppy disk chassis—dual 8" disk drives
- 2 Keyboards—English, 117VAC power supply, 25' cable
- QCC-1 Camera capture font/logo compose—PC card
- 3 Rackmount kits with slides
- 1 Face library—All styles at 64 and 32 scanlines
- 4 Maintenance extender boards
- 1 5-Pack 8" floppy diskettes
- 1 Operating manual
- 2 Operator training diskettes
- 1 Service and maintenance manual

**Dual-Channel System . . . . . \$29,495.00**

### OPTIONS

- DD-20/8** 20M byte Fixed Disk Add-on, Includes:  
3 1/2" Rackmount Chassis, 20M byte Fixed Disk, Power Supply, Host Adaptor, Controller Board . . . . . \$ 3,995.00
- QST-Q8** Automated Subtitling System via Time-code Input. Includes: Plug-in Time Code Reader Board, Audio Connector, Software, and Manual. Indicate Language and Standard. (Dual channel units require subtitle display via time-code in one channel only.) . . . . . \$1,995.00
- EN-10** Keyboard, English, 117VAC Power Supply, 25' Cable. . . . . 4,450.00

Q8

- RKB-8** Recall Keyboard with Editor Interface . . . . . \$1,995.00
- SCA-8** Second Channel Upgrade (Q-8S to Q-8D), NTSC, RGB, 117VAC/60Hz ± 10%, Includes:  
1 Single-Channel Chassis, 1 Rackmount Kit with Slides, 1 117VAC Power Supply, 2 Maintenance Extender Boards, Connecting Cables, 1 Operating Manual, Supply, 25' Cable . . . . . \$14,995.00
- QCC-1/8** Camera Capture Font/Logo Compose (PC Card Mount in Q-8 Electronics Chassis). . . . . 2,995.00
- KC-8** Keyboard Cable Extension Kit  
50' Cable with Connectors. . . . . 45.00  
75' Cable with Connectors. . . . . 55.00  
100' Cable with Connectors. . . . . 65.00

### ACCESSORIES

- FD-10** 10-Pack 8" Floppy Diskettes. . . . . \$ 225.00
- FLD-8** Face Library Diskette (All face styles at 64 and 32 scanlines) . . . . . 1,000.00
- FS-8** Single Face Style . . . . . 100.00
- INT-8** International Language Conversion Kit, Includes:  
System Software, International Face Library at 64 scanlines (Face Styles as Above), Operations Manual Addendum with International Keyboard Layouts. . . . . \$995.00

**SPECIFY:** French AZERTY, French QWERTY, German-Nordic, or Spanish-Portuguese

Note: Q-8S or Q-8D also available with French, French QWERTY, German-Nordic or Spanish-Portuguese keyboards. Contact Quanta for pricing and delivery.

# VIDEO EFFECTS SYSTEMS

## DLS 6030 Digital Library System

- Small size, compact electronics
- Up to 6400 stills storage capacity
- Standard SMD interface built in
- Powerful, user-friendly control
- Digitally-linkable capability
- Store digitally on standard video tape
- Digital production effects possible

With unprecedented capabilities for recording, accessing and presenting pictures, sophisticated disk storage, digital production effects, and limitless off-line digital storage on standard videotape, the DLS-6030 can meet your most demanding requirements. Now and far into the future.

Storage can be either field or frame to give you the flexibility you need for pictures and captions.

The DLS 6030 accepts asynchronous input so you can capture pictures from incoming remotes.

Picture grab lets you capture stills from live video in rapid succession, then later edit them to select those you want to store permanently.

You can also erase individual pictures from the disk at any time without affecting pictures stored on adjacent tracks. Special "write protect" features are included to prevent accidental erasure.

Since all picture information remains in digital form, complete fidelity is maintained without generation loss—even if you use small ENG-type recorders. An elegant digital innovation from the digital video people.

DLS 6030

DLS 6010

## DSC 4800 Satin TV Standards Converter

- Freeze
- Noise reduction
- Component input and output
- 4:2:2 component digital input/output
- Auto input standard select
- Overscan
- Internal test signals
- Remote control
- Engineering set-up
- Laser frame
- Image enhancement
- Revert
- Single wire reference

Satin is an advanced bidirectional broadcast quality TV standards converter. Besides handling PAL and NTSC signals, other color standards can be processed via the component RGB input and output. Picture quality is excellent. This is achieved because Satin is completely digital—with the digital decoder and coder contained in the Codec and the line and field conversion taking place in the standards converter unit. The result is a superb technical performance which is maintained year in and year out. Satin is ready now for the digital studio. Video processing is SMPTE 4:2:2 component digital format in accordance with the CCIR.601 international standard. Satin also features a digital interface conforming to the international standard—a further building block in the realization of the all-digital studio.

DSC 4800 (Satin)

## Mirage™ — Three-Dimensional TV Images In Motion

The Mirage system brings to reality that which has never been done before in realtime: the concept of forming live television pictures into three-dimensional shapes and moving them in three-dimensional space. Effects are accomplished with live video or during post-production in the edit suite. Mirage will process any shape that can be conceived including globes, cylinders and cones. Using Mirage's Floating Viewpoint Control, the user can take the viewer's eye not only around the image but through it as well. The Morph shape generator allows creative people without computer programming experience to form their own custom shapes.

## Encore™ — Multi-Dimensional Images

Second only to Mirage in its video manipulation capabilities, Encore also provides three-dimensional perspective with Floating Viewpoint Control, plus compression, expansion, flips, rotation, mosaic, posterization and more. Its integral combiner lets the user connect 14 units for multi-channel operation. And using Mirage as an Encore channel, the system will produce free-form manipulation of flat pictures including such effects as an Encore picture flying down a Mirage cylinder.

## Paintbox® — The Ultimate TV Graphics System

Quantel's Paintbox is a complete electronic graphics and design system that has become the world standard. Paintbox provides the user with all the facilities that are available in a conventional graphics studio—electronically. Working with a simple touch tablet and pressure-sensitive stylus, pictures are displayed in front of the artist on a TV screen. Live video may be captured and designers have complete freedom to create or change images in real-time in whatever art medium they select, ranging from oils, water color, chalk, pencil and crayon to air brush. Paintbox animates, produces TV's finest typography, and perspective may be added as an option. Instant access to thousands of pictures is available through Quantel's Central Lending Library in addition to its own library storage capabilities.

## Cypher Graphics Generator

Much more than just a perfect caption generator with print-quality type faces and logos, Cypher also has the manipulative power of Encore available for each and every character. Cypher can generate any character from an enormous resource of type faces. With Floating Viewpoint Control, Cypher users can orchestrate the movement of the caption or its individual characters with the utmost ease. Each visible character can be modified separately or together in size position, rotation or perspective. Each color in a caption can be different, multi-colored, and even animated to produce unusual color changes and effects. Traditional typographic capabilities such as kerning, letter spacing, word spacing, text justification and line spacing are designed into the Cypher system, as well as rolls and crawls.

## Harry-Digital CEL Recorder

Harry, is a digital cel recorder for use with Paintbox digital art/graphics system.

Harry allows cel animation, video retouching, matte work, and video rotoscoping to be performed directly from a Paintbox touch tablet.

This capability eliminates the need for complicated frame-by-frame editing sessions with video tape recorders. Harry can do it easier, faster, and in digital form.

Harry is a real time random access record/replay system fully integrated with the Paintbox. Cels can be prepared one at a time on the Paintbox and then automatically stored in Harry. Capacity is 2,700 cels.

During rehearsal or sequence build-up, Harry can replay at any speed. Any cel can be edited or repeated for twinning purposes. Cels can be replayed at normal video frame rates for program output.

Harry can also record approximately 90 seconds of live video which can then be retouched one frame or field at a time. The modified video can be edited and replayed in real time.

Complex matte preparation and rotoscoping can likewise be performed frame-by-frame from a live source returning to a live replay.

All these functions can be done easily using the Paintbox menu. No additional control panels are required. Like the Paintbox, Harry has been designed to be used by artists and graphics designers.

### Options for Harry

**Rainbow** bringing several important enhancements together in a single package. Included are: Color Grading, Color Changing, Track and Trail, Differencing and Averaging.

**Dynamic Rounding** This feature allows the combining of digitally generated pictures without the intrusion of annoying interference artifacts.

**Paradoxically**, the totally pure, noise-free nature of digital pictures generates noise when two such pictures are added together—an inherent problem with the digital standard. The option package eliminates this problem, taking the Harry one step beyond the digital standard.

**Audio Scratch Track** This feature gives Harry a 60 second random access internal audio scratch track facility (optionally 120 seconds), allowing operators to make perfectly timed cuts against audio—frequently the controlling factor in an editing job.

### Operating System Refinements Are:

- Non-additive Mixing—neatly complementing Harry's existing additive mixing capabilities
- Enhanced clip library management system for easier and faster access to stored clips; these are now organized alphabetically and a keyword search facility has been added
- Library for storing keyer set-ups—invaluable in complex multi-generation edits

## QuickSet Husky (Wt. Capacity 17 lbs.)

### Tripods, Counterbalance Spring Heads

Load Capacity . . . . . 17 lbs. (7.7kg)  
Maximum Height . . . 57"-72" (144.8-182.9cm)  
Minimum Height . . . 23"-31" (58.4-78.7cm)  
(dependent on model)  
Column Height . . . . . 16" (40.6cm)  
Tilt Angle . . . . . 60° up, 90° down  
Pan Rotation . . . . . 360°  
Weight . . . . . 7 lbs. (3.2kg)

#### QKTH-1

Lightweight all aluminum tripod. Spring loaded counterbalance head, safety elevator column, all black finish. 2-section tubular legs.

#### QKTH-3

Same as QKTH-1 with 3-section tubular legs.

#### QKTH-7

Same as QKTH-1 but with strut supports.

#### QKTH-9

Trolley, Same as QKTH-1 but with single length leg with struts and detachable wheels.

### Photographic Tripods

Load Capacity . . . . . 17 lbs. (7.7kg)  
Maximum Height . . . 72"-90" (182.9-228.6cm)  
Minimum Height . . . 30"-31" (76.2-78.7cm)  
(dependent on model)  
Column Height . . . . . 16" (40.6cm)  
Tilt Angle . . . . . 60° up, 90° down  
Pan Rotation . . . . . 360°  
Side Tilt . . . . . 40° up, 105° down  
Weight . . . . . 7.5-8.25 lbs. (3.4-3.75kg)

#### QKTH-17

Lightweight aluminum tripod. 3-section elevator column and 3-dimensional pan, tilt and side tilt head.

#### QKTH-21

Same as QKTH-17 but with 4 section tubular legs.

### Fluid Head Tripod Systems

Load Capacity . . . . . 10 lbs. (4.5kg)  
Maximum Height . . . 57"-72" (144.8-182.9cm)  
Minimum Height . . . 25"-31" (58.4-78.7cm)  
(dependent on model)  
Column Height . . . . . 16" (40.6cm)  
Tilt Angle . . . . . ± 90°  
Pan Rotation . . . . . 360°  
Weight . . . . . 4 lbs. (1.8kg)

#### QKTH-23

Lightweight aluminum tripod, 2 section legs, manual lift column, 15 lb. capacity fluid head.

#### QKTH-25

Same as QKTH-23 but with struts and safety elevator column.

#### QKTH-26

3 section legs, manual lift column.

#### QKTH-27

Same as QKTH-25 but with 3 section legs, safety elevator column.

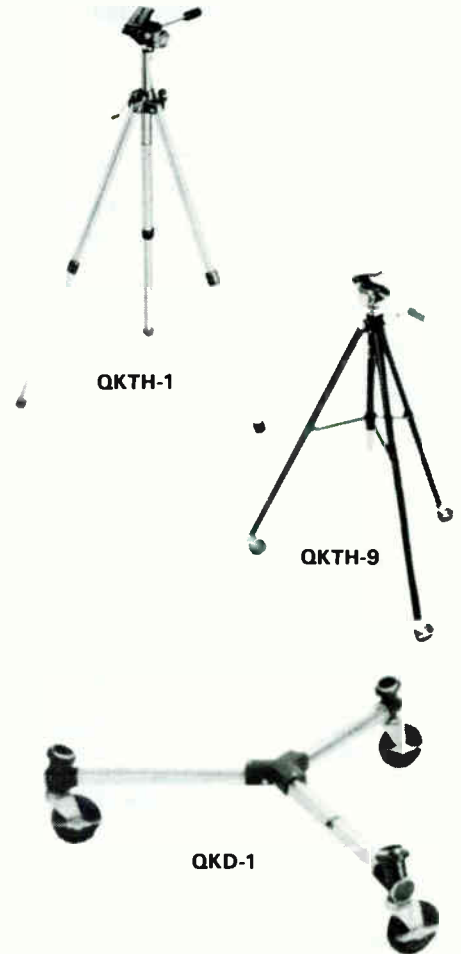

#### QKTH-28

3 section legs, struts, safety elevator column.

#### QKTH-29

Trolley. Same as QKTH-25 but with single length leg and detachable wheels.

# LIGHTWEIGHT TRIPODS/ TROLLEY/HEADS/DOLLY

### QKTH-9 Trolley-Counterbalance Spring Head

Load Capacity . . . . . 20 lbs. (9.1kg)  
Maximum Height . . . . . 58" (148.6cm)  
Minimum Height . . . . . 43 1/4" (110.2cm)  
Column Height . . . . . 16" (40.6cm)  
Tilt Angle . . . . . 60° up, 90° down  
Pan Rotation . . . . . 360°  
Wheel Circle . . . . . 38" (96.5cm)  
Weight . . . . . 9 1/4 lbs. (4.2kg)

### QKT-11 Tripod

Load Capacity . . . . . 17 lbs. (7.7kg)  
Maximum Height . . . . . 57" (144.8cm)  
Minimum Height . . . . . 23" (58.4cm)  
Weight . . . . . 7 lbs. (3.2kg)

### QKT-11

Same as QKTH-1, but without head.

### QKD Dollies

Load Capacity . . . . . 50 lbs. (22.7kg)  
Wheel Size . . . 3 or 4" x 3/4" (10.2 x 1.9cm)  
Wheel Circle . . . . . 35" (88.9cm)  
Folds to . . . . . 4" x 6" x 19"  
(10.2 x 15.2 x 48.3cm)  
Weight . . . . . 8 lbs. (3.6kg)

### QKD-1

For Husky tripods only, 4" wheels

### QKD-3

Fits most round foot pad tripods, 3" wheels

## Tripods and Trolleys
