## PREFACE

Today, almost any dealer catalog you consult contains selected information from our “Equipment Trade References”. A number of years ago, we began developing pages for dealer catalogs from sales brochures, spec sheets, photos, and price lists. The end result is a “Catalog Page Bank” of over 10,000 pages. This page bank has become a product information library for the industries we serve. It became clear to us that most practitioners needed this information daily; therefore, we created the “Illustrated Trade References”. Each volume serves a particular industry, providing the details necessary to design, specify, compare, or purchase equipment. In the past, we attempted to publish these books as annuals. The magnitude of this effort was awesome. We now have the systems in place to bring these books out on a regular schedule. To those who have waited for this edition, we appreciate your patience. We know you will find these volumes to be the dependable reference source you have come to expect from the Bill Daniels Company. If within 15 days you are not completely satisfied with our product, you may return it in resaleable condition for a full credit to your account. Please send us your comments on how we might improve these books. Your remarks will be seriously considered, and may benefit all of us in the future.

# Introducing the Only Camera Better than the Z-31

## Z31A

The Z-31A, Hitachi's newest member of the Computacam family, further enhances the performance, features and functions that have made the Z-31 so successful.

With newly developed Twist Field Saticon tubes and improved video processing, the Z-31A delivers 800 lines of resolution and 60dB signal to noise ratio.

We increased the power of the auto set-up system and cut the set-up time in half.

The price — it's as good as the specs.

Call the regional office nearest you and ask to see the camera that beats the Z-31... and every other camera in it's class.

# The image makers

High Resolution Diode Gun™  
Plumbicon® TV Camera Tubes for  
diagnostic imaging.

Pyroelectric DTGFB vidicon tube  
with 8-14 micron sensitivity for  
thermal imaging and 24-hour  
surveillance.

Image intensifier tubes  
including microchannel  
plate and proximity  
focused types.

High resolution frame  
transfer CCD image  
sensors for color and  
black and white applications.

Diode Gun and Triode Gun Plumbicon camera  
tubes for color or general purpose imaging.

Whatever your imaging application – medical or industrial diagnostics, machine vision, broadcasting or CCTV, surveillance or robotics – Amperex is eager to work with you.

The resources available to you at our Slatersville, Rhode Island facility include our Research and Development and Applications Engineering Departments. Both are integrated with a "super clean" Class 100 manufacturing plant. In addition to offering a broad range of imaging devices including the newest solid state image sensors, Amperex is continuously developing new technologies and adapting existing products to the specific needs of our customers.

The Amperex reputation as an image maker is based on supplying the right products for your imaging needs. For more information call or write Imaging Products Group, Amperex Electronic Corporation, Slatersville, Rhode Island 02876. (401) 762-3800. A North American Philips Company. Outside the U.S.A. contact: Philips Electronic Components and Materials Division, 5600 MD Eindhoven, The Netherlands.

## Amperex®

*Amperex Imaging Products  
... we see things your way.*

Electro-magnetic coil  
assemblies.

Vidicon  
tubes – low  
cost general purpose  
to fiber optic  
special window  
types.

Solid state  
thermal imaging  
devices for 3-5  
micron and 8-13 micron  
applications.

Newvicon®  
high-sensitivity  
camera tubes for  
low light and 1  
micron IR imaging.

## A42 Video Slide Projector

A compact and reliable digital still store system. With a built-in 5 1/4" Winchester disk drive that provides safe on-line picture storage.

### • Virtual Picture Numbering

Picture numbering scheme is completely independent of disk storage locations. Pictures are identified by serial numbers ranging from 0 to 9999 regardless of the on-line storage capacity.

### • Backup and Off-Line Storage

Utilizing a high speed digital streaming tape drive, the A42 stores pictures on a quarter-inch tape cartridge. This facilitates easy transport of pictures from one system to another, or from the studio to the mobile truck. With selective backup, any number of pictures up to 50 frames/100 fields can be transferred to the tape cartridge. Selective restore allows either the entire contents or only selected pictures to be transferred from the cartridge to the disk.

### • Sequence

Three sequences of 100 pictures each can be created using any of the recorded pictures. A sequence can be edited at any time by inserting, deleting or substituting pictures. A sequence can be temporarily exited to perform other functions.

### • Independent Output Channels

In the dual channel system, pictures can be recalled to both channels independently. Dissolves or vertical interval cuts can be programmed for on-air transitions between the channels.

# VIDEO SLIDE PROJECTOR/ SPECIAL EFFECTS SYSTEM

A42

### • Graphics Compose

Optimizes the use of the 2 channels for easy graphics creation. Each layer, or the entire graphic, can be stored on the disk. The A42 makes it possible to recover from mistakes when composing multi-layer graphics.

### • Library System (optional)

Each still on the A42 can be labeled with a title of more than 60 alphanumeric characters, including an automatic time and date stamp. Flexibility in searching for a picture eliminates the need to set up categories. To group certain pictures together, include a common word anywhere in their titles. For example, if searching with the word '49ers', any picture that includes '49ers' anywhere in its title would be listed on the screen. The library system is compatible with all A42 systems.

## A52 Digital Special Effects System

• Picture positioning • Compression to zero • Expansion to 99 times • Variable compression axis • Border of any color and width • Background of any color • Cropping from any or all sides • Full manipulation of cropped pictures • Flips and tumbles • Mosaics • Multi-freeze • Variable aspect ratio • Solarization • Variable duration for each keyframe • Variable time for entire effect • Programmable break or pause • Soft edge key signal • Contact closures for remote operation • A/B video switching

### • Transparent Picture Quality

The incoming composite signal is digitized to eliminate the analog decoding problems such as drift and complex adjustments. Digitally decoded into 4:2:2 components, it is then processed to ensure signal transparency and long-term stability.

### • The A52 Control System

By providing instantaneous access to a large number of effects, it makes on-air operation simple. Precise control over all parameters is provided to satisfy the most demanding requirements.

### • The A52CP (Control Panel)

The control panel consists of a high-resolution graphics display, a professional 3-axis joystick, numeric keypad, optically encoded fader bar, dedicated keys, the DataKey, and 6 variable "soft keys".

### • Mini Control Panel

The A52MP mini control panel retains the majority of the A52CP functions. It also consists of a 3-axis joystick, display and the DataKey. Operation of the A52MP is similar to the A52CP, allowing them to be used interchangeably.

A52

### • On-Air Operation

The A52 provides the user with 36 on-line effects. Twelve frequently used effects are pre-programmed and presented in picture form on the graphics display. These include flips, tumbles and a variety of compressions. The user can modify the pre-programmed effects to meet specific needs. The remaining 24 locations can accommodate simple to complex effects created by the user. The 12 pre-programmed and 18 user-programmable effects are stored in non-volatile memory.

### • External Control

RS232 and RS422 serial ports are standard. Through these ports, all of the functions of the control panel can be emulated by a computer. For interface to switchers and editors, four contact closure inputs are provided.

### • Digital Interface

The A52 provides composite digital input and output ports. These digital ports make it possible to interface the A52 to the Abekas A42 digital still store system.

## DIGITAL SPECIAL EFFECTS SYSTEM

### A53-D Digital Special Effects System

A 3-dimensional digital special effects system, the A53-D performs rotation, translation, perspective and scaling transforms on the incoming video source, thus providing maximum flexibility in 3-dimensional manipulation of images.

#### • Creating Effects

Effects on the A53-D are made up of keyframes, ranging from 2 to 16 in length. A keyframe is simply a set of parameters, defined by the operator, at a given point in an effect. The system then interpolates the intermediate values allowing the effect to run smoothly and continuously. These parameters could be size, position, border width, background color, perspective or rotation of the picture, etc. To edit an effect, the operator can step through it in forward or reverse direction. Parameters can be modified on one, all, or a group of keyframes saving time. Individual or groups of keyframes can be inserted, deleted, or moved from one part of the effect to another. Complete effects can be copied from one effect location to another or to the workspace

#### • Post-Production Operation

The A53-D is ideal for post-production, each parameter can be programmed with utmost accuracy. Numeric keypad entries allow the exact duplication of parameters making it simple to reconstruct an effect. Matched frame editing can be performed not only at keyframe boundaries, but also at every point between keyframes

#### • Live Operation

The A53-D provides the broadcaster with 24 on-line effects, each of which can be accessed at a stroke of a key. In addition, a repertoire of off-line effects can be quickly recalled from the disk. The 24 on-line effects are user-programmable and stored in non-volatile memory

#### • The Mini Control Panel

Ideal for space limited applications, the A53-D Mini Panel retains the majority of the A53-D standard control panel functions. The Mini Panel consists of a 3-axis joystick, a menu display and function keys. Provides 20 on-line effects, each 16 keyframes long. A micro floppy disk drive is provided for off-line effect storage. Operation of the Mini Panel is similar to the A53-D standard panel, allowing them to be used interchangeably

#### • A53-D Create Effects

• True 3-D perspective • 3-D location • Rotation about H, V, Z axes • Variable rotation axes • Global locate, rotate, axis • Expansion, compression • Variable inside or outside border • Background of any color • Field and frame freeze • Full manipulation of frozen pictures • Variable aspect ratio • Strobe • Cropping from any and all sides • Full manipulation of cropped pictures • Solarization/Posterization • Variable effect time • Programmable pause • Contact closures for remote operations • Built-in A/B video switching • Forced monochrome • Inverted luminance • Multi-pictures live • Switchable fold-over • Auto-keying of multi-faceted objects • Cube maker • Timing setup from the control panel • Variable motion types

A53-D

#### • 3-D Features

The A53-D is designed as a true 3-dimensional effects system. The operator can perform simultaneous 3-axis rotations and translations with variable perspective on the input picture. The picture can be reduced or expanded in size and moved to any location in the 3-D space. The system adds the appropriate perspective to the picture, but the operator can add any amount of perspective desired. Rotations can be performed about the picture axes or the H, V, Z axes of the 3-D space. The picture can rotate about its own center or any specified center. With a combination of 3-D controls on the A53-D, any imaginable 3-dimensional move can be applied to the plane of the input picture

#### • Motion Types

Every effect in the A53-D system can be programmed to have a linear and smooth motion. Manipulating the trajectory can result in an accelerating and decelerating linear motion. This feature can be programmed for any of the H, V, Z axes on a keyframe-by-keyframe basis

#### • Serial Ports

Two connectors, a 25-pin D and a 9-pin D, provide RS232 and RS422 communication paths respectively. Through these ports the A53-D can communicate with a variety of other equipment

#### • 2-Channel Operation

The A53-D Digital Effects Combiner provides a truly flexible multi-channel system. It accommodates up to 4 control panels and 2 channels. A remote assignment panel allows the system to be configured either as a dual channel, or as two completely independent single channel systems

#### • A53-D/A62 Digital Interface

The A53-D system provides composite digital video input and output ports. Through these ports the A53-D can be interfaced to the much acclaimed Abekas A62 Digital Disk Recorder. The combination of the two systems introduces a tremendously powerful tool for on-line post-production. It is now possible to manipulate and composite an infinite number of layers in a completely digital environment and in real time

# ABEKAS VIDEO SYSTEMS, INC.

# DIGITAL DISK RECORDER

## A62 DIGITAL DISK RECORDER

- Real-time record and playback
- Internal digital matting
- Random access
- Simultaneous record/play
- Variable record/play speed
- Transparent signal system
- Digitally-decoded RGB outputs
- Built-in sequence editor
- SMPTE serial interface
- Precise control
- High quality color framing
- Compact size

The Abekas A62 Digital Disk Recorder is the most advanced tool available to satisfy the demanding needs of complex post-production. It is ideal for applications such as animation, video disk mastering and sophisticated multi-layered matting.

The A62 combines the well-known advantages of digital video recording with high-speed Winchester disk drives, producing a precisely controllable real-time record and playback device with storage capacities of 50 seconds and 100 seconds. Both versions offer the same basic features: namely, a full range of record/playback speeds, from still frame to faster than one times in forward and reverse; precise high-speed single frame editing; built-in sequence editor; and internal digital matting. Dramatically enhancing the value of the A62, the 100 second version also offers simultaneous real-time record/playback and color-framed random access over the entire 100 second range.

### Transparent Signal System

The transparent picture quality of the A62 is the direct result of full bandwidth digital recording and advanced digital signal processing techniques. The digital decoding and freeze frame performance are identical to that of the highly acclaimed A52 Digital Special Effects system. Unlike that of video tape recorders, the A62's performance is not limited by analog recording techniques and the tape medium, but rather by the A/D and D/A performance.

### Powerful Control System

The A62 offers a powerful and traditional video tape recorder type of control system using a time code based addressing scheme.

The A62 can be controlled by the A62CP control panel, which is provided with the system, or by an external computer through RS232 or

RS422 serial ports. In addition, two RS422 SMPTE serial ports are provided, enabling the A62 to emulate a VTR, thus simplifying editor interface.

### Simple Control Panel

The A62CP control panel consists of an integral graphics display with associated softkeys, trackball, DataKey, numeric keypad and various dedicated function keys. Comprehensive menus are presented on the graphics display, enhancing the power and simplicity of the system. The trackball is used to browse manually through the material on the disk. The browse speed corresponds to the speed of the trackball movement. A DataKey, like the one used on the A52 Digital Special Effects system, is used for off-line storage of control parameters.

### Sequence/Segment Editor

A number of variable length segments can be defined by specifying In and Out points, and can be linked in any order to form a sequence. Individual segments, or the entire sequence, can be run manually or automatically. A sequence can be modified by rearranging the order of the segments or redefining the segments by changing their In and Out points. The sequence length automatically reflects these changes.

### Internal Digital Matting

The A62 greatly simplifies the sophisticated post-production task of complex multi-layer matting. The internal matting capability allows a foreground to be digitally matted over an existing background in real-time. The background always remains in the digital domain during this process; therefore, the usual problems of generation loss associated with matting are completely eliminated. This process can be repeated a countless number of times, maintaining first generation quality from start to end. The matting is accomplished in non-real-time on the 50 second version, and in real-time on the 100 second version using the simultaneous record/playback capability.

The flexible system architecture enables internal re-entry of either the background video or the foreground video and key signal. This permits the real-time matting of incoming foreground on an existing background, or the matting of an existing foreground on an incoming background. All the necessary adjustments for the matte/key processor are provided: foreground black, foreground black cleanup, fade value, key polarity, key level and key gain. The analog input/output video level and timing, and the digital matte/key adjustments are made right from the control panel.

### RGB Outputs

Digitally-decoded high quality RGB outputs are provided as an option for the A62.

# ACME-LITE MFG. CO.

# TRIPODS/ACCESSORIES

## Compact Tripods For Small Cameras

**L-1:** A very compact 4-section tripod easy to carry around and ideal for Compact 35mm and SLR cameras. Legs are slotted for extra strength and to prevent twisting and sections are quickly locked with levers. Extra strength is provided by leg braces. 2-way head pans and tilts. Opens to 48", closes to only 20". Lift-type Elevator. . . . . \$29.95

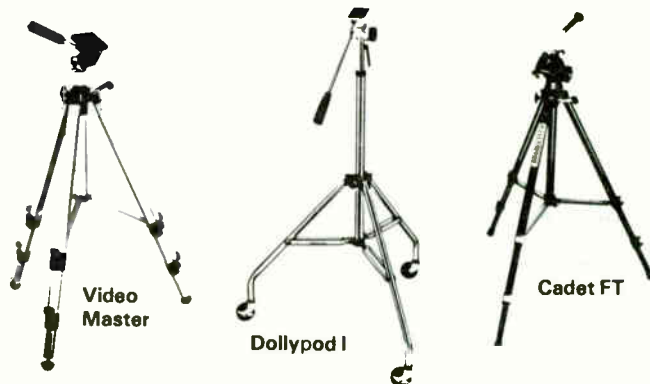

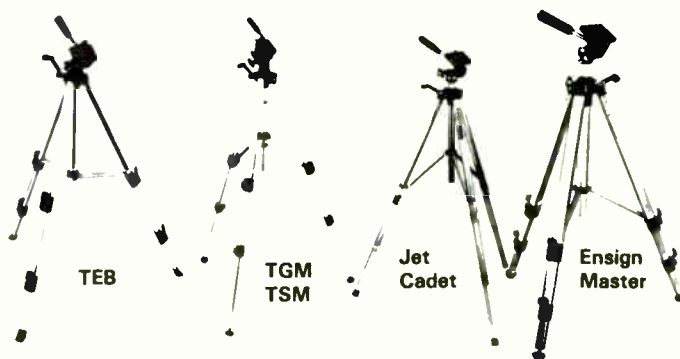

**TEB:** Compact tripod that has every feature needed for small cameras. 21mm channel legs are rigidized by leg braces and sections open and close quickly with lever locks. Elevator column is gear driven with crank handle. 3-way panhead tilts, pans, and flips over for vertical camera position. Opens to 51", closes to 20" . . . . . \$39.95

**TGM:** Handsome lightweight black tripod with 22mm open channel legs and fast lever locks, 3-way head pans, tilts, and flips over for 35mm cameras; leg braces rigidize legs; geared elevator column for precise elevation . . . . . \$49.95

**TSM:** Same tripod as TEM but with stronger closed channel legs for maximum support . . . . . \$54.95

**Jet Cadet:** Heavier 25mm tubular leg for extra strength rigidized by strong leg braces. Sections locked with positive locking collets. Larger panhead is 3-way with panning, tilting, and flip over action. Elevator column is gear driven with folding crank handle and has friction control to prevent camera slipping. Also available with spring head as Video Cadet and with large fluid head as Cadet FT . . . . . \$61.95

**Ensign Master:** Heavier 25mm leg in open channel version rigidized by strong leg braces. Sections locked with fast lever locks. Larger panhead is 3-way with panning, tilting, and flip over action. Elevator column is gear driven with folding crank handle and has friction control to prevent camera slipping. Also available with spring head as Video Master and with large fluid head as Master FT . . . . . \$74.95

## Medium Weight Tripods For Compact Camcorders and 8mm Video Cameras

**Cadet:** Two medium duty models featuring heavy 25mm tubular legs, all black, leg sections slotted for extra strength and to prevent twisting; levers open and lock leg sections quickly and easily; heavy leg braces, geared elevator with crank; friction control adjusts tension on elevator to prevent slipping.

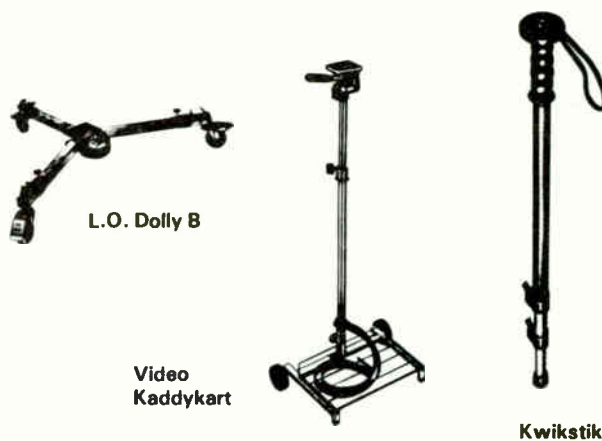

**Video Cadet:** As above with spring action head brakes camera forward and back . . . . . \$79.95

**Cadet FT:** As above with large fluid head for smooth movement, quick disconnect platform, long leveraged panhandle with adjustable angle, large locking controls . . . . . \$89.95

**Master:** Series of two similar tripods offering black 26mm closed channel leg for extra strength. Both models include lever locks, heavy leg braces, geared elevator; friction control adjusts tension on elevator to prevent slipping.

**Video Master:** As above with spring action head brakes camera forward and back . . . . . \$84.95

**Master FT:** As above with large fluid head for smooth movement, quick disconnect platform, long leveraged panhandle with adjustable angle, large locking controls. . . . . \$99.95

## Dollypod Series

**Dollypod I:** The perfect tripod for mobility because it was engineered to roll on wheels. Low center of gravity prevents tripod from tipping when rolling. Heavy leg tubing, double runner brace, clutch elevator control; folds up for compactness. Complete with heavy precision spring head, quick disconnect, adjustable panhandle . . . . . \$210.00

**Dollypod II:** Same as above but smaller spring panhead, quick disconnect, adjustable panhandle. . . . . \$189.00

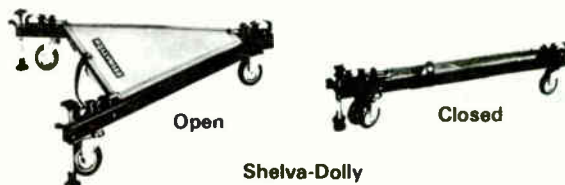

**Dollypod III:** Same as above but with adjustable tension fluid head, quick disconnect, adjustable panhandle . . . . . \$229.00

## Tripod Accessories

**Shelva-Dolly** Unique medium weight dolly with its own built-in shelf to hold VTR and accessories. Three 3" wheels each has plunger lock with toe release. Fits any tripod with adjustable clamps. Canvas shelf folds up when dolly collapsed for easy portability . . . . . \$84.95

**L.O. Dolly B** A heavy-duty dolly made from 30mm square channel aluminum tubing with 3" rubber wheels and toe locks. Each strut is gauge marked for clamp alignment and closes up into parallel position for compactness. Sliding leg clamps are adjustable both for tripod leg spread and tripod leg size. Locks into either open or closed position with web carry strap. Fits all tripods . . . . . \$74.95

**Video Kaddykart** Convenient way to support video camera and VCR. Camera mounts to 3-way panhead on telescoping tubing for adjustable height. VCR mounts on strong base with 3" wheels secured by adjustable strap. Now you can roll your equipment and follow action. Upright tubing disassembles for use as Unipod . . . . . \$69.95

**Podrack** Wire basket which hooks onto legs of any tripod to hold VTR conveniently. Measures 13" W and 4.5" D expandable to 8" . . . . . \$39.95

**Kwikstik** Heavy-duty telescoping Monopod with camera platform to hold still or video camera. Provides steady support with lightweight mobility which can be carried easily and change for camera position quickly. 3-section with fast lever lock; complete with wrist strap and rubber tip. . . . . \$39.95

# TRIPODS/HEADS/ PORTABLE TABLE

## Propod and Vidipod Tripods

Because of their size and weight, camcorders require heavy-duty tripods to provide stability while the camera is following the action and also require special adjustable features so the camcorder works with best efficiency and convenience. The Propod and Vidipod tripods are made rugged with full adjustment features for each type and size camcorder on the market to provide the best results easily and comfortably.

**Propods:** Series of 3 models each featuring, heavy 32mm leg tubing and 6' height. All parts have been made massive including the geared elevator column with crank handle, leg braces with lock, oversize collet locks, adjustable friction control to adjust tension on elevator to prevent falling and long panhandle which can be adjusted to different angles

**Propod I:** As above with heavy spring action panhead, quick disconnect platform and tilt lever lock . . . \$149.00

**Propod II:** Massive fluid action head for smooth tilt movement, quick disconnect and tilt lever lock . . . \$175.00

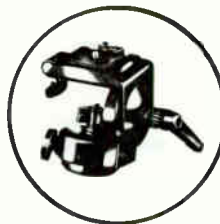

**Propod III:** Precise fluid action head with adjustable fluid tension in both pan and tilt quick disconnect and tilt lever lock . . . \$185.00

**Vidipods:** Series of 2 models featuring heavy 30mm closed channel legs and large lateral lever locks. Both models include geared elevator column, friction control elevator, heavy leg braces and long leveraged panhandle with adjustable angle

**Vidipod CC:** As above with strong spring action head, quick disconnect platform and tilt lever lock . . . \$134.95

**Vidipod CCF:** As above with precise fluid action head with adjustable fluid tension in both pan and tilt movements, quick disconnect, and tilt lever lock . . . \$155.00

**Wheels:** Set of three 3" wheels with toe locks attach without tools to either Vidipod model to provide extra mobility . . . \$39.95

## Three Different Style Heads Providing FluidTorq Features

**Fluid Torq Master:** Massive head measures 2.5" x 3" x 4" high with smooth roller bearing movement and teflon controlled tension. Adjustable pan and tilt tension, quick disconnect, adjustable angle panhandle with positive lock.

**FluidTorq II:** Large, heavier-duty head with added features. Adjusting knob changes head tension to balance camera weight and size. Long handle can be adjusted to different angles. Quick disconnect facilitates mounting camera quickly and easily. Separate locking control for panning and tilting. Smooth fluid movement.

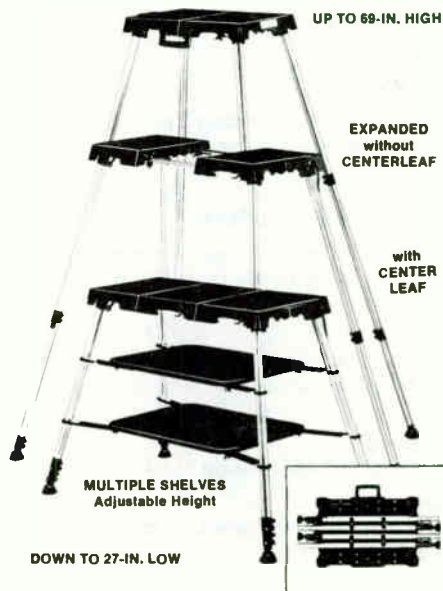

**FluidTorq SR:** Massive, more deluxe head for larger cameras. Adjusting knob changes head tension to balance camera with spring assist to brake camera under loose tension. Telescoping panhandle to adjust to different lengths with adjustable angle and ratchet lock. Quick disconnect to mount camera quickly. Separate locking controls. Smooth fluid movement.

## ADJUSTABLE

- **The Tabletop Gets Bigger and Bigger**  
The large 13" x 19" vinyl covered tabletop opens to 13" x 29" or 375 sq. in. of workspace
  - **The Table Gets Taller or Shorter**  
3 section legs adjust from 27" work height up to 69" for any job in any size room
  - **The Legs Slide In**  
No screwing, no stripping. Legs slip into sockets and clamp locked easy, fast
  - **The Legs Slide Out**  
No more leg locks to twist. Tamperproof levers open/lock adjustable legs
  - **The Shelves Adjust Up or Down**  
Optional 16" x 22" shelves adjust to different heights or use in multiples
- Aluminum diecast table vinyl covered. Steel legs up to 1 1/8" diameter. Large rubber swivel feet. Carry handle; legs store under tabletop for portability.  
**Adjustable Table** . . . \$149.95

### Accessories

- Center Leaf:** 13" x 10" cast aluminum section fills in center to make continuous surface. . . . \$34.95
- Shelf:** 16" x 22" vinyl covered with brackets to adjust to various heights or use in multiple . . . . . 29.95
- Power Panels:** Electrical panel attaches to end of table and provides 3 grounded outlets, 15' cord . . . . . 19.95
- Padded Carrying Case.** . . . . . 39.95

# LOCATION LITEPAKS/ LITE STANDS

## Location Litepaks

Litepaks provide an economical and convenient way to store and carry all your lighting equipment. A variety is shown below including deluxe and economy lights in both deluxe cases and economy carriers.

### LP340BD Deluxe Location Litepak

Includes: • (3) No. 600 reflectors • (3) No. 4BD barndoors • (3) DYH 600W quartz lamps • (1) Deluxe carry case • (3) Flywate stands • (3) Stand extensions • (1) Extension cord • Lighting plans

Barndoors for use as front, side, and back lighting. Totals 1800W of illumination. All contents contained in partitioned plywood deluxe case measuring 19" x 12" x 8" . . . . . \$515.00

### LP333 Deluxe Location Litepak

Same as LP340BD but without barndoors . . . . . \$449.00

### LP3 Combination Litepak

An economy 3-way lighting kit that provides a total of 1800W of lighting for front, side, and back. Includes 3 No. 600 reflectors with 600W quartz lamps, 3 flywate lite stands with 3 stand extensions for total height of 7.5 ft., 12 ft. extension cord, fittings, and lighting diagrams. All contents in partitioned heavy weight paperboard carrier with metal snaplocks and styrene handle. . . . . \$350.00

### LP2 Combination Litepak

Same as LP3 but a 2-way lighting kit providing 1200W of illumination. Contains 2 each of No. 600 reflector lamps, stands, extensions, etc. in same carrier . . . . . \$250.00

### LP27 Video Combination Litepak

Same as LP2 but adds Model 708G Videolite for total 1800W. Provides camera mounted light plus side and background light for 3-way triangular lighting for professional effect. Complete with lamps, 2 flywate stands and extensions, fittings, and light plans fitted into same carrier . . . . . \$330.00

### LP36 Q-Brite Kit

Contains deluxe heavy-duty Model 660 Q-Brite Reflectors and heavier duty Casestands in sturdy paperboard carrier with metal snap-latches and styrene handle. Includes 3 No. 660 with 600W DYS quartz lamps, 3 Casestands with stand extensions, 2 rotating 4-leaf barndoors, fittings . . . . . \$399.00

### LP26 Q-Brite Kit

Same as above but 2-way kit including 2 No. 660 with lamps, 2 Casestands, and one barndoor. . . . . \$269.00

## Lite Stands

### For Every Video and Photo Need

Lite Stands are an indispensable part of every lighting set-up. They support the light and place it exactly where it is needed. Acme-Lite offers a variety of sizes and prices to suit every need.

#### Flywate Stand

Ultra compact 4-sec. closing to a mere 18" and opening to 6 ft. Recommended for lightweight units and where compact portability is needed. . . . . \$34.95

#### Midelwate Stand

Same design but slightly larger closing to 24"; opens to 7 ft. . . \$39.95

#### Litewate Stand

Basic steel stand with 5/8 tubing offers greatest value. 2-sec closes to 42"; opens to 6.5 ft. . . . . \$22.95

#### Bantamwate Stand

Same stand but 3-sec closes to 36"; opens to 8 ft. . . . . \$34.95

#### Welterwate Stand

Deluxe stand for heavier lights offers finest construction and features 3-sec closes to 31"; opens to 7 ft. Heavier 1" tubing and 31" leg spread . . . . . \$69.95

#### Heviwate Stand

Same construction but 4-sec with heavier 1 3/8 diameter tubing. Closes to 37"; opens to 12 ft.; leg spread 35" . . . . . \$99.95

#### 7A Aluminum Stand

Aluminum 5-sec stand offering lighter weight and greater versatility. Sections locked in; legs braced; lock knobs won't fall out. Closes to 19"; opens to 7 ft.; leg spread 32"; weighs 30 oz. . . . . \$36.95

#### 9A Aluminum Stand

Same as 7A but closes to 23"; opens to 9 ft.; weighs 36 oz. . . \$41.95

#### Champion Roller Stand

Heavy-duty roller stand to hold largest lights. Built-in dolly 3" wheels sturdily braced. Folds up compactly. 3-sec with one inch base tubing closes to 39" and opens to 10 ft. Sections locked in; locking clamps prevent denting. . . . . \$139.95

#### Stand converters

All lite stands except Champion require 3/8" reflector fitting. To convert size of stand to smaller or larger fitting use:

No. 35 Converter Converts 3/8 to 5/8 fittings

No. 53 Converter Converts 5/8 to 3/4 fittings

. . . . . each \$6.60

# ACME-LITE MFG. CO.

# PROFESSIONAL LIGHTING

## Q-Brite Professional Video and Photo Lights

Q-Brite represents a trio of heavy-duty, compact quartz reflectors for professional use. Constructed of heavy steel housings and scientifically contoured aluminum reflectors using strong swivel yokes with adaptors for either 3/8 or 5/8 stands. Electrical construction includes 3-cond. power cords, heavy rated switches, and ceramic sockets. All models include lamp, safety chain, accessory clips, finger grips.

### No. 660 Q-Brite

Basic unit conical in shape with 4" diameter reflector, 3" depth which produces medium beam spread, fixed focus. Ideal illumination for most lighting applications such as key or fill as main or side light. Housing sunshine gold. 600W quartz lamp included. .... \$49.95

### No. 680 Focusing Q-Brite

Unique focusing arrangement enables beam adjustment from medium to broad and 3:1 ratio of beam center intensity. Such versatility makes this model adaptable to all lighting situations. Housing surf sand. 600W quartz lamp included. .... \$123.95

### No. 960 Broad Q-Brite

Specifically designed to give broad, uniform beam ideal for back and background lighting. Measures 4 x 4" with shallow 2" depth. Includes built-in 4-leaf barndoors. Housing black. 600W quartz lamp included. .... \$99.95

### No. 990 Q-Brite 1000W

A higher intensity broad beam reflector with long life frosted lamp for greater diffusion. Includes 1000W lamp, rated 400 hours in 5-1/2" reflector with heavy-duty switch. Barndoors included. .... \$149.95

**4VB BARNDOORS:** 4-leaf rotating Barndoors to fit Models 660 and 680 only ..... \$32.50

**VSD SCRIM:** Fine mesh screen framed in aluminum for diffusion. Use singly or in pairs. For all Q-Brite models only. .... each \$11.95

## Specifications For Q-Brite Models

Model	Lamp	Watts	Amps	Kelvin	Hours	Beam	FCBC
660	DYS	600	5.2	3200	75	45°	100
680	DYS	600	5.2	3200	75	40°-75°*	65-190*
960	DYS	600	5.2	3200	75	60°	60
990	FHM	1000	8.7	3200	400	75°	140

**FCBC:** Footcandles at Beam Center measured at 10 feet. All models priced to include Lamps as indicated.

\*For focusing model indicates extreme from spot to flood position.

## Suggested Q-Brite Combinations

The versatility of Q-Brite line allows for various combinations to suit your lighting needs. Below are listed several combinations which are more economical than purchased as components.

**No. LP268 Litepak**

1 No. 660 Q-Brite  
1 No. 680 Q-Brite  
1 No. 960 Q-Brite  
(incl. Barndoor)  
3 Casestands  
3 Stand Extensions  
3 DYS Lamps  
1 Deluxe Case  
\$545.00

**No. LP396 Litepak**  
1 No. 660 Q-Brite  
2 No. 960 Q-Brite  
(incl. Barndoors)  
3 Casestands  
3 Stand Extensions  
3 DYS Lamps  
1 Deluxe Case  
\$530.00

**No. LP398 Litepak**  
1 No. 680 Q-Brite  
2 No. 960 Q-Brite  
(incl. Barndoors)  
3 Casestands  
3 Stand Extensions  
3 DYS Lamps  
1 Deluxe Case  
\$550.00

**No. LP290 Litepak**  
2 No. 990 Q-Brite  
(incl. Barndoors)  
2 Casestands  
2 Stand Extensions  
2 FHM Lamps  
1 Deluxe Case  
\$530.00

**No. LP300 Litepak**  
1 No. 660 Q-Brite  
1 No. 680 Q-Brite  
1 No. 990 Q-Brite  
3 Casestands  
3 Stand Extension  
3 DYS/FHM Lamps  
1 Deluxe Case  
\$625.00

## Assort your own lighting studio, packed in Deluxe Case, with Stand and Accessories complete.

### The Case

The case designed for the Q-Brite line is the most versatile and deluxe ever designed. Constructed of solid plywood and covered with tough PVC laminate. All edges and corners reinforced with extruded aluminum. Interior fully foam padded. Vertical partitions adjustable to any size. Includes strong hasp locks and full length piano hinge. Measures 26 x 12 x 9. Holds up to 3 lights, 3 stands, plus accessories. .... Case Only \$179.95

### The Stand

The special Case stand designed to fit in the case provides maximum sturdiness for Q-Brites. 3-sec. stands made of 5/8, 1/2, and 3/8 telescoping tubing, black seamless tubing with star locking knobs. Sections locked in, legs channeled and braced. Elevates to 7 ft. folds to 26"; leg spread 30". .... Stand Only \$29.95

# QUARTZ REFLECTORS

## Quartz and Photoflood Koolvent Reflectors Deluxe Studio Lights for Photo or Video

010-Q  
010-LL

010-P  
012-P

640HD

Each reflector has a specially designed Koolvent housing on the back which keeps the unit cooler and easier to use. Heavy swivelling yoke, 3-conductor grounded power cord, and large control knobs make this suitable for heavy-duty use.

**010-P Koolvent Reflector:** 10" diameter using #1 (BBA) lamp 250W (not included) in screw-in ceramic socket providing 45° beam spread with 125fc at beam center at 10 ft. . . . . \$56.95

**010-Q Koolvent Reflector:** 10" diameter using 600W quartz lamp (included) providing 40° beam spread with 150fc at center at 10 ft. Expected lamp life 75 hours. . . . . \$95.00

**010-LL Koolvent Reflector:** Same as 010-Q but 500W quartz lamp (included) with 100fc and 2000 hour life . . . . . \$125.00

**012-P Koolvent Reflector:** 12" diameter for #2 (EBV) lamp 500W (not included) providing 40° beam with 170fc at center . . . . . \$69.95

**025-P Koolvent Reflector:** Cone shaped 7" diameter for #1 or #2 photoflood lamp (not included) for narrow beam, 80 to 120fc . . . . \$65.95

**640-HD Koolvent Reflector:** 6" diameter using 600W quartz lamp (included) with 60° beam and 90fc at center at 10 ft. Equipped with 4-leaf rotating barndoors . . . . . \$115.00

## Compact, Economy Quartzflud Reflectors for Front, Side or Backlighting

**710-SL Quartz Studiolite:** Compact, low-cost light with big 1000W lighting punch. Includes quartz lamp with 75 hour life in lightweight phenolic housing small enough for gadget bag. Elliptical aluminum reflector for broad beam complete with folding 4-leaf barndoors to control beam. Includes locking swivel, panel switch, heavy power cord, stand adaptor for 3/8 stand . . . . . \$119.95

**710-LL Quartz Studiolite:** Same as above but with 1000W quartz lamp with 400 hour life rating ideal for longer video taping. . . . . \$129.95

**LP232 Litepak:** Deluxe combination of two Model 710SL for total 2000W. Includes two 7 ft. Midelwate Stands, 4 stand extensions, extension cord, lamps. All fitted into deluxe wood case, partitioned and lined . . . . . \$455.00

**600 Quartz Reflector:** Small, lightweight 6" diameter aluminum reflector which throws broad beam of light. Complete with 600W quartz lamp, double ball swivel, and stand adaptor for 3/8 stand. Electrically fitted with ceramic socket, 10 ft. power cord, 10 amp line switch, cool finger knob. Use for main, side, or back lighting . . . . . \$84.95

**48D Barndoors:** 4-leaf rotating barndoors to fit Model 600 reflector . . . . . \$22.95

**640BD Reflector:** Combination of 600 reflector with lamp and 48D barndoors. . . . . \$105.95

**923 Studio Jumbolite:** Giant 18" diameter reflector to illuminate entire scene and overall lighting in studio. Comes equipped with amazing 2-in-1 Lamp with large frosted outer envelope for diffusion plus inner quartz lamp for long life and consistency. Produces intense light highly diffused. Lamp 1000W, 27,000 lumens, 500 hours, 3200K. Reflector disassembles into 3 sections for portability. Complete with 10 ft. cable cord and 10 amp line switch . . . . . \$125.00

**920-RS Jumbolite:** 923 Reflector assembly and lamp plus heavy-duty Champion stand on roller base . . . . . \$325.00

### Liteclamps

**47 Mini Spring:** Medium tension spring clamp for attaching small lights to flat surface or tubing. Has 3/8 stud for light . . . . . \$7.95

**Pipe Clamp:** Heavy-duty clamp for heavy lights with adjustable screwlock. Fits flat or tubular surfaces from 5/8" to 2" . . . . . \$23.95

**49:** with 3/8 light stud . . . . . \$23.95

**49:** with 5/8 light stud . . . . . \$23.95

**48 Gaffer:** Heavy tension spring clamp with large grips for clamping to flat or tubular surface. Has 3/8 stud for light. Fits 5/8 to 2" . . . . \$23.95

# VIDEO CAMERALITES

**3 Models Offering Variable Power Sources, Flexibility, and Versatility • Light Output • Power Source • Beam Angle**

## Model 22-AC and AC Twinlite

Two individually switched lamps in tandem each 250W operating from 115V wall outlet. One lamp provides 250W for normal room sizes and average beam angle for smaller subjects. Both lamps provide 500W for large areas and wider beam angle for larger subjects. All Twinlite lamps are miniature size with built-in reflectors having faceted surfaces for optimum illumination. Dichroic coating on lamps and phenolic housings provide cool operation. Swivel yoke can mount on stand or video camera. . . . . \$129.95

Lamp	1	175 hrs.
Life	2	350 hrs.
Color Temp.		3250K
Beam Angle	1	25°
	2	45°
Watts	1	250
	2	500
Footcandles	2	150fc
	1	300fc

### One Lamp

Optimum illumination for normal room. Medium beam angle for average subjects.

### Two Lamps

Increased illumination for large room. Wider beam angle for larger subjects.

## Model 32-DC and DC Twinlite

Two individually switched lamps in tandem for DC operation includes 50W (high intensity) and 100W. Low wattage lamp provides intense light but doubles battery running time while second lamp provides same illumination with wider beam. Use both lamps simultaneously for high light output with wider beam angle. Total unit provides variable light output and beam angle plus double battery running time. . . . . \$129.95

Lamp	1	3000 hrs.
Life	2	50 hrs.
Color Temp	1	3075K
	2	3350K
Beam Angle	1	27°
	2	38°
	both	60°
Watts/ Amps	1	50/4.2
	2	100/8.6
	both	150/12.7
Footcandles	1	80fc
	2	90fc
	both	170fc

### First Lamp

Doubles battery running time.

### Second Lamp

Wider beam angle.

### Both Lamps

Increases both illumination and beam angle.

## Model 32P-DC and DC

Same as Model 32 but made to professional standards, with high intensity lamps. Includes two 200W lamps, to operate on 30V battery to provide maximum illumination of 400W. . . . . \$159.95

## Model 42-AC and DC Twinlite

Same construction as described before but operates on both DC (battery) and AC power.

Two individually switched lamps in tandem: one 100W operates on 12V battery; other 250W operates on 115V wall outlet. Unit can be used on either type power source with security of having unlimited reserve power when battery runs down.

Lamp	AC	175 hrs.
Life	DC	50 hrs.
	2	225 hrs.

**twinlites**

Or both lamps can be used simultaneously on both power sources when additional light and wider beam angle is needed. One power cord to fit battery and one to fit wall outlet each keyed to be used on correct power source. . . . . \$139.95

### DC Lamp

Use on 12V battery for portability.

### AC Lamp

Use on 115V circuit for reserve power.

### Both Lamps

Increased illumination for large room. Wider beam angle for larger subjects.

Color Temp	AC	3250K
	DC	3350K
	2	3300K
Beam Angle	AC	25°
	DC	38°
	2	60°
Watts	AC	250
	DC	100
	2	350
Footcandles	AC	150fc
	DC	40fc
	2	190fc

### Accessories

4VT Barndoors: 4-leaf barndoors attach to front of any Twinlite model to provide accurate control of light pattern. . . . . \$24.95

VST Scrim: Fine mesh screen attaches to front of any Twinlite model to provide soft lighting and diffusion. . . . . \$12.95

95 Handle: Handle attaches to any Twinlite model for holding light in hand. . . . . \$7.95

## Luminex Deluxe Videolite Series

A quartette of four compact lights which attach directly on camera, on light stand, or on tripod. Each is designed to provide color balanced light for sparkling pictures and will improve picture quality by adding depth, interesting highlights, and wiping out objectionable shadows.

Convection cooled, switch, swivels for bounce lighting, safety filter, faceted long-life quartz lamps, built-in shoe adaptor, stand adaptor.

No. 300: Luminex Videolite Operates on battery power; includes 100W, 12V lamp. . . . . \$69.95

No. 310: Luminex Videolite 115VAC current, 150W quartz lamp providing optimum output for low-level cameras. . . . . \$69.95

No. 325: Luminex Videolite 115VAC, 250W quartz lamp for optimum output in average size rooms. . . . . \$79.95

No. 360: Luminex Videolite 115VAC, 600W quartz lamp for high output in large rooms, weddings, parties, etc. . . . . \$79.95

### Accessories

4VL Barndoors: 4-leaf barndoors to fit all above models. . . . . \$17.95

## Videolites Camera Mounted

No. 708G Videolite 600W quartz lamp. 75 hour for more intense light in larger rooms and groups. Complete with safety guard, bounce bracket, stand adaptor. Includes lamp. . . . . \$59.95

No. 800VL Videolite 100W low-level light for closeups and small areas. Same construction as 708G. Includes lamp. U.L. approved. . . . . \$39.95

360

390

No. 725 Videolite Economy videolite with built-in elevated shoe mount (use 948 for cameras without shoe) and includes 250W quartz lamp rated 3200K. 200 hours good for up to 40 video cassettes. . . . . \$59.95

725G Videolite Same as above but with wire safety guard and cooler operation. U.L. approved. . . . . \$69.95

## 390 Auto Thyristor Videolite

A sensor measures the distance from camera to subject and then adjusts the amount of illumination. At full power, the light produces 600W for use in large banquet and party rooms, weddings, etc. but at closer distance or small rooms will dim the light to whatever is needed to prevent excessive heat and glare. A special dichroic filter color balances the light to produce color pictures at any distance. A beam focus lever adjusts for spot or flood. Built-in shoe mounts to top of most video cameras. . . . . \$129.95

# BATTERY BELTS/LIGHTS/ ACCESSORIES

## Battery Belts

Individual battery belts for strapping around the body to connect to and power VCR, cameras, lights, etc. Each cell in separate pockets to distribute weight evenly. All batteries rechargeable sealed lead acid to provide maximum energy for low cost. Cells are sealed to prevent leakage and can be used in any position; can be recharged in 16 hours up to 200 times from zero. Ideally suited for lighting applications because low impedance insures longest effective illumination output as well as extended discharge time for other applications. All belts include shoulder suspenders to lighten battery weight.

### 12BB Battery Belt

Basic Battery belt 12V, 5AH. Will power 100W light 20 minutes effectively; VCR or camera 4-5 hours. Has standard receptacle for cigarette lighter plug. Battery circuit fused. Includes 500MA charger and belt suspenders. Weight 5.5 lbs.

12BB ..... \$149.95

### 12BL Battery belt

Long life battery belt 12V, 10AH. Same as above but powers light 45 minutes; VCR or camera 9-10 hours. Weight 11 lbs. With 1.0A charger, suspenders.

12BL ..... \$290.00

### 24BB Battery Belt

Heavy-duty battery belt 24V, 5AH. Same construction as above. Includes 500MA charger and suspenders. Weight 11 lbs.

24BB ..... \$345.00

## Low Voltage Videolites For Battery Operation

### 7PB Videolite

12V 100W. Light including quartz lamp for plugging into 12BB or 12BL battery belt or any 12V battery system with 6' coil cord with cigarette lighter plug. Fitted with 3/8 stand adaptor.

7PB ..... \$69.95

### 7DL Videolite

24V 250W. Light including quartz lamp for plugging into 24BB battery belt or any 24V battery system with 6' coil cord with cigarette lighter plug. Swivel yoke with 3/8 stand adaptor. Lamp 75 hours, 3200°K.

7DL ..... \$99.95

## Videolite Accessories

25 Shoe Adaptor for 7PB or 7DL to mount light to video camera . \$ 7.95

4VS Barndoors, 4-leaf rotating for 7DL light. .... 29.95

VSS Diffusing Scrim for 7DL light . .... 10.95

## Combination Light and Battery Belt Kits

### PBB Combination Kit

12V 5AH 100W. Includes 12BB battery belt and 7PB low-voltage light plus 100W lamp, 500MA charger, shoe adaptor to mount light to camera, pouch to hold light, charger, suspenders.

PBB Kit ..... \$225.00

### PLL Combination Kit

12V 10AH 100W. Intended for longer running time. Includes 12BL battery belt and 7PB low-voltage light plus 100W lamp, 1.0A charger, shoe adaptor, accessory pouch, suspenders.

PLL Kit ..... \$360.00

### PHD Combination Kit

24V 5AH 250W. Heavy-duty kit for greater light output. Includes 24BB battery belt and 7DL low-voltage light plus 250W lamp, 500MA charger, shoe adaptor, suspenders. Barndoors and diffusing scrim available for light.

PHD Kit ..... \$440.00

### 350 AC/DC Minilite

Compact light fits on top of video camera operates on either 110VAC household current or 12V battery power. Comes complete with 100W AC lamp and 50W DC lamp for use on any 12V battery. Includes plug adaptor for use AC or DC. Light includes safety filter, 10' cord, camera shoe adaptor, fins for convection cooling.

350 ..... \$79.95

### Cam-Case A

Hard sided case made of polyethylene laminated on plywood to protect contents and finished in streamlined aluminum molding on all corners and edges in gold. Measures 19" x 14" x 7.5" to fit all camcorders. Interior fully foam padded with 4 permanent compartments formed by adjustable partitions. Includes rugged hardware with key locks, stay hinges, large carry handle. Hold-down strap provided to hold camera secure plus heavy shoulder strap and pad. Built-in Title Board with vinyl letter set allows you to make your own changeable movie titles (included).

A ..... \$119.95

### Cam-Case B

Each half of the case is a single molded shell, richly embossed design, and rounded corners. The two shell halves are joined by black metal edging containing streamlined stretch handle, two slide key locks, large spring hinges, and oversize bumper rests. Interior is fully foam filled with egg-crate lining on top and diced foam on bottom to permit custom forming cavity to fit your own camera.

B ..... \$119.95

Three sizes of soft bags to fit every camcorder. All bags made of water resistant 1000 denier Vandura in black or gray with gold piping. Bags feature unique double zipper top that opens toward back of bag to keep cover out of the way but opens or closes simultaneously for fast, easy access. Sides reinforced with close cell padding for protection. Plenty of extra pockets to hold cassettes and accessories.

MAXI. Measures 15" x 10" x 7" for full VHS or larger 8mm camcorders. Includes 6 pockets for accessories. .... \$64.95

MAXI ..... \$64.95

MIDI: Measures 12" x 7" x 5" for compact or smaller 8mm camcorders. Includes 4 pockets. .... \$54.95

MIDI ..... \$54.95

MINI: Measures 9" x 7" x 5" for Handi camcorders or video cameras. Includes 3 pockets. .... \$49.95

MINI ..... \$49.95

# VIDEO/AUDIO PATCHING

## Pro-Patch Video Jackfield

### PPV-24 MK II

The Pro-Patch Video Jackfield features a 2 x 24 array of ADC switching (self-normaling) coax jacks wired back to quick and simple BNC connectors on a clutter-free rear panel. Self-normaling loops internal to the jackfield are color-phase compensated for cross patching. No phase shift occurs between self-normal and patch cord providing a phase coherent patching system.

4-26792-0010 2 x 24 (48 Jacks) . . . . . \$1750.00

Note: Use only 3' patch cord to preserve phase coherent capability of ADC Pro-Patch Video Jackfield.

Note: Use only 36" patch cords for Pro-Patch units.

Note: When ordering, G denotes gold plating on all contact surfaces, N denotes gold plating on the center conductors/springs only.

## PPI Panels

- You can select the SJ3000 in terminating, non-terminating, nickel or gold versions
- The SJ3000 coax jack is rated for 10,000 insertion/withdrawal cycles
- PPI Panels are available in 1<sup>3</sup>/<sub>4</sub>" and 3<sup>1</sup>/<sub>2</sub>" heights with 12, 20, 24 or 26 circuits for greater installation flexibility
- PPI Panels with various hole and spacing configurations are sold separately or loaded with your choice of jacks

Our innovative PPI Panel with SJ3000 switching (self-normaling) coax jacks makes accessing and connecting video circuits easy.

The PPI is available in several configurations to suit your particular application need.

PPI-2224RS-75N Loaded Panels. . . . . \$820.00

## VAMP—Video, Audio Modular Patchbay

- Chassis accepts 20 video and audio modules
- Audio module features unique QCP terminations
- Video module comes with the ADC SJ3000 self-normaling coax jack
- ADC supplies blanks for unused positions to give the appearance of a fully loaded patchbay

Offers all the flexibility you need in a single bay. Ideal if you have limited or changing patching requirements or need audio and video patching in the same bay.

# VIDEOGRAPHIC PRINTER

## CT1500 VIDEOGRAPH PRINTER

### IMAGE

- **Size:** 6" x 8" (standard 3 by 4 television aspect ratio)
- **Number of Scan Lines:** More than 100,000, thus creating a videograph which does not display the characteristic television line structure
- **Copy Time:** 18 Seconds typical for 525 line 60 fields/second image  
26 Seconds typical for 625 line 50 fields/second image
- **Tonal Range:** A maximum of 64 discernable shades when using 7772 dry silver paper or 7856 dry silver film
- **Media:** 7772 Dry silver paper — 7856 Dry silver film — 100 film or 200 paper videographs per daylight load cassette

### SIGNAL SOURCES

- **Formats:** 525 Line 60 fields/sec interlaced or 262 line non-interlaced composite video. 625 Line 50 fields/sec interlaced or 312 line non-interlaced composite video. Other television formats available on special order
- **Level:** Nominally per RS170
- **Connectors:** BNC in loop-thru configuration
- **Impedance:** Switchable, between 75 ohm and Hi-Z

### CONTROLS

- **Front Panel:** Recording start/stop, negative/positive image, intensity, contrast, recording speed
- **Remote:** All front panel controls are available at the rear panel connector. Footswitch jack also provided for start/stop

### DISPLAYS

- **Front Panel:** Intensity, contrast, recording speed plus systems status indicators
- **Remote:** All system status data provided on rear panel connector

### GENERAL

- **Size:** 10.5" H x 17"W x 22"D (26.7 x 41.5 x 56.0cm)
- **Weight:** 85 lb. (38kg)
- **Power:** 115V, 60Hz, 750W or 230V, 50Hz, 750W

The CT1500 is a Videograph Printer. Given a standard video signal as the input, it provides large, high quality pictures in paper, negative or overhead transparency form. Superior quality video to photo conversion is available for the first time, because of the capability of the CT1500 to eliminate video scan lines from the image.

Videographs can now be used for applications which previously were open only to time consuming and expensive photographic methods. Continuous tone videographs for reference, analysis, test, comparison, annotation, distribution, overhead projection, and color printing masters (in the form of continuous tone separations and graphic overlays), are now in your hands, in seconds, ready for use.  
**CT1500** ..... \$9900.00

### OPTIONS

**CT1503:**  
The Automatic Range Compensation (ARC) module allows a wide range of input and sync amplitudes to be accepted without adjustment.

**CT1503** ..... \$1000.00

**CT1504**  
The RGB Switcher module selects between RGB signals and mixes all three to allow the creation of continuous tone cyan, magenta, yellow and black separations. Also accepts RGB inputs and combines them to allow the creation of a full quality black and white videographs.

**CT1504** ..... \$1000.00

# MODULAR VIDEO CABINETS

MVC-1

MVC-2, shown with accessory ROS and TS

MVC-3, shown with accessory ROS

## MVC-1, MVC-2, and MVC-3 Modular Video Cabinets

The MVC-1, 2, and 3 accept most popular monitors and playback equipment, providing complete access to both front and back of the electronics.

The MVC Series offers versatility, security, mobility, and attractive storage for video systems. Each module incorporates a welded steel frame for strength, handsome oak pattern side panels, doors and top, one adjustable shelf built-in ventilation and accommodations for hook-up wiring. Each system has an assortment of accessories.

- **Dimensions:** Each module overall, 33" H x 31" W x 23" D. Inside dimensions, 30 1/2" H x 29 1/2" W x 20 1/2" D. (Deduct 2 1/2" from inside height for flip-up door.) Casters add 6" to overall height.
- **Construction:** Welded steel frame using 16-gauge uprights and 20-gauge top and bottom. Side panels of oak pattern with plastic overlay on 3/8" particle board. All doors oak pattern overlay on 1/2" particle board with T-molded edges, hinges full-length piano type. Master keyed locks on all doors. Pilaster brackets in each module for 1/2" increment adjustments of shelf. Adjustable steel shelf in each module. 2" wiring access holes with plastic grommets supplied in each shelf. Caster sockets arc welded into bottom of each module. Top panel 1/2" oak pattern with T-molded edges
- **Casters:** 5", ball bearing swivel, two with locking toe brakes. (Standard on models MVC-2 and MVC-3).

**MVC-1:** This module includes one swing-up locking door and a fully adjustable shelf. Wiring access holes are provided in the bottom of the cabinet and in the adjustable shelf within the cabinet. The MVC-1 Module can be stacked. Arc welded caster sockets are provided so that casters may be added if desired. Shpg. Wt. 109 lbs.

**MVC-1** . . . . . \$370.00

**MVC-2:** Identical in size to the MVC-1. It is equipped with two conventional piano-hinged doors, both locking. Wiring access holes are provided both in the bottom and in the adjustable shelf. Heavy-duty 5" casters, two with locking toe brakes. Shpg. Wt. 114 lbs.

**MVC-2** . . . . . \$386.00

**MVC-3:** Four locking doors insure easy and immediate access to the back of the video equipment as well as the front. Adjustments can be made without removing the equipment from the cabinet. The front monitor door swings up and slides back into the top of the cabinet leaving a glare shield extending over the monitor screen. Access provisions have been made for equipment hook-up. Shpg. Wt. 223 lbs.

**MVC-3** . . . . . \$719.00

### Accessories

**ROS Roll Out Shelf:** Designed to position at any height within the cabinet and to give easy access to the video recorder/playback, this convenience accessory can be used with either the MVC-1, MVC-2 or MVC-3. The 80 lb. load capacity shelf insures safety for the equipment. Shpg. Wt. 13 lbs.

**ROS Roll Out Shelf** . . . . . \$58.25

**ES Extra Shelf:** The adjustable steel shelf will add over four square feet of shelving to the module. Shpg. Wt. 10 lbs.

**ES Extra Shelf** . . . . . \$25.00

**TS Tape Storage Drawer:** Provides storage for 32 3/4" video tape cassettes. Designed to position at any height within the cabinet. Shpg. Wt. 17 lbs.

**TS Tape Storage Drawer** . . . . . \$79.00

**A Electrical Assembly:** Dual electrical outlets which will mount in the top or bottom, left or right of the MVC-1, MVC-2, MVC-3. 20' of 16/3 stranded wire with molded plug. Shpg. Wt. 2 lbs.

**A Electrical Assembly** . . . . . \$21.00

## MVC-4, 5, and 6 Modular Video Cabinets

The MVC-4, 5, and 6 accommodate the larger video equipment. They provide 30% more locking space than the MVC-1, 2, and 3 Series.

- **Dimensions:** Each module overall, 32<sup>1</sup>/<sub>2</sub>" H x 36" W x 27" D. Casters add 6" to overall height. Door openings, 26<sup>3</sup>/<sub>4</sub>" H x 30" W. Inside, 29<sup>1</sup>/<sub>4</sub>" H x 33<sup>1</sup>/<sub>2</sub>" W x 24<sup>1</sup>/<sub>2</sub>" D
- **Construction:** Welded steel frame using 16-gauge uprights and 20-gauge top and bottom. Side panels of oak pattern with plastic overlay on <sup>3</sup>/<sub>8</sub>" particle board. All doors, oak pattern overlay on <sup>1</sup>/<sub>2</sub>" particle board with T-molded edges. Double hinged, double doors front and rear each with 270° sweep. Hinges full length piano type. Master keyed locks on all doors. Pilaster brackets in each module for <sup>1</sup>/<sub>2</sub>" increment adjustments of shelf. One adjustable steel shelf in each module. Equipped with grommets wiring access holes in cabinets and shelves. Top panel <sup>1</sup>/<sub>2</sub>" oak pattern with T-molded edges
- **Casters:** 5" ball bearing swivel, two with locking toe brakes. (Standard on models MVC-5 and MVC-6)

**MVC-4:** Consists of the top module of the MVC-6. Use as a tabletop cabinet. Arc welded caster sockets are provided so that casters may be added if desired. Shpg. Wt. 135 lbs. . . . . \$399.00

**MVC-5:** Same as MVC-4 plus it includes heavy-duty 5" casters, two with locking toe brakes. Shpg. Wt. 140 lbs. . . . . \$430.00

**MVC-6:** Locking doors insure easy and immediate access to the back of the video equipment as well as the front. Acces provisions have been made for hook-up. The spacious system offers 27<sup>1</sup>/<sub>2</sub> cubic feet of locking storage. The top and bottom modules are individually lockable adding convenience and versatility to the system. Shpg. Wt. 275 lbs. . . . . \$822.00

### Accessories

**RROS Roll Out Shelf:** Positions at any height within the cabinets, giving easy access to the video recorder/playback. Shpg. Wt. 22 lbs. . . . . \$68.25

**EES Extra Shelf:** The adjustable steel shelf will add 4.8 square feet of shelving to the cabinets. Shpg. Wt. 11 lbs. . . . . \$28.25

**TTS Tape Storage Drawer:** Provides storage for video tape. Designed to position at any height within the cabinets. Shpg. Wt. 29 lbs. . . . . \$88.25

**A Electrical Assembly:** Dual electrical outlets, 20 feet of 16/3 stranded wire with molded plug. Shpg. Wt. 2 lbs. Television equipment and materials not included . . . . . \$21.00

## VT Series — Video Tables

Fully hinged, steel-backed double-locking doors protect tapes and accessories. Each cabinet has 5.75 cubic feet of storage space with an adjustable shelf within the cabinet.

Heavy, ribbed rubber pads on top of each unit reduce noise and provide a non-skid surface. The welded steel tables have charcoal brown enamel finish with oak panels and a chrome plated handle. Two keys furnished.

The top of the cabinet on the VT-27C is a convenient working height of 27" for video recorders and playback units.

**VT-27C** 27<sup>1</sup>/<sub>2</sub>" H, 18" x 30" shelf size, Shpg. Wt. 62 lbs. . . . \$238.00

The VT-38C offers a monitor shelf 38" above the floor. Small playback units are positioned on the second shelf.

**VT-38C** 38" H, 18" x 30" shelf size, Shpg. Wt. 73 lbs. . . . . \$254.00

The television receiver or monitor is 52" high on the top shelf of the VT-52C model for excellent group viewing.

**VT-52C** 52" H, 18" x 30" shelf size, Shpg. Wt. 77 lbs. . . . . \$263.00

The shelves of the VT-3254C provide over 14 square feet of space. An especially big feature is the choice of heights—there are twelve to choose from—from 32" to 54". Many job functions can be served with one versatile table. Overall size: 18" x 30" with adjustable height from 32" to 54" in 2" increments.

**VT-3254C** Steel, three 18" x 30", one 16<sup>5</sup>/<sub>8</sub>" x 28<sup>5</sup>/<sub>8</sub>" shelf size, Shpg. Wt. 84 lbs. . . . . \$273.00

### Accessories

**VCS Electrical Assembly:** 4 power outlets, grounding type, 20' cord, 3-wire, 1250W. Shpg. Wt. 3 lbs. . . . . \$26.50

**AV-552 Safety Belt:** Webbed belt for securing the monitor to the table. 10' long, 600 lb. test. Shpg. Wt. 1 lb. . . . . \$19.00

### DP-27 Rugged Utility Table

This rugged utility table with a 300 lb. load capacity especially suited for computer and micro-film reader applications. Spacious walnut pattern wood top is 36" x 20" with protective T-molding around edges. The all-welded steel frame is finished with baked on charcoal brown enamel. Equipped with decorative casters as standard.

**DP-27** 27"H (not adjustable), 20" x 36" shelf size, Shpg. Wt. 45 lbs. . . . . \$120.00

### Optional:

**Glides:** Add suffix "G" to model number. Reduce weight by 3 lbs., height by 2". Deduct \$5.00 from price.

**4" Casters:** Add suffix "-4" to model number. Add 2 lbs. to weight, 2" to height. Add \$5.00 to price.

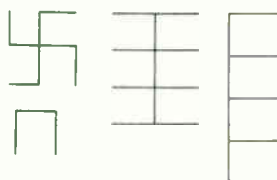

**5" Casters:** Add suffix "-5" to model number. Add 4 lbs. to weight, 3" to height. Add \$10.00 to price.

# LEARNING CENTER STUDY CARRELS

Choice of seating arrangements with IVLC and DVLC

IVLC

DVLC-1 with accessories

## IVLC—Instructive Video Learning Center

- **Overall Dimensions:** Each student position is 50" H x 36" D. The 3/4" thick divider panels are positioned on 48 3/4" centers
- **Work Surface:** Positioned 29" above the floor and is 48" W x 24" D. Supplied in blond maple finish
- **Monitor Shelf:** Built into each student position, 48" W x 12" D. Equipped with electrical outlet on top surface and an entrance into conduit for wiring to recorder/playback. Charcoal brown semi-gloss enamel finish
- **Side Panel:** 30" H x 36" L x 3/4" thick. Designed with flowing contour lines. Provides audio and visual separation between student positions. Supplied in danish walnut finish
- **Front Panel:** 28 1/4" H x 48" W x 1/2" thick. Supplied in danish walnut finish
- **Table:** Steel legs are 14-gauge x 1 1/4" square tubing. Includes adjustable glides with anchor brackets. Legs secured to rails by 5/16" bolts with self-locking nuts. Rails are 18-gauge steel. Legs are spaced in intervals to maintain ample strength and rigidity, yet facilitate easy janitorial maintenance
- **Wiring:** Harness type. Provision is made for quick connections between positions. Accessory Power Cord may be used inside the optional Electrical Leg or enter directly into the wiring channel. Intended usage will determine number of cord sets required. Each circuit should be fused for 15A maximum. 14-gauge wiring provided for current carrying wires in both the wiring for each position and the accessory cord set. The capacity of each circuit is 15A or 1800W at 120V

The handsome walnut pattern front and divider panels are covered with wear resistant plastic laminate as is the birch desk surface. Exposed edges are protected with plastic molding. Metal parts are finished with baked-on charcoal brown enamel. Instructive Video Learning Centers ship unassembled.

# VIDEO CASSETTES

### Agfa Broadcast Plus U-Matic Video Cassettes

AGFA Broadcast Plus U-Matic Cassettes will add a new dimension of color brilliance and definition to your masters with: 1dB more color signal-to-noise, 2.5dB more video signal-to-noise, 4dB more RF output and an exceptionally low dropout rate, as compared to the industry standard.

In addition to excellent video characteristics, AGFA BROADCAST PLUS U-Matic Cassettes utilize a black anti-static backcoating resulting in better tape transport and winding properties.

Precision molded and assembled under stringent and uncompromising quality control standards, AGFA BROADCAST PLUS U-Matic Cassettes are designed for use on all U-Matic video cassette players and recorders.

## BATTERIES/BATTERY BELTS

### 7700 Series Ride Behind Batteries

All Alexander ride behind (on board) batteries are equipped with an Anton Bauer Snap On battery mount. No cables or modifications are needed. All Alexander batteries feature graded and sorted cells so the battery is assembled with premium grade cells.

<b>7700-10</b> Voltage: 12V Capacity: 4AH Weight: 3 lbs., 8.5 oz. Type: NiCad	<b>7700-11</b> Voltage: 13.2V Capacity: 4AH Weight: 3 lbs., 14 oz. Type: NiCad	<b>7700-12</b> Voltage: 14.4V Capacity: 4AH Weight: 4 lbs., 6 oz. Type: NiCad
---	--	---

### Mini 7700 Series

The same premium quality as our full size 7700 series except lighter weight. Each of the Mini 7700 batteries will have slightly more than 50% of the run time of our full size 7700 series batteries. All are equipped with an Anton Bauer Snap On battery mount.

<b>7700-10 Mini</b> Voltage: 12V Capacity: 2.2AH Weight: 1 lb., 15 oz. Type: NiCad	<b>7700-11 Mini</b> Voltage: 13.2V Capacity: 2.2AH Weight: 2 lbs., 2 oz. Type: NiCad	<b>7700-12 Mini</b> Voltage: 14.4V Capacity: 2.2AH Weight: 2 lbs., 5 oz. Type: NiCad
--	--	--

### In Board Batteries

All Alexander in board batteries are constructed of premium grade, tested and sorted cells. The batteries are constructed using the most advanced technology available.

### Double Adjusting Battery Belts

All Alexander battery belts feature a unique double adjusting system allowing the crew member to adjust the belt to fit his or her figure...large or small. In addition, all Alexander battery belts include a shoulder strap for additional comfort and ease. The belt is leather with polyethylene and nylon stitched pockets. Polyethylene will not crack, split or break even under extreme weather conditions.

## CHARGERS AND ANALYZERS

### Chargers and Analyzers

#### TA3877-II TriAnalyzer

Helps you determine the remaining capacity or life of up to three batteries independently, yet simultaneously. Fully charges, discharges, recharges each battery. Remaining capacity is displayed in mA.H. The deep discharge process also conditions each battery, extending battery life. The ideal companion for our SM32077 Smart Charger.

**Voltage:** 12V to 14.4V  
**Charge Rate:** 1800mA.H  
**Discharge Rate:** 1600mA.H  
**Trickle Charge Rate:** 10mA.H

#### SM32077 Smart Charger

Independently charges up to three batteries. "Smart" because it automatically detects when a battery reaches full charge by using a unique microprocessing system. For use with all types of video batteries.

**Voltage:** 12V to 14V  
**Charge Rate:** 1800mA.H  
**Trickle Charge Rate:** 10mA.H

#### 20-11 Charger

Completely charges three 220mA.H batteries in 10 hours or less. This includes our 7700 Mini Series, BP-20-11, BP60A, JVC-1 and JVC-11 batteries.

**Charge Rate:** 200mA.H

#### 20-40 Charger

Completely charges two 4A.H batteries in 10 hours or less. The full size 7700 Series and BP90A are in this category.

**Charge Rate:** 400mA.H

# RACKMOUNTABLE VIDEO/ PULSE DELAY LINES

A complete rack mountable series of video and pulse delay lines, with the capability of replacing up to 1450 feet of cable, is now being marketed by Allen Avionics.

Showing 8 individual slide switches for rapid delay changes.

Photo shows 1 of 4 Strappable versions (VRS Series). Note that there are 7 input and output terminals available for strapping desired delay.

All models are stocked in our plant in Mineola, New York.

**RACK MOUNT** showing delay units with switches and terminals available for delay changes. Up to 11 delay units can be housed. Cards for mounting units in rack are purchased separately. Note hinged front panel.

Rack Size: 19" w., 10" d., 5 1/4" h.

Four variable slide switch units are being offered with total delays of 255, 637.5, 1275 and 2270 nanoseconds. Each unit contains 8 individual delay units. Four strappable units are also manufactured with total delays of 317.5, 635, 1270 and 2260 nanoseconds. The strappable units consist of 7 separate delay lines each having their own input and output terminals. The slide switches or terminal strapping provide methods for adding the individual lines together so that the output is always the summation of the individual lines. This eliminates most video distortions and assures good chrominance to luminance delay. Precision delay changes of as small as one nanosecond are easily accomplished. Low insertion loss, amplitude and delay flatness, along with excellent pulse fidelity, are characteristic of this series.

All units are manufactured to fit standard 19 inch racks and are provided with additional inserts to satisfy almost any mounting requirement. Delay units and racks can be purchased separately. The rack is manufactured with a hinged panel so that fast delay adjustments can be made. However, once adjustments are made, the front panel prevents further tampering with the slide switches or terminals.

Units are rack mounted by attaching a durable plastic card to the large surface. Note inserts provided for the attachment.

To satisfy requirements other than rack mounting, additional inserts are provided.

Part No.	Delay Range (Nano-Sec.)	Delay Steps (Nano-Sec.)	Method of Variation	Maximum Insertion Loss @ 100 KHz (db)	Amplitude Flatness At Any Delay Setting 100KHz to 5.5MHz (db)	Max. Rise Time (Nano-Sec.)	Package Size (Inches)
VRM0255	0-255	1.0	Slide Switch	.40	.4 Max.	20	1.250 x 4.15 x 4.00

# VIDEO/PULSE DELAY LINES

Allen Avionics, an established leader in the design and manufacture of Electromagnetic Delay Lines and L-C Filters has now developed a specialized group of products for the video market.

In color television broadcasting, accurate timing of signals is essential. This was initially achieved by the use of 75 ohm coaxial cable. The cost in time and materials to accomplish precise trimming and the lack of a rapid and convenient method of changing delays is currently responsible for the decline in cable usage. Television studios, studio equipment manufacturers and others engaged in the video industry are changing from 75 ohm cable to a more suitable method of achieving precise short delays. Allen Avionics now offers a line of Video Units for this purpose. Their use will result in a reduction of size, weight, installation cost and an overwhelming saving in time and effort to make delay changes.

Models VPO635, VP1270 and VP2075 are padded to provide a flat loss at any setting. As a result of this padding, these units will exhibit a maximum variation of  $\pm 2$ db at any delay setting.

Model VP0010 was designed specifically to be used as a delay trimmer in conjunction with our other delay units or any 75 ohm system. It offers .5 nanosecond switching resolution with excellent amplitude flatness up to 5.5 MHz.

These new delay units feature extremely flat amplitude response to 5.5 MHz, small increments of delay variation, low signal distortion and tight delay tolerance. The delay networks are ideal for pulse applications because of their fast rise times and low distortion. Amplitude equalization is employed to achieve excellent flatness over the video frequency range. The delayed output of any model in this group is the summation of individual lines. It is not the result of a tapped line. This feature insures that output pulse distortions are minimized. Units will match to any 75 ohm system and can be directly connected into the video signal path by means of BNC connectors.

Part No.	Delay Range (Nano-Sec.)	Delay Steps (Nano-Sec.)	Method of Variation	Maximum Insertion Loss @ 100 KHz (db)	Amplitude Flatness At Any Delay Setting 100KHz to 5.5MHz (db)	Max. Rise Time (Nano-Sec.)	Package Size (Inches)

# VIDEO/PULSE DELAY LINES

## DELAY TRIMMERS—VRM011, VAR011 & VAR005

VRM011

These VAR Units, which permit an infinitely small delay adjustment, insure an amplitude and delay flatness superior to that of any other unit presently available.

The units can be used as delay trimmers alone, or in conjunction with any of our other delay boxes from D.C. to over 5.5 MHz.

VAR011

Part No.	Delay Range (Nano-Sec.)	Toggle Switch Variation (Nano-Sec.)	Trimmer Variation (Nano-Sec.)	Maximum Insertion Loss @ 100 KHz (db)	Amplitude Flatness at Any Delay Setting 100KHz to 5.5 MHz (db)	Package Size (Inches)
VRM011	0-11	.5 steps to 10.5	Continuously Variable to .5	.3	.3	1 1/4 x 4 5/32 x 4
VAR011	0-11	.5 steps to 10.5	Continuously Variable to 1	.2	.25	4 3/8 x 2 3/8 x 1 1/16
VAR005	3-7	---	Continuously Variable from 3 to 7	.2	.2	3 5/8 x 1 1/2 x 1 1/4

VAR005

Impedance: 75 ohms.  
Working Voltage: 100 volts.  
Pulse Distortion: Less than 3% with an input rise time of 20 nanoseconds.  
Return Loss: 20db or greater.

## TYPE AV-397 & 75-2A

75-2A  
7-3/8"x4-11/16"x2-3/16"

AV-397  
2"x2-1/2"x5-1/2"

Maximum Delay: 2.075 microseconds  $\pm$ 3% variable in .025  $\mu$ s. steps from .025 to 2.075 microseconds.  
Time Delay of Individual Lines: 1, .5, .2, .2, .1, .05, .025 microseconds.  
Rise Time for Entire Line: .06 microseconds maximum.  
Frequency Response: 3db down at 5 megahertz for 2.075 microseconds delay.  
Distortion: 2% maximum with .2 microsecond input pulse.  
Impedance: 75 ohms  $\pm$ 5%.  
Working Voltage: 100.  
Temperature Coefficient: 50 parts/million/ $^{\circ}$ C from  $-55^{\circ}$ C to  $105^{\circ}$ C.  
Attenuation: 7% maximum for 2.075 microsecond delay.

## TV LINE EQUALIZERS – VE300 & AV-535

IMPEDANCE: 75 ohms  $\pm$ 2 ohms to 8 Megahertz.  
ATTENUATION OF CABLE PLUS EQUALIZER: 3db.

These Equalizers are designed to compensate for losses in RG-11/U (75 ohm) cable and its equivalents. The units are capable of equalizing 50 to 300 feet in 50 foot increments.

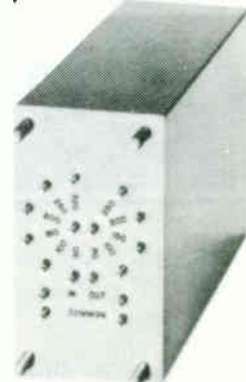

VE300  
4-11/16"x3-11/16"x2-1/16"

The VE300 is provided with a rotary switch to select the required amount of cable footage to be equalized. It is supplied with BNC connectors for quick input and output connections and is foamed in a metal can.

The AV-535 has terminals on its mounting surface arranged to provide for simplified strapping of different cable lengths. The unit is foamed and hermetically sealed in a metal can.

Attenuation of equalizer alone is as shown. TOLERANCE  $\pm$ .07 db.

Feet	0.1 MHz	2 MHz	4 MHz	8 MHz
50	2.97 db	2.86 db	2.79 db	2.67 db
100	2.93	2.68	2.53	2.27
150	2.90	2.51	2.28	1.88
200	2.86	2.35	2.03	1.52
250	2.82	2.19	1.82	1.21
300	2.78	2.02	1.58	0.86

AV-535  
2"x3-1/2"x5"

Prices and Specifications Subject to Change Without Notice.

**“MVFL” SERIES**

**DELAY EQUALIZED NTSC LOWPASS FILTERS —VFL, MVFL & VCL SERIES**

For the video field, we have built many lowpass filters having sharp roll-offs and good passband delay linearity with cut-off frequencies from .1 MHz to 10 MHz. The most popular of these are used to attenuate the harmonics of the NTSC color sub-carrier frequency 3.58 MHz. The most commonly used filters in this group are tabulated below:

**VFL & MVFL SERIES – IMPEDANCE = 75 OHMS**

Standard Size Max. Insertion Loss 1db Part No.	Miniature Size Max. Insertion Loss 2db Part No.	Max. .25db Attenuation @ Frequency (MHz)	Max. 3db Attenuation @ Frequency (MHz)	Min. 45db Attenuation @ Frequency (MHz)	Approximate Passband Delay (Nanoseconds)
VFL1P7	MVFL1P7	1.75	1.92	2.41	1691
VFL2P2	MVFL2P2	2.25	2.45	3.10	1325

Max. Insertion Loss @ 100 KHz = 2.5db.

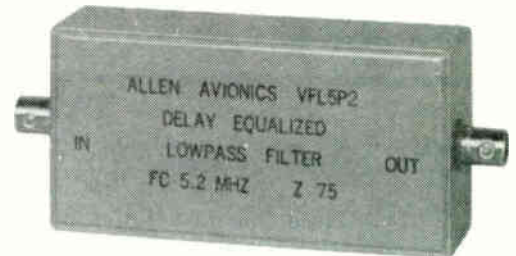

Max. Passband Ripple = ±.25db.

Size: 6" x 2" x 1 1/4" in metal can with BNC Connectors.

**DELIVERY FROM STOCK**

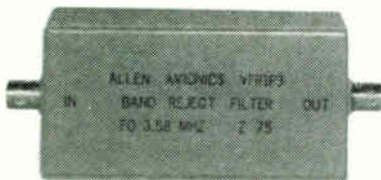

TYPICAL AMPLITUDE & DELAY RESPONSE OF VFL & MVFL SERIES

**NTSC REJECT FILTERS**

Some of the most frequent specifications that we encounter in the video industry are based upon rejection of the color information in the video signal to provide isolation from the luminance signal. These specifications require very low phase distortion to the luminance signal. To satisfy this requirement, Allen Avionics has designed a group of band reject filters with phase equalization where necessary. One of the most often used applications for this band reject filter is in color systems for monochrome transmission to prevent color flashes from appearing on the screen. Since various segments of the television industry have different passband requirements, we are listing three filters with different reject bandwidths.

Impedance = 75 ohms.  
Maximum Insertion Loss @ 100 KHz = 3db.  
Maximum Passband Ripple to 5.5 MHz = ±.25db.

Part No.	Maximum 3db Attenuation @ Frequency (MHz)	Minimum Attenuation @ 3.58 MHz
VFR4P6	1.95 – 6.55	40db
VFR1P3	3.00 – 4.30	40db
VFR0P5	3.37 – 3.88	30db

Size: 4" x 2" x 1 1/4" in metal can with BNC Connectors.

**NTSC BANDPASS FILTER**

Allen Avionics sub-carrier bandpass filter is a low distortion unit designed to attenuate the luminance information in color TV signals. This filter is useful in most applications where it is required to isolate the chrominance information.

Impedance = 75 ohms.  
Maximum Insertion Loss @ 3.58 MHz = 1.5db.  
Maximum Ripple = ±.25db.

Part No.	Maximum 3db Attenuation @ Frequency (MHz)	Minimum 30db Attenuation @ Frequency (MHz)
VFB3P6	3.40 – 3.70	2.40 – 5.80

Size: 4" x 2" x 1 1/4" in metal can with BNC Connectors.

# VIDEO FILTERS

## VSL4P5 DELAY EQUALIZED LOWPASS FILTER

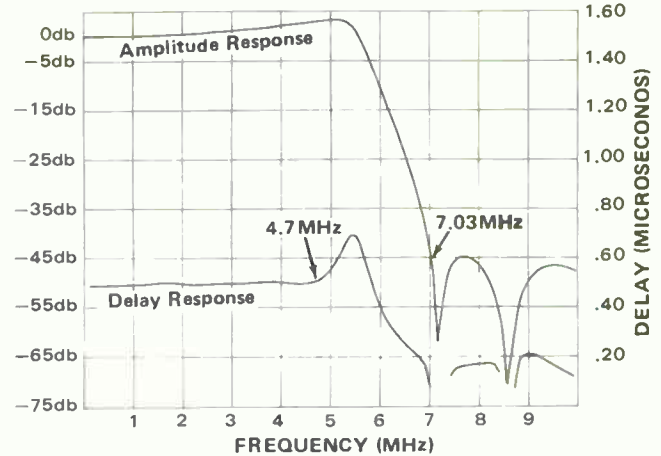

This filter is similar to the VFL series and is intended for use at the output of a digital to analog converter. Its special feature is that amplitude equalizers have been incorporated to shape the passband response for  $\frac{\sin X}{X}$  correction.

Impedance = 75 ohms.  
Attenuation = 38db or greater  
at 7.03 MHz to 20 MHz.  
Maximum Group Delay Distortion  
= 30 nanoseconds or less  
to 4.7 MHz.

Nominal Delay = 500 nanoseconds.  
Size — 4 x 2 x 1¼ inches.

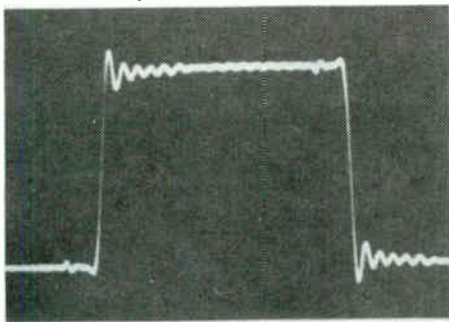

Units supplied in Metal Cans with BNC Connectors

## VIDEO GAUSSIAN FILTERS

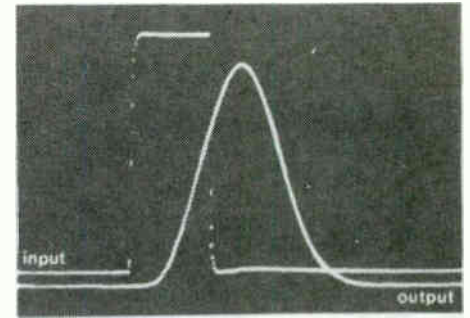

These filters are used for pulse shaping and bandwidth limiting. They are very useful in the removal of unwanted distortions caused by noise, ringing, preshoot and overshoot. Due to their fine impulse response, they are often used in conjunction with delay lines that must have minimum pulse distortion in the delayed output.

Input Pulse

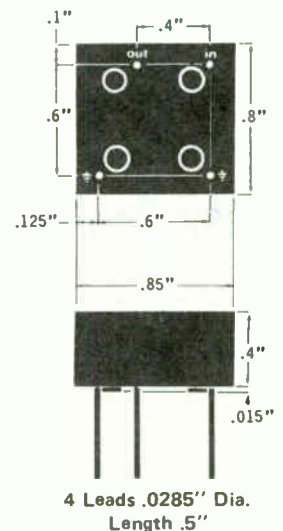

Output Pulse

An approximate Gaussian Waveshape obtained by passing a pulse through a Gaussian Filter.

Part No.	3db ± .5db Frequency (MHz)	Impedance (Ohms)	17db Min. Attenuation Frequency (MHz)	Delay Time (Nano-seconds) Nominal	Rise Time (Nano-seconds) Nominal

## HUM ELIMINATOR HEC1000

**ELIMINATES HUM AND OTHER INTERFERENCE in Video Lines caused by differences in Ground Potential.**

- FLAT - DC to 10 MHz
- For Color and Black & White
- No Low Frequency or High Frequency Roll-Off
- No Differential Gain Distortion
- No Differential Phase Distortion
- Passive Device - Failure Free
- Reversible • Low Price
- Small Compact Package

ALSO AVAILABLE:  
HUM ELIMINATOR HEC500 FOR  
50 OHM APPLICATIONS

**IN FIELD:**

Between Remote Truck & Telco  
Between Remote Truck & Microwave  
For Intertruck Hookup  
For VTR Units  
For Monitoring Lines

**IN STUDIO:**

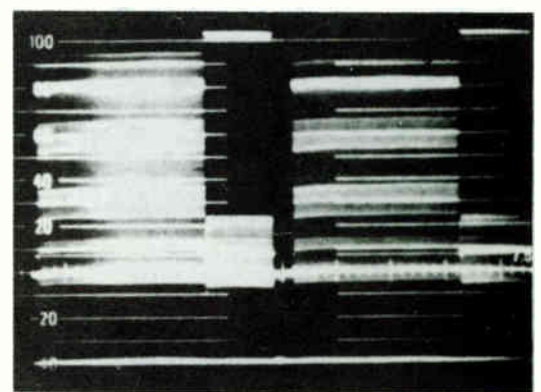

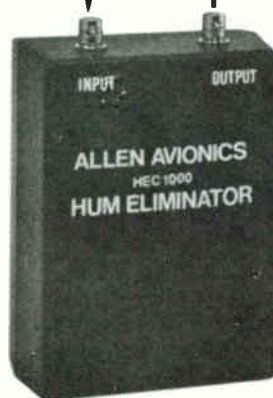

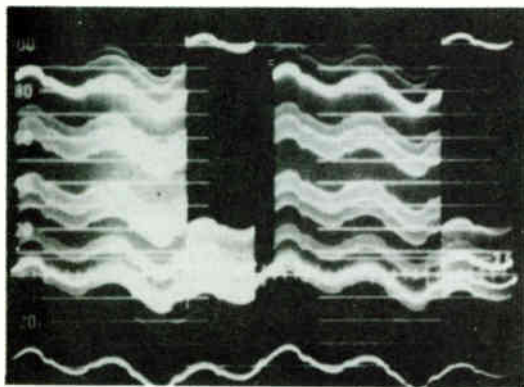

Between Buildings  
On long runs in Buildings  
Between Studios & Transmitter  
On incoming Telco Circuits  
On outgoing Telco Circuits

**HEC1000 SPECIFICATIONS:**

Impedance	75 ohms, unbalanced
Connectors	Type BNC
Bandwidth	DC to 10MHz (0.6 dB @ 10 MHz)
Hum Reduction	to 50 dB depending on system
Dimensions	5.3" x 4.0" x 2.0" (135 x 102 x 51 mm)
Weight	Approx. 3 lbs. (1.36kg)
Insertion Loss	< 0.2 dB

## AUDIO/VIDEO CLEANING ACCESSORIES

71200/71300

60200/68000

58000/58010

### 60100-A VCR Cleaner For VHS

Utilizes an exclusive ribbon that feeds into your machine like a conventional tape. A few drops of Allsop 3 solution are placed on the delicate ribbon which then circles critical parts to remove oxide residues from the video and audio heads. Additional soft pads swab contaminants from the capstan and pinch rollers. This great cleaning system is effective for up to 30 cleaning cycles. Non-refillable.

60100-A ..... \$16.95

### 66000-A VCR Cleaner For Beta

Incorporates Allsop's unique ribbon for thorough, non-abrasive cleaning power. Simply place a few drops of Allsop 3 solution on the soft ribbon and insert the tape into your machine like an ordinary cassette. The ribbon gently swabs contaminants from critical parts, removing oxides and airborne debris from audio and video heads. Good for 20-30 separate cleanings. Non-refillable.

66000-A ..... \$16.95

### 60200 Ultraline VHS Video Recorder Cleaner

Uses a technologically innovative design to provide a cleaning breakthrough offered by no other system. Small "windows" on the surface allow you to directly apply Allsop 3 solution to the internal cleaning ribbon for maximum cleaning coverage. The non-abrasive ribbon cleans entire tape path, removing contaminants from critical VCR parts. Additional felt pads clean capstan and pinch rollers. Replaceable ribbon and pads available.

60200 ..... \$29.95

### 68000 Ultraline Beta Video Cassette Cleaner

The ultimate Beta cleaning system. Strategic "windows" on the cleaning cassette surface allow you easy access to place Allsop 3 solution directly inside the cassette. The moistened cleaning ribbon then gently removes harmful contaminants and oxides from critical parts along the entire tape path. Replacements available.

68000 ..... \$29.95

### 71300 Ultraline Audio Cleaner

Our gear driven wiper arm and felt cartridge replacement system enables the user perfect cleaning action for all three areas needed. When cleaning felts become soiled, cartridges can be easily replaced to make the Ultraline like new again. System includes 1/2 oz. bottle of Allsop 3 cleaning solution. Use part #71010 for replacement cartridges and solution.

71300 ..... 8.95

### 71200 Ultraline Audio Cleaner With Case

Fits nicely into any automotive glove or map compartment. This wet system cleaner performs three important tasks in one cleaning cycle. First our gear driven wiper arm insures positive wiping action for head cleaning; second our felt cartridges on both sides (for auto reverse) of the head wiper cleans the pinch roller as it revolves; and third the Allsop 3 wipes the capstan automatically. Includes a 1 oz. bottle of special Allsop 3 solution, spare felt cartridges and tweezers which all fit into an attractive leather-like case. Uses #71010 for replacement.

71200 ..... \$14.95

### 58000 Orbitrac™ Record Cleaning System

#### 58060 Orbitrac™ Record Cleaning Solution

Takes a totally new approach to record care. By anchoring the cleaner in the record center, the Orbitrac™, when rotated around the record surface, delicately wipes and removes dirt from each groove. After one or two revolutions the record should be free of impurities and have no static charge because of the Orbitrac™ specially formulated cleaning solution. This system comes complete with Orbitrac™ cleaner, solution and sprayer, wipe off brush, special record cleaner anti-static mat, attractive designer case and complete instructions. Orbitrac™ record cleaner solution is also available in an 8 oz. refill bottle, and in a refill kit that includes two new cleaning pads with an 8 oz. bottle of cleaning solution.

58000 ..... \$16.95

58060 ..... 7.95

### 60210 Ultraline VHS Replacement Components

Contains fresh ribbon and pad cartridge. Replace after 20-30 cleanings.

60210 ..... \$8.95

### 68010 Ultraline Beta Replacement Components

Has new ribbon good for 20-30 cleanings. Available from quality video dealers.

68010 ..... \$8.95

### 71010

#### Audio Cleaner Replacement Cartridges and Solution

Makes the Allsop 3 audio cleaning products even more unique. This kit includes four complete capstan and pinch roller cartridges, two head felt cartridges, a 1 oz. bottle of Allsop 3 solution and a pair of specially designed tweezers. This kit is compatible with Allsop #71200 and #71300.

71010 ..... \$7.95

# VIDEO HEAD CLEANERS

## Professional Video Products

- 67000** 3/4" U-Matic Video Cleaner with Solution  
 Non-abrasive cleaner with an alternating wet/dry cleaning action. Comes in a plastic storage case. . . . . \$49.95
- 67500** 3/4" U-Matic Refill Kit  
 Included two refill spools of tape and a bottle of solution . . . . . \$29.95
- 62000** 1/2" VHS Format Cleaner with Solution  
 Non-abrasive cleaner with an alternating wet/dry cleaning action. Comes in a plastic storage case. . . . . \$29.95

- 60210** 1/2" VHS Refill Kit  
 (For Model #62000) includes new cleaning ribbon, drive system cleaning pads, and a bottle of solution . . . . . \$9.95
- 63000** 1/2" Beta Format Cleaner with Solution  
 Non-abrasive cleaner with an alternating wet/dry cleaning action. Comes in a plastic storage case. . . . . \$29.95
- 68010** 1/2" Beta Refill Kit  
 (For Model #63000) includes new cleaning ribbon and a bottle of solution. . . . . \$9.95
- 65000** 8mm Cleaner . . . . . \$19.95

## 1/4" Tape Drive Head Cleaner and Refill

- 54000** Cleaner  
 One cleaning cartridge, two plastic boxes each with 6 cleaning pad replacements, two 1/2 oz. bottles of cleaning solution, one pair of tweezers, one cleaning record, one instruction booklet, reusable box to contain above components . . . . . \$44.95
- 54010** Refill  
 Four plastic boxes each with 6 cleaning pad replacements, two 1/2 oz. bottles of cleaning solution, one pair of tweezers, one cleaning record, packaged in tray and box for storage . . . . . \$12.95

- **Cleaning Components:** Absorbent, non-shedding pads in a spring-loaded holder allowing conformance to the head with controlled movement. Replaceable and good for 40 cleanings
- **Cleaning Solution:** A "trichlorotrifluoroethane" cleaning solution is applied to the cleaning foam prior to insertion of the cartridge
- **Cleaning Action:** A thorough cleaning is accomplished by the cleaning pad passing horizontally across the read-write head. Such movement is derived mechanically from the tape drive's own drive roller. The area cleaned on the head surface is approximately .4" x .7". This can be increased by programming the head to be moved up and down

# DIGITAL VIDEO PRODUCTION SYSTEMS

## Pyxis/Pyxis-E Digital Video Production Systems

### Common Features

#### Effects

- Cut (Vertical interval switch between channels) • Dissolve • Horizontal wipe • Corner wipes • Window
- Shutter (R and L edges to center) • Blind (Top and bottom to center) • Fade to black • Vertical wipe

#### Editor Interface

- GPI connection allows external triggering of selected effect by ground closure

#### Modifiers

- Midstop • Soft edge (all effects) • Transition speed (16, 24, 32 or 60 frames)

#### Proc Amp Controls (2 Channels)

- Luminance level • Chroma level • Hue (NTSC only)
- Set-up • H phase • SC phase

#### Audio Select

- Audio cuts • Audio lead • Stereo production • Audio follow video • Audio hold

#### Wipes

- Vertical • Horizontal • Four corners • Window, shutter and blind

#### Sync

- Operates on a stand-alone basis or genlocked

#### Stereo Audio Mixing

- Audio can be mixed, switched or faded along with the video or locked to the A or B channel using "Audio Hold"

#### Digital Effects

- Push on • Pull off • Push off • Posterize

#### Pyxis

- 2-channel TBC • A/B video switcher • Digital video effects • Audio mixer • 8-bit resolution • Live camera inputs • Editor interface • Dual proc amp picture control

The easy way to move up to professional A/B roll editing. A dual-channel TBC with built-in digital effects and full proc amp control for two video tape sources plus two live cameras. It works with 1/2" and 3/4" VCRs to synchronize timing, correct picture imbalances and provide smooth transitions between scenes...cuts, soft wipes, dissolves and even digital push-ons and pull-offs.

Other features include posterization and selectable source switching. Meets RS-170 broadcast specifications.

Pyxis NTSC .....\$6250.00  
Pyxis PAL .....6950.00

Pyxis

Pyxis-E

#### Pyxis-E

- Video channels have independent freeze capability that can be used in field or frame mode • Field mode achieves the clearest image when motion is present • Frame mode delivers the highest resolution for detailed originals and graphics • 8-bit resolution • Built-in dual channel picture freeze • A wide spectrum of special effect possibilities and combinations available • To ensure smooth operation and broadcast quality results, the output is frame synchronous

This is a video production system that incorporates the same A/B roll editing and special effects features found in Pyxis...plus more, with new features and capabilities.

For maximum interfacing flexibility, it is designed with dual eight-bit infinite window TBC/Synchronizers. As a result, the system can synchronize video from any source, even consumer equipment, without advance sync or feedback connections. This means that you can employ equipment ranging from video cameras to remote feeds to 8mm VCRs to VTRs.

Pyxis-E NTSC .....\$8450.00  
Pyxis-E PAL .....9200.00

# ALTA GROUP, INC.

# DIGITAL VIDEO PRODUCTION SYSTEMS

Cygnus

## Cygnus Digital Video Production System TBC with Effects and Proc Amp Controls

- "Infinite window" TBC
- Video effects
- H & V image enhance (NTSC)
- 4x1 video and stereo audio routing switcher
- 8-bit resolution

### Effects

- Continuously variable picture strobe
- Continuously variable posterization
- Continuously variable colorization
- Digital picture freeze
- 64 levels of mosaic tile
- Cuts (vertical interval switching between channels, audio follows video)

### Proc Amp Controls

- Luminance level
- Chroma level
- Hue (NTSC only)
- Setup
- H phase
- SC phase

Cygnus provides an infinite window TBC as well as numerous special effects and 4x1 audio/video switching.

Broadcast television stations, cable stations, corporations, and independent video producers represent a few of the users that have already gained the "Cygnus Advantage."

The system meets broadcast RS-170 specifications.

The system enables you to freeze the video, or achieve stop-action and slow-motion through strobing controls. As a result "Rock Video" effects can be created.

You can artificially colorize or color correct the video, posterize the video and add a mosaic effect. Each effect can be independently adjusted through a variable control.

But the best part is that all effects can be used in any selected combination. This means you can manipulate the video through a virtually endless stream of visual possibilities. Even a frozen screen can be altered through variable colorization, posterization, and mosaic effects.

Cygnus NTSC . . . . .	\$4,990.00
Cygnus PAL . . . . .	5,600.00

## Centaurus Digital Video Production System

- Full 4.2MHz bandwidth
- Y/C 358 and composite input/output
- Full 8-bit video resolution
- Meets broadcast specification RS120A
- Complete remote operation
- Direct connection to numerous editors
- Simple, single key operation
- Dual proc amp controls: Luma, setup, chroma and hue
- Genlock indicator with horizontal and SC phase adjustments
- Built-in disk drive with removable digital video data disk
- Matched frame editing
- S-VHS inputs/outputs
- GPI interface with internal programmable sequence memory (list mode)
- Display monitor shows full system status, edit listing, retrieval sequence and storage information
- Number key utilizes pad for picture storage-retrieval, programmable transition speeds, variable stops, variable background colors and programmable strobing
- Allows inputs and modifier effects to be changed during split screen operation

Centaurus, a wideband Video Production System for A/B roll editing, provides high resolution still storage and retrieval. The system contains dual infinite window TBCs/synchronizers, a video/stereo-audio routing switcher and special effects generators. Other features include an internal downstream keyer, numerous wipes, digital effects and dual channel fully independent digital frame/field freeze.

Centaurus

Pictures, logos, slides and titles can be easily stored and retrieved with either a removable hard disk or an external 500M byte disk drive which stores up to 1000 frames or 2000 fields of video. The entire system features simple key operation, making it ideal for on line operation and post production.

Centaurus NTSC . . . . .	\$16,950.00

# BEAM PROJECTORS

## 660 10" Beam Projector

- 10" Alzak processed reflector • Sheet steel welded construction
- Medium prefocus socket • Screw feed beam focus adjustment
- Three 36" teflon lead wires • Pipe clamp for 3/4" to 1 1/2" pipe included • Plate steel color frame included • U.L. listed for up to 750W

A special purpose luminaire, the 660 produces a narrow beam which varies from 7.9' to 14.3' at a distance of 25'. Designed to operate both standard incandescent and high color temperature tungsten halogen lamps. The luminaire is used in theater and television for special effect lighting to represent strong sunlight or moonlight shafts. The circular beam pattern is also useful in architectural and museum accent lighting.

660 500-1000W 10" beam projector . . . . . \$110.00

### Accessories

- 660PC Malleable iron pipe clamp . . . . . \$8.00
- 660SC Safety cable with spring clip (not included) . . . . . 5.00
- 660CF Color/diffuser frame . . . . . 5.00

## RLY/RLC Rain Lights

- Sheet steel construction • Dimmable first quality transformer
- Color frame included • Ridges strap iron yoke on RLY • 6' cord with U-ground cord cap on RLY • Key slots for junction box installation on RLC

The Rain Light is a low voltage "Bullet Beam" spotlight used for accenting individual display items or creating a falling "rain" effect when used on a sequencing controller. Utilizing a very narrow beam, long life low voltage lamp, the rain light is ideal for show windows, museums, theatrical special effects and for disco effect lighting. The RLY is designed for portable applications where it can be clamped in place and temporarily connected. The RLC is designed for permanent installation where the luminaire is hard wired and recessed in a ceiling.

RLY 25W 5.5V rain light (yoke mtd.) . . . . . \$45.00  
RLC 25W 5.5V rain light (ceiling mtd.) . . . . . 40.00

### Accessories

- RLY PC Pipe clamp . . . . . \$8.00
- RLY CF Color frame (included with RLY) . . . . . 1.75
- RLC CF Color frame (included with RLC) . . . . . 1.75

## PAR 46, 56 and 64

### Steel Hood Beam Projectors

- Rugged sheet steel construction • 360° beam rotation lamp holder
- Plated steel color frame included • Hinged rear cover for lamp access
- Latching circular color frame holder (PAR 46 and 56) • Spring loaded color frame lock (PAR 64) • Rubber cord with molded plug (PAR 46)
- Three 36" teflon lead wires (PAR 56 and 64) • Pipe clamp for 3/4" to 1 1/2" pipe included (PAR 56 and 64)

Versatile luminaires designed for diverse applications. Intensities and beam spreads are a function of the lamp selected for use in the fixture. One unit can serve multiple purposes simply by changing the lamp.

Ideal for use in concerts, nightclubs, television and film remotes and architectural applications where maximum flexibility is desired in a small, compact package.

### PAR 46

The smaller size of the PAR 46 offers maximum flexibility. With an oval shaped orientational beam and a 200W lamp.

PAR 46 Steel PAR hood . . . . . \$38.00

### Accessories

- PAR 46CF Color frame . . . . . \$1.75
- PAR 46PC Malleable iron pipe clamp . . . . . 8.00
- PAR 46SC Safety cable spring clip . . . . . 5.00

RLY

660

RLC

PAR 64 WP

PAR 64 AL

### PAR 56

Features a lamp range from 300-500W.

PAR 56 Steel PAR hood . . . . . \$46.00

### Accessories

- PAR 56CF Color frame . . . . . \$2.00
- PAR 56PC Malleable iron pipe clamp (included) . . . . . 8.00
- PAR 56SC Safety cable spring clip . . . . . 5.00
- PAR 56SS Safety screen . . . . . 6.50

### PAR 64

The optional 64 to 56 adaptor ring offers maximum flexibility. The PAR 64 features a lamp range from 300-1000W.

PAR 64 Steel PAR hood . . . . . \$52.50

### PAR 64 AL

Shares the same basic features as the PAR 64 except constructed of rolled aircraft aluminum to minimize weight and maximize durability.

PAR 64 AL Aluminum PAR hood . . . . . \$65.00

### PAR 64 WP

Shares the same basic features as the PAR 64 except constructed of rolled aircraft aluminum with an enclosed rear lamp house to minimize weather intrusion.

PAR 64 WP Weather PAR hood . . . . . \$90.00

### Accessories

- PAR 64PC Malleable iron pipe clamp . . . . . \$ 8.00
- PAR 64CF Color frame . . . . . 3.00
- PAR 64/56AR Adaptor ring (for PAR 64 and PAR 65 AL only) . . . . . 5.00
- PAR 64 BD4 4-way barndoor . . . . . 42.00
- PAR 64SN Snoot . . . . . 12.00
- 404-8 Motorized color wheel . . . . . 85.00
- PAR 64SC Safety cable with spring clip . . . . . 5.00
- PAR 64SS Safety screen . . . . . 8.00

# SCOOPS

## Scoops

### Common Features

• Heavy spun aluminum construction • Processed matte aluminum reflector • Three 36" teflon lead wires • Pipe clamp for 3/4" to 1 1/2" pipe included • Color/diffuser frame available • U.L. listed for up to 1000W (155 1500W)

Lightweight multi-purpose ellipsoidal reflector floodlights. The luminaire is used in theatre and television as both a flood light and a cyclorama fixture. Other uses include photographic and television remote fill light. These scoops are ideal for fixtures for color blending and for creating smooth even washes of light.

### 153 Scoop

153 Scoop produces a very diffuse soft edged beam of 12.6' in diameter at a distance of 5'. Designed to operate standard incandescent lamps.

153 250-400W 10" scoop . . . . . \$45.00

#### Accessories

153PC Malleable iron pipe clamp (extra) . . . . . \$8.00  
153CR Color frame . . . . . 3.00  
153SC Safety cable with spring clip . . . . . 5.00

### 154 Scoop

154 Scoop produces a very diffuse soft edged beam of 15' in diameter at a distance of 7.5'. Designed to operate both standard incandescent and high color temperature tungsten halogen lamps.

154 300-1000W 14" scoop . . . . . \$75.00

#### Accessories

154PC Malleable iron pipe clamp . . . . . \$8.00  
154CR Color frame . . . . . 7.00  
154SC Safety cable with spring clip . . . . . 5.00

### 160 Scoop

160 Scoop produces a very diffuse soft edged beam which varies in diameter from 13.5' to 20.7' at a distance of 7.5'. Designed to operate high color temperature tungsten halogen lamps.

160 500-1000W 14" scoop . . . . . \$140.00

#### Accessories

160PC Malleable iron pipe clamp . . . . . \$8.00  
160CF Color/diffuser frame . . . . . 7.00  
160SC Safety cable with spring clip available . . . . . 5.00

### 161 Scoop

161 Scoop produces a very diffuse soft edged beam of 20' in diameter at a distance of 10'. Designed to operate high color temperature tungsten halogen lamps.

161 500-1000W Quartz 16" scoop . . . . . \$115.00

#### Accessories

161PC Malleable iron pipe clamp . . . . . \$ 8.00  
161SC Safety cable with spring clip . . . . . 5.00  
161CF Color/diffuser frame. Must be ordered separately.  
Not included in price of fixture . . . . . 13.00

### 155 Scoop

155 Scoop produces a very diffuse soft edged beam of 20' in diameter at a distance of 7.5'. Designed to operate both standard incandescent and high color temperature tungsten halogen lamps.

155 500-1500W 18" scoop . . . . . \$85.00

#### Accessories

155PC Malleable iron pipe clamp . . . . . \$ 8.00  
155SC Safety cable with spring clip . . . . . 5.00  
155CR Color/diffuser frame. Must be ordered separately.  
Not included in price of fixture . . . . . 13.00

Q-Lite Jr.

Q-Lite

### 1K-Q-Lite and 650 Q-Lite Jr.

• Compact • Broad even beam • Ventilated steel housing • Lightweight • Wide range of lamps • Standard with barndoors

Compact, lightweight multi-purpose flood/fill lights. Designed to operate high color temperature tungsten halogen lamps in stage, studio or location lighting. The luminaire is ideal for use in tight or confined spaces where maximum light output and beam are required for fill or flood lighting.

#### 1K Q-Lite

Produces a very broad beam which will uniformly illuminate an area 25' by 43' at a distance of 10' with a center intensity of 56fc.

\*\*Q-Lite with BD and household conn. (3' lead) (1000W) . . . \$130.00

#### 650 Q-Lite Jr.

Produces a very broad beam which will uniformly illuminate an area 27' by 22' at a distance of 8' with a center intensity of 88fc.

\*\*Q-Lite Jr. with BD household conn. (3' lead) (650W) . . . \$110.00

#### Accessories

Barndoor for Jr. . . . . \$15.00  
Barndoor for Q-Lite . . . . . 20.00  
Hanging 5/8 stud only to fit 510PC . . . . . 12.00  
Q-Lite/Q-Lite Jr. Color Frame . . . . . 6.50  
510 Pipe Clamp . . . . . 8.00  
25' extension cord with protective safety switch and household conn. . . . . 48.00

\*\*Pipe clamp not included with fixture. Both use RSC base.

# ELLIPSOIDALS

## 1KL6 and 1KL2040Z Ellipsoidals

### Common Features

- Tempered crown glass lens in a teflon bearing focus assembly
- 1KL6-2040Z features a unique three lens zoom focus assembly
- Extruded aluminum body with diecast parts
- Adjustable lamp holder with heat deflector and lamp lock
- Adjustable tension shutter gate complete with a pattern slot and holder
- Multifaceted peened Alzak aluminum reflector
- 270° tilt strap iron yoke with positive locking dogs
- Offset reversible heavy gauge shutters in separate planes
- Pipe clamp, color frame and safety cable included
- U.L. listed for 1000W lamp

The 1KL Series Ellipsoidals have an adjustable lamp holder for peak performance or for flat field where pattern projection is desired. The four integral framing shutters are in separate planes and are offset and reversible to insure maximum shaping flexibility. With a range of lamps from 500W to 1000W the 1KL Series is ideal for theaters, night clubs and television studios or wherever superior controlled lighting performance is required.

## 1KL8-10 and 1KL8-1424Z Ellipsoidals

### Common Features

- Adjustable lamp holder with heat deflector and lamp lock
- Adjustable tension shutter gate complete with a pattern slot and holder
- Multifaceted peened Alzak aluminum reflector
- Offset reversible heavy gauge shutters in separate planes
- Pipe clamp, color frame and safety cable included
- U.L. listed for 1000W lamp

The 1KL8-10 and the 1KL8-1424Z feature an adjustable lamp holder for peak performance or for flat field where pattern projection is desired. Four integral framing shutters are in separate planes and are offset and reversible to insure maximum shaping flexibility. With a range of lamps from 500W to 1000W.

### 1KL8-10 (10°)

- Tempered crown glass lens
- Extruded aluminum and hardened aircraft aluminum body with diecast parts
- 270° tilt strap iron yoke with positive locking dogs

The one 8" x 14" tempered crown glass plano convex lens produces a very narrow beam of approximately 12.6' in diameter for a 60' throw.

<b>1KL8-10</b>	. . . . .	<b>\$325.00</b>
----------------	-----------	-----------------

### 1KL8-1424Z (14°-24°)

- Unique two lens zoom focus assembly
- Extruded aluminum body with diecast parts
- Adjustable strap iron yoke with positive locking dogs

The variable focus lens system produces beams as wide as 21' or as narrow as 12' or anywhere in between at a distance of 50'.

# ELLIPSOIDALS

## 4.5-2550Z Baby Zoom Ellipsoidal

• Unique smooth action two lens zoom focus assembly • Extruded aluminum body with diecast aluminum parts for lightweight strength • Adjustable lampholder, with lamp lock and heat deflector for long lamp life • Choice of mini-can or medium 2 pin sockets for a wide range of lamp wattages • Pebbled specular Alzak aluminum reflector for precise optical control • 3-36" teflon leads fit in a unique luminaire pocket for easy storage • U.L. listed for 750W (pending)

The 4.5-2550Z zoom focus ellipsoidal is a unique luminaire with professional qualities. The smooth operating, variable focus lens system produces beams as wide as 37.3' or as narrow as 17.7' at a distance of 40'. The 4.5-2550Z has an adjustable lampholder allowing peak center performance or a flat field when pattern projection is desired.

### V-0805 10AH Belt Powerpack

- Convenient, portable power from sealed, rechargeable lead-acid cells • Powers a VCR for up to 10 hours, a 100W lamp for nearly one hour • Connecting coilcords will not dangle • Weighs less than 9 lbs. • 12V lead-acid cells are rugged; have high cycle-life and recovery ability • Power receptacle is fused for maximum protection • Web belting is adjustable and has easy-latch buckle • Includes recharger • Recharges from standard household current

V-0805 .....\$109.95

V-0810

### V-0810 Decathlon NiCad Powerpack

- Lightweight, portable power • Powers 100W videolight for up to 35 minutes • VCR up to 6 hours • Weighs 3 lbs. • Adjustable straps fit over the shoulder or around the waist • Includes heavy-duty AC charger for dependability • Can be recharged up to 1,500 times • Recharges in just 12 hours • Cannot be damaged by over or under-charging • Fused for extra safety • Cigarette lighter-type receptacle connects to any VCR, videolight, voltage meter, etc. with accessory car battery cord • Main pack measures 7"H x 5"W x 2"D

V-0810 .....\$149.95

V-0812

### V-0812 Decathlon Plus NiCad Belt Powerpack

- Powers 100W lamp approximately one hour, or VCR up to 12 hours • Weighs less than 5 lbs. • Attaches comfortably around waist • Adjustable web belt has easy-latch buckle • Foam padding under rugged nylon fabric covering • Can be recharged up to 1,500 times • Recharges in just 12 hours from any standard 110/120V household outlet • Cannot be damaged from over or undercharging • Fused for extra protection

V-0812 .....\$219.00

V-0601

V-0898

V-0892

### V-0601 Dual Connector

- Connects two lights, or one light and VCR, to a single 12V power source • Cigarette lighter-type plug and dual receptacles

V-0601 .....\$9.95

### V-0898 Voltage Meter

- Assures adequate 12V power to maintain video quality • Connects power supply to VCR, lights, or other equipment • Color-coded LEDs indicate low power

V-0898 .....\$24.95

### V-0892 DC Car Converter

- Supplies multiple voltage power from either car lighter or 12V battery pack • Switch controls 12V, 9V, 7.5V, 6V, 4.5V, 3V • Spider adaptor fits all accessories

V-0892 .....\$12.95

V-0835

V-0837

V-0832

V-0832

### Adaptor Cords for Camcorder

Attach Sony, JVC, Panasonic, RCA or other to any Ambico Power Pack (Model V-0803, V-0805, V-0810, V-0812 or V-8000)

**V-0832 RCA Camcorder-to-Cigarette Plug** • Fits RCA and Hitachi camcorders. (Also fits RCA/Hitachi portables)

V-0832 .....\$14.95

**V-0835 Sony/JVC Camcorder-to-Cigarette Plug** • Fits Sony Beta, JVC

V-0835 .....\$44.95

**V-0837 Panasonic Camcorder-to-Cigarette Plug** • Fits Panasonic, Magnavox, Penney, Canon, Philco, Sylvania, GE, Olympus, Quasar and other camcorders

V-0837 .....\$19.95

**V-0838 Sony 8mm-to-Cigarette Plug** • Fits Sony 8mm camcorders

V-0838 .....\$17.95

### VCR-To-Powerpack Adaptor Cords

(for portable units with separate cameras)  
**V-0832 RCA VCR-to-Cigarette Plug** • Fits RCA/Hitachi (Also fits RCA/Hitachi camcorders)

V-0832 .....\$14.95

**V-0834 Panasonic Dummy Battery-to-Cigarette Plug** • Fits current Panasonic, Magnavox, Penney, Canon, Philco, Sylvania, GE, Olympus, Quasar and other models. (Does not require original VCR battery for operation)

V-0834 .....\$16.95

**V-0836 Panasonic VCR-to-Cigarette Plug (with OEM battery charger)** • Fits same models as V-0834 but requires original VCR battery for operation • Can also be used to charge original VCR battery from a 12V car battery)

V-0836 .....\$14.95

# VIDEOLIGHTS/KITS

## V-0100 Flood/Spot Videolight

• Bathes subject in warm light for accurate, realistic colors • Comes complete with lamp, handgrip, base for wall or tabletop mounting, auto bulb eject, flood/spot switch and instructions • 300W . . . . . \$99.95

## V-0170 AC/DC Flood/Spot

• Quartz-halogen light with brushed reflector to spread soft light • 120VAC and 12VDC adaptor for car lighter receptacle or battery pack • Flood to spot adjustment • 150W AC lamp, 100W DC lamp • Heat absorbing glass Safety-Shield • Tilt Control for 120° bounce lighting . . . . . \$112.95

## V-0190 AC/DC Focusing Videolight

• Quartz-halogen lamps • Separate cords and lamps for AC and DC avoids hazard of bursting bulbs with wrong voltage • 200W AC lamp • Cigarette lighter-type plug and 100W DC lamp • Heat-absorbing glass Safety-Shield • Extra cool vented housing • Wide-Spot adjustment . . . . . \$129.95

## V-0177 AC/DC Convertible Videolight

• Compact video light perfect for even the smallest camcorders • Fantastic versatility—AC or AC/DC capability • 150W AC and 50W DC provide perfect touch for low lux camcorders • Special diffusion light-shield enhances wattage intensity of quartz-halogen bulbs • Lightweight and easily transportable • The Convertible Videolight will provide truer, more exciting colors wherever you use your camcorder V-0177. . . . . \$99.95

## V-0815 Power and Light Kit Plus

• Superior design stores light, cable and battery in hard case • Can also be used as free standing light stand for remote lighting situations • Sealed rechargeable 12V, 4AH battery holds charge up to six months when not in use • Power level indicator gives advanced warning for recharging • 50W heat shielded quartz halogen lamp runs 45 minutes • Shoulder strap, recharger and camera grip with light bracket included . . . . . \$199.95

## V-0806 Battery/Videolight Kit 10-AMP DC

• Compact videolight (V-200) with portable power • Belt power pack (V-0805) has rechargeable lead-acid cells in polypropylene cases for protection from shock and temperature changes • Outer packs of rugged nylon fabric, padded for extra comfort • Recharges from household current overnight • Powers lamp up to one hour • 100W quartz-halogen lamp included . . . . . \$169.95

## V-0817 Battery/Videolight Kit with Focusing AC/DC NiCad

• Long-life NiCad batteries can be recharged up to 1500 times • AC/DC quartz-halogen videolight focuses from wide beam to spot • The light is V-0170 • Power pack (V-0810) weighs 3 lbs. • Gives remarkable power-to-weight ratio • Powers DC lamp for 35 to 45 minutes • Adjustable strap fits over shoulder or around waist • Nylon fabric foam padded case • Includes 150W AC lamp • 100W DC lamp, and connector cords . . . . . \$229.95

## V-0819 Battery/Videolight Kit with Focusing AC/DC NiCad

• A versatile videolight that will run on either AC or DC power, with its own long-life lightweight power pack • Supplies 200W quartz-halogen light in AC operation and 100W quartz-halogen light DC • Light is model V-0190 • Power pack is model V-0810 • Containing rechargeable, long-life NiCad batteries for maximum power at just 3 lbs. • Powers lamp for 35 to 45 minutes • Includes 200W AC lamp, 100W DC lamp, and connector cords . . . . . \$259.95

V-0190

V-1000

V-0177

V-0815

## V-1000 (AC), V-1500 (AC/DC) Val-U-Light

• Quartz-halogen lamp gives 150W light for accurate color reproduction • Hinged barndoors adjust individually • On/off switch • Heavy-duty cord • Safety heat shield  
V-1000. . . . . \$49.95  
V-1500 (Adaptor and DC bulb) . . . . . 79.95

# LENS/FILTER KITS/ACCESSORIES

## V-0345 High Power Telephoto Lens

This lens provides a magnification of 4X, the lens provides close-ups for wild-life shoots, sports events and other long distance video photography. Although the high magnification requires a 7" long lens barrel the lens is extremely well-balanced and weighs only 7 ounces . . . . . \$289.95

## V-3100 Auto-Focusing Video Lens Kit

Kit contains two lenses: a 1.5X telephoto lens and a .5X wide angle lens. The kit's 1.5X lens increases a camcorder's capability by 50%. The .5X lens doubles the camcorder's field of view. Both lenses function perfectly in both autofocus and manual focus modes . . . . . \$129.95

## V-0310 Fisheye Lens Attachment

Dramatically widens angle of view. Helpful when shooting in tight quarters. Used close up, it creates those well-known fisheye caricature effects . . . . . \$74.95

## V-0341 Hemispheric Lens Attachment

Gives a picture area three times larger than the video camera's normal wide-angle capability. Tremendous depth-of-field means virtually limitless focal length, from directly in front of lens to infinity. Large precision lens provides distortion free images with no fisheye effect, no barrel distortion, etc. Works with any video camera having macro capability . . . . . \$99.95

## V-0311 Close-up/Wide View Lens Attachment

A two section attachment. As a close-up allows tight, detail shots; for example, a wedding invitation card. As a wide-view, takes in the entire shot when camera cannot be moved back further. Gives 166<sup>2</sup>/<sub>3</sub>% greater field of view than standard camera lens . . . . . \$69.95

## V-0312 Telephoto Lens Attachment

Acts as a telescope to make the longest zoom even longer. Great for sports action, wildlife, and travel. Used for close-ups, gives sharp focus on subject with soft focus on background. 1.5X magnification . . . . . \$175.00

## V-0314 Macro Lens Attachment

For extreme close-ups, less than 6" from subject. A +4-diopter, high-optical-quality attachment; especially useful for video cameras with no macro capability. Necessary when using Ambico Tele-Cine Converter with video cameras not designed for close-up work. . . . . \$19.95

## V-0317 Color/Soft Effects Kit

Contains a Focalizer with clear center that softly diffuses background images while maintaining sharp focus on the primary subject. A neutral density lens with clear center that screens out light from objects other than the focal subject and tri-color filter that saturates images in three colored sections . . . . . \$29.95

## V-0318 Three Color Filter Kit

Contains red, blue and yellow filters with clear centers. These lenses allow sharp highlighting of the focal subject while tinting backgrounds, objects in rich color. Lens can be used individually or in combination to produce a variety of vivid effects . . . . . \$24.95

## Video Lens Attachments

### V-0319

### Video Special Effects Kit

Three high-quality, screw-in lens attachments.

**Multi-Imager** creates identical multiple images which can be rotated with control arm.

**Rainbow-Effect** lens turns light sources into dramatic, prismatic effects in all colors of the spectrum.

**Starburst** lens attachment makes any point of light become a brilliant star. Kit also includes carrying case with protective pouch for each lens attachment, and adaptor rings to fit most video cameras. All handsomely gift boxed . . . \$59.95

## V-0990 Lens Guard Kit

Neutral density attachment protects camera tube when shooting toward strong light. Prevents "hot spot" burn on camera tube. Also adds contrast for extra-vivid coloring. Kit also includes Clear Optical Lens Shield to protect camera lens from fingerprints, dust, spray, etc., while pictures are shot distortion free. Kit comes in carrying case with protective pouch for each lens attachment, and with adaptor rings. . . . . \$15.95

## Vertical Consoles

### 5 Vertical Heights

Panel Heights: 21", 42", 52 1/2", 61 1/4", 70"

### 2 Depths

25 1/2" or 30"

All 19" Panel Width

### Standard Order

- Doors are provided flush with right-hand hinge
- Rear door mounted to inner frame flange, facilitating recessed mounting
- Styled frames have EN22 trim with black horizontal inlay

### Optional

- DFH left-hand hinged doors, casters, levelers and many other options are featured in the Accessories and Hardware section
- If louvered top panel is desired, add "L" to the end of part number (Optional at additional cost) Example: 5241L
- Optional blowers can be ordered from Blowers section

## Ordering Example

LS 141-3 Order Number Includes:

- Plain (without styling trim)
- 19 1/4" Sloped Front with 37° Angle
- 15 3/4" Lower Front Panel Height
- 21" Rear Lower Panel Height
- 43" Overall Height
- 19" Panel Width
- 40" Overall Depth
- 22" Base Depth
- White Writing Surface with 3 1/2" Drop Front, 12" Depth
- Right and Left Plain Side Panels
- Plain Rear Panel
- Plain Upper Rear Turret Panel
- Lower Plain Front Panel
- Cowlings—Plain, Front and Rear
- Open Turret Front
- MX Panel Mounting Channels, Front and Rear
- Panel Mounting Hardware Kit

IADRPH3-19-25E	122.40	3 1/2" Panel Height, 25 1/2" Deep Slope Front and/or Vert. Console
IADRPH7-19-25E	132.50	7" Panel Height, 25 1/2" Deep Slope Front and/or Vert. Console
IADRPH10-19-25E	145.75	10" Panel Height, 25 1/2" Deep Slope Front and/or Vert. Console
IADRPH3-19-30E	124.65	3 1/2" Panel Height, 30" Deep Vertical Frame Console
IADRPH7-19-30E	133.75	7" Panel Height, 30" Deep Vertical Frame Console
IADRPH10-19-30E	146.25	10" Panel Height, 30" Deep Vertical Frame Console

### Shelves-19" Panel Width

IASH19-22	21.55	22" Deep, Low Silhouette Frame Console
IASH19-25	24.90	25 1/2" Deep, Slope Front and/or Vertical Console
IASH19-30	26.80	30" Deep, Vertical Console

### Writing Surface-Pull Out-19" Panel Width

IAWP19-22	93.85	Mtg. Channel Depth 22", White Laminate
IAWP19-25	104.45	Mtg. Channel Depth 25 1/2", White Laminate
IAWP19-30	117.35	Mtg. Channel Depth 30", White Laminate

### Writing Surface Assemblies-Square Corner-18 1/2" Deep With 1 3/4" Apron On Front and Sides-Single Bay-19" Panel Width

QWSX18-1-19S-25	118.60	Used When Frame Depth Is 25"
QWSX18-1-19S-30	120.35	Used When Frame Depth Is 30"
IAP3WC-19	17.05	Writing Surface Filler Panel
IAP3WCB19-19	22.95	Writing Surface Filler Panel

## Blowers

### 19" Panel Width-With 3' Triple Conductor Cord and Clear Anodized Aluminum Grille

AMCO Part Number	Price	Description
<b>Panel Mount—REAR EXHAUST—(For optional Air Deflectors, up or down, refer to Accessories)</b>		
IABDS5-19-3	\$209.40	5 1/4" Panel Height, 7 1/4" Depth
IABDS8-19-3	294.25	8 3/4" Panel Height, 10 1/4" Depth
<b>Recessed in Base—TOP EXHAUST—(For optional Air Deflectors, up or down, refer to Accessories)</b>		
IABRDS-19-22-3	317.00	3 1/2" Panel Height, 22" Depth
IABRDS-19-25-3	330.05	3 1/2" Panel Height, 25 1/2" Depth
IABRDS-19-30-3	344.40	3 1/2" Panel Height, 30" Depth

### Blower Air Deflectors

IABAD-5	19.45/Pr.	Used on IABDS5 Blower
IABAD-8	21.80/Pr.	Used on IABDS8 Blower

### Blower Filters

IABAF5	15.15	Reusable Filter For IABDS5 Blower
IABAF8	15.70	Reusable Filter For IABDS8 Blower
IABRAF	15.15	Reusable Filter For IABRDS Blower

### Casters

CAX1	7.50	2 1/2" Dia., 1" Tread Width, Swivel, 200lb. Capacity
CAX2R	65.65/Pr.	3 1/4" Dia., 1 1/2" Tread Width, Weld. Rigid, Sold in Pairs, 275 lb. Capacity
CAX2S	24.55	3 1/2" Dia., 1 1/2" Tread Width, Swivel, 200 lb. Capacity
CAX3	27.20	3 3/8" Dia., 1 1/2" Tread Width, Swivel w Foot Lock, 200 lb. Cap.

### Levelers

H317	.95	Leveler Only—Without Sleeve
LLFX	8.95	Leveler With Sleeve
LLFX-1	8.95	Leveler With Sleeve and 1/2" Wood Shim
LLFX-2	8.95	Cushioned Leveler With Sleeve and 1/2" Wood Shim

### Anti-Tip Leg Assemblies\*

ATLE22-1	74.60/Pr.	Use With or W/O CAX1 Casters, 22" D. Frame, Low Silhouette
ATLE25-1	78.30/Pr.	Use With or W/O CAX1 Casters, 25 1/2" D. Frame, Slope Front and/or Vertical
ATLE30-1	80.55/Pr.	Use With or W/O CAX1 Casters, 30" D. Frame, Vert. Consoles
ATLE22-2	103.40/Pr.	Use w/Any CAX2 and/or CAX3 Casters, 22" D. Frame, Low Silhouette
ATLE25-2	111.95/Pr.	Use w/Any CAX2 and/or CAX3 Casters, 25 1/2" D.030 D. Frame, Slope Front and/or Vertical
ATLE30-2	114.10/Pr.	Use w/Any CAX2 and/or CAX3 Casters, 30" D. Frame, Vertical Consoles

### Chassis Guide Support Assemblies

CG4-18	17.05/Pr.	Used With DT and/or PD Desk Top Cabinets, 18 1/2" Deep
CG4-22	19.05/Pr.	Used With Low Silhouette Consoles, 22" Deep
CG4-25	21.40/Pr.	Used With Slope and/or Vertical Consoles, 25 1/2" Deep
CG4-30	28.00/Pr.	Used With Vertical Consoles, 30" Deep

\*Note: Anti-Tip Leg Assemblies shipped loose.

**AM-2100 AMHERST INTELLIGENT CONTROLLER**

Using advanced microprocessor control, the AM-2100 packs high performance image processing and machine control functions into a rugged, single rack high chassis. Its unique "open bus" design lets you add new functions as you need them, through software.

Standard features include:

- 32-line Time Base Corrector with subcarrier feedback for full bandwidth performance
- RS170A Color Field Sequencer for cleaning up mismatched color frame edits
- Full Proc Amp Controls with presets and front panel LCD display of parameter readings
- SMPTE/EBU Time Code and Control Track Reader
- PC Control from IBM PC or compatible
- Modem Control for remote operation via telephone line, with keyboard override
- Machine Control for VTRs, switchers, etc. Operated from its own front panel or from a PC
- Help menus guide the user as needed
- New functions and updates can be installed in the field
- Multiple units tie together via RS-232, and stack easily with daisy-chain power runs
- Built-in diagnostics can be accessed by phone
- Rear panel circuit breaker resets quickly and eliminates downtime due to blown fuses

Power, expandability, and ease of use make the AM-2100 the ideal tool for broadcast and teleproduction professionals.

**Front Panel:**

Video adjust, setup adjust, hue adjust, chroma adjust, SCH phase adjust, genlock, (RS-170A) protected power on/off switch and indicator, 16 character x 2 line backlit LCD display, 5 button programmable function control with LED status indicators

**Back Panel:**

RS-232 (422 on request), GPI port 1, GPI port 2, Slide-out PCB trays, computer reset switch, circuit breaker, Power receptacle, Power outlet

**Central Processing Unit:**

96-pin Amherst video/computer bus, 8088 processor, 2K to 8K SRAM, 2K increments, 24K EPROM, clock/calendar with battery backup

**Modes:**

Direct (vertical lock), bypass (E/E)

**Specifications**

**Performance**

- Window of Correction:** 32 line window
- Bandwidth:** 4.3MHz, ±0.5dB at unity chroma gain
- Differential Phase:** < 2°
- Differential Gain:** < 2%
- Tilt:** < 1%
- Signal-to-Noise Ratio:** 56dB (plus quantizing effects)

**Method**

- Digitizing Rate:** 14.3MHz (4X subcarrier)
- Quantization:** 8 bits
- Bus:** Multiplexed, computer/video

**Signals**

- Video In:** 0.5 to 2.0V p-p into 75 ohms, NTSC
- GL In:** NTSC, RS-170A loop-through, 0.4 to 2.4V p-p
- Video Out (2):** 1V p-p into 75 ohms, NTSC RS-170A
- Advanced Sync Out:** 0.4/4V, selectable, into 75 ohms
- SC Feedback:** 1V p-p (minimum) into 75 ohms

**Mechanical**

- Dimensions:** 1.75" H x 19" W x 16" D
- Power:** 120VAC, 60Hz, < 30W
- Weight:** 12 lbs.

**AM-2100** ..... \$7750.00

**Options**

- Sony VO5850/5800 Interface Cable ..... \$250.00
- JVC CR850 Interface Copy ..... 300.00
- Sony BVU-800 Interface Cable ..... 325.00

# CAMERA TUBES

## 30mm TUBES

### XQ1410 Series Plumbicon® Camera Tube

1.2'' (30mm) diameter Plumbicon television camera tube with high resolution lead oxide photoconductive target, separate mesh construction, magnetic deflection and magnetic focusing and internal light bias. It's intended for highest quality usage in XQ1410L, XQ1410R, XQ1410G and XQ1410B types of color cameras, in broadcast, educational and high quality industrial applications.

The XQ1410 series has increased resolution and internal light bias for reduction of lag under low-key conditions.

### XQ1413, XQ1415 Series Plumbicon Camera Tube

1.2'' (30mm) diameter Plumbicon camera tube with high resolution lead oxide photoconductive target, with extended red response.

This series is interchangeable with the XQ1023 series, however the XQ1413 series has internal light bias for reduction of lag under low-key conditions.

Tubes of the XQ1415 series are identical to tubes of the XQ1413 Series but incorporate an infrared reflecting filter on the anti-halation glass faceplate.

### XQ1430 Series Plumbicon Camera Tube

1.2'' (30mm) Diameter high resolution, separate mesh, all magnetic Plumbicon television camera tube intended for high quality color studio cameras which have internal prism of front bias lighting. The XQ1435 is an extended red Plumbicon tube for best red response and includes an integral IR filter.

### XQ3410 Series Plumbicon Camera Tube

1.2'' (30mm) Diameter rear loading high resolution Diode Gun™ (Patent Pending) Plumbicon Television Camera Tube with a 1'' scan format for geometry and low capacitance for high sensitivity and high signal-to-noise. Internal bias light provides for low lag characteristics. The XQ3415 is an extended red Plumbicon tube designed for best red response and includes an integral IR filter.

### XQ3430 Series Plumbicon Camera Tube

Diode Gun Plumbicon Television Camera Tube with full 30mm scan format for high resolution and low capacitance for high sensitivity with high signal-to-noise ratio. The XQ3435 is the extended red Plumbicon tube in this series. It is designed for the best red response and includes an integral IR filter.

## 1'' TUBES

### XQ1070 Series Plumbicon Camera Tube

1'' (25mm) high resolution Plumbicon television camera tube with low heater power, separate mesh construction, magnetic focusing and deflection.

This series is intended for use in highest quality broadcast camera equipment.

The XQ1070 series is also mechanically interchangeable with 1'' diameter vidicons with separate mesh construction and has the same base pin connections.

### XQ1075 Series Plumbicon Camera Tube

1'' (25mm) High resolution Plumbicon television camera tube with extended red response, and is intended for use in high quality broadcast camera equipment where infrared filtering is required but not present in the camera optical system.

This series is identical to the XQ1075 series with the exception that it does not have an infrared cutoff filter.

### XQ2170 Series Plumbicon Camera Tube

A 1'' (25mm) Diode Gun High Resolution Plumbicon Camera Tube. High sensitivity, high resolution, low lag television pick-up tube with lead oxide photoconductive layer, separate mesh and all magnetic deflection and focus. The electron gun assembly is designed to significantly improve resolution and lag. It operates in a diode mode. The beam has a uniform energy distribution, improved beam acceptance and speed of response, and enhanced resolution. The gun also provides very high beam reserve, minimizing comet tailing and blooming in cameras with dynamic beam control.

Note that while the XQ2170 series is mechanically interchangeable with the XQ1070 series, the "diode gun" requires a positive grid 1 voltage (up to +20V) and draws a positive grid current of up to 5mA. Cameras designed around XQ1070 then, must be modified to accommodate this.

## 1" TUBES (Cont'd)

### XQ1500 Series Plumbicon® Camera Tubes

1" (25mm) High resolution Plumbicon Television Camera Tube which features the Anti-Comet Tail (ACT) gun designed to handle highlights up to four f/stops over peak white. The internal light bias reduces lag to a minimum. The XQ1505 extended red Plumbicon tube for best red response incorporates an infrared reflecting filter on the anti-halation glass faceplate.

### XQ3070 Series Plumbicon Camera Tube

1" (25mm) Diameter Plumbicon with high resolution lead oxide photoconductive layer with Diode Gun™ (Patent Pending) construction and high beam reserve for cameras with DBC. Light bias for low lag. Low output capacitance for high signal-to-noise ratio. The XQ3075 extended red Plumbicon tube provides for the best red response and includes an integral IR filter on the anti-halation button.

## 2/3" TUBES

### XQ4187 (85XQ) Plumbicon Camera Tube

2/3" (17.8mm) Diameter Plumbicon Television Camera Tube with Diode Gun for dynamic beam control DBC and low output capacitance for best signal-to-noise ratio. The R, G, and B has a high resolution lead oxide photoconductive layer, Electrostatic Focus magnetic deflection with high stability (HS) electrode structure. It requires very low power and has low deflection field damping.

### XQ3467 Series Plumbicon Camera Tube

2/3" (17.8mm) Diameter Plumbicon Television Camera Tube with lead oxide, high resolution layer. The R, G, and B employs a triode gun with Electrostatic Focus and Magnetic Deflection.

### XQ3457 (87XQ) Series Plumbicon Camera Tube

2/3" (17.8mm) Diameter Plumbicon Television Camera Tube with high resolution lead oxide layer, Magnetic Focus and Electrostatic Deflection (MS). The R, G, and B incorporates the Diode Gun for dynamic beam control DBC, Low Capacitance for high signal-to-noise ratio and is only 87.5mm long for smaller cameras.

### XQ2427 Series Plumbicon Camera Tube

2/3" (17.8mm) Diameter Plumbicon Television Camera Tubes with special high resolution lead-oxide photoconductive target, low heater power, magnetic focusing and deflection.

#### Special features are:

- Photoconductive target for increased resolution
- Diode Electron Gun for DBC (Dynamic Beam Control) to minimize comet tailing and blooming

### XQ3427 Series Plumbicon Camera Tube

2/3" (17.8mm) Diameter Plumbicon Television Camera Tubes with special high resolution lead-oxide photoconductive target, low heater power, magnetic focusing and deflection.

#### Special features are:

- Photoconductive target for increased resolution
- Diode Electron Gun for DBC (Dynamic Beam Control) to minimize comet tailing and highlight blooming
- Low output capacitance for high signal-to-noise ratio

### XQ1427 Series Plumbicon Camera Tube

2/3" (17.7mm) Plumbicon Television Camera Tube with high resolution lead oxide photoconductive target, separate mesh construction, low heater power, magnetic deflection and magnetic focusing.

The XQ1427R, XQ1427G, and XQ1427B types are intended for use in color cameras in Field Production, Broadcast Studio, Electronic News Gathering, educational and high quality industrial applications.

## 1/2" TUBE

### XQ4087 (80XQ) Plumbicon Camera Tube

1/2" (8mm scan diagonal) Plumbicon Television Camera tube with low heater power, magnetic deflection and electrostatic focusing, assembled with a DT1120 small lightweight deflection unit.

#### Special features are:

- Diode electron gun for DBC (Dynamic Beam Control), which minimizes comet tailing and blooming
- Low output capacitance achieved by a special signal plate with contact through the window
- Low deflection field damping by wall electrodes
- Excellent geometry and registration capability
- Reduced line pick-up due to side connection of the mesh
- Low power consumption due to electrostatic focus

The XQ4087 tubes are intended for color and monochrome cameras in broadcast (Electronic News Gathering), educational and high quality industrial applications.

# PRODUCTION SWITCHER

## AVC Series Video Production Switcher

- **Simplified Controls:** pushbuttons instead of knobs assure controls never get out of sync with internal memories
- **Expanded Memory System:** Key Memory System allows storage and recall of up to four separate and distinct key setups for each key source
- **Unparalleled Switcher Flexibility:** three keyers per M/E so operator can introduce any type or combination of keys in any sequence with any background
- **Extensive Preview Capability:** preview monitoring system allows previewing of not only any M/E output, but also individual buses feeding the M/E as well as the Quad Split, Program, and Preset Buses (or program bus A and B)
- **Independent M/E Pattern Systems:** with the AVC series, up to 128 patterns are keypad selectable, and each M/E has its own independent pattern system
- **Bordering Flexibility:** half-halo borders allow wipe transitions to be hard on one side, tapering to full soft on the other for unique images and effects with 164 standard wipe patterns
- **Choice of Auto-Transitions:** automatic transitions from 0.1 to 9.9 seconds can be sinusoidal, exponential or logarithmic, as well as linear
- **Positive Tally Indication:** actual tally with positive "On Air" indications are provided for extra operating ease and reliability
- **Wider Matte Color Choice:** totally independent matte generators let the operator choose any color wanted on every matte function
- **Downstream Mixer/Keyer:** downstream mixer/keyer allows user to choose either PGM/PST or A/B operation
- **Power Backup:** standard dual power supplies automatically switch if one should fail
- **Battery Backup:** batteries hold memory registers and current switcher setting in case of power failure

The uncluttered beauty of the AVC Series panel is striking. In creating the AVC Series switcher, Ampex engineers achieved many industry firsts, including the elimination of all panel control knobs. Instead, there are two centrally located "adjust panels" containing Up/Down and On/Off pushbuttons as well as the Pattern Positioner. All major switcher adjustments are made from this convenient focal point.

Advanced design concepts are used to enhance reliability and to improve signal performance. For example, dual current sharing power supplies are standard. Independent microprocessors in both the control console and the electronics bay may have an optional backup CPU installed. A battery backup for the AVC system is standard.

One dual-twisted-pair audio cable is the only connection required between the console and the electronics bay.

The large, backlit M/E display panels contribute to the easy operation of the AVC Series. These panels display the key sources selected on all three keyers in each M/E. In addition, the wipe pattern numbers and auto-transition duration times are also displayed in large, easy-to-read numerals.

Also on this display are "active bus" and keyer tally indicators that always show which video bus or buses including keyers are contributing to the output of the M/E. To further simplify the operator's job, these tally indicators change colors from yellow to bright red to indicate when any of those sections of the switcher are "On Air".

One of the greatest advantages of the AVC Series switcher is its ease of operation. AVC Series switchers are among the most powerful and capable production switchers available on the market today. Yet, for all their creative power and capability, AVC switchers operate in the logical and familiar cascaded re-entry, A/B format. The operator's perceived "video flow" is always left-to-right and top-to-bottom and, except for Mix Key, Wipe Key and Auto-Transitions, the fader position always corresponds to the active video bus.

AVC Series

The AVC switchers use 12-button keypads on each M/E for the selection of key sources for all three keyers, wipe patterns and auto-transition rates. Use of the keypad makes control of the M/E fast and efficient, and its compactness allows the overall physical size of these extremely powerful switchers to be kept to human proportions.

AVC Series switchers are designed to significantly increase creative capabilities while actually reducing operational tasks. Simple controls, easy-to-read and understand visual displays and tallies and compact size add up to a more useful production system. With an AVC Series switcher's simple-to-operate console and logical, familiar A/B operation providing truly useable power, you'll be assured of better final production results every time.

### AVC Series Options

There are numerous options available for use with AVC Series switchers that can extend their unique and powerful production capabilities. AVC switcher options include:

#### Analog Key Border Generator and Encoded Chroma Keyers

This option gives a smooth, high quality analog key border generator capable of making borders or drop shadows with any luminance value, colored outlines and, on effects keyers, drop shadows which can be varied from zero up to 14 lines deep. Key insert video can be decayed and delayed up to 14 lines for very dramatic effects from even simple graphics.

Each key border generator option also includes an encoded chroma keyer. The encoded chroma key portion is fully integrated and fully timed in the AVC. No external rack units or timing devices are required.

#### Switcher Status Display Output

Every parameter of AVC switcher status can be displayed in easy-to-read bar graphs with this option. Fader status, direction and travel are shown along with pattern modifier menus, error and operating messages. A switch in the signal system converts the status output to a diagnostic display output to help with maintenance and troubleshooting.

#### Clock/Timer/Safe Area Display

This option is a valuable aid for both live and post production. It provides up to two Clock/Timer displays, and a Safe Title display keyed over the Preview monitor. The Clock/Timer displays can be made to count up or down from any present time, manually or automatically. The Safe Area display shows SMPTE Safe Title and Safe Action area (Safe Title only in PAL), plus centering and alignment cursors.

#### Auxiliary Buses

All AVC Series switchers can accommodate up to 16 auxiliary buses. Auxiliary buses can be video-only, audio-follow-video or audio breakaway. Aux buses can select from all primary switcher inputs plus all M/A and Program output (fully timed). Numerous control systems are available.

FAX: (415) 367-4132 TWX: 910-378-5920

# PRODUCTION SWITCHER

## AVC Series Video Production Switcher (Cont'd)

### Panel STAR™ Memory

Panel STAR Memory is a panel-oriented memory system which can store and recall up to eight complete switcher setups. With the Panel STAR option, setups can be swapped or transferred from one M/E to another. When complex production requirements and heavy time pressures are involved, this can be an invaluable time and frustration saver.

Panel STAR Memory will also make smooth interpolations of size and position between the setups stored in memory. You can transition between setups involving up to three M/Es and the downstream keyer individually, simultaneously or in any combination at the same or at different rates. This kind of powerful control makes any type of production faster, easier and more flexible.

### X-STAR™ Memory

X-STAR Memory is a dual micro-floppy disk system which can store 400 complete switcher setups on one disk, greatly extending the power of Panel STAR Memory. With two disks in operation, over 800 setups can be stored and available for immediate recall. Dual drives mean that disks can be checked, edited, formatted and copied in-house using standard 3 1/2" disks. X-STAR can also store the contents of the AVC Key Memory for even greater production simplicity. Worst-case access to any AVC X-STAR setup is about ten seconds, with typical access requiring less than five seconds.

### ADO™ 2000 System Interface

Designed primarily for live, on-air use, the ADO interface lets you select, trim and run ADO effects from the console as though the ADO were an integral part of the AVC pattern system. The switcher can control up to four ADO channels at once. It even allows you to use the full AVC pattern border capability around ADO pictures.

A special Quad Bus option is available to route signals—including M/E outputs—to the ADO inputs. The Quad Bus and ADO interface let you build up extremely complex effects that can then be controlled quickly and easily by a single button push at the AVC console. Since the whole AVC/ADO setup can be stored in Panel STAR Memory, the AVC switcher will set up a three M/E effect involving ADO keys and moves, select inputs to the ADO, and set up all other switcher parameters and effects. The ADO moves can then be done using AVC faders or auto-transitions, or it can be part of a complex transition of the entire AVC from one memory to another.

### SPECTRAKEY™ Chroma Key System

SPECTRAKEY is an exceptionally high quality RGB chroma key system that uses a patented chroma-nulling process. It lets you key from any color. SPECTRAKEY is fully integrated into the AVC system, so it eliminates the cumbersome problems of external timing compensation or signal routing, and all SPECTRAKEY setups can be stored in Key Memory.

The SPECTRAKEY system's low gain edges and patented techniques make chroma key scenes that are difficult to distinguish from real scenes. Chroma keys involving smoke, glass and other transparent objects present no problems for SPECTRAKEY.

AVC-33

Other options not shown here include Quad Split System and Serial Edit Interface

## SPECIFICATIONS

### Input Characteristics

Primary Input Loop-through bridging: 1.0V P-P composite video  
RGB Chroma Key Inputs 0.7V P-P video, with or without composite sync  
Reference Video Input 1.0V P-P composite video; non-loop through input, 75Ω termination  
Return Loss > 40 dB, at subcarrier frequency, with external 75Ω termination

### Output Characteristics

Output Impedance 75Ω, all outputs  
Line Outputs PGM, 2 outputs; Master Black, 1 output; DSK Black, 1 output  
Monitor Outputs M/Es, 3 outputs (A-bus, B-bus, M/E output) PGM bus, 1 output PST bus (PGM B), 1 output  
Quad Split (when Q/S system installed), 1 output; Key PVW system  
Aux Bus Outputs 2 outputs per aux bus  
Return Loss ≥ 37 dB, at subcarrier frequency

### Video Performance

Frequency Response ± 0.2 dB, 100 KHz - 5 MHz  
+ 0.2, -0.5 dB; 5 MHz - 8.0 MHz  
Smooth rolloff above 8.0 MHz  
Line Tilt (IEEE window signal) ≤ 1.0%  
Field Tilt (IEEE window signal) ≤ 1.0%  
Chrominance/Luminance Gain Inequality < 1.0 dB  
Chrominance/Luminance Delay Inequality (12.5T Modulated Pulse) < 25 ns, max  
Differential Gain ± 1.5%; 10-90% APL  
Differential Phase ± 1.5; 10-90% APL  
Dynamic Gain ± 1.0%; 10-90% APL  
Signal Noise Ratio > 60 dB P-P video (1.0V reference to RM6 noise (unweighted), 30 KHz to 5 MHz)  
Crosstalk ≥ 55 dB at subcarrier frequency  
Path Length Accuracy 1.5° at subcarrier frequency  
Video Switch Approximately 1 μs during vertical interval  
K Factor (ZT Pulse) ≤ 1.0%  
Crossfade Gain Linearity ± 0.5% luminance, ± 1.5% chrominance  
Crossfade Phase Linearity ± 1.5%

### Power

Power Supply Diode coupled, dual redundant power supply with battery back-up  
Battery Back-up 5 days, nominal  
Input 100/110/220/240 VAC, +10%, -15% plug programmable  
60 Hz ± 2%  
50 Hz ± 2%  
Ferro-resonant transformer  
Power Consumption AVC-33: approximately 1.4 KW  
AVC-31: approximately 1.3 KW  
AVC-23: approximately 1.2 KW  
AVC-21: approximately 1.0 KW

### Tally

Relay 1 Form C; 24 V, 2A contacts  
Tailed Inputs All primary plus 2 external key inputs plus ME tally

# AMPEX CORP.

FAX: (415) 367-4132 TWX: 910-378-5920

# PRODUCTION SWITCHERS

## Vista™ Series Production Switchers

### Standard Features

- 10 or 18 inputs including color, black and color background
- Powerful Mix/Effects unit
- Downstream mixer keyer with Master Fade-to-Black
- Flip-Flop operating format
- Integrated switcher status display
- 5 independent matte generators
- 4 auxiliary buses (2 with full re-entries)
- Available in NTSC, PAL or PAL-M video standards

### Patterns

- 32 patterns including rotary wipes and random pixel dissolve
- Full screen adjustable borders
- 4 pattern border types (hard, soft, soft halo and half halo)
- Border width can track pattern size
- Patterns can be positioned with Auto-Panning capability

### Keying

- Three linear keyers capable of Luminance, RGB Chroma, Composite Chroma and ISO keys
- Key memory system stores setups for each source, recalls to any keyer
- UNIKEY™ additional DSK external linear gain key
- Key Masking System
- Optional SPECTRAKEY™ advanced Chroma Key System
- Optional flexible borders: 4 shadow styles and border-modify

### Microprocessor Features

- Panel Memory with event transition and automatic sequencing
- Powerful Preview System will even preview patterns
- RS-232, RS-422 and GPI control ports
- AVC audio system compatibility
- User-programmable switcher configuration

Vista Series switchers are available in ten or eighteen input configurations (including black and color background).

The Mix/Effects system is capable of virtually any combination of transitions involving two keys and two backgrounds. Both keyers can do every type of key—they each have full length, independent source buses as well as operator-assignable automatic isolated hole cutting. Keys may appear over the A or B bus, both buses, or in any combination. And, key transitions are selectable at any time as part of—or independent of—the transition system.

A full function downstream system provides two additional levels of keying (one full capability, one ISO only) as well as mix and fade capabilities.

A versatile preview system quickly and easily monitors the video available at any point in the switcher, and even allows pattern previews without tying up the M/E.

The Vista is ideal for small production facilities, editing suites, mobile applications, or any broadcast or post production situation where space is at a premium. The console measures 12½" tall, while the electronics require only 14" of rack space. Since communications between the two are serial, a simple dual twisted-pair cable is all it takes.

A unique electro-luminescent display shows operating status of transition times, memory setups, diagnostics and other essential operational information—so you always know where you are.

The Vista's up-down controls require less space, are more precise, and are more suited to modern, memory driven switchers than potentiometers. And they won't drift or get noisy over time.

New operators will be pleased at how fast they master Vista's capabilities, while seasoned operators will appreciate the creative freedom offered by Vista's well placed controls.

Vista will store and recall 24 switcher setups, as well as eight different sequences involving any combination of the 24. Sequences can call other sequences, loop, or be paused at any time.

Vista

You can design any transition between setups, then automatically execute the sequence linearly, or in a variety of non-linear transitions.

Auto transitions can be specified in seconds, tenths of seconds, or frames. And, an optional extended memory system lets you save it all on disk.

## Specifications

Video Inputs	75 ohm, loop-through
Return Loss	< -40 dB at subcarrier
Video Level	1V p-p composite
Timing Inputs	
Pulse Level	2 or 4V p-p nominal
Subcarrier	2V p-p nominal
Video Outputs	75 ohm source terminated, 1V p-p
Return Loss	< -37 dB at subcarrier
Frequency Response	±0.2 dB, 100 kHz to 5 MHz +0.2 db/ -0.5 dB 5 MHz to 8 MHz Smooth roll off above 8 MHz
Differential Phase	±1.5° (10%-90% APL) worst case
Differential Gain	±1.5% (10%-90% APL) worst case
Signal-to-Noise Ratio	>60 dB p-p video/RMS noise 120 kHz to 5 MHz, unweighted
Line Tilt	≤1.0% (IEEE window signal)
Field Tilt	≤1.0% (IEEE window signal)
Chrominance/Luminance Delay Inequality	≤25 nS (12.5 T Pulse)
Chrominance/Luminance Gain Inequality	≤0.2 dB
Crosstalk	≤ -55 dB at subcarrier
Path Length Accuracy	<1.5° at subcarrier
K Factor (2T Pulse)	<1.0%
Crossfade Gain Linearity	±0.5% luminance ±1.5% chrominance
Crossfade Phase Linearity	±1.5°
Dynamic Gain	±1.0% (10%-90% APL)

# COMPUTERIZED EDITING SYSTEMS

## ACE™ Computerized Editing Systems

Because the ACE Editor is both software-based and modular, it is a superior long-term investment—for both the editor and the engineer. Software enhancements improve the system's capabilities without making the hardware obsolete. Modularity allows you to start out with exactly the system you need, and add capability as your business grows.

### A Family of Editors Lets You Choose the Best System for Your Application

From a very affordable interformat system, all the way to a 16-device control system with up to 6000-line edit list capacity, the Computerized Editing family consists of powerful editors—designed to fit almost any of your editing requirements.

### A Systems Approach to Post-Production

When an ACE Editor is the centerpiece of a system in which the major components are Ampex products, you're in charge of a Creative Command Center™. Within the Creative Command Center, ACE has superb control of Ampex switchers, VTRs, and Ampex Zeus™ advanced video processors, and even ADO™ special effects systems. RS-422 serial communications and compatible software throughout make machine interfacing a smooth road.

The Creative Command Center offers enough flexibility to satisfy any post-production requirement. Select your switcher from the Ampex 4100 Series, or from the Ampex AVC Series, including the powerful AVC Century or the compact Vista™ switchers. Choose from Ampex's complete line of Type C VTRs. For small format work, Ampex offers a selection of Betacam and Betacam SP™ VCRs. Choose from three versions of ADO systems for digital effects. ACE Editors control them all—via the speed and efficiency of serial communications.

Of course, ACE interfaces with products of other manufacturers, too. RS-422 compatibility, general purpose interface (GPI), superb disk input/output capabilities, and ACE's Trigger Screens help make ACE the right choice for any equipment configuration.

### Dedicated Keyboard: Soft Key Superiority

The ACE dedicated keyboard features a logical, uncluttered layout that positions clusters of keys according to function and frequency of use and, like the TouchScreen, easy to learn and easy to master.

The true power of the ACE Editor is contained within eight soft keys, grouped at the top of the keyboard. These soft keys provide direct access to the powerful software features ACE Editors offer.

### TouchScreen: Silent Lightning

The TouchScreen is silent, efficient, powerful, and extremely rapid. Instead of keyboarding your inputs, you merely point your finger at an entry on the menu monitor. It provides the editor all the power and features of a keyboard, but allows greater operating comfort and speed.

TouchScreen data is displayed "double spaced," making it easy to move quickly from one command to another. Whenever numbers are required, a keypad display appears. It is arranged much like a standard 10-key array on a keyboard, but with many extra custom features for easy numerical entry, trimming, and storage.

### ACE Software: The Power Behind the Screen

One of the unique features of ACE software is the ability to configure menus to an editor's preference. You can display as little or as much data as desired on your Edit Construction List (ECL) or Edit Decision List (EDL). Simplify the menu for a "cuts-only" session, or add important switcher data for a challenging multiple M/E session. ACE does not impose its menus on the user. It lets you custom tailor the display to match your creativity and style.

ACE

### ACE Triggers: The Power of the Pulse

All triggers are indented from the program line for an easy visual cue, with concise titles heading the four information columns. Triggers are fully listed in the EDL—easy to read and easy to modify.

GPIs can be triggered at entry plus, entry minus, or record absolute, with variable pulse durations easily set.

### Joystick Control

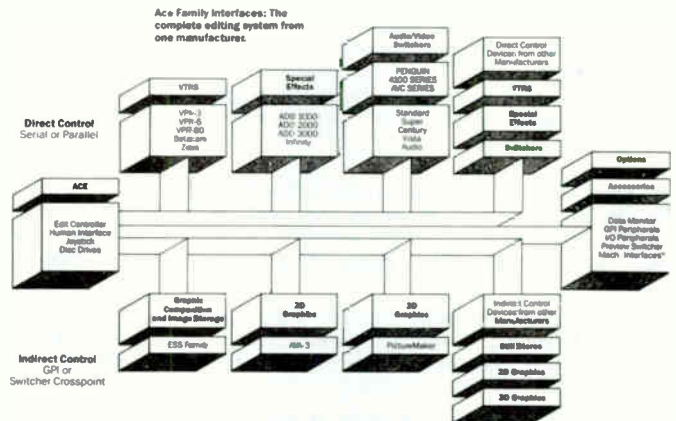

The joystick is standard with many ACE models and complements both TouchScreen and keyboard operation. This is no ordinary joystick, but rather a key element in the synergy of a Creative Command Center.

### ACE 200 Editor

ACE 200 is an NTSC, PAL, and PAL-M compatible distributed processing electronic editor which controls up to 20 GPIs and 16 devices. These devices include VTRs, ATRs, Ampex Zeus advanced video processors, Ampex switchers, ADO special effects systems, as well as equipment from other manufacturers.

### ACE Micro Editor

The ACE Micro Editor is an NTSC, PAL, and PAL-M compatible distributed processing electronic editor which provides full computing power and editing versatility at an affordable price. ACE Micro Editors have excellent functionality in broadcast, industrial, interformat, and second suite applications. ACE Micro controls one video switcher, and up to 4 GPIs and 4 VTRs, including Type C, 3/4", Betacam and Betacam SP. A printer and one human interface are also supported.

Prices and Specifications Subject to Change Without Notice.

# VIDEO TAPE RECORDER

## VPR-80 C-Format Video Tape Recorder

### The VPR-80/TBC-6 Package

The VPR-80 and its digital time base corrector, the TBC-6, were designed to make your production and editing easier and faster.

Automatic Scan Tracking™ (AST) is a standard feature on the VPR-80. The AST system insures tracking and allows you to vary playback speed from still frame through slow motion to 1½ times play speed—with no picture breakup and no need to adjust.

A complete editing package is standard, too. It's easy to understand, fast and simple to operate, and frame-accurate. It even lets you preview and trim your edits prior to recording.

The exclusive AST tracking system enables the VPR-80 to deliver broadcast quality pictures at any play speed—from stop through slow motion to 1½ times normal forward speed. By providing accurate auto tracking at all tape speeds, AST insures stable, perfect pictures. And, the AST system further improves the quality of your normal playback by automatically servoing the video head to the exact center of the video track.

### Gentle Tape Handling, Even at 30X Play Speed

Whether you need two hours of recording and playback time, or just enough tape for a 30 sec. spot, the VPR-80's "intelligent," high-response servo system gently handles reels of any size from 11¾" down to the smallest, lightest spot reel.

### Sophisticated Electronics Let You Work Fast and Efficiently

Dual microprocessors are the key to the VPR-80's power and operating simplicity. By dividing the workload, the VPR-80 can respond faster and more efficiently.

One microprocessor manages the VTR control system while the other is dedicated to all the servo subsystems. The result is accurate, dependable performance of all the machine's operations—and instantaneous response to your commands.

All this power has an additional benefit; it makes the VPR-80 simple to operate. Everything from setup to servicing can be done with a minimum of technical skill.

### Power Failures Won't End Your Day

If the power fails, a backup battery and voltage regulator system continue to power your machine's memory. Tape time, control panel setup and edit functions are all held until power is restored.

### Sophisticated Editing

Sophisticated editing is simple, fast and frame accurate. And, built-in machine intelligence helps guide you through the process.

- Insert and Assemble can be selected by pushbutton
- Auto-Edit permits automatic editing from preselected cues
- Entry and Exit edit points can be selected by pushbutton
- Your edits can be trimmed, frame by frame, on the keypad or by jogging the tape
- Both audio and video edits can be previewed prior to final recording
- A transfer feature automatically sets the next scene's edit entrance point

### "No-Fault" Operation Standard on this Machine

The VPR-80 advises you of any system faults or non-standard conditions that could affect machine performance. Status verification and diagnostic routines are performed automatically when the machine is turned on.

The VPR-80 checks for power failure in any of the subsystems, scanner stall, over-heating or absence of control track. It even lets you know when an editing procedure is incorrect—or when there's no video input.

If a fault or non-standard condition is detected, you're immediately alerted. And, the VPR-80 pinpoints the problem and indicates it, specifically, on the control panel display. If the problem could cause tape damage, the machine automatically shuts down.

VPR-80

### Audio

There are three fully independent audio channels on the VPR-80. Channels 1 and 2 are optimized for use as a stereo pair, and channel 3 has wideband capability for time code.

Individual level meters are standard, and separate level controls are provided for audio record and playback.

### Flexible System Interface

A simple five function remote control interface lets you run your VPR-80 from up to 100' away. For 2-machine editing, there's a single, plug-in connector. There's even a monitor jack that lets you keep an eye on critical video and control waveforms. And, parallel remote and serial remote PWAs are optionally available to give your VPR-80 even more flexibility.

The VPR-80 can also be teamed with our ADO™ effects, PictureMaker 3D animation, ACE™ and ACE Micro editors and Ampex switchers in a complete post-production editing system.

In order to provide consistent performance over a wide range of time base error inputs, we've packaged the VPR-80 with the TBC-6 digital time base corrector.

The 28-line correction window in the TBC-6 will handle the wildest gyroscopic errors you can throw at it. And in shuttle, its circuitry provides viewable pictures at 30X play speed, in forward and reverse.

Full color dropout compensation and velocity error correction are built in. And, the SCH phased sync generator includes fully adjustable horizontal and vertical blanking circuitry.

You're in full control of composite video signal adjustments on the TBC-6, with independent video and chroma gain controls, as well as chroma gain controls, as well as chroma phase, subcarrier phase, horizontal phase and black level controls. And primary controls are all remotable via an optional TBC-6 remote control panel.

You can even time share your TBC-6. It's designed to operate with heterodyne recorders, so you get maximum service out of a single piece of equipment.

For applications that don't require the broadcast quality variable speed capabilities of the TBC-6, the low cost TBC-40 is available.

Like the TBC-6, the TBC-40 will time share with other VTRs. It provides all the video signal control of the TBC-6 and, if ever needed, can be easily upgraded to TBC-6 performance specs.

# BETACAM RECORDER/PLAYERS

## CVR-75/CVR-70 Betacam SP Recorder/Players

### Common Features

#### Video

- Automatic Scan Tracking™ (AST) with Dynamic Motion Control
- TBC remote control interface
- High speed picture-in-shuttle up to 24X normal speed in mono-chrome, either forward or reverse
- Full-featured editor
- Jog function allows tape movement in either direction, one frame at a time
- Versatile editing interfaces
- Dynamic Motion Control CVR-70 can memorize rehearsed playback speeds of a connected CVR-65 or CVR-75 over their tracking range (-1 to +2X normal), and then command the CVR-65 or CVR-75 to reproduce these speeds in subsequent editing operations
- Versatile Time Code System, VITC and SMPTE/EBU longitudinal track format
- Presettable user bits, free-run or record-run modes
- Built-in time code generator/reader
- Two composite outputs
- Two dub/component outputs
- —Y, R-Y, B-Y or Compressed Time Division Multiplexed (CTDM) output for high-quality component editing
- Color framing. Superior color framing operation, using both the CF flag and the Vertical Interval Subcarrier (VISC) system when operating in a composite environment
- Studio-quality audio performance
- Four channels: two longitudinal, two AFM
- Separate playback levels for each channel
- Integrated mixer for channels 1 and 2
- Low impedance audio monitor outputs for separate or mixed output
- Dolby C\* noise reduction on longitudinal channels
- Multi-function hours meter
- Headphone jack with volume control

### CVR-75 Betacam Recorder/Player

The CVR-75 is equipped with a built-in, full-featured editor that allows both assemble edits and insert edits for Video, Audio 1 and 2, and time code. Pre-roll times are selectable. Preview/Review functions can be engaged to check edit accuracy. And, edit points determined by the use of in/out mark functions may be trimmed in either direction on a frame-by-frame basis.

Sc/H (subcarrier to horizontal sync) phase indicators, are built into the CVR-75. These circuits monitor both the video input and output for correct RS-170A phasing, assuring good edits whether the CVR-75 is the source or recorder.

In the editing suite, the CVR-75 is a versatile work-horse. Designed to meet the stringent requirements of demanding editing sessions, the machine provides a selection of time codes.

Besides Longitudinal Time Code (LTC) with user bits, the CVR-75 provides Vertical Interval Time Code (VITC).

With the CVR-75, you always know exactly where you are on the tape. The need for shuttling back and forth to search for an exact insert or exit point is eliminated.

### CVR-70 Betacam Recorder/Player

The CVR-70 studio VTR combines the performance of Betacam SP with features such as dynamic motion control, viewable pictures in shuttle, a full-featured editing system, a built-in time base corrector and a versatile time code system.

The CVR-75/70 are compact, lightweight and can be installed in either standard 19" EIA racks or consoles in studios and OB vehicles.

# BETACAM PLAYERS

## CVR-65/CVR-60

### Betacam SP Players

- AST™ automatic tracking allows variable speed playback within a range of -1 to +2X play speed with broadcast quality pictures (CVR-65 only)
- Built-in time base corrector provides broadcast quality video while eliminating any other signal processing requirements
- TBC remote control interface
- High speed picture-in-shuttle up to 5X normal speed in color, 24X in monochrome, either forward or reverse
- Jog function allows tape movement in either direction, one frame at a time
- Versatile editing interfaces
- Dynamic Motion Control CVR-65 can memorize rehearsed playback speeds over -1 to +2X normal speed, and reproduce them in subsequent playback
- Versatile Time Code System, VITC and SMPTE/EBU longitudinal track format
- Built-in time code reader
- Built-in character generator
- Time code, system status or setup menus displayed in video monitor output
- Two composite outputs
- Two dub/component outputs —Y, R-Y, B-Y or Compressed Time Division Multiplexed (CTDM) output for high-quality component editing

CVR-65

- Color framing. Superior color framing operation, using both the CF flag and the Vertical Interval Subcarrier (VISC) system when operating in a composite environment
  - Studio-quality audio performance  
Four channels: two longitudinal, two AFM  
Separate playback levels for each channel  
Low impedance audio monitor outputs for separate or mixed output  
Dolby\* C noise reduction on longitudinal channels
  - Multi-function hours meter
  - Headphone jack with volume control
- The CVR-65 delivers all the performance of the Betacam SP format with features such as

AST automatic tracking, dynamic motion control, viewable pictures in shuttle, a built-in time base corrector and a time code reader.

The CVR-65 is compact, lightweight and can be installed in either standard 19" EIA racks or consoles in studios and OB vehicles.

The CVR-60 delivers all the performance of the Betacam SP format in an economical playback machine.

The CVR-60 is compact, lightweight and can be installed in either standard 19" EIA racks or consoles in studios and OB vehicles.

# BETACAM PORTABLE RECORDER/PLAYER

## CVR-35 Betacam SP Portable VTR

Through advanced circuit design and semiconductor technology, power consumption for the CVR-35 is kept to a minimum.

You can choose between NP-1A or BP-90 batteries for up to 120 minutes of recording on one set of batteries.

An AC-500 Power Adaptor is also available for AC operation.

### Excellent picture quality — with two playback modes

Now you can insure that you have recorded the picture you need. Luminance or Compressed Time Division Multiplex (CTDM) monochrome pictures can be seen in the camera viewfinder, either during recording using the confidence playback mode, or later using the normal playback mode. In addition, color pictures can be viewed on a monitor during normal playback.

### Four audio channels, with performance to match the video

With the Betacam SP format the CVR-35 can deliver true studio quality audio performance.

In addition to two high performance AFM tracks, specifications have been improved on the longitudinal channels. Dolby\* C noise reduction is also provided on the longitudinal channels to further improve sound quality.

And as with the video capability, you also have audio confidence playback while recording, to assure that those valuable scene sounds are being captured.

### Frame accurate backspace editing and an RS-422 interface makes field editing easier

Automatic frame accurate back space editing and nearly instantaneous starts on the CVR-35 provide smooth, continuous recording without break-up between sequences.

The CVR-35 is designed to also act as a high quality video/audio "feeder" source for an editing VTR. During the editing process the CVR-35 can be controlled by the editing VTR through the RS-422 serial interface.

### Multifunctional time code generator/reader with genlock

Now you can have a choice of time codes for post-production on Betacam SP. In step with the extended performance of Betacam SP, the CVR-35 brings the advance of Vertical Interval Time Code (VITC) as well as the SMPTE/EBU longitudinal track format.

The versatility of the Time Code System of the CVR-35 includes pre-settable User Bits, free-run or record-run modes, and genlock for setting/synchronizing to an external time code master generator.

To complement the CVR-35 playback capabilities, both Time Code Systems now have built-in readers.

### TBC interface adds versatility

Through a time base corrector, the CVR-35 is capable of studio-quality color playback for re-recording, microwave, satellite, or on-air transmission.

Advanced video/sync and subcarrier inputs are provided for use with an Ampex TBC-40 or other TBC.

### Complete professional connector panel

Although compact in size, the CVR-35 provides a full featured connector panel that allows you to configure a system that meets your specific applications.

Composite and component video inputs and outputs are provided along with audio interfaces, allowing the CVR-35 to be connected to a wide variety of ENG/EPF equipment.

### Designed for operational convenience

Independent VU meters and controls are provided so you can accurately adjust record and playback levels on all four audio channels. Other features include:

- Built-in RF modulator
- Time code/tape time display
- Video input level display
- Battery status display

## CVR-5 Portable VTR

- Four audio channels, with performance to match the video
- Full bandwidth playback capability
- Multifunctional time code generator/reader with genlock
- Recording review function
- Combine with Betacam cameras for complete camcorder operation
- Phantom power supply
- Frame accurate automatic backspace editing
- Adaptors let you configure your CVR-5 for a variety of applications

The CVR-5 can be configured as an integral part of an AmpeX camcorder, or operated as a stand-alone recorder.

The CVR-5 can also be configured to record input from most existing cameras—in either the component or composite domain. So you can get Betacam SP performance, without having to replace your equipment.

The CVR-5 records and plays both oxide and metal particle tape in the 30-minute size cassette. It lets you pick the tape that's right—and cost effective—for your application.

And as with the video capability, you also have audio confidence playback while recording, to assure that those valuable scene sounds are being captured.

Audio recording is extremely flexible. Besides recording directly from your camera's microphone the CVR-5 has four XLR inputs for external microphones and audio lines.

If your work requires playback at full bandwidth you'll appreciate the playback output provided on the CVR-5. When combined with an optional CVA-500 playback adaptor the CVR-5 will output at full video bandwidth in color plus one channel of audio for recording check or microwave transmission.

Now you can insure that you have recorded the picture you need. Luminance or Compressed Time Division Multiplex (CTDM) chrominance pictures can be seen in the camera viewfinder either during recording using the confidence playback mode or later using the normal playback mode.

With the Betacam SP format the CVR-5 can deliver true studio quality audio performance.

In addition to two high performance AFM tracks, specifications have been improved on the longitudinal channels. Dolby® C noise reduction is also provided on the longitudinal channels to further improve sound quality.

For a quick confidence check, the CVR-5 provides a review function. It will rewind and playback the final few seconds of your recording, then automatically recue for your next sequence.

Now you have a choice of time codes for post-production of Betacam tape. In step with the extended performance of Betacam SP, the CVR-5 offers both Vertical Interval Time Code (VITC) as well as the SMPTE/EBU longitudinal track format.

The versatile Time Code System of the CVR-5 includes pre-settable user bits, free-run or record-run modes, and genlock for setting/synchronization to an external time code master generator.

## PORTABLE VTR

And to complement the CVR-5 playback capabilities, the longitudinal Time Code System now has a built-in reader.

To eliminate picture breakup between sequences, the CVR-5 provides a backspace assemble editing function. It automatically rewinds at the end of a sequence when the record button of the CVC-5 is pushed, then recues the tape at a clean edit point. Backspace editing can be performed from either the stand-by or save modes.

For applications where a remote microphone is required, a "phantom" power supply is built right into the CVR-5. It's designed to power a professional quality condenser microphone, providing audio input on Channel 1.

- CVA-5—allows the CVR-5 to accept either component or composite input from a wide range of cameras
- CVA-1—allows the CVR-5 to accept component input from a wide range of cameras
- CVA-500—allows color playback at full bandwidth

Two VU meters and controls are provided so you can accurately adjust record and playback levels on all four audio channels.

Other features include: Time code/tape time display, video input level display, and battery status display

Warning indicators are also provided for the status of: RF, servolock, end of tape, tape slack, condensation, and low battery.

The CVR-5 can be combined with CVC-3A camera to become the CVR-503A camcorder or the CVC-30 camera to become the CVR-530 camcorder.

# COLOR CAMERAS

## CVC-3A/CVC-30 Color Cameras

### Common Features:

- Automatic iris adjustment
- Automatic centering
- Automatic beam optimizer
- Automatic tube protection shutter
- Automatic white/black balance
- White balance memory for each filter position
- Linear matrix
- 2H delay image enhancement
- Shading compensation for lens extender
- Built-in effects microphone
- 1.5" viewfinder with horizontal slide mechanism

### Viewfinder Displays Provide:

- Record status
- Filter position
- Video level
- Audio level and control (CH.1)
- Gain setting
- White/black balance status
- Can be combined with CVR-5 portable VTR for complete camcorder operations

The CVC-3A is a 3-tube  $2/3"$  Saticon camera. The CVC-30 is a 3-tube  $2/3"$  diode gun Low Output Capacitance (LOC) Plumbicon camera.

Both cameras provide superior resolution and S/N, and both feature an electrostatic deflection/magnetic focus system. The CVR-5 VTR is compact, versatile, and can be used in a number of composite and component configurations. And, since it records and plays both Betacam and Betacam SP format tapes, the CVR-5 is ideal for a wide range of ENG/EFP applications.

## Specifications

<b>CAMERA</b>	Pick-up tube	3A: $2/3"$ MF Saticon 30: $2/3"$ Diode Gun Plumbicon (MS, LOC)
	System	RGB 3-tube system
<b>VIEWFINDER</b>	Optical system	F1.4 prism system
	Built-in filters	1:3200° K, 2:5600° K + 1/4ND, 3:5600° K, 4:5600° K + 1/16 ND
	Lens mount	Special bayonet mount
	Video output	1.0V p-p, sync negative, 75 Ohms 2 outputs: TEST OUT, VTR connector
	Horizontal resolution	650 TV lines at center (typical)
	Registration	0.1% Zone I, 0.15% Zone II, 0.3% Zone III
	Geometric distortion	Less than 1%
	Sensitivity	3A: 2000 lux with F4, 90% reflectance 30: 2000 lux with F4.5, 90% reflectance
	Minimum illumination	3A: approx 30 lux (with f 1.4 lens +18 dB gain) 30: approx 25 lux (with f 1.4 lens +18 dB gain)
	S/N Ratio	NTSC/PAL-M: 59 dB, PAL/SECAM: 57 dB
Connectors	VTR: 50-pin, TEST OUT: BNC, LENS: 6-pin/12-pin, REMOTE: 6-pin	
<b>VIEWFINDER</b>	Picture tube	1.5 inch monochrome, BRIGHT control, CONTR control, TALLY switch, AUDIO control, ZEBRA on/off switch
	Resolution	500 TV lines
<b>GENERAL</b>	Power requirements	DC 12V (10.5V to 17V)
	Power consumption	20W NTSC/PAL/PAL-M, 22 W SECAM
	Warm-up time	3.5 seconds from pre-heat condition
	Operating temperature	-20° C to +40° C (-4° F to 104° F)
	Storage temperature	-20° C to +50° C (-4° F to +122° F)
	Microphone	Sharp-directional
	Supplied accessories	Extension board, tripod adaptor, tripod bracket, extractor, auto centering chart
	Dimensions	265 mm (10.4 in) H x 111 mm (4.3 in) W x 360 mm (14.2 in) L
	Weight	Approx 4.3 kg (9 lb, 7 oz) with viewfinder

CVC-3A

The electrostatic deflection/magnetic focusing system allows precisely controlled beam ballistics in a very compact package.

This system also lowers the amount of drive voltage required while improving deflection accuracy. The improved deflection increases the luminance resolution in the corners of your picture, while reducing the registration error. The result is a compact camera, with no trade-off in picture quality.

The low output capacitance of diode gun pick-up tubes and a low noise/high sensitivity FET, help contribute to superior S/N ratio.

Both cameras also have an exceptionally high center resolution. And, since a constant beam focus is maintained over the active area of the tube face, corner resolution is excellent.

When combined with the Betacam SP format, this ability to deliver quality pictures gives you studio camera performance in a lightweight, compact package.

# CCD CAMERA

## CVC-50 Betacam Camera

- Automatic iris control
- Automatic white/black balance
- 2 white balance memories for each filter position
- High resolution, adjustable viewfinder
- Genlock capable
- Microphone
- Automatic white level compression
- Color bar generator
- Can be combined with CVR-5 portable VTR for complete camcorder operations

## Viewfinder Displays Provide:

- Record status
- Tape remaining
- Filter position
- Video level
- Audio level and control (CH. 1)
- Gain position
- White/black balance
- Battery condition
- Shutter speed (CVC-50)

## CVC-50 Camera

The CVC-50 combines all the durability and convenience of the CVC-5 with the picture dynamics you demand for sports, EFP and high-quality ENG production.

Frame Interline Transfer CCD sensors make it all possible. They reduce vertical smear to such a degree that it's no longer visible in most shooting situations.

The shutter captures moving objects more clearly. The switchable electronic shutter makes the CVC-50 especially effective for sports and action news.

It allows you to capture clear pictures, even when your subject is moving at high speed. You'll also find that the shutter mode results in exceptional still and slow-motion playback.

It allows you to select any of seven shutter speeds: (1/100 through 1/2000 NTSC, 1/60 through 1/1600 PAL). The speed is displayed in your viewfinder.

CVC-50

## TYPICAL SYSTEM CONFIGURATIONS

The viewfinder can be shifted back and forth as well as right and left for more comfortable shooting.

## Options

Assemble a high-performance camcorder by combining either camera with a CVR-1A or CVR-5 on-board VTR.

Add a CA-3/CA-3A stand-alone adaptor and feed component or composite video directly to a remote VTR. An RM-P3 Remote Control Unit can be connected to the CA-3A to allow simple remote control.

For an expanded system, add a BVF-50 5" black and white viewfinder and CA-50 adaptor to your CVC-50 camera, and run it all with the CCU-350 camera control unit.

On-board VTRs are available from Ampex to turn your CVC-5 or CVC-50 into a versatile, high-performance camcorder.

# BETACAM ENG CAMCORDER

## CVR-505 Betacam SP ENG Camcorder

The CVR-505 Camcorder combines all the benefits of a full featured CCD camera with a portable VTR capable of studio quality video and audio.

### The CVR-505 Consists of the CVC-5 CCD Camera and the CVR-5 Video Tape Recorder

The CVC-5 3-CCD Camera is rugged, reliable and operates under conditions that are difficult or impossible for other camera types.

The CVR-5 VTR is compact, versatile and can be used in a number of composite and component configurations. And, since it records and plays both Betacam and Betacam SP formats, the CVR-5 is ideal for a wide range of ENG applications.

## The CVC-5 Camera

### Superior Picture Quality

In high contrast settings, the CVC-5 allows you to compress high lights with a switchable Dynamic Contrast Control.

And, CCD technology eliminates lag, burn-in and microphonic noise while delivering excellent resolution.

### No Registration Hassles

CCD image geometry eliminates the need for registration—and virtually eliminates registration error in all zones.

### A Full Range of Operational Conveniences

- Automatic iris control
- Automatic white/black balance
- 2 white balance memories for each filter position
- Linear matrix
- 2H delay image enhancement
- Shading compensation for lens extender
- Built-in effects microphone
- Automatic white level compression

### Viewfinder Displays Provide:

- Record status
- Filter position
- Video level
- Audio level and control (CH. 1)
- Gain setting
- White/black balance status

### Stand-Alone Versatility

When combined with a CA-3 adaptor the CVC-5 can be operated in a stand-alone configuration. It will feed either component or composite video to a remote VTR via a 26-pin connector.

### Rugged Construction

The CVC-5 features a compact, lightweight, diecast magnesium alloy frame, and is both dust and moisture resistant.

## The CVR-5 Portable VTR

The CVR-5 can be configured as an integral part of an Ampex Betacam SP Camcorder, or operated as a stand-alone recorder.

The CVR-5 can also be configured to record input from most existing cameras—in either the component or composite domain.

The CVR-5 records and plays both oxide and metal particle tape in the 30 minute size cassette.

### Excellent Picture Quality—with 2 Playback Modes

Luminance or Compressed Time Division Multiplex (CTDM) chrominance pictures can be seen in the camera viewfinder either during recording, using the confidence playback mode, or later, using the normal playback mode.

### Four Audio Channels with Performance to Match the Video

With the Betacam SP format the CVR-5 can deliver true studio quality audio performance.

In addition to two high performance AFM tracks, specifications have been improved on the longitudinal channels. Dolby C noise reduction is also provided on the longitudinal channels to further improve sound quality.

And, as with the video capability, you also have audio confidence playback while recording.

Besides recording directly from your camera's microphone, the CVR-5 has four XLR inputs for external microphones and audio lines.

CVR-505

### Full Bandwidth Playback Capability

The CVR-5, when combined with an optional CVA-500 playback adaptor, will output at full video bandwidth in color plus 1 channel of audio for recording check or microwave transmission.

### Recording Review Function

For a quick confidence check the CVR-5 will rewind and playback the final few seconds of your recording, then automatically recue for your next sequence.

### Multifunction Time Code Generator/Reader with Genlock

CVR-5 offers both Vertical Interval Time Code (VITC) as well as SMPTE/EBU longitudinal track format.

The versatile CVR-5 Time Code System of the CVR-5 includes presettable user bits, free-run or record-run modes, and genlock for setting/synchronization to an external time code master generator.

And, to complement the CVR-5 longitudinal playback capabilities, the time code system now has a built-in reader.

### Frame Accurate Automatic Backspace Editing

To eliminate picture breakup between sequences, the CVR-5 provides a backspace assemble editing function. It automatically rewinds at the end of a sequence when the record button of the CVC-5 is pushed, then recues the tape at a clean edit point. Backspace editing can be performed from either the standby or save modes.

### Phantom Power Supply

A Phantom Power Supply is built into the CVR-5. It's designed to power a professional quality condenser microphone, providing audio input on Channel 1.

### Adaptors Let You Configure Your CVR-5 for a Variety of Applications

- CVA-5 allows the CVR-5 to accept either component or composite input from a wide range of cameras
- CVA-1 allows the CVR-5 to accept component input from a wide range of cameras
- CVA-500 allows color playback at full bandwidth

### Designed for Operational Convenience

Two VU meters and controls are provided so you can accurately adjust record and playback levels on all four audio channels.

### Other Features Include:

- Time code/tape time display
- Video input level display
- Battery status display

### Warning indicators are also provided for status of:

- RF
- Servo lock
- End of tape
- Tape slack
- Condensation
- Low battery

# CHASER/EMULATOR

## Chaser™ 7000 Series Chase Synchronizer

Chaser is a time code based chase synchronizer, developed principally for "audio for video" post production facilities. It continually reads edit code from two tape machines, a master and a slave, and maintains a pre-determined time relationship between the two by directly controlling the slave's transport functions and capstan motor. The use of full speed time code readers allows the slave to chase the master in wind speeds, reducing cueing and lock up times. Chaser is capable of a high degree of synchronization accuracy, so that overall system stability is only limited by the slave transport mechanics.

The master and slave time code numbers are seldom the same, as the audio and video portions of a program are not always recorded at the same time. Even if they were, the same machines are rarely used for both, recording and post production. The instantaneous position that the slave is displaced with respect to the master is called the offset. (Slave - Master = Offset). With Chaser, offsets can be entered over the complete 24 hour range, with a resolution of 1/100<sup>th</sup> of a TV frame.

Three different synchronization modes give Chaser tremendous flexibility. In "frame-lock" mode, Chaser maintains absolute alignment of the time code numbers, including offset, and subframe phasing. If tapes with disrupted time code or splices need to be synchronized, the user can select the "phase-lock" mode, to maintain only the relative phase between the two tapes without regard for absolute time code numbers. A third mode, "auto-lock" is a combination of both. After initial synchronization using time code numbers, "phase-lock" continues using only the frequency component of the code.

Two different, though functionally similar control panels are available: the integral front panel with display/keypad or a remote control unit with expanded capabilities. The integral control panel contains an alphanumeric LED display and a number of clearly labelled pushbuttons logically arranged in a display group, a data entry group and a function group. In the data entry mode the display keys double as numerical keys, keeping the panel uncluttered and user friendly.

7000 DSP

7000 RCT

The remote control unit is connected to Chaser's SMPTE/EBU RS-422 serial remote control port, allowing it to be conveniently located at the edit console, while the Chaser electronics are located near to the audio transport. In addition to the functions on the integral front panel, the remote control unit constantly displays the slave transport's status. The data entry and display keys are separated, permitting additional display flexibility. Four keys are dedicated to remote control of the slave transport's fast forward, rewind, play and stop functions. This optional remote control unit replaces the integral front panel display/keypad.

7000 DSP Integral Front Panel/Local Control . . . . . \$3950.00  
7000 RCT Remote Control Version . . . . . \$4950.00

## 7100 Emulator Audio Transport Interface

Emulator is an audio transport interface that integrates audio into the video edit suite without the need for extra VTRs and external tape synchronizers. Using Emulator, you can perform audio insert edits without tying up a VTR to synchronize the audio tape machine. Integrating the ATR edit points into the edit decision list eliminates the need to maintain separate lists of offsets and record in/out points for the audio, simplifying the list management process.

Emulator uses the same transport interface and control electronics as Chaser. It receives commands from the edit controller, in the specified RS-422 serial VTR protocol format. These commands are then broken down into sub commands which are used to control the ATR using the built-in intelligent transport interface. Emulator controls all the cueing, pre-roll synchronization, record in/out, and other functions necessary in an integrated editing environment.

To make use of Emulator, all you require is an edit controller that uses the SMPTE/EBU serial remote control protocol for controlling video tape machines. Emulator interfaces are available for several VTR protocols, (BVU, BVH, VPR, etc.) The edit controller must be capable of sync rolling the source VTRs. An extra channel of control is required to communicate with Emulator.

7100

For example, an A/B roll video suite would require that a C source machine capability be added for the audio transport interface. If multiple record machine capability is available on the edit controller, an additional Emulator may be added to control a master record ATR sync rolled with the record VTR. All the ATR functions, edit points, etc. are controlled from the main edit controller keyboard. Separate synchronizer control panels are not required.

7100 . . . . . \$3995.00

# TIME CODE EQUIPMENT

## ECM-4010 Edit Code Master

- Designed to take full advantage of the multitude of application possibilities for vertical interval time code
- Combination generator and high speed reader for both, LTC and VITC
- High resolution character inserter can be used to burn in a window from either the generator or reader data
- Powerful microprocessor software and proprietary reader and generator circuitry combine to offer a time code system that will outperform any other
- Modular construction using euro-card style EV-BLOC modules in a one rack unit high frame
- High resolution character generator/keyer
- Time and user bits presettable from front panel
- Parallel and serial remote control
- RS-232/422 serial port to interface to external computers
- Alphanumeric user bit capability
- Wide speed range in both LTC and VITC readers
- Reads last valid code from either VITC or LTC in auto mode or manual priority selection
- Several Jam-Sync modes with and without user bit transfer
- Adjustable LTC output level to +12dBm
- Keypad lock-out prevents unauthorized tampering

**ECM-4010 . . . . . \$4995.00**

**ECM-4010**

**3700D**

**4900**

## 3700D Edit Code Master

- Longitudinal time code generator and full speed reader (over 2000:1 speed ratio)
- Video character generator with high resolution characters and alphanumeric user bit decoding is standard
- Separate generator and reader displays are particularly useful in Jam-Sync modes and when operating reader and generator independently
- High flexible Jam-Sync modes allow transfer of reader time and user bits into the generator in a variety of configurations
- Full alphanumeric user bit functions can be used to record tape index, captions, source identification or other data along with the time code
- RS-232C serial port permits interfacing to remote control panels, computers, editors, etc.
- Multiplexed parallel BCD output of reader time and user bits
- An aural alarm signals genlock problems. This can be disabled if, for example, the generator is locked to a VTR rather than house Sync or PGM video

**3700D . . . . . \$3650.00**

## 3600D Edit Code Generator/Reader

- SMPTE/EBU edit code generator, a full speed reader and a video character inserter in a slim one rack unit package
- True dual standard, NTSC and PAL. Generates time code in accordance with SMPTE RS-170 or RS-170A, or EBU 4 or 8 field standards (4 switch selectable modes), locked to the PGM video source
- Front panel format switches, no need to disassemble whenever certain system parameters need to be changed, e.g. field 1 or 2 update of VCG, color framing, drop frame, etc.
- Reads time code from 1/30X to 70X play speed
- High resolution character generator in two character sizes, full screen positionable, keys time and user bits into the picture
- Momentary and continuous Jam-Sync modes. In Cont Jam, good code is automatically substituted when synchronizing to poorly recorded or disrupted code

**3600D . . . . . \$3150.00**

## 4900 Edit Code Reader/VCG/Translator

- Capable of hesitation-free time code display from 70X down to 1/30X play speed
- VITC option all the way down to still frame
- Full speed range LTC reader
- Optional VITC decoder module
- Easily accessible formatting DIP switches
- High resolution character inserter; 2 sizes
- VITC source ID decoder
- Byte-wide parallel data output for easy editor inter-

face • Play speed LTC translator output incorporating a soft-lock feature provides continuous time code at all reading speeds from still frame to maximum wind
- LTC code phase corrector/regenerator for dubbing

**4900 . . . . . \$1995.00**  
**49V VITC Reader Module for 4900 . . . . . 300.00**

## 800 Portable SMPTE Time Code Generator

- Generates time code in 30, drop frame and 25 fps
- Video Sync lock, code error, battery low indicators
- High intensity LED display with blanking capability
- Built-in play speed reader with Jam-Sync
- Generator hold and reader hold functions
- Long battery life
- Large, easy to read keypad
- Full user bit capability, including hexadecimals
- Generator preset function
- Automatic start/stop function for generator

**800 . . . . . \$1300.00**

## TCR-500 Time Code Reader/Character Inserter

- Provides low cost solution to the recovery and video display of SMPTE time code
- High resolution character keyer which inserts the time code display into the active video picture
- Perfect choice for off-line or field time code reading and "burn-ins"
- Characters displayed are 16 scan lines per field in height. External controls for complete horizontal and vertical positioning of display, and character level. User selectable display of time code, user bits, or both. Characters may be white with black border or vice versa. Drop-frame, non-drop-frame, and reading error indicated in display
- Two isolated video outputs containing video input with or without character display. The outputs are source terminated into 75 ohms and provide unity gain from the video input
- Composite video 2V p-p (not terminated). Looping input via BNC connectors
- Balanced or unbalanced input of SMPTE time code at a signal level from -30 to +40dBm, at tape speeds of 0.1X to 10X play (tape machine dependent). XLR connector

**TCR-500 . . . . . \$995.00**

# POST PRODUCTION MANAGEMENT SYSTEM

## Transform-1 Post Production Management System

- The ability to use conventional videotape editing controllers for electronic film post production
- A complete production logging system that allows both data and pictures to be stored for all original material
- The power to accurately conform video edit decision lists to lists suitable for the assembly of the final release media i.e. conform to film, videotape, digital, audio, etc.
- A central edit decision list database with full list management and multi-user capabilities
- The ability to accept and generate video edit lists in all industry formats

Transform-1 is a computerized post production management system designed to integrate all film and videotape editing functions within a facility.

A key element is its ability to work within existing industry equipment. No specialized support hardware of any kind is required to adapt the system to existing facilities.

### Multi-User Capabilities

The addition of two remote terminals allows simultaneous, independent access to the system by three users. A single main computer can integrate into three separate logging/editing workstations within a post production facility. Each workstation can be interfaced with total independence to existing hardware.

### Production Logging System

The system provides a logical means of storing all pertinent information relating to any number of productions. Random access to all data simplifies information retrieval and speeds the overall production process.

The transfer logging functions allow the user to record detailed information describing the relationship between each reel of film and the corresponding videotape. This allows the system to accurately conform video edit decision lists to film cut lists. The logging system also provides for the transfer of all original dialogue including wild and post sync sound, and can accommodate the conforming of dialogue on other audio post production media, such as digital audio.

The duplication logging function allows information for both the master and working copy tape reels to be stored. This allows the system to make the necessary changes in off-line edit lists when they are used for auto assembly of the original master tape reels.

The descriptive logging function allows information to be stored for each take shot in a particular production. All pertinent information such as tape reel, scene, slate, original camera and sound rolls as well as the time code location of the particular take area stored in the log. The system also provides a field for storing notes regarding the content of the take.

### Electronic Story Board

Provides the ability to store a single black and white image for each slate or camera setup shot for a production. The stored images may be recalled to provide the editor with a quick visual representation of the material to be edited. In a simple recall mode, it can display 16 images simultaneously on a monitor.

The images may also be recalled and interactively re-arranged on screen to establish a visual sequencing of an edited segment. Thus, the user is able to create an electronic "story-board" of a segment prior to editing.

The System provides the ability to accurately conform video edit decision lists to lists suitable for assembly of the final release media. Individually conformed lists for both picture and sound may be created by the system. The production log serves as the basis for referencing each edit decision to original source material.

For film releases, the System generates cut lists for both picture and sound for direct use by an assistant or negative cutter. The system completely accounts for the 3:2 relationship as it conforms time coded video edit lists to foot/frame cut lists. Extensive error checking is performed on all cut lists to identify possible assembly problems such as missing material, holes, overlaps, as well as re-used picture and sound.

If the production is to be released on tape, the System can provide CMX compatible lists optimized for on-line auto assembly.

Using the duplication and descriptive log information the system makes any necessary changes in the off-line edit lists while checking for on-line assembly errors such as video holes and "B-roll" requirements. It provides the ability to generate an audio conform list enabling the dialogue to be rebuilt from original audio material. This list will provide a synchronous dialogue track for either tape or film releases.

## Specifications

### Main Computer:

Intel 80286 processor, 4M byte internal memory

### Operating Environment:

Xenix System V

### Storage Media:

5 1/4" Floppy Disk Drive, 1.2M byte capacity

5 1/4" Winchester Disk Drive, 60M byte capacity

### I/O Connections

#### Console Monitor

Output: 9-pin "D" type

#### Console Keyboard

Input: 5-pin DIN connector

#### Printer Output:

25-pin "D" connector, Centronix type interface

#### Terminal/Editor

Serial Ports: 25-pin "D" connector, 4 standard

#### Logging VTR

##### Video Input:

9-pin "D" type, 1V p-p 75 ohm switch selectable

#### Picture/VTR

##### Video Output:

9-pin "D" type, 1V p-p 75 ohm impedance

#### SMPTE/EBU:

RCA connector, unbalanced

#### Time Code Input:

-12dBm to +6dBm

#### Drive Expansion

##### Interface:

50-pin ribbon connector

# TERMINAL EQUIPMENT

## 610 System Controller

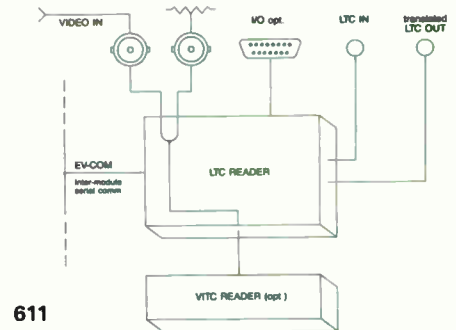

All communications within the EV-BLOC system are supervised by a system controller. The function of the system controller is to establish the location and type of each module installed in the system, and to schedule the use of the EV-COM bus by other modules. The 610 System Controller module is specifically designed to perform this task and provide a gateway to the EV-BLOC system. The standard RS-232C serial port allows an external computer or computer based editor to control and monitor the status of any of the 610 Series modules installed in the system. Fitting the 422 option changes the serial port to a SMPTE/EBU compatible RS-422 configuration.

610

## 611 Time Code Reader/Translator

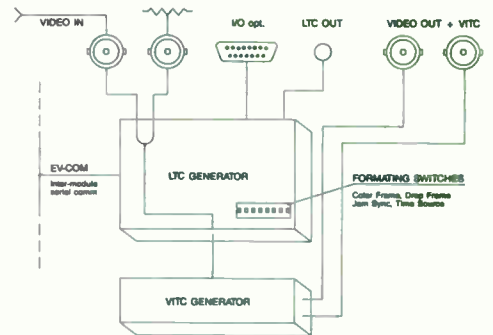

- VITC/LTC Reader. Reads longitudinal time code from 1/30<sup>th</sup> play speed to 70 times providing time and user bits out as multiplexed parallel BCD (with BCD option fitted) or as serial ASCII (with 232 option fitted). Custom interfaces are available for other OEM applications
- LTC Jam-Sync Generator. Regenerates and re-synchronizes LTC code to eliminate edit aborts due to mis-phased or unreadable time code
- VITC/LTC to LTC Translator. Permits LTC only editing equipment to read both codes providing frame accuracy at all tape speeds

611

## 612 Time Code Generator

- VITC/LTC Generator. 4/8 field color framed, free running or jam-synced to data from a 611 Reader module. When jam-synced to the record VTR reader in VITC only editing, continually ascending code is inserted on the edit master as edits are assembled. VITC coded workprints can be prepared for frame accurate edit decisions without a character burn-in
- Multi-Source VITC Keyer. Any number of isolated video sources may be encoded with identical VITC using multiple 612 Generator modules

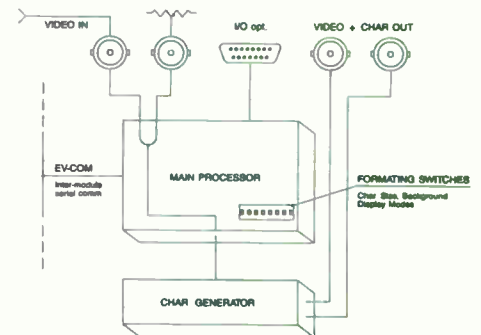

612

## 613 Video Character Generator

- Off-Line Editing. Inserts time/user bit character data from another 610 series module into program video for burning time code into workprints. Frame accurate edit decisions can also be made directly from VITC without the need of a window dub
- Video Typewriter. Used in conjunction with a computer or keyboard, the 613 module is a low cost alphanumeric character generator for preparing tape indexes, slate boards, etc.

Each module requires a companion I/O module as outlined below:

- For 610 — 605 Serial I/O Module
- For 611 — 604 Parallel I/O Module
- 605 Serial I/O Module when 232 option fitted
- For 612 — 603 Parallel I/O Module
- & 613 — 605 Serial I/O Module when 232 option fitted

613

FAX: (603) 880-8781

# TERMINAL EQUIPMENT

## 620 VITC/VITS Deleter

## 621 VITC Generator/Translator

## 622 VITC Reader/Translator

Powerful VITC/LTC translator modules. Source identification and remote control via video signals.

The 620 series modules are basically stand-alone units, i.e. no provisions are made for direct data transfer between modules, except via external code or video connections. For more complex systems 610 series modules should be used. Their "EV-COM" communications bus permits direct command/data interchange with other modules within a frame.

## 620 VITC/VITS Deleter

This is a general purpose vertical interval signal deleter. A high quality programmable video keyer substitutes black level for any type of code or test signal present on lines 10 to 21 (6 to 22 for PAL) of the vertical blanking interval. A group of DIP switches is used to select any line or group of lines. Color burst is not affected.

## EV-BLOC RACK FRAME COMPONENTS

### Backplane Assembly #601

The Backplane circuit board has been developed specifically to meet our design goal of maximum flexibility on the system level with reliability and performance on the module level. Circuit conductors for data, video and audio signal transfers, from each circuit block to its associated I/O module, have been carefully laid out to eliminate any chance of cross-talk between program video and high frequency microprocessor signals.

The assembly comes complete with 21 64-pin euro-card connectors (DIN 41612), one for the power supply regulator module, and 10 pairs for the EV-BLOC modules and their companion I/O modules.

## 621 VITC Generator

- VITC Generator: 4/8 field color framed, resettable to 00:00:00:00 or jam-synced to longitudinal time code (LTR option) with error bypass (a terrific LTC to VITC translator; teach your editor VITC)
- Multi-source VITC Keyer: Any number of 621's can be synchronized to a common time code generator to accommodate isolated video sources. User bits may be transferred from the common generator or preset locally, using easily accessible DIP switches. This provides an added benefit
- Source Identification: The user bits in each module can be encoded to uniquely identify its video source. The time code bits can be set to zero, for cameras etc., or jam-synced to time-coded sources such as VTR's
- Remote Machine Control: Six control inputs can be utilized to control VTR's etc. via the program video path

## 622 VITC Reader

- VITC Reader. Reads vertical interval time code from about 20 times play speed down to still frame, providing time and user data out as LTC and multiplexed parallel BCD. An optional video inserter (VCG) keys the data into the picture
- VITC to LTC translator for use with LTC only editing equipment or readers
- Source ID Decoder. User bits encoded with a special code from an EV-BLOC 621 module or Model 4000 are displayed as unique source identification e.g. CAM 3, TC 1, VTR 5 etc., using the optional VCG
- Remote Machine Control. Six grounding output switches respond to specific user bit codes from a 621 encoder to remotely control a variety of devices via the program video path or off tape. Just think of the application potential

620

## Power Supply Regulator #602

## Power Transformer #6025

The power supply consists of two separate assemblies.

The plug-in regulator module provides regulated +5V for micro-processor and logic circuits, and ±8V for signal processing elements.

The power transformer module contains all line/mains voltage circuits enclosed in a heavy duty stainless steel shielding case. Appropriate RFI protection is provided by LC filters.

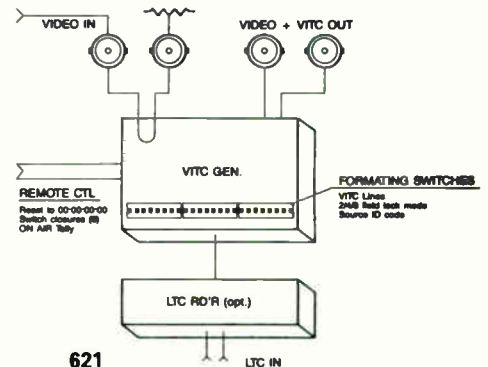

The power supply provides enough DC current to handle a full complement of 10 EV-BLOC modules. Except for special custom applications, the two units are generally supplied together.

Options currently available are:

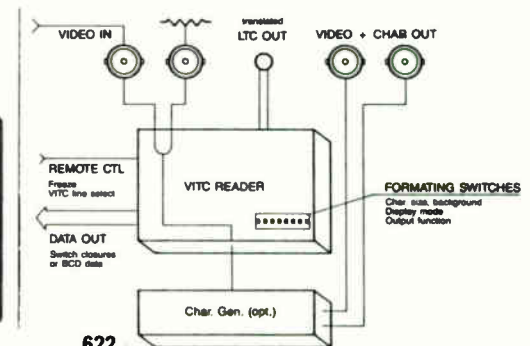

for Model 621: — LTR Longitudinal timecode reader

for Model 622: — VCG Video character generator

Each EV-BLOC module in this series requires I/O module #603

621

# CHARACTER GENERATOR/ TEST EQUIPMENT/ CLOCKS/TIMERS

## VCG-1260 Character Generator

The VCG-1260, designed primarily to display time information in video, has limited text and logo capabilities too. It decodes DQS-B6 or SMPTE/EBU time code from your master clock system and displays the time or user bit information. In addition, a built-in elapsed time counter with 0.01 sec resolution and a remote START/STOP control may be used for timing sporting events, etc.

The VCG-1260 may be used as a low cost alphanumeric generator using the optional serial. ACSII port. Limited custom logo capabilities are optionally available.

Eight front panel keys allow user selection of 4 character sizes; horizontal and vertical positioning, inverse video, input code, and display formats to suit individual applications. The configuration parameters are stored in non-volatile memory, eliminating the need to reprogram the setup after a power failure.

A broadcast quality keyer and high resolution characters combine to give a high quality presentation for on-air use. A separate preview output is provided for setup to preserve the integrity of the program output on air.

VCG-1260 Video character generator including video keyer to convert master clock and SMPTE inputs to video output. Sports timer function with remote control stop/start facility — internal clock system, H-V positioning, inverse, video-preview output. Optional serial ASCII input for alphanumeric display information and tape leader generator function.

VCG-1260 .....\$2480.00

## PT-26 Production Timer

The PT-26 Production Timer is a very versatile and easy to use production tool. Two independent timers with separate displays allow up-counting, down counting with automated count reverse at 00:00, totalizing program segments, real time use in 24 hour format, etc. Timer A may be used as a 24 hour real time clock and gives a DQS-B6 serial code output to drive many Evertz accessories such as remote displays, video character generators, serial-to-parallel decoders, etc. A programmable transistor switch output is available on each timer and will operate in either the up or down mode. A front panel slide switch permits the two timers to operate with seconds in sync.

Data entry follows calculator format for ease of operation. Separate function keys for each timer control UP/DOWN, SET/RESET and START/STOP. Each timer is provided with an external input for remote control using a single pushbutton for stop, start or reset.

A quartz crystal timebase provides an accuracy of approximately 1 sec per week. Power is supplied from a separate 9-14V, 300mA DC line adaptor. The unit is packaged in an attractive, lightweight enclosure.

PT-26 Deluxe production timer features two event count up, count down, real time and two displays, time calculator function .....\$890.00

## Remote Time Displays

A variety of remote time displays is available, all operating off our well established DQS-B6 serial time code. The code can be distributed over large areas using a twisted or shielded pair cable. In addition, a simulated analog display, 1275A, also reads SMPTE/EBU edit code.

VCG-1260

PT-26

1272

1275A

## 1272 Remote Time Display

1272 is a bright 6 digit time display with 1" high characters readable to over 40'. Desk or wall mountable

1272 .....\$295.00

## 1275A Time Display

1275A has 60 LEDs mounted in a circular arrangement, simulating an analog second hand. In addition, the hours, minutes and seconds are displayed in digital format. The unit reads DQS-B6 or SMPTE/EBU time code or may be used as a totally self contained 12 or 24 hour clock. A dip switch allows user selection of 8 different operating and display modes. Beautifully finished with wood trim, ideally suited for studio, lobby, board room, etc.

## 2/3" AND 1" LENSES

40 x 9.5

40 x 14

### LENSES FOR 2/3" AND 1" CAMERAS

#### Zoom 40x Lenses — Microprocessor Controlled

This lens is incredibly small, very lightweight 43 lbs. (19.5 kg), yet it has a remarkably fast relative maximum aperture. The limitations of minimum object distance no longer exist because of microprocessor control, focusing is now possible at any distance.

The 40x is a lens with high transmission, minimum iris ramping, superior MTF (Modulation Transfer Function) and reduced chromatic aberrations.

The 40x is a multipurpose lens, it will cover all the angles from a wide 49.75° to a tight 1.33° and more, with the standard 2.1x extender and optional 1.45x extender.

Advanced three lamp diascope, a modular PC board layout, circuit breakers, ribbon cable wiring, interchangeable servo modules and a heater are standard. Even the operational ease has been taken into account with external LED readouts for zoom position, iris position, and extender/diascope position.

Also adding to the operational ease of the 40x are an easily accessible electronic back focus adjustment with a lock, a manual back focus adjustment and manual overrides for the iris and the extender/diascope turret.

# BATTERIES

## Snap-On® NiCad Batteries

Snap-On batteries feature • Quick change design for instant camera mounting without cables or connectors • Premium fast charge cells and exclusive all-cell sensing • Batteries are individually computer tested and shipped with a print-out • Accessories are available for mounting Snap-On batteries on belts, VTRs, monitors, and other portable equipment.

**PRO PAC® 14 4AH, 14.4 Volt Snap-On NiCad Battery.** Fast or slow charge. 4-3/4 lbs. Typical run time: 2 hours at 25 watts, 3 hours at 18 watts, 4 hours at 13 watts. . . . . **\$525.00**

**PRO PAC® 13 4AH, 13.2 Volt Snap-On NiCad Battery.** Fast or slow charge. 4-1/4 lbs. Typical run time: 2 hours at 24 watts, 3 hours at 16 watts, 4 hours at 12 watts . . . . . **\$505.00**

**TRIM PAC® 2AH, 12 Volt, Compact Snap-On NiCad Battery.** Fast or slow charge. 2-1/2 lbs. Recommended for applications drawing under 15 watts. Typical run time: 1-1/2 hours at 12 watts. . . . **\$250.00**

**Recommended Battery Applications:** The Pro Pac 13 is a universal battery that will power virtually all ENG/EFP cameras, VTRs, and monitors. However, the Pro Pac 14 will yield superior performance and capacity on those cameras that can accept the higher voltage.

Pro Pac 14/Com Pac 14	Pro Pac 13	Trim Pac
Ikegami	Panasonic	JVC KY-1900
RCA	Bosch	Sony BVP-110
Sharp	Hitachi	
Thomson	Ampex	
Philips	JVC	
	Sony	
	NEC	

## PRO PAC® 90 Professional VTR Battery

The Pro Pac 90 is a premium professional version of the Sony BP-90 type VTR battery. Unique features include: • Special fast charge premium cells • Printed circuit board design instead of wiring • Individual cell sensing system • Low temperature protection circuit • Special Triconn® 3-conductor connector (eliminates need for separate fast charge cable) • Accessible fuse with spare fuse • Heavy duty molded housing and steel reinforced molded strain relief on cable • Can be charged directly with all Lifesaver Chargers • Can also be charged with other brand conventional chargers but without benefit of the individual cell sensing protection system.

**PRO PAC 90. 4AH, 12 Volt NiCad VTR Battery.** Fast or slow charge. 3-1/2 lbs. Typical run time: More than 3 hours at 14 watts. . . . **\$330.00**

**T-SO-90. PRO PAC 90 to Snap-On Adaptor.** Allows Pro Pac 90 to fit any Anton/Bauer Snap-On Bracket; i.e., for on camera mounting or for wearing on a belt with UniPac holder. Adapts Pro Pac 90 to charge on the Mobile Fast Charger . . . . . **\$195.00**

**NP-1A. High Capacity (1.7AH) 12 Volt NiCad VTR/Camera Battery.** Direct replacement for NP-1 type battery applications. Can be charged with any NP-1/NP-1A charger. Typical run time one hour at 18 watts . . . . . **\$85.00**

**Power Strap** A multi-purpose battery strap designed for use with all portable video recorders and low voltage portable lighting equipment • Can be worn as a belt for lighting applications • At 12V, 4AH, the Power Strap will continuously run a VO-6800 recorder for 3 hours or power a 25W UltraLight bulb for 2 hours • User accessible 8A circuit breaker • Made of 1000 Denier Cordura • Supplied with a nylon strap for belt mounting and a 14-16 hour overnight charger • Can be fast or quick charged with any Anton/Bauer Lifesaver® charger with the optional CA-30 charge cable • Accessory cables are available for most DC power requirements . . . . . **\$495.00**

PRO PAC 90

30/13 BATTERY BELT

POWER STRAP

DBH. DUAL BATTERY HOLDER

PRO PAC 13/14

PPSA-D. PERPETUAL POWER BELT

**CC-68 Cable.** VTR coiled cable with right angle connector to power most popular recorders. 4-pin DC input . . . . . **\$70.00**

## Universal NiCad Battery Belts/Holders

The ultimate battery belt. Powers virtually all portable equipment, including 30 volt lights, all 13V cameras and VTRs, and UltraLight Modular Lighting System. Unique construction features include: • Leather belt • Lexan® battery modules • Quick release military buckle • Anatomical design • Can be worn around the waist, over the shoulder or bandolero style • 30 volts, 4AH or 13.2 volts, 8AH switchable • Built-in 115/230 volt overnight charger • Voltage display • Charge indicator • Input and output circuit breakers • Multiple charge sensors • In low voltage lighting applications 80 watt maximum total light output (one or two bulbs).

**30/13 Battery Belt.** • 30 Volt, 4AH or 13.2 volt, 8AH switchable • Built-in 115/230 volt overnight charger • One hour fast charged • 10 Amp circuit breaker • Waist size: 32" to 48" adjustable . . . . . **\$865.00**

**CA-30. Fast Charge Cable.** Connects 30/13 belt to Lifesaver 1 Hour Fast Charger (LSFC) . . . . . **\$56.00**

**PPSA-D. Perpetual Power Belt-Automatic.** • Accepts two Snap-On batteries of any type • When first battery is depleted, the belt automatically draws from the second • First battery may be replaced and the process repeated providing uninterrupted power • Leather belt • Quick release aircraft buckle • Lexan® control module with voltage display • Circuit breaker • 2 Output connectors for powering a camera and a VTR simultaneously . . . . . **\$335.00**

**DBH. Dual Battery Holder.** • Accepts a pair of either 2 Pro Pac 13 or Pro Pac 14 Snap-On NiCad batteries • Provides 8AH of continuous power to run a typical camera 4 hours • Control module monitors battery capacity and switches automatically to the second battery when the first is depleted • First battery may be replaced and the process repeated, providing uninterrupted power • Low-battery warning LED • 5 Amp circuit breaker • Universal 5-pin XLR output • Size: 5-1/2" x 3" x 6". Wgt. 1-1/2 lbs. . . . . **\$265.00**

# BATTERY SYSTEM/CHARGERS

## Silver Battery System

• Silver Zinc batteries will operate equipment approximately three times longer than NiCad batteries of equivalent size and weight. In many cases the SV-13 Silver Battery will operate a camera for an entire day • Fully compatible with Anton/Bauer Snap-On accessories and Snap-On mounts, and will power all video cameras and VTRs • Not recommended for lighting applications • Silver batteries can only be charged with the Anton/Bauer SVDC-13 Silver Battery Charger

**SV-13. 12AH, 13.5V Snap-On Silver Battery.** • Expected life: 80-100 charge/discharge cycles (one year maximum) • Typical run time: 6 hours at 25W • Wgt. 4 1/2 lbs. • Individually computer tested and packaged with computer printout. . . . . \$1985.00

**SVDC-13 Digital Control Silver Charger.** • Charges two SV-13 Silver Batteries simultaneously and independently • Overnight or 6 hour charge rate, selectable • Dual protection circuits • Charge rate indicators and green ready lights • Size: 8 1/2" x 5 1/2" x 10 1/2" • Wgt. 14 1/2 lbs. • 115/230V, 50/60Hz . . . . . \$1985.00

**SVSC. Silver System Shipping/Carrying Case.** • Heavy-duty case features custom foam interior that holds one SVDC-13 Charger and two SV-13 Silver Batteries • Rugged hardware and an outer shell of high density polyethylene fully protects battery charger during shipment • Size: 18" x 11" x 16 1/2" . . . . . \$295.00

## Lifesaver® NiCad Chargers

The first 100% safe charging systems. Lifesaver circuit safely maintains fully charged battery indefinitely. All Lifesaver chargers feature • 3 automatic charge rates • Logic controlled charge monitor circuit • Battery coupled cell sensing system with hot and cold temperature protection • Integral Anton/Bauer Snap-On bracket directly accepts Snap-On type batteries • Special Triconn 3-conductor connector accepts Pro Pac 90 and other BP-90 type VTR batteries

**LSFC. Lifesaver Fast Charger.** • Single position, one hour charger • Accepts all Anton/Bauer 4AH Snap-On, Pro Pac 90, NiCad batteries • And all Anton/Bauer battery belts • Size: 7 1/2" x 6 1/4" x 4" • Wgt. 4.4 lbs. • 115/230V, 50/60Hz . . . . . \$565.00

**LSQC. Lifesaver 8 Hour Single.** • Single position, 8 hour quick charger • Accepts all Anton/Bauer 4AH Snap-On, Pro Pac 90, and Pro Pac 60 NiCad batteries • Charges other brand BP-90 type batteries at the overnight rate • Size: 6 1/2" x 4 1/8" x 3 5/8" • Wgt. 5.5 lbs. • 115/230V, 50/60Hz . . . . . \$365.00

**LSQ4. Lifesaver 8 Hour Quad.** • Four position 8 hour quick charger • Independent charge circuits and LED indicators for each position • Accepts any combination of Anton/Bauer 4AH Snap-On, Pro Pac 90 and Pro Pac 60 NiCad batteries • Charges other brand BP-90 type batteries at overnight rate • Size: 10 1/4" x 3 5/8" x 7" • Wgt. 5 lbs. • 115/230V, 50/60Hz . . . . . \$995.00

**MP-8 Lifesaver 8 Position** • Automatically identifies any combination of battery • Equalizing routine restores batteries to full capacity • Red and green LED's for each position • 24 character two line LCD provides detailed charge information for each battery . . . . . \$2985.00

## Special Purpose Charger

**MFC. Mobile Fast Charger.** • Single position universal one hour fast or 16 hour, overnight charger • Operates from most vehicles with or without engine running • Accepts all Anton/Bauer Snap-On NiCad batteries and Pro Pac 90 batteries using TSO-90 XLR adaptor • Protection circuit that disconnects charger if vehicle voltage becomes too low • Operates on 10-15VDC input • Size: 6" x 7 1/2" x 3 1/2" • Wgt. 2 3/4 lbs. . . . . \$565.00

## Micro Chargers

Micro Chargers are designed for travel or as back up chargers and are not recommended as a primary charge system. Prolonged use of Micro Chargers may contribute to premature battery aging.

Silver System Batteries and Charger

Lifesaver Fast Charger

SVSC Shipping Case (shown with Silver System)

Mobile Fast Charger

Lifesaver 8 Hour Quad Charging the Pro Pac 13 and 14, and two Pro Pac 90 batteries

MP-8

**MC-14. Micro Charger 14 Volts.** Miniature wall mount overnight (16-18 hours) charger for Pro Pac 14. Must not be used with 13V or 12V batteries. For 115VAC only. . . . . \$85.00

**MC-13. Micro Charger 13 Volts.** Miniature wall mount overnight (16-18 hours) charger for Pro Pac 13. Must not be used with 14V or 12V batteries. For 115VAC only. . . . . \$85.00

**TPMC-12. Trim Pac Micro Charger.** Compact overnight charger for 12V Trim Pac battery. Full charge in 16-18 hours. For 115VAC only. . . \$85.00

**U-12MC. Micro Charger 12 Volts.** Miniature wall mount overnight (16-18 hours) charger for the Power Strap. Must not be used with 14V or 13V batteries. For 115VAC only . . . . . \$85.00

**CPMC-14. ComPac Micro Charger 14 Volts.** Miniature wall mount overnight (16-18 hours) charger for the ComPac 14 battery only. Not to be used with any other battery types. For 115VAC only . . . . . \$85.00

# ACCESSORIES/ POWER SUPPLIES

## Snap-On Accessories

Snap-On accessories will accept both Anton/Bauer Snap-On NiCad and Silver batteries except as noted.

**UP. UniPac Single Snap-On Battery Holder.** • Accepts any Anton/Bauer Snap-On battery • Includes loops (for any size pants belt) • Integral power cable with female XLR-4 DC input connector • Cameras and VTRs not equipped with an XLR-4 DC input require SO/XLR adaptor . . . . . \$130.00

**UL-UP. UltraLight® UniPac.** • As above with XLR-2 DC input connector for new UltraLight system • NiCad only . . . . . \$130.00

**SO/XLR. Snap-On Bracket to XLR-4 Adaptor.** • Fits any Anton/Bauer Snap-On Bracket • Provides universal 4-pin male XLR DC input connection to any camera or other device with an Anton/Bauer Snap-On bracket . . . . . \$95.00

**ULPA. Light Tap™ Power Adaptor.** • Allows camera battery to power UltraLights, and camera simultaneously • Maximum 85W total light output (one or two bulbs) • Accepts 12-14V Snap-On NiCad batteries • Operates 12-14V bulbs. NiCad only . . . . . \$130.00

**PSXLR5. Snap-On Battery to XLR-5 Adaptor.** • Compact adaptor snaps onto any Anton/Bauer Snap-On battery or power supply converting it to a 5-pin XLR female power output connector . . . . . \$95.00

**TSO-9Q. Pro Pac 90 to Snap-On Adaptor.** • Allows Pro Pac 90 to fit any Anton/Bauer Snap-On bracket; i.e., for on camera mounting or for wearing on a belt with UniPac holder • Will not accept other brand BP-90s . . . . . \$195.00

**PPSA-D. Perpetual Power Belt-Automatic.** • Accepts two Snap-On batteries of any type . . . . . \$335.00

## Snap-On® Quick Release Brackets

**QRX. Universal Snap-On Quick Release Bracket.** • This is the basic Anton/Bauer Snap-On bracket that is the standard of the video industry and included as standard equipment with virtually all ENG cameras. Includes: • Electrical contacts, internal wire connections • 4 mounting screws (6x32) • Designed to be installed on any portable device allowing use of any Anton/Bauer Snap-On battery • Bracket measures 4 11/16" x 3 5/8" . . . . . \$75.00

**QRX-C. Universal Snap-On Compact Bracket.** • Designed for the new smaller cameras • Fully compatible with all Snap-On products • Includes electrical contacts • Internal wire connectors and 4 mounting screws (6x32) • Bracket measures 4 11/16" x 3" . . . . . \$75.00

**QR-BVP-3. Snap-On Quick Release Bracket.** • With integral power connector and plate for custom mounting on Thomson 601/701 and Sony BVP-300 Series cameras • No camera modifications required . . \$95.00

**QR-BVP-1. Snap-On Quick Release Bracket.** • With integral power connector and plate for custom mounting on Sony BVP-110 • No camera modifications required . . . . . \$95.00

**QR-DXC-M3. Snap-On Quick Release Bracket.** • As above, but for Sony DXC-M3 camera • Built-in circuit operates low battery level indicator in viewer . . . . . \$130.00

**QR-DXC-M3A. Snap-On Quick Release Bracket.** • With integral power connector and plate for custom mounting on Sony DXC-M3A, DXC-M2, BVP-150 and BVP-3 (with CA-3/CA-30 adaptor) cameras • No camera modifications required . . . . . \$95.00

**QR-DX-3000. Snap-On Quick Release Bracket.** • For custom mounting on the rear of the Sony DXC-3000 camera • With integral power connector . . . . . \$120.00

**QR-777. Snap-On Quick Release Bracket.** • With integral power connector for custom mounting on the rear of Panasonic 777, 888, or 555 camera • No camera modifications required. (Same as Panasonic WV-PS355 bracket) . . . . . \$130.00

**QR-76BC. Snap-On Quick Release Bracket** • With integral power connector and special plate for custom mounting on the rear of RCA TK 76B and C cameras • No camera modifications required . . . \$165.00

**QR-BETA-3. Snap-On II Quick Release Bracket.** • With integral power connector and plate for custom mounting on Sony/Thomson Betacam camera/recorders • No camera modifications required . . . \$150.00

**QR-BETA-5. Snap-On II Quick Release Bracket.** • Features a unique dual mounting system for the Sony BVW-105 camera/recorder • Rear mount when used on tripod • Under mount for field use (Same as QR-BETA-3 Bracket) . . . . . \$165.00

**QR-BETA-1.** • As above but for BVW-1 camera . . . . . \$150.00

**QR-BETA Back Mount.** • Snap-On II Quick Release Bracket with integral power connector and plate for custom mounting on the back of Sony/Thomson Betacam camera/recorder or to power the recorder alone . . . . . \$95.00

**SP-BETA Kit. Snap-On Quick Release Bracket.** • Mounting system for the new "SP" series AMPEX and Sony cameras/recorders . . \$195.00

## Charge Adaptor Cables

**CA-30. Fast/Quick Charge Cable.** • Connects the 30/13 belt to Lifesaver Fast Charger (one hour) only • The UltraKit 12V U12VCO Clip-On battery to Lifesaver Fast Charger (one hour) • Lifesaver Quick Charger (8 hour) or Quad Charger 4 position (8 hour) • And to Mobile Fast Charger . . . . . \$55.00

**TCA-30. Tektronix Fast Charge Cable.** • Connects Tektronix BP1 battery (Waveform Monitor DC power source) to Lifesaver 1 hour Fast Charger) . . . . . \$55.00

## Power Supplies

The Anton/Bauer SPS-3 is an advanced switching-type power supply and the LPS-4 is a linear regulator with a toroidal transformer. Superior filtering techniques and design make these power supplies the coolest, most efficient and noise-free units available to the video industry. The integral Snap-On mount allows these supplies to be conveniently snapped onto the rear of any camera just like a battery pack.

**SPS-3. Advanced Switching Type 3 Amp Power Supply with Snap-On Mount.** • Output: 13V at 3A (max.) • Input: 115VAC only . . . \$495.00

**LPS-4. Linear Power Supply 4 Amp with Snap-On Mount.** • Output: 12V at 4A (max.) • Input: 115/230VAC . . . . . \$595.00

# BATTERY-OPERATED LIGHTS

## UltraLight® System

The UltraLight System provides compact, lightweight, and versatile portable lighting. UltraLights become fill, spot or flood lights according to the selection of quick-change bulbs, filters, and focus adaptors. The removable lighthead module allows bulb changes in the field without direct handling. A working system requires one or more of the power cables/adaptors listed below as well as a bulb of corresponding voltage.

**ULS. UltraLight Single.** • Single base and head module with single power input • Includes one (1) BAB 25 watt bulb .....\$195.00

**ULD. UltraLight Dual.** • Dual base with two head modules • Two switches and single power input • Includes two (2) BAB 25 watt bulbs. Bulb voltages must be matched • Total power draw not to exceed 100 watts .....\$350.00

**UL-HM UltraLight Head Module.** • Extra quick-change rugged aluminum module to house alternate or spare bulbs .....\$ 75.00

## UltraKit® Complete 12 Volt Lighting Kit

- UltraLight Single
- UltraLight Dual

**Kits include the following:**

• 12 Volt Power Strap NiCad fast charge battery pack with integral belt loop and detachable ULC-L power cable • Wall-type Micro Charger • One (Single UltraKit) or two (Dual UltraKit) 12 Volt BAB 25W flood bulb • Heavy duty shipping case with custom fit foam interior (extra spaces allowed for accessories).

Filters, spare head modules, and power adaptors/cables may be purchased separately if required. Lifesaver fast charge (LSFC) with the optional CA-30 charge cable adaptor.

Single .....\$595.00  
Dual .....750.00

## Power Adaptors

**ULPA. UltraLight Light Tap Power Adaptor.** • Allows camera battery to power UltraLight(s) and camera simultaneously • Maximum 85 watts total light output (one or two bulbs) • NiCad only. ....\$130.00

**ULAC. UltraLight AC Power Supply.** • Compact AC power supply allows use of low voltage bulbs (12-14V) where AC power is available • Maximum 90 watts of light output (one or two bulbs) • 115/230V, 50/60Hz, 12-14VAC for lighting applications only • (Requires ULC-LAC cable) .....\$265.00

**UL-UP. UltraLight UniPac.** • Compact Anton/Bauer Snap-On bracket with integral belt loops and 5 foot cable with XLR-2 DC input connector • Maximum 85 watts total light output (one or two bulbs) • NiCad only .....\$130.00

## Adaptors/Filters

**UL-WA. UltraLight Wide Angle Adaptor.** • Optical device that provides a smooth, even pattern that will cover the widest angle zoom lenses • Can also be used with flood bulbs to smooth out uneven bulb patterns .....\$45.00

**UL-DF. UltraLight #1 Diffuser.** • For use with spot bulbs • Lowers light output by one "F" stop (50%) while softening the edges of the beam pattern .....\$45.00

**UL-DC. UltraLight Dichroic Filter.** • Converts output of all bulbs to match 6000°K daylight • Must be used when using UltraLight for daylight fill or cool white fluorescent fill. ....\$98.00

UltraLight Single with UL-WA Focus Adaptor

ULTRALIGHT DUAL

ULTRAKIT

ULPA Power Adaptor allows battery to power UltraLight and camera simultaneously.

UltraLight head module with Adaptors and Filters.

ULAC

## Brackets

These brackets are used for quick mounting the UltraLight on all popular cameras. The UltraLight can be mounted to any 5/8" stud mount or light stand in either a horizontal or vertical position (facing down).

**BR STUD 1/4.** For all cameras with 1/4-20 threaded accessory hole. ....\$45.00

**BR STUD 3/8.** For all cameras with 3/8-16 threaded accessory hole. ....\$45.00

**BR SHOE.** For all cameras with microphone/accessory shoe. ....\$45.00

**BR UNIV.** Universal mount that clamps onto the handle of virtually any camera .....\$45.00

**BR U2.** Similar to BR UNIV but permits mounting of two UltraLight Singles or one stud may be replaced by a microphone holder to allow operation of UltraLight Single or Dual with a microphone. ....\$65.00

**UL-HH.** UltraLight handle with 5/8" stud for off camera hand-held applications .....\$45.00

## Cables

**ULC-L.** 5 Foot cable for 12-14 volt application. 5 pin male to 2 pin XLR female .....\$56.00

**ULC-30.** 5 Foot cable for 30 volt applications. 2 pin male to 2 pin XLR female .....\$56.00

**ULC-110.** 8 Foot 110 volt cable. Wall plug to 2 pin XLR female. ....\$48.00

**ULC-LAC.** 8 Foot cable for operating UltraLight from ULAC Power Supply. 2 pin male to 2 pin XLR female .....\$56.00

**ULC-BETA.** 2 Foot cable for operating UltraLight directly from QR-BETA Brackets. Eliminates need for UltraLight Power Adaptor (ULPA). 4 pin male to 2 pin XLR female .....\$56.00

FAX: (203) 929-9935

# BULBS/PORTABLE LIGHTING/ LIGHTING KIT

## Bulbs for UltraLight

**Triple Purpose Low Voltage Bulbs** — The ESX, EYR and EYF/FPA bulbs provide three beam/output options.

1. Spot (15°)-plain bulb. 2. Medium Spot (approximates 21°)-with #1 Diffuser (UL-DF). 3. Flood (36°)-with Wide Angle Adaptor (UL-WA) this bulb covers most zoom lenses down to 9mm length (for 2/3" tube cameras).

**Dual Purpose Low Voltage Bulb** — The EXZ bulb provides two beam/output and is a good all around bulb.

Bulb	Watts	Spot	Med.	Flood	Amps	Run Time w/4AH Battery	Price
ESX	25	200	85*	30**	1 <sup>2</sup> / <sub>3</sub>	120 min.	\$28.00
EYR	50	400	170*	60**	3 <sup>3</sup> / <sub>4</sub>	60 min.	28.00
EYF/FPA	85/75	700	300*	120**	6 <sup>1</sup> / <sub>4</sub>	35 min.	28.00
EXZ	60	—	175	70**	4 <sup>1</sup> / <sub>2</sub>	45 min.	28.00
BAB	25	—	—	35	1 <sup>2</sup> / <sub>3</sub>	120 min.	28.00
EYP	50	—	—	65	3 <sup>3</sup> / <sub>4</sub>	60 min.	28.00
EYC	85	—	—	125	6 <sup>1</sup> / <sub>4</sub>	35 min.	28.00

Note: All above data measured at 14V. \*with #1 Diffuser (ULDF)

\*\*with Wide Angle Adaptor (ULWA) wattage ratings shown above are higher than those indicated by bulb manufacturer; when bulbs are used at higher voltages (13.2 or 14.4) the wattage ratings increase to those shown above.

**30V Bulbs.** While the above low voltage bulbs offer maximum versatility, the following bulbs can be used with 30V battery belt to provide excellent results in certain applications.

Bulb	Watts	Amps	Footcandles at 5'	Run Time w/4AH Battery	Price
EXS	200	6 <sup>2</sup> / <sub>3</sub>	400	35 min.	\$28.00
EKP/ENA	80 Note 1	2 <sup>1</sup> / <sub>2</sub>	140	90 min.	28.00
ENZ	50 Note 1	1 <sup>2</sup> / <sub>3</sub>	90	140 min.	28.00

Note 1: Bulbs ELB and ENZ must be used with UL-WA Wide Angle Adaptor. The beam pattern of the plain bulbs is unacceptable.

1. Medium Flood (24°)-plain bulb. 2. Full Flood (36°)-with Wide Angle Adaptor.

**Single Purpose Low Voltage Flood Only Bulbs** — The BAB, EYP, and EYC bulbs provide full flood (36°)-plain bulb.

Results of extensive testing have shown that the 25W ESX bulb used with the Wide Angle Adaptor or the plain BAB bulb provide the most pleasing lighting conditions for most indoor interviews in the typical 3' to 6' range.

UltraLight head module securely holds bulbs. Removable lighthouse module permits field changes without direct handling of bulb.

## 115/230VAC Bulbs

The UltraLight will directly accept several 115 and 230V bulbs. However, while AC powering is desired, we recommend using the Low Voltage Bulbs powered with the model ULAC 115/230 voltage AC power supply. Anton/Bauer does not offer 230V bulbs.

Bulb	Watts	Volts	Footcandles at 5'	Price
FMG	150	115	300	\$20.00

## UltraKit® 30V Light Kit

30V light kit combines either a single or dual Ultralight system with the 30/13 Battery Belt in a heavy duty shipping case with custom fit foam interior for protection. The kit includes a ULC-30 5' cable with 2 pin Amphenol male to 2 pin XLR female connectors. Single kit has one spare 30V bulb and the dual comes with 2 spare 30V bulbs.

Filters and spare head modules may be purchased separately. 30/13 Battery Belt may be charged in 1 hour with the Lifesaver Fast charger using the CA-30 cable.

Single .....\$1265.00  
Dual .....1395.00

Ultrakit

# DIAGNOSTIC EQUIPMENT/CCU/ VIDEO CABLE

## Diagnostic and Service Equipment

**DATA-TAP™ Battery Testing and Monitoring Device.** Gives the user accurate information on the constant state of discharge of their battery pack • Measures 1/2 inch thick and sandwiches between the existing Anton/Bauer Snap-On® camera bracket and Pro Pac® system battery • Equipped with a digital read-out in ampere hours • This device monitors power consumption • Weighs 12 oz.

**DATA-TAP** ..... \$345.00

**ADM (Automatic Discharge Module)** Designed to be used in conjunction with DATA-TAP to calibrate/discharge Anton/Bauer Snap-On, Pro Pac or Pro Pac 90 VTR type batteries (12-14V only), giving the user accurate information as to the battery's ampere hour capacity. Can also be used as a stand-alone to discharge NiCad or silver batteries which may not have been fully depleted during operation • The unit has a 2-position switchable automatic cut-off circuit • LED indicates when discharge is complete • Will discharge a standard 4AH battery in 2 hours • Weighs approximately 2-1/2 lbs.

**ADM** ..... \$295.00

**SCD. Silver Cell Equalizer.** This unit is designed to enhance silver cell battery life through equal discharging of the individual cells. Features: • Digital voltmeter capable of monitoring individual cell voltages • 9 LED display which indicates the discharge status of each individual cell..... \$595.00

**EXTEND.** Extender Board of Servicing SVDC-13 Silver Charger Control Boards ..... \$45.00

## Micro Control™ Compact Control Unit (CCU)

**Revolutionary portable camera control system** operates over a standard 3 wire microphone cable to more than 1000 feet and is powered by the camera battery.

Micro Control's hand-held Compact Control Unit (CCU) weighs only 1-1/3 lbs. and its companion Camera Decoder snaps onto an Anton/Bauer Snap-On battery bracket on the rear of the camera. A standard battery then snaps onto Micro Control's Camera Decoder. The system controls • Iris, Master Ped, Red Gain, Blue Gain, Red Ped, Blue Ped, On/Off control for Bars, Auto White Balance, and Auto Iris • In addition, tally/call and an intercom circuit are included • Micro Control draws only 75 milliamps from the camera battery • All control functions, power and intercom operate over a single microphone audio cable with standard 3 pin XLR connectors • Specify RTS or Clear-Com when ordering

**MC-3.** MicroControl for the Ikegami HL-79A-DAL ..... \$2995.00

**MC-3 79E.** MicroControl for the Ikegami HL-79E ..... 2995.00

**MC-3 HL95.** Micro Control for the Ikegami HL-95 ..... 2995.00

**Compact Control Unit:**  
Panel size is 6" x 4-3/8", and unit is 2-1/2" deep, weighs 1-1/3 lbs.  
**Camera Decoder:**  
5-1/3"H x 4-1/3"W x 2-1/2"D; weighs 1-1/2 lbs.

Cable may be selected from list below.

**Special Twin Cable.** Miniature, highly flexible cable consisting of one audio conductor and one coax for video output • Audio terminated with 3 pin XLR male and female • Video terminated with standard BNC connectors both ends • Cables may be linked in series for additional length with BNC adaptor.

50 feet ..... \$ 75.00  
100 feet ..... 105.00  
150 feet ..... 135.00

## CASES

### Transit Cases

Anvil® A.T.A. Cases offer the ultimate in protection. They conform to the Air Transport Association specification 300, Category 1 standards for reusable shipping containers. Anvil A.T.A. Cases must withstand the rigors of more than 100 round-trip transittings, on both surface vehicles and aircraft, to qualify for this rating.

In addition to custom-designed models for individual requirements, Anvil maintains a design library containing literally thousands of stock

case models which can be shipped as is, or modified to meet your requirements, and shipped without delay.

Case interiors are custom-designed to provide maximum shock absorption and vibration resistance. Soft, resilient unicellular polyfoam is sculptured to fit around your equipment like a glove. Quality control is assured through numerous inspections during and at the conclusion of the manufacturing process.

### A.T.A. Video Cases

We can build a strong case around any broadcast, industrial or educational video product on the market. Just give us the model number of your camera, recorder, monitor or any other component or combination—and we'll give you a case that will make sure your video components are ready to get the shot when you are, every time.

### E.I.A. Rackmount Cases

Standard 19" rackmount components can be safely and easily moved to your location—shoot ready. Anvil offers several variations on the rackmount design; front and rear removeable lids with or without shock isolation option, pull-over-lid design (case within a case design), or the popular mixer/rack arrangement providing rackmount space horizontally opposed to standard vertical rack space. Whichever way you go, Anvil has the rack case to make for the fastest setup and strike.

### A.T.A. & Forge® II Audio-Visual Cases

Want your A/V shows to come off without a hitch, time after time? Pack your gear in Anvil cases and relax. Our catalog includes models for motion, slide, strip and overhead projectors, as well as multi-image devices and dissolve units. And we've got your sound system covered too. Forge II carrying cases are now available for selected film-based items.

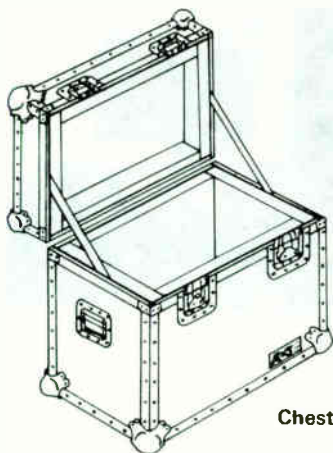

### A.T.A. & Forge® II Computer Cases

Now you can ship individual computer components, or entire mini or micro computer systems, anywhere in the world without the slightest bit of worry. Our A.T.A. Computer Case catalog contains models for hundreds of different components and system combinations. And mixing components from different hardware manufacturers is as easy as giving us the brand names and model numbers. We'll recommend the case or cases required to provide the highest degree of protection possible. And we can custom-design your cases to provide room for software and peripherals, too.

## CASES

Chest Style A

### A.T.A. —

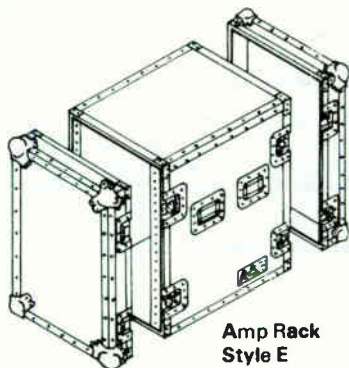

Our A.T.A. Spec. 300, Category 1 Cases are constructed using the finest materials available. To form the actual shell, we start with high grade 1/4" plywood, laminated with tough ABS plastic, fiberglass, or aluminum. Aluminum edging is secured into place using machine driven steel rivets. Heavy-duty recessed twist-latches and recessed spring loaded handles are used on all A.T.A. Cases. Other features include heavy gauge steel ball corners and edge clamps. The interior is lined with 1" polyester foam to custom fit the equipment and provide protective shock absorption. Definitely a must for excessive truck or air travel.

### Lite Flite —

Designed for the around town user, Lite Flite Cases are made with high grade 1/8" plywood laminated with ABS, fiberglass, or aluminum. Aluminum edging is secured to panels using machine driven steel rivet. High quality exterior latches and handles are used on Lite Flite Cases. As in the A.T.A. Case, the interior is 1" polyester foam lining provided for shock protection.

### Custom Cases —

Our specially trained staff of case designers are available by telephone between 9:00 and 5:00 and in person to answer any questions in regards to design or specific case requirements. Their expertise is invaluable in designing for and fulfilling your particular case needs.

# CHARACTER GENERATOR

## Aston 4 Video Character Generator

- Software anti-aliasing
- 10ns effective resolution
- Typographic excellence
- Library of over 1600 typefaces
- Fonts in any size from 10 to 100 lines
- Multi-colored logos in any size from 10 lines to full screen
- Diagonal writing
- Optional second multi-layer background
- Plane displays
- Multi-layer background plane for graphics
- Up or down roll and multi-row left or right crawl
- Timed roll or crawl
- Caption management system
- Remote disk drives
- Multiple keyboard option
- Dual channel option

The Aston 4 provides clean, clear text copy. Large and small characters are provided without flicker or stairstepping. With the optional LogoMaster, flicker free multi-colored logos and symbols can be merged to provide a smoothness which pleases the graphic designer, director and customer.

### Basic Video Character Generator Includes:

- 1 Keyboard
- 2 Disk drive units mounted in mainframe
- 5 Typeface master disks selected from Aston 4 standard typeface library
- 1 Display font disk
- 1 Page store disk
- 1 Software disk
- 1 Set of technical manuals and operating instructions

**Aston 4** . . . . . \$32,500.00  
**Aston 4 With Dual Channel Option** . . . . . 47,500.00

### Specifications

#### Characters

**High resolution:** Characters specified by 74nS x 1 TV line pixels, 8 anti-alias levels (tones) per pixel, providing an effective resolution of 10nS. (The Aston 4 pixel width of 74nS is chosen to be compatible with the sampling rate used in the international digital television standard (CCIR 601) for direct interfacing of digital component systems).

Aston 4

- Character Height:** 10 to 100 TV lines (height of capital H) in 1 line increments
- Italics:** Variable from 4 to 30° slope
- Edging:** 8 angles of variable-thickness drop shadow, and variable-thickness all-round edge
- Diagonal:** Variable in 1° steps from vertically up, through horizontal, to vertically down
- Kerning:** Automatic
- Inputs**
- Syncs:** 2 to 4V mixed syncs or standard color black, looped through via BNC connectors. Internal non-broadcast sync source provided, when external source not present
- AC Power:** Mainframe: 184V to 256V, 50Hz. Consumption 1000VA (absolute maximum rating for dual channel machine with full set of peripherals). 102V to 128V, 60Hz available to special order. Keyboard: 194V to 256V, 50Hz. Consumption 125VA (absolute maximum rating including remote disk drives). IEC Power Connectors
- Interface Connections**
- Keyboards:** Two 2Mbit/second bi-directional data links, Manchester encoded, using dual code driver. Each 4V p-p (nominal) into 75 ohms (BNC connector). Maximum distance is 300 meters. A total of 6 keyboards can be connected
- Serial Ports**
- Port A:** Full RS232-C serial port, providing all handshake lines for full modem capability. All lines may be optionally configured for RS422 levels. Programmable number of stop bits plus parity. Data speed programmable in standard steps from 45.5 to 38400 baud
- Port B:** RS232-C serial port supporting RTS/CTS handshake only. All lines may be optionally configured for RS422 levels. Programmable number of stop bits plus parity. Data speed programmable in standard steps from 45.5 to 38400 baud
- Parallel Port:** 16-bit unidirectional or 8-bit bi-directional with handshake. Fully programmable
- Outputs**
- Program:** RGB, Red, Green and Blue, 0.7V p-p non-composite into 75 ohms. BNC connectors
- Key:** 0.7V p-p non-composite linear key signal into 75 ohms. BNC connector
- Edit:** RGB, Red and Blue are 0.7V p-p non-composite. Green is 1V p-p composite ("syncs-on-green") or 0.7V non-composite, user preset. BNC connectors. The edit output displays safe title area, cursor, characters and (by switch option) system status information
- "Add-Edit"**
- Input:** 75 ohms 1V p-p. Output from color encoder. BNC connector

**Select Series Cabinets**

**Select Series Modular Enclosure System**, for electronic and industrial equipment, provides quality protection, optimum flexibility and aesthetics. Components include 19" slope front consoles, turrets and wedge sections; 19", 24" and 30" racks and wedge sections and a full line of customizing accessories.

Features include modular design for expansion ease, convenient accessibility to interior equipment through cabinet top and sides, designer-styled aesthetics including textured flat black enamel frame, a satin clear anodized aluminum horizontal trim, choice of colors for top and side panels and an extensive choice of decorative and convenience accessories

Units are 16-gauge CRS welded construction with an adjustable 11-gauge CRS mounting system with 10-32 N.F. threads on EIA standard hole spacing. UL Listed and custom versions are available. All Select Series enclosures are shipped completely assembled.

**Heavy Duty Slope Front Consoles**

The **Select Series 1044 Slope Front Console** is an example of Soundolier's top quality engineering and modern design. This unit has a wide variety of applications. The modular design allows for easy installation of assemblies, and the modern color schemes compliment any building interior. Basic unit consists of a 16 gauge CRS frame with 11 gauge CRS mounting angles, a removable full length locking rear door with louvers, a removable top and lower front panel and pontoon base. Mounting angles are tapped 10-32 on universal E.I.A. hole spacing and are adjustable from front to rear. Caster plates are provided. The writing surface may be easily removed for access to standard 19"(483mm) E.I.A. mounting rails. Plastic laminate writing surface is white or teakwood color. Wiring access is provided on the rear portion of the writing shelf. The frame, mounting angles, pontoon base and shelf assembly are finished in Soundolier textured flat black baking enamel. Standard

colors for tops, sides and doors of this series will be Soundolier Royal Blue (Color No. 35) or Soundolier Satin Beige (Color No. 31).

 EXAMPLE: U1044

**Model 1047 Slope Front Console**

Soundolier **Model 1047 Slope Front Console** is the same basic design as Model 1044, except that it will not mount a writing surface. Modular in design, it can be joined with other 1047 or 1044 consoles, or 1044-45 wedge sections. The basic unit consists of a 16 ga. CRS frame painted textured flat black baking enamel with 11 ga. CRS mounting angles and a removable full length locking rear door with louvers. Additionally, the top and lower front panels and pontoon base are removable. Mounting angles are tapped 10-32 on universal E.I.A. hole spacing and are movable from front to rear. Caster mounting plates are tapped for easy installation of Soundolier CS-8PR Casters. Side panels and casters are optional. Color selections

include Soundolier Royal Blue (Color No. 35) or Soundolier Satin Beige (Color No. 31). Other colors are available, see

**Console and Turret 45° Wedge Sections**

**Model 1044-45** wedge section is for use with 1044 and 1047 Slope Front Consoles. Models **714-45** and **719-45** Wedge Sections are for use with 700-14 and 700-19 Desk Turrets respectively. Each wedge section is a complete self supporting unit. They have no front openings or mounting angles. One wedge section used with appropriate consoles or turrets will produce a 45° corner installation. Two adjoining wedge sections will produce a 90° corner installation. The 1044-45 wedge section used with 1044-LS consoles and 144-45 or 144-90 writing surface will produce a

45° or 90° corner writing surface. The basic frame is 16 ga. CRS painted textured flat black baking enamel. The 1044-45 has a pontoon base painted textured flat black. It has a removable louvered full length locking rear door and top panel. The 714-45 or 719-45 have removable top and back panel. Door, top and back panels are available in Soundolier Royal Blue (Color No. 35) or Soundolier Satin Beige (No. Color 31).

## Select Series Cabinets (cont'd) ACCESSORIES

700 SERIES

### Slope Front Turrets

The **Select Series** Slope Front Turrets are sturdy, compact modular units designed for standard 19"(483mm) rack panels. These desk top assemblies have a variety of applications. In addition to their functional aspects, the color schemes brighten any office or building interior. Construction is 16 gauge CRS. The 700 Series consists of the frame, base, removable top, back panel and horizontal aluminum trim. Panel mounting strips are punched with  $\frac{1}{2}$ " (7mm) diameter holes on universal E.I.A. spacing on the front, rear, top and bottom. The frame and base are finished in Soundolier textured flat black enamel. Standard colors for tops, sides and back panels of this series will be Soundolier Royal Blue (Color No. 35) or Soundolier Satin Beige (Color No. 31). Suffix model number with color number. Other colors are available.

OPTIONS: Side panels, side trim, laminate decorative insert strip - consult spec. sheet # SL 1257.

SELECT SERIES VERTICAL CABINETS

### Heavy Duty Vertical Cabinets (19", 24", 30" Panel Widths, 25 $\frac{1}{2}$ " Deep)

The **Select Series** vertical multi-racks are the result of our technical knowledge, innovative design and superior construction techniques. Optional sides and door appear flush. The many color combinations compliment any decor. Modular concept, standard 19"(483mm) rack panels, and easy assembly offer maximum flexibility. Open side approach makes wiring convenient. No nuts or bolts for the removal of doors and side panels makes servicing electronic components a time saver. The **Select Series** consists of a 16 ga. CRS frame and 11 ga. CRS mounting angles. Panel mounting angles are tapped 10-32 on universal E.I.A. hole spacing and are movable front to rear. Doors are easily removed through the use of spring pull pin type hinges. Caster plates are provided. The frame, mounting angles and base are finished in textured flat black baking enamel. A satin, clear anodized aluminum trim provides a contrast to the textured black frame. The plastic insert panel on top front of cabinet is available in teakwood, black, royal blue or brick orange. Standard colors for tops, sides and doors of this series are Soundolier Royal Blue (Color No. 35) or Soundolier Satin Beige (Color No. 31). Suffix model number with color number.

19" SELECT SERIES WEDGE

### Floor Cabinet Wedge Sections

**2000-45 Series** wedge sections are designed to accommodate corners for the **Select Series** 19", 24" and 30" vertical cabinets. Wedges are self supporting and designed to provide wiring access between cabinets (units are not intended to house equipment). A 45° corner is produced by joining appropriate wedge and cabinet. Two adjoining wedge sections will produce a 90° corner installation. Basic Frame is 16 gauge CRS painted textured flat black baking enamel. Top and Rear door are available in Soundolier Royal Blue (color No. 35) or Soundolier Satin Beige (color No. 31). Other colors are available see paint color code p. 51. Decorative insert panel must be ordered separately. Consult spec sheet #SL1312 for complete information.

TO MAINTAIN UL LISTING, THESE MODELS MUST BE USED  
WITH UL LISTED CABINETS.

**Rectangular Writing Surfaces**

The **TKS-200-PL** Series, is designed for **Select Series** vertical cabinet models 2036 thru 2077 and the **TKS-144-PL** Series, is designed for the 1044 console. The entire unit is teakwood laminate covered over heavy particleboard. Two (2) heavy duty "Z" angle brackets, (Model No. **200-SBR** for racks) (Model No. **144-SBR** for consoles) and hardware are provided with each single writing surface for attachment to the rack or console. Additional brackets may be ordered as single items. Brackets are 11 ga. CRS, painted Soundolier textured flat black.

The **TKS-200-FR** and **WHS-200-FR** Series writing frames are two piece writing surfaces designed for **Select Series** vertical racks. The frame is constructed of 16 ga. CRS and is mig welded. Wiring access (per bay) is provided on the rear portion of the writing frame. The frame is painted Soundolier textured flat black baking enamel. A choice of teakwood (TKS) or white (WHS) laminate writing surface is available. The writing surface may be easily removed for access to standard 19 inch E.I.A. mounting rails. Writing surfaces are offered for a single rack or console, and for 2, 3 and 4 bay installations.

**Corner Writing Surfaces**

The **144 Series** 45° and 90° Writing Surfaces are designed to be used with Soundolier's 1044LS slope front consoles and 1044-45 corner wedge sections. The writing surface frame is constructed of 16 ga. CRS steel with choice of Teakwood (TKS) or White (WHS) laminate writing surface. Versions for 45 degree or 90 degree console configurations are available. Wiring access is provided on the rear portion of each writing surface. The 16 ga. CRS frame is painted in Soundolier textured flat black baking enamel to match the 1044LS consoles.

The **2000FD** Series front doors are for Soundolier's **Select Series** cabinets (Model Nos. **2036** thru **2077**). To maintain the trim appearance of this series of quality cabinets a recessed door pull is used. Spring pull pin type hinges facilitate rapid access to equipment. For security a key lock is standard - 2 keys furnished. Construction is of 16 gauge CRS. Two colors are available: Soundolier Royal Blue (Color No. 35) or Soundolier Satin Beige (Color No. 31). Suffix model number with color number.

2000FD SERIES

**Standard 19" Cabinets**

100 SERIES

**Cabinet Relay Racks (Unassembled)**

**Series 100** cabinet relay racks are designed for standard 19" (483mm) panels. Constructed of 16 ga. CRS throughout. Rear door lock and low profile handle included. Panel mounting angles are tapped to accept 10-32 pan head screws (included). Louvers are internal type for improved ventilation. Iron phosphate coated for rust prevention and paint adhesion. Knockouts located at rear top and bottom. If no color is specified, Soundolier Satin Beige will be furnished.

**OPTIONS:**

**Series 110 (Front Door)** — Mounted on a ridged continuous hinge for right or left hand mounting, includes lock and handle. May be ordered with or without

cabinet. See chart for model numbers.

## Sectional Wall Mounting Cabinets

**Series 300/320** sectional wall cabinets are designed for standard 19" (483mm) rack panels. Series 320 is the same as series 300 but has an extra deep center section. Both series are available without the front door. Specify 300LD series or 320LD series. Entire cabinet is constructed of 16 ga. CRS. Back and front sections are one piece construction with angle braces at each corner. All seams and miters are electric welded and ground smooth. Center cabinet is strengthened with 16 ga. braces at each corner. Three larger models have 11 ga. mounting supports on back section. Removable pin hinges are provided for easy assembly and are bolted to cabinet section for greater strength. Knockouts and internal louvers are provided. Center section and rear section are secured with locking rods and alignment pins. Front section is complete with cylinder lock. All models have tapped panel mounting rails and 10-32 pan head screws for panel mounting. If no color is specified, Soundolier Satin Beige will be furnished.

300/320 SERIES

## Desk Top Cabinet

**400 Series** desk top cabinets are completely assembled and constructed from 16 ga. CRS throughout. Each unit is equipped with a locking rear door which is mounted on sturdy slip joint hinges. Internal louvers and recessed panel angles give this compact cabinet a "clean look." The panel mounting angles are tapped for 10-32 screws. Designed to mount most Soundolier cabinet accessories. If no color is specified, Soundolier Satin Beige will be furnished.

## 500/502 Series Multi Racks

The **500/502 Series** multi racks are designed to provide maximum flexibility for standard 19" (483mm) rack panels. Series 502 is the same as Series 500 but is deeper for extra equipment area. Multi racks can be readily joined together and because of its open side construction, wiring is simple and convenient. Each basic rack is supplied with a rear door complete with cylinder lock and low profile handle and slip-jointed hinges. Panel mounting rails are adjustable, manufactured of 11 ga. CRS and tapped for 10-32 screws. Construction of all other parts is 16 ga. CRS. Combination knockouts are located on the top, bottom and rear flanges. To facilitate cable entry, three 2 $\frac{1}{2}$ " (71mm) diameter holes are located toward the rear of the base of the rack. Racks are shipped welded and assembled. All metal surfaces receive an iron phosphate coating prior to finishing for rust prevention and maximum paint adhesion. If no color is specified, Soundolier Satin Beige will be furnished.

\* TO ORDER UL LISTED VERSIONS, ADD U PREFIX TO AVAILABLE MODEL NO. EXAMPLE: U500-61

\*\* BASIC RACK INCLUDES REAR DOOR AND 1 PAIR TAPPED ADJUSTABLE MOUNTING RAILS. ADDITIONAL RAILS ARE OPTIONAL.

**OPTIONS:**  
**Series 510** (Front Door) Mounted on a ridged continuous hinge for right or left hand mounting. Includes lock and handle.

**Series 110FDP** (Plexiglas front door)

**Series 230** (Mounting Rail) Standard rack includes rails. Extra sets available as an option.

**Series 540/542** (Side Panels) — One pair of side panels is required to close either a single basic rack or multiple racks attached. The side panels install easily by hooking them over internal side channels in the basic rack. 540 Series mounts 500 model racks. 542 Series mounts 502 model racks.

**Cabinets and Racks**

600-12

**600-12 Wall Mounted Cabinet**

**Model 600-12** is for surface mount installations accommodating 19"(483mm) rack panel equipment. Constructed of 16 gauge CRS. Includes a locking front door. Internal louvers on each side provide ample ventilation. 11 Ga. CRS panel mounting rails are recessed for a "Flush" look and tapped 10-32 on universal EIA spacing. Panel mounting screws are provided. Three double 1/2"(13mm) and 3/4"(19mm) knockouts are provided on top and bottom for wire entry. Four keyhole slots for wall hanging are provided on back panel. Finish is Soundolier Satin Beige.

MODEL	WIDTH	HEIGHT	DEPTH	PANEL	WEIGHT

NOTE: TO ORDER UL LISTED VERSIONS, ADD U PREFIX TO AVAILABLE MODEL NO. EXAMPLE: U600-12

AWR SERIES

**AWR Series**

**AWR Series** Amplifier Wall Cabinets are designed for recessed or surface wall mounting of amplifiers. Available with 3 1/2" and 5 1/4" panel space openings as well as a version for commercial metal stud walls (Model AWR-3-4). Amplifier mounting frame is an integral part of the tilt out door. 10-32 mounting holes are on standard EIA spacing. Right side of chassis has a blank panel area 1 1/2"(38mm) x 5"(127mm) where additional switches may be mounted (AWR-3-4 has no blank panel area). Door and door frame assembly are 14 gauge CRS. Front door is flush with flush keylock and two keys. Door is attached to frame with a piano hinge and has welded door stops to prevent improper closing. Backbox is 16 gauge CRS with 7 knockouts on bottom panel. Tampering is prevented by attaching door frame to backbox internally. Shipped complete, finished inside and out with Soundolier Satin Beige.

MODEL	TYPE	WIDTH	HEIGHT	DEPTH	PANEL SPACE

AWR-5S	SURFACE	24 1/8" (616mm)	18 1/8" (464mm)	7 1/8" (180mm)	5 1/4" (133mm)

800 SERIES

**800 Series Open Relay Racks**

Series 800 open relay racks are for use when a complete enclosure is not required. Heavy 16 ga. CRS construction is used throughout with integral 11 ga. CRS mounting rails. Five models are available in vertical panel space openings from 36 1/4"(921mm) up to 77"(1956mm). Each unit is shipped unassembled with all necessary hardware. Standard finish is Soundolier Satin Beige (Color #31).

MODEL NO.	VERTICAL PANEL SPACE

**Television Monitor Adapters**

The **TMC-10** and **TMC-15** are designed to accommodate a variety of sizes of video monitors in a 19 inch panel space. These adapters are easy to attach to the rack and provide the proper slope for easy viewing.

The **TMC-10** and **TMC-15** are constructed of 16 ga. CRS and are mig welded together. Panel mounting rails are punched with .281 dia. holes on universal EIA hole spacing. Panel mounting screws and U clips are provided with each console. Standard colors are Soundolier Satin Beige (No. 31) and Soundolier Royal Blue (No. 35).

2000FDP

**Plexiglas Doors**

**110FDP and 2000FDP Series** are equipment cabinet doors with a smoked plexiglas front. Units are constructed of reinforced 16 ga. CRS frame with integral keylock (2 keys furnished), sturdy piano hinge, door pull and mounting hardware. Standard color is Soundolier Satin Beige (color No. 31) for the 110FDP Series and Soundolier Satin Beige (color No. 31) or Royal Blue (color No. 35) for the 2000FDP Series.

**Blank Panels**

**S19 Series** panels are constructed of 16 gauge CRS. The top and bottom of the panel are formed for rigidity. The panel mount holes are oblong for adjustment and neater appearance. Finish is Soundolier Satin Beige.

**S219/S224/S230 Series** panels are constructed the same as S19 series but are formed on all four sides to maintain the flush appearance of **Select Series 19"**, 24" and 30" cabinets respectively. S219 will also mount standard 19" racks. Two standard colors are offered: Soundolier Royal Blue (No. 35) or Soundolier Satin Beige (No. 31). Suffix model number with color number.

**A19 Series** panels are constructed of 1/8" (3mm) aluminum with no returns. Panel mount holes are oblong for adjustment and neater appearance. Panels are painted on one side. Finish is Soundolier Satin Beige.

\*\*NOTE: 2400 and 3000 Select Series cabinets are available with louvered top factory installed upon request.

**Select Series Louvered Panels**

Optional louvered panels for **Select Series** cabinets are designed to provide air flow and to dissipate equipment generated heat from within an enclosure. Top, side and rear panels are available for models listed. (Louvered rear panels are standard for **Select Series** cabinets and consoles). All panels are constructed of 16 gauge CRS with either two or four sets of nine internal louvers. Panels incorporate a 1/4" return on all four sides to maintain the flush appearance of **Select Series** Enclosures. All sizes and hole spacing conform to EIA Standards. Standard colors are Soundolier Satin Beige (color No. 31) and Soundolier Royal Blue (color No. 35). Additional colors are available.

NOTE: These panels are optional for models noted and may be ordered separately for use wherever desired.

## Cabinet Accessories

CT1020

### Roller Truck

**Model CT1020** roller truck is constructed of 16 ga. CRS and is designed for Soundolier's 100, 200, WA100 and WA200 series cabinets only. Finish is Soundolier Satin Beige. Other colors are available.

CT1020 ROLLER TRUCK		
DIMENSIONS	LOAD CAPACITY	MOUNTS CABINET SERIES

CS-8PR

### Select Series Casters

**CS-8PR** Swivel casters must be used with **Select Series** racks and consoles which have caster plates ready to mount CS-8PR casters. Each CS-8PR includes 2 swivel casters. An individual rack or console requires 4 casters or two CS-8PR. Adjoining cabinets require only 2 casters (one CS-8PR) at juncture.

## Fan Panels

ES2195-71 (BACK)

ES21921-122

### Fan Panels

**ES** and **IS** Series fan panel assemblies provide exhaust or intake cooling respectively for electronic equipment mounted in standard 19" EIA cabinets. Units are available in single or dual fan models with 70 CFM or 120 CFM fan speeds. Recessed and flush mounting configurations are available for top or front mounting on standard cabinet mounting rails. Fan units are constructed of nickel chrome plated wire grille backed with stainless steel wire mesh screen assembled on standard 19" EIA 16 gauge CRS panels. Standard finish is Soundolier Satin Beige (color No. 31). Additional colors are available.

## AC Power Strip

### AC Power Strip

**ACS-1** is designed for equipment cabinet installation. Units provide six UL Listed, grounded duplex outlets with UL Listed power cord. Each assembly includes necessary hardware. For your convenience, appropriate Soundolier cabinets may be ordered with ACS-1 Power Strips pre-mounted. Consult factory for details. ACS-1 may also be used in conjunction with Soundolier fan assemblies and power panels to provide a complete cooling and AC power distribution system.

## AC Power Panels

**Model ACR-193** is an AC master power panel for standard 19" (483mm) rack mounting requiring only 3-1/2" (89mm) of vertical panel space. Panel is constructed of 16 gauge CRS and standard color is Soundolier Satin Beige (No. 31). Complete list of colors available. The main switch is a DPST rocker type and switches both sides of the power line. A red jewel, neon pilot lite indicates whether AC power is on or off. Eight outlets are provided, six controlled by main switch and two non-switched outlets. Each outlet is grounded. A 15 amp fuse is provided. Back of panel has a 7/8" (22mm) hole which accepts 1/2" (13mm) conduit fittings.

**Model ACK-193** is identical to ACR-193 except a key switch is used for security. Two keys are provided.

**Model ACR-293 and ACK-293** are the same as those above except they have a return on all four sides to maintain flush appearance of Soundolier select series cabinets.

## Roller Truck

**Model CT1020** roller truck is constructed of 16 gauge CRS and is designed for Soundolier's 100, 200, WA100 and WA200 series cabinets only. Finish is Satin Beige. Complete list of colors available. The roller truck is complete with four 3" (76mm) ball bearing casters. Two casters are the rigid type and two are the swivel type. The swivel casters are also the locking type. The total load capacity is 400 lbs (181kg). Dimensions—24-13/16" (630mm) x 21" (533mm).

## Monitor Panels

**Model MVX-193** monitor panel for standard 19" (483mm) rack mounting requiring only 3-1/2" (89mm) of vertical panel space. Panel is constructed of 16 gauge CRS and standard color is Soundolier Satin Beige (No. 31). Complete list of colors available. Unit can be used with any multi-channel sound system. It provides aural and visual monitoring with the turn of a switch. A double pole, six position switch is wired to supply five program channels with a sixth "off" position. Each channel connects to two screw terminals on the rear of the panel. A 70 volt or 25 volt line may be monitored. A 3" (76mm) speaker is used for aural monitoring connected through a potentiometer for level selection. Potentiometer and channel selector are on a black plate with white nomenclature. Speaker grille is slightly raised. The VU meter has a long life thermoplastic case. The meter movement is a moving coil design and has a type A meter scale.

**Model MVX-293** is identical to MVX-193 except it has a return on all four sides to maintain flush appearance of Select Series cabinets and Soundolier Royal Blue (No. 35) is offered as a second standard color.

**Model MX-193** is identical to MVX-193 except the VU meter is not provided.

**Model MX-293** is identical to MVX-293 except the VU meter is not provided.

**Model MVX-195** is identical to the MVX-193 except a high compliance Soundolier 4" (102mm) FC104 speaker is used for better aural monitoring. A high quality Soundolier HT-82 line transformer is also used. Panel height is 5-1/4" (133mm).

**Model MVX-295** is identical with the MVX-293 except a high compliance Soundolier 4" (102mm) FC104 speaker is used for better aural monitoring. A high quality Soundolier HT-82 line transformer is also used. Panel height is 5-1/4" (133mm).

**Model MVX-1910** is identical to MVX-193 except the panel is 10-1/2" (267mm) high and the monitor speaker is an 8" (203mm) unit.

**Model MVX-2910** is identical to MVX-293 except the panel is 10-1/2" (267mm) high and the monitor speaker is an 8" (203mm) unit.

**Model MX-1910** is identical to MVX-1910 except a VU meter is not provided.

# TAPE LOADING SYSTEMS/ACCESSORIES

System III with 609-P Pay-Off Unit

System III

609-R Rewinder

Hockey Puck Splicer

## Video Tape Loading Systems U-matic, VHS and Beta

System can be equipped to load and reload U-matic, VHS, Beta, 8mm, M-II, Betacam and 19mm video cassettes and cookies, plus load 1" and Nagra reels and audio cassettes, carts, and reels. Video cue-tone available. Tape loading speed is 135" per second. Counter allows selection of exact tape length desired. Built-in cleaner can wipe video tape during loading or rewinding.

All systems consist of a 751-V delivery unit and an 829 receiving unit with one interchangeable take-up module. Systems II and III also include the 29R unloading unit. The 829 receiving unit, which contains a processor that continuously monitors in-path tape loading tension, may be upgraded: System I or II to System II or System III.

Systems I and II require only one take-up module for both VHS and Beta; System III requires separate modules for each format. U-matic modules handle both KCA and KCS housings. When ordering, specify desired module—U-matic or 1/2" on System I or II; U-matic, VHS or Beta on System III.

**System I Video Loader** Loads new tape into new cassette housing . . . . . \$6,550.00

**System II Video Loader/Reloader** Has additional feature that automatically removes old tape from cassette housing without taking them apart, and thus allows for their convenient reuse. . . . . 7,550.00

**System III Video Loader/Reloader/Rewinder** Adds ability to rewind and fast-forward cassettes, and to wipe tape while rewinding. When reloading, tape can be removed from either reel . . . . . 7,850.00

**Take-up Modules** Extra interchangeable modules (in addition to one selected with Receiving Unit).

Load (All Systems) . . . . . 450.00

Load/Reload (Systems II and III) . . . . . 600.00

Load/Reload/Rewind (System III) . . . . . 750.00

**Audio Tape Loading Options** (1) Audio Cassettes, (2) Type-A Broadcast and 8-track Carts, and (3) Nagra Reels.

**First Option** . . . . . 325.00

**Second and Third Option (each)** . . . . . 50.00

**609-P Pay-off Unit** Used with video loader to transfer tape directly from a cassette housing or cookie into another housing. Mounts to left of Delivery Unit which counts desired length. Stops on leader and indicates length loaded. VHS unit transfers tape from VHS housing to both VHS and Beta housings.

**U-matic or VHS** . . . . . \$ 975.00

**U-matic and VHS** . . . . . 1,175.00

**Economy Video Loader** Loads new tape into new cassette housings. Includes 751-V Delivery Unit and 609-T Take-up Unit with tape wiper and one Take-up Module, either 1/2" (VHS and Beta) or U-matic, Audio tape loading options also available . . . . . 4,850.00

**Second Take-Up Module** . . . . . 450.00

## Video Cassette Rewinder, Cyclor, Counter, Unloader

**609-R Video Cassette Rewinder, Cyclor, Counter, Unloader** Rewinds and fast-forwards U-matic, VHS and Beta Cassettes. Cyclor fast-forwards tape to leader and then automatically rewinds it. Counter displays tape length in cassette in feet. These units can also be used as pay-off unit or as take-up unit on Economy Loader.

**609-R** Rewinder/Cyclor—One format: U-matic, VHS, or Beta . . . . . \$1,125.00  
Each additional format . . . . . 700.00

**609-RC** Rewinder/Cyclor/Counter—One format: U-matic, VHS or Beta . . . . . 1,400.00  
Each additional format . . . . . 975.00

**29-R** Unloader—When added to 609-R or 609-RC, removes old tape from housings so they can be reused . . . . . 850.00

## Video Tape Splicers

**Hockey Puck Splicer** Tape and leader are butted together and held in place by vacuum holes in tape slot. Splicing tape is placed on top of block across ends to be spliced. The "puck", a precision fitting, hardened metal roller, is rolled down the slot and cuts and applies splicing tape in one motion.

1/2" Tape . . . . . \$575.00

3/4" Tape . . . . . 575.00

**Vacuum Source** The Hockey Puck Splicer requires a vacuum source for tape hold-down, either a small vacuum pump or a compressed air source connected through a venturi.

**Venturi Kit** Consists of venturi, flow control and fittings to generate vacuum from compressed air source . . . . . \$ 75.00

**Vacuum Pump** . . . . . 125.00

Costs for various formats and features, including optional Hockey Puck Splicer(s) and vacuum pump.

Economy Loader	System I	System II	System III
U-matic (or one 1/2" format on System III)			
\$5,550.00	\$7,250.00	\$8,250.00	\$8,550.00
VHS and Beta			
\$5,550.00	\$7,250.00	\$8,250.00	\$9,300.00
U-matic, VHS and Beta (two Hockey Puck Splicers)			
\$6,575.00	\$7,250.00	\$9,425.00	\$10,625.00

Above System III for U-matic, Plus:

**U-matic Pay-off Unit** . . . . . \$9,525.00

**VHS/Beta System II Load/Reload Module, and 1/2" Hockey Puck Splicer** . . . . . \$9,725.00

Add \$325.00 to above prices for audio cassette or broadcast cart loading option; add \$375.00 for both.

Subtract \$50.00 from above prices for Venturi Kit instead of Vacuum Pump.

# MACHINE CONTROLLERS/ SYNCHRONIZERS/ EDITING SYSTEMS

## Q•LOCK

### Professional Machine Controllers, Synchronizers and Editing Systems

- 2, 3, 4 or multi-machine systems
- EBU/SMPT E time code based
- 2 levels of control for different budgets and applications
- Interfaces to virtually all tape transports
- Synchronizes video, audio and film machines
- Integral time code generator and readers

All Q•LOCK machine control systems use standard EBU/SMPT E time code as the reference for synchronization, and each configuration includes as standard a time code generator capable of delivering 24, 25, 30 fps and drop-frame codes.

Event control of remote equipment is available, with two levels of central system control.

## Full Central Control

### The Q•LOCK 4•10 Series

For most aspects of post-production, some type of central control is required, where the system, in whole or in part, is always under the direct control of the engineer.

Speed is of the essence, and time is money. Q•LOCK has been designed to keep post-production time to a minimum.

The Q•LOCK 4•10-A Series is just such a system. Based on the enormously successful Q•LOCK 3•10 products, the 4•10-A System consists of a computer frame and the Alpha Controller.

The 4•10-E Series uses the Eclipse Editor, an intelligent controller with a clear, multiline display of system status and messages.

The 4•10 frame contains the main control electronics—machine interfaces, time code generator, time code readers for each machine, and the main processor card governing the synchronizing routines. Four full machine interfaces may be installed. In addition, there are several relays accessible to the operator, with connections via the "services" socket on the rear of the frame.

**Event Relays.** Three single "make" relays for firing external equipment from time code addresses.

**"On Air" Relay.** A change-over relay which closes when a record command is issued, and opens when the un-record is fired.

**Sync Unmute.** This relay only closes when all machines are cued, or in synchronized play, which means audio can be muted at other times.

The integral time code generator has separate feeds to all machines, and may be referenced to either the internal crystal or an external source such as video syncs.

Selection of whether a machine is designated master or slave is made via switches on the front of the cards in the frame—there is no need to recable any machines just for master status.

## Q•LOCK 4•10 + Alpha

The Alpha Controller will control and synchronize 2 or 3 machines out of the maximum "pool" of 4 (the 4<sup>th</sup> machine is selected to be "off line").

Full transport control of individual machines or the whole group is provided, with industry standard locator functions and 10 locate/numeric memories. The integral time code generator may be preset to any desired value, and genlock software allows code to be restriped or generated for consistency, in time code value and rate, with existing tapes.

A special version of the Alpha Controller, the Beta, has been specifically designed for flush mounting in a mixing console, with a width of 160mm (typically 4 modules).

Offset calculations can be performed by the system automatically, while automatic record drop-in and drop-out can be programmed on-the-fly or from an edit list.

Q•LOCK Synchronizer

Eclipse Editor

Specialist software is available for particular tasks which demand repetitive routines, such as dialogue replacement (dubbing or looping). Each package reduces to single keystrokes routines which normally would require several. Such software is available (as an option) for Sound Effects Assembly (Q•SOFT-SFX), Dialogue Replacement (Q•SOFT-ADR), Audio/Video Conforming (Q•SOFT-CONFORM), and Automatic Machine Selection (Q•SOFT-RELAY).

A typical setup for the Q•LOCK 4•10 is with a U-matic Video Machine as master, a multitrack machine as Slave 1 and a 2-track audio machine as Slave 2. This configuration is typical of that used in video-audio post-production, where music, sound effects and dialogue are transferred from the twin-track, or direct, onto the multitrack in sync with picture, for later mix-down and layback onto video.

## Q•LOCK 4•10 + Eclipse

The Eclipse Editor may be used as the central controller for either the 4•10 computer, giving full four machine editing or combined with a future family of synchronizers expandable up to 32 machines on the SMPTE studio bus system.

Eclipse offers 12 user-programmable keys so that engineers derive a routine of keystrokes and execute it with one key depression.

Dual tasking may be performed: any single machine may be accessed for other functions while the group is editing, saving possibly large amounts of on-line studio time—for example, some sound effects may be spotted while an audio tape is being laid back to video.

Each event relay with the 4•10 frame may be associated with 3 time code cue points.

Up to 100 loop memories are available, each loop containing the data for Loop Start, Loop End, Record-In, Record-Out, and machine configuration and offsets.

# SYNCHRONIZATION SYSTEM/ TIME CODE GENERATOR/READER

Pacer Pad

Pacer

Striper

## Pacer Synchronizer/Generator/Resolver

- Easy to operate • Complete two-machine synchronization • Integral time code generator • Program select for all popular slave machines • Compatible with off-line and on-line editing systems • "Pacer Pad" option for increased flexibility • High-speed serial interface for control expansion

The Pacer has been designed with a wide range of applications in mind: Interlinking with VT edit facilities; transferring sound from videotape to a master audio machine; final layback to video; hooking up two multi-track audio machines — any application where you need two machines running in sync with subframe accuracy and maximum stability.

The compact 1U rackmounting Pacer package contains everything you need. All you may wish to add is the Pacer Pad—a remote keypad and display terminal adding locate facilities and record drop-in/out functions. It connects to an industry standard RS-232-422 serial interface which can be used for interfacing a PC, or a video editing system for centralized, flexible control applications.

A multistandard time code generator is built into the Pacer package, so you need no extra equipment. It can be reset or jam-synced to incoming code as required.

Two high-speed code readers monitor master and slave positions. As well as reading time code, they automatically switch to reading tachometer and directional information if time code is absent.

The slave interface is simply and quickly set up for your machine—all you need is the appropriate cable and your selection of the slave machine "file" from the library ROM. Interface software is provided for all the major tape machine families.

The "calibrate" mode rapidly learns your machine's characteristics and stores them in memory. Then, pressing "chase enable" ensures that the slave stays as close as possible to the master.

Time code offsets are simply and quickly programmed from the front-panel. Battery-backed intelligence means that learned machine characteristics, tachometer rates, time code offsets and the like are retained even when the system is switched off.

Three types of lock are selectable: Frame-lock — utilizing constant master/slave time code comparison; Auto-lock — utilizing frame edges for reference after initial time code sync, and therefore allowing the use of discontinuous time code (for example as a result of editing) and offsets; and phase-lock — where sync is achieved via frame edge and phase information only. This facilitates the use of external sync references—such as house video sync—for a wider range of applications requiring "genlock" and resolving capabilities.

## Striper Time Code Generator And Reader With "Quickstripe"

- Multistandard time code generator • Code output at 1X, 2X and 4X playspeed • Reads time code and user bits • Genlock facility, in forward and reverse • Presettable generator start times • Auto preroll generation

Striper can output code at 2 or 4 times playspeed, simply switch the machine to the higher speeds and record time code in a half or even a quarter of the time.

For example, if your machine has speeds of 15 and 30 ips, and you want code on tape at 15 ips, set the machine to 30 ips, Striper to 2X speed and save half the time.

The generator can be referenced to internal crystal, or external pulse such as video sync or the frame rate output of the Audio Kinetics Gearbox unit. It is also compatible with the revised EBU/SMPTE format with the included parity bit.

This combination offers a sophisticated time code standards conversion system.

Striper can also be preset to any hour start from 0 to 10 hours, with an option to automatically start with a 15 second preroll. The generator level is user adjustable on the front panel.

Striper can also be set to read time code, or user bits, and so new code can be generated from bad code.

An intelligent time code reader front-end detects time code direction and sets the generator direction to the same when the JAM command is given, so code can also be generated backwards to, for example, extend code at the start of material to provide pre-roll for synchronizers. This is easily achieved by turning the tape over and feeding the existing code into Striper, pressing JAM and recording the extending code over the end (start) of the old code. The reader can also display User Bits, and a run/stop key allows the display to be held. A "good code" LED shows whether incoming code is suitable for jamming.

The run/stop key can also stop the generator, and then continue from the same point.

Striper also has a comprehensive self-diagnostic program, so in the unlikely event of IC failure, the display will show which IC is faulty.

**TD-1B TAPE DEGAUSSER**

- Erases audio, video, computer, data tape, magnetic films, cartridges and cassettes
- For tapes up to 3/4 inch
- Accommodates up to 10-1/2 inch NAB reels
- Provides a wide focused magnetic field to assure complete erasure
- Positive results every time with a simple two pass operation for broadcast NAB audio cartridges
- Transient protection to prevent permanent tape damage
- Internal fuse protection
- 115 and 220 volt, 50-60Hz models available

**TD-1B—\$119.00**  
(115V 50-60Hz)

**TD-1BF—\$128.00**  
(230V 50-60Hz)

**Power**

**Requirements:** TD-1B 115VAC ± 10% 50-60Hz

TD-1BF 230VAC ± 10% 50-60Hz

**Duty Cycle:** One minute ON — Three minutes OFF

**Dimensions:** 5-1/4" x 7-1/4" x 3"

**Weight:** Net: 9-1/2 lbs. Shipping: 10 lbs.

**Reel Size:** Up to 10-1/2" in diameter. Removable center post for large carts

**TD-4A TAPE DEGAUSSER**

- Erases audio, video, data tapes, U-Matic cassettes up to 750 oersteds, reels to 16 inches in diameter. See performance chart
- Provides 2550 effective gauss field
- Built-in timer has adjustable "on" cycle and automatic shut-off
- Automatic cooling fan operation
- Overheat light with automatic thermal protection prevents exceeding duty cycle on "Hi" position. Thermal protection resets to normal operation automatically
- Hi-Lo operation allows continuous duty erasing on Lo position for most tapes. See performance chart
- Standard 5/16 inch center post with 3 inch NAB hub supplied
- Conservative design assures long, reliable performance

Erases audio, video, computer, and cartridge tape.

# CURTAIN TRACKS

## Curtain Tracks Rig-I-Flex 140 Series

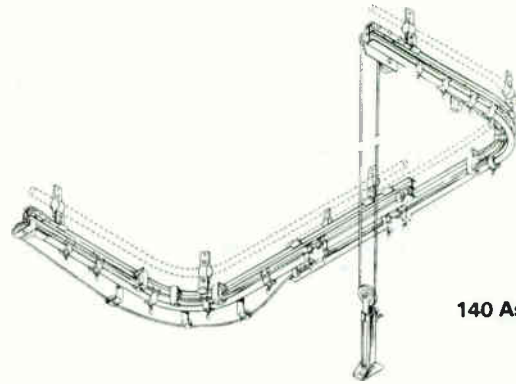

Rig-I-Flex is a versatile I-beam track which has been engineered for both curved (Model 140) and straight (Model 141) cord traverses as well as for "walk along" use (Model 142). It was especially designed for heavy curtains on stages and TV studios and for enclosing areas in industrial plants. The 140 utilizes spindles and idler brackets (charged as extras) for guiding the operating cord along curved areas. The track channel is curved on-the-job to a suggested minimum radius of 2'. This traveler cannot be used for reverse curving or serpentine layouts.

The 140-R, 141-R and 142-R are identical to the 140, 141 and 142 except that the carriers consist of nylon wheels (without ball-bearings) which permit quieter track operation.

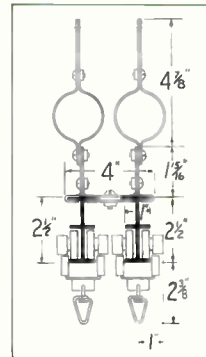

When ordering, advise whether the track is to be ceiling-mounted or suspended.

A sketch or template must accompany each inquiry or order for the 140 Rig-I-Flex curved tracks. Only in this way can the required number of Spindles and Idler Brackets be supplied.

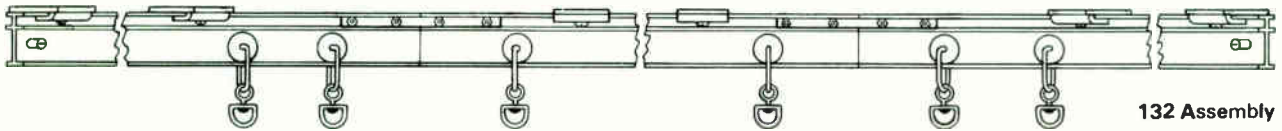

- 140** Rig-I-Flex Track \* except 1458', 1459', 1460'
- 140R** Rig-I-Flex Track \* except 1458', 1459', 1460'

## 132 Flex-I-Trac 130 Series

Flex-I-Trac is a light-to-medium duty cyciorama I-beam type track designed for medium weight stage and TV studio curtains, and for enclosing industrial welding booths.

This economically priced track unit is supplied for "walk-along" operation only with no cord, pulleys or master carriers furnished. The track channel is curved on-the-job to virtually any degree or radius.

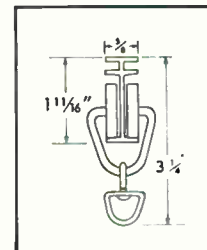

For most satisfactory track operation the track channel should be solidly anchored to the ceiling with the use of ceiling clamps. When ordering, advise whether the track is to be ceiling-mounted or suspended.

132-B is identical to the 132 except that #1337 Nylon Ball-Bearing Single Carriers are used instead of #1301.

132-C is identical to the 132 except that #1337-A Nylon Ball-Bearing Single Carriers with non-binding lips are used instead of #1301, and #1352 Master Carriers are used.

# ADAPTOR MODULES/KITS/ COMMUNICATIONS ADAPTOR

## HOBNOB® Serial Adaptor Module (SAM)

HOBNOB is a serial adaptor module (SAM) in easily and quickly installed kit form. HOBNOB, when installed into a Sony VP-5000 or VO-5600 VCR, converts the standard remote port to function as the Sony VO-5800 and VO-5850 remote control port.

HOBNOB provides the full range of forward and reverse search from edit controllers or search modules such as the RM-440 or RM-580. HOBNOB accurately responds to all edit command sequences. Therefore, the much lower cost VCP's and VCR's can be used in source positions of most low to medium priced editing systems.

HOBNOB also provides a front panel mounted search dial to the VP-5000 and VO-5600 allowing full bi-directional/variable, local/manual shuttle control. The search dial provides linear speed control from 0 to 9 times play. Popular applications for this feature include off-line manual reviewing and re-cueing without the need of tying up more expensive models.

HOBNOB (in kit form) . . . . . \$595.00

## SCA-58 VTR Serial Communications Adaptor

The SCA-58 is a micro-processor based VTR serial communications adaptor, designed to increase the editing flexibility for the Sony VO-5800 and the VO-5850 industrial video tape recorders.

The SCA-58 provides the capability of adding one or more VO-5850 or VO-5800 to the source side of Sony BVE-800 editing system or editing systems other than Sony that utilize the RS-422 SMPTE BUS as well as the Sony 800 protocol serial communications format. A built-in SMPTE high speed time code reader insures absolute editing accuracy.

The SCA-58 is a stand alone, plug-in, VTR powered module, which can be easily attached to the rear panel of the Sony 5800/5850 recorders. A single SCA-58 may also be utilized in conjunction with a Sony BVU-800 Broadcast VTR, for the purpose of VTR to VTR editing. The SCA-58 allows the use of low cost VTR's in high level editing situations, saving users thousands of dollars over the cost of broadcast type VTR's.

SCA-58 . . . . . \$1,295.00

HOBNOB kits are also available for Sony VP-5020 as well as for type 7 and type 9 VCRs.

NOB-IT Kit provides front panel search dial only for Sony VP-5000/5600 VCRs . . . . . \$389.00

HOB-IT Kit provides editor interface only for Sony VP-5000/5600 VCRs. . . . . \$389.00

DUB-IT Kit provides Y-688 Dub-out for Sony VP-5000/5600 Sony DUB connector is provided . . . . . \$389.00

DUB-IT 5600 Kit w/Dub-in provides both Y-688 Dub-out and Dub-in for Sony VO-5600 VCRs. Sony Dub connectors are provided . . . . . \$489.00

DUB-IN 5600 Kit provides the record in feature of the DUB-IT kit only. . . . . \$389.00

HOBNOB 5020 Kit provides both front panel search dial and 33 pin parallel remote control port with editor interface and external sync for use with TBC's . . . . . \$695.00

AA-5020PI Kit provides 33 pin parallel remote control port with external sync for use with TBCs . . . . . \$495.00

# VIDEO/DATA/ GRAPHICS PROJECTION

## Barcoveision 400

- High resolution liquid cooled 5.5" projection CRTs with low blooming P53 phosphor provides greatly improved picture definition • Optical resolution: 1000 lines • Wide range of screen sizes up to 20' x 15'

For applications that require large screen projection of different composite video and standard video resolution RGB computer sources, the Barcoveision 400 delivers high light output and excellent resolution on front, rear, flat or curved screens up to 20' wide. The Barcoveision 400 accepts inputs from virtually any NTSC/PAL/SECAM composite video source.

Order Code 90-00340 .....\$6,950.00

## Barcodata 400-RGB

- Independent Video/RGB mode horizontal and vertical size and horizontal phase (centering) remote controllable adjustments; allows each projector input to be individually corrected for size, aspect ratio and phase position
- Reduced horizontal retrace time (<5.0 $\mu$ s) for greater computer compatibility
- Low noise, DC "smart" fans for improved cooling efficiency
- Improved autolock circuitry provides greater immunity to signal noise, VCR playback problems
- Improved "Auto Tracking" circuits guarantee perfect image quality, convergence from 15-42kHz
- Extended range of operation possible on a dedicated or slaved basis from 42-54kHz
- Wideband 30MHz RGB amplifier standard (projector inputs are RGB only)
- Optional direct drive composite video input with 15MHz RGB amplifier
- Wide range of screen sizes up to 20' x 15'

For corporate and industrial applications that require large screen projection of a wide range of video and computer data sources. Compatible with an array of RGB computer display terminals as well as standard NTSC/PAL/SECAM composite video

Order Code 90-00360 .....\$12,850.00

## Barcographics 400-RGB

- Microprocessor based autolock circuitry allows flawless operation from 15-72kHz
- 100MHz single-ended RGB amplifier for unsurpassed picture resolution (projector inputs are RGB only)
- High definition, all glass lenses provide resolution >2000 lines
- Ultra low horizontal retrace time (<2.5 $\mu$ s) for universal computer display compatibility
- Independent video/RGB mode horizontal and vertical size and horizontal phase (centering) remote controllable adjustments; allows each projector input to be individually corrected for size, aspect ratio and phase position
- Low noise, DC "smart" fans for improved cooling efficiency
- Wide range of screen sizes up to 20' x 15'

For CAD/CAM/CAE applications that require very high resolution, real time imaging together with the flexibility of large screen display of other lower resolution computer sources, as well as NTSC/PAL/SECAM composite video

Order Code 90-00190 .....\$23,995.00

## Retrovision 400

- Rear screen projected image provides very high light output and contrast
- Ideal for use in high ambient light environments where mobility is an important factor

The Retrovision 400 is a completely self-contained, stand alone, rear screen projection system with stereo audio capability specifically designed for applications which require the flexibility of ease of transport and operation in very high ambient light environments. Through the combined use of rear screen projection and a large 67" (1.7m) high performance fresnel screen, the Retrovision 400 delivers pictures with outstanding contrast and brightness. The Retrovision 400 is equipped with stereo audio inputs and 2 x 15W 2-way bass reflex loudspeakers for truly stand alone operation.

Designed to provide the ultimate resolution and flexibility on screens up to 20' (6.0m) wide, the Barcographics 400 breaks all existing limits of projector performance through its: 15-72kHz scan rate, 100MHz RGB bandwidth, 2.5 $\mu$ sec horizontal retrace time and precision glass optical lens resolution of over 2000 lines

Order Code 90-00226 .....\$11,650.00

## Retrodata 400 RGB

- Independent video/RGB mode H and V size and H Phase (centering) remote controllable adjustments; allows each projector input to be individually corrected for size, aspect ratio and phase position
- Reduced horizontal retrace time (<5.0 $\mu$ sec) for greater computer compatibility
- Low noise,

Barcodata 400

- DC "smart" fans for improved cooling efficiency
- Improved autolock circuitry provides greater immunity to signal noise, VCR playback problems
- Improved "auto tracking" circuits guarantee perfect image quality, convergence from 15-42kHz
- Extended range of operation is possible on a dedicated or slaved basis from 42-54kHz
- Wideband 30MHz RGB amplifier standard (projector inputs are RGB only)
- Optional direct composite video input with 15MHz RGB amplifier

The Retrodata 400 is a completely self contained, stand alone 67" (1.7m) rear screen projection system which offers unparalleled performance, flexibility and ease of operation. The Retrodata 400 offers all of the advantages incorporated in the Retrovision 400 with additional features specifically oriented toward corporate and industrial applications where high light output, contrast and resolution are required for projection in full ambient light environments.

Order Code 90-00166 .....\$17,950.00

## Barcoveision 1000

- 9" CRT technology provides up to twice the light output and resolution of conventional CRTs
- Liquid coupled, high definition, all glass lenses provide resolution of over 2000 lines
- Video mode picture framer; provides adjustable blanking on all four sides of projected image

Developed to provide the ultimate in performance, the Barcoveision 1000 provides over 1000 lumens of light output and an optical resolution of 2000 lines.

These major improvements were made possible through the development and utilization of 9" CRT technology. Together with high definition, liquid coupled glass lenses, these CRTs provide up to double the light output and double the resolution of 5" and 7" CRTs found in most typical projectors.

The Barcoveision 1000 accepts inputs from virtually any NTSC/PAL/SECAM composite video source as well as RGB,S analog from most standard video resolution computer terminals.

Order Code 90-00310 .....\$14,275.00

## Barcodata 1000-RGB

- 9" CRT technology provides up to twice the light output and resolution of conventional CRTs
- Liquid coupled, high definition, all glass lenses provide resolution of over 2000 lines
- 1000 lumen light output
- Independent video/RGB mode horizontal and vertical size and horizontal phase (centering) remote controllable adjustments; allows each projector input to be individually corrected for size, aspect ratio and phase position
- Reduced horizontal retrace time (<5.0 $\mu$ s) for greater computer compatibility
- Low noise, DC "smart" fans for improved cooling efficiency
- Improved auto-locking and "Auto Tracking" circuits guarantee flawless performance from 15-42kHz
- Extended range of operation possible on a dedicated or slaved basis from 42-54kHz
- Wideband 30MHz RGB amplifier standard (projector inputs are RGB only)
- Optional direct composite video input with 15MHz RGB amplifier

The Barcodata 1000 offers all of the advantages incorporated in the Barcoveision 1000 with additional features specifically oriented toward corporate and industrial applications which require very high resolution projection of a wide range of video and computer data sources. Compatible with a number of computer display terminals.

# COLOR MONITORS

## CVS Series Broadcast Color Monitors

- Automatic set-up • Microprocessor based • Password protection
- American Standard Phosphor (ASP) • EBU Phosphor (optional) • Automatic Kinescope Biasing (AKB) • 2 Coded Video Inputs: loophrough and floating • Quad decoder • RGBS input • Component video input (optional) • Internal test patterns • Notch filter/comb filter • Switchable color temperature • Front RGB switches • Simple or full remote
- Master remote for up to 48 monitors • Adjustable aperture correction • Presettable functions per input • Pulse cross
- Underscan/overscan • Safe area • Program display (optional)
- Rackmountable

### Stable and matching pictures

Display controls such as contrast, brightness, saturation and hue are value-related. When set to identical values different monitors will display matching pictures.

AKB-circuitry maintains color temperature independent of tube-aging and ambient temperature.

### Flexible set-up

Settings of display controls, display functions (INT/EXT sync, H&V delay, etc.) and decoder functions (mono, aperture etc.) can be memorized and recalled.

In calibrated position, pictures are displayed as recommended by the EBU and SMPTE.

In preset position, the settings of the display controls, display functions and decoder functions are user selected.

### Flexible, easy color temperature alignment

While manual adjustment is provided for, three different standard color temperatures (6500°K, 3200°K, 9300°K) can be automatically aligned.

### Flexible full modular design

CVS design reflects extreme modularity, independent boards exchange information over an analog and digital bus while a microprocessor controls all communications.

The standard monitor is equipped with an RGBS-input on the RGB-amplifier board and 2 coded inputs on the Quad-decoder board, thus leaving three slots empty. Here other options can be inserted at any time, while no hardware modifications are needed.

### Flexible remote control facilities

As the CVS has full remote capabilities, Barco Industries developed a multi-monitor remote control. From this MMRC all settings of display controls, display functions and decoder functions can be accessed, for any or all CVS monitors of a production gallery.

Also, a handheld keyboard was designed to remotely control a single CVS monitor.

### 14" Monitors

CVS/37/PS/Q CRT Pitch .62mm (330 TV lines) . . . . \$4295.00  
 CVS/37/IH/Q/ASP CRT Pitch .31mm (680 TV lines) . . . . \$5495.00

### 20" Monitors

CVS/51/PS/Q CRT Pitch .68mm (480 TV lines) . . . . \$4650.00  
 CVS/51/IM/Q/ASP CRT Pitch .43mm (700 TV lines) . . . . \$5650.00

### CVS Options

Single remote panel . . . . . \$ 445.00  
 Master remote panel . . . . . 6495.00

 Thoma color analyzer . . . . . 5800.00  
 RM 37 Rackmount kit for CVS 37 . . . . . 280.00  
 RM 51 Rackmount kit for CVS 51 . . . . . 350.00

CVS Series

CTVM4/37

## CTVM 4 Series Broadcast Precision Color Monitors

- ASP • EBU phosphor (optional) • AKB • RGBS input • Component video input (optional) • Internal test patterns • Notch filter/comb filter
- Front RGB switches • Decoded RGBS and B-Y and R-Y outputs
- Pulse cross • Underscan/overscan

### Cathode Ray Tubes

**Delta Gun Dot Mask CRT (D):** If accurate monitoring at every stage, when keen observation for the slightest error in color picture reproduction is vital, the monitor must be equipped with a delta gun dot mask picture tube.

**In-line Gun Dot Mask CRT (I):** Combining the advantages of in-line CRT (no dynamic convergence adjustments) with the resolution of delta gun tubes, the high resolution dot in-line CRT accurately displays every detail.

**In-line Gun Slot Mask CRT (P):** In broadcast situations where color monitors are used for picture identification, a slightly lower standard of reproduction can be accepted and sometimes it may be advantageous to employ monitors fitted with in-line gun slot mask picture tube.

### 14" Monitors

CTVM4/37/IH/N2/ASP In-line Dot Mask CRT  
 CRT pitch .31mm (680 TV lines) . . . . \$8100.00

# COLOR MONITORS

## CM Series

### Professional High Resolution Color Monitors

CM Series high quality color monitors meet all but the most critical professional and broadcast requirements. They are available with standard resolution slot mask in-line gun CRTs or high resolution dot mask in-line gun CRTs. Both provide precise, stable convergence. The CM Series consists of three models: CM 22 (9", portable), CM 33 (14"), and the CM 51 (20")

### CM 22 9" Portable Monitor

- Two composite video inputs, looped through and floating
- One RGBS input plus RGB fast insert
- Automatic Kinescope Biasing (AKB) maintains color temperature and black level stability
- Comb filter, switchable to notch
- AC or DC operation (external 12V battery)
- Built-in audio amplifier, speaker and front panel headphone output
- Pulse cross and underscan
- Blue-only for tape noise evaluation and for monitor adjustment using SMPTE color bars
- Front panel pre-set controls for hue, brightness, chroma and contrast
- Internal/external sync (fast or slow)
- Remote control and tally light
- Modular design: all active and passive components on plug-in boards

### CM 22 Applications

Television picture evaluation; preview of individual video sources; video/data combinations; systems for combined video and graphics display; background and character generators; and editing suites. The CM 22 is also ideal for ENG, EFP and other outside applications where high resolution and color temperature stability must be combined with compact size and portability.

### Decoder

NTSC comb filter (switchable to notch); PAL B, M or N

### CM 22 Options

Rackmount tray for mounting of two CM 22s in a 19" rack

CM 22 CRT pitch .30mm (420 TV lines) . . . . . \$2850.00

### CM 33 14" and CM 51 20" Professional Color Monitors

- Two video inputs, looped through and floating
- One RGBS input (optional)
- Built-in audio amplifier and speaker
- Pulse cross and underscan
- Blue-only for tape noise evaluation and for monitor adjustment using SMPTE color bars
- Front panel presets for controls and color balance adjustments
- Modular design: all active and passive components on plug-in boards

### CM 33 and CM 51 Applications

The CM 33 and CM 51 are especially suited for artistic evaluation of television pictures, video source previewing, graphic systems and character generators, and RGBS viewing or other RGB applications. They are also ideal for applications where video and data are combined.

### Decoder

NTSC notch filter; PAL B or SECAM H/V

### CM 33/CM 51 Options

RGBS inputs; rackmount kit

### CM 33/

HRC/NTSC CRT pitch .43mm (420 TV lines)  
 Without RGB . . . . . \$2850.00  
 With RGB . . . . . 2850.00

### CM 51/C/NTSC

CRT pitch .68mm (480 TV lines)  
 Without RGB . . . . . \$3100.00  
 With RGB . . . . . 3350.00

### CM Options

TR 22 19" rackmount tray (holds two CM 22's) . . . . . \$210.00  
 RM 33 19" rackmount kit for CM 33 . . . . . 280.00  
 RM 51 19" rackmount kit for CM 51 . . . . . 258.00

# MONITOR/DECODERS/ DEMODULATORS

## TVM 3/37 Master Control Monochrome Monitor

- Illuminant D phosphors (6500°K color temperature) • Switchable notch filter • Pulse cross and underscan • Front panel presets for brightness and contrast • Internal/external sync • Remote control • Modular design

The TVM 3/37 precision monochrome monitor is a measuring instrument for broadcast, industrial and educational applications where high quality, transparency and reliability are important. Derived from the CTVM master control monitors, the TVM 3/37 produces sharp, clear and stable pictures.

### Applications

Any quality-oriented, monochrome application, such as program evaluation or viewing that does not require color information. The unit can also be used for camera and telecine alignment.

TVM 3/37	14" Monochrome Monitor	.....	\$3495.00
RM/37	Rackmount for TVM 3	.....	.280.00

## PCD 3 Series Chroma Decoders

Two decoder models handle every standard and application. Both provide either RGBS or Y/R-Y/B-Y outputs from one of two encoded video inputs. The line includes a cabinet for housing the decoders.

The PCD 3 NTSC 5 is a precision complex comb filter decoder using advanced, 3-line adaptive CCD comb filter techniques. It is an NTSC-only unit. The cabinet holds one decoder.

### The PCD 3 Multi-standard Decoder

Offers a choice of NTSC; PAL B, M or N; and SECAM. It uses a 2-line comb filter switchable to notch (NTSC). Two units will fit in the decoder cabinet, in any combination of standards.

### ASMD 3 Automatic Decoder Controller

Provides automatic signal identification and decoder switching for both models. It can accommodate up to seven different color systems.

### Applications

Decoding of any composite video signal to RGBS or Y, R-Y, B-Y for various RGB or component signal processing applications; input module for precision standards converters and signal processing applications, like chroma keyers and paintboxes.

## VSD Series Television Demodulators

- High grade video and sound signals • Overall gain independent of picture content • Automatic Gain Control (AGC) eliminates the effects of variable field strength resulting from different input signals • Video and sound level meter • Relative indication of field strength on front panel meter • Excellent 2T and 20T pulse response • Modular, all solid-state design

VSD demodulators are used where high grade video and sound signals from a broadcast signal are needed. Three models are available: VSD 1 Multi-channel, multi-standard; VSD 2 Multi-channel single standard (VSD 1 and VSD 2 have five presettable channels); and the quartz-controlled VSD 2/X single channel, single standard, which is available for any TV channel between 5 and 890MHz.

TVM/3/37

## LIGHTING EQUIPMENT

### Slimline II 2000W Tungsten-Halogen Light

Lightweight and portable, designed for broad fill applications. It is ideal for TV, motion picture, still photography and provides a flat even pattern of light over a wide area.

Slimline II comes with 4-leaf barndoors and accepts a wide variety of accessories. Lamping options include a complete range of 120/240V lamps for AC or DC operation.

### Mini-Mac 650 and Mini-Mac 1000 Tungsten-Halogen Broad Lights

The Mini-Mac 650 and Mini-Mac 1000 Tungsten-Halogen Broad Lights feature a rugged, compact design ideal for general lighting applications. Mini-Mac's provide a wide range of lamping options in different wattages and produce an even pattern of light over a wide area. 4-leaf barndoors included.

The Mini-Set 1000 flood and set light is indispensable anywhere a wide wash of light is required. It is available with stand or C-clamp mounting and comes with 2-leaf barndoors. Full range of lamping options available.

### Cyc Strip Lights

Available in 9 different models in a wide range of lengths and circuits. Cyc strips provide a clean, even illumination for cyclorama backgrounds. Cyc Strips can be overhead or floor mounted and accept a full range of mounting hardware, gel frames, safety frames and plug connectors.

### Focusing Fresnel Spotlights

Deliver a superior filament-free illumination and provide a smooth transition from flood to spot. Durable, well ventilated spotlights from 300 to 5000W. Their fresnel lenses from 3-13" make them ideal for TV and motion picture applications.

They accept a complete line of accessories including barndoors, scrims, gels, snoots, cables, hangers and stands.

### Baby Keg Spotlight with Barndoors

This unit is pole operated and features an improved state-of-the-art medium bipost lamp socket. It has a focusing range of better than 10:1 and includes 4-leaf barndoors.

# VIDEO CONTROLLER

## BCD-4000 Professional Video Controller

- One expansion slot
- Tape and disc
- Disc and disc
- Tape and tape
- Full function control variable speed
- Edit function select 2 VTR editor option
- RS-422 SMPTE protocol
- 2 VTR SMPTE code
  - Read and write
  - Non-drop frame
  - Drop frame
  - EBU 25 fps (optional)
- Vertical interval video switching
- 4 "GPI Triggers"

The BCD-4000 Professional Video Controller for slot-compatible IBM PC type computers controls virtually all industrial and broadcast video tape and disc machines as well as many other video devices.

The controller can simultaneously control a pair of Industrial or Broadcast video tape or video disc machines with full variable speed, and function select. RS-232 and RS-422 SMPTE protocols are available for 1", Betacam, M-II and other sophisticated devices. The unit can be equipped with a built-in 2-machine editor.

The main CPU board occupies one expansion slot in the computer with no adaptors, making it suitable for advanced "AT" and 386 machines. The board is short enough to fit small computers.

For Interactive Video Systems, the controller responds to the same command protocol as BCD's VIPc with the added capability of interrupting the host computer on the user's choice of interrupt lines.

For video editing and animation support, the unit may be equipped to read and write SMPTE Time Code: Drop Frame, Non-Drop Frame, or 25 fps EBU Time Code.

The optional internal video editor can control any two appropriate video tape or disc machines for straight-cuts editing. BCD's EDL-4000 Edit Decision List Management system takes full advantage of all the features.

The unit is currently at home in production, post-production and video animation environments.

### Supported Machines

#### Sony Disc

LDP-1000, 2000, 180

#### Sony Tape

Type V, VII, IX, BVU, BVH, SLO-383, SLO-305, SLO-325

#### Panasonic Disc

TQ-2023F, TQ-2024F

#### Panasonic Tape

NV-8200, 8170, 9240, 9600, 8500, AU-700, M-II, AG-6100, 6200, 6300, 6500, RECAM with adaptor

#### JVC Tape

CR-850U, CR-8250, BR-8600, BR-6400, BP-5000

#### Pioneer Disc

LD-V 1000, 2000, 3000, 4000, 6000, 6010, LP-700, CLD-900, 909

#### Hitachi Disc

VIP-9500, 9550

#### Philips Disc

LD-935/17

#### MAST/Keystone Slide

System 2 Random Access

### Specifications

#### Video Machine Control I/O

##### Parallel Outputs

26 Open Collector  
40 ma. current sink  
15V max.

##### Analog Output

0-10VDC

##### Parallel Inputs

16 LSTTL Schmitt Trigger 14V max.

##### Serial I/O

RS-232  
RS-422  
Sony Type V, VII, IX

##### Auxilliary Trigger

4 GPI Opto-Isolator

##### Video Audio Signal Control

###### Inputs

2 audio line level Ch. 1 and Ch. 2  
2 video 1V p-p 75 ohm unterminated  
Player and Aux.  
1 tape address code, line level

###### Outputs

2 audio line level, Ch. 1 and Ch. 2  
1 video 1V p-p into 75 ohm, selectable  
Player/Aux./Off  
1 tape address code, line level

#### BCD-4000 Standard System

1 Machine Control with SMPTE Read . . . . . \$1750.00  
1 Machine Animation Option. . . . . 295.00

#### Second Machine Control Option

Includes SMPTE Read . . . . . \$1100.00  
2 Machine Video Editing Option. . . . . 495.00  
SMPTE Generator Option (per machine). . . . . 395.00

EDL-4000 Edit Decision List Software . . . . . \$595.00

# VIDEO CONTROLLER

## VIPc Video Disc/Tape Controller

The VIPc is a microprocessor based video tape/video disc controller for the IBM PC and similar computers. The VIPc controls an industrial style video tape recorder/player and/or laser video disc player or one of each.

Originally designed for Computer Assisted Video Instruction, the VIPc fills other needs for precision video machine control: Cable TV Headend control, Multiple VTR control and multiple video disc control for simulations, and Point-of-Purchase displays.

### Mother Board

VIPc's "Mother Board" plugs into a computer expansion slot and may host one or two Expansion Modules to control tape, disc, one of each, or two disc. The Mother Board contains a microprocessor and up to 24K of ROM and 4K of RAM. The board uses two bi-directional 8088 I/O port addresses in the host computer, typically 3C2 hex and 3C3 hex. All communication is in the form of ASCII characters using mnemonic 4 character commands.

### Video Tape Module

The VIPc command syntax is very straightforward for either tape or disc. All commands consist of four characters, sometimes followed by a number. For example Stop, Play, FFWD, REWD and Pause are typical VTR commands.

"FIND 1000; PLYB 2000" causes the device to play both video and audio from frame 1000 to frame 2000.

### Video Disc Module

The VIPc-Disc Module operates in the same manner and with the same commands as the VIPc-Tape Module.

Because different disc players require different commands to perform similar actions, BCD has incorporated on-board firmware to interpret the user's commands into those appropriate for a particular disc player. The VIPc command to select disc type is "Type X" where X is the disc type.

This flexibility enables the user to control various disc players by merely changing the "X" designation.

The VIPc-Tape features frame-accurate location or video tape scenes using BCD's Absolute Addressing Code which numbers each video tape frame and provides a Tape I.D. number. The BCD frame code is compatible with all other BCD products for tape interchangeability. Optionally, the VIPc can read standard SMPTE time code for tape positioning.

### Monitor Switch

Each module includes a small external video-audio switch box which connects the VIPc to the video player and TV monitor. Typically, it switches between computer composite video and player video, at the precise frame. Alternately, a special jack provides TTL trigger signals to switch some combination TV monitors from RGB Computer mode to Composite Video mode. The player itself is controlled through a cable from the switch box.

The switch box for VIPc-Disc has three disc control connectors for players requiring RS-232 Serial, 8-bit parallel or bit-stream (consumer) communications.

### Video Tape Animation

The Video Tape Animation option equips the VIPc tape system to: read standard SMPTE time code and to perform short-duration insert edits with an appropriate VTR. The input source may be any recordable video signal, camera or computer graphics.

### VTR Types:

#### Sony

Type V Series (VP-5000 to VO-5850), BVU Series, SLO-323, SLP-303, SLO-325, SLP-305, SLO-383, VO-2011, VO-2611, VO-2811, VO-2850, VO-2860.

#### Panasonic

NV-9240, NV-9600, AU-700, NV-8200, NV-8170, NV-8500, AG-6100, AG-6200, AG-6300, AG-6500.

### JVC

BR-6400 with modification. CR-850U.

### Disc Player Types:

#### Pioneer

LD-V1000, LD-V2000, LD-V3000, LD-V4000, LD-V4200, LD-V6000, LD-V6010, PR-8210, LD-700, CLD-900.

#### Sony

# VIDEO TAPE CONTROLLER/ COMPUTER CONTROLLED VIDEO SOFTWARE

## VideoLink 232 Video Tape Controller

The 232 lets computers control industrial type video tape recorders with frame-accurate precision via a standard RS-232 Serial Port. The internal microprocessor and up to 16K of RAM/ROM translates simple user commands into complex VTR operations.

The VideoLink features frame accurate location of video tape scenes using BCD's Absolute Addressing which numbers each video frame and provides a Tape I.D. number. The BCD frame code is compatible with all other BCD products. Its internal video/audio switcher permits one TV monitor to display composite video from either tape or computer.

A special terminal provides TTL trigger signals for auxiliary device control. With accessories, this output can automatically switch a Sony PVM Series monitor from RGB for computer display to composite video for tape display.

The VideoLink command syntax is straightforward: "FIND 1000; PLYB 2000" causes the system to play both video and audio tapes from frame 1000 to frame 2000.

Originally designed for computer assisted video instruction, the VideoLink fills other needs for precision video tape control: Cable TV headend control, multiple VTR control for simulations, point-of-purchase displays and video disc simulation.

SMPTE Read option equips the VideoLink to read standard SMPTE time code as well as BCD's frame number code.

The VideoLink animation option equips the VideoLink to: read standard SMPTE time code and to perform short-duration insert edits with an appropriate VTR. The input source may be any recordable video signal, camera or computer graphics.

## VTR Types:

## VideoBase Computer Controlled Video Software

VideoBase is a small memory-resident program which operates a BCD VIPc, VideoLink or BCD-4000 from within almost any program. The Database system you use now is ready to be a video database. Even your word processor can control video disc and tape.

The five functions Play, Stop, Fast Forward, Rewind and Pause are always available by pressing the ALT key in concert with one of the cursor keys.

The video scene is defined by two frame numbers on the screen. To play a scene with VideoBase, just position the cursor on the first frame number and press a pair of special "hot keys," usually the ALT and the right shift keys. VideoBase then scans the screen until it locates the cursor and the first (beginning) frame number. Then it continues scanning until it finds another number, the ending frame number. It then sends the appropriate commands to the BCD controller.

Alternately, you may define the frame numbers by enclosing them with brackets. Pressing the "hot keys" with [2000] {3000} on the screen will play the video from frame 2000 to frame 3000. If only the first number is present, the BCD Controller will "press the Pause button" at that frame.

VideoBase takes full advantage of the VIPc's ability to control both disc and tape players.

Beginning and ending frame numbers of scenes may be expressed in either frames or SMPTE format. This means that frame 18000 is the same as 00:10:00:00 or ten minutes into the program. The format choice is yours. If your BCD controller is equipped to read SMPTE code, VideoBase will handle that, too.

With so much power and so many options, you'll be surprised how easy VideoBase is to configure. Just select the options you want from the menu in the VBINSTALL program.

All you need for VideoBase is an MS-DOS computer that uses the equivalent of the IBM Color Graphics Adaptor or Monochrome display and, of course, a BCD VIPc, VideoLink or BCD-4000.

# VTR CONTROL INTERFACE/SOFTWARE

## 450 VTR Control Interface

The 450 VTR Control Interface permits any Apple II, II+ or IIE computer to control industrial type video tape recorders and/or players with frame-accurate precision. The single board fits into a peripheral slot (typically #4) in the computer, and includes all required video, audio and VTR control cables.

Solid-state video/audio switching displays composite video from either the computer or the VTR.

Standard software permits encoding absolute frame addressing of video tape for frame-accurate tape positioning.

The standard software includes the Logger II utility for defining "In" and "Out" points of scenes and saving the file to disk. Additionally, OPSUBS (Operational SUBroutineS) provides all the BASIC subroutines required for integrating precision VTR control into your custom BASIC programs. Drivers for Pascal are available at additional cost.

Applications for precision random access video tape include education, training, point-of-purchase and a multitude of other image storage/retrieval uses including X-ray and museum filing.

Many users pre-produce and evaluate programs before mastering video discs.

## VTR Types:

### Sony

Type V Series (VP-5000-VO-5850), BVU Series, SLO-323, SLP-303, SLO-383, SLP-305, SLO-325, VO-2011, VO-2611, VO-2811, VO-2850, VO-2860.

450 ..... \$595.00

## Software for the Model 450 Logger II

Logger II is an enhanced version of Logger I which is provided with each BCD 450 VTR Control Interface. Logger II is a standard part of BCD's The Instructor authorizing system. If you purchase The Instructor, you do not need another copy of Logger II.

Logger II in concert with the BCD 450 VTR Control Interface lets you control most VTR functions from your Apple keyboard. You can write BCD frame code (and read it), mark in and out points of video scenes, Go To and play specific scenes, label scenes (up to 30 characters), adjust "preroll" times, and even read SMPTE time code at extra cost.

## Flexible Display

Logger II displays the in and out points of scenes and current tape position as Hours:Minutes:Seconds:Frame, or Frame Numbers or both. HH:MM:SS:FF: display is selectable for either 30 frames/second or 25 frames/second for U.S. or European systems.

450

Additionally, Logger II allows global up/down changes of the tape log, printing of tape logs in HH:MM:SS:FF: or Frames format, and Go To from its main menu or the Change File sub-menu.

OPSUBS .....	N/C
Logger II .....	N/C
Logger II SMPTE .....	\$125.00

## The Instructor

Originally designed for those who must produce an Interactive Video lesson "by tomorrow afternoon", The Instructor provides a myriad of selections for the creative author.

Based upon the 450 VTR Control Interface, The Instructor almost holds your hand, prompting you to select "Pages" in the form of text, multiple choice, keyword, video, audio, graphics, menu, random, or even activate your video tape recorder's Record function.

## The Instructor Knows the Score

Not only the student's final percentage, but every response to every question is automatically saved to the disk for your analysis.

Precision Video Tape Control, The Instructor includes the Logger II program which makes the computer remember frame numbers while you concentrate on lesson content. The system encodes a specific tape I.D. number on each video tape and disk tape log so The Instructor can be sure your student has inserted the current tape into the VTR.

The Instructor 450 system is frame-accurate so you can update existing tapes to become interactive. For video facilities that already have SMPTE time code, The Instructor's SMPTE option can read that too.

The Instructor .....	\$395.00
The Instructor SMPTE .....	520.00

## Super Pilot Library Routines

### Super Pilot + Video

Apple Super Pilot is a versatile Pascal-based authoring language. Now, supplemented by BCD's routines, Super Pilot can control industrial video tape machines with frame-accurate precision.

The BCD Apple Super Pilot Library Routines are supplied on a standard Apple Disk, to be transferred to your Author Master Disk. Thereafter, each student lesson disk you initialize will contain the BCD VTR operating routines. The BCD SPL package also contains the BCD standard disk, including Logger I and Logger II.

# OSCILLOSCOPE

## 9020 OSCILLOSCOPE

- 20MHz, dual trace
- Delayed sweep
- Component tester
- Variable hold off
- Beam finder
- Includes two X1/X10 probes

The 9020 is a 20MHz, dual trace oscilloscope with an abundance of features to satisfy any use in the education, field service, hobby and development environment.

The 9020 is equipped with a delayed sweep feature usually available on higher bandwidth oscilloscopes. This makes easy waveform analysis.

The built-in component tester makes the 9020 both an oscilloscope and a component curve tracer. This function will give the user a quick good/bad indication of resistors, capacitors, inductors, diodes, transistors, transformers etc. The testing can be done on components both in or out of circuit.

Other useful features include the variable hold off function for obtaining a stable display when measuring an aperiodic signal and the beam find function for locating the beam tracing itself regardless of any knob settings.

The switchable X1/X10 probes offer more sensitivity at low frequency measurements and less circuit loading at high frequency measurements.

Variable Control	5:1; max clockwise increases sensitivity five times to 1mV/div, 10MHz (-3dB) approx. 5% error	Mode	Normal, Search, Delay
Input Impedance	1M ohm, 25pF (2%)	Multiplier	10 turn variable (X1 to X10)
Input Max. Voltage	400V (DC + pos peak AC); 500V p-p AC at 1kHz or less	<b>X - Y Operation</b>	
Operating Modes	CH1, CH2, CH1 & CH2, ALternate, CHOPped (Approx. 500KHz)	X - Y Mode	Selected by X - Y switch
Algebraic Addition	CH1 + CH2; or -CH1 + CH2	Bandwidth	DC - 2MHz (3dB), Y, CH1; X, CH2
Inverter	CH1 only	Phase Shift	Less than 3° (100KHz)
<b>Timebase</b>		<b>Component Tester</b>	
Deflection Factor	20 calibrated steps: 0.1us/div to 0.2s/div (1-2-5 sequence); uncalibrated VAR control extends deflection factor to 0.5s/div.	Test Voltage	8.6Vac (rms) Max. Open Circuit
Accuracy	Less than 3% (10°C to 35°C)	Test Current	Max. 28mA (Shorted)
Expansion	X10, Accuracy less than 5% (0.2us, 0.1us Uncalibrated)	Test Frequency	50Hz:60Hz
Single Sweep	SINGLE - RESET switches with LED	Components	Capacitor, Inductor, Diode, Trans stor, Zener, etc.
Holdoff	10:1, HOLD-OFF variable control increases holdoff time.	<b>Ambient Operational Conditions</b>	
<b>Trigger</b>		Normal Range	10° to 35°C; R. Humidity 80% max.
Triggering Modes	AUTO (peak) or NORM	<b>Power Consumption</b>	Approx. 35 watts
Source	CH1, CH2, ALT (CH1/CH2), EXT.	<b>Dimensions</b>	310mm (wide) 160mm (high); 400mm (deep).
Coupling	AC, DC, LF, HF	<b>Weight</b>	9Kg
		<b>Accessories</b>	Power cord, Operator's Manual 2 Probes (10:1/1:1)

#### General

Cathode Ray Tube	150mm rectangular with 8 x 10 division internal graticule; approx. 2KV acceleration potential; phosphor P31.
Trace Rotation	Corrects trace tilt; adjustment is made on right side of instrument.
Beam Finder	Returns trace to view regardless of control settings.
Z-Modulation	Positive TTL level, >50ns width pulse can blank trace of an intensity.
Ramp Output	Sawtooth wave approx. 5V p-p.
Calibrator	1KHz (5%), 0.2V p-p (2%) Square Wave.

Price ..... \$499.00

# VIDEO CABLE

## 75 ohm Precision Video Cables

The 9231 is a precision 75 ohm Video cable manufactured with rigid control of concentricity and all dimensional tolerances offering superior return loss characteristics, a quality Video transmission cable which provides exceptional picture definition and eliminates problems resulting from periodicity. It has a non-contaminating PVC jacket for more flexibility. The double braid 8281 75 ohm Video cable is made to tight tolerances for excellent return loss performance. Our 8279

miniature 75 ohm Video cable is for applications where space is critical. The gray PVC and black polyethylene jackets are made of non-contaminating, non-migratory compounds.

Typical Application: Video signal transmission in Color and Monochrome TV studios.  
100% Sweep Tested.

## ELECTRONIC CABLE TERMINOLOGY

**ampere**—A standard unit of current. Designated as the amount of current that occurs when one volt of emf is applied across one ohm of resistance. An ampere of current is produced by one coulomb of charge passing a point in one second.

**analog**—Representation of data by continuously variable quantities.

**bandwidth**—The difference between the upper and lower limits of a given band of frequencies. Expressed in hertz.

**baud**—Unit of data transmission speed meaning bits per second 500 baud = 500 bits per second.

**bit**—One binary digit.

**bunch strand**—Conductors twisted together with the same lay and direction without regard to geometric pattern.

**byte**—A group of adjacent binary digits, (8 bits)

**capacitance**—The ability of a dielectric material between conductors to store electricity, when a difference of potential exists between the conductors. The unit of measurement is the farad, which is the capacitance value which will store a charge of one coulomb when a one-volt potential difference exists between the conductors. In ac, one farad is the capacitance value which will permit one ampere of current, when the voltage across the capacitor changes at a rate of one volt per second.

**concentric stranding**—A group of uninsulated wires twisted together and containing a center core with subsequent layers spirally wrapped around the core to form a single conductor.

**conductivity**—The ability of a material to allow electrons to flow, measured by the current per unit of voltage applied. Also, it is the reciprocal of resistivity.

**conductor**—A material suitable for carrying an electric current.

**CPU**—Central Processing Unit.

**crossstalk**—A type of interference caused by audio frequencies from one line being coupled into adjacent lines. The term is loosely used also to include coupling at higher frequencies.

**current, alternating (ac)**—An electric current that periodically reverses direction of electron flow. The rate at which a full cycle occurs in a given unit of time (generally a second) is called the frequency of the current.

**current, direct (dc)**—Electrical current whose electrons flow in one direction only. It may be constant or pulsating as long as their movement is in the same direction.

**db**—Decibel.

**dc resistance**—See resistance.

**dielectric**—An insulating (nonconducting) medium.

**dielectric constant**—Also called permittivity. That property of a dielectric which determines the amount of electrostatic energy that can be stored by the material when a given voltage is applied to it. Actually, the ratio of the capacitance of a capacitor using the dielectric to the capacitance of an identical capacitor using a vacuum as a dielectric.

**digital**—Representation of data by discrete characters.

**electrostatic**—Pertaining to static electricity, or electricity at rest. An electric charge, for example.

**flex life**—The ability of a cable to bend many times before breaking.

**Hertz**—The unit of frequency, one cycle per second.

**hum**—A term used to describe the 60- or 120-cps sound present in the sound of some communications equipment. Usually hum is the result of undesired coupling to a 60-cps source or to the defective filtering of 120-cps ripple output of a rectifier.

**impedance**—The total opposition a circuit, cable, or component offers to alternating current. It includes both resistance and reactance and is generally expressed in ohms.

**impedance, characteristic**—In a transmission cable of infinite length, the ratio of the applied voltage to the resultant current at the point the voltage is applied. Or, the impedance which makes a transmission cable seem infinitely long, when connected across the cable's output terminals. For a waveguide, it is the ratio of rms voltage to total rms longitudinal current at certain points in a diameter, when the waveguide is match-terminated.

**impedance match**—A condition whereby the impedance of a particular circuit cable or component is the same as the impedance of the circuit, cable, or device to which it is connected.

**inductance**—A property of a conductor or circuit which resists a change in current. It causes current changes to lag behind voltage changes and is measured in henrys.

**interference**—Disturbances of an electrical or electromagnetic nature that introduce undesirable responses into other electronic equipment.

**jacket**—Pertaining to wire and cable, the outer sheath which protects against environment and may also provide additional insulation.

**lay**—Pertaining to wire and cable, the axial distance required for one cabled conductor or conductor strand to complete one revolution about the axis around which it is cabled.

**lay direction**—The twist in the cable as indicated by the top strands while looking along the axis of the cable away from the observer. Described as "right hand" or "left hand."

**leakage**—The undesirable passage of current over the surface of or through an insulator.

**loss**—The portion of energy applied to a system that is dissipated and performs no useful work.

**MHz**—Megahertz (one million cycles per second). Formerly mc.

**micro**—Prefix meaning one-millionth.

**mil**—A unit of length equal to one thousandth of an inch.

**milli**—Prefix meaning one-thousandth.

**nanosecond**—One thousandth of one millionth of a second ( $10^{-9}$  seconds)

**ohm**—The electrical unit of resistance. The value of resistance through which a potential difference of one volt will maintain a current of one ampere.

**periodicity**—The uniformly spaced variations in the insulation diameter of a transmission cable that result in reflections of a signal, when its wavelength or a multiple thereof is equal to the distance between two diameter variations.

**pico**—Prefix meaning one-millionth of one-millionth. ( $10^{-12}$ ).

**picofarad**—One-millionth of one-millionth of a farad. A micro-microfarad, or picofarad (abbreviation pf).

**plasticizer**—A chemical added to plastics to make them softer and more flexible.

**polymer**—A substance made of many repeating chemical units or molecules. The term polymer is often used in place of plastic, rubber, or elastomer.

**Propagation delay**—Time required for a signal to pass from the input to the output of a device.

**pulse**—A current or voltage which changes abruptly from one value to another and back to the original value in a finite length of time. Used to describe one particular variation in a series of wave motions.

**resistance**—In dc circuits, the opposition a material offers to current, measured in ohms. In ac circuits, resistance is the real component of impedance, and may be higher than the value measured at dc.

**RG/U**—"RG" is the military designation for coaxial cable, and "U" stands for "general utility."

**rope strand**—A conductor composed of a center group of twisted strands surrounded by layers of twisted strands.

**separator**—Pertaining to wire and cable, a layer of insulating material such as textile, paper, Mylar, etc., which is placed between a conductor and its dielectric, between a cable jacket and the components it covers, or between various components of a multiple-conductor cable. It can be utilized to improve stripping qualities and/or flexibility, or can offer additional mechanical or electrical protection to the components it separates.

**shield**—A sheet, screen, or braid of metal, usually copper, aluminum, or other conducting material placed around or between electric circuits or cables or their components, to contain any unwanted radiation, or to keep out any unwanted interference.

**shield effectiveness**—The relative ability of a shield to screen out undesirable radiation. Frequently confused with the term shield percentage, which it is not.

**shield percentage**—The physical area of a circuit or cable actually covered by shielding material, expressed in percent.

**skin effect**—The tendency of alternating current, as its frequency increases, to travel only on the surface of a conductor.

**standing wave**—The stationary pattern of waves produced by two waves of the same frequency traveling in opposite directions on the same transmission line. The existence of voltage and current maxima and minima along a transmission line is a result of reflected energy from an impedance mismatch.

**standing wave ratio (swr)**—A ratio of the maximum amplitude to the minimum amplitude of a standing wave stated in current or voltage amplitudes.

**surge**—A temporary and relatively large increase in the voltage or current in an electric circuit or cable. Also called transient.

**sweep-test**—Pertaining to cable, checking frequency response by generating an rf voltage whose frequency is varied back and forth through a given frequency range at a rapid constant rate and observing the results on an oscilloscope.

In CATV applications, the structural return loss sweep-test determines internal reflections in the cable. A high structural return loss is desirable.

**thermoplastic**—A material which will soften, flow, or distort appreciably when subjected to sufficient heat and pressure. Examples are polyvinyl chloride and polyethylene.

**thermosetting**—A material which will not soften, flow, or distort appreciably when subjected to heat and pressure. Vulcanizable. Examples are rubber and neoprene.

**twist**—A type of electrical conductor comprised of a number of tiny threads, each thread having a fine, flat ribbon of copper or other metal closely spiraled about it. Used for small size cables requiring limpness and extra-long flex life.

**transfer impedance**—For a specified cable length, transfer impedance is defined as the ratio of internal longitude in a voltage to external current flow on the cable shield. Transfer impedance is used to determine shield effectiveness against both ingress and egress of interfering signals. Cable shields are normally designed to reduce the transfer of interference—hence shields with smaller transfer impedance are more effective than shields with higher transfer impedance.

**triboelectric noise**—Noise generated in a shielded cable due to variations in capacitance between shielding and conductor as the cable is flexed.

**unbalanced line**—A transmission line in which voltages on the two conductors are unequal with respect to ground, e.g., a coaxial cable.

**unlay**—More than one layer of helically laid wires with the direction of lay and length of lay the same for all layers.

**velocity of propagation**—The transmission speed of an electrical signal down a length of cable compared to speed in free space. Usually expressed as a percentage.

**volt**—A unit of electrical pressure. One volt is the amount of pressure that will cause one ampere of current in one ohm of resistance.

**voltage**—Electrical potential or electromotive force expressed in volts.

**watt**—A unit of electrical power. One watt is equivalent to the power represented by one ampere of current under a pressure of one volt in a dc circuit.

**wavelength**—The distance between the nodes of a wave. The ratio of the velocity of the wave to the frequency of the wave.

## FIBER OPTIC CABLE TERMINOLOGY

**bend loss**—A form of increased attenuation caused by a) having the fiber curved around a restrictive radius of curvature or b) microbends caused by minute distortions in the fiber imposed by externally induced perturbations. Excessive Bend Loss may result from poor drawing or cable manufacturing techniques.

**bend radius**—Radius of curvature that a fiber can bend without breaking.

**buffer**—A protective coating over the fiber.

**carrier frequency**—The electromagnetic wave frequency selected to transmit information. Optical carrier frequency is from the infrared, visible, or ultraviolet spectrum areas ( $10^{12}$  Hz and above).

**cladding**—A low refractive index that surrounds the core and provides optical insulation and protection of the core.

**core**—The light transmission part of the fiber with a refractive index higher than that of the cladding.

**dispersion**—The cause of bandwidth limitations in a fiber. Dispersion causes a broadening of input pulses along the length of the fiber. Two major types are a) mode dispersion caused by differential optical path lengths in a multimode fiber, and b) material dispersion caused by a differential delay of various wavelengths of light in a waveguide material.

**fiber**—A single, separate optical transmission element characterized by a core and a cladding.

**Fiber Optics**—Light transmission through optical fibers for communication or signaling.

**gigahertz (GHz)**—A unit of frequency equal to one billion hertz.

**graded-index**—A type of fiber where the refractive index of the core is lower toward the outside of the fiber. It bends the rays inward and also allows them to travel faster in the lower index of refraction region. This type of fiber provides high bandwidth capabilities.

**Injection laser diode (source)**—Sometimes called the semiconductor diode. A laser in which the lasing occurs at the junction of n-type and p-type semiconductor materials.

**KPSI**—Tensile strength in thousands of pounds per square inch.

**laser**—A coherent source of light with a narrow beam and a narrow spectral bandwidth (about 2nm).

**link**—One transmitter and one receiver.

**light emitting diode (source)**—A semiconductor device that emits incoherent light formed by the P-N junction. Light intensity is roughly proportional to electrical current flow.

**megahertz (MHz)**—Unit of frequency equal to one million hertz.

**micron ( $\mu\text{m}$ )**—Millionth of a meter =  $10^{-6}$  meter.

**mode**—A permitted electromagnetic field pattern within a waveguide fiber.

**modulation**—The coding of information onto the carrier frequency. Modulation means include (among others) amplitude, frequency, or phase, plus many forms of on-off digital coding.

**multiplex**—Putting two or more signals into a single channel.

**nanometer (nm)**—One billionth of a meter =  $10^{-9}$  meter.

**numerical aperture (NA)**—The acceptance angle of the fiber defined as:

$$NA = \sqrt{n_1^2 - n_2^2}$$

Where  $n_1$  and  $n_2$  are respectively, the refractive index of the core and the cladding. Also defined as the sine of the half angle of light acceptance. (See figure under Step-Index.)

**optical waveguide fiber**—A high refractive index core with low refractive index cladding.

**photodetector (receiver)**—Transforms light into electricity. For relatively fast speeds and moderate sensitivity in the 0.75  $\mu\text{m}$  to 0.95  $\mu\text{m}$  area wavelength, the silicon photo diode is most commonly used.

Avalanche photodiodes (APD) combine the detection of optical signals with internal amplification of photo-current. The internal gain is realized through avalanche multiplication of carriers in the junction region. The advantage in using an APD is its higher signal-to-noise ratio, especially at high bit rates.

**pin-diode**—A device used to convert optical signals to electrical signals in a receiver.

**refractive index**—The ratio of light velocity in a vacuum to its velocity in the transmitting medium.

**repeater**—A transmitter and receiver combination used to regenerate an attenuated signal.

**receiver**—An electronic package that prepares the optical signal for conversion to an electrical signal.

**single mode fiber**—A fiber waveguide on which only one mode will propagate. It must be used with single mode sources—lasers—and provides the ultimate in bandwidth transmission. Very small core diameters 2.5  $\mu\text{m}$ , extremely expensive, and difficult to couple due to its small core size.

**skew rays**—A ray which is skew to the fiber axis. If the optical waveguide is straight, a skew ray traverses a helical path along the fiber, not crossing the fiber axis.

**source**—The means (usually LED or laser) used to convert an electrical information-carrying signal into a corresponding optical signal for transmission by an optical waveguide.

**spectral bandwidth**—The difference between wavelengths at which the radiant intensity of illumination is half its peak intensity.

**speed of light (c)**— $2.998 \times 10^{10}$  meters per second.

**splicing**—Permanent joining of identical or similar fiber ends without a connector.

**step-index**—A fiber in which the core is of a uniform refractive index.

**transmitter**—The electronic package that prepares an electrical signal for conversion to an optical signal.

# BENCHER, INC.

333 W. Lake  
Chicago, IL 60606  
(312) 263-1808

# CAMERA STANDS

### M3 Camera Stand - Table Model

Consists of • 4' M3 column • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 baseboard • M3 column/baseboard support base

430-02 .....\$675.00

### M3 Camera Stand - Table Model

Consists of • 5' M3 column • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 baseboard • M3 column/baseboard support base

430-04 .....\$700.00

### M3 Camera Stand - Wall Model

Consists of • 4' M3 column • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 wall mounting brackets

430-06 .....\$575.00

### M3 Camera Stand - Wall Mount - EX

Consists of • 5' M3 column • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 wall mounting brackets

430-08 .....\$600.00

### M3 Column & Carriage Only

Consists of • 4' M3 column • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly

430-80 .....\$550.00

### M3 Column & Carriage - EX

Consists of • 5' M3 column • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly

430-81 .....\$575.00

### M3 Quartz Camera Stand - Bench

Consists of • M3 column (4 1/2' net, 6' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 baseboard • Sidelight arms, pair • Sidelight arm braces, pair • Dual quartz copy lights, pair • Copy light control • Camera stand bench

430-15 .....\$1650.00

### M3 Quartz Camera Stand - Pedestal

Consists of • M3 column (4 1/2' net, 7' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 baseboard • Sidelight arms, pair • Sidelight arm braces, pair • Dual quartz copy lights, pair • Copy light control • Camera stand pedestal

430-16 .....\$1825.00

### M3 Strobe Camera Stand - Bench

Consists of • M3 column (4 1/2' net, 6' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 baseboard • Sidelight arms, pair • Sidelight arm braces, pair • Dual strobe copy lights with power supply • Camera stand bench

430-17 .....\$2350.00

### M3 Strobe Camera Stand - Pedestal

Consists of • M3 column (4 1/2' net, 7' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 baseboard • Sidelight arms, pair • Sidelight arm braces, pair • Dual strobe copy lights with power supply • Camera stand pedestal

430-18 .....\$2500.00

### M3 Quartz Illuma Stand - Bench

Consists of • M3 column (4 1/2' net, 6' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 illuma baseboard • 14 x 17" opal plexiglass • 14 x 17" clear glass • Quartz base illuminator assembly • Sidelight arms, pair • Sidelight arm braces, pair • Dual quartz copy lights, pair • Dual function copy light control • Camera stand bench

430-20 .....\$2000.00

### M3 Quartz Illuma Stand - Pedestal

Consists of • M3 column (4 1/2' net, 7' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 illuma baseboard • 14 x 17" opal plexiglass • 14 x 17" clear glass • Quartz base illuminator assembly • Sidelight arms, pair • Sidelight arm braces, pair • Dual quartz copy lights, pair • Dual function copy light control • Camera stand pedestal

430-21 .....\$2150.00

### M3 Strobe Illuma Stand - Bench

Consists of • M3 column (4 1/2' net, 6' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 illuma baseboard • 14 x 17" opal plexiglass • 14 x 17" clear glass • Strobe base illuminator assembly • Sidelight arms, pair • Sidelight arm braces, pair • Dual strobe copy lights with power supply • Camera stand bench

430-22 .....\$2700.00

### M3 Strobe Illuma Stand - Pedestal

Consists of • M3 column (4 1/2' net, 7' overall) • Auxiliary dual counterbalance springs • Column scale • M3 camera carriage assembly • M3 illuma baseboard • 14 x 17" opal plexiglass • 14 x 17" clear glass • Strobe base illuminator assembly • Sidelight arms, pair • Sidelight arm braces, pair • Dual strobe copy lights with power supply • Camera stand pedestal

## VE-40 VHS Video Head Cleaner

Features a one-piece pushbutton design. Can be used with or without the cleaning solvent that cleans the entire tape travel path.

Effectively cleaning the erase head, audio and control track heads, capstan, pinch rollers and most importantly, the video head drum. The VE-40 is safe for use in all VHS and VHS Hi-Fi stereo format machines as well as VHS format camcorders . . . \$14.95

## VE-41 Beta Video Head Cleaner

Featuring the same technology as the VE-40, built as a two-piece cleaner for Beta format machines. The cleaning solvent is provided in a pressurized applicator. Simply spray the cleaning material before inserting the cleaner into the machine. The VE-41 is safe for use in all Beta and Beta Hi-Fi stereo format machines as well as Beta format camcorders . . . \$14.95

## VE-42 8mm Video Head Cleaner

Designed especially for all 8mm video cassette recorders and camcorders. The VE-42 features abrasive-free polyester spun bonded material that may be used with or without the cleaning solvent. Each cleaner is good for 25 fresh cleanings . . . \$16.95

## VE-17B Video Cassette Title and Label Kit

Self adhesive clear pockets can be affixed to the edge of the cassette shell. Professionally lettered title cards can easily be inserted and quickly replaced . . . \$8.95

## VE-13B Video Lens Care Kit

Dust and fingerprints impair video image quality. Keep your video camera lens clean with the Video Lens Care Kit . . . \$5.95

## VE-16 VCR Dust Cover

Protects against dust, corrosion and scratches. Constructed of a soft gray cloth material that releases humidity but traps out air contaminants . . . \$16.95

## VE-20B Tape Mending Kit

The VE-20B mending and splicing kit is fitted with specially designed clamps to hold tape securely in place while diagonal or butt splices are being made. Supplied with easy to follow instructions in a permanent storage box . . . \$24.95

# MAINTENANCE PRODUCTS

## BK-1 Video Care System

Includes all necessary components for maintaining ultimate VCR performance.

- Unique pushbutton fluid-dispensing VHS video head cleaner
- 10 peel-off video title labels
- 20 re-useable re-record safety tabs
- Anti-static video screen cleaning fluid with cleaning cloth
- Complete instructions enclosed . . . \$24.95

## BK-2 Compact Disc Care System

Includes all necessary components for maintaining ultimate compact disc performance.

- Effective and safe radial compact disc cleaner
- Combination blower cleaning brush
- 10 cotton cleaning tips
- Anti-static cleaning cloth
- Compact disc cleaning fluid
- Complete instructions enclosed . . . \$24.95

## BK-3 Audio Care System

Includes all necessary components for maintaining ultimate audio system performance.

- Carbon fiber record cleaning brush
- Stylus cleaner with inspection mirror
- Cassette head cleaner with cleaning fluid
- Tape mending kit complete with splicing tape and tape cutter
- Complete instructions enclosed . . . \$24.95

## BK-4 Computer Care System

Includes all necessary components for maintaining ultimate computer performance.

- Computer drive head cleaner available in 5 1/4", 3.5 diskette or data cassette
- Combination blower cleaning brush
- Anti-static monitor screen cleaning fluid with cleaning cloth
- Complete instructions enclosed . . . \$24.95

## BK-5 Audio Cassette Care System

Includes all necessary components for maintaining ultimate audio cassette deck performance.

- Electronic tape head demagnetizer
- Audio cassette head cleaner with cleaning fluid
- Audio tape head cleaning tools
- Pocket-size inspection flashlight, using AA batteries (not included)
- 10 Audio cassette title cards
- Complete instructions enclosed . . . \$24.95

## VE-1 Camcorder Care System

Packed in a portable, shock-resistant carrying case, the Camcorder Care System is ready to go anywhere with a camcorder. Containing all the elements to keep camcorders in top performing condition, this system comes complete with:

- A safe and non-abrasive head cleaner available in four different formats: VHS, Beta, 8mm, or C-Format
- Combination blower cleaning brush
- Anti-static lens cleaning fluid with cleaning cloth . . . \$24.95

#### VERTICAL DEFLECTION

Two identical input channels CH1 and CH2  
**Bandwidth:** -3dB. DC to 20MHz (2Hz to 20MHz on AC)  
**Sensitivity:** 2mV/div to 10V/div in 1-2-5 sequence.  
**Accuracy:** ±3%. **Variable Sensitivity:** -2.5:1 range allows continuous adjustment of sensitivity 2mV/div to 25V/div. **Input Impedance:** 1MΩ/28pF. **Input Coupling:** DC—GND—AC. **Input Protection:** 400V DC or pk AC

#### HORIZONTAL DEFLECTION

**Normal Mode Sweep Rate:** 0.5μs/div to 0.2 sec/div, 18 ranges in 1-2-5 sequence. **Accuracy:** ±3% (to 200ns/div.). **Variable Sweep:** -2.5:1 allows cont coverage from 0.5μs/div to 0.5 sec/div. **Store Modes Sweep Rate:** 0.5μs/div to 50 sec/div, 25 ranges in 1-2-5 sequence. **Accuracy:** ±3% (to 200ns/div). **Variable Sweep:** -2.5:1 allows cont. coverage from 0.5μs/cm to 50μs/div (sampling only) **X Expansion:** X10 push button gives fastest speed of 50ns/div. **Accuracy:** ±3% (50ns ± 5%)

#### TRIGGER

Variable level control with Auto trigger. In Auto, timebase free-runs when insufficient signal is present or outside range of input. **Source:** Internal CH1 or CH2, External. **Slope:** Positive or negative. **Coupling:** DC, AC or TV (active sync separator with line frame selected by timebase switch between 50 and 100 μs/div). **Sensitivity Int.:** DC coupled 0.3div to 2MHz, 1div to 20Hz. AC coupled 0.3div 10Hz—2MHz 1 div, 4Hz—20MHz. **Ext.:** DC coupled 150mV to 2MHz, 600mV to 20MHz. AC coupled 150mV, 10Hz to 2MHz 600mV, 4Hz to 20MHz. **Ext. Input Impedance:** 100kΩ/10pF. **Ext. Input Protection:** 250V DC or pk AC

#### DISPLAY MODES

**Single trace:** CH1 or CH2. **Dual trace:** In Normal, Chopped or Alternate, Modes are auto selected by the t.b. switch. Between 0.5μs/div and 0.2ms/div the Alternate Mode is selected while on ranges slower than 0.2ms/div Chop is selected. The chop freq. is 500kHz (Simultaneous capture in store modes). **Add:** CH1 and CH2 Added to give the algebraic sum of the two channel inputs. (Normal mode only) **Invert CH2:** CH2 may be inverted. When used with Add mode, gives algebraic difference of two channels. **X-Y:** CH1 = X, CH2 = Y. (Normal mode only)

#### DIGITAL FACILITIES

**Store Size:** 1024 x 8-bits per channel. **Vertical Resolution:** 1 in 256 approx. 30 steps/div. **Horizontal Resolution:** 1 in 1024 approx. 100 samples/div. (0.05ms/div range on Dual is 50 samples/div). **Expansion:** X10 reduces resol. by 10, all ranges. **Sample rate:** 2MHz (0.5μs) reducing in proportion with timebase. **Dot Joining:** Linear interpolation between samples.

#### DIGITAL DISPLAY MODES

**Roll:** Stored data and display updated continually. (t.b. ranges 50sec/div to 0.05ms/div). **Refreshed:** Stored data and display updated by triggered sweep. (t.b. ranges 50 sec/div to 0.05ms/div). **Sampling:** Stored data and display updated from trigger point in armed mode. **Armed:** Freezes store at end of triggered sweep. **Hold—All:** Freezes store immediately. **Hold—CH2:** Freezes CH2 data immediately. **Pre-trigger Storage:** Roll mode only, switchable for 0%, 25%, 75% and 100% of full store pre-trigger

#### PLOT OUTPUT

**Analog output of the stored display. Y Output:** CH1 or CH2. Amplitude 100mV/div (nominal). **X Output:** X ramp via 4mm socket. Amplitude 100mV/div (nominal). **Output Sweep Rate:** Selected by Time/cm (main t.b.) range 50sec/div to 50ms/div in 1-2-5 seq. **Output Impedances:** 100Ω. **Pen Lift Output:** High output to indicate penlift. TTL open collector. Max. Voltage 15V. Max. Sink Current 8mA.

#### GENERAL

**Calibrator:** 1V ± 2% square wave at approx. 1kHz  
**Z Mod Input:** DC coupled, 2V visible mod. Sensitivity + 40V cut off sensitivity. Input impedance: 10kΩ/10pF approx. Max. input: 100V DC or pk AC. **CRT:** 8 x 10cm rectangular mono-accelerator. **Accelerating Voltage:** 2kV **Supply Selectable:** 100V, 120V, 220V, or 240V ± 10%. 45 to 400Hz, 40W approx. **Safety:** Designed for IEC 348 Cat 1. **Operating Temp. Range:** 0 to 50°C (+ 15°C to 35°C for full accuracy). **Dimensions:** 140 x 305 x 460mm. (5.5" x 12.0" x 18.1") **Weight:** 6kg approx

### ADDITIONAL SPECIFICATIONS 2521 ONLY

#### AUTOMATIC CURSOR MEASUREMENTS

**Accuracy:** Time = 0.1% of full scale for ranges 50s/div to 0.05ms/div. and ±3% of f.s. for 20μs/div to 5μs/div. Voltage 3% of rdg. ±0.5% of f.s. ±1 digit

- 20 MHz realtime bandwidth
- 20 MHz storage bandwidth
- RS-232 interface on 2521
- Automatic time and voltage measurement on 2521
- 2521 accepts 2502 waveform processor
- 2 mega-sample/sec sampling rate
- 1k memory per channel
- Equivalent time sampling
- Plot output
- Trace hold capacity
- Pre-trigger capture - 25%, 75%, 100%
- Post storage expansion of stored waveform

2520 ..... \$1990.00  
 2521 ..... 3050.00

#### DIGITAL PLOTTER INTERFACE

Output of data and range via RS423 interface to a digital plotter. **Scales:** Automatically printed. **Graticule:** Available for plotting at the completion of a plot cycle. **Colors:** Color pens automatically selected for CH1, CH2 and graticule.

#### RS423 INTERFACE

**Read and Write Functions:** Baud rate: 300, 1200 or 9600. Stored Data input/output. **Data Format:** Binary, Decimal, Octal and string length. **Timebase Range:** up to 50μs/div. Hold display and Hold CH2. **Write Only:** Arm, Release, Analog plot, Digital plot, Local, Text. **Read Only:** CH1, CH2 and Dual, Attenuator and Timebase setting current and stored.

#### ADDITIONAL OUTPUT

Line output 1V approx.

#### ACCESSORIES SUPPLIED

Instruction Manual, Schematic Diagram and Parts List, Two 10:1 Probes, Spare Fuse.

#### OPTIONAL ACCESSORIES

Front Panel Cover—LC-130, Rack Mount Kit—RM-30, Protective Carrying Case—LC-30, 10:1 Direct Probe—PR-40, Deluxe 10:1 Direct Probe—PR-37, Deluxe 100:1 Probe—PR-100

### 2502 Waveform Processor

- Optional accessory to 2521
- Signal capture functions
- Reference stores 1 to 5 permit waveforms to store/recall
- Magnify or attenuate stored waveforms
- Arithmetically manipulate stored signals
- Filters noisy signals

2502 ..... \$740.00

### SPECIFICATIONS (Model 2502)

#### SIGNAL CAPTURE FUNCTIONS

**Signal Averaging\*\*:** Up to 256 averages allowing 1, 4, 8, 16, 32, 64, 128 and 256 averages. **Capture\*:** Arms scope for signal capture. **Capture and Repeat:** Arms and automatically applies previous post-storage functions.

#### POST-STORAGE DISPLAY FUNCTIONS

CH1 x CH2†, CH1 + CH2†, CH2 CH1†, CH1 CH2†, Copy CH1 → CH2\*, Copy CH2 → CH1\*. **Trace Magnification Attenuation:** Multiplies trace from x 3.98 to x 0.06 in 250 selectable steps. Gain is displayed on screen.

**Filter\*:** 6 selectable stages/timebase range. **Invert\*, Restore, Position:** Moves trace and datum in X and Y planes and cursor in X plane. **Frequency:** Calculates and displays signal frequency measured between cursors.

#### REFERENCE STORES

**Store Number:** Select 1 of 5 stores to retrieve or save. **Save/Recall:** Save or recall selected store. **Additional Control Facilities via RS423:** \*Write only, \*\*Read and write. †zero datum referred to centre line of screen.

#### DIMENSIONS

146 x 92 x 30mm (5.75 x 9.2 x 30")

**WEIGHT** 0.23kg (0.5lbs)

# OSCILLOSCOPES

1590A

## 1590A 100MHz, Quad Input, Dual Independent Time Base Oscilloscope

- 1 mV sensitivity to full bandwidth
- 500  $\mu$ V/div cascade sensitivity to 70 MHz
- 23 calibrated sweeps
- Rectangular CRT with internal graticule and scale illumination
- 16 kV accelerating voltage
- V Mode—displays four signals unrelated in frequency
- Switchable input impedance
- Alternate timebase operation
- Signal delay line
- 20 MHz bandwidth limiter
- Lighted pushbutton function switching
- Voltage and current probe calibrators
- Video sync separators
- Channel 1 output

1590A . . . . . \$1886.00

1570A

## 1570A 80MHz, Quad Input, Dual Time Base Oscilloscope

- 1 mV/div sensitivity to full bandwidth
- 500  $\mu$ V/div cascade sensitivity to 40 MHz
- 22 calibrated sweeps
- Rectangular CRT with internal graticule and scale illumination
- 12 kV accelerating voltage
- V Mode—displays four signals unrelated in frequency
- Alternate timebase operation
- Signal delay line
- 20 MHz bandwidth limiter
- Lighted pushbutton function switching
- Video sync separators
- Channel 1 output

1570A . . . . . \$1464.00

### SPECIFICATIONS—Model 1590A VERTICAL AMPLIFIERS (CH 1 and CH 2)

**Deflection Factor:**  
Standard: 5 mV/div to 5 V/div in 10 ranges, 1-2-5 sequence, each with vernier adjustment. LED UNCAL reminder.  
X5 Gain: 1 mV/div to 1 V/div. LED X5 GAIN reminder.  
Cascaded: (CH 1 and CH 2): 500  $\mu$ V/div.  
**Accuracy:**  
 $\pm 3\%$  (+10° to +35°C).  
 $\pm 5\%$  (0° to +50°C).  
 $\pm 8\%$  (cascaded operation, CH 1 to CH 2).  
**Frequency Response:** (X1 or X5 vertical gain)  
DC: DC to 100 MHz (-3dB)  
DC to 120 MHz (-6dB)  
DC to 70 MHz (cascaded)  
AC: 5 Hz to 100 MHz (-3dB)  
5 Hz to 120 MHz (-6dB)  
7 Hz to 70 MHz (cascaded)  
**Rise Time** 3.5 ns or less  
**Bandwidth Limiting:** Response can be limited to approx. 20 MHz by bandwidth limit switch.  
**Input Impedance:** 1 M $\Omega$   $\pm 2\%$  shunted by 28 pF  
**CH 2 Polarity:** Normal or inverted.  
**Maximum Input Voltage:**  
400 V(DC - AC peak) or 800 VAC p-p  
**Crosstalk:** -40 dB minimum.  
**(CH 3 and CH 4)**  
**Deflection Factor:**

1:1—0.1 V/div  $\pm 2\%$ , 10:1—1 V/div  $\pm 2\%$   
**Frequency Response:** DC to 100 MHz (-3 dB)  
DC to 120 MHz (-6 dB)  
**Rise Time:** 3.5 ns or less.  
**Input Impedance:** 1 M $\Omega$   $\pm 2\%$  shunted by 22 pF  
**Input Coupling:** DC only.  
**Maximum Input Displayed:**  
1:1 DC Component— $\pm 0.5$  V.  
AC Component—1 V p-p.  
10:1 DC Component— $\pm 5$  V.  
AC Component— $\pm 10$  V p-p.  
**Maximum Input Voltage:** 400 V (DC + AC peak)  
**(CH 1 thru 4)**  
**Operating Modes:**  
CH 1—CH 1, single trace.  
CH 2—CH 2, single trace.  
DUAL—CH 1 and CH 2, dual trace.  
ADD—algebraic sum of CH 1 + CH 2, single trace (CH 1 - CH 2 with CH 2 inverted).  
QUAD—CH 1 thru CH 4, four trace.  
In DUAL and QUAD modes, alternating or chopped traces selectable with ALT and CHOP switches.  
**Chop Frequency:** Approx. 250 kHz, selectable  
**Signal Delay Time:** Approx. 10 ns visible delay.  
**Maximum Undistorted Amplitude:** 8 divisions (Full rated bandwidth).  
**SWEEP SYSTEM**  
**Modes:**  
A—A sweep.  
ALT—A sweep (intensified for duration of B sweep) and B sweep alternating.

A-INT-B—Duration of B sweep is displayed as an intensified portion of the A sweep.  
B DLY'D—Delayed B sweep.  
DUAL—Dual Sweep, A and B sweeps independent.  
X-Y—X-Y display mode.  
**A Sweep:** 20 ns/div to 0.5 s/div in 1-2-5 sequence, 23 steps. Vernier control provides fully adjustable sweep time between steps. LED UNCAL reminder.  
**B Sweep:** 20 ns/div to 50 ms/div in 1-2-5 sequence, 20 steps.  
**Accuracy:**  $\pm 2\%$  (+10° to +35°C);  $\pm 4\%$  (0° to -50°C).  
**Sweep Magnification:** 10X,  $\pm 5\%$  (+10° to +35°C),  $\pm 6\%$  (0° to +50°C).  
**Linearity:**  $\pm 3\%$ ; 10X,  $\pm 5\%$ .  
**Holdoff:** Continuously adjustable for A sweep (NORM to more than 5 times normal.)  
**Trace Separation:** 0 to 4 div. contin. adjustable.  
**Delay Method:** Continuous delay or trigger delay.  
**Delay Time:** 0.2 to 10 times A SWEEP TIME/DIV setting, continuously adjustable.  
**Time Difference Measurement Accuracy:**  
 $\pm (1\%$  of measurement  $\pm 0.1\%$  of full scale) (+10° to -35°C),  $\pm 4\%$  (0° to -50°C).  
**Delay Jitter:** 1:20,000 of full scale sweep time.  
**TRIGGERING**  
**A TRIGGER:**  
**Modes:** AUTO (free run), NORM, SINGLE/RESET, FIX (triggering level automatically set to center of waveform).

## Specifications Continued—1590A and 1570A

**Source:** V. MODE, CH 1, CH 2, (EXT) CH 3, (EXT) CH 3 1/10, LINE.

### Coupling:

AC—20 Hz to 100 MHz  
LF Rej—30 kHz to 100 MHz  
HF Rej—20 Hz to 30 kHz  
DC—DC to 100 MHz

**VIDEO**—Trigger signal is routed through sync separator. Horizontal sync pulses selected at sweep times of 50  $\mu$ s/div and faster (LINE). Vertical sync pulses selected at sweep times of 0.1 ms/div and slower (FRAME).

**Level:**  $\pm 90^\circ$ ; permits triggering at any point on the + and - slope of the displayed waveform.

**Slope:** Sweep can be set to trigger on the + or - going slope on the trigger waveform.

**LED Indicator:** Sweep A TRIG'D.

### B TRIGGER:

**Modes:** Starts after delay. Triggerable after delay.  
**Source:** CH 1, CH 2, (EXT) CH 4, (EXT) CH 4 1/10, starts after delay.

### Coupling:

AC—20 Hz to 100 MHz  
LF Rej—30 kHz to 100 MHz  
HF Rej—20 Hz to 30 kHz  
DC—DC to 100 MHz

**Level:**  $\pm 90^\circ$ ; permits triggering at any point on the + and - slope of the displayed waveform.

**Slope:** Sweep can trigger on the + or - going slope on the trigger waveform.

**LED Indicator:** Sweep B TRIG'D.

**Trigger Jitter:** 0.5 ns maximum at 100 MHz at 2 ns/div sweep rate (X10 MAG on).

### Trigger Sensitivity (A and B):

COUPLING	BANDWIDTH	INT	EXT
DC	DC—20 MHz	0.5 div	50 mV
	DC—50 MHz	1.0 div	100 mV
	DC—100 MHz	1.5 div	210 mV
AC	Same as DC except lower limit is 20 Hz		
HF Rej	Same as AC except increased attenuation above 30 kHz.		
LF Rej	Same as AC except increased attenuation below 30 kHz.		
VIDEO	FRAME	0.5 div	50 mV
	LINE	0.5 div	50 mV
AUTO	Same as AC except lower limit is 50 Hz.		
FIX	40 Hz-20 MHz	1 div	100 mV
	40 Hz-80 MHz	1.5 div	210 mV

### HORIZONTAL AMPLIFIER (Input thru CH 2 input)

**Deflection Factor:** Same as vertical channel 2.

**Accuracy:** Same as vertical channel 2.

### Frequency Response:

DC: DC to 5 MHz (-3 dB).

DC to 6 MHz (-6 dB).

AC: 5 Hz to 5 MHz (-3 dB).

5 Hz to 6 MHz (-6 dB).

**Input Impedance:** Same as vertical channel 2.

**Maximum Input:** Same as vertical channel 2.

**X-Y Operation:** CH 2 = X axis, CH 1 = Y axis.

**X-Y Phase Difference:**  $3^\circ$  or less at 100 kHz.

### Z-AXIS INPUT (Intensity Modulation)

**Input Signal:** TTL level, intensity increasing with more positive levels.

**Usable Frequency Range:** DC to 10 MHz.

**Input Impedance:** Approx. 10 k $\Omega$ .

**Maximum Input Voltage:** 50 V (DC  $\Omega$  AC peak)

### VERTICAL AXIS SIGNAL OUTPUT

(CH 1 output)

**Output Voltage:** 50 mV/div (into 50-ohm load).

**Output Impedance:** Approx. 50 ohms.

**Frequency Response:** DC to 100 MHz (-3 dB), into 50-ohm load.

### CRT

**Type:** Rectangular with internal graticule.

**Accelerating Voltage:** 20 kV.

**Display Area:** 8  $\times$  10 division (1 div = 1 cm).

### OTHER SPECIFICATIONS

#### Calibration Output:

**Positive Square Wave:** 1 kHz  $\pm 3\%$

**Voltage:** 1.0 V p-p  $\pm 1\%$  ( $+10^\circ$  to  $+35^\circ$ C).

1.0 V p-p  $\pm 2\%$  ( $0^\circ$  to  $+50^\circ$ C).

**Current:** 10 mA p-p  $\pm 2\%$  ( $+10^\circ$  to  $+35^\circ$ C).

10 mA p-p  $\pm 4\%$  ( $0^\circ$  to  $+50^\circ$ C).

**Gate Outputs:** Positive gate (pulse) output coincident with A sweep and B sweep respectively, 1.5 V p-p into 500 ohms.

#### Environment:

**Trace Rotation:** Electrical, front panel adjustable.

**Beam Finder:** Pushbutton shrinks and intensifies display.

**Operating:**  $+10^\circ$  to  $+35^\circ$ C, 85% maximum relative humidity for full specifications.

$0^\circ$  to  $+50^\circ$ C, 90% maximum relative humidity, full operating range.

**Storage:**  $-20^\circ$  to  $+70^\circ$ C, 80% maximum relative humidity

**Altitude: Operating:** up to 5000 meters (16,000 ft).

**Non-Operating:** up to 12,000 meters (39,000 ft).

**Power Requirements:** 90-264 VAC, 45-400 Hz, Approx. 56 W.

**Dimensions (H  $\times$  W  $\times$  D):** 13.8  $\times$  28.4  $\times$  40 cm (5

$\frac{1}{4}$   $\times$  11 $\frac{1}{4}$   $\times$  15 $\frac{3}{4}$ "

**Weight:** 7.4 kg (16 $\frac{1}{2}$  lbs.)

### ACCESSORIES SUPPLIED WITH OSCILLOSCOPE

Two 10:1 Probes

Spare Fuses

Instruction Manual

Schematic Diagram and Parts List

Probe Holder

### OPTIONAL ACCESSORIES

Demodulator Probe—PR-32

Deluxe 10:1/direct Probe—PR-37

10:1/direct Probe—PR-40

Front Panel Cover—LC-100

Deluxe 100:1 Probe—PR-100

Probe Pouch—LC-150

### SPECIFICATIONS—Model 1570A

#### VERTICAL AMPLIFIERS (CH 1 and CH 2)

##### Accuracy:

$\pm 2\%$  ( $+10^\circ$  to  $+35^\circ$ C).

$\pm 4\%$  ( $0^\circ$  to  $+50^\circ$ C).

$\pm 7\%$  (cascaded operation, CH 1 to CH 2).

**Frequency Response:** (X1 or X5 vertical gain)

DC: DC to 80 MHz (=3 dB).

DC to 40 MHz (cascaded).

AC: 5 Hz to 80 MHz (=3 dB).

7 Hz to 40 MHz (cascaded).

**Rise Time:** 5 ns or less.

**Other Vertical Amplifier Specifications same as 1590A.**

#### (CH 3 and CH 4)

**Deflection Factor:** 0.1 V/div  $\pm 2\%$ .

**Frequency Response:** DC to 80 MHz (-3 dB).

**Rise Time:** 5 ns or less.

**Input Impedance:** 1 Megohm  $\pm 1\%$  shunted by approx. 22 pF.

**Input Coupling:** DC only.

**Maximum Input Displayed:**

DC Component— $\pm 0.5$ V.

AC Component—1 V p-p.

**Maximum Input Voltage** 400 V (DC + AC peak).

#### (CH 1 thru 4)

**Operating Modes:**

Same as 1590A.

### SWEEP SYSTEM

**Modes:** A—A sweep.

ALT—A sweep (intensified for duration of B sweep) and B sweep alternating.

A-INT-B—Duration of B sweep is displayed as an intensified portion of the A sweep.

B DLYD—Delayed B sweep.

X-Y—X-Y display mode.

**A Sweep:** 50 ns/div to 0.5 s/div in 1-2-5 sequence, 22 steps. Vernier control provides fully adjustable sweep time between steps.

**B Sweep:** 50 ns/div to 50 ms/div in 1-2-5 sequence, 19 steps.

**Other Sweep Specifications Same as 1590A.**

### TRIGGERING

#### A TRIGGER:

**Modes:** AUTO (free run), NORM, SINGLE, RESET.

**Source:** V. MODE, CH 1, CH 2, (EXT) CH 3, LINE.

#### Coupling:

AC—20 Hz to 80 MHz.

LF Rej—30 kHz to 80 MHz.

HF Rej—20 Hz to 30 kHz.

DC—DC to 80 MHz.

**VIDEO**—Trigger signal is routed through sync separator. Horizontal sync pulses selected at sweep times of 50 ms/div and faster (LINE).

Vertical sync pulses selected at sweep times of 0.1 ms/div and slower (FRAME).

#### B TRIGGER:

**Source:** CH 1, CH 2, (EXT) CH 4, starts after delay.

**Coupling:** AC only—20 Hz to 80 MHz.

**Trigger Jitter:** 1 ns maximum at 80 MHz at 5 ns/div sweep rate (X10 MAG on).

#### Trigger Sensitivity (A and B):

COUPLING	BANDWIDTH	INT	EXT
DC	DC—20 MHz	0.5 div	50 mV
	DC—80 MHz	1.5 div	210 mV
AC	Same as DC except lower limit is 20 Hz.		
HF rej	Same as AC except increased attenuation above 30 kHz.		
LF rej	Same as AC except increased attenuation below 30 kHz.		
VIDEO	FRAME	0.5 div	50 mV
	LINE	0.5 div	50 mV
AUTO	Same as AC except lower limit is 50 Hz.		

**Other Triggering Specifications Same as 1590A**

### HORIZONTAL AMPLIFIER (Input thru CH 2 input)

Same as 1590A.

### Z-AXIS INPUT: (Intensity Modulation)

Same as 1590A.

### VERTICAL AXIS SIGNAL OUTPUT

(CH 1 Output)

**Output Voltage:** 50 mV/div (into 50-ohm load).

**Output Impedance:** Approx. 50 ohms.

**Frequency Response:** DC to 80 MHz (-3 dB), into 50-ohm load.

### CRT

**Type:** Rectangular with internal graticule.

**Accelerating Voltage:** 12 kV.

**Display Area:** 8  $\times$  10 division (1 div = 1 cm).

### OTHER SPECIFICATIONS

**Calibration Output:** Positive Square Wave: 1 kHz  $\pm 3\%$ .

**Voltage:** 0.1 V p-p  $\pm 1\%$  ( $+10^\circ$  to  $+35^\circ$ C).

0.1 V p-p  $\pm 2\%$  ( $0^\circ$  to  $+50^\circ$ C).

#### Environment:

Same as 1590A

**Trace Rotation:** Electrical, front panel.

**Power Requirements:** 90-264 VAC; 45 to 400 Hz, approx. 55 W.

**Dimensions Weight:** Same as 1590A

### ACCESSORIES

Same as 1590A

# OSCILLOSCOPES

2120

## 2120 20MHz Dual-Trace Oscilloscope

- Dual or single trace operation
- 1 mV/div sensitivity
- 20MHz response at a true -3dB
- AUTO/NORM triggered sweep operation with AC, TVH, TVV and Line coupling
- Calibrated 18 step timebase with x10 magnifier
- X-Y operation
- Bright, sharp rectangular CRT with P31 phosphor
- Front-panel trace rotation control
- Tilt stand and soft handle
- Selectable +/- slope
- Built-in calibration source
- Compact low-profile design.

2120 .....\$479.00

### SPECIFICATIONS

#### VERTICAL AMPLIFIERS (CH 1 and CH 2)

**Sensitivity:** 5 mV/div to 5 V/div in 1-2-5 sequence, 10 steps. Vernier control provides fully adjustable gain between steps and increases maximum sensitivity to 1 mV/div (at reduced bandwidth).

**Accuracy:** ±3%.

**Input Resistance:** 1 MΩ ±2%.

**Input Capacitance:** 35 pF ±5 pF.

**Frequency Response:** 5 mV to 5 V/div (CAL): DC to 20 MHz (-3dB). 1 mV/div (uncalibrated): DC to 10 MHz (-3dB).

**Rise Time:** 17.5 ns.

**Operating Modes:** CH 1: CH 1, single trace.

CH 2: CH 2, single trace.

ALT: dual trace, alternating.

CHOP: dual trace, chopped.

ADD: algebraic sum of CH 1 + CH 2.

**Polarity Reversal:** CH 1 only.

**Maximum Input Voltage:** 400 V dc + ac peak.

**Maximum Undistorted Amplitude:**

DC to 20 MHz: 4 divisions.

DC to 10 MHz: 8 divisions.

#### TRIGGERING

**Triggering Modes:** AUTO (free run) or NORM.

**Trigger Source:** CH 1, CH 2, ALT, EXT, LINE.

**Maximum External Trigger Voltage:**

200 V dc + ac peak.

#### Trigger Coupling:

AC 30 Hz to 30 MHz.

TV H Used for triggering from horizontal sync pulses.

TV V Used for triggering from vertical sync pulses.

#### TRIGGER SENSITIVITY:

Coupling	Bandwidth	Int	Ext
AC	30 Hz-30 MHz	.5 div	500 mV
TV V	10 Hz-1.5 kHz	.5 div	500 mV
TV H	3 kHz-30 MHz	.5 div	500 mV

#### SWEEP SYSTEM

**Sweep Speed:** 0.5 μs/div to 0.2 s/div in 1-2-5 sequence, 18 steps. Vernier control provides fully adjustable sweep time between steps.

**Accuracy:** ±3%.

**Sweep Magnification:** 10x, ±6%.

#### HORIZONTAL AMPLIFIER (Input through channel 2 input)

**X-Y Mode:** Switch selectable using X-Y switch.

CH 1: Y axis. CH 2: X axis.

**Sensitivity:** Same as vertical channel 2.

**Accuracy:** Y-Axis: ±3%. X-Axis: ±6%.

**Input Impedance:** Same as vertical channel 2.

**Frequency Response:** DC to 2 MHz typical

(-3 dB).

**X-Y Phase Difference:** Approximately 3° at 50 kHz.

**Maximum Input Voltage:** Same as vertical

channel 2.

#### CRT

Type: Rectangular with internal graticule.

Display Area: 8 × 10 div (1 div = 1 cm).

Accelerating Voltage: 2 kV.

Phosphor: P31.

#### OTHER SPECIFICATIONS

**Calibrating Voltage:** 1 kHz (±10%) Positive Square Wave, 0.2 V p-p (±2%).

CH 1 Output (on rear panel):

Output Voltage: 50 mV/div (into 50-ohm load).

Output Impedance: Approximately 50 ohms.

Frequency Response: 20 Hz to 10 MHz, -3dB, into

50 Ω. 20 Hz to 20 MHz, -6dB, into 1 MΩ.

Trace Rotation: Electrical, front panel adjustable.

Power Requirements: 115 V/230 V ±10%,

50/60 Hz, approximately 35 W.

Dimensions: (WxHxD) 12.6 × 5.1 × 14.2" (320 ×

130 × 361 mm)

Weight: Approximately 15 lbs (6.75 kg)

#### ACCESSORIES SUPPLIED

Two probes. Schematic Diagram and Parts List. AC

Power Cord. Spare Fuse.

#### OPTIONAL ACCESSORIES

10:1 Probe, Model PR-46.

100:1 Probe, Model PR-100.

2125

## 2125 20MHz Dual-Trace, with Delayed Sweep Oscilloscope

- 5x Gain Control extends sensitivity to 1 mV/div
- Delayed sweep in 6 ranges and variable X1 to X10, 3 display modes
- Built-in component tester for capacitors, inductors, diodes, transistors, zener diodes.

2125 .....\$570.00

### SPECIFICATIONS:

(Except for those listed below, specifications are the same as for Model 2120)

#### VERTICAL AMPLIFIERS (CH1 and CH2)

**Sensitivity:** 5 mV/div to 5V/div in 1-2-5 sequence, 10 steps. Vernier control provides fully adjustable gain between steps. X5 Gain: Extends sensitivity to 1mV/div

**Frequency Response:** 5mV to 5V/div (CAL): DC to 20 MHz (-3dB) 5X Gain: DC to 10 MHz (-3dB)

**Rise Time:** 5mV to 5V/div: 17.5 ns. 5X Gain: 3.5 ns

#### SWEEP SYSTEM

**Delayed Sweep:** Ranges: 10ms, 1ms, 0.1ms, 10μs, 1μs, 0.1μs.

**Variable:** X1 to X10.

**Display Modes:** Normal, Delayed, Alternate

#### COMPONENT TESTER

**Test Voltage:** 8.6 VDC rms max (open circuit)

**Test Current:** 20 mA max (short circuit)

**Test Frequency:** Line frequency (50/60 hz)

**Testable Components:** Capacitors, inductors, diodes, transistors, Zener diodes, etc.

## SPECIFICATIONS

### VERTICAL AMPLIFIERS (CH1 and CH2)

**Deflection Factor:** 1 mV/div. to 5 V/div.  $\pm 3\%$  in 12 steps. 1-2-5 sequence with vernier adjustment.

**Frequency Response:**

1 m V/div. 2 mV/div.

DC: DC to 20 MHz.—3dB

AC: 5 Hz to 20 MHz.—3dB

5 mV/div. to 5 V/div.

DC: DC to 60 MHz.—3dB

AC: 5 Hz to 60 MHz.—3dB

**Rise Time:** 5.8 ns or less (60 MHz) 17.5 ns or less (20 MHz)

**Input Impedance:**  $1M\Omega \pm 2\%$ , approx. 20 pF.

**Maximum Input Voltage:** 500 V p-p or 250 V (DC + AC peak).

**Maximum Non-Distorted Amplitude:** More than 8 dBV, DC to 60 MHz.

### CH3

**Deflection Factor:** 0.5 V/div.  $\pm 2\%$

**Frequency Response:** DC: DC to 60 MHz.—3dB

**Rise Time:** 5.8 ns or less.

**Input Impedance:**  $1 M\Omega \pm 2\%$ , approx. 20 pF.

**Maximum Input Voltage:** 50 V (DC + AC peak).

### Operating Modes:

CH1 —Single Trace

CH2 —Single Trace

ADD —CH1 + CH2 Single Trace

DUAL —CH1 and CH2 Dual Trace

TRIPLE—CH1, CH2, CH3, Triple Trace.

ALT —Dual or Triple Trace, alternating sweep.

CHOP —Dual or Triple Trace, chopped sweep.

**Chop Frequency:** Approx. 250 kHz.

**Channel 2 Polarity:** Normal or inverted.

**Crosstalk:** -40 dB minimum.

**Signal Delay Time:** Approx. 20 ns visible.

### SWEEP SYSTEM

#### Mode:

NORM —Triggered Sweep.

AUTO —Sweep free runs in absence of trigger.

FIX —Same as AUTO except trigger level is automatically fixed at center of waveform.

SINGLE—Permits viewing and photographing of one-time events.

#### Sweep Time:

A—0.05  $\mu$ s/div. to 0.5 s/div.  $\pm 3\%$  in 22 ranges, in 1-2-5 sequence with vernier adjustment.

B—0.05  $\mu$ s/div. to 50 ms/div., in 19 ranges, in 1-2-5 sequence.

#### Sweep Magnification

X10  $\pm 5\%$ , 0.5 s/div. to 0.5  $\mu$ s/div.  $\pm 8\%$ , 0.2  $\mu$ s/div. to 0.05  $\mu$ s/div.

**Linearity:**  $\pm 3\%$  all ranges,  $\pm 5\%$  on 0.2  $\mu$ s/div. and faster ranges at X10 magnification.

**Holdoff:** Continuously variable to >5X normal.

**Trace Separation:** Continuously variable, up to 4 divisions.

**Delay Method:** Continuous (Starts after delay), Trigger. Zero (delay time zero).

**Delay Time:** Continuously adjustable. 0.2 to 10 X the A sweep time setting.

**Delay Jitter:** 1/20000 of ten times of A sweep time setting.

### TRIGGERING

#### Source:

V MODE —Trigger selected by vertical MODE switch.

CH1 —Triggered by CH1 signal.

CH2 —Triggered by CH2 signal.

CH3/EXT—Triggered by CH3 signal.

LINE —Triggered by line voltage.

**Coupling:** AC, HFrej., DC, VIDEO FRAME, VIDEO LINE.

**Automatic:** Sweep is obtained without an input signal.

**Normal:** Sweep is not obtained without an adequate trigger signal.

**FIX:** Sweep is obtained without an input signal Trigger threshold is automatically set at center of trigger signal.

**Single:** Single sweep operation.

**Slope:** Sweep can be set to trigger on the positive or negative going slope on the trigger waveform.

**Level:** Fully adjustable.

**Video Sync:** Vertical and horizontal sync separator circuitry allows any portion of complex video waveform to be synchronized and expanded for viewing.

**Video Line—**Horizontal sync pulses are selected as triggers.

**Video Frame—**Vertical sync pulses are selected as triggers.

#### Sensitivity:

DC —DC-50MHz, 1 div. internal or 500 mV external 50-60 MHz, 1.5 div. internal or 800 mV external.

AC —Same as DC except lower limit is 10 Hz.

HFrej —Increased minimum level below 10 Hz and above 20 kHz.

VIDEO—FRAME or LINE: 1 div. internal or 500 mV p-p external

AUTO —Same as AC except lower limit is 50Hz.

FIX —Same as AC except lower limit is 50Hz.

### EXTERNAL TRIGGER INPUT

**Maximum Input Voltage:** 50 V (DC + AC peak).

**Input Impedance:**  $1 M\Omega \pm 2\%$ , approx. 20 pF.

### HORIZONTAL AMPLIFIER

(Input thru CH2, X10 MAG not included)

**Deflection Factor:** Same as vertical amp (CH2).

**Frequency Response:** DC: DC to 1 MHz.—3dB. AC: 5 Hz to 1 MHz.—3dB.

**Input Impedance:** Same as vertical amp (CH2).

**Maximum Input Voltage:** Same as vertical (CH2).

**X-Y Operation:** Operating mode selectable with HORIZ DISPLAY switch. CH1 = Y axis, CH2 = X axis.

**X-Y Phase Difference:**  $3^\circ$  or less at 100 kHz.

### Z-AXIS INPUT

(Intensity Modulation)

**Sensitivity:** TTL Compatible Negative Voltage increases brightness.

**Frequency Range:** DC to 5 MHz.

**Input Impedance:** Approx. 10 k $\Omega$ .

**Maximum Input Voltage:** 50 V (DC + AC peak).

### VERTICAL AXIS SIGNAL OUTPUT

(CH1 Output)

**Output Voltage:** Approx. 50 mV/div. into 50 $\Omega$ .

**Frequency Response:** 5 mV/div. to 5 V/div.: 100 Hz to 60 MHz. —3dB into 50 $\Omega$ . 1 mV/div., 2 mV/div., 100 Hz to 20 MHz. — 3 dB into 50 $\Omega$ .

### CRT

**Type:** Rectangular, with internal graticule.

**Acceleration Voltage:** 12 kV.

**Display Area:** 8  $\times$  10 div. (1 div. = 1 cm).

### OTHER SPECIFICATIONS

**Probe Adjust Voltage:** 0.5 V  $\pm 6\%$ , square wave,, positive polarity, approx. 1kHz

**Trace Rotation:** Electrical, adjustable from front panel.

**Environmental:**  $+10^\circ$  to  $+35^\circ$  C, 85% max. RH —full operation.  $0^\circ$  C to  $+40^\circ$  C, 85% max. RH —within spec.

**Power Requirements:** 100/120/220/240 VAC  $\pm 10\%$ , 50/60 Hz, approx. 61W.

**Dimensions:** (W $\times$ H $\times$ D): 14.1"  $\times$  5.7"  $\times$  17.9" (359  $\times$  145  $\times$  454 mm)

**Weight:** 20.3 lbs. (9.2 kg.)

## 1541A 40MHz Dual Trace Oscilloscope

■ 1 mV/div sensitivity ■ 20 calibrated sweeps ■ Rectangular CRT with internal graticule and scale illumination ■ Video sync separators ■ 6 kV accelerating voltage ■ X-Y operation ■ Z axis input ■ X10 sweep magnification ■ Single sweep ■ V mode-displays two signals unrelated in frequency ■ Sum & difference capability ■ Channel 1 output ■ Includes probes

1541A .....\$845.00

1541A

### SPECIFICATIONS

#### VERTICAL AMPLIFIERS (CH1 and CH2)

**Deflection Factor:** 1 mV/div. to 5 V/div.  $\pm 3\%$  in 12 steps. 1-2-5 sequence with vernier adjustment.

#### Frequency Response:

1 mV/div. 2 mV/div.

DC: DC to 15 MHz. -3dB

AC: 5 Hz to 15 MHz. -3dB

5 mV/div. to 5 V/div.

DC: DC to 40 MHz. -3dB

AC: 5 Hz to 40 MHz. -3dB

**Rise Time:** 8.8 ns or less (40 MHz); 23.4 ns or less (15 MHz)

**Input Impedance:** 1M $\Omega$   $\pm 2\%$ . approx. 20 pF.

**Maximum Input Voltage:** 500 Vp-p or 250 V (DC + AC peak).

#### Operating Modes:

CH1 —Single Trace

CH2 —Single Trace

ADD —CH1 + CH2 Single Trace

ALT —Dual Trace, alternating sweep.

CHOP—Dual Trace, chopped sweep.

**Chop Frequency:** Approx. 250 kHz.

**Channel 2 Polarity:** Normal or inverted.

**Crosstalk:** -40 dB minimum.

#### SWEEP SYSTEM

##### Mode:

NORM —Triggered sweep.

AUTO —Sweep free runs in absence of trigger.

FIX —Same as AUTO except trigger level is automatically fixed at center of waveform.

SINGLE—Permits viewing and photographing of one-time events.

**Sweep Time:** A—0.2  $\mu$ s/div. to 0.5 s/div.  $\pm 3\%$  in 20 ranges, in 1-2-5 sequence with vernier adjustment.

**Sweep Magnification:** X10  $\pm 5\%$ ,  $\pm 8\%$  on 0.2  $\mu$ s/div.

**Linearity:**  $\pm 3\%$  all ranges,  $\pm 5\%$  on 0.2  $\mu$ s/div. at X10 magnification.

**Holdoff:** Continuously variable to more than 10 times normal.

#### TRIGGERING

##### Source:

V MODE—Trigger selected by vertical MODE switch.

CH1 —Triggered by CH1 signal.

CH2 —Triggered by CH2 signal.

EXT —Triggered by EXT TRIG signal.

LINE —Triggered by line voltage.

**Coupling:** AC, HFrej., DC, VIDEO FRAME, VIDEO LINE.

**Automatic:** Sweep is obtained without an input signal.

**Normal:** Sweep is not obtained without an adequate trigger signal.

**Single:** Single sweep operation.

**Slope:** Sweep can be set to trigger on the positive or negative going slope on the trigger waveform.

**Level:** Fully adjustable.

**Video Sync:** Vertical and horizontal sync separator circuitry allows any portion of complex video waveform to be synchronized and expanded for viewing.

**Video Line:** Horizontal sync pulses are selected as triggers.

**Video Frame:** Vertical sync pulses are selected as triggers.

##### Sensitivity:

DC —DC-40 MHz, 1 div. internal or 100 mV p-p external.

AC —10 Hz 40 MHz: 1 div. internal or 100 mV p-p external.

AC HFrej—Increased minimum level below 20 Hz and above 20 kHz.

VIDEO —FRAME or LINE: 1 div. internal or 100 mV p-p external

AUTO —50 Hz—40 MHz: 1 div. internal or 100 mV p-p external.

#### EXTERNAL TRIGGER INPUT

**Maximum Input Voltage:** 50 V (dc + ac peak).

**Input Impedance:** 1 M $\Omega$  approx. 35 pF.

#### HORIZONTAL AMPLIFIER

(Input thru CH2, X10 MAG not included)

**Deflection Factor:** Same as vertical amp (CH2).

**Frequency Response:** DC—DC to 1 MHz, -3dB;

AC—5 Hz to 1 MHz, -3dB.

**Input Impedance:** Same as vertical amp (CH2).

**Maximum Input Voltage:** Same as vertical amp (CH2).

**X-Y Operation:** Operating mode selectable with HORIZ DISPLAY switch. CH1 = Y axis, CH2 = X axis.

**X-Y Phase Difference:** 3° or less at 100 kHz.

#### Z-AXIS INPUT

(Intensity Modulation)

**Sensitivity:** TTL Compatible negative voltage increases brightness.

**Frequency Range:** DC to 2 MHz.

**Input Impedance:** Approx. 10 k $\Omega$ .

**Maximum Input Voltage:** 50 V (dc + ac peak).

#### VERTICAL AXIS SIGNAL OUTPUT

(CH1 Output)

**Output Voltage:** Approx. 50 mV/div. into 50 $\Omega$ .

**Output Impedance:** Approx. 50 $\Omega$ .

##### Frequency Response:

5 mV/div. to 5 V/div.: 100 Hz to 40 MHz.

-3dB into 50 $\Omega$ .

1 mV/div., 2 mV/div.: 100 Hz to 15 MHz.

-3dB into 50 $\Omega$ .

#### CRT

**Type:** Rectangular, with internal graticule.

**Acceleration Voltage:** 6 kV.

**Display Area:** 8  $\times$  10 div. (1 div. = 1 cm).

#### OTHER SPECIFICATIONS

**Probe Adjust Voltage:** 1 V p-p ( $\pm 3\%$ ) square wave, positive polarity, approx. 1kHz.

**Trace Rotation:** Electrical, adjustable from front panel.

**Environmental:** +10° to +35°C, 85% max. RH—full operation. 0°C to +40°C, 85% max. RH — within spec.

**Power Requirements:** 100/120/220/240 VAC  $\pm 10\%$ ,

50/60 Hz, approx. 36W.

**Dimensions:** (W $\times$ H $\times$ D): 13.4"  $\times$  5.7"  $\times$  15.0" (341

$\times$  145  $\times$  380mm)

### SPECIFICATIONS

#### VERTICAL AMPLIFIERS (CH1 and CH2)

**Deflection Factor:** 1 mV/div. to 5V/div.  $\pm 3\%$ , in 12 steps, 1-2-5 sequence with vernier adjustment  
**Frequency Response:** 5 mV/div to 5 V/div DC: DC to 25 MHz,  $-3\text{dB}$  AC: 5 Hz to 25MHz,  $-3\text{dB}$  1mV/div, and 2 mV/div DC: DC to 10 MHz,  $-3\text{dB}$  AC: 5 Hz to 10 MHz,  $-3\text{dB}$   
**Rise Time:** 1mV/div. and 2 mV/div.—35 ns or less. 5 mV/div. to 5 V/div.—14 ns or less  
**Input Impedance:** 1 M $\Omega$   $\pm 2\%$  shunted by approx. 22 pF  
**Maximum Input Voltage:** 500 Vp-p or 250 V (dc + ac peak)

#### Operating Modes:

CH1 —Single Trace  
CH2 —Single Trace  
ADD —CH1 + CH2 Single Trace  
ALT —Dual Trace, alternate sweep  
CHOP—Dual Trace, chopped sweep  
**Chop Frequency:** Approx. 250 kHz  
**CH2 Polarity:** Normal or inverted  
**Crosstalk:**—40 dB minimum

#### SWEEP SYSTEM

**Mode:** NORM—Triggered sweep  
AUTO—Sweep free runs in absence of trigger  
**Sweep Time:** 0.2 $\mu\text{s}$ /div. to 0.5 s/div,  $\pm 3\%$  in 20 ranges, in 1-2-5 sequence with vernier adjustment  
**Sweep Magnification:** X10,  $\pm 5\%$  ( $\pm 8\%$  on 0.2 $\mu\text{s}$ /div.) Extends max. sweep rate to 20 ns/div.  
**Linearity:**  $\pm 3\%$  all ranges.  $\pm 5\%$  on 0.2 $\mu\text{s}$  range at X10 magnification

#### TRIGGERING

**Source:** V MODE—Trigger selected by vertical MODE switch

CH1 —Triggered by CH1 signal  
CH2 —Triggered by CH2 signal  
LINE —Triggered by line voltage  
EXT —Triggered by EXT TRIG signal

#### Coupling: AC, TV FRAME, TV LINE

**Automatic:** Sweep is obtained without an input signal.

**Normal:** Sweep is not obtained without an adequate trigger signal.

**Slope:** Sweep can be set to trigger on the positive or negative going slope on the trigger waveform.

**Level:** Fully variable.

**Video Sync:** Vertical and horizontal sync separator circuitry allows any portion of complex video waveform to be synchronized and expanded for viewing.

**TV LINE** —Horizontal sync pulses are selected as triggers—sweep time of .10  $\mu\text{s}$ /div.

**TV FRAME**—Vertical sync pulses are selected as triggers—2ms/div for viewing fields of video. 5 ms/div. for complete frames.

#### Sensitivity:

AC —10Hz to 25 MHz, 1 div. internal, or 100 mV external

TV —Frame or Line, 1 div internal or 100mV external

AUTO—50Hz to 25 MHz, 1 div. internal or 100 mV external

**Maximum Input Voltage:** 50 V (dc + ac peak)

**Input Impedance:** 1 M $\Omega$   $\pm 2\%$ , approx. 32 pF

#### HORIZONTAL AMPLIFIER

(X10 MAG not included)

**Deflection Factor:** Same as vertical amp.

**Frequency Response:** DC: DC to 500 kHz,  $-3\text{dB}$ ; AC: 5 Hz to 500 kHz,  $-3\text{dB}$

**Input Impedance:** Same as vertical amp.

**Maximum Input Voltage:** Same as vertical amp.

**X-Y Operation:** Operating mode selectable with TRIG MODE switch. CH1 = Y axis, CH2 = X axis

**X-Y Phase Difference:** 3° or less at 50 kHz

#### Z-AXIS INPUT

(Intensity Modulation)

**Sensitivity:** 5Vp-p minimum (TTL compatible) Negative voltage increases brightness

**Frequency Range:** DC to 2 MHz

**Input Impedance:** Approx. 10 k $\Omega$

**Maximum Input Voltage:** 50 V (dc + ac peak)

#### VERTICAL AXIS SIGNAL OUTPUT

(CH 1 Output)

**Output Voltage:** Approx. 50 mV/div. into 50 $\Omega$

**Output Impedance:** Approx. 50 $\Omega$

**Frequency Response:** ( $-3\text{dB}$  into 50 $\Omega$ ) 5mV/div. to 5V/div.: 100 Hz to 20 MHz; 1mV/div. and 2mV/div.: 100 Hz to 10 MHz

#### CRT

**Type:** Rectangular with internal graticule

**Acceleration Voltage:** 6 kV

**Display Area:** 8  $\times$  10 divisions; 1 div. = 10mm

#### OTHER SPECIFICATIONS

**Probe Adjust Voltage:** 1 Vp-p  $\pm 3\%$  square wave, positive polarity, reference level 0V. approx. 1 kHz  
**Trace Rotation:** Electrical, adjustable from front panel

**Environmental:** +10° to +35°C, 85% max. RH—full operation. 0° to +40°C, 85% max. RH—within spec.

**Power Requirements:** 100/120/220/240 VAC  $\pm 10\%$ , 50/60 Hz. approx. 32W.

**Dimensions (WxHxD):** 13.4"  $\times$  5.7"  $\times$  15.0" (341  $\times$  145  $\times$  380mm)

**Weight:** 17 lbs. (7.8 kg)

## SPECIFICATIONS

**Vertical:** 2 channels, AC or DC coupled, 5 mV/div to 5 V/div in 1-2-5 sequence, Accuracy: 5%, Input Impedance: 1 megohm/25pF  
**Horizontal:** Time/div 80 s/div to 20  $\mu$ s/div  
**Trigger:** Internal—CH1 only. External—rear panel via BNC input (TTL compatible).  
**Digital Storage:** Memory—Each channel 2048 x 8 Vertical resolution—8 bit, Sampling—10 Megasam-

## 2501 Digital Storage Adaptor

■ Adds the benefits of a digital storage oscilloscope to an analog scope ■ Provides DSO capabilities at low cost ■ True dual-channel operation ■ Store and magnify waveforms ■ Plot hard copies ■ Simple 3 lead scope connection

2501 . . . . . \$795.00

ples/sec to 2.5 samples/sec. Save—halts acquisition of CH2 in Refresh, Hold—halts acquisition of CH1 and CH2 in all modes.  
**Modes:** Refresh—80 s/div to 20  $\mu$ s/div, Roll—80 s/div to 5 ms/div, Single Shot—80 s/div to 20  $\mu$ s/div  
**Pretrigger:** 0%, 50%, 100% in Single Shot  
**Rear Panel Connectors:** Ch 1 output to scope (0.2 V/div, 0 to + 2 V)

Ch 2 output to scope (0.2 V/div, 0 to + 2 V)  
Trigger output to scope—TTL negative edge to trigger external scope. Also functions as a Plotter pen lift—TTL low for pen down. External trigger input (TTL compatible). Slope set by SLOPE switch.  
**Plot Output:** CH 1 or CH 2 outputs used for signal at 0.2 V/div (Output from 0 to + 2V) Plot times selected by 10 x TIME/DIV switch setting. Pen lift—TTL high, pen up; —TTL low, pen down (front panel LED on)

## GENERAL

**External Scope Requirements:** Dual (or single) channel at 0.2 V/div. Timebase at 0.1 ms/div. External trigger input, negative slope.  
**Power Requirements:** 120/240 VAC  $\pm$  10%, 50/60 Hz, 15 W  
**Dimensions (HxWxD):** 97 x 260 x 260mm (3.82 x 10.24 x 10.24") **Weight:** 1.8 kg. (3.96 lbs.)

1420

## SPECIFICATIONS

### VERTICAL AMPLIFIER

**Deflection Factor:** 10 mV/div to 20 V/div.,  $\pm$  5% in 11 ranges each with vernier adjustment.  
**Frequency Response:** DC: DC to 15 MHz, (- 3 dB), AC: 10 Hz to 15 MHz, (- 3 dB), Rise Time: 24 ns or less. Overshoot: 3% or less.  
**Input Impedance:** 1 M $\Omega$  shunted by 26 pF.  
**Maximum Input Voltage:** 600 V p-p or 300 V (DC + AC peak).  
**Operating Modes:** CH A—Single Trace. CH B—Single Trace. A & B—Dual Trace.  
**Chop Frequency:** 100 kHz  $\pm$  20%  
**Channel Separation:** > 60 dB at 1 kHz.

### SWEEP SYSTEM

**Mode:** NORM—Triggered Sweep, AUTO—Sweep free runs in absence of trigger.  
**Sweep Time:** 1.0  $\mu$ s div to 0.5 s div.,  $\pm$  5% in 18 ranges, in 1-2-5 sequence, variable between ranges.  
**Sweep Magnification:** X10.  $\pm$  10%. Extends max. sweep rate to 100 ns. div.  
**Linearity:**  $\pm$  3%;  $\pm$  5% for X10 magnification.

## 1420 15MHz, Dual Trace, Portable Oscilloscope

■ Operates on AC, external DC or optional internal battery pack power ■ Conveniently fits into an ordinary attache case ■ Full feature design

1420 . . . . . \$919.00

### TRIGGERING

**Source:** CH A—Triggered by CH A signal. CH B—Triggered by CH B signal. EXT—Triggered by EXTernal signal (CH A in dual).  
**Coupling:** AC—20 Hz to 20 MHz.  
**Automatic:** Sweep obtained without an input signal.  
**Normal:** No sweep without an adequate trigger signal.  
**Slope:** Sweep can be set to trigger on the positive or negative going slope on the trigger waveform.  
**Level:** Continuously adjustable.  
**Video Sync.:** Vertical and horizontal sync. separator circuitry allows any portion of complex video waveforms to be synchronized and expanded for viewing VIDEO LINE and VIDEO FRAME sync switched automatically by SWEEP TIME/DIV switch. LINE—50  $\mu$ s div. to 1.0  $\mu$ s/div. FRAME—0.5 s/div. to 0.1 ms/div.  
**Sensitivity:** AUTO—20 Hz to 15 MHz; 1 div. internal or 1 p-p external.

### EXTERNAL TRIGGER INPUT

**Max. Input Voltage:** 50 V p-p or 24 V (DC + AC peak)  
**Input Impedance:** 100 k $\Omega$  35 pF (nominal).

### HORIZONTAL AMPLIFIER (input through CH B)

**Deflection Factor:** Same as vertical amp.  
**Frequency Response:** DC—DC to 1 MHz (- 3 dB). AC—10Hz to 1 MHz (- 3 dB).  
**Input Impedance:** 1 M $\Omega$   $\pm$  5%/26 pF ( $\pm$  3 pF).  
**Maximum Input Voltage:** Same as vertical amp.

## 1400 Oscilloscope Calibrator

■ Cost effective test calibrator ■ Provides time and amplitude signals ■ 0.5% amplitude accuracy ■ Can be used as signal source for testing ■ .015% Time accuracy ■ 1 ns rise time

1400 . . . . . \$499.00

**Accuracy (Into 1 M $\Omega$ ):** 23°C  $\pm$  5°C:  $\pm$  0.5%, 20 mV to 100 V range.  $\pm$  1%, 1 mV to 10 mV range.  
10°C to 40°C: Add  $\pm$  0.5% to above accuracy.  
**Rise Time:** < 5 mS. **Frequency:** 1kHz.

### TIME OUTPUT SIGNAL

**Range:** 0.5 s to 10 ns square wave in 1-2-5 sequence.

**Accuracy:** .015%  
**Amplitude:** 0.5 s to 20 ns—100 mV to 1 V peak. 10 ns—100 mV to .5 V peak. Rise Time: < 1 ns.  
**Leading Edge Aberrations:** 2% of peak-to-peak amplitude or 10 mV, whichever is greater.  
**Output:** 50  $\Omega$  nominal

### SINE WAVE OUTPUT SIGNAL

**Frequency:**  $\approx$  1 kHz  
**Amplitude:**  $\approx$  1 V peak-to-peak

### GENERAL

**Power Requirements:** 120/140 VAC, 50/60 Hz, 25 watts maximum  
**Operating Temperature:** 10°C to 40°C  
**Dimensions:** (HWD) 3x7.25x9.5" (7.6x18.4x24.1 cm).  
**Weight:** 4 lbs (1.8 kg)

1400

## SPECIFICATIONS (ALL SPECIFICATIONS TAKEN AFTER 30 MINUTE WARM-UP)

### VOLTAGE OUTPUT SIGNAL

**Range:** 1 mV to 100 V peak square wave in a 1-2-5 sequence.

## 3000 Series Compact, Convertible Tripods

**3001** Tripod Ideal for 35s and medium format cameras.

Legs are made of sturdy, tubular hard-finish aluminum and each has sure-grip, quick-acting lever locks that don't foul in sand or mud.

Legs have three different separately settable click-stopped spread angles for easy leveling that allow you to get close to things like walls or tables or even boulders. Maximum elevation is 60°.

- 3000 3001 Tripod with 3025 head . . . \$ 87.95
- 3001 3001 Tripod only . . . . .69.95
- 3002 3001 Tripod with 3028 head . . . . .101.95
- 3003 3001 Tripod with 3029 head . . . . .109.95
- 3004 3001 Tripod with 3047 head . . . . .137.95

**3010 Standard** Exceptional stability that weighs under 6 lbs. with our 3025 Head.

The Basic 3011 Tripod is compact — yet it goes up to 6', and has a reversible center post that lets you shoot at almost ground level. Sturdy, tubular aluminum legs have sure-grip, quick-acting lever locks. Ideal for cameras up to medium format. Also available in black anodized finish.

- 3010 Basic 3011 Tripod with 3025 "3-D" head . . . . . \$117.95
- 3011 Basic 3011 Tripod only (Mounting stud is Euro thread) . . . . .98.95
- 3012 Basic 3011 Tripod with 3028 Super "3-D" head . . . . .130.95
- 3013 3011 Tripod with 3029 pan/tilt head . . . . .141.95
- 3014 Basic 3011 Tripod with 3047 deluxe 3-way panhead . . . . .162.95
- 3015 Basic 3011 Tripod with 3026 ball head . . . . .129.95

**3020 Convertible** Maximum shooting height is 74 1/2". The adjustable spread of the legs combined with the reversible center post, which has a removable section, lets you get as low as 14". (Even minus the center post extension, you can go up to 63", with 6 1/4" of center post travel).

- 3020 3021 Tripod with 3025 3-D head . . \$137.95
- 3021 3021 Tripod only . . . . .118.95
- 3022 3021 Tripod with 3028 super 3-D head . . . . .150.95

- 3023 3021 Tripod with 3047 deluxe 3-way pan/tilt head . . . . . \$180.95
- 3024 3021 Tripod with 3029 pan/tilt head . . . . .160.95

**3031 Dependable** Ideal for location shooting where you need a compact, sturdy tripod (the 3031 has three-section legs and a geared center post). Leg adjustment is fast and easy. Rocker arm leg lock and a spirit level on the shoulder shows you when you're on the level. Convertible cushioned spike tip legs and rigid center bracing hold everything firm.

- 3031 3033 Tripod with 3047 deluxe 3-way pan/tilt head . . . . . \$211.95
- 3033 3033 Tripod only . . . . .150.95

**3035 Work Horse** You can use this tripod at its maximum height of 7 1/2', lower it to 22" or go to virtually ground zero by opening the legs and reversing the geared center column. It maintains stability at all heights. Independent, variable-spreading leg braces allow you to obtain different angles on each leg. The three legs are continuously adjustable in relation to each other.

- 3035 3036 Tripod with 3047 deluxe 3-way pan/tilt head . . . . . \$242.95
- 3036 3036 Tripod only . . . . .179.95

**3040 Sturdy Strong** two section bi-post design, lightweight aluminum alloy construction, with exceptional sturdiness built-in. Locking knob controls extension of each leg. Geared, reversible center post offers 19" of travel, and reverses for low shots or copying. Legs are equipped with convertible cushion/spike tips. Maximum height to 73", folds to a compact 37", minimum height is 34 1/2".

- 3040 3046 Tripod with 3047 deluxe 3-way pan/tilt head . . . . . \$215.95
- 3046 3046 Tripod only . . . . .154.95

**3050 Automatic Extension** of each leg can be adjusted individually, or all three can be released simultaneously. Triggers let you move from as low as 22" (16" from base of pan head to ground), to 67 1/2" or higher, built-in spirit level on the shoulder, plus two more levels on the 3047 pan/tilt head. Auto Tripod has independent, continuously variable leg braces that set each leg at a different angle. A sturdy

geared center post with 9 1/2" of precisely controlled elevation. The legs have convertible, cushioned spike tips.

- 3050 3051 Tripod with 3047 deluxe 3-way pan/tilt head . . . . . \$302.95
- 3051 3051 Tripod only . . . . .245.95

## HEADS

**3025 "3-D" Head with Euro Socket** Separately locked movements on three axes. Perfect for 35mms, and the conical self-adjusting bearing surfaces on the tilt pivots provide more than enough strength to support Hasselblads and RBs. Thumb-screw movement locks.

- 3025 . . . . . \$25.95

**3026 and 3055 Double Action Ball Joint Heads** Separate, quick-acting locks for panning and tilting functions. You can position camera anywhere in a 180° hemisphere.

- 3026 Double action ball joint head . . . . . \$35.95
- 3055 Heavy-duty double action ball joint head . . . . .50.95

**3028 Super "3-D" Head with Euro Socket** Three axes movement system, including a pan lock. Camera platform wider for better support of larger camera bodies and a pair of ratchet-type positive locking handles that give substantial grip, yet can be rotated to any desired position.

- 3028 . . . . . \$42.95

**3029 Pan/Tilt Head** Easy-to-use pan/tilt head for cameras up to medium format. Full 3-way action with each axis movement controlled by a separate locking handle. An ideal complement to any tripod. Weighs only 2 lbs.

- 3029 . . . . . \$47.95

**3047 Deluxe 3-Way Pan/Tilt Head** Removable camera mounting plates that don't slip. Works like a chuck. Two fixed bosses seat the mounting plate, while the third opens and closes with a quick-acting, positive-locking knob lever. Mounting plate has an inlaid friction surface, and a convenient, adjustable length 1/4"-20 mounting screw.

- 3047 . . . . . \$70.95

# TRIPODS/HEADS/ DOLLIES

## Fluid Heads

**Mini Fluid Head** Measuring just 5" x 5" x 5" (excluding handle), this lightweight, fluid-type damped tripod head pans a full 360° and features a camera platform that measures 2 3/4" x 3". The Mini Fluid Head comes with a versatile handle which is positionable on either side and can be separated into two individual segments, each 9" in length. The Mini Fluid Head can be tilted 45° up and 90° down continuously, with detent at -45°, and has separate pan and tilt locks. Vertical drag is continuously adjustable.

**3063** ..... \$133.95

**Micro Fluid Head** Only 2 lbs. including an adjustable handle. Perfect for light weight (up to 6 lbs.) VCR cameras. It measures 4 1/4" x 5 3/4" x 2 3/4" (excluding handle); pans smoothly a full 360°; can be tilted up or down 90°; has pan and tilt locks, and continuously adjustable drag. Platform has adjustable positioning slot designed so handle can be on either left or right side.

**3126** ..... \$69.95

**Cine/Video Fluid Head** This lightweight, professional quality, fluid-damped tripod head is designed for Cine and Video cameras weighing up to 22 lbs. The large, removable camera platform has a mounting stud that travels in a 3 1/2" slot and facilitates balancing at the camera's center of gravity. In addition, there are three locking detents for the platform, any of which can be used. Pans smoothly 360° and the panning drag can be adjusted by a large pawl-controlled lever. The tilting range is 60° up to 90° down. Detent can be set to limit the downward movement to 45°. Separate locks, independent of the drag system provide a positive hold in any position.

**3066** ..... \$339.00

**XL Fluid Head** Lightweight fluid head capable of handling cameras up to 9 lbs. Features a special "quick release plate" which lets you attach and detach the camera quickly and easily. The adjustable handle can be located on either the right or left side of the head.

**3160** ..... \$91.95

**Ball Camera Leveler** This is an ideal adjunct to the 3063 Mini Fluid Head. It works like a claw ball in that you mount it to your tripod, you can remove the camera and head quickly to mount on another tripod similarly equipped, and you can level your camera even if you haven't leveled the tripod. Ideal for use in the field on uneven terrain.

**3115** ..... \$39.95

## Tripods with Fluid Heads

**3170 Tripod with Micro Fluid Head** Versatile, easy to handle and sets up quickly and easily. Sturdy legs are made of tubular hard-finish aluminum and each has sure-grip lever locks. Designed for VCR cameras (our 3001) can hold up to 6 lbs.

**3170** ..... \$126.95

**3165** 3011 Tripod with 3160XL Fluid Head ..... 151.95

**3124 Tripod With Micro Fluid Head** A lightweight all-aluminum tripod (our 3011) that's sturdy, stable, versatile, easy to use and easy to carry. It weighs only 7 lbs. with our Micro Fluid Head (Order Code 3126) that features real, fluid-effect action.

**3124** ..... \$156.95

**3122** As above but in black anodized finish ..... 170.95

**3129** 3011 Tripod with 3126 Micro Fluid Head and 3127 Dolly ..... 230.95

**3145** Video Tripod Caddy ..... 31.95

**3149** 3126 Micro Fluid Head with 3211 Tripod with black anodized finish and 3127 Dolly ..... 244.95

**3163** 3160XL Fluid Head with 3011 Tripod ..... 174.95

**3164** As above plus 3127 Dolly ..... 246.95

**3046 Sturdy Tripod** All aluminum double-braced, two section design weighs only 7 lbs., 4 oz. It extends to a full 73" with the Mini Fluid Head. 19" geared center post. Folds to a compact 32 1/2" for traveling. Legs are furnished with convertible cushion/spike tips.

**3046** Cine/Video Tripod w/o head ..... \$154.95

**3140** Cine/Video Tripod with Mini Fluid head ..... 280.95

**3142** Same as above in black anodized finish ..... 295.95

**3068 Universal Cine/Video Tripod** Weighs less than 12 lbs., extends to 66". Legs are furnished with convertible cushion/spike tips. For precise positioning, there is a centerpost which permits 9" of extension. The unique variable-angle center brace system on the tripod allows minimum elevation of the tripod platform as low as 16".

**3068** ..... \$251.00

**3065** Universal Tripod with 3066 Fluid Head ..... 584.00

**3069** Universal Tripod with 3066 Fluid Head and 3067 Dolly ..... 792.00

**3118** Universal Tripod with 3063 Mini Fluid Head ..... 377.00

**3061 Heavy-Duty Cine/Video Tripod** Ideal field tripod. Closed length is only 37 1/2", extends to a full 63". It can be set as low as 12". With its built-in claw ball, the camera head can be leveled quickly under all use conditions. The Heavy-Duty Tripod weighs just 17 lbs. 2 oz.

**3061** ..... \$302.00

**3062** Heavy-Duty Cine/Video Tripod with 3066 Fluid Head ..... 633.00

**3064** Heavy-Duty Cine/Video Tripod, with 3066 Fluid Head and 3067 Dolly ..... 844.00

## Dollies

**Deluxe Cine/Video Dolly** Designed specifically for use with the Universal and Heavy-Duty Tripods. Individually braked wheels measuring 5" in diameter, and a unique leg locking system make it easy to assemble and disassemble for transporting. The tripod legs are captured in a 38" diameter circle and the doorway clearance needed for the fully assembled dolly is only 39 1/2".

**3067** ..... \$214.00

**Portable Video Dolly** Features sure-lock no rock system. Heavy-duty quick fastening rubber straps hold tripod in place. 20" radius, folds to a compact 22 1/2".

**3127** ..... \$74.95

**Variable Leg Spread Dolly** Has a special feature that allows you to adjust the radius from a max of 20" to as little as 12 1/2".

**3137** ..... \$92.95

**Auto Dollies** When you depress the centrally located foot pedal of either the Auto Dolly or the Folding Auto Dolly, you release all three wheels. When you lift the pedal, cam action raises the wheels free of the ground and the weight of the dolly and tripod rest on separate feet.

- The Auto Dolly weighs 6 lbs. • Incorporates Shepherd Casters, and is easily assembled • Spread from center to tripod leg socket is 18 1/2" • The Folding Auto Dolly features 3" wheels • Weighs 9 3/4 lbs. • Spread from center to tripod leg socket is 20" • Folds to a compact 29"

On either dolly, mounting and dismantling the tripod is accomplished by cam operated kick-locks.

**3056** Auto Dolly ..... \$123.95

**3156** Folding Auto Dolly ..... 159.95

**3254** Black Folding Auto Dolly ..... 176.95

Prices and Specifications Subject to Change Without Notice.

# CAMERA STANDS/ ACCESSORIES

## 260/300 Super Salon Series Camera Stands

Available with 8 ft. and 10 ft. columns, the 85mm dia. chromed steel columns are mounted on heavy cast "T" bases; easy to move around because of their smooth-rolling wheels. The horizontal camera arms travel 23 in. and extend to 32 in. with precise rack and pinion drive. The camera support platform allows positioning in a 360° solid angle. The crossarm support casting features a built-in accessory tray.

### SUPER SALON 260

- Overall height: 8 ft. 7 in.
- Max. height: 8 ft.
- Min. height: 21 in.
- Arm length: 40 in.
- Horizontal arm travel: 23 in.
- Weight: 143 lbs.
- Base spread: 37-1/2"

Order Code 0840 ..... \$1062.00

### SUPER SALON 300

- Overall height: 10 ft. 5 in.
- Max. height: 10 ft.
- Min. height: 21 in.
- Arm length: 40 in.
- Horizontal arm travel: 23 in.
- Weight: 154 lbs.
- Base spread: 37-1/2"

Order Code 0850 ..... \$1177.00

## 200/260 Salon Series Camera Stands

Just slightly lighter in construction (75mm dia. col.). Available in 6 ft. and 8 ft. working heights, they feature an adjustable, counter-balanced sliding horizontal 32 in. crossarm with 15-1/2 in. travel. The camera support platform allows movements in a solid angle of 360°.

Large sized wheels in the heavy cast base and single pedal control facilitate easy positioning and quick, rock-steady locking. The crossarm support casting features a built-in accessory tray.

### SALON 200

- Overall height: 79 in.
- Max. height: 72 in.
- Min. height: 21 in.
- Arm: 32 in.
- Arm travel: 15-1/2 in.
- Weight: 106 lbs.
- Base spread: 33 in.

Order Code 0820 ..... \$853.00

### SALON 260

- Overall height: 103 in.
- Max. height: 96 in.
- Min. height: 21 in.
- Arm: 32 in.
- Arm travel: 15-1/2 in.
- Weight: 114 lbs.
- Base spread: 33 in.

Order Code 0830 ..... \$908.00

## The Mini Static Camera Stand

Mini Static can handle cameras from 35mm to 4 x 5 formats. Ideal for ID Passport work and portraiture. Pneumatically damped chrome column extends from a minimum of 37 in. to a height of 64 in. An easily mounted 21 in. extension brings maximum working height to 85 in. A 3/8 in. Euro stud on column top allows direct mounting of head. For mounting an additional camera, or an accessory tray, an accessory bracket is available.

Cast iron base has three pivoting wheels for easy movement and individual leg locks for sure holding.

- Max. height: 64 in.
- Min. height: 37 in.
- Arm: 17-1/2 in.
- Weight: 44 lbs.
- Base spread: 27 in.

Order Code 0800 ..... \$250.00

## The Mini Salon Camera Stand

Designed for medium and small format cameras, and for copying. The Mini Salon allows working heights from 9 in. to 63 in. and higher with an easily mounted 21 in. accessory extension. Column is chromed steel and is mounted on a heavy cast iron base with three pivoting wheels which lock firmly into place with individual leg locks. A double horizontal sliding bracket is fitted with two screw mounts which permit the use of an additional camera or an accessory tray.

- Max. height: 63 in.
- Min. height: 9 in.
- Arm: 17-1/2 in.
- Weight: 42 lbs.
- Base spread: 25 in.

Order Code 0810 ..... \$330.00

## Technical CS-1 Studio Camera Stand

Free-wheeling camera stand gives you great mobility for camera placement, then locks into a rock-solid stance. Rubber tipped feet take over from the casters. Fast and easy to adjust, letting you raise the camera to over six feet, or lower it to about a foot above the floor (with the cross arm reversed). Counterbalancing makes the cross arm easy to move, and the stand can handle an 11-1/2 lb. camera

- Overall height: 77 in.
- Max. height: 72 ft.
- Min. height: 12 in.
- Arm: 18 in.
- Weight: 24 lbs.
- Base spread: 36 in.

Order Code 0720 ..... \$280.00

# LIGHT STANDS/ ACCESSORIES

### 3079 Super Stand

The bigger your light, the more you need this strong, tall, stable stand. Made of aluminum, it's comparatively lightweight (slightly over 15 1/2 lbs.), yet will support large lighting units such as movie and TV floodlights, including 228mm sockets. Full extension is just under 12'. Standard 5/8" stud and 1/4-20 adaptor to take strobes, smaller professional Q.H. lights, and other lights. Clamp-on leveller can be ordered which keeps the Super Stand on an even footing, when the terrain isn't. For indoor use, there's an accessory set of 100mm casters.

- Closed length: 55.9" • Minimum elevation: 56.3" • Max. elevation: 143.3" • Diameter of base: 64.5" • Legs are 30mm diameter aluminum
- Sections are respectively, 50, 40, 30mm
- 3079 . . . . . \$240.00

### Accessories

**Extension Leveller** • 22mm diameter tube which clamps on to one of the legs of the Super Stand • Provides a 15" (40cm) range of adjustment so that the center column of the stand can be kept level on uneven ground.

3080 . . . . . \$48.00

**Caster Set** • 100mm (3.9") diameter casters • Provides easier movement when the stand is used indoors.

3081 . . . . . \$40.00

### Cine Stands

Designed to hold heavy lights, reflectors and scrims. The Wind-up 2 and Wind-up 3, Cine and Cine 3 Stands, as well as the Super Stand all accept 1 1/8" (28mm) bushings and supplied with adaptors for 5/8" (16mm) and 1/2" female yoke sockets. The Tall Cine accepts 5/8" bushings and female yoke sockets.

### 345 Three Section Light Stand

• Extends to 13' • Closes down to 41 1/2" • Weighs 6 lbs. 4 oz. • Will support any of four Monolite units or lights of comparable weight • The 345 comes with Shepherd casters • Mounting stud is 5/8" for standard studio strobes with 1/4-20 thread adaptor.  
3082 (345) 13' light stand with casters . . \$122.00  
3365 Same as above in black anodized finish . . . . . 129.95

### 251 The Workhorse for Portable Strobe and Q.H. Lighting

• Stable 8' stand • Weighs under 2 1/4 lbs. • Closed length is 34 1/4" • Mounting stud is 5/8" for standard studio lights with 1/4-20 thread adaptor • 42" diameter legs spread

3086 (251) 8' light stand with 1/4-20 stud . . . . . \$55.95

3361 Same as above in black anodized finish . . . . . 58.95

3088 Shepherd Casters, for use indoors . . . 29.00

### 3089 Bantam Weight Stand

• 6' light stand • Lightweight for its size and relative sturdiness • For use with small strobes and quartz lighting units • Mounting stud is 5/8" diameter • Closed length is 24 3/4" • Minimum extension is 32" • Weight 2 lbs.

3089 . . . . . \$44.50

### Accessories

# SUPPORT EQUIPMENT

## Super Clamp with Standard Stud

Holds everything imaginable. Lightweight cast alloy, friction lined, screw operated. Safety lock will hold even if knob is not tight.

Order Code 2900 . . . . . \$25.95  
Order Code 2915 Same as above without stud. . . . . \$23.95

## Super Clamp with 3025 Head

For straight vertical or straight horizontal positioning, the 3025 pan head gives good strength, fast set-ups, plus pan lock and leveling controls. Its three movements can be adjusted separately.

Order Code 2910 Super Clamp with 3025  
Camera Mounting head . . . . . \$51.90

## Ball Joint Head for Super Clamp with Camera Platform

When you have to clamp on to a support at odd angles, the ball joint head provides a sensible solution and offers dual purpose use as well. The camera end has a reversible tip, so it can be used both with 1/4-20 and European tripod sockets. The other end fits directly into the clamp socket and locks in place. In addition, the clamp end is tapped with a European thread so it makes an excellent accessory for use with a tripod.

Order Code 2916 . . . . . \$27.00

## U-Hook Cross-Bar Holder

Plugs into super clamp socket. Ideal for cross poles when used to support background paper.

Order Code 2902 . . . . . \$6.50

## Narrow U-Hook Glass Holder

Need photos through plate glass for special effects? This is what you use. Plugs into clamp socket.

Order Code 2903 . . . . . \$7.50

## 'L' Bracket Shelf Holder

Plugs into clamp socket.

Order Code 2904 . . . . . \$10.50

## Single Background Holder Hooks

When you're traveling light, and need only one background, use this pair of single hooks which fit right into a pair of super clamps.

Order Code 2911/pair . . . . . \$14.95

## Single Background Holder Hook Set

Same pair of hooks, mounted on a pair of super clamps.

Order Code 2912/pair . . . . . \$62.50

## Background Holder Hooks (Set of 2)

Set of 2 sturdy, heavy gauge hooks, will accommodate up to 3 Expan units. These are drilled with clearance holes for #10 screws for mounting direct to your wall.

Order Code 2921 . . . . . \$25.00

## Background Holder Hook Set

Consists of 2 #2921 Cast Hooks Mounted on Super Clamps, ready to mount on Auto-Pole.

Order Code 2955/per set . . . . . \$72.00

## Swivel Umbrella Adaptor

When you have to use a light which doesn't have built-in provision for tilting or for using an umbrella, this does the trick. Plugs directly into super clamp, both ends turnable. Also works without 345 (#3082) and 251 (#3086) light stands.

Order Code 2905 . . . . . \$17.95

## Make A Boom with Joining Stud

Replaces the standard stud supplied with the super clamp to permit 2 clamps to be joined at 60° angles. Ideal for constructing a super sturdy fixed position boom for lights or gobos.

Order Code 2913 . . . . . \$3.00

## Extension Arm

Want to hang a light or camera from a pole, but running into interference problems? The extension arm plugs into the Super Clamp and lets you use either the standard stud or a 5/8 dia. nipple, 6 more inches away from the problem.

Order Code 2906 . . . . . \$15.95

## Short Stud, Reversible

While the standard stud supplied with the super clamp serves adequately with small camera tilt-tops, purists will want more bearing surface between the bottom of a ball joint head and the super clamp. This short stud permits flush mounting, and it's reversible for both 1/4-20 and European camera thread.

Order Code 2907 . . . . . \$3.00

You can also order the super clamp with the short stud instead of the standard stud.

Order Code 2909 . . . . . \$25.95

## Magic Arm with Camera Platform

Fully articulated arm with 90° pivotable and 360° rotatable ends and an elbow that rotates 360°. Analogous to a human arm with a shoulder, an elbow, and a wrist except that you have considerably greater movement. In the relaxed position, you can move any of the joints to any desired position. A firm turning movement of the control handle—located at the elbow joint—locks all three joints firmly into position.

Order Code 2930 . . . . . \$70.95

Order Code 2931 Accessory Fork . . . . . \$14.95

## Auto-Pole/Expan Background System

Our background systems combine Auto-Pole support poles with the Expan drive system to create a strong, easy-to-assemble, modular and flexible way to handle a number of background paper rolls.

- 2920 Expan background paper drive set with plastic drive chain . . . . . \$ 48.95
- 2950 Auto-Pole, set of 2 . . . . . 130.00
- 2953 Mini Auto-Pole 1.0m-set of 2 (39") . . . . . 110.00
- 2956 Auto-Pole (black anodized finish), set of 2 . . . . . 142.00
- 2960 Complete Auto-Pole/Expan Kit . . . . . 340.00
- Consists of:
  - 1 - Set of Auto-Poles (2950)
  - 1 - Background Holder Hook Set (2955)
  - 3 - Expan sets (2920)
- 2961 Complete Auto-Pole/Expan Kit (same as above but with black Auto-Poles) . . . . . \$353.00

Note: Other accessories available.

# BOGEN PHOTO CORP.

# COPY STANDS

## Technal TC-1 Copy Stand System

The TC-1 features a quick position-setting handle, coupled with a rotating friction drive which can be used for fine adjustments. A flip-over locking lever holds the camera arm firmly in place wherever it's set. The camera arm length is variable to permit centering a variety of cameras over the baseboard.

For precise leveling control of small format cameras when parallelism is important, there's a removable and adjustable alignment guide on the camera arm. And with the TC-1, working with 4" x 5" technical or press cameras is as easy as using a 35, due to the spring counter-balanced elevating mechanism incorporated in its design.

- Overall Height: 43" • Baseboard Size: 20" x 27" (clear of column 23 1/2") • Working Heights (center of tripod thread): Minimum 9 3/4", Maximum 40 3/4" • Crossarm Adjustment (from column): Minimum 6 3/4", Maximum 10 1/2"

Order Code 1870 . . . . . \$310.00

TC-1

## TL-3 Copy Light Assembly for TC-1

The accessory TL-3 lighting provides four swivel arm lamp holders mounted on a folding assembly which can be adjusted over a range of positions, both for lighting on the baseboard, and for above baseboard small object photography. The lamp holders of the TL-3 accept standard reflector floodlight bulbs up to 150W. These lamps provide even more beam coverage, draw less current and are cooler than photofloods. Their color temperature is rated at 27X line voltage, so a 3200°K rating can be obtained from a line voltage of 118.5V, 126V will produce 3400°K.

- Support Arm Length: 20" adjustable from 15° above level to 60°
- Crossarm: 22" (12" between lamp centers)

Order Code 1871 . . . . . \$126.50

## Adjustable Lighting Bar Set

Designed to let you select your own illumination (such as strobe or quartz halogen) and position your lights for a variety of lighting requirements. It consists of two crossbars, 12" long, mounted on 22" long support arms. These support arms can be tilted through a 45° angle, a real benefit when illuminating large artwork. Each cross arm can move from as low as 4" to as high as 21" above the support arms, providing you even more versatility.

Order Code 1874 . . . . . \$76.00

## Movable Copy Stage

Mounted on its own spring counter-balanced carriage, the Movable Copy Stage comes with a removable opal acrylic sheet which provides a clear area of 17" x 14" for transillumination. It's perfect for photomacrography, gross specimen photography and the copying of graphics for slide making, etc.

- Overall Size: 24" x 17" • Clear area: 17" x 14"

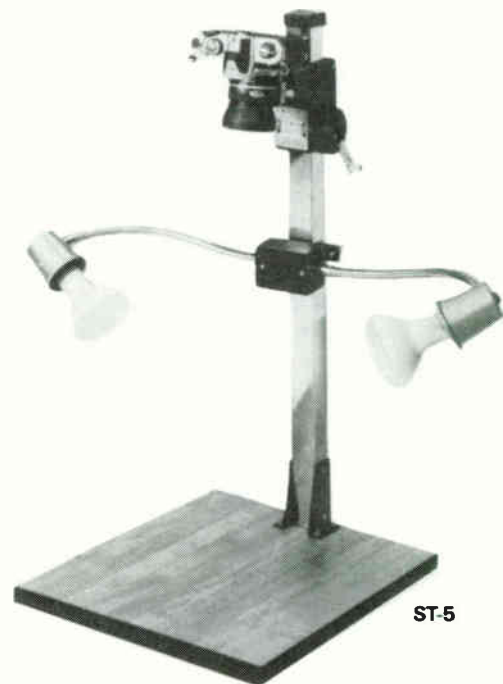

Order Code 1873 . . . . . \$180.00

## Technal ST-5 Compact Copy Stand

This is a basic copy stand with excellent features. It is compact yet sturdy and provides vibration-free camera support. With the friction elevating drive on the right side, you can raise or lower the camera with your right hand keeping the copy in focus with your left. For copying, close-up, photomacrography, and similar applications, the ST-5 is an excellent choice.

- Maximum Height of Arm (measured from camera screw): 28" • Minimum Height: 10 1/2" • Baseboard: 14 1/2" x 17 1/2" • Weight: 10 1/2 lbs.

Order Code 1890 . . . . . \$115.95

ST-5

## L-5 Light Assembly

The ideal companion unit for the ST-5 Copy Stand. Consists of two sockets mounted on gooseneck arms with a junction box and master switch clamp to the column of the Copy Stand. Position of the lights is adjustable vertically on the column by loosening two screws. Flexible goosenecks provide maximum lighting latitude. Designed for 150W reflector floodlight bulbs. U.L. listed.

Order Code 1891 . . . . . \$72.95

# VIDEO SECURITY CENTERS

## Safely Store and Display Your Valuable Video Equipment in Lockable Security Centers

Your expensive equipment can be locked out-of-sight, yet it's always ready for use—simply unlock and open the doors—you're ready for the presentation. And your equipment is easily accessible for operation and repairs. Each center has useful features like a VCR shelf, locking doors with 2 keys, and a ventilated back panel. Heavy-duty casters let you share your system between classrooms or offices.

**A. VCR-1000 All-Wood Video Cabinet** has a rich Walnut finish with quality workmanship. A stylish way to support your video system. Features a tempered glass pullup window that locks to safeguard the TV/Monitor; sliding shelf for VCR; 3" plate-mounted casters and 170° European-style hinges so cabinet doors open fully. Recommended for use with TV/Monitor up to 26" diagonal screens. Ships assembled, (F.O.B. Corinth, MS). Dimensions: monitor cabinet—27"W x 26 1/4"H x 24"D, monitor shelf to VCR shelf—10 3/4", VCR shelf to bottom shelf—13".

**B. VTRC50E Midsize Video Security Center** has twin doors that lock cabinet from top to bottom. 3 adjustable shelves. Steel construction finished in Black, with Walnut mar-resistant laminate doors. Doors mounted on full length piano hinges to fold back against cabinet. Includes a 2-outlet electrical assembly with 20-foot grounded extension cord. Recommended for use with TV/Monitors with up to 19" diagonal screens. Ships disassembled. Cabinet Interior: 26"W x 48"H x 22D.

**C. VTRC70E Video Security Center** offers a larger cabinet with 3 adjustable shelves. 4 locking cabinet doors divide cabinet in half—monitor may be viewed from the top section while VCR and other equipment remains locked in the bottom cabinet. Includes 2-outlet electrical assembly with 20-foot grounded extension cord. Recommended for use with TV/Monitors with up to 26" diagonal screens. Ships disassembled. Cabinet Interior: 31"W x 60"H x 22"D.

**VTRC40E Video Security Center** (not shown) has 2 adjustable shelves. Recommended for use with up to 19" diagonal screens. Complete with 2-outlet electrical assembly with 20-foot grounded extension cord. Ships disassembled. Cabinet Interior: 31"W x 30"H x 22"D.

**D. VTRC420E Personal-Size Video Security Center** features two adjustable interior shelves in 2 3/4" increments, 2" hidden casters, 2-outlet electrical assembly and 20-foot grounded extension cord. Ivory finish. Cabinet Interior: 28"W x 39"H x 23"D. Recommended for use with up to 19" diagonal screens. Ships assembled.

## Universal TV Wall/Ceiling Mounting Systems . . . One Bracket Holds Any Size Monitor!

**E. TVM1 Universal Video Mounting Bracket** Lets you install monitors on the ceiling. Accepts 17" to 26" diagonal screen TVs. Formed steel construction. Black baked enamel finish with Walnut vinyl-clad steel accents. Allows a tilt factor up to 20 degrees. Ships UPS, disassembled.

**F. TVM2 Wall Bracket Adaptor** allows TVM1 to mount on wall. Ships UPS, disassembled.

# MOBILE EQUIPMENT TABLES

## Especially Designed For Your AV/Video Equipment

Feature steel construction, die-pressed shelves with smooth rounded edges, "Quiet-Glide" caster inserts, 4" casters (2 locking), "Square-Lock" design for easy assembly, and Midnite Gray finish. Slant Bar allows you to slightly tilt TV forward, eliminating glare from overhead lights. All ship UPS, disassembled.

The BB Wide-Body Mobile Equipment Tables have an oversized base shelf providing extra stability. Recommended for use with TV/Monitors with up to 26" diagonal screens such that the TV/Monitor will not overhang the shelf.

**A. BB54 Series**, 54"H with 3 shelves. Dimensions: top and middle shelves 32"W x 22"D, bottom shelf 32"W x 27"D, distance between top and middle shelves 12", middle to bottom shelf 32½".

**B. BB44 Series**, 44"H with 3 shelves. Dimensions: top and middle shelves 32"W x 22"D, bottom shelf 32"W x 27"D, distance between top and middle shelves 12", middle to bottom shelf 23".

The MP Mobile Equipment Tables come in different heights with either 2, 3, or 5 shelves. Recommended for use with TV/Monitors with up to 19" diagonal screens such that the TV/Monitor will not overhang the shelf.

**C. MP54DX Series**, 54"H with 5 shelves makes an ideal mobile videotape editing or duplicating rack. Distance between shelves 10".

**D. MP54 Series**, 54"H with 3 shelves. Dimensions: top to middle shelf 23"; middle to bottom shelf—20".

**E. MP48 Series** are 48"H tables with 3 shelves. Dimensions: top to middle shelf 17", middle to bottom shelf 20".

**F. MP30 Series**, 30"H with 2 shelves. Distance between shelves 14".

**G. Mini Pak Mobile Equipment Tables** come with 20"W x 18"D shelves, 2 shelves per table, 26"H, 34"H and 42"H. Top to bottom shelf: MP26-17", MP34-13", MP42-21".

# TV/VCR CABINETS/STANDS

## Show Your Video, And Lock Your Valuable Accessories

Bretford's TV/VCR Cabinets and Stands are designed for small and large group viewing. They feature steel construction for strength and durability, contemporary Midnite Gray enamel finish and "Quiet-Glide" caster system for 2" ball casters or 4" hard rubber casters, (2 locking) depending on the model. Cabinet models come with 2 keys. *Each cabinet or stand will support TV/Monitors with up to 19" diagonal screens such that the TV/Monitor will not overhang the shelf. BBC54E is the only cabinet stand recommended for 26" diagonal monitors such that the TV/Monitor will not overhang the shelf.* All ship UPS disassembled, (except BBC54E and VTRC54E).

*"E" Models feature a standard electrical assembly with two grounded outlets, 20 ft. grounded extension cord and a built-in cord winder.*

A. VTR20 TV/VCR Stand has a recessed top shelf, wider bottom shelf for stability. 2" ball casters. Dimensions: top shelf 30"W x 16"D, distance between shelves 13".

B. VTRC30E TV/VCR Cabinet Stand adds locking storage cabinet to VTR20 frame. Dimensions: top shelf 30"W x 16"D, cabinet interior 28"W x 10"H x 18"D.

C. MPVC40E TV/VCR Cabinet Stand is 40"H, with 2" ball casters. Cabinet has moveable shelf. Dimensions: top shelf 30"W x 16"D, distance between shelves 13", cabinet interior 28"W x 17"H x 18"D.

D. MPVC54EDX TV/VCR Cabinet Stand is 54"H, has slant bar on top shelf to reduce glare and a middle shelf for additional equipment. Complete with 4" casters (2 locking). Dimensions: distance between shelves 12½", cabinet interior 28"W x 17"H x 18"D. (Does Not Ship UPS)

E. MPVC54E TV/VCR Cabinet Stand 54"H, with slant bar and 4" casters (2 locking). Dimensions: distance between shelves 26", cabinet interior 28"W x 17"H x 18"D.

F. BBC54E Wide Body TV/VCR Cabinet Stand 54"H features a wider base for stability. Supports TV/Monitor with up to 26" diagonal screens. 4" casters (2 locking). Dimensions: top Shelf 32"W x 22"D, distance between shelves 17", cabinet interior 32"W x 16¾"H x 27"D.

G. VTRC54E TV/VCR Cabinet Stand 54"H, with slanted top shelf. 4" casters (2 locking). Ships assembled. Distance between shelves 24". Dimensions: top shelf 28"W x 17"D, cabinet interior 28"W x 17"H x 21"D.

# MOBILE EQUIPMENT TABLES

"E" Models feature an electrical assembly with two grounded outlets, a 20 ft. grounded extension cord and a built-in cord winder.

Rubber mat for top shelf helps keep equipment in its place

Die-pressed shelves with smooth, rounded edges provide greater strength and user safety

Arc-welded caster sockets and "Quiet-Glide" caster inserts offer greater strength and mobility for loads up to 460 pounds

Top shelves on all Traditional Mobile Equipment Tables have stiffeners welded on the under-side for extra strength and support

Quality 4" casters

Rolled shelf edges

Rubber mats

SB Safety Belt attaches to any mobile cart—works just like a seat belt!

**From Projectors To Video Systems, These Tables Work Recommended for use with TV/Monitors with up to 19" diagonal screens such that the TV/Monitor will not overhang the shelf.**

**A. 42 Traditional Mobile Equipment Table 42"H with three shelves. Slate Gray. Distance between shelves: top to middle shelf 14½", middle to bottom shelf 17½".**

**34 Traditional Mobile Equipment Table 34"H with 3 shelves. Slate Gray. Distance between shelves: top to middle shelf 6½", middle to bottom shelf 17½".**

**26 Traditional Mobile Equipment Table 26"H with 2 shelves. Slate Gray. Distance between shelves 17½". Ships UPS.**

**16 Traditional Mobile Equipment Table 16"H with 2 shelves. Slate Gray. Distance between shelves 7½". Ships UPS.**

**The T54 Traditional TV/VCR Table 54"H with 3 shelves. Double-welded top shelf. Slate Gray. Distance between shelves: top to middle shelf 23", middle to bottom shelf 20".**

# ADJUSTABLE TABLES

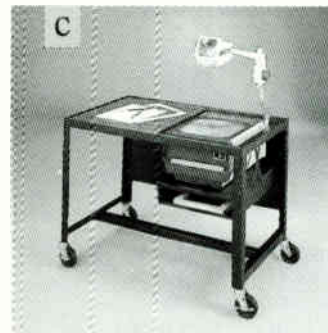

TVA3654 & TVCA3654

A2642 & A2642E

AOH2741

## You Get 5, 8 Or 10 Tables In One!

Versatility and ruggedness are built into Bretford's Adjustable Cabinets and Tables. Each has multiple height adjustments and is designed with all steel construction and die pressed shelves. Other features include the "Quiet-Glide" caster system, arc welded caster sockets for maximum stability and heavy-duty 4" casters (2 locking) for smooth transport of loads up to 460 pounds. Each unit comes with one ribbed rubber mat. *Each table or cabinet is recommended for use with TV/Monitors with up to 19" diagonal screens such that the TV/Monitor will not overhang the shelf.* Cabinet model comes with 2 keys. All ship assembled.

"E" Models feature a standard electrical assembly with two grounded outlets, 20 ft. grounded extension cord and a built-in cord winder.

A. TVA3654 Adjustable TV Table adjusts from 36" to 54" at 2" increments 10 height adjustments in all. Double-welded top shelf. Dimensions: 17 1/2"W x 24"D. Slate Gray.

B. The TVCA3654 Adjustable TV Cabinet same as TVA3654 with a security cabinet. Cabinet Interior: 25"W x 17 1/2"H x 21"D. Midnite Gray.

C. AOH2741 Adjustable Overhead Projector Table works well for stand-up or sit-down applications. Work surface adjusts from 27"H to 41"H in 2" increments, and OH platform adjusts from 6" to 10" in 1" increments. Projector Opening: 15 1/2"W x 20 1/2"D. Black with walnut vinyl writing surface.

D. A2642 Universal Projection Table adjusts to 5 heights: 26", 30", 34", 38" and 42" high by simply removing and resetting four bolts. Slate Gray.

E. CA2642 Adjustable Cabinet same as A2642, with locking cabinet. Cabinet Interior: 23"W x 15 1/2"H x 17"D. Midnite Gray.

TVS Slant Bar Accessory allows you to slightly tilt TV forward, eliminating glare from overhead lights. For use with TVA3654 and TVCA3654.

# PROJECTION SCREENS

Keystone eliminator corrects distorted images, such as overhead projection

Carrying cases for portable tripods are made of heavy vinyl with velcro closure. Center hole for tripod handle assures easy carrying.

## Present Your Best Image On These Quality Screens

### A Series 300 Spectator

Bretford's best portable tripod screen made from the finest materials.

Ships UPS.

3050 M or B	50" x 50"	22 lbs.	\$176.00
3050 L			185.00
3060 M or B	60" x 60"	26 lbs.	193.00
3060 L			201.00
3070 M or B	70" x 70"	30 lbs.	213.00
3070 L			222.00

### B Series 375 Commodore

Bretford's most economical tripod screen. Steel legs, magnetic leg lock, steel handles, high-low capability, tension bar. Ships UPS.

3750 M or B	50" x 50"	19 lbs.	\$119.00
3750 L			127.00
3760 M or B	60" x 60"	22 lbs.	146.00
3760 L			154.00
3770 M or B	70" x 70"	25 lbs.	164.00
3770 L			172.00

### C Series 450 Super Vista

Deluxe screen for large audience applications. Extruded aluminum legs, positive leg lock, steel "D" shaped case with die-cast end caps and handle. Positive plunger lock provides accurate and secure height adjustments.

4577 M or B	84" x 84"	38 lbs.	\$310.00
4588 M or B	96" x 96"	42 lbs.	386.00

### D Carrying Cases

4105	for 50" Tripod Screens	2 lbs.	\$23.00
4106	for 60" Tripod Screens	2 lbs.	27.50
4107	for 70" Tripod Screens	2 lbs.	30.50

## Video Projection Screens . . . Ready When You Are

When not in use, these screens are rolled up and protected in the case. Unlike traditional rigid video projection screens, Bretford screens do not require valuable floor space, so they're ideal for your flexible communications center. Matte White Fabric (M suffix) is traditionally the best all around viewing surface for projection with good clear definition at close viewing angles. Nominal gain at 0° axis is 1.0. Silver Suede Fabric (S suffix) is a new viewing surface designed especially for video projection. Highly reflective silver surface actually highlights and brightens the projected image. Nominal gain at 0° axis is 3.2.

### E Portable Tripod Video Screens

Provide convenience and rugged construction for years of service. Feature strong aluminum legs, positive leg-lock, die-cast handle and steel slat with tension bar. Contemporary steel case has a more durable black finish. Available in 72" or 100" diagonal sizes.

3V45 M	46" x 60"	72" diagonal	26 lbs.	\$191.00
3V45 S				207.00
4V57 M	64" x 84"	100" diagonal	38 lbs.	296.00
4V57 S				317.00

### Wall-Mounted Video Screens

Are made from the best materials. Contemporary case design has a more durable black finish and features a roller-lock which keeps the projection surface in position. Available in 72", 100", or 10' diagonal sizes.

2V45 M	46" x 60"	72" diagonal	12 lbs.	\$ 91.00
2V45 S				108.00
2V57 M	64" x 84"	100" diagonal	24 lbs.	180.00
2V57 S				201.00
2V68 M	72" x 96"	10' diagonal	25 lbs.	207.00
2V68 S				240.00

- 2— Gel/Diffusion frame
- 2— 1000W DXW Lamp, Q1000T5/4CL

- 1— MINI MAC 1000 BROAD-LIGHT w/4-way Barndoor
- 1— 1000W FHM Lamp, Q1000T3/4
- 2— SLIMLINE II 2000W BROAD-LIGHT w/4-way Barndoor
- 2— 2000W FEY Lamp, Q2000T8/4CL
- 2— Light Stand w/5/8" Adaptor
- 2— Heavy-Duty Light Stand w/5/8" Adaptor
- 1— Grip Mac w/5/8" Spud
- 1— 6" C-Clamp w/two 5/8" Spuds
- 1— Carrying Case-Lights
- 1— Carrying Case-Stands **\$2860.00**

### TO-97-LL BASICALLY 3 KIT

- 2— TOTA-LIGHTS, 16' Cables, (less lamps) T1-10
- 1— OMNI-LIGHT 16' Cable, #1 Reflector (less lamps) O1-10
- 1— Omni-Barndoor O1-20
- 1— Full Scrim O1-54
- 1— Tota-brella T1-25
- 1— Tota-frame T1-20
- 1— Assorted Gels T1-78
- 3— Omni-stands O1-33
- 1— Tota/Omni Lampak TO-61
- 1— Case TO-87 **\$825.00**

### D2-94-LL DP 4 KIT

Lightweight kit that is very versatile and unique. Four reflectors can be interchanged to vary the beam pattern from a soft wide angle to a narrow beam long throw fixture.

- 4— DP1000 FIXTURES with #1 reflector and 16' power cable and inline switch
- 4— DP Barndoors
- 4— KS Stands
- 1— DP Lampak
- 1— Carrying Case, partitioned, lightweight **\$1425.00**

### T1-94M-LL T 4 KIT

Versatile and lightweight giving a very wide spread of light, or (by moving the reflector door into the light beam) gives a concentration of light which can be used for bounce light. The kit has a large selection of accessories.

- 4— TOTA 1000W fixtures with 16' power cable and integral two-leaf reflecting doors
- 1— Tota-brella
- 4— Tota-frames
- 2— Assorted Gels
- 1— Lightflector
- 4— Tota-flags
- 1— Tota-Flector
- 4— Flexi-shafts
- 1— Tota-tatch
- 4— Omni-stands
- 1— Tota-mount
- 1— Tota-clamp
- 1— Large Space Clamp
- 1— Gaffer tape
- 1— Tota-lampak
- 1— Case

\$1335.00

### 01640-WB SUPER 600 "ENG" KIT III

Everyone in TV or photo lighting production must have at least one ENG KIT III. Very efficient light output and lightweight.

- 3— FREZZI 600, 30VDC/125VAC Fixture
- 3— 120V Cable, 8' with on/off switch and plug
- 3— DYS 600W Quartz Lamp
- 3— Accessory Holder
- 3— Four Leaf Barndoor
- 2— Scissor Mounts
- 3— Ultra Featherweight Stands, folded 25 1/4", extended B3 1/2"
- 1— 25' Extension Cable, 3-way
- 1— Rugged Case, partitioned, roomy, lightweight

\$975.00

### 01610-WB SUPER 600 "ENG" KIT I

Designed for use when 120VAC is not available. The power is a 30VDC battery belt which generates a 250W lamp. Both power cords and lamps are included in the kit. Gives more light output per watt than any competitive fixture.

- 1— FREZZI 600, 30VDC/125VAC fixture
- 1— 120V Cable, 8' with on/off switch and plug
- 1— 30V Cable, 8' with on/off switch and plug
- 1— Accessory Holder
- 1— Rotating Barndoor
- 1— Daylight Glass Conversion Filter, 3200°K to 5400°K
- 1— Hand Grip

- 1— Micro-Featherweight Stand, folded 18 1/2", extended 78"
- 1— 30V at 4AH Battery Belt (250W-30 min) w/charger cable (charges one hour)
- 1— DYS, 600W at 3200°K Quartz Lamp
- 1— DYG, 250W at 3400°K Quartz Lamp
- 1— ENG Kit I Carrying Case

\$1015.00

01611-WB Same as 01610-WB above except includes "Fast Charge" belt, model F-30 EXFA-F in place of F-30EC-F

\$1065.00

BC-30-D-F One (1) hour fast charger for above F-30EXV-F (Charges one hour)

395.00

### MINI-FILL KITS

#### MFK1-F INCLUDES:

- 1— MF12P-F Mini-Fill
- 1— VB12-F Battery
- 1— VBC-F Charger
- 1— EYC-F or EXV-F Bulb

\$295.00

#### MFK2-F INCLUDES:

- 1— MF12P-F Mini-Fill
- 1— VB12-F Battery
- 1— VBC-F Charger
- 1— EYC-F or EXV-F Bulb
- 1— MFDF-F Dichroic Filter
- 1— FLCC-F Carrying Case

\$455.00

#### MFK3-F INCLUDES:

- 1— MF12V-F Mini-Fill
- 1— VB12-F Battery
- 1— VBCV-F Charger
- 1— EYC-F or EXV-F Bulb

\$355.00

#### MFK4-F INCLUDES:

- 1— MF12V-F Mini-Fill
- 1— VB12V-F Battery
- 1— VBCV-F Charger
- 1— EYC-F or EXV-F Bulb
- 1— MFDF-F Dichroic Filter
- 1— MFCC-F Carrying Case

\$515.00

#### MFK5-F INCLUDES:

- 1— MF4X-F Mini-Fill
- 1— VB4X-F Battery
- 1— VBCV-F Charger
- 1— EYC-F or EXV-F Bulb

\$365.00

#### MFK6-F INCLUDES:

- 1— MF4X-F Mini-Fill
- 1— VB4X-F Battery
- 1— VBCV-F Charger
- 1— EYC-F or EXV-F Bulb
- 1— MFDF-F Dichroic Filter
- 1— MFCC-F Carrying Case

\$525.00

#### MFK9-F INCLUDES:

- 3— MF4X-F (LC) Mini-Fill
- 3— MFDF-F Dichroic Filter
- 3— FLLS-102-F Short Stand
- 1— LPS-400-F Power supply
- 3— SL 1-F Stud
- 3— EYC-F Bulb
- 1— FLCC-104-F Case

\$1250.00

Other Custom-Designed Kits Available Per Your Specific Requirements.

## PORTABLE LIGHTING

### MINI-FILL

YOUR CHOICE OF POWER CONNECTOR

- A Frezzi Amp Connector
- B 2-Pin Amphenol (30V)
- C BP-90 In-Line
- D Cigarette Lighter Type
- E XLR (4 or 5 Pin)

Shown with convenient flip-up dichroic filter model MFDF-F and diffused front surface.

### UNIQUE MINI-FILL FEATURES:

- Extremely lightweight—only 12 oz.
- Compact size 2" x 4 1/4"
- Operates from any 12—14.4 or 30V battery
- Utilizes the latest high efficiency multi-mirror lamps—(20-100W)
- Completely serviceable
- Field tested
- Field proven
- Mounts on camera, pistol grip or lightstand
- Dual-lighthouse configuration from one power source
- Rugged construction—Built by Frezzolini®—The world leader in portable lighting and power

### SINGLE LIGHT CONFIGURATION (Including 100W or 75W Bulb)

- MF12P-F Mini-Fill w/Cigarette Lighter plug (Fig. D) \$149.95
- MF12C-F Mini-Fill w/BP-90-F Type Co-Ax Plug (Fig. C) 149.95
- MF12V-F Mini-Fill w/Frezzi Amp Connector (Fig. A) 149.95
- MFSV-F Mini-Fill w/Short (18") Cable & Amp Connector (Fig. A) 149.95
- MF4X-F Mini-Fill w/XLR-4-F Connector (Fig. E) 149.95
- MF5X-F Mini-Fill w/XLR-5-F Connector (Fig. E) 149.95
- MF30-F Mini-Fill w/2-pin Amphenol Connector for 30V Operation (Includes 80W Bulb) (Fig. B) \$154.95

### DUAL LIGHT CONFIGURATION

- DMF12-F Twin Mini-Fill Interconnected for Power from one (1) Source. Choice of Power Connectors: Sony BP-90-F In-Line, Frezzi-Amp, XLR-4-F or Cigarette Lighter Type \$295.00
- DMF30-F Same as DMF12-F Except Wired for 30V Operation. Including 2-Pin Amphenol Connector \$298.00
- MFDF-F Mini-Fill "Flip-Up" Dichroic Filter 88.00
- MFCC-F Mini-Fill Carrying Case 80.00
- LP90-F Leather Pouch w/Belt Loops for BP-90-F 38.00
- LPS100-F AC Adaptor/Power Supply, 100W w/Cigarette Lighter Type Mating Connector 195.00
- LPS400-F 4-Channel AC Adaptor/Power Supply, 400W w/XLR4-F Connector Output 295.00
- FLLS-102-F Mini-Fill Short Stand 36.00
- CLPA-F On-Camera Power Adaptor (XLP-4-F) 125.00
- 1340-A-F Replacement Socket and Base Plate 25.00

### MINI-FILL LAMP GUIDE

Lamp Code	Volts	Watts	Life (Hrs.)	Color Temp.	Typical Center-Candle-power	Beam Spread

\* Also recommended for 13.2 & 14.4VDC operation

### KEY AND BACKLIGHTING

AC/DC Power—You need "FREZZI" high output lights, plus portable power for most all ENG production.

**MODEL FL-650-F**

- Ultra-lightweight—1 lb.
  - Built-in spare lamp holder
  - AC/DC Operation from 12V-30V-115V-220V-240V
  - 650W capability
- FL-650-F Lighthouse Only **\$165.00**  
Lamp/Cable/Handle/Mount are additional.

**MODEL FL-250-F or MODEL FL-100-F**

- Ultra-lightweight—1 lb.
  - DC operation from 12V-30V
  - Complete kits available
  - Choice of power configurations
- FL-250-F **\$195.00**  
FL-100-F **195.00**

Includes: Lamp, Attached Cable, Hand-Grip

**SWING-AWAY DICHROIC FILTER**

**BATTERY PACKS/POWER BELTS**

**30VDC Operation with EC-30-F High-Capacity Battery Packs**

- 30VDC at 4AH
  - Operates 30V 250W DYG lamp 30 minutes
  - Fast charge capability (1 hr.)
  - Built-in overnight charger (12 hrs.)
  - Rugged steel case
  - Weight: 10 lbs.
  - Premium-grade selected NiCad cells used
- Model EC-30-F **\$645.00**  
Optional: BC-30D-F One (1) hour fast charger **395.00**

**VB-F Series 12V at 4AH "High-Tech" Battery Packs**

- Premium-grade selected NiCad cells used
  - Built-in belt clip
  - Shoulder strap provided
  - Includes VBCV-F 115V overnight charger
- VB-12-F 4AH, 12V, 7.813" x 5.10" x 1.625", 4.0 lbs. **\$165.00**

\*with additional XLR4 connector **255.00**

**Frezzi™ High Capacity 6AH Multi-Purpose Power Belts**

- Features:**
- High capacity—full 6AH (at 6A discharge rate)
  - Batteries housed in rugged aluminum cassettes mounted on a genuine leather belt
  - Built-in overnight (14 hrs.) charger
  - Fast charge (1 hr.) capability with Model BC-77U charger
  - Fuse & thermal protection
  - Low belt profile—only 4" wide
- Model F-12-EXFA **Model F-12-77**  
• 12.0V at 6AH • ± 6.0V at 6AH  
• Standard five (5)-pin XLR • HL-77 connector  
connector • Weight 8 lbs.
- Weight 8 lbs. **\$475.00** **\$475.00**  
Model F-14-EXFA **\$475.00**  
• 14.4V at 6AH  
• Four (4)-pin XLR connector  
• Weight 8.5 lbs. **\$495.00**

**Frezzi Power Belts for 30V Sun Gun 30VDC Operation with Frezzi F-30-EC-F and F-30-EXFA-F High-Capacity Battery Belts**

- Full 4AH capacity using selected NiCad cells
  - Operates 30V 250W DYG lamp for 30 minutes
  - Batteries housed in rugged aluminum cassettes which are mounted on a genuine leather belt
  - Built-in overnight charge (14 hrs.)
  - F-30-EXFA-F has fast-charge capability (1 hr.) w/ optional Frezzi 8C-30D-F fast charger
  - Fuse and circuit-breaker protection
  - Weight: 10 lbs.
- Model F-30 EC-F **\$595.00**  
Model F-30-EXFA-F **645.00**  
Model F-30/14EXFA-F Switchable 30V at 4AH, 14V at 8AH Power Belt **795.00**

**BATTERY PACKS**

**Frezzi On-Board™ Battery Packs "Superior To Camera-Manufacturer Supplied"**

- Extended life with no memory
- Battery mounts direct to camera-manufacturer-supplied Anton/Bauer bracket or optional Frezzolini™ camera battery mounting bracket
- No cables or modification required
- Full 4AH capacity—only premium selected NiCad cells used
- Custom-designed mounting brackets available
- Rugged welded aluminum case
- Lightweight 2AH models available
- Internal fuse and thermal protection—internal spare fuse included for field replacement
- Complete charge compatibility with camera-factory-supplied charge systems, or Frezzolini fast, overnight or multiple battery chargers available

- Frezzi On-Board 6P-12-F 4AH, 12V **\$455.00**  
Frezzi On-Board BP-13-F 4AH, 13.2V **475.00**  
Frezzi On-Board BP-14-F 4AH, 14.4V **495.00**  
Frezzi On-Board BP-122-F 2AH, 12V **275.00**  
Frezzi On-Board BP-132-F 2AH, 13.2V **285.00**  
Frezzi On-Board BP-142-F 2AH, 14.4V **295.00**

All battery packs have fast charge (1 Hr.) capability.

**Frezzi Premium-Grade Direct Replacement for Sony BP-90-F Battery Packs FBP-90-F and Fast Charger FBP-90FC-F**

- Full 4AH capacity using premium-grade selected NiCad cells
  - Rugged and serviceable plastic case
  - Fuse and thermal protection
  - Internal spare fuse for field replacement
  - High discharge capability to power 100W lightheads
  - Weight 3.5 lbs.
  - Complete charge compatibility with Sony BC-210 charger, Frezzi BC-124S-F overnight charger, Frezzi MBC-5-F 8-battery overnight charger, Frezzi BC-77UB-F 1 hr. fast charger with HV fast-charge adaptor cable, plus other Frezzi fast/slow multi-battery charging stations
- FBP-90-F **\$275.00**  
FBP-90FC-F **330.00**

**Battery Pack Mounting Brackets**

- HM90-F BP90-F adaptor for on-board mount **\$198.00**  
HM90B-F Same as HM90-F except for Betacam mount\* **198.00**  
HM90BWF Same as HM90B except has mount for wireless receiver\* **248.00**

\*Requires HMBVV1-F bracket

### Batacam Battery Mounting Bracket

Model: HMBVV1-F

Bracket mounts to the upper rear portion of the recorder, and accepts BP13/BP132-F batteries or BP90-F when used with HM90-F. Also accepts RPS-3-F and RPS-40-F on-board AC supply.

HMBVV1-F \$105.00

### Frezzi 2AH NiCad Replacements for

#### Lead-Acid VTR Battery Packs

Model FBP-20-F Replacement for Sony BP-20A

Model FBP-44-F Replacement for JVC PBP-1

Model FBP-44-F Replacement for Panasonic LCR-3012 VBP

Model FBP-60-F Replacement for Sony BP60

Model FNP-1-F Replacement for Sony NP-1

#### NiCad Batteries

Model B-12-F (12V at 1AH) \$125.00

Model FBP-20-F (12V at 2AH) 225.00

Model FBP-44-F (12V at 2AH) 225.00

Model FBP-60-F (12V at 2AH) 225.00

Model FNP-1HC-F (12V at 1.8AH) 75.00

### Sealed Lead Acid Battery

Model 12V 6.5AH-SGLA-F 37.50

## CHARGERS

### FREZZI SINGLE-BATTERY UNIVERSAL FAST CHARGERS MOEEL BC-77U/MOEL BC-77UB SINGLE-BATTERY UNIVERSAL FAST CHARGERS

#### General:

The line of Frezzolini Universal fast chargers were specifically designed to fast charge (1 hr.) all models of Frezzolini 12V and 14.4V 2-6AH battery packs. The Frezzi chargers also have the capability to safely fast charge Anton/Bauer 12V and 14.4V NiCad on-board battery packs. All chargers are transformer-type line-isolated and designed per European IEC-65 safety code specifications. The chargers are constructed of heavy-gauge aluminum in a compact size to withstand abuse in the field. The universal feature of this charger enables operation anywhere in the world.

Model BC-77U/BC-77UB-F \$395.00

Model BC-300-F (for use with 30V batteries with fast charge capability) 395.00

### FREZZI MULTIPLE BATTERY CHARGING STATIONS

"We custom-design per your specific charging requirements"

#### MBC-2-F (All Feature Model)

Fast-charges five (5) Frezzolini or Anton Bauer 12-14.4V NiCad battery packs in less than one (1) hour while simultaneously charging eight (8) additional Frezzolini, Sony, JVC or Panasonic VTR battery packs overnight. Universal AC inputs. Deluxe shipping case available. Weight: 45 lbs.

MBC-2-F \$2400.00

#### MBC-4-F

Fast charges (1 hr.) five (5) Frezzolini or Anton/Bauer 12-14.4V NiCad battery packs while simultaneously charging eight additional Sony BP-90 type battery packs in 14 hours. Universal AC inputs. Deluxe shipping case available. Weight: 45 lbs.

MBC-4-F \$2090.00

#### MBC-4A-F

Fast charges (5) Frezzolini or Anton/Bauer 12-14.4V battery packs. Weight: 43 lbs.

MBC-4A-F \$1595.00

#### MBC-5-F, Charges Eight (8) BP-90 Type Batteries Simultaneously

- Universal AC inputs
- Compact size
- Line-isolated
- Current-sensing LED's
- Other models available for all VTR or camera battery packs

Charge eight (8) BP-90 type battery packs simultaneously in 14 hours with MBC-5 Charging Station. Universal AC inputs. Weight: 8 lbs.

MBC-5-F \$495.00

### Overnight Trickle Chargers

- Fully charges battery packs in 14 hours
- Switchable 115-230VAC 50/60Hz input
- Miniature size
- Transformer-type line-isolated
- Current-sensing LED

Model FTC-12/13/14-F (For BP-12/13/14-F) Fig. B \$80.00

Model FTC-122/132/142-F (For BP-122/132/142-F) 90.00

Model BC-122S-F (For FBP-20/44/60-F) Fig. C 90.00

Model BC-124S-F (For BP-90/FBP-90-F) Fig. A 80.00

Model CR-1-F (Current regulated for BP-90-F, BP-12/13/14-F) 125.00

Trickle charges for VB-F series batteries 115V input only.

Model VBC-F (For VB-12-F) \$38.00

Model VBCV-F (For VB4X/VB-12V-F) 38.00

Model FTC-NP1-F (For (1) NP1) 95.00

## CHARGERS/POWER SUPPLIES

### Frezzi Dual Channel AC Adaptor and Fast Charger

The Frezzolini RPS-2-F Dual-Channel combination power supply/fast charger consists of two totally independent power sources. Each power source has the capability of either functioning as a precise regulated power supply for ENG Camera/VTR Power or switching over to a NiCad battery fast charger. Either one or two battery packs are simultaneously fast charged with automatic high-charge termination when the battery packs reach full charge.

#### Specifications

AC Input: 115/230VAC ± 10% 50/60Hz

Regulated DC Output: 13.25VDC (3.0A max. each channel)

Line Regulation: ± .05% for 10% line change

Load Regulation: ± .05% for 50% load change

Output Ripple: 5.0mV p-p maximum

Overload Protection: Automatic current limit/foldback

Fast Charge Time: 12.0V battery—75 min.

14.4V battery—180 min.

Size: 8 1/2" x 5" x 5 1/2"

Weight: 8.5 lbs.

RPS-2-F \$895.00

### Frezzi On-Board™ AC Power Supplies

#### Models RPS-3-F and RPS-40-F

Ultra lightweight, compact size, mount directly to ENG/EPF professional TV cameras with on-board battery mounts. Replacing battery with either unit allows for "continuous" operation when 120 or 240VAC 50/60Hz is available. Easy voltage selection slide switch on unit. On-off lighted switch. Advanced switching design with full RFI/EMI suppression. Supplied as OEM and replacement equipment to major manufacturers.

#### Specifications

RPS-3-F RPS-40-F

Power: 50W 40W

Output Current: 4A max. 3A max.

Output Voltage: 13VDC nominal

Output Ripple: 10mV typical

Input Line Selection SW.: 120/240VAC 50/60Hz

Line Regulation: ± 0.1% (10% line change)

Load Regulation: ± 0.2% (50% load change)

Current Limit: Output protected and fully isolated

Size: 5.0" x 4.0" x 3.4" 5.25" x 4.125" x 2.0"

Weight: 2.3 lbs. 1.8 lbs.

RPS-3-F \$595.00

RPS-40-F \$450.00

63003L-8M	STUDIO STAND LOW folded 28" extended 64"	193.50

A must for positioning the light beam exactly where you want it, placing the boom stand out of the picture. A light can easily be counterbalanced equal to the weight of a 6" fresnel with accessories.

63020-8M BOOM ARM AND HEAVY-DUTY STAND \$630.50

### LTM MICROPHONE POLES

The LTM Microphone Poles are now being made of a new composite material, carbon and fiberglass, making the best microphone poles even better.

They are lighter, stronger, and extremely reliable. There is an access hole at the top if there is a need to run a wire inside the pole.

The new poles are manufactured in five sizes, ranging from 15" collapsed to 3'7" extended for the smallest pole, to 5'2" collapsed to 16'7" extended for the largest pole. The latter also has a 4'8" extension to make it a full 21'.

Code #	Designation	Weight	Price
M2 90A 412-LTM	15" to 4'1/2"	8.6 oz.	\$234.00
M2 90A 413-LTM	20" to 6'3"	9.5 oz.	235.00
M2 90A 414-LTM	31" to 9'	13.7 oz.	380.00
M2 90A 415-LTM	4'1" to 13'8"	17.6 oz.	400.00
M2 90A 416-LTM	5'2" to 16'7"	23 oz.	470.00
M2 90A 417-LTM	4'8"	9.5 oz.	298.00

### GAFFER EQUIPMENT

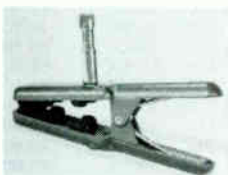

1B321/3-BM Two Position 5/8" STAND TO FIXTURE MOUNT with 1/2 Yoke Bolt \$15.80

02705-WB "C" Clamp with Hand Position Knob - 1/2" yoke bolt \$17.50

02704-WB As above. No plating, paint or hand knob - 1/2" yoke bolt \$10.00

63070-BM GAFFERS GRIP with 1/2" Safety Stud, Non-Marring \$30.95

02731-WB PANTOGRAPH STIRRUP \$16.00

02734-WB STIRRUP PIPE, two light position \$10.00

### SAND BAG

Used to weight stands for fixtures, boom, gobos and flags to assure stability and safety both on location and in the studio. These high quality lined sandbags can also be emptied and reloaded with ease.

0702B-WB SINGLE BAG - 25 lbs. \$55.00  
07029-WB SADDLE BAG - 50 lbs. 75.00

## MATTHEWS GRIP EQUIPMENT

When your video or film production calls for grip equipment, Matthew's has it! Call WBC for a complete Matthew's catalog.

## PORTABLE DISTRIBUTION

### CONNECTORS

All connectors are PHENELIC molded plastic, grounded and shipped with wire ends for the pin connectors. (All are grounded.)

### LTM PEPPER POT DIMMER

- 40A Triac
- 1000W capacity
- Lightweight and rugged cast aluminum housing
- 10A circuit breaker
- Input surge protection

LTM's PEPPER POT is a lightweight 1000W capacity dimmer that provides a smooth and sensitive 150µs rise time, utilizing the modified square law curve.

The rugged cast aluminum housing is powder-coated for durability and has a mylar, scratch-resistant face plate.

List Price \$194.00

### 2.4kW PIGTAIL INLINE DIMMER

0600502-EC	Parallel Blade "U"	\$325.00
0600506-EC	Pin Plug	325.00
0600503-EC	Twist Lock	325.00
06006-EC	Remote Control Unit	81.00

### MAIN ENTRY POWER CONTROL BOX

Main power entry with CAM-LOK connectors to 50A 240V, 3 phase/4 wire main breaker distributed to eight 20A breaker/switches protecting two each 20A recessed plugs all housed in an approved enclosure. Box is constructed from aluminum. 150 usable amps at 125V.

04439-WB Main Entry Power Control Box \$2300.00

Note: All Portable Distribution exposed cabling is of S.D. Standards (resists oil, water, etc.). Other wire types and configurations may be Custom Fabricated upon request. (All grounded wiring).

## GAFFER SUPPLIES

### THORN LAMPS\*

Thorn, an English corporation, is one of the world's largest manufacturers of quartz lamps. The CYX, one of the most used lamps in the industry, has a stronger base than those of competitors...made from super strong glass/mica plus a high temperature metal retaining clip assures maximum strength from the base to the quartz envelope. Lamp tests show they are 50% quieter and last up to 60% longer at 3200K°, 125V.

# CURTAINS, TRACK & ACCESSORIES

## CURTAINS — CYC

Cyclorama curtains are seamless up to 125' in length and 28' in height. The cloth is inspected before fabrication to assure against weaving flaws and sewn to our rigid specifications. These cycloramas are available in three colors — white, CBS gray, powder blue/green.

## SEAMLESS LINO-WEAVE

This curtain has a 4" heavy-duty binding at the top with spring harness snaps on one foot centers. The 2 3/4" bottom hem has a #90 lead tape weight sewn 1" above the bottom of the hem in a separate muslin pocket. The side hems have a 2" heavy-duty binding with eyelets on 2' centers for tauting the curtain. Tow cord with handle is provided for easy transporting of curtain. The curtain is flame-proofed and flawless (as per the standards of the mills and converters) and is fabricated to the highest quality workmanship. Tow cords are also furnished.

	Sq. Ft. (14'9" & under)	Sq. Ft. (14'10" & over)
07005-WB White	\$3.90	\$4.15
07006-WB CBS Gray	4.10	5.00
07007-WB Powder Blue/ Green	4.00	4.75

## SEAMLESS SCRIM

07038-WB White	\$2.20	\$2.95
07039-WB Black	2.30	3.20

## TAUTING POLE

Tauting poles are used generally with the CYC curtain to assure proper vertical tension on the cyclorama. They stand vertical at both ends of the CYC with adjustable claws attached through the vertical eyelet on the curtain. The base is weighted with a sandbag. The curtain is then adjusted to a proper tautness by the pair of poles.

07013-WB Tauting Pole Base (one left and one right hand)	(2 req'd) \$ 50.00 ea.
07014-WB (8') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 56.00 ea.
07015-WB (9') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 63.00 ea.
07016-WB (10') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 70.00 ea.
07017-WB (11') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 77.00 ea.
07018-WB (12') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 84.00 ea.
07019-WB (13') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 91.00 ea.
07020-WB (14') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 98.00 ea.
07021-WB (15') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 105.00 ea.

07026-WB (20') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 140.00 ea.
07027-WB (21') Tauting Pole with Guy Wire and Turnbuckle	(2 req'd) 147.00 ea.

## EYELET CLAWS

07031-WB Eyelet Claws to attach Tauting Pole to CYC Curtain (2' centers required)	\$14.00
---	---------

## SAND BAG

07029-WB Sand Bag, 50 lb. size, non-spill saddle bag type made of heavy-duty duck with inner liner and Velcro fasteners. Used to hold base and pole in position \$75.00

## CURTAINS — BACKGROUND SPECTROCOLOR II™

The background curtains are also fabricated to rigid specifications and come in almost any color. Usually it is recommended that the first background curtain be chroma-key blue. This then permits chroma-keying and when not illuminated may be used to produce a limbo effect. Tow cords are also furnished.

(Primary)	Sq. Ft.
07058-WB Red	\$2.20
07059-WB Green	2.20
07060-WB Chroma-Key Blue	2.20
(Other)	
07061-WB Antique Gold	2.20
07062-WB Silver Haze	2.20
07063-WB Limbo Black	2.20

## VELCRO FASTENER

07068-WB 8' Velcro Fastener	\$20.00
07069-WB 9' Velcro Fastener	22.50

07079-WB 19' Velcro Fastener	47.50
07080-WB 20' Velcro Fastener	50.00
07081-WB 21' Velcro Fastener	52.50

07083-WB SWATCH BOOK	\$2.50
----------------------	--------

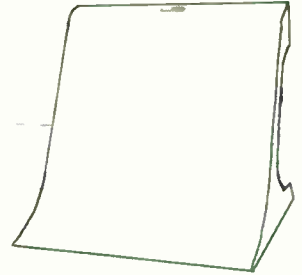

## CYC GROUND ROW

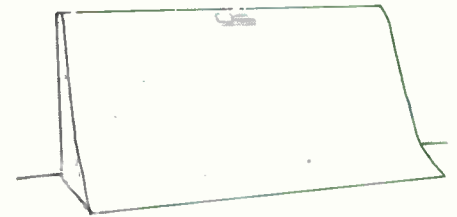

Made of fiberglass for durability and to allow compound curvatures. Color of the ground row matches the cyclorama curtain. Hides all cyclorama floor fixtures. When using top cyc lighting, the ground row is tinted with gels.

If designed, the ground row may be painted to match any color background curtain by using tempa paint and washing with water when production is complete. Works 5' from cyc curtain.

## CYC LIGHT GROUND ROW

07085-WB 4 1/2" radius corner section	\$450.00
07086-WB 8' straight section	475.00

## CYC CURTAIN GROUND ROW

07088-WB 9' radius corner section	\$425.00
07089-WB 8' straight section	375.00

## CURTAIN TRACK AND ACCESSORY HARDWARE

It is most important that the curtains be suspended properly to assure even travel at the studio floor and stability of the track system. Wall brackets are available in 6" increments from the studio wall. Suspension brackets are used where wall mounting is not possible. All brackets assure proper spacing between the tracks. Grid mounted track hangers are available for studios where the grid pipe extends to the studio wall. Hardware is available for the mounting to any type of wall, including hollow.

Track and accessories have been selected to assure a perfect installation. Curtain carriers are supplied with the proper trim chain ready to attach the cyc or background curtains. The dual track method is recommended. Track switching can be purchased upon installation or can be installed at a later date. A complete package, ready to install, includes preformed corners, assuring proper diameter for accurate corner illumination and ease of curtain travel.

01710-WB 5' section of straight cyc/background track	\$ 12.00
07111-WB 10' section of straight cyc/background track	24.00
07112-WB 15' section of straight cyc/background track	36.00
07113-WB 20' section of straight cyc/background track	48.00
07114-WB 9' radius, 1/4 circle cyc/background track	40.00
07115-WB 9' radius, crating charge	30.00
07118-WB 4 1/2' radius, 1/4 circle cyc/background corner track	26.00
07119-WB 4 1/2' radius, crating charge	18.00
07122-WB Track Switch, Right Hand	400.00
07123-WB Track Switch, Left Hand	400.00
07124-WB Inter Track Switch Assembly	800.00

07125-WB	Switching Pole	\$100.00
07127-WB	Trim Chain per foot	.55
07128-WB	Nylon Wheel Carrier with Bumper Assembly	6.00
07129-WB	Hanging Clamp	1.73
07130-WB	Ceiling Clamp	6.90
07131-WB	Splicing Clamp	5.50
07132-WB	Carrier Stop	3.75

#### WALL BRACKETS

07138-WB	4" Single Track Wall Bracket Assembly	\$16.50
07141-WB	8" Double Track Suspension Bracket Assembly	15.00
07142-WB	12" Double Track Wall Bracket Assembly	23.50
07143-WB	18" Double Track Wall Bracket Assembly	34.00
07144-WB	24" Double Track Wall Bracket Assembly	36.50
07145-WB	30" Double Track Wall Bracket Assembly	38.50
07146-WB	36" Double Track Wall Bracket Assembly	40.50
07147-WB	42" Double Track Wall Bracket Assembly	42.50
07153-WB	24" Double Track Corner Wall Bracket Assembly	37.00
07154-WB	30" Double Track Corner Wall Bracket Assembly	40.00
07155-WB	36" Double Track Corner Wall Bracket Assembly	43.00

(Can be used for monitor/shelf bracket)

#### TRUSS OR CEILING SUSPENSION

7161-WB	Beam Attachment Assembly for 8" Suspension Bracket	\$18.50
07162-WB	Hanging Clamp Assembly for Single Track Suspension (each includes 18" x 3/8" all-thread rod)	14.00

#### GRID PIPE SUSPENSION

07163-WB	Track Suspension Bracket Top (1 1/2" ID to Track)	\$8.00
07164-WB	Track Suspension Bracket Top Corner Right Hand (1 1/2" ID Pipe)	8.00
07165-WB	Track Suspension Bracket Top Corner Left Hand (1 1/2" ID Pipe)	8.00
07167-WB	Track Suspension Bracket Bottom (1 1/2" ID to Track)	7.50
07168-WB	Track Suspension Bracket Bottom Corner Right Hand (1 1/2" ID Pipe to Track)	7.50
07169-WB	Track Suspension Bracket Bottom Corner Left Hand (1 1/2" ID Pipe to Track)	7.50
07172-WB	Accessory Suspension Bracket (with 3/8" Attachment Hole)	5.00
07171-WB	Accessory Suspension Bracket (with 3/8" Threaded Stud)	5.50
07170-WB	Accessory Suspension Bracket (with 3/8" Threaded Socket)	5.75
07177-WB	All Thread 3/8" coupling	1.00

## STUDIO DISTRIBUTION

Rigid, 16 gauge, one-piece 3 1/2" x 4 1/2" steel construction of desired length, with internal wiring to meet all electrical codes. Available with mounting hardware for any possible situation, standard 18" or 24" pigtail with connector of your choice. A unique four circuit cyc box

for powering your cyc lights. Unit available completely assembled including 1 1/2" ID pipe (not included in price below) ready to hang...saving time and cost at installation. Comes primed and painted with 3" permanent decal assuring circuit identification from the control console.

### GRID CONNECTOR STRIPS

05015-WB	10' Strip, 4 20A * Pigtails	\$404.50
05018-WB	13' Strip, 5 20A * Pigtails	500.00
05021-WB	16' Strip, 6 20A * Pigtails	617.00

Other Configurations Available  
Price on Application

\*Add \$13.75 per Circuit for 20A NEMA Twist Lock.

Note: Price for Connector Strip Bracket Assemblies, Single Pipe are included in price of Connector Strip and are completely assembled ready to install. They are shipped in a wooden crate, price included.

### WALL BOXES

Fabricated to the high standards of the above mentioned connector strip with desired number of circuits and ampacity. Ready for wall or pipe mounting.

05310-WB	Two Pigtails, 2-20A	\$102.00
05315-WB	Three Pigtails, 2-20A, 1-50A	142.00
05311-WB	Three Pigtails, 3-20A	138.00

Other Configurations Available  
Price on Application

Replacement 3", 3 color circuit numbers .50

## GRID HARDWARE

All hardware may be purchased to suspend the complete lighting grid system. Included would be load channel, for ceiling mounting positions, all thread, required nuts and bolts, beam clamps, concrete anchors, grid hardware and pipe cut to length.

05107-WB LIGHT PIPE ft./\$2.25

The heart of good lighting is the grid system. It is very important to use 1 1/2" ID light pipe.

05194-WB LIGHT PIPE Handling Charge ft./10

05109-WB GRID LOCK \$12.00

Used to fasten perpendicular 1 1/2" ID light pipe together when constructing a grid. Also used for movable light pipe to place a light at any position in the grid. The grid lock will not let the pipe torque.

05113-WB Beam clamp 3/8", attaches "Load Channel" to most types of angle iron, such as truss deck beams \$5.50

05114-WB Bolt Assembly 3/8", attaches "Load Channel" (as above) when slots are provided by truss deck beams (money savings) .75

05115-WB Sleeve Anchor 3/8" (for low PSI density concrete ceiling and floors) .55

05116-WB Wedge Anchor 3/8" (for high PSI density concrete ceiling and floors) 2.00

05117-WB	Toggle bolt 3/8" assembly for hollow wall	\$1.00
05118-WB	Load Channel, slotted sections, 20' x 3/8" x 1 1/2", 12 gauge	76.00
05112-WB	Load Channel Splicing Clamp	13.00
05119-WB	All Thread Suspension Rod, 3/8" x 12' plated	7.00
05120-WB	Locking Spring Nut	1.25
05121-WB	Square Locking Washer	1.20
05122-WB	Hex Head Nut, 3/8"	.10
05123-WB	Flat Washer, 3/8"	.05
05124-WB	Lock Washer, 3/8"	.05
05125-WB	Connector Strip Bracket Assembly, Single Pipe	22.50
05126-WB	Connector Strip Bracket Assembly, Double Pipe	28.00
05191-WB	Corner 90° Cyc Light Pipe, 4 1/2' radius, 1 1/2" ID Slip Couplings—both ends	90.00
05192-WB	Pipe Cuts, 1 1/2" ID	1.75
05193-WB	Pipe Threads, 1 1/2" ID	5.00
05195-WB	Light Pipe Coupling	4.00
05196-WB	Light Pipe Wall Flange, 1 1/2" ID	12.95
05197-WB	Movable Light Pipe, 6' x 1 1/2" ID	16.00
05198-WB	Light Pipe end plug 1 1/2" ID	1.75
05109-WB	Grid Locks, 1 1/2" x 1 1/2" for Movable Light Pipe	12.00

## STUDIO LADDERS

Designed to meet or exceed all safety standards. These ladders are manufactured to work to grid height providing a 6' reach from ladder platform to grid with a 30" safety rail. The ladder is fabricated from 1" square tubing with all joints welded. Gaffers storage chest and basket for extension cables and other frequently used studio equipment are recommended. The large casters are rubber with toe touch locking. A second ladder is recommended for larger studios. Finished with two coats of durable enamel.

09210-WB	Studio Ladder for 8' Grid	\$ 730.00
09211-WB	Studio Ladder for 9' Grid	790.00
09212-WB	Studio Ladder for 10' Grid	865.00
09213-WB	Studio Ladder for 11' Grid	935.00
09214-WB	Studio Ladder for 12' Grid	965.00
09215-WB	Studio Ladder for 13' Grid	1030.00
09216-WB	Studio Ladder for 14' Grid	1095.00
09217-WB	Studio Ladder for 15' Grid	1160.00
09218-WB	Studio Ladder for 16' Grid	1180.00
09219-WB	Studio Ladder for 17' Grid	1245.00
09220-WB	Studio Ladder for 18' Grid	1305.00
09221-WB	Studio Ladder for 19' Grid	1370.00
09222-WB	Studio Ladder for 20' Grid	1430.00

09228-WB	Gaffers Basket	65.00
09229-WB	Gaffers Tool Box, Locking	275.00

# LIGHTING CONTROL SYSTEM

## DIMMER BANKS — PORTABLE

### ALPHA DIM TO INCLUDE:

(For Portable/Location Use)

Alpha Dim 2.4kW portable dimmer with integral potentiometer is used to dim 2-1000W or 1-2000W fixtures. It is used in small studios or on location. A 10' low voltage cable with remote control can be purchased.

0600502-EC Parallel Blade "U"	\$325.00
0600506-EC Pin Plug	325.00
0800503-EC Twist Lock	325.00
06006-EC Remote Control Unit	81.00

### PLAYMATE II PORTABLE DIMMER PACK TO INCLUDE:

(For Portable/Location or Small Studio Use)

Compact and flexible, Playmate can be purchased with (12) 20A, (6) 50A, or (3) 100A dimmers per each portable pack. Receptacles on dimmer outputs are (2) per 20A dimmer and (1) per 50A and 100A dimmer. Each dimmer has a single properly sized protective breaker. The *celebrity* and *Prelude* control consoles are used with the Playmate dimmer packs.

41412-_____ (12) 20A Dimmers	\$3629.00
41406-_____ (6) 50A Dimmers	4085.00
41403-_____ (3) 100A Dimmers	2570.00
41400-00-EC Daisy Chain 18"	76.00

Receptacle Code (Place after Cat. No.)

O1-EC — Terminal Output

O2-EC-PBG — Parallel Blade "U" Ground (2kW Dimmers only)

O3-EC-UTLG — Twist Lock (Not in 12kW)

O6-EC — PPG Grounded Pin Plug

(Only Two Receptacles Per Dimmer)

## DIMMER BANKS Studio

## MODULAR FLOOR MOUNT CABINET

Available in four heights (43", 59", 76", 85") DCF Cabinets provide independent ventilation for each dimmer, thus preventing cross-temperature effect and increasing dimmer life. Standard 19" EIA. Dimmers are available in 10, 20, 50, 60 and 100A ratings. Contractor access is assured by removable panels on all faces.

Studio dimmer racks are modular to simplify installation. This system is complete with needed dimmer plug-in modules, wiring, breakers and all other components ready to be set in its permanent location.

**NOTE: SUPPRESSION OF RADIO FREQUENCY INTERFERENCE IN DIMMERS**

SCR dimmers utilize rapid switching of electrical current for effective dimming. This rapid switching creates radio frequency interference (RFI) that causes "noise" problems in audio systems. All well-designed dimmers contain choke coils to filter most of the RFI. There is confusion, however, about the best method to describe such filtering. A common approach is to quote a total rise time, which does not consider spikes. A more accurate approach is that proposed by Motorola Semiconductor Products in their article AN-295 on RFI suppression, wherein the rate of current rise is recommended to be less than 0.35A (350mA) per  $\mu$ sec. All Electro Controls' dimmers meet or exceed these recommendations.

Custom Built — Price on Application

## CONTROL CONSOLES Manual

### PRELUDE MANUAL PRESET CONTROL CONSOLE

Designed as a powerful basic console, perfect for portable use. Also ideal for auxiliary control in large systems and is compatible with most electronic dimmers.

#### Features

- 12 to 48 channels
- 2 scene configuration
- Selectable A/B/I per controller
- 4 submasters
- Split crossfader with separate times
- Timed independent master
- Time range: Manual to 6 minutes
- Grand master
- Blackout switch
- Variable bump level
- Real-time analog output
- Adjustable output-mates with many brands of dimmers

01-7810-12 Basic Module	\$1288.00
01-7712-20 12-Two scene expansion module	496.00
01-7740-00-EC Patch module	1360.00

#### Options Include

- Digital communications — superior EC protocol
- 12 channel effects module
- Operation light
- Key switch
- Auxiliary panel/houselights, etc.
- Digital output model offers these additional options
  - Full matrix, proportional patch module
  - Handheld focus control
  - Library storage of patch data
  - Printout of patch assignments
  - Video monitor of channel outputs

POA

## CONTROL CONSOLES Manual/Memory/Patch

### CELEBRITY

(For use with Custom Studio Dimmer Banks and the Playmate II Portable Dimmer Pack)

Modular *celebrity* comes in many different models; in single or two-tiered designs. (There's one perfect for you.) Either 24 or 48 *celebrity* Scene Masters can be configured with up to 96 control channels, and with patch, *celebrity* controls up to 512 dimmers. Controller comes with vinyl cover, 25' control cable, and 10' power cable.

7700-10-EC Basic <i>celebrity</i> Control Console, 24 Scene 12 Channel with operator's light	\$2600.00
7720-00-EC 24 Scene Master Expansion Module	756.00
7730-00-EC 12 Channel Expansion Module	793.00
7740-00-EC Patch Module	1360.00
7700-01 Single tier console stand with casters	1020.00
7200-02 Dual tier console stand with casters	1133.00
7750-00-EC Tape Module Plus (10) Tapes	1195.00
7760-00-EC Special Effects Module	1015.00
7770-00-EC Wireless Remote Controller	2790.00
7774-00-EC Wired Remote Controller	604.00
7790-40-EC Blank Plate	40.00
7791-10-EC Wall Plug-in Box	60.00

### CELEBRITY PLUS

*celebrity plus* provides greatly enhanced memory capacity in an easy to use format. It can also be used with the *celebrity*, or as a stand-alone memory control. *celebrity plus* offers access to 250 memory cues and 125 channels through autosequencing, by means of a split wheeled A/B crossfader and a single wheeled C/D crossfader. It may be installed initially, or added to your *celebrity* console. *celebrity plus* is CRT compatible, displaying data updates in both "on-stage" and "preview" modes.

6780-25-EC Basic <i>celebrity plus</i> Control Console, 125 Channels and 200 Cues	\$6199.00
6780-64-EC Basic <i>celebrity plus</i> Control Console, 64 Channels and 250 Cues	6199.00
7740-00-EC Patch Module	1360.00
7700-01 Single tier console stand with casters	1020.00
7750-00-EC Tape Module Plus (10) Tapes	1195.00
7790-40-EC Blank Plate	40.00
7791-10-EC Wall Plug-in Box	60.00

### PREMIERE

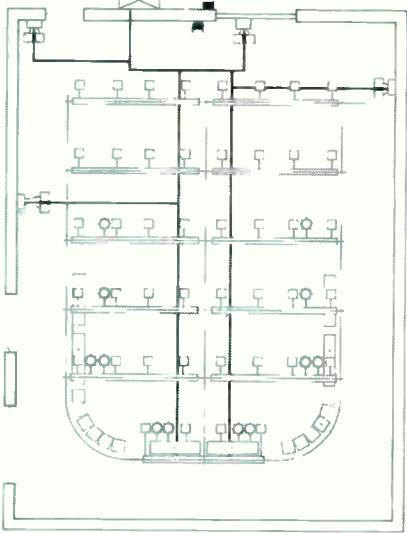

For the most sophisticated control. Ideal for large production studios where large lighting jobs have to be made manageable — fast. Up to 4000 2K or 5K dimmers patch to 500 channels with 2 to 4 color CRTs for the ultimate control available.

# BASIC LIGHTING

## INTENT

This Document has been prepared to further assist the Television, Motion Picture, and Still Photographic Lighting people in the professional knowledge of basic lighting.

## SUBJECTS

- Basic Studio Lighting Technique with Related Fixtures and Accessories
- Special Application Lighting
- Location/Portable Lighting and Power Distribution
- Quartz Lamps
- Cyclorama/Background Curtains and Hardware
- Studio Grid System
- Lighting Control System
- Miscellaneous Gaffers Equipment
- Other Useful Lighting Techniques and Applications

### A. Basic Studio Lighting Technique with Related Fixtures and Accessories

To professionally use television, motion picture, and still photographic lighting equipment, you only need to remember five positions of light. As proper fixtures and accessories are located at these positions, a very good picture having brilliance, depth, excellent color rendition, no merges of tone, and sharpness will be created. This is known as Basic Lighting.

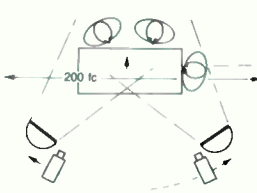

The five lighting positions are: (1) Base Light, (2) Background Light, (3) Key Light, (4) Back Light, and (5) Fill Light. Using these five positions, there are no tone mergers, no pure whites or blacks when making black and white pictures, and only one apparent direction of light. Learn the five applications of light sources, what they do, and also learn to choose the proper fixture and accessories for the job.

**1. Base Light**  
This light source has one purpose: to illuminate the whole subject area and to bring the footcandles to a working level (desired camera lens aperture opening).

In a studio situation, this level is usually about 200fc. The beam direction from the base light is approximately the same as the axis of the camera lens. The base light should be positioned just outside the camera's lens axis on the opposite side of the key light and is suspended above the camera pedestal height by a light lift. This light cleans up, but does not eliminate the shadows from the Key Light. A pleasing depth of field (the sharpest part of the picture) will be noticed once the Base Light illumination position and proper footcandles are achieved for a desired f/stop lens opening (approximately f/56).

**1-a. Base Light Hanger**  
The telescoping or pole type, floor operated, light hanger is used to position the Base Light from the light grid to just above the camera height. The motor drive for the telescoping light hanger is battery operated, and will raise or lower 100 lbs. The battery has a two hour operation time and may be charged to be at full capacity in one hour.

The pole hanger can also be operated from the studio floor but the weight of the fixture must be raised manually. The telescoping hanger works below the grid and the pole hanger must have as much height above the grid as required to raise the base light. The base light fixtures are generally scoops or broads. These both produce softer quality light.

Focusing Broad

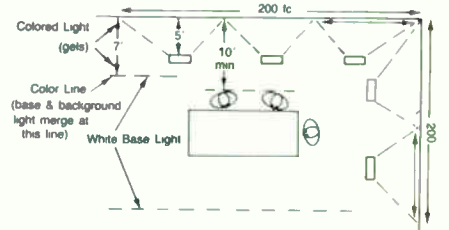

Focusing Scoop

**2. Background Light**  
Background light is a wash of even light (sometimes colored by a gel) over a vertical plane to illuminate a cyclorama, curtain, or a flat. Consider the background as a secondary subject. Its treatment is very important, since an average of fifty percent of a picture is background.

This family of lights is designed to work as close to the background as possible without spill light on the subject. For example, imagine having a primary green background color spilling on the main subject. The

illumination level is the same as the base light (200fc) and is measured only with white light (not with a gel in place).

Set Light

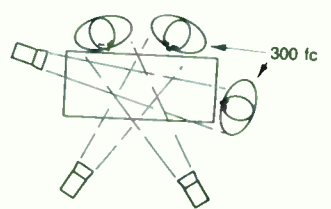

Cyc Light

By turning on both the Base and the Background lights you will get a very flat, but evenly lighted picture. It is lifeless and uninteresting. With this basic setup, we can start thinking about artistic applications to bring the picture to life and give it dimension.

**3. Key Light**  
This is the modeling light. The key light gives curves to round objects, sides to square objects, or shapes the human face. It is the apparent source of light in a picture and casts the only shadow.

10" Fresnel

Slim Face

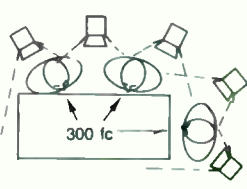

Normal Face

Gruesome Face

The subject's shadow should generally not appear on the background. The key light should project approximately one-third more light on the subject than the background light or base light. Since the base and background lights are 200fc, the key light should be 300 fc.

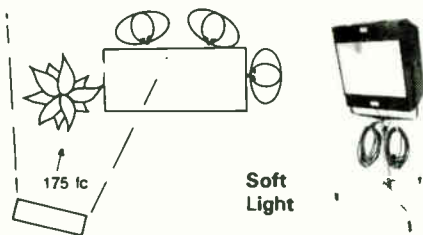

**4. Backlighting**  
Backlighting's job is to separate the subject from the background. Since a lens cannot see depth, it must be created by lighting with some help from the depth of field created by the camera lens. You have created an illusion of what the eyes (or two lenses) normally see.

6" Fresnel

Backlight should be set at an angle to allow some front spill from behind (over the shoulders and behind the arms). This creates depth, modeling, and texture. The backlight also requires about 300fc.

**5. Fill Light**  
The last light source that we will discuss is the fill light. It is usually a softer light source than the base light. It is used to define the subject washed by the base. The footcandles are close to 200fc, but never exceed it.

For example, a large dark, leafy plant is used as a prop, but it casts shadows that tend to blend with the dark leaves. Use the fill light to soften these shadows and better define the plant.

Basic Studio Lighting for television generally does not exceed a 2:1 ratio and more often a 2:3 ratio.

**Remember:**

- Background and Base Lighting . . . . .200fc
- Back and Key Lighting . . . . .300fc
- Fill Lighting . . . . .175fc

The Background, Back and Key Lighting are much harsher than the softness of the Base and Fill Lights.

If the camera and if the complete video system is working properly, you will see a handsome picture with depth and detail. The same is achieved with a photographic camera if the focus, speed and f/stop are properly set.

The key and back lights can be adjusted to increase and decrease contrast. The art of lighting is in the placement and footcandle setting of these two light sources.

A decrease will result in a flat, uninteresting picture and an increase will add modeling and interest. But, if the light is increased too much, the detail is lost in the shadow and highlight areas. Seeing the detail in all areas is important, anything less shows poor technique and is unacceptable in professional basic production lighting.

**B. Special Application Lighting**

The Ellipsoidal is used to project a pattern on a cyclorama or background curtain. The fixtures are equipped with push shutters, pattern slot, iris, and zoom capabilities. They are equipped generally with condenser type lenses for focusing.

Push Shutters—Capable of shaping light to a square, triangle, or rectangle.

Pattern Slot—Enabling patterns to be projected on a background.

Iris—Controlling the diameter of the light pattern (cuts down the footcandles).

Zoom—Controlling the diameter of the light pattern (no footcandle loss).

The Par Holder fixture is a lamp housing only, and the lamp is much like a round automobile headlight. It is very safe and efficient in footcandle output. It is used in sporting events, church lighting, and arenas. We generally use the Par 64 Quartz lamp.

The Follow Spot is an instrument used to spot the subject. It is usually the only light beam that can be both still and movable during television or motion picture production, thus the name Follow Spot.

**C. Location/Portable Lighting and Power Distribution**

There are many excellent kits available. Generally the same four lighting positions are used on location. The WBC kit family and the recommended users are as follows:

Porta Kit 6000—Designed to light and give a good quality production on a single set area of most any kind, where a demand of quality lighting is required. Consumption: 60A—7000W

Porta Kit 4000—Used for a smaller set, but not as much control. Consumption: 60A-4000W

- \* Slimline Kit 2000—Consumption: 40A-4000W
- \* Mini Mac Kit 1000—Consumption: 30A-3000W
- \* Mini Mac Kit 650—Consumption: 20A-1950W

\* These last three kits are designed individually for overall Base Lighting, but they can be used in combination to create Basic Lighting. The advantage is that they can be purchased as a single kit, which makes it more convenient budget-wise by purchasing a kit at a time, and easier to transport on location.

Super 600 ENG Kit III—This kit is lightweight and easy to take on location. At least one of these kits is a must for anyone in the video business. TV, Motion Picture Remote Production, and News people are the ones that utilize this kit. Consumption: 20A-1950W.

Super 600 ENG KIT I—Designed generally for News Production where 120V is not available, freedom from cabling is a requirement, and "getting a picture the best way you can" is the objective. Consumption: 4AH, 250W at 30VDC.

In addition to the above kits, custom kits can be designed.

There are thousands of pieces of lighting equipment for location work. The need to be aware of Bardwell & McAlister's, Frezzolini's, Lowel-Light's LTM of America's, Matthews' and Rosco's catalogs for reference is a must.

In addition to this equipment, power distribution plays a large part of portable lighting. Again, the quick reference to both studio and remote equipment used is in this Short Form Catalog.

**D. Quartz Lamps**

Tungsten Halogen Quartz lamps are the standard of the industry. They burn at 3200K, which is standard for tungsten filaments. The lamp is filled with Halogen gas, which keeps the quartz envelope clear when the lamp burns at 120V (220 to 240V are also available). The everyday incandescent lamp does not have these unique features. The quartz lamp burns more specularly, and is smaller in size. These lamps led to the newer fixture designs, such as the cyc lights.

**E. Cyclorama/Background Curtains and Hardware**

Cyclorama, scrim, and the background are the three types of curtains used in a studio. Generally the ones used most are the cyclorama and the background curtains.

The cyclorama curtain serves as infinity to the camera eye. The curtain is a seamless cloth used for background projection. The cyc curtain comes in white, black, CBS gray, and powder blue/green.

Another seamless curtain used is the scrim. The scrim weave is coarse enough to see through. With the subject behind the curtain (example: an orchestra) and not lighted, the orchestra cannot be seen. By taking the front lights down on the scrim and the orchestra lights up, the viewer can see through the scrim, thus giving a nice lighting effect. The scrim curtain comes in white and black. The black scrim is never lighted from the camera side, just the subject side is lighted.

The other most common curtains, next to the cycs, are the Spectrocolor II background curtains. These background curtains come in almost any color. It is usually recommended that the first background curtain be chroma-key blue. This allows for chroma-keying. When the curtain is not illuminated, it can also be used for a limbo effect.

The curtains are hung from double I-beam aluminum tracks. Curtain carriers are supplied with the proper trim chain ready to attach the cyc or background curtain. Dual tracks are recommended for the combined use of cyc and background. The tracks come in straight sections up to 20' and quarter circle turns of 9' or 4 1/2' radii.

The track sections are supported by wall brackets, which come in 6" increments from the studio wall. All brackets assure proper spacing of the tracks. When unable to support from the studio wall, a ceiling suspension support is available.

The cyclorama, once hung properly, has a very smooth surface. Tauting poles assure a proper vertical tension to the curtain. They stand vertically at both ends of the cyc with adjustable claws attached through eyelets along the curtain edge. The curtain can then be adjusted to proper tautness by the pair of poles. Once the poles have been positioned, a 50 lb. size, non-spill saddle-type sand bag is placed at the base of each pole to hold it in place. Even horizontal tension of the curtains is assured by continuous lead weight inside the bottom hem.

**F. Studio Grid System**

Power distribution within the grid system is achieved through rigid, 16 gauge, one piece 3 1/2" x 4 1/2" steel constructed power strips, with internal wiring meeting all electrical codes. The external electrical pigtail circuit comes in 18" or 24" lengths with the connector of your choice. The power strips are known as the connector strips. The strips are primed and painted with 3" permanent decals assuring correct circuit identification from the studio floor. The wall boxes are also fabricated to the same high standards. They are ready for wall or grid pipe mounting with usually one to three pigtail-circuits.

To support the system being installed from the existing building's absolute deck of truss beams, a "load channel" is connected to this superstructure. The load channel is then the grid system's main support. The grid connector strip brackets also support 1 1/2" light pipe. A light pipe grid can be formed by interconnecting the strips with additional light pipe. The pipe is locked securely at 90° angles, in such a way that no torque is experienced. This pipe system is known as the pipe grid. The total system, the connector strips and the pipe, is simply known as the Studio Lighting Grid System.

**G. Lighting Control Systems**

In recent years, electronic technology has brought down the cost and increased the capabilities of dimmers and controllers. This puts them in the price range for smaller studios, and makes them more applicable to sophisticated production use.

The dimmer module now has multiple dimmers built-in (up to four in a single chassis). They cost about the same

as a single chassis dimmer did a few years ago. They are very clean from audio and video noise interference. The new engineering and the economical multiple dimmers give us the ultimate in lighting, a dimmer per circuit that allows individually controlled lights, taking up less occupied space.

New controllers have the standard two scene manual presets and master modules plus additional 24 or more scene master modules. The controller's features are so expanded that they are almost unlimited. A control system adds the professional touch to your productions (particularly live ones). You can achieve some very impressive effects.

With electronic patch panels, the dimmers per circuit can be placed almost anywhere on the board. With a wireless, handheld control unit, you can turn lights on and off from the ladder. You can easily duplicate the lighting for a daily or weekly show by adding a cassette memory module. If you have a special problem, call WBC/EC, as there are many additional controller features and accessories.

Also, consider the energy savings of a control system. By setting a controller (during rehearsal or light adjustments) at a 10% voltage decrease, three things will happen: the lamp life is increased 400%; the Kelvin temperature of the light drops, generating a warmer light source; the lumen output is decreased.

Economically, you can pay for a control system in a few years with just the savings of replacement lamps. Using a control system, you can conserve electricity by dimming the lamps while not televising. Plus approximately one ton of air conditioning is saved for every 5000W/120V of light. Thus, a control system is no longer out of the budget range of a studio that is now using on/off switching. If you can afford lighting systems, grid systems, and cyclorama systems, you can justifiably afford a control system.

**H. Miscellaneous Gaffers Equipment**

While working in the studio, it is a must to have a safe ladder to perform all the needed adjustments and installations required. Our studio ladders are designed to meet or exceed all safety standards. These ladders are manufactured to work to grid height, while providing a 6' reach from the ladder's platform to the grid, with the safety of a 30" railing. The ladder is made of 1" square tubing with all welded joints. In larger studios, two of these ladders are highly recommended.

Other common items under this category are color gels, paints (ask for a Rosco catalog for more a complete listing), grip equipment (ask for a Matthew's catalog), footcandle meters, etc. This list goes on.

**I. Other Useful Lighting Techniques and Applications**

High Key—Total picture is created by light tones of gray or colors. Lack of subject contrast, high even light. Example: White home appliances against a white background and floor.

Low Key—Dark tones of grays or colors. High contrast light. Example: Night or evening scenes.

Bounce Light—Harsh, concentrated light that is reflected off a white surface which diffuses the light and makes it almost shadowless. Example: Food, portraiture and small parts.

Glass—Use medium soft light from beneath. Example: Glassware and crystal.

Texture—Use key or background light to bring texture to a normally flat surface. Example: Cloth and many man-made surfaces.

Silhouette—Use backlighting to dramatize the outline of a subject making the subject appear very dark from the front. Example: Opening scene of a news anchorman. A ship on the water.

Medical—Requires shadowless, cool lighting. For pictures that must have exact color reproduction and/or microscopic lighting. Example: Surgery, skin disorders, cell research.

Copywork—Base light both sides of copy to make an exact duplicate of any flat material. Example: Illustration or document, animation.

The only way to learn the basics of lighting is to work with it. This can be time consuming, but this experience will improve your skills and directly affect production budgets. Remember, a picture depends heavily on lighting for depth and texture; without light, you have nothing.

One of the best ways to learn how to apply lighting is to study still pictures, which might be a good painting or a photograph. Note the mood of the setting and the application of light. Is the picture flat? Does it have a lot of depth? Does the lighting tell the story? How was basic lighting applied?

Good Luck to you as we at WBC sincerely hope these few paragraphs help apply a better understanding of lighting to your next picture!

# BROADCAST VIDEO SYSTEMS LTD.

# GENERATOR/KEYERS

## SA-101 Safe Area Generator

- Any pattern may be added to any of 5 independent, synchronous video sources
- Safe Action and Safe Title Areas (as per SMPTE RP 27.3) displayed simultaneously
- Display can be switched on/off, black/white independently on each source from remote panel
- Center cross to locate exact picture center
- Markers inserted to show legal H & V blanking limits
- All patterns and markers digitally generated and locked to subcarrier, assuring accurate, drift-free reference for precise picture positioning
- Movable Box Generator Option—An optional plug-in PC board allows the user to generate and store in memory ten different rectangles which can be keyed into any of the five video sources, with or without the Safe Area patterns. Each rectangle can be programmed for size and position at two rates of speed from the remote panel. Recall of any of these rectangles is via a remote thumbwheel. This option is very useful for positioning graphics, news shots, chroma keys, etc.

## Specifications

<b>Electrical:</b>	115V ± 10%, 60Hz
<b>Line Standard:</b>	525
<b>Video Inputs:</b>	Five, 1V p-p, 75 ohm, terminating
<b>Ref. Input:</b>	1V p-p looping (Color black or one of video inputs)
<b>Video Outputs:</b>	Five, 1V p-p, 75 ohm
<b>Frequency Response:</b>	< ± 0.15dB to 6MHz
<b>Diff. Phase (10-90% APL):</b>	< 1°
<b>Diff. Gain (10-90% APL):</b>	< 1%
<b>Line Tilt:</b>	< 0.25%
<b>Field Tilt:</b>	< 1%

All Graticules and Markers selectable on/off, black/white from remote panel.

SA-101 .....	\$1650.00
MBG Option .....	.810.00

## Masterkey Linear Keyer

- Switchable between linear and fast key modes
- Smooth, seamless inlay of digital effects and paint boxes
- Faithfully preserves the anti-aliased edges of modern character generators
- Variable edge softness with key slope control
- Unique key window allows masterkey to differentiate down to a 5 IRE level difference, anywhere in the gray scale
- Full key control in internal, external, normal and invert modes
- Mix to key or cut to key
- All user controls on remote panel, supplied complete with 25' cable
- Optional auto mix provides 4 selectable speeds of automatic mix to key initiated via control panel pushbutton or external GPI

Masterkey .....	\$2900.00
-----------------	-----------

## VK-900 Video Keyer Mix Amp

- Switchable between self key (internal) and external key
- Local or remote, key on/off and clip level
- Mix to key via optional fader panel or user supplied pot
- A/B mix between any two synchronous sources
- Optional auto mix gives 4 selectable speeds of automatic A/B mix or mix to key

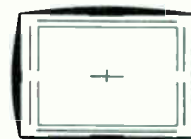

VK-900 Composite video keyer .....	\$1185.00
Single fader remote panel option .....	165.00
Auto mix option .....	525.00

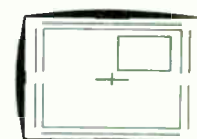

SA-101

Safe Action and Title Graticules

With Center Cross and Blanking Markers Enabled

With Addition of Box Generator Option

Masterkey

VK-900

CDK-1000

## CDK-1000 Downstream Keyer

- Switchable between mix or mix key mode
- B input may be switched from RGB to Y, B-Y, R-Y via remote panel
- Mix mode provides an A/B additive mix between two component signals or a component and RGB signal via the first fader handle
- Mix key mode (internal) allows the component or RGB signal on the B input to be keyed into the component signal on the A input. The dissolving in of the key is controlled by the first fader handle
- Mix key mode (external) allows a composite signal on the ext. key input to cut the hole into the component signal on the A input. The hole is filled with the RGB or component signal on the B input. The first fader controls the dissolving in of the key
- The second fader handle provides master fade to black in both mix and mix key modes
- All inputs clamped to ensure proper mixing and keying of bipolar signals
- Supplied complete with twin fader remote panel and 25' control cable
- Optional auto mix gives fully automatic operation of first fader control with 4 preset rates

CDK-1000 Component downstream keyer with fade to black .....	\$4950.00
Auto mix option .....	525.00

# VIDEO PRODUCTS

EV-4061

## EV-4061 Combination Waveform/Vector Monitor

- Switchable between waveform and vector display modes
- Full broadcast specifications
- A/B encoded video inputs with buffered video output
- Half rack width, 5 1/4" high
- Mounts beside half rack picture monitor for complete monitor bridge
- 3 vertical and 3 horizontal sweep rates
- High brightness trace on all sweep rates
- Variable brightness illuminated graticule
- Int./Ext. reference in either mode
- Parade display

### Controls and Features Common to Both Displays

#### Front Panel Controls

- Waveform/Vector mode switch
- Power on/off toggle switch
- V and H centering
- DC restorer on/off switch
- A-B-CAL switch
- Int./Ext. reference switch
- Intensity, focus, scale illumination

#### Rear Panel Controls (screwdriver adjust)

- Trace rotation

#### Display

- 10 x 8cm rectangular flat faced CRT with P31 phosphor
- Accelerating voltage 6kV regulated

#### Power Requirements

- 108-125V, 216-238V, 50/60Hz switchable on rear panel, 35VA

#### Operating Temperature

- 0° to 45°C

#### Mechanical

- Dimensions: 5 1/4" H x 8 1/2" W x 18" L
- Weight: 18 lbs.

The EV-4061 can be installed beside the following half rack width picture monitors:

- Conrac SNA9/RK
- Electrohome EVM910, EVM920
- Sony PVM-8200T
- Panasonic WV5311
- Videotek VM-8PRW
- JVC TM-41AU (with BVS rackmount)

EV-4061	\$3650.00
Bench case for tabletop	75.00
Dual rackmount	285.00

## DK-400 Downstream Keyer

- Two independent, stand alone video mixing amplifiers in one rack unit
- Each mix amp may be operated separately or may be cascaded
- First mix amp is switchable between A/B mix and mix-to-key from remote panel
- Preview output to allow presetting of clip level
- Second mix amp allows convenient master fade to black or second A/B mix
- Switchable between self key or external key mode
- Back porch clamping on all video and key inputs
- Optional automix gives 4 selectable speeds of automatic A/B mix or mix-to-key

### Specifications

Electrical:	110/230V, 50/60Hz, 8VA
Mechanical	
Electronics:	1 rack unit (1 3/4" x 19" x 10")
Remote Panel:	5" x 7" (mating connectors supplied)
Auto Mix	
Remote Panel:	5" x 2" (mating connectors supplied)
Connectors:	BNC for video Amphenol 25-pin for control

#### Video Inputs:

#### Key Input:

#### Video Outputs:

Four, 1V p-p 75 ohm, terminating  
 1V p-p composite, looping  
 Five, 1V p-p 75 ohm, 2 outputs from each amplifier plus key prev out

DK-400 ..... \$2450.00

## HB-800 Hum Bucking Coil

Eliminate up to 6V p-p ground induced hum.

# VIDEO AND PULSE DELAY LINES

DL-500 Series

## DL500 Series Rackmounted Video Delays

- 75 ohms equalized to 5.5MHz
- Isolated grounds between channels
- 16 cards in 3 1/2" x 19" rackmount
- > 70dB crosstalk between channels

The DL501 and DL502 are infinitely adjustable within their specified range via soldered jumpers and variable fine trim. They will mount in an FR505 frame.

Part No.	Range	Price
DL501	10-165ns	\$215.00
DL502	10-325ns	345.00

## DL505 Series Rackmounted Video Delays

- 75 ohms equalized to 5.5MHz
- Isolated grounds between channels
- 16 cards in 3 1/2" x 19" rackmount
- > 70dB crosstalk between channels

The DL505 Series, utilizing dual-in-line delays offers the widest range of video delay concurrent with small size, rigid specifications and economy. The gold contact "Bergstrip" jumpers provide quick and easy delay selection while maintaining the circuit integrity of a soldered connection. The total range of any card may be extended in the field by simply adding an additional line.

Cards are infinitely adjustable within specified range via jumpers and fine trim.

Card Type	Range	Price
DL505-1	10-165ns	\$ 239.00
DL505-2	10-245ns	289.00
DL505-3	10-455ns	430.00
DL505-4	310-745ns	618.00
DL505-5	410-845ns	651.00
DL505-6	510-945ns	657.00
DL505-7	610-1045ns	804.00
DL505-8	710-1145ns	837.00
DL505-9	810-1245ns	843.00
DL505-10	910-1345ns	878.00
DL505-11	1010-1445ns	885.00
DL505-12	1110-1545ns	1018.00
DL505-13	1210-1645ns	1065.00
DL505-14	1310-1745ns	1098.00
DL505-15	1410-1845ns	1104.00
DL505-16	1510-1945ns	1110.00

## DL605 Series Rackmounted Active Video Delays

The DL-605 Series is similar to the popular DL-505 Series with the addition of an on-board video amplifier. The thick film amplifier provides up to 10dB gain to allow unity video output level at any delay setting.

Using the dual-in-line delays, the DL-605 Series can accommodate video delay of over 1900ns with 5.5MHz equalization. Gold jumpers, combined with a fine trim section make each card infinitely adjustable throughout its specified range.

Ten cards may be housed in a 2 rack unit frame (3 1/2") complete with power supply.

Card Type	Range	Price
DL605-1	10-165ns	\$ 356.00
DL605-2	10-245ns	407.00
DL605-3	10-455ns	548.00
DL605-4	310-745ns	735.00
DL605-5	410-845ns	769.00

# DISTRIBUTION AMPLIFIERS/ ROUTING SWITCHERS

**10 X 10 BCD BASED ROUTING SWITCHER**

**10 X 1 VIDEO ROUTING SWITCHER**

**AUDIO DISTRIBUTION AMPLIFIER**

## VIDEO DISTRIBUTION AMPLIFIER

Self-contained, 1-3/4" x 19" rack mount, level control, standard BNC connections, power supply included.

- 2 x 12 (Dual 1 x 6's) ..... \$495.00
- 4 x 24 (Quad 1 x 6's) ..... 795.00

## 10 X 1 ROUTING SWITCHER

Direct access momentary pushbutton controls, 1-3/4" x 19" rack mount, 10 inputs/1 output, power supply included, transformer input.

- Audio**
- 110-Mono ..... \$695.00
- 120-Stereo ..... 995.00
- Video**
- 210-Video Only ..... \$1095.00
- 220-Audio Follow Video (1 level audio) ..... 1295.00
- 230-Audio Follow Video (2 level audio) ..... 1495.00

## AUDIO DISTRIBUTION AMPLIFIER

Self-contained, regulated power supply, 1-3/4" x 19" rack mount, individual front panel output level controls, shielded power supplies and transformer inputs. Available with either active or transformer outputs.

- 1 x 10-MA-Mono, Active Out ..... \$395.00
- 1 x 10-DMA-Stereo, Active Out ..... 595.00
- 1 x 10-MT-Mono, Transformer Out ..... 695.00
- 1 x 10-DMT-Stereo, Transformer Out ..... 895.00

## 10 X 10 AUDIO ROUTING SWITCHER (BCD BASED)

Thumbwheel control with LED Matrix display of active crosspoints, 5-1/4" rack mount, power supply included, remote controls available. (Please specify on order).

- 510-Mono 10 x 10 ..... \$3595.00
- 520-Stereo 10 x 10 ..... 4595.00

# DISTRIBUTION SWITCHING SYSTEMS

## TVS/TAS-2000

### Distribution Switching Systems

- Redundant control card capability • Multilevel breakaway capability
- SMPTE-422 computer control optional • Internal refresh memory with 30-day memory save • Power supply failure indicators on all boards • Power supply alarm indicators with contact closure for remote alarm • Fused power supply outputs • Redundant power supply capability • No PROM changing on crosspoint boards • Vertical interval switching of video • Clamped video inputs • Output delay trim
- Field expansion of inputs and outputs without rewire • Compact—10 x 10 matrix arrangement, 60 x 10 audio and video or 130 x 10 audio or video in 8<sup>3</sup>/<sub>4</sub>" card cage • Internal cooling fans. Fans removable during normal operation • Matrix board "in use" indicator • Computer automated system testing of audio and video through all possible signal paths • BNC video and party line connectors • Dual video outputs
- Capable of interface to TCS-1 machine control system

The TVS/TAS-2000 Distribution Switcher is a modular switching system consisting of a matrix, output and control cards. The cards—the basic building blocks of the system—are installed in rackmounted card cages which utilize pin and socket connectors to increase reliability and provide low circuit card insertion force.

Systems may be configured and interconnected to create switching systems with capabilities ranging from 10 x 10 to 450 x 150.

Redundant power supplies can be housed in each card cage.

### Control Configurations

Desktop and rackmount control panels are available for use with the TVS/TAS-2000 switcher to meet virtually any control requirement.

### Power Supplies

The PS-2000 Power Supplies provide unregulated DC voltages for on-card regulation. Because the supplies are interconnected in a redundant manner, either supply can power the card cage. Cost savings can be achieved by eliminating the redundancy and replacing the second power supply with a blank panel.

Monitor test points, a green LED indicator for each voltage and a red alarm LED, are located on the front panel of the power supplies.

### Polling Card

The CE-2000 Polling Card is the system's master controller. It polls panels for switching commands and periodically refreshes all switcher outputs.

Using a nonterminated coaxial cable, the serial bidirectional party line offers a highly efficient communications medium for system control. The CE-2000 provides four separate and identical party line outputs. A short in one party line will automatically trigger the logical removal of the shortened line, allowing the other three lines to continue normal operation.

### Card Cages

The RF-2000 Card Cages are 8<sup>3</sup>/<sub>4</sub>" (five rack units) high and 18" deep. They mount in standard 19" racks, and feature easily removable front doors for quick access to circuit boards.

Each card cage has its own ventilation system. Air is drawn in through the front panel and exhausted through the right rear side. Fans are mounted to a removable panel on the rear of the chassis to allow replacement without turning the switcher off.

Input connections for the switcher system are located on the first card cage, and each cage in the system contains its own output connectors.

Internal cabling carries video and audio between card cages within a single rack. Plug-on cables and terminators are used to facilitate future expansion of inputs and outputs.

### Alarm Circuits

Alarm circuits are contained within all circuit boards. The loss of any power supply voltage used on any individual circuit card creates an

TVS/TAS-2000

alarm condition which is indicated by the activation of a red LED. This alarm condition is used to the power supplies where it generates a card cage alarm.

### Matrix and Output Circuit Cards

#### Video Cards

The VS-2100 Video Matrix Card has 10 input amplifiers, each with a plug-selectable sync tip clamp option. The video matrix card contains 100 solid-state crosspoints for video switching. An LED is used on each card to indicate when the card has one or more crosspoints selected.

#### Audio Cards

The AS-2100 Audio Matrix Card switches audio signals. This card has 10 solid-state bridging input amplifiers with high common-mode rejection. Balanced input signals are converted to a single-ended signal for switching by crosspoints. When the card is in use, output bus amplifiers and output crosspoints feed the matrix output bus. When the card is not in use, these are disconnected from the bus. Cards can be added to a system to supply the required number of inputs. For interchangeability, DIP switches are used to select the card addressing. An "In Use" LED indicates when one or more card crosspoints are selected.

### TVS/TAS-2000 Matrix Configurations

The TVS/TAS-2000s with internal power supplies are available in four standard configurations. Type CAV, CAA, CVV and MSO offer packages tailored to size and cost. Types CAV, CAA and CVV are the most economical but are limited to a maximum of 60 inputs. Type MSO has a higher price tag but is expandable to 130 inputs and beyond. All configurations are field expandable to their maximum capacity.

#### Type CAV: Combined Audio and Video

This configuration combines both audio and video switchers in a single 8<sup>3</sup>/<sub>4</sub>" card frame. While the unit is limited to 60 inputs, it may be ordered with (or expanded to) 100 outputs.

#### Type CAA: Combined Audio Audio

The CAA design can be configured as a dual audio switcher (channel 1 and 2) with 60 inputs to 10 outputs or as a single audio with 60 inputs to 20 outputs in each 8<sup>3</sup>/<sub>4</sub>" card frame.

#### Type CVV: Combined Video Video

Type CVV provides as many as 60 inputs to 20 outputs per 8<sup>3</sup>/<sub>4</sub>" card frame.

#### Type MSO: Multiple Chassis with Single Output Card per Chassis

These switchers are supplied with one card frame for each video output decade and a separate card frame for each audio output decade. Expansion to facilitate matrices of any size may be ordered initially or at a later date.

# MASTER CONTROL SWITCHER

## MCS-2000 Master Control Switcher With Built-In Stereo Capabilities

### Control Panel

The MCS-2000 Master Control Switcher panel is divided into functional blocks, with each block labelled. Controls are readily located for easy use.

The control panel is microprocess-based, with all panel signals sent to the system main frame by an RS-422 data line. All rotary controls are digitized at the control panel, allowing the output to be inserted into the data stream.

Level settings and panel configuration can be entered into the switcher memory and recalled for instant setup at a later time, saving time and money.

### Monitor Controls

Audio monitoring facilities for all audio signals entering and leaving the switcher are provided for stereo or monaural speaker systems. One set of speakers receives audio from an off-air demodulator or the switcher line output. The second set of speakers is fed by the Select button row.

**DIM:** Lowers level of all control room speakers by a user-selected amount to allow conversation.

**SPRKB:** Reverses the feed to control room speakers.

**AIR:** Audio output level control for "air" channel control room speakers.

**SELECT:** Controls level to monitor speakers from any of the "select" button sources.

### Source Selector

The switcher input buttons can be assigned to any of up to 250 sources. Upon selecting a source, pressing the Send button and then pressing a preset bus button will cause the selected source to be assigned to that button. The assigned source name is displayed over each button.

If the selected source is audio-only or video-only, the LED below the preset button will light red. If a split source, the LED will light green.

Current assignments of all buttons can be saved by pressing the Save button, followed by a number from the ten-key pad. Pressing Recall and entering the same number will recall the saved setup at any time.

### Backup

A completely independent ten-in by one-out audio/video switcher is optional in case of main switcher failure. Two inputs are preassigned, one to the master control switcher on-air output and the other to one bus of the routing switcher. The master switcher is normally selected. In case of master switcher failure, the routing switcher or one of eight hard-wired sources may be selected.

### Audio/Video Splits

Audio/video combined transitions are normally selected on the program or preset buses. An audio or video-only split is made by pressing the Audio or Video-Only button and a Source button. The video-only split is indicated by illumination of the video source button at full brightness. The audio source button is illuminated at half brightness for an audio split.

Breakaway capability is provided for auxiliary or Second Audio Program (SAP) levels of audio.

### Meter Bridge

The Meter Bridge mounts above the main control panel. A 24-hour clock and a stop clock are provided for operator convenience. Stereo analog VU meters and digital peak meters are provided for four audio channels: Select, Preset, Program, and Off-Air.

### On-Air Bypass

When Bypass is pressed, the current on-air source is locked to the on-air bus and no switcher control can affect the on-air output. The switcher is now available for production or dubbing work. When necessary to return to on-air control, the button is pressed again and the switcher is reconfigured as it was when Bypass was entered. This feature allows the sophisticated keying and mixing facilities of the switcher to be used for production work while maintaining the on-air signal.

### Transition Controls

These controls allow selection of automatic and manual transitions. Six wipes, along with fades and dissolves may be selected. Speed of transitions may be selected and automatically executed. All transitions may be executed manually with the fader arm. The six wipes are user-selectable from a library of more than 100 available patterns.

### Audio Controls

The audio controls allow the gain and balance for a particular source to be set up while on preset. When the Take button is pressed and transition occurs, the preset levels move to the program bus along with the source. This allows balance and gain adjustments to be made while on preset. Proper gains and balance are automatically remembered for all inputs currently on the switcher.

Direct control of program bus levels can be achieved by pressing the Program button and making the desired adjustment.

### Key System

Two keyers and four matte generators are provided by the switcher. The key currently on the preset bus is normally controlled by this section, allowing the key to be fully set before going on-air, even if another key is present on the program bus.

Up to 250 external key sources can be accommodated, with the proper one for a given key source automatically selected.

The proper type of key is selected automatically for the assigned source, but can be manually changed if desired.

Matte or video inserts may be selected. Saturation, luminance and hue often can be controlled independently of border saturation, hue and luminance. Video matte insert keys can also be bordered.

The switcher can also wipe or dissolve between two totally independent keys.

### Machine Control

The switcher can be interfaced to a complex machine control system such as the BTS TCS-1 Machine Control System and will provide complete full-function control of any machine selected on the preset or program bus.

# CHARACTER GRAPHICS GENERATOR

## Vidifont Veditext II™

Veditext II is the latest in the Vidifont line of distinctive operator-oriented design systems. Providing corporate, educational and commercial users new heights in character graphics generation.

The Veditext II boasts many of the basic features of the higher-end Vidifont Graphics V™, with the capability to incorporate optional features including Animation, Time Sequential Overlays, Vidiclock™ and the Playback Sequence Controller. And Veditext II has access and compatibility with Vidifont's extensive font library, including creative services for custom graphics and logos.

## System Configuration

Veditext II's compact design invites installation in virtually any graphic environment, particularly where space is at a premium.

**Keyboard:** Combines the standard typewriter keyboard with conveniently grouped function, editing and operational keys. Special attention to detail provides an environment that is both ergonomically efficient and user-comfortable.

**Disk storage:** Each double density 5 1/4" flexible disk holds up to 20 fonts, or provides random access of up to 600 display pages. Fonts and messages can be stored on the same disk. In a two-channel system, disk formatting or duplicating can be performed simultaneously with editing and composition.

**MultiChannel:** Directory controlled, high-capacity RAM and disk memory treat each message, regardless of length, as a single page, under a single identification. Over 10 instantly available on-line from RAM. Font IDs, colors, table locations, predesignated update windows, and all other user-environment parameters are recorded as part of each message. Allows multiple off-line channels rapid access for updates and changes, while on-line use can occur simultaneously utilizing different fonts, colors, formats and messages.

## Display Characteristics

**Fonts:** Eight full-set fonts per channel, each containing up to 106 characters, may be accessed and intermixed for instant composition. Resident font memory has a capacity up to 24, with additional fonts available from flexible or hard disk.

Veditext II has complete access and compatibility with Vidifont's complete graphic and font library of over 100 typefaces and 250 sizes.

**Colors:** The color collection contains 4,096 choices. On-line you can manually select, or automatically load, any combination of 16 Color Quads. Multicolored fonts and logo graphics may be displayed in up to 48 colors per character with or without multi-colored edge.

**Backgrounds:** Can be created independently of the character plane or linked to the foreground plane, dimensioned by one of the display items, and enlarged or reduced. Background sizes range from one TV line high and two pixels wide to a full display. 32 colors may be selected from the 4,096 palette independently of those on the foreground character plane.

## Composition/Editing

**Multiplanar:** Up to 16 rows may be stacked by composing the first plane, pushing it back, composing the second, pushing it back, etc. Access to any plane is available by temporarily peeling away forward planes.

**Justification:** Veditext II provides horizontal centering, left or right and left and right justification. Veditext II suggests an initial justification point and moves the cursor to that location. You may begin to compose at that point, manually move to a new point or specify a preselected location by X and Y coordinates.

**Tabs:** Each page may contain unlimited tab locations set at any horizontal and/or vertical point and recorded as part of the message. Upon playback, information at these tab points can be accessed instantly with forward or back tabbing, then updated and rerecorded.

**Lower Thirds:** The cursor is automatically centered on the bottom row. As a message is composed, it is centered unless otherwise designated. When the operator moves the cursor to the next row, the message scrolls up and the cursor is centered for the next entry.

**Acquire/Deposit:** Font style, color and edge may be "acquired" from any character and "deposited" on any other entity (character, word, row, group or entire page). This eliminates reentry steps, saves time and encourages artistic creativity.

## Display Dynamics

**Rolls/Crawls:** Veditext II has 7 bidirectional speeds, with 224 speed/direction combinations. Roll or crawl movements may be stopped at any point, then resumed at the same or different rate.

**Ripple-On/Ripple-Off:** Provides character-by-character appearance or removal, at any of 127 different preselected rates, as fast as 1/1000 second.

**Flash:** An infinite number of flash speeds are available on a character-by-character basis. Underlines and backgrounds can be independently flashed.

## Expansion

Beyond the basic Veditext II are expansion capabilities with which to grow.

- **Animation.** Of characters, rows, pages and backgrounds
- **Time Sequential Overlays.** For frame-accurate editing of events
- **Playback Sequence Controller.** For creation of an ordered or randomly sequenced playback list
- **Vidiclock.** Provides time of day, elapsed and split time plus stop, pause and resume up or down
- **Vidivote.** Election reporting package
- **Vidicast/Vidisports.** Weather and sports package
- **GraphicStore.** Paint and library system
- **Twenty-megabyte hard disk drive.** Increases font and message storage

## AUTOMATIC STUDIO/ FIELD CAMERA

### LDK 26A Television Camera System

- Excellent picture quality through 18mm Plumbicon tubes and optimized digital scan, shading and dynamic focus correction
- Operational flexibility. Maximum flexibility for a wide range of broadcast applications under varied weather and light conditions. The interactive computer system with operational and set-up memories allows quick set-up and smooth operation for single or multi-camera systems
- Reliable and ready for operation. Assured by digital control components, self-diagnostics and easy interchangeability of main units without the need for further adjustments. And COACH, the Philips remote control and monitoring system, gives double assurance of perfect performance
- Safety for the future. A camera that is built to last, having a transparent computer controlled system with distributed intelligence that can also accommodate future developments

#### Computer Control—For Perfect Performance

The LDK 26A System has 3 microcomputers—in the camera head, the camera processing unit and the master control panel. Each unit can converse with the others in the chain enabling constant check on status of camera performance. Each camera has its own set-up computer. Because of this "distributed intelligence" system it is possible to set up independently, simultaneously and automatically any number of camera chains. And, system units can be interchanged, without the need for resetting, checking or adjusting.

The control system is fully digital, and digital/analog converters with "pulse-pot" technology permit manual and automatic adjustment over the whole control range. Because of this system no manual preset is required for automatic set-up.

The extensive automatic control of parameters makes the LDK 26A a total automatic 18mm camera with perfect, consistent performance.

#### Memories—An Aid For Production

Every LDK 26A camera has 2 set-up and 2 lens memories as standard. Optionally, there are 6 operational memories available.

The set-up memories may be used for special creative and technical applications. Each memory can store over 700 parameters.

The lens file can store color temperature, flare, shading and registration.

Each of the operational memories stores gains, RGB, blacks, filter wheel position, color temperature, black stretch, gamma and contours.

#### COACH—Double Assurance

COACH is a tool for centralized maintenance and monitoring of the LDK 6 family of cameras. It consists of 2 components—an interface and an IBM-compatible personal computer. Simple to use, COACH provides:

- Remote control and monitoring of LDK 6 family camera systems
- Flexible retrieval, storage and control of camera data
- In depth diagnostic monitoring
- Remote access via standard modems over telephone lines

#### Status Feedback

The unique status feedback system is another important advantage of the LDK 26A.

The data transparency of the design enables access to, and retrieval from, any unit on the bus. All setting-up and operational control parameters are available for displays on the master control panel. All settings in the camera processing unit and camera head are generated by the digi-pots on the master control panel and are fed back to the alphanumeric displays and are shown by an exact percentage readout. This permits settings to be checked, at a glance, without physically measuring them.

#### Diagnostics

There is one standard diagnostic system (Diagnostics-1) and one optional system (Diagnostics-2) available for the LDK 26A.

Diagnostics-1 operates on-line, and is active whenever a camera is "on." It makes no decisions which will interfere with normal "on-air" operation. However, where important characteristics deviate from nor-

LDK 26A

mal, it warns the operator a decision is needed, and provides a readout on request.

Diagnostics-2 is a very valuable optional extra. It operates off-line, and on demand, by using signal injection techniques throughout the camera system. Messages are displayed on the picture monitor indicating probable fault location.

#### Automatic Programs

The following selectable automatic programs are available in the LDK 26A:

- Full auto set-up
- Auto daily check
- Auto white balance
- Auto black balance
- Auto lens registration calibration
- Auto lens shading, flare and color temperature calibration

These auto programs provide full automatic control not only to give ease of use, but also to produce the best results in the shortest time.

The auto lens programs can be used when the zoom lens is equipped with a built-in diascop.

After setting the back focus, it is possible to set up the camera fully automatically after tube replacement without any manual presetting. This is made possible because of the full range of computer controlled tube parameters.

#### Ahead Of Its Time

The LDK 26A camera head is smaller in size with high brightness, high resolution 5" viewfinder which makes it one of the most versatile 18mm cameras in the studio or on location. It has a number of outstanding features:

- Dynamic lens error correction
- Remote controlled scan reversal
- Integrated lens support
- Quick lens change
- Optical axis of the lens and viewfinder in one vertical plane
- A 5-position filter wheel
- A separate (controllable) auto cap
- Rotatable, tiltable and easily removable viewfinder (tilt range  $\pm 60^\circ$ )
- Extensive indicators and markers in the viewfinder
- Provision for remote facility for intercom and external viewfinder switches (e.g. on pan bars)
- Utility power e.g. for teleprompter
- Rainproof housing
- Extensive intercom facilities
- R, G and B and external video on VF display
- Unparalleled service accessibility

The LDK 26A has an integrated camera lens support which ensures correct balance of the combined camera head and lens—whatever the size of the lens being used—light or heavyweight. Then there is the flexible viewfinder for extremes of pan and tilt movement. Finally, there is a wide range of indicators and signal selectors together with full communication facilities.

For the engineer and video operator, the master control panel acts as the surveillance center for the whole system—a sort of electronic screwdriver for maintenance and diagnostics. It monitors and controls hundreds of functions. Used with the individual operational control panels, the video operator has control over the whole system.

Immediate reading of lens f/stop numbers, preprogrammed contours, etc. is possible after selection of the relevant camera by means of the MATCH knob on the operational control panel.

# AUTOMATIC STUDIO/ FIELD CAMERA

## LDK 6A

### Television Camera System with Total Computer Control and Distributed Intelligence

#### Superb Picture Quality

Through 25mm or 30mm Plumbicon tubes and optimized digital scan, shading and dynamic focus correction.

#### Operational Flexibility

For a wide range of broadcast applications under varied weather and light conditions. The interactive computer system with operational and set-up memories allows quick set-up and smooth operation for single or multi-camera systems. The RGB triax system allows great cabling flexibility.

#### Reliable — Ready for Operation

Assured by digital control components, self-diagnostics and easy interchangeability of main units without the need for further adjustments. Tube change takes about 10 minutes. The "full auto set-up" program aligns the green channel automatically, using the diascope integral to the camera head. Red and blue are then aligned to green.

#### Future-Proof

State-of-the-art in concept and design, having a transparent computer system with distributed intelligence that can also accommodate future developments. And COACH, the Philips remote control and monitoring system, gives double assurance of perfect performance.

#### Memories — A Major Advantage

The LDK 6A camera has 6 operational, 2 set-up and 4 lens memories. All 6 operational memories can be recalled so that there is immediate access to pre-arranged special production effects or lighting conditions.

Each of these operational memories can store: • Gains RGB • Blacks RGB • Filter wheel 1 • Filter wheel 2 • Color temperature • Master black • Gain • Black stretch • Gamma • Contours • Auto-iris presets

For special creative and technical applications over 700 parameters can be stored in 2 separate selectable set-up memories.

Each LDK 6A camera can also store the complete characteristics of up to 4 lens types and recall their parameters when required. These parameters are: • Color temperature • Registration • Flare • Shading • Back focus

These lens files can also be used to store range extender characteristics and are called up automatically with servo extender selection.

#### Diagnostics

There are two comprehensive diagnostics systems in the LDK 6A. The first is an advance warning system for fault detection to avoid costly downtime. The second is able to pinpoint the location of a fault to a specific board.

Diagnostics-1 operates on-line, and is active whenever a camera is "on." It makes no decisions which will interfere with normal "on-air" operation. However, where important characteristics deviate from normal, it warns the operator a decision is needed, and provides a character display readout on the engineering monitor.

Diagnostics-2 operates off-line, and on demand, by using signal injection techniques throughout the camera system. Messages are displayed on the picture monitor indicating probable fault location.

#### Selectable Automatic Programs

Selectable automatic programs in the LDK 6A include: • Full auto set-up • Auto daily check • Auto white • Auto black • Auto shading white • Auto shading black • Auto video levels • Auto lens registration calibration • Auto tube adjustment • Auto centering • Auto registration—full range

These automatic programs provide for ease-of-use and produce the best possible results in the shortest possible time.

LDK 6A

Because of the computer-controllable back focus and the full range computer control of the tube parameters, it is even possible to set up the camera fully automatic after tube replacement without any manual pre-setting. The green channel is automatically aligned to a digital electronic test pattern, with red and blue, subsequently aligned to green.

#### COACH — Double Assurance

COACH is a tool for centralized maintenance and monitoring of the LDK 6 family of cameras. It consists of 2 components — an interface and an IBM-compatible personal computer. Simple to use, COACH provides: • Remote control and monitoring of LDK 6 family camera systems • Flexible retrieval, storage and control of camera data • In depth diagnostic monitoring • Remote access via standard modems over telephone lines • Remote video measurement. It therefore helps make more cost-effective use of engineering staff and allows contact and control at the local Philips Service Center.

#### Status Feedback

The unique status feedback system is another important advantage of the LDK 6A.

The data transparency of the design enables access to, and retrieval from, any unit on the bus. While all operation settings are displayed on the common control panel, virtually all setting-up and operational control parameters are available for display on the master control panel. All settings generated by digi-pots are fed back to the alphanumeric displays and are shown by an exact percentage readout. This permits settings to be checked at a glance, without physically measuring them.

#### The Camera Head

• Dynamic lens error correction • Remote control scan reversal • Rain-proof housing and RFI shielded • Quick lens change • 4 different lens memories • Built-in diascope • Optical axis of the lens and viewfinder in one vertical plane • Two 5-position filter wheels — one controllable by cameraman • Extensive viewfinder signal selection • Auto-iris • Momentary auto-iris by spot measurement • Auto-white balance control by spot measurement • Extensive intercom facilities • Rotatable, tiltable and removable 7" high resolution viewfinder with extreme tilt range ( $\pm 60^\circ$ ) • Extensive indicators and markers in the viewfinder • Provision for remote facility for intercom and external viewfinder switches (e.g. on pan bars) • Two audio channels • Utility power • Integrated lens support • Large, switchable tally light visible from every direction • Contours from red (option)

And it is in the camera head, not in the lens, that the diascope is located, making a wider selection of lenses available for different production situations. Full range extender facilities are maintained.

# FRAME TRANSFER-CCD ENG CAMERA SYSTEM

## LDK 90

### Frame Transfer-CCD ENG Camera System

Three high-resolution Frame Transfer CCDs together with a shutter give superior picture quality with perfect geometry and negligible registration error, with corner-to-corner sharpness and without any lag, burn-in, comet-tailing, smear or microphonics. The Dynamic Contrast Control (DCD) handles in excess of 500% signal level over peak white without loss of detail.

FT-CCDs continue to produce perfect pictures with no deterioration in quality and no aging. They are stable and permanent. The robust solid-state LDK 90 is built to withstand the hectic pace of ENG and on-camera recorder operation. And with no tube changing, cost of ownership is extremely low.

#### Flexibility in Operation

The LDK 90 FT-CCD camera has been designed as the precise answer for ENG use. But bearing in mind the many and varied needs of broadcast and production companies throughout the world, BTS has provided quick fit adaptors and appropriate control systems for Betacam and other standards of on-camera recording, and for EFP use.

#### No Maintenance

Having CCD sensors the camera is completely solid-state and will require no maintenance. Equally, the built-in shutter is maintenance free. Therefore, even under rigorous working conditions the camera will be extremely reliable throughout its lifetime.

#### With Ease-of-Use

Microprocessor control of automatics. Electronic color temperature control, with two presets for studio and daylight operation. An operational menu system. A very wide range of viewfinder indicators. These are some of the built-in features that help make sure the cameraman can shoot quickly and easily.

#### The CCD-FT Principle

The Frame Transfer structure has a photosensitive imaging section with 350,000 pixels PAL, 300,000 pixels NTSC located next to a storage region and connected to it by parallel shift registers.

Each separate image is transferred to storage and a completely new image takes its place. The shutter is timed to operate during the transfer to ensure that the image remains unchanged and unaffected by incoming light. Each frame of the picture is thus clean and independent of previous frames and highlights (no smear).

#### System Control

A remote control unit, which can be used up to 300m from the camera, is available for EFP or studio use with RGB, CCVS and monitoring outputs, together with a cameraman intercom facility. A very compact local control panel can be connected to the remote control unit for control of iris, masterblack level, individual gain and black level for red and blue. The LCP may also be used for ENG and on-camera recorder use.

The BTS camera with Frame Transfer-CCD offers these additional advantages over other cameras (mainly equipped with Interline CCDs):

- Higher resolution obtained by 604 PAL, 610 (NTSC) pixels
- Total elimination of smear because of the CCD/shutter combination
- Shorter picture exposure time of  $1/50^{\text{th}}$  second (50Hz) or  $1/60^{\text{th}}$  second (60Hz) rather than  $1/25^{\text{th}}$  and  $1/30^{\text{th}}$  second respectively. These shorter exposure (integration) times result in higher dynamic resolution, which is especially important when shooting moving objects (slow motion replay)
- Vertical resolution clearly better than can be obtained with tube cameras
- Future proof—special sports version with exposure control available soon

#### Higher Sensitivity

Electronic color temperature compensation eliminates the use of color conversion filters. The result is approximately one f/stop more sensitivity in daylight operations.

LDK 90

#### Four Position Gain Control

A choice of 4 positions to suit different applications.

- For applications where an extremely high (+6dB) signal-to-noise ratio is required
- 0 For normal operation (signal-to-noise ratio 56dB PAL, 58dB NTSC)
- + For low light level operation
- + + For extreme low light operation

#### Operation Memory Menu

For more demanding applications (such as extreme conditions) as well as for EFP use, a special menu control panel with a protective cover is available for the cameraman.

Its functions are: • Master black: 0, -10%, -20% • Black stretch: on/off • Gamma 1: 0.45 • Gamma 2: 0.55 or customer setting • Contour: -, nom, + • Exposure control: (provision for)

#### Local Control Panel

This special accessory is for use in the field with painting, iris and master black control.

#### Matte Box

A matte box accessory allows use of all standard bellows, filters, "french flags," etc.

This is particularly suitable for the LDK 90 in film-style applications where additional artistic and creative possibilities are required.

#### Computerized Control

A built-in microprocessor fulfills several functions including: Switch-function communication with the camera viewfinder and, if present, the Remote Control Unit (RCU), as well as auto-iris control via intelligent picture sampling methods.

#### Viewfinders

The  $1\frac{1}{2}$ " viewfinder is X-Y-Z adjustable and rotatable. There is a complete range of indicators. These include filter, color balance, gain, tape-end, rec, batt, menu, and range extender, together with tape bar, audio level, white balance window, and selectable zebra level.

A 5" viewfinder is also available for EFP/studio use.

#### Light, Compact, Efficient

Extremely light and compact, the LDK 90 weighs only 5 lbs. (2.35kg), basic camera. Visibility is extremely good. Hand grip and balance are perfect. Shoulder, flat bottom or tripod use are all designed for convenience. Power consumption is less than 11W. Battery life is long.

#### Accessories/Lenses

A full range of accessories and lenses for convenience and flexibility is outlined in the LDK 90 short form catalog, separately available.

## UPRIGHT CABINET RACKS

### SHIELD-A-RACK UPRIGHT CABINET RACKS

Designed to meet FCC emission control requirements. Provides optimum flexibility of component design. Shield-A-Rak offers contemporary styling and rugged construction.

#### Design Features

- Decorative rigid vinyl trim with woodgrain inserts.
- Doors have locking handles for greater security.
- Two pairs of 12 gauge adjustable mounting rails tapped 10-32 on EIA universal spacing.
- Frame - 16 gauge steel; doors - 18 gauge. 19" panels, fit front and rear openings.
- Shipped completely assembled.

#### Bonus Features

- Most effective shielding method assures an average EMI/RFI shielding of 55 dB, up to a maximum of over 70 dB, through a frequency range from 30 to 1,000 MHz.
- Doors have wire mesh gasketing to provide best shielding. Gasket is attached with clips for easier repair or replacement.
- Heavy duty hinges and multipoint latching mechanisms on door allow uniform pressure on door gasketing for greater shielding effectiveness.

#### Finishes

- Royal blue textured (RB) and Gray textured (GT)

# UPRIGHT CABINET RACKS

## SERIES 60 UPRIGHT CABINET RACKS

- "U" braces on sides of all welded 14 gauge steel frame for durability
- Door, 20 gauge steel
- Sides and top, 18 gauge
- Front and rear panel mounting rails tapped 10-32 on EIA universal spacing
- Accommodates 19" panels
- Caster brackets pierced for RC-7758 casters
- 1" knockout holes in base

- Interiors are accessible from front and rear for easy installation and maintenance of components
- One door furnished. May be used on front or rear; mounted to open left or right
- Two pairs of adjustable mounting rails are included
- Shipped completely assembled

### Finishes

Gray textured (GT) or Royal Blue textured (RB).

These cabinet racks are quality enclosures that enhance the function, appearance and value of your

products. All Series 60 Cabinet Racks include welded frame, sides, top and rear door.

## INCLINED PANEL CABINET RACKS

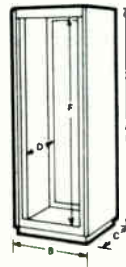

Series 60s Inclined Panel Racks are similar to the upright models in style and construction and can be used in conjunction with them. The front is divided into upright and 20° inclined panel space. Two pairs of fully adjustable mounting rails are in the front upright and sloping panel area, and one pair in the rear.

Available in either plain or louvered sides and rear door; solid top.

Available in either plain  
or louvered side  
and rear door;  
solid top.

**SERIES 2000  
INCLINED PANEL**

## SERIES 2000 UPRIGHT CABINET RACKS

Here are electronic enclosures that do more than house equipment. The sheer square line of the Series 2000, its symmetrical styling is the result of experience and perception Bud designers have. All Series 2000 cabinet racks include welded frame and base, sides, top, and rear door.

### Design Features

- Anodized aluminum extrusion top trim.
- "U" braces on sides of all welded 14 gauge steel frame for added strength and rigidity.
- Door, 20 gauge steel.
- Sides and top, 18 gauge.
- Front and rear panel mounting rails tapped 10-32 on E.I.A. universal spacing.
- Accommodate 19" panels.
- Castor brackets pierced for RC-7758 casters.
- One inch diameter knockout holes in base.
- Interiors are accessible from front and rear for easy installation of and maintenance of components.
- Readily removable rear door can be mounted right or left.
- Two pairs of fully adjustable mounting rails are included.
- Shipped completely assembled.

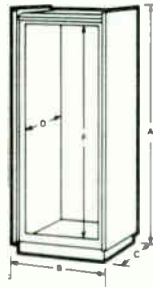

### Finishes

Gray textured (GT) or royal blue textured (RB).

## INCLINED PANEL CABINET RACKS

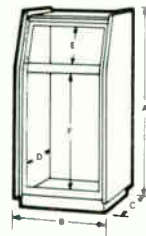

Series 2000 Inclined Panel Racks are similar to the upright models in style and construction and can be used in conjunction with them. The front is divided into upright and 20° inclined panel space. Two pairs of fully adjustable mounting rails are in the front upright and sloping panel area, and one pair in the rear.

DELUXE RELAY RACKS

PRESTIGE RELAY RACKS

## VALURACK 30"

This cabinet rack is another of our Designer Series available for off-the-shelf delivery. It offers the distinctive styling that enhances the value of its contents. The front is attractively framed by rigid vinyl trim with black inserts and a name plate.

### Design Features

Entire interior is accessible from front to rear for installing or maintaining components. One pair of horizontally adjustable mounting rails, tapped 10-32 on E.I.A. universal spacing attach to horizontal rail supports. The 20 gauge door has cam lock and flush handle, 18 gauge sides and 16 gauge top and bottom. Mounting brackets in base drilled to accommodate Bud RC-7758 casters or RL-7768 levelers.

### Bonus Feature

Shipped unassembled in two cartons. Quick, easy, assembly. No special tools required. Hardware included. NSTA approved packaging.

### Finish

Royal Blue Textured (RB).

## AVS500 VCR SYSTEM CABINET

This sturdy, all welded, compact, mobile unit provides a convenient VCR center for a range of AV applications and a housing for electronic devices.

**Design Features:** Top shelf of upper section houses a monitor or display. Clear dimensions of this are 18" high, 26" wide, 22" deep. Lower shelf designed for tape deck or disc player. Overall 65½" x 30" x 24".

Lower section contains two shelves for cassette storage or other material. Top shelf slides out. Area above each shelf is 12". All steel construction.

**Bonus Features:** Front doors bifold to provide a 270° opening for maximum view when V.T.R. system is operating. Flush mounted cam locks on all doors assure tamperproof storage and maximum security. Four 2" casters are included.

**Delivered assembled:** Weight 255 lbs.

**Finish:** Black textured.

## DELUXE RELAY RACKS

Versatile, economical enclosures house a wide range of electronic equipment and control system.

**Design Features:** Well-ventilated racks take 19" panels. Rear door has two black thermoplastic catches. If casters are required, specify RC-7756. Top, bottom, sides and rear door, 16 gauge steel. **Shipped knocked down.**

**Bonus Features:** Contoured front vertical members include 7/64" panel mounting supports drilled and tapped 10-32 on E.I.A. universal spacing.

**Finishes:** Royal blue textured (RB) and Luster Gray (LG).

# CABINET/EXTENSION RACKS

## ADD-A-RACK SYSTEM

### FOR SERIES 60 AND SERIES 2000 CABINET RACKS

Used to combine two or more enclosures into one integral system.

**Design Features:** Assembly consists of a welded frame top, bottom and rear door. Aluminum extrusions are included for Series 2000.

**Bonus Features:** The advantage of using this system is economy. When developing a band of enclosures, costs can be dramatically reduced by using one complete unit and several Add-A-Rack assemblies to obtain the optimum width.

**Finishes:** Order the same color as the cabinet rack.

CONCORDE SERIES

## CONCORDE SERIES UPRIGHT CABINET RACKS

Another choice of cabinet racks from Bud with a personality all their own. One that will add a unique but highly sophisticated appearance to your product. One that appeals to a marketplace looking for new and always better ideas. Concorde Cabinet Racks include welded frame, top, sides and rear door.

### Design Features

- "U" braces on 14 gauge steel frame provide assured strength and rigidity.
- Door, 20 gauge steel.
- Sides and top, 18 gauge.
- Front and rear adjustable panel mounting rails, 12 gauge, tapped 10-32 on E.I.A. universal spacing.
- Accommodate 19" panels.
- Caster brackets pierced for RC-7758 casters.
- One inch knockout holes in base.
- Clear anodized aluminum extrusion frames the cabinet. Name plate area has subtle woodgrain inset.
- Interiors are accessible from front and rear for easy installation and maintenance of components.
- Shipped completely assembled.

### Finishes

Gray textured (GT) or royal blue textured (RB).

### Accessories

Concorde Cabinet Racks are available with 24" panel space.

# CABINET RACKS/PORTABLE CABINETS

## CLASSIC II CABINET RACKS

Refined styling, design simplicity. Rigid plastic extruded front trim frames the front - a few reasons why the Classic II sets your product apart from the conventional.

Classic II Cabinet Racks include welded frame, top, bottom, sides, rear door with flush mounted handle and cam lock.

### Design Features

- Light weight, yet support heavier than average loads, since "U" braces on frame provide extra strength and support
- Rear door 20 gauge steel. Front door available. Can be mounted to open left or right.
- Side panels - 18 gauge steel
- Top and bottom - 16 gauge steel
- Adjustable front and rear mounting rails 12 gauge, tapped 10-32 on E.I.A. universal spacing
- 19" wide panels fit openings
- Caster brackets pierced for RC-7756 casters

### Finishes

Gray textured (GT) or royal blue textured (RB).

### Accessories

Classic II Cabinet Racks are available with 24" panel space.

## CLASSIC II PORTABLE CABINETS

Whether used independently or as a companion to the Classic II cabinet rack, the design of this distinctive cabinet harmonizes perfectly with the most sophisticated systems. While it's portable, it is equally effective for permanent installations.

### Design Features

- Top, bottom and side panels .060 aluminum. Frame, 6063T aluminum extrusions
- Accomodate 19" panels
- Doors and panels not included but are available
- 1/8" aluminum alloy doors attach to mounting rails
- Black thermoplastic flush-type latch

### Bonus Features

- Recessed brushed chrome handles are attached to two steel flanges extending the length of the cabinet. This added support assures carrying safety.
- Two 16 gauge steel vertically adjustable chassis supports included
- Shipped completely assembled

### Finishes

Gray textured (GT) or royal blue textured (RB).

## RACKS

### OPEN RELAY RACKS

Ideal for installations where easy access to components is a top priority. Each built for years of solid, trouble-free service, as well as obvious ease of service where frequent attention is desired (i.e. telephone switching systems, etc.).

#### RR-1260 SERIES

**Design Features:** Exceptionally strong structure made up of chassis-type base and supporting angles. Uprights,  $\frac{7}{16}$ " steel channels, 3" deep; top plate,  $1\frac{1}{8}$ " x  $3\frac{1}{8}$ ". Rails tapped 10-32 on E.I.A. universal spacing. Base is  $19\frac{3}{4}$ " x 22" and drilled for RC-7756 casters. Shipped knocked down.

**Finish:** Luster Gray (LG) and Black Textured (BT).

Catalog No.	Panel Space	Height	Weight
RR-1263	31 $\frac{1}{2}$ " x 19"	35 $\frac{5}{8}$ "	36 lbs.
RR-1363	36 $\frac{3}{4}$ " x 19"	40 $\frac{7}{8}$ "	37 lbs.
RR-1264	66 $\frac{1}{2}$ " x 19"	70 $\frac{5}{8}$ "	46 lbs.
RR-1364	71 $\frac{3}{4}$ " x 19"	75 $\frac{7}{8}$ "	47 lbs.
RR-1366	77" x 19"	81 $\frac{1}{8}$ "	49 lbs.

#### RR-1265

**Design Features:** Heavy-duty rack usually bolted to floor. Base, two  $\frac{1}{4}$ " steel angles,  $3\frac{1}{2}$ " x  $4\frac{7}{8}$ " x  $20\frac{3}{8}$ ", cross bars,  $\frac{1}{8}$ " x  $2\frac{3}{32}$ " x  $1\frac{9}{16}$ " steel angles. (Uprights, 3" x  $1\frac{9}{32}$ "). Panel mounting holes drilled and tapped 12-24. Base is  $20\frac{3}{8}$ " x  $12\frac{3}{4}$ ". Shipped knocked down.

**Finish:** Black Textured (BT).

Catalog No.	Panel Space	Height	Weight
RR-1265	66 $\frac{1}{2}$ " x 19"	72 $\frac{1}{4}$ "	64 lbs.

#### RR-1360 SERIES

**Design Features:** Extra-sturdy racks made of 14 gauge steel. Eight-inch deep welded "U" member and triangular bracket hold uprights to base (12 GA.). Panel mounting rails tapped 10-32 on E.I.A. universal spacing. Chassis type base,  $20\frac{7}{8}$ " x 26", drilled for RC-7756 casters. Racks may be bolted together in Add-A-Rack fashion. Shipped knocked down.

**Finish:** Luster Gray (LG) and Black Textured (BT).

Catalog No.	Panel Space	Height	Base Width	Weight
RR-1367	61 $\frac{1}{4}$ " x 19"	64 $\frac{5}{8}$ "	20 $\frac{7}{8}$ "	74 lbs.
RR-1368	70" x 19"	73 $\frac{3}{8}$ "	20 $\frac{7}{8}$ "	77 lbs.
RR-1369	77" x 19"	80 $\frac{3}{8}$ "	20 $\frac{7}{8}$ "	81 lbs.

#### RR-1240 SERIES

**Design Features:** Chassis-type base holds heavy components for table mounting applications. Supporting angles provide strength, rigidity. Panel mounting rails tapped 10-32 on E.I.A. universal spacing. Standard 19" panel fits flush with front. Base,  $20\frac{3}{8}$ " x 12". Shipped knocked down.

**Finish:** Luster Gray (LG) and Black Textured (BT).

Catalog No.	Panel Space	Height	Weight
RR-1248	21"	24"	14 $\frac{1}{4}$ lbs.
RR-1249	28"	31"	16 $\frac{3}{4}$ lbs.

# CABINETS/CABINET RACKS

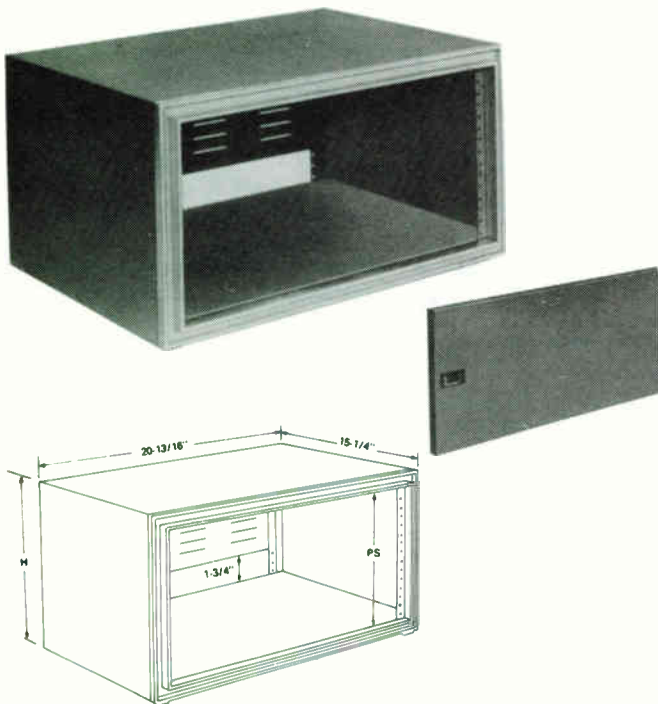

## THE STYLIST HEAVY-LOAD-BEARING CABINETS

Decorative rigid vinyl trim with woodgrain insert frames the front of this cleanly designed cabinet. Square corners enhance the unit's contemporary styling and, in turn, enhance the appearance and marketability of your product.

**Design Features:** 16 gauge steel. Rear fitted with louvered panel; 1 3/4"-high opening for cable access. Front and rear openings accept 19" panels or Stylist doors. Self-adhesive feet furnished.

**Bonus Features:** Full-width box flanges at top and bottom eliminate tilt and sway even when unit is loaded to its full 500-pound capacity. Cold-rolled steel structure is self supporting, no internal framework. Bustle-type door allows placement of panel behind door for meters, knobs, etc.

**Finishes:** Royal blue textured (RB) or gray textured (GT).

# CHASSIS

## ALUMINUM CHASSIS

From Bud, the widest selection of aluminum chassis in the industry: 63 sizes. Each is welded at stress points for assured, maximum strength and rigidity. Sides folded in at bottom for additional support. Bottom plate easily attached. Natural finish.

## CHASSIS BOTTOM PLATES

Fits all chassis sizes. Used to protect wiring or components, or as dust covers on underside of chassis.

# ACCESSORIES

## ACCESSORIES

For Series 2000, Series 60, Valurack, Concorde Series Upright Cabinet Racks.

The following key will indicate the cabinet rack on which the accessories shown on these pages may be used: Valurack (A), Classic II (B), Series 2000 (C), Series 60 (D), Concorde (E). Match the key letter under the accessory with the proper cabinet rack designation.

### POWER OUTLET STRIPS

Power outlet strips can be used in cabinets, on walls or along work or test benches. Silver gray housings; no loose wires can come into contact with conductor wires. Strips snap into adjustable mounting clips. Grounding type 15 amp., 125 volt receptacles .15 amp thermal-type circuit breaker with reset. Models 6 and 66 have 14 gauge 3 wire power cord, others have 12 gauge solid conductor. Both have 6 ft. cords. All components U.L. approved.

#### A-B-C-D-E

Catalog No.	Number of Outlets	Length	Weight

POS-11	11	72"	4¾ lbs.

\*Surge Suppressed

### SURGE SUPPRESSOR

#### A-B-C-D-E

Provides protection to data or word processing equipment and other sensitive electrical equipment from sudden "spikes" or high energy voltage. Prevents equipment damage, lost or distorted data. Clamps transient impulses in 10 Nanoseconds. Maximum "spike" current 2000 amps. 15 amp thermal type, circuit breaker with reset. 14 gauge, 3 wire, 6 foot power cord, all components U.L. approved.

### ADJUSTABLE SLIDE DRAWER

Fit cabinets with 19" panel space. Adjustable slides. Support heavy loads even when fully extended. Silver anodized handles.

#### Panel Finishes

White textured (WH) and Luster Gray (LG)  
 H-9355 Handle only for drawer.

#### A-B-C-D-E

Cat. No.	Size Inside	Panel Height	Wgt.
D-1721	16¾" x 6¾" x 16¾/16"	8¾"	23 lbs.
60-2368	16¾/16" x 6¾/16" x 19¾/16"	8¾"	24 lbs.

### DESK TOP DRAWER

Front panel height, 3½". Hinged drawer top has Formica® bonded to aluminum. Front panel latch locks and releases drawer and top. Mount to "U" braces in cabinet.

Panel Finishes: White textured (WH) and Luster Gray (LG).

#### A-B-C-D-E

Cat. No.	Size Inside	Wgt.
60-2363	16¾/16" x 3 x 14 7/8"	23 lbs.

### SLIDING DESK TOP

Requires only 1¾" panel space and 15½" x 17½" inside. Working area, 11" x 17½". Supports 50 lbs. Formica® surface. Mounts to uprights in Series 60 without brackets. Ball-bearing slide mechanism.

Panel Finishes: White textured (WH) and Luster Gray (LG). Top surface is antique white.

# DOORS/ACCESSORIES

## PLEXIGLASS DOORS

Fits Series 60, Series 2000, and Concorde Racks.

1/8" smoke gray plexiglass.

Frame is 1<sup>31</sup>/<sub>32</sub>" x 1<sup>1</sup>/<sub>8</sub>" anodized aluminum extrusion with longitudinal grooves for enhanced appearance.

Door is magnetically held in closed position. Easily installed or removed through use of spring pin hinges.

Inner surface of door is at least 1 1/2" from front of panel.

Door clears panel space when opened 90° or more.

Installation hardware furnished.

# MULTIPLEXERS/BIPLEXER

## Series 573 Mobile Multiplexer

The Series 573 Mobile Multiplexers accept input from two slide projectors and are equipped with a third input port which is usually used for 16mm input. It is not practical to use the third input for a slide projector. Buhl makes other multiplexers to handle three or more slide projectors. No projection lenses are needed for the two slide projectors because the optics are built into the multiplexer itself. The 16mm projector for the third input does require its own projection lens. The video camera uses its normal zoom lens. The camera can be mounted on a tripod but most users find the camera mount a convenient accessory. The choice of two basic models of the mobile multiplexer is determined by the diameter of the video camera zoom lens. Each of the two models can then be equipped with mounting plates to handle any of these slide projectors: Kodak Ektagaphic II, Kodak Ektagaphic III, Kodak S AV.

- 573-200 3.0" or less (camera lens diameter) . . . . . \$ 1450.00
- 573-190 4.5" or less (camera lens diameter) . . . . . 2237.00
- 573-312 Camera mount for 573 Series Multiplexers  
for semi-permanent mounting . . . . . 340.00

### Accessories

- 573-130 Kodak Ektagaphic E III Slide Projector  
(Includes brightness modifier and neutral  
density filter holder) Lens not included . . . \$ 286.00
- 575-132 Eiki 16mm telecine optical projector.  
SNT-OT. 5 bladed shutter, synchronous  
motor, diffusion device, lens not included . . 2005.00
- 575-112 Buhl projection lens for Eiki 16mm . . . . . 117.00
- 575-180 ELMO 16mm telecine optical/magnetic  
projector 16CL ETC. 5 bladed shutter,  
synchronous motor, lens not included.  
Diffusion device included . . . . . 2110.00

- 575-170 ELMO ST 180 ETC Regular 8mm telecine  
projector. 15-25mm ELMO zoom lens included.  
Diffusion device included . . . . . 700.00
- 574-100 Diffusion device for ELMO 8mm/Super  
8mm projectors. . . . . 36.00
- 573-202 Diffusion device for Eiki and ELMO  
16mm projectors. . . . . 36.00
- 574-695 Brightness modifier for Kodak III  
35mm projectors. . . . . 24.00

## 573-420 Modular Bipler

Modular system for film or slide transfer to video.

- 573-420 Bipler unit without projectors, accepts  
either of two inputs via a movable internal  
mirror. . . . . \$696.00

### Accessories

- 573-430 Adjustable height stand accepts either  
Kodak Ektagaphic Series II or Series III  
slide projector . . . . . \$ 105.00
- 574-066 Lens with extended barrel and ND filter  
holder for Kodak Ektagaphic slide projector,  
for slides to video via bipler . . . . . 135.00
- 575-450 Camera mount for modular bipler  
eliminates need for a tripod or dolly . . . . . 261.00
- 575-130 Kodak Ektagaphic E III slide  
projector including brightness modifier that  
adapts projector for slide to video  
transfer. Lens not included . . . . . 286.00

573-420

# MULTIPLEXERS

Series II  
Mobile Multiplexer

Series III  
Mobile Multiplexer

## SERIES II AND III MOBILE MULTIPLEXERS

### 620 Series Multiplexer II

Compact Mobile Multiplexer II for Ektagraphic III slide projectors and 16mm TV modified projector. Basic unit includes mounting plates to hold 16mm projector and two Ektagraphic III slide projectors. Includes optical system for both slide and 16mm projectors. Includes brightness modifiers and ND filter holders for slide projectors. Does not include projectors.

620-100 . . . . . \$3000.00

#### Accessories for 620 Series

620-150 Camera mount for 620-100 Multiplexer . . . . \$240.00  
620-160 Quick release camera mount. . . . .27.00  
620-180 Floor mounting stand for MM II with leveling feet . . . . .247.50

620-390 Rolling cabinet for MM II. . . . . \$282.00  
620-400 Ektagraphic E III for use on MM II.  
Includes brightness modifier and ND filter holder.  
When ordered with 620-100, projector will be factory installed and aligned on the multiplexer . . . . .286.00

### 630 Series Multiplexer III

Series III Mobile Multiplexers accept up to three Ektagraphic III slide projectors. Some models have a fourth input port for a 16mm projector.

The projection lenses for the slide projectors are built into the multiplexer, no additional slide projector lenses are needed.

If the slide projectors are purchased through Buhl they will be pre-mounted onto the multiplexer and equipped with special light diffusers to kill the projector filament images.

Use of the fourth input port calls for accessory support equipment and appropriate projection lenses.

The Series III is designed to work with video camera lenses of 3" diameter or smaller.

630-310 Accepts 3 Ektagraphic III slide projectors.  
No input port for 16mm. Does not include projectors . . . . . \$2925.00  
630-312 Accepts 3 Ektagraphic III slide projectors and has a fourth input port for a 16mm projector. Does not include projectors . . . . .3225.00

#### Accessories for 630 Series

630-150 Camera mount fits 630-310, 630-312, and 630-316 multiplexers. Used for mounting the video camera instead of a free-standing tripod . . . . . \$240.00  
630-160 Quick release mount used between camera and tripod or camera mount for fast, easy removal and replacement of the camera. . . . .27.00  
630-180 Floor mounting stand supports multiplexers 630-310 or 630-316 and includes leveling feet . . . . .247.50  
630-390 Rolling cabinet supports multiplexers 630-310 or 630-316. Includes lockable bottom compartment and large casters. Top surface 18" x 30". Height 27 1/2" . . . . .282.00  
630-400 Kodak Ektagraphic E III Slide Projector is equipped with light diffusing plates to kill filament image and assembled onto the Series III Multiplexer. . . . .286.00  
630-500 Support for fourth input. This assembly supports both the multiplexer and the fourth input 16mm projector. Includes 5" diameter locking wheels . . . . .697.00

#### Dissolve Control for 3 Slide Projectors.

There are many controls available through audiovisual dealers.

# VIDEO TRANSFER SYSTEM

## Tyrone Video Transfer System

### • L-Shaped Configuration:

The L-Shaped layout makes it easy for the operator to monitor both the projector and camera adjustments during the transfer process.

### • Interchangeable Inputs:

The projector and shelf become a single unit that can be removed or replaced without losing basic adjustment.

### • Aerial Image:

Aerial image means that there is no grainy screen to degrade image quality. The video camera sees the image formed "in air". The image is made visible to the camera by the carefully engineered field lenses which are part of the Bipler's optical system.

### • Black Mirror:

The optically polished black mirror positions the image correctly for the video camera. It serves to reduce the light from the projector to levels that the video camera can handle, and is rotated by the external lever to select the input port.

### • Removable Internal Screen:

A small screen can be inserted between the field lenses so that the aerial image is visible to the naked eye during setup. The screen is removed before recording.

Developed from Buhl's original Modular Bipler, the Tyrone Video Transfer System is an integrated unit to handle 16mm, Super 8mm, 8mm or slides to video.

Designed to take up a minimum amount of floor space, the Tyrone is ideal for small labs or shopping mall kiosks where floor space is priced at a premium.

The concept is that the projector and shelf become a single unit, which once aligned, can be removed and replaced without losing the basic adjustments. This is accomplished by fitting each shelf with carefully machined locating slots, which in turn fit into precision points on the Tyrone shelf holder.

For example, a typical model might be set up to handle Super 8mm and 16mm films for transfer.

Buhl would provide a custom made shelf for the positioning and alignment of the Super 8 projector to the optical system. When the need arises for transferring 16mm films to video, a second shelf with a 16mm projector could be installed in place of the Super 8 projector in a matter of seconds.

While the basic model uses only one input window (and this preserves the L-Shape concept), it is possible to install a second shelf on the opposite side of the unit. A second shelf position, or T-Shape could be added to offer the advantage of being able to switch from one projector to another in even less time than by changing shelves.

With two identical projectors, one at each input, one projector can be loaded while the other is running.

A custom package for two slide projectors in dissolve can also be added.

More than one Tyrone model allows the ability to move the camera, quickly from one to another by using quick release camera mounts.

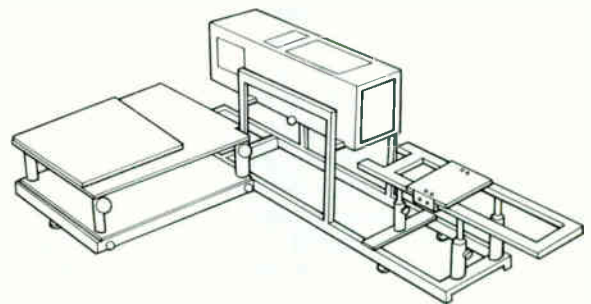

### Tyrone Video Transfer System includes:

- Optical system
- Custom alignment shelf for film or slide projector. (User must specify make and model number of projector.)
- Custom camera mount. (User must specify make and model of video camera, lens centerline height and distance from the tripod socket to the tip of the lens.)

502-100 Tyrone . . . . . \$1200.00

Tyrone T-Shaped Configuration

502-100 Basic Tyrone System

### Accessories

- 502-000 Additional shelf and riser. (User must specify make and model of projector) . . . . . \$150.00
- 502-001 "T" configuration add-on shelf and riser for right side. (User must specify make and model of projector) . . . . . \$315.00
- 505-100 Two projector 35mm dissolve system to hold and align two Ektagraphic III slide projectors in dissolve mode. Objective lens included. Does not include projectors or dissolve control (accepts vertical or horizontal slide format) . . . . . \$990.00

# CABBAGE CASES, INC.

1166-C Steelwood Rd.  
Columbus, OH 43212-1356  
(614) 486-2495

# CASES

Cabbage Cases is currently recognized as one of the foremost manufacturers of custom-designed electronic, scientific, and audio-visual equipment cases, anywhere.

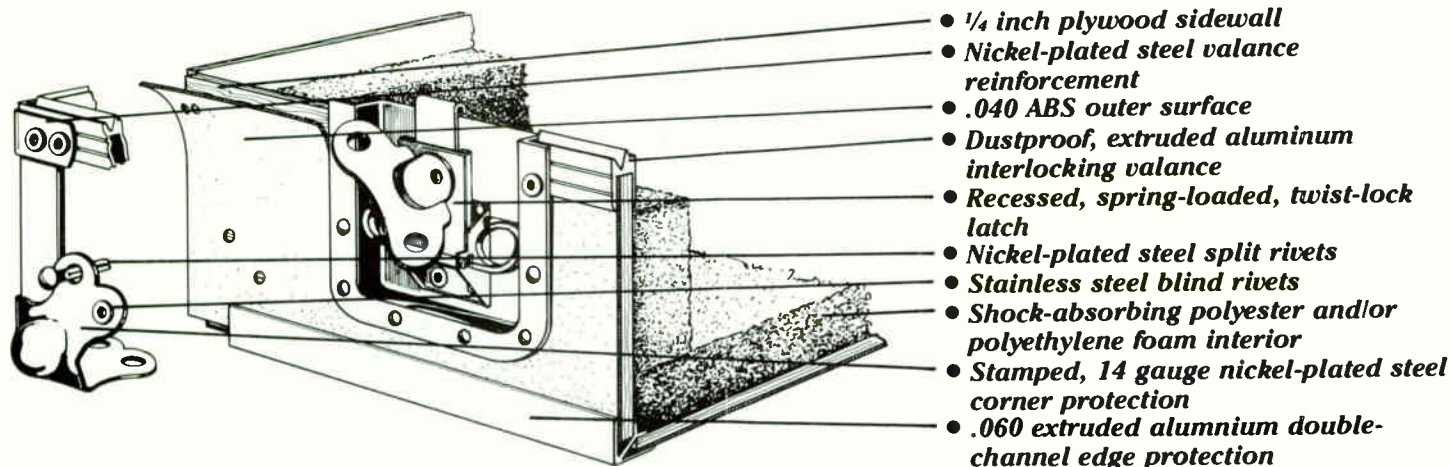

Each Cabbage Case is a custom-designed, personalized piece of equipment ... designed to satisfy your specific problems and needs. Simply supply your particular requirements ... we do the rest. There are never any surprises. Before anything is built, we will discuss your total requirements and supply complete information concerning proposed case size, weight, and shipping requirements ... including a firm price quote. Once begun, your case will be carefully constructed to the precise specifications required and will be individually serial-numbered for your convenience and protection.

## *Heavy-Duty<sup>®</sup> and Lightflite<sup>®</sup>*

Now, choose from two, distinct lines of Cabbage Cases ... Heavy-Duty and Lightflite. Select the type most appropriate for your particular application. Both are constructed of only the finest, most durable materials, including polyester & polyethylene foam, our own dustproof aluminum valance, continuous piano hinge, nickel-plated steel corners, latches & handles, and the very finest industrial-grade adhesives.

**HEAVY-DUTY** cases are ATA style and are designed to protect items that must be shipped under the most severe conditions. Heavy-Duty cases provide maximum protection.

**LIGHTFLITE** cases are made of tough, .090 ABS plastic, thermoformed to shape without wood. While extremely rugged and durable, they are much lighter in weight. Lightflite cases are especially suited for hand carrying and shipping under most normal conditions.

**S-Series  
Rack Cabinets**

### S-Series Rack Cabinets

- Three panel widths
- Four cabinet depths
- Nine cabinet heights

The slim style of the Cabtron "S" Series cabinet incorporates features desired by every designer. The modular construction of every component makes it possible to join frames in any number with the  $\frac{5}{8}$ " thick side panels completing the distinctive square style.

Every "S" Series frame is constructed of prime 14 gauge steel welded into one basic modular frame and finished in one of ten standard textured vinyl finishes. Four corner gussets rigidize the frame top. The very functional weldment base has air grilles both front and rear, removable bottom panel and mounting holes for all Cabtron casters. Different types of grilles are available.

Four 11 gauge panel mounting angles are provided with each frame, the front pair being tapped for 10-32 machine screws and the rear pair have .281 diameter holes all in EIA pattern. A hardware kit is supplied with each frame, consisting of four 10-32 panel screws for every  $8\frac{3}{4}$ " of front panel space. Additional mounting angles can be attached to horizontal struts.

All "S" Series frames will accept the famous Cabtron Blower System which does not require any vertical panel space for its air intake but rather utilizes the bottom grilles for its air intake. Cabtron blowers are available in 150, 300, 500 and 800 CFM.

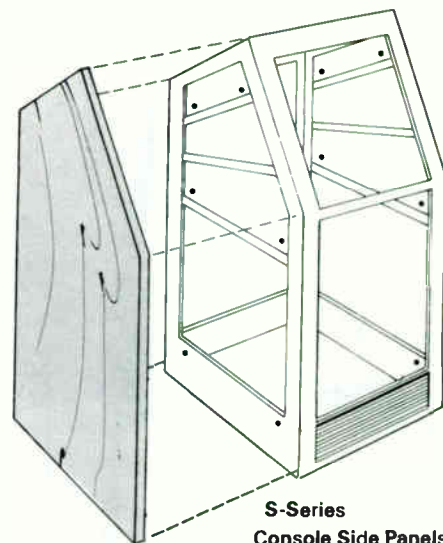

**S-Series Modular  
Electronic Cabinets**

### S-Series Modular Electronic Cabinets

Cabtron Systems has developed a complete line of modular cabinetry to meet even your most complex design applications. Our unique capabilities of complete interchangeability of components let you design a total "custom" unit with "in-stock" parts...at "in-stock" production prices, too. A complete line-up of problem-solving, cost-cutting electronic cabinets to make short work of your design needs.

Each of the seven basic cabinet series are designed for specific industry applications with the highest in quality craftsmanship. Choose from hundreds of different sizes. Add the finishing touches from our selection of ten custom vinyl textured color finishes and wide variety of stylish trim packages. There is a Cabtron cabinet that's right for you, whatever your design application is...from computer to OEM products or in-house test equipment.

**S-Series  
Console Side Panels**

**S-Series  
Bench and Rack Side Panels**

### S-Series Bench and Rack Side Panels

Cabtron S-Series Square Side Panels feature a clean square appearance that blends into the frame structure.

Constructed of prime 16 gauge steel formed  $\frac{5}{8}$ " thick and finished in any one of ten standard Cabtron System textured vinyl colors.

Standard side panels are bolted on from the inside of the cabinet with no screws showing on the exterior surface.

Externally removable side panels may be ordered by adding "ER" to the standard number.

Louvered side panels may be ordered by adding "LV" to the standard number.

Also available as a Flat Side Panel with attachment studs...designation SSF.

**S-Series  
Console Frames**

### S-Series Console Frames

- Three panel widths
- Three slope opening
- Four frame depths

Every "S" Series Console Frame is constructed of prime 14 gauge steel welded into one basic modular frame and finished in one of ten standard textured vinyl finishes.

The exclusive filtered base design allows complete flexibility for interchanging different types of grilles.

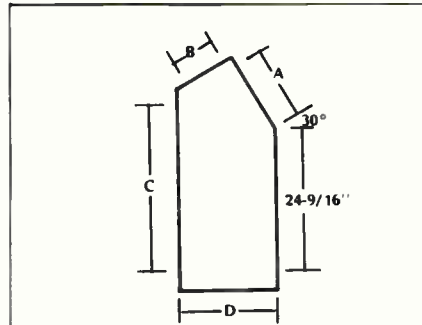

Each Cabtron Console Frame comes with slope and vertical angles in each corner that are adjustable within the frame. Front slope angles are tapped 10-32 on EIA pattern and all other angles have .281 diameter holes on EIA pattern. A hardware kit is supplied with each frame consisting of HW-201 panel mounting screws.

All filtered base frames will accept the exclusive Cabtron Blower System or base fan.

Cabtron "S" Series Console Cabinets have been designed to meet the requirements of today's industry. The modular construction of every component makes it possible to join frames in any number. Side panels complete the distinctive square style.

**Consoie Wedge Frames**

**Bench Frame**

### Bench Frame

- Three panel widths
- Five panel heights
- Four frame depths

The slim style of the Cabtron "S" Series Bench Cabinet incorporates features desired by every designer. The modular construction makes it possible to join frames in any number. The 5/8" thick side panels complete the distinctive square style.

Every "S" Series Bench Frame is constructed of prime 14 gauge steel welded into one basic modular frame and finished in one of ten standard textured vinyl finishes.

Four 11 gauge panel mounting angles are provided with each frame; the front pair being tapped for 10-32 machine screws and the rear pair having .281 diameter holes, all in EIA pattern. Additional internal mounting angles available. A hardware kit is supplied with each frame, consisting of four 10-32 panel mounting screws, HW-201 for every 8 3/4" of front panel space.

**S-Series  
Rack Wedge Frames**

### S-Series Rack Wedge Frames

Cabtron System Wedge Frames are available in 30 and 45° angles for making wing or organ type assemblies.

Each Wedge Cabinet consists of one frame, one rear panel and one top panel, plus aluminum top trim.

Frame construction is all 14 gauge steel and finished in any one of ten standard Cabtron Systems textured vinyl colors.

Desk Turret

## Desk Turret Model 1-2-3 19 Degree

The square style of the Cabtron Systems "S" Series Desk Turret is designed for housing small controls atop a desk or bench assembly.

Constructed of 16 gauge steel with solid sides and fixed panel mounting angles in openings A and B. Each panel mounting angle has .281 diameter holes spaced in EIA pattern.

Finished in one of ten standard vinyl textured finishes. A hardware kit is supplied with each frame, consisting of four 10-32 panel mounting screws and clip nuts for each 3 1/2 inches of front slope panel space.

# TURRETS/TOE BASE

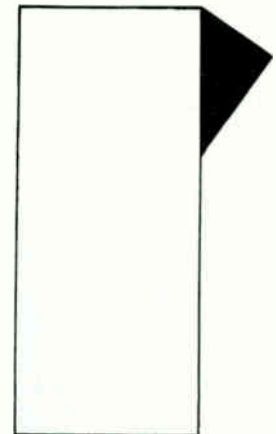

Toe Base

## Toe Base

When your operator needs additional toe clearance, for bench, rack or consoles, Cabtron's Toe Base is the answer. You can use this Toe Base as a riser when additional height is required on a bench frame. The Toe Base recesses 3" back from the front edge of cabinet and is flush on sides and rear. Welded to the frame, unless otherwise specified, the toe base has a height of 4" and a width identical to the Bench Frame to which it is fitted.

# BLOWERS/ AIR DUCT ASSEMBLIES/FAN

## ACCESSORIES

### Base Mounted Blowers

Cabtron Base Mounted Blowers are the exclusive design of Cabtron and are made to fit within the base of any filtered base Cabtron frame. Available in four air deliveries, 150 CFM, 300 CFM, 500 CFM and 800 CFM.

Cabtron blower units have dual outlets providing filtered air into the cabinet. For directing filtered air to certain parts of the cabinet we recommend using our "AD" air ducts.

Cabtron blower units may be mounted in either the front, rear or center positions and project above the grille per dimension "H" shown above.

All Cabtron blowers operate on 115VAC, 50-60Hz and are fused per industry standards. A 30" cord and plug is provided for easy attachment to our receptacle strips. All parts are finished in Cabtron light gray finish.

Other voltages and cycles available on special order at extra cost.

MODEL NUMBER	"H" BLOWER HEIGHT *	"D" BLOWER DEPTH

### Air Duct Assemblies

The Cabtron Air Duct Assembly makes it possible to exhaust cool, clean filtered air directly into hot spot areas of the cabinet and around chassis and drawers.

Air Ducts may be assembled to any Cabtron Blower System mounting flush with the side of the frame. Cabtron Blower Systems have two exhaust ports which may be ducted or one port may run free and the other ducted.

Air Ducts are supplied with 90° air deflectors directing the air towards the front of the cabinet. 50% of the exhaust ports have 90° deflectors and the balance are closed with cover plates.

Constructed of prime 20 gauge (.036) steel and finished in Cabtron's light gray finish. 1 1/2" x 5" air exhausts are spaced in 7" increments starting 1/2" from top of duct. A steel elbow is fastened to Cabtron's blower and air duct assembly.

Note: Not available for use with BL-150 blower)

### 400 CFM Panel Mounted Fan

Cabtron 400 CFM Panel Mounted Fan may be installed in the top panel opening of any Cabtron frame and will exhaust the air from the cabinet. These fans will provide a circulation of air throughout the cabinet and if cooling is actually required then we recommend our base mounted blower system.

All Cabtron Panel Mounted Fans operate on 115VDC, 50-60Hz.

Please specify standard Cabtron color when ordering.

## Flush Doors and Louvered Flush Doors

Cabtron Flush Doors and Cabtron Louvered Flush Doors provide front and rear access openings for bench, console, desk and rack frames. All Cabtron flush doors fit within the panel mounting area and feature a continuous hinge which is bolted to the frame mounting angles. The satin aluminum flush handle has a key lock as a standard feature.

All louvered doors have two rows of 5" louvers on 1" centers and provides 1 1/4 square inch of ventilation per louver.

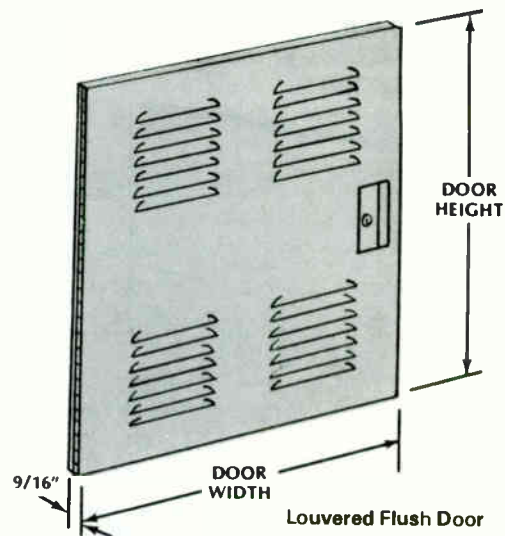

Constructed of prime 16 gauge cold rolled steel and finished in any one of ten standard Cabtron vinyl textured finishes. Specify when ordering whether the door is to be hinged left hand or right hand by adding the suffix "L" or "R" to the catalog number.

## Surface Doors and Surface Doors Louvered

Cabtron Surface Doors and Cabtron Louvered Surface Doors fit on the outside of the frame overlapping the panel mounting surface so that equipment may be installed to the frame angles and covered with the surface door.

All Cabtron Surface Doors feature a continuous hinge which is bolted to the frame surface with three 1/4-20 screws. The satin aluminum flush handle has the exclusive slide action for positive latching. Key lock is a standard feature.

All louvered doors have two rows of 5" louvers on 1" centers and provide 1 1/4 square inches of ventilation per louver.

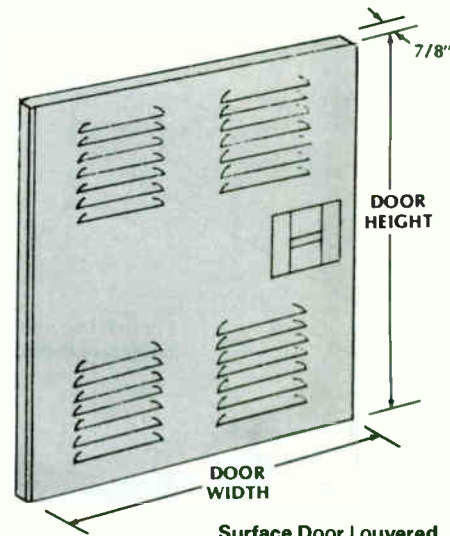

Constructed of prime 16 gauge cold rolled steel and finished in any one of ten standard Cabtron vinyl textured finishes. Specify when ordering whether the door is to be hinged left hand or right hand by adding the suffix "L" or "R" to the catalog number.

## ACCESSORIES

**Formed Plain Enclosure Panels**

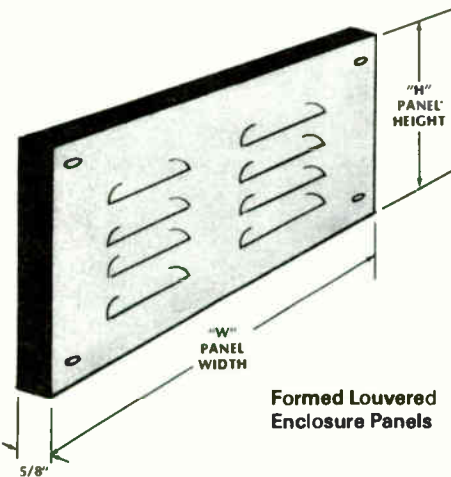

### Formed Plain Enclosure Panels

Cabtron Formed Enclosure Panels are formed with a 5/8" flange on all four sides fitting into 5/8" recesses of all Cabtron frame panel openings. Vertical dimensions are in increments of 13/4" to correspond with hole spacing on panel mounting angles on Cabtron frames which are in EIA standard increments.

Cabtron formed panels are fabricated of 16 gauge cold rolled steel and finished in any one of Cabtron's ten standard vinyl textured finishes as specified. Hardware for fastening panels to frames are provided in hardware kits supplied with frames.

**Formed Louvered Enclosure Panels**

### Formed Louvered Enclosure Panels

Cabtron Formed Louvered Enclosure Panels are formed with a 5/8" flange on all four sides fitting into 5/8" recesses of all Cabtron frame panel openings. Vertical dimensions are in increments of 13/4" to correspond with hole spacing on panel mounting angles of Cabtron frames which are in EIA standard increments.

Louvered are in two full length columns and are 5 1/8" long, 3/4" high, 1/4" open with 1/4" between louvers. Each louver provides 1 1/4" square inch opening for ventilation.

Cabtron formed louvered panels are fabricated of 16 gauge cold rolled steel and finished in any one of Cabtron's ten standard vinyl textured finishes as specified.

# PANELS/ PANEL SPACERS

## ACCESSORIES

### Formed Perforated Enclosure Panels

Cabtron Formed Perforated Enclosure Panels are formed with a 5/8" flange on all four sides fitting openings. Vertical dimensions are in increments of 1 3/4" to correspond with hole spacing on panel mounting angles of Cabtron frames which are in EIA standard increments.

Cabtron "PR" Panels are perforated with 5/64" diameter holes in staggered rows on 1/8" centers; 76 holes per square inch; 36% open.

Cabtron Formed Perforated Panels are fabricated of 16 gauge cold rolled steel and finished in any one of Cabtron's ten standard vinyl textured finishes as specified. Hardware for fastening panels to frames are provided in hardware kits supplied with frames.

### Flat Aluminum Panels

Cabtron Flat Aluminum Panels are fabricated of 6061-T6 aluminum 1/8" thick and supplied unfinished with gummed paper on one side. For painted panels add the suffix "PD" after the catalog number.

Vertical dimensions are in increments of 1 3/4" to correspond with hole spacing on mounting angles of Cabtron frames. Hardware for fastening panels to frames are provided in hardware kits supplied with frames.

When it is desired to have 1/8" panels flush with surface of frame, use one pair of Cabtron panel spacers per panel — code letters "PS".

One Pair Required Per Panel

### Panel Spacers For 1/8" Flat Panels

Cabtron Panel Spacers are designed to make 1/8" flat panels fit flush with the frame surface. One pair per panel is required.

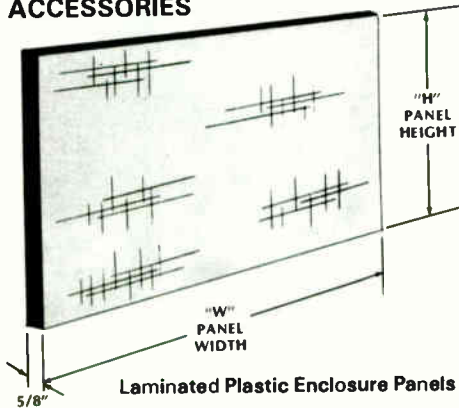

Constructed of 16 gauge steel and cadmium plated per QQ-P-416a Type II Class 2.

# CABTRON SYSTEMS, INC.

200 Anets Drive  
Northbrook, IL 60062  
(312) 498-6090

# PANELS/SHELVES/ CABLE CARRIER & RUNWAY

## ACCESSORIES

Laminated Plastic Enclosure Panels

### Laminated Plastic Enclosure Panels

Cabtron Plastic Lined Panels are bonded to extra strong core having an over-all thickness of  $\frac{5}{8}$ " fitting into  $\frac{5}{8}$ " recess of all Cabtron frame panel openings.

Ideal usage is with Cabtron extension frames or desk and counter frames. Plastic tops resist abrasion, heat, acids and alkalines and are supplied in light gray.

Vertical dimensions are in increments of  $1\frac{3}{4}$ " to correspond with hole spacing on panel mounting angles of frames. A complete hardware kit is supplied with each panel for fastening panel from underside.

Equipment Shelves

### Equipment Shelves

Shelves may be installed in all Cabtron cabinets at any desired height, bolting to the four cabinet panel mounting angles.

Fabricated of prime 16 gauge cold rolled steel and finished in Cabtron's light gray.

**CAUTION:** If cabinet has either air ducts, receptacle strips or ground strips—full depth shelves may not be used. Shorter depth shelves may be used by ordering an additional pair of mounting angles.

Sliding Shelves

### Sliding Shelves

Sliding shelves may be installed in all Cabtron cabinets at any desired height in increments of  $1\frac{3}{4}$ ". Steel slides allow equipment to be removed from shelves with ease. Maximum loading capacity is 50 lbs.

Fabricated of 16 gauge cold rolled steel and finished in Cabtron light gray.

### Cable Carrier No. CC-30

The Cabtron Cable Carrier provides support for cable harness which are attached to a sliding out chassis.

Attached to the rear mounting angle with  $\frac{1}{4}$ "—20 hardware the Cabtron Cable Carrier will extend a maximum of 30".

Constructed of 12 gauge steel and cadmium plated per QQ-P-416a, Type II, Class 2.

### Cable Runway

Cabtron Cable Runways are used to run wiring vertically within the cabinet. With Cabtron Cable Runways it is now possible to run wiring from one chassis to another without having to cable lace and if changes are required, it is a simple matter to remove the cover and make the change.

It is recommended that the Cabtron Cable Carrier "CC-30" be used in conjunction with the Cable Runway for trouble free chassis operation.

Cabtron Cable Runways are constructed of durable plastic and fastened to the frame with #10 hardware. Unless otherwise specified the Cabtron Cable Runway will be installed at the left rear corner when viewed from the front of the cabinet.

Caster Dollies

## Caster Dollies For C and S Series Cabinets

Cabtron Caster Dollies provide an extended base for additional stability and heavy load carrying capacities. Constructed of prime 14 gauge steel with two 12 gauge channel supports across casters and finished in any one of Cabtron's ten standard vinyl textured finishes.

Rack frames may be mounted midway between front and rear of dolly or flush with the back. The midway position provides a 6" ledge both front and rear and the rear position provides 12" of front extension. All top ex-

posed surfaces are covered with long-wearing black rubber mat. Furnished as illustrated.

Two ball bearing 4" diameter swivel casters and two ball bearing 4" rigid casters are included as standard parts of the dolly. A foot lock may be added to the dolly by adding the letters "FL" to the dolly number. All swivel casters may be ordered by adding the suffix "AS" (All Swivel) after the catalog number.

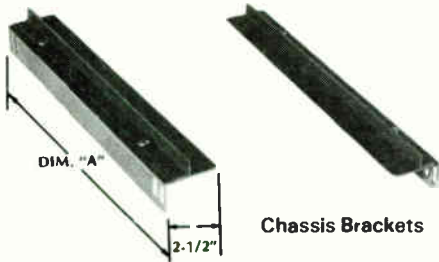

Filtered base frames are bolted directly to caster dolly using 3/8" - 16 hardware. Assembly hardware is included with each dolly.

Chassis Brackets

## Chassis Brackets

Cabtron chassis brackets are capable of supporting heavy loads and relieving stress to front panel mounted equipment.

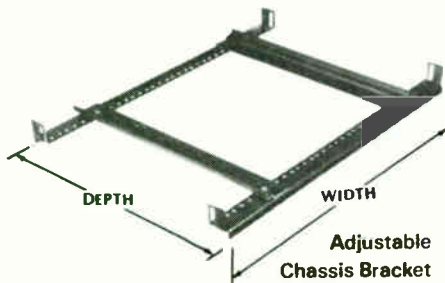

Consisting of two parts, the lower angle is fabricated of 16 gauge cold rolled steel. All parts are cadmium plated per QQ-P-416a Type II, Class 2. The lower angle is adjusted vertically along the cabinet panel mounting angles and the top angle is adjustable to the chassis width. All mounting hardware supplied.

When full cabinet depth chassis brackets are not required, shorter chassis brackets may be used by ordering an additional pair of panel mounting angles.

CAUTION: If cabinet has either air ducts, receptacle strips or ground strips — full depth chassis brackets may not be used. We suggest either shorter chassis brackets or using the adjustable chassis brackets (CBA).

### ORDERING AND DIMENSIONAL DATA

Catalog No	A	Used On
CB-18	16-13/16"	18-1/2" Depth Frame
CB-22	20-5/16"	22" Depth Frame
CB-25	23-13/16"	25-1/2" Depth Frame
CB-30	29-1/16"	30-3/4" Depth Frame

Adjustable Chassis Bracket

## Adjustable Chassis Bracket

Cabtron Adjustable Chassis Brackets are capable of supporting heavy loads and relieving stress to front panel mounted equipment affording maximum adjustability.

Consisting of four parts, two support brackets bolted across the front and rear panel mounting angles. The two chassis guides bolt across the two support brackets. All parts are fabricated of prime 12 gauge cold rolled steel and cadmium plated per QQ-P-416a, Type II, Class 2.

Chassis supports are adjustable vertically along the panel mounting angles and the chassis guides are adjustable horizontally along the chassis supports to any chassis width.

When using chassis brackets in sloped opening of console frames, it is necessary to order 2 — MA 21 mounting angles.

## Panel Mounting Angles for C, H and S-Series Cabinets

Additional Cabtron Panel Mounting Angles may be mounted anywhere within the frame affording complete flexibility.

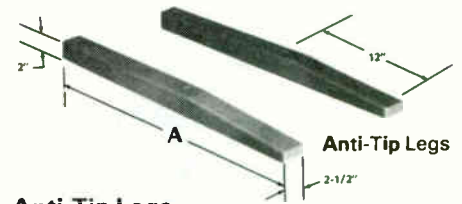

Angles are fabricated of 11 gauge (.120) cold rolled steel and cadmium plated per QQ-A-416a, Type II, Class 2, available in two styles, one with 9/32" diameter holes on both legs and the other style is tapped 10.32 on one leg and 9/32" diameter holes on the other leg. All panel mounting holes are spaced in EIA pattern, 5/8" — 5/8" — 1/2" and all lengths are in increments of 13/4".

NOTE: All Cabtron Frames are equipped with four panel mounting angles, one in each corner. Front mounting angles tapped.

# BRACKETS/ MOUNTING ANGLES/ ANTI-TIP LEGS & BASES

Anti-Tip Legs

## Anti-Tip Legs

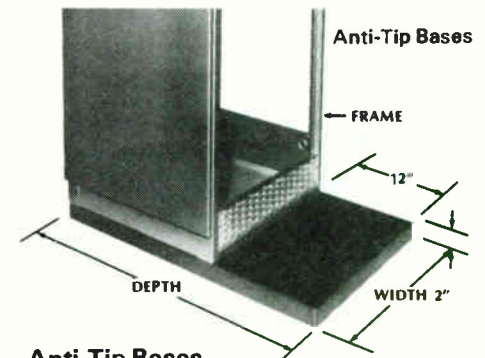

Anti-Tip Legs will support the cabinet when equipment is extended out from the cabinet.

Cabtron Anti-Tip Legs are constructed of 11 gauge cold rolled steel and finished in any one of ten Cabtron standard vinyl textured finishes.

Cabtron Leveling Pads (HW-125) may be added to the Anti-Tip Legs.

### ORDERING INFORMATION (FURNISHED IN PAIRS)

ATL-25	37-1/2"	25-1/2"
ATL-30	42-3/4"	30-3/4"

Anti-Tip Bases

## Anti-Tip Bases

Anti-Tip Bases provide additional stability when heavy equipment is extended beyond the frame.

Constructed of prime 14 gauge steel and finished in any one of ten Cabtron standard vinyl textured finishes. Extended surface is covered with long wearing black rubber matting bonded to base.

Filtered base frames bolt directly to the anti-tip base using 3/8" — 16 hardware.

# DRAWERS/ WRITING TOP

## ACCESSORIES

SIZES # 3 & 5 3-1/8" High  
SIZES # 7 thru 14 6-5/8" High

Pull-Out Writing Top

## Equipment Drawer

Cabtron Equipment Drawers are designed for use as storage drawers for cables, test equipment, papers, etc. and drawer front is the same size as a standard panel, therefore, it can be used at any vertical location in the cabinet.

Cabtron drawers feature a full width flush pull and steel slides providing full access to the 17" deep drawer. All drawers are constructed of prime steel and the drawer body is finished in Cabtron light gray and the drawer front is

finished in any one of ten Cabtron standard vinyl textured finishes. Recommended maximum carrying weight is 50 lbs.

Locks are available on drawer models, 5, 8, 10, 12 and 14 ONLY. To order locks add the suffix "LK" after the catalog number.

**CAUTION:** If cabinet has either air ducts, receptacle strips or ground strips — full depth drawers may not be used. Shorter depth drawers may be used by ordering an additional pair of mounting angles.

## Pull-Out Writing Top

Cabtron Pull Out Writing Tops provide easy access to a temporary writing or work surface and when not required, it will slide back into the cabinet.

Light gray finish. Maximum load carrying capacity is 50 lbs.

Writing Top Drawer

## Writing Top Drawer

Cabtron Writing Top Drawers are designed for use in standard vertical panel spaces of all Cabtron frames and provide an ideal pull-out writing surface.

Cabtron Writing Top Drawers feature a full width flush pull and steel slides providing full access to the 17" deep writing top. The

hinged black plastic top fits flush with top of drawer and allows the inside to be used for miscellaneous items.

Constructed of prime steel and the drawer body is finished in Cabtron light gray and the drawer front is finished in any one of ten Cabtron standard vinyl textured finishes. Recommended maximum carrying weight is 50 lbs.

## ACCESSORIES

### Receptacle Strip

Cabtron Receptacle Strips are Three Wire, single circuit, A.S.A. Standard (third wire bare copper grounding) with 15A, 125V, receptacles on 6" centers.

Receptacle Strips mount vertically on the frame struts and are installed at the right rear of the cabinet unless otherwise specified. Each Receptacle Strip is equipped with an entrance fitting which is positioned at the bottom of the Receptacle Strip unless otherwise specified.

#### ORDERING AND DIMENSIONAL DATA

Receptacle Strip Number	"L" Overall Length	Number of Receptacles	Cabinet Vertical Panel Height

Base Mounted Grilles

### Base Mounted Grilles

The Cabtron Filtered Base Frame brings new flexibility to the electronic cabinet by offering a selection of base grilles to fit your requirements.

Shown at the right is a typical rear grille with optional grilles below which may be used in place of the standard GR-19-S grille.

All optional grilles are finished in a vinyl finish, same as frame, unless otherwise specified.

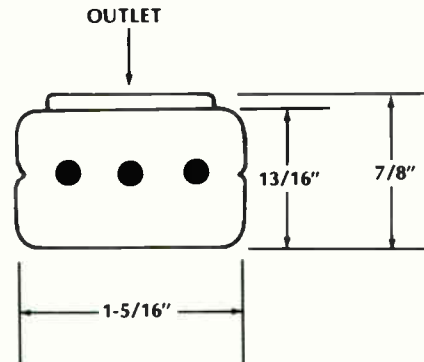

Grilles are constructed of prime 16 gauge steel, formed 9/16" thick, 327/32" high, and the panel width of the frame.

### Grounding Strip

Cabtron Grounding Strips allow equipment to be grounded Independent of the cabinet.

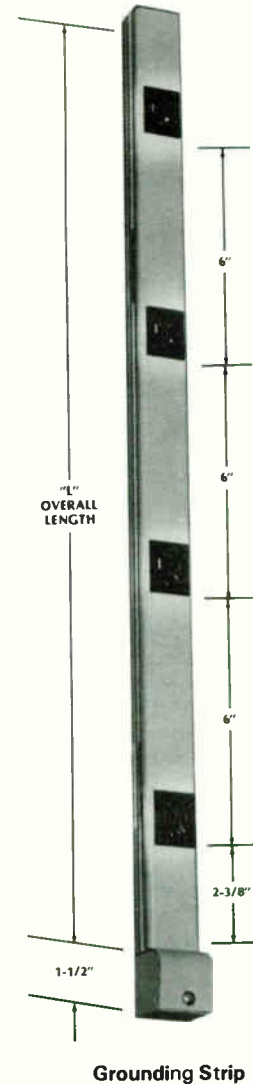

Cabtron Grounding Strips are 1/4" x 3/4" copper bus bar having 10-32 tapped holes spaced on 3 1/2" centers the full length.

All Grounding Strips mount vertically, on insulating hardware to the frame struts and are installed to the right rear of the cabinet unless otherwise specified.

# EXTENSION TOPS/ DESKTOP

## ACCESSORIES

### "WTA" Plastic Extension Tops, with Radius Front

Cabtron "WTA" Plastic Extension Tops have a radius front with square corners providing a smooth continuous work surface for any Cabtron rack or console frame. Constructed of .062 light gray or gunstock walnut plastic top sheet bonded to 3/4" exterior plywood.

Tops are supported by means of a top support panel which is bolted to the mounting angles and is the same height as the plastic top (3 1/2"). Top support panels are supplied with the plastic top (one for each frame) and are painted light gray.

When used with "H" series frames add 2" to dimension "A" for each frame and the suffix "H" to the extension top number (WTAH).

### Plastic Desktop

Cabtron Plastic Desktops are ideally suited for use with the "C" series desk frames described in section C, or may be used across the top of any Cabtron rack or bench frame.

Cabtron desktops are fastened to the frame from the under side and predrilled holes are not supplied unless dimensions for same are provided. Constructed of 1/16" top and bottom plastic sheets bonded to 1 1/8" flakeboard with an over-all thickness of 1 1/4". Available in light gray or walnut. Special colors, patterns and sizes are quoted on request.

When ordering special sizes, simply specify the standard size listed below which must be made larger than the size desired and also specify actual dimensions required.

### "WTC" Plastic Extension Tops One-Piece Console For 30° and 45° Assemblies

Cabtron one-piece plastic extension tops provide a smooth continuous work surface for the fronts of Cabtron rack or console front frames that are joined in a "console" or "wing type" arrangement and which utilize two 30° or 45° wedge assemblies as illustrated. Constructed of .062 light gray or gunstock walnut plastic top sheet bonded to 3/4" exterior plywood.

Cabtron plastic tops are supported from the frame by means of a 12 gauge steel top support assembly which is capable of supporting heavy loads and is bolted to the frame panel mounting angles with #12 hardware. All top supports are supplied as part of the plastic top, one for each frame and finished in light gray.

For "H" series assemblies add the suffix "H" after the part number.

### LP-900 24-Channel Controller

• 6-channel chaser • Grand master with illuminated black-out switch • A, B and C submasters on the X and preset scenes • 12 preset scenes with pin matrix • Trimmable control voltage range • Bump buttons with selectable add and solo modes • Split dipless crossfader between X scene and preset scenes • Male 27-pin "Jones-type" with a P-327-CCT mating cable connector supplied with console • Alps 60mm travel, viscous damped faders • 37<sup>5</sup>/<sub>8</sub>" H x 30<sup>7</sup>/<sub>8</sub>" W x 18<sup>1</sup>/<sub>4</sub>" D • 26 lbs.

LP-900 ..... \$1995.00

### LP-1000 2-Scene 24-Channel Controller/ LP-1001 2-Scene 12-Channel Expander

• 6-channel chaser • Grand master with illuminated black-out switch • A, B and C submasters on the X, Y and preset scenes • 12 preset scenes with pin matrix • Trimmable control voltage range • Bump buttons with selectable add and solo modes • Split dipless crossfader between X and Y scenes • Expandable to 48 control channels • Alps 60mm travel, viscous damped faders • 47<sup>1</sup>/<sub>8</sub>" H x 29<sup>5</sup>/<sub>16</sub>" W x 25<sup>3</sup>/<sub>8</sub>" D (LP-1000), 47<sup>1</sup>/<sub>8</sub>" H x 12<sup>1</sup>/<sub>2</sub>" W x 25<sup>3</sup>/<sub>8</sub>" D (LP-1001) • 40 lbs. (LP-1000) • 15 lbs. (1001)

### LP-1001 Expander

• 2-scene 12-channel controller • Complete with bump buttons • Submaster assign switches • Output level LEDs • 12 x 12 diode pin matrix, with no mastering or power supply • An LP-1000 controller may be expanded from a 2-scene 24-channel to a 2-scene 36 or 48-channel controller by adding one or two LP-1001s and the appropriate cabling. (25 diode pins are included with each expander) • The expander may be permanently attached and internally wired to the main console, or left unattached and externally wired via a Master Slave Interconnect Cable • In the latter case, the main console must have a Master Slave Harness installed

### Master Slave Option

• Allows one or more LP-1000s or LP-900s to be slaved to a master LP-1000 or 900 to increase control channel capability • In the slaved mode the grand master, submasters, preset master, preset controllers and crossfader of the slave unit are overridden by those controls on the master console • The pin matrix on the slave console is used to assign its channel controllers to the master console's preset scene controllers • Individual operation is restored to normal by disconnecting the external interconnect cable

One Master Slave Harness per console and one External Interconnect Cable per interconnect are required for master/slaving LP-1000s or LP-900s.

LP-1000 2 x 24 channel with 12 presets and 27-pin Male control connector ..... \$2695.00  
LP-1001 2 x 12 channel with 21 preset matrix-expander for LP-1000 and 15-pin Male control connector ..... 1245.00

### Controller Accessories

IH LP-1000 Internal Master Slave Harness, with master and slave connectors ..... \$145.00  
EH LP-1000 External Master Slave Interconnect Cable ..... 95.00  
BO Charge for bolting expander to master frame, incl. internal wiring ..... 55.60  
DI Diode pin ..... 1.86

### Flight Cases

FC1 LP-1000 ATA Style Case ..... \$279.00  
FC2 LP-1000 with 1 LP-1001 ATA Style Case ..... 343.00  
FC3 LP-1000 with 2 LP-1001's ATA Style Case ..... POA  
FC4 LP-900 ATA Style Case ..... 255.00

### Control Cables

1505 50' 15-pin F control connector on both ends ..... \$ 91.00  
1510 100' (for use with LP-1001) ..... 148.00  
1515 150' ..... 205.00  
1520 200' ..... 264.00  
3005 50' 27-pin F control connector on both ends ..... 139.00  
3010 100' (for use with LP-1000 and LP-900) ..... 223.00  
3015 150' ..... 307.00  
3020 200' ..... 394.00

LP-900

LP-1000

### Control Cable Spreader Options

801 36" 8-pin M to 8-pin F control connector ..... \$23.00  
1502 36" 15-pin M to two 8-pin F control connector (for LP-1001) ..... 55.00  
1532 36" 15-pin F to two 8-pin F control connector (for LP-1001) ..... 50.00  
3004 36" 27-pin M to four 8-pin F control connector (for LP-1000 and LP-900) ..... 80.00  
3034 36" 27-pin F to four 8-pin F control connector (for LP-1000 and LP-900) ..... 79.00

NOTE: Male spreader (801, 1502, 3004) connects to controller via cable; Female spreader (1532, 3034) connects directly to controller

### Basic Dimmer Packs with 8 CJC Control Input

(Not including power or load panels)

LD-1200 6 channels at 1.2kW per channel 7.2kW pack total ..... \$ 895.00  
LD-2400 6 channels at 2.4kW per channel 14.4kW pack total ..... 1195.00

### Power Panel Options (Power Input)

TP Terminal strip plug-in panel with cover box ..... \$ 74.50  
UP U-ground plug-in panel ..... 41.50  
HP Twist-lock plug-in panel ..... 107.00  
BP Blank plug-in panel—14" wire tails ..... 36.00  
PP Patch bay powerlock plug-in panel ..... 94.00  
DP Direct plug-in connector with handle and cover plate ..... 24.50

### Load Panel Options (Power Output)

TL Terminal strip plug-in panel with cover box ..... \$ 97.50  
UL U-ground plug-in panel (2 connectors per channel—12 total) ..... 67.50  
SL Stage pin plug-in panel (1 connector per channel—6 total) ..... 118.50  
8L Blank plug-in panel—14" wire tails ..... 43.00  
PL Patch bay powerlock plug-in panel (4 hot connectors per channel—24 total) ..... 65.00  
DL Direct plug-in connector with handle and cover plate ..... 29.00

### Control Input Panel Options

8C Blank plug-in panel ..... \$17.00  
RCC Ribbon cable plug-in panel Male 10-pin IDP Series ..... 39.50  
10 CJC Single 10-pin M C-J plug-in panel with input filtering ..... 36.00  
8 CJC Dual 8-pin M-F C-J plug-in panel (included with basic dimmer pack) ..... 27.50

### Dimmer Pack Accessories

RBK Rear rack brace kit (1 pr.) ..... \$19.00  
PBP Patch bay patchcord (36" length, 12 ga. with one end terminated in a 30A powerlock connector, specify red, green or white) ..... 96  
HTL Cable mount female twist-lock connector (mates with HP panel-Hubbell #2713) ..... 55.50

LP-750

### LD-360 Tree-Mount Dimmer

- Dual SCR's • Full magnetic circuit breakers • No fuses to replace
- All components are on a G-10 FR circuit board • Minimum wiring
- Line noise filtering that eliminates buzz and interference with sensitive audio equipment • Can handle 2400W total pack power if the parallel blade U-ground power plug is replaced with a plug rated to handle 20A, and the pack is connected to a suitable outlet • Six parallel blade U-ground receptacles • 25A per channel • One each male and female 8-pin Jones connector, with a mating cable connector

LD-360 ..... \$369.00

LD-360

### LD-1200/LD-2400 6-Channel Dimmer Packs

- EIA 19" rackmountable package • 3 1/2" H x 12" D • < 30 lbs. • Magnetic circuit breaker, locking full on switch, input power, drive, power output and no load indicators on each channel • Automatic shutdown with flashing indicators for overvoltage and overtemperature • Six dual SCR modules • Efficient cooling system with integral fan • Air enters through sides and exhausts out front • Units may be stacked with no heat build up • Effective, low-voltage drop inductors minimize RFI and lamp filament singing • Plug-in power input and output panels (U-ground, twistlock, stagepin or terminal strip) • Minimum selectable 0 or 2V • Maximum trimmable from +5 to 24V

LD-1200 1.2kW per channel, total 7.2kW, one magnetic 10A breaker per channel ..... \$ 895.00

LD-2400 2.4kW per channel, total 14.4kW, one magnetic 20A breaker per channel ..... 1195.00

LD-2400

### Rack Systems

- Powerlock patchbay system • Rack load panels • Three sets of rack rails • Dimmer packs are mounted to the front rail and are secured at their rear via the second rail with rear rack braces • Back of the rack features a third rail which will accept any Leprecon rack panels • ATA style road rack or permanent installation rack • Panels available with direct, patch or metal wiring options • Accessories available

# GOOSENECK LAMPS/ ACCESORIES

## LITTLITE SETS

High intensity Littlite has a 5W bulb with a finned hood. Low intensity has a 2.4W bulb with a smooth tubular hood.

"L" Series sets come complete and ready for easy surface mounting. All sets include bulb, mounting base and fully adjustable dimmer. Sets also include a 6' cord, 2-piece snap mount, screws for permanent mounting and a wall plug-in transformer. "A" versions do not include the transformer, and can be powered by any available 12V supply.

### Low Intensity Series

#### Detachable Lamp with Base

L-1/6	6"	\$49.95	L-1/6A	6"	\$40.95
L-1/12	12"	49.95	L-1/12A	12"	40.95
L-1/18	18"	49.95	L-1/18A	18"	40.95

#### Attached Lamp with Base

L-2/6	6"	\$39.95	L-2/6A	6"	\$30.95
L-2/12	12"	39.95	L-2/12A	12"	30.95

L-4/12	12"	59.95	L-4/12A	12"	50.95
L-4/18	18"	59.95	L-4/18A	18"	50.95

## Individual Gooseneck Lamps

Littlite "P", "G" and "X" Series lamps can be built into any device that requires lighting.

"G" Series Goosenecks have a BNC type swivel connector

"P" Series Goosenecks have a 3/8" diameter (1/8" NPT) threaded end with ground lug and nut.

"X" Series Goosenecks have a 3-pin male "XLR type" connector.

Individual Permanent Mount Lamp		Individual Permanent Mount Lamp			
6P	6"	\$16.00	6P-HI	6"	\$26.00
12P	12"	18.00	12P-HI	12"	28.00
18P	18"	20.00	18P-HI	18"	30.00

Individual Detachable Lamp		Individual Detachable Lamp			
6G	6"	\$23.00	6G-HI	6"	\$33.00
12G	12"	25.00	12G-HI	12"	35.00

Individual Detachable Lamp (XLR)		Individual Detachable Lamp (XLR)			
6X	6"	\$25.00	6X-HI	6"	\$35.00
12X	12"	27.00	12X-HI	12"	37.00
18X	18"	29.00	18X-HI	18"	39.00

## Accessories

### DM Dimmer Rheostat

Varies the intensity of P, G, or X Series Goosenecks. Will dim two low intensity or one high intensity lamps . . . . . \$5.00

### PS Panel Socket

Mates with the G Series Gooseneck Swivel Connector. Mounts in a 3/8" hole in material 1/8" or less thick, or in an MP . . . . . \$2.40

### WB Weighted Base

A heavy metal plate that is screwed onto the bottom of the light allowing an L model to become a movable free-standing light source . . . \$6.00

### MP Mounting Plate

A 1 1/4" square metal plate with a 3/8" hole in its center . . . . . \$3.00

### HIC High Intensity Conversion Set

A high intensity hood and Q-5 bulb to convert low intensity lamps to high intensity. Simply remove the old hood and bulb, insert the Q-5 bulb and slip on the HI hood . . . . . \$15.00

### CL Adjustable Clip

Adjusts to clamp on edges from 1/16" to 3/4" thick. Included are a mounting bracket, springplate, screws, and washers . . . . . \$4.00

### 1815 Bulb

12V, 230mA, 2.4W bulb for the low intensity lamps . . . . . \$1.00

### Q-5 Bulb

12V, 380mA, 5W tungsten halogen bulb for the high intensity lamps . . . . . \$7.00

### WXF Wall Transformer

Plugs into a 110VAC outlet and supplies 12VAC up to 930mA . . \$12.00

### SM Snap Mount

A pair of self-adhesive pads used whenever you need quick easy placement and removal of an L-series lamp . . . . . \$2.00

### CF Color Filter

For use with the high intensity Gooseneck lamps, which have a slot in the hood for the filters. They come in a set of four colors: dark and light red, amber and blue. . . . . \$3.00

### CP Cigarette Lighter Plug

Used to power a lamp from a cigarette lighter outlet . . . . . \$3.00

### LV Low Voltage Hookup Kit

Included parts and instructions for wiring lamps into a 12V system. Included fuse and holder, connectors and line taps . . . . . \$6.50

### SC Storage Clips

Use to secure Littlites for transit or storage. Includes two mounting screws . . . . . \$1.00

# CALAWAY ENGINEERING

# VIDEO EDITING SYSTEMS

## CED Series Computer Assisted Video Editing Systems

• CED MKII offers direct control of a mix of up to 6 Ampex and Sony protocol machines as standard • SCED is compatible with Calaway Engineering Translators and Sony BVH 2000, BVU-800/820, and BVW-10/40 machines • CED series offers standard RS-422 direct switcher control of popular audio and video switchers

### Features Common to All Models

• NTSC (PAL available) • Compatible with CMX and GVG  
• Optional 8" disc • Numeric keypad with double zero • Motion controller: Variable speed, Frame advance, Mark in/out keys • Preview Switcher: Audio/Video Previews, Sync Generator NTSC w/Genlock, Black Burst Generator NTSC, GPI Pulse  
• Video and Audio Switcher Control: Cross Point Selection w/Aux and Black, Transition Setup, Transition Execution  
• Frame Accurate • Color framed • Preview Field Select • Full Range Synchronizer • Save Editor Setup to disc • Save A/V switcher assignments • Save macro set • Save GPI labels/mode • Error/Help Messages • Automatic Assembly - Sequential and Checkerboard • Sync Roll • Previews: VVV, VVB, VBW • Replay • Edit Types: Video, Audio 1, Audio 2  
• Transitions: Cuts, Wipes, Dissolves • Split Edits • Trim Times • Set Times • Move Times • Constants: 8 • Master Slave • Saved to list • Looping and Branching • English Display of Macros • Transport Controls: FFW, FREV, Play, Stop, Slow Cue, Cue to In-point, 2X Play Very Slow, and More • Mark Keys • List Functions: Compatible with CMX, GVG/ISC, Conversion between Formats, Notes, Insert Edits/Notes, Delete Edits/Notes, Replace Edits/Notes, Shift Times, Renumber, Move, Ripple, Load EDL from Disc, Save EDL to Disc, Save EDL to Printer, Multiple Lists on Each 5 1/4" Disc, Seek for Event by Event Number, Seek Event by Record in Time, Scroll List Up/Down by Page, Jump to Head/End of List • List Sort: Event Number, Modified Record In, As Stored, Change Mode at Any Time

### All Models Include:

• Motion controller • Power cord • Installation manual • Operation manual • Software: edit program and diagnostics • Edit support card • upPV preview switcher

**CED upPV Preview Switcher:** Provides preview switching and synchronizing signals for the basic editing system (Composite sync and black burst). It also provides an output pulse at the start of a transition which can be used to trigger an external device.

### SCED + MK-II Six VTR Editor

• 6 VTRs standard • Fast 80286 computer • GPI w/E-MEM and Slo-Mo • All software options • Mixed Sony/Ampex Control • Powerful macros • Multiple record

### Includes

• Rackmount electronics chassis with: 80286 processor with serial and parallel printer ports • GPI card • Two 4-channel serial cards • Floppy disc interface • Monochrome display adaptor • Single 5 1/4" drive • Desktop green screen monitor • Extended color-coded keyboard • MS-DOS

**SCED + MK-II Editor for Serial VTR Control . . . \$22,495.00**

CED Series

### SCED + Six VTR Editor

• 6 VTRs standard • A/B mix standard • User supplied computer • Variety of switchers/mixers • Optional control of Ampex VTRs

### Includes

• Two 4-channel serial cards • Extended color coded keyboard

**SCED + Six VTR Editor . . . . . \$16,995.00**

SCED + requires either the Calaway Engineering MK-I computer or the Compaq Deskpro I, II or 20. The computer must have one 360K floppy disc drive, 640K of memory MS-DOS or compatible operating system version 3.0 or later. SCED + requires 3 free slots in the computer.

### SCED Four VTR Editor

• 4 VTRs standard • User supplied computer • A/B mix standard • Powerful off-line system • Variety of switchers/mixers

### Includes:

• 4-channel serial card • Color coded keyboard

**SCED Four VTR Editor . . . . . \$12,495.00**

SCED requires either the Calaway Engineering MK-1 computer, the IBM PC/XT, or the Compaq Deskpro I, II or 20. The computer must have one 360K floppy disc drive, 512K of memory MS-DOS or compatible operating system version 3.0 or later. SCED requires 2 free slots in the computer.

# EDITING ACCESSORIES

## SCED + MK-II SIX VTR EDITOR ACCESSORIES

### 8" Disc Option

MK-II Disc Includes: Rackmounted 8" drive, 50 pin interconnect cable, Power cable, Format program . . . . . \$2,495.00

### Floppy and Hard Disc Options

CE-525	5 1/4" floppy disc *	. . . . . \$295.00
CE-350	3 1/2" floppy disc drive*	. . . . . 295.00
CE-20M	20M byte hard disc drive.	. . . . . 995.00

\* Room for only one extra floppy drive in the MK-II. This may be either the 5 1/4" or the 3 1/2" drive.

### RGB-Preview Switcher

RGB-PVW Includes: upPV-RGB preview switcher (video only, three 3 x 1 channels), power cord, 6' interconnect cable . . . . . \$2,795.00

### Interconnect Cables

RS-422	SCED to VTR, 25'	. . . . . \$120.00
SWCH	SCED to Switcher/Mixer, 25' **	. . . . . 300.00
MK-II-CG	MK-II to Character Generator, 25'	. . . . . 120.00
MCXTR	Motion Control extension, 50'	. . . . . 150.00
KDXTR	Keyboard/display extension, 50'	. . . . . 350.00

\*\*The SWCH switcher control cable includes 3 cables, 1 for the preview switcher and 1 each for the audio and video switchers.

### Special Length Cables:

RS-422X	\$100.00 plus \$1.00 per foot, max. 150'
SWCHX	\$250.00 plus \$3.00 per foot, max. 150'
MK-II-CGX	\$130.00 plus \$1.00 per foot, max. 150'

Allow extra time when ordering for fabrication of non-standard length cables.

## SCED + SIX VTR ACCESSORIES

### Hardware Option

GPI + General Purpose Interface. Includes: Software upgrade, connector, diagnostic software . . . . . \$2,695.00

Note: GPI + requires one free slot in computer.

### Software Options

Mixed Mixed control of Sony/Ampex allows control of Ampex VPR-3, VPR-6, VPR-80 and Abekus A-62 . . . . . \$1,995.00

Film Film entry mode . . . . . 495.00

SCED-CG Character generator control, specify Quanta Q8 or QCG-500 . . . . . 2,495.00

## SCED FOUR VTR

## AND SCED + SIX VTR EDITOR ACCESSORIES

### Hardware Options

GPI General Purpose Interface. Includes: Software upgrade, connector, GPI card . . . . . \$2,295.00

Note: GPI requires one free slot in computer.

SCED-Disk 8" Disc Option. Includes: 8" rackmounted disc drive, Formatting software, Power cord, 50 pin interconnect cable, Replacement disc controller. . . . . \$3,175.00

Note: When used with the Compaq Deskpro, you will lose the parallel printer port supplied with the Deskpro.

### upST Series Translators

000 Cabinet. Includes: Cabinet, Power cord, Power supply, Sync separator . . . . . \$2,300.00

210 Sony Sony VO-5850. Includes: Framing kit. . . . . 1,550.00

223 Hitachi HR-230 (Must have time code reader.) . . . . . 1,550.00

Note: The upST series translators are used to translate the commands required by the particular machine (serial or parallel) into an RS-422 format compatible with the SCED direct control format. Machines equipped with the upST translators may be intermixed with a Sony machine on a system. There is room in each cabinet for up to four translator cards.

Each upST includes the control cable and an internal play speed time code reader.

## SCED FOUR VTR AND

## SCED + SIX VTR EDITOR ACCESSORIES (Continued)

### Hardware Options (Continued)

SCED-MK-I Computer Includes: Fast 8088 processor card with 640K memory, RS-232 interface card, Parallel printer port, Floppy disc controller card, Case, Desktop green screen monitor, Power cord, Monochrome display adaptor, Software: MS-DOS, Single 5 1/4" floppy drive. . . . . \$2,595.00

Note: Delivery of MK-I Computer is not expected before first quarter of 1988.

### Floppy and Hard Disc Options for MK-I Computer

CE-525	5 1/4" floppy disc *	. . . . . \$295.00
CE-350	3 1/2" floppy disc drive *	. . . . . 295.00
CE-20M	20M byte hard disc drive.	. . . . . 995.00

\* Room for only one extra floppy drive in the MK-I. This may be either the 5 1/4" or the 3 1/2" drive.

### RGB-Preview Switcher

RGB-PVW Includes: upPV-RGB preview switcher (video only, three 3 x 1 channels), Power cord, 6' interconnect cable . . . . . \$2,750.00

### Interconnect Cables

RS-422	SCED to VTR, 25'	. . . . . \$120.00
SWCH	SCED to Switcher/Mixer, 25' **	. . . . . 300.00
CED-CG	MK-II to Character Generator, 25'	. . . . . 120.00
MCXTR	Motion Control extension, 50'	. . . . . 150.00
KDXTR	Keyboard/Display extension, 50'	. . . . . 350.00

\*\*The SWCH switcher control cable includes 3 cables, 1 for the preview switcher and 1 each for the audio and video switchers.

### Special Length Cables:

RS-422X	\$100.00 plus \$1.00 per foot, max. 150'
SWCHX	\$250.00 plus \$3.00 per foot, max. 150'
CED-CGX	\$130.00 plus \$1.00 per foot, max. 150'

Allow extra time when ordering for fabrication of non-standard length cables.

## CALAWAY EDITOR ACCESSORIES

### Edit List Processing Software

KLEAN	Edit list cleaning package . . . . . \$750.00
KEEN	Edit list tracing software* . . . . . 750.00

Note: KLEAN and KEEN will operate on any IBM compatible computer. \*Delivery of KEEN is not expected before second quarter of 1988.

### Time Code Equipment

TCPC Time Code Phase Indicator. Includes: TCPC phase indicator, Power supply with cord, Instruction manual. . . . . \$495.00

## SCED UPDATES AND UPGRADES

### SCED Software Update Option

SCED	. . . . . \$375.00
SCED +	. . . . . 500.00
SCED + MK-II	. . . . . 675.00

Note: The first update released after purchase of a Calaway Editor will be provided to the user at no charge.

To receive subsequent software updates, the user must purchase the software update option. With this option, they will receive all software updates for one year. (There will be at least one update released each year.) If the user skips one or more years, the cost of the update will be the total of the years missed plus the current year.

### SCED Upgrades

SCED to SCED +	. . . . . \$ 5,175.00
SCED to SCED + MK-II	. . . . . 11,500.00
SCED + to SCED + MK-II	. . . . . 6,325.00
GPI to GPI +	. . . . . 460.00

Note: The upgrade includes any necessary hardware and software to upgrade the user's current system to the desired system.

# CALZONE CASE CO.

225 Black Rock Avenue  
Bridgeport, CT 06605

(800) 243-5152  
FAX: 203-336-4406

## CASES

From initial design to finished product, every case we make is treated as an architectural structure. Some manufacturers build a simple wooden box, add some hardware to the exterior, and call it a "flight case." We build Calzone cases from the inside out. One-of-a-kind Calzone design innovations, like our patented Interlocking Double Angle Construction, allow us to create an internal structural framework to provide exceptional durability, long life and unmatched protection for your valuable equipment.

In addition to our concept of an internal substructure, we also use the finest quality furniture-grade plywood, metal-to-wood-to-metal riveting, our patented Deep Grooved Aluminum Valance and heavy grade laminate external shells. Calzone's high density polyfoam interiors can be custom shaped to accommodate any type of equipment—from electric guitars and keyboards to computers, video cameras and specialized government testing equipment.

### Escort®

- Shock dispersion ball corner • High density polyester foam
- Flushmounted recessed spring-loaded handle for easy access and handling
- Large spring-loaded catch to secure lid to mainframe, locking catches optional
- Interlocking double angle 1/4" or 1/2" forms sub-frame structure
- Corner structure brace, double or triple rivet
- Extruded .093 gauge interlocking valance
- Heavy gauge full length piano hinge
- Industrial grade high pressure, impact resistant laminate on 1/4" or 1/2" furniture grade plywood in a variety of colors, aluminum and fiberglass laminate optional

### Pro Line II

- Full length piano hinge • Shock absorbent polyether foam • Form fit corner
- Spring-loaded handle with rubber grip
- Small recessed spring-loaded catch
- Corner brace protects corner of valance
- Custom extruded interlocking valance
- Custom double angle, internally riveted
- Poly tolene laminate on 1/4" plywood (gray or black)

### Convoy®

- Double angle construction where applicable
- Nickel plated butt hinge
- Nickel plated flat stock corner with self-standing foot
- Attache style catch with lock
- Plastic molded, color coordinated, easy grip handle
- 1/8" custom extruded valance
- Foam lined protection
- 1/8" ABS plastic molded and precision formed
- Optional shoulder strap

### Ultima Series

- Lightweight
- Durable • 1/4" plywood top and bottom with an exterior gray tolex laminate
- High density polyether foam lining
- Full length piano hinge
- Nickel plated hardware
- Lockable latches
- Metal reinforced handle for carrying ease

### Video/Cinematography Cases

Whether you're shooting a live remote, music video, feature length film, or making an audio/video presentation, you often have to travel with equipment worth thousands of dollars. Considering the delicate nature of cameras, projectors, recorders, editing and lighting gear, mikes, etc., the relative cost of the Escort and Convoy cases is a small price to pay to insure the complete protection and long life of your gear. We custom build cases designed around the way you work to save you time and money on location. We build a variety of standard cases along with special custom order models to handle any type of equipment imaginable.

High quality Escort wardrobe, drawer and utility cases come in a wide selection of standard sizes and can be custom built to handle any kind of stage costumes, make-up, wigs, related clothing and accessories.

Escort and Convoy audio visual cases come in all standard sizes and can be built to carry projectors, stands, screens, slides and accessories. Everything you need to take your multimedia show on the road without worrying about damage.

Standard and Custom Rackmount Cases

Cinematography

Video/Broadcast

Expensive and fragile recorders, monitors, projectors, editing/processing equipment and communications gear deserves the kind of extra protection provided by durable and easy to handle Escort and Convoy cases. All cases are available in video sizes and formats, or can also be custom built to your requirements.

Get your equipment to the location without any worries about road-shock. Our standard and custom cases for cameras, lenses, magazines, lights, stands and power packs represent the ultimate in protection and ease of handling. They can also help organize your equipment for complicated and remote location shoots.

The Ultima Series offers today's musicians an attractive streamlined case to protect their keyboards, mixers, recorders, and drum machines during local transport. Our custom aluminum shell makes it an extremely lightweight case providing maximum protection at nearly half the price of related A.T.A. type cases.

# COAXIAL CONNECTORS

## BNC, N, and TNC Fastfit® Coaxial Connectors

CP 88

CPFI UG88

CP 89

CPFI UG89

CPFI TNC

CP TNC

CPM TNC

CPMC TNC

### BNC Plugs

#### Fastfit/Crimp-On-CP 88

Two piece connector construction, with crimpless, solderless captive center contact and crimped outer braid.

#### Fastfit/Twist-On-CPFI UG88

One piece connector construction, with both crimpless and solderless center conductor/ braid connections. Requires no tools.

N-Type

### N-Type Crimp Style Plugs

#### N-Type Crimp Style

Quick crimp, low-cost 50 ohm impedance all brass construction.

### BNC Jacks

#### CP 89 Fastfit Crimp-On

Jack cord connector. Two piece connector construction with crimpless, solderless captive center contact and crimped outer braid.

#### CPFI UG89 Fastfit Twist-On

Jack cord connector. One piece connector construction with both crimpless and solderless center conductor/braid connections. Requires no tools.

### TNC Plugs

#### Fastfit/Twist-On-CPFI TNC

One piece connector construction, with both crimpless and solderless center conductor/ braid connections. Requires no tools.

#### Fastfit/Crimp-On-CP TNC

Two piece connector construction, with crimpless, solderless captive center contact and crimped outer braid.

#### Mini-Coax/Crimp-On-CPM TNC

Crimped center contact and outer braid. Designed for miniature coaxial cables.

#### COMM-MIL Crimp-On-CPMC TNC

Cost effective version of the crimp type (category "C") MIL-C-39012/16 series of plugs.

### Electrical Characteristics

Working Voltage: 500VRMS at sea level

Contact Resistance Outer Contact: 2m ohms

Center Contact: 1.5m ohms

Insulation Resistance: 5000M ohms minimum

Dielectric Withstanding Voltage: 1500VRMS at sea level

# SUPPORT EQUIPMENT

## MC-200 and MC-300 Pedestals

- The innovative Modular Cassette Counterbalance (MCC) System highlights the Easy To Balance Pedestal Column • The MCC System reduces the total weight of the unit, resulting in light maneuverable camera operation • Needle bearings incorporated in the casters help to reduce rotational friction and resistance • Specially designed rubber wheels and axles guarantee smooth starting and running operation • Sturdy adjustable cable guards are made of special 3-layer structure material to absorb shock and noise

### MC-200 Specifications

**Min. Height:** 24.0" (61cm)  
**Max. Height:** 49.2" (125cm)  
**Min. Width:** 31.1" (79cm)  
**Max. Width:** 34.3" (87cm)  
**Dead Weight:** 363 lbs. (approx. 165kg)  
**Mounting Weight:** 66 ~ 286 lbs.  
 (30 ~ 130kg)

MC-200 ..... \$13,500.00

### MC-300 Specifications

**Min. Height:** 22.8" (58cm)  
**Max. Height:** 60.6" (154cm)  
**Min. Width:** 31.1" (79cm)  
**Max. Width:** 34.3" (87cm)  
**Dead Weight:** 374 lbs. (approx. 170kg)  
**Mounting Weight:** 66 ~ 242 lbs.  
 (30 ~ 110kg)

MC-300 ..... \$16,500.00

## Tripods and Dolly

### TR-60 Tripod Specifications

**Max. Height:** 45.3" (115cm)  
**Min. Height:** 20" (51cm)  
**Loading Capacity:** 132 lbs. (60kg)  
 (When used together with CD-10.....198 lbs. (90kg))  
**Dead Weight:** 16.5 lbs. (7.5kg)

TR-60 ..... \$1,240.00

### TR-90 Tripod Specifications

**Max. Height:** 47.6" (121cm)  
**Min. Height:** 25.6" (65cm)  
**Loading Capacity:** 264 lbs. (120kg)  
**Dead Weight:** 24.2 lbs. (11kg)

TR-90 ..... \$1,700.00

### CD-10 Dolly Specifications

**Loading Capacity:** 286 lbs. (130kg)  
**Dead Weight:** 17.6 lbs. (8kg)  
**Dimensions:** 25 x 114 x 114.8cm

CD-10 ..... \$1,460.00

# STILL VIDEO CAMERA

## RC-701 Still Video Camera

Unlike conventional cameras using chemical-based films, the RC-701 changes the visual image into an electronic signal and records it instantly on a standard 2" video floppy disk. Up to 50 images can be recorded on each disk. Since images are stored in the form of electronic signals, conventional photo processing is out of the picture. Recorded images can be viewed immediately on a monitor TV, printed out in full color, or even sent around the world via ordinary telephone lines.

### High-Resolution CCD

The high resolution CCD (charge-coupled device) image sensor is only 2/3", it boasts 780 horizontal lines and 490 vertical lines. Pure and precise color is obtained through the high-performance RGB stripe filter, resulting in crisp images and realistic color.

### 6x Zoom Lens with Ultra-Fast f/1.2 Aperture

The 11-66mm (35mm lens conversion: 44-264mm) 6x zoom lens provides a maximum aperture of f/1.2, and features a single focus-push/pull zooming ring for smooth, swift zoom operation. A bayonet mount ensures positive transmission between the lens and camera body. Close-ups as near as 2 3/8" (60mm) are possible.

The FD lens adaptor lets you use Canon's entire line of FD lenses for photo possibilities as endless as your imagination.

### Swift, Silent Shooting at up to Ten Images per Second

The RC-701 features four shooting speeds. In addition to the single image, you can shoot 2, 5, or 10 images per second to capture every bit of the action. Winding noise is greatly reduced for virtually silent operation.

### High-Precision Silent Shutter

Unlike shutters on conventional 35mm cameras, the high-precision slit shutter incorporates a magnetic charge rotary design and a feather-touch shutter button. Since operation is totally electronic, shutter noise and vibration are dramatically reduced.

### Auto White Balance for Natural Color

In the automatic mode, the white balance control assures that color pickup is exactly as you see it. For creative special effects, you can also select manual operation, with 9 positions available.

### Increased Photo Possibilities with 6-mode AE and Manual Exposure

You can choose from 6 different AE modes depending on where and what you're shooting. When using SV lenses: 1) shutter priority AE, 2) P: standard program AE, 3) PT: teleprogram AE (automatic 1.5X sensitivity increase at lowest light limit for modes 1-3), 4) PH: high-speed program AE (high-speed shutter priority through increased sensitivity), and 5) flash AE. Position 6) stopped-down AE is for when Canon FD lenses are used, while position 7) enables manual exposure setting. In particular, the automatic 1.5X sensitivity boost increases your shooting possibilities in low light.

### Highly Precise Light Metering

Built into the focusing screen is an advanced MBS (micro beam splitter) which splits the incoming light between the focusing screen and the highly sensitive SPC element. When SV lenses are used in AE mode, incoming light is measured as the average of the entire frame, with an emphasis on the center portion, resulting in virtually perfect exposures every time.

### Brilliant Viewfinder and Centralized Data Display

The viewfinder makes use of a bright laser-matte incorporated into a split image design. A compact prism has been adopted for a clear, brilliant viewfinder image. Also in the viewfinder are LED indicators for program AE mode, flash ready, AE lock, manual white balance, manual aperture for FD lenses, as well as a 2-digit 7-segment LED data display that indicates (using numerals, letters and symbols) exposure information, remaining battery power, and floppy disk status.

RC-701

### Changing Video Floppy Disks in Seconds

Just remove the floppy disk with a single touch, insert another, and shoot on. The video floppies are only 2" square and light as a feather.

### Easy-to-follow Data Display

All the information you need during shooting is shown clearly on the centralized liquid crystal data display.

### Automatic Data Recording Makes Filing Easy

Along with the image, specific data can be recorded on each track: 1) year/month/day, 2) hour/minute/second, 3) shutter speed and aperture value of the photo taken, and 4) a four-digit number (code number: synchronization with the track counter can be switched On/Off). This data can also be shown on the TV monitor for later reference.

### Quick 1-hour Charge High-Capacity NiCad Battery

Using the battery charger, you can recharge camera power in just one hour. Fully charged, the high-capacity NiCad battery pack holds enough power for shooting approx. 250-350 frames (5-7 video floppy disks).

### Specifications

<b>Type:</b>	SLR-type still video camera
<b>Pickup element:</b>	Frame transfer type CCD image sensor (780 pixels horizontally) Equivalent to 2/3"
<b>CCD format:</b>	Eye-level type with Exclusive Canon roof prism;
<b>Viewfinder:</b>	Field of view: Horizontal 94%, Vertical 94%
<b>Light metering system:</b>	TTL full aperture, using SPC; center-weighted average metering
<b>Shutter:</b>	2 rotary blades, focal-plane shutter
<b>Shutter speed:</b>	1/2000 sec. - 1/8 sec.
<b>Flash sync speed:</b>	1/80 sec.
<b>Sensitivity:</b>	Equivalent to ISO 200 (ISO 600 in high sensitivity mode)

RC-701 .....	\$2725.00

# STILL VIDEO TRANSCEIVER

## RT-971 Still Video Transceiver

### Send Color Images Around The World by Telephone In Minutes

Convert any image into a video signal, input it into the RT-971, and you can send it through ordinary telephone lines to another RT-971 anywhere in the world. In just minutes, high quality color still images with vivid color and crisp resolution can be sent, with operation as simple as any facsimile machine. In addition, the RT-971 also records still images on a 2" video floppy disk which can then be viewed on the monitor. And in combination with an SV camera, you can take pictures to send around the world in just 3 minutes. By putting together a variety of video components, an ideal still video system can be constructed to suit specific applications in such diverse fields as photojournalism, medicine, construction, and management.

RT-971

### Automatic Reception of up to 50 Images

Real time image reception and recording are automatic. Just insert the floppy disk and transmissions are recorded as they are received, just like a facsimile machine. In the field mode, up to 50 images can be received consecutively.

### Stable Image Playback

The playback signal from the floppy disk is momentarily held in a memory circuit for extremely stable image playback while shortening head contact time to reduce wear.

### Frame Memory for Free Composition

The frame memory function enables multi-freeze composition of up to 4 images of your choice in any configuration you desire, with positive and negative reversal also possible. For greater efficiency, the 4 reduced images may be stored or sent as a single frame.

### Multifunction Interface Versatility

With 4 different interfaces, the RT-971 can be used in a variety of ways.

- **Memory I/F**—The memory contents of the RT-971 can be transferred to an external frame memory unit, etc.
- **Modem I/F**—By using a modem, the contents of the image memory can be sent at up to 64K bit/sec. to another RT-971 or CTS computer
- **Printer I/F**—A color printer can be connected through the 36P terminal
- **Remote/Caption**—The Remote/Caption Controller CS-RT can be used to add captions or control the RT-971 from a distance up to 10' away

### Multiple Analog Input/Output Terminals

Analog terminals for video, audio, and telephone use (modular jack) are built-in. A video camera, VCR, TV tuner, monitor TV and other video equipment, as well as microphones and Modems, can all be connected. Flexible system expansion to suit your needs makes the RT-971 an excellent business investment.

- **As a color facsimile:** RT-971 + Canon RP-601 Color Video Printer (to print out transmitted images)
- **As an image editor:** RT-971 + Canon RR-551 Still Video Recorder + monitor TV (for dubbing and editing video images stored on a floppy disk)

RT-971 ..... \$20,900.00

### Analog and Digital Transmission Mode Compatibility

The RT-971 is compatible with both analog (AM, FM) and digital (external modem necessary) transmission modes to enable you to select the one best suited to your telephone system (2 line or 4 line type) for the lowest noise transmission.

### Four Color Modes

Color images can be sent anywhere in the world in 3 minutes (RT-971 to RT-971 in field mode) in 2-color mode, while monochrome images can be sent in just a minute and a half in B & W mode. Also, there are 3- and 4-color modes, with masking and UCR coefficient setting possible. By adjusting both the white balance and black balance, ideal color can be obtained.

# COLOR VIDEO CAMERA MODULE

## Ci-10 CCD Color Video Camera Module

- **Pickup**
  - Element: CCD image sensor
- **Number of**
  - Pixels: 780 horizontally x 490 vertically
- **Filter:** An RGB pure color stripe filter with full space sampling
- **Image Size:** Equivalent to that of a 2/3" image pickup tube (8.8mm width x 6.6mm height)
- **TV System:** NTSC (15.75kHz/60Hz/VS 1.0V p-p 75 ohms)
- **Synchronization:** Internal
- **Resolution**
  - Horizontal: 300 TV lines
  - Vertical: 320 TV lines
- **S/N Ratio:** 43dB or better
- **Sensitivity**
  - Standard: 200 lux at f/2.8
  - Minimum: 20 lux at f/1.4 (with high gain)
- **White Balance:** Continuously variable (with illumination mark)
- **Lens Mount:** C mount
- **Power Supply:** 9VDC, ± 20 (0.45 A max.)
- **Operating**
  - Temperature: 14 to 113°F (-10 to 45°C)
- **Overall**
  - Dimensions: 4" H x 2 1/2" W x 1 1/2" D (102 x 63 x 37mm)
- **Weight:** Approximately 10 1/4 oz. (290 grams)

### Ci-10 Applications

#### As a versatile monitor camera

The Ci-10 can be the perfect module for use in banks, financial institutions, computer rooms, supermarkets, grocery stores, OA business offices, medical clinics and hospitals, small plants and large factories, modern transport terminals—to single out only a few essential practical applications.

#### As an image processing input camera

For clinic X-ray rooms, patient control centers, fiberoptic or microscope laboratories, computer adjuncts, communication centers, printing houses, editorial bureaus.

#### As an inspection unit or measurement image sensor

Use the Ci-10 to determine material object dimensions, shapes, colors, volume, and so forth.

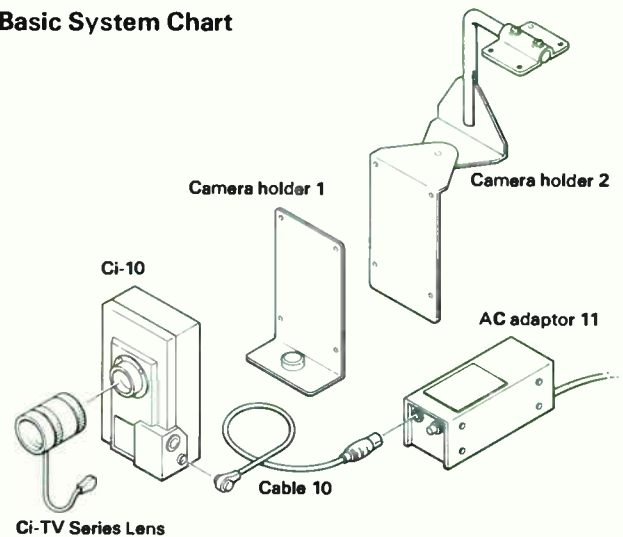

#### As an image sensor for industrial robots

Put the Ci-10 to work with industrial robots, unattended vehicles, wireless remote-controlled cranes or bulldozers, or any other forefront applications of advanced factory automation.

#### As a camera for door-phone with monitor

Install the Ci-10 as a monitor module for residential homes and apartments or in business offices.

# STILL VIDEO SYSTEM

## RE-550 Video Visualizer

The RE-550 takes any visual source—notes, charts, color pictures, or even actual objects—and instantaneously flashes it on your monitor. There's no processing, and no delay. In addition to the camera input, the unit connects to any of the SV (Still Video) System components, such as the RR-551 SV Recorder, and handles input from VCRs, video disk players, or any video source.

### RE-550's Quality Components Deliver High Resolution Color

This virtually maintenance-free CCD Color Video Camera Module puts 380,000 picture elements (780 horizontally x 490 vertically) to work to assure a highly detailed picture. The camera unit itself has an RGB pure color stripe filter and an RGB separation output system. Use with the optional lighting system to project a stable image with maximum clarity.

### Send the Image of Your Choice Straight to the Monitor

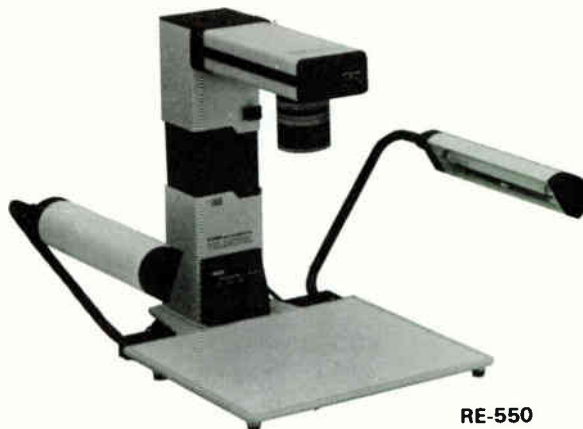

Whether it's a 2-dimensional manuscript or an actual object, you can manipulate and project the source of your choice to show your audience clearly—even in a well-lit room.

### The Macro Zoom Lets You Make a Mountain out of a Mole Hill

The f/1.2 zoom lens with macro lets you adjust the image size to suit your presentation. The flexible unit can handle documents ranging from A4 (8<sup>1</sup>/<sub>4</sub>" x 11<sup>1</sup>/<sub>16</sub>"") to A7 (2<sup>1</sup>/<sub>16</sub>" x 4<sup>1</sup>/<sub>8</sub>"") size. The sliding stanchion and arm allow you to move the camera up and down, and back and forth, in order to achieve the exact effect you wish to project.

### Choose Your Source with the Handy Built-in Selector

The built-in selector switch lets you choose your video input. Use the Canon RR-551 SV Recorder, the RT-971 SV Transceiver, a VCR, a video disk player, or any video source and simply flick a switch. Mix and

match for the most dynamic presentation possible. A touch of a button sends the video image to a monitor TV, a video projection screen, or the Canon RP-601 Color Video Printer. The built-in microphone allows for sound mixing as well.

RE-550 .....\$2830.00

### Accessories

- AC Adaptor PA-12 • PIN Cable AV KE-AVI • PIN Cable AV KE-AVII
- Shade SH-RE • Lens Cap C-58 • Carrying Case (Option)

## RR-551 Still Video Recorder

The RR-551 Still Video Recorder is a versatile machine that records and plays back images from a wide variety of video sources on a 2" floppy disk. Connect Canon's Color Video Printer and print out full color hard copies of these images in minutes. Unwanted images can be erased and re-recorded, saving trouble, time and money.

### High Resolution, High Reliability Through Advanced Technology

A specially developed CCD (charge-coupled device) comb filter, auto tracking control, and a PLL (phase-locked loop) circuit work together to ensure that images are accurately recorded without rainbows or "color bleed". To help reduce head wear, an exclusive Air Film head/media interface and pad release mechanism are adopted, while a brushless direct drive motor assures optimum accuracy.

### Versatile Recording and Playback Modes

**Interval Recording/Playback Mode:** This mode allows you to set the time interval (from 1 to 99 seconds) between image display to match the tempo of your presentations, or to record at timed interval.

**Programmed Playback Mode:** Display up to 50 recorded images in any order you like. The unit can be quickly re-programmed for variations of the same presentation.

**Direct Access Mode:** Using the 10-key pad, simply punch in the number of the image you wish to display.

**High Speed Recording/Playback Mode:** Three speeds can be selected to record or play back: 2, 5, or 10 images a second. Not only does this feature enable action to be simulated, it also is handy for quick image search.

### Multifunction Convenience From Your Directors' Chair

Turn on the power and insert a video floppy disk, and the wireless controller allows direct access or programmed playback operation from the comfort of your seat up to 23' (7 meters) away.

### Twin Mode Field/Frame Recording and Playback

The RR-551 is equipped with two recording/playback modes. Use the frame mode (25 images per disk) for excellent quality prints and high resolution image reproduction on a large monitor. You can also choose the field mode, which allows you to record up to 50 images on a single

floppy disk. For more convenience, you can mix modes on the same disk, with mode selection upon recording. During playback, the mode is automatically matched to the recorded mode used during recording of each image.

### Identify Each Image

The month/day/year and any ID designation up to 11 digits long, can be recorded on the image for future reference and greater filing convenience. ID designations or data recorded in field mode by the Canon RC-701 SV camera can also be displayed.

### Record From a Wide Variety of Video Sources

The RR-551 is equipped with Video and RGB terminals, allowing you to record video images from an ordinary television, VCR, video disc player, or video camera, in addition to the images taken with the RC-701 SV Camera.

RR-551 .....\$2830.00

### Accessories

- Wireless Controller WL-55 (with two size AAA batteries) • RF Cable KE-FF • RF Cable KE-FO • F Connector CN-75/300 • PIN Cable KE-PIN (2) • Antenna Selector AN-SE • RGB Cable KE-P4 (optional) • Head Cleaning Disk VF-CD (optional)

# COLOR PRINTER

FP-510

## FP-510 Full Color Printer

- Built-in masking circuit
- For ultra fine computer graphics
- 160 pixels per inch
- 64-step gradation
- High resolution printer
- Ink-jet printing method

### High-Quality Image

The FP-510 achieves high-quality images by using an ink-jet printing method which produces vivid color reproduction, controlling each color to 64 gradations, providing high-density images of 160 Dot Per Inch (DPI) comprised of one dot corresponding to one picture element.

### Intelligence

Image processing circuits such as UCR and masking are built in to achieve faithful and beautiful color reproduction in response to input signals. Programming for color phase correction, which is very difficult and time consuming, is no longer necessary. Much simpler program produces a color print faithful to the original.

### Low Maintenance

Reliability has been further improved by incorporating an electromotive pumping mechanism and an auto-capping mechanism to prevent ink head block.

### Outstanding Operability and Practicality

With a front loading system for roll paper, a single layout with all the control buttons concentrated at the front panel, and a built-in automatic paper cutter, operability is improved and the external design simplified. This color printer is easy for anyone to use.

### Wide Range of Applications

RGB, CMY, color pallet, or B/W modes can be selected as image data so that the printer can be used for anything from complex computer graphics to simple monochromatic graphics.

### Optional Print Size

#### And Enlargement Function

Print size can be easily programmed (up to 203mm; 8" W and 999mm; 39<sup>5</sup>/<sub>16</sub>" L). Also there is an integer multiple function, making possible print enlargement by up to nine times.

### Exclusive Ink and Roll Paper

Water soluble ink, outstanding for preservation and color reproduction, is used. Gradation has been improved by providing cyan and magenta colors in three types of ink differentiated by density: thick, medium and light. Moreover, the roll paper is an exclusive coated paper developed for outstanding ink absorption and color reproduction.

### Fully Augmented Interface

An interface complying with Centronics specifications has been provided as standard, but in consideration of the printer's broad range of applications, a GP-IB (IEEE-488) interface board has been provided as an option for connection with various peripheral units (e.g., all types of meters) so that the system can be upgraded in the future.

The FP-510 achieves high-density images and abundant gradations by using analog modulation through dot diameter variation and by light and dark ink.

### Light/Dark Ink

In order to obtain even richer expressions of color tone, three tonal versions of cyan and magenta ink are used: dark, medium and light.

### Analog Modulation Method

There are two methods of producing tonal gradation. One is to alter the number of dots recorded within a specific area without changing the diameter of the individual dots. This method is called digital modulation because there are only two possibilities: dot present or dot absent. The other method is to alter the diameter of the individual dots while leaving the number of dots within a specific area unchanged. The outstanding feature of analog modulation can be understood by comparing the two methods of expressing "light" in the above illustrations. Digital

modulation requires one whole dot to obtain a single color gradation. In the illustrations there are four dot areas, so four gradations can be expressed. This means that one picture element requires four dot areas to represent four gradations. The analog method, on the other hand, can represent many gradations with a single dot because it can change the dot diameter. (One dot corresponds to one picture element.) In the above illustration, therefore, one picture element needs only one dot area to represent numerous gradations. So, in representing the same gradation, analog modulation can yield an image of much higher density. The FP-510, for instance, provides a high density image of 160 pixels/inch with 64 gradations, but if it employed digital modulation to represent this many color tones, each picture element would have to be extremely large because 64 dots would be needed, and the picture would be quite rough in appearance.

## Specifications

**Printing Method:**

Drop-on-demand type ink-jet printing

**Recording Density:**

6.3 PEL (6.3 pixels/mm); 160DPI One dot corresponds to one picture element

**Gradation:**

64 gradations

**Color**

**Representation:**

260,000-color; 2-color, 4-color, 16-color, 256-color (pallet)

**Gamma Correction:**

Optional setting by user or selection of built-in correction formula

**Palette Selection:**

RGB 16-color mode (gamma correction present) RGB 256-color mode (gamma correction present) CMY 16-color mode (no correction)

**Ink:**

Exclusive ink (all-color simultaneous exchange cartridge system) Break-down Yellow...1 color; Cyan...3 colors; Magenta...3 colors; Black...1 color

**Print Paper:**

Exclusive coating paper (USA, Canada) Letter size roll paper (8<sup>1</sup>/<sub>2</sub>" W x 88<sup>9</sup>/<sub>16</sub>" L). (Other regions) A-4 size roll paper (width 210mm x length 27m) Can be set freely by program: Maximum width: 8" (203mm); (1,280 dots); Maximum length: 39<sup>5</sup>/<sub>16</sub>" (999mm); (6,294 dots)

**Print Size:**

Can be set freely by program: Maximum width: 8" (203mm); (1,280 dots); Maximum length: 39<sup>5</sup>/<sub>16</sub>" (999mm); (6,294 dots)

**Print Start Position:**

Can be set freely by program

**Print Speed:**

Approx 8 min., 36 sec. for 8" x 6" (203mm x 152mm); Approx 2 min., 36 sec. for 4" x 3" (102mm x 76mm)

# VIDEO PRINTER/LAMINATOR

## RP-601 Color Video Printer

The RP-601 is the color video printer that receives still images from video floppy disks, VCR's, or video disks and delivers authentic color reproduction. The specially developed ink-jet printing method offers prints far surpassing conventional color printer performance. Five types of IC assure superior quality and reliability, and also make the printer compact and energy efficient. Used in conjunction with the Canon SV (Still Video) Recorder RR-551, a video camera, TV, or the SV Camera RC-701, the application possibilities are practically infinite. Coupled with the RT-971 SV Transceiver you can print out photographs from halfway around the world.

**Advanced Technology Provides Amazing Picture Quality**  
Starting with ink-jet printing, a wide variety of rich, realistic colors, the RP-601 also uses analog modulation recording, a masking circuit to reproduce true-to-life colors and automatic gradation controls to adjust subtle nuances in hues and shading.

### All Your Needs, Large or Small

To suit a variety of needs, the RP-601 has a choice of two sizes. A large print (3 5/8" x 4 15/16") takes 4.5 minutes, while a small print (2 3/4" x 3 5/8") takes only 3 minutes.

### Practical, Functional Design

The special print paper loads automatically. The simple front panel features only main controls, such as the print switch. Auxiliary functions for occasional access only, such as manual picture adjustment, are tucked away to avoid complication.

### Paint the Prettiest Picture Possible

Utilizing ink that ejects smoothly, reproduces colors accurately, and performs consistently in a variety of environmental conditions. To match, the coated print paper has a high absorption rate and is completely compatible with the analog modulation of the RP-601.

### Reliable High Resolution Ink-jet System

In addition to the auto-capping mechanism that protects the ink heads, the electric pumping mechanism resolves ink head block by a one touch recovery operation. Good

RP-601

color reproduction, characteristic of ink-jets, is consistent with reliability and relatively low maintenance.

### Specifications

Type:	Pictorial full color video printer
Printing Method:	Drop-on-demand ink-jet printing
Ink:	8 colors, cartridge replacement system
Picture quality adjustment:	Auto (auto-half tone setting), manual (sharpness, color density, hue, brightness)
Recording density:	6.7 dots/mm <sup>2</sup>
Gradation:	64 gradations
Input/Output:	Video (pin jack), Analog RGB (13-pin connector)
Power source:	120V ± 10%, 60Hz
Power consumption:	35W
Dimensions:	12 5/16" H x 15 3/4" W x 6" D
Weight:	21.2 lbs.
Working environment:	Temperature: 50° ~ 95°F (10° ~ 35°C), Humidity: 30 ~ 85%

RP-601 . . . . . \$3,995.00

### Accessories

- PIN Cable KE-PIN
- Printer cable 13 KE-13P
- Color Paper RP-B6 (200 sheets)
- Ink Cartridge IK-8C
- Laminating Film (option)

## RL-303 Laminator

Use the RL-303 Laminator to put a protective film on RP-601 color prints to preserve your best still images and retain their bright colors.

### Specifications

Lamination method:	One-side lamination by heat-pressure method
Warm-up time:	With 60 seconds at 68°F (20°C).
Laminating Speed:	11.4mm/sec.
Paper feed width:	8 1/2" x 11" (letter size)
Power source:	120V, 60Hz
Power consumption:	1kW (max.)
Dimensions:	5 5/16" H x 19 5/16" W x 8 1/16" D
Weight:	18.9 lbs.
Working environment:	Temperature: 50° ~ 95°F (10 ~ 35°) Humidity: 30 ~ 85%

# CAMERAS/RECORDERS

## VC-50A PRO Color Video Camera

- f/1.4 10X power zoom lens with macro • Parallax-free Active Auto-focus • 2/3" 6MHz Saticon tube that allows unsurpassed color reproduction with high S/N ratio of over 47dB • Horizontal resolution better than 420 lines • EVF data checklist of camera and recorder functions appears in the viewfinder • Rotating eyepiece on the electronic viewfinder • Enhanced sensitivity provides optimum results in light as dim as 10 lux • Microphone permits either stereo or super-directional sound recording • Built-in character generator—for seven-color titling, scrolling and more

The VC-50A PRO gives you the touch of a pro, at the touch of a button. It's a magnificent camera for user convenience. A 10X power zoom lens with macro capability gives you more reach for bringing distant subjects in close. The 6MHz Super High-band Saticon tube ensures accurate color reproduction with horizontal resolution of over 420 lines and greatly improved signal-to-noise ratio. Enhanced sensitivity allows available-light recording in light as low as 10 lux. The VC-50A PRO comes with a sensitive super-directional microphone for superior sound recording.

**VC-50A PRO** ..... \$1495.00

VC-50A

## VM-E2N 8mm Camera and Recorder

- f/1.2 6X power zoom lens with macro • Advanced CCD image sensor with 250,000 pixels • Flying erase head for noise-free transitions • Active autofocus, manual focusing possible • Fully automatic white balance • AFM Hi-Fi sound • 2-hour recording capability • Pushbutton auto fade • Comprehensive system accessories • Unidirectional electret condenser microphone • EIA standard television system with 525 lines, 60 fields, NTSC color signal • 2 hours recording time with P6-120 video cassettes • Low light capability • Sepia button for special color effects

47" x 108" "Carter Cartop" (on 1983 VW Vanagon)

## The "Carter Cartop" Camera Platform For the Industrial, News, Motion Picture or Television Photographer

- Features quality materials and workmanship throughout
- Provides a sturdy cartop platform of distinctive and pleasing appearance as well as the utmost in utility
- Engineered for light weight and load supporting ability
- Self-adjusting supports, fits any roof contour, and distributes the load evenly
- Stainless steel tie-down clamps hold "Carter Cartop" securely to the car with turnbuckle fastenings
- Easily installed, completely detachable

All models shipped assembled for ease of installation. Send year, make and model of your car, station wagon, van or carryall with your order. Also, send total width of top from rain gutter to rain gutter, and from crown of roof to crown of other side. Patented, self-adjusting pads distribute the weight over roof contour.

Width	Length	# Men	Price
42" or 47"	60"	1	\$ 995.00
42" or 47"	90"	1-2	1350.00
42" or 47"	108"	2-3	1650.00
42" or 47"	126" or 144"	3	1995.00

(32" or 52" width available, allow 3-4 weeks)

All prices include a sturdy ladder trimmed to match the "Carter Cartop", either side entry or tailgate type (deduct \$75.00 if no ladder is desired).

VP704

VP708

**VP702-01/02**

**Video/Audio Distribution Amplifiers 1 x Ten**

- 1 x 10 distribution of video and two audio channels in one module
- Loopthrough on video and audio inputs
- Switchable selection of balanced or unbalanced audio input
- Internal audio gain adjustment, accessible from rear
- Switchable equalization to compensate for video cable losses
- Isolated outputs for short-circuit protection
- Small size, 1 U-high and 19" rackmounting

Both units feature 10 isolated outputs of stereo sound and video. The VP702-02 has loopthrough facility which enables daisy-chaining of audio inputs. Video inputs also loopthrough.

Suited to a wide variety of applications, the units feature low power consumption, a designed bandwidth of 6.5MHz and equalization switchable in 1.5dB steps.

The VP702-01 has XLR connectors for its balanced input.

The VP702-02 has 5-pin DIN connectors with the added feature of loopthrough on its balanced input. Both versions also have unbalanced phono inputs with loopthrough.

- VP702-01 .....\$465.00
- VP702-02 .....465.00

**VP704 Automatic Signal Switcher-10 Way**

- Small size, 1 U-high, 19" rackmounting
- Switching of 10 video inputs
- Manual selection of any input
- Automatic sequencing of all 10 inputs
- Skip facility in auto mode
- Dwell time adjustment
- Vertical interval switching
- Very low crosstalk
- Switching capability for time code or other data signals
- Can be configured as 10 in—1 out or 1 in—10 out

For recording applications, surveillance monitoring or situations where clean switching is important, the VP704 provides vertical interval switching between inputs which are synchronized.

- VP704 .....\$650.00

**VP705 Audio Distribution Amplifier**

- Low noise, flat frequency response, low distortion and high overload margin
- Especially suited to professional Hi-Fi audio distribution in Video Tape Duplication systems
- Isolated outputs offer short circuit protection
- Loopthrough on audio inputs enabling daisy-chaining for economic audio distribution
- Switchable selection of balanced or unbalanced audio input
- Internal gain adjustment, accessible from rear
- Small size, 1 U-high and 19" rackmounting
- Low power consumption

- VP705 .....\$360.00

**VP708 Six x 1 Routing Switcher**

- 6 loopthrough video inputs
- 6 loopthrough audio inputs, 3 balanced and 3 unbalanced (or 6 unbalanced)
- Two video outputs and two stereo audio outputs
- Audio outputs balanced or unbalanced
- Audio signal-to-noise ratio > 112dB (ref. +24dBu)
- +24dB audio headroom (ref. 0dBu balanced signals)
- Audio crosstalk > 80dB, 20Hz to 20kHz
- Low audio distortion < 0.05%
- Vertical interval switching
- Solid-state switching of both video and audio
- Momentary press buttons with LED indications
- Compact one rack unit, 19" mounting or free-standing

A rear panel connector allows for external remote control from a distance of up to 20 meters.

Facilities are provided for connection of an audio follower module to allow switching of two extra audio channels.

By daisy-chaining, the unit can be configured to produce 11 x 1, 16 x 1, 21 x 1 or, by matrix connecting, the built-in expansion capability lets the VP708 be a 6 x 2, 6 x 3, 6 x 4, 6 x 5, or 6 x 6 matrix switcher.

- VP708 .....\$975.00

**VP709 Stereo Audio Monitor**

- Simultaneous VU monitoring of four audio channels
- Simple pushbutton selection for A/B stereo audio signal comparisons
- Two headphone jacks, one mono and one stereo
- Built-in loudspeaker with volume control
- Line-out of selected stereo signal for external monitoring
- Built-in power supply

The VP709, designed primarily for video cassette duplication applications, provides comprehensive monitoring of stereo audio (or 2-channel audio) signals from two sources.

The panel has a good quality loudspeaker, stereo and mono headphone jacks and VU metering.

The monitor panel fulfills a variety of applications, typically the A/B comparison of stereo audio signals from two VCR sources, such as the master and slave in a video cassette duplication system. Another application is the monitoring of the two linear audio and two Hi-Fi audio signals from a Hi-Fi VCR.

- VP709 .....\$700.00

2117 Chestnut Ave.

Wilmette, IL 60091

(312) 256-0937 Telex: 28-6897 VIDEO UR

# CHANGEOVER MODULE/ AUDIO SWITCH/MIXERS/ CONTROL SYSTEM

## VP700 Automatic VCR Changeover Module

- Built-in cue-tone generator enables cue-tones to be placed onto the existing audio track
- Switching of video, RF (off-tape), balanced or unbalanced audio CH1 and CH2
- Auxiliary signal input which can be addressed manually
- Electronic control interlock to prevent inadvertent switching in the auto sequence
- Vertical interval switching
- Integral power supply
- Professional XLR connectors
- VCR playing sequences switchable 1-2-1, 1-2-3 or continuous 1-2-1 option
- Dub switcher option available

The VP700 VCR changeover module is designed to automatically control the playing sequence of two or three hi-band or low-band U-Matic video cassette recorders. Both audio tracks are switched.

The module operates in any of three modes—Manual, Prewind or Fully Auto.

In **Manual** operation, independent control of three VCRs is possible for the front panel. The **Prewind** start enables the exact position of each prerecorded sequence on each tape to be found automatically prior to starting the program sequence. In **Fully Auto**, after the prewind sequence, the unit automatically generates the required control outputs which, for example, may be used to put slave recorders into the Record sequence, as applied to mass duplication applications. At the end of the sequence all three VCRs are rewound. Leads are provided to suit the VCR type.

**VP700** ..... \$1600.00

## VP710 Audio Level Adjust—5 Group

- Flexible signal switching—input stereo channels can be reversed, mixed or re-routed to both or individual channels
- 5 audio stereo inputs—balanced or unbalanced
- 2 x 5 audio stereo outputs with individual channel level adjustment
- 5-group dual bargraph Peak Program Meter display
- 10 channels of continuous PPM monitoring
- PPM incorporates a precision full-wave peak detector
- 8 meter sensitivity ranges (-12dBu to +8dBu), measurement range +20dBu to -27dBu
- 1kHz calibrated tone signal
- Dynamic range 120dB
- Crosstalk between audio groups 100dB, 20Hz to 20kHz
- > +27dB headroom
- Flat frequency response ±0.1dB, 20Hz to 20kHz
- Signal-to-Noise ratio > 120dB (ref +24dBu), 20Hz to 20kHz
- Compact module 3.5" (2U) and standard 19" rackmount
- XLR input connectors, locking 5-pin DIN output connectors

The VP710 is a five-group audio switch/mixer designed for use with video cassette duplicators where master tape audio signals need moving, mixing, matching, mono-ing or level-adjusting. By flexible switching of input stereo channels they can be reversed, mixed or re-routed to one or both channels and the audio level on each channel can be individually adjusted.

The module will accommodate five stereo audio input groups, either balanced or unbalanced

**VP710** ..... \$1600.00

VP-710

VP-716

VS-615

## VP716 Audio Level Adjust—2 Group

- Flexible signal switching—input stereo channels can be reversed, mixed or re-routed to both or individual channels
- 2 audio stereo inputs—balanced or unbalanced
- Dual bargraph PPM display
- Auxiliary stereo inputs and line-outs
- Additional group 1 and 2 line-outs for extra monitoring
- XLR balanced input connectors, locking 5-pin DIN balanced output connectors
- Dynamic range 108dB
- Crosstalk between audio groups 90dB, 20Hz to 20kHz
- 24dB headroom
- Signal-to-noise ratio > 108dB (ref +24dBu), 20Hz to 20kHz
- Flat frequency response ±0.2dB, 20Hz to 20kHz
- Compact module, 1.75" (1U)H and standard 19" rackmount

This switch/mixer module will accommodate two stereo audio input groups, either balanced or unbalanced. The level of each individual channel can be adjusted and displayed on the PPM bargraph LED display. Two channels (one stereo) of PPM monitoring are provided, switchable to select group 1, group 2 or auxiliary outputs.

**VP716** ..... \$595.00

## VS-615 Machine Control System—5 Group

- Selection of slave group(s) G1 to G5 for simultaneous remote control of up to 1000 slave VCRs
- Full 7-function remote control of Eject, Rewind, Fast-Forward, Stop, Play, Record and Pause
- Individual group status memory display of Play, Record and Pause
- Lock button to override function buttons and so prevent accidental operation
- Master eject facility
- Momentary press buttons with LED indication
- Operation of any type of remotely-controllable VCR
- Compact one rack unit, 19" mounting

The VS-615 Machine Control System provides full 7-function remote control of up to five groups of slave VCRs in a video cassette duplication system. The modules have been designed to provide an inexpensive solution to the user who wishes to tailor his own customized systems.

**VS-615** ..... \$700.00

# DWIGHT CAVENDISH DEVELOPMENTS LTD.

# AUTOMATIC VIDEOCASSETTE SYSTEM

## CS811 Automatic Video Cassette System

- Very simple to use • No software or cueing tones on tapes
- Versatile expandable modular system • Single or multi-channel configuration • Stand-alone modules with 19" rackmounting cabinet option • Automatic VCR mains switch-off when not in play, also monitor mains if required • Change-over from one VCR to another or continuous repeat play mode
- Optional text generator during VCR down-time • Adjustable pre-roll timing for each VCR • Internal or external UHF modulator • 24-hour real time clock with weekday indicator • Programmable memory allowing clock to play VCRs up to 20 times per day • Four independent clock outputs • Short mains interrupt protection • Mains failure battery back up for clock • Will operate domestic VCRs which have wired remote control of play/stop/rewind • Loss of video detector

The CS811 budget system is ideal for playing video programs or text for a wide variety of commercial applications. The system is very simple to operate and does not need any special software or cueing tones on the tapes. It uses only two module types and can be simply configured to customer requirements in any combination from the minimum system (one automatic video controller and one VCR) to an expanded system with optional cabinet.

CS811

### Minimum System

This system requires only one module to control the VCR in either of two modes:

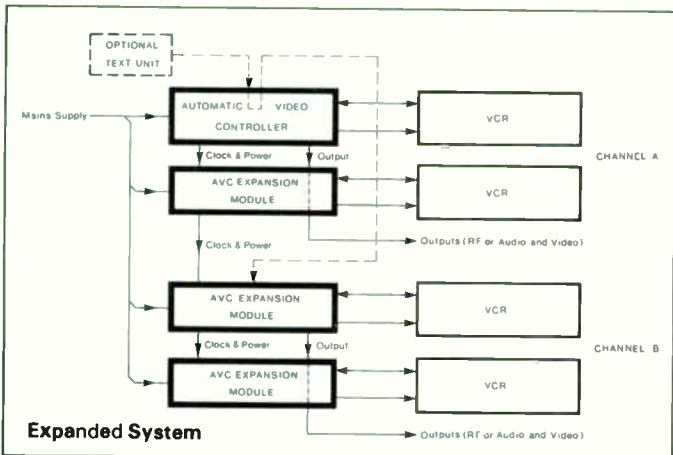

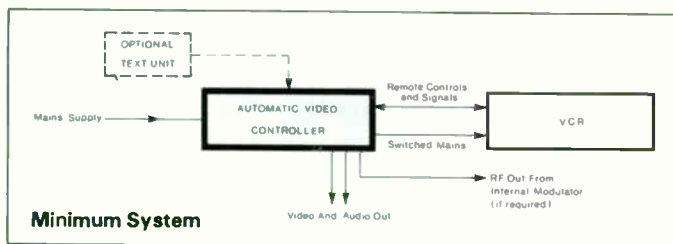

Each play is started by the clock, stopped and rewound automatically or each play is continually repeated after rewind.

An optional text unit can be incorporated to display text between video programs

### Expanded System

This system shows two channels with two VCRs per channel. Within each channel, automatic changeover occurs from one VCR to the other.

The two channels can be played completely independently. When each VCR has finished playing, its mains supply is switched off automatically. The maximum expanded system can control 6 VCRs.

## Specifications

### Inputs

- VCR Video:** 1V p-p, 75 ohm BNC
- Text Video:** 1V p-p, 75 ohm BNC, switched loopthrough
- VCR and Text Audio:** -5dBm / > 10K ohm, unbalanced, phono

Note: In some configurations text input is output from previous module.

### Outputs

- Video:** 1V p-p, 75 ohm, BNC
- Audio:** -5dBm, unbalanced, phono
- RF (only if mod. used):** Nominally channel 30 to 39 (adjustable, 3mV, 75 ohm)

**Remote:** Lead supplied to suit customer VCR model used

### Power

**Voltage:** 220VAC to 240VAC, 50/60Hz (110V/120V on request)

**Consumption:** 12W (24W with three VAC Expansion Modules)

### Control Clock

24 hour format with day of week, 20 memories, 4 independent outputs, battery back-up for 12 hours

### Dim.

### (HxWxD) & Weight

- Auto Video Cont.:** 87 x 440 x 330mm, 6.5kg approx.
- AVC Expansion Module:** 45 x 440 x 330mm, 4.5kg approx.

# DIGITAL EFFECTS SYSTEMS/ EDITING SYSTEMS

## MS101 (Maurice Minor) Zoom Effects Controller

Consists of:

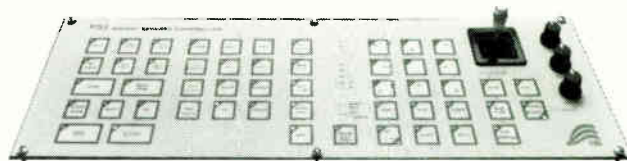

P147-30 TBC/frame store synchronizer with NDS filter

P148/1 Serial interface with key combiner (DKC)

P153 Touch pad controller

• Joystick • Zooms • Folds • Slides • Reveals • Moves • Quarters  
 • Montages • Pixellation • False coloring • Posterization • Adjustable  
 move speed • Remote control of framestore setup

MS101 ..... \$11,995.00

P153

## MS102 (Maurice EFX-II) Single Channel Zoom System

Consists of:

P147-30 TBC/frame store synchronizer with NDS filter

P148/1 Serial interface with key combiner (DKC)

P152 "Maurice" touch screen controller

Software disk program

• Zoom • Flip • Tumble • Border • Variable aspect ratio • Slide • Joy-  
 stick positioning • Montage • Pixellation • False color • Quantization  
 • Programmable moves • Updatable disk based software

MS102 ..... \$17,750.00

P152

## MS203 (Maurice EFX-III) Dual Channel Zoom System

Consists of:

(2) P147-30 TBC/frame store synchronizers with NDS filters

P148/2 Serial interface with key combiner (DKC)

P152 "Maurice" touch screen controller

Dual channel software disk system

• Push on/off • Reveal/conceal • Digital effects on both channels si-  
 multaneously • Up to 8 video inputs with optional P169V routing  
 switcher • Built-in dual key combiner with software controlled priority

MS203 ..... \$27,750.00

P148

## MS304 (Maurice EFX-IV)

### Dual Channel Zoom System with Mix Effects

Consists of:

(2) P147-30 TBC/frame store synchronizers with NDS filters

P148/3 Serial interface with mixer (SEG)/combiner (DKC)

P152 "Maurice" touch screen controller

Dual channel software disk program

• Mix • Fade • Wipe • Internal color matte generators • Multi-level  
 keying all under software control • Vignette of color matte • High  
 grade internal SPG • Programmable mix, fade and wipe

MS304 ..... \$29,990.00

P147-30

## Eric Editing System

• Expandable from basic 2 machine to 12 and beyond • Usable with  
 most VTRs/VCRs and other machines in any mix • Comprehensive jog/  
 search/cruise control of all machines • Frame accurate and full color  
 framing • Split audio facilities with auto fade • Integrated with CEL  
 Maurice system effects • Three external GPIs as standard • Edit list  
 management options • Easy trim functions • Auto preview, replay, re-  
 turn, tag, match tag, go to, timecode burn-in, readers and generators,  
 dub facilities, laser disk controllers, etc.

P158 Basic 3 machine control ..... \$3,500.00

Used with existing EFX systems

Controlled by Maurice (P152)

Eric System — Consists of P158 and P152 controller ..... \$7,995.00

## Upgrades

EFX I to MS101 (Maurice Minor) ..... \$ 4,990.00

EFX I to MS102 (EFX-II)

Includes NDS filter ..... 9,995.00

EFX I to MS203 (EFX-III)

Includes 2 NDS filters and key combiner (DKC) ..... 20,495.00

EFX I to MS304 (EFX-IV)

Includes 2 NDS filters, mixer and key combiner (DKC) ..... 21,995.00

MS101 to MS102

Includes NDS filter ..... 7,495.00

## MS101 to MS203

Includes 2 NDS filters and key combiner (DKC) ..... \$18,525.00

## MS101 to MS304

Includes 2 NDS filters, mixer and key combiner (DKC) ..... 20,945.00

## MS102 to MS203

Includes additional NDS filter and key combiner ..... 12,775.00

## MS102 to MS304

Includes additional NDS filter mixer and key combiner  
 (DKC) ..... 15,140.00

## MS203 to MS304

Includes mixer ..... 5,240.00

## Up-Grades Editing Systems with Effects Systems

### Eric System to MS102

Eric Editing System Plus

P147-30, P148/1 and software

disk program ..... \$15,375.00

### Eric System to MS203

Eric Editing System Plus

(2) P147-30, P148/2 and software disk program ..... 26,375.00

### Eric System to MS304

Eric Editing System Plus

(2) P147-30, P148/3 and software disk program ..... 28,840.00

# VIDEO PRODUCTION SWITCHERS

## Series 90 Video Production Switchers

- Illuminated pushbuttons
- Unique sequential effects (SFX) processing
- Greater flexibility plus simpler operation
- Modular construction
- Full range of options
- High performance, high stability
- Available for PAL, PAL-M, NTSC

The Series 90 range represents a great advance in the field of video production switchers. Based on the SFX (Sequential Effects) group, the range offers flexibility and ease of operation.

The Series 90 and its SFX group were made possible by the development of processing and control, resulting from a complete reappraisal of the uses of video switchers and the needs of operators of present day production techniques.

Conventional video switchers suffer from severe limitations when used in complex production sequences, and frequently the whole sequence must be planned in advance to ascertain the correct point of entry into the sequence. Even with the pre-planning, some simple sequences are impossible on conventional switchers, because a "lock-out" situation is reached. A single SFX group can perform sequences impossible on even a triple Mix/Effects conventional switcher. Pre-planning is generally unnecessary, and "lock-outs" are impossible.

Three models of the Series 90 are offered, but modular construction of both electronics and control panels permits a high degree of flexibility in the choice of each system. This arrangement also enables plug-in installation by customers of additional facilities as required.

The Series 90 employs the latest techniques of circuitry and construction to ensure the highest standards of performance, stability and reliability. Each unit of the electronics is internally timed, so there are no heavy and bulky delay cables—a particular asset for mobile van installations.

## SFX Mode Module

(Part of each SFX group)

This module, shown above, provides selection of the operating mode of the SFX group.

The following controls are provided:

**Key 1 Mode Controls:** A set of five momentary action pushbuttons to select the mode of operation of Key 1. Key, Matte Key, Non-Additive Insert, Spotlight, Split Screen.

**Transition Mode Controls:** Three pushbuttons to select Background, Key 1 and Key 2 Transitions. These controls may be either momentary or alternative action. (Selection is made in the electronics unit). Above the Key 1 and Key 2 buttons are LED indicators to show when these key levels are on air.

**Matte Controls:** Three potentiometers to provide control of Hue, Saturation and Luminance of the internally generated matte signal. (An optional dual matte generator allows two separate matte signals, matte 1, matte 2, to be used simultaneously in Key 1 and Key 2. When this option is fitted, the matte controls on the SFX module are not installed.)

**Split Screen Controls:** These controls adjust the size of the split screen and the width of a border around the split screen. The size control also adjusts the size of the pattern when spot is selected.

**Fader Handle:** Used to effect dissolve or wipe transitions. Indicators are provided to show the current direction of travel.

**Mix/Wipe Controls:** Two momentary controls to select the type of transition controlled by the fader.

**Cut:** Provides an immediate cut to the effect(s) selected on preview.

**TR/PV:** Operation of the TR/PV button allows previewing of a transition without affecting on air signal.

## Series 90 Standard Modules

### Key Mode Module

(Part of each SFX group)

This module provides selection of key sources, masking, level and softness controls for the two key processors of the SFX group. Controls are also provided for the Dual Key Border Generator, which is a plug-in option to the SFX group.

The following control groups are provided:

#### Key 1 Source Controls

**Note:** In all of the modes of Key 1, except Matte Key and Spotlight, the key is filled with the video from the foreground bus.

**F** Momentary action switches select the signal to be used for UTIL keying from either the foreground or utility buses, or

**EXT** from an external input.

**RGB** Momentary action switch select the key signal from the optional RGB Chroma Keyer.

# CENTRAL DYNAMICS LTD.

147 Hymus Blvd.  
Pointe Claire, Quebec CN H9R 1G1  
(514) 697-0810

# VIDEO PRODUCTION SWITCHERS

## Series 90 Key Mode Module (Cont'd)

**ENC** An alternate action switch. When enabled, the keying signal is derived from the encoded chroma keyer incorporated in the SFX group. The signal video input to the keyer is selected by the F, UTIL, EXT buttons. ENC is cancelled by depressing the button a second time, or by selection of RGB.

**INV** An alternate action switch which causes the selected key signal to be inverted.

### Key 2 Source Controls

**F** Momentary action switches select the signal to be used for keying from the foreground or Utility busses, or from the external input. In all of these modes, the key is filled with the output of the color matte generator. With the optional Dual Matte Generator Key 2 may be filled with video from the Utility bus.

**RGB** Momentary action switch select the key signal from the optional RGB chroma keyer. In this mode the key is filled with the video from the Utility bus.

**C/GEN** Momentary action switch. Separate key and video fill signals are accepted from an external character generator

**INV** An alternate action switch which causes the selected key signal to be inverted.

### Level and Softness Controls

Two pairs of potentiometers provide control of the key Level (clipping level) and Softness for Key 1 and Key 2.

### Key 1/Key 2 Mask

An alternate action pushbutton enables a rectangular mask for Key 1 and Key 2 processing. A toggle switch assigns the rectangular mask to Key 1, Both, or Key 2. Four potentiometers provide full independent control of position for the four sides of the rectangle. When the mask is enabled, a brightness change on the preview output displays the masking area to permit accurate adjustment. Keying is inhibited outside the preset rectangle. A toggle switch inverts the mask i.e. —keying is inhibited outside the rectangle.

Masking of Key 1 may also be independently performed by patterns derived from the Wipe Mode Module. This function is enabled by the simultaneous operation of the KEY and S/SCN switches or MATT and S/SCN switches on the SFX mode module. When this function is enabled, a brightness change also displays the masking area in the preview output. Key 1 may be simultaneously masked by the S/SCN-KEY or S/SCN-MATT selection and by the Key Mode module rectangular MASK selection.

## Key Border Controls (Optional)

Note: These controls are operational only when the Optional Dual Key Border Generator is fitted to the SFX group. This option also includes 1 or 2 line key borders.

A toggle switch assigns border selection to Key 1, or 2, or both, and all borders may be single or double width.

Note 1: Different color and key border modes can be assigned to Key 1 and Key 2.

Note 2: 1 or 2 line borders are selected by successive depressing of the BLACK, WHITE or COLOR pushbuttons.

**BLACK** Black all around borders.

**WHITE** White all around borders.

**COLOUR** All around borders, filled with the output of the matte generator, phase shifted by 180 degrees. This facility permits colored borders around a color matte title with minimum chroma crawl effect.

**OFFSET** An alternate action switch which displaces the border to the right and down, giving a 'drop shadow' effect.

**OUTLINE** The border only is displayed (black, white or colored, as selected).

**OFF** No border.

## Wipe Mode Module

(Part of each SFX group)

This module provides basic pattern selection and multiplication, wipe direction and edge controls, pattern modulation and positioning. The controls are also used for the SPLIT SCREEN mode of Key 1.

### Wipe Direction

Three pushbuttons provide selection of N (normal) N/R (normal/reverse) and R (reverse) direction.

### Wipe Edge Controls

Two pushbuttons provide selection of hard or soft edge wipe. A potentiometer controls the degree of softness. This button also enables the border for the SPLIT SCREEN mode of Key 1.

An alternate action pushbutton selects a wipe border, which may be used in conjunction with hard or soft wipes. The border is filled by the matte generator and a potentiometer controls the width of the border.

### Pattern Selection

A group of nine pushbuttons select the basic patterns. A symmetry control is provided for the box, diamond and circle patterns.

### Pattern Multipliers

Two pushbuttons 'X H' and 'X V' allow multiplication of the selected pattern by four horizontally, or vertically, or both. When the positioner is turned On (NORM), the multiplication ratios (horizontal and vertical) may be varied by moving the positioner.

### EE

This pushbutton selects the output of the optional Extended Effects Generator in place of the standard patterns.

# CENTRAL DYNAMICS LTD.

147 Hymus Blvd.  
Pointe Claire, Quebec CN H9R 1G1  
(514) 697-0810

Series 90  
Extended Effects Generator

## Series 90 Extended Effects Generator (Cont'd)

### Orientation Controls

Four pushbuttons select the orientation of start point of the selected rotary wipe. The same controls may be used to determine the resolution of the matrix wipe patterns (4x3, 8x6, 16x12, or 32x24), and to select normal or alternate pattern, and spin facilities on the non-exclusive patterns.

### Non-Exclusive (White Buttons)

These patterns are used in exactly the same way as those of the SFX pattern generator. They can be controlled independently by both SFX faders and can be used as split screen patterns.

Normal and alternate pattern selections are available from each button, and these patterns may be used as spin wipes.

### Pointer

Four pushbuttons control the direction of the pointer. This effect is available as a key input to each SFX group and is totally independent of all wipe functions.

These same controls are also employed to select the operational mode of spin wipes. Wipes may spin at a constant rate (free), or may rotate according to the fader arm motion (lock), or may not spin, but have their orientation changed (angle).

(A similar generator is available as a free-standing model for use with any production switcher.)

### Positioner

The positioner always controls the position of the pointer. The positioner on/off switch enables positioner control of the star and rotary patterns.

### Modulation

Modulation from the selected SFX group is available for all wipes (except matrix) and is controlled by the modulation on/off switch. When using an exclusive pattern it is possible to perform an unmodulated wipe to a modulated split screen.

NOTE: A second Extended Effects Module may be installed on 1090 so that each SFX has exclusive use of extended effects.

## Digital Video Effects Interface

Each SFX provides, as a standard feature, outputs for key and wipe signals used by digital effects units. A video input for the digital effects unit may be provided by either the utility bus, an auxiliary bus of the Series 90 1090, or by an optional auxiliary bus.

The DVE Key output is usually made available to the switcher as one of the inputs of an RGB output switching system (in place of one of the chroma keys).

Consult CDL's Marketing Services office for application information and details for interfacing to particular digital effects units.

# VIDEO PRODUCTION SWITCHERS

One Bus Quad

## One Bus Quad

This module provides quadplexer effects for all Series 90 switchers.

There are 5 selectable patterns which produce a composite picture derived from either 3 or 4 sources selected from 10 available video input signals.

The 5 patterns include 2 rectangular quad splits, 1 diagonal quad split, and 2 "Y" splits.

Patterns can be positioned horizontally and vertically, and edges may be soft bordered and colored.

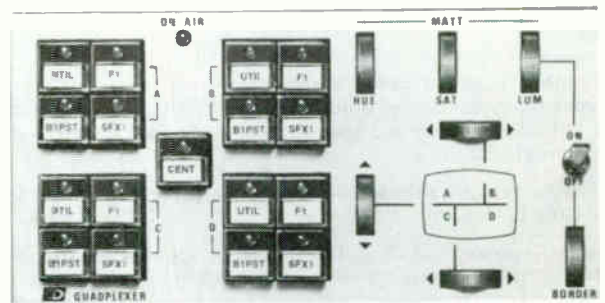

### Other Features

Quadrant preselections can be aired simultaneously or in any sequence.

Quad output can be fed to another switcher input not used for Quad inputs.

Quad color border matte can be fed directly to the 10<sup>th</sup> input and used as a quadrant fill. It is 180° out of phase with the border matte and can therefore be used when colorizing pattern borders.

(Also available as a free-standing VQ2170 model for use with any production switcher.)

## Quadplexer

This module provides "Quad Split" facilities, with SFX re-entry, and can be fitted to 690 and 1090.

A 4x4 input switcher allows selection of sources to the four corners of the split. The four sources provided are normally the utility bus, the SFX 1 foreground and preset background buses and the output SFX 1 (utility 2 replaces preset background on 1090).

Three potentiometers provide control of the horizontal split position, and independent control for the two vertical splits. These controls are disabled if the alternate action "Center" control is operated. In this mode, the Quadplexer provides a conventional quartering of the picture area.

A border of variable width is enabled by a toggle switch, and the integral Border Colorizer provides a color matte output to fill the border.

Special configurations using auxiliary buses allow a greater range of effects to be entered into the Quad. Contact CDL Marketing Service for details and recommendations.

# CENTRAL DYNAMICS LTD.

147 Hymus Blvd.  
Pointe Claire, Quebec CN H9R 1G1  
(514) 697-0810

# VIDEO PRODUCTION SWITCHERS

Title Keyer

## Series 90 Title Keyer

This unit is designed to key color matte titles in program video. A Key Border module is fitted to provide a variety of edging effects. One or 2 line key borders are standard.

The unit accepts the following inputs:

Input video  
Color black

For Key signal inputs. (One input may be strapped to accept separate feeds of key and video from a character generator.)

The internal color matte generator is locked to the incoming video, and no pulse feeds are required. An output of separated syncs is provided, and if this feed is used to drive a caption camera or character generator, this unit may be used to title over non-synchronous sources. Keying is inhibited if the selected key signal is not synchronous with the video.

### Controls

**Pushbuttons:** Illuminated

**Matte Controls:** Hue, Saturation, Luminance

**Key Border Controls:** Border on/off; Outline (the border only is displayed). Offset (the border is displaced to the right and down to give a drop shadow effect).

1 or 2 line borders are selected by successive depressing of the On, Outln or Offst pushbuttons.

**Key Source Controls:** 1, 2, 3, 4. Key input 1 is normally fed from the utility bus of the switcher for maximum flexibility. Input 4 may be strapped to accept separate key and video from a character generator.

**Title Fader:** Allows the title to be faded into or out of the program video.

**Title In/Out:** Allows the title to be cut into or out of the program video.

**Master Fade:** Fades the output of the keyer to black, and can be used with synchronous or non-synchronous video. A cut to local color black will occur at the end of the fader travel.

**Key Level:** Adjusts the "clipping level" of the keying circuits. Softness is preset to minimize edge crawl effects.

**Border Fill Controls:** The border is filled with the output of the matte generator, phase shifted by 180°. This permits color edges to colored titles with minimum crawl and differential saturation effects. Separate saturation and luminance controls are provided for the border signal, and permit black, white, gray or colored edges to be selected.

**Preview:** Three outputs of the preview signal are provided. This always displays the title keyed into the video, irrespective of the settings of the faders and in/out controls.

(Also available as a free-standing DK 2160 model for use with any production switcher).

Auto Transitions

## Auto Transitions

Smooth, accurate transitions can be made for each SFX and the Program Processor Amplifier. Rates from one frame up to 999 frames can be selected. A transition can be stopped and restarted at any time.

Audio Follow Switcher

## Audio Follow Switcher

Either mono or stereo systems may be installed in any Series 90 switcher.

The system includes an 8 x 2 audio switching matrix for dissolve, fade-to-silence and A/B/output switching. The two audio buses follow the program background and preset background buses of an SFX.

There are 3 control modes: Manual, Editor and Follow Switcher.

In the Follow Switcher mode, independent selection is provided for Follow Crosspoints and Follow Faders. When Follow Fader is selected, the dissolve will follow the SFX fader when a background transition is performed. The fade-to-silence follows the fade-to-black of the Title Keyer (when this option is installed).

NOTE: Title Keyer facilities are standard on 690 and 1090.

The system includes a 4" x 8" control panel (standard Series 90 Switcher Control Panel Module) and Rack Electronics (6 RU).

## Utility and Auxiliary Buses and Re-entry

A variety of options are available for installing buses to a Series 90 Switcher.

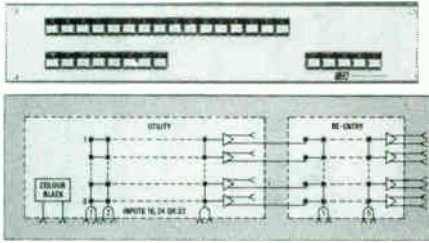

**4800 Series Buses** may be added to the basic switcher electronics; i.e., additional rack space is not required. Models are available with primary only inputs, primary and secondary inputs, and timed to the switcher output or untimed. The following number of buses may be added to Series 90 Switchers, 2 to 690 and versions of the 1090 may have up to 6.

# CENTRAL DYNAMICS LTD.

147 Hymus Blvd.  
Pointe Claire, Quebec CN H9R 1G1  
(514) 697-0810

# VIDEO PRODUCTION SWITCHERS

UM8

AM2

## Utility and Auxiliary Buses and Re-Entry (Cont'd)

UM8 and AM2, 8 and 2 Series Bus Expansion Systems may be added to Series 90 switchers to provide timed (UM Series), or untimed (AM Series) buses. They may also be used for general purpose vertical interval switching. The UM Series includes primary and secondary inputs. The AM Series has only primary inputs. These systems require additional rack space.

RGB Chroma Key Systems

## RGB Chroma Key Systems

The RGB chroma keyer developed for the Series 90 Switchers is designed for optimum performance under a wide range of keying conditions. Controls are provided for Hue selection and "Separation" of the keying signal, and shadow level. The shadow output is used to modulate the background signal to obtain realistic shadows in the keyed composite.

NOTE: The shadow facility is only available on Key 1 of the SFX group. Selection facilities can be provided for input or output of the chroma keyers.

1) For a single chroma keyer, a 6 x RGB input selector is available. For two chroma keyers a dual 6 x RGB input selector is available (See Figure 1).

2) For greatest flexibility, one chroma keyer per RGB source (up to a maximum of six) may be fitted, together with 6 x 2 output selectors. A 6 x 1 or 6 x 2 shadow output selector may also be provided, as appropriate (See Figure 2).

Both of these systems are controlled by the RGB Key Select panel, fitted with the correct number of switches. Each selector may be switched to any of the RGB sources (1-6) or to follow the selection of the appropriate foreground video.

For 690, a special 4 x RGB Follow Only Input Selector is available as an option. Either a single or dual version can be installed in the switcher rack electronics. (No additional rack space is required).

Figure 1. Input Switching System

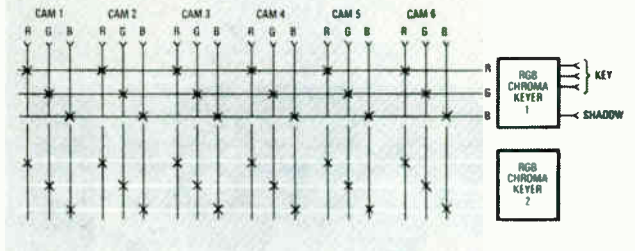

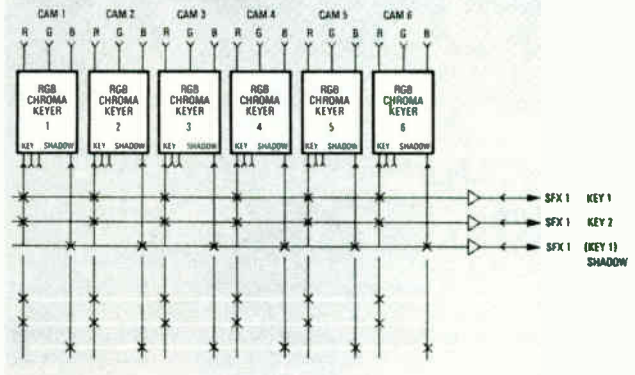

Figure 2. Output Switching System

## Special Chroma Keying Systems

Two systems are available for cameras which produce preprocessed single line key signals, rather than RGB, and can also be used to select key signals from digital video effects units. The systems provide manual/follow switching of the key signals.

Encoded Chroma Keyers

## Encoded Chroma Keyers

Encoded chroma keyers may be fitted to each SFX amplifier. The standard option is a one line delay type keyer and does not affect systems timing. "Zero delay" encoded chroma keyers are also available for the most critical application.

## Edit Controller Interfaces

All Series 90 Switchers are designed to be controlled by video tape edit controllers.

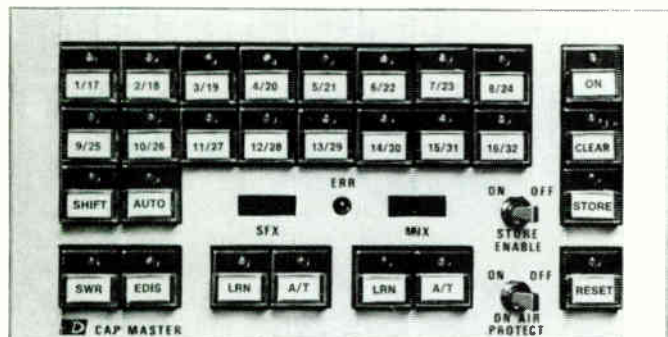

In some cases, the edit controller manufacturer supplies the interface; in others, CDL supplies the interface.

Consult CDL's Marketing Services for application information and details for interfacing to a particular editing system.

# VIDEO PRODUCTION SWITCHERS

CAP Master

CAP Slave

## SFX/MEM (CAP)

### CAP Features

- Can be added to any Series 90 production switcher
- Memorizes all crosspoint selections, mode selections and potentiometer settings for a complete Series 90 SFX processor system
- Effects dissolve dynamically transfers static analog potentiometer settings from the setup of one event to a second event, over a period of time defined by the Auto Transition Module
- Integral memory for 32 or 64 switcher setups
- Ten minute memory for all Learn events; 120 sec. Learn duration for any single event
- Memorizes auto transition rates
- Instantaneous random access to any event
- Event editing permits changing contents of any event, such as a transition, without affecting the switcher setup
- Permanent storage of memory contents on optional floppy disk

CAP is the advanced technology Computer Assisted Production option designed specifically for Series 90 video production switchers.

The Series 90 lends itself to Computer Assisted Production due to the unique design of its SFX amplifier which permits extremely complex production sequences to be performed with one fader handle.

CAP is an invaluable aid to fast moving production sequences.

Complex scenes involving multiple sources, keys, SFX amplifier mode, etc. can be preloaded into CAP's memory, and recalled randomly or sequentially, and accurately executed during real-time production.

This gives the operator full control of the dynamic transitions necessary for artistic expression and the desired effect.

Full manual control of all functions is maintained to allow last minute manual overrides of any CAP selection.

### CAP Models

The CAP Master can be used with any Series 90 switcher. CAP Slave can only be used with 1090.

Switchers with one SFX System require only the CAP Master Module.

Switchers equipped with two SFX Systems normally use both Master and Slave Modules. If only CAP Master is supplied, then selection of CAP control for either SFX-1 or SFX-2 must be specified on order.

When CAP Slave is supplied, the Master Module controls SFX-2 and the Slave Module controls SFX-1.

### Floppy Diskette Option

The diskette and its Control Module permit the stored events in CAP to be transferred off-line to a diskette. The diskette can be filed for later use, or sent to another production center equipped with a Series 90 CAP.

Data from CAP Master and CAP Slave Modules can be quickly stored on the diskette, and retrieved, with the operation of two pushbuttons.

The Slave panel is identical to the Master except for two keys. Because the Slave Module is used only for the SFX-1 Processor System, the MIX-LRN and A/T functions are replaced with Slave and Free. The Slave key either "ties" the Slave Module to the Master or permits it to operate independently.

When the two modules are used independently, CAP has a capacity of 64 events with information for different sections of the switcher. When "tied" the capacity is 32 events, with each module containing information for the entire switcher.

### Operation

The two basic operation modes are storing and recalling events manually or automatically.

To use CAP the following simple steps are performed:

1. Set up the switcher for an event's sources, keys, effects, etc.
2. Store the event information in the CAP memory.
3. Repeat steps 1 and 2 for each new event, or recall an event to reset the switcher to that previous event setup.

The following types of events are easily handled by CAP:

- Switcher status (SWR)
- Auto transition rates (A/T)
- Fader Learn (LRN)
- Simultaneous auto transition from one set of analog values to another, excluding fader values (E DIS)
- A combination of the above

Each CAP control panel has two 4-character information displays and control keys with status indicators. The keys are used for:

1. Event selection for the current production sequence (Numeric keys with/without shift)
2. Select switcher sections that are to be memorized: SWR, E DIS (Effects Dissolves), SFX-LRN (Learn), MIX-LRN (Master Mix Learn), and Auto Transitions (A/T)
3. Mode Controls: Auto, Reset, Store Enable, On-Air Protect

### Installation

CAP Control Modules are mounted on panels which can be installed into spare 4" x 8" switcher panel slots, or in a matching switcher extension tub. Control panel extension is always required if the floppy diskette option is to be fitted. All CAP models can be added to any installed Series 90 switcher.

### Note

- 1) Title Keyer and Fade-to-Black facilities are standard on 690 and 1090 and are integral to the Program Processor Module.
- 2) Two Extended Effects Generators may be installed on 1090. (One assigned to each SFX.)

### Typical Specifications

#### Video Inputs

16, 24 or 32 inputs, 1V p-p synchronous or non-synchronous.  
75 ohm loopthrough: return loss > 40dB to 5MHz

#### Video Outputs

2 Program outputs  
2 Preview outputs (Utility/Preview)  
1 Auto preview output for each SFX group.  
All outputs are 1V p-p composite; return loss > 34dB to 5MHz

#### Pulse Inputs

All are 75 ohm loopthrough, 2V p-p or 4V p-p  
Sync  
Blanking  
Burst Gate (PAL only)

#### Subcarrier Input

75 ohm loopthrough: 1V p-p or 2V p-p

#### Frequency Response

1-5MHz  $\pm 0.1$ dB  
5-7MHz  $\pm 0.2$ dB -0.5dB  
Steady roll off above 7MHz

#### K Rating

$K_p \frac{1}{4} \% K - K_p - b \frac{1}{4} \% K - K_b \frac{1}{2} \% K$

#### Linearity:

> 1% 10-90% APL

#### Tilt

Line and field (standard window)  
< 1%

#### Chrominance/Luminance Inequalities

Gain: < 1%  
Delay: < 10ns

#### Non-Linear Distortion:

(10-90% APL)  
Dynamic Gain: < 1%  
Diff. Gain: < 1%  
Diff. Phase: < 1°

#### Crosstalk:

One adjacent input hostile.  
All paths energized except path under test > -56dB

#### Path Delay, typical:

690: 350ns  
1090: 600ns

#### Path Length Inequality:

< 1° at subcarrier frequency

#### Signal-to-Noise Ratio:

> 60dB unweighted relative to 0.7V

#### Power Input:

(50/60Hz) 117V  $\pm 10\%$  - 234V  $\pm 10\%$

#### Power Requirements, typical:

690: 550VA  
1090: 900VA

#### Tally Outputs:

Two independent tally outputs are provided, each providing one "make" contact to a common for each input. Contact rating 2A, 40VA resistive

#### Permissible Ambient Temp. Range:

0-50°C

Within this range the performance specification will be maintained for changes of  $\pm 10^\circ\text{C}$ , about the ambient temperature at which the equipment was set up

#### Standards:

Switchers can be supplied for NTSC, PAL, PAL-M operation. Please specify at time of order.

# SIGNAL DISTRIBUTION SYSTEM

## SDS-2 Signal Distribution System

**System Architecture...**the basic system's architecture is a modular straightforward simplistic design to assure extremely high performance and reliability regardless of system size.

**This design approach also provides:**

- Flexibility...microprocessor controlled and 4 levels of switching
- Extremely Hi-Density 2048 crosspoint array
- Expandable...from 32 x 32 up to 512 x 512

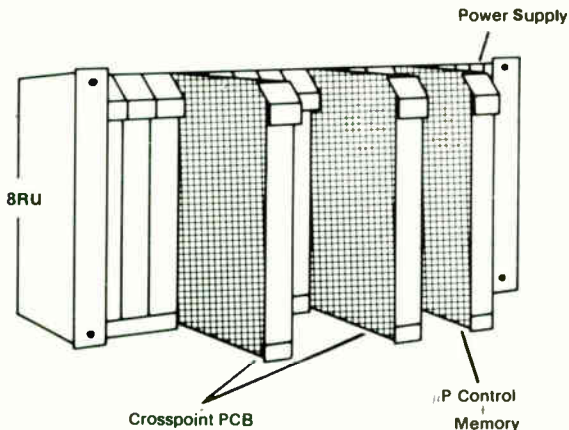

## RS-2000 Switching Array

RS-2000 Hi-Density switching array features the latest state-of-the-art circuitry and packaging techniques in the audio and video domains.

The basic RS-2000 Switching Array contains 2048 crosspoints, the control board, a power supply...all in a rack frame that is only 14" high and 15" deep...8 RUs.

The control board includes the master intelligence system that uses the Intel 8085 microprocessor which has the capacity and speed to control a system using more than one RS-2000 array. The power supply has the capacity to power any two RS-2000 frames; therefore, providing redundant power supply capacity.

RS-2000 Array

The basic array configuration is 32 inputs by 32 outputs and a variety of switching array types are available.

	64 x 32	32 x 32
Audio Only	X	
Data Only	X	
AFV		X
Dual Audio		X
Video Only		X
Video + Data		X
Audio + Data		X
Dual Data		X

The basic system is configured for up to 4 signal levels and any combination of the above arrays may be combined. As an example...a system could include 1 video, dual audio and 1 data level. The latter could be used for SMPTE Time Code, digital control signals or data lines connecting peripheral computer hardware to various host computer systems. All 4 levels can be controlled in a Follow mode or separately at the discretion of the user.

The SDS-2 has been designed to accommodate arrays as large as 512 x 512 with up to 4 levels.

**Examples:** Space requirements for SDS-2 systems using RS-2000 Hi-Density arrays.

32 x 32 AFV	8 RU	14"
64 x 32 Audio Only	8 RU	14"
<b>3 Level</b>		
64 x 32 AFV		
64 x 32 Audio Only	24 RU	42" (3 RS-2000 arrays)
<b>1 Level</b>		
96 x 96 Video Only	72 RU	126" (9 RS-2000 arrays) (Less than 2 std. racks)

## MicroPatch™ Control System

MicroPatch is the computer software operating program that puts the intelligence into SDS-2's control scheme. MicroPatch is highly sophisticated, flexible and includes a variety of software application programs.

**Among the programs included with MicroPatch are:**

- Salvo Take
- Security Loc
- System Alert
- MacroPath
- Quick Switch
- SysConfig

An exclusive feature of the SDS-2 MicroPatch control software is the ability to initiate up to eight Salvo Takes automatically using the systems on-board clock. This feature permits users to define various matrix configurations that are used on a daily basis and have the system select them at a predetermined time. Each of these Salvos can be of any size from one crosspoint to 512 crosspoints with all switches occurring in the vertical interval.

MicroPatch also includes Help and extensive Diagnostic software routines.

# CENTRAL DYNAMICS LTD.

147 Hymus Blvd.  
Pointe Claire, Quebec CN H9R 1G1  
(514) 697-0810

# SIGNAL DISTRIBUTION SYSTEM

## SDS-2 Signal Distribution System (Cont'd)

Diag. 1 is used for Microprocessor/Memory/Control maintenance. Diag. 2 tests the switching array(s) to verify that the routing switcher is operating properly. Individual crosspoints, tally, latches, all inputs to a specific output, a specific input to all outputs are all separate diagnostic routines...as is a check which cycles through all the crosspoints.

Self-Test routines are also included and are transparent to the operating system as are the other tests.

The above represent a sampling of the available programs. Software development will continue through Central Dynamics Computer Labs and a formal Central Dynamics Users Group. Testing, documenting and debugging will be conducted by Central Dynamics to assure that all programs developed by Users are compatible and available to other interested users.

MicroPatch also includes programs that permit communicating with the outside world. The ports are compatible with RS-422/423 and RS-232.

### Control Hardware

The control system is based on the Intel 8085 microprocessor which communicates to all control panels and switching arrays. The array's frame control board communicates to the matrices within the array. Example: If the array is configured into a 32 x 32 Video Only matrix and a 32 x 32 Audio Only matrix, the control board would talk to each path separately making it possible to independently control each half of the frame. This board also has sufficient RAM to store operating data so all the application programs can be executed efficiently; programs such as Salvo Take, Security Loc, etc.

Memory is also backed up with battery power that can protect the memory for a minimum of 15 days.

**MICROPATCH CRT STATUS DISPLAY**

A CRT control console is standard equipment and is used for defining the basic system operating parameters and as a master control center for the system. Besides providing control, it is used to monitor the status of all input and output signals. Other status displays include input and output Lock configurations and Salvo Take tables.

When installing the SDS-2 system, reconfiguring the switching arrays or expanding the system, the terminal is used to define the control panel types used, their priorities, and the basic system operating parameters, i.e., audio follow video, stereo audio, digital control, etc.

In addition to the CRT control console, the user may select any number of a wide variety of discrete and multi-function numeric or alphanumeric control panels...up to a maximum of 512. The panels communicate with the 8085 microprocessor via eight coax serial control loops.

### Video System

The SDS-2 switcher RS-2000 uses the latest state-of-the-art video switching technology. The basic design of the crosspoint is a high speed analog multiplexer developed by Central Dynamics expressly for the SDS-2. Each video crosspoint board contains 16 multiplexers; each one under microprocessor control. This permits selecting a crosspoint and receiving a confirming tally, via a return signal from the matrix, that verifies that the selected crosspoint is latched.

Each video input amplifier PCB contains 16 unity gain wideband video amplifiers that distribute each video signal to a maximum of 32 multiplexers. The video output card contains 16 video output amplifiers which receive outputs from a maximum of 8 multiplexers. The unique Central Dynamics designed output switching amplifier eliminates the requirement for "combiners" when expanding a SDS-2 system. This output switching amplifier concept permits expanding the inputs by simply connecting the output of each frame to the output of another frame...via a standard 75 Ohm coax cable.

This unique design not only reduces rack space when expanding, but assures maintaining and optimizing the system's signal distribution transparency and timing.

### Audio System

The SDS-2 utilizes a Central Dynamics design that closely simulates the characteristics of a manual patch panel.

This is achieved by processing all audio signals in a balanced configuration. Each input signal is routed through two separate, isolated input buffers; therefore, two parallel crosspoint paths.

All audio switching uses highly reliable, standard CMOS analog switches. Packaging design for the input crosspoints and output amplifier cards achieves the same density as the video matrix.

# SWITCHERS

## VAS-1010 Audio/Video Utility Switcher

### General Description

The VAS-1010 is a self-powered, modular utility switcher that features an advanced design video crosspoint and processing all audio differentially. The switcher is available in the following 10 x 1 configurations:

- Video Only
- Audio Only
- Audio Follow Video
- Audio/Video Breakaway
- Stereo Option

### Other Features

- Any of the configurations may be remotely controlled
- A switcher configuration may be upgraded in the field to a more sophisticated switcher. Example: A "Video Only" may be converted to an "Audio/Video Breakaway"

### Video System

The system is based on a 10 x 1 crosspoint matrix with loop through inputs. Each input has a sync tip clamped unity gain buffered stage. These 10 input amplifiers feed the 10 x 1 matrix which is switched during the vertical interval from a synchronous pulse derived from the selected video source. The matrix output feeds an output amplifier stage which features a  $\pm 2$ dB gain adjustment, a backporch clamp and drives two 75 ohm loads.

### Audio System

The system is based on a 16 x 1 analog switch, two of which are used for the 10 x 1 matrix. This design permits processing all audio differentially. The matrix output feeds the output stage which features a  $\pm 2$ dB gain adjustment and is capable of driving either two 150 ohm or 600 ohm loads.

### Video Specifications

#### Inputs

Number	10 loop through
Signal Level	1V p-p nominal, 2V p-p maximum
Impedance	75 ohm
Return Loss	Better than 40dB to 5MHz

#### Outputs

Number	2 internally isolated
Signal Level	1V p-p nominal
DC Level	Less than 50mVDC
Impedance	75 ohm; source terminated
Return Loss	Better than 40dB to 5MHz
Isolation	Better than 36dB to 5MHz

#### Performance

Gain	Unity, $\pm 1$ dB adjustable
Frequency Response	100kHz to 5MHz, $\pm 0.1$ dB 5MHz to 8MHz, +0.1dB to -0.2dB 8MHz to 10MHz, 0dB to -5dB
Differential Gain	Better than 1%, 10%-90% APL
Differential Phase	Better than 1°, 10%-90% APL
K Rating	Better than 0.2% kpb
Line Tilt	Better than 0.5%
Field Tilt	Better than 0.5%
Crosstalk	Better than -60dB referenced to 1V p-p at 5MHz
Signal-to-noise ratio	Better than 65dB
Path length uniformity	Less than $\pm 1^\circ$
Switching time	Vertical interval of fast selected output
Connectors	BNC, Inputs and Outputs

### Control System

The control system is contained on a PCB mounted to the front panel. It controls all audio and video crosspoints either separately or in the Follow mode. Two variations are available: (1) AFV that controls 10 pushbuttons and latches, (2) same as AFV PCB plus 2 additional and separate controls for audio and video breakaway pushbuttons and latches.

These panels can be removed by simply removing from the frame and mating with a supplied interconnecting cable. Also supplied is a blank panel to cover the front of the rackmounted frame.

The VAS-1010 is self-powered and can be operated on 110/220 VAC, 50/60Hz.

Connector panel on rear of VAS-1010 electronics frame

### Audio Specifications

#### Inputs

Number	10 balanced or unbalanced
Signal level	+8dBm nominal, +24dBm max., at 600 or 150 ohms

#### Impedance

Common mode rejection	Better than 70dB at 60Hz
Maximum DC level	$\pm 15$ VDC

#### Outputs

Number	2, balanced to ground reference
Signal level	+24dBm at 600 or 150 ohms
DC level	Less than 50mVDC
Impedance	Less than 50 ohms, capable of driving 150 or 600 ohm load

#### Performance

Gain	Unity, $\pm 1.5$ dB, adjustable
Frequency response	$\pm 0.1$ dB, 20Hz to 20kHz
Total harmonic distortion	Better than 0.1%, 20Hz to 20kHz at +24dBm

#### Crosstalk

Signal-to-noise	Better than 70dB, 20Hz to 20kHz
Connector	90dB referenced to 8dBm 37-pin-D, subminiature

## Video Duplikins For Economical 35mm Slide To Video Transfer

- Superior multi-element lens
- Slide holder providing vertical, horizontal and rotational adjustments
- Slide-in holder for 2 x 2 filters
- Hinged swing-away diffusion plate for even illumination
- Black anodized aluminum housing
- 2 focusing mounts for variable magnification, (2:1), and adjustable back focus
- Designed to work with many of the Sony, Sharp, Panasonic, NEC, JVC, Hitachi, etc. cameras. (Please specify camera model when ordering).

Video Duplikins let you incorporate 35mm slides into video productions in your studio without using costly transfer equipment. This stand-alone system easily attaches to the lens port of your 2/3", 3-tube or CCD professional camera. The Video Duplikin lets you control cropping or add effects filters to increase creativity.

## Periscope V16

- Highest professional optical and mechanical quality
- 1:1 Relay system. (Field of view same as for objective lens alone.)
- Accepts standard C mount lenses with adaptors to fit most professional 2/3" format lenses. Other lenses may be used with Century C-mount Adaptors
- Fast T3.2, f/2.5
- Accepts Century Interchangeable Mount System for use with most 2/3" three-tube and CCD video cameras
- Adjustable back-focus
- Custom systems available
- Weighs 2.5 lbs.

V16 Periscope establishes a standard in optical relay systems. Ideal for 2/3" three-tube and CCD cameras, the lightweight and economical V16 promises to get into tight corners, up to new highs and down to new lows, increasing the effectiveness of your shots.

Century Periscopes require Interchangeable Camera Adaptors (TM Series).

PR-1125	Periscope V16, with case. Accepts C mount lenses directly and Century C Mount Adaptors	.....	\$3450.00
PR-1128	V35 Periscope, with case. Requires Periscope Interchangeable Lens Adaptors	.....	6750.00

\* Above Values are relative to VHS and Beta reference specifications.

### REFERENCE NOTES:

1. TAPE WIDTH — measured using a 20X profile projector.
2. YIELD STRENGTH — force necessary to produce a 5% elongation of the tape.
3. SURFACE RESISTANCE — electrical resistance of the tape per half inch square measured when 500V is applied between two metal electrodes.
4. COERCIVITY — is a measure of the magnetizing force required to record, erase, or otherwise cause a change in the remnant field strength of a magnetic tape.
5. RETENTIVITY — is a measure of the magnetic strength retained in a magnetic tape per unit magnetizing force.
6. SQUARENESS — is an index of the magnetic efficiency, and is a measure of particle alignment.
7. OPTIMUM RECORDING CURRENT — that current necessary to obtain the maximum playback output level from a reference tape on which a 4.0 MHz signal is recorded.
8. VIDEO RF OUTPUT — playback level obtained after recording a 4.0 MHz signal at the reference optimum recording current.
9. VIDEO SIGNAL-TO-NOISE — the difference in gray level from the

reference tape, after recording a 50% gray signal from the reference tape and then measuring the noise through a 10 kHz high base filter and a 4.0 MHz low base filter.

10. CHROMA OUTPUT — the difference between the playback output of a color bar test signal recorded on the test tape and the reference tape.
11. CHROMA SIGNAL-TO-NOISE — the difference in chrome level from the reference tape after recording a monochrome test signal and measuring AM noise through a 10 kHz high pass filter and a 500 kHz low pass filter.
12. STOP MOTION — capacity to withstand still picture degradation and is measured by observing a still picture stair-step signal for one hour.
13. AUDIO SENSITIVITY — the difference in playback output level between the test tape and the reference tape at 1 kHz.
14. UNIFORMITY — the variation in output within the tape expressed as the highest and lowest output levels.
15. ERASABILITY — the difference in playback output level of a 1 kHz signal recorded at 10dB over reference level & the residual playback output level of an erased portion.

# AUTOMATIC VIDEOCASSETTE CHANGER

## **BROADCASTER II™** **Automatic Videocassette** **Changer** **New and Improved**

### Features

- Random access of up to 15 videocassettes
- Total microcomputer control
- Easy 7-day programming with 100 events per day
- No VCR modification required
- Computerized stepper motor drive—indexing accuracy within 0.005 inch
- Minimal moving parts for high reliability and long service life
- Units may be cascaded for additional capacity
- Will play multiple sequential segments on each tape
- Built-in vertical interval switching
- Automatic switch to auxiliary source during cassette change
- Automatic record/delayed playback optional
- Optional electronic modules can add numerous features
- More cost-effective than multiple VCR systems

The Broadcaster II is a stand-alone, highly reliable videocassette changer mechanism. Totally microprocessor-controlled, the unit can randomly access from its internal storage trays any of fifteen standard  $\frac{3}{4}$  inch videocassettes.

The unit is designed to be used in broadcast television stations, CATV systems, LPTV studios, hospitals, schools, hotels, and other facilities where high quality video programming must be originated automatically on a pre-determined weekly time schedule. Available options allow the Broadcaster II to serve as a self-contained record/delayed playback system, a versatile editing suite library, or as part of an automated commercial insert system.

### System Operation

The Broadcaster II can randomly access from a library of up to fifteen standard  $\frac{3}{4}$  inch videocassettes, insert them into an unmodified Sony Type 5 videocassette machine (VCR), and cue the pre-encoded tapes automatically.

At an operator-programmed time, or upon receipt of a "start" command, the Broadcaster II prerolls the tape to speed and switches it on-air during the vertical blanking interval of network (or other "auxiliary" source) video. With a sync-locked VCR (Sony Type 5 equipped with a Channelmatic HANDIMOD I sync-lock accessory module), clean, glitch-free, broadcast quality video transitions occur.

At the end of the tape program, audio and video output are returned to the network or auxiliary source. The tape is rewound and removed (if so programmed) or simply removed in a "played" condition and replaced in its storage slot.

### Operator Programming

All system commands are microcomputer controlled and are entered by the operator on an integral display/keyboard module, the CCU-1A. A full seven day schedule consisting of up to 100 events per day may be entered by the operator at one time.

The 20-pushbutton keypad and large 12-digit LED display allow not only simple schedule entry, but quick and easy error checking, schedule editing (including event insertion or deletion), and the ability to copy entire schedules from day-to-day.

Events may be scheduled to occur at pre-determined times or as sequential occurrences. The operator may choose whether to automatically rewind individual videocassettes either before or after they air, or to rewind all previously aired videocassettes at the end of the programming day.

Additional scheduling functions allow audio/video switching, message generator page turning, and limited external equipment control.

### Videocassette Retrieval and Insertion

The Channelmatic Radial Retrieval and Insertion Mechanism (patent pending) has been designed for the utmost in reliability with a minimum of wear-prone moving parts. A computer controlled stepper motor working through a teflon-coated, hardened steel lead screw, maintains vertical drive to an accuracy of  $\pm .005$  inch. A special one-turn motor inserts and retracts cassettes.

The mechanical components contain no wear-prone gears, chains or belts and only minimal adjustments should ever be required. All sensors are a long-life infrared beam type, eliminating the need for micro-switches and their inherent adjustment problems.

Patent Pending

## **Broadcaster II™ (cont'd)**

### **Videocassette Machine Interface**

Videocassette machine installation consists of moving the floor of the mounting tray to the proper height corresponding to the particular model of VCR and sliding the VCR into the tray. A spring latch is then engaged, pushing the VCR into perfect alignment. No modifications need to be made to the VCR itself, and it is readily accessible for required routine maintenance and head cleaning.

### **Physical Attributes**

The Broadcaster II is mounted in an attractive steel cabinet which is casted for ease of movement and equipped with large front and rear doors for easy access to the mechanism and control panel. The front door is provided with a large plexiglas window for observation and interior lighting is standard.

### **Optional Equipment**

Options allow the Broadcaster II to perform such varied functions as DTMF tone decoding, built-in color message generation, automatic recording, and external VCR control. Two or more Broadcaster II units may be cascaded together for continuous programming. Other Channelmatic control, function and interface modules are available to adapt the Broadcaster II to perform many other desired functions.

- Automatic Sync Lock:** The Handimod I can be added to automatically sync lock the VCR, assuring broadcast vertical-interval switching.
- Video Monitoring:** A panel is provided for the addition of a 5" monochrome video monitor to allow monitoring of the system video output. Pulse-cross is also available optionally.
- Character Generator:** The CMG-3008A Color Message Generator module and related CSG-3001A Sync Generator module can be added to provide a built-in 8-page/8-line per page alternate video source to fill time during cassette change or to provide a backup in event of VCR malfunction.
- Tone Decoding:** Various tone decoder modules may be added to allow control of Broadcaster II to be initiated by tones fed through a telephone or other voice-grade audio path or by satellite service cue tones.
- Distribution:** Channelmatic 1x6 video, audio, and pulse distribution amplifier modules may be added to enable Broadcaster II to provide multiple isolated outputs.
- Cascading:** Two or more Broadcaster II units may be interfaced together electronically to increase the capabilities of the system.
- Backup Source:** The VPD-3001A Universal Signal Presence Detector module may be added to enable Broadcaster II to automatically switch to a secondary video source if output video is lost for any reason.
- Installed VCR:** An installed and tested Sony VP-5000 is optionally available.
- Record and Play:** Electronics may be added to enable automatic recording and delayed playback of programming.
- Balanced Audio:** The UAA-3031A audio amplifier module may be added to provide balanced audio inputs and outputs for broadcast interface.
- External VCR Control:** A VCR-3001 videocassette controller module enables an external VCR to provide fill programming during cassette changing.

### **Electronic Components**

All internal electronic components are mounted in a slide-out electrical enclosure for easy removal. Function modules are standard Channelmatic 3000 Series units, and all CCU-1A microcomputer components are 5000 Series units. These modules may be removed and replaced from the front of the unit without even removing the enclosure assembly.

### **Summary**

Field proven in many installations around the world, the Broadcaster II offers up to 15 hours of automatic programming without the need for operator intervention of any kind. The unit is an economical alternative to multiple videocassette machine sequencing systems of the same capacity. Full seven day scheduling ability makes the Broadcaster II a valuable addition to any television system.

### **Specifications**

- Inputs**  
**Video:** 1.0V p-p, 75 ohm terminated  
**Audio:** 0dBm nominal, 150 ohm unbalanced
- Outputs**  
**Video:** 1.0V p-p, 75 ohm  
**Audio:** 0dBm nominal, 150 ohm unbalanced  
**VCR Control:** Compatible with Sony Type 5 or Type 7 Series VCRs
- Power Requirements**  
**Operating:** 115VAC, 60Hz, 15A  
**Memory Backup:** Lithium Battery (built-in) maintains clock and program memory for 30 days without AC power applied
- Physical Size**  
**Height:** 51" (including casters)  
**Width:** 22.25"  
**Depth:** 38.5" actual (An additional 24" behind the cabinet and 48" in front of the cabinet are recommended for ease of operation and maintenance.)
- Floor Loading:** Approximately 167 psi at four caster contact points
- Tape Requirements:** Type KCA videocassettes (for Type KCS videocassettes equipped with Sony Type KA-1 adaptors or equivalent). Tapes must be pre-encoded with DTMF cues before use to permit automatic operation.

## **ATS-1A Automatic Tone Switcher**

### **Features**

- Microcomputerized DTMF Tone Decoder
- Programmable tone selection
- Front panel status indicators
- Vertical interval switching
- Low cost—highly versatile
- Maximum time override for reliability

The ATS-1A Automatic Tone Switcher is a fully automatic, microprocessor-controlled integrated circuit DTMF tone decoder and vertical interval audio/video switching system.

The unit decodes DTMF tones from a satellite channel, a local tone generator, or a standard dial-up telephone circuit when equipped with the optional built-in automatic answering device.

Upon receipt of the desired tone code, the ATS-1A automatically switches channel to audio and video to one of four sources such as satellite receivers, local character generators, or videocassette players. All switching is performed by integrated circuits and occurs during the vertical blanking interval for a clean, broadcast-quality transition. A time delay between the receipt of a valid tone code and the A/V switch may be easily programmed.

Operator programming of the microcomputer is accomplished by means of any standard 16-digit DTMF tone generator connected either directly or (optionally) via dial-up telephone line. Program memory is protected against periods of AC power outage by a 1.0 Farad capacitor.

The ATS-1A also features an open collector-type control output for each of the three auxiliary channels. The control outputs may be programmed for independent delay times.

The unit also accepts control inputs on four discrete lines which, when grounded, cause an immediate (or optionally delayed) vertical interval A/V switch to the associated input.

### **Specifications**

<b>Inputs</b>

# ROUTING SWITCHER

## AVS-10A PATCHMASTER™

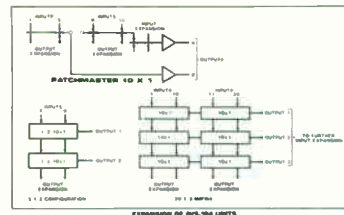

### Features

- Low cost, high performance
- Optional stereo switching
- High impedance, low capacitance bridging inputs
- Convertible 10 x 1 or two 5 x 1
- Vertical interval switching
- Integrated circuit crosspoints
- Secondary switching for input expansion
- Built-in audio termination block for easy audio impedance matching
- Dual-tracking power supply—short circuit proof and thermal protected
- Built-in lithium battery memory backup
- Local or remote control
- Illuminated field-legendable pushbuttons with replaceable lamps
- Expansion is possible to any practical input-output configuration
- Time-of-day clock controller available for preprogrammed real time switching

The Patchmaster is a broadcast-quality bridging audio-follow-video routing switcher which will satisfy a variety of switching requirements. Configured as a 10 input by 1 output switcher, the moving of internal jumper plugs converts the unit to two independent 5-input by 1-output switchers. By externally looping the input signals a 5-input by 2-output matrix is a third option. Switching is vertical interval as referenced to the output signal.

Both input and output expansion provisions are included in the switcher. The extremely high impedance, low capacitance bridging inputs cause negligible line loading, therefore, many switchers may be looped together for expansion to any desired number of outputs. Expansion in increments of ten inputs is provided with automatic secondary switching to eliminate crosstalk degradation.

Connections are also provided for remote switcher control. The combination of input/output expansion and remote control will satisfy many requirements where modular switch matrices are too complex and expensive. The switcher is housed in an attractive 1.75 by 19" rackmounting package and has an internal lithium battery, capable of maintaining switch memory for days. Large field-legendable illuminating pushbuttons are utilized and the lamps are easily replaced from the front panel. The switches are momentary and provided with electronic interlocking.

### Accessories

#### AVS-10AS

The AVS-10AS version offers two-channel audio for those installations requiring stereo or subcarrier audio capability.

#### ACP-10A and ACP-10AS

These accessories bring all audio, sync and control connections out from the rear panel of a Patchmaster switcher and put them on an expanded barrier strip panel for easy installation and movement of audio connections. A cable is included to facilitate panel mounting at the rear of a standard rack.

### Specifications

#### Video

**Inputs:** 10 or 5 x 2, plus expansion in increments of 10  
**Input Impedance:** High impedance looping, greater than 60K ohms  
**Return Loss:** Greater than 50dB at 5MHz  
**Input Level:** 0.5 to 2.0V p-p for 1V p-p output  
**Outputs:** 2 (10 x 1) or (each 5 x 1); 75 ohms source-terminated  
**Output Level:** 4V p-p maximum  
**Gain:** Factory set to unity; front panel adjustable from -6 to +12dB

**Frequency Response:** ± 0.05dB to 5MHz; ± 0.1dB to 10MHz

#### Worst Case

**Crosstalk Rejection:** Greater than 60dB at 3.58MHz  
Greater than 50dB at 5.00MHz

#### Adjacent Channel

**Crosstalk Rejection:** Greater than 65dB at 3.58MHz

**Differential Gain:** Less than 0.1%

**Differential Phase:** Less than 0.1°

**Tilt:** Less than 0.5%

**Hum and Noise:** Better than -70dB, referenced to 1V p-p output

#### Control

##### Inputs:

Parallel-type, logic level 0-12V; logic low activates switch, Resets others  
When switch is Set, set line is held Low for 12VDC 80mA lamp drive. Voltage supplied by AVS-10A  
Rear panel 25-pin male "D" connector  
Channelmatic model RCP-10A

##### Interface:

##### Remote Control Panel:

##### Audio

##### Inputs:

10 or 5 x 2, plus expansion in increments of 10  
High impedance balanced or unbalanced bridging, look ohms; internal termination block provided for low-impedance inputs

**Input Levels:** + 8dBm nominal, + 12dBm maximum

**Outputs:** 2 (10 x 1) or 1 (each 5 x 1); 600 ohms balanced

**Output Level:** + 19dBm maximum

**Gain:** Factory set to unity, front panel adjustable

**Frequency Response:** ± 0.05dB, 20Hz to 20kHz

**Crosstalk:** Greater than 70dB at 20kHz

**THD:** Less than 0.2%, 20Hz to 20kHz

**Hum and Noise:** Better than -70dB referenced to + 18dBm

##### General

**Size:** 1.75" x 19" x 8", rackmounting

**Power:** 120VAC, 60Hz

**Connectors:** Video—BNC

**Power Backup:** Internal lithium battery

## SAV-1A Stereo Audio/Video Distribution Amplifier

### Features

- Complete 6 output distribution of video and stereo audio
- Wide bandwidth integrated amplifiers
- Attractive self-contained package
- Front panel input and output test points
- Front panel gain adjustments
- Low cost—broadcast performance

The SAV-1A is a self-contained, broadcast quality video/stereo audio distribution amplifier providing six independent output channels.

The audio section provides six isolated stereo (twelve mono) 600 ohm balanced outputs from a single stereo (dual mono) high impedance bridging input.

The video section provides six independent source-terminated 75 ohm outputs from a single high impedance looping input.

Outputs are independent precision integrated amplifiers for accurate balance. Gain is adjusted with front panel 25-turn potentiometers. Input and output test points are also brought out to the front panel for easy initial adjustment and periodic testing.

The amplifier components have been specially chosen and the circuitry specifically designed for flat response, low distortion, maximum reliability and good long-term stability. The video amplifiers contain automatic DC offset circuitry to minimize output drift.

The unit contains an integral regulated power supply and is housed in a single 1.75 x 19" rackmounting package.

### Specifications

#### AUDIO SECTION

##### Inputs:

0dBm nominal, +8dBm maximum; transformerless 200K ohm balanced or unbalanced bridging (may be terminated in any desired lower impedance)

##### Outputs:

6 stereo (12 mono) 600 ohm balanced or 12 stereo (24 mono) 150 ohm unbalanced (half in-phase, half out-of-phase); Outputs may be terminated in any desired impedance higher than 150 ohms without affecting frequency response or distortion

##### Gain:

25dB, continuously variable from full Off with front panel control

##### Frequency Response:

± 0.5dB, 10Hz to 30kHz

##### Hum and Noise:

-80dB at 20dBm output

##### Output Isolation:

Greater than 50dB

##### Distortion:

0.1% or less

##### Connectors:

Barrier strips

#### VIDEO SECTION

##### Input:

0.5 to 2.0V p-p, 50K ohm looping

##### Outputs:

6, source terminated in 75 ohms, 3V p-p maximum output

##### Frequency Response:

± 0.1dB to 5MHz; ± 0.2dB to 10MHz

##### Diff. Gain:

Less than 0.1%, 10 to 90 APL

##### Diff. Phase:

Less than 0.1°, 10 to 90 APL

##### Tilt:

Less than 1% (DC coupled)

##### Hum and Noise:

60dB below 1V p-p output

##### Output Isolation:

Greater than 45dB at 3.58MHz

##### Connectors:

BNC

SDA-1A

## SDA-1A Sync Stripping Pulse Distribution Amplifier

### Features

- Looping Hi-Z input
- Built-in sync stripper
- Wide bandwidth integrated drivers
- 6 isolated 75 ohm source-terminated outputs
- Front panel input and output test points
- Attractive self-contained package

The SDA-1A is a self-contained sync stripping and sync pulse distribution amplifier with six source-terminated 75 ohm outputs and one high impedance looping input. The unit can take an input of composite video or sync and deliver six outputs of -4 volts of clean composite sync.

The SDA is ideal for locking videocassette machines to a video source for clean vertical interval switching. It is a great mate to Channelmatic's Universal Audio Amplifier when interfacing VTRs to a commercial insertion system.

### Specifications

<b>Inputs:</b>	0.5 to 8.0V p-p, 75K ohm looping
<b>Outputs</b>	
<b>Number:</b>	6
<b>Impedance:</b>	Source-terminated in 75 ohms
<b>Level:</b>	4.0V p-p, ± 5%
<b>Isolation:</b>	Greater than 35dB
<b>Tilt:</b>	Less than 1%
<b>Rise Time:</b>	Less than 250ns
<b>Propagation Delay:</b>	Less than 250ns
<b>Signal-to-Noise:</b>	Greater than 70dB at 4.0V p-p
<b>Power:</b>	115V ± 10%, 60Hz A/C
<b>Connectors:</b>	BNC
<b>Size:</b>	1 3/4" H x 19" W x 8" D

# PROGRAMMABLE CONTROLLER

## **PCM-3000A SUPERCLOCK Programmable Controller Module**

### Features

- Locator optional remote control
- Totally programmable operation
- Basic clock has 8 open collector (30V, 40mA sink) outputs (NC, NO, or pulsed)
- Expandable memory/expandable outputs
- Controls up to 99 functions at a single time and up to 10,000 devices
- Simple keypad programming with full editing capabilities and cursor prompting
- Attractive modular rackmount package
- Programming security built-in
- Provision for battery backup power
- Optional hard-copy printout
- Optional Telco remote control
- Optional custom software

The PCM-3000A Programmable Controller is a microprocessor-based 7-day clock module for the Channelmatic Series 3000 frame. It has a 1 min. resolution and a large memory for storage of program events. The system is bus-oriented and provisions are included for expansion of memory, input-output capability, and addition of a multitude of special control interfaces. The basic system has eight programmable closure-type outputs which can be preprogrammed to open or close on any desired weekly time schedule.

The PCM-3000A is designed to be used in any application where local or remote control of equipment is required on a 7-day schedule. By adding appropriate modules, it can be used to control almost any electrical or electronic device, including satellite receivers, videocassette machines, audio-video switchers, relays, IF switching, message generators, solenoids, motors, etc. A professional 80-column printer is also available for the PCM-3000A; it prints out the operator program and all events as they occur. By adding a TRC-3016A Transmit Modem option, the system can be upgraded to remote control a variety of functions over a standard telephone line or any voice-grade audio path.

A UAD-3000A Unattended Telephone Answering Device module and related CTD-3001A DTMF Decoder Module can be added to a clock-controller subsystem enabling it to be operated over standard telephone lines.

The PCM-3000A Clock-Controller must be initially programmed by the user. This operation consists of "loading" instructions into its random-access memory (RAM) which later are used by the microcomputer as a guide in giving proper commands to the peripheral equipment under control. This operator-program function is performed with the 16-button keypad and related 12-digit display while the unit is in the Program mode.

The multifunction 12-digit LED readout can be placed into any one of four display modes by pressing the appropriate pushbutton: in the Run mode, it displays the day, AM or PM, and the time; in the PGM mode, it displays the day, AM or PM, the time or a 4-digit code which corresponds to the event function; in the Man mode, it displays any manually activated events as they are entered from the keypad.

A means of disabling the keypad has been incorporated into the system. This feature prevents the operator program, which is stored in random access memory, from being altered by tampering or inadvertent operation of the keypad pushbuttons. A "secret code" has been assigned in software to allow the keypad to be locked and unlocked. This lock-unlock function can only be performed when the PCM-3000A is in the Run

**PCM-3000A 7-Day Clock-Controller  
with Telephone Over-Ride**

mode. The keypad may be locked only by entering the two digits in proper sequence. It is unlocked in the same manner. When locked, pressing any digits other than the proper code will have no effect on the unit. The secret code can be easily changed in the field.

PCM-3000A Clock-Controllers are supplied for operation with 120VAC, 60Hz power, with a 12VDC standby power source. Screw terminals are provided on the rear panel of the unit for connection of the standby power source. The standby power should be supplied from a battery which is maintained in a fully-charged state by an automatic charger. Battery powering the unit in this fashion will assure maintenance of memory during periods of power failure.

The PCM-3000A is designed for compatibility with all other Series 3000 modules, allowing systems of almost any configuration or complexity to be easily assembled.

### Options

2. Eight Form "A" (SPST) Relay Output
4. Memory Expansion (increases number of events per week to 6300, worst-case)
7. Printer and Drive Circuitry/Software (80-line printer to printout program in memory, events as they occur including date, time, and equipment operation)
8. Communications Board (provides input and output port expansion)

## LCC-1A Li'l Ben™ Clock Controller

### Features

- Simple easy to use, four-key keypad
- Four-digit LED display
- One second resolution
- 7 day programmability
- 100 event capacity
- Power backup
- 8 open collector outputs
- Optional relay outputs
- Optional 2 x 1 stereo audio/video switcher
- Optional 4 x 1 stereo audio/video switcher

Li'l Ben is a low-cost seven day clock controller. The basic unit has eight outputs which may be individually programmed to turn On or Off up to 100 times. Output events are controlled with one second resolution.

Human interface consists of a four-key keypad for input and a four-digit multiplexed LED display with 16 indicators for output. Eight indicators are used to guide the user through the various modes of operation. The remaining eight are used to show circuit status.

The hardware consists of a CMOS microcontroller, a CMOS EPROM for program storage, a CMOS RAM for temporary system and user parameter storage, and a 1.0F double layer capacitor for momentary power failure carry-over. Provisions are made for connection of an external user-supplied battery for long term carry-over.

LCC-1A is the basic version of the Li'l Ben Clock Controller. Its eight control outputs are FET "pull-to-ground" type with the capability of sinking up to 100mA when On. An externally applied voltage of up to 30V is allowed when Off. An RC snubber network is provided to protect the FET from instantaneous high current transients such as those produced by inductive loads or electrostatic discharge.

LCC-2A is a version of the Li'l Ben Clock Controller with eight single form C relay outputs.

LCC-3A is a version of the Li'l Ben Clock Controller with a built-in 2 x 1 stereo audio follow video switcher. Two of the control outputs are internally wired to control the audio/video switches. The remaining six FET outputs are still available for controlling external devices.

LCC-4A is a version of the Li'l Ben Clock Controller with a built-in 4 x 1 stereo audio follow video switcher. Four of the control outputs are internally wired to control the audio/video switches. The remaining four FET outputs are still available for controlling external devices.

### Specifications

#### Control Outputs

FET: 8 open-drain FET 100mA max sink current  
+30VDC, -2VDC max

Relay: Single form C

#### Optional Audio/Video

##### Video

Inputs: 2 or 4 BNC, 75 ohm terminating  
Input Level: 4V p-p max  
Gain: Unity  
Outputs: 1 BNC, 75 ohm source terminating  
Response:  $\pm 0.05\text{dB}$  to 5.0MHz,  $\pm 0.1\text{dB}$  to 10MHz  
Crosstalk:  $> 60\text{dB}$  at 3.58MHz  
Differential Gain:  $< 0.1\%$ , 10-90% APL  
Differential Phase:  $< 0.1^\circ$ , 10-90% APL  
Tilt:  $< 0.5\%$   
Hum and Noise: -70dB reference to 1V p-p

##### Audio

Inputs: 2 or 4 stereo 600 ohm balanced, or 300 ohm unbalanced  
Input Level: 8dBm nominal; 12dBm max  
Output Level: 18dBm max  
Gain: Unity  
Response:  $\pm 0.05\text{dB}$  20Hz to 20kHz  
Crosstalk:  $> 70\text{dB}$  at 20kHz  
Harmonic Distortion:  $< 0.2\%$  20Hz to 20kHz  
Hum and Noise:  $< -70\text{dBm}$ , reference to +18dBm

##### Physical

Size:  $1\frac{3}{4}'' \times 19''$  in rackmounting enclosure

##### Power Requirements

Primary: 115VAC, 60Hz  $\pm 10\%$   
Backup: +4.5VDC, 5mA

##### Clock Accuracy

Dependent on power line frequency. Regulated to the National Bureau of Standards.

During power-fail mode, accuracy better than 3 seconds per hour.

# TEST SWITCHER

## **BBX-1A BILLIBOX™** **Bypass and** **Test Switcher**

### Features

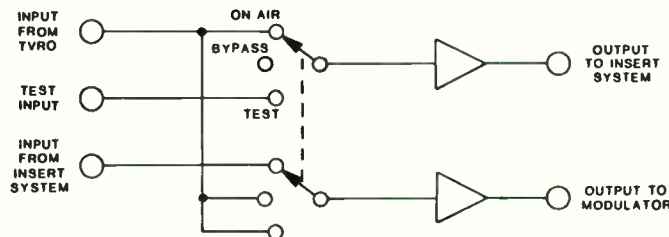

- Automatic bypass
- Manual bypass
- Preview bus
- Test signal bus
- High speed DTMF tone encoder
- Digit-by-digit steppable tone generator
- Sync loss annunciator
- Vertical interval switching
- Front panel LED status indicators
- Adjustable missing pulse detector
- Automatic recovery after two minutes
- High performance specifications
- Compact one rack unit package
- Preview monitor output
- Sync loss output
- Annunciator output
- Stereo processor interface
- Wide bandwidth integrated amplifiers

The Billibox is a universal accessory for use with any commercial insert system. It can automatically bypass the commercial insert system by switching the TVRO audio and video signals directly to your modulator if it senses loss of sync from your video tape players. An audible alarm sounds when sync is lost notifying an operator of a failure.

When in the test mode the operator is able to switch audio and video test signals thru the commercial insertion system for checking performance specs. Also internally generated audio DTMF cue tones can be sent to the tone decoders for testing and calibrating purposes.

You can also manually bypass your system for preview or test purposes. When in the preview mode the insert system can function normally but the commercials will not be sent out to the modulator. The Billibox is

designed to interface with stereo processors and with both kinds of cue tone transmission formats. All switching is done in the vertical interval to insure a clean switch.

## 8-BALL Monitor Switcher

### Features

- Low cost—high performance
- Stereo switching
- Vertical interval switching
- Integrated circuit crosspoints
- Dual tracking power supply—short circuit proof and thermal protected
- Built-in capacitive memory backup
- Large, high-quality, illuminated, field-legendable push buttons with replaceable lamps
- If more inputs, outputs, or remote control are needed, the AVS-10A Patchmaster is available

The 8-Ball is an instrument quality 8 x 1 stereo audio/video monitor switcher that features unity gain on both audio and video sections so the switched signal is unaffected in any manner by the switcher itself. It is essentially transparent to the signal sources and to the destination monitor to which the signal is directed.

The 8-Ball switcher offers electronically-interlocked vertical interval switching, stereo audio capability, and high quality front panel switches that have break-before-make gold contacts, bright long-life bulbs, and field-legendable caps. An integral capacitor provides a memory back-up function to restore switching configuration once power comes back on after a power outage.

### Specifications

# DISTRIBUTION AMPLIFIERS

VDA-1A

VDA-3006A

## VDA-1A, VDA-2A, VDA-3A Video Distribution Amplifiers

### Features

- Wide bandwidth integrated amplifiers
- Attractive self-contained package
- DC output coupling
- Looping Hi-Z input
- Six isolated 75 ohm source-terminated outputs
- Models available with one, two or three 1 x 6 amplifiers
- Low-cost—broadcast performance
- Front panel: -3dB to +12dB gain adjust
- Front panel input and output test points
- Auto DC offset

The VDA-1A is a self-contained broadcast-quality video distribution amplifier with 6 source-terminated 75 ohm outputs and 1 high impedance looping unit. Components and circuit design were carefully chosen to provide flat response, low signal distortion, maximum reliability and good long-term stability. Front panel mounted gain control and test points are provided. New circuitry provides automatic DC offset control on the outputs.

The 1.75 by 19" rackmounting package is available with either one, two or three independent amplifiers with a common power supply. Amplifiers may be operated with separate inputs or looped together to provide as many as eighteen outputs from a single source.

VDA-1A	One Amplifier
VDA-2A	Two Amplifiers
VDA-3A	Three Amplifiers

### Specifications

<b>Inputs:</b>	0.5 to 2.0V p-p, 50K ohm looping
<b>Outputs:</b>	6, source-terminated in 75 ohms, 3V p-p maximum
<b>Frequency Response:</b>	$\pm 0.10\text{dB}$ to 5MHz $\pm 0.20\text{dB}$ to 10MHz
<b>Differential Gain:</b>	Less than 0.1%, 10 to 90 APL
<b>Differential Phase:</b>	Less than 0.1%, 10 to 90 APL
<b>Tilt:</b>	Less than 1% (DC coupled)
<b>Hum and Noise:</b>	60dB RMS below 1V p-p output
<b>Output Isolation:</b>	Better than 45dB at 3.58MHz
<b>Connectors:</b>	BNC
<b>Size:</b>	1 $\frac{3}{4}$ " H x 19" W x 8" D

## VDA-3006A Video Distribution Amplifier

### Features

- Wide bandwidth integrated amplifiers
- Attractive modular rackmount package
- DC coupling throughout
- Looping low-capacitance Hi-Z input
- 6 isolated 75 ohm source-terminated outputs
- Low-cost—broadcast performance
- Front panel mounted -3dB to +12dB gain adjust
- Front panel mounted input and output test points
- Up to 12 modules in 3.5 by 19" rackmount frame
- Auto DC offset

The VDA-3006A is a modular broadcast-quality video distribution amplifier with six source-terminated 75 ohm outputs and 1 high impedance looping unit. Components and circuit design were carefully chosen to provide flat response, low signal distortion, maximum reliability and good long-term stability. Front panel mounted gain control and test points provided. New circuitry provides automatic DC offset control on the outputs.

Up to 12 VDA-3006A modules fit in the CMF-3000B 3.5 by 19" rackmount frame. Amplifiers may be operated with separate inputs or bridged together to provide more than six outputs from a single source.

### Specifications

<b>Inputs:</b>	0.5 to 2.0V p-p, 50K ohm looping
<b>Outputs:</b>	6, source-terminated in 75 ohms, 3V p-p maximum
<b>Frequency Response:</b>	$\pm 0.10\text{dB}$ to 5MHz $\pm 0.20\text{dB}$ to 10MHz
<b>Differential Gain:</b>	Less than 0.1%, 10 to 90 APL
<b>Differential Phase:</b>	Less than 0.1%, 10 to 90 APL
<b>Tilt:</b>	Less than 1% (DC coupled)
<b>Hum and Noise:</b>	60dB RMS below 1V p-p output
<b>Output Isolation:</b>	Better than 45dB at 3.58MHz
<b>Connectors:</b>	BNC
<b>Size:</b>	3.5" H x 19" W x 10.5" D

# PROJECTOR STAND/ UTILITY TABLE

## VSU-1S Vida-Set™ Projector Stand

- **Multi-Projector Versatility:** Width adjustment allows Vida-Set to be used with Sony, Panasonic, AquaStar, Arcturus, Barco, Bell & Howell and other popular projectors
- **Counterbalanced Height Adjustment:** From 27<sup>3</sup>/<sub>16</sub>" to 38<sup>3</sup>/<sub>16</sub>" accomplished by lifting or pushing down the upper module and is made easy through the assistance of a gas spring\* in the pedestal module to counterbalance the weight of the projector. A foot pedal release leaves hands free for this adjustment
- **Fast Image/Screen Alignment:** Roll, pitch and yaw adjustments are accomplished easily with convenient knob and lever controls
- **Modular Concept:** The VSU-1 (stand module) and VSU-1P (pedestal module) are sold separately or together to meet your specific needs
- **Compact and Portable Design:** Legs fold and upper module collapses in width for convenient storage or transport
- **Heavy-Duty 5" Locking Casters:** Two fixed and two swiveling wheels make system roll easily yet lock up securely. Special brakes lock swiveling as well as wheel rotation for stable projection
- **Positive Projector Hold Down:** Special rubber-padded brackets which adjust to various projector dimensions, secure your video projector to the VSU-1 stand
- **Steel and Aluminum Construction:** Provides optimum combination of strength and weight for high performance and long service

<b>VSU-1S</b>	
System (1 VSU-1 and 1 VSU-1P) . . . . .	<b>\$787.00</b>
<b>VSU-1</b>	
Table Stand . . . . .	<b>389.00</b>
<b>VSU-1P</b>	
Pedestal . . . . .	<b>398.00</b>

**VSU-1S**

### Accessories

<b>EK-10 Extender Kit</b> raises the VSU-1 an additional 9 <sup>13</sup> / <sub>16</sub> " . . . . .	<b>\$ 24.95</b>
<b>VR-1 VCR Shelf</b> . . . . .	<b>69.95</b>
<b>VB-1 Stacker Bracket</b> for stacking one VSU-1 on top of another VSU-1 . . . . .	<b>89.95</b>
<b>VCM-10S Ceiling Mount</b> for Sony video projectors . . . . .	<b>179.00</b>

\*Note: The gas spring is optimized for projectors weighing from 55 to 75 lbs. Heavier or lighter projectors will require proportionately greater effort to raise or lower.

## VS-100 Versa-Set Utility Table

- **Large Table Surface:** Accommodates a variety of equipment: 16mm projectors, video monitors, speakers, multi-image stands, slide projectors, computers, overhead projectors, amplifiers, mixers and much more. No need to rent or buy different sized tables.
- **Attached Folding Legs:** Sturdy, attached folding leg design provides fast and easy set up and prevents accidental leg detachment during transport or storage.
- **Adjustable Height Settings:** Telescoping legs can be adjusted to 10 preset heights (from 26<sup>3</sup>/<sub>8</sub>" to 56<sup>7</sup>/<sub>8</sub>" ) in seconds. Simplifies set up, saves time and effort
- **Roto-Lock System:** Legs slide to desired position then rotate to lock snap button in proper hole. Provides positive, visible locking for safe support of valuable equipment.
- **Strong Elastic Leg Straps:** Secure legs in hold-down position and allow easy transport and storage.
- **Heavy-Duty Carrying Handle:** Provides secure, comfortable, and convenient transport.
- **Construction:** Lightweight, sturdy aluminum, offers heavy-duty service with easy portability.
- **Color and Design:** Handsome style in dual brown-tones with nickel accent complements decor of offices, meeting rooms, classrooms and conference rooms.
- **Locking Accessory Shelves:** Heavy-duty Versa-Mate™ shelves in two sizes attach easily for full system support of video recorders, audio recorders, dissolvers and other auxiliary equipment.
- **AC Power Attachment:** Four outlets, switch, 12' cord and mounting/wrap bracket attach directly to table.

<b>VS-100 Utility Table</b> . . . . .	<b>\$209.00</b>
---------------------------------------	-----------------

### Accessories

**VM-1 Small Versa-Mate Accessory Shelf** with locking fasteners provides accessory space for audio recorders, dissolvers and other miscellaneous auxiliary equipment. (Tools not required) . . . . . **\$59.95**

**VS-100**

**VM-2 Large Versa-Mate Accessory Shelf** with locking fasteners provides heavy-duty accessory space for large video recorders, amplifiers, mixers and other miscellaneous equipment. (Tools not required) . . . . . **\$79.95**

**AC-4TK AC Power Attachment** with four outlets, switch, 12' cord and mounting/cord-wrap bracket, attaches directly to table. Only one main power cord to connect . . . . . **\$49.95**

## PLATINUM SERIES

SNAP-ON-TYPE NICKEL-CADMIUM BATTERIES

### KS SERIES CAMERA BATTERIES

#### FEATURES

- Nickel cadmium
- Universal snap-on-type mount.
- Compatible with all major ENG and EFP battery mounts, including Betacam
- Greater reliability
- 20-minute charge cycle with the patented CASP

### ER SERIES VTR BATTERY PACKS

#### FEATURES:

- Direct replacement for Sony BP90
- Nickel-cadmium
- 20-minute fast charge with patented CASP

### KR SERIES CAMERA BATTERIES

#### FEATURES:

- Nickel cadmium
- Compatible with:
  - All Ikegami
  - Ampex BCC-20
  - Hitachi FP21/22 & SK81/91
  - JVC KY-2700
  - RCA TK76B,C & TK86
  - Sharp XC700 & XC800
  - Sony BVP150, BVP300, BVP330, BVP3 & BVP30
- 20-minute charge cycle with patented CASP and many other cameras

### HR SERIES BATTERY PACK FOR PORTABLE LIGHTS

#### FEATURES:

- Nickel-cadmium
- Replaces any 30 or 14-volt packs
- Complete with comfortable leather belt
- Reliable
- 20-minute charge cycle with patented CASP
- Weighs just 5 pounds, 8 ounces
- Discharges at 14.4 volts for up to 25 minutes
- Well ventilated

VOLTAGE	WATTS	HR SERIES BATTERY	REPLACES	CABLE	OPERATE TIME (Min.)
30 VOLT	250	HR1 (TWO)	30V BELT	BE7	24
14 VOLT	80	HR1	14V BELT	BE12	25

## CASP

CHARGER—ANALYZER—SEQUENCER—POWER SUPPLY  
all-in-one

#### IT CONSISTS OF:

- a front microcomputer module
- a rear switcher type power module
- an optional printer module which fits in between the front & rear modules

#### IT IS:

- universal—will charge & analyze any type of rechargeable battery
- ageless—can never become obsolete
- ultra-fast—full charge in 15 to 20 minutes with Christie reFLEX batteries
- very easy to use
- small & light

#### IT HAS:

- 6 channels for processing 6 different batteries, or powering 6 pieces of dc equipment
- automatic battery recognition
- a unique 4-way sensing system
- wide input voltage & frequency capability, with optional dc input

# CHARACTER & GRAPHICS GENERATOR/ VIDEO PRINTER/PAINT SYSTEM

## VP-2 Plus Character and Graphics Generator

- **Character Resolution:** 35ns resolution, equivalent to 1510 pixel elements
- **Colors:** 512 color choices available 16 per page for characters, edges, and backgrounds
- **Fonts:** Six full fonts (upper and lower case) on line selectable from a library of 43 Chyron face styles with international fonts available. Custom font and logo compose service is also available (3 fonts standard)
- **Character Planes:** Full horizontal and vertical overlap of characters, symbols, and logos to any depth
- **Background Editing Capabilities:** Color every two raster lines, copy and fill function
- **Auto Display (Read from Disk):** Display selected graphics pages from disk memory in any sequence at variable rates
- **Palette Animation:** Cycle color in graphic images at selected multiples of video frame rate
- **Edge Types:** The three edge types for any font—full drop shadow, character offset, and bordered edge—can be varied in extent, direction, and color
- **Menus:** Complete menus and prompting displays to guide you through graphics composition
- **Composition and Control Features:** Cursor commands: up, down, right, left, backspace, return, home. Insert, delete, or move characters, words, lines. Select fonts, character colors, palette edge types, edge colors, key color. Set tab, clear tab, right justify, center page, line or column. Italicize a font (left or right), and display menu. Change character, word, line, color, font, edge, or edge color
- **Software enhancement installed**
- **Extended Roll Buffer**

VP-2 Plus Includes software enhancement and three standard fonts . . . . . \$7,195.00  
 VP-2 Plus With multifont . . . . . 8,115.00

## Multifont Option for VP-2

Allows VP-2 to use up to six font styles in six sizes, providing up to 36 fonts on-line. Each multifont chip contains one typestyle in scanline sizes: 18, 24, 30, 36, 42 and 48. Available as a field-installable kit, or as an option on new VP-2 systems.

**Multifont Upgrade**  
 Field Installable Kit . . . . . \$920.00  
 Option on new VP-2 . . . . . 920.00

**Multisize Fonts**  
 Placed into sockets on new Font Board . . . . . ea./150.00

## VP-1SG Video Printer

- **Fonts:** Six full fonts (upper and lower case) on line selectable from a library of 43 Chyron face styles with international fonts available. Custom font and logo compose service is also available (3 fonts standard)
- **Hardware:** Microprocessor controlled—dual 32K byte frame store memory—ROM Program—4000 bytes of message memory—internal sync generator with genlock and NTSC video generation
- **Color Select:** Any 1 of 8 colors may be assigned to backgrounds, characters or edge
- **Color Table:** Any 8 of 512 colors
- **Sync:** Genlock to external sync or composite video from a stable source. (VCR may not be a stable source)
- **Keying:** Full downstream keying included
- **Output:** NTSC composite video (Optional RGB)
- **Commands:** Select background color, character color, edge type, edge color, font type. Skip scan lines (push down), center line, center page, roll display, page delay, repeat message, end of page, horizontal and vertical margin control. Adjust character spacing, italicize, set color table. New line. Character shift left, right, up, down. Repeat message. End of message
- **System:** Microprocessor based with ROM program
- **Interface:** Multibaud rate serial RS-232 interface. Max 9600 Baud
- **Frame Store:** 32K bytes of run length encoding. 2 frame stores to provide sequential picture generation. (35ns resolution)

The VP-1SG accepts serial data from an RS-232C communications interface. Imbedded format commands within the data will be detected and executed and will cause the generation of a high resolution video picture (35ns increments). The video memory is organized as a dual frame buffer which allows one page to be displayed while the next page is being created.

VP-2 Plus

VP-1SG

Chameleon

This unit can be driven by any computer system with text processing capability and a serial communication port. This includes most personal as well as larger computer systems.

VP-1SG Includes software enhancement and 3 standard fonts . \$3,995.00

## Chameleon Paint System

- Easy to use icon-oriented Human interface
- Full set of drawing tools (plus free-hand drawing)
- Line
- Circle (outline or filled)
- Rectangle (outline or filled)
- Closed figure
- Area fill
- Multiple brushes
- User-definable brushes
- Cut and paste, with resizing
- Layout grid and drawing aid
- 16-level zoom with pan
- Flexible color selection and modification
- 768 x 482 resolution (582 lines for PAL)
- 256 colors displayable out of 4,096 possible
- Digitizing tablet with pen
- 10M byte removable hard disk
- Internal keyer configurable for downstream or upstream
- Simultaneous RGB and NTSC or PAL available with optional RGB board
- 256 levels of gray camera capture (option)

High resolution stand-alone paint system with digitizing tablet and pen, 10M byte removable hard disk, internal genlock with keyer.

Chameleon Includes RGB and camera capture . . . . . \$11,900.00

# GRAPHICS & TITLING SYSTEM/ SPECIAL EFFECTS GENERATOR

## RGU-2 Graphics and Titling System

- For studio and mobile production
- Incorporates many features of the Chyron IV
- Character Resolution is defined in 27ns increments
- Font Library. Character width and spacing is proportional for each character. Fonts contain upper and lower case alphas, numerics, punctuation, symbols, circumflexes, and diacritical marks
- Font Storage can hold 4 complete fonts at once. The standard Chyron RGU-2 memory has a capacity of over 32,000 16 bit words
- Color for Characters/Background is available when using the optional Chyron Color Encoder. A choice of 8 colors at a time, selectable from a 64-color palette. Background colors can range in size from full screen height to as small as 8 TV lines
- The Logo Compose Feature permits composition of custom graphics and fonts from artwork via keyboard entry
- The Character Display Area is defined by a visible safe title area on the Edit monitor. It will accommodate up to 62 characters per row, depending on their width and up to 20 rows per page, depending on their height
- Vertical Interval Change allows next messages to be displayed without black areas between messages
- Edging allows characters and graphics to be displayed with symmetrical "surround" edging, non-symmetrical "dropshadow" edging, or no edging
- Vertical Roll is selectable in five speeds, including pause. Roll may be used in two modes: roll from full screen, and roll from erased screen. Up to 2000 rows of standard text may be rolled continuously. An end-of-roll vertical tab—recorded at composition time—automatically pauses the roll at the desired screen location
- Horizontal Crawl is selectable in five speeds, including pause. An automatic end-of-crawl pause may be recorded at composition time
- Slow Reveal allows titling and graphics to be displayed character-by-character with a staccato typewriter-like effect in a choice of 5 rhythms
- Centering
- Flashing is provided on a character basis to dramatize titling and graphics, and is recordable on Vididisc
- Horizontal and Vertical Shift allows individual characters or rows to be moved under control of the cursor, in both the horizontal and vertical direction. Horizontal movement is in 112ns increments allowing adjacent character tuck. Vertical movement is in increments of one scan line pair
- The Font Compose Unit (optional) enables RGU users to create high quality custom fonts, logos, and other graphics according to their own requirements. In addition, fonts may be italicized and re-sized
- Program Animation is achieved with the Program Sequence Controller (PSC), a standard feature that transforms the Chyron RGU-2 into a graphics animation machine. A series of function keystrokes—recorded at composition time—establishes the appearance, sequence, and dwell time of displays. All system functions can be captured by PSC, including color, flash, roll, and crawl to further enhance the effect animation. In addition to action graphics displays, PSC can provide automatic recall of non-sequential messages, instant interchange of fonts for the same message compositions, automated keyboard operations for recall sequences, and easy programming of repetitive operations
- Auto Color/Font Change
- Tabs can be selected from 256 possible locations. Eight may be selected in a single page display
- Lower Third allows messages to be keyed into the lower third display area without pre-programming
- Insert and Delete are keystroke functions

Single Channel RGU-2 w/color encoder and downstream keyer . . . . . \$15,990.00  
Dual channel RGU-2 w/2 color encoders w/downstream keyers . . . . . \$20,190.00

## MOTION Special Effects Generator For RGU-2

- Multiple effects including spin, flip, rotate, zoom, compress, and image splitting can be created instantaneously
- Position and time duration of effect are operator selectable
- Key manipulation can be background or foreground relative to Chyron characters
- 100 Matrix wipe patterns
- Standard broadcast rackmounted
- All trigonometric computations are implemented in hardware with pipeline processing under direction of a microprocessor controller
- NTSC and PAL compatible
- Special effect sequences can be stored within Chyron messages and recalled at will
- A manual operation is available for effect formatting and testing
- Provides an external key signal for integration into your system

The Motion Special Effects Generator provides the RGU-2 with a powerful new low-cost modular option. The Motion will provide exciting special visual effects through digital video manipulation of Chyron generated graphics.

Combinations of effects may be individually customized. The speed of performance along with number repetitions can also be controlled from the Chyron keyboard. All functions operate in real time and provide smooth transitions between steps. Motion will support up to 15 colors at one time from the palette provided by the Chyron system. The Motion image may be keyed as a background effect behind Chyron characters or as a foreground effect over the characters. It can also be manipulated as a background to foreground, or reverse transaction, to produce a three dimensional effect. A Motion Control Module is required on an RGU-2 System.

Motion . . . . . \$15,000.00

# CHARACTER GENERATOR

## Scribe Text Generator

- Unsurpassed print quality resolution with 16 levels of anti-aliasing
- 1500 master typeface library
- Automatic font resizing from 10 to 400 scan lines
- 512K font memory expandable to 4M bytes
- Eight font loading positions
- Alternate fonts loadable during message compose
- Automatic playback with recorded fonts
- Automatic character kerning
- Row swap
- Unlimited character, word, or row underlap or overlap
- Automatic centering horizontal and/or vertical
- Squeeze/Expand for characters, words, or row
- Cut and paste
- Adjustable safe title area
- Color Encoder and soft keyer/fader
- 16.7 million color choices for characters, edges, and backgrounds
- Multiple character edges in variable size and color
- Multicolored log/character display including metallic
- Background colors selectable on scan line basis
- Automatic color ramping for shaded backgrounds
- Color/font pickup
- Dual frame buffer
- 1.2M byte floppy disk plus 20M byte Winchester Disk for storage of messages, fonts, and programs
- Insert/delete controls
- Right/left/center justification
- 256 tab positions
- Multiple speeds of roll/crawl
- Programmable timed roll
- Multiple speeds of slow reveal
- Programmable function keys
- Clock/event timer
- Built-in sync generator with genlock
- Programmable directory for operators includes auto font loads, with color palettes, tab, edges
- Software intensive
- Remote event triggering

## Options

- Font memory expansion to 4M bytes in 512K byte increments
- Disk storage expandable by 280M bytes with lomega cartridge backup
- Additional keyboards
- Capability to accommodate up to 10 disk drives
- Utility software for custom shaded or metallized fonts, italics, X, Y, Z rotation, glows, neons, embossed, auras, and light sources
- International character set
- RGB or YIQ component outputs
- Logo compose for customized creation of anti-aliased logos from artwork
- Dynamic Read Effects — flips, tumbles, wipes and slides with variable speed control
- Preview/offline edit channel allows simultaneous composition and update of messages while main channel remains on-air
- Networking permits multiple systems to have shared access to all pages, fonts and files
- Expanded General Purpose Interface for external control of execution of pre-programmed sequences on Scribe

Scribe is a revolutionary, high performance text generator featuring print quality display and offering unlimited choice of type styles. Add to this unlimited overlays, positioning, sizing, coloring, and shading, along with an array of functions and controls which make the Scribe the most sophisticated text generator available.

## Offset Characters

The Scribe can offset characters in eight directions. With this feature you can create many variations to a single master font and also enlarge your typeface library to include styles and sizes that you find most useful without additional expense.

## Drop Shadows

Experiment with drop shadows in various sizes, directions, and colors. Create attention-getting impact with letterforms that Scribe's versatility and resolution make available for the first time. Now you are free to explore new typographic directions with confidence and ease.

## Detailed Lettering

Scripts, cursives, and calligraphic styles can lend great distinction to your text display. Now you can show them off to their best advantage because Scribe's high resolution will show every detail of the delicate twists and turns that characterize these most graceful and expressive typestyles.

## Italics

Italics, because they contrast so definitely with regular roman typefaces, can be very useful to a graphic designer. And Scribe can italicize in 1° increments to produce right leaning type or left leaning type.

## Kerning Programs

Kerning is a very important feature of the Scribe. All of the master fonts come with a kerning program that automatically adjusts the space between certain letter combinations for a more efficient and esthetically pleasing display. You can also make your own kerning adjustments when the requirements of your message call for it.

## Bordering

Making borders or outlines for a typeface can quite often add to its character and heighten its visibility. With Scribe you have the option of making borders from 1 to 100 lines thick. And with Scribe's color capabilities, you have almost unlimited choices of border variations.

**Scribe** . . . . . \$28,900.00

# BACKGROUND GRAPHICS/ PAINT SYSTEM

## 4200 Character/Graphics Generator

- Motion-special effects generator
- Motion-channel control module CCM (mixes, wipes, fades)
- 27ns resolution
- Automatic character kerning
- Software controlled
- RS232 computer interface
- Software diagnostics
- 512 color choices
- Versatile multi-font library
- Proportionally-spaced characters
- Background stripes and solids
- True character overlay
- Choice of character edging (style and color)
- See-through characters
- Auto-color/font change
- Diagonal typing
- Multi-color character/logo display
- Font loading positions
- Programmed animation (PSC)
- Multiple roll and crawl speeds
- Adjustable video window during roll
- Slow reveal
- Automatic centering
- Mini-computer programming
- Automatic Instruction Displays (AID)
- Flexible VIDIDISC magnetic storage system
- Disk duplication
- Flash
- Automatic lower third display
- Visibly-bordered safe title area
- Operator controlled margin release of safe title area
- Left and right justification
- Insert and delete controls
- 256 tab positions
- Auto pause and rolls and crawls
- Modular design

4200

- Clock/event timer
- Automatic kerning
- Word or row squeeze, or stretch
- Row swap

### Options

- International fonts
- Right-to-left writing
- Subtitling interface
- SMPTE time code interface
- Advanced camera font compose
- Multimode Graphics Module (MGM)
- Full-function second channel
- Color encoder
- Down stream keyer
- Multiple keyboards
- Multiple VIDIDISC transport
- Large capacity Winchester hard disk
- Drawing tablet (electronic painting system)
- Sports scoreboard
- Weather service interface
- Custom font/logo compose service
- Election reporting system

4200 Priced from \$41,000.00 to \$90,000.00 depending on configuration.

## Multimode Graphics Module (MGM)

### Option For Chyron IV

- Standard RS170 input
- 512 color palette
- Full screen display capability
- Accepts drawing tablet input
- Resizing of graphics
- Cut and paste
- Standard geometric library
- Infinite montaging of multiple graphics
- Montaging of text channels
- Area fill
- Custom brush compose
- Palette animation
- Satellite weather service interface

The Multimode Graphic Module (MGM) provides a multitude of graphic abilities never before associated with a character generator. In addition to standard camera font compose, the MGM offers an advanced camera font compose that is unparalleled in the industry today.

An important extra dimension is added by the MGM's background graphics abilities. High resolution background graphics (1024 x 512 pixels) can be created either from standard black-and-white camera input or hand drawn with an optional digitizing tablet. Up to 16 colors may be selected from a 512 color palette, as well as a wide variety of brush sizes and styles, color fill, color pick-up, etc. Circles, rectangles and other graphic primitives are automatically drawn at the touch of a key. Completed portions of the background graphic can be cut and

pasted and varied in size. Backgrounds can also be montaged over other backgrounds for an unlimited layered effect. Palette animation is an important function of the MGM. The colors of the background graphics can be animated for exciting effects such as glow glitter, neon and color trails.

Weather service interface of the MGM can accept and display high resolution weather graphics from Weather Service International (WSI) or Environmental Satellite Data, Inc. (ESDI). The weather graphics are transmitted over telephone line\* to the Chyron IV and stored on Chyron's Winchester disk for subsequent display on command.

\*Data terminal and modem are required.

In foreground mode, the MGM provides an extremely advanced form of camera font compose that will quickly and easily create standard and multicolor graphics. Fonts can be automatically modified and added to your font library.

When background graphics are created with the MGM, they can be displayed as a single graphic or combined with text and other graphics on Chyron IV's channel one or two and stored as a single message on Winchester disk.

These unique Battery Belts replace On-Camera Batteries, BP-90, NP-1, and any other built-in or attached Battery Packs. Used world-wide by entrepreneurial professional ENG/EFP Camera Persons and Broadcast News Persons, Cine 60 Battery Belts offer more reliability, more power, more mobility, better balance with more comfort and greater economy with obsolete-proof versatility.

- **Most economical.** Longer life gives more hours of power per dollar than any other type NiCad battery
- **Lifetime investment.** Never discarded. All components of the battery purchasable to replace those that wear out
- **Most convenient.** Charger and Charge Cable built-in means less equipment to keep track of
- **More comfort.** Worn, not carried like 5 lb. On-Camera Batteries
- **Cameras and Betacams** become easier to handle, lighter to carry without On-Camera Battery
- **Undisturbed balance,** unimpeded movement from uniformly distributed weight around waist
- **Universal use.** Runs any equipment, lights, cameras, monitors, microwave devices. Run two or more devices simultaneously

\*Require Fast Charger. 115V Overnite Charger supplied.  
All Battery Packs have a 115V Overnite Charger.

14AH Style; 4 1/2" x 8" x 10". With built-in handgrip, shoulder strap.

20AH Style; 6 1/2" x 6 1/2" x 14 3/4". With built-in handgrip.

Properly cared for, Cine 60 Battery Belts and Packs provide many years of reliable service. Due to many variations in possible use, the number of re-cycles or life expectancy cannot be stated exactly. There are so many factors to consider which will influence battery life, such as high discharge, low discharge, temperature, environment, charging modes, etc. For instance, a battery constantly used at high discharge will not have as many re-cycles as a battery used for low discharge applications. Life expectancy can vary from 500 to 20000 re-cycles. But from our 26 year experience in making and selling batteries, we have seen batteries out of service after 4 years and we have seen batteries in use after 10 years. Again, the above mentioned factors will apply to the disparity in re-cycle life for any battery.

## 30V/14.4V/13.2V All-Purpose Battery System

Cine 60's versatile power for most portable equipment and Sun-Guns. The Battery provides 14.4V and 30V. With an in-line plug-in voltage converter, it becomes a 13.2V battery. And with a power adaptor, it will power both a Sun-Gun and camera simultaneously. 13.2V mode limited to applications drawing under 48W. Equipped with 2-pin Amphenol and 5-pin XLR connectors. A complete system requires the battery, voltage converter, and power adaptor, plus 1 or more video cables.

Applications for the All-Purpose Battery System are virtually unlimited. It will power all 13.2V cameras, VTRs, Betacams, and other similar systems, all 14.4V cameras, most 12V cameras, VTRs, plus all 14.4V and 30V battery lights and Sun-Guns.

All-Purpose Battery Belts. Require the Voltage Converter for 13.2V operation.

3014	30V, 4AH/14.4V, 8AH	Overnite		11 lbs.	\$ 712.00
3014FC	30V, 4AH/14.4V, 8AH	Fast Charge *	1 hr.	11 lbs.	760.00
3017	30V, 7AH/14.4V, 14AH	Overnite		15 lbs.	1090.00
3017FC	30V, 7AH/14.4V, 14AH	Fast Charge *	2 hrs.	15 lbs.	1140.00

All-Purpose Battery Packs. Require the Voltage Converter for 13.2V operation.

9014	30V, 4AH/14.4V, 8AH	Overnite		10 lbs.	\$ 712.00
9014FC	30V, 4AH/14.4V, 8AH	Fast Charge *	1 hr.	10 lbs.	760.00
9017	30V, 7AH/14.4V, 14AH	Overnite		14 lbs.	1090.00
9017FC	30V, 7AH/14.4V/14AH	Fast Charge *	2 hrs.	14 lbs.	1140.00
1430	30V, 10AH/14.4V, 20AH	Overnite		26 lbs.	1815.00

VRX Voltage Converter. Plugs in between battery and video cable. Converts 14.4V to 13.2V. Allows battery to power all 13.2V cameras, VTRs, Betacams. Maximum 48W. 5-pin male XLR input, 5-pin female XLR output. . . . . \$45.00

6400-Y Power Adaptor. Allows battery to run a battery light and camera simultaneously. Plugs in between battery, video cable, and light cable. 5-pin male XLR input, two 5-pin female XLR outputs. With the VRX plugged into one output to power a 13.2V Betacam or camera, and the second output providing 14.4V to operate a 14.4V, 70W battery light, excellent battery utilization is assured. . . . . \$49.00

\*Requires Fast Charger. Overnite charger built-in.

## Kwik-Charge Battery Belts/Packs

Same as Fast Charge Belts and Packs but with built-in dual-rate Kwik-Charger that allows fully charging 4 and 8AH batteries in 4 hrs., and 7 and 14AH batteries in 7 hrs. Then trickle charge circuit safely maintains fully charged battery indefinitely. Can also be fast charged with Cine 60 Universal Fast Chargers Models 9400, 9400-U and Model 94DC30 Mobile Fast Charger.

8327KFC	12V, 8AH, 4 hr. Kwik-Charge Battery Belt, 1 hr. Fast Charge *	\$ 792.00

# MOTION PICTURE CAMERA BATTERY BELTS AND PACKS

These batteries are the standard power source for the motion picture industry and are equipped with connectors to interface with the motion picture camera manufacturer's power cables.

**Universal. Overnight Charge types for Arri, Aaton, and Eclair Cameras.**

Cat. No.	Volts/Amps	Weight	Price
<b>6305 Battery Belt</b>	8.4V, 8AH/12V/16.8V, 4AH, with Banana Jacks, 3- and 4-pin XLR, switch	7 lbs.	\$545.00
<b>9105 Battery Pack</b>	8.4V, 8AH/12V/16.8V, 4AH, with 5-pin XLR switch	6 lbs.	\$55.00
<b>7005 Battery Belt</b>	8.4V, 14AH/12V/16.8V, 7AH, with Banana Jacks, 3- and 4-pin XLR, switch	10 lbs.	710.00
<b>9705 Battery Pack</b>	8.4V, 14AH/12V/16.8V, 7AH, with 5-pin XLR, switch	9 lbs.	765.00

Note 1. Above battery belts can be supplied with 4- and 5-pin in place of 3- and 4-pin XLR, on request.

**For Arri 168L, 16SR, 358L, 358I-3, 35-III, 35-2C, Eclair, and Aaton Cameras.**

<b>9805 Battery Pack</b>	12V, 8AH/16.8V, 8AH, with Banana Jacks, 4-pin XLR, Overnight Charge	9 lbs.	\$795.00

# BATTERIES/CHARGERS

## Cine 60's 12V 4AH

### Replacement Batteries for Sony's BP-90

Built to Cine 60 standards with fish paper-insulated, deep welded NiCad cell modules protected by precision "Lifeguard" cell sensors for cooler, more efficient fast charging. Housed in a rugged molded case, it utilizes Sony's original non-shorting split connector and has an autoreset circuit breaker protecting the battery against external shorts while eliminating fuses.

**BP-912S.** Charges overnight with all BP-90 chargers.  
May be fast charged with Sony's BC-210 or other 2-wire fast chargers. . . . . \$230.00

**BP-912FC.** As above but also may be fast charged with all  
Cine 60 Fast/Lifeguard/Quik Chargers. Requires BPA charge adaptor . . . . . 255.00

**BP-2C Dual BP-90 Battery Charger.** Charges 2 BP-90 batteries (any brand) overnight. In molded housing 1 1/2" x 2 7/8" x 4 3/8". Wt. 8 oz. 115V. . . . . 105.00

**BP-2C-220.** As above but 220V . . . . . 105.00

**BP-612S.** 13.2V 2AH NiCad replacement battery for Sony's BP-60 lead-acid battery. Higher voltage and NiCad reliability assure long life and run time. With autoreset circuit breaker. . . . . 195.00

**BP-25C Dual Battery Charger.** Charges 2 BP-612s overnight. Size and weight same as BP-2C. 115V . . . . . 105.00

**BP-25C-220.** As above but 220V . . . . . 105.00

**BP-512S.** 12V 2.5AH NiCad replacement battery for Sony's BP-20, -20A lead-acid batteries. Equipped with an autoreset circuit breaker. Charge with BP-25C dual overnight charger. . . 195.00

**NP-1.** 12V 1.5AH replacement battery for Sony's NP-1. Charge with Sony's NP-1 chargers . . 60.00

**CBP-2J5S.** 12V 2.5AH NiCad replacement battery for JVC/Panasonic PBP-1 lead-acid battery. Equipped with an autoreset circuit breaker. Charge with CBP-2J charger . . . . . 195.00

**CBP-2J Dual Battery Charger.** Charges 2 CBP-2J5S batteries overnight. Size and weight same as BP-2C. 115V . . . . . 105.00

**CBP-2J-220.** As above but for 220V . . . . . 105.00

For "Hitch-Hiker"™ and OEM types Anton-Bauer Snap-on® batteries (with BP3XF charge adaptor), Cine 60 BP-912FC battery (with BPA charge adaptor), Cine 60 "OB" batteries directly. All Lifeguard chargers feature a manual start 1A charge rate and an automatic start of a 150mA. Lifeguard rate permitting batteries to be fully charged in 4 hours and then safely maintained in a "ready" condition indefinitely. Sensing circuits and visual indicators provide continual monitoring of battery condition. Equipped with 5-pin XLR connector. Can also be used for other types of 2, 4 and 7AH 12 to 14.4V NiCad batteries which have a 3rd wire cell sensing circuit.

**LC-914 Lifeguard 4 Hour Charger.** One position 4 hour Quik charger. Line-isolated, line and load regulated. Requires BP3XF charge adaptor for "Hitch-Hiker" and OEM camera batteries, BPA charge adaptor for Cine 60 BP-912FC battery. Lightweight, small size, 1 1/2" x 2 7/8" x 4 1/4". Wt. 10 oz. 115/220V, 50/60Hz. . . . . \$235.00

**LC2-914 Lifeguard Two Position 4 Hour Charger.** Two independent positions charge 2 batteries in 4 hours. Equipped with "Hitch-Hiker" and OEM camera battery connector. Line isolated and line and load regulated. Lightweight, small size. 2 1/2" x 6 1/4" x 8". Wt. 1 3/4 lbs. 115/220V, 50/60Hz . . . . . \$485.00

**LC4-914 Lifeguard Four Position Fast Charger.** Four independent positions charge 4 batteries in 4 hours. A unique parallel patching circuit permits increasing the charge rate of the "Master's" position to 4A to charge 1 battery in 1 hour. Requires BP3XF charge adaptor for BP-912FC Cine 60 BP-90 battery. Line isolated, line and load regulated. Lightweight, small size. 4 1/2" x 6 5/8" x 7 1/2". Wt. 4 lbs. 115/220V, 50/60Hz . . . . . \$695.00

# BELTS/PACKS/CABLES

**Universal Sofbelts** feature highest quality, high drain, long-life, fishpaper-insulated NiCad cells, matched and deep-welded into battery modules encased in thickwalled, precisely sized module boxes designed to protect cells and intercell connections against harsh field abuse. Module boxes are mounted on a flexible, soft, body-molded, foam-cushioned belt that assures lifetime comfort. Universal sofbelts are available in two types, standard (cannot be fast charged), and Fast Charge. Both are equipped with a Lifetime Warranty built-in high efficiency Overnite Charger, and Auto-reset Circuit Breaker. Fast Charge types feature precision cell sensors of ceramic, hand-calibrated to an accuracy of  $\pm 5\%$  assuring a full, safe, fast charge. Sofbelt weight is evenly distributed around the waist for excellent balance and comfort.

## Universal Sofbelts

Cat. No.	Volts/Amp. Rating	Charge Rate	Weight	Price
1314304	13.2V/14.4V-8AH/30V-4AH	Overnite	11 lbs.	\$ 772.00
1314304FC	13.2V/14.4V-8AH/30V-4AH	Fast Charge*	1 Hour 11 lbs.	820.00
1314307	13.2V/14.4V-14AH/30V-7AH	Overnite	15 lbs.	1150.00
1314307FC	13.2V/14.4V-14AH/30V-7AH	Fast Charge*	2 Hours 15 lbs.	1195.00

**Universal Battery Packs** utilize the same components and incorporate the same features as the Universal Sofbelts. The housings are rugged thick-walled enclosures designed to accept the heavy-duty encountered in the field. The 8AH and 14AH versions are styled for carrying with a padded shoulder strap (supplied) or a tubular metal handle in the housing. The 20AH Model is equipped with a metal handle for portability.

## Universal Battery Packs

Cat. No.	Volts/Amp. Rating	Charge Rate	Price
901314	13.2V/14.4V-8AH/30V-4AH	Overnite	10 lbs. \$ 772.00
901314FC	13.2V/14.4V-8AH/30V-4AH	Fast Charge*	1 Hour 10 lbs. 820.00
901317	13.2V/14.4V-14AH/30V-7AH	Overnite	14 lbs. 1150.00
901317FC	13.2V/14.4V-14AH/30V-7AH	Fast Charge*	2 Hours 14 lbs. 1195.00
90131430	13.2V/14.4V-20AH/30V-10AH	Overnite	26 lbs. 1815.00

\*Require Fast Charger. 115V Overnite Charger built-in.

All Universal Sofbelts and Battery Packs have a 115V Overnite Charger built-in. For 220V or 115/220V built-in Overnite Chargers, the following options are available:

8994	220V Charger. Built into Universal Sofbelt or Battery Pack in lieu of the 115V Charger . . .	\$22.00
6994	115/220V Charger. Built into Overnite Charge type Universal Sofbelts or Battery Packs. Not available for Fast Charge types . . .	\$44.00

## Video Equipment Battery Cables

Coiled cable, 1' retracted, 6' extended. Supplied with 5-pin XLR connector and OEM's mating connector.

## 13/14/30V Universal Batteries

- Triple Voltage:  
13.2V for cameras  
14.4V for lights  
30V for lights
- Simultaneously runs 13.2V camera and 14.4V light
- 2 and 3 times more power than any camera battery
- Comfortable Sofbelt or compact battery pack styles

# CHARGERS/BATTERY DEMEMORIZER/ ADAPTORS

## Universal Fast Chargers

**One Hour Fast Chargers for 4 and 8AH batteries. Two Hour for 7 and 14AH batteries.**

Used for charging all Cine 60 Fast Charge Battery Belts and Packs. Can also be used for Hitch-Hiker™, and OEM Camera Batteries (Require BP3XF Charge Adaptor), and Cine 60 BP-912FC Battery (Requires BPA Adaptor). Two charge rates, Fast, Trickle. Size 2 3/4" x 3 3/4" x 8". Wgt. 3 lbs. 9400-U, 9400-UB Size 2 3/4" x 4 1/2" x 8 3/4".

9400	115V Fast Charger with 5-pin XLR connector .....	\$315.00
9400B	As above but with 4-pin XLR connector .....	.315.00
9422	220V Fast Charger with 5-pin XLR connector .....	.315.00
9422B	As above but with 4-pin XLR connector .....	.315.00
9400-U	115/220V Fast Charger with 5-pin XLR connector .....	.395.00
9400-UB	As above but with 4-pin XLR connector .....	.395.00

## Mobile Fast Chargers

**One Hour Mobile Fast Chargers.** Designed for safely and fully charging Fast Charge Batteries in the vehicle with the engine running. Equipped with LED indicators for DC input and Charge Mode, Charge Current Ammeter, Start Button, On-Off Switch, Back Up Automatic Cut Off of Fast Charge if battery's sensing circuit fails to operate. Can be used to charge other similarly rated batteries equipped with 3rd wire cell sensing circuits. Operates on 10.5-14VDC.

**94DC12 Mobile 10 to 12 Cell Fast Charger.** For charging 12, 13.2 and 14.4V, 4AH batteries in one hour, 7AH in two hours. Equipped with 5-pin XLR connector. Requires BP3XF Charge Adaptor for Hitch-Hiker™, and OEM Camera Batteries, BPA Charge Adaptor for BP-912FC Battery, size 4 3/4" x 4 3/4" x 6 3/4". Wgt. 4 lbs..\$395.00

**94DC30 Mobile 20 to 24 Cell Fast Charger.** For charging 12, 13.2 and 14.4V, 8AH and 14AH, and 24 to 30V, 4AH and 7AH batteries. Charge time 1 hour for 4 and 8AH batteries, 2 hours for 7 and 14AH batteries. Size 3 1/2" x 5" x 10 1/2". Wgt. 8 lbs. ....\$495.00

## Overnite Chargers

**9401-5 14-16 Hour Overnite Charger.** For Hitch-Hiker and OEM types Anton-Bauer Snap-On® Batteries (with BP3XF charge adaptor). Cine 60 "OB" batteries directly. Line-isolated, line and load regulated. LED indicator, 5-pin XLR. Lightweight, small size. 1 1/2" x 2 7/8" x 4 1/4". Wgt. 8 oz. Operates on 115V, 50/60Hz. . . \$105.00

9402-5. As above but for 220V operation.

Note: Available with 4-pin XLR. Specify 9401-4 & 9402-4.

(For OB14-4 battery) . . . . . \$105.00

## Battery Dememorizer

**DM1214.** Equipped with current drain device, voltage sensor, automatic voltage cut off, voltmeter, voltage selector, start switch, 5-pin XLR connector, and BP-90 connector. Requires BP3XFM Charge Adaptor for OEM and Hitch-Hiker On-Camera Batteries. NiCad battery "memory" is created by the build-up of excess crystals in the cell. Repetitive long periods of overcharging and shallow discharging can bring about this condition which is apparent by a loss of capacity. The Dememorizer, properly used will break down the excess crystals in the cell thereby restoring the lost capacity. In the process it will also re-balance the cells. It will "dememorize" 12V, 13.2V, and 14.4V 1.5 to 20AH NiCad batteries. Size 3 1/4" x 5 1/2" x 7 1/4". Wgt. 2 lbs. ....\$236.00

## Charge Adaptors

**BPA Charge Adaptor.** Connects BP-912FC Battery to any Cine 60 Fast/Lifeguard/Quick Chargers . . . \$42.00

**BP3XF Hitch-Hiker Charge Adaptor.** Connects Hitch-Hiker or OEM Camera Batteries to any Cine 60 Fast/Lifeguard/Quick Chargers. .... .45.00

**BJ3XM "OB" Battery Charge Adaptor.** Connects "OB" Camera Battery to Anton-Bauer OEM Battery Chargers .....

**BP-1C Tektronix Charge Cable.** Connects Tektronix BP-1 Battery to Cine 60 9400-U .....

**4F-5M Charge Adaptor.** Connects 4-pin XLR Charger to 5-pin XLR battery .....

**5F-4M Charge Adaptor.** Connects 5-pin XLR charger to 4-pin XLR battery .....

## Sun-Gun System

For ENG/EFP 12 to 30VDC Soft, Wide-Angle Focusing Light.  
Ideal camera mounted. Double wall aluminum construction.

- 6201-A Sun-Gun. With integral 8' cable terminated in 2-pin Amphenol connector, removable handle, and bulb. (Specify which bulb) ..... \$198.00
- 6202 Swing-Away Dichroic Filter. Converts Sun-Gun light to daylight ..... .85.00
- 6203 Swing-Away Diffusion Filter. Softens Sun-Gun light. Lowers output by f/stop ..... .65.00
- 6204 Swing-Away Safety Glass. For extra safety when Diffusion or Dichroic Filters are not used ..... .55.00
- SG-6510 Power Cable Adaptor. Connects to Sun-Gun's cable converting it to 5-pin XLR to run Sun-Gun with 12 or 14.4V battery. 12 or 14.4V bulb required ..... .40.00
- Sun-Gun Mounting Brackets. Two piece, machined sleeve, machined stud. Allows rapid mounting of Sun-Gun on camera ..... .45.00
- A-1/2. For all cameras with accessory shoe ..... .45.00
- B-1/2. For all cameras with 1/4-20 threaded accessory hold ..... .45.00
- B-1/26. For Ikegami ITC-730 Camera ..... .45.00
- B-1/25. For JVC KY-1900 Camera ..... .45.00
- B-1/216. For all cameras with 3/8-16 threaded accessory hole ..... .45.00
- C-1/2. For RCA TK-76 Camera ..... .45.00
- D-1/2. Universal. For most cameras. Clamps onto the camera's handle ..... .45.00
- E-1/2. For Ikegami HL-79A-D ..... .45.00
- F-1/2. For RCA TK76B, TK76C, TK-86 ..... .45.00
- Stud only. (Specify which type). ..... .27.00
- Sleeve only..... .27.00

Bulbs For Sun-Gun:		Run Time With Various Capacities Of Batteries

- 6207B. Heavy-duty carrying case. Customized for Sun-Gun, Battery Belt, and Accessories. Size 11 1/8" x 19" x 7 1/4" ..... \$110.00
- 6207P. As above, but for Battery Pack ..... .110.00
- APC. Heavy-duty carrying case. Customized for Sun-Gun, Battery Belt, and Accessories. Size 22 3/4" x 17 1/2" x 8 3/4" ..... .185.00

## All-Purpose Sun-Gun Kits

**APSGK-8 All Purpose Sun Gun Kit.** Combines the Cine 60 Sun-Gun to provide 14.4 and 30V portable lighting with a versatile Battery Belt system that runs virtually all portable equipment including 12, 13.2, and 14.4V cameras, VTRs, and TV monitors. The belt can be charged in one hour with a Mobile Fast Charger operating from most vehicles or a Universal 115/220V Fast Charger. This unique kit is a complete working system requiring only one or more of the video cables for connecting the Battery Belt to the manufacturer's equipment. .... \$1995.00

### Includes:

- 6201-A Sun-Gun
- 6202 Dichroic Filter; 6203 Diffusion Filter; 6204 Safety Glass
- 6212 14.4V, 70W Bulb; 6209 30V, 250W Bulb
- SG-6510 Power Cable Adaptor
- A-1/2 Sun-Gun Mounting Bracket; B-1/2 Stud only
- 3014FC 30V, 4AH/14.4V, 8AH Fast Charge Battery Belt with built-in 115V Overnite Charger
- 6400-Y Power Adaptor. Allows Battery Belt to run Sun-Gun (with 14.4V bulb installed) and a 14.4V camera simultaneously
- VRX Plug-In Voltage Converter. Connects in-line between 6400-Y Power Adaptor and Video Cable. Allows Battery Belt to run Sun-Gun (with 14.4V bulb installed) and 13.2 or 12V camera simultaneously. Maximum drain 48W
- 94DC30 Mobile Fast Charger. Operates from car battery (with engine running)
- 9400-U Universal Fast Charger. Operates from 115/220V, 50/60 cycles
- APC All-Purpose Sun-Gun Kit Carrying Case

**APSGK-14 All-Purpose Sun-Gun Kit.** As above but with 30V, 7AH/14.4V 14AH Battery Belt that can be charged in two hours ..... \$2385.00

# VIDEO CABLE/ EQUIPMENT RUN TIME CHART

Required Video Cable for connecting Cine 60's Battery Belt or Pack to the manufacturer's equipment. Cables with an (s) are 6' straight type, with a (c) coiled type, 1' retracted, 6' extended. The 1<sup>st</sup> number in the Run Time Chart, 4, 7, 8, 14, and 20 is the battery's Amp.-Hr. capacity. The number alongside it is the approximate hours of equipment run time using that battery capacity.

Equipment	Video Cable		Price	Approximate Hours of Run Time

# VIDEO CABLE/ EQUIPMENT RUN TIME CHART

Required Video Cable for connecting Cine 60's Battery Belt or Pack to the manufacturer's equipment. Cables with an (s) are 6' straight type, with a (c) coiled type, 1' retracted, 6' extended. The 1<sup>st</sup> number in the Run Time Chart, 4, 7, 8, 14, and 20 is the battery's Amp.-Hr. capacity. The number alongside it is the approximate hours of equipment run time using that battery capacity.

# VIDEO CABLE/ EQUIPMENT RUN TIME CHART

Required Video Cable for connecting Cine 60's Battery Belt or Pack to the manufacturer's equipment. Cables with an (s) are 6' straight type, with a (c) coiled type, 1' retracted, 6' extended. The 1<sup>st</sup> number in the Run Time Chart, 4, 7, 8, 14, and 20 is the battery's Amp.-Hr. capacity. The number alongside it is the approximate hours of equipment run time using that battery capacity.

2AMP 2-Pin Amph. receptacle for 30V batteries . . . . .	.13.00
2CNN Cap and chain assembly for #2 Amp receptacle . . . . .	.8.00
C5F 5-pin XLR receptacle . . . . .	.12.00
C4F 4-pin XLR receptacle . . . . .	.12.00
RBBJ Red or black banana jack . . . . .	.4.50
RBBC Red or black insulating cap . . . . .	.1.00
RA4F 4-pin pre-wired connector for OB4-14 Camera Battery. . . . .	.21.00
RA5F 5-pin pre-wired connector for OB5-14 Camera Battery. . . . .	.21.00
C4MC 4-pin cable connector, male, XLR . . . . .	.8.00
C5MC 5-pin cable connector, male, XLR . . . . .	.8.00
C4FC 4-pin female cable connector, XLR. . . . .	.12.00
C5FC 5-pin female cable connector, XLR. . . . .	.12.00
CP2M 2-pin male cable connector for Sun-Gun . . . . .	.15.00
115C4 Replacement 115V built-in charger for 4AH and 8AH batteries. . . . .	.105.00
115C7 Replacement 115V built-in charger for 7AH and 14AH batteries. . . . .	.115.00
220C4 Replacement 220V built-in charger for 4AH and 8AH batteries. . . . .	.105.00
220C7 Replacement 220V built-in charger for 7AH and 14AH batteries. . . . .	.115.00
1120C4 Replacement 115/220V built-in charger for 4AH and 8AH batteries . . . . .	.150.00
1120C7 Replacement 115/220V built-in charger for 7AH and 14AH batteries . . . . .	.160.00
BD-6 7.2 to 8.4V, 4AH replacement battery belt housing, 6-pocket . . . . .	.125.00
BD-7 9.6 to 12V, 4AH replacement battery belt housing, 7-pocket . . . . .	.125.00
BD-8 13.2 and 14.4V, 4AH replacement battery belt housing, 8-pocket . . . . .	.125.00
BD-9 16.8V, 4AH replacement battery belt housing, 9-pocket . . . . .	.125.00
F-7 7.2 to 12V, 7AH replacement battery belt housing, 7-pocket . . . . .	.135.00
F-8 13.2 and 14.4V, 7AH replacement battery belt housing, 8-pocket . . . . .	.135.00
F-9 16.8V, 7AH replacement battery belt housing, 9-pocket. . . . .	.135.00
ED-8 30V, 4AH, 12 to 14.4V, 8AH replacement battery belt housing, 8-pocket . . . . .	.150.00
HTCH Replacement Hitch-Hiker™ camera battery housing only . . . . .	\$ 95.00
(Does not include Anton/Bauer battery connector and stud base)	
HOB Replacement Hitch-Hiker "OB" type battery housing complete with Cine 60 Stud Base and 5 or 4-pin XLR (specify) . . . . .	.150.00

Note 1. For a complete listing of replacement parts refer to Cine 60's Repair Parts Schedule.

Note 2. When ordering replacement parts, it is necessary to furnish with the part number, the catalog number of the battery belt or pack in which the part is used.

1/2ED-18

AA-69

F-1

TD-35

BD-17

High drain, long life NiCad cell modules. Insulated with porous fish-paper to radiate cell heat more efficiently than plastic promoting longer life. Assembled with deep-seated spot welds to minimize "break-away" open circuits. Selected, graded, and matched.

Built-in charger. Precisely matches cell's impedance allowing more efficient conversion of charge current to stored energy in the cell rather than heat. This superior charge acceptance assures fully charged cells. Less heat promotes longer cell life.

Cine 60 Cells and Chargers are designed and matched to each other to provide optimum performance. Use of replacement cells other than Cine 60's is not recommended.

Battery belt housing. Multi-pocket design results in superior cell heat radiation. Allows cells to charge and discharge more efficiently than when clustered together in a block or pack battery. Also lengthens cell life.

# ACCESSORIES

## Snaplok Mount

**6700 Single-Action Snaplok**, instantly and safely mounts camera antenna, or any portable device to a tripod, shoulder pod, stand, truck, any flat surface. Double pushbutton release permits instant removal. Complete Snaplok Mount includes a precision machined aluminum alloy base, mating camera plate, two 3/8-16, one 1/4-20 mounting screws. Size 3/4" x 3 1/8". Wt. 17 oz. . . . . \$180.00

**6700B** Snaplok base only . . . . . 160.00  
**6700A** Snaplok camera plate only . . . . . 33.00  
**67SS1** 3/8-16 Mounting screw . . . . . 4.00  
**67SS2** 1/4-20 Mounting screw . . . . . 4.00  
**6701** Same as 6700 but smaller size (5/8" x 1 1/2" x 4 1/4", Wt. 8 oz.)  
 Double action type mount then "push to lock". . . . . 160.00

**6701B** Base only . . . . . 144.00  
**6701A** Plate only . . . . . 27.00

## Arri Camera Accessories

**Battery Cables**. Coiled, 1' (6' extended). Supplied with original molded plug and mating connectors to O.E.M. specifications.

**6401S** For Arri 16S. With 2 prong molded battery connector . . . . \$ 52.00  
**6401S5** For Arri 16S. With 5-pin XLR battery connector . . . . . 69.00  
**6401M** For Arri 16M. With 2 prong molded battery connector . . . . . 59.00  
**6401M5** For Arri 16M. With 5-pin XLR battery connector . . . . . 79.00  
**6401BL** For Arri 16BL. With 4-pin XLR battery connector . . . . . 93.00  
**6401BL5** For Arri 16BL. With 5-pin battery connector . . . . . 95.00  
**6401SR** For Arri 16SR, 35BL, 35-III cameras . . . . . 95.00  
**6402V** For Arri 35, variable speed motor. With 2 prong molded connector . . . . . 52.00  
**6402V5** For Arri 35, variable speed motor. With 5-pin XLR connector . . 69.00  
**6402C** For Arri 35, constant speed motor. With 2 prong molded connector . . . . . 52.00  
**6402C5** For Arri 35, constant speed motor. With 5-pin XLR connector . . 69.00  
**6900** **Offset Motor Base** for Arri 35 III C or IIB. A gear box providing a flat camera base and low center of gravity. Essential for professional tripod mounting. Mounts constant or variable speed motor . . . . . 600.00

**6900A** As above but with built-in contacts for automatic clapstick . . 656.00  
**6504** **Focusing Device** for Arri 35. For uninterrupted easy follow focusing by camera man or assistant. Includes 3 lens scales and 3 gears. . . . . 742.00

**6910'C'** **Lens Mount Adaptor**. Precision machined lens mount permitting the use of Arri mounted lens on cameras with "C" mounts. . . . . 192.00

**6910B** As above but for cameras with "Bayonet" mounts . . . . . 192.00

## Arri Camera Batteries

**12V/2A. 2AH Arri SR Camera Battery**. Totally compatible. No adaptor, special mounting or connections required. 2AH cells provided a 30% increase in run time. Can be charged with Arri SR Battery Charger or Cine 60 Dual Charger. Size 2 1/2" x 3 5/8" x 4 1/2". Wt. 2 lbs. . . . . \$325.00

**D-Nc2000 Dual Charger**. Charges two 12V/2A batteries in 8 hours. Independent charge circuit and LED indicator for each channel. Automatic 115/220V operation. Size 2" x 3 1/2" x 4 1/2". Wt. 1 1/2 lbs. . . . . \$325.00

**9707AOB Arri 35BL-3 "Flat Pack" Camera Battery**. Slim 12V 7AH battery designed to mount inside the Arri Geared Head. Features two 5-pin XLR output connectors, Autoreset Circuit Breaker; Built-in 115V Overnight Charger; Charger Cable (in compartment): Charge Indicator, Charge/Operate Switch. Size 1 1/2" x 6 5/8" x 9 5/16". Wt. 7 lbs. . . . . \$695.00

Note 1. 9707AOB can be supplied with 4-pin XLR connectors on request.

**9727HLSP Arri 35-III "Double Pack" Camera Battery**. Provides two 12V 7AH outputs switchable at the camera to 24V for high speed operation. This battery is 2 complete and independent 12V 7AH battery systems totaling 14AH combined in one housing. Each with a 115V Overnight Charger which automatically disconnects each battery when full charge is reached; Charge indicator, and Autoreset Circuit Breaker to protect each battery against external shorts. With padded shoulder strap and hand grip. Size 4 1/2" x B" x 10". Wt. 14 lbs. . . . . \$1017.00

**9727FCHLSP** As above but capable of being fast charged in 2 hours with 9400 Series Fast Chargers . . . . . 1107.00

Note 2. 9727HLSP can be supplied with 4-pin XLR connectors on request.

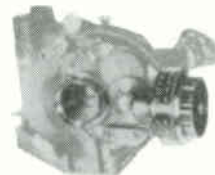

**9727HLSP Arri/Panavision "Double Pack" Camera Battery**. Higher capacity model of 9727HLSP. Has two 12V 10AH 5-pin XLR outputs, switchable, total 20AH and two 24V 10AH 3-pin XLR outputs (not switchable) to run Panaflex Camera and associated video assist. Size 6 1/2" x 6 3/4" x 14 3/4". Wt. 22 lbs. . . . . \$1795.00

Note 3. 20-120HLSP can be supplied with 4-pin XLR connectors on request.

## 6900 Offset Motor Base

## 6401S Cable

## 6504 Focusing Device

## Moviecam Batteries

The original equipment batteries for the Moviecam Camera. Equipped with 4-pin XLR, Selector Switch for 12V and 24V operation, built-in 115V Overnight Charger, Charge Indicator, Charge Cable, and Autoreset Circuit Breaker. Padded shoulder strap and hand grip supplied with battery pack.

**6316** Battery Belt, 12V 8AH/24V 4AH Wt. 10 lbs. . . . . \$ 640.00  
**7016** Battery Belt, 12V 14AH/24V 7AH Wt. 14 lbs. . . . . 968.00  
**9116** Battery Pack, 12V 8AH/24V 4AH Wt. 9 lbs. . . . . 670.00  
**9716** Battery Pack, 12V 14AH/24V 7AH Wt. 13 lbs. . . . . 1005.00  
**12-224** Battery Pack, 12V 20AH/24V 10AH Wt. 22 lbs. . . . . 1595.00

## Direct Replacement for the OEM Anton/Bauer Snap-On® Batteries.

This premium quality battery features a rugged housing with air vents for life-extending lower charge/discharge temperatures, precision "Lifeguard" ± 5% cell sensors for more accurate charge control, and Cine 60 quality long-life NiCad cells. A built-in Autoreset Circuit Breaker protects the battery against external shorts. Mounts instantly without cables or connectors. Side-ribs in the housing assure non-slip handling. Can be charged directly with OEM Chargers. May also be charged with all Cine 60 Slow, Quick, and Fast Chargers (with BP3XF Adaptor).

**Hitch-Hiker™ H-14 14.4V 4AH Camera Battery** . . . . . \$495.00  
**Hitch-Hiker H-13 13.2V 4AH Camera Battery** . . . . . 485.00  
**Hitch-Hiker H-12 12V 4AH Camera Battery** . . . . . 475.00

**BP3XF Charge Adaptor**. Snaps onto Hitch-Hiker or OEM's battery to permit charging with Cine 60 Chargers. . . . . 45.00

**Direct Replacements for Cine 60 "OB" Newspak Batteries**. Same features as "Hitch-Hiker" Camera Batteries but require "Shorty Cable" for connecting to the camera. Mounts onto Cine 60 "NMB" or Anton/Bauer Snap-On® OEM brackets. Can be charged directly with all Cine 60 chargers. May also be charged with OEM chargers (with BF3XM Charge Adaptor).

**OB14-5** 14.4V 4AH Camera Battery. Replaces all OB5-14 type Batteries . . . . . \$435.00  
**OB14-4** As above but replaces OB4-14 Battery . . . . . 435.00  
**OB-13** 13.2V 4AH Camera Battery. Replaces all OB5-13 Battery . . . . . 425.00  
**OB-12** 12V 4AH Camera Battery. Replaces OB5-12 type Batteries . . . . . 412.00

"Shorty" Cables. Required for connecting the OB Battery to the camera

**SHB-6XC7** For Sharp XC-700 Camera . . . . . 44.00  
**SHB-6400IKE** For Ikegami HL-77 Camera . . . . . 44.00  
**SHB-6406** For all Hitachi Cameras . . . . . 44.00  
**SHB-6408** For all JVC "KY" and Sony BVP Cameras, Betacams . . . . . 44.00  
**SHB-6471** For Ikegami HL79A-E, ITC-730 Cameras . . . . . 44.00  
**SHB-6473** For Ampex BCC-14, BCC-20, Philips LDK-14 Cameras . . . . . 66.00  
**SHB-6476** For RCA TK-76, -A, -B, -C . . . . . 143.00  
**SHB-6483** For Ikegami HL-83, HL-95 Cameras . . . . . 59.00  
**NMB** "OB" Battery Mounting Bracket. (Specify for which camera). . . . . 75.00  
**BJ3XM** Charge Adaptor. Connects "OB" Batteries to Anton/Bauer OEM Chargers . . . . . 45.00

# FILM/VIDEO

# CAMERA PROMPTING SYSTEMS

## CAMRAPROMPTER

### Complete Camera Prompting System For 16mm Cine and ENG/EFP Video Cameras

- Bright, easy-to-read script information. Copy "frame" size: \*can be typed (bulletin-style) or handprinted on matte-finish 6 1/4" W x 5" H plastic rolls (7" W x 25" L)
- Small remote control unit (with 10' detachable cable) provides continuously variable speed control (forward or reverse)
- Ultra-silent, miniaturized motor drive
- Power supplies: standard 12V battery packs or belts, as well as AC mains (with a 12V regulated power supply). 1.75A max. \*\*
- Side-mounted light source utilizes two standard fluorescent lamps (GEF4T5-CW)
- Weight: Camraprompter unit (complete with universal camera mounting plate, adjustable bracket, remote control, scroll and cables) weighs approximately 9 lbs. 8 oz. (4.3kg.)
- \*\*Power supplies not included.

Mounted in a matte box-type enclosure, the Camraprompter\* utilizes a clear acrylic optical flat set at a 45° angle in front of the camera lens. The optical flat acts as a mirror reflecting the bright, easy to read script to the subject being photographed, with virtually no light loss to the lens.

A side-mounted light source is used to back-light the script "scroll." The script copy can be hand-printed or typed (bulletin-style) onto the matte-finish clear plastic 25-foot roll which is advanced by means of an ultra-silent, miniaturized motor drive. (Optional script board/roller unit available for convenient and legible hand-printing).

A compact remote control unit provides continuously variable speed control (forward or reverse). The remote control unit may be operated by the "on camera" subject or by the person in charge of pacing the sequence (who is viewing the script roll from the side of the Camraprompter unit).

Camraprompter can be operated—tripod-mounted or handheld—with most portable motion picture and ENG/EFP cameras currently in use. (It can also be mounted and operated independently on its own stand).

Camraprompter is the ideal prompting system for news/documentary, educational or industrial assignments, as well as TV commercials and other applications shot on location.

\*Patents pending.

Camraprompter

5P001	Camraprompter (complete camera prompting system for film and video cameras). Includes universal camera mounting plate . . . . .	\$2875.00
5P000	Script "Scroll" (plastic, 7" x 25'). Spare roll . . . . .	11.50
5P011	Script "Scroll" (vellum 7" x 60'). Replacement roll . . . . .	13.00
5P003	Lamp (replacement fluorescent lamp, GE F4T5-CW) . . . . .	12.00
5H020	Carrying case, for Camraprompter (only) . . . . .	200.00
5P009	Scriptboard unit. (Script scroll feed roller assembly is not included) . . . . .	145.00
5P008	Script scroll feed roller assembly, complete. Includes Spool (5P007) and Spindle (5P006), as spares . . . . .	185.00
5P007	Script spool, as spare . . . . .	65.00
5P006	Script feed roller spindle, as spare . . . . .	120.00
5P005	Clear acrylic optical flat, as spare . . . . .	30.00
5P004	Base plate with hardware, as spare . . . . .	265.00
5J008	Extension cable (25'), for speed control box . . . . .	110.00
5P010	Speed control box with 8' cable, as spare . . . . .	175.00
5J009	Power cable (supply end uncommitted), as spare . . . . .	70.00

## CAMRAPROMPTER "L"

### Complete Camera Prompting System For 16mm and 35mm Cine and Studio Video Cameras

- Quick to set up and easy to operate
- Large, clear 8 1/2" x 11" script viewing area
- Matte finish plastic roll, 12 1/8" W x 25" L, on which copy can be typed, handwritten or computer printed
- Compact remote control unit (with detachable cable) provides continuously variable speed control (forward or reverse)
- Silent, miniaturized motor drive
- 6" x 6" Filter and matte holder
- Power supplies (not included): 12V battery packs or belts, as well as AC mains (with a 12V regulated power supply). Under 2A
- Side-mounted light source uses two standard fluorescent lamps (GE F8T5-CW)
- Weight: Camraprompter "L" unit (complete with Universal "L" Mounting Plate Assembly, remote control, script scroll, scroll roller assembly, and cables) weighs approximately 21 lbs. (9.5kgs)
- Unit may be quickly disassembled into three pieces which pack into a compact case (purchased separately)

The Camraprompter "L" is designed to accommodate larger camera systems than the original Camraprompter. Lighter, more portable and lower cost than conventional prompting systems, it operates easily with handheld 35mm film and electronic cinematography cameras, as well as 16mm film and ENG/EFP and compact studio video cameras.

The clear acrylic optical flat is set at a 45° angle in front of the camera lens in a mattebox-type enclosure. The subject being photographed can easily read the script on the flat which acts like a mirror, clearly reflecting the text.

The script "scroll" is available in a 25-foot matte finish plastic roll, or a lighter gauge material, such as vellum, may be used. It is back lighted by a side-mounted light source. Script copy can be hand-printed, typed with a prompting typewriter, or computer printed onto the scroll. A silent, miniaturized motor drive advances the script "scroll".

Camraprompter "L"

5P300	Camraprompter "L" (Complete camera prompting system). Includes Universal "L" mounting plate . . . . .	\$3600.00
5P305	Script "Scroll" (plastic, 11 7/8" x 35'). Spare roll . . . . .	18.00
5P012	Script "Scroll" (vellum 11 7/8" x 60') . . . . .	25.00
5H300	Carrying case for Camraprompter "L" system . . . . .	250.00

NOTE: Power supplies are not included. Camraprompters require a standard 12V battery pack or belt, or 12VDC regulated power supply.

Prices and Specifications Subject to Change Without Notice.

# ZOOM CONTROL SYSTEMS

## J-6 Joystick Power Zoom Control

- Compatible with major professional 16mm, 35mm film cameras, the EC-35 electronic cinematography system, and several EFP video cameras
- Operates off internal 12V rechargeable battery or external power of 10VDC-35VDC from the camera head
- Provides variable zoom rates from 2 seconds to 30 minutes
- Highly responsive Joystick-type sliding thumb control provides logarithmic speed variation (from zero to maximum) in direct response to thumb position
- Gradual start/stop system permits extremely smooth precision feathering of the zoom throughout the speed range
- Speed rate dial; limits maximum rate of the zoom motor from 2 seconds to 3 minutes per revolution
- Field serviceable. The J-6 is easily tested with a standard voltage meter. All parts are standard. I.C.'s (in plug-in sockets) can be replaced without a soldering iron
- A pair of zoom direction LEDs blink for positive indication when operating at very slow zoom rates up to 30 minutes
- 20X speed fast return button provides for quick return to mark
- Direction-reversing toggle switch assures easy motor mounting and realignment with sliding thumb control
- Bright LEDs indicating: Low voltage and motor on/off
- Convenient camera run on/off switch
- Optional VTR start/stop, and return video switches
- Highly reliable solid-state electronics featuring LVD transformer (a ceramic core moving within a magnetic coil) eliminates all microswitches, cams and pots. No potted "mystery" modules
- Plug-in cables for easy replacement
- Highly rugged contoured aluminum case with all controls and connectors recessed
- Perfect partner for J-4 and J-5 Zoom Motors

- 2C302** J-6 Joystick/J-5 Motor Power Zoom Control package complete with J-6 self-contained joystick control with rechargeable battery, battery trickle charger, J-5 Zoom Servo Motor, and J-6 Control to J-5 Motor Cable. . . . . **\$2,625.00**
- 2C300** J-6 Joystick Power Zoom Control, as spare. Complete with built-in rechargeable NiCad battery, and J-6 Battery Trickle Charger . . . . . **1,750.00**
- 2C162** J-6 Battery Trickle Charger, as spare. Recharges internal NiCad battery in 14 hrs. Capable of either 120VAC or 240VAC, 50/60Hz operation . . . . . **90.00**
- 2C320** J-6 Service Tool Kit . . . . . **100.00**
- 2E263** Tripod handle mounting clamp. Clamps to J-6 to tripod pan handle. . . . . **180.00**

## J-6 Motor Cables

- 2J223** J-6 control to J-4 motor cable . . . . . **\$135.00**
- 2J224** J-6 control to J-5 motor cable . . . . . **135.00**
- 2J225** J-6 control to Heden motor cable . . . . . **135.00**

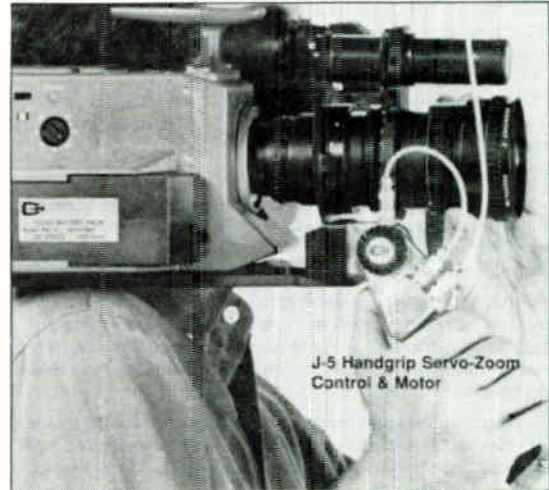

## J-6 Camera Cables

Note: The J-6 may be powered either by its own internal battery, or from the camera battery. Unless otherwise indicated, cables listed below provide 2 functions, auxiliary power for the J-6 from the camera, and camera remote start/stop from a button on the J-6.

- 2J230** J-6 Camera Cable for Arri 35BL, 35III, and 16SR, (11-pin Fischer connector) . . . . . **\$150.00**
- 2J231** J-6 Camera Cable for Arri 16SR, and 35III, (4-pin custom connector) . . . . . **165.00**
- 2J232** J-6 Camera Cable for Arri 35BL, (6-pin Lemo connector) . . . . . **160.00**
- 2J233** J-6 Camera Cable for Moviemcam . . . . . **160.00**
- 2J234** J-6 Camera Cable for FX35 . . . . . **140.00**
- 2J235** J-6 Camera Cable for CP-16R, GSMO . . . . . **140.00**
- 2J236** J-6 Camera Cable, unterminated . . . . . **120.00**
- 2J237** J-6 Auxiliary Power Cable, with Banana connector . . . . . **120.00**

J-6

J-5 Handgrip Servo-Zoom Control & Motor

## J-5 Handgrip Power Zoom Control

- 2G105** J-5 Handgrip Servo-Zoom Control and Motor for GSMO and CP-16R. Includes power cable (2J119) and motor cable (2J218). Note: For use with GSMO, add 1L009 Mounting Plate . . . . . **\$1,850.00**
- 2J218** J-5 Motor Cable, as spare (Note: Can also be used as a spare for CL-3 Cable 1J160) . . . . . **120.00**
- 2J219** J-5 Power Cable, as spare . . . . . **120.00**
- 2J222** J-5 Remote Operation Cable Set (4 1/2', includes 2J220 and 2J221 Power and Motor cables) . . . . . **275.00**
- 2J220** J-5 Long Power Cable, for remote operation (4 1/2') as spare . . . . . **140.00**
- 2J221** J-5 Long Motor Cable, for remote operation (4 1/2'), as spare. . . . . **140.00**
- 2G132** J-5 Control-to-J-4 Motor Adaptor. Permits J-5 Control Handle (2G225) on CP-16R to drive J-4 Motor (2C123). Requires J-5 Motor Cable (2J218). . . . . **70.00**

## J-5 Motor Bracketry (Motor to Lens)

- 2H133** J-5 Bracketry for Angenieux 10-150mm . . . . . **\$275.00**
- 2H115** J-5 Bracketry for Angenieux 9.5-95mm or 12-120mm . . . . . **275.00**
- 2H125** J-5 Bracketry for Angenieux 9.5-57mm . . . . . **275.00**
- 2H145** J-5 Bracketry for Angenieux 12-240mm . . . . . **300.00**
- 2H100** J-5 Bracketry for Angenieux 17.5-70mm . . . . . **240.00**
- 2H232** J-5 Bracketry for Zeiss 10-100mm T2 . . . . . **300.00**

## J-5 Zoom Motors and Accessories

- 2C123** J-4 Servo Motor, as spare (without D clamp) . . . . . **\$950.00**
- 2G146** J-5 Servo Motor, as spare . . . . . **825.00**

NOTE: Bracketry is not included with J-5 or J-6 zoom controls, or with J-5 motor. The same servo motor can be used with different lenses by ordering the appropriate bracketry.

# CINEMA PRODUCTS CORP.

# STABILIZING SYSTEM

## Steadicam Camera Stabilizing Systems (Universal Model III) for Film and Video Cameras

• Total mobility and portability • Double-jointed stabilizer support arm freeing the arm to move 360° horizontally from the elbow • Cameraman can change support arm from one side of the vest's front plate to the other, allowing left or right hand operation • Operator safety ensured by pin and cone quick-release system • Single Steadicam can be used interchangeably with most handheld 35mm, 16mm and video cameras with no interface

### All Steadicam (Universal Model III) systems include:

• Operator's vest • Stabilizer support arm (adjusted for an average camera weight load) • Camera mounting assembly (featuring a 3<sup>3</sup>/<sub>4</sub>" high-intensity adjustable viewing monitor) • Camera mounting platform • Two (2) NC-12 NiCad battery packs • Two (2) NCC-12 chargers • West docking bracket • Three cases (accommodating the camera operator's vest, stabilizer support arm, camera mounting assembly, and related accessories)

- 3C015** Steadicam (Universal Model III) with adjustable standard-load stabilizer arm. For use with film and video cameras weighing up to 40 lbs. . . . . **\$37,000.00**
- 1C007** Steadicam (Universal Model III) with adjustable light-load stabilizer arm. For use with film and video cameras weighing up to 30 lbs. . . . . **\$36,500.00**

NOTE: For most 16mm cameras and EFP video cameras use 1C007. To use Steadicam interchangeably in all formats substitute or adjust the stabilizer support arm and servo control system.

## Steadicam Stabilizer Support Arms

- 1L144** Adjustable standard-load stabilizer arm, as spare. May be adjusted in the field. For use with cameras weighing up to 40 lbs. Features include: adjustable springs, articulated elbow, and quick right/left hand connecting system. . . . . **\$12,500.00**
- 1L151** Adjustable light-load stabilizer arm, as spare. Features are same as adjustable standard-load arm (1L144) but for cameras weighing up to 30 lbs. . . . . **\$12,000.00**

## Power Supplies For All Versions Of

### Steadicam (Universal Model)

- 1K216** Battery pack — NC-12 . . . . . **\$ 525.00**
- 1K217** Charger — NCC-12, for above. Overnight charge . . . . . **.425.00**
- 5K214** Quick charger — NCQC-12. Charges NC-12 battery pack (S/N #709000 and above) in approximately 35 minutes. NCQC-12 Quick Charger is supplied in integral carrying case which features 2 charge wells . . . . . **.4,000.00**
- NOTE: The NCQC-12 Quick Charger will charge NC-12 Battery Packs (with serial numbers below #709000) overnight.

## 35mm Modifications and Accessories

- 3G141** CP/Arri 400' magazine modification, for customer supplied magazine . . . . . **\$1,950.00**
- 3J184** Power cable for CP/Arri 35 2C, as spare . . . . . **.400.00**
- 3J185** Power cable for Arri 35 III, 35BL, and 16SR. . . . . **.400.00**
- 3H100** Case for 2 CP/Arri 400' magazines, as spare. . . . . **.200.00**
- 3J183** Switch cable, for Arri 35BL/Steadicam, as spare . . . . . **.200.00**

## Accessories for Steadicam

- 3L140** Steadicam Universal Model III Camera Operator's Vest. Features removable washable pads and "pin-and-cone" parachute-style, quick-release system . . . . . **\$4,250.00**
- 3M000** Low mode cage, for use with most portable film or video cameras and existing Steadicam . . . . . **.550.00**
- 3M005** Low mode bracket, for use with Arri 35BL and existing Steadicam. . . . . **.550.00**
- 3M007** Robings J Bracket, required for use with low mode cage (3M000 or 3M005) and existing Steadicam. . . . . **.150.00**
- 1L260** Camera mounting plate for CP-16R/Steadicam, as spare . . . . . **100.00**
- 3M001** Camera mounting plate for Moviecam/Steadicam, as spare . . . . . **.385.00**

**Steadicam**

**3M000**

- 3M003** Camera mounting plate for Arri 16SR/Steadicam, as spare . . . . . **\$ 100.00**
- 3M004** Camera mounting plate for Aaton/Steadicam, as spare . . . . . **100.00**
- 3M002** Camera mounting plate for Sharp XC-700/Steadicam, as spare . . . . . **.300.00**
- 3M010** Camera mounting plate, multi-purpose for many portable video cameras . . . . . **100.00**
- 3M008** West Docking Bracket, permits camera mounting platform portion of Steadicam to be mounted on existing lighting stand (5/8" stud) when not in use by operator . . . . . **.225.00**
- 3M009** Wheelchair Mount, permits Steadicam arm to be mounted to moveable or fixed objects . . . . . **.800.00**
- 1L417** "Compact Vehicle" Kit Model III — Ideal for use with Steadicam while shooting in tight quarters, inside a vehicle (helicopter, small airplane and boat, compact car, etc.) . . . . . **.675.00**
- 5L100** Garfield Adaptor, mounts existing Steadicam arm to dolly or tripod . . . . . **.750.00**
- 1J273** Ground Strap (for camera mounting plate), as spare . . . . . **10.00**
- 1J240** Coaxial Cable, 30' length, with terminations to power supply unit and monitor . . . . . **.40.00**
- 3M020** Steadiworm accessory. Facilitates precision left/right balance of camera mounting assembly. Provides fingertip control for rotation of the electronics module. . . . . **.675.00**
- 3M011** Clamp plate assembly for Arri 35BL . . . . . **.300.00**
- 3M022** Clamp plate assembly for Ikegami HL-79 . . . . . **.475.00**
- 3M024** Standard clamp plate assembly, as spare . . . . . **.300.00**

## Steadicam Cases

- 3H300** Hard case for Steadicam camera mounting platform . . . . . **\$475.00**
- 3H302** Soft case for stabilizer support arm. Conveniently made to fit inside of vest case . . . . . **.60.00**
- 3H301** Soft case for Steadicam vest . . . . . **150.00**

# SERVO-CONTROL SYSTEMS

## WRC-3A Wireless Lens Control System

• Provides convenient radio control of focus, iris and zoom functions on motion picture and video zoom lenses • Battery powered system eliminates the need for physical contact between the camera assistant and camera, enhancing flexibility of shooting positions • Ideal for dolly, crane, or Steadicam shots • Handheld transmitter features individual dual control knobs • JB-3 junction box mounts on the shooting camera and permits use of the WRC-3A system when not being used in conjunction with Steadicam • Universal motor mounting bracketry allows WRC-3A servo-motors to be mounted off of the Steadicam Camera Mounting Plate, so that the lens is free of the motor weight • This system of support tubes and clamps may be used with most camera/lens combinations

- 1S306 3-Channel Wireless Servo-Control System**  
 Includes WRC-3A 3-channel wireless servo-control transmitter (1S300); RCR-3A 3-channel receiver (1S301); RCR-3A to programmer cable (1J200); NC-4 battery pack (1K152); NCC-6 charger (1K161)  
 NOTE: Add appropriate Motors/Bracketry Kit . . . \$4,000.00
- 5S306 3-Channel Wireless Servo-Control System for Video Cameras**  
 Please specify Fujinon, Canon or Angenieux Lens. Same components as 1S306. . . . . 4,125.00
- 1S350 Universal Motors/Mounting Bracketry Kit**  
 (Video or film cameras). Includes: two (3S400) LM-3 servo motors; two (1S351) long Motor Mounting Brackets for 1/2" rods; two (1S358) 1/2" Main Support Rods. NOTE: For use with wireless or cable operated servo control systems. . . . . 3,000.00
- 5S350 Universal Motor/Mounting Bracketry Kit**  
 (Video or film cameras). Includes: one (3S400) LM-3 servo motor; one (1S351) long Motor Mounting Bracket for 1/2" rod; one (1S358) 1/2" Main Support Rod. NOTE: For use with wireless cable operated servo control systems . . . . . 1,500.00
- 1S300 3-channel wireless servo-control transmitter, as spare. Model WRC-3A (includes antenna) . . . . . 900.00**
- 3M006 Junction Box (JB-3), permits WRC-3A 3-channel wireless control to be used with most film camera/lens combinations when Steadicam is not in use . . . . . 450.00**
- 3S400 CP LM-3 Servo Motor, high-torque with two operating ranges. Includes: installed idler gear, servo assembly potentiometer and cable . . . . . 1,400.00**
- 1S345 Heden Servo Motor. Includes: installed idler gear, servo assembly and potentiometer with cable (1J260) . . . . . 1,850.00**
- 1J260 Cable, for focus, zoom or iris motor. NOTE: For use with Cinema Products' servo motors only . . . . . 120.00**
- 1S347 Heden Motor Kit for focus, iris, or zoom. Provides Idler gear and potentiometer so that customer may convert existing motor to be used with Cinema Products WRC-3A. Does not include mounting bracketry or lens gears . . . . . 1,000.00**
- 1K152 Battery pack — NC-4 . . . . . 160.00**  
**1K161 Battery charger — NCC-6 (for use with NC-4 battery pack) . . . . . 70.00**

## Servo-Control Universal Motor Mounting Bracketry, (as spares)

- 1S358 Universal main support rod, 1/2" . . . . . \$ 40.00**  
 Mounts onto Steadicam clamp plate
- 1S351 Motor support bracket, long. Clamps around motor and 1/2" rod . . . . . 140.00**
- 1S352 Motor support bracket, short. Clamps around motor and 1/2" rod . . . . . 110.00**
- 1S353 Parallel rod clamp. Permits "stacking" of 2, 1/2" tubes . . . . . 110.00**
- 1S354 Parallel rod adaptor clamp. Adapts 5/8" rod to 1/2" . . . . . 110.00**
- 1S355 Parallel rod adaptor clamp. Adapts 15mm rod to 1/2" . . . . . 110.00**
- 1S356 Parallel rod. 2" long, 1/2" dia. . . . . 30.00**  
**1S357 Parallel rod. 4" long, 1/2" dia. . . . . 30.00**

# CINEMATOGRAPHY ELECTRONICS, INC. SPEED CONTROL EQUIPMENT

1625 Stanford St.  
Santa Monica, CA 90404  
(213) 829-1811

## Mini Crystal Control—MC<sup>2</sup>

- Ultralight, ultra small unit • Over 120 crystal speeds • State-of-the-art electronics • Versatile and compact • Advanced digital switch pad for selecting crystal speeds • LED tach • LED ft./meter counter • On/off switch • Battery indicator • Rugged construction • Compatible with many cameras including: 35BL, 35BL-2, 35BL-3, 35BL-4, 16SR, 16SR HS

Mini Crystal Control MC<sup>2</sup> .....\$2700.00

## Crystal High Speed Control

- Replaces the riser block used below the ARRI 35-3 • 132 crystal speeds, from 1 fps to 130 fps, in 1 frame increments • TV speeds of 29.97 fps and 23.97 fps for filming with 180° and 144° shutter angles respectively • Continuously variable speed knob is presettable with a range of 3 to 125 fps • Efficient speed ramp that automatically accelerates the camera to the pre-selected speed without pausing or shifting • Allows high speed filming with Arriflex 1000' magazines without the worry of film jamming or breakage • Two "tri-colored" (red, yellow, green) LED battery condition monitors • LED tach • Footage counter • Two 11-pin connectors for "zoom control" power or other accessories • Can be used with HMI lamps of either 50 or 60 cycle line frequency

Crystal High Speed Control (for ARRI-3) .....\$3125.00  
Follow Focus Bracket (for CHSC) .....75.00

## 16 SR Speed Control

- Adds performance and features to the Arriflex 16 SR camera • 75 crystal speeds from 1 fps to 75 fps in 1 frame increments, and 150 crystal speeds in 1 frame increments for the High Speed SR camera • Digital LED tach • Footage/meter counter with reset • Red and green LED battery condition monitor • Out-of-sync beeper and volume control • Machined out of two solid blocks of aluminum • Anodized to a satin finish with engraved lettering • Integral sliding door provides protection from accidental bumping to the digit switches • 7 oz. (200g) • Attached in place of the exposure meter • Shape provides full use of the rotating eyepiece, even with the finder extension • Electrical connection is made through a special wire harness internal to the camera, leaving the camera exterior free from cumbersome cables and wire • Flicker-free filming with either 50 cycle or 60 cycle line frequency

16 SR Speed Control .....\$2700.00

## Precision Speed Control

- For filming computer/video monitors, projectors, or HMI lights • Over 50,000 different crystal speeds are possible, from 1 through 50 fps in .001 fps increments • Speed changes are easily accomplished with 5 pushbutton switches which also display the actual camera speed • Phase shift button can be used to slightly alter the film speed while the camera is running, synchronizing the film to a flickering image • Adjustable clamp for easy attachment to a camera or pan/tilt handle • Electrical connection is made through a single plug on a 4' coiled cord • Ideal for eliminating the scan-line while filming

Precision Speed Control .....\$1400.00

## HMI and TV Crystal Control

- Will remove the irritating TV scan line and allow flicker-free HMI filming at various frame rates • Will crystal control many cameras, including ARRIFLEX 35-3, 35BL, 16SR, and with an optional adaptor all Aaton, Gizmo, and Mitchell Fries cameras • Flicker-free results at the following crystal speeds: 7.5, 15, 24, 30, 40, 60 and 120 fps • European filming • Selectable speeds are 6.24, 12.5, 20, 25, 33.3, 50 and 100 fps

HMI and TV Crystal Control (with auxiliary connector) .....\$700.00

## Cine-Check Optical Tach

- Small, handheld optical tach made especially for the film-video industry • Easily reads AC line frequency by simply pointing the sensor at a HMI or incandescent lamp • Will also read video or computer flicker scan rates directly from a monitor • Reading is in frames per second (accurate to .01 fps)

Cine Check (with carry case) .....\$600.00

Precision Speed Control

Crystal High Speed Control

## Intervalometer

- A relatively slow-changing event can be recorded on film and then projected over a few seconds or minutes • Can be used with most 16 and 35mm cine and still cameras including Arriflex, Mitchell, Nikon and Canon • 300 highly accurate crystal interval settings from 1 sec. to 100 hours • LED digital counter with reset that displays the number of frames of film that have been exposed • Manual trigger button for special intervals or testing • For cameras that cannot furnish the proper voltage (12-40V) an additional auxiliary battery cable is available • Will trigger the camera with either a shorting contact or a positive trigger pulse and is not polarity sensitive

Intervalometer .....\$600.00  
Cable, Intervalometer .....75.00

## Single Frame Modification Kit

- For Arriflex-3, 35BL and 16SR cameras • 1/3 second exposure • No external power necessary • Compatible with Cinematography Electronics Intervalometer • Can be controlled from a handheld pushbutton • No mechanical modification is required to the camera

Single Frame Modification Kit .....\$200.00

## Strobe Sync Control

- Will synchronize an electronic flash to the shutter of any ARRI-3, 35BL, or 16SR camera • Will trigger a flash once per frame, also can be set to trigger every 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup>...16<sup>th</sup> frame • Will flash for the eyepiece, this allows the cameraman to view the special strobe effect while filming • Can be used at any speed up to 250 fps • Will trigger most popular strobes

Strobe Sync Control .....\$900.00  
Cable, Strobe-Unilux .....75.00

## Aaton/Gizmo/Fries Adaptor

- Can be used with the Cinematography Electronics Precision Speed Control or HMI TV crystal controls • Crystal filming speeds of 30 fps and 29.97 fps along with 50,000 other crystal speeds are easily attainable with this handy adaptor. Simply plug adaptor between camera and speed control

Aaton/Gizmo/Fries Adaptor .....\$ 400.00  
Cable, Adaptor (specify camera) .....75.00  
Video Sync Control .....3600.00

# TIME CODE PRODUCTS

## CDI-716A

### Microprocessor-Based Time Code Generator

• Microprocessor-based for future upgrades • Operational parameters and preset easily loaded via front panel • Generates SMPTE, EBU or film code formats • All frame rates • Multi-function jam-sync • Jam-sync coding with user selectable offsets • Generates 4-field NTSC RS-170A or 8-field PAL color code • Internal time of day clock • Selectable SMPTE "Phase Bit" • Programmable operation modes from front panel • Non-volatile memory on user presets and set ups

### Specifications

**Video Input**  
 Loopthrough: .5V to 2V, 75 ohm not terminating  
 Black burst composite sync

**Color Field ID:**  
 Field ref pulse line 3 to line 20 field 1

**Tachometer Input**  
**Frame Rate:** X1 through X256 per frame

**Code Output**  
**SMPTE/EBU or Film Standards:**  
 .5V to 2V p-p, factory set  
 1V p-p

**Jam Code Input**  
**SMPTE/EBU or Film Standards:**  
 300mV to 10V p-p

**Rate Output**  
**2X Frame Rate Tone:**  
 .5V to 2V p-p  
 Factory set 1V p-p

**Power:** 115V/230V, 50/60Hz  
**Dimensions:** 1 3/4" H x 19" W x 14" D  
 Rackmounting ears

CDI-716A .....\$2650.00

## CDI-735L Time Code Reader With Front Panel LED Display

• Decodes 30-frame SMPTE and 25-frame EBU code formats • Eight-digit front panel display selectable for time or user data • Error bypass eliminates faulty readings by replacing defective code with sequentially correct code • Frames-delete function for uncluttered viewing • Hold for capture of edit points • Wide range decoding and high sensitivity front end • LED time or user data readout • Single rack unit

### Specifications

**Code Input**  
**Amplitude:** 10mV to 10V p-p  
**Bandwidth:** 1/30 to 80X play speed  
**Impedance:** 10K ohm, balanced, 3-pin XLR connector

**Reshaped Code Output**  
**Format:** Same as input, reshaped  
**Amplitude:** +4dBm in 600 ohm, 3-pin XLR connector

**Risetime:** Selectable 25µsec/50µsec  
**Controls:** Time/user select  
 Display freeze  
 Frames delete

**Indicators:** Drop frame  
 Color frame  
 Data present  
 Error

**Options:** Serial RS-232/422 data output  
 Parallel BCD data output

**Power:** 115V or 230V  
**Dimensions:** 1 3/4" H x 19" W x 14" D

CDI-735L .....\$1595.00  
 -300 RS-232 Serial Data Output option .....260.00  
 -400 RS-422 Serial Data Output option .....260.00  
 -500 BCD Data Output option .....240.00

CDI-735L

## CDI-735CD Time Code With 8-Channel Coincidence Detector

• Error Bypass eliminates faulty readings by replacing defective code with sequentially correct code • Decodes all frame rate formats • 8-digit LED display of time or user data • Built-in coincidence detector with 8 controlled outputs • 3 modes for programming coincident times — Front panel numeric keypad for event times input — Stores capture value on-the-fly from incoming code — Optional remote programming via RS-232/422 serial data port • All set up parameters and event values stored in nonvolatile memory

### Specifications

**Code Input**  
**Amplitude:** 10mV to 10V p-p  
**Bandwidth:** 1/30 to 80X play speed  
**Impedance:** 10K ohm balanced, 3-pin XLR connector

**Restored Code Output**  
**Format:** Same as input, reshaped  
**Amplitude:** +4dBm into 600 ohm 3-pin XLR connector

**Risetime:** Selectable 25µsec/50µsec  
**Coincidence Detector:** Coincidence times programmable via front panel controls or optional serial data (RS-422) input

**Outputs:** Eight controlled outputs with 1 sec. TTL pulse (Form C relays optional)

**Options:** Opto isolator  
 "Form C" relay  
 Parallel BCD output

**Power:** 115V or 230V, 50/60Hz  
**Dimensions:** 1 3/4" H x 19" W x 14" D  
 Rackmounting ears

CDI-735CD .....\$2160.00  
 -040 Opto-Isolator Output option .....120.00  
 -050 Form C Relay Contact Output option .....140.00  
 -300 RS-232 Serial Data Output option .....260.00  
 -390 RS-232 Serial Programming Port option .....460.00  
 -400 RS-422 Serial Data Output option .....260.00  
 -490 RS-422 Serial Programming Port option .....490.00  
 -500 BCD Data Output option .....240.00

# TIME CODE SYSTEM/ SYNCHRONIZER CONTROLLER

## CDI-750 Time Code System

- Extended sync source selection • Reads longitudinal time code from 1/30<sup>th</sup> to 80 times play speed • Built-in time-of-day clock • Microprocessor based, software controlled • Programmable jam sync mode operation • Instant selection of 24, 25, 30 or Dropframe Time Code • Two 8 digit LED displays showing reader and generator time code • Clustered Key Switches "operator friendly" • Memory Retention of set-up on power loss • Fully positionable video inserter • Meets both SMPTE and EBU longitudinal time code specifications, including time date, user data, status bits and drop frame or color frame indicators • Accepts color field I.D. pulse required for color video editing • Recognizes 4-field NTSC and 8-field PAL encoding standards • Time base selectable between external video sync or internal crystal reference • Generates a two-times frame rate sine wave output for resolver applications • Generates "burst" and "continuous" time code formats • Full-featured video keyer with two separate outputs and four character sizes • Configured with opto-isolators or optional Form C relays • 16 programmable, time code operable general purpose interfaces control studio or special effects equipment with frame-accurate timing • Communicates with or controlled by a computer via its RS-232/422 computer interface • Fully compatible with the SOFTOUCH™ Audio Editing System

The reader and generator can be individually tailored to immediate needs, while the system's state-of-the-art software controls make it readily adaptable to future enhancement.

## Specifications

### CODE INPUT

**Amplitude:** 10mV to 10V p-p  
**Bandwidth:** 80 bps to 192K bps  
**Impedance:** 10K ohm balanced on 3-pin XLR connector

## CDI-4800

### Shadow II Synchronizer Controller

- Typically interlocks in a two to four seconds in play • Exclusive chase mode maintains strict interlock even when the master machine is in fast forward or rewind • Wide Band reader assures time code readability from 1/50<sup>th</sup> to 80 times normal play speed • At higher wind speeds, the Shadow II utilizes available tach pulses to maintain synchronization until head contact is made again • Interchangeably locks to code, video sync and 50/60Hz tone • A unique software "filter" can eliminate wow and flutter transfer for the smoothest, most stable lock possible in any application • Specifically designed for direct computer interface • RS-232C/RS-422 interface control makes it compatible with video/audio editing systems, mixdown consoles and virtually any computer device, including personal computers

Its powerful internal microprocessor enables the Shadow II to dynamically learn the control characteristics using SMPTE/EBU standard time code as the reference, optionally augmented by an external sync signal, the Shadow II continually adjusts a transport's capstan speed to keep it accurately synchronized to another transport within 1/100<sup>th</sup> of a frame (1/3000<sup>th</sup> of a second). When multiple Shadow IIs are connected in a series, numerous transports can be interlocked to a Master transport.

Use a Softouch or Shadowpad controller with Shadow II, for additional power of transport control. Along with standard transport motion and autolocation commands, this power includes offsets up to 24-hours, selection of the speed and type of transport interlock, subframe-accurate record and mute commands, time code and offset memory.

## Specifications

### SYNCHRONIZATION TOLERANCES

**Accuracy:** ± 50µs  
**Resolution:** ± 0.5µs  
**Transport Speed:** 1/50<sup>th</sup> to 80 times play speed  
**Normal Lock Rate:** 1/2 play speed or 2x play speed  
**Slow Lock Rate:** 18 subframes/sec. to 15 frames/sec., selectable  
**Typical Lock-Up Time from Stop:** 2-5 sec.

CDI-750

### RESTORED CODE OUTPUT

**Format:** Same as input, reshaped, retimed  
**Amplitude:** + 4dBm into 600 ohm 3-pin XLR connector  
**Risetime:** Selectable 25µs/50µs (internal selection)  
**Amplitude:** Preset 1V p-p, adj. .5V to 2V p-p

### VIDEO INPUT

**Format:** NTSC, PAL, SECAM composite video  
**Level:** 0.5V to 2.0V p-p  
**Impedance:** Non-terminated, bridging, BNC connector

### CODE OUTPUT

XLR connector, SMPTE/EBU standards, Factory set 10PK to PK, adj. .5V to 2V

### RATE OUTPUT

2x XLR connector, Frame rate (Format C), SMPTE/EBU standards, Factory set 1V p-p, adj. .5V to 2V p-p

### VIDEO OUTPUTS (2)

**Format:** Same as input with Time/User characters from reader, generator or both  
**Level:** 1.0V p-p (adjustable)  
**Impedance:** 75 ohm unbalanced, BNC connectors, Keyer black & white, Level internally adjustable

CDI-750 . . . . . \$3995.00

CDI-4800

### INPUTS

#### MASTER AND SLAVE

**Time Code:** 24/25/30 frames/sec. and Drop Frame  
**Auxiliary:** 50/60Hz  
**Command Indication (tallies):** Active low/variable threshold  
**Direction Sense:** Floating logic input  
**Tach Frequency Range**  
**Play:** > 4Hz  
**Maximum Wind Speed:** < 2.5kHz

### OUTPUTS

#### MASTER AND SLAVE

**Commands:** Opto-isolated open collector

#### SLAVE ONLY

**Capstan Speed Override**  
**Voltage Output (1x):** 12V max. swing within ± 12V range

#### OUTPUTS

#### SLAVE ONLY

**Voltage Output (2x):** 30V, 15V max. swing within ± 30V range (user supply required)  
**Frequency Output:** 45Hz-40kHz floating TTL compatible

### SPECIAL INPUTS

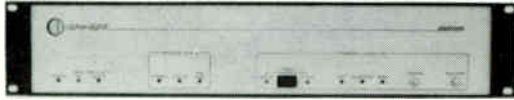

**Video Reference Input:** Nominal impedance—1M ohm or 75 ohm, switch selectable  
**Video Reference Types:** Composite sync, vertical drive, black burst, color bars, composite video

CDI-4800 Shadow II Transport Synchronizer . . . . . \$3395.00

# EDITOR INTERFACES

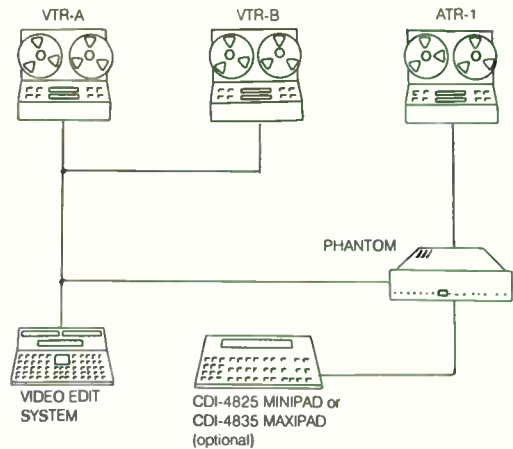

CDI-4810

### CDI-4810 Phantom VTR Emulator

- Interfaces Video Editing Systems to Audio Transports
- RS-422 in • Parallel out • Compatible with Ampex, Sony and other protocols (Selectable from an externally accessible dip switch)
- Event Controller (x4 Events)
- Interface with Shadowpad Mini and Shadowpad Maxi

The Phantom Emulator accepts information from the video editing system via the RS-422 interface and provides parallel information to the audio transport. In addition, you can use it to control U-Matic type VCRs to video editing systems designed for 1" VTRs.

Designed around a high speed microprocessor, the Phantom also provides control of up to four events. It can interface with the 4835 Shadowpad-Maxi to provide event control and offset entry as well as external control of the slave transport if required.

### Specifications

- Mechanical:** Dimensions: 3 1/2" H x 17" W x 13" D, rack-mountable  
 Weight: 16 lbs.
- Electrical:** Voltage—115/230, switch selectable  
 Frequency—50/60Hz  
 Power—40W (typical)
- Standard Accessories:** Power Cord  
 Instruction Manual
- CDI-4810 ..... \$2550.00

### CDI-4825 Shadowpad-Mini Offset Controller

- Enter offset register information to the Shadow II Transport Synchronizer
- RS-232 Communications
- Highly Legend Display
- Control of System Registers
- Offset Control

The Shadowpad-Mini allows you to enter offset register information and recall and modify system register information. Plus it enhances the power of the Shadow II Transport and can be used with both the 4700 and 4800 Shadows.

Primarily developed to control offset between transports, the Minipads keyboard display provides status information of the Shadow II and transports connected to it. The Minipad keyboard allows such features as trim, recall, retard, store, advance, message, and display modes.

CDI-4825

### Specifications

- Mechanical:** Dimensions: 2 3/4" H x 6 1/2" W x 8 1/2" D  
 Weight: 2 lbs.
- Electrical:** +8VDC from Shadow II
- Standard Accessories:** 20' Interconnect Cable  
 Instruction Manual
- CDI-4825 ..... \$695.00

### CDI-4835 Shadowpad-Maxi Controller

- Team it with the Shadow II Transport Synchronizer
- RS-232 Communications
- Independent Transport Control
- Highly Legend Display
- Control of System Registers
- Full Function Keypad
- Offset Control

The 4835 gives the operator complete control of the Shadow II's information display. Plus the full function keypad displays status and operation of the Shadow II and transports connected to it.

Independent transport control, speed, type of interlock and modification of slave offset parameters are just a few of its extended features.

CDI-4835

### Specifications

- Mechanical:** Dimensions: 2 3/4" H x 11" W x 8 1/2" D  
 Weight: 2 lbs.
- Electrical:** +8VDC from the Shadow II
- Standard Accessories:** 20' Interconnect Cable  
 Instruction Manual
- CDI-4835 ..... \$995.00

# AUDIO EDIT CONTROLLER/ TC GENERATOR/READER

## CDI-4890 Softouch-PC Audio Editing Controller

- Simplifies and controls time-code applications. Facilities generating or reading both SMPTE and EBU standard longitudinal or VITC code in choice of 24, 25, or 30 drop-frame format
- Regenerating code or jam syncing code eliminates drop-outs or "patch work" code easily and quickly
- Allows optional triggering of events with frame-accuracy, so special effects cart machines and other studio equipment can be easily brought into the editing process
- Supplies a time-adjustable beep tone for cueing talent
- Permits "hot" or preprogrammed record "punch in" for frame-accurate "on the word" edits and overdubs
- The preview function is a valuable tool, enabling review of edit decisions without recording

The Softouch-PC's power comes from its ability to streamline the audio editing process. Its range of memory functions speeds up editing sessions and helps eliminate costly errors.

Sixteen Softkeys™ permit repetitive or intricate pre- and post-production editing routines to be executed at the touch of a single key. Any command or routine that can be executed manually on the Softouch keyboard can be done automatically with Softkeys. Set up each Softkey to perform a single task, string together multiple tasks or multiple Softkeys, even perform calculations and carry messages and prompts for the operator. Plus, the Softkey sequences can be modified, erased or replaced at any time.

Loop Memory provides the flexibility to define, modify and save all pre- and post-roll data, beep-tone setting, trim, mark in/out and record in/out data for up to 100 loops at one time. Choose to cycle through any individual loop, or execute complex assemblies with a minimum of keystrokes. Additional "scratch-pad" memory (to store edit points) is yet another feature of Softouch's intelligence. A virtually maintenance-free internal battery preserves the programmed keys when the unit is shut off.

As more powerful microprocessors and memory modules become available, Softouch will support them. Standard personal computer operating systems techniques are also employed to allow for integration of a wide variety of future studio-related products. The Softouch-PC's architecture ensures that system functionality can expand at a pace consistent with the latest technical advances in sound recording, engineering, producing and editing.

Softouch-PC

## CDI-735V Time Code Reader with Video Character Inserter

- Decodes 30-frame SMPTE, 25-frame EBU and 24-frame film formats
- Frame-accurate, wide-speed decoding from 1/30<sup>th</sup> to 80 times play speed
- Multi-function video character inserter. Switchable to display time or user data. Full-raster positioning via "soft control". Multi-size characters. Remote keyer control
- Unique error bypass eliminates faulty readings by replacing defective code with sequentially correct code
- Front panel frames and mask control
- Reshaped code output to feed edit computer
- Front panel and video display of drop frame and color frame modes
- All set-up parameters stored in nonvolatile memory
- High sensitivity front end

Designed around a high speed microprocessor, this time code reader allows error-free, frame-accurate decoding of time and user data. Plus it has a multi-function integral video character inserter that supplies a monitor display of combined code information superimposed over program video.

The CDI-735V is ideal for generating "burned in" workprints.

### Specifications

#### Code Input

<b>Amplitude:</b>	10mV to 10V p-p
<b>Bandwidth:</b>	1/30 <sup>th</sup> to 80 times play speed
<b>Impedance:</b>	10K ohm balanced, 3-pin XLR connector

#### Reshaped Code Output

## CMX 100 ELECTRONIC EDITING SYSTEM

### Integrated:

#### Edit Controller/Video Switcher/Audio Switcher & Mixer

• Commercials/news/sports/promos/short segments • A/B roll with cuts/dissolves/fades • 3 lightweight, portable pieces: 3 1/2" rack electronics; console; 12" monitor

### Video:

Sources: VTRs A/B • Aux 1 and 2 • Black keying via customer supplied DSK or CGN

### Audio:

Sources: • VTRs A/B (2 channel) • Aux 1 and 2 (1 channel) — aux can be mike or line • 6 input faders • Built-in tone generator • VU type meters for 2-channel output • Audio-follow-video (user defined) or breakaway

### Console Organization:

• Track selection • REC/PVW keys • Video program/preset • Audio program/preset • VTR motion and selection keys • Keypad • Transition keys • Audio faders • 4 GPIs • 2 keyer-triggers • VU metering

### Machine Control:

• SRCH knob • Play/stop/still/jog • Allstop

### Backspace Editing or Marks

#### Assemble or Insert Editing:

• Time code or tape timer (control track)

#### Time Code/Tape Timer Numbers—Ease of Entry:

• Set in/out • Trim • Duration

### CRT Display:

• Menus • Windows • Highlighting • Edit Area: VTR position/status, edit in/out/duration • Display control: remove/display durations, unused zeros, etc.

### Keypad:

Numbers: Becomes number pad when required i.e. setting in timecode • Direct Functions: • Go to • Trigger list • Initialize • More (key): BVB preview, recall marks, match-cut calculate (into last edit) keys 1-4 become GPIs during preview or record • Set/duration/trim • CGN • Help • Replay • Open edit

### Initialization:

• Time code/timer • Lock tolerance • Fast/slow dissolve rates • Saves setup in memory • Port assignments • Audio-follow • Marks or backspace • Display control

### Trigger List (20 Triggers):

• Triggers made on-the-fly in preview or record • Trigger scroll highlights active trigger

The following can be triggered in an edit: • Track select • GPIs • Audio and video crosspoints • Motion control (speeds not saved) • Keyers 1 and 2 • Cuts/dissolves

Modify individual or all triggers (delete, trim, enable/disable); Create (pre-program) trigger.

CMX 100

### Record List (Non-Volatile Memory saves list even when powered down):

• Any of previous 50 events can be recalled with triggers • Memory can be divided into up to 9 segments • Record time, duration, tracks and segment are shown

Event	DUR	Track	Segment
1.	10:00:00:00 30:09	VI2	1
2.	10:00:30:09 10:00	VI	3

The CMX 100 is an on-line three-VTR electronic editing system aimed directly at the short segment program production market. The CMX 100 provides control of A and B source VTRs, the record VTR, two auxiliary sources and black. In addition to four General Purpose Interfaces (GPIs), two Keyer triggers are included. The CMX 100 is available in both NTSC and PAL standards.

The 100 combines into a single desktop console all of the equipment needed to do finished product (on-line) television program editing. An operator has at his or her fingertips a 5-input video switcher, a 6-input audio switcher, and motion control of 3 VTRs. There is easy access to video dissolves, cuts and fades, and audio mixing.

The 100 is specifically designed for rapid assembly of short program segments in the most efficient and economical manner. Used as an on-line tool for the effective creation of high-impact promos, commercial spots, news or sports program segments, it can perform all of the necessary editing functions without tying up an entire studio and/or editing suite.

# EDITING SYSTEM

## 330A and 3100 Large-Scale Editing Systems

The 330A is a high-performance, large scale editing system priced to suit the most basic budget. Designed for both offline and online needs, features include Motion Memory, Match-Cut Calculation, Autoclean, Learn Keys, Master/Slave and Sync Roll. The 330A allows for future expansion by being directly upgradeable to the CMX 3100, 3400, 3400A, or 3600.

The 3100 has an expanded keyboard and adds enhanced features and speed. This 8- to 24-port system offers multiple EDL files, Autoclean, Match-Cut Calculate, Learn Keys, and other features designed to speed the editing process. Master/Slave and Sync Roll offsets are saved in the EDL. Superkit saves space and money by interfacing three VTR/ATRs with one interface card. The 3100 may be upgraded to a CMX 3400, 3400A or 3600.

### Machine Control Functions

- Rewind • Fast forward • Play • Stop (individual devices) • Slow
- Slow reverse • Shift/retard slow • Shift/retard slow reverse • Cue (individual devices) to head of preroll • Go to (330A only) • Replay: replays any recorded event • Still frame • Jog forward • Jog reverse
- Retard jog rate • Advance jog rate • Search (with GISMO option): up to seven speeds forward and reverse • Variable speed jog (with GISMO option) • Multiple machine motion control (with GISMO option) • All-stop • Record • Automatic reset of interface communications

### Edit Transition Selections

- Cut • Split cut ("L" cut) • Dissolve from/to • Dissolve rate • Short cut dissolve (with last dissolve rate) • Wipe from/to • Wipe code
- Wipe rate • Short cut wipe (with last code and rate) • Key in (background/foreground/duration) • Key out (background/foreground/duration) • Delayed key • Key fade up from black • Key fade to black
- Key cut in • Key cut out • Open end edit • Closed end edit

### List Management Functions

Sort modes: Sort by event number, Sort by record in time, Sort off Move event(s) in EDL • Re-edit events in EDL • Insert re-edited events in EDL with list update • Exit re-edit • Single or Block Move event(s) in program with Pull Up • Record start time • Delete events with pull up • Record on/off • Renumber events Autoclean: On or off during record, Cleans overrecords, Deletes duplicate events, Cleans multi-line events, May clean entire EDL while loading from disk (3100 only) Notes: Any edit in EDL may have notes, Multiple lines available, Delete a single line, a group or all lines off a note

### Edit Decision List Display/Input/Output

- Scroll List Up • Scroll List Down • Scroll to Event Number requested (Display) • Disk On: Saves each edit to disk after record • Punch On: Saves each edit to papertape after record • Print EDL in hard copy
- Reads papertape EDL • Disk Out: Stores EDL on disk • Single event
- Range of events • All events (default) • Multiple EDL files on floppy disk • Print: Prints EDL in hard copy • Increased display of events in NDF/DF EDL • Initialize Disk: Erases EDL from disk • Autoscroll: EDL scroll with Master (Record) machine motion • Print disk file directories in hard copy

### Automatic Edit Assembly Functions

- Sequential assembly ("A" mode) • Enable for assembly (by event number) • Disable for assembly (by event number) • Resume assembly • List enabled events/List disabled events (3100 only) • Reel-by-reel assembly ("B" mode, 3100 only)

### Hardware Options

- General Purpose Interface (GPI) • Fast, direct access to relays • All information goes to disk • Eight relays controlled • Up to 16 GPI triggers per event • GISMO • Jam sync (machine dependent) • Time code reader board (available with Multi-I<sup>2</sup>) • Motion memory (M<sup>2</sup>)

### Specifications

<b>System Configuration:</b>	Distributed processing
<b>Central Controller:</b>	DEC microcomputer
<b>Device Interface:</b>	Microprocessor controllers
<b>Device Interface Memory:</b>	EPROM
<b>Communication Format:</b>	Serial/9600 Baud/RS-232
<b>Communication Protocol:</b>	CMX 8-bit binary
<b>Edit Decision List Size:</b>	500 events. 500 additional lines for ancillary data, (330A) 700 events. 1000 additional lines for ancillary data (3100)
<b>Edit Decision List Format:</b>	CMX 3400A, CMX 3400, CMX 340X, CMX 3100, CMX 336XL, CMX 330XL, CMX 50, The Edge
<b>Edit Decision List I/O Disk:</b>	8" single-sided, single density, IBM 3740 format (option on 330A)
<b>Edit Decision List Printer/Paper Tape:</b>	Serial/300-9600 Baud/RS-232
<b>CRT Display Format:</b>	80 Characters per line/25 lines/60Hz refresh rate/non-interlaced
<b>Display Monitor (option):</b>	High resolution CMX terminal/broadcast video monitor
<b>Number of Devices Assignable:</b>	8 (330A) 24 (3100)
<b>Number of Devices Controllable:</b>	5 + GPI (330A) 8 (3100)
<b>Edit Accuracy:</b>	Frame accurate, color framed, PAL-pair self-correcting or manual for 4- or 8-field correction
<b>Time Code Standards:</b>	SMPTE drop/non-drop frame, EBU
<b>Tape Timer (machine dependent):</b>	Alternative to time code with use of Multi-I <sup>2</sup>
<b>Television Standards:</b>	NTSC/PAL/SECAM
<b>User's Keyboard:</b>	Alphanumeric Color Coded (330A) Expanded/alphanumeric color coded (3100)
<b>Remote Motion Control Device (option):</b>	Rotary control for search/slow motion/frame jogging (memorized recall available)
<b>330A</b>	.....from \$17,500 to 22,000.00
<b>3100</b>	Edit controller .....21,000.00
	Interface packages start at .....7,500.00

# EDITING SYSTEMS

## 3400/3400A/3600 Large-Scale Editing Systems

The 3400 is the industry-standard for large-scale editing systems. It offers the editor major advantages in productivity and speed including such features as Precue Auto Assembly, Auto Clean, eight user-defined keys, multiple EDL files, Match Cut Calculate, and Switcher Memory Upload/Download. The 3400 maintains versatility and plug compatibility with all CMX Intelligent Interfaces (I<sup>2</sup>s). Any CMX 330XL, 340X, 336XL, or 3100 system can be upgraded to a 3400.

The 3400A has all of the features of the 3400 and GISMO II. Expanded GPI, and Dynamic Motion Memory (DM<sup>2</sup>). DM<sup>2</sup> allows speed changes to be programmed, learned on the fly, stored to the EDL, and previous triggers may be modified. Fit/Fill mode allows 3400A to calculate expansion or compression of scenes. The 330XL, 336XL, 340X, 3100 and 3400 may be upgraded to the 3400A.

The 3600 offers the editor major advantages in productivity and speed, including such features as 4-channel audio control, Precue Auto-Assembly, Dynamic Motion Memory, Switcher Memory Upload/Download, Multiple EDL files, and Match Cut Calculate. The 3600 maintains versatility and plug compatibility with all CMX's Intelligent Interfaces (I<sup>2</sup>s). Any CMX 330XL, 336XL, 340X, 3100, 3400 or 3400A may be upgraded to a 3600 system.

### Machine Control Functions

- Rewind • Fast forward • Scan (dedicated key) • Reverse scan
- Play • Stop (individual devices) • Slow (3400A, 3600) • Slow reverse
- Shift/retard slow • Shift/retard slow reverse • Cue (individual devices) to head of preroll • GOTO (individual devices) to in-time display
- Replay: replays any recorded event • Still frame • Jog forward • Jog reverse • Retard jog rate (machine dependent 3400A, 3600) • Advance jog rate (machine dependent 3400A, 3600)
- Search (with GISMO option): up to seven speeds forward and reverse • Variable speed jog (with GISMO option) • Multiple machine motion control (with GISMO option) • ALLSTOP • Record • Automatic reset of interface communications

### Edit Transition Selections

- Cut • Split cut ("L" cut) • Dissolve from/to • Dissolve rate • Short cut dissolve (with last dissolve rate) • Wipe from/to • Wipe code
- Wipe rate • Change wipe pattern • Short cut wipe (with last code and rate) • Key-in (background/foreground/duration) • Key out (background/foreground/duration) • Delayed key • Key fade up from black • Key fade to black • Key cut in • Key cut out • Open end edit
- Closed end edit

### List Management

- **Sort Modes:** Sort by event number, Sort by record in time, Sort off
- Move Event(s) in EDL; Re-Edit events in EDL; Insert Re-edited events in EDL with list update • Exit re-edit • Resequence events in program with pull up • Record start time • Delete events with pull up • Record on/off • **EDL text editing:** Re-number events, Change A/V modes, Change reel numbers • **Autoclean:** On or off during record, cleans over-records, deletes duplicate events, cleans multi-line events, may clean entire EDL while loading from disk • **Notes:** Any edit in EDL may have notes, multiple lines available, delete a single line, a group or all lines of a note

### Edit Decision List Display/Input/Output

- Scroll list up/down • Page scroll up • Page scroll down • Autoscroll: EDL scroll with Master (record) machine motion • Display: move EDL highlight by event number; by record time code • Disk on: saves each edit to paper tape after record • Punch on: Saves each edit to paper tape after record • Punch save: punches paper tape EDL • Reader: reads paper tape EDL • Disk save: stores EDL on disk • Disk load: loads EDL from disk single event; range of events; all events (default) • Multiple EDL files on floppy disk • Print disk file directories in hard copy • Print: prints EDL in hard copy • Increased display of events in NDF/DF EDL • Choice of 3600 or downward compatible output for CMX PDP or LSI based systems (3600) • Event highlight for all lines in event (3600)

3400A

### Automatic Edit Assembly Functions

- Sequential assembly ("A mode") • Reel-by-reel assembly ("B mode") • Precue sequential assembly (looks ahead 30 events) • Precue reel-by-reel assembly (looks ahead 30 events) • Enable for assembly (by event number) • Disable for assembly (by event number)
- Resume assembly • List enabled events • List disabled events
- Enabled/disabled status saved on disk, printout (3600)

### Hardware/Options

- General Purpose Interface (GPI) (3400) • Fast, direct access to relays • All information goes to disk • Eight relays controlled • Up to 16 GPI triggers per event • GISMO (3400) GISMO II (3400A, 3600 standard) Jam sync (available with conventional I<sup>2</sup>) • Time code reader board (available with Multi-I<sup>2</sup>) • Motion memory (M<sup>2</sup>) (3400) • Dynamic Motion Memory (3400A standard) • General Purpose Interface (GPI) (3400A standard) • Fast, direct access to relays • One page relay/trigger screen • Devices activated with pulse or on/off trigger
- All information goes to EDL and floppy disk • 16 relays standard
- Additional relays (up to 64) optional • Programmable pulse duration
- Switchable TTL open collector • Up to 16 GPI triggers per event
- Printer buffer (3600)

### Specifications

## CHROME VIDEO TRIPOD SERIES

### VTR-F2 Professional "Fluid Head" Video Tripod

- Oil fluid panhead • Large platform camera quick release system • Extra stable heavy-duty 27.5mm channel leg assembly with tri-brace
- Large camera head assembly with flip-over design • Dual channels to accept light arm bracket accessories • Separate head adjustment knob to ensure professional tilting and panning actions correlated to the weight of the camera or camcorder • Built-in bubble level • Telescopic handle zooms from 10" to 15" • Geared elevator column • Heavy-duty channel leg assembly with tri-brace for extra stability • Opens to 62" — Closes to 26"

VTR-F2 Professional fluid head tripod . . . . . \$189.95

### D-10 Universal Tripod Dolly

- Professional durability, reliability, and construction • Collapses to a compact 18" for easy transport • Rugged cyclolac carry handle and leg clamp assembly • Unique single action leg locks • 3" diameter wheels lock individually • Adjusts to hold all tripods regardless of configuration or style • Provides that smooth, even roll for perfect videography • Chrome finish

D-10 Universal tripod dolly . . . . . \$69.95

### M-1 Deluxe Monopod

- Designed for use where space limitations prohibit the use of a tripod, but where stability is a must • All aluminum construction • Opens to 57" — Closes to 20"

M-1 Deluxe monopod . . . . . \$24.95

### VTR-65 Professional Video Tripod

- Spring loaded counterbalance head • 3-section (32mm) tubular aluminum leg design • Each leg section has easy grip knurled leg locks
- Leg tips feature retractable spikes for no-slip stability on any terrain
- Radial tri-brace ensures extra stability • All aluminum castings in steel gray/satin chrome finish • Built-in spirit level • Oversized metal control knobs for positive grip and safety locking • Opens to 72" — Closes to 29 1/2"

VTR-65 Professional video tripod . . . . . \$119.95

### VTR-60 Deluxe Video Tripod

- All aluminum design • Springloaded counterbalanced panhead
- Built-in spirit level • Heavy-duty 3-section channel legs with quick lever locks and radial tri-brace provide optimum stability • Extra height with positive action geared center column adjustment • Opens to 58" — Closes to 24"

## 1810/1830/1860 Series Solid-State CCD Color Cameras

- RGB or NTSC output • High Resolution: 754(H) x 488(V) picture elements • High Sensitivity: (2fc/20 lux) • White balance auto, manual or remote • AGC or manual gain • Zero geometric distortion: Selectable gamma (jumper selectable 0.5 to 1.0) • No lag or image retention • Low power consumption • Blemish free sensor • 365,000 picture elements • Adjustable C-mount • Genlock, optional • RS-170 crystal, optional • Low temperature operation, optional

### Applications

#### RGB

• Machine Vision: Pattern Recognition; Measurement and Inspection; Image Processing • Medical Imaging • True Color Analysis

#### NTSC

• Security and Surveillance • Medical Imaging • Microscopy • Image Processing • Inspection • Magnetic Interference • Environments: Subways; High Voltage Areas; Linear Accelerators

With a frame transfer image sensor of approximately 365,000 pixels 754(H) x 488(V), the 1800 displays as much as twice the pixel density and picture quality of most competitive models.

The 1800 is available in either true RGB or NTSC encoded versions. For RGB, the pixel density combined with a pure RGB color stripe filter produces independent, high resolution tri-color images in red, green and blue. This, in turn eliminates the need for peripheral decoding circuitry required in conventional single chip CCD color cameras. As a result, this color camera is noticeably more reliable.

The 1830 and 1860 Series cameras are used in environmental applications where protection from harsh surroundings is necessary. The 1830 is housed in a 3" barrel maintaining a relatively small and lightweight size.

The 1860 is housed in a 6" barrel for the purpose of accommodating a 6:1 or 10:1 zoom lens. A U.L. Classified explosion proof housing is also available as an option.

Automatic Gain Control (AGC) is incorporated in the 1800 Series to provide excellent sensitivity, and with low power consumption, allows flexible system integration and easy operation.

#### Electrical

- Pickup: Single CCD with pure RGB stripe filter using frame transfer method • Pickup Area: 8.8 x 6.6mm (Corresponding to 2/3" tube)
- Active Picture Elements: 754(H) x 488(V) — 251(H) x 488(V) per channel • Cell Size: 11.5µm(H) x 27µm(V) • Resolution NTSC: Horizontal 300 TV lines; Vertical 320 TV lines • Resolution RGB (per channel): Horizontal 188 TV lines; Vertical 320 TV lines • Sensitivity: 3200°K 2fc faceplate illumination for full video. Useable picture .30fc faceplate • Contrast Variation: > 5% overall @ 25°C • Scanning System: NTSC, 2:1 interlaced • Video Output: 1.0V p-p 75 ohms (NTSC); 0.7V p-p 75 ohms (RGB); (Sync signal on green channel or independent sync) • Gamma: 0.5 or 1.0 jumper selectable • AGC (NTSC only): 6dB variable gain (peak-average adjustable); Jumper selectable—on/off • Internal Adjustments (RGB only): Independent gain controls on Red and Blue outputs (Can be remoted—specify "Internal" or "Remote") Independent set-up controls on RGB output • Auto Lens (NTSC only): Peak average adjustable (Separate auto lens video eliminates AGC/auto lens interaction) • Signal-to-Noise Ratio: Luminance 46dB (gamma 1, gain 0dB) NTSC only • White Balance—NTSC Version: (Unique "through the lens" sensor, variable from tungsten to daylight, automatic or rear panel adjustable, or by remote control—switch selectable) • Power Requirements: 12VAC/DC ± 10%; 24VAC/DC ± 5%; 115VAC ± 10%, 50/60Hz with optional wall transformer • Power Consumption: 6W

### 1810 Specifications

#### ENVIRONMENTAL

**Ambient Temperature Limits**  
-10° to 50°C (14° to 122° F)

**Storage**  
-30° to 70°C (-22° to 157° F)

**Humidity**  
Up to 95% relative humidity

**Ambient Air Pressure**  
Sea level to equivalent of 10,000 feet (20" of mercury)

**Vibration**  
5 to 60 Hz with 0.020 inches total excursion (3.5 g's @ 60 Hz). From 60 to 1,000 Hz 3 g's rms random vibration without damage

**Shock**  
30 g's in any axis under non-operating conditions per MIL-E-5400T, paragraph 3.2.24.6

#### MECHANICAL

**Weight (less lens)**  
24 ounces

**Lens Mount**  
"C" Mount, 16 mm Format

**Camera Mount**  
1/4-20 threaded holes. See dimensional drawings

**Connectors**  
BNC Connector—Video out (NTSC)  
Hirose HR11-9BR-6S (RGB out)  
Hirose HR30-10R-6S (Auxiliary)  
Switchcraft TB4M (Lens drive)  
Switchcraft TB3M (Power in)  
Switchcraft TB5M (Remote) (RGB)

### 1830 and 1860 Specifications

#### ENVIRONMENTAL

**Ambient Temperature Limits**  
Operating: -10° to 50°C (14° to 122° F)

40° to 50°C (-49° to 122° F) with heaters, "L" Option

**Ambient Air Pressure**  
Two atmospheres (sea level) to equivalent of 100,000 feet (30,480 m) exceeding MIL-E-5400T paragraph 3.2.24.2, Class 3

**Humidity**  
Up to 100% relative humidity MIL-E-5400T paragraph 3.2.24.4 Equipped with standard Schrader tank valve (purge fitting) on camera housing to allow camera to be purged with dry nitrogen or other moisture eliminators, and to maintain housing interior at atmospheric pressure.

**Storage**  
-30° to 70°C (-22° to 157° F)

**Vibration - 1830**  
5 to 60 Hz with 0.020 inches total excursion (3.5 g's @ 60 Hz) From 60 to 1,000 Hz, 3 g's rms random vibration without damage

**Vibration - 1860**  
0.03" total excursion from 5 to 30 Hz peak random vibrations of 5 g's from 30 to 1,000 Hz without damage or degradation

**Air Contaminants**  
Withstands exposure to sand, dust, fungus, and salt atmosphere, MIL-E-5400T paragraphs 3.2.24.7, 3.2.24.8, 3.2.24.9

**Explosion**  
MIL-E-5400T paragraph 3.2.24.10

**Shock**  
30 g's in any axis under non-operating conditions per MIL-E-5400T paragraph 3.2.24.6

#### Acoustic Noise

Operates in extremely high acoustic noise environment (150 dB) eq. close proximity to high thrust rocket engine

**Underwater Operation**  
Camera head operates to 60 feet in depth (18.3m) with factory installed connector option available

#### MECHANICAL

**Weight**  
1832—4 pounds  
1835—5 pounds  
1860—16 pounds (less lens)  
17 pounds (Z10D lens)

**Lens Mount**  
"C" Mount, 16mm format

**Camera Mount**  
1/3-20 threaded holes  
See dimensional drawings

**Connectors**  
1830: Bendix PTO7C-14-18P  
1860: Bendix PTO7C-20-39P  
Mating connector supplies all functions, video, power and remote controls through single connector.

**Pressurizing Fitting**  
Standard Schrader Valve

**Purge/Relief Fitting**  
Pressure relief valve (1860 only)

**Cable—Camera to CCU**  
AC 27, AC 34 or equivalent, 500 feet maximum

**I.D. Generator**  
Optional

**Variable Phase Line Lock Switch**  
Optional

## 4700 Series

### Solid-State CCIR CCD Monochrome Camera

- **High Resolution:** 699(H) x 580(V) picture elements
- **High Sensitivity:** (To .07 lux/.007fc)
- Auto black for wide dynamic range or manual adjustable
- AGC with peak-average adjustment or fixed gain with manual adjustment
- Zero geometric distortion
- Selectable gamma
- No lag or image retention
- Low power consumption
- Blemish free sensor
- Over 400,000 picture elements
- Adjustable C-mount
- Line-lock or genlock, optional
- External H & V drive, optional
- Clock output, (13.374MHz) optional
- IR filters, optional

### Applications

- **Machine Vision:** Pattern recognition; Non-contact measurement and inspection; Bar code reading; Image processing
- **Robotics:** Automated visual control
- **Magnetic Interference Environments:** Subways; High voltage areas; Linear accelerators; NMR units
- **Remote Piloted Vehicles:** Land based, aircraft, submersibles
- **Microscopy**
- **Medical imaging**
- **Security/surveillance**

The 4700 Series Solid-State Cameras are ideal for applications that require both high resolution and high sensitivity. High resolution pictures are attainable without geometric distortion, lag or image retention. The 1/2" format CCD (Charge Coupled Device) image sensor of the 4700 Series generates sensitivity that closely matches standard silicon target imaging tubes.

Weighing 15.5 oz., the 4710 Series is suited for numerous applications including machine vision, image processing, robotics, process control and microscopy.

Automatic Gain Control (AGC) is incorporated in the 4700 Series to provide high sensitivity for use in low-light areas. The 4700 utilizes the frame transfer method and over 400,000 picture elements to generate a high resolution image with a contrast variation of  $\pm 5\%$ . Low power consumption allows flexible system integration and easy operation.

4710

## Specifications

### ELECTRICAL

- Pickup**  
Single CCD using frame transfer method
- Pickup Area**  
6.4 x 4.8mm (Corresponding to 1/2" tube)
- Active Picture Elements**  
699(H) x 580(V)
- Number of Picture Cells**  
732(H) x 290(V)
- Cell Size**  
9.2um(H) x 16.8um(V)
- Resolution**  
Horizontal 525 TV lines  
Vertical > 415 TV lines
- Sensitivity**  
2850°K faceplate illumination in fc. See Chart 1
- Contrast Variation @ 25°C**  
<5% overall
- Scanning System**  
CCIR, 2:1 interlaced
- Video Output**  
1.0 Vp-p 75 ohms unbalanced
- Gamma**  
0.5 or 1.0 jumper selectable
- AGC**  
6 dB variable gain (peak-average adjustable)  
Jumper selectable—on/off
- Auto Lens**  
Peak average adjustable  
(Separate auto lens video eliminates AGC/auto lens interaction.)
- Signal-to-Noise Ratio @ 25°C**  
50 dB (gamma 1, gain 0 dB)  
Unweighted
- Auto Black**  
Maintain set-up level at 7.5  $\pm$  5 IRE units if picture contains at least 10% black
- Power Requirements**  
12V AC 50 Hz or DC  $\pm$  10%,  
24V AC 50 Hz or DC  $\pm$  5%,  
220 / 240V AC 50 Hz  $\pm$  10%,  
with optional wall transformer
- Power Consumption**  
4.2W

### ENVIRONMENTAL

- Ambient Temperature Limits**  
-10° to 50°C
- Storage**  
-30° to 70°C
- Humidity**  
Up to 95% relative humidity
- Vibration**  
5 to 60 Hz with 0.082 inches total excursion (15 g's@60Hz). From 60 to 1,000 Hz, 5 g's rms random vibration without damage.
- Shock**  
30 g's in any axis under non-operating conditions per MIL-E-5400T, Paragraph 3.2.24.6.
- Altitude**  
Sea level to equivalent of 10,000 feet (20 inches of mercury).

### MECHANICAL

# HIGH RESOLUTION CAMERA

## 5300 Series Two-Piece Camera

• Microscopy and measurement applications • Resolution: Up to 1100 TV lines • 1" Image Tube: For superior quality and reliability, choose from Vidicon, Silicon Target or Newvicon® • FET: Low noise input • Line lock or genlock • Automatic beam control • Automatic light control • Geometry: 0.5% • Linearity: 0.5% • Adjustable Gamma Correction: From 0.5 to 1.0 • Low power consumption • 14MHz, optional • Standby, optional • Circular blanking, optional • Shading, optional • High sensitivity, optional • 60dB S/N, optional • H and V drives, optional • Power Options: 115VAC or 230VAC • Crystal controlled master oscillator, optional • Other image devices, optional (Saticon®, Chalnicon® or Lead Oxide, for example)

This lightweight camera head, with C-mount lens adaptor, is ideal for uses requiring high resolution characteristics, such as in microscopy and measurement applications. Usable picture resolution from 700 to 1100 horizontal TV lines is typical, depending upon the image tube selected. Designed for long-life and continuous operation, only one cable is required to connect the camera head to its camera control unit (CCU).

The 5300 CCU front panel controls include power on/off, automatic or manual white level, and automatic or manual black level. An optional highlight clipper control is available.

## Specifications

### ELECTRICAL

• Input Voltage (Specify): (a) 105VAC to 130VAC, 50/60Hz; (b) 210VAC to 260VAC, 50/60Hz; (c) 10.8VDC to 13.2VDC or 10.8VAC to 13.2VAC, 50/60Hz; (d) 21.6VAC to 26.4VAC, 50/60Hz • Input Power: 16W nominal (24W maximum) • Vertical Sweep Rate: 60Hz; or 50Hz with CCIR • Horizontal Sweep Rate: 15,750Hz for 60 fields; 15,625Hz for 50 fields with CCIR • Scanning: 2:1 interlace at 525 lines, 30 frames; or 625 lines, 25 frames with CCIR • Synchronization: EIA RS-170 specification; or jumper selectable CCIR (master oscillator is variable phase line locked, switch selectable in 60° increments; or jumper selectable genlocked). Crystal control optional available • Automatic Black Level: Maintains setup level at 7.5 ± 5 IRE units if picture contains at least 10% black with a horizontal dimension of at least 1.0% of picture height • \*Gray Scale Rendition: Renders all shades of gray on EIA TV Resolution Chart, 1956 • Gamma Correction: Adjustable from 0.5 to 1.0 • Output Video: 1.0V p-p or 1.5V p-p composite video, factory selectable • Geometric Distortion: Maximum of 0.5% within a circle that does not exceed picture height • Linearity: 0.5% • Image Tube Scan Failure Protection: In the event of horizontal or vertical scan failure, the image tube beam is automatically turned off • Horizontal Scan Frequency: Master oscillator, phase locked to power line. In genlock mode, with no external signal applied, master oscillator is line locked. Crystal control option available • Vertical Scan Frequency: Derived from master oscillator • Underscan/Overscan Capability: ± 10%

### ENVIRONMENTAL

• Ambient Temperature Limits: Operating: -4°F to 140°F (-20°C to 60°C); Storage: -65°F to 158°F (-54°C to 70°C) • Altitude: Sea level to equivalent of 10,000' (10" of mercury) • Humidity: 95% relative • Vibration: 0.03" total excursion from 5Hz to 30Hz; peak random vibrations of 5g from 30Hz to 1,000Hz, without damage or degradation • Shock: Up to 15g in any axis under non-operating conditions

# MONOCHROME CAMERA

## 5400 Series

### 2-Piece Camera

- For Microscopy and Measurement
- **Resolution:**  
Up to 990 TV lines
- **1/2" Image Tube:**  
Chalnicon®
- **Solid-State Circuitry:**  
For long life dependability
- **FET Input:**  
For clear, crisp, low-noise video pictures
- Line Lock or Genlock
- Automatic Beam Control
- Automatic Light Control
- **Geometry:**  
0.5%
- **Linearity:**  
0.5%
- **Adjustable Gamma Correction:**  
From 0.5 to 1.0
- Scan Reversal, Optional
- Circular Blanking/Shading, Optional
- Standby, Optional
- External Horizontal and Vertical Drives, Optional
- **Power Options:**  
115VAC or 230VAC
- Crystal Controlled Master Oscillator, Optional
- Portable or Rackmountable CCU

The 5400 Series individual camera head and camera control unit (CCU) are ideal for applications that require high resolution (up to 900 TV lines) from a small, lightweight video camera.

The camera head is 1 1/2" in diameter and 5" long and weighs less than 1 lb.

The 5400 camera is designed for such applications as robotics, image processing and pipe inspections. And with the options of circular blanking, shading, standby, along with its compact size and weight, the 5400 becomes a camera with exceptional characteristics for medical and scientific uses.

This monochrome camera accepts a standard C-mount lens and has a permanently attached 6' flexible cable with connector to interface with the CCU.

5400

## Specifications

### ELECTRICAL

**Input Voltage (Specify)**  
(a) 105 to 130VAC, 50/60 Hz  
(b) 210 to 260 VAC, 50/60 Hz  
**Special Order:**  
(c) 10.8 to 13.2 VDC or 10.8 to 13.2 VAC, 50/60 Hz  
(d) 21.6 to 26.4 VAC, 50/60 Hz

**Input Power**  
16 Watts, Nominal (24 Watts, Maximum)

**Vertical Sweep Rate**  
60 Hz; or 50 Hz with CCIR

**Horizontal Sweep Rate**  
15,750 for 60 fields, 15,625 for 50 fields with CCIR

**Scanning**  
2:1 interlace at 525 lines, 30 frames, or 625 lines, 25 frames with CCIR

**Synchronization**  
EIA RS-170 specification, or jumper selectable CCIR (master oscillator is line locked or genlocked, jumper selectable)  
Crystal control option available.

**Image Tube Type (Electrostatic Deflection/Magnetic Focus)**  
5404; 1/2" Chalnicon®, Cohu E5415

**\*Sensitivity**  
See Chart

**Signal-to-Noise Ratio (Visual Equivalent)**  
56 dB

**Resolution**  
See Chart

**Automatic Light Range**  
See Chart

### Automatic Black Level

Maintains setup level at 7.5 ± 5 IRE units if picture contains at least 10% black with a horizontal dimension of at least 1.0% of picture height

### Resolution Stability Vs. Temperature

Meets resolution specifications over operating temperature range

### Resolution Stability Vs. Voltage Variation

Meets resolution specifications over specified AC line voltage range

### \*Gray Scale Rendition

Renders all shades of gray on EIA TV Resolution Chart, 1956

### Gamma Correction

Adjustable from 0.5 to 1.0

### Output Video

1.0V or 1.5V p-p composite video, factory selectable

### Geometric Distortion

Maximum of 0.5% within a circle not exceeding picture height

### Linearity

0.5%

### Image Tube Scan Failure Protection

In the event of horizontal or vertical scan failure, the image tube beam is automatically turned off

### Horizontal Scan Frequency

Master Oscillator, phase locked to power line. In genlock mode, with no external signal applied, master oscillator is line locked  
Crystal control option available.

### Vertical Scan Frequency

Derived from master oscillator

### Underscan/Overscan Capability

10%

### ENVIRONMENTAL

#### Ambient Temperature Limits

Operating: -20° to 60°C (-4° to 140° F)  
Storage: -54° to 70°C (- 65° to 158°F)

#### Altitude

Sea Level to equivalent of 10,000 feet (10 inches of Mercury)

#### Humidity

95% Relative

#### Vibration

0.03" total excursion from 5 to 30 Hz, peak random vibrations of 5 g's from 30 to 1,000 Hz, without damage or degradation

#### Shock

Up to 15 g's in any axis under nonoperating conditions

### MECHANICAL

#### Camera Head (Less Lens)

Dimensions: 1.5" Diameter, 5.0" Long (3.8 cm D, 12.7 cm L)  
Weight: 1.0 pounds (0.45 kg).  
Front panel contains "C" mount adapter and vidicon retaining ring for back-focal adjustment

#### Camera Control Unit

Dimensions: see dimensional drawings  
Weight: 4.0 pounds (1.8 kg). Single or dual rack mount version of CCU is available with a Cohu 2383 rack frame

#### Type of Connectors

Camera Head: Multi-pin on end of pigtail  
Camera Control Unit: Multi-pin, BNC Video Out, Line Cord, Fuse and Holder

#### Cable Length (Maximum)

6' (182.9 cm) Superflex; 20' (609.6 cm) AC33

#### Controls

Auto/Manual Target, Auto/Manual Black Level, and Power On/Off

\*All specifications with 2854°K (incandescent illumination)

# CAMERA SYSTEM

## 8000 SERIES HIGH RESOLUTION TELEVISION CAMERA SYSTEM

- 1" Image Tube for superior resolution quality
- Automatic Sensitivity over 10,000:1 light range
- Fully Solid-State, with exception of image tube
- FET Input for clear, crisp, low-noise video
- Choose: Up to 1749 lines/frame
- 8, 16, or 32 MHz Bandwidths, selectable
- Front Panel Control of target, beam, focus, black level, and power
- Renders All 10 EIA Gray Shades with only 0.05 foot-candle illumination on image tube faceplate
- Less Than 1.5% Picture Distortion
- Adjustable Overscan and Underscan, White Peak Clipper, Gamma/Black Compressor, and Output Video
- CCU Can Be Up To 2000 Feet from camera head
- Fully Protected with regulated power supplies and automatic beam cut-off in the event of sweep failure
- Two BNC Video Output Connectors
- Operates on 115/230VAC, 50/60Hz

### OPTIONS:

- Variable Scan Rate Generator Module with jumper selectable line-locked or crystal controlled synchronization
- Blanking Generator Module operates from external sync pulse or EIA RS-170, 330, or 343, video signal
- Shading Circuit corrects for non-uniform response of lens and image tube

Designed for reliable, unattended, continuous-duty operation, the 8000 Series High Resolution Television Camera System provides maximum stability, detailed video information, superior corner resolution, and optimum flatness of field. This versatile system has a separate lightweight camera head and modularized camera control unit.

Typical applications which are ideal for use of the 8000 High Resolution System include virtually any instrumentation or monitoring need in medical, scientific, and industrial fields. The convenient small size and weight of the camera head allows interface with delicate instruments, such as laboratory microscopes. This "go-anywhere" convenience of the camera head, plus the ability to remotely locate the control unit through a single cable connection, suits numerous industrial closed-circuit television applications including inspection, measurement, and test chamber monitoring purposes.

## ORDERING INFORMATION

# MONOCHROME MONITORS

## 9600B Series Monochrome Monitors

- On/off switch
- LED pilot light
- Reduced scan switch
- Horizontal hold
- Focus (screwdriver adjust)
- Input "A" 2 BNC loopthrough
- Input "B" 2 BNC loopthrough or external sync
- Termination switches
- Vertical hold
- Height (screwdriver adjust)
- Brightness
- Contrast
- A/B channel switch
- External/internal sync switch
- AC connector (3-wire)
- Fuse holder
- Width control

## Composite Input

Compatible with any EIA standard RS170 input (0.5V-2V p-p).

## Differential Input Amplifier

Provides increased common mode rejection >40dB up to 6V p-p.

## Linear Gray Scale

Video amplifier provides 16 discernable levels of black, gray and white.

## Scanguard Circuitry

Assures clear, crisp displays over a wide range of brightness.

## Asynchronous Operation

Ensures no discernable movement of display if the vertical and power line frequencies differ.

## Switchable Power Supply

For 110/220/240V operation, 50/60Hz, 525/60 NTSC and 625/50 CCIR scan operations.

## DC Restoration

Back porch clamping ensures black level stability.

## Safety Approvals

U.L. and CSA listed. 9600B Series Monitors are designed to meet or exceed safety standards and regulations of CSA, U.L., HWC, FCC, and DHHS (U.L. 544 medical approval on specific models).

9600B

9600B Series Monochrome Monitors are high quality, high performance raster-scan displays built to international performance standards. The 9600B Monitor gives stable and reliable performance for industrial CCTV, medical and educational displays. 9600B Monitors are extremely rugged, with excellent geometry and 60,000 hour MTBF reliability. A variety of options and accessories for your specific requirements are also offered.

9600B Series Monochrome Monitors are available in 9", 12", 15", 17" and 23" CRT sizes with P4 white phosphor standard. Ruggedly constructed, the 9600B Series Monitors have textured steel cases and are finished in beige and brown earth tones.

## Ordering Information

Model	Tube Size	Mounting Configuration

## Accessories

**9609B/RBL or RBR Rackmounting Kit**  
Fits standard EIA equipment rack. Holds one  
(A) 9609B or two (B) side-by-side with blank  
removed. Color: Brown.

Length: 18.97"  
Height: 8.75"

**9612B/R Rackmounting Kit**  
Holds one 9612B. Color: Brown.  
Length: 18.97"  
Height: 10.47"

**9615B/R Rackmounting Kit**  
Holds one 9615B. Color: Brown.  
Length: 18.97"  
Height: 12.20"

**9617B/R Rackmounting Kit**  
For 9617B monitor. Holds one 9617B. Color:  
Brown.  
Length: 18.97"  
Height: 15.74"

**9617B/YC, 9632B/YC Ceiling Mount**  
Fits standard 1.5" steel pipe and fittings (not  
included). Comes complete with mounting  
studs and allows monitor to tilt to desired an-  
gle. Color: Black.  
Shipping Weight: 16 lbs.

**9617B/YW, 9632B/YW  
Wall Mounting Bracket**  
For use with ECM3 ceiling mount. Color:  
Black.

## VIDEO CABLE EQUALIZER/ DISTRIBUTION AMPLIFIER

### 9800 Series Video Cable Equalizer

- Up to 30dB equalization at 10MHz
- Dependable operation over a wide environmental range
- Front panel variable equalization adjustments
- Total solid-state active circuitry
- Hum and noise — 50dB RMS below 0.7V p-p
- Integral, regulated power supply on each module

The 9800 Series Video Cable Equalizer compensates for high frequency losses due to long cable runs. Equalization is sufficient for up to 6000' of RG-11/U foam dielectric cable. Longer distances can be equalized by using polyfoam dielectric cables having even lower losses. Equalization of 0 to 15dB at 10MHz is made using the Response control. Equalization above 15dB requires activating the +15dB toggle switch and using the variable Response control. Activating the +15dB toggle switch introduces a fixed 15dB of equalization to which the variable Response control will add the necessary signal for up to a total of 30dB equalization at 10MHz. Should low frequency gain compensation be necessary, the variable Gain control will provide from -4dB to +6dB adjustment, which shifts the entire equalization curve, low frequency to high frequency.

The 9800 Series Equalizer, when used at the receiving end of a cable, provides excellent results with both color and monochrome video signals. The equalizer will accept either a 75 ohm unbalanced or 124 ohm balanced input, producing an equalized 75 ohm unbalanced output. Differential input provides rejection of hum caused by ground loops. The equalizer may also be used at the transmitting end with similar performance.

**9800-855** For vertical chassis

**9800-856** For horizontal chassis

### 9800 Series Video Distribution Amplifier

- Modular construction with total solid-state active circuitry
- Choice of vertical or horizontal configurations
- Fits standard 19" rack or cabinet
- Integral power supply on each module

The 9800 Series Video Distribution Amplifier is a solid-state, side-band video amplifier that amplifies and distributes video signals from one input to four output channels. The input may be composite or non-composite, monochrome or color video. Each amplifier has an integral power supply; AC on/off switch and indicator; front panel test points for input, output and power supply; and a video gain adjustment on the front panel. Individual connector panels, one for each amplifier, fasten to the rear of the enclosure and have six BNC or UHF connectors, one connector for each output and two for the bridging (loopthrough) input.

**9800-152** For horizontal chassis BNC connector assembly,

1 input (with loopthrough), 4 outputs

**9800-352** For horizontal chassis UHF connector assembly,

1 input (loopthrough), 4 outputs

**9800-151** For vertical chassis BNC connector assembly,

1 input (with loopthrough), 4 outputs

**9800-351** For vertical chassis UHF connector assembly,

1 input (with loopthrough), 4 outputs

### 9800 Series Module Enclosures

Two types of enclosures are available for mounting in a standard 19" rack or cabinet. The vertical chassis accommodates up to ten vertically plugged-in amplifiers and the horizontal chassis holds up to three amplifiers. The line cord and fuse are attached to the rear of the chassis and power distribution to all amplifiers is via interconnection board. The vertical chassis requires 5 1/4" of rack space and the horizontal chassis requires 1 3/4" of space.

**9850-000** Vertical chassis (holds 10 modules)

**9860-000** Horizontal chassis (holds 3 modules)

**9800-855**

**9800-152**

**9800-151**

**9850-000**

**9860-000**

## 240 VBI Video Transmitter

The 240 is an instrument designed to transmit still video images during the vertical blanking interval (VBI) of a standard television signal. Using only one line of information per field, an NTSC-like color image may be sent in approximately eight seconds.

Operationally, the 240 accepts a standard NTSC or monochrome video signal which may be "frozen" into either of two solid-state video memories. An internal video switch allows the selection of two independent video cameras or sources. On operator command, the contents of either memory are converted to a format compatible with vertical interval transmission for input to a conventional VBI multiplexer. Selective addressing codes are used at the beginning of each picture to allow the use of two simultaneous displays at a receiving location.

The 240 can be internally switched to insert the transmit signal onto any line presently approved by the FCC. It is not necessary to synchronize the video inputs of the 240 transmitter to the station video. The transmit memories have simultaneous video outputs so that the same images are displayed at both receive and transmit locations. A remote control provides information about the status of the current memory contents, control of the transmission, and capability to freeze new pictures.

### System Options

- 940 Mass Storage System. The 940 allows video images, frozen by the 240 to be digitally stored on a hard disc utilizing an IBM/PC® computer. The images can then be recalled for transmission

# VIDEO TRANSMITTER/RECEIVER

240

- Up to a total of four memories are available
- The 240 can be configured to address different receive locations for selective distribution of images

### 240 Specifications

- Size:** 5 1/4" x 19" x 15"
- Weight:** 16 lbs.
- Power:** 100/115/220VAC, 50/60Hz, single phase, 75W
- Mounting:** Standard 19" rack
- Inputs:** 2 - Source Videos: 1V p-p, 75 ohms  
1 - Station Video: 1V p-p, 75 ohms
- Outputs:** Display Video, 1V p-p, 75 ohms (Memory #1)  
Display Video, 1V p-p, 75 ohms (Memory #2)  
Insert Video, 1V p-p, 75 ohms (black video with insert line added)
- Connectors:** Video: BNC  
Remote Control: 15-pin "D"
- Performance:** Resolution: 512 x 240 picture elements, single field  
Transmission Time: 8 seconds  
Gray scale: 8-bit (256 gray levels)  
Insert Line: Switchable

240 Transmitter . . . . . \$17,000.00

## 241 VBI Video Receiver

The 241 is a special form of video scan converter intended to receive still television images that have been transmitted in the vertical blanking interval of a conventional "realtime" television signal. The 241 detects one line of uniquely formatted video in each field of the host signal and reconstructs a single field video image in approximately eight seconds. Images may be monochrome or NTSC-like color.

In operation, the 241 receiver accepts a baseband video signal with properly encoded information in the vertical blanking interval and provides the functions of line selection and scan conversion. The detected data is reconstructed into a still "frozen" image over an eight second interval, with the viewer seeing an old image being replaced by a new one in the form of a horizontal "wipe".

Two memories are incorporated in the 241 receiver, allowing for the simultaneous display of two separate images. The memories are independently selected by a transmitted code. A third video output is provided for VCR recording of a received program.

Installation of the 241 is simple, requiring only an appropriate video input signal from a tuner, microwave receiver, satellite receiver, or other video source. TV monitors are used for display purposes, or an RF modulator may be used for local picture redistribution to conventional TV receivers.

### System Options

- 940 Mass Storage System. The 940 allows video images, received by the 241, to be digitally stored on a hard disc utilizing an IBM/PC computer. The images can then be recalled for viewing

241

- Up to a total of four memories are available
- The 241 can be configured as an addressable receiver. This allows reception of images intended only for that location

### 241 Specifications

- Size:** 5 1/4" x 19" x 15"
- Weight:** 16 lbs.
- Power:** 100/115/220VAC, 50/60Hz, single phase, 75W
- Mounting:** Standard 19" rack
- Input:** Broadcast Video: 1V p-p, 75 ohms
- Outputs:** Composite Video: 1V p-p, 75 ohms, 2:1 interlace,  
NTSC-like format
- Connectors:** Video: BNC
- Performance:** Resolution: 512 x 240 picture elements, single field  
Gray scale: 6-bit (64 gray levels)

241 Receiver . . . . . \$7,000.00

# VIDEO TRANSCEIVER

250 Transceiver

## 250 VIDEO TRANSCEIVER

- Completely solid state design
- Operation in moving environments
- Plug-in circuit cards for simplified maintenance
- Real time monitoring of A/D operation
- "Genlock" to other video sources for systems operation
- Automatic Transmit/Receive switching
- Compact and rugged construction
- Tabletop or rackmount
- EIA standard 2/1 interlace video output

### Options

- Transmit only
- Receive only
- 625 Line operation
- Dual 256 x 240 memory

The 250 is designed to provide narrow band video communications over standard voice grade telephone circuits. Three basic functions are provided:

1. A "frame freeze" capability which captures a single image that may be assessed for quality before transmission
2. Conversion of the frozen picture to a "slow-scan" television signal suitable for transmission over audio channels
3. Reception of slow-scan TV signals and reconversion to a still image on a normal TV monitor

In the transmission mode, the 250 accepts a conventional CCTV input signal which is digitized on command and fed to a solid state digital memory. The output of the memory is then displayed on a TV monitor which indicates the exact quality of the image to be transmitted. Once a transmit command is given, the memory is read out slowly from left to right, with a white cursor on the TV monitor screen showing the degree of picture completion.

In the receiving mode, the 250 accepts properly formatted slow scan TV input signals and reconstructs a conventional TV still picture, using the same memory which provided frame freeze for transmission. Image retention is indefinite unless deliberately erased or power to the 250 is lost.

### 250 Transceiver

256 x 240 x 6-bit memory	\$.4000.00

# VIDEO TRANSCEIVER

290PR Portable Receive System

3 1/2" Chassis

5 1/4" Chassis

## Video Briefcase® (290 Video Transceiver)

The 290 family of video communication instruments is designed to provide a wide range of options to the systems designer. Like the 250, the 290 equipment sends video images over voice-grade circuits. However, the 290 has more versatility and features. A 3-camera switcher is built into all models. 290's are available in four different resolution configurations:

256 x 240	512 x 480
256 x 480	512 x 240

The 3 1/2" chassis is standard. The 5 1/4" is optional and allows for the incorporation of multiple memories. With the 5 1/4" unit, up to four separate images can be displayed simultaneously.

A hard-wired remote control unit is standard with the 290 series. A wireless infrared handheld unit is also available.

An optional I/O Module allows for storage of pictures by connecting the 290 to the Video Image Storage System 940. In addition, the 290 is compatible with the 250.

Six-bit grayscale (64 levels) is standard and an 8-bit (256 level) grayscale is optional.

The 290 can be packaged in a sturdy suitcase or elegant leather attache.

Options: 8-bit grayscale, multiple memories, computer I/O, 625-line operation, and 10kHz transmission for faster picture update.

## NTSC Color Video Briefcase (290C Transceiver)

512 x 240 x 6-bit memory	\$8000.00
512 x 480 x 6-bit memory	8750.00

The transmitters and transceivers listed below include hard wired remote control units. Small, handheld infrared remote control units are also available as optional equipment.

### 290C Transceiver

512 x 240 x 6-bit memory	\$7500.00
Second memory-additional	1500.00
512 x 480 x 6-bit memory	8250.00

### 290CR Receiver

512 x 240 x 6-bit memory	\$6500.00
Second memory-additional	1500.00
512 x 480 x 6-bit memory	7250.00

### 290CT Transmitter

512 x 240 x 6-bit memory	\$7000.00
Second memory-additional	1500.00
512 x 480 x 6-bit memory	7750.00

### Monochrome Video Briefcase (290 Transceiver)

256 x 480 x 6-bit memory	\$6500.00
256 x 480 x 8-bit memory	7500.00
512 x 480 x 6-bit memory	7500.00
512 x 480 x 6-bit memory	8500.00

### 290 Transceiver

256 x 480 x 6-bit memory	\$6000.00
Second memory-additional	1000.00
256 x 480 x 8-bit memory	7000.00
Second memory-additional	1500.00

# VIDEO DIGITIZER

## 270A VIDEO DIGITIZER

The 270A converts standard television signals into digital data for computer processing and control. Display video output has superimposed cursor and brightness profile. May be interfaced with most minicomputers. 8-bit grayscale.

**270A** 512 x 480 resolution ..... **\$4500.00**  
**270A-1** 2048 x 480 resolution ..... **5000.00**  
**270A-2** 1024 x 950 resolution ..... **5000.00**

### SPECIFICATIONS

**Size:** 5-1/4" x 19" x 12"  
**Weight:** 13 lbs.  
**Mounting:** Standard 19" rack  
**Construction:** Solid-state, card file  
**Power:** 110/115/230VAC, 50/60Hz, single phase, 40W max.  
**Input/Video:** Composite Video: 1V p-p, 75 ohms, 2:1 interlace  
**Input/Sync:** Horizontal Drive: (optional input) 4V p-p, 75 ohms  
**Inputs/Digital/Word Serial Input:** Data: Parallel binary (X, Y, or Z)  
 X—9 bits (270A); 10 bits (270A-2); 11 bits (270A-1)  
 Y—9 bits (525 line rate); 10 bits (625 or higher line rate)  
 Z—8 bits  
 XYZ: 01 = X  
 10 = Y  
 11 = Z  
 L/O: 0—Latch & operate (Read or Write)  
 1—Latch new data only  
 R/W: 0—Read (Encode)  
 1—Write (Z mod)  
 Strobe: Pulse, 1µs min; initiates L/O cycle on leading edge; can be strapped for True or False pulse  
**Inputs/Digital/Word Parallel Input: (270A only)**  
 X Position: 9 bits parallel binary (525 lines)  
 Y Position: 10 bits, parallel binary (625 lines)  
 Z Mod Data: 8 bits, parallel binary  
 Strobe: Pulse, 1µs min; initiates encoding or Z mod process on leading edge; can be strapped for True or False pulse  
 X, Y, & Z Select: Determines whether X, Y, & Z are entered Word Serial or Word Parallel  
 0 = Parallel  
 1 = Serial  
**Outputs/Video:**  
 Display: Composite: 1V p-p, 75 ohms  
 Z Mod: Composite: 1V p-p, 75 ohms  
 Sampled Video: 10V p-p 600 ohms, white positive formatted (at rear of Sampling Board)

270A

**Output/Sync:** Composite Sync: 4V p-p, 75 ohms  
**Outputs/Digital:** (All TTL)  
 Digitized Video: 8 bits, parallel binary  
 Status (Flag): 0—Busy  
 1—Ready  
 (Can be strapped for pulse or level)  
**Horizontal Timing:** True pulse; 9µsec  
**Vertical Timing:** True pulse, 1 msec  
**Field Index:** 0—Even field  
 1—Odd field  
**Controls:**  
 Power: On/Off  
 Setup Position  
 Video Amplitude  
 Black Level  
 Mode: Setup/Run  
 Display: On/Off  
 Cursor: Dot/Line  
**Performance:**  
 Video Bandwidth: 25MHz  
 Sample Aperture Time: 25 nsec  
 Conversion Time: Single element: 6µsec  
 Entire raster: (See below)

Model No.	Taking Multiple Elements/Line	Taking Single Element/Line
270A	2 sec. (min.)	17 sec.
270A-1	9 sec. (min.)	68 sec.
270A-2	9 sec. (min.)	34 sec.

**Access Time:** 6 sec min. to 1/30 sec max. (dependent on video timing relative to strobe time)

**Z Mod D/A Settling Time:** 300 nsec

### Resolution:

Model No.	Line Rate	Picture Elements	
		H	V

# DIGITAL TRANSCEIVER

286 With Multi-Feature Remote Control

## 286 Digital Transceiver

The 286 is a compact, versatile device which can transmit and receive still video images over narrowband communications channels. Color images can be transmitted at synchronous bit rates of up to 200Kb/s, black and white pictures at rates of up to 500Kb/s. The transmission rate is determined by the modem selected which, in turn, depends on the type of channel available. The 286 can be ordered with either a RS-232/V.24 or a V.35 serial interface, and is compatible with the earlier 285 and 285C Transceivers.

At the transmit site, a single field or frame from a TV camera is "frozen" in the 286 digital memory. When the operator is satisfied with the stored picture, he initiates the transmission over an established communication channel. The picture can be scanned from left to right or top to bottom.

At the receive location, the picture is automatically received, stored in memory, and displayed on a standard TV monitor. It may also be recorded on a video tape recorder or sent to a video hard copy unit.

The 286 is available in both color and black and white versions, and with single or multiple memories. It is also available in transmit only and receive only models. An optional computer I/O port can be used to connect to an external computer for mass storage or image processing. The 940 Image Storage System can also be used with the 286.

The 6-bit grayscale has 64 levels of gray and the 8-bit has 256 levels of gray. All prices include one serial interface and one remote control (see choices below).

An easy-to-use remote control is supplied with each unit, and is available in both simplified and full-feature versions. Video sources that can be used with the 286 include cameras, VCRs, and video laser discs. Color inputs from VCRs must be time-base corrected. Standard 19" rack or tabletop, 3 1/2" x 19" x 15" (single memory units); or 5 1/4" x 19" x 15" (multi-memory units or units with internal modem)

## Remote Control Choices

Listed price includes choice of remote control: either simplified (for easy operation) or full-feature (for maximum operational flexibility). Additional units are \$1,000.00. Custom configurations including a wireless (IR) unit are available on special order.

## Serial Interface Choices

Listed price includes choice of serial interface: either RS-232C/CCITT V.24 compatible or CCITT V.35 compatible. Additional units are \$500.00. An internal CCITT V.29 9600 bit/s modem can be ordered in place of the above interfaces for \$1,600.00. Units ordered alone are \$2,100.00.

# VIDEO FRAME STORE

## 490 Series Video Memory Instrumentation

The 490 Series Video Memory and memory related units are intended for use in analysis, processing and distribution of video images. They are based on the solid-state video frame store technology developed over the past ten years. These units provide flexibility in video systems by providing basic single frame store, and such options as color capability, multiple memories, computer I/O and low-scan TV adaptors.

## 491 Video Frame Store

The 491 Video Frame Store is designed for use in a wide range of industrial and scientific applications. Up to four synchronized video memories are available in a single chassis, thus allowing functions such as image comparison, overlays, subtraction, and RGB color synthesis. Direct recording of NTSC color video signals is an optional feature.

A digital I/O option allows individual picture elements in the stored image to be accessed by a computer, processed, and returned to the 491 memory. This I/O option can easily be interfaced with most computers or other digital processing equipment. A single 16-bit duplex I/O module in the computer is all that is required for interfacing to modern mini-computers. All digital signals to or from the unit are buffered and are TTL compatible.

The "frame grab" process can be initiated by means of a front panel pushbutton, a remote pushbutton, a TTL compatible convert signal, or from a computer when an optional I/O module is installed. The unit digitizes and stores the first frame following the conclusion of a convert command. The video output is a standard video signal synchronized to the video input and can be switched or mixed with other video signals or recorded on conventional video tape recorders.

## Specifications

<b>Size:</b>	3 1/2" x 19" x 15" (Single Memory) 5 1/4" x 19" x 15" (Multiple Memory)
<b>Weight:</b>	16 lbs. (Single Memory)
<b>Mounting:</b>	Standard 19" rack
<b>Construction:</b>	Solid-state, card file
<b>Power:</b>	110/115/220VAC, 50/60Hz, single phase, 75W
<b>Input/Video:</b>	Composite Video: 1V p-p, 75 ohms
<b>Input/Control:</b>	Store: Pulse, ground true, 1µs min. or switch closure to ground Memory Control: TTL compatible signals
<b>Output/Video:</b>	Composite Video: 1V p-p, 75 ohms
<b>Controls:</b>	AC Power: On/Off; Store (can be remoted); Video Level; Black Level
<b>Indicators:</b>	AC Power
<b>Resolution:</b>	512 x 512 picture elements, TV test chart resolution is 400 lines
<b>Frame Store Time:</b>	1/30 <sup>th</sup> second (525-line) 1/25 <sup>th</sup> second (625-line)
<b>Grayscale:</b>	6 bits (64 gray levels)

## 491 Video Frame Store (maximum of four memories)

# VIDEO SCAN CONVERTER/ FRAME STORE

495

## 494 Video Scan Converter

The 494 Video Scan Converter is a solid-state video memory with high-speed analog/digital and digital/analog converters, and is capable of digitizing, storing, and displaying video information while performing a scan format conversion. The video source may be either 525-line, 2:1 interlaced standard format video or 525-line 30Hz sequential scan format. The output of the scan converter will be in the opposite format as the source.

The conversion mode of the 494 must be set to match the conversion desired, either interlaced to sequential or sequential to interlaced. This acquisition and conversion process may be either continuous or intermittent. With the unit set for continuous conversion, the process may be interrupted by pressing the "freeze" button for as long as desired. With the unit set for single conversion, the conversion process proceeds only while the button is depressed.

The 494 Video Scan Converter is a digital semiconductor memory made up of random access memory (RAM) integrated circuits capable of storing two complete frames of video information while data is being read from the other in output format. At the end of each frame of video, the functions of the two memories are reversed, resulting in continuous conversion with a one-frame delay.

**494 512 x 512 x 8-bit memory . . . . . \$9000.00**

### Specifications

**Connectors:** Video: BNC  
 Remote: 15-pin "D"  
**Resolution:** 512 x 512 picture elements, TV test chart resolution is 400 lines  
**Frame Store Time:** 1/30<sup>th</sup> second (525-line)  
 1/25<sup>th</sup> second (625-line)  
**Grayscale:** 6-bits (64 gray levels)  
**Conversion Linearity:** ± 0.2%, ± 1/2 LSB  
**Video Bandwidth:** 5MHz

## 495 Asynchronous Frame Store

The 495 is a unique video frame store which allows the capture of transient events which cannot be synchronized to the timing of a television camera. This special video memory provides a method of random acquisition of a field or frame of information from a television signal.

Visual data generated through the use of pulsed lighting and an interlaced television camera generally will produce only one "good" field for analysis. Random timing usually results in the reproduction of a portion of one field and part of the following field. Because conventional video frame stores require the starting and ending of an acquisition cycle during the vertical retrace, data distortion results. The Asynchronous Frame Store solves this problem by storing the input video on the next horizontal line following a trigger timed to the event in question (i.e. strobe) and continues until the same line occurs in the following field or frame.

Operation with NTSC color video signals is available and a digital I/O option allows easy interface with most computers or other digital processing equipment. All digital signals to or from the 495 are buffered and are TTL compatible.

**495 512 x 512 x 6-bit memory . . . . . \$5500.00**  
**512 x 512 x 8-bit memory . . . . . 7500.00**

# VIDEO FRAME STORE/INTERFACE DIGITAL DISK STORAGE

## 499 Video Multimemory

The 499 is designed for the sequential capture and reproduction of a relatively large number of video images. Available in either 525-line or 625-line TV standards, the 499 will store 16 512 x 512 pixel images, 32 512 x 256 pixel images, or 64 256 x 256 pixel images, all with 8 bits of gray scale (256 shades of gray). Only one video output is provided. However, an individual picture may be brought up on command, or all images may be automatically sequenced at either normal TV rates (60 to 50 per second). Both recording and playback functions may be controlled for "time lapse" effects.

The main chassis of the 499 occupies only 5 1/4" of rack space, and includes space for a computer I/O card which allows external image storage or processing. A desktop controller allows the operator to select various functions.

499 Main Memory Chassis and Controller

## 930 Digital Disk Video Image Storage System

The Video Image Storage System consists of a microcomputer with Winchester disk storage plus custom software and is capable of storing and retrieving a large number of standard television images. The 930 interfaces with one of several Colorado Video digital memories for picture acquisition and display. The 930 can be used with black and white or color memories.

The 930 is intended for applications where rapid access to any picture and accurate long term preservation of information is a primary requirement. The computer permits the use of simple commands for storage and retrieval, and for keyboard entry of picture documentation.

### Components

**Disk Memory:** Capacities range from 5M byte to 70M byte in 5 1/4" fixed disk drives, and 10M byte in a removable cartridge drive version. Storage can be increased by adding additional drives.

**Computer:** An Apple IIe®\* is provided with a display monitor, floppy disk drive, and system interface card with cables. Software functions are:

1. Instructions for system operation.
2. Picture listing: titles and description listed by number.
3. Individual selection of a picture by its corresponding number along with insertion, editing and deletion of titles and descriptions.
4. Automatic storage or display of a picture sequence.
5. Protection of selected pictures from accidental overwrite.
6. Picture size reduction for fast previewing (monochrome only).

**Video Memory:** The video memory must be purchased separately. There are several choices:

- 290 B&W Analog Slow-Scan
- 290C Color Analog Slow-Scan
- 490 Series of Frame Store units (491, 492, 493)

The 290 and 490 Series units each use the 793 I/O Module when employed as the video memory in the 930 System.

	Performance		Capacity	
	Picture Resolution	Store/Display Transfer Time	5M byte Disk	70M byte Disk
	256 x 256 pixels	1.3 seconds/frame	80 frames	1120 frames
	256 x 512 pixels	2.6 seconds/frame	40 frames	560 frames
	512 x 512 pixels (8-bit gray scale)	5.3 seconds/frame	20 frames	280 frames
<b>Specifications:</b>	<b>Size:</b>	5" x 6" x 14"	5" x 6" x 14"	
	<b>Weight:</b>	25 lbs.	28 lbs.	
	<b>Mounting:</b>	Tabletop	Tabletop

## 745 Host Adaptor

The 745 interfaces the IBM PC or PC/XT® with Colorado Video display memories and external mass storage peripherals. The adaptor uses the DMA capability of the IBM I/O channel to achieve high speed data transfers. There are modes of DMA operation as shown in the figure below.

The display memory interface consists of a 16-bit parallel output port, an 8-bit parallel input port, and two handshake lines. The mass storage interface is compatible with the small computer system interface. The adaptor occupies eight contiguous locations in the IBM I/O address space. These addresses are determined by appropriate switch settings on the adaptor board.

The adaptor plugs into a long slot on the IBM main board. External connections use 37 pin "D" connectors mounted on two spare slots on the IBM chassis rear panel.

### Specifications

**Power:** 0.9A at 5V  
**Load:** 1 TTL load max/I/O channel line

# VIDEO PEAK STORE

## 493 Video Peak Store

The 493 Video Peak Store is an instrument with unique capabilities. In essence, it is a video field/frame store device which will continually add new information to memory contents, if such new data is of higher amplitude than that already recorded. Processing occurs in "real time" and the video output signal is continuously viewable.

The 493 is not an averaging memory and so transient information is not lost over a period of time unless overwritten by higher amplitude signals. The peak recording process will cause some forms of noise to eventually "smooth" into a DC offset which is equivalent to the peak value of the noise waveforms.

The 493 Video Peak Store is a compact, solid-state unit, suitable for operation either in the field or in the laboratory. Options include computer I/O capability and Slow-Scan TV transmission of stored data to remote locations.

Operational modes with the 493 are:

1. Field/frame store with manual or remote "freeze" command
2. Peak store, adding "whiter" video information to memory contents
3. Peak store, adding "blacker" video information to memory contents
4. Peak storing on a continuous, manually controlled, or interval basis
5. Optional peak storing of NTSC color video signals

Applications of the 493 include:

### Scan Conversion

Electro-optical scan conversion by means of focusing a TV camera at a CRT. Radar or non-conventional television scanning with image build-up over short or long periods of time.

### Transient Recording

Recording of phenomena such as daylight lightning strokes or use as a "storage" oscilloscope.

### Tracking

Tracking of either a light target against a dark background or a dark target against a light background, leaving a visible record. Follow vehicles, microscopic biological movements or other subjects.

### Noise Smoothing

Because the 493 is a data accumulating device, some forms of noise will eventually "smooth" into a DC offset, equivalent to the peak amplitude of the noise components.

### Miscellaneous

Stroboscopic image recording, "painting with light," or controlled addition of images to a display.

# VIDEO ANALYZER

321 Front Panel

321 Rear Panel

## 321 VIDEO ANALYZER

- Dynamic noise measurements
- Vertical "line selector" operation
- Large screen waveform display
- Point-by-point video amplitude indication
- Chart recording output
- Reference grating
- Video noise reduction
- Remote Control
- Narrow-band video output
- X-Y coordinate indication

The 321 is a versatile instrument for analysis of video signals. Provides sampling and display of waveforms along a vertical or slant cursor. Display also includes a waveform reference grating and H and V markers. Has output for chart recording of line selected waveform data on either axis. Provides variable rate scanning on both axes.

# VIDEO POSITION ANALYZER

635

Display Normal Mode

Display Quantized Mode

## 635 Video Position Analyzer

The 635 accepts a composite video signal and provides a digital readout of the position of a preselected feature of medium or high contrast.

A precision, digitally-controlled gate is internally generated and used to select the feature of interest. The threshold level of a video slicing circuit is then adjusted to obtain a black or white signal with rapid on/off transitions, and lateral positional variations of the first transition are used to actuate a sampling position-to-voltage converter. The resulting DC voltage level is then continuously updated at the field rate of the input signal.

Position data is integrated over the height of the gate, which is internally selectable to 4 or 8 lines per field. The resulting position voltage is fed to a built-in 3-1/2 digit meter for display and the BCD result is available for external use. The meter may be calibrated to give readings corresponding to absolute positions.

## Specifications

- Size:** 5-1/4" x 19" x 12"
- Mounting:** Standard rackmount
- Construction:** Solid-state, silicon, plug-in card
- Power:** 117VAC, 60Hz, single phase
- Inputs:** Composite Video: 1V p-p, 75 ohms
- Outputs:** Monitor Video: 1V p-p, 75 ohms  
 Sampled Positional Data: BCD, 3-1/2 digits, TTL  
 Sync: 4V p-p, 75 ohms

# X-Y INDICATOR/ DIGITIZER

## 620 X-Y Indicator

The 620 is an instrument used to generate X and Y coordinates (crosshairs) on a TV screen. It allows rapid alignment of subject material with a predetermined location when used in conjunction with a standard TV camera and monitor.

The 620 accepts composite video on a looping input and provides composite video out to a standard TV monitor.

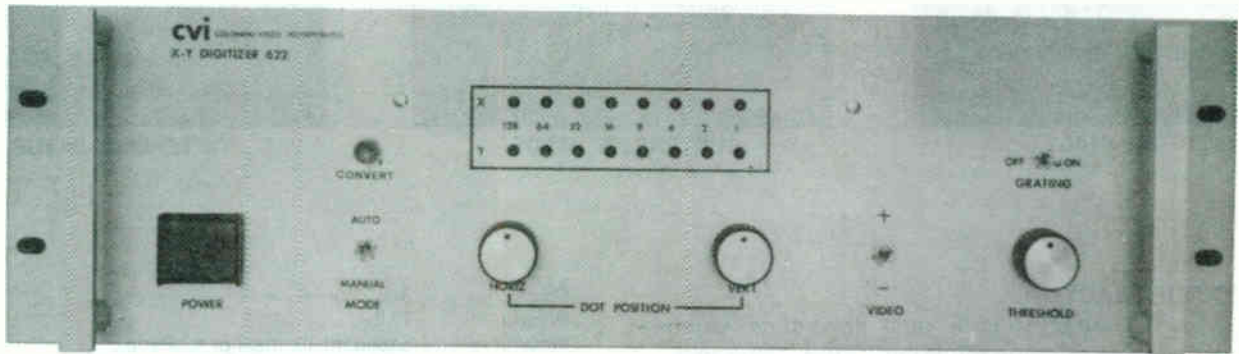

### Specifications

**Size:** 1-2/3" x 11" x 8"  
**Mounting:** Free standing (1-3/4" x 19" rackmount optional)  
**Construction:** Solid-state, P.C. Board  
**Power:** 117VAC, 60Hz  
**Input Signal:** Video, composite, 1V p-p, 75 ohms  
**Output Signal:** Video, composite, 1V p-p, 75 ohms  
**Operating Controls:** AC Power: On/Off

 X & Y Position: 60% of full screen, Internal

**Indicators:** AC Power  
**Connectors:** BNC

**620 X-Y Indicator** .....\$480.00

## 622 X-Y Digitizer

The 622 X-Y Digitizer allows computer input of positional data from standard TV signals. Video from either a television camera or tape recorder may be connected to the 622 with the operator moving a superimposed small white dot around a standard TV screen to generate digital X-Y coordinates. The unit contains self-calibrating features as well as a highly accurate TV grating pattern which allows assessment of the geometric quality of the video input signal.

A second unique feature is an automatic tracking capability which eliminates the need for manual positioning of the data reference point. In this mode of operation, the 622 "acquires" a single high contrast point of video data and automatically outputs the coordinates. Typical applications in this instance include aircraft tracking, eye movement studies, and laser beam location.

In the automatic tracking mode, the operator selects either positive or negative video polarity, then adjusts a video threshold control so that only the desired target appears on the TV screen. Data reduction is then automatic with 8-bit X and Y words being generated every 1/60 second. Resolution is 256 (H) by 237 (V).

### Specifications

**Size:** 5-1/4" x 19" x 12"  
**Mounting:** Standard 19" rack  
**Construction:** Solid-state, card file

# VIDEO SUBTRACTOR

REFERENCE IMAGE

SUBTRACTED IMAGE

DIFFERENCE IMAGE

## 492 VIDEO SUBTRACTOR

The 492 Video Subtractor is a dual solid-state video memory unit capable of comparing one stored image with the other and displaying the difference. It is intended for use in inspection, registration, quality control, surveillance and other applications where differences between two images can be used for decision making or process control.

In a typical application, a reference image is digitized and stored in one of the two video memories in the 492. A subsequent image is stored in the other memory. This image is subtracted from the reference memory and the difference is provided as a video output for display on a standard television monitor. It is also possible to continuously compare the input video with the reference image. A separate video output of the reference memory is also provided. A digital I/O option allows the use of a computer to analyze either of the stored images.

# VIDEO MULTIPLEXING INSTRUMENTS

496

497

## 496/497 Series

### Video Multiplexing Instruments

The 496 is capable of time multiplexing four synchronized video sources into a single video signal for transmission or recording. The source signals are then separated (demultiplexed) with the 497 and stored in one or more memories for continuous flicker-free display.

### 496 Video Multiplexer/Inserter

A device which permits the transmission of two to four video signals over a single channel by time-sharing on a frame or field basis (each frame includes two fields). The frames or fields have identifying source number codes inserted in the vertical blanking interval to allow correct demultiplexing. In the multiplexer mode the 496 automatically sequences through all available input sources.

In the insertion mode, the 496 becomes a special purpose multiplexer which, under operator control, can insert a single frame from a separate synchronized video source into a main video signal. It can be used with the 497 to provide "side channel" displays from the second video source.

#### Option

625-line, 50Hz operation

#### Specifications

**Size:** 1.75" x 19" x 15"  
**Weight:** 6 lbs.  
**Mounting:** Standard 19" rack or optional tabletop  
**Power:** 100/115/230VAC, 50/60Hz, single phase, 10VA  
**Inputs:** Composite Video: 1V p-p, 75 ohms, 2:1 interlace (4)  
**Outputs:** Composite Video: 1V p-p, 75 ohms, 2:1 interlace  
 Composite Sync: 4V p-p, 75 ohms, 2:1 interlace (3); used to genlock all video sources  
**Controls:** AC Power: On/Off

 Insert: 2, 3, 4  
 Field/Frame  
**Connectors:** Video In and Out: BNC (5)  
 Sync: BNC (3)

496 .....\$4,000.00

### 497-4 Video Demultiplexer

Receives inputs from the 496 and performs the function of producing a continuous video output of each of the video signals multiplexed onto a single transmission link. Each incoming video frame or field is identified by its code and stored in a digital memory for continuous output. The resulting displays are nearly indistinguishable from normal video. With the 497, the multiplexed outputs from four sources result in 7.5 frames per second, versus the normal 30 frames per second with conventional video. The 497 is also available in one, two and three memory versions, indicated by 497-1, 497-2, and 497-3.

Applications of the 496/497 series include: teleconferencing, distance education, multichannel tape recording, surveillance, multichannel video data acquisition and display, stereo video transmission and display, and adding still graphics to full-motion teleconference networks.

#### Options

Digital I/O interface  
 NTSC color  
 Slow-Scan TV output  
 625-line, 50Hz operation

# VIDEO QUANTIZER

## 606H Video Quantizer

The 606H is an instrument designed to process the grayscale characteristics of monochrome video input signals in order to achieve radical alterations in output linearity or, alternately, to synthesize color signals from different shades of gray.

The unit operates on the input video signal by selecting from 1 to 16 separate narrow "slices" which are adjustable to any amplitude level between black and white. Selection of the thresholds may be linear, logarithmic, antilog, or on any other arbitrary basis. The control panel contains adjustments which allow the operator to vary the slice threshold as well as the color output from each of the 16 channels. A wide range of color variations may be produced by adjusting the amount of Red-Green-Blue sent to the output from each channel. The unit also contains a linear video amplifier, the output of which may be mixed as b/w with the quantized color signals for added versatility.

The 606H is intended primarily for television studio "special effects" production, but is suitable for a wide range of other uses. Effects achievable include:

- Keying
- Tone Reduction
- Outlining
- Equal Brightness Contouring
- Super-Graphic Pattern Generation
- Grayscale Inversion
- Synthetic Color Generation
- Tinting

The 606H may be used with either noncomposite or composite video input signals from a television camera, flying spot scanner, video tape recorder, or other source.

606H . . . . . \$5000.00

610E

BOX OUTLINE

SMALL CROSSHAIR

LARGE CROSSHAIR  
& BOX OUTLINE

INTERRUPTED CROSSHAIR  
& BOX OUTLINE

## 610E Video Pointer

The 610E produces a series of oblong and crosshair patterns, as seen on the screen of a television monitor. By use of front panel controls or external control voltages, the patterns may be positioned to any location on the screen and changed in size over a range of ten to one.

The 610E contains two positionable pattern generators. The Box Outline generator section may be used to vary the horizontal and vertical size of the oblong produced, as well as to position the box anywhere in the field, horizontally and vertically. In addition, the separate Crosshair pattern may be positioned anywhere else on the screen, relative to the box, by its H and V controls. When the box is moved, the crosshairs track along with it.

Uses of the 610E include calling attention to significant elements in a TV scene, X-Y target coordinate analysis (through internally or externally generated DC voltage), and as a gating signal for video keying. Conventional video signals from a TV camera or other source may be fed into the 610E, and the superimposed patterns may be varied continuously from black to white with the Matt Control.

610E . . . . . \$1950.00

# CHARACTER GENERATOR BOARD

## PC-2 Character Generator Board

Generate Broadcast Quality Characters with an IBM Compatible Personal Computer

- 40ns resolution
- Random page access
- 64 colors
- 32 font styles including graphic font, edge, shadows, and italics
- Preview/program mode
- RGB or composite NTSC video output
- Built-in keyer
- 4 speeds of roll and crawl

Now you can use your IBM PC or compatible computer as a full-featured character generator without sacrificing your other computer applications.

The heart of the PC-2 system is a plug-in board that fits in your computer's expansion slot and gives it the ability to generate broadcast quality characters for production work whenever you need it.

The PC-2 is easy to use, half the price of comparably equipped CGs and extremely versatile. It puts command menus right up on the computer screen while you work, so there are no commands to memorize, no thick manuals to slow you down.

For characters, it offers four types of letter fonts in varying sizes, plus one graphic font and up to 64 colors. With italics, edging, background striping, drop shadows, and as many as eight colors per line, you can create credit rolls, titles, and crawls in an endless variety of styles.

PC-2's powerful editor lets you insert or delete characters or whole lines at once with full cursor movement anywhere on the screen. Left and right justification, centering and proportional spacing ensure your text always looks good.

Put two independent crawl lines at any of four speeds in either direction anywhere on the screen. PC-2 contains its own keyer so it's easy to key names or text over your pictures or even create striped background screens. Make text come on-screen from either direction or appear in a teletype-like effect. Credits roll up or down as quickly as you like.

PC-2 can call up from 1 to 19 pages in a file, and chain 8 files together for 152 pages of text. It also loops pages for continuous crawls or rolls.

The PC-2 can combine with other Comprehensive Video software to turn any IBM PC or compatible computer into a powerful production work station.

## Specifications

<b>Resolution:</b>	40ns (1000 x 512 pixels)
<b>Character Colors:</b>	64
<b>Background Colors:</b>	64
<b>Colors On Screen Simultaneously:</b>	64
<b>Colors Per Line:</b>	8
<b>Characters Per Line:</b>	10-62
<b>Font Styles:</b>	30
<b>Graphic Symbols:</b>	74
<b>Edge and Shadow Options:</b>	Plain Shadows (short and long) Projections (short and long) Outlines (open and silhouette) Italics
<b>Cel Block Frame Height:</b>	32/64 lines
<b>Effective Character Height Range:</b>	20-64 lines approx.
<b>Maximum Script Lines Per Page:</b>	13
<b>Font Styles Per Line:</b>	16
<b>Font Styles Per Page:</b>	30
<b>Edit Functions:</b>	Insert, delete, auto-centering, justification, left or right (per line or per entire page)
<b>Roll Speeds:</b>	4 (3/4, 1 1/2, 3 1/2, 7 sec/page)
<b>Crawl Speeds:</b>	4 each for 2 independent lines (2, 4, 8, 16 char/sec)
<b>Background Stripes:</b>	31 choices in 16 colors
<b>Flash:</b>	Character by character
<b>Pages of Memory:</b>	200 on a floppy disk; 12,000 with 20M byte hard disk
<b>Output:</b>	RGB 1V peak, non-composite video PRG 1V p-p, composite video PRV 1V p-p, composite video KEY 1V p-p, RGB
<b>Input:</b>	1V p-p, composite video (required)
<b>Hardware Requirements:</b>	IBM PC, XT, AT or compatible with 256K (maximum 640K) 2 expansion slots

PC-2 Plug-in board for IBM PC or true compatibles (requires 4.77MHz with minimum 256K memory) . . . . .	\$2995.00
PC-2S Turnkey system with 2 disk drive IBM XT compatible computer and character generator . . . . .	4295.00

# COMPUTER VIDEO SOFTWARE

## COMPUTER AIDED VIDEO

### Computer Software for Video Professionals

#### Tapemaster™

When you absolutely have to find a particular scene in a roomful of tapes, who do you turn to? With Comprehensive's Tapemaster software, you can locate a scene with a few keystrokes. Any word or combination of words in that scene's description will do the job.

With an optional time code reader, you can add time code to your tape logs with the press of a button.

Tapemaster will also build an edit decision list of your selected tapes—automatically.

Fast, powerful, and easy to use, Tapemaster will pay for itself the first time it saves you from reshooting a scene you know you had shot before.

**T-MST** .....\$595.00

#### Log-It™ 100

The creation of shooting logs on location has never been easier. Comprehensive's Log-It 100 Program transforms your 4 1/2 pound, battery-operated Model 100 computer into a time code reader and tape logger that can be used anywhere. With the stroke of a single key, Log-It automatically reads SMPTE time code at up to 6 times play speed in forward and reverse. A built-in programmable stop watch even lets you log control track tapes.

The Log-It 100 program is supplied on a plug-in cartridge. No additional hardware, special tools, or modifications to the Model 100 are required.

**Log-It 100** .....\$345.00

#### Edit Lister™

Now you can prepare, store, revise, clean, and transfer edit decision lists with your personal computer. Edit Lister also lets you connect the computer directly to an off-line edit controller with an RS-232 edit output. As edits are performed, they are automatically transmitted to the computer. Edit Lister stores each event in memory as it builds an edit list.

Edit Lister includes high level list management and list cleaning features such as: re-edit with ripple, add and delete edits, add post-production notes, include program effects such as dissolves, wipes, splits and keys, move single edit and block move entire scenes, and clean over-record edits.

**EL-A/64-SS** For Apple IIe or Apple II + with 64K  
(requires serial card) .....\$800.00

**EL-A/128-SS** For Apple IIc or Apple IIe with 128K (IIc  
requires serial card) ..... 900.00

**EL-B-SS** MS-DOS version (requires 256K and serial card) . . . .900.00

**EL-C** CP/M for Kaypro II, IV, 10 and Sony SMC-70 with 64K  
and RS-232 serial port. .... 900.00

#### D-Link™

Take an edit list prepared by Edit Lister and store it on CMX format 8-inch disk. The disk can then be loaded directly into any on-line system that can read a CMX formatted disk.

The **D-Link package** includes D-Link software, controller card, shielded cable and 8-inch disk drive.

**D-Link-A/64** For Apple IIe or Apple II + with 64K ..... \$1995.00

**D-Link-A/128** Apple IIe with 128K

(not available for the Apple IIc) ..... 1995.00

**D-Link-B** IBM PC ..... 1995.00

#### Script Master™

You can easily prepare and revise scripts on screen exactly as they will appear on paper. A single keystroke will move you from one column to another and the audio and video columns always stay synchronized as you make changes in either column.

In addition to containing the text editing capabilities you expect in a full featured word processing program, Script Master is flexible enough to allow you to make changes in the standard format.

For IBM PC and compatibles 256K and DOS 2.0 or greater.

**S-MST** .....\$199.00

#### Budget Master™

The Program fills the needs of corporate and independent producers to budget for small and large productions. Budget Master comes with a number of predesigned budget forms that will cover the requirements of most producers. You can use these forms as supplied, quickly modify them to suit your purposes, or design new forms. You define the number and name of major budget sections and sub-totals within a budget design. A budget "tracking" capability permits expense items to be entered for any budget item. Budget Master produces summary screen displays and a full range of printed reports.

**B-MST-A** For the Apple IIe or IIc  
(requires 64K and 2 disk drive) .....\$395.00

**B-MST-B** For the IBM PC and compatibles (requires 256K  
and DOS 2.0 or greater) ..... 395.00

#### Cabletrak™

No more handwritten notebooks used for cataloging the hundreds of cables in a radio/TV studio or station. No more writing out cable labels—Cabletrak does all that for you quickly and easily.

Cabletrak helps in studio construction by enabling you to print sublists for installation crews, to generate labels for both ends of each cable, or to print an entire list of the cables needed.

With every Cabletrak file, you can log in as many as 1,200 cables (600 on an Apple). And you can create an unlimited number of files.

**C-TRAK-A** For Apple II +, IIe, IIc required 64K .....\$499.00

**C-TRAK-B** for IBM PC and compatibles ..... 499.00

#### Prompt Master

Your IBM PC or compatible can be used as an effective stand-alone teleprompter. Prompt Master smoothly scrolls large, easy to read text backwards or forwards at adjustable speeds or rolled in a given time frame. Line and page numbers are prominently displayed.

#### Special Features:

- Reverse image for mirror systems
- Real-time stopwatch display counts down any set segment length
- Outputs directly through color card using a specially designed cable for converting RGB output to composite video
- Reads ASCII text files from any source, including Script Master

Prompt Master also gives you a choice of printouts. It can look the same as the prompter display, including line number, or it can be printed full width across the page

**P-MST-B** for IBM PC or compatible with 256K .....\$950.00

#### Library Master

The tape library management system for television station and post production facilities. A modern post production facility or television station must store thousands of tapes for hundreds of clients.

Finding tapes quickly has typically meant maintaining duplicate files of index cards sorted by client, agency, and sometimes title or product.

Library Master allows you to maintain a single tape catalog and allows you to index any tape by a variety of categories.

Library Master also maintains a shipping history and comes with Clientbase, a database for client information.

When you are filling out a library card, or entering shipping information, Clientbase allows you to enter the Client Code, and then it fills in the rest of the information automatically

**L-MST** IBM and compatible computers with 256K and DOS 2.0 or higher .....\$995.00

| (5) UP-C      | UHF Crimp Plug Connectors                         |
| (2) XLRJ      | 3-Pin XLR Jack Connectors                         |
| (1) XLRJ-BL   | 3-Pin XLR Jack to Jack (barrel) Adaptor           |
| (2) XLRP      | 3-Pin XLR Plug Connectors                         |
| (1) XLRP-BL   | 3-Pin XLR Plug to Plug (barrel) Adaptor           |
| (1) RK-1      | Roly Kit Tool Case                                |

## Video Distribution Amplifier

Overcome line loss, provide additional equipment outputs and line equalization, or any combination of these. 4 output Video Distribution Amplifier contains two input connectors to permit signal looping, thereby allowing the units to be "ganged" if more than four outputs are needed. Mounts easily on any flat surface.

CVA2B-4 ..... \$189.00

## Passive Video Switchers

Passive video switchers with audio pass-along offer a fast simple way to interconnect video and audio equipment. Pushbuttons select the input and automatically terminate the other video inputs, for constant impedance.

CPS-4A 4 pr. video w/audio pass-along ..... \$139.00

CPS-8A 8 pr. video w/audio pass-along ..... 199.00

**Medium-Duty Tripod and Fluid-Effect Head**

A medium-duty but lightweight assembly featuring a 30 lb. capacity fluid-effect head with adjustable quick-release platform, dual-handle operation, tilt safety stop, fluid-action pan and tilt, and reversible 1/4" or 3/8" camera mounting screw.

Collapsed Length: 30" Weight: 14 3/4 lbs.  
Extended Length: 70" 3142 Tripod Capacity: 65 lbs.

1473 Fluid-Effect Head Capacity: 30 lbs.  
**3148** .....\$729.00

**Compact Tripod with Fluid-Effect Head**

Compact and lightweight, this tripod is specially designed for today's lightweight industrial and consumer color cameras.

Collapsed Length: 20"  
Extended Length: 54"  
Weight: Less than 6 lbs.  
Tripod/head Capacity: 18 lbs.

**6144** .....\$139.00

**6144**

**Lighting Kits**

**Comprehensive**

**Lighting Kits**

Virtually all lighting kit suppliers face a similar challenge—selecting component pieces that best handle the requirements of the largest number of users. Comprehensive kits are therefore divided into two general categories: kits featuring a full assortment of accessories for a wide variety of locations; and kits that offer the bare necessities, but provide extra room for accessories of your choice. Either way, Comprehensive lighting kits offer you a substantial savings over purchasing individual component pieces.

**B-2 Basic 2 Kit**

- (1) VL-601 light
- (1) VL-601 VF focusing light
- (1) VL-BD-2 Barndoors for VL-601 VF
- (1) GUH Gel/Umbrella holder
- (1) MS Modular stud
- (1) U-30 Umbrella (30")
- (2) LS-2 light stands
- (2) DYH lamps
- (1) C-2 kit case
- Size: 8 1/4" H x 10" W x 25" L
- Weight: 18 lbs. 5 oz.
- (Lamps included) .....\$438.00

**B-3 Basic 3 Kit**

- (1) VL-601 light
- (2) VL-601 VF focusing light
- (1) VL-BD-1 Barndoors for VL-601
- (1) VL-BD-2 Barndoors for VL-601 VF
- (1) GUH Gel/Umbrella holder
- (1) MS Modular stud
- (1) U-30 Umbrella (30")
- (1) VLS-1 Single scrim for VL-601
- (1) VLS-V Single scrim for VL-601 VF
- (3) LS-2 light stands
- (3) DYH lamps
- (1) C-2 kit case
- Size: 8 1/4" H x 10" W x 25" L
- Weight: 25 lbs.
- (Lamps included) .....\$667.00

**UM-300 Ultra-Mini Kit**

- (3) VM-300 lights
- (1) UAMV umbrella/ stand adaptor
- (1) UMMV Mini umbrella
- (2) SAMV stand adaptors
- (1) TCMV table clamp
- (1) HGMV handgrip
- (2) TRS mini stands
- (3) FNB lamps
- (1) MC mini case
- Size: 15 1/4" H x 4" W x 20 1/2" L
- Weight: 14 lbs. 6 oz.
- (Lamps included) .....\$899.00

**UM-1**

- Same as UM-300 with M-250 lights and ELH lamps instead of VM-300 lights and FNB lamps .....\$645.00

**T-2 Take 2 Kit**

- (2) K-600 focusing lights
- (2) KBD Barndoors for K-600
- (1) GUH Gel/Umbrella holder
- (1) MS Modular stud
- (1) UMMV mini umbrella
- (2) TRS mini stands
- (2) DYS lamps
- (1) KC kit case
- Size: 16" H x 6 3/4" W x 22" L
- Weight: 19 lbs. 14 oz.
- (Lamps included) .....\$812.00

**ENG-3 Kit**

- (2) K-600 focusing lights
- (1) VM-300 focusing light
- (2) KBD Barndoors for K-600
- (1) DFK diffusion filter for K-600
- (1) DIV dichroic filter for VM-300
- (1) CSMV camera mount for VM-300
- (1) VC-30 30V battery cable for VM-300
- (1) HGMV handgrip for VM-300
- (1) SAMV stand adaptor for VM-300

(3) TRS mini stands

- (2) DYS lamps
- (1) FNB lamp
- (1) EPL lamp
- (1) KC case
- Size: 16" H x 6 3/4" W x 22" L
- Weight: 23 lbs. 5 oz.
- (Lamps included) .....\$1159.00

**ENG-312C** ENG-3 kit with 12V battery mode option set up for Comprehensive batteries with 7-pin connector .....\$1159.00

**ENG-312D** Same as above for use with 12V batteries with 4-pin XLR connectors .....\$1153.00

**ENG-312E** Same as above for use with 12V batteries with 5-pin XLR connectors .....\$1153.00

**T-4 Take 4 Kit**

- (2) V-10/6 focusing light
- (2) VBD barndoors for V-10/6
- (2) VAH accessory holders for V-10/6
- (2) MF-10 flood lights
- (4) LSP light stands
- (2) DXW lamps
- (2) FHM lamps
- (1) PRC Kit case
- Size: 15 3/4" H x 11 1/2" W x 35" L
- Weight: 45 lbs.
- (Lamps included) .....\$1359.00

**P-4 Production 4 Kit**

- (2) V-10/6 focusing light
- (2) VBD barndoors for V-10/6
- (2) VAH accessory holders for V-10/6
- (2) VSS single scrim for V-10/6
- (1) VDS double scrim for V-10/6
- (2) MF-10 flood lights
- (2) FLS-1 single scrim for MF-10
- (4) GUH Gel/Umbrella holders
- (4) MS Modular studs
- (1) U-43 Umbrella (43")
- (4) GF gel frames

(1) LGP Location gel pack

- (2) CSC Ceiling scissor clip
- (2) CC C-clamp
- (4) LSP Light stands
- (2) DXW lamps
- (2) FHM lamps
- (1) PRC Kit case
- Size: 15 3/4" H x 11 1/2" W x 35" L
- Weight: 53 lbs. 13 oz.
- (Lamps included) .....\$1629.00

**T-3 Take 3 Kit**

- (2) V-10/6 focusing light
- (2) VBD Barndoors for V-10/6
- (2) VAH Accessory holder for V-10/6
- (1) MF-10 flood light
- (3) LSP light stands
- (2) DXW lamps
- (1) FHM lamp
- (1) PRC Kit case
- Size: 15 3/4" H x 11 1/2" W x 35" L
- Weight: 36 lbs. 14 oz.
- (Lamps included) .....\$1079.00

**EFP-3 Kit**

- (2) V-10/6 focusing light
- (2) VBD barndoors for V-10/6
- (2) VAH accessory holder for V-10/6
- (2) VSS single scrim for V-10/6
- (1) MF-10 flood light
- (1) FLS-1 single scrim for MF-10
- (3) GUH Gel/umbrella holders
- (3) Modular studs
- (1) U-43 umbrella (43")
- (3) GF gel frames
- (1) LGP location gel pack
- (1) CSC ceiling scissor clip
- (1) CC C-clamp
- (3) LSP light stands
- (2) DXW lamps
- (1) FHM lamp
- (1) PRC Kit case
- Size: 15 3/4" H x 11 1/2" W x 35" L
- Weight: 43 lbs. 4 oz.
- (Lamps included) .....\$1285.00

# SOFTLIGHTS/LIGHTING KITS

## Comprehensive Softouch™ Softlights

Available in five different sizes and lamp capacities to meet any softlight application from 1,000W to 8,000W.

### Softouch "Ace"

Our most compact softlight. Suitable as small fill light for one or two subjects or for small product applications. Available lamp types include 300, 500, 650, 750 and 1,000W at 120V and 800W at 240V. Comes equipped with 16' line cord, parallel blade U-ground plug. (Two "Aces" on stands make an ideal "quick interview" package). 7 lbs. 5 oz.

**ST-Ace** ..... \$295.00

### Softouch "Deuce"

"All-around" location softlight. Uses same lamp choices as Softouch "Ace", but accommodates two lamps for up to 2,000W capacity. Independent switching permits either left, right, or both lamps to be illuminated. Comes equipped with 16' line cord, parallel blade U-ground plug. 14 lbs. 9 oz.

**ST-Deuce** ..... \$395.00

### Softouch "Quad"

Studio or location softlight. Accommodate a pair of 1,000, 1,500 or 2,000W lamps for up to 4,000W capacity at 120V. Independent switching for left, right, or both lamps. Comes equipped with two 3' line cords, each terminating in pin plug stage connector. (Pin plug to parallel blade U-ground adaptor available). 22 lbs. 14 oz.

**ST-Quad** ..... \$595.00

### Softouch "Six"

Studio or location softlight. Accommodates three 1,000, 1,500 or 2,000W lamps for up to 6,000W capacity at 120V. Independent switching for each lamp or any combination of three. Comes equipped with three 3' line cords, each terminating in pin plug stage connector. (Pin plug to parallel blade U-ground adaptor available). 32 lbs.

**ST-Six** ..... \$895.00

### Softouch "Eight"

Studio or location softlight. Accommodates four 1,000, 1,500 or 2,000W lamps for up to 8,000W capacity at 120V. Independent switching for each lamp or any combination of four. Comes equipped with four 3' line cords, each terminating in pin plug stage connector. (Pin plug to parallel blade U-ground adaptor available). 43 lbs.

**ST-Eight** ..... \$1195.00

**ST-AC Case** Made of heavy-duty, high density polyethylene. Holds two "Ace" lights, two LSP stands and lamps. 20 lbs. 2 oz.

**ST-AC** ..... \$198.00

**S-DC Case** Holds one "Deuce" light, one LSP stand and lamps. 17 lbs. 4 oz.

**S-DC** ..... \$150.00

**3-Pin Plug to Parallel U-Ground Adaptor Cable.** Heavy-duty construction, 20A capacity. 8 oz.

**U-dapt** ..... \$39.95

## Softouch Accessories

**Gel/Diffusion Frame:** Enables the attachment of diffusion, color effect, or color correction media to Softouch lights.

**GF-Ace**, 8 oz. .... \$25.00

**GF-Deuce**, 1 lb. .... \$35.00

**GF-Quad**, 1 lb., 8 oz. .... \$60.00

**GF-Six**, 2 lbs., 6 oz. .... \$95.00

**GF-Eight**, 3 lbs. .... \$95.00

### Egg Crates:

Modifies light output to a more "directional" source. Also helpful in controlling unwanted "spill" from light.

**EC-Ace**, 1 lb., 4 oz. .... \$ 65.00

**EC-Deuce**, 2 lbs., 9 oz. .... \$90.00

**EC-Quad**, 3 lbs., 12 oz. .... \$185.00

**EC-Six**, 6 lbs., 4 oz. .... \$190.00

**EC-Eight**, 8 lbs., 2 oz. .... \$225.00

Softouch Lighting

SP-AK

## Comprehensive Location Lighting Kits

### SP-AK Softpair "Ace"

The ideal, "quick-take" location system. This one's the answer for those times when you have to make that "talking head" shot of the C.E.O. or tape an impromptu "one-on-one" interview.

#### Includes:

- (2) ST-Ace lights • (2) LSP light stands • (2) FCM lamps • (1) ST-AC case • Size: 9"H x 19"W x 37 1/2"L (includes lamps)

**SP-AK Kit** ..... \$935.00

### S-DK Softdeuce Kit

The safe, convenient and lightweight method to troupe a 2K softlight to your next location.

#### Includes:

- (1) ST-Deuce light • (1) LSP light stand • (2) FCM lamps • (1) S-DC case • Size: 25 1/4"H x 7 1/4"W x 35 1/4"L (Includes lamps)

**S-DK Kit** ..... \$625.00

### MA-2 Maxi-2 Kit

- (2) V-20/10 lights • (2) V20BD 4-way barndoors • (2) V20AH accessory holders • (2) LSP stands • (2) FEY lamps • (1) V20C kit case • Size: 16"H x 16"W x 36"L. (Lamps included).

**MA-2 Kit** ..... \$1175.00

# COMPREHENSIVE VIDEO SUPPLY CORP.

# CASES/MAINTENANCE KITS/ TOOL BOXES

## Video Carrying Cases

Unique aluminum-covered wood carrying cases provide maximum protection at the lightest weight and lowest price. While not specifically designed as shipping (freight) containers, they are perfectly safe to check through as baggage.

### CVC-300-BI

For all portable Beta and VHS recorders with AC adaptor. This case comes with a partition that allows you to use the same case with any of these video units.

CVC-300-BI ..... \$138.95

### CVC-400-VHS

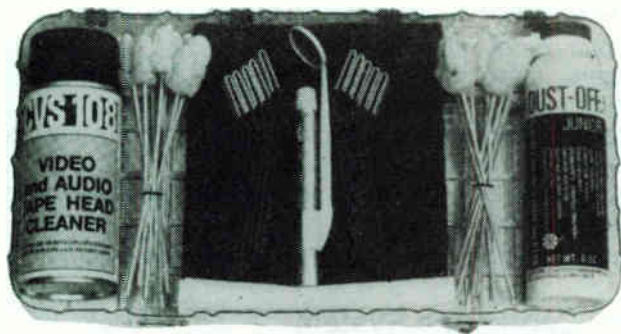

For all VHS units and Beta Series II, Akai, GE, Hitachi, JVC, Magnavox, Curtis Mathes, MGA, Montgomery Ward, Panasonic (consumer and industrial), J.C. Penney, Quasar (VHS only), RCA, Sylvania, and others.

CVC-400-VHS ..... \$135.00

### CVC-500E

The Everything Case. This case comes with layers of foam that enable you to cut out and custom fit cameras, cables, power supplies, lenses, tape, etc., to suit your needs. Maximum capacity: outside dimensions of above cases (not including hardware) 21" L x 16 1/2" W x 7 1/4" H. Weight: 16 lbs. Inside dimensions: 19 3/4" L x 15" W x 4 1/2" H.

CVC-500E ..... \$138.95

## Professional VCR/VTR Maintenance Kit

Tape heads (video, audio, erase and control track) and guides should be cleaned every 30 to 40 hours of running time for optimum image and sound quality. Kit contains all the items necessary to maintain VCRs/VTRs to professional standards. Supplied in convenient carry-along storage box.

### Contents:

- 1 each CVS-108 8 oz. can Professional Video Head Cleaning Fluid
- 1 each FGJB 6 oz. Dust-Off
- 25 each CVS-505 Cellular-Foam VCR Cleaning Swabs
- 10 each CVS-504 Professional Video Head Cleaning Tools
- 10 each CLW Lint-Free Cloth Wipes
- 1 each CVS-506 Inspection Mirror with Light
- Instructions

CVS-10K ..... \$49.95

## Rolykit Tool Boxes

One of the most functionally designed tool boxes to come along. Made of high impact resistant plastic and heavy-duty canvas, the Rolykit Tool Box will organize and store a maximum of hand tools, connectors, adaptors, cleaning materials, and other assorted video necessities in a minimum of space.

You'll want one with you, filled with all the essential odds and ends, on your next location shoot.

### RK-1 Rolykit Senior

- 13 trays with divisible, self-capping compartments (dividers included)
- Maximum closed dimensions: 8 1/4" H x 10 3/4" W x 9 1/2" D

RK-1 ..... \$34.95

### RK-2 Rolykit Junior

- 10 trays with divisible, self-capping compartments (dividers included)
- Maximum closed dimensions: 7 1/4" H x 10 3/4" W x 8 1/4" D

RK-2 ..... \$29.95

## "Quick-Clean" VCR Head Cleaning Kit

Economical way to remove accumulated oxides, dust deposits and other abrasive contaminants from VCR tape path which can impair machine performance and damage expensive video heads.

### Contents:

- 10 each CVS-505 Cellular-Foam Cleaning Swabs
- 1 each CVS-125 1 oz. Head Cleaning Fluid

CVS-11K ..... \$7.19

### IMPORTANT NOTE:

NEVER clean video heads with cotton swabs or other lint or debris producing materials. Serious damage to heads may result.

# COMPUTER PROMPTING CORP.

1511 K Street, N.W., Suite 831, Washington, DC 20005 (202) 783-2051

## IBM-PC BASED COMPUTERIZED TELEPROMPTERS

### CPC-1000: Computerized Teleprompter

#### Features:

- Operates on IBM-PC/XT/AT and most compatibles including several LAPTOP computers
- Over 5 hours of smooth continuous scroll capacity
- Hard copy printout with line numbers coordinated with the built-in word processor line numbers
- 3 crisp, clear fonts (All upper or upper/lower case)
- 16 text/background colors
- Instant help screens
- 3 different controls—Dial/Mouse/Keyboard—available to get smooth variable scroll in forward and reverse directions
- Scripts (in ASCII format) typed on any computer may be down loaded using a modem and scrolled
- Scripts (in ASCII format) from most word processors running on an IBM PC may be directly loaded without using a modem

#### System Requirements:

- IBM PC or Compatible with a parallel printer port and at least 256K of memory
- Enhanced Graphics Adaptor (EGA) with 256K of internal memory on board
- RGB or composite monitor
- Game adaptor to be connected to the "Dial" type hand control
- Optional Mouse for additional "Mouse" type hand control
- Optional Serial port to be connected to the optional mouse control

### CPC-1750: Computerized Teleprompter to Interface to a Newsroom System

**Features:** All the features of the CPC-1000 computerized teleprompter as described above

- Simultaneously edits script while prompting
- Interfaces to Newsroom systems, and acts as a "dumb" display unit
- Down loads and up loads scripts from other computers

**System Requirements:** In addition to the system requirements for the CPC-1000, one monochrome adaptor, one TTL monochrome monitor, and a modem are also required

### CPC-2000: Computerized Teleprompter with Closed and Open Captioning Option

**Features:** All the features of the CPC-1000 computerized teleprompter as described above

- Real-Time Closed Captioning: It allows text which is entered and scrolled for teleprompting, to be simultaneously entered and output as closed captions with no additional cost or effort
- Post Closed Captioning: Any prerecorded video tape can be easily closed captioned using only one key stroke per line of text that has been previously entered into the CPC's word processor
- Open Captioning: Both Real-Time and Post Captioning may be used to create open captions on a video tape, and may also be used for sub-titling foreign language video tapes

**System Requirements:** In addition to the system requirements for the CPC-1000, a line 21 Encoder is also required

### CPC-500: Closed and Open Post Captioning System

- Features:**
- Post Closed Captioning: Any prerecorded video tape can be easily closed captioned by using only one key stroke per line of text that has been previously entered into the CPC's word processor
  - Open Captioning: Both Real-Time and Post Captioning may be used to create open captions on a video tape, and may also be used for sub-titling foreign language video tapes

**System Requirements:** An IBM PC with a serial port and a line 21 Encoder

- 
- **CPC Software packages:** CPC-1000, CPC-1750, and CPC-2000 software systems come with an EGA card which outputs both composite B&W and RGB signals, a game adaptor, hand control and manual. CPC-500 system consists of software
  - **Mount/Computer System:** Computer Prompting Corp. is a distributor for several camera mount, monitor and computer manufacturers and can provide a choice of Mount/Monitor/Computer systems at a price below the list price

# MONOCHROME MONITORS

## 2600 Series 9" Medium and High Resolution Monochrome Monitors

- 9" diagonal CRT
- 750 lines minimum resolution
- P4 or P45 phosphor standard; many other phosphors available
- Wide range of scan frequencies; up to 34kHz
- 12, 25 or 30MHz video bandwidths
- 50 fL brightness

The various models in the 2600 9" series give you a choice of high performance, low cost monitors to best fit your application. Excellent linearity, geometry and raster size stability ensure consistently superior display quality.

### 2600C9 9" CRT General Purpose Monitor

The 2600 is an economical, highly reliable monitor for general purpose applications such as surveillance, industrial TV, broadcast signal viewing and alphanumeric display. The 2600 can operate off 12VDC in your custom console and is available in many rackmount configurations.

**2600C9** . . . . . \$395.00

### 2620C9 9" CRT Broadcast Monitor

Additional features are added to the 2600 to create the 2620. Switchable pulse cross, underscan and notch filter are provided as front panel controls. In addition, an audio speaker with volume control, VTR input connector and AFC select are included to give you the features and flexibility you require in broadcast and video production environments. The 2620 is also available in many rackmount configurations.

The 2620 is capable of displaying a minimum of 10 discernible shades of gray. This highly stable, high performance monitor also features 525/60 or 625/50 line rates, 12VDC operation, composite video or external sync, solid-state circuitry, single board design for easy maintenance and service, front panel adjustments for display height, vertical hold and horizontal hold and convenient brightness, contrast and volume controls.

**2620C9** . . . . . \$460.00  
Rackmounts . . . . . 175.00

### 2640C9 9" Medical Monochrome Monitor

The 2640 offers a crisp, stable and distortion-free display for critical evaluation of images generated by CT scanners, MR, ultrasound and many other medical diagnostic equipment. High video bandwidth, high scan rates and switchable reverse video are additional features of the 2640.

**2640C9** . . . . . \$695.00

### 2680C9 9" CRT Medical High Performance Monitor

A P45 phosphor CRT, greater brightness stability (G2 regulation), 25MHz video and dynamic focus—all standard features—the 2680 easily meets the stringent requirements for a medical display. Analysis of images generated by medical diagnostic equipment is an application best suited for the 2680.

**2680C9** . . . . . \$1695.00

## 2400 High Resolution Monochrome Raster Scan Displays

- 1280 horizontal x 960 vertical pixels, at 1225 line scan resolution
- 19" diagonal, 90° deflection, 19V CRT
- 50 fL calibration, 150 fL maximum
- 50Hz to 40MHz, -3dB video bandwidth
- 15kHz-37kHz interlaced or non-interlaced. Up to 3 selectable line rates optional—525/60, 875/60, 1024/60, or customer specification

2400C19

2600C9

2620C9

The 2400 is ideally suited to applications requiring a high resolution, high performance monochrome display. Such demands may be found in computer-aided design (CAD), computer-aided manufacturing (CAM), medical imaging, process control and similar sophisticated systems.

**2400 C19** 19" Cabinet model (plastic) . . . . . \$3225.00  
**2400 C19** 19" Cabinet model (metal) . . . . . 3495.00  
**2400 R/S 19** 19" Rackmount with slides . . . . . 3225.00  
**2400 N19** 19" Chassis only . . . . . 3045.00

## QQA Series High Resolution Monochrome Monitors

- 3 switch-selectable preset line rates, from 500-1225 lines, internally adjustable
- Locks to any field rate, from 37 to 60 fields per second
- Variable aspect ratio; width and height controls are continuously adjustable to provide a range sufficient to adjust from a full to a square raster
- Differential video input to minimize hum and other extraneous pickup on long video cables
- Accepts composite video or non-composite video plus separate composite sync
- Dynamic focus
- Linearity within  $\pm 1.5\%$  of picture height
- DC restoration: Keyed sync tip, keyed back porch, or zero DC restoration may be selected
- Video bandwidth flat within  $\pm 1\text{dB}$  to 30MHz
- Video polarity inversion, switch selectable from the front panel, option
- Separate horizontal and vertical sync input option

The QQA series high resolution monitors are used widely in such applications as medical X-ray, displays of varying scan rates, document viewing, high resolution television, and display of computer-generated images.

**QQA 15/C** 15" Cabinet model . . . . . \$3490.00  
**QQA 15/RS** 15" Rackmount with slides . . . . . 3570.00  
**QQA 15/N** 15" Chassis only . . . . . 3260.00  
**QQA 17/C** 17" Cabinet model . . . . . 4335.00  
**QQA 17/RS** 17" Rackmount with slides . . . . . 4435.00  
**QQA 17/N** 17" Chassis only . . . . . 3970.00

# COLOR MONITORS

## 7241 High Resolution Color Monitor

- 1080 x 1024 resolution format
- Choose from 15 to 44kHz scan rate
- 40MHz video bandwidth
- 19" PIL high resolution CRT (0.31mm pitch)
- Compatible with IBM Professional Graphics Adaptor (both Hi-Res Graphics and Emulation modes)
- World-wide power adaptability
- No point on raster deviates from proper position by more than 2% of raster height
- Less than 1% change from zero to 100% APL at 20fL
- 30fL calib., 50fL maximum

The 7241 RGB Color Monitor is specifically designed to provide crisp, stable and distortion-free images generated by graphics systems. The high resolution 7241 incorporates all the excellence of our 7211 and in addition, offers user convenience, flexibility and style. The 7241 is a cost-effective choice for process control, CAD/CAM, medical imaging and many other computer graphics systems.

### Options

- Three switchable scan frequencies
- Long persistence phosphor
- High brightness CRT
- 36-44kHz scan range
- Anti-glare filters
- Differential video inputs
- Separate vertical and horizontal drives
- Desktop or chassis only
- Dark body phosphor
- Tilt and swivel base

7241C19	19" cabinet model . . . . .	\$2995.00

## 7351 Ultra High Resolution Color Monitor

- 1280 horizontal x 1024 vertical resolution format (non interlaced)
- 19" CRT 0.31 pitch, P22 phosphor, PIL
- 110MHz
- 30 fL nominal
- Rise time 3ns; fall time 3.5ns
- Horizontal—65kHz  $\pm$  2.5kHz scan rates; optional 45-55kHz
- Vertical—47Hz; Horizontal—63Hz
- Desktop with tilt/swivel base, rack slide, or chassis only

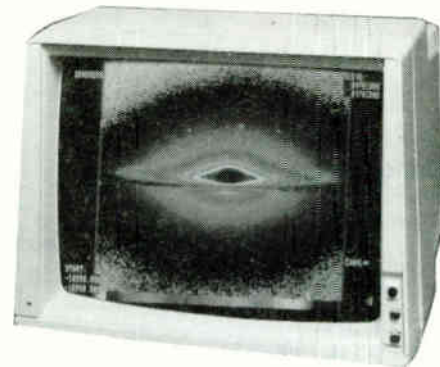

19" display for finely detailed, non-interlaced images generated for computer-aided design (CAD), computer-aided engineering (CAE), architecture, engineering and construction (AEC), computer-aided design and drafting (CAD/D) and many other imaging applications demanding highest resolution in full color.

7351C19	19" cabinet model . . . . .	\$3480.00

# COLOR MONITOR SYSTEM

## 6545 Broadcast NTSC, PAL B and RGB Color Monitor System

- Automatic setup with 6550 Micromatch Photometer
- Soft-touch user controls
- American Standard Phosphors (Colormatch™)
- Beam current feedback and comb filter
- Auto-sensing of NTSC and PAL B signals
- 13" or 19" in-line dot matrix CRTs
- Selectable RGB or decoder inputs

Designed for the professional studio environment, its advanced technology sets standards in performance, stability and operation. Critical evaluation of broadcast signals, color balancing and matching, animation and graphics are among the many uses.

Available in 13" and 19" screen sizes. For ready access and convenience, all user controls are mounted on the front panel. The 6545 is set up at the factory to match broadcast standards, however, if you desire to change the factory default settings to better fit your environment or professional preferences, just use the soft-touch controls. Your new settings can be stored in memory, and by using Conrac's exclusive 6550 photometer, new settings can be duplicated on other 6545 monitors in just a few seconds—automatically. Whether you use default settings or your own, patented signal processing circuitry assures unequalled stability.

Front panel controls provide convenient, quick and precise control of all critical parameters, soft-touch controls and accurate digital electronics replace tricky knobs and potentiometers.

The parameters of the display are stored in two areas of working memory. Initially, one memory area contains the factory presets (default) and these parameters are used at power-up. The other memory area is your "working" memory which changes at the touch of a front panel control. At any time, you can store your working settings into default memory (replacing the factory settings) for future reference as you adjust the 6545, and other 6545s, to suit your application. When desired, the front controls can be locked out preventing unauthorized entry to the memory settings. Some controls can be operated remotely via a rear panel jack.

### Specifications

<b>Resolution:</b>	> 800 TV lines
<b>Linearity and Geometry:</b>	± 1.5% of raster height
<b>Black Level Stability:</b>	< 1% change of peak luminance from 10% to 90% APL

# COLOR MONITORS

## 7211 Series High Resolution Color Monitors

- 13" or 19" Precision In-Line (PIL) CRT
- Three selectable scan frequencies
- Pre-set calibration controls
- 40MHz video amplifier
- Worldwide power adaptability
- Lightweight aluminum construction
- Resolution 13" CRT: 921 H x 739 V pixels; 19" CRT: 1080 H x 1029 V pixels

**Note:** Resolution specifications are for 1225 line scan.

These RGB color image displays are specifically intended as visual outputs for computer-generated information. The high-resolution 7211 incorporates high performance features which make it a cost-effective choice for process control, CAD/CAM, medical imaging and computer data systems.

## 7211T High Resolution Color Monitor with Infrared Touch System

- 19" PIL CRT
- Three selectable scan frequencies
- 40MHz video amplifier
- Lightweight aluminum construction
- Infrared touch system (64 x 48 matrix)
- Flexible communications interface
- Five modes of touch operation (point, stream, continuous track and hold, and pulsed mode)
- Touch system reports: Coordinate reports, error reports, exit reports, user-definable modes for failed beam interruption and analysis, number system options for coordinates, software filter for space/time validation of hits

This RGB color image display is specifically designed as an input/output device for computer generated information. The high resolution 7211T incorporates a proprietary infrared touch system ideal for process control, computer-aided learning and data entry systems—wherever a simple man/machine interface is most desirable.

### 19" with Touch System—Metal Cabinet Only

## 7250 19" Color Monitor with Auto-Trak™

- Variable resolution to 1024 x 1024 pixels (interlaced) 15.75kHz to 37kHz Auto-Trak
- Color stability through full contrast range
- Auto switching for 40MHz analog and 16/64 color TTL
- Auto internal/external sync select
- Large 19" high resolution CRT
- Fully compatible with IBM's MDA, CGA, EGA, PGA and PS/2 (both high resolution graphics and emulation modes)
- Ideal for everything from text to high resolution color graphics

The 7250 Color Monitor with Autotrak is fully compatible with IBM's MDA/CGA/EGA/PGA—both high resolution and emulation modes. Auto-Trak lets the 7250 automatically lock on to an incredibly wide range of horizontal frequencies. Add to this resolutions to 1024 x 600 pixels and a 19" high contrast CRT and you're looking at one incredibly versatile monitor. One you can use for desktop publishing one minute and high resolution color graphics the next.

# LIGHTING/LAMPS/ACCESSORIES

## Mini-Cool Portable, Photographic Light

The Mini-Cool is designed especially for photography. All its interchangeable lamps provide light which is essentially free of heat, infrared and ultraviolet radiation.

The Mini-Cool is small and light enough to attach to any video, motion picture or still camera, using the camera adaptor supplied. Or it may be handheld, using the handle included with each unit. (The handle has a hollow underside which can be fitted over a 5/8" diameter light stand column or post, but this is recommended only as an occasional practice. A far more secure mounting is provided by the stand adaptor.)

The Mini-Cool is operable from a variety of AC and DC power sources, simply by installing a lamp of corresponding voltage and an appropriate adaptor cord. The lamp socket, switch and wiring are all heavy-duty construction, easily capable of handling DC currents as well as AC. A 120V, 250W lamp is included.

Depending upon which lamp is installed, the Mini-Cool will require a power source of 120, 30, 14.4 or 12V. 12V battery packs and belts are available in several capacities (running times) and provide portable 12V power, completely independent of wall outlets.

When a wall outlet is used, the 120/12V Power Transformer (C4455) provides adequate power (up to 100W) for any of the 12V lamps. More than one lamp may be powered from the transformer, so long as their combined wattages do not exceed 100W.

The following are specific voltage requirements for each of the lamps:

**FOS-1** (the standard lamp supplied with the Mini-Cool). This lamp requires 100 to 120VAC, which is the standard voltage.

**FOS-2** This lamp requires 30VDC, provided by some battery packs and belts, most of which have a 2-pin receptacle. An adaptor cord for connecting this receptacle to the Mini-Cool is available (C4444).

**FOS-3 through FOS-9.** These lamps all require 12V, provided by a transformer or battery pack. Commercially available battery packs and belts use several styles of connector, including 3-pin, 4-pin, 5-pin and cigarette-lighter types. Adaptor cords for all these are available from Cool-Lux, as well as cords with clamps to fit posts of automotive-type batteries.

**FOS-10.** This lamp requires 14.4V, which is the voltage used by many video cameras and recorders. Using this lamp the Mini-Cool allows using a common power source for all items.

The Mini-Cool is supplied with a 1' power cord, which includes an in-line switch and terminates in a standard (household) 3-prong plug. This plug is connected to battery packs through an appropriate adaptor cord, or to a wall outlet or transformer through an extension cord. It is advisable to use 16-gauge extension cords, especially with 12V lamps. The extension cord (C4442) is 10' long, 16-gauge, with 3-wire safety construction (provides a safety ground when used with household voltage).

**C4440 Mini-Cool Standard Pack (AC).** Includes one each Mini-Cool Light, FOS-1 lamp, camera adaptor (C4447), and handle (C4441). Supplied in foam carton. . . . . \$99.95

**C4460 Mini-Cool AC/DC Pack.** Includes all items listed in standard pack plus FOS-9 lamp and 12VDC adaptor cord (C4453). Supplied in foam carton . . . . . \$129.50

**C4461 Cool Kit I.** Includes Mini-Cool Light, Olympic L-5 battery pack (12V, 5AH), with charger, 12VDC adaptor cord (C4453), Extension cord (C4442), FOS-1 Lamp, FOS-9 lamp, stand adaptor (C4446), camera adaptor (C4447), handle (C4441), spring-clamp mount (C4452), and diffusion lens (C4449). Supplied in foam-fitted carrying case . . . . . \$299.95

**C4462 Cool Kit II.** Includes two Mini-Cool lights, two light stands (C4451), three FOS-1 lamps, one FOS-4 lamp, two stand adaptors (C4446), two camera adaptors (C4447), two spring-clamp mounts (C4452), two scissor-clip mounts (C4469), one putty-knife mount (C4464), one 12VDC adaptor cord (C4453), three extension cords (C4442), one daylight filter (C4448) and one diffusion lens (C4449). Supplied in foam-fitted carrying case . . . . . \$675.00

Mini-Cool

AC/DC Pack

**C4463 Cool Kit III.** Includes three Mini-Cool Lights, five FOS-1 lamps, one FOS-3 lamp, three stand adaptors (C4446), one camera adaptor (C4447), three spring-clamp mounts (C4452), two scissor-clip mounts (C4469), one putty-knife mount (C4464), one 12VDC adaptor cord (C4453), three extension cords (C4442), one cube tap (C4471), one daylight filter (C4448) and one diffusion lens (C4449). Supplied in foam-fitting carrying case . . . . . \$675.00

# LIGHTING/ POWER BELTS & PACKS

## Micro-Lux Camcorder Light

- Greatly improves picture quality of Low-Lux cameras
  - Uses only 35W at 12VDC (or AC via adaptor)
  - Will run off (Olympic) L-6.5 for two full hours
  - Quartz 3200°K lamp (included)
  - Life 2000 hours
  - Capable of producing 9000 candle beam power
  - Built-in diffusion lens
  - Capable of delivering high volumes of halogen treated luminescence, from a near point tungsten source, encapsulated in an all-quartz envelope, and delivered through its efficiently engineered, interchangeable reflector system
  - Size: 3<sup>1</sup>/<sub>4</sub>" x 1<sup>3</sup>/<sub>4</sub>" x 1<sup>3</sup>/<sub>4</sub>"
  - Weight: 3 oz.
  - Material: High grade aluminum
  - Finish: 25μ anodized (high temp.)
  - Colors: Black, silver, red, gold or blue
- C4401 Micro-Lux . . . . . \$79.95**

Micro-Lux

Olympic

## Olympic™ 12V Power Belts and Packs

- 12V power belts, 13AH and 20AH models
- 6.5AH power pack
- Advanced technology starved electrolyte cells
- Long life, up to 2000 charge/discharge cycles
- No "memory" effect
- Exceptional deep discharge recovery
- Built-in heavy-duty charger and solid-state voltage monitoring with all power belts
- Power packs and belts designed for maximum wearer comfort
- More power than NiCads, less than half the cost
- Also available with 4-pin connector
- Power packs available in 8 colors

## Olympic Batteries, Chargers and Transformers

- C4494** Olympic L-13 Battery Belt, standard model . . . . . \$279.95  
**C4495** Olympic L-13 Battery Belt, 4-pin model . . . . . 294.95  
**C4496** Olympic L-20 Battery Belt, standard model . . . . . 329.95  
**C4497** Olympic L-20 Battery Belt, 4-pin model. . . . . 344.95  
**C4499** Olympic L-6.5 Battery Pack . . . . . 99.95  
**C4455** Power transformer, 117V/12V, 100W . . . . . 49.95  
**C4480** Plug-in battery tester . . . . . 29.95  
**C4466** Universal Quick Charger, 117VAC or 220VAC to 12VDC . . . . . 49.95  
 Olympic N-2.5 Battery Pack designed primarily for low-current camcorders . . . . . 129.95

## Replacement Parts

- C4491** Single cell for Olympic L-13 belt . . . . . \$28.00  
**C4492** Single cell for Olympic L-20 belt . . . . . 32.00  
**C4485** Case only for Cool Kit I (includes foam set) . . . . . 40.37  
**C4486** Foam set only for Cool Kit I case. . . . . 8.71  
**C4411** Extra cubed foam for bottom of starcase . . . . . 9.50  
**C4412** Extra wave foam for top of starcase . . . . . 5.00  
**C4413** Extra long partition (330mm = 13") for starcase . . . . . 2.50  
**C4414** Extra short partition (127mm = 5") for starcase . . . . . 1.50

# SCENIC BACKGROUNDS

- Commercial, Industrial and Portrait Photography
- Exhibits and Displays
- Motion Picture TV and Theatrical Scenery

## Materials Used In Construction Of Scenic Backgrounds

All backgrounds are fabricated of heavy gauge vinyl (30 mil), a self-extinguishing material that has been approved for use in areas of public assembly. The units, which are available "ready-to-use," are those which have been permanently mounted onto sturdy wood frames. All units are also available unframed for direct installation onto existing walls.

## Paint Finish Selection

Most of the units are available in several alternative finishes. To obtain any style in a finish, merely indicate the particular unit desired (by name and number) then specify that it be painted in whichever finish is desired. All units are also available unpainted. On re-orders of the same style, because they are hand painted to order, all units are sometimes subject to slight variations in color and tone.

## Custom Work

In addition to our stock items, we also fabricate customized backgrounds to meet any design specified, i.e. company names and logos, TV station call letters, etc. The size of the customized panels may range anywhere from 2' x 2' up to 4' x 12'. Estimates for custom work are available on request.

## Shipping Time

These scenic panels are all made to order; they are not kept in stock. Normally approximately four weeks is required between placing an order and the shipment of painted panels, whether framed or unframed. Unpainted, unframed units can sometimes be shipped faster if required.

Style No.	Style Name	Painted, Framed Ready-To-Use	Unpainted Unframed

# COMPUTER VIDEO INTERFACES

## CVID 150 Universal Internal Monochrome Interface

- The CVID 150 must be soldered by a technician to mount internally
- Special "plug in" versions available for AT&T, Honeywell, IBM 3278, ITT Courier, Macintosh, and Teletype terminals
- 6 oz. epoxy encapsulated 2" x 2" x 3/4" module
- Provides composite RS-170-like video signals
- 2 adjustment potentiometers
- 1) input attenuator 0.7 to 5V P-P, minimum pulse of 50ns
- 2) Horizontal Centering Control
- Video output 75 ohms
- Accepts Horizontal frequency range of 1-50kHz
- Video input impedance 1K ohm DC, all others 1M ohm
- Analog/digital video input
- Monochrome input and output

**CVID 150** .....\$265.00

CVID 150

## 460-99 Digital To Analog RGB Interface-Demonstrator

- Ideal for rentals and demos
- Standard pots and dip switches are replaced by knobs and toggle switches
- Includes self-diagnostics (Option-01)
- Outputs: R, G, B, and Monochrome composite analog
- 1V P-P with TTL Composite Sync on 5 BNC connectors
- Horizontal blanking
- Autotracking Horizontal and Vertical positioning controls
- All outputs, including TTL Sync, drive over 400' of RG-59 75 ohm coaxial cable
- Compatible with EGA, CGA, MDA, and Hercules (auto EGA/CGA switching)
- 5 modes of operation
- Automatic Horizontal and Vertical sync circuitry
- Separate UL/CSA power supply
- Digital video input
- Color and monochrome input

**460-99** .....\$640.00

460-99

## 460/461/600 Digital To Analog Interfaces

- Horizontal sync from 15 to 75kHz
- Five options available: -01 Automatic self-diagnostics using a tricolored LED; -02 an added phone jack with TTL signal indicating EGA or CGA mode; -03 External interlace control for IBM 3270 PC/G; -04 Video input sensitivity enhancement for IBM 3179; -99 Please refer to above specifications
- 461 Supports terminals with odd-interlace and has no vertical centering control
- 100MHz video bandwidth
- 600 is a monochrome output only
- 460 without R, G, B, sync circuits or outputs
- Separate UL/CSA power supply
- Digital only video input type
- Color and mono input

**460/461** .....\$395.00

**600** .....245.00

460/461/600

## 620 ECL To Analog Interface

- Autotrack Horizontal positioning control covers 15 to 95kHz
- For use with high resolution workstations such as: Sun, Apollo, Symbolics, etc.
- Outputs: Analog 0.7V P-P video, and separate BNC's for Horizontal and Vertical TTL sync
- Designed for ECL video with ECL or TTL sync
- 3 analog video outputs allow the duplication of a white picture on a color display device
- Video outputs are capable of driving over 150' of RG-59 75 ohm coaxial cable
- 10ns video response (< 2.5ns rise time)
- Separate UL/CSA power supply
- Digital only video input type
- Monochrome input and output

**620** .....\$450.00

620

## 700RGB Analog To Analog Interface

- 100MHz analog interface supports newest workstations, including IBM PS/2, VGA, PGA, MCGA, Apple, Macintosh II and AT&T Targa
- Outputs: R, G, B, and Composite Monochrome (0.7V P-P at 75 ohms), TTL Composite Sync
- Output video has sync removed and is DC restored to: Black = 0.0VDC
- Sync input 250mV to 8V P-P
- Automatically selects: 1) Horizontal and Vertical Sync 2) Composite Sync or 3) Sync on green
- "Zero Drift" positioning of < 150ns drift from 50° to 150°F
- Calibrated, adjustable R, G, B gain controls on front panel
- Accepts positive, negative or differential analog video input signals
- Autotrack Horizontal positioning control covers 15 to 95kHz
- Separate UL/CSA power supply
- Analog video input
- Color and monochrome input

**700** .....\$525.00

# COLOR CORRECTOR/ ENCODER

600J

## 600J Color Corrector

- Exceptionally wide range of color correction
- Accepts any NTSC video signal from any source
- Virtually transparent, does not decode
- User friendly control panel cuts post-production time
- Full control of chroma gain, luminance gain, set-up and black stretch/compression
- Up to 350ns of chroma/luminance delay correction
- Each correction parameter may be switched in or out independently, together with correction in or out
- Sync, blanking and subcarrier regenerated from input video, no external pulses required
- Optional SMPTE time code control for frame by frame correction and event storage

The 600J is available with either a manual "on the fly" control panel or a time code control system for integration into a VTR edit suite, enabling frame by frame color correction.

The color corrector may be ordered with time code control or may be field updated at any time with this option.

The time code control system consists of three separate units: a color corrector control panel, a time code control panel and a time code electronics unit.

As all remote functions must be digitized in order to be stored, a different remote control panel must be used with the time code control option. This panel has "sprung center" joysticks and pots with two color LEDs on all correction parameters to give a visual indication of control panel settings. All correction on/off switching is done via pushbuttons.

A second control panel contains readouts for the self-contained SMPTE time code reader plus current event and next event readouts.

A fourth readout indicates preset information from the on-board keypad. Pushbuttons for entering and modifying time code, previewing, etc. are also contained on this remote panel.

## 203 NTSC Encoder

- Integral bar generator standard
- Single bar generator can drive multiple encoders
- Delivers 5 outputs
- All set-up controls on front panel
- Long term stability
- Occupies only 1 3/4" of rack height

Designed for any RGB (or YRGB) picture source, this encoder provides all the facilities needed in a broadcast encoding system in the smallest practical package, with operational requirements and stability as prime considerations. All switch functions such as picture-bars changeover, bridging, etc., are carried out using individually latching pushbutton switches, while all preset controls are accessible from the front so that extender modules are not required for setting up purposes.

203

Color bars are EBU type, switchable between full field bars, split field (with lower third red) and full field red.

Note: If several encoders are to be installed together, one bar board can drive several encoders.

COX203 . . . . . \$3800.00

# POST-PRODUCTION SWITCHER

## 6129AHK Post-Production Switcher

### Six Levels of Video:

- Background level
- Level 1 (A Bus)
- L2 (C Bus)
- Insert Chroma key (option)
- DSK matte
- DSK insert/outline (option)

### Effects Generator:

- Two ME systems
- 32 patterns (standard) for ME1
- 32 patterns (option) for ME2
- ME2 shares ME1 generator when second pattern option not installed
- Each ME system has keyer
- MIX/WIPE with independent MIX and WIPE in each ME system
- Symmetry, Hard/Soft, Borders, Positioners

### Chroma Keying:

- RGB Chroma keyer standard uses buses for video
- Second Chroma keyer RGB or Encoded (option) has separate encoded input and is an additional video level
- 2 modes switch in, with background fade out or dissolve foreground in

### Luminance Keys:

- 2 keyers on in each ME system Wipe key, Mix key, Mask key
- Downstream key (matte)
- DSK with shadow and border (option)

### Pulse Drive System:

- Inputs: Sync and Subcarrier (360° adj.) PAL requires additional Blanking & B. Gate
- Genlock Sync Generator (option) Auto change-over on loss of inputs

### Signal Processing:

- Blanking processor
- Test Mode for system timing
- Dual clamps on all video inputs
- Master Fade to Black

### Video Inputs:

- 8 looping primary
- 2 external ME key inputs
- 4 inputs for optional DSK
- RGB and ENC for optional Chroma key
- RGB for standard Chroma key

### Downstream Keyers:

- 2, standard matte keyer optional matte or insert keyer with drop shadow and outline (outline only in matte mode)
- 4 input selector for optional DSK

### Colorizers:

- Three, one background, two for borders (one border colorizer for DSK fill)

Over a background video signal, the 6129AHK can insert two video signals each with a different pattern, a chroma key between the two pattern levels, a matte DSK over that, with a second DSK having border and drop shadow capability (insert or matte key) over the entire combination. Its Insert Chroma keyer is an additional video input which permits foreground dissolve-in or background dissolve-out. Each Mix-Effects system has its own keyer which can be wiped, masked, or mixed in. Fader arms can be delegated to Effects transitions, Chroma keyer, DSK and Fade to Black. All fader arm operations can be controlled by 0-999 Frame auto transitions, GPI or Panel triggerable (Five ramps).

6129AHK

Automation is very sophisticated. Two modes, five independently triggerable, resettable ramps with different durations, and 100 Sequences which can run all stored analog functions smoothly between Events (border color, positioner, symmetry etc.) Automated effects can be controlled from Editor.

### Specifications

Video Inputs:	8, looping
Signal-to-Noise:	> 65dB
Crosstalk:	> 53dB
Path Difference:	± 1°
Differential Phase:	< 1°
Differential Gain:	< 0.04°
Tilt:	< 0.25%
Power:	110/220V, 70W
Black Burst Outputs:	4
Genlock Inputs (option):	1
Pulse Inputs:	Sync, subcarrier (PAL requires Burst Gate and Blanking)
Weight:	45 lbs.
Dimensions:	Control panel table mount — 20.5" x 12.5" — 3.5" front 7" rear Rackmount: 19" x 12.5" — 3.5"D Electronics: 19" x 7" — 20"D

6129AHK ..... \$10,995.00

# SWITCHERS/ INTERFACE UNIT

## 8200 Dual TBC Full Switcher

- 5 input video switcher with 2 built-in TBC's • 2 levels of keys (1 insert key one matte key) • Mix key, wipe key, mask key and Mosaic key • 16-line windows on TBC's with digital effects • 8-bit luminance and two 6-bit chroma channels • Mosaic, posterization, push, pull and slide
- Separate outputs for each TBC • Blanking processor and test mode for timing • 12 wipe patterns with joystick positioner • Variable soft edges, colored borders • Auto transitions GPI triggerable • Background colorizer • Genlockable sync generator (RS170A) • 4 blackburst outputs • 2 advanced blackburst outputs • 2 advanced sync outputs • 2 input audio mixer • Audio follow and breakaway

8200 .....\$ 9,795.00

### Accessory Models

6045 Color Bars and RGB Chroma Keyer .....\$ 895.00  
6065 Encoded Chroma Keyer .....1,428.00

# SIGNAL PROCESSING EQUIPMENT

## 6800 Programmable VTR Audio Mixer

- Designed primarily for use with VTR editing controllers
- Can perform automatic cuts and mixes, with durations accurately programmable up to 999 frames
- Seven stereo inputs with individual gain controls for each channel
- The two channels (tracks) may be reversed at the output, or combined into either output channel
- This allows the use of the SMPTE time code on the free audio channel of the recording VTR
- Input selection may be manually overridden by switches on the front panel
- Mixing may also be performed manually from the front panel, if required
- Each output channel has a gain control
- A separate VU meter is provided for each set of stereo inputs
- Both mixers are simultaneously controlled by a single slider or by the automatic ramp generator

6800 .....\$3,623.00  
6806 Mono 7 input audio follow mixer .....1,545.00

## 8105 Digital Timebase Corrector

- 16 line window
  - 8 bit resolution producing 320 lines
  - 4X subcarrier sampling
  - Heterodyne operation also features mosaic, posterization, built-in sync generator and other unique features
8105. ....\$4,990.00

## 6065 Encoded Chroma Keyer

- Provides key output for any switcher
  - Self contained
  - Requires no external drives
  - Accepts external key input
  - Keys on any color
- 6065 .....\$1,428.00

## 6045 RGB Chroma Keyer, Color Bars Tone

- Full field bars
- RGB chroma keyer
- External key input
- Provides key output for any switcher
- Derives power from any CLC switcher or from 6030 power supply

6045 .....\$895.00  
6030 Power Supply .....296.00

## 6806 Mono 7 Input Audio Follow Mixer

- Audio follow for 6119, 6109, 6129, 6112, 6124
  - Balanced inputs
  - Balanced outputs
  - Derives power from CLC switchers or from 6030
- 6806 .....\$1,067.00  
6030 Power Supply .....296.00

6800

6065

6045

## 6070 Sync Generator

- RS170A; genlockable
  - 3 1/2" rackmount
  - Field identification pulse
  - 6 black burst outputs
  - SMPTE color bars
  - Special test outputs for checking Sc/H phase on any video signal
  - High stability subcarrier oscillators without ovens (oven available as option)
  - 5Hz (1.4p-p m), or 1Hz (0.3p-p m) without oven or 0.1Hz (0.03p-p m) with oven
  - Available in PAL or NTSC PAL version has PAL ID and line switching
  - Locks to correct 4 field sequence in NTSC and 8 field sequence in PAL
  - Subcarrier adjustable through 360°
  - Horizontal adjustable plus or minus 5µs
- 6070 Subcarrier stability ± 10Hz .....\$1,595.00  
6070 Subcarrier stability ± 1Hz .....2,265.00

## 6051 Precision RGB Encoder

- Broadcast quality, RS170A
  - Genlockable with internal sync generator
  - Locks to correct 4 field NTSC; 8 field PAL
  - Sync and subcarrier outputs
  - Locks to black burst, comp video or sync
  - Operates with non-standard sync
  - Internal color bars for test
  - Front panel subcarrier and horizontal controls for genlock mode
  - 1 3/4" rackmount
- 6051 .....\$2,400.00

## TRIPODS

- Scratch resistant matte black anodized aluminum
- An enclosed cross section construction offers non-twistable legs and extra rigidity
- 2500 and 2900 series are equipped with quik-release fluid effect pan head. (Needle bearings with visco-elastic lubricants)
- Pan handle can be adjusted for right or left hand use
- Center column controlled by spring pressure and column brake, which prevents your camera from dropping suddenly and being damaged
- Moving parts operate smoothly and are easily controlled

# VIDEO CAMERA BAGS

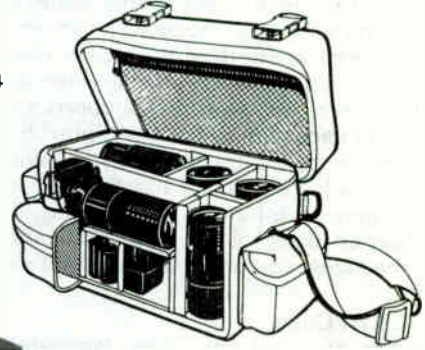

## Video Camera Bags

- Bag walls and adjustable dividers are anti-shock padded with high-density, moisture-resistant, closed-cell foam
- The industry's most extensive use of Fastac<sup>®</sup> hook'n loop material allows unlimited readjustment of interior space
- Unique, Padded Lens Bench<sup>™</sup> holds camera with zoom or telephoto lens attached, for instant use
- All seams are reinforced. All stress points are double reinforced with piping and/or double-X stitching
- Shoulder straps utilize ergonomic design which prevents slipping and feels comfortable

Cullmann Bags are designed and manufactured from only the finest materials. High-impact hardware is rust and corrosion-proof. Famous YKK zippers are rugged and smooth. The urethane-coated, high-count micro-denier Duracord<sup>™</sup> fabric is tear-resistant, tends to be self-healing if punctured, and is very easy to clean. Interiors are Reflex Blue water-resistant nylon that gives high visibility to whatever you put in the bag, so that even small items are easy to find.

## DAGO CASES

6945 Indiana Court  
Suite 600  
Golden, CO 80403  
(303) 421-7912 (inside Colorado)  
(800) 342-3246 (outside Colorado)

## CASES

### DAGO CASES

- The case core and all interior partitions are constructed of  $\frac{3}{8}$ " American-made AC grade plywood meeting all U.S. government specifications
- Finished panels are assembled at the corners by full-length 1" aluminum interlocking corner extrusions stapled every 2" from the inside, providing extra support and a cleaner, more finished look
- Where case sections meet, a solid aluminum tongue-and-groove valance travels full length around each case section, again adding substantially to the structural strength of the closed case
- On the hinged top, a heavy-duty piano-style hinge is riveted every  $2\frac{1}{2}$ ". All hinged tops have  $1\frac{1}{2}$ " woven lid supports securely riveted to the interior of each side of the case, providing ample support for the opened top
- Interiors are fitted with 2.2 lbs./cu. in. high-density foam, cut and installed by hand to the contour of your equipment. Ethafoam extra-density foam is also available for heavier loads
- Cable and hardware compartments are finished with a durable snag-resistant olefin fiber material

#### A.T.A. Case

- The plywood panels are laminated with either Nevamar® melamine-resin laminate, fiberglass panels, or aluminum as per your specifications
- Mounted at each corner of the case with six rivets is a 14 gauge rust-resistant steel ball corner. Corners are available rounded or, as an option, stackable
- Case closures are recessed and designed to meet A.T.A. regulations. They fit flush with the valance, leaving no gaps. The twist lock feature eliminates accidental opening during rough handling. Options include padlock catches or separate flush mounted key locks for protection against unauthorized tampering
- All handles are recessed and have extra-thick rubber grips for comfortable handling of heavy loads
- Heavy-duty steel casters are available as an option for large or heavy cases. All casters are mounted to a  $\frac{3}{4}$ " caster plate and securely bolted to the bottom of the case

The Dago A.T.A. Case is designed and made for heavy-duty use where common carriers (airlines, trucking, overseas shipping) are utilized on a regular basis. It is particularly suitable for the transporting of delicate instruments, computers and peripherals, musical instruments and equipment, and audio-visual, video, and photography gear.

#### La Strada Flite Case

- The plywood panels are covered with a heavy-duty olefin fiber material
- Corners are either 14 gauge rust-resistant steel ball corners or 20 gauge steel flat corners, depending on the size of the case
- Case closures are recessed and designed to meet A.T.A. regulations. They fit flush with the valance, leaving no gaps. The twist lock feature eliminates accidental opening during rough handling. Options include padlock catches or separate flush mounted key locks for protection against unauthorized tampering
- All handles are recessed and have extra-thick rubber grips for comfortable handling of heavy loads
- Casters can be added, and are available in four different styles. All casters are mounted to a  $\frac{3}{4}$ " caster plate and securely bolted to the bottom of the case

A.T.A. Case

La Strada Case

The Dago La Strada Flite Case is designed and made for heavy-duty use where common carriers (airlines, trucking, overseas shipping) are utilized. It is suitable for the transporting of delicate instruments, computers and peripherals, musical instruments and stage equipment, and audio-visual, video, and photography gear. The La Strada Flite Case utilizes the same high quality materials as our A.T.A. cases but with one difference—the outer covering is a distinctive heavy-duty olefin fiber fabric. This is an extremely durable material that is scuff-, tear-, and soil-resistant. It will not snag or unravel, and is available in six colors.

#### La Strada Case

- The plywood panels are covered with distinctive heavy-duty durable olefin fiber material
- Handles have extra-thick rubber grips for comfortable handling of heavy loads
- To prevent unwanted tampering, an exterior key lock is provided
- A combination model is available as an option
- Case closures are exterior mounted and of all steel construction
- Heavy-duty steel casters are available as an option for large or heavy cases

The Dago La Strada Case line was developed for equipment that is handled in local and short-distance situations but does not require the added weight and bulk of the A.T.A. and La Strada flight cases. Although this case is not intended for the extreme handling inflicted by common carriers (airlines, trucking), La Strada cases are built with the same attention to detail as all Dago cases. Distinctive heavy-duty olefin fiber outer covering provides a lighter-weight, durable case that will last.

## VIDEO PROJECTION SCREENS

Various models available with White Magic glass beaded or nongloss matte white surface, both flame retardant and mildew resistant.

### TRIPOD MODEL SCREENS

#### Picture King

- Extra heavy-duty tripod • Spring roller in embossed metal case • Camlok metal roller system • Automatic fabric lock • Automatic leg lock • Extra heavy extruded gable type constructed aluminum legs • Full range height adjustment • Plunger locks for positive stops • Built-in keystone eliminator

Size H x W	Nominal Diag. Size	Glass Beaded	Matte White	Suggested Retail
64" x 84"	100"	Picture King 11-3125-040	11-3125-330	\$296.00
72" x 96"	10'	11-3145-040	11-3145-330	322.00

### MANUAL WALL/CEILING SCREENS

#### Model B™

- Large, ruggedly constructed screen • No rub, flat back case • Grooved metal rollers on larger sizes • May be hung from wall, ceiling or map rail hooks

#### Model C™

- Floor stand to fit all sizes, optional at extra cost • Slat saddle distributes pull on heavy fabric for easier operation and longer life • Pull cord furnished • Case ball bearing mounted roller ends have sturdy metal supports concealed by heavy-duty end caps designed with built-in brackets for easy installation on wall or ceiling

Size H x W	Nominal Diag. Size	Glass Beaded	Matte White	Suggested Retail
<b>Model B</b>				
64" x 84"	100"	11-7125-040	11-7125-330	\$176.00
72" x 96"	10'	11-7145-040	11-7145-330	210.00
<b>Model C</b>				
64" x 84"	100"	11-9125-040	11-9125-330	\$280.00
72" x 96"	10'	11-9145-040	11-9145-330	290.00

### ELECTRIC WALL/CEILING SCREENS

#### Cosmopolitan® Electrol®

- Whisper-quiet screen with fingertip operation • Picture surface centered • Custom crafted for visual presentations • Walnut grain vinyl covered steel case

#### Board Room Electrol®

- Picture surface centered • Sturdy wood case • Comes assembled ready for in-ceiling installation

#### Senior Electrol®

- Automatic electric operation • Heavy-duty motor driven • Complete with three position control switch and metal hangers for either wall or ceiling installation • Strong wood case

Size H x W	Nominal Diag. Size	Glass Beaded	Matte White	Suggested Retail
<b>Cosmopolitan Electrol</b>				
64" x 84"	100"	12-8125-040	12-8125-330	\$647.00

## D-2000 SERIES ROUTING SWITCHERS

- Compatible matrix frames of 50 x 25, 25 x 25 and 25 x 20 used as building blocks for systems of up to 256 inputs, with up to 8 levels of control
- Easily field expandable—no need to specify initially the future matrix size
- Switcher is output oriented with each output bus having its own microprocessor control system, independent of every other output bus
- Serial data control system using RG-59/U coax—with opto-isolators in the control lines to avoid compromising reliability due to ground loop hum
- D-4300 series switching units can be furnished with compatible microprocessor controls, for use where small auxiliary switchers are needed for special purpose additional levels
- Non-proprietary components, available through electronics distributors, used throughout
- All plug-in modules interchangeable with other modules of same type. Switcher remains within specifications, without readjustment, when modules interchanged.

The Datatek D-2000 series of Video and Audio Routing Switchers use a variety of compatible matrix frames to make up systems of various sizes for video, audio, SMPTE time code and intercom.

The D-2000 series switchers are easily field expandable without down time, by adding matrix frames and interconnecting them with plug-in cables. There is no need to specify initially the future size of the switcher, provided the ultimate size is not greater than 256 inputs.

The switchers are output oriented both from a signal and a control standpoint. Output modules are either 25 x 1 or 50 x 1 and each output module has its own microprocessor control system which is completely independent of the control system on any other output bus. This provides maximum bus security since failure of a microprocessor or shorting a control line will affect only one bus and not the entire matrix.

Further, since each output bus has its own control system, the crosspoint tally fed back to the control panel is generated on the same module as that on which the crosspoint is located. A positive crosspoint tally status for the bus is generated, rather than a tally generated from a central control module serving many output busses.

Serial data is used over standard RG-59/U coaxial cable to connect the matrix frames to the control panels. This simplifies installation and reduces cost. To insure that ground loop hum does not compromise the reliability of the serial data control system, control panels are equipped with opto-isolators.

By combining a video matrix frame with one or more audio, time code, etc. matrix frames, multi level systems can be assembled for video, audio, stereo audio (left and right), SMPTE time code, intercom, tally, and machine assignment. The control system provides for up to 8 levels of control, any of which may be "follow video" or "breakaway". Where an auxiliary matrix of small size is needed, D-4300 series switching units can be equipped with compatible microprocessor control modules, and controlled as part of the D-2000 switcher. This is useful where a small video or audio auxiliary matrix is needed for special purpose additional levels for switching audio, tally, intercom, SMPTE time code, synclock, cursors, time base correctors, etc.

### D-2000 Series Video and Audio Routing Switchers

The D-2000 Series Routing Switchers use a serial data control system and have expansion capability to 250 inputs x 250 outputs.

**D-2000-25x20V** Video Routing Switcher. Basic "Building Block" matrix frame capacity is 25 inputs x 20 output busses. Frame size is 7 inches.

**D-2000-25x25V** Video Routing Switcher. Basic "Building Block" matrix frame capacity is 25 inputs x 25 output busses. Frame size is 8-3/4 inches.

**D-2000-50x25V** Video Routing Switcher. Basic "Building Block" matrix frame capacity is 50 inputs x 25 output busses. Frame size is 10-1/2 inches.

**D-2000-25x20A** Audio Routing Switcher. Basic "Building Block" matrix frame capacity is 25 inputs x 20 output busses. Frame size is 7 inches.

**D-2000-25x25A** Audio Routing Switcher. Basic "Building Block" matrix frame capacity is 25 inputs x 25 output busses. Frame size is 8-3/4 inches.

# VIDEO-AUDIO ROUTING SWITCHERS

## D-2000-50x25A

Audio Routing Switcher. Basic "Building Block" matrix frame capacity is 50 inputs x 25 output busses. Frame size is 10-1/2 inches.

### 100x25 AUDIO SWITCHER

There are no proprietary components used in the Datatek switching systems. All components are available through electronics distributors as standard items.

All plug-in modules are interchangeable with other modules of the same type, and the switcher will remain within specification, without adjustment, when modules are interchanged. If cable equalization is used, the cable equalizer would of course normally need to be reset. Removal or insertion of modules with power on will not disturb other signals, and will not blow fuses.

### MATRIX FRAMES

**D-2021** Power Supply System, 5-1/4" rack mounting. Includes fault monitoring and alarm.

**D-2044** Latch Retention (Battery) Supply.

**D-2045** Control Buffer Frame, 3-1/2", for use with X-Y Control Panels.

**D-2014** Source Tally Relay Frame, 1-3/4"

**D-2019** Parallel Interface Frame, 5-1/4"

Prices and Specifications Subject to Change Without Notice.

# CONTROL PANELS

D-2047 Three Bus Lever Switch Control Panel

D-2029 Single Bus Touch Pad Control Panel

## D-2000 Series Control Panels

Each Datatek control panel is equipped with its own microprocessor to communicate with an associated output bus microprocessor in the matrix frame. The serial data control system uses RG-59/U coaxial cable, with an optoisolator in each bus to prevent errors due to ground loop hum.

Control panels are available to operate either a single bus, or multiple busses. They are also available for audio-follow-video, audio or video breakaway, and for controlling multiple levels, either on a follow or breakaway basis. In addition, the control panels can be lever switch, touch pad keyboard, or pushbutton per input.

Modems and RS-232-C interfaces are available to operate single or multiple busses over standard telephone lines, or connected to automation systems.

**Control Panels** — Some of the D-2000 series control panels are listed below.

- D-2029** Single Bus Touch Pad Control Panel, 1-3/4" Rack Mounting, for video-only, audio-only, or audio-follow-video switching. With two LED displays, one for preset (selection) and one for line. With reset and take button.
- D-2030** Single Bus Touch Pad Control Panel, 1-3/4" Rack Mounting, for one video and two audio channels, with provisions for switching audio-follow-video or breakaway of one or both of the audio channels. Includes three LED displays, one each for video and audio channels 1 and 2. Includes switch level select switch, reset and take button.
- D-2031** Single Bus Touch Pad Control Panel, 1-3/4" Rack Mounting, for audio-follow-video or audio breakaway switching. With two LED displays, one for video source and one for audio source. Includes split-audio switch, reset and take button.
- D-2032** Portable Diagnostic Control Unit, for checking matrix status from front of rack. Includes LED displays and touch pad keyboard. May also be used as a single bus control panel.
- D-2033-25** Single Bus Pushbutton Control Panel, 1-3/4" Rack Mounting, with 25 illuminated pushbutton switches.
- D-2033-25S** Single Bus Control Panel, 1-3/4" Rack Mounting, with 25 illuminated pushbutton switches. Provision for split audio switching.
- D-2033-25P** Single Bus Control Panel, 1-3/4" Rack Mounting. Programmed to control any 25 specified inputs out of the matrix.
- D-2033-50** Single Bus Pushbutton Control Panel, 3-1/2" Rack Mounting, with 50 illuminated pushbutton switches.
- D-2033-50S** Same as above, but with additional switch for split audio switching.
- D-2034 S** Multi-Bus Touch Pad Control Panel, 3-1/2" Rack Mounting, for operation of the full matrix or a portion of the matrix, including provision for split audio operation. Includes two LED displays, one for output bus and one for input selected. With touchpad, reset and take button. Equipped with key-lock inhibit of the take switch to prevent accidental interference with individual bus control panels. Requires also D-2045 Control Buffer Frame.

- D-2037** Single Bus Control Unit, 2-digit lever switch input selection, no take button. Signal switches as lever switch changed. In miniature housing.
- D-2040** Single Bus Desk Top Control Panel, touch pad input selection with reset and take button, and LED status display.
- D-2041** Single Bus Desk Top Control Panel, lever switch input selection with take button.
- D-2042** Single Bus 2-Digit Lever Switch Control Panel, 1-3/4" Rack Mounting, with LED status display and take button.
- D-2042A** Single Bus 3-Digit Lever Switch Control Panel, 1-3/4" Rack Mounting, with LED status display and take button.
- D-2047** Three Bus 2-Digit Lever Switch Control Panel, 1-3/4" Rack Mounting.
- D-2049** Two Bus 2-Digit Lever Switch Control Panel, 1-3/4" Rack Mounting.
- D-2049A** Two Bus 3-Digit Lever Switch Control Panel, 1-3/4" Rack Mounting.
- D-2050** Supervisory CRT Terminal and X-Y Control Panel. Requires also D-2045 Control Buffer Frame.
- D-2036** Alpha-Numeric Single Bus Control Panel, 1-3/4" Mounting, 10 Alphas and 10 numerics/Alpha.
- D-2069A** Alpha-Numeric Single Bus Keypad Control Panel, 1-3/4" Rack Mounting, 12 Alphas and 99 numerics/Alpha.
- D-2098** Two Bus Keypad Control Panel, 3-1/2" rack mounting.
- D-2100** Single Bus Keypad Control Panel, 3-1/2" rack mounting.
- D-2103** Eight Bus Keypad Control Panel, 3-1/2" rack mounting, permits split audio, with nine LED displays.

## Machine Assignment and Control System

The Datatek Machine Assignment and Control System is designed for operation in conjunction with the D-200 Video-Audio Routing Switcher.

- D-2000-25x25D** Bi-Directional Data Matrix, 8-3/4", for 25 Source Buffer Modules and 25 Destination Switch Modules.
- D-2000-50x25D** Bi-Directional Data Matrix, 10-1/2", for 50 Source Buffer Modules and 25 Destination Switch Modules.
- D-2204** Source Buffer Module (one needed for each machine interfaced into system).
- D-2205** 25x1 Destination Switch Module (one needed for each machine control panel).
- D-2206** 50x1 Destination Switch Module (one needed for each machine control panel).
- D-2207** Machine Interface Unit, 8 function.
- D-2208** Machine Interface Unit, 16 function.
- D-2213** Machine Control Panel Module. Provides: (A) RS 422 connection to 25x1 or 50x1 Destination Switch Module and (b) Connection to readouts and momentary normally open switches on console for up to 8 functions.

Control Panels—Price dependent on customer requirements. Customer can use existing switches if desired or can build own panels.

Because of options and system configuration affecting price, all prices are on a "Price on Application" basis.

## ROUTING SWITCHER

### D-2400 Routing Switcher

- Compact design—up to 450 crosspoints per RU
- Inherent capability for up to 8 levels—individually addressable
- Up to 4 levels accommodated in one card frame
- Unlimited expansion, inputs and outputs
- Field expansion without rewire
- Wide video bandwidth (60MHz) to handle HDTV, MAC or Digital Video signals
- Vertical interval switching standard—external reference not used
- High audio level and low noise give wide dynamic range of 116dB minimum
- Very short, consistent access time, regardless of size
- Independent control microprocessor for each two buses in the system
- Minimum of two X-Y control ports for overall matrix control, with computer control capability
- Control system compatible with D-2000, D-2200, D-2300, D-4300 systems and control panels
- Modules are not slot conscious—no PROM nor switch changes required
- All crosspoints computer tested at factory

An extremely flexible control system is used, providing for comprehensive control of up to eight levels, for field programming either the whole or part of the matrix, for external RS-232/422 control, etc. The system is compatible with D-2000, D-2200, D-2300 and D-4300 series systems.

Unlimited field expansion of inputs and outputs is available, using building blocks of various configurations. Knowledge of, or an estimate of, ultimate system size at the point of initial installation is not required. Terminating inputs and internally bused-together card frames are not used.

Very wide bandwidth and high slew rate in the video matrix prepare the D-2400 to handle HDTV, MAC, Digital Video, etc. signals. Similarly, the high quality, high level and wide bandwidth of the audio matrix provide for a wide range of audio signals, including time code.

D-2400 systems are based on the use of 20 x 10 matrixed crosspoint boards and 10-bus output amplifier boards, arranged in various configurations and accommodated in 14" (8 rack units) card frames.

D-2400

Standard building block configurations are used. They range from 160 x 20 by 1 level to 40 x 20 by 4 levels. Modules and rear assemblies may be deleted for systems of smaller or intermediate size—or for an initial less-than-capacity installation that may later be brought up to full capacity by adding the deleted items. Other configurations within a card frame are available for special applications.

Regardless of system size and configuration, modules are not slot conscious. A module of a particular type will operate correctly in any slot where that type is used. PROM changes or switch changes, etc., are not required.

Datatek does not internally bus card frames together to initially provide an assembly of some specified ultimate system size. This practice, although convenient to a manufacturer, penalizes the customer with the necessity to specify an "ultimate" size, the necessity of occupying rack space with unused or partially unused card frames, and the necessity of higher initial cost.

All Datatek systems are expanded by external cabling, and the addition of system hardware as it becomes necessary. This, to a very large extent, relieves the customer from initial commitment to system size and configuration, to rack space and location, to hardware type and to higher initial cost.

# ROUTING SWITCHERS

**VIDEO-AUDIO SWITCHING UNITS**

## D-4300 Series Video and Audio Switching Units

- Video and Audio switcher "building blocks" of 6 x 1, 16 x 1 and 20 x 1
- Each building block equipped with self contained power supply
- Choice of video-only switching, audio-only switching, audio-follow-video and split audio operation
- Video and Audio inputs are high impedance bridging, permitting stacking units for multiple output bus applications
- Vertical Interval video switching
- Video switching units equipped with 4-section cable equalizer on output
- Differential Phase/Differential Gain performance of 0.15°/0.15%
- Video crosstalk 60 dB or better to 6.0 MHz

- Audio maximum output level +30 dBm, balanced
- Audio distortion 0.15% maximum, 20 Hz to 20 kHz
- Audio dynamic range in excess of 100 dB
- Audio inputs and outputs on connectors
- Balanced audio crosspoint, audio common mode gain -60 dB, 10 Hz -20 kHz
- Remote control panels using momentary switches with choice of LED or incandescent lamps for feedback tally
- Remote control cable is RG-59/U coax with BNC connectors
- Local control panels available
- Switching units are plug-in modules
- Optional tally relays available for source tallies, intercom, etc.

### SWITCHING UNITS

<b>D-4301A</b>	6 x 1 Video Switching Module, bridging inputs, occupies 2 module widths in 10-module DF-603 Rack Frame. Less rack frame and remote control panel. . . . .	<b>\$395.00</b>
<b>D-4310A</b>	6 x 1 Video Switching Module, terminating inputs occupies 1 module width in DF-603 Rack Frame or DF-603H Rack Frame. Less rack frame and remote control panel. . . . .	<b>\$385.00</b>
<b>D-4302A</b>	6 x 1 Audio Switching Module, bridging inputs, occupies 1 module width in 10-module DF-603 Rack Frame or in 3-module width DF-603H Rack Frame. Less rack frame and remote control panel. . . . .	<b>\$405.00</b>
<b>D-4304A</b>	20 x 1 Video Switching Unit, bridging inputs, including 1-3/4" rack frame, less remote control panel. . . . .	<b>\$895.00</b>
<b>D-4305A</b>	20 x 1 Audio Switching Unit, bridging inputs, including 1-3/4" rack frame, less remote control panel. . . . .	<b>\$895.00</b>
<b>D-4317A</b>	20 x 2 Audio Switching Unit, bridging inputs, including 1-3/4" rack frame, less remote control panel. . . . .	<b>\$1800.00</b>
<b>D-4307A</b>	16 x 1 Video-Audio Switching Unit, audio-follow-video switching, bridging inputs. Includes 1-3/4" rack frame, less remote control panel. . . . .	<b>\$1250.00</b>
<b>DF-603</b>	Rack Frame, 5-1/4" . . . . .	<b>\$185.00</b>
<b>DF-603H</b>	Rack Frame, 1-3/4" . . . . .	<b>\$155.00</b>

### REMOTE CONTROL PANELS

<b>D-4320A-6</b>	Pushbutton Remote Control Panel, 6 inputs, for video only, audio-only or audio-follow-video switching. 1-3/4" rack mounting, less control cable (coax). Uses switches with LED tallies. . . . .	<b>\$375.00</b>
<b>D-4322A-6</b>	Pushbutton Remote Control Panel, 6 inputs, for video-only, audio-only or audio-follow-video switching. 1-3/4" rack mounting, less control cable (coax). Uses switches with lamps for tally, and clear plastic lenses for inserting legends. . . . .	<b>\$385.00</b>
<b>D-4320A-6S</b>	Pushbutton Remote Control Panel, 6 inputs, audio-follow-video or split-audio switching. 1-3/4" rack mounting. Uses switches with LED tallies. . . . .	<b>\$395.00</b>
<b>D-4322A-6x2</b>	Pushbutton Remote Control Panel, 6 inputs, 2 output buses, for controlling two of 6 x 1 type switching units. 1-3/4" rack mounting, less control cable (coax). Uses lamps for tally and clear plastic lenses for inserting legends. . . . .	<b>\$475.00</b>
<b>D-4320A-16</b>	Pushbutton Remote Control Panel, 16 inputs, for audio-follow-video switching. For use with D-4307A Switching Units. 1-3/4" rack mounting, less control cable (coax). Uses switches with LED tallies. . . . .	<b>\$435.00</b>
<b>D-4322A-16</b>	Pushbutton Remote Control Panel, 16 inputs, for video-only, audio-only or audio-follow-video switching. For use with D-4307A Switching Units. 1-3/4" rack mounting, less control cable (coax). Uses switches with lamp for tally, and clear plastic lenses for inserting legends. . . . .	<b>\$460.00</b>
<b>D-4320A-20</b>	Pushbutton Remote Control Panel, 20 inputs, for video-only, audio-only or audio-follow-video switching. For use with 20 x 1 Switching Units. 1-3/4" rack mounting, less control cable (coax). Uses switches with LED tallies. . . . .	<b>\$455.00</b>
<b>D-4322A-20</b>	Pushbutton Remote Control Panel, 20 inputs, for video-only, audio-only or audio-follow-video switching. For use with 20 x 1 Switching Units. 1-3/4" rack mounting, less control cable (coax). Uses switches with lamps for tally, and clear plastic lenses for inserting legends. . . . .	<b>\$490.00</b>
<b>D-4320A-20S</b>	Pushbutton Remote Control Panel, 20 inputs, for audio-follow-video or split-audio switching. For use with 20 x 1 Switching Units. 1-3/4" rack mounting. Requires 2 control cables (coax). Uses switches with LED tallies. . . . .	<b>\$465.00</b>

# DATATEK CORP.

1121 Bristol Rd.

FAX: (201) 232-6381

# ROUTING SWITCHER

## D-4325 Routing Switcher

- 25 x 1 routing configuration in 2 rack unit frame:
  - Video and Stereo Audio
  - Video and single Audio Channel
  - Video Only
  - Stereo Audio
  - Single Channel Audio
- Control arrangements:
  - Local Control Panel
  - Remote Control Panel over coax line
  - RS-232/422 serial interface (standard)
  - "Wire per crosspoint" parallel
  - Binary parallel port (5 bit)
- All control arrangements operable in parallel with full tally
- Control system fully compatible with D-2000 series routing switchers
- Crosspoint status retained in event of power loss. Memory maintained for years
- AC coupled video inputs with DC restoration
- Vertical Interval video switching referenced to present output signal
- Precision video cable equalizing for outputs
- Differential Phase/Differential Gain of 0.08°/0.08%
- Audio inputs are balanced high impedance bridging, with high common mode rejection
- High audio output level capability, .03% total harmonic distortion at +32dBV
- Wide bandwidth audio for time code usage
- Provisions included to expand from 25 x 1 to 50 x 1

The D-4325 25 x 1 routing switcher provides "on-air" performance switching of video and audio signals. It is contained in a 2 rack unit mounting frame providing up to one 25 x 1 video and two 25 x 1 (stereo) audio channels, and redundant power supply modules. Modules can be deleted where less than maximum capacity is desired.

Twenty-five looping video inputs using BNC connectors are at the rear of the frame and allow expansion to more outputs by adding frames. Audio inputs are by way of 15-pin "D" connectors and, as in the case of the video inputs, looping audio input connectors are provided. A set of mating audio connectors is included with the system.

The rear of the frame also includes a 9-pin "D" connector for RS-232/422 control, which is included in the D-4325 package as standard. Loopthrough BNC connectors are included for use with D-2000 type control panels.

The front of the D-4325 frame can be equipped either with a blank front panel with power supply status LEDs, or a local control panel with audio/video breakaway capability. The front panel is hinged to provide access to the plug-in modules for adjustment or maintenance purposes. There are no active components in the rear of the frame; all active components are on the plug-in modules.

D-4325

## Control System

Control electronics for the D-4325 system is included on each of the video or audio switching/output modules. For audio-only switching, a separate control module is not needed.

The microprocessor based control system is D-2000 switcher compatible, allowing use of any of the D-2000 series control panels, as well as the control panels designed specifically for the D-4325 system. Pushbutton remote control is over a single coax cable using BNC connectors, and maximum control cable length is over 1,000'.

A local control panel, D-4325LC, mounts on the front of the rack frame in lieu of a front cover and provides audio/video breakaway switching. The D-4325LC local control panel also includes connectors for remote "wire per crosspoint" and binary parallel controls. This is useful when it is desired to operate the D-4325 system from existing control panels.

The D-2184-25 is a 1 rack unit remote control panel providing breakaway switching and also a "chop" facility to toggle automatically between two selected inputs. This is particularly useful in adjusting and comparing video levels, color levels and timing in amplifiers and program sources.

The D-2033A-25S Remote Control Panel, with relegendable button caps, is available as an alternative to the D-2184-25 Remote Panel.

An RS-232/422 control port is included in the D-4325 as standard, with baud rates up to 38.4K baud plug selectable on the switching/output modules. This allows control from computers, editors, terminals and modems.

A significant feature of the D-4325 control system is that all control methods may be operable in parallel, with normal tallies. For example, a switch made via the RS-232/422 port will be displayed as a tally on both the D-4325LC local control and D-2184-25 remote control panels.

The control system on each switching/output module includes a EEPROM to store crosspoint status in the event of a power loss. Data retention is specified as a number of years.

# VIDEO AMPLIFIERS

## D-603G Video Distribution Amplifier

• Differential input • 6 outputs • Front access for adjustment of gain  
• Output DC • Continuously adjustable cable equalization 0 to 1000' of  
Belden 8281 • Individual power supply • Requires D-603RA

.....\$195.00

D-603RA Power Supply and Connector Assembly . . . . .100.00

## D-604 Pulse Distribution Amplifier

• Differential input • 6 outputs • Regenerative type • Front access ad-  
justment of output DC and levels • Individual power supply • Requires  
D-603RA . . . . . \$205.00

## D-605 Subcarrier Distribution Amplifier

• Differential input • 2 independently adjustable channels each with 3  
outputs • Individual power supply • Requires D-603RA . . . . \$285.00

## D-606 Video Distribution Amplifier-Precision D.A.

• Differential input • 6 outputs • Selectable DC restorer or AC coupled  
operation • High gain up to 18dB available • Individual power supply  
• Optional cable equalizer • Requires D-603RA . . . . . \$280.00

D-6061 Cable Equalizer for D-606, provides continuously adjustable  
control of equalization vs cable length. Up to 1500' of  
8281 . . . . . \$20.00

## D-609 Video Distribution Amplifier, Precision D.A.

• Differential input • 6 outputs • Individual power supply • Cable  
equalization in 50' steps and gain control in 3dB steps are mounted on  
rear of frame, not on plug-in module • Substitution of standardized  
VDA modules does not require adjustment for frame slot • Requires D-  
609RA . . . . . \$295.00

D-609RA Power Supply and Connector Assembly . . . . .115.00

## D-609F Video Distribution Amplifier

• Same as D-609, but cable equalization and gain controls are accessi-  
ble from front of rack frame • Controls are not on plug-in module • Re-  
quires D-609FRA . . . . . \$295.00

D-609FRA Power Supply and Connector Assembly . . . . .155.00

## D-619B Pulse Distribution Amplifier

• Differential input • 6 regenerative Gaussian shaped outputs • Pulse  
presence indicated on front panel • Individual power supply • Requires  
D-619RA . . . . . \$300.00

D-619RA Power Supply and Connector Assembly . . . . .100.00

## D-663 Video Distribution Amplifier

• Differential input • 10 outputs • Individual power supply • Cable  
equalization—continuously adjustable • Gain control in 2dB steps with  
vernier mounted on front of rack frame and not on plug-in modules  
• Individual power supply • Requires D-663RA . . . . . \$385.00

D-663RA Power Supply and Connector Assembly . . . . .115.00

DF-663 7" Rack Frame, provides 10 module slots. . . . .325.00

DE-663 Module Extender . . . . . 30.00

D-663

## D-664 Video Distribution Amplifier

• Differential input • 6 outputs • Front access adjustment of gain and  
continuously adjustable cable equalization • 0 to 1000' of Belden  
8281 • Gain and equalization on plug-in sub-module to allow amplifier  
substitution without adjustment for gain, equalization or timing • Indi-  
vidual power supply • Requires D-619RA . . . . . \$245.00

D664RA Power Supply and Connector Assembly . . . . .100.00

## D-665 Precision Video Distribution Amplifier

• 6 outputs • AC coupled or DC restored operation • Differential input  
• Front access adjustment of gain and continuously adjustable cable  
equalization • Gain and equalization on plug-in sub-module to allow  
amplifier substitution without adjustment • Individual power supply  
• Requires D-664RA . . . . . \$280.00

## Frames

DF-603 5 1/4" Rack Frame, accepts 10 D-507G, D-518,  
D-603G, D-604, D-605, D-606, or D-607A modules,  
intermixed if desired . . . . . \$185.00

DF-603H 1 3/4" Rack Frame, accepts 3 D-507G, D-518,  
D-603G, D-604, D-605, D-606, or D-607A modules,  
intermixed if desired . . . . . \$155.00

DE-400A Module Extender for D-507G, D-518, D603G, D-604,  
D-605, D-606, and D-607A . . . . . \$30.00

DF-609 5 1/4" Rack Frame, provides 10 module slots. Accepts  
D-512, D-513, D-514, D-609, D-609F, D-619, D-657,  
D-658, D-660 or D-664 modules, intermixed if de-  
sired . . . . . \$235.00

DF-609H 1 3/4" Rack Frame, provides 3 module slots. Accepts  
D-512, D-609, D-609F, D-619, D-657, D-658 or  
D-660 modules, intermixed . . . . . \$195.00

DF-609BP Blank Panel for DF-609 and DF-609H . . . . . 10.00

DE-609 Module Extender . . . . . 30.00

# HEADS

## H-4 Spring Head

- 1/4-20 Camera Screw
- Dual Counterbalancing Springs
- Pan Handle locks both tilt and pan

**Load Capacity:** 25 lbs.  
**Tilt Angle:** ± 60°  
**Pan Rotation:** 360°  
**Height:** 4 1/2"  
**Width:** 2 1/2"  
**Length:** 4 1/2"  
**Weight:** 3 1/2 lbs.  
**Material and Finish:** Black Anodized Aluminum

H-4 Spring Head ..... \$112.00

H-4 Spring Head

## Q Spring Head

- Counterbalancing spring to prevent camera dumping
- Two camera screw locations

**Load Capacity:** 10 lbs.  
**Tilt Angle:** ± 60°  
**Pan Rotation:** 360°  
**Height:** 3"  
**Width:** 4"  
**Length:** 4"  
**Weight:** 1 lb.  
**Material and Finish:** Black Anodized Aluminum

Q Spring Head ..... \$48.00

Q Spring Head

## MH-1-S Spring Head

- Spring loaded tilt to prevent camera dumping
- Pan and tilt lock independently of each other
- Pan handle with adjustable angle fits either side
- Leveling base allows 5° tilt in all directions
- Bubble Level
- Friction drag adjustment of pan and tilt by spring loaded control knobs

**Load Capacity:** 30 lbs.  
**Tilt Angle:** 60° Up-90° Down  
**Pan Rotation:** 360°  
**Height:** 6"  
**Width:** 3 1/2"  
**Length:** 6"  
**Weight:** 4 1/2 lbs.  
**Material and Finish:** Black Anodized Aluminum

MH-1-S Spring Head ..... \$169.00

MH-1-S Spring Head

## FM-25 Fluid Head

- Dual handle capability
- Easily visible bubble level gauge
- Extremely smooth pan and tilt movements with two handles

**Load Capacity:** 25 lbs.  
**Side Tilt:** 90° either side  
**Pan Rotation:** 360°  
**Height:** 5"  
**Weight:** 5 lbs.  
**Platform Size:** 4" x 4 1/4"

FM-25 Fluid Head ..... \$255.00

FM-25 Fluid Head

## FM-15

Same as FM-25 but with lighter viscosity fluid for cameras under 15 lbs.

FM-15 ..... \$255.00

## HD-46 Spring Head

- Internal Torsion Spring to prevent camera dumping

**Load Capacity:** 50 lbs.  
**Tilt Angle:** 70° Up-90° Down  
**Pan Rotation:** 360°  
**Height:** 7 1/2"  
**Platform Size:** 4" x 6"  
**Weight:** 6 lbs.  
**Material and Finish:** Black Anodized Aluminum

HD-46 Spring Head ..... \$185.00

HD-46 Spring Head

## DSLA Leveling Adaptor

- Quick and easy action. Locks securely

**Load Capacity:** 50 lbs.  
**Leveling Adjustment:** ± 5°  
**Height:** 3 1/2"  
**Diameter:** 6 1/2"  
**Weight:** 2 lbs.  
**Material and Finish:** Black Anodized Aluminum

DSLA Leveling Adaptor ..... \$140.00

DSLA Leveling Adaptor

## F-10 Fluid Head

**Load Capacity:** 10 lbs.  
**Tilt Angle:** 90° Up-90° Down  
**Pan Rotation:** 360°  
**Height:** 4 1/2"  
**Width Overall:** 3 1/2"  
**Length:** 2"  
**Weight:** 1 1/3 lbs.  
**Platform Size:** 2" x 2 1/2"

F-10 Fluid Head ..... \$67.00

F-10 Fluid Head

## CM Cradle Head

**Load Capacity:** 50 lbs.  
**Tilt Angle:** 20° Up-30° Down  
**Pan Rotation:** 360°  
**Height:** 6"  
**Width:** 5"  
**Length:** 14"  
**Weight:** 7 lbs.  
**Material and Finish:** Black Anodized Aluminum

CM Cradle Head ..... \$248.00

CM Cradle Head

## CC Cradle Head

- Removable and adjustable camera platform for easy installation and perfect balance. Holds tilt without camera dumping

**Load Capacity:** 25 lbs.  
**Tilt Angle:** ± 45°  
**Pan Rotation:** 360°  
**Height:** 6 1/4"  
**Width:** 8"  
**Length:** 9"  
**Weight:** 5 lbs.  
**Material and Finish:** Black Anodized Aluminum and Plated Steel Cradle

CC Cradle Head ..... \$95.00

CC Cradle Head

## CS Cradle Head

Same as above except:  
**Load Capacity:** 40 lbs.  
**Length:** 10"  
**Weight:** 6 lbs.

CS Cradle Head ..... \$248.00

## MH-2S Spring Head

**Load Capacity:** 20 lbs.  
**Tilt Angle:** 60° Up-90° Down  
**Pan Rotation:** 360°  
**Height:** 5 1/2"  
**Width:** 3 1/2"  
**Length:** 6"  
**Weight:** 2 1/2 lbs.  
**Material and Finish:** Clear Anodized Aluminum

MH-2S Spring Head ..... \$121.00

MH-2S Spring Head

## RTH Two-Way Tilt Head

- "Quick Change" Camera Screw
- Friction drag screw to prevent camera dumping

**Load Capacity:** 10 lbs.  
**Tilt Angle:** 30° Up-90° Down  
**Pan Rotation:** 360°  
**Height:** 5"  
**Width:** 2"  
**Length:** 2 1/2"  
**Weight:** 1 lb.  
**Material and Finish:** Clear Anodized Aluminum

RTH Two-Way Tilt Head ..... \$51.00

RTH Two-Way Tilt Head

## MH-2

Same as above except without spring.

MH-2 ..... \$98.00

# TRIPODS

**The Challenger  
DG/H4 Tripod/Head**  
• Self-Locking Gear Mechanism  
Load Capacity: 25 lbs.  
Min. Height: 34"  
Max. Height: 70"  
Elevation Adjustment: 16"  
Geared Center Post: 1 3/8" Dia.  
Leg Diameters: 1 1/8" x 1 1/4"  
Head Tilt Angles: 60° Up-90° Down  
Spring Loaded Head: 2 Springs  
Head Pan Rotation: 360°  
Weight: 8 lbs.  
Material and Finish: Clear and Black Anodized Alum

DG/H-4 ..... \$207.00

**DG**  
Same as above except without head ..... \$148.00

**Dollypod Geared  
Elevation Trolley**  
Load Capacity: 25 lbs.  
Min. Height: 48"  
Max. Height: 68"  
Elevation Adjustment: 18"  
Geared Center Post: 1 7/8" Dia.  
One Section Leg: 1 1/2" Dia.  
Wheels: 5" Dia.  
Weight: 15 lbs.  
Material and Finish: Clear and Black Anodized Alum

Dollypod ..... \$358.00

**ETVG-W Geared  
Elevation Tripod**  
Available with wheels, wheels and spikes, or points. Split-collar lock for leg extension.  
Load Capacity: 75 lbs.  
Min. Height: 40"  
Max. Height: 88"  
Base Spread at max. ht.: 60"  
Base Spread at min. height: 38"  
Elevation Adjustment: 18"  
Geared Center Post: 1 7/8" Dia.  
Leg Diameters: 1 7/8" x 2"  
Wheel Diameter: 5"  
Weight: 15 lbs.  
Material and Finish: Clear and Black Anodized Alum

ETVG-W ..... \$593.00

**D/Q Lift Column  
Tripod/Spring Head**  
• Two camera screw locations  
Load Capacity: 15 lbs.  
Min. Height: 30"  
Max. Height: 84"  
Elevation Adjustment: 18"  
Lift Center Post: 1 3/8" Dia.  
Leg Diameters: 1 1/8" x 1 1/4"  
Head Tilt Angle: ± 70° Spring Loaded  
Head Pan Rotation: 380°  
Weight: 5 lbs.  
Material and Finish: Clear and Black Anodized Alum

D/Q ..... \$143.00

**DRG/Q**  
Same as above except with gear elevating post ..... \$155.00

**Reditilt RTG  
Geared Elevation  
Tripod/Head**  
• "Quick Change" Camera Screw  
• Friction Drag Screw  
• One handle locks pan and tilt simultaneously  
• Removable Head  
Load Capacity: 15 lbs.  
Min. Height: 28"  
Max. Height: 65"  
Elevation Adjustment: 20"  
Geared Center Post: 1 3/8" Dia.  
Leg Diameters: 1 1/8" x 1 1/4"  
Two-Way Tilt Head: ± 90°  
Head Pan Rotation: 360°  
Weight: 4 3/4 lbs.  
Material and Finish: Clear and Black Anodized Alum

Reditilt RTG ..... \$185.00

**CG Compac  
Gear Elevation Tripod**  
• Adjustable flat or pointed feet  
• Accepts CW 1 slip on wheels  
Load Capacity: 30 lbs.  
Min. Height: 32"  
Max. Height: 67"  
Elevation Adjustment: 16"  
Geared Center Post: 1 3/8" Dia.  
Outer Leg Section: 3/4" x 1 1/2"  
Inner Leg Section: 5/8" x 1"  
Weight: 7 lbs.  
Material and Finish: Clear and Black Anodized Alum

CG Compac ..... \$137.00

**C**  
Same as above except with lift column center post ..... \$110.00

**AG Geared  
Elevation Tripod**  
• Freeze-proof and stick-proof leg clamps  
Load Capacity: 50 lbs.  
Min. Height: 27 1/2"  
Max. Height: 58"  
Elevation Adjustment: 20"  
Geared Center Post: 1 7/8" Dia.  
Outer Leg Section: 2 1/4" x 1 1/4"  
Inner Leg Section: 1" Dia.  
Weight: 10 lbs.  
Material and Finish: Clear and Black Anodized Alum

AG ..... \$294.00

**A**  
Same as above except with "Floating Action" spring loaded center post ..... \$207.00

**PSG-34 Geared  
Elevation Pedestal**  
Load Capacity: 100 lbs.  
Min. Height: 34"  
Max. Height: 55"  
Elevation Adjustment: 18"  
Geared Center Post: 1 7/8" Dia.  
Weight: 30 lbs.  
Steel Center Column: 4" Dia.  
Base Spread: 32"  
All Swivel Wheels: 5" Dia.  
Material: Cast Alum base steel tube center post  
Finish: Black baked enamel

PSG-34 ..... \$534.00

**PS-34**  
Same as above except with "Floating Action" spring loaded center post and central wheel brake control . . . \$467.00

**PSG-43 Pedestal**  
Load Capacity: 100 lbs.  
Min. Height: 43"  
Max. Height: 60"  
Elevation Adjustment: 18"  
Geared Center Post: 1 7/8" Dia.  
Weight: 30 lbs.

# TRIPODS/DOLLIES/CAMERA AND MONITOR MOUNTS

### Reditilt Pro RTP

#### Lift Column Tripod/Head

- "Quick Change" Camera Screw
  - Friction Drag Screw
  - One handle set pan and tilt simultaneously
  - Reversible Center Post
- Load Capacity: 10 lbs.  
Min. Height: 28"  
Max. Height: 65"  
Elevation Adjustment: 18"  
Center Post: 7/8" Dia.  
Leg Diameters: 3/4" x 7/8"  
Two-Way Tilt Head: ±90°  
Head Pan Rotation: 360°  
Weight: 33/4 lbs.  
Material and Finish: Clear and Black Anodized Alum.

RTP ..... \$83.00

### Reditilt Junior

#### RTJ Life Column Tripod/Head

- "Quick Change" Camera Screw
  - Friction Drag Screw
  - One handle locks pan and tilt simultaneously
  - Reversible Center Post
- Load Capacity: 10 lbs.  
Min. Height: 23"  
Max. Height: 50"  
Elevation Adjustment: 16"  
Center Post: 7/8" Dia.  
Leg Diameters: 3/4" x 7/8"  
One-Way Tilt Head: ±90°  
Head Pan Rotation: 360°  
Weight: 23/4 lbs.  
Material and Finish: Clear and Black Anodized Alum.

RTJ ..... \$59.00

### Reditilt Mini-20 RTM-20 Lift Column Tripod/Head

- "Quick Change" Camera Screw
  - Friction Drag Screw
  - One handle sets pan and tilt simultaneously
  - Reversible Center Post
- Load Capacity: 10 lbs.  
Min. Height: 20"  
Max. Height: 52"  
Elevation Adjustment: 12"  
Center Post: 7/8" Dia.  
3-Section Leg Dia.: 5/8" x 3/4" x 7/8"  
One-Way Tilt Head: ±90°  
Head Pan Rotation: 360°  
Weight: 23/4 lbs.  
Material and Finish: Clear and Black Anodized Alum.

RTM-20 ..... \$67.00

### W-4 Universal Dolly

- For all D & S Tripods except C and CG.
- Load Capacity: 50 lbs.  
Folds To: 10" x 21"  
Circle Diameter: 42"  
Wheel Diameter: 5" x 3" x 13/16" tread  
Weight: 7 lbs.  
Material and Finish: Clear and Black Anodized Alum.

W-4 ..... \$107.00

### Slip-On Dolly

#### for CW-1 Compac Tripod

- Load Capacity: 20 lbs.  
Wheel Diameter: 4"  
Weight: 6 1/2 lbs.  
Material and Finish: Nickel Plated Steel

- Easy-On/Easy-Off Screw On Wheels Available with 3" Wheels and Deluxe Wheels ..... \$52.00

- CW-1DX Deluxe Wheels ..... \$109.00  
CW-12DL 2" Casters ..... \$39.00

### W-3 Dolly for A & B Tripods

- Easily attached to tripod legs and center post
  - Dolly folds with tripod
- Load Capacity: 60 lbs.  
Diameter Open: Same as tripod spread  
Rubber Wheels: 5" x 13/16" tread  
Weight: 6 lbs.  
Material and Finish: Anodized Alum.

W-3 ..... \$136.00

### Monopod/Friction Head

- "Quick Change" Camera Screw
  - Extension made secure with toggle lock instead of collet for strong support
- Load Capacity: 10 lbs.  
Min. Height: 31"  
Max. Height: 72"  
Leg Diameters: 7/8" x 1"  
RTH Head: ±90° One-Way Tilt  
Pan Rotation: 360°  
Weight: 17/8 lbs.  
Material and Finish: Clear Anodized Alum.

Monopod ..... \$45.00

### SD-3 Dolly Shelf

- Plugs on and off the legs of tripod. Fits all D & S tripods except A, B and C Series.
- Load Capacity: 30 lbs.  
Shape: Equilateral Triangle  
Length of Sides: 29"  
Rubber Wheel: 3" Dia.  
Weight: 9 1/2 lbs.  
Material: Steel  
Finish: Baked Metallic Alum.

SD-3 ..... \$90.00

- SO-5 Same as above but with 5" wheels.  
SO-6 ..... \$90.00

### WD-3 Wheel Dolly

- For all D model tripods
- Load Capacity: 20 lbs.  
Folds To: 5" x 6" x 22"  
Circle Diameter: 36"  
Wheel Diameter: 3"  
Weight: 4 1/2 lbs.  
Material: Steel  
Finish: Baked Metallic Alum.

WD-3 ..... \$51.00

### WB-8 Camera Mount

- "Quick Change" Camera Screw can be quickly converted to tamper-proof unit
  - May be mounted on ceiling, wall or table
- Camera Load Capacity: 10 lbs.  
Height: 5"  
Tilt Angle: ±90°  
Pan Rotation: 360°  
Tubing Length: 12"  
Tubing Diameter: 1"  
Mounting Screw: 1/4" - 20  
Material and Finish: Black Anodized Alum.

WB-8 ..... \$59.00

### UM-1 Camera Mount

- May be mounted on ceiling, wall or table.
- Camera Load Capacity: 25 lbs.  
Tilt Angle: ±90°  
Pan Rotation: 360°  
Height: 15"  
Width: 00  
Material and Finish: Clear Anodized Alum.
- Options: Additional tube length and brace supports may be ordered.

UM-1 ..... \$83.00

### RCM-1 Monitor Ceiling Mount

- Ceiling plate may be custom made to attach to existing ceiling
- Test Load Capacity: 500 lbs.  
Tilt Angle: ±30°  
Rotation: 360°  
Size: 3" larger than monitor  
Weight: 30 lbs.  
Material: Steel  
Finish: Brown Baked Enamel

RCM-1 ..... \$138.00

### RWM-3 Monitor Wall Mount

- Test Load Capacity: 500 lbs.  
Tilt Angle: ±30° down  
Rotation: 360°  
Size: 3" larger than monitor  
Weight: 30 lbs.  
Material: Steel  
Finish: Brown Baked Enamel

RWM-3 ..... \$150.00

### Deluxe Wheels DX

4" double ball bearing wheels with combined 360° swivel lock and wheel brake, step on locking lever for positive lock and release.

Add \$57.00 to list of any D & S Dolly

# FRESNEL LENS SPOTLIGHTS

## LEONARDO 1000W, 2000W, 5000W FRESNEL LENS SPOTLIGHTS

### Common Features

- Front and rear spot-flood focusing • Highly efficient optical system
- Manual or pole operation • Innovative lens door accessory clips which can be positioned to suit various applications • Engineered ventilation system ensuring extended lamp life • Rugged octagonal shape of light sheet steel, allowing strong air flow to pass the lamp, lens and reflector, particularly when the unit is tilted down • Quick acting spot to flood action is accomplished with a smooth no-slip focusing mechanism • Anodized aluminum reflector • High temperature heat resistant matte black paint • All purposes spot used for basic set lighting either in studio or on location • Available either with 23' (7m) cable and switch or with 3'-3" cable, no switch

### Accessories

- Wire guard • Four leaf rotating barndoor • 8-way rotating barndoor
- Color frame • Complete set of scrims

### LEONARDO 1000W Fresnel Lens Spotlight

- G 22 bi-post, heavy-duty socket • Recessed 10A toggle switch mounted on the unit, rated for AC and DC • 6" diameter convex Fresnel lens mounted on the hinged front door • 23' (7m) cable, 3 core x 1.5 sq.mm

### Accessory

- Cone with two discs (front aperture: 55 x 80 x 105mm)

### 310.100 Manual (M.O.)

**Focus:** Directly controlled by front and rear T-handles  
**Stirrup:** Flat bar or cast aluminum with various mounting options  
(Please specify with order)

310. LEONARDO 1000-750-500W, 6" Fresnel, manual operated, 25'-0" cable, switch, connector and 5/8" adaptor on yoke . . . . . \$360.00

310/ST LEONARDO 1000-750-500W, 6" Fresnel, manual operated for hanging, with 3'-0" cable, connector, flat yoke and c-clamp 91.100 . . . . . 350.00

### 311.100 Pole Operated (P.O.)

**Focus:** Front mounted angle cast aluminum cup coded yellow and rear T-handle  
**Stirrup:** Constructed from precision diecast parts and steel tubing allowing control of the following functions through colored diecast aluminum cup:  
Vertical movement: (Tilt)—White  
Horizontal movement: (Pan)—Blue

311. LEONARDO 1000-750-500W, 6" Fresnel, pole operated, 3'-0" cable, c-clamp and connector . . . . . \$540.00

### LEONARDO 2000W Fresnel Lens Spotlight

- G 38 bi-post, heavy-duty socket • Recessed 20A toggle switch mounted on the unit, rated for AC and DC • 10" (250mm) diameter convex Fresnel lens mounted on the hinged front door • 23' (7m) cable, 3 core x 2.5 sq. mm

### Accessory

- Cone with two discs (front aperture: 110 x 150 x 190mm)

### 320.100 Manual (M.O.)

**Focus:** Same as 310.100  
**Stirrup:** Aluminum flat bar with various mounting options  
(Please specify with order)

320. LEONARDO 2000-1500-1000W, 10" Fresnel, manual operated, 25'-0" cable, switch, connector and 1 1/8" adaptor on yoke . . . . . \$550.00

310.100 (M.O.)

321.100 (P.O.)

351.100 (P.O.)

### 320/ST

LEONARDO 2000-1500-1000W, 10" Fresnel, manual operated for hanging, with 3'-0" cable, connector, flat yoke and c-clamp 91.100 . . 580.00

### 321.100 Pole Operated (P.O.)

**Focus:** Same as 311.100  
**Stirrup:** Same as 311.100  
**Switch:** Rotary 20A switch with angled diecast aluminum cup coded red

321. LEONARDO 2000-1500-1000W, 10" Fresnel, pole operated, 3'-0" cable, c-clamp and connector . . . . . \$750.00

### LEONARDO 5000W Fresnel Lens Spotlight

- G 38 bi-post, heavy-duty socket • Recessed 45A lever switch mounted on the unit, rated for AC and DC • 12" (300mm) diameter convex Fresnel lens mounted on the hinged front door • 23' cable (7m), 3 core x 4 sq. mm

### Accessory

- Cone with two discs (front aperture: 155 x 215 x 275mm)

### 350.100 Manual (M.O.)

**Focus:** Same as 310.100  
**Stirrup:** Same as 320.100

350. LEONARDO 5000W, 12" Fresnel, manual operated, 25'-0" cable, switch, connector and 1 1/8" adaptor on yoke . . . . . \$960.00

350/ST LEONARDO 5000W, 12" Fresnel, manual operated for hanging, with 3'-0" cable, connector, flat yoke and c-clamp 91.100 . . . . . 925.00

### 351.100 Pole Operated (P.O.)

**Focus:** Same as 311.100  
**Stirrup:** Same as 311.100  
**Switch:** Rotary 40A switch with angled diecast aluminum cup coded red

351. LEONARDO 5000W, 12" Fresnel, pole operated, 3'-0" cable, c-clamp and connector . . . \$1125.00

# DISCHARGE FRESNEL LENS SPOTLIGHTS

## Rembrandt 575W/1200W/2500W/4000W/6000W Discharge Daylight Fresnel Lens Spotlights

- Double-ended, medium length arc discharge lamp with a color temperature of 5600°K and color rendering index in excess of 90
- High voltage igniter mounted in an external protective enclosure at side of lamphouse base. This allows improved cooling and enhances electrical insulation of critical component
- Ballasts and accessories are interchangeable with other luminaires in DeSisti range
- Can be used as key or fill light on location
- Rugged octagonal shape of light sheet steel, allowing strong air flow to pass the lamp, lens and reflector, particularly when the unit is tilted down
- Quick acting spot to flood is accomplished with smooth non-slip focusing mechanism
- On/off momentary pushbuttons mounted on enclosure at side of lamphouse base
- Elapsed time indicator, non-resettable
- Power cut-off microswitch acts if Fresnel lens is broken or removed or the lens door is not properly closed
- Anodized aluminum reflector
- High temperature heat resistant matte black paint

### Accessories

- Wire guard
- 4-leaf rotating barndoor
- 8-way rotating barndoor
- Color frame
- Cone with set of discs
- Complete set of scrims

## Rembrandt 575W

### Discharge Daylight Fresnel Lens Spotlight

- 6" (150mm) diameter convex Fresnel lens, complete with wire guard
- Flat bar aluminum manual stirrup with 1 1/8" (28.57mm) spigot (B.S.)
- 25' (7.5m) cable, 7 core x 1.5 sq. mm with mating connector

### Accessories

2200.100

## TIZIANO 2500W Discharge Daylight Lamp Open-Face Luminaire

• Focusable open-face luminaire designed for the single ended discharge lamp • Combination of an accurately constructed ellipsoidal aluminum reflector with the high output compact source lamp produces high performance fitting suitable for the most stringent conditions • Focus range of 8.5: 1, spot to flood extends the use of this versatile luminaire • Unsurpassed in long throw applications • 5600°K color temperature and rugged lightweight construction make the "TIZIANO" a particularly useful keylight or daylight fill on film or video locations • Rugged octagonal shape of light sheet steel with rear handle and diecast accessory clips. Spot to flood action is accomplished with a smooth no-slip mechanism • G 38 bi-post socket • High voltage discharge lamp igniter housed in a thermally insulated compartment at the rear of lamphouse. Hot restrike permitted, but 20 seconds lag is suggested between two strikes • Ellipsoidal sandblasted anodized aluminum reflector • Flat bar aluminum manual stirrup with 1 1/8" (28.57mm) spigot (8.S.) • 10" (0.5m), 3 x 4 sq. mm + 4 x 1 sq. mm with mating connector

- 2230/System** "TIZIANO" 2500W system with:  
#2230 2500W "TIZIANO", #2024 ballast 120V, #2236 barndoor, #2237 color frame, and #2021.100 extension cable .....\$4,650.00
- 2230.** "TIZIANO" 2500W, CID open face focusing spotlight with 3'-0" cable, connector and yoke .....2,400.00

2230.100

## RAFFAELLO 575W and 2500W Discharge Lamp Softlights

• Extends the use of the high intensity discharge lamps • Offers users a soft, virtually shadowless light output • Efficiency of the lamp is very high with daylight quality light beam (5600°K) (3200°K lamps also available) • Low power requirement and cold source • Protective glass is mounted above the source optical system to limit the ultraviolet emission • Power cut-off microswitch is provided if the glass is broken or removed • Nickel plated brass socket with expansion allowance • On/off pushbutton mounted on control panel. Hot restrike permitted, but 20 seconds lag suggested between two strikes • Solid and slotted sheet metal, without spill light and appropriate ventilation • Sandblasted anodized aluminum reflector • Aperture: 12 5/8" x 15" (320 x 380mm) (575W) 17" x 24 3/4" (430 x 630mm) (2500W) • Yoke: flat bar with 1 1/8" (28.57mm) spigot (to 8.S.) (575W) • Double reinforced tubes with 1 1/8" (28.57mm) spigot (to 8.S.) (2500W) • Built-in elapsed time indicator • Heat resistant matte black paint • 25" (7.5m) cable, 7 core, 1.5 sq. mm with mating ballast connector

- 2000/System** "RAFFAELLO" 575W HMI system with:

## "CARAVAGGIO" 1200W Discharge Par 64 Luminaire

• Luminaire utilizing the 1200W PAR 64 Discharge Lamp • Each unit comes complete with on/off switches and power cable • Oval shaped beam pattern may be oriented by rotating the lens in front of the lamp • Various additional combinations for flood, spot and intensity control are made possible by special snap-in lenses on hinged front-door • Lightweight unit can be used in applications from ENG work to large scale outdoor productions • Can be mounted to double or triple headers to act as a multi-PAR system for area coverage • Strong output of the lamp delivers its maximum punch in a rugged lightweight housing offering more light per pound of weight than most comparable units of the same wattage range

- 2320/System** "CARAVAGGIO" 1200W PAR system with:  
#2320 1200W "CARAVAGGIO", #2014 ballast 120V, #2326 barndoor, #2327 color frame, and #2011.100 ext. cable .....\$3,200.00

## Desisti HMI Softlights

The Desisti Softlight is developed to extend the usage of the HMI, DMI, Brite-Arc or QMI High Intensity Discharge Lamps into fill light applications. Suited for Film, Video or Photographic media, the low current draw of the lamps coupled with the soft, virtually shadowless light output of the unit offer many possibilities for the lighting professional. Housed in heavy sheet metal, the unit has the appearance of a traditional softlight with the lamp and starting circuitry mounted in a removable bottom panel for easy maintenance. A protective glass is mounted above the optical system to limit the ultraviolet emission of the lamp. The glass protection is seated on a safety cut-out switch to ensure the unit can only be turned on if the glass filter is in place.

The top hood contains the secondary reflector which can be easily changed from a white painted reflector to an anodized aluminum reflector for different effects. Robust and compact, the Desisti Softlight is available in 575W, 1200W and 2500W sizes. Units have a full complement of accessories and are available with 120V or 220/240V ballasts.

## RC80/F 650-120V 800W-220/240V

## RC100/F 1000W 120V or 220/240V

The Varibeam 650W and 1000W units are variable focus softlights with a full range of interchangeable accessories. The unit is suited for key or fill light applications. Features include a rugged stainless steel strap for support to the lamp sockets, even field of light with focus from spot to flood by means of an external plastic knob. The attachment of the barndoor is simplified without the need of an accessory holder unless additional accessories are required. The RC80/F650W can also be used for mounting 800W 220V lamps, 650 or 1000W unit . . \$141.00

## RC200 2000W-120V or 220/240V

The Varibeam 2000W variable focus spotlight is a smartly priced unit with variable focus control providing a smooth even field of light in the spot or flood position. The rugged metal housing ensures protection of the reflector and sockets and will withstand the treatment of location handling. Ideal for key, fill or special effect applications in studio or on location. The RC200 can operate at 120 or 220/240V by simply changing the lamp. The power cable comes complete with 15' of cable and in-line switch. A full range of accessories are available and the barndoors can be mounted to the unit without the traditional need for accessory holder. . . . . \$293.00

# PORTABLE LIGHTING

HMI Softlights

## Telescopic Poles

Used to mount lights in low ceilings, doorways, windows, and various other difficult situations. The springloaded telescopic poles are made of lightweight, aluminum metal with rubber feet attached at top and bottom for safe mounting to a variety of surfaces. The complete system can be used to hang lights up to 40 lbs.

## RC110 "Minilite" 1000W-120V, 800W-240V

The 1000W Minilite-RC110 is a floodlight with a fixed lamp position suitable for illumination of small backgrounds or for fill light applications. The even field of light is extremely smooth from side to side and can be neatly cut with the integral barndoor leaves. The unit is also provided with 12' of cable, an on/off switch, and a fiberglass back. The rugged construction of the unit will withstand the rough handling of location lighting. A range of mounting equipment is available for use with the RC110. . . . . \$169.00

# LIGHTING KITS

## DLK 200

"Punch" light kit for lighting through windows and other transparent materials. 2000W units for long throw applications 120 or 220V. Stands extend to 8'-3", folds to 35". Accessory holder not required for barndoor.

- 2 RC200 2000W varibeams
  - 2 RC201 2K accessory holders
  - 2 RC202 4-leaf barndoors—2K
  - 2 RC220 2K stands
  - 2 MX10 Set of full single and full double scrims (10" dia.)
  - 1 DC121638 Large 2K case (12" x 36" x 38")
- Total kit weight: 54 lbs.

DLK 200.....\$1367.00  
DLK 200/L with 2-FEY 2000W lamps .....1568.00

## DLK380

Draws under 20A for ENG or ETV applications. Accessory holder not required for barndoor.

- 3 RC80/F 650W varibeams
  - 3 RC103 4-leaf barndoors
  - 3 240.100 Nano stands
  - 1 DC81632 Compact 3 light case (8<sup>3</sup>/<sub>4</sub>" x 16" x 32")
- Total kit weight: 30 lbs.

DLK 380.....\$871.00  
DLK 380/L with lamp(s).....935.00

## DLK 3100

3—1K's in compact rugged case. Barndoors attach without accessory holder

- 3 RC100/F 1000W varibeams, plus same accessories as DLK 380
- Total kit weight: 30 lbs.

DLK 3100.....\$871.00  
DLK 3100/L with 3-DXW 1000W lamps .....982.00

## DLK 480

Can be used in 220V applications. Ideal for EFP applications or documentaries.

- 4 RC80/F 650W varibeams
  - 4 RC101 Accessory holders
  - 4 RC103 4-leaf barndoors
  - 4 RC240 Nano stands
  - 4 MX63 Set of full single and full double scrims (6<sup>5</sup>/<sub>8</sub>" dia.)
  - 1 DC 111638 Extended 4 light case (11" x 16" x 38")
- Total kit weight: 44 lbs.

DLK 480.....\$1362.00  
DLK 480/L with 4-FAD 650W lamps .....1447.00

## DLK 4100

Full accessories including scrims, barndoors, and accessory holders. Lightweight compact case carries all items.

- 4 RC100/F 1000W varibeams
- Plus same accessories as DLK 480  
Total kit weight: 44 lbs.

DLK 4100.....\$1362.00  
DLK 4100/L with 4-DXW 1000W lamps .....1511.00

## DLK 3801

Variety of ENG and ETV applications, draws under 20A. Accessory holders and scrims included. Additional accessories available including dichroic filters and black flags. 120V or 220V use.

- 3 RC80/F 650W varibeams
  - 2 RC101 Accessory holders
  - 2 RC103 4-leaf barndoors
  - 3 240.100 Nano stands
  - 1 MX63 Set of full single and full double scrims (6<sup>5</sup>/<sub>8</sub>" dia.)
  - 1 DC111632 Extended 3 light case (11" x 16" x 32")
- Total kit weight: 34 lbs.

DLK 3801.....\$ 950.00  
DLK 3801/L with lamp(s) .....1014.00

DLK 200

DLK Mix 5

## DLK Mix 4

Industrial or documentary lighting applications, 120 or 220V. Extremely flexible Mix kit with two 650's and two 1K fill lights. Four lightweight rugged stands. Case allows for storage of varibeams with accessory holders attached to units.

- 2 RC80/F 650W varibeams
  - 2 RC110 Minilites—fixed focus fill lights
  - 2 RC101 Accessory holders
  - 2 RC103 4-leaf barndoors
  - 4 RC240 Nano stands
  - 2 MX63 Set of full single and full double scrims (6<sup>5</sup>/<sub>8</sub>" dia.)
  - 1DC111632 Extended 3 light case (11" x 16" x 32")
- Total kit weight: 43 lbs.

DLK Mix 4.....\$1226.00  
DLK Mix 4/L with 2-FAD 650W and 2-FLM 1000W lamps ...1329.00

## DLK Mix 5

"Portable Studio" for indoor or location. 5 lights in one case, 5000W. Good for CCTV or CATV. Minilites used for fill, set or cyc lights. Includes 4 Nano stands and fiber grips.

- 2 RC100/F 1000W varibeams
  - 3 RC110 Minilites, fixed focus fill lights
  - 2 RC101 Accessory holders
  - 2 RC103 4-leaf barndoors
  - 1 RC413 Gaffer grip with 5/8" spigot
  - 4 240.100 Nano stands
  - 2 MX63 Set of full single and full double scrims (6<sup>5</sup>/<sub>8</sub>" dia.)
  - 1 DC111638 Extended 4 light case (11" x 16" x 38")
- Total kit weight: 50 lbs.

DLK Mix 5.....\$1431.00

# PANTOGRAPHS

## Mini Pantographs

Designed to meet the trend of ever smaller and lighter luminaires, the "Mini Pantograph" is a compact self-balancing unit with a 15kg capacity. Its maximum 3m extension means that it is as much suited to the video/photographer's type studio, as it is to a production studio being used for secondary suspension where compact dimensions, lightweight, medium capacity and short drop are the design parameters.

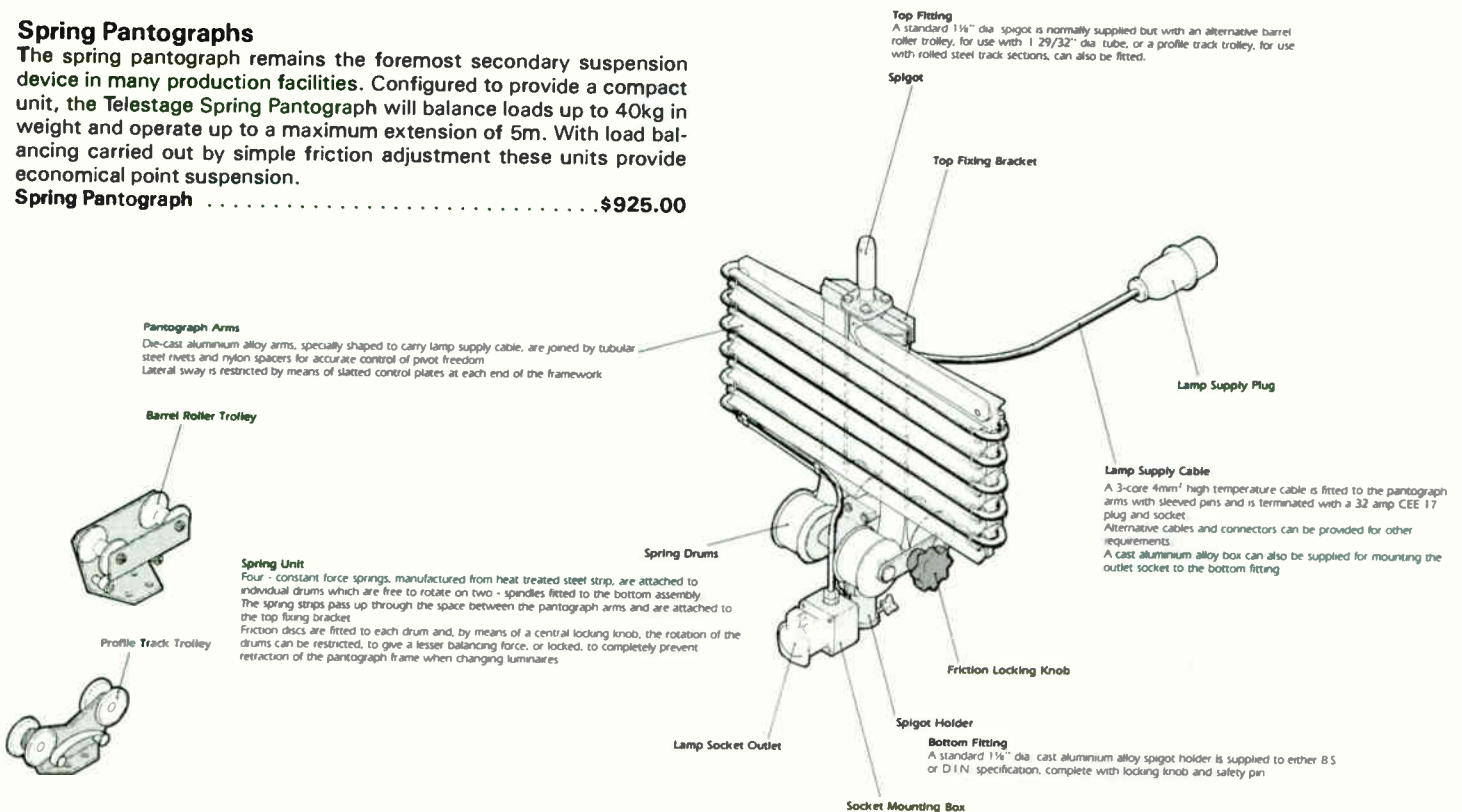

**Mini Pantograph . . . . . \$650.00**

## Spring Pantographs

The spring pantograph remains the foremost secondary suspension device in many production facilities. Configured to provide a compact unit, the Telestage Spring Pantograph will balance loads up to 40kg in weight and operate up to a maximum extension of 5m. With load balancing carried out by simple friction adjustment these units provide economical point suspension.

**Spring Pantograph . . . . . \$925.00**

# DIGITAL EFFECTS SYSTEM

## Illusion Digital Effects System

- Multi-channel system
- Perspective with variable vanishing point (option)
- Bubble memory. Non volatile and with 2000 event storage
- Performs as dual channel system when in the A/B video switching mode
- Variable expansion control to infinity
- Freeze
- Preprogrammed effects
- User programmable
- Three dimensional joystick control...horizontal, vertical and circular
- Rotation (optional)
- Unlimited expansion and compression
- Vertical and horizontal aspect control
- User control of: Effect duration and speed, Picture size, Screen placement, Perspective orientation, Rotation
- Manual or automatic execution
- Smoothly executed effects
- 100% digital processing
- Can be used as an additional channel to other digital effects systems
- Switcher and editor compatible
- Small rack equipment...can be installed in remote vans
- NTSC component version
- Feedback

Posterization  
 Mosaics  
 Freeze  
 Strobe  
 Variable border

### Feedback effects:

A bordered picture spun with "feedback" to give multi-image geometrical effect. Unique to Illusion, the effect is internally generated and does not tie up a switcher M/E. The image geometry is manipulated and controlled through Illusion's panel.

### Mosaic:

Captured from live video or freeze frame, the resolution (tile size) may be varied with Illusion's fader permitting easy On-Air execution.

### Posterization:

As with mosaic, any signal source may be posterized. Variations are available to compensate for highly illuminated and dark subjects.

### Alternate line split image with perspective:

Split image is formed by separating the image into alternate lines. The solid video (seen in the monitor picture) is the unsplit portion of the signal. The perspective vanishing point is variable.

### Double image with axis offset:

A double image over a background can be manipulated into any number of creative effects with Illusion. The double image could be posterized independent of the background...or put into perspective (cut-in monitor picture) are just two examples.

\*All these pictured effects can be performed on dynamic live video or frozen images.

The system consists of a CRT terminal, disk drive and rack electronics that are added to an existing Illusion Mainframe. The CRT is menu driven. Up to two additional disk drives may be added which would provide storage space for up to 10,000 "slides". A removable cartridge drive is also available.

ILN4000 Illusion	\$23,900.00
<b>Options</b>	
PSP100 Perspective	\$ 5,000.00

## DPS-130 Four-Matte

- Allows cable system operators and broadcast facilities to view four video signals simultaneously
- Selection of the desired channel can be made without scanning all converter channels available
- Further applications include monitoring of several CCTV cameras for security and multi-source viewing in mobiles where space is at a premium
- Output is RS-170A, enabling use as a switcher for alternate level of effects
- Freeze frame ability permits stop motion of all frames simultaneously
- Border is generated with selectable coloring
- H $\emptyset$  and B $\emptyset$  controls
- Internal processing amplifier
- Component video processing
- Interfacing available for an optional programmable audio switcher
- Burst and horizontal timing is front panel adjustable using a series of up/down counters
- Can also be configured for monochrome only

DPS-130 Four-Matte . . . . . \$18,500.00

## DPS-165 Frame Synchronizer

- 525-line buffered memory
- Monochrome or direct color input
- Synchronous or non-synchronous switching
- Auto diagnostic memory
- Internal test signal generator
- Two true RS-170A outputs
- Optional remote control
- Freeze frame/field (field 1/2 selectable)
- Horizontal phase control

DPS-165 Frame Synchronizer . . . . . \$4,990.00  
DPS-165A Frame Synchronizer with adaptive comb filter . . . \$5,990.00  
RC-165 Remote Control for DPS-165 and DPS-165A . . . . . \$1,340.00

# TIME BASE CORRECTORS/ SYNCHRONIZERS

## DPS-170 Time Base Corrector

- High performance/low cost
- Heterodyne capability
- Direct color capability with 3.58MHz feedback
- Wide dynamic tracking range of -1 to +3 with clear viewing at up to  $\pm 30X$  normal tape speed
- Tape source flexibility, with a 16-line buffered correction window and RF/TTL selectable drop out compensator output
- Two true RS-170A video outputs
- Editing and assembly
- Horizontal phase control
- Match frame editing

DPS-170 Time Base Corrector . . . . . \$4,990.00

## DPS-175 TBC/Framestore

- High performance, low cost
- Freeze frame/field (field 1/2 selectable)
- Synchronous and non-synchronous switching to tape
- Wide dynamic tracking range of -1 to +3 and clear viewing up to  $\pm 30X$  play speed
- Heterodyne capability
- Direct color capability with 3.58MHz feedback
- 525-line buffered correction window and TTL/RF selectable drop out compensator
- Two true RS-170A video outputs
- Horizontal phase control
- Editing and assembly
- Match frame editing

DPS-175 T.B.C./Framestore . . . . . \$6,450.00  
DPS-175A T.B.C./Framestore with adaptive comb filter . . . \$6,990.00

## DPS-185 Test Signal Generator

- 32 test signals
- 2 independent outputs per channel
- 7 auxiliary outputs—sync drives
- Genlockable
- RS-170A specs
- Dedicated color black outputs

DPS-185 Sync/Test Generator . . . . . \$4,250.00

# DISTRIBUTION AMPLIFIERS

## 110 Video Distribution Amplifier

- DC output coupling
- Regulators on every DA
- 6 outputs
- 9dB gain
- 20MHz bandwidth
- Mounting versatility

The 110 Video Distribution Amplifier emphasizes the use of tightly controlled standard component parts that are properly derated for ultra stable performance.

The standard DC coupled outputs provide the user with a unit that has minimum tilt and bounce. Each video distribution amplifier has its own regulator, thereby limiting a failure to one unit should a problem occur with the DC circuitry. The LED indicators for plus and minus voltages allow for a convenient and rapid visual indication of normal operation. The 20MHz bandwidth permits distribution of digital data and other wideband information.

The 110 Video Distribution Amplifier can be mounted in a vertical or horizontal configuration. For horizontal mounting, the 101 frame is used. This frame has a capacity for mounting up to 3 video DA's and comes complete with its own built-in power supply. When the video DA's are mounted vertically, the frame 103 is used. The 103 frame requires an 801 power supply and the capacity is up to 10 video DA's.

110 Video DA, 1 x 6, DC coupled outputs . . . \$285.00  
AC coupled outputs . . . .295.00

## 120 Video DA with Differential Input Back Porch Clamper 10dB Slope Equalizer

- Differential input
- Common mode rejection, -55dB
- Back porch clamper, fast or slow
- Optional 10dB slope equalizer
- 6 outputs
- 12dB gain

The 120 is a 1-input, 6-output video distribution amplifier which features differential input, a switchable back porch clamper and an optional 10dB cable slope equalizer.

On cable runs where common mode hum exists, the differential input minimizes this problem by at least 55dB. The switchable clamper circuit will further reject hum by 30dB and, in addition, the field tilt is reduced to within 0.1%. The clamping speed (fast or slow) can be altered quite simply by a plug-in strap located on the PC card.

The optional 10dB 6-section cable equalizer is continuously variable and easy to use. Only one adjustment is required and it is located on the front edge of the card. With the Di-Tech equalizer you do not require separate fixed equalizers for various lengths of cable. In addition, an extender card is not required for making equalizer

adjustments. The equalizer is a plug-in card which can be added in the field without the need for soldering.

The 120 is designed for mounting in the 101 frame which accepts up to 3 modules or the 103 frame which accommodates up to 10 modules.

120 Video DA, 1 x 6 with differential input and clamper . . . . . \$380.00  
Option A 120 with 10dB cable equalizer . . . . . 430.00

## 1200 Clamper, Amplifier and Equalizing DA

- Switchable 75/124 ohm input
- Flat gain, 12dB
- Adjustable equalization up to 10dB
- Plug-in modules
- 2/75 ohm and 1/124 ohm outputs
- Back porch clamp, fast or slow

The 1200 is a versatile unit that eliminates many problems caused by lengthy 75 ohm or 124 ohm cable runs. The back porch switchable clamper attenuates hum and field tilt by at least 30dB. The differential input reduces common mode hum caused by ground loops by at least 55dB. In applications where microwave ringing occurs, the unit is easily converted over to a soft clamping action via a strap that is conveniently located on the 120 plug-in module.

The six section slope equalizer is continuously variable from 0 to 10dB at 4.5MHz or 10.0MHz with a single front panel control. The equalizer is switchable between 75 ohms and 124 ohms and the location of the slide switch is on the rear panel. Post or pre-equalization is easily accomplished with the 1200.

The flat gain range of the unit is -6 to + 12dB and the control is continuously adjustable. This control is located on the front edge of the module.

The 1200 is normally supplied to function with a nominal input of 115VAC. Should the need arise for DC operation, this unit can be furnished to operate at  $\pm 24$  or  $\pm 48$  VDC. DC operation is an optional feature.

1200 75/124 ohm, clamper, amplifier and equalizer . . . . . \$1220.00

# PULSE DISTRIBUTION AMPLIFIERS/ FRAMES/POWER SUPPLIES

## 150 Pulse Distribution Amplifier

- 6 outputs
- I.C. circuitry
- Input hum up to 4.0V p-p, no output jitter
- Constant output
- Maximum stability
- Test points, input and output

The 150 Pulse Distribution Amplifier is a device which utilizes the incoming pulse for time reference only and regenerates a pulse that is virtually free from distortion.

The input will accept up to 4.0V p-p hum with no jitter appearing on the 6 outputs. With input levels from 2 to 8V p-p, the output will remain constant at 4.0V p-p and the output rise and fall times are controlled and remain at 100ns.

Front panel test points are provided for monitoring the input and outputs and each pulse distribution amplifier has its own DC regulator.

The 150 utilizes the 101 frame for mounting up to 3 modules and with the 103 frame you can accommodate up to 10 modules.

**150 Pulse DA, 1 x 6 . . . . . \$275.00**

## 151 Pulse Distribution Amplifier with Variable Delay

- I.C. circuits
- Pulse width adjustment up to 0.5μs
- Hum up to 4.0V p-p, no output jitter
- 6 outputs
- One delay adjust for 6 outputs
- Optional 3 delay adjusts for 6 outputs

The 151 Pulse Distribution Amplifier is identical to the 150 Pulse Distribution Amplifier except for the added features of adjusting the pulse width and pulse delay. The standard 151 has one delay adjustment for 6 outputs and the 151 Option A has one adjustment per 2 outputs thereby providing 3 delay controls.

The carefully controlled passive circuit and I.C. comparator allows for stable pulse delay and avoids problems usually encountered with one shot multivibrators.

Front panel test points are provided for monitoring the input and outputs and each pulse distribution amplifier has its own DC regulator.

The 151 utilizes the 101 frame for mounting up to 3 modules and with the 103 frame you can accommodate up to 10 modules.

**151 Pulse, DA, with variable delay. 1 adjustment per 6 outputs . . . . . \$325.00**

**Option A- Model 151 with 3 adjustments. 1 adjustment per 2 outputs . . . . . 390.00**

151

103

## Frames and Power Supplies

The 101 Frame has been designed to mount into a standard 19" EIA rack frame assembly. The 101 configuration allows for mounting up to 3 Di-Tech modules and its built-in power supply.

The 103 Frame has been designed to mount into a standard 19" EIA rack frame assembly. A hinge down front panel is supplied to protect and to allow convenient access to the modules. The 801 Power Supply slides into the frame assembly and up to 10 Di-Tech modules can be accommodated.

The 801 is a plug-in power supply that has been designed to easily handle the current requirements from the di-tech modules under specified voltage variations and temperature environments. A special feature of the power supply is the redundant DC circuitry which permits the unit to continually provide the specified voltages in the event of a problem. In addition, the appropriate LED will be extinguished and a contact closure will occur for the external alarm output.

<b>101</b>	1 3/4" frame, with power supply, mounts up to 3 modules . . . . .	<b>\$395.00</b>
<b>103</b>	5 1/4" frame, mounts up to 10 modules and 801 power supply . . . . .	<b>.310.00</b>

# VIDEO DETECTORS/IDENTIFIERS

404

### 402 Video Presence Detector

- 4 bridging inputs per card
- 12 video inputs per 1<sup>3</sup>/<sub>4</sub>" frame
- 40 video inputs per 5<sup>1</sup>/<sub>4</sub>" frame
- Threshold control, 10 to 40 IRE units of sync
- 4 alarm switches per card
- External alarm outputs

The 402 Video Presence Detector utilizes a unique input circuit that is sharply tuned to pass only the horizontal line rate of the composite video input. In addition, the circuit is also level dependent, thereby providing the user with a true indication of presence or absence of video.

The 402 provides for 4 bridging loopthrough inputs and 4 alarms. Each detector has its own alarm circuit, thereby permitting an individual alarm for each video input. The on-board alarm light is illuminated and separate external relay outputs are provided.

There are 4 front panel switches which individually engage or disengage the alarm circuits. An adjustment is provided for each detector in order to adjust the threshold level from 10 to 40 IRE units of sync. With the 101 frame you can monitor up to 12 inputs and the 103 frame can accommodate up to 40 inputs.

The Video Presence Detector is adaptable to a wide variety of applications, such as: simultaneous monitoring of all video inputs to large A/V routing switchers, security surveillance systems, monitoring remote feeds and controlling remote equipment on/off.

- 402 Video Presence Detector, 4 inputs, 4 alarm relays . . . \$340.00
- 402S Video Presence Detector, 4 inputs, 4 alarm relays (B402007) . . . 380.00

### 403 Video Presence Detector with Relay Switching

- I.C. detectors
- On-board LED status indicators
- Relays for external alarms
- Automatic relay switching
- Separate detector for auxiliary input
- 2 Form C contacts for balanced audio switch

The 403 has been designed to be utilized at remote unattended areas where automatic video and audio switching is required when a failure occurs in the transmission system.

Two inputs are provided. One is for the program and the other is for the auxiliary backup composite video feed. Should the program feed fail, the on-board video detector output would then trigger the relay to automatically switch to the auxiliary input. Normally the unit is factory set to switch after a 3 second failure but this can be easily altered by a simple component change. As this switch is taking place, an on-board LED failure indicator is illuminated and a separate relay is used for the external alarm. In addition, 2 Form C contacts are provided for switching balanced audio.

A unique feature of the 403 is the separate video detector and alarm circuit for the auxiliary input. This added feature now allows the user to have simultaneous status on both program and auxiliary video inputs. With the 101 frame, you can mount up to 3 modules.

- 403 Video Presence Detector, 2 inputs, relay switching . . . \$315.00

### 404 Video Presence/Loss Detector

- 4 bridging inputs per card
- 2 relays per alarm circuit
- One relay electronically latched
- Adjustable time delay control
- 12 video inputs per 1<sup>3</sup>/<sub>4</sub>" frame
- 40 video inputs per 5<sup>1</sup>/<sub>4</sub>" frame

The 404 Video Presence Detector employs 4 separate sync detectors each with its associated relay alarm circuitry. The 4 inputs per card are high-impedance bridging loopthrough.

When conditions are normal, a green on-board LED is illuminated. Should a video loss occur, an on-board red LED is illuminated and 2 separate relays are provided for the external alarm. One relay is a Form C type which closes or opens in a signal alarm condition. When video is present the relay automatically reverts to a normal condition. The second relay, which is Form A, is electronically latched and can only be reset by external control.

Each alarm circuit has an adjustable time delay control for establishing alarm priorities and switching logic. Delays can be set from 1 to 10 seconds.

The 404 mounts into the 101 frame. The frame is 1<sup>3</sup>/<sub>4</sub>" high and accepts 3 modules. With this approach you can monitor up to 12 video lines.

For larger systems, the 103 frame is utilized. This frame accommodates 10 modules and 40 video feeds are monitored in 5<sup>1</sup>/<sub>4</sub>" of rack space.

- 404 Video Presence Detector, 4 inputs, 2 alarm relays per input . . . \$455.00

### 410, 411, 412, 413 Video Detectors And Video Identifiers

- Numbers are selected via thumbwheels
- Video loss alarms
- Numbers are added passively to video
- Vertical and horizontal positioning of numbers

The 410 Detector and Source Identifier has circuitry for a sync detector, high and low level APL detectors, number generator and an internal sync generator. Four numbers are added passively to the incoming video source. When a sync failure occurs, the unit provides a video loss alarm and then switches over to its internal sync generator that delivers its own composite signal which only contains the four numbers.

The 411 Detector and Source Identifier contains circuitry for a sync detector, number generator and an internal sync generator. Two numbers are added passively to the incoming video. When a sync failure occurs, the unit provides a video loss alarm and then switches over to its internal sync generator that delivers its own composite signal which only contains the two numbers.

- 410 Video Presence Detector, 4 numbers, APL detectors . . . \$495.00
- 411 Video Presence Detector, with two numbers . . . 395.00
- 412 Video Source Identifier, 4 digits . . . 295.00
- 413 Video Source Identifier, 3 numbers and 2 letters . . . 330.00

# COMPUTER CONTROLLER/ AUTO-LOGGER

## PACE 2000 7 Day Computer Controller

- Up to 1501 events
- 7 day period, repeatable
- Emergency mode
- 240 sources/240 destinations
- Audio/video breakaway
- Simple English language
- Off-line data storage
- External interrupts

The PACE 2000 Computer Controller is an upgraded version of the PACE 1000 System which allows automated and manual control of A/V routing switchers, VTRs, satellite receivers, A/B switchers, I.F. processors, etc.

The 2000 System will operate locally at 9600 baud and for remote applications the baud rate is 1200. The 2000 will allow up to 240 source labels and 240 destination labels.

On the rear of the computer there are two output ports. One is for source/destination control such as A/V routing switchers and the other is labeled unit/function for control of machines such as VTRs. Machine control does require additional optional hardware in order to interface the device with the computer.

The output from the computer is a parallel 16-bit word plus a strobe line. Each execution takes approximately 30ms, therefore you can execute approximately 30 events in a one second time period. If required, you can time set the events to within one second of each other.

The PACE 2000 is a non-complex device to operate with regard to entering the events for a 7 day period. Non-technical people can be utilized in using this system. All events are in English language and when the schedule for the week is entered, an optional paper printer can be used for obtaining a hard copy printout. The video terminal has a standard typewriter keyboard along with function keys. These function keys are utilized for selecting various modes of operation.

**PACE 2000 consists of:** Intel SBC chassis including all RAM and EPROM boards, ADDS video terminal, battery back-up . . . \$13,700.00

### Optional Peripheral Equipment

- Back-up power supply . . . . . \$1,200.00
- Printer with 1 case of paper . . . . . 800.00
- Case of paper for printer . . . . . 70.00
- Modem #3434 with handset coupler . . . . . 1,180.00
- Modem #3455 (for computer location) . . . . . 1,090.00
- ADDS video terminal (additional units) . . . . . 1,600.00
- 2100 automatic logger (without printer) . . . . . 1,825.00
- Mini Mate, floppy disk . . . . . 2,400.00

### Optional Output Interface Hardware

- 3001** 5 1/4" source/destination frame assembly, up to 16 modules . . . . . \$855.00
- 3002** 5 1/4" unit/function frame assembly, up to 16 modules . . . . . 855.00
- 3005** 1 3/4" unit/function frame assembly, up to 3 modules . . . . . 500.00
- 3006** 1 3/4" source/destination frame assembly, up to 3 modules . . . . . 500.00
- 801** Power supply (used with 3001 and 3002 frames) . . . . . 475.00
- 300** Source/destination card, 20 x 1 latch, TTL output . . . . . 250.00
- 301** Source/destination card, 100 x 1 BCD latch . . . . . 260.00
- 303** Unit/function card, 10 on/off relays, latch or momentary . . . . . 300.00
- 304** Unit/function card, 8 relays, momentary or latch, VTR control . . . . . 275.00

Intel SBC System

- 305** Source/destination card, 16 x 1 binary output (Hughes SVR 463) . . . . . \$ 270.00
- 580** Source/destination 12 x 1 format (used with 5400 A/V switcher) . . . . . 250.00
- 584** Serial to parallel converter (use 101 frame) . . . . . 500.00
- 9730** Master source/destination override and interface, panel, 3 1/2" x 19" with auto disconnect. Thumbwheel selection for inputs and outputs (for 5800 and 5840) . . . . . 1,200.00
- 9760** Master unit/function override and interface panel . . . 710.00

2100 Auto-Logger

## 2100 Auto Logger

- User labeling for sources and destinations
- Logs events to the nearest second
- Prints actual tally from switcher

The 2100 Auto Logger is used in applications where a hard copy printout is required for verifying input/output switching from a routing switcher.

A video terminal is used for accessing the RAM in the microprocessor. RAM access allows the user to type in a 5 character description for input sources and output destinations on the matrix switcher. The terminal is also used to set the clock, date, time and print the source and destination names.

The 2100 has a built-in calendar and a 24 hour clock. When the logger is used with our PACE seven day computer controller they function together as follows: A source/destination code is passed through the 2100 logger to the switcher. When the proper crosspoint is taken, the tally from the switcher is then passed back to the logger. When this cycle is completed, the printout provides you with what the source/destination should be, the actual tally back for the source switched, and the date and time for the switched event. Should the switcher take an incorrect source the printout will show the incorrect source and a flag message (TALLY ERROR!) is printed.

The auto logger does require a separate interface panel as well as a video terminal and these items are priced separately.

- 2100 Auto Logger (for 5800 and 5840) . . . . . \$1,825.00

## 5400 Audio Follow Video Routing Switcher

- Solid-state switching, audio and video
- Matrix size: 12 x 2, 8 x 2 or 4 x 1
- Vertical interval switching
- 20MHz bandwidth
- Optional relay outputs
- Remote control flexibility

The 5400 remote controlled audio follow video routing switcher has been designed to offer the user a quality distribution system at an economical price.

The electronics is housed in a 1<sup>3</sup>/<sub>4</sub>" frame. A choice of matrix size is provided. They are: 12 x 2, 8 x 2 or 4 x 1. Video switching is vertical interval and in the absence of vertical drive, switching reverts automatically to random.

Video inputs are bridging loopthrough, high impedance. Output expansion is easily accomplished by looping through the inputs until the desired output number is achieved. Typically, you can expand the output configuration up to 12 before requiring video DAs.

The 504 plug-in PC switching card contains all the electronic circuits for the video, audio, control, latching and optional tally. The 101 frame is pre-wired at the factory for a 12 x 2 configuration, thereby permitting a truly simple input expansion by purchasing just the 504 switching card.

Variations in methods of control are available and they are: illuminated momentary pushbuttons or touch-tone®.

- 5400 AFV, remote controlled routing switcher with VI switching:
- |                          |           |

# AFV ROUTING SWITCHERS

5400

5412

## 5412 Audio Follow Video Routing Switcher (2 Audio Levels)

- 2 levels of audio per input
- Matrix size: 12 x 1
- Vertical interval switching
- Plug-in PC card
- Remote control flexibility
- Wide bandwidth

The 5412 remote controlled audio follow video routing switcher has been designed to offer the user a compact quality distribution system at an economical price.

The electronics as illustrated is housed in a 1<sup>3</sup>/<sub>4</sub>" frame and this compactness makes it extremely useful as an input selector for VTRs, small studios, ENG or mobile vans. The control panel has 12 illuminated momentary pushbuttons and the control cable normally supplied is 50'. Should longer lengths be required, please specify on your order.

The dual audio provision provides the user with an extra feature that is normally supplied by most other switching manufacturers.

Should the future application be stereo, multilanguage or control codes, the 5412 can satisfy your requirements without adding an additional chassis in order to obtain that second audio level.

Video inputs are bridging loopthrough, high impedance. Output expansion is easily achieved by looping the inputs until the desired number of outputs is attained. Typically, you can expand the output configuration up to 6 before video DAs are required.

The 5412 contains a plug-in printed circuit card which contains all the circuitry for the video, dual audio control, latching and on board DC regulators. The AC supply is housed within the frame assembly. All integrated circuits are mounted in their own sockets and the I.C.'s are not soldered to the printed circuit card.

- 5412 AFV, remote controlled routing switcher with: . . . . . \$1950.00
- A. 12 x 1 matrix
  - B. 2 channels of audio per input
  - C. V.I. switching

NOTE: Price includes one 12 x 1 control panel with illuminated pushbuttons, one 50' control cable and two 10' IN/OUT cables.

- 5426 8 x 2 AFV switcher with GVG interface (panels not included) . . . . . \$2375.00

# SWITCHERS

## 5470 Audio/Video Tone Access Switching System

- Touch-tone control
- Audio, video or audio/video switching
- Dial up or dedicated tone access
- Control up to a 4 x 4 matrix in 5 1/4" of rack space
- LED crosspoint status
- Optional relay output control cards

The 5470 system has been designed to simplify and minimize installation time of tone accessed switching equipment at remote unattended sites.

This system includes all the necessary circuitry to control four independent 4 x 1 switching matrices. The 4 x 1 matrices are easily converted to a 4 x 4 matrix by externally adding looping cables on the inputs.

The 5470 consists of the 3137A auto answer card along with a compression amplifier which compensates for variations in line levels. The 570 decoder decodes the two frequencies associated with each number on the touch-tone encoder. The 572 control decoder accepts the output from the decoder and produces 12 high current PNP outputs which are then utilized for controlling the switching matrix on the 504 card. The switching card does contain its own latching circuitry.

The rear panel assembly is wired to accept an optional 573 control card. This card is utilized for other control functions and is supplied with 12 momentary or latching relays.

Should an AC power failure occur at the unattended site, the system is designed to accept and diode switch to an external DC source.

**5470 Telephone tone accessed switching system:**  
4 x 4 audio follow video matrix. . . . \$4080.00

**Option A**  
Battery back-up system . . . . .390.00

## 5500 Audio/Video Routing Switcher

- Up to 28 inputs by 2 outputs per frame
- Vertical interval switching (standard)
- Solid-state switching, audio and video
- Remote control flexibility
- Loopthrough inputs
- Plug-in PC cards

The 5500 series routing switcher provides a compact approach to a simple and quick means of routing any input signal to any output bus without disturbing other inputs.

The standard control panels which house the momentary illuminated pushbuttons are located separately from the electronics. Should other means of addressing the switcher be required, you may utilize thumbwheel switches with readouts or touch-tone control.

5500

5106/5112

Inputs to the switcher are in groups of four and BNC type connectors are used for all inputs and outputs. Inputs are high-impedance, bridging and output expansion is easily accomplished by the loopthrough method. The switching pulse for video is vertical interval.

An optional feature for the 5500 is the tally relay. Each time a crosspoint is taken a relay closure is provided for applications such as camera tally, machine control or other control functions.

**5500** AFV, remote controlled switcher with VI switching:  
Matrix 28 x 2 . . . . . \$5540.00

Matrix 24 x 2 . . . . . 535.00  
Matrix 20 x 2 . . . . . 460.00

**NOTE:** For the 5500, price includes 50' control cables and momentary illuminated pushbuttons. Price for extra cable lengths is .95 per ft.

**509** 4 x 2 audio/video switcher plug-in card (5500). . . . . 430.00

**542** Dual audio/video output amplifier card (5500). . . . . 395.00

## 5106 Passive Video Switcher Non-Illuminating Buttons

- Front panel video test points
- Crosstalk: -70dB minimum

The 5106 GAP video switcher has been designed for applications where low cost switching is required, such as test signal selection, monitor input selection and closed circuit distribution.

The 5106 is provided in a 6 x 1 configuration and utilizes high quality switches with silver plated contacts. The selected input is fed to the output and other inputs are automatically terminated.

Test points are provided on the front panel for purposes of verifying the video inputs and levels.

**5106** 6 x 1 video switcher, passive . . . . . \$225.00  
**5112** 12 x 1 video switcher, passive. . . . . 290.00

Telex 97-1806

# CONTROL SYSTEM/ ENCODER/CONVERTER

## 5700 Touch-Tone® Control System

- Controls 12 to 144 functions
- Phase lock loop circuitry
- CMOS ICs
- High current or relay outputs
- Stability  $\pm 1\%$ , FO
- Bandwidth  $\pm 5\%$ , FO

The 5700 Series Touch-Tone Control System is designed for applications in controlling A/V routing switchers, pan and tilt functions for remote cameras, supervisory control systems, or any communication environment that requires control through use of the telephone lines, utilizing touch-tone pads.

With this system, Di-Tech provides all the necessary functional PC cards with power supplies and frames to satisfy most requirements thereby virtually eliminating the usual interface problems.

For example, the 570 tone decoder utilizes phase lock loop circuitry to detect the tones and CMOS ICs to decode 2 of 7 tone frequencies into 12 low level outputs. Should high level outputs be required, you would then add the 572 control decoder card which provides for strobe gating and 12 high current open collector driver outputs. If relay outputs are required, then you utilize the 573. This unit is the same as the 572 except for the relay outputs. Should more than 12 outputs be desired, then you simply add the 572 or 573 for up to 144 outputs.

5700 Touch-tone control system, consisting of models:

570 tone decoder . . . . .	\$390.00
572N/P control decoder . . . . .	255.00
573 control decoder, momentary relay output . . . . .	350.00
573A & C control decoder, magnetic latching relays (12) . . . . .	440.00
573B control decoder, magnetic latching relays (6) . . . . .	390.00
575 tone encoder . . . . .	275.00
578 X-Y control decoder for 5840/5800 switchers . . . . .	475.00
3137A automatic answering card with compression amplifier . . . . .	400.00

## 5704 BCD X-Y Encoder

- Front panel numerical readout
- Remote control 5800/5840 switcher
- BCD encoded output
- 4 digit coding, 100 x 100 control

The 578 is utilized in applications when remote access to the 5800/5840 routing switcher is required via the telephone lines or via an RF link with sub carrier. The standard telephone touch pad is used for selecting the output and then the input.

The 578 X-Y tone encoder must be used in conjunction with the 570 tone decoder. The 578 takes the one of twelve outputs from 570 and formats them into a 16-bit BCD word. This 2-byte word is used to drive the X-Y input of the 5840 routing switcher. It may also be used to drive the 5810 (X-Y interface) for the 5800 routing switcher.

This card also features a numerical readout located on the front of the card which indicates the numbers as they are entered. The output numbers are entered first followed by the "\*\*\*\*". The input numbers are then selected followed by the "\*\*\*\*" which enters the numbers and generates a take pulse to the switcher. The whole procedure is performed over the phone line from a remote location.

5704 X-Y, BCD controller via  
touch-tone (101, 3137, 570, 578)  
used with 5800 and 5840. . . . . \$1600.00

## 584 RS-232 Converter

- Standard RS-232 input/output, 1200 baud standard
- Parallel data in, serial data out
- Serial data in, parallel data out

The 584 converts parallel data to the standard RS-232 format when used in the "Transmit" mode and in the "Receive" mode the unit receives the RS-232 and converts it back to the parallel format.

The 584 is factory set to operate at 1200 baud but other baud rates are available as an option.

The 584 is used in applications where parallel data from the PACE computer must be converted to a serial format for transmission purposes. This card will also accept RS-232 serial data and convert it back to parallel data for purposes of controlling the 5800 and 5840 routing switchers.

584 Serial to parallel or parallel  
to serial converter (card only) . . . . . \$500.00

## ROUTING SWITCHER

### 5800 Series Audio/Video Vertical Interval Routing Switcher

- 20 x 15 AFV matrix, 10<sup>1</sup>/<sub>2</sub>" rack space
- 20 x 1 switching modules
- BCD parallel control
- Crosspoint latch feedback tallies
- Differential input, audio
- Expandable inputs and outputs
- 3 level audio switching, optional
- DC restorer for video inputs
- LED readouts, crosspoints status, optional
- Audio breakaway, optional

The 5800 Series AFV routing switcher employs separate frames to house the video and audio modules. A building-block approach is utilized in order to simply expand the inputs or outputs as future requirements change. Non-proprietary multi-source components are used throughout and there are no specialized single source items utilized in the system.

The audio and video switching modules contain 20 x 1 matrices complete with output amplifiers. When the switching module is extracted from the frame you only effect those inputs to that one output bus. Other output buses are not effected. The video and audio matrix frames are arranged in a 20 input by 15 output format. Each frame occupies 5<sup>1</sup>/<sub>4</sub>" of rack space so for a 20 x 15 AFV matrix you only require 10<sup>1</sup>/<sub>2</sub>" of rack space. Each 20 x 1 video switching module contains an LED numerical readout for crosspoint status. This is in addition to the tally feedback indicator on the control panel.

Control input and crosspoint tally return are in a bi-directional BCD format, therefore only eleven wires are required for the control cable. The basic capacity is 100 inputs and expansion beyond that requires additional control facilities. Various methods of control are (I) illuminated momentary pushbuttons (II) thumbwheel with take button and tally indicator (III) touch pad with preset and on-air indicators (IV) external computer or controller.

External power supplies are furnished with the system. The rack space for the supplies vary, depending on the matrix ordered. Dual power supplies and battery back-up systems for crosspoint memory are available as an option.

#### The 5800 Series Contains The Following Items: 5801 Frame Assembly (Video)

The frame is 5<sup>1</sup>/<sub>4</sub>" high and accommodates all the video modules for a 20 x 15 matrix. A hinged down front panel is provided for easy access to the vertically mounted plug-in modules. All matrix frames are provided with connector facilities which enable field expansion to be carried out in a simple and quick fashion. Control and signal loopthrough connectors are also provided.

5801 Video Assembly

5802 Audio Assembly

#### 520 Video Matrix Board

This board is arranged in a 20 x 1 output format. In addition to the crosspoints, each card contains its own control, latching and crosspoint tally circuitry. The crosspoints utilize transistors and diodes and the control circuitry is BCD 8-bit parallel with take line. Drive levels are TTL. Each module contains its own output amplifier with a level control mounted up front.

#### 530 Video Input Amplifier

The input circuitry contains a DC restorer for APL variations and sync adding for non composite inputs. All of these features can be added or deleted via straps on the module. There are 5 input amplifiers per card and for 20 inputs, 4 cards per frame are required.

#### 560A Vertical Trigger and X-Y Control Card

This card provides the trigger pulse for vertical interval switching, which is derived from external sync. Should the sync input fail or is not used, then a random trigger pulse is generated. When using the sync adder feature, this card processes the sync and distributes it to the input amplifier cards. LEDs are provided for sync and trigger failure indication. The 560A also contains the logic circuits for X-Y control and audio breakaway.

#### 5802 Audio Frame Assembly

The frame is 5<sup>1</sup>/<sub>4</sub>" high and accommodates all the audiomodules for a 20 x 15 matrix. A hinged down front panel is provided for easy access to the vertically mounted plug-in modules. All matrix frames are provided with connector facilities which enable field expansion to be carried out in a simple and quick fashion. Control and signal loopthrough connectors are also provided.

#### 525 Audio Matrix Board

This board is arranged in a 20 input by 1 output format and an I.C. is used for the crosspoint. Switching for three separate audio channels is provided and each channel has its own amplifier with a front panel control. The 525 accepts the BCD data from the 520 card, decodes it and drives the I.C. crosspoint.

#### 535 Audio Input Amplifier

The input circuitry contains a differential input and is high-impedance bridging. There are 20 amplifiers on each board and one board per audio channel is required. For three channels of audio you require three input amplifier boards. The operational amplifier employs an I.C.

# ROUTING SWITCHERS/ CONTROLLER

## 5815/5820 Audio/Video Vertical Interval Routing Switchers 5815

- Up to a 15 x 7 AFV matrix
- 2 levels of audio per input
- V.I. switching
- Size: 5 1/4" H x 19" W matrix frame

The 5815 Routing Switcher has a frame capacity for a 15 x 7 AFV matrix. Inputs are expandable in increments of 5 and the outputs are in increments of one. The audio section can be mono or stereo. Audio and video plug-in cards are housed in a single 5 1/4" rack frame assembly and a separate power supply is used to supply the DC power. Input expansion beyond 15 is not possible. Output expansion beyond 7 is achieved by adding another 15 x 7 frame and then you must loophrough on the inputs.

**5815 AFV, remote controlled routing switcher with:**  
15 x 7 matrix, 2 channels of audio per input,  
V.I. switching, seven 50' control cables,  
power supply with crosspoint memory . . . \$10,200.00  
**Note:** See 5820 for panel pricing.

## 5820

- Up to a 20 x 6 AFV matrix
- Up to 3 levels of audio per input
- V.I. switching
- Size: 5 1/4" H x 19" W matrix frame

The 5820 Routing Switcher has a frame capacity for a 20 x 6 AFV matrix. Inputs are expandable in increments of 5 and the outputs are in increments of one. The audio section can be expanded up to 3 levels per input. Audio and video plug-in cards are housed in a single 5 1/4" rack frame assembly and a separate power supply is used to supply the DC power. Input expansion beyond 20 is not possible. Output expansion beyond 6 is achieved by adding another 20 x 6 frame and then you must loophrough on the inputs.

**5820 AFV, remote controlled routing switcher with:**  
20 x 6 matrix, 3 channels of audio per  
input, V.I. switching, six 50' control  
cables, power supply with crosspoint mem-  
ory . . . . . \$10,080.00  
**Note:** Prices do not include control panels for 5815 or  
5820.

Available control panels with prices are:

- 910-1** Thumbwheel with readout  
and take button . . . . . \$255.00
- 915C1** Touchpad w/input and on-line readouts . . . . . 370.00
- 927** Pushbutton, LED type . . . . . 375.00
- 922** Illuminated pushbuttons, Pendar Type. . . . . 530.00

**Note:** (1) The 5815 and 5820 utilize the same plug-in cards that are used in the 5800 AFV switcher  
(2) There are many types of control panels that can be used with both systems.  
(3) Both systems have audio breakaway capability.  
Select the correct control panel for this feature.

5815

9000

## 9000 Input/Output CRT Master Controller For 5800 and 5840

- 5 character alphanumeric input/output labeling in RAM
- Input/output status display mode
- Single or preset salvo crosspoint selections

The 9000 X-Y Controller was designed to allow easy access to all inputs and outputs of the 5800 and 5840 routing switchers. The controller utilizes a video terminal to control and display the status of all inputs and outputs to and from the switcher. The electronics are housed in a 1 3/4" high frame assembly.

One of the unique features of this unit is the ability to assign a 5 character description to all inputs and outputs to and from the routing switcher. These assignments are stored in RAM, thereby allowing the user the flexibility of changing any input/output assignment at any time. The information that is stored in RAM is backed up by a battery located in the main frame which houses the microprocessor board.

The 9000 Controller has two tally status modes of operation. The first mode displays the output status of the switcher in 4 easy to read columns. Each column displays 20 outputs with its assigned video and audio input. Additional pages display outputs in excess of 80.

The second tally status mode will display any input status. In this mode of operation you must type in the input desired on the user line. Once the input is selected the 9000 will automatically indicate all outputs that have been assigned to that one input. This feature is extremely useful when rapid information is desired on input status.

The control function of the 9000 is designed to permit a single execution or group executions via a salvo command. Video only, audio breakaway or audio follow video are standard methods for taking the crosspoint.

- 9000** CRT X-Y Controller  
(for 5800, 5840 and 5850) . . . . . \$2,750.00
- 9001** CRT X-Y Serial Controller  
(5800, 5840 and 5850  
input/output assignment) . . . . . 4,500.00

# CONTROL PANELS

927

## CONTROL PANELS FOR SWITCHERS 5800/5840 PARALLEL BCD AND SERIAL TYPES

### Numerical Control Panels

The 910-1 is a single bus control panel which utilizes a thumbwheel to pre-select inputs. The "take" button executes the switch and the 2 digit LED displays the "on-line" input number. The 910-2 is a two bus panel and the 910-3 is a triple bus panel. The serial version is 901-1. Size is 1 $\frac{3}{4}$ " H x 19" W.

The 911 is a single bus control panel which is housed in an attractive desk type enclosure. This panel is the same as the 910 except for the enclosure. Size is 2 $\frac{7}{8}$ " H x 8 $\frac{7}{8}$ " W x 7" D.

The 913-1 is a single bus control panel which utilizes a thumbwheel for selecting inputs. The 3 "take" buttons allow you to switch audio only, video only or audio follow video. The 2 LED displays simultaneously monitor the "on-line" audio and video switched inputs. The 913-2 is a two bus panel. Size is 1 $\frac{3}{4}$ " H x 19" W.

The 915B-1 is a single bus control panel which utilizes pushbuttons arranged in a touch pad type configuration for selecting inputs and "take." There are two LED displays which monitor the present input and "on-line" input. The 915B-2 is a 2 bus panel and the 915B-3 is a 3 bus panel. The serial version is the 903. Size is 3 $\frac{1}{2}$ " x 19".

The 922 is a single bus control panel which provides rapid selection of inputs through the use of 20 illuminated momentary pushbuttons. The buttons have removable lens caps and the clear mylar inserts are used for button identification such as VTRs, etc. This allows rapid switching by a familiar name rather than an unfamiliar number. The serial version is the 922SE. Size is 1 $\frac{3}{4}$ " H x 19" W.

The 927 is a single bus control panel with 20 LED type pushbuttons. The buttons have removable ID strips for adding button legends. Size is 1 $\frac{3}{4}$ " H x 19" W.

The 940-1 is a single bus control panel with 40 illuminated momentary pushbuttons for rapid selection of inputs. Each button has a removable lens cap with a clear mylar insert. The insert is used for easy input identification such as VTR, BARS etc. An audio breakaway button is provided as a standard feature. Size is 3 $\frac{1}{2}$ " H x 19" W.

The 944 is a single bus panel with 40 illuminated momentary pushbuttons for selecting inputs. The 3 mode selector switches are for video only, audio 1 only or audio 2 only. You can also perform audio follow video or breakaway audio 1 and audio 2 together. This panel is used with our 5840-2 dual audio and video system. Size is 1 $\frac{3}{4}$ " H x 19" W.

The 947 is a single bus panel with 40 pushbuttons for selecting inputs. Each button has an LED which is illuminated when the crosspoint is taken. The audio breakaway and video only feature is standard. The maximum depth of 1 $\frac{1}{4}$ " makes this panel extremely useful especially in restricted mounting areas such as mobile vans, console, etc. Size is 3 $\frac{1}{2}$ " H x 19" W x 1 $\frac{1}{4}$ " D.

917

### Numerical X-Y Panels

The 917 is a parallel control, master X-Y panel that uses buttons arranged in a touchpad type configuration for selecting input and output data. The 3 numerical readouts are used for displaying the preset input, "on-line" input and output bus. Size is 3 $\frac{1}{2}$ " H x 19" W.

The 975 is a master X-Y control panel with serial output data. Thumbwheels are used for selecting inputs and outputs. A momentary pushbutton is used for taking the crosspoint and a numerical readout displays the "on-line" input. Size is 3 $\frac{1}{2}$ " H x 19" W.

The 977 is a master X-Y control panel with parallel BCD data. Thumbwheels are used for selecting inputs and outputs. A momentary pushbutton is used for taking the crosspoint and a numerical readout displays the "on-line" input. Size is 1 $\frac{3}{4}$ " H x 19" W.

The 9730 is a master X-Y control panel with parallel BCD data. Thumbwheels are used for selecting the inputs and outputs. Momentary pushbuttons are provided for audio follow video, audio only and video only type switching. A numerical readout displays the "on-line" input. The tally pushbutton, when depressed, will display the on-line input assigned to that designation. This panel is usually used with our PACE 2000 7 day controller. Size is 3 $\frac{1}{2}$ " H x 19" W.

The 9760 is a master type control panel that is used for manual control of VTRs, film chains, etc. A thumbwheel selects the machine to be controlled and the pushbutton selects the function such as ON, OFF, FAST, FORWARD, etc. The 9760 is usually used with our PACE 2000 7 day computer controller. Size is 3 $\frac{1}{2}$ " H x 19" W.

997

## ALPHANUMERIC CONTROL PANELS

### Serial or Parallel BCD Control

#### Readouts are 3 Character with 0-9 Numbers

The 991-1 is a single bus control panel that uses an alphanumeric labeled thumbwheel for selecting inputs. Up to 16 user defined group names are provided. Audio breakaway is standard and a momentary pushbutton is used for taking crosspoint desired. The 991-2 is two of these controllers mounted in a 1 $\frac{3}{4}$ " H x 19" W rackmount panel.

The 992 is a two bus controller that utilizes pushbuttons arranged in a touchpad type configuration for selecting the group name and source number. Up to 16 user defined names are provided. Audio breakaway is standard and an illuminated pushbutton is used for taking the crosspoint. Size is 5 $\frac{1}{4}$ " H x 19" W. A single bus version is available for console mounting and the size is 5 $\frac{1}{4}$ " H x 8 $\frac{1}{2}$ " W.

The 993 is a single bus controller with pushbuttons for selecting the group name and source number. Audio breakaway is standard and an illuminated pushbutton is used for taking the crosspoint. Size is 3 $\frac{1}{2}$ " H x 19" W.

The 996 is a 10 bus controller with pushbuttons arranged in a touchpad type configuration for selecting the group name and source number. The mode selector switches provide for audio only, video only and audio follow video type switching. Two preset alphanumeric readouts are provided for viewing the audio and video before taking the crosspoint. Ten separate illuminated pushbuttons "take" the crosspoint desired and ten alphanumeric displays view the "on-line" inputs. Size is 10 $\frac{1}{2}$ " H x 19" W.

The 997 is a single bus control panel with two thumbwheels for selecting two different input sources. Each input select has its own take button and a separate button labeled "rock" switches between both inputs. Size is 1 $\frac{3}{4}$ " H x 19" W.

The 998 is a single bus control panel with a thumbwheel for selecting the group name and source number. Four pushbuttons are provided for rapid selection of the 4 most used inputs. Audio breakaway is standard and an illuminated pushbutton is used for "taking" the crosspoint. Size is 1 $\frac{3}{4}$ " W x 19" W.

# ROUTING SWITCHER

5851 Video Assembly

5852 Audio Assembly

## 5850 Series Audio/Video Vertical Interval Routing Switcher

- Input/output expansion
- Up to 3 audio levels per input
- Audio/video breakaway
- Vertical interval switching
- Parallel or serial control
- Computer controllable RS-422, RS-232 or parallel BCD
- 40 x 20 AFV matrix in 24 1/2" rack space
- 40 x 1 crosspoint modules

The 5850 Series Routing Switcher utilizes the same audio and video input amplifier cards and 40 x 1 crosspoint cards as the 5840 series. The V.I. trigger card is different and the output capacity within the frame is now 20. A built-in fan assembly, removable from the front has also been included in this series.

The video cards are contained in the 5851 assembly and the audio cards are within the 5852 assembly. Each assembly can be a video only switcher or an audio only switcher. When used together they become audio follow video. If required, the 5850 Series can be used to expand existing 5840 systems currently in the field.

Each frame, as illustrated, has the capacity to house up to a 40 x 20 matrix in 12 1/4" of rack space. The audio follow video version requires 24 1/2". Expansion beyond the 40 inputs and outputs is achieved by adding additional frames and cabling.

The audio and video crosspoint cards are configured in a 40 x 1 format therefore, output expansion within the frame is in increments of one. There are four input amplifier boards in each video frame and each board houses ten input amplifiers. Any crosspoint card within the 5851 or 5852 frames can be extracted with power on without affecting any other output bus in the system.

The 5850 Series can be supplied with LED numerical readouts on the 40 x 1 video crosspoint modules. This feature is available as an option.

The 5850 Routing Switcher can be controlled in various ways. They are: computer, illuminated momentary pushbuttons, thumbwheel with take button and on-line indicator, touchpad with preset and on-air indicators and X-Y control. Custom panels with preset, salvo, and single button take are furnished as an option.

Two types of control are available with this series: serial or parallel. The serial method allows you to utilize twisted pair as the control cable. The parallel method of control is in bi-directional BCD format and only 11 wires per control cable are required. The diameter of this control cable is only 1/4".

External power supplies are utilized to furnish power to the 5850 Series and a redundant system with diode switching is available as an option.

### The 5851 Video Assembly Contains the Following Items:

#### 5851 Frame Assembly (Video)

The frame is 12 1/4" high and accommodates all the video modules for a 40 x 20 matrix. A hinged down front panel is provided. All matrix frames are provided with connector facilities. Control and signal loopthrough connectors are also provided.

## 522A Video Matrix Board

This board is arranged in a 40 input x 1 output format. In addition to the crosspoints, each card contains its own control, latching and crosspoint tally circuitry. The crosspoints utilize transistor and diodes and the control circuitry is BCD 8-bit parallel with take line. Drive levels are TTL. Each module contains its own output amplifier with a level control mounted up front.

## 532 Video Input Amplifier

The input circuitry contains a DC restorer for APL variations and sync adding for non-composite inputs. All of these features can be added or deleted via straps on the module. There are 10 input amplifiers per card and for 40 inputs, 4 cards per frame are required.

## 561 Vertical Trigger and X-Y Control Card

This card provides the trigger pulse for vertical interval switching, which is derived from external sync. Should the sync input fail or is not used, then a random trigger pulse is generated. When using the optional sync adder feature, this card processes the sync and distributes it to the input amplifier cards. LEDs are provided for sync and trigger failure indication. The 561 also contains the logic circuits for X-Y control.

### The 5852 Audio Assembly Contains The Following Items:

#### 5852 Audio Frame Assembly

The frame is 12 1/4" high and accommodates all the audio modules for a 40 x 20 matrix. A hinged down front panel is provided. All matrix frames are provided with connector facilities. Control and signal loopthrough connectors are also provided.

#### 527A Audio Matrix Board

This board is arranged in a 40 input by 1 output format and an I.C. is used for the crosspoint. Switching for three separate audio channels is provided and each channel has its own amplifier with a front panel level control. The 527 also contains circuitry for its own control, latching and crosspoint tally. The control circuitry is BCD 8-bit parallel with take line. Drive levels are TTL.

#### 537 Audio Input Amplifier

The input circuitry contains a differential input and is high-impedance bridging. There are 40 amplifiers on each board and one board per audio channel is required. For three channels of audio you require three input amplifier boards. This board employs redundant regulators with automatic switchover.

#### 561 Vertical Trigger and X-Y Control Card

This card provides the trigger pulse for vertical interval switching, which is derived from external sync. Should the sync input fail or is not used, then a random trigger pulse is generated. When using the optional sync adder feature, this card processes the sync and distributes it to the input amplifier cards. LEDs are provided for sync and trigger failure indication. The 561 also contains the logic circuits for X-Y control.

#### Power Supply Frames

8300 2 power supplies, redundant with switchover

8301 Up to 3 single power supplies

8302 Redundant frame, used with 8301 frame and 830 plug-in power supplies

## SCREENS FOR WALL OR CEILING

### ELECTRICALLY OPERATED SCREENS

**TARGA** — Our most popular electric screen for video projection. Sizes through 15' diagonal. Walnut woodgrain vinyl on steel case mounts easily to wall or ceiling. Motor in roller design permits viewing surface to be centered in case. Smooth, quiet operation.

**ENVOY** — Adds a touch of class to your video presentation. Screen is recessed in the ceiling — invisible when not in use. At the touch of a switch, the automatic ceiling closure opens and the screen appears. Closure may be painted to match ceiling. Sizes through 15' diagonal.

**ROLLERAMIC** — For really big screen presentations — sizes through 25' diagonal. All-wood case may be recessed in the ceiling or painted to match its surroundings.

**TARGA** — Walnut woodgrain steel case, 5/8" H x 4" W. Matt white or glass beaded for front projection. (Also available in Cineflex rear or Duoflex dual projection—see below.)

Nominal Diagonal	Viewing Area	Overall Size	Case Length	Shipping Wt. (lbs.)	Matt White or Glass Beaded Price

### MANUALLY OPERATED SCREENS

**CINEPERM** — Wall-mounting version of Cinefold. 1" tubular aluminum frame installs easily to wall. Snap-on surfaces in flexible matt white or Cineflex are interchangeable for either front or rear projection. Replacement surface can be installed in less than five minutes in the event of damage. Excellent for bars, discos, etc. Virtually any size, from 7½' diagonal. Call for more information.

**LUMA** — Wall/ceiling screen. Walnut woodgrain steel case 3/4" H x 2 1/4" W. Spring-roller screen available in sizes through 100" diagonal.

Nominal Diagonal	Viewing Area	Overall Size	Case Length	Shipping Wt. (lbs.)	Matt White or Glass Beaded Price

# VIDEO PROJECTION MOUNT

## ElectraMount

### Motorized Ceiling-Recessed Video Projector Mount

- Video projector protector
- Accommodates virtually any ceiling-mounted video projector
- 3-position low voltage switch is standard

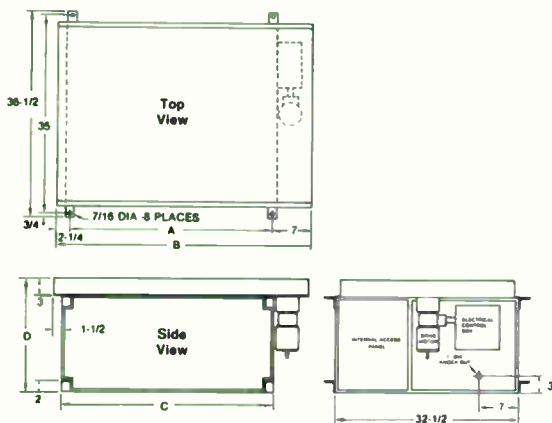

The ElectraMount is the ideal video projector mount. To begin a presentation, touch a switch and watch it descend. After the show, flip the switch and it retracts into the ceiling—safe from dust, smoke, and tampering.

Four models fit almost any video projector. Projector suspends from a steel grid, which is raised and lowered simultaneously with the closure by means of four 1" diameter threaded steel rods. Projector and operating mechanism are fully enclosed in a protective steel housing. The steel ceiling closure is available in off-white baked enamel, or recessed to accept ceiling tile.

### Ceiling-Recessed Video System

Operate the ElectraMount in tandem with a Draper motorized screen using the video interface control. Touch the switch—or optional wireless remote control—and the ElectraMount begins to descend. When it stops, the video projector comes on and the motorized screen descends. At the end of the presentation, flip the switch and the ElectraMount and screen will rise automatically as the projector shuts off. The ElectraMount and any electric screen may also be operated independently using any of Draper's motorized screen controls.

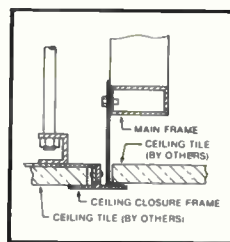

### Dimensional Drawings

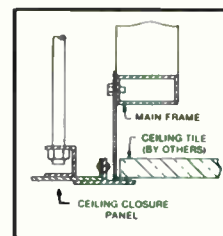

Model	A	B	C	D

# CHARACTER GENERATORS

## 10-K/20-K Character Generators

• Full function real-time character generators • 30 standard fonts with border and drop shadow edges are included. Additional packages of styles and sizes available on disk. Foreign language fonts and keyboards available • Basic packages include 4 and 44 high-resolution typefaces which are used to build fonts in any size from 4 to 150 (upper case height) scan lines high • Kerning, spacing, positioning, coloring, and edging—by letter, row or page, with user controllable complete overlap and tuck • Separate background plane for “weaving,” with unlimited weave capability • 256 simultaneous colors, from a total 16.7 million for characters, edges and backgrounds—selectable by palette, RGB, or HSV • Sophisticated digital filtering produces graphics with 16 intermediate shading levels of any color. Both character and edges are generated this way • Complete directories with user comments, selectable by message type • Full sequence control of message time, speed, type, and duration • Alphanumeric message storage, up to 31 digits in any order • Full-color edit output with cursor and adjustable safe-title marks • Integrated sync generator, encoder, and linear downstream keyer • Menu-driven • Separate menu screen output for prompts, error messages, system information and “preview text” • Help key, along with a “help screen display” for every operational key on the keyboard • Recordable tabs and justified tabs (right, left, and center) • Centering and positioning—top, middle, bottom in both horizontal and vertical • Instant italicizing of any font—right or left, in multiple positions • Automatic message retype, with different font, color, or edge • Multiple playback choices—fade, wipe, and reveal, for any message in any sequence • Linear key signal output for anti-aliased fonts • As many as 4 plug-in keyboards • GPI trigger controls sequences • User-formattable disks • 4M bytes of internal memory, allowing approximately 24 fonts and 1,000 text pages on line, depending on size • Anti-aliased and standard fonts • Flash • 40ns start or stop, 80ns minimum width, no maximum (up to full screen). The “apparent resolution” of anti-aliased font is < 10ns • Characters or background colors from 1 to 485\* scan lines (full screen) • Horizontal linear adjustment range of -17/+1 $\mu$ s. Phase adjustment continually variable through 360° • Compatibility: Dubner CBG and Texta: Animations and graphics can be transferred to a 20-K cartridge on a 20-K; and to a 10-K diskette on a 10-K equipped with optional Iomega drive. Full Color Graphics: CBG Third Plane, Textra 500 and DPS-1 full color images can be converted on a 20-K to a 20-K background with reduced color resolution

Dubner 20-K and 10-K Character Generators are identical systems, except for the disk drive.

The 20-K system includes a 10M byte Iomega cartridge disk drive.

Cartridge contains system software and standard fonts. Approximately 10,000 text pages fit on a disk. Background graphics, fonts and animations reduce text storage capacity.

10-K/20-K

A connector for additional external disk drives is standard. An Iomega disk drive connected to a 10-K functions as a 20-K.

The 10-K features a 1M byte 5 $\frac{1}{4}$ " floppy disk drive.

Diskette capacity is 800K. Four diskettes included contain system software, standard fonts and messages. Approximately 1,000 text pages fit on a diskette. Background graphics and animations reduce text storage capacity.

## Specifications

### Video Inputs

**Genlocking:** 1.0V p-p NTSC black burst or composite video. 4.0V p-p sync and blanking may be used alternatively

**Background:** 1.0V p-p NTSC composite video for internal keying

### Video/Key Outputs

**R, G, B:** 0.7V p-p non-composite video for use with external encoder or RGB monitor

**Air:** 1.0V p-p character generator NTSC composite video

**Edit:** 1.0V p-p NTSC composite video with cursor

**Mixed:** 1.0V p-p composite video with character generator keyed into background. (Linear key with anti-aliased fonts)

### Status/

**Preview:** 1.0V p-p monochrome video showing status messages or preview of next display

**Key:** 1.0V p-p keying signal for use with external keyer; composite or non-composite; output is linear (256 steps) for external linear keyers when anti-aliased fonts are used

10-K ..... \$15,000.00

20-K ..... 18,500.00

\*PAL Specifications available upon request.

## 5-K Character Generator

• Full resolution font character generator • Included as standard are: floppy disk storage of images and text pages, 256 colors on-screen from the full 16,700,000 possible, and eight regular fonts or four anti-aliased fonts with four sizes each on line for instant access • Gives the operator selection of different colors for the character itself and for its edge and shadow • Sequencing of moves and pages has nine selectable speeds • Animation playback of up to 40 frames from the Dubner Texta or DBG-2 is possible, plus displaying all backgrounds from Texta and CBG-2 • All the pre-packaged Backgrounder programs will run on the Dubner 5-K

5-K ..... \$9,500.00

# VIDEO PAINTING SYSTEM/ GRAPHICS GENERATOR

## DPS-1 Video Painting System

• 4, 2, or 1-field NTSC frame buffer • Keyboard and status display  
• Tablet • 10M byte lomega drive for storage and recall of up to 8 pictures • Color selection: by hue, saturation, and luminance or from the picture; all legitimate NTSC colors allowed • Millions of colors displayable simultaneously • Cut and paste • Color correction: contrast, brightness, hue • Frame averaging • Fill • Motion suppression • X, Y, Z, tilt, scale and perspective • Pictures in internal memory • Posterize • Mosaic • Magnify • Compatible with CBG-2 3<sup>rd</sup> plane • Brushes: Hard and soft solid, airbrush, transparency (window) soft and hard, chalk, square, stamp, luminance, wash, calligraphy, multi-color, soft and hard trim, fuzz, smear; all brushes anti-aliased • Soft stencils, reverse stencil • Emboss • Cropping • Draw lines and curves (anti-aliased) • Color ramps: vertical, horizontal, diagonal, 4-way

### Planned Options

• Texture map to curved surfaces • User customized menus • VTR control • Animation • 3-D smooth-shaded image rendering with light sourcing • Larger disk drives • Tilt and pressure sensitive stylus • Control box with knobs and keys for additional functions and controls • Text generation (anti-aliased)

The DPS-1 is a full-color video painting system that grabs images from any NTSC source for storage and modification. For perfect picture quality, the DPS-1 stores and uses all four fields of the NTSC color sequence.

The DPS-1 is based on software innovation that allows the composite NTSC signal to be digitally sampled and manipulated without decoding and re-encoding.

**DPS-1 . . . . . \$20,000.00**

## Texta Video Graphics Generator

• Proportional spacing • 9-speed roll • Crawl and slow reveal • Diagonal typing • 3-D shadows • 64-color logo characters • Scanwipe • Tumble • Timed roll • Animate any sequence of frames in real time • Unlimited border and shadow combinations • Optional second channel permits read next previewing, dual user operation, merged output for creating complex imagery and curve drawer software • Options include a Video Digitizer, for creating new fonts and logos, a weather service interface, for receiving hourly satellite pictures and forecasts, and a tablet with pen and four-button "mouse" drawing directly into Texta's display memory • Texta disks are fully compatible with the CBG-1 and CBG-2 and can be used for playback on Dubner's 20-K character generators • Texture mapping on dual channel systems permits design of 3-D objects and "mapping" of a flat Texta graphic onto geometric shapes • Can store over 500 fonts and 20,000 pages of text on twin removable disk cartridges • Full-screen image composition, combining text and a variety of graphic tools: Lines, Grids, Ellipses, Scale, Rotate, Area Fill, and more • Anti-aliasing circuitry generates over 16 million intermediate shades • Palette of 4096 colors and true 37ns pixel resolution

### Texta

400	Single channel Texta—Basic configuration . . . . .	\$42,000.00
410	Single channel Texta—Studio configuration . . . . .	48,500.00
420	Dual channel Texta—Basic configuration . . . . .	49,500.00
430	Dual channel Texta—Production configuration . . . . .	56,000.00
440	Dual channel Texta—Studio configuration . . . . .	59,500.00
450	Dual channel/dual user Texta—Studio configuration . . . . .	62,500.00
460	Dual channel Texta—Graphic configuration. . . . .	69,500.00
470	Dual channel/dual user Texta—Graphic configuration . . . . .	72,500.00
480	Dual channel Texta—3-D configuration. . . . .	89,500.00
490	Dual channel/dual user Texta—3-D configuration . . . . .	92,500.00

### Options

401-N	GVG CV24N color encoder . . . . .	\$ 1,500.00
401-C	Cox color encoder . . . . .	3,600.00
403	Video digitizer/font compose module . . . . .	5,000.00
404	Merged output . . . . .	4,000.00

Texta

405	Digitizing tablet with pen and puck . . . . .	\$ 6,000.00
406	Preview plane . . . . .	6,500.00
407	Additional I/O ports . . . . .	2,000.00
408	Additional keyboard . . . . .	3,000.00
409	Curve drawer . . . . .	10,000.00
412-4	Megomem (4M board of RAM) . . . . .	5,000.00
413	Printer . . . . .	1,500.00
423	Traveling case (two pieces) . . . . .	1,200.00
428	Recall keypad. . . . .	1,200.00
433	Interface for weather graphics . . . . .	3,000.00
438	Anti-aliased font package . . . . .	500.00
450-S	Cable extender . . . . .	1,000.00
466	Additional lomega blank disks . . . . .	90.00
466-F	Formatted lomega disks . . . . .	100.00
491	Extender board . . . . .	300.00

# VIDEO PRESENTATION SYSTEM

Video Pro 7

## Video Pro 7 Portable Video Presentation System

- Large 7" color monitor for one on one or small group presentations
- 240 line resolution
- 6<sup>3</sup>/<sub>8</sub>" H x 18" W x 12<sup>3</sup>/<sub>8</sub>" D (excluding carrying handle)
- 22 lbs.
- Excellent picture quality for effective communication
- Discreet Forward and Reverse visual search controls—for rapid access to any point in the program
- High efficiency 4" full range speaker with two watts of audio output provides realistic sound reproduction
- Auto Repeat makes it possible for your sales message to run continuously, even when the unit is unattended. Ideal for point-of-sale displays
- Auto Rewind automatically rewinds the tape when it comes to the end or when the tape counter reaches "0000"
- Advanced tape transport mechanism provides consistent high quality presentations
- Convenient microprocessor-controlled soft touch keys with LED indicators
- Video and audio inputs and outputs for easy connection to other video equipment, or external speakers
- Pause control with noise cancel
- Front load VHS deck

The Video Pro 7 is the ideal traveling companion, small enough to place under an airline seat...or on the corner of your customer's desk. Totally self-contained, the Video Pro 7 carries like an attache case. Set up is fast and easy so when you reach your destination, your presentation can begin immediately.

The Video Pro 7 has a durable carrying handle that doubles as an elevation leg for optimum monitor viewing.

## Specifications

<b>Video System:</b>	NTSC color
<b>Tape Format:</b>	VHS
<b>Tape Heads:</b>	High quality helical scan with drum heater and dew indicator
<b>Tape Speed:</b>	SP provides up to 2 hours and 40 minutes of viewing (T-160)
<b>Power Requirements:</b>	120V, 60Hz—10' 3-wire cord (cord wrap)
<b>Power Consumption:</b>	Average 50W; .4A
<b>Audio:</b>	2W (output); 4" round full range speaker; slide volume control
<b>Monitor Controls:</b>	Tint, Color, Brightness, Contrast, Vertical Hold
<b>Tape Controls:</b>	Play, Fast Forward and Rewind, Forward and Reverse Visual Search, Stop, Pause, Eject, Tracking, Noise
<b>Jacks:</b>	Audio and video inputs and outputs—RCA type. Headset—mini-jack type
<b>28A300</b>	.....\$1025.00

## Accessories

<b>128-45</b>	Protective Dust Cover: Heavy gauge textured vinyl with velcro closure and zippered storage pocket . . . . . \$ 20.00
<b>128-46</b>	Padded Carrying Case: Attractive nylon-weave carrying case protects the unit during travel. Equipped with carrying handle, shoulder strap, and side pocket for extra cassettes and other materials. . . . . .80.00
<b>185-374</b>	Shipping Case: A.T.A. styled case provides extra protection needed when shipping the Video Pro 7. Drop, shock and water resistant. . . . . .200.00

# ROUTING SWITCHERS

Dynasty

## Dynasty/Dynasty 100 Routing Switchers

Dynasty routing switchers are available in 30, 40 and 60MHz bandwidths, while the Dynasty 100 has a bandwidth of 100MHz. The Dynasty 100 permits clean processing of even the most complicated signals including 1280 x 1024, 60Hz, non-interlaced computer generated graphics as well as NTSC, PAL, HDTV, audio and control signals.

Laser Trimmable Hybrids let the user "Hot Change" modules without any PROMs to change, module adjustments or DIP switches to set. These time saving improvements also aid in increased bandwidths for overall system performance not to mention reduced down-time for maintenance, repair, upgrade and modification.

The use of custom printed circuit baluns provide for minimum input return loss. Further, the utilization of true 75 ohm, high density, BSM connectors allows for rapid system modification and expansion without the previously common system down time and realignment. System expansion is just about as simple as Plug 'n' Play. All the way to 1000 x 1000.

Dynasty may be easily upgraded to 100MHz performance by the addition of Dynasty 100. For those users that require high definition and computer generated graphics, Dynasty 100 offers the maximum in signal processing performance, yet still at only about twice the price of a conventional (competitor's) 10MHz switch. Dynasty 100 offers 250V/ $\mu$ s slew rates. The combination of Dynasty and Dynasty 100 switchers allows the system designer to Mix 'n' Match bandwidths in a given switching environment.

## Specifications

### 30MHz Systems

**VIDEO** 100 x 100 system  
**Input:** 1.0V p-p, 75 ohm, composite video (0.714V, 0.286 S)  
**Input Return Loss:** > 30dB at 5MHz (for 10 loops)  
**Output Return Loss:** > 40dB at 5MHz  
**Output DC Ref.:** Adjustable -0.2 to +0.2V; maintained  $\pm 0.02V$  10-90% APL; composite and non-composite video

**Chrominance/Luminance Gain:** Adjustable to unity. Any input to any output  $\pm 0.05dB$   
**Crosstalk Isolation:** > 60dB to 5MHz. Worst case, all inputs and outputs active

**Electrical Length:** 25ns nominal (frame input to output)  
**Differential Delay:** 1° at 5MHz  
**Bandwidth:** 30MHz (1MHz reference)  
**Frequency Response:** 100kHz-5MHz:  $\pm 0.15dB$ ; 8MHz  $\pm 0.3dB$ ; 20MHz  $\pm 1.0dB$  (1MHz reference)  
**Slew Rate:** 50V/ $\mu$ s

**Envelope Delay:** < 5ns 100kHz-5MHz  
**Chrominance/Luminance Delay, 12.5 T Pulse:** < 5ns  
**Chrominance/Luminance Gain:** < 0.05dB  
**Differential Gain:** 0.05%, 10-90% APL, 5MHz  
**Differential Phase:** 0.05°, 10-90% APL, 5MHz  
**Transient Response:** 0.5% 2T pulse, 1.0% T pulse  
**Tilt:** < 1% line or field  
**Hum and Noise:** 80dB RMS below 1V p-p, 10MHz bandwidth

### 40MHz Systems

**VIDEO** 100 x 50 system  
**Input:** 1.0V p-p, 75 ohm, composite video (0.714V, 0.286 S)  
**Input Return Loss:** > 35dB at 5MHz (for five loops)  
**Output Return Loss:** > 40dB at 5MHz  
**Output DC Ref.:** Adjustable -0.2 to +0.2V; maintained  $\pm 0.02V$  10-90% APL composite or non-composite video

**Gain:** Adjustable to unity. Any input to any output  $\pm 0.05dB$   
**Crosstalk Isolation:** > 60dB to 5MHz. Worst case, all inputs and outputs active

**Electrical Length:** 25ns nominal (frame input to output)  
**Differential Delay:** 1° at 5MHz  
**Bandwidth:** 40MHz (1MHz reference)  
**Frequency Response:** 100kHz-5MHz:  $\pm 0.15dB$ ; 8MHz  $\pm 0.3dB$ ; 20MHz  $\pm 1.0dB$

**Slew Rate:** 50V/ $\mu$ s (1MHz reference)  
**Envelope Delay:** < 5ns 100kHz-5MHz  
**Chrominance/Luminance Delay:** < 5ns  
**Chrominance/Luminance Gain:** < 0.05dB  
**Differential Gain:** 0.05%, 10-90% APL, 5MHz

**Differential Phase:** 0.05°, 10-90% APL, 5MHz  
**Transient Response:** 0.5% 2T pulse, 1.0% T pulse  
**Tilt:** < 1% line or field  
**Hum and Noise:** 80dB RMS below 1V p-p, 10MHz bandwidth

### 60MHz Systems

**VIDEO** 100 x 20 system (100 x 80 with DA-1580A input distribution)  
**Input:** 1.0V p-p composite video (0.714V, 0.286 S)  
**Frequency Response:** 100kHz to 10MHz  $\pm 0.10dB$ , to 20MHz  $\pm 0.25dB$ , to 30MHz  $\pm 0.75dB$ , to 60MHz  $\pm 1.5dB$  (1MHz reference)  
**Slew Rate:** 100V/ $\mu$ s

**Pulse Response (10MHz S.W. 2ns rise and fall times):** 8ns, equal rise and fall times with 20% maximum overshoot and ringing  
**Differential Gain:** 0.1% at 5MHz  
**Differential Phase:** 0.1° at 5MHz  
**Crosstalk Isolation:** > 55dB to 5MHz, > 25dB to 60MHz, worst case all inputs and outputs active

**Hum and Noise:** 55dB RMS noise below 1V p-p signal, 60MHz bandwidth unweighted

### 100MHz System

**VIDEO** 50 x 80 system  
**Input:** 1.0V p-p, 75 ohm composite video (0.714V, 0.286 S)  
**Input Return Loss:** 40dB at 5MHz  
**Output Return Loss:** 30dB at 5MHz  
**Signal Connectors:** BNC  
**Gain:** Unity  
**Worst Case Crosstalk:** 50dB at 5MHz, 25dB at 100MHz

**Pulse Response (10MHz S.W. 2ns rise and fall times):** 5ns equal rise and fall times with 15% maximum overshoot and ringing  
**Slew Rate:** 250V/ $\mu$ s

**Bandwidth:** 100MHz (1MHz reference)  
**Frequency Response:** 100kHz-5MHz:  $\pm 0.25dB$ ; 80MHz  $\pm 1.0dB$ ; 100MHz  $\pm 1.0, -3.0dB$  (1MHz reference)

**Envelope Delay:** < 10ns 100kHz to 80MHz  
**Differential Gain:** 0.2% 1V p-p, 10-90% APL at 5MHz  
**Differential Phase:** 0.2° 1V p-p, 10-90% APL at 5MHz  
**Tilt:** 1% maximum line or field  
**Hum and Noise:** 65dB RMS noise below 1.0V p-p signal, 10MHz bandwidth unweighted; 50dB, 100MHz

**Switching Time:** < 5 $\mu$ s

### Audio Specifications

**Inputs:** Balanced high impedance bridging, +24dBm max. at 600 ohms (+30dBm at 150 ohms)

**Common Mode Rejection:** > 60dB, 50-120Hz; 50dB, 30Hz-15kHz  
**Outputs:** Balanced low impedance, indefinite short-circuit protection. +24dBm max. with 600 ohm load. +30dBm max. with 150 ohm load

**Output Level Variation:**  $\pm 0.2dB$  max. between inputs

**Connectors, Input-Output:** 37-pin "D" subminiature  
**Gain:** Adjustable to unity  
**Crosstalk Isolation:** > 80dB below max. out to 15kHz (worst case)  
**Frequency Response:** 30Hz-20kHz  $\pm 0.2dB$  (Time Code Output - > 220kHz bandwidth)

**Harmonic Distortion:** 0.1% to 15kHz +8dBm in/out; 0.25% to 15kHz max. in/out  
**Hum and Noise:** -75dBm max.

## System 21 Switching

- High performance switching for NTSC, PAL, component HDTV video, audio, SMPTE/EBU time code, tally, intercom PL and data
- Broadcast and 35MHz video bandwidth standard
- Multiple signal switching, multi-level control; up to four independent levels with follow, split and breakaway
- Building block expansion—10 x 10 to 1000 x 1000 systems without performance compromise, using standard modules
- Module change without PROMs or switch changes
- Precision vertical-interval switching
- Compact—50 x 10 audio-video system within 10 1/2" of panel space
- Coax control line—reduced installation cost, simplified maintenance
- RS-422/423 external control interface standard
- Power-fail memory protection, 1000 hours standard
- Preset entire switcher—simultaneous take (salvo)
- Redundant system controller and power supply options
- VDT X-Y control—salvo switching, output and input status, system reconfiguration
- Ease of maintenance—replace any module under power, control system self-test

The System 21 meets today's needs for high performance routing of video, audio, high speed time code, tally, intercom and data. Future expansion in size and number of signals is easily accomplished with standard modules. Standard features include interface to automation systems, power-fail memory, entire switcher preset with simultaneous take (salvo) and status readout for CRT or computer display. Redundant system controllers and power supplies can be installed to provide rapid changeover in the event of a system controller or power supply malfunction.

The microprocessor-based system controller is connected to the control units by serial data, coax comm-lines providing simple, low cost installation and maintenance. Proven, highly reliable, data transmission techniques are used to assure that switching occurs only in response to error free data. Comm-line data rise time is controlled to prevent crosstalk into signal circuits. A unique serial data, coax control bus allows frames to be located at widely separated points, simplifying signal cabling to the system.

The control system can be configured for each user's requirements using standard VDT, touchpad, pushbutton and lever switch control units.

Any number of signals—video, audio, time code, etc.—can be grouped on a single control "level" for simultaneous switching. Multiple control levels are available in the system to provide breakaway operation. All levels may switch together for "follow" operation.

A series of standard switch frames accommodates all system configurations. Major crosstalk paths are confined and controlled on the matrices. Printed circuit motherboards provide all module interconnections to control crosstalk and assure system reliability. On-board DC power regulators provide isolation and fault protection. System crosstalk performance and reliability are not affected by system size.

<b>Comm Line:</b>	Single coax., 2000' (610m) RG-59 max. serial data, 9600 baud, BNC connector
<b>Status/Seriel Control Buses:</b>	Single coax., 2000' (610m) RG-59 max. 19.2K baud, BNC connector
<b>External Control Interface:</b>	RS-423 (RS-232C compatible)/RS-422 serial data, 300-9600 baud, 9-pin "D" subminiature male connector

# MATRIX ROUTING SWITCHER

**Module Frame Size:** 10 1/2" H(6RU) x 15" D x 19" rackmount  
**Temperature Range:** 0° to +50°C  
**Relative Humidity:** 0% to 95% non-condensing  
**Primary Power:** 115/230VAC ± 10%, 50/60Hz

### Video—100 x 50 System

**Inputs:** High impedance looping, 1.0V p-p  
**Input Return Loss:** > 35dB at 5MHz  
**Outputs:** Dual, 75 ohm source terminated. Isolation between dual outputs, 40dB at 5MHz  
**Output Return Loss:** > 40dB at 5MHz  
**Output DC Reference:** Adjustable -0.2 to +0.2V; maintained ± 0.02V 10-90% APL

### Switching Drive Signal

**(for vertical-interval switching):** Composite sync, 4V p-p nom., high impedance looping  
**Connectors, Input-Output:** BSM (BNC interface available)  
**Gain:** Adjustable to unity  
**Crosstalk Isolation:** > 60dB to 5MHz (worst case)  
**Electrical Length:** 25ns nominal  
**Differential Delay:** 1° at 5MHz any input to one input  
**Switching Time:** < 5µs  
**Frequency Response:** 100kHz-5MHz ± 0.1dB, 8MHz ± 0.3dB (1MHz ref.)

**Bandwidth:** 35MHz  
**Envelope Delay:** < 5ns, 100kHz-5MHz  
**Differential Gain:** 0.15% with 1V p-p output, 10-90% APL at 5MHz  
**Differential Phase:** 0.15° with 1V p-p output, 10-90% APL at 5MHz  
**Transient Response:** 0.5% pulse, 1.0% T pulse  
**Tilt:** < 1% line or field  
**Hum and Noise:** 80dB RMS below 1V p-p, 10MHz bandwidth

### Audio—100 x 50 System

**Inputs:** Balanced high impedance bridging, +24dBm max. at 600 ohms  
**Common Mode Rejection:** > 60dB, 50-120Hz; 50dB, 30Hz-15kHz  
**Outputs:** Balanced low impedance, short-circuit protection for indefinite time period. +24dBm max. with 600 ohm load  
**Output Level Variation:** ± 0.2dB max. between inputs

**Connectors, Input-Output:** 37-pin "D" subminiature  
**Gain:** Adjustable to unity  
**Crosstalk Isolation:** > 80dB below max. out to 15kHz (worst case)  
**Frequency Response:** 30Hz-20kHz ± 0.2dB (Time Code Output—greater than 220kHz bandwidth)  
**Harmonic Distortion:** 0.1% to 15kHz +8dBm in/out; 0.25% to 15kHz max. in/out  
**Hum and Noise:** -75dBm max. (99dB below +24dBm)

# MATRIX ROUTING SWITCHER

## System 21 Video Switching/System Expansion

Switch matrices utilize state-of-the-art hybrid input amplifiers and switch crosspoints to provide superior performance and high reliability. Maintenance time and costs are significantly reduced. The input amplifiers provide high impedance bridging to minimize input signal loading. Crosspoints require extremely low power in the "off" state, significantly reducing heat and enhancing system reliability.

Matrix modules receive input address information from jumpers printed on the motherboard, making all matrices directly interchangeable. Video output modules use compact hybrid amplifiers to provide ten independent output buses. Each bus provides two 75 ohm source-terminated outputs. Output modules receive output address information from switches on the motherboard making all output modules directly interchangeable.

The video system is organized in groups of ten outputs, with one to ten video matrices and one video output module per group. Inputs are connected to the matrices through precision 75 ohm connectors and printed circuit baluns to assure high return loss and frequency response over the system's wide passband. Matrix outputs are connected to the output module through a motherboard bus. Current switches isolate unselected matrices from the bus to control crosstalk and maintain frequency response.

Video systems provide 35MHz bandwidths. Switch module versions are: AC coupled (video or data); DC coupled (video or data with DC reference maintained). STR output modules are used with AC coupled switch modules. STR will maintain DC reference over 10-90% (APL) for composite and non-composite video.

Switching transitions occur on line 10 of the vertical interval, referenced to external composite sync. Random switching is provided in the absence of reference sync.

System 21 expands without modification of components. Up to ten switch matrix modules can be connected to one output module to provide a 100 in by 10 out group in one frame. Input signals can loop through up to five groups to provide up to 50 outputs.

A 200 input by 10 output system can be built in only two frames by adding a secondary switching module to the first frame.

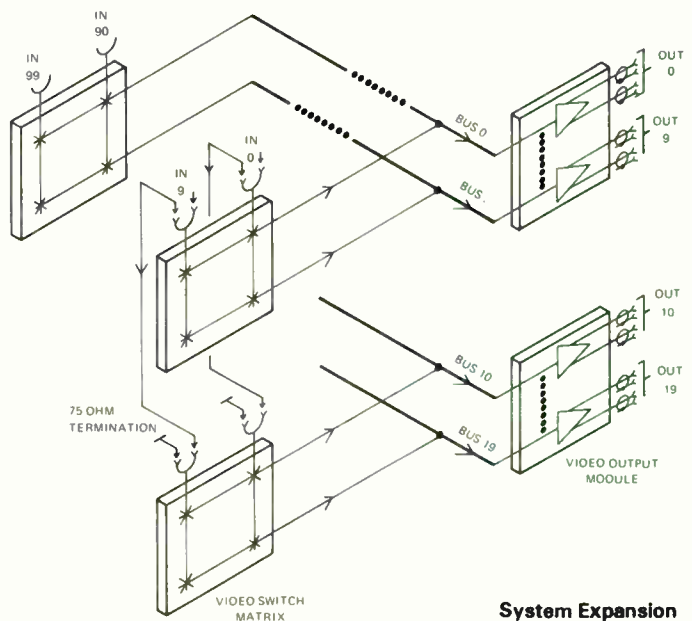

Systems which have more than 200 inputs require secondary switching and additional frames. Any system can be expanded without modification of existing components.

# MATRIX ROUTING SWITCHER

## System 21 Frames

All switch frames provide mounting space for a plug-in power supply, an internal system controller and varying quantities of switch matrix and output modules.

Frames can be interconnected as power redundant pairs. One power supply has sufficient capacity for two frames, allowing replacement of a defective supply while the system remains in operation. Power supply failure is indicated by front panel lights and an isolated contact closure available via a rear-panel barrier strip.

Each output group is assigned to any desired "output 10's" position and one of two control levels by DIP switches mounted on the frame motherboard. The output modules develop enable signals for the associated switch matrices when information on the control bus is addressed to their particular group. These assignments can be changed by the user at any time to reconfigure the system for new requirements.

A parallel control bus, provided by an internal system controller or slave controller, can be looped between as many as five frames.

Frames containing controllers require an external composite sync drive for vertical-interval switching.

System 21 utilizes precision assembly techniques to accommodate looping inputs on large matrices. Careful impedance matching is a must and a great deal of attention must be paid to the input balun, its installation, and the impedance of the connector.

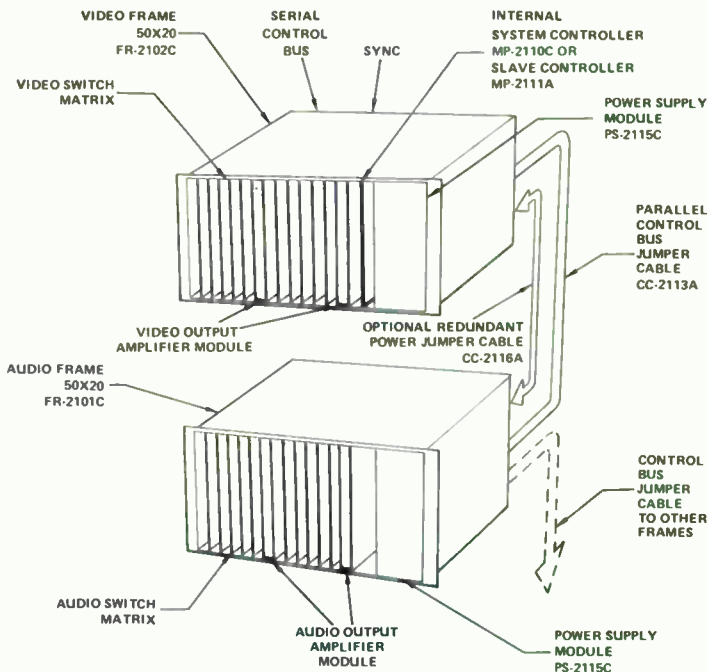

System 21 input baluns are printed for consistency while diecast cavities separate them from crosstalk reduction. System 21 also utilizes "BSM" connectors, true 75 ohm devices. To further tie things down, the terminator is a fixed resistor, not a variable resistor, used to compensate for production variances.

Eliminating assembly variations and misadjustment opportunities makes it possible, in an emergency, to change modules hot and quick.

A small number of standard frames accommodates all system configurations.

A typical self-contained 100 input by 10 output video system, shown at left, illustrates the compact nature of the System 21.

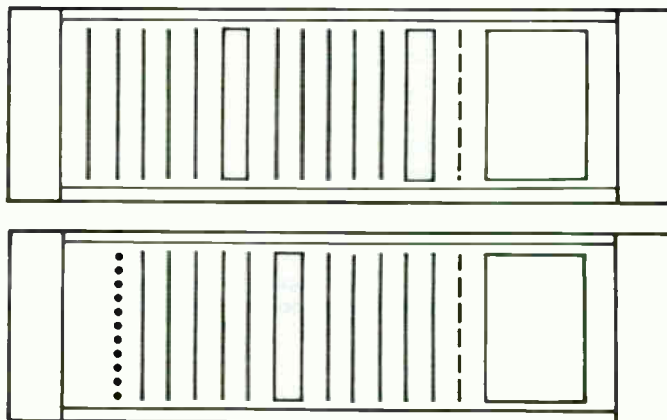

BNC interface panels are available for external connections.

## SERIES 10 SOLID-STATE VIDEO & AUDIO SWITCHING EQUIPMENT

The Series 10 Solid-State Video and Audio Switching Equipment provides 10-input/10-output high quality vertical interval monochrome or color video switching and on-air quality audio switching. Each 10 x 10 matrix is housed in a 5-1/4" H x 14-1/2" D x 19" rackmount chassis (13.34 x 36.83 x 48.26 cm) which includes power supply.

The control system is microprocessor-based and allows local and remote operation. Remote master and individual output bus control panels are available to operate over a single coaxial cable control line. Up to four levels of switching, 1 video and 3 audios as an example, can be controlled locally and/or remotely. A total of 15 remote Models SVA-100B, SVA-101B, SAA-110A and SAA-111A include 10 Form A tally relays and facilities to control the slave matrices, Models SVA-102B and SAA-112A.

**Notice:** Series 10 equipment has been tested to show compliance with FCC Rules, Part 15, Subpart J, for Class A computing devices.

SVA-100B

### SVA-100B Video Switcher

• Self-contained, for local control • 10 Inputs, 10 dual outputs with tally regulated power supply

SVA-102B

### SVA-101B Video Switcher

• Same as SVA-100B but for remote control operation only • Control by single coaxial comm. line • Requires remote control panel(s) option

### SVA-102B Video Switcher

• Same as SVA-101B but for remote slave control only • Control from switcher control bus only • Model CC-1130A control bus jumper cable assembly not included • Tally not provided

### SAA-110A Audio Switcher

• Self-contained, for local control • 10 input by 10 output with tally and regulated power supply

### SAA-111A Audio Switcher

• Same as SAA-110A but for remote control operation only • Control by single coaxial comm line • Requires remote control panel(s) option

### SAA-112A Audio Switcher

• Same as SAA-111A but for slave control only • Controlled from switcher control bus only • Model CC-1130A control bus jumper cable assembly not included • Tally not provided

# SWITCHING EQUIPMENT

SCA-120A

### SCA-120A Master Remote Control Panel

• Rackmounting • For remotely controlling all 10 outputs of video and/or audio switchers

SCA-122A

### SCA-122A Master Remote Control Panel

• For desk-top use • Same as SCA-120A except for housing

### SCA-130A Single Bus Remote Control Panel

• Rackmounting • For remotely controlling 1 output of video and/or audio switchers

SCA-131A

### SCA-131A Single Bus Remote Control Panel

• For desk-top use • Same as SCA-130A except for housing

### CC-1130A Switcher Control Bus Jumper Cable Assembly

• Switcher control bus jumper cable assembly for control of slave matrices, Model SVA-102B and/or SAA-112A. 24 inches (61cm) length

### TC-260A Termination

• 75 ohm BNC termination plug for terminating looping video inputs

# SWITCHING EQUIPMENT

## Series 1600 Video and Audio Switching Systems

The Series 1600 Video and Audio Switching Systems provide 16 input/1 output high performance switching for standard HDTV video, audio, SMPTE/EBU Time Code. The Series 1600 also provides a unique triple 5 input/1 output video switch unit that can be used for RGB switching in raster scan graphics and chroma-key applications. Each switching matrix is housed in a 1<sup>3</sup>/<sub>4</sub>" H x 19" W x 9<sup>1</sup>/<sub>2</sub>" D rackmount chassis (4.45 x 48.26 x 24.13 cm).

The control system allows local and a choice of either remote parallel control using Dynair control panels, or external serial control through a 300 baud RS-423 port. Switching units can be grouped, up to four levels, to provide video, multiple video (RGB), audio, multiple audio (stereo) and audio-follow-video systems.

### SVA-500A 16 x 1 Video Switcher

Video Switcher, self-contained, for local and parallel remote control.

**Inputs:** 16, high impedance looping, 1.0V p-p nominal

**Outputs:** 1, dual 75 ohm, source terminated

**Output Isolation:** > 40dB at 5MHz

#### Connectors,

**Input-Output:** BNC

**Crosstalk Isolation:** > 60dB at 5MHz (worst case)

**Frequency Response:** 100kHz-5MHz,  $\pm 0.1$ dB: 8MHz,  $\pm 0.3$ dB (1MHz reference)

**Bandwidth:** 35MHz

**Differential Gain:** 0.1% with 1V p-p output, 10-90% APL at 5MHz

**Differential Phase:** 0.1° with 1V p-p output, 10-90% APL at 5MHz

**Hum and Noise:** 65dB RMS below 1V p-p, 10MHz bandwidth

**Power:** 115/230VAC  $\pm 10\%$ , 50/60Hz

### SVA-501A 16 x 1 Video Switcher

Video Switcher, same as SVA-500A except equipped for local and serial remote control.

**Control Bus:** Serial data control, RS-423 (RS-232 compatible) levels, 300 baud, 3 conductor cable (transmit, receive, common)

### SVA-502A 16 x 1 Video Switcher

Video Switcher, same as SVA-500A and SVA-501A but for slave control only. Controlled from switcher parallel control bus only. (Model CC-1639A Control Bus Jumper Cable required.)

### SAA-512A 16 x 1 Audio/Time Code Slave Switcher

Audio Switcher, self-contained, for slave control only. Controlled from switcher control bus only. (Model CC-1639A Control Bus Jumper Cable required.)

**Inputs:** 16 balanced high impedance bridging + 24dBm max., at 600 ohms

**Common Mode Rejection:** > 60dB, 50-120Hz;

**Output:** 50dB, 30Hz-15kHz

**Output:** 1 balanced low impedance, short-circuit protection, + 24dBm max. with 600 ohm load

#### Connectors,

**Input-Output:** Screw terminal

**Gain:** Adjustable to unity

**Crosstalk Isolation:** > 80dB below max. output to 15kHz (worst case)

**Frequency Response:** 30Hz-20kHz;  $\pm 0.2$ dB

**Harmonic Distortion:** 0.1% to 15kHz, +8dBm in/out; 0.25% to 15kHz max. in/out

**Hum and Noise:** -75dBm max.

### SVA-520A 5 x 1 RGB Video Switcher

Video Switcher, self-contained, for local and parallel remote control. Same as SVA-500A but with three 5 in/1 out sections.

SVA-500A and SVA-501A

SVA-520A and SVA-521A

### SVA-521A 5 x 1 RGB Video Switcher

Video Switcher, self-contained, for local and serial remote control. Same as SVA-501A but with three 5 in/1 out sections.

### SVA-522A 5 x 1 RGB Video Slave Switcher

Video Switcher, same as SVA-520A and SVA-521A but for slave control only. Controlled from switcher parallel control bus only. (Model CC-1639A Control Bus Jumper Cable required.)

### SCA-530A 5 x 1 Remote Control Panel (Parallel)

Master Parallel Remote Control Panel, rackmounting. For remotely controlling SVA-520A.

**Status:** Active input pushbutton, lighted

**Control Bus:** 8 conductor cable for power and control, 500' (150m) max.

#### Control Bus

**Connector:** 9-pin "D" subminiature

**Size:** 1<sup>3</sup>/<sub>4</sub>" H x 19" W x 1<sup>1</sup>/<sub>2</sub>" D (4.45 x 3.81 x 48.26cm)

### SCA-531A 16 x 1 Remote Control Panel (Parallel)

Master Parallel Remote Control Panel, rackmounting. For remotely controlling SVA-520A.

**Status:** Active input pushbutton, lighted

**Control Bus:** 8 conductor cable for power and control, 500' (150m) max.

#### Control Bus

**Connector:** 9-pin "D" subminiature

**Size:** 1<sup>3</sup>/<sub>4</sub>" H x 19" W x 1<sup>1</sup>/<sub>2</sub>" D (4.45 x 3.81 x 48.26cm)

### CC-1639A Control Bus Jumper Cable

Control Bus Jumper Cable, 9" (22.86cm). For control of slave matrices, Models SVA-502A, SAA-512A, and/or SVA-522A.

### CN-9954A Connector

9-pin "D" female connector for control bus and remote control panel.

### CN-9955A Connector

9-pin "D" male connector for control bus and remote control panel.

BP-1502A

SW-1540A

FR-1500A

VS-12D

## SERIES 1500 VIDEO DISTRIBUTION AMPLIFIERS

Series 1500 distribution and switching products may be used as self-contained, stand alone units for desk top or custom mounting. For rackmounting applications, units can be installed in the FR-1500A Rackmounting Frame which occupies only 1-3/4 inches (4.45cm) of standard 19-inch rack space. All units are equipped with BNC type signal connectors unless otherwise noted. Mating connectors are not included.

### DA-1510A

Video Distribution Amplifier. Provides four isolated 75 ohm source terminated outputs from one high impedance looping input.

- Input: 75 ohm unbalanced, high impedance looping, 1 V p-p, BNC connectors
- Outputs: 4, 75 ohm source terminated, 1 V p-p, BNC connectors
- Gain: Adjustable +/-3 dB
- Frequency Response (ref. 1 MHz): 100 kHz-10 MHz: +/-0.5 dB; 30 MHz: +1, -2 dB
- Tilt: Less than 1% line or field
- Differential Gain: 0.25% at 5 MHz, 10-90% APL, 1 V p-p output
- Differential Phase: 0.25° at 5 MHz, 10-90% APL, 1 V p-p output
- Hum and Noise: 65 dB RMS below 1 V p-p, 10 MHz bandwidth
- Size: Module only, 1-11/16"H x 5-3/4"W x 9" D (4.32 x 14.61 x 22.86 cm); mounted in MB-1504A desk mount, 2"H x 6"W x 9-1/4"D (5.08 x 15.24 x 23.50 cm)
- Power: 115/230 VAC +/-10%, 50/60 Hz
- Net Weight: 2-1/2 pounds (1.13 kg)

DA-1510A ..... \$300.00

### FR-1500A

Rackmounting Frame. Provides mounting for three (3) Series 1500 units in standard equipment racks. A captive screw fastener at the rear of the frame, and a guide pin at the front, secures each unit, allowing equipment to be used in mobile applications.

- Size: 1-3/4"H x 9-1/4"D x 19" rackmounting (4.45 x 29.21 x 48.26cm)
- Net Weight: 2-1/2 pounds (1.13 kg)

FR-1500A ..... \$100.00

### BP-1502A

Blank Module. Fills one unused space in FR-1500A Frame • Net Weight: 1-1/4 pounds (0.57 kg)

BP-1502A ..... \$60.00

### MB-1504A

Desk Mount Kit. For one Series 1500 unit. Includes rugged aluminum cover, rubber feet, and hardware.

- Net Weight: 13 ounces (0.37 kg)

MB-1504A ..... \$30.00

## PULSE DISTRIBUTION AMPLIFIERS

### PD-1515A Pulse Distribution Amplifier

Provides 4 isolated, source terminated outputs from 1 high impedance looping input. Regenerative input, linear output. Normal output with up to 1000 ft. (305 m) Belden 8281 input cable.

- Input: 2-4 V p-p negative pulses, 75 ohm unbalanced differential, high impedance bridging, BNC connectors
- Common Mode Rejection: Greater than 60 dB, 50-400 Hz, +/-30 V reference chassis ground
- Outputs: 2-4 V p-p negative pulses, 4 each 75 ohm source terminated, BNC connectors
- Output Return Loss: Greater than 35 dB at 5 MHz
- Output Isolation: Greater than 40 dB at 5 MHz
- Output Rise Time: 130 ns
- Gain: Adjustable to 2-4 V p-p
- Hum and Noise: 75 dB RMS below 4 V p-p
- Overshoot and Ringing: Less than 1.0%

V-396

- Tilt: Less than 1.0%
- Size: 1-11/16"H x 9"D x 5-3/4"W (4.32 x 22.86 x 16.61 cm); mounted in MB-1504A desk mount, 2"H x 9-1/4"D x 6"W (5.08 x 23.50 x 15.24 cm)
- Power: 115/230VAC +/-10%, 50/60Hz
- Net Weight: 3 pounds (1.36kg)

PD-1515A ..... \$325.00

EQ-1530A Equalizer (Post Equalizing) ..... \$575.00

EQ-1531A Equalizer (Post Equalizing) ..... 700.00

EQ-1532A Equalizer (Pre-Equalizer) ..... 650.00

## PASSIVE VIDEO SWITCHERS

Multiple input to single output locally controlled terminating video switchers. Units have extra contacts for user wiring of audio-follow or external cue lights.

### VS-6D Video Switcher

Video Switcher. Provides passive switching of from one to six inputs to a single output. Incorporates switch-controlled terminations. Equipped with separate auxiliary switch section for user wiring of unbalanced audio, balanced audio, external cue lights, or other secondary functions. For lighted pushbutton operation, order LK-1541A Lighting Kit shown below.

- Inputs: Six (all except operating channel terminated in 75 ohms)

- Output: One
- Connectors: BNC
- Size: 1-3/4"H x 6-1/2"D x 19"W (4.45 x 16.51 x 48.26 cm)
- Net Weight: 2-1/2 pounds (1.13 kg)

VS-6D ..... \$225.00

### VS-12D Video Switcher

Video Switcher. Same as VS-6D but with 12 inputs.

- Inputs: Twelve (all except operating channel terminated in 75 ohms)

- Output: One
- Connectors: BNC
- Size: 1-3/4"H x 6-1/2"D x 19"W (4.45 x 16.51 x 48.26 cm)
- Net Weight: 2-1/2 pounds (1.13 kg)

VS-12D ..... \$300.00

### LK-1541A Optional Lighting Kit

Lighting Kit. For use with passive switchers. Provides 6VDC at 100mA to power lamps provided with switcher. Calculator style plug-in transformer with 6 foot (1.82 meters) cable.

- Connector: Miniature male, 3.5 mm (mates with Switchcraft No. 41 jack provided on rear of switcher)

- Primary Power: 115 VAC, 60 Hz

- Net Weight: 6 ounces (0.17 kg)

LK-1541A ..... \$20.00

### SW-1540A 6-Input, 1-Output Passive Video Switcher

6-Input, 1-Output Passive Video Switcher. Switch controlled 75 ohm inputs. Separate auxiliary contacts included for user wiring of secondary switching functions. Lighted pushbuttons with use of LK-1541A Lighting Kit. Shown with optional MB-1504A.

- Inputs: 6 (all except input selected, 75 ohm terminated), BNC connectors
- Output: 1, BNC connector
- Switching: Break-before-make
- Size: Module only, 1-11/16"H x 9"D x 5-3/4"W (4.32 x 22.86 x 14.61 cm); mounted in MB-1504A desk mount, 2"H x 9-1/4"D x 6"W (5.08 x 23.50 x 15.24 cm)
- Net Weight: 2-1/2 pounds (1.13 kg)

SW-1540A ..... \$200.00

## SERIES 5300 DISTRIBUTION EQUIPMENT

Series 5300 Distribution Equipment mounts in a 5-1/4" x 19" rackmounting frame (13.34 x 48.26 cm). The frame has a total of twenty mounting spaces. Two power supply modules can be used to provide redundant power supply operation. All amplifier modules include "on-board" power regulators, fuses and blown fuse indicators. AC input power is 115/230 VAC  $\pm$  10%, 50/60 Hz.

### FR-5300B Frame

Module Mounting Frame. Provides twenty spaces for Series 5300 modules. All modules can be installed without soldering. (Frame shown with modules installed.)

Size: 5-1/4"H x 14-1/4"D x 19"W Net Weight: 9 pounds

### PS-5305B Power Supply Module

Power Supply Module. Mounts in FR-5300B Frame and provides unregulated dc for amplifier modules. Requires four spaces in frame. Two power supplies can be installed for redundant operation.

### AD-5370B 5 Output Audio Distribution Amplifier Module

High performance audio distribution amplifier module. Indefinite short circuit protection. Can be used in same frame with other Series 5300 modules.

### DA-5310B Dual 1 Input 2 Output Video Distribution Amplifier Module

Video Distribution Amplifier Module for high performance video systems. Two identical amplifier sections on one module, each providing 1 terminating input to 2, 75 ohm outputs. Equalization available for up to 1000 ft. (305 m) of cable.

#### DA-5310B/10A Video DA, Non Equalized

DA-5310B/11A Video DA, Equal., Belden 8281, Unbal. In.

DA-5310B/21A Video DA, Equal., WECO 16 PEVL, Bal. In.

DA-5310B/22A Video DA, Equal., WECO 760, Bal. In.

### DA-5320B 5 Output Video and Subcarrier Distribution Amplifier Module

Video Distribution Amplifier Module for high performance video systems. Sync-Tip reference maintains dc level with changing APL. Equalization available for up to 1000 ft. (305 m) of cable.

#### DA-5320B/10A Video DA, Non-Equalized

DA-5320B/11A Video DA, Equal., Belden 8281, Unbal. In.

#### DA-5320B/12A Video Equalizer, 30MHz

DA-5320B/21A Video DA, Equal., WECO 16, PEVL, Bal. In.

DA-5320B/22A Video DA, Equal., WECO 760, Bal. In.

### DA-5330B 10 Output Video and Subcarrier Distribution Amplifier Module

Video Distribution Amplifier Module for high performance video systems. Sync-Tip reference maintains dc level with changing APL. Equalization available for up to 1000 ft. (305 m) of cable.

#### DA-5330B/10A Video DA, Non-Equalized

DA-5330B/11A Video DA, Equal., Belden 8281, Unbal. In.

DA-5330B/22A Video DA, Equal., WECO 760, Bal. In.

### DA-5340B 4 Output Video Distribution Amplifier Module

4-Output Video Distribution Amplifier Module and Frame Adaptor for high performance video systems. 1 high impedance looping input and 4, 75 ohm outputs provided.

### EQ-5350 Post-Equalizing Amplifier Module

Post-Equalizing Amplifier Module. Provides up to 24dB of equalization at 8 MHz. Will equalize up to 3000 ft. (914.4m) of Belden type 8281 cable or 5000 ft. (1524 m) of WECO 16 PEVL. Provides 2,75 ohm outputs.

EQ-5350B/51A Post-Equalizing Amp., Belden 8281, Unbal. In.

EQ-5350B/61A Post-Equalizing Amp., WECO 16 PEVL, Bal. In.

### LA-5353B Unbalanced to Balanced Line Amplifier Module

75 ohm unbalanced input, 124 ohm balanced line driving amplifier module. Available with pre-equalization for up to 2500 ft. (762 m) of WECO 16 PEVL cable to provide 7500 ft. (2286 m) equalized circuit when used with EQ-5350B/61A.

### PD-5360B 5 Output Pulse Distribution Amplifier Module

Pulse Distribution Amplifier Module for high performance video systems. Regenerative input, linear output with controlled, adjustable, rise time. Front panel input pulse presence indicator. Normal output with up to 1000 ft. (305 m) Belden 8281 input cable.

### Series 5300 Blank Filler Panels

BP-5390A Blank Filler Panel. Mounts in FR-5300B Frame and fills one unused amplifier space. Net Weight: 4 oz.

BP-5391A Blank Filler Panel. Mounts in FR-5300B Frame and fills two unused amplifier spaces. Net Weight: 5 oz.

BP-5392A Blank Filler Panel. Mounts in FR-5300B Frame and fills four unused amplifier spaces. Net Weight: 6 oz.

### CC-5398A Power Supply Service Cable

Power Supply Service Cable. Allows power supply to be extended from frame for maintenance.

### CE-5396A Module Extender

Module Extender for all Series 5300 modules (except power supply). Allows modules to be extended from frame for maintenance. Net Weight: 2 lbs.

### CN-9860A Cable Mating Connector

Cable Mating Connector. For use with Western Electric type 760 or equivalent 124 ohm balanced cable. Mates with Trompeter BJ-77.

### CN-9861A Cable Mating Connector

Cable Mating Connector. For use with Western Electric type 16 PEVL or equivalent 124 ohm balanced cable. Mates with Trompeter BJ-77.

# VIDEO PATCHING EQUIPMENT

## COAXIAL PATCHFIELDS AND ACCESSORIES

The system consists of a high density patchfield that incorporates 22 channels in a standard 19 inch wide rack panel—either 1 3/4 or 3 1/2 inches high. Each circuit is connected to a patented COTERM® 22T jack which provides normal-thru connection without the use of patch cords or looping plugs. Patch cords may be inserted to break the normal-thru signal path and program cross connections. Sources that are patched out are automatically terminated within the jacks. Test probes may be used to enter the jack to sample the signal without interruption of the live circuit.

The Coaxial Patching System provides normal-thru connections and self-termination within the jacks, as well as cross patching and non-interrupting on-line monitoring of live circuits.

### COTERM® 22T

The COTERM 22T is a reliable, normal-thru patching and line terminating jack designed for rugged use and trouble-free service. It is available in 75 ohm impedance or optionally in 50 ohm impedance. It accepts standard BNC connectors on its rear terminals.

22T Normal-Thru, Self-Terminating ..... \$40.00

### COJAX® 22B

The COJAX 22B is identical to the COTERM 22T in dimensions, quality and serviceability. It is a normal-thru patching jack without the internal self-termination feature.

22B Normal-Thru ..... \$37.00

### COPATCH® 2-2A

The COPATCH 2-2A is a self-terminating jack without the normal-thru feature. It provides patchfield appearance of two standby source circuits. 75 or 50 ohm impedance.

2-2A Normally Terminating ..... \$40.00

### COPATCH® 2-2

The COPATCH 2-2 has neither the normal-thru or self-termination features. It provides two inputs to test equipment, trunk lines or other equipment.

2-2 Non-Terminating, Non-Normalling ..... \$37.00

All Coaxial Jacks may be interchanged for use in mixed patchfields.

## COAXIAL PANELS

Panels are available in metal or phenolic either 1 3/4 or 3 1/2 inches high for standard rack mounting. Coterm, Cojax or Copatch jacks may be mounted interchangeably on all panels—each panel holds 22 jacks across the 19 inch width. 4 standard panels are available, consult factory for other sizes.

105-113-22 Aluminum 1 3/4" high x 19" wide ..... \$60.00

105-114-22 Phenolic 1 3/4" high x 19" wide ..... 80.00

105-115-22 Aluminum 3 1/2" high x 19" wide ..... 68.00

105-112-22 Phenolic 3 1/2" high x 19" wide ..... 88.00

## COAXIAL PATCH CORDS

105-057—Standard Patch Cord constructed with soldered center pin and crimped sleeve shield connections to meet the highest standards of reliability. Standard lengths of 2, 3 and 4'; others available on special order.

PATCH CORDS (Specify length—2, 3 and 4' standard)

# PRODUCTION SWITCHER

## DV-5 Production Switcher

- Designed for teleproduction and post-production in small and medium-sized broadcast studios • Automatic calibration • 12 inputs, including black and background • 3 keyers • 3 digital color generators • Front-panel programmable with TimeTracker • Two mix-effects systems for effects and autotake • Switching power supply • Soft Take • Computer control of all switching and effects • Contact-closure editing interface will initiate any pre-programmed event • Remote fully digitized control panel with two wires to chassis • 39 wipe patterns • Command will return 28 parameters to factory calibration

The DV-5 video switcher is a compact and powerful tool for advanced teleproduction. Innovative circuit design allows packaging in a compact two rack-unit chassis and a 12<sup>1</sup>/<sub>4</sub>" remote front control panel. The electronics chassis uses just two printed circuit cards.

Built-in computers handle advanced features such as front-panel programmability, calibration, and fault diagnosis.

The DV-5 is used in two modes: Production or Programming. In Production Mode, the switcher allows control of wipe patterns and effects. In programming Mode, a keypad is used to store control sequences for later playback. When sequences have been programmed, they may be recalled in Production Mode for fast accurate recreation of effects that are difficult or impossible to perform manually.

### Specifications

#### Effects Pattern

**Generator:** 40 patterns available; border, symmetry, normal-reverse, soft controls

#### Take Pattern

**Generator:** 4 patterns plus mix, key and effects

**Downstream Keyer:** Fill with matte or external character generator video; fade-to-black; reverse keys

**Color Generators:** Three, background/border/DSK; digitally settable

**Effects Keyer:** Mix/Wipe/Key; keyer is internal, external, DVE, or chroma. Key mask and key reverse

**Edit Control Interface:** Optional RS-422 or 423 interface to popular edit controllers

**Audio Follow:** Optional 10-input audio follow switcher is available

**Chroma Keyer:** Optional RGB or NTSC chroma keyer

**Drop Shadow Generator:** Optional Drop Shadow Generator with variable 0-15 line drop, black or white pre-shadow, outline

**Programmable:** Time Tracker follows control movements, or normal mode follows button pushes. Up to 99 full panel setups can be stored. Up to 699 step sequences of control operations can be stored. Expandable, battery backed-up CMOS memory allows optional multiuser memory areas with password protection

**Video Inputs:** 10, looping impedance, 1V p-p composite or non-composite, synchronous or non-synchronous video inputs. 1, Character Generator Fill. 1, Digital Video Effects (DVE). 1, Genlock input

**Key Inputs:** 1, External chroma key; 75 ohm terminated. 1, External Effects key; 75 ohm terminated. 1, Character Generator key; 75 ohms terminated. 3, looping impedance Red/Green/Blue chroma-key inputs

**Video Outputs:** 1, Preview; 1V p-p 75 ohm source terminated. 2, Program, 1V p-p 75 ohm source terminated. 1, DVE feed from insert bus. 1, Black, 1V p-p 75 ohms source terminated

DV-5

- Sync Inputs:** NTSC: Sync, Blank, CBF; 75-ohm terminated, 2-4V p-p; or use optional genlock sync generator PAL: PAL ident flag added, external PAL sync generator required
- Data:** 1, Tally connector, 10 form C relays. 2, BNC, RS-423 link to front panel. 1, RCA phono jack for contact closure editing. 1, 9-pin D connector for RS-232 or RS-422 link to edit controller. 1, 9-pin D connector for RS-232 or RS-422 link to DVE or Audio Follow Switcher
- Differential Phase:** 1°
- Differential Gain:** 1%
- Bandwidth:** 10MHz
- Path Length:** 1.5°
- Absolute Delay:** 48°
- Program Output**
- Isolation:** 45dB
- Crosstalk:** 52dB at 3.58MHz
- Fade Linearity:** 1%
- Signal-to-Noise Ratio:** 50dB
- Power Consumption:** .65W, 110 or 220V, 50-60Hz
- Mechanical:** Control panel: 12<sup>1</sup>/<sub>4</sub>" x 2" x 19" rackmountable. Chassis: 3<sup>1</sup>/<sub>2</sub>" x 18" x 19" rackmountable. Shipping weight: 34 lbs.
- DV-5** ..... \$8995.00

### Options

- DSG-5** Drop Shadow Generator (15 lines) for DV-5 titler ..... \$2000.00
- GLS-5** Genlock Sync Generator for DV-5 ..... 1000.00
- RWP-5** Rotary Wipe Package for DV-5 ..... 650.00
- QSP-5** Quad Split Package for DV-5 ..... 500.00
- MEX-5** Memory Expansion for DV-5 ..... 350.00
- BPS-5** Back-up Power Supply for DV-5 ..... 650.00
- NTSC-5** NTSC encoded chromakey generator for DV-5 .. 1650.00
- RGB-5** RGB chromakey generator for DV-5 ..... 1650.00
- Serial-5** SMPTE Serial interface to any editor controller using the GVG 100 protocol ..... 1500.00
- SPK-5** Spare Parts Kit for DV-5 ..... 1000.00
- EXT-5** Extender board for DV-5 ..... 300.00
- SVC-5** Service manual for DV-5 ..... 50.00
- OPS-5** Operators Manual for DV-5 (basic units include 2) . . 45.00

# PRODUCTION/AUDIO FOLLOW SWITCHERS

SE-3

## SE-3 Production Switcher/Special Effects Generator

- 3 mix-effects circuits, 2 border generators
- 1 color background, 2 color matte generators
- Front-panel programmable with up to 5,000 steps
- Quad splits
- Re-entrant effects
- ECHOLab's patented Soft Take
- 1 3/4" front panel depth
- 12 video inputs total, 10 are looping impedance or 75 ohm terminated, inputs 1 and 2 are black and color background. Composite or non-composite, sync or non-sync sources may be used
- 5 keying inputs, comp or non-comp, must be synchronous Genlock source (black or composite video). 75 ohm terminated

The SE-3 makes exceptional performance available for a low price. A powerful built-in Z-80 microcomputer replaces most of the digital logic found in other switchers and also allows user programming.

SE-3 . . . . . \$12,200.00

### Upgrades

SE-3 to SE-6 upgrade (includes CPU, EFF, FPL, TLY, DSK swap) . . . . . \$12,000.00

AFS

## AFS-Audio Follow Switcher

- 9 inputs plus silent and tone, voiceover. Stereo optional
- 600 ohm balanced line, XLR type connectors
- Programmable, computer controlled audio switching and fading
- SMPTE link to ECHOLab's SE-3 or edit controllers
- Parallel link to other video switchers

The AFS is a computer-controlled switcher for audio mixing in a video environment. Intended to complement the SE-3 switcher, the AFS can be a stand alone programmable mixer or it can be controlled by the SE-3 or other video switchers. In this mode, the AFS will automatically switch audio to follow video, that is, selecting direct bus video 5 will cause the AFS to switch to audio source 5. Up to four sources can be designated as audio-only and will not respond to video switching.

Eleven input sources are selectable, including a low distortion 450Hz tone and silent, and voiceover can be added to the output. Pushing a single button will select its input in the normal fashion, and if two or more buttons are pushed simultaneously all buttons will remain lit and all sources will be selected.

SE-6

## SE-6 Production Switcher

- Quad splits, re-entrant effects
- ECHOLab's patented Soft Take
- Computer control of all switching and effects
- Front-panel programmable with up to 2000 shots/transitions
- Contact closure editing interface (standard) will initiate any pre-programmed event
- Remote fully digitized control panel with two wires to chassis
- 12 video inputs total, 10 are looping impedance (47K ohm) or 75 ohm terminated. Two inputs are internally generated black and background colors. Composite or non-composite sync or non-sync sources may be used
- 6 linear keys (Key 1-Key 5 and CGEN), one RGB or composite chromakeyer. Key 1, Key 3, and CGEN may be used with cut and fill signals

The SE-6 adds convenience and flexibility for fast-paced teleproduction. Two independent mix-effects systems and direct bus switching handle up to 12 video inputs, including black and background. Two built-in Z-80A microprocessors handle digitization of front panel controls (no heavy cables) and allow full control by edit controllers as well as user programmability. A front-panel programming system has been developed for enhanced ease of use.

The SE-6 is used in two modes: In production mode, the switcher is a normal 5-bus switcher. In program mode, the programming capability is turned on with a keyswitch, and the programming keypad is used to store control sequences for later playback. Any operation which can be done manually can also be programmed.

## SPECIAL EFFECTS GENERATOR/ PULSE CROSS DISPLAY

The SE-1G is a color special effects generator packaged in an attractive desk-top or rackmount box. Extensive use of large scale integrated circuits contribute to the unit's small size. Its unparalleled flexibility and ease of use will enhance all small to medium studio productions. The SE-1G will accept up to four composite or non-composite TV cameras, as well as a keying camera. Six effects are provided, including four corner inserts, a non-positionable circle wipe and keying. An internal RS-170 sync generator with genlock capability may be locked to composite video applied to input one.

### Specifications

- Audio output:** 2-Conductor phone jack, loop-through to intercom pins on camera connectors
- Tally:** 5-Pin Amphenol, connector; 1A 30V max; short to ground
- Frequency response:** DC-8MHz  $\pm$  1dB
- Differential gain and phase:** Better than one percent and one degree at 3.58MHz
- Output isolation:** Better than 30dB at 3.58MHz
- Power:** 115VAC-60Hz, 15W
- Dimensions:** Desk-top box 3'H x 16"W x 11"D  
rackmount—8<sup>3</sup>/<sub>4</sub>" x 19"W x 2<sup>1</sup>/<sub>4</sub>"D
- Weight:** 12 Pounds shipping weight
- Camera inputs:** 4, 75-ohm loop-through, external termination plug
- Key input:** BNC, looping impedance, 1V comp or non-comp
- G/L input:** 1V composite video at input 1
- Sync outputs:** 4, 1V black burst; 1, 4V vertical drive; 1, 4V horizontal drive. Option: 4V sync
- SE-1G** ..... \$1695.00

### SE-1G Special Effects Generator

- Compact, versatile
- Six special effects
- Accepts up to 4 composite or non-composite cameras, plus keying camera
- Internal RS-170 B & W sync generator with genlock

The PCD is the most effective and economical tool for monitoring video quality for small studio applications. The input to be monitored is a 1V p-p composite video signal. Six SO-239 connectors provide two different types of output signals: display and distribution.

The Display outputs carry unmodified input video until either Display Select switch is pushed. Pulse cross or waveform sample displays may be selected separately or in combination. Four isolated distribution amplifier outputs are also available; these outputs are not affected by the display select switch.

### Specifications

- Inputs:** 2 Looping or switch selectable 75 ohms termination; SO-239 connectors
- Display outputs:** 2; 75 ohms source terminated
- Distribution outputs:** 4 Isolated outputs; SO-239 connectors. 75 ohms source terminated
- Frequency response:** 10MHz  $\pm$  1dB
- Differential phase and gain:** Better than 1° and 1% at 3.58MHz
- Output isolation:** Better than 30dB at 3.58MHz
- Power:** 115VAC—50/60Hz, 4W
- Dimensions:** 3<sup>1</sup>/<sub>2</sub>"H x 9"W x 10"D desktop box  
1<sup>1</sup>/<sub>4</sub>"H x 19"W x 10"D rackmounted  
3-wire power cord
- Weight:** 8 Pounds shipping weight
- PCD** ..... \$595.00

### PCD Pulse Cross Display

- Combines in one package the television monitoring and distribution instruments needed in a small studio
- Waveform sampler
- Pulse Cross display
- Distribution amplifier

## EMME® Computerized Editing Systems

• A workstation optimized for creative video editing • Fast, comprehensive edit decision list • Time-saving cluster events function • Multiple workstation configurations • Built-in expansion • Integrated time code modules • Fast, smooth, control of up to nine 1", 3/4" or 1/2" VTRs/Multitrack ATRs and a production switcher

### Fast, Comprehensive Edit Decision List

A powerful edit decision list program allows you to select functions quickly and efficiently. As you edit, each of your decisions goes directly into the list. You can insert a multisource event such as a dissolve by pressing the DISSOLVE key, then entering the desired number of frames. Follow the same procedure to re-edit a multi-source event.

The EMME list also lets you correct entry errors. If an entry is made into an existing event by mistake, that event is not destroyed. To restore the event to its original form, press the O.S. (Out Sequence) key on the keyboard, and the system reverts to the beginning of the event, thereby automatically deleting the erroneous entry.

Along with these shortcuts, you still get a full selection of time proven features like selective update, block move, sort, change sequence, auto clean, list clean and global search.

### Time-saving Cluster Events Function

With the powerful editing tool of cluster events, create complex, multiple-source decisions as elements of the cluster, then treat them as a single event. To dissolve back and forth from a person on camera to a character generator graphic, for example, you no longer have to create an event for each dissolve. Instead, create a cluster that is previewed and recorded as one event. By controlling the character generator through the Relay key, you can dissolve to the person on camera, trigger the relay and change the graphics, dissolve back to the person, and continue through the entire sequence.

And you can use cluster events to great advantage with today's "intelligent" switchers, capable of displaying multiple sources in a wide variety of modes.

### Multiple Workstation Configurations

An optional workstation has been customized for the unique needs of today's professional film editors. This Cinemagraphic Editing Workstation is easily interchangeable with the Video Editing Workstation. Each is plug compatible with the EMME computer.

If your specialty is filmstyle editing, you can make all editing decisions using the "Mouse" Controller, a single-button device that moves a corresponding cursor on a display of all system functions on a data display monitor.

### Integrated Time Code Modules

An LTC reader is included in each EMME machine interface, and you can order additional time code accessories to suit your applications. These include the time code inserter, VITC reader, LTC generator and combined LTC/VITC generator, all plugging into the system's smart interface chassis.

VITC capability lets you use all audio tracks available for applications like multiple language programs and stereo audio mixes. And it gives you the added flexibility of editing in slow motion—all the way down to still frame.

Prioritizing time code formats in the absence of a particular code is easily accomplished. If you're reading LTC, for example, and this code drops out, the system automatically reverts to VITC, or to the control track. Similarly, when the VITC reader is in use, the order of priority can be from VITC to LTC, and finally to control track, so that you always have automatic backup capability.

### Auto Assemble with Full Look-ahead Search

Auto Assemble lets you automatically assemble all of your edit decisions onto a master tape. With our look-ahead search, you can even auto assemble a half-hour program in a half hour of real time. Once you've completed your edit decision list, you select Auto Assemble on the control panel. The system automatically looks ahead in the list for the next edit, cues a selected VTR, then pre-parks it to wait for the right time to play.

# COMPUTERIZED EDITING SYSTEMS

### E-Key Registers for Repetitive Functions

The Video Editing Workstation gives you 10 E-key registers, each a set of up to 80 keystrokes that the workstation remembers and executes with a single stroke. You can quickly execute special functions like center cut dissolve and automatic offset just by pressing one key. When a weekly show opens with a standard sequence of special effects, for example, the commands used to perform the opening can be stored into one or more E-key registers.

### Multitrack ATR Control

You can match video to audio for perfect lip synchronization, time special audio effects to match video action, and expand the total number of synchronous audio channels.

### Smooth, Efficient Editing At Your Command

EMME's Video Editing Workstation features a dedicated function editing control panel. Keys are grouped by function into clusters, and the clusters logically arranged on the panel to maximize your efficiency and creative freedom. You'll find the most frequently used keys placed in a triangular pattern where you can easily locate and use them. Also included is a special Help key as part of the control panel to give you instant, on-screen information about specific functions as you need it.

A shuttle knob lets you manipulate the powerful edit decision list to select list management functions and control machine motion.

All functions that require a status display are highlighted with LED indicators on the keytops, so that as you scroll through the list, you are constantly kept informed of in-use status, right up to the current event.

**EMME 3000/3100** Includes three VTR interfaces, three longitudinal or vertical interval time code readers, rackmountable electronics chassis and interface chassis (E-Box with E-bus control module), rackmountable single 8" disk drive. Choice of either Video Workstation or Computer station (color coded keyboard), operator and technical/installation manual. . . . . \$24,950.00

**VMI VTR Interface Package For Parallel Or Serial VTRs.** Package includes P.C. and time code reader boards (longitudinal or vertical interval), 10' RS-422 cable (from main frame to interface), 50' control cable (from interface to VTR). VTR make and model number and time code cables must be supplied by customer. . . . . \$2,995.00

**AMI ATR (Audio) Interface Package For Parallel Or Serial ATRs.** Includes two P.C. boards, time code reader (longitudinal only), 10' RS-422 cable (from main frame to interface), 15' cable (from interface to ATR). ATR make and model and time code cables must be supplied by customer. . . . . \$4,750.00

# VIDEO EDITING SYSTEMS

## 200 Series Video Editing Systems

- **ActionMatch:** Calculates edit points to match action and sound anywhere within an edit segment. Audio-only or video-only inserts can be precisely matched to corresponding action or sound with joystick control and a single keystroke
- **Amber Status Monitor:** An amber status monitor is included with each 200 System
- **Auto Duration:** Utilizes the trim register to set the edit duration relative to either an in or an out point
- **Auto/Manual Assembly:** Provides for automatic editing of a sequence or an entire program following the instructions in the edit list. Manual Assembly calls up the next edit automatically but actual performance of the edit relies on the operator
- **AutoMatch:** Allows the operator to create matching source and record in edit points at any location within the previous edit. This automatically provides match frame edits for A/B rolls and effect transitions
- **Auto Scene Store:** In this mode a single keystroke snapshots scene location by time code and reel number. Up to 99 locations can be stored or listed
- **Automatic Dialogue Replacement:** ADR provides cue tones and a continuous audio record cycle for "looping" or post-dubbing of sound. It can also be used to replace video material
- **CleanIt:** CleanIt automatically cleans overlapped edits in the EDL one edit at a time during the off-line edit process. This program constantly checks the preceding edit to see if an overlap has occurred
- **Color Framing:** A Color Framing routine allows the edit system to monitor the color frame relationship for 1" VTRs based on time code
- **Control Track or SMPTE/EBU Time Code:** The editing system has the capability to operate in either control track or industry standard SMPTE/EBU drop frame or non-drop frame time code. The system also operates with any combination of control track or SMPTE/EBU time coded tapes
- **High Speed Search:** Allows the operator to program any tape time location (control track or SMPTE/EBU time code), and have the selected VTR search to that tape location
- **List Scroll:** Gives you joystick control to shuttle forward and backward through the edit list, including "cruise" for no-hands scrolling of EDL
- **Manual Bump:** Allows for small adjustments to rolling VTRs from the keyboard to achieve precise synchronization of multiple machines for syncroll
- **Programmable Personality:** Each model of VTR has an individual "personality" with regard to speed and response characteristics. Personality switches tell the system what specific VTRs are connected
- **Smart Start:** Learns the characteristics of the VTRs in the system and makes adjustments in the synchronization routines to accommodate variations in performance
- **Split Audio/Video Edits:** Can be programmed with independent selection of audio and video in edit points

## Conversion Kits

- CK-201/204** Upgrades the ECS-201 to the ECS-204. Includes a memory board and keycaps . . . . . \$10,800.00
- CK-202/204** Upgrades the ECS-202 to the ECS-204. Includes a memory board and keycaps . . . . . 6,480.00
- CK-203/204** Upgrades the ECS-203 to the ECS-204. Includes a memory board and keycaps . . . . . 5,400.00
- CK-204/205** Upgrades the ECS-204 to the ECS-205. Includes a memory board, keycaps, one VTR interface, an additional electronic control unit with rackmount kit, and time code reader channel . . . . 8,100.00

## Options and Accessories

- AVS-100** Audio Follow Video Switcher . . . . . \$1,200.00
- CG-100** Command Generator . . . . . 1,000.00
- CI** Character Insertor . . . . . 1,200.00
- ICC-100/5'** Interconnect cable for parallel I/O . . . . . 175.00
- ICC-100/20'** Interconnect cable for parallel I/O . . . . . 300.00
- IFP-100** Interface Package (Specify VTR manufacturer and model number intermixable formats available) . . . . . 1,000.00
- IFP-100/VSI** Serial VTR interface package, provides dual range joystick control. Time code is carried through VSI to 204X, 1205 or 1000 Series Edit Controller—no additional time code cables required. . . . 1,500.00
- JB-100** Junction Box . . . . . 200.00
- PIO-100** Parallel input/output . . . . . 175.00
- SE-100** Switcher Effects Unit . . . . . 7,000.00
- SWI-100/110** Switcher Interfaces includes JB-100 and appropriate cables; specify model/manufacturer of switcher to be interfaced . . . . . 2,000.00
- SWI-120** Switcher Interface includes JB-100 and appropriate cables; specify model/manufacturer of switcher to be interfaced . . . 3,000.00
- RMK-200E** Rackmount kit . . . . . 250.00
- PC-300** Software program for outboard edit list management . . . 1,000.00

## ECS-204X

A four VTR, advanced list management A/B roll edit controller with assignable record, three built-in time code readers, 1000 line edit memory, 409 list cleaning program, CleanIt, block moves, comments, sequential and checkerboard auto-assembly. Includes three VTR interfaces, electronic control unit with rackmount kit, monitor, the PC-300 list storage program, Operation and Maintenance Manuals. Fourth VTR interface and Time Code channel optional . . . . . \$19,000.00

## ECS-205

An eight VTR advanced list management A/B roll edit controller with four built-in time code readers (expandable to eight), with assignable record. Includes list management and assembly features of the 204.

Includes four VTR interfaces, two electronic control units, editing console, status monitor and operations/maintenance manuals. Additional VTR interfaces and time code channels optional, monitor, the PC-300 list storage program and Operation/Maintenance Manuals. . . . \$27,000.00

# VIDEO EDIT CONTROLLER

## ECS 900 Plus Video Edit Controller

- A six serial VTR controller
- Any serially interfaced VTR may be assigned record functions from the 1000 keyboard
- Combinations of parallel and serial interfaces may be used
- Serial time code generator is standard with optional longitudinal time code reader
- The edit decision list can be transmitted in and out of the controller via dual RS-232 serial data streams to personal computers, independent disc drives, punched tape reader/generators and printers
- An edit list of 1000 lines may be stored internally
- List management includes pending and actual addition and deletion of edit events
- The controller may be fully interfaced to most major manufacturers' production switchers for A/B roll effects
- CleanIt...The dynamic edit list cleaning program that cleans lists as edits are performed
- TenCom...Set of ten general purpose interfaces, can trigger external digital video effects units, graphics generators, audio tape decks and external VTRs
- ActionMatch...Provides single keystroke backtiming that matches audio and video points for in-scene synchronization
- AutoMatch...For single keystroke matchframing
- AutoTag...For automatically extending events from a match frame point
- ListTag...For single keystroke matchframing to any point within previously recorded material
- SyncRoll Tag...Single keystroke re-synchronization among several source and record reels for edit-by-edit synchronized rolls
- Split Audio/Video Edits...A logical keystroke/joystick sequence that quickly establishes separate in-points for audio and for video
- 99-Frame Scene Store...A separate memory that can store 99 different time code locations by reel number, accessible via two-digit addresses. Locations can be entered "on the fly" as music beats, chord changes, scene changes, etc.
- Joystick VTR Control...All interfaced VTRs can be placed in high speed forward or reverse scan, play, jog and still-frame pause from the joystick
- ListScrol...The joystick can be used to scroll and cruise the edit list through a highlighted line in the edit decision list register
- Last and Next Edit Recall...One shifted keystroke pulls any edit in the highlighted line up to the edit register for modification, trimming and/or re-recording
- Five Preview Modes...VVV, VBV, BVB, Preview-In and Preview-Out
- Manual Bump...Up to four rolling VTRs can be manually synchronized—and locked into sync—for SyncRoll
- SyncRoll...Three sources and one record VTR can be rolled "in-sync" while cuts, wipes and dissolves are performed from the keyboard of the 1000. Each transition/event is automatically loaded into the edit list
- List Management Package...Features Add, Delete and Replace, with or without Ripple
- The PC-300 personal computer program...for outboard list storage and manipulation
- JoyScrol...A feature that locks the position of the edit list to the motion of a delegated VTR

ECS 900 Plus

- Sequential auto-assembly
- 409...An advanced stepthrough list cleaning program unique to Convergence edit-controllers
- Move...A feature that can literally edit the list by defining blocks of edits and copying—or deleting—them anywhere in the list, with or without Ripple
- Comments...Entry into the list from the keyboard of an MS DOS based personal computer (with the PC-300)
- Checkerboard auto-assembly
- User bits display
- Exchange register...used for alternating active edit events

## ECS 900 Plus

A complete high-end six serial VTR list management edit system with assignable record, 1000 line edit memory, list in and out, add, delete and replace with or without ripple, CleanIt and 409 list cleaning programs, block moves, comments, Joy-Scrol, sequential checkerboard auto-assembly. Includes three VTR VSI serial interfaces, one time code generator and Operations/Maintenance Manual. Three additional VSI serial interfaces and time code channels optional . . . . \$16,200.00  
**TCR-4 Internal time code reader, 3 channels . . . . \$3,500.00**  
**TCR-1 Time code reader expansion channel for existing TCR-4 . . . . \$300.00**

## Accessories

**Video Switcher Source cuts-only systems. Audio follow . . . . \$1,200.00**  
**CI Character Inserter Inserts time code digits into video being recorded, providing "window dubs" . . . . \$1,200.00**  
**ICC-100/5' Interconnect cable for Parallel I/O . . . . \$175.00**  
**ICC-100/20' Interconnect cable for Parallel I/O . . . . \$300.00**  
**IFF-100 Interface Package Specify VTR manufacturer and model number (1", 3/4", 1/2") . . . . \$1,000.00**  
**JB-100 Junction Box Required for multiple connections to Parallel I/O. . . . \$200.00**  
**PC-300 Personal computer software program (MS, DOS, IBM compatible) . . . . \$1,000.00**  
**SE-100 Switcher Effects Unit Audio follow video switcher with 23 wipe patterns, dissolves. . . . \$7,000.00**  
**SWI-100/110 Switcher Interfaces Includes JB-100 and appropriate cables; specify model/manufacturer or switcher to be interfaced . . . . \$2,000.00**  
**SWI-120 Switcher Interface Includes JB-100 and appropriate cables; specify model of switcher to be interfaced. . \$3,000.00**

# VIDEO EDIT CONTROLLERS

## ECS 195 Series Editing Systems

A powerful, low cost A/B roll video edit-controller. Standard features include the ability to mix tape formats, including 1", exclusive tag features simplify backtiming for match frame edits and matching video to narration; scene store for quick storage and retrieval of key scenes; and an internal 50 edit line memory that is expandable to 200 lines.

The basic system may be expanded to include three time code readers and one generator, and a list management package with sequential auto-assembly.

### ECS 195, Basic System

**ECS 195LM with a list management package and sequential auto-assembly, three time code readers, one generator**

#### The Console

- Joystick • Cruise • SMPTE time code or control track
- High speed search • Manual bump

#### Edit Entry

- Switcher effects and notation • Split audio/video edits

#### Auto Edit Cycle

- Preview modes • Allstop • Replay • Status display generator • Dual Serial EDL ports • TwoCom • Color framed time code generator on the 195LM

#### Tags

- AutoTag • AutoMatch® • Scene store and recall
- Syncroll • Manual bump

#### List Search

- JoyScrol® on the 195LM • ListScrol®

#### List Management

- Internal memory 50 edit line memory storage is standard on the 195; 200 edit lines are included in the 195LM
- Add, delete or replace edits with or without ripple in the 195LM • Pending clean • CleanIt® • Format selection
- Reel-numbers • Edit numbers • Recall edits • Renumbering

#### Auto Assembly

- Auto assembly provides for automatic editing of a sequence or an entire program, following the instructions in the edit list • Manual assembly calls up the next edit automatically, but actual performance of each edit list is initiated by the operator allowing for modifications or adjustments • Auto and manual assembly are available on the 195LM

#### Other Features

- Audio monitoring • Three channel audio insert selection • Trim function • Auto duration • Automatic dialog replacement

#### Engineering Notes

- Assemble/Insert • Time code with offset • Switcher/Mixer control • VTR interfaces • Color framing • Multiple or single monitor • Smart start • Programmable personality • Preroll/Postroll time select

**ECS-195 A/B Roll, Three VTR Controller with 50 event memory, tag features, edit list in and out, add, delete and CleanIt. Includes three parallel VTR interfaces**

.....\$10,505.00

**ECS-195 Plus** includes all features of the ECS-195 in addition to: internal time code readers and one generator. Complete list management package including add, delete and replace with or without ripple, JoyScrol (list slaved to VTR motion), 450 event edit memory, sequential auto-assembly and Operation/Maintenance Manual .....

\$15,000.00

#### Conversion Kits

**LM Option A** Upgrades earlier 195TCRG to ECS-195LM. Adds list management package with Ripple, JoyScrol 200 event memory and sequential auto-assembly

.....\$2,200.00

**LM Option B** Upgrades basic 195 to ECS-195LM. Adds three time code readers and one generator, list management package with Ripple, JoyScrol and sequential auto-assembly .....

\$6,000.00

**LM Option C** Upgrades the ECS-195LM to the ECS-195 Plus if the unit was purchased after January 1, 1987 .....

\$2,200.00

# EDITING SYSTEMS

## IVES® II Desktop Postproduction Editing System

In its standard configuration, the IVES II can easily handle all editing and machine control functions for a typical 2-VTR editing bay without additional peripheral equipment. And when expanded through the addition of its A/B option, your IVES II increases its power even more, giving you full A/B roll and separate Special Effects Generator (SEG) control in one package.

- SMPTE/EBU time code or control track editing, so you can edit whichever way you find more comfortable. And to safeguard your efforts, the system will automatically switch to control track pulses should the time code source be interrupted
- An internal routing switcher that automatically routes all your video, audio and time code inputs based on your selections. No recabling is necessary
- Dedicated Mark/Set keys that let you easily mark in and out edit points on-the-fly or set them numerically
- Back-to-back matched edits that are as precise as possible because the system automatically matches last out points with next in points for both video and audio
- Programmable general purpose interface (GPI) relay closure that can trigger auxiliary equipment at any time before or during an edit
- Video and audio fade control that allows you to program video and audio fades directly from the keyboard, for durations of 1 to 9 seconds
- Scene-thru and replay, the IVES II's unique commands that let you replay any sequence of edits or just the last edit performed
- A rapid go-to search that lets you find any scene location, including last in and last out points, within seconds
- A print command that generates an edit decision list (EDL) of your edits in CRT display or industry standard edit list formats
- Preview out, a time-saving command that permits you to preview and fine tune your edit out point without having to preview the entire edit
- Aux video input that allows you to conveniently insert camera or title video into your production
- The ability to insert IVES II color black as a video source
- Copy source or master tapes for workprints or backup copies. IVES II's one-button Copy command automatically rewinds both VTRs to the beginning, then quickly makes a direct copy from the play VTR to the record VTR, or vice versa. While copying, you can add time code to just the copy or to both tapes if you need two tapes that have identical time code. This is especially helpful for A/B editing situations. And because all video, audio and time code signal routing is performed automatically, no cable repatching is required
- Stripe the play and/or record tapes with continuous SMPTE/EBU time code, control track pulses and video color-black. All at the touch of single-button controls. And possible because the IVES II includes its own sync and video color-black generators and dual time code generator/readers. So you won't need additional time code equipment, either in the field or in the postproduction room
- Print out rough cut edit lists in CRT or industry standard EDL formats, so you can review important scenes and possible edit points without actually performing the edit
- Mix audio directly onto your edited master tape. Add background music, sound effects and voice-overs, complete with fades and adjustments of the mix ratio from front panel or auxiliary audio line inputs. A 3W amplifier is included so you can monitor audio from either VTR
- Change from one tape format to another quickly and easily, allowing you to move from 1/2" to 3/4", 3/4" to 1", etc., with remarkable speed

**IVES II Single Source, Cuts-Only Edit-Controller.** Includes two VTR interfaces, two built-in time code readers and generators, internal sync and black generators, programmable fades to and from black, audio mixer, non-volatile memory, operators manual. System is expandable to include second source VTR for A/B roll effects . . . . . \$5,350.00

IVES II

IVES Pro

## IVES® Pro A/B Roll Editing System

Three VTR Edit Controller with Remote Rackmountable Electronics and Detached Keyboard.

- Ability to intermix 1/2", 3/4", 1" formats
- Self-contained SMPTE/EBU time code generator/readers
- RS-232 serial port
- Parallel output to printer
- Pre-stripe capability with color-black and time code
- Programmable fade to and from color-black
- Audio mixer with programmable fade
- Automatic dubbing of source material and edited master
- Internal sync and color-black generators with outputs
- Split audio/video edits
- Auto assembly from external source
- Learn mode—repeats series of keystrokes
- E-E preview for setting audio/video record levels
- Ability to edit with drop/non-drop time code formats
- Non-volatile memory for edit and function data storage

**IVES PRO A/B Roll, Three VTR Edit-Controller** with remote rackmountable electronics, auto-assembly from external source, three VTR interfaces, three built-in time code readers and two generators, internal sync and black generators . . . . . \$7,950.00

# EDIT CONTROL SYSTEM

Super 90

## Super 90 Edit Control System

- Plugs into most 3/4" and 1/2" VTRs
- Joystick control of tape speed
- Pulse Scan
- Interchangeable VTR formats
- High speed search
- Cruise
- Full VTR remote control
- Auto-tag
- Recall feature
- Built-in sync generator
- On-board computer
- Dynamic Edits
- Mark, set and trim in/out edit points
- Programmable pre- and post-rolls
- Insert or assemble edits
- Independent control of audio and video channels
- Control track or SMPTE/EBU time code
- Abort capability
- Status display generator
- Fastest edit controller available

The Super 90 is a low cost microprocessor-based editing system designed to bring sophisticated joystick editing within the budget of every videotape producer. It is a plug-in system that provides variable speed tape motion control with most 3/4" and 1/2" editing VTRs.

The multi-format Super 90 is particularly suitable for high speed ENG (electronic news gathering), EJ (electronic journalism), remote production vans, educational and industrial productions, broadcast productions requiring a single source, and as an off-line system for commercial post production.

The Super 90 can be used for single or dual monitor editing, remote VTR rolls, back-timed edits, animation and manual edit listing. The Super 90 operates on control track or industry standard SMPTE/EBU time code, and is available in NTSC or PAL versions.

The Super 90 is human-engineered for ease of operation and is the fastest editor available in the industry. The dedicated twelve-button keyboard permits quick initiation of edit functions and communication with the editor and its options, Liplock® audio pitch control, and Blade™ black/fade module.

**Super 90 Single Source, Cuts-Only Edit Controller**  
 Includes two time code readers and one generator, all built-in. RS-232 edit list out capability, two VTR interfaces, one each operator and maintenance manual.

Super 90 . . . . . \$4950.00

## Accessories

### CI Character Inserter

Inserts or displays time code digits into video. Provides "window dubs." . . . . . \$1200.00

### BL-90 Blade Black Generator And Fade Module

Fades up from and/or down to black at in or out edit points. Includes internal black burst generator for prerecording color black on video tapes. (Fades NTSC and PAL, Black Burst Generator NTSC only.) . . . . \$925.00

### CCA-90 Control Cable Assembly

Interfaces VTR to 90 Series Edit Controller. Specify VTR manufacturer and model number . . . . . \$650.00

### RGL-90 Time Code Reader/Generator/Listener Module

Installed in a ECS-90 it will generate and read drop and non drop frame SMPTE or EBU time code. Lists edit decisions via RS-232 serial port to storage devices . . . . \$3250.00

## Manuals

ECS-90/Super 90 Operators . . . . . \$25.00

# TIME CODE EQUIPMENT

## ECONOLINE® TIME CODE GENERATOR AND READER PERIPHERALS

### Time Code Generators

#### MTG-55 Master Time Code Generator

- Rackmount package • Thumbwheel switches for data entry
- Color frame sync capability • Front panel controls for stop, start, load, and drop frame • Output 0dBm, 600 ohm, balanced

MTG-55 . . . . . \$1350.00

#### PTG-56 Portable Time Code Generator/Reader

- Miniature handheld package • Weighs 0.55 lbs. • 1/16 to 30 times play speed reading range • Slave (jam-sync) capability
- Full membrane keypad for data entry and control • Custom LCD • Remote start, stop capability

PTG-56 . . . . . \$1995.00

#### MTG-57 Master Time Code Generator/Reader

- Small desktop package • Weighs 2.9 lbs. • 1/16 to 30 times play speed reading range • Slave (jam-sync) capability • 0.3" red LED • Keypad for data entry and control with audible fault alarm • 117VAC, 60Hz, 3W max.

MTG-57 . . . . . \$1795.00

### Time Code Readers

#### TCR-65 Time Code Reader

- Rackmount package • 1/20 to 20 times play speed reading range • 0.4" red LED • Updates from tach pulses during code dropouts • Front panel controls for time code level and display hold • 117VAC, 60Hz, 4W max.

TCR-65 . . . . . \$1350.00

#### TCR-66 Mini Time Code Reader

- Miniature desktop package • Weighs 0.55 lbs. • 1/16 to 30 times play speed reading range plus user bits • 0.3" red LED indicators for drop-frame and user bit operation • Front panel controls for display hold, frame blanking, and user bit operation • Operates from 7-16VDC or furnished AC adaptor

TCR-66 . . . . . \$1295.00

#### TCR-67 Time Code Reader

- Small desktop package • Weighs 2.9 lbs. • 1/16 to 30 times play speed reading range plus user bits • 0.5" green LED • LED indicators for drop-frame and user bit operation • Front panel controls for display hold, frame blanking, and user bit operation • 117VAC, 60Hz, 3W max.

TCR-67 . . . . . \$1495.00

### Time Code Reader/Inserters

Each unit can read drop or non-drop time codes and provides controls to adjust character size and screen position.

#### VCG-75 Video Character Generator

- Compact rackmount package • 1/20 to 20 times play speed reading range • Front panel controls for time code level, size, position, brightness, insert on/off, and display hold • 117VAC, 60Hz, 3W max.

VCG-75 . . . . . \$1350.00

PTG-56

MTG-57

TCR-65

VIG-850

#### VCG-76 Portable Time Code Reader/Inserter

- Miniature handheld package • Weighs 0.6 lbs. • 1/16 to 30 times play speed reading range plus user bits • Controls for background mask in/out, time code/user bit, frame blanking, and insert on/off • Operates from 10-18VDC or furnished AC adaptor

VCG-76 . . . . . \$1595.00

#### VCG-77 Time Code Reader/Inserter

- Small desktop package • Weighs 2.9 lbs. • 1/16 to 30 times play speed reading range plus user bits • Front panel controls for background mask, in/out, time code user bit, frame blanking, on/off, display hold • 117VAC, 60Hz, 3W max.

VCG-77 . . . . . \$1795.00

#### VIG-850 Premium Multi-Format

##### Time Code Generator/Reader

- Compact, rackmount package • Generates longitudinal and VITC time code • Reads and displays longitudinal and VITC time code • Generates slaved time code from 10 commandable generator slave modes • Compatible with NTSC and PAL/SECAM video standards • Built-in broadcast quality VITC video inserter • Drop and non-drop frame • Generates, reads, and displays user bits • 105-125VAC, 47-30Hz, 30W max.

VIG-850 . . . . . \$5490.00

## 1600 Series

### High Resolution Video Disc Recorders

- PTCA
- Image Freeze
- Cerebral Angiography
- Forward/Reverse Slow Motion

Convenient and flexible, the 1600 Series Disc Recorders provide high resolution images at any speed between real time and still, in either direction. When used in procedures such as PTCA or Angioplasty, recorded images can be easily reviewed, and an optimum choice made. The selected image can then be held in a still display, providing a reference or guiding shot which can be "toggled" with live fluoro. High resolution video preserves detail and quality.

The 1600 Series Video Disc Recorders provide real time (60 TV fields/sec.) recording, from 8.3 to 20 seconds duration, depending on the model. Video replay can be real time, slow motion, field by field, or a single "frozen" image. Playback can also be in either forward or reverse directions.

Video is recorded on a flexible, high density, coated mylar disc on which the video heads "float". The use of two heads, each with individual stepper mechanisms, allows one head to stabilize, while the second may be recording and/or playing. The combination of flexible recording media and floating heads makes the 1600 Series virtually crashproof, and capable of displaying high resolution video images over long periods of time. Television line rates from 525 to 1249 can be accommodated.

### Analog Video Disc Recorder Packages

Packages include real time Video Disc Recorder with remote control, 25' of control cable, 5-pack of recording cassettes, head cleaning cassette: tabletop or rack-mount chassis, cine camera interface to eliminate VDR flicker. (Any recorder below can be ordered to operate from 525 up to 1249 line rate.)

<b>16-10</b>	6MHz high resolution recorder. 600 fields, 10 second real time record capacity . . . \$22,000.00
<b>16-10/10</b>	10MHz maximum resolution recorder. 500 fields, 8.3 second real time record capacity . . . . .26,000.00
<b>16-20</b>	6MHz high resolution recorder. Two chassis store 1200 fields, 20 second real time capacity . . . . .34,000.00
<b>Dual System 10</b>	Two 10 second 6MHz high resolution recorders with one remote control for simultaneous dual operation. Each recorder has a 600 field capacity . . . . .41,500.00
<b>Dual System 10/10</b>	Two 8.3 second 10MHz maximum resolution recorders with one remote control for simultaneous dual operation. Each recorder has a 500 field capacity . . . . .49,500.00
	Extra recording cassettes for above units, 5 pack. . . . .600.00
<b>16-20/10</b>	10MHz maximum resolution recorder. Two chassis store 1000 fields, 16 second real time recording capacity . . . . .38,000.00

# VIDEO DISC RECORDERS

1600 Series

## Specifications

### General

**Power:** 105-120/220-240VAC, 50/60Hz  
**Consumption:** 16-10, 16-10/10: 350W; 16-20: 650W

### Video

**Input/Output Level:** 1.0V p-p, 75 ohms  
**Bandwidth:** 16-10, 16-20: 6.0MHz, -3dB; 16-10/10: 10.0MHz  
**S/N Ratio:** 16-10, 16-20: 43dB; 16-10/10: 40dB  
**Differential Gain:** 2-4%  
**Horizontal Scan:** 2:1 interlaced, line rates to 1249  
**Dimensions**  
16-10, 16-10/10: 8.75" x 16.5" x 22.75"  
16-20: 17.75" x 16.5" x 22.75"  
**Weight:**  
16-10, 16-10/10: 55 lbs.  
16-20: 150 lbs.

### Video Storage

**Disc Type:** Coated Mylar  
**Recording Format:** One Image/Track  
16-10: 600 fields  
16-20: 1200 fields  
16-10/10: 500 fields  
**Disc Rotation:** 3600 RPM (3000 RPM 50Hz systems)  
**Track Step Rate:** Single up to 60/sec.  
**Slew Rate:** 3 frames real time, 180/sec.  
**Time Base Stability:** 50ns line/line, 3µs long term

### Controls and Displays

**Speed Control:** Varies record or playback from real time to 1 field every 3 seconds  
**Fast Q:** Fast sequential access to any of 12 disc sectors  
**Latch On/Off:** Latches FWD, REV or RECORD buttons  
**Time Lapse:** Real time record/play, or at rate selected by the speed control  
**Cue:** Automatically stops record/play at 000 counter display  
**Field/Frame:** Interlaced (frame) or single field play  
**Jog:** Forward or reverse single image playback  
**FWD/REV:** Moves to next track forward or reverse in play. Provides continuous playback when latched  
**Record:** Records one field/frame with each activation. Can be latched to provide continuous (loop) recording  
**Counter:** Displays image track number on disc

## FREEZE FRAME

### HR-1000

#### High Resolution Freeze Frame

- High resolution 1024 x 1024 x 8-bit memory
- Unlimited "freeze" duration
- Single/dual monitor operation
- Memory provides 2 or 4 separate images
- Digital test pattern
- Full remote control
- Simultaneous dual display
- Optional dual inputs
- 16MHz video bandwidth
- 525, 625, 1023, 1049 or 1225 line rates

#### System

The HR-1000 is a flexible and high performance digital memory system, optimized for medical procedures demanding artifact-free reference images. A video system bandwidth of 16MHz, together with a 40MHz digitizing clock rate, provides a 1024 x 1024 x 8-bit memory matrix, with a 256 level gray scale. The memory architecture is structured so that two different images may be stored and displayed selectively or simultaneously. The HR-1000B version, containing an optional second video input, enables two separate and unrelated images to be stored in memory. A full function remote control makes the HR-1000 simple to operate and easy to integrate with new and existing systems.

#### Snapshot, HLI, and Multistandard Operation

A number of selectable preset modes and functions are provided in the HR-1000, enabling it to be optimized for a variety of tasks. Television system line scan rates of 525, 625, 1023, 1049 or 1225 are DIP switch selectable.

The HR-1000 may also be set up for a number of different operational conditions. The "Snapshot" mode allows a specific field to be captured. Using a field accurate switch selectable delay sequence, the HR-1000 will count the desired number of fields from the strobe or trigger pulse, before capturing the snapshot image. The delay allows the generator to achieve full power and thus provide the best image for capture. The field-count sequence also ensures that the ideal field is always recorded, eliminating the need for operator judgement.

In the circumstance where the last in a series of observed images is required, a switch selectable mode provides a "Hold Last Image" manual record command. This mode provides a convenient and easy method of viewing an event progression, and capturing the last and ideal image for a particular procedure.

#### Still Image Record

As well as recording images from a standard VTR playback, the HR-1000 is also able to capture an image held in a "still" VTR display. This enables a "still" image to be transferred to the HR-1000, freeing the VTR for continued recording. Since HR-1000 images are held in a solid-state store, they may be displayed indefinitely, and the VTR is not forced into extended "still" operation.

#### Cine Fill

The HR-1000C is a convenient source of high resolution images in a "cine fill" application. The last image in memory is used as a "fill" image until the next new image is pulsed. In this manner, the unacceptable flicker, which is caused by pulsing the cine at less than television rate, is eliminated. The 1024 x 1024 high resolution HR-1000C output maintains excellent image quality, and subsequent devices in the television chain receive a standard rate signal. The HR-1000C automatically goes to "bypass" when the cine ceases.

#### Test Patterns

Accurate alignment of the video channel is critical in high performance display systems. To allow system calibration to be checked quickly and accurately, the HR-1000 provides digitally derived standard test pattern outputs. The pattern is selected to provide the most critical evaluation of monitor and hard copy outputs, and to help ensure that a "standard" condition can be established and maintained.

At initial power "on", the HR-1000 displays the "contrast" test pattern, allowing a rapid assessment of system alignment to be performed before use. Additional patterns may be cycled from the remote control, with pattern contents such that display alignment can be done without external test equipment.

# FREEZE FRAME

## HR-1000 (Cont'd)

### Progressive Scan

The vertical resolution of a television channel can be doubled by progressive (non-interlaced), rather than interlaced scanning. The progressive technique takes a full  $1/30^{\text{th}}$  of a second to scan the camera pickup tube. A digital scan converter changes the progressive scan to a standard interlaced format; RS-170/RS-343 (525, 1023, or 1049 line), so that VTRs, monitors and other subsequent devices in the television channel "see" a standard video signal.

Since the progressive scan converter immediately follows the television camera in the system, all images are limited by the resolution of the converter. The full 16MHz resolution provided by the HR-1000 optimizes the conversion process for 525, 1023 and 1049 systems.

Ruggedly Engineered

Accessible and Serviceable

## High Resolution Digital Frame Stores

- HR-1000** 16MHz high resolution cardio-freeze. Stores two high resolution TV images on 1024 x 1024 x 8-bit memory. Remote control standard. Single video input and dual video outputs plus multiformat camera output. Switchable TV line rates (525 or 1023/1049) . . . . . \$19,500.00
- HR-1000B** Dual video inputs and outputs (simultaneous AP and LAT views). 16MHz high resolution cardio-freeze. Stores two high resolution TV images in 1024 x 1024 x 8-bit digital memory. Remote control standard. Switchable TV line rates (525 or 1023/1049) . . . . . \$21,000.00
- HR-1000C** 16MHz high resolution cine-fill device. Eliminates flicker caused by operating camera system at less than 60 images/sec. Switchable TV line rates (525 or 1023/1049) . . . . . \$18,500.00
- HR-1000D** Combines the features of the HR-1000 and HR-1000C cine-fill. 16MHz high resolution cardio-freeze stores two high resolution images in 1024 x 1024 x 8-bit digital memory. Eliminates flicker caused by operating camera at fewer than 60 images/sec. Remote control and switchable line rates. (525 to 1023/1049) standard . . . . . \$26,000.00
- Expanded memory for HR-1000 and HR-1000B. Allows two extra high resolution images to be stored internally for a total of four. . \$5,000.00
  - Optional video switcher for HR-1000B. Automatically switches Live or Frozen images from a bi-plane system between two monitors. Saves the cost of buying two additional monitors for frozen images. (Cannot be used with expanded memory) . . . . . \$4,500.00
  - Progressive Scan option for HR-1000 (requires specific OEM interface) . . . . . \$5,000.00

## Specifications

### General

- Power:** 104-132/191-242VAC, 50/60Hz  
**Consumption:** 225W  
**Temperature:** 40°F to 104°F  
**Humidity:** 10 to 90% RH, non-condensing  
**Dimensions/Weight**  
**Chassis:** 5.25" H x 17" W x 20" D, 30 lbs.  
**Remote:** 2.95" H x 6.73" W x 4.76" D, 2.0 lbs.

### Video

- Input:** 1.0V p-p at 75 ohms, RS-170/343/CCIR compatible  
**Output:** 1.0V p-p at 75 ohms, RS-170/343/CCIR compatible  
**Bandwidth:** DC to 16.0MHz, -3dB  
**Memory:** 1024 x 1024 x 8-bit. Memory architecture permits access to two (2) 1024 x 512 fields. (Optional 1024 x 1024 memory available.)  
**Clock Rate:** 40.0Hz  
**S/N Ratio:** 51dB p-p video to RMS noise

### Controls

- Mainframe:** Power On/Off  
**Remote:** Memory Select, Live, Image 1 and 2, Record, Memory A or B (optional). Remote Controls for specific or custom applications are available. lease contact the factory for additional information. System pre-sets by internal DIP switches

### Connectors

- Video Input:** HR-1000 one (1) BNC; HR-1000B, two (2) BNC  
**Video Output:** Three (3) BNC; Video 1, Video 2, MFC  
**Remote Control:** 37-pin, D connector  
**External Interface:** 25-pin, D connector  
**Power:** 3-pin, AC connector

## DIGITAL IMAGE PROCESSOR

Fluoro 100

### Fluoro 100 Digital Image Processor For Surgical C-Arms

- Continuous digital window/level function
- 100 field or 50 frame Winchester disk storage
- Dual AP/LAT image outputs
- 4-stage selectable noise reduction
- Hold last image, digital snapshot and compare modes
- Hard copy (MFC) output of either image
- 2 images per second transfer to disk
- Keyboard for patient data on CRT, disk, hard copy
- Full function handheld remote control
- Built-in digital test patterns and histogram

#### Better Usage

Remote handheld control eliminates the need for operation outside a sterile environment. Allows surgeon to work with greater control and confidence.

TV screen display places vital information where the surgical team can see it. This information includes elapsed fluoro time, image number, noise reduction setting, and system status messages.

100-image storage on Winchester disk permits surgeon to routinely store all images for later selection to multi-format camera.

Radiation dose reduction is possible with hold last image and digital snapshot modes. Evaluation of frozen fluoroscopic images can be made without continuous exposure to the patient or operator.

Dual video output allows simultaneous AP and lateral views on two separate monitors.

#### Better Documentation

Keyboard option allows better documentation. Patient name, identification, date, and hospital are permanently annotated on the digital recording, displayed on the screen and transferred with image to Winchester disk. Information is entered once on standard typewriter layout, and becomes part of all images for each patient—convenient when case loads are heavy.

#### Better Imaging

Continuous window/level option allows user to adjust gray scale of digitized image to enhance a specific area of interest on screen similar to CT scanner controls. Improves hard-to-image lateral spine views.

Selective noise reduction improves image quality. Useful life of older, noisier image systems can be extended. Signal-to-noise improvements of 4 to 14dB are possible.

Subtraction (with log amp) option provides improved imaging techniques. A stored "mask" enables faster, more accurate placement of catheters, guide-wires, chymopapain needles, implants, and prosthetic devices.

#### Multi-Format Camera Printing

MFC video output from Fluoro 100 is dedicated for hard copy of either AP or lateral views without recabling.

Continuous window/level adjustment of gray scale enhances hard-to-image views for output, eliminating timely MF camera corrections. A reset button automatically brings the Fluoro 100 back to standard linear setting.

Built-in test patterns stored on the Fluoro 100 provide reliable, digital patterns for adjusting monitor and camera to linearity.

Keyboard option transfers patient name, identification, and date to hard copy output, providing foolproof documentation for patient records.

# DIGITAL IMAGE PROCESSOR

## Fluoro 100 (Cont'd)

### The Fluoro 100 Offers Better Installation And Maintenance Programs

The key to better images is superior installation and maintenance programs to accepted standards. The Fluoro 100 is especially helpful to technicians, engineers, and installers in meeting these standards.

The installation engineer can customize the system for each hospital by selecting internal DIP switch settings governing field or frame recording, power-up settings for noise reduction, record, and save modes, and use of the fluoro timer.

With one switch and a plastic overlay on the handheld remote panel to redefine button functions, the Fluoro 100 becomes a service, calibration, and system trouble-shooting center, allowing:

- Access to 5 built-in test patterns to align, calibrate, and trouble-shoot the system. For example, a regular alignment of a multi-format camera will use the patterns
- Access to a built-in histogram function, used as a means to evaluate system performance over time
- Reformat of the Winchester disk, excluding patterns, right in the hospital
- Systematic checking of the Winchester to ignore bad sectors, and using hidden spare tracks to maintain 100-image storage
- Positioning of the recording heads electronically to a safe track on the disk for shipping or traumatic movement within the hospital

The Fluoro 100 is interfaceable to all major C-Arm manufacturers.

### Specifications

#### General

**Power:** 105-120/210-240VAC, 50/60Hz  
**Consumption:** 300W  
**Temperature:** 40°F to 104°F  
**Humidity:** 10 to 90% RH, non-condensing  
**Dimensions/Weight**  
**Chassis:** 7.0" H x 17.0" W x 20.0" D, 50 lbs.  
**Remote:** 1.25" H x 3.5" W x 5.75" D, 2.5 lbs.  
**Keyboard:** 1.75" H x 13.75" W x 7.5" D, 2.5 lbs.

#### Video

**Input/Output:** 1.0V p-p, 75 ohms, RS-170/CCIR compatible  
**Bandwidth:** DC to 4.0MHz, -3dB  
**Memory:** 512 x 512 x 8-bit  
**Clock Rate:** 10.0MHz  
**S/N Ratio:** 54dB p-p video to RMS noise  
**Image Storage:** Solid-state 2 fields or frames  
 Winchester 100 fields or 50 frames

**Image Transfer Time:** 1 frame in 0.75 sec. from memory  
 2 fields/sec. Burst mode  
**Winchester:** 5.25"

#### Controls

**Chassis:** Power On/Off  
**Remote:** Hold Last Image (HLI); Digital Snapshot (DS), and compare (COMP) mode select. Monitor A/B, Noise Reduction, Timer, Disk REV/FWD, Keep (image), Window Up/Down, Level Up/Down, Reset, Invert, and Mask/Subtract  
**Keyboard:** Standard typewriter format for data input

**Service Controls:** A remote overlay and service port J6 provide access to 5 test patterns, including 50% APL (flat field), Crosshatch, Contrast/Resolution, Gray Scale, and Multiburst. Controls are provided for Recall Test Pattern, Record, Histogram, Format Winchester, and Park Heads

#### Connectors

**Video Input:** BNC (1)  
**Video Output:** BNC (3); Image A and B, Multi-format Camera  
**Keyboard:** D-25  
**Interface:** D-25  
**Test:** D-37  
**Remote:** D-37  
**Power:** 3-pin, AC connector

#### Fluoro 100

Image processor for mobile C-Arms. Full remote control includes Hold Last Image, Digital Snapshot, and Compare modes. Stores 2 fields or frames in dual 512 x 512 x 8-bit digital memories. System status and elapsed fluoro time is displayed on monitors. Dual outputs for AP/LAT viewing, plus special MF camera output. Winchester disk stores 100 TV fields (50 frames). Includes 4 stage noise reduction, continuous digital window/level, image invert, real time subtraction (with log). Keyboard for placing patient name, ID, date, and doctor's name on screen, disk, or hard copy film, includes 5 built-in test patterns and imaging histogram for TV and MF camera alignment. . . . . \$14,750.00

#### Fluoro 100E

Includes all features of Fluoro 100 Plus: Enhancement package which provides 1-button enhancing of hard-to-image body parts. Compare mode replaced by BURST mode, allowing rapid, successive images to be recorded/recalled on disk at 2 images/sec. . . . . \$17,850.00

# DIGITAL FRAME STORE

## Floro-Stor 1 Digital Frame Store

- 2 separate field images in digital memory, recalled by front panel controls
- Images are automatically enhanced with built-in noise reduction
- 512 x 512 x 8-bit digital memory, giving 256 level gray scale
- Complete with interface box for easy installation via footswitch to any R/F or Specials room
- Automatically holds last fluoro image on footswitch release
- For use in R/F and specials rooms, to speed up needle and catheter positioning, and to examine images without additional radiation

The Floro-Stor 1 is a valuable aid during many interventional and surgical procedures requiring accurate positioning, such as:

- Cervical myelograms
- Biopsies
- Chymopapain
- Pacemaker implants
- Catheter placement for digital studies (carotids, etc.)

With the aid of the Floro-Stor 1, live fluoro is used more sparingly. On footswitch release, the last fluoro image is held on the screen from the Floro-Stor 1 digital memory, allowing time for full examination without radiation. The screen will revert to live fluoro on footswitch control until footswitch release again freezes the last fluoro image on the screen.

The Floro-Stor 1 digital frame store is a high performance, flexible, and economical field or frame storage system, suitable for a wide range of applications. Fully solid-state, it allows delicate and critical procedures to be more accurately monitored without increasing fluoro exposure. Stored images may be displayed for an unlimited time, and hard copy film can be output if necessary.

Only 3 1/2" high, the Floro-Stor 1 is compact enough to fit any standard monitor cart.

## Specifications

### General

Power:	105-120/210-240VAC, 50/60Hz
Consumption:	70W
Temperature:	40°F to 104°F
Humidity:	10 to 90% RH, non-condensing
Dimensions:	3.5" H x 17.0" W x 19.0" D
Weight:	20 lbs.

### Video

Input:	1.0V p-p, 75 ohms, RS-170/CCIR compatible
Output:	1.0V p-p at 75 ohms, RS-170/CCIR compatible
Bandwidth:	DC to 4.0MHz, -3dB
Memory:	512 x 512 x 8-bit
Clock Rate:	10.3MHz
S/N Ratio:	54dB p-p video to RMS noise

## DSR-4 Series Digital Frame Stores

- Surgical C-Arm
- Pacemaker implants
- R/F applications

### DSR-4 FEATURES

Control Choices	DSR-4A	DSR-4C	DSR-4D	DSR-4E
<b>HLI-Hold Last Image</b> During live fluoro, the image is viewed directly. When the footswitch is released, the last image is displayed on the monitor. (This may be used in conjunction with the noise reduction).	■	■	■	■
<b>DS-Digital Snapshot</b> Depressing the footswitch initiates radiation through the imaging system. When the image is up to normal level, a "snapshot" is taken by the digital memory, and a signal sent to the generator to stop radiation. The footswitch must then be reactivated for additional radiation.  The benefit of "snapshot" mode is that minimum radiation is generated to get one good picture. The "Digital Snapshot," when used with noise reduction capability, creates a superior single image.	■	■		
<b>COMP-Comparator</b> In this mode, live fluoro images can be compared to a previously made recording. The record capability is blocked, allowing the older image in memory to be preserved for comparison with live fluoro.	■	■		
<b>Image Selection</b> <b>Image 1</b> A 512 x 256 vertical pixel resolution image, comparable to a TV "field," a 60th of a second scan	■	■	■	■
<b>Image 2</b> Can be recorded separately for an independent image. Orthopedic surgeons could use memory 1 for an AP view; image 2 for a lateral.	■	■	■	■
<b>Both Images</b> Can be combined for a full TV "frame" of 512 x 480 pixels (U.S. standard TV), or a 512 x 512 pixel frame for European standards. The 512 matrix is centered for 625 line systems. Line rates other than 525 or 625 cannot be accommodated by the DSR-4 series recorder.	■	■	■	■
<b>Feature Choices</b> <b>Noise Reduction</b> 3-6dB S/N improvement is achieved by averaging two images continuously during live fluoro. Upon release of the footswitch, four images are averaged, then displayed. This allows continuous motion viewing, with minimal "lag" due to averaging technique. When a specific image recording is desired, steady the imaging system, and release the footswitch.	■	■	■	■
<b>Subtraction</b> After a "mask" image is recorded via HLI or DS, the subtraction command inhibits record capability. Live fluoro images are then subtracted from the "mask" image.		■		■
<b>Gamma</b> The gray-scale balance is changed via gamma curves. Positive/negative image reversal is included. Typical curves are 0.3, 0.6, 1.0, and 1.3.	■	■	■	■
<b>Grey Scale</b> Each pixel is represented by 6 bits giving 64 different shades from black to white.  Each pixel is represented by 8 bits giving 256 different shades.	■		■	
<b>Dual Image Outputs</b> Simultaneous output of two frame memories can be recorded for a two-monitor system. Orthopedic surgeons often prefer simultaneous viewing of AP and lateral images, each on its own monitor.			■	■

# DIGITAL FRAME STORES

DSR-4 Series

### Specifications

**Power:** 70W  
**Voltage:** 115/230VAC, 50/60Hz  
**Matrix:** 512 x 512  
**Bandwidth:** 4MHz  
**S/N Ratio:** 4A/4D, 42dB; 4C/4E, 54dB  
**Sample Rate:** 10.3MHz  
**Linearity:** 1%  
**TV Standard:** RS-170/CCIR compatible  
**Dimensions:** 3.5" H x 17" W x 19" D  
**Weight:** 20 lbs.

**Remote Control:** 25D connector, low voltage 5-30VDC opto-isolator) allow remoting to the fluoro controls.

**Note:** All Eigen recorders are compatible with Multi-format cameras and video recorder feeds. Frame "grabbing," averaging, and subtraction can be done from a VTR feed.

### DSR-4A

Frame store, with HLI, DS, and COMPARE modes. Stores 1 TV frame or 2 TV fields in 512 x 512 x 6-bit digital memory. Noise reduction and 8 stage gamma adjustment. Powers up with digital test pattern . . . . . \$7,500.00

### DSR-4C

Same as above, but with 512 x 512 x 8-bit digital memory, subtraction and improved signal to noise ratio . . . . . \$10,500.00

### DSR-4D

Frame store, with HLI mode. Stores 2 TV frames or 4 TV fields in 512 x 512 x 6-bit digital memory. Noise reduction and 8 stage gamma adjustment. Dual video outputs for simultaneous two image views. Test pattern. . . . . \$10,500.00

### DSR-4E

Same as DSR-4D, but with 512 x 512 x 8-bit digital memory, subtraction and improved signal to noise ratio . . . . . \$12,000.00  
 Remote control for above units . . . . . 600.00

# VIDEO/GRAPHIC PROJECTION SYSTEMS

## High-Beam 250 Series/1000 Series

### Video and Data Projectors

All the models in the Hi-Beam range are quick to set up, easy to use and packed with professional features.

- Large, clear picture with excellent brightness to contrast ratio
- Dual focus lenses
- Top quality projection from all video sources, including cameras, video cassette recorders, TV tuners
- Accepts appropriate color standard for your material—NTSC 3.58 or automatic switching between PAL, SECAM or NTSC 4.43
- Projection of graphics and data from most computers
- Remote control facilities
- Floor or ceiling mounting
- Front or rear projection

The Hi-Beam line consists of five models. These comprise three versions of the Hi-Beam 250 Series with a typical brightness of 275 lumens and a variable screen size from 5'-10' horizontal and two Hi-Beam 1000 models which have an output of 560 lumens and a variable screen size from 5'-25' horizontal. All five models accept program sources from broadcast or cable TV; video tape, disc and cameras; as well as, computer generated information such as data and graphics. Completely flexible, Hi-Beam projectors accept composite video, RGB-Analog and RGB TTL (digital) inputs from up to six sources depending upon model and project bandwidths in ranges from 15-18kHz to 15-25kHz.

### Hi-Beam 250 Series

- **Projection Lenses**  
3 x f/1.0 color corrected high resolution lenses (1000 lines), dual focus adjustment for center and outer edges
- **Projection Tubes**  
3" x 7" Quick start, mesh cooled CRTs with chemically tempered face plates
- **Light Output**  
275 lumens typical high light brightness
- **Screen Size**  
Variable between 5'-10' horizontal. Optimum 8' horizontal flat or curved screen
- **Throw Distance**  
1.5 times screen width
- **Dimensions**  
9 1/4" H (235mm)  
22 1/2" W (575mm)  
32 1/2" L (820mm)

## Color Digital Imager IV™ Color Output System

- Produce professional quality 35mm color slides, instant slides and prints, overhead transparencies, and high quality video output
- System plugs in like a printer—easy to install, easy to learn, and most important, easy to use
- Allows for output enhancement of many popular compatible word processing, spreadsheet, graphics and CAD packages
- Plug in any of a wide variety of available high quality typefaces to produce typeset quality visuals, no costly artwork or type to buy
- No waiting for slides to be produced, last minute revisions are easy
- Your presentation remains confidential until you choose to release it
- Works with any personal, mini or mainframe computer, only RS-232C serial port needed. Device can be easily shared on a local network

## Specifications

### Description

Automatic digital film imaging device for quickly producing presentation quality, high resolution 35mm color slides, instant slides, prints and overhead transparency output from any computer. High resolution analog color RGB output provided to drive video monitors and projectors. Systems' powerful internal intelligence makes output creation simple. Easily connects to mainframe, mini, or personal computers via a standard RS-232C asynchronous serial output. Plug in, high resolution type faces available to dramatically enhance textual output.

### Internal Intelligence

Intelligent imaging device provides for image generation and enhancement of digital data from your computer. Internal microprocessor and built-in graphic primitive commands require a minimum amount of information from your application software to create images. Functions available include polygon fill, automatic text control including kerning and rotation, film compensation curves and automatic film advance.

### Output Resolution

Unit resolution is independent from host computer's video output. The addressable resolution of 832 by 630 combined with image resolvability of 56nsec, image enhancement techniques and digital type fonts, produce quality which rivals that of a high cost system claiming 2000 lines or more.

### Color

4096 selectable colors with 16 displayable simultaneously.

### Software Package Compatibility

The Color Digital Imager IV is compatible with a number of popular graphics, word processing, spreadsheet, database management, and CAD packages operating on mainframe, mini and personal computers. Some of the more popular programs include Microsoft Chart, DRI GEM Collection, AutoCAD Autodesk, Lotus 1-2-3, Micropro Wordstar and Graphic Software Systems Virtual Device Interface (VDI).

### Camera Compatibility

Two camera backs standard. Motor driven 35mm single lens reflex camera with frame counter and battery eliminator. Polaroid 3 1/4" x 4 1/4" flat pack film back. Also available optionally in a Kodak 35mm Instant Color Slide back. Precision multielement lens included with each back.

### Film Types Supported

Using supplied 35mm camera back

Kodak—Ektachrome 100 and 64

Fuji Photo—Fujichrome 100

3M Colorslide CRT 100

Polaroid—Polachrome CS40

Using supplied Polaroid Film Back

Polaroid Type 669 print film

Polaroid Type 691 transparency film

Using optional Kodak 35mm Instant Color Slide Back

Kodak Instagraphic Color Slide Film

Optionally, user defined film exposure tables can be developed and downloaded from host computer. Software routine to allow exposure table development is included.

# COLOR OUTPUT SYSTEM

### Exposure Rate

40-80 slides or prints per hour typical. Kodak Ektachrome 100 requires approximately 32 seconds per exposure.

### Video Output

0-1V analog video RGB, 17.2kHz horizontal, 51.8Hz vertical interfaced. 6' RGB video cable included (DB-9 to 4 BNC connectors).

### Controls

Simplified controls provide for ease of operation. These include on/off, expose, number of copies, film type and reset. Other controls set the film recorder's communication parameters as well as the communication instruction set desired—either Native Graphic Primitive mode or a Hewlett Packard HP-GL instruction subset. Specific commands can be communicated to the Color Digital Imager IV to allow networking.

### Communications

EIA RS-232C Asynchronous Serial Standard. Configured to communicate with standard Data Terminal Emulation (DTE) devices with supplied 6' cable. Baud rate is selectable from 110 to 19,200 baud.

### Accessories

External Font Extension Module with one plug-in high resolution digital font cartridge containing five sizes supplied standard. Many other cartridges available as options. Polaroid Instant Film System included with 35mm Autoprocessor, Slide Mounter-Cutter and a supply of slide mounts, Kodak Instant Film System available as an option. This system contains a Kodak Instant Color Slide Back, a pack of Kodak Instagraphic Color Slide Film with side mounts and a Kodak Instant Slide Cutter-Mounter.

### Size

Color Digital Imager IV	Font Extension Module
Height 12.8" (375mm)	4.75" (120mm)
Width 10.19" (259mm)	4.75" (120mm)
Length 18.8" (476mm)	6.62" (169mm)

### Weight

Net—Approximately 36 lbs. (16.4kg)

Shipping—Approximately 46 lbs. (20.9kg)

Includes Color Digital Imager IV, Font Extension Module and Accessories

### Power Requirements

Domestic Version: 105-130VAC/60Hz, 75W, 6' cable, 3 wire ground type, FCC subpart 15J Class A, U.L.

International Versions: 100 220-240VAC/45-63Hz, 75W, 6' cable, 3 wire ground type (where appropriate)

### Included Software

System Test Diskette (5 1/4" double-sided MS or PC DOS compatible format). Routines are included to test the proper set-up of the hardware and to alter or develop new film exposure parameters. Also included is a program which allows imaging of any low resolution screen generated by the IBM PC Color Graphics Adapter (CGA) or Enhanced Graphics Adapter (EGA) in GCA emulation mode directly onto the Color Digital Imager IV.

## EV-10 Eikivision — VHS Self-Contained Video System

- Big 9" color monitor
- Standard 1/2" VHS. The world's most popular video format with up to 8 hours of continuous play with T-160 tape (6 hours with T-120 tape)
- 7-day touch-button programming
- Rugged tape handling mechanism. With industrial quality direct drive motors and a minimum of belts to wear out
- Pause control for discussion and review
- Video search to locate important program sections, at five times normal tape speed, forward or reverse
- Full function remote control
- Headphone jack for private listening
- Front-load convenience. Inserts and ejects tapes quickly and easily

Tape Speed	Play/Record Time	
	T-120	T-160
SP		2 hours
33.35mm/sec.	2 hours	40 minutes
EP		8 hours
11.12mm/sec.	6 hours	8 hours

## Specifications

<b>Power Requirements:</b>	120V, 60Hz, 70W
<b>Television System:</b>	EIA standard 525 lines 60 fields NTSC color signal
<b>Playback/Record System:</b>	VHS (1/2" cassette format); Luminance: FM azimuth recording; Chrominance: converted subcarrier, direct recording
<b>Video Search:</b>	5 X EP-11.12mm/sec.
<b>Tape Counter:</b>	Mechanical 4 digits
<b>Video Input:</b>	.5 to 2.0V p-p, 75 ohms, RCA type jack
<b>Video Output #1:</b>	1.0V p-p, 75 ohms, RCA type jack
<b>Video Output #2:</b>	1.0V p-p, 1.0K ohms, RCA type jack
<b>CRT Display:</b>	9" color monitor (diagonal measure)
<b>Audio Amplifier:</b>	1.0W

<b>Weight:</b>	37 lbs.
<b>EV-10</b>	.....\$699.00

## SHOWMATE™ 4

### Portable Video Presentation Systems with VHS Format — Player Only

- Plays any pre-recorded VHS cassette
- 7" (diagonal) screen size
- NTSC color format
- Power Requirements: Main: 120VAC, 50/60Hz
- Batteries: Optional, two 12VDC
- External Battery: 12VDC
- Carrying handle converts to viewing easel
- Compatible with other video components
- AC/DC selector
- Built-in battery charger
- 1/4" headphone jack permits private listening
- AC power cord storage
- Digital LCD tape counter with memory feature
- Dynamic speaker is front mounted for best viewer sound
- 3 video heads: 2 for SP/LP/EP, 1 for special effects
- Detachable remote control
- Dimensions: 6.8" H x 19.5" W x 13.2" D
- Weight: 25 lbs.

## 1200 Series Videotape Cleaner/Profilers

- Proven cleaning technique reduces dropout up to 90%
- Automatic 3-level grading system
- Lower tape costs
- User established sensitivity and grading levels
- Built to last
- Printer for permanent record
- High efficiency head patterns dramatically improve profile coverage
- Easy to use

An effective tape management program means that all tapes should be cleaned and tested before taping. All tapes deteriorate with use and occasionally, even a new tape will be defective. Taping on bad tape can mean lost opportunity or lost dollars. 1200 Series Profiler will clean and profile your 1" tapes automatically at 25 times playing speed with remarkable accuracy. The 1224 offers full track coverage for the ultimate in profiler performance. The 1200 Series Cleaner/Profilers are the assurance for your quality assurance program.

Non-technical personnel can easily grade tapes by pushing A, B and C buttons to automatically display defects exceeding pre-established levels—separate levels for top edge tracks, bottom edge tracks and video.

Precision ground tungsten carbide blades hone the tape surface, removing dirt, loose oxide and embedded particles. Continuously advancing tissues clean both tape surfaces.

A Cleaner/Profiler will pay for itself in reduced tape costs. Studies show that the 1200 Series cleaning technique reduces temporary dropout up to 90%. Typically, 80% of tapes retired for excessive dropout can be returned to service after cleaning. And cleaner, smoother tapes mean significantly longer head life on your other equipment. So, the 1200 Series means more than the highest

quality assurance standards—it means getting the most value for your money on tapes and heads, too.

Sensitivity can be adjusted on a 100-point scale. Grading function features separate settings for top edge, bottom edge and video tracks. Numeric key pad also provides tape identification and date.

All 1200 series machines are precision engineered and built to exacting standards. The deck is constructed of 1/4" hardened aluminum plate. Circuitry reflects the latest state-of-the-art electronic technology. Three microprocessors ensure accurate, reliable operation.

Automatic operation and easy to read display system makes evaluation simple. After loading the tape, the machine will clean and profile the tape without supervision. A quick look at the display panel will reveal the quality level of the tape.

### Specifications

**Tape:** 1" (2.54cm) B and C format  
**Profile Capacity:** 204 minutes  
**Reel Capacity:** 14" (35.5cm)  
**Hubs:** NAB 1"  
**Transport:**  
Cleaning Speed: 290 ips (737cm/sec)  
Profile Speed: 192 ips (488cm/sec)  
Tension: Constant at 10 oz. (284g)  
Dual motor drive, automatic reverse, Dynamic/Servo braking  
**Integration Period:** 15 sec.

1224

The display also provides a detailed look in 15 second increments of the various track areas: top and bottom edges (audio/control) and video.

### Consumables:

Cleaning Edges—2 Tungsten Carbide Blades Life 3000 hours of tape  
Cleaning Tissues—2 Spools  
Life 160 hours of tape  
**Dimensions:**  
Height: 36" (91.4cm)  
Depth: 21" (53.3cm)  
Width: 20.5" (52.1cm)  
Machine Weight: 160 lbs. (70kg)  
Shipping Weight: 300 lbs. (135kg)  
Input Power: 100/120VAC 50/60Hz 220/240VAC 50/60Hz  
Power Consumption: 750W

## VIDEOTAPE CLEANER/PROFILER

### EA 750 Videotape Cleaner/Profiler

- Establish your own quality criteria
- Reduce temporary dropout up to 90%
- Optional printer
- Electronic evaluation technique

The EA 750 is a fully automatic, high speed tape cleaner and profiler, specifically designed and precision engineered for professional video cassette maintenance and evaluation. The EA 750 offers an LED linear display system that makes thorough tape evaluation quick and easy. Pushbutton accessing of three pre-established acceptance levels simplifies classification into common categories, i.e. "Master Stock", "Commercial", and "Dub" quality, making this system particularly suited to operation by non-technical personnel. In one pass, tapes are cleaned, evaluated and rewound in  $\frac{1}{10}$  the normal running time. Versatility and performance, combined with a simple operating format assures that the EA 750 will be a cost-efficient addition to any video cassette management program.

The savings resulting from the implementation of a tape management program utilizing an EA 750 can be substantial. Independent testing confirms that the EA 750's cleaning technique removes up to 90% of temporary dropout. Gone is the cost of re-shooting "wrecked" scenes or the loss of program material. Tape life can be extended up to an estimated 50% because of reduced particle abrasion.

Technical staff are not required to operate the EA 750. Operation is fully automatic.

After inserting either a standard or mini-cassette into the slot, the operator selects one of three operating modes: "Rewind Only" — "Rewind and Clean Only" — "Rewind, Clean and Profile". Switch interlock prevents accidental erasure of material. The machine draws a tape loop, rewinds and shuttles tape from head end to tail end—cleaning only. The tape reverses automatically. On the rewind pass, the tape is cleaned a second time, and if profile has been selected, the tape is degaussed and profiled electronically.

Electronic profiling will locate and identify damaged tape areas which register visually on the LED linear display panel. The panel is divided into three illuminated channels representing the "Top Edge", "Video" and "Bottom Edge" of the tape. These channels are calibrated in  $\frac{1}{2}$  minute segments from 0 to 64 minutes. (A 2X switch allows operation with longer cassettes). No light indicates that the number of defects is below the predetermined acceptability level.

After a tape has been profiled, the operator evaluates the tape by pressing the buttons labeled A, B and C.

### Specifications

<b>Input Power:</b>	95 to 135VAC, 50/60Hz 190 to 270VAC, 50/60Hz (switch selectable)
<b>Power Connector:</b>	3-wire with molded U-ground (North American) 3-wire I.E.C. color coded (European)
<b>Power Consumption:</b>	80W
<b>Front Panel Controls:</b>	On/off (with indicator) Stop (with indicator) Tissue (for replacement of tissue with "out of tissue" indication) Rewind (no loss of recorded signal) Clean (no loss of recorded signal) Profile (includes tape erasure, interlocked with Clean to prevent accidental erasure) Grade "A", "B" or "C" (determines the display on the front panel profiler)
<b>Front Panel Display:</b>	3 bar graph presentation of tape length and tape condition (profile mode only)
<b>Status Indications:</b>	Power on, out of tissue, stop, profile, rewind, clean, displayed grade (A, B or C)
<b>Depth of Erasure:</b>	Greater than 50dB (at 75 ips)
<b>Tape Handling:</b>	Constant speed Constant tension Dynamic braking Automatic reversal
<b>Additional Controls:</b>	Center sensitivity Edge sensitivity 3 sets of damage counters (for A, B and C tape grades) X2 display expansion switch
<b>Dimensions:</b>	Height: 9" (including rubber feet) Depth: 22 $\frac{1}{2}$ " Width: 21 $\frac{1}{4}$ "
<b>Processing Time (approx.):</b>	60 min. cassette—6 min., 20 sec. 30 min. cassette—3 min., 20 sec. 20 min. cassette—2 min., 20 sec. 10 min. cassette—1 min., 20 sec.
<b>Shipping Weight:</b>	100 lbs. (45kg) approx.
<b>Consumables:</b>	Lifetime Tissue spools, 15 hrs. of machine operation Blade rotation, 100 hrs. of machine operation New blades after 4 rotations
<b>Specifications</b>	Tissue (lint free, fibrous) 18 ft. per roll Blades (tungsten carbide, square edge) 2 per set

# DATA/GRAPHICS PROJECTION SYSTEMS

## ECP® 3000/ECP Graphics Data/Graphics Projection Systems

### Features Common to Both Models (Preliminary)

- f/1.0 lens capable of resolving 1024 x 1080 pixels • Electronics are capable of synchronizing over 1000 TV lines vertical • Electronic pin-cushion circuits separately correct top, bottom and sides for flat, curved, or rear screen applications • Aspect ratio 4:3 • Keystone circuitry to correct pictures for angles up to  $\pm 15^\circ$  vertically from screen axis • Input level 0.5V to 2.0V p-p,  $75 \pm 1\%$  terminated • Separate sync is automatically accepted in either polarity • DC restoration • Keyed clamp • Minimum video gain 40dB or 100X • Maximum video output 130V p-p drive

**Vertical Deflection**—Size: automatically regulated over frequency range and adjustable from 20% underscan to 10% overscan • Frequency Range: automatically locks from 45Hz to 120Hz

**Horizontal Deflection**—Size: automatically regulated over frequency range and adjustable to 10% overscan 10% underscan • Optional remote control receiver can be connected to projector for rear screen applications • Unit comes with 1 input module allowing 2 RGB sources to be connected. Second empty slot allows an additional input module to be installed in the projector • IR Remote Video/Data Switcher allows use of 6 additional input modules and master control of projector

- High Voltage 34.0kV regulated to  $> \pm 1\%$

### Accessories Included

- 25' signal cable, 10-pin keyed • RGB and sync splitter for BNC connections

## ECP 3000 High Brightness Data/Graphics Projection System

- **Maximum Brightness**—650 lumens peak light output, 370fL on a 6' diagonal 10 gain screen total light output

**Focused Data**—480 lumens, 280fL on a 6' diagonal 10 gain screen total light output • Functional 3 lens design allows simple adjustment for flat, curved or rear screens from 5' to 25' diagonal • Automatically switches to separate sync or sync on green • 60MHz bandwidth  $\pm 3dB$  • Linear non-differential amplifier accommodates 8 nsec pixels and digital clock rates over 130MHz

**Vertical Deflection**—Retrace Time:  $< 300ms$

**Horizontal Deflection**—Frequency Range: automatically locks from 15kHz to 50kHz • Retrace Time:  $3.6\mu s$  • Can be ceiling mounted on its optional ceiling mount or on a castered cart for portable applications • 105 lbs./41.3kg

ECP3000*	\$14,995.00
ECP3000 Cart	499.00
ECP3000 Ceiling Mount	355.00

## ECP Graphics 15-80kHz Data/Graphics Projection System

- **Maximum Brightness**—500 lumens peak light output • 290fL on a 6' diagonal 10 gain screen total light output • Single lens dichroic design converges colors accurately inside the projector, not at the screen • **VARI-FOCUS**—the ECP Graphics is not a fixed focus design. Three external controls allow simple, quick adjustment of center, corner, and top to bottom optical focus for screen sizes from 6' to 12' diagonal (5' to 14' using electronic sizing) • 80MHz bandwidth  $\pm 3dB$  • Linear non-differential video amplifier accommodates 6 nsec pixels and digital clock rates over 160MHz

**Vertical Deflection**—Retrace Time:  $< 300\mu s$

**Horizontal Deflection**—Frequency Range: automatically locks from 15kHz to 80kHz • Retrace Time:  $< 5.0\mu s$  15-34kHz,  $< 2.5ms$  34-80kHz • Can be ceiling mounted on its optional yoke or on a castered cart or desk stand for portable applications • 100 lbs./46kg

ECP 3000

ECP Graphics

### Additional Accessory Included

Projector mounting studs and knobs

ECP Graphics* 15-80	\$21,995.00
ECP Graphics Cart	550.00
ECP Graphics Ceiling Mount	200.00

### ECP3000/ECP Graphics Accessories

IR Remote Switcher**	\$1,495.00
RGB Loop 3/4/5 Wire Module	295.00
RGB/Sync (H & V) 10-Pin Module	295.00
RGB/Sync 2 Input Module	295.00
Enhanced PC Module	255.00
GP Analog Module	295.00
GP TTL Module	255.00
Monochrome 4 Input Module	255.00
Quad Std. Decoder Module	595.00
Case/Power Supply (For Ind. Module)***	125.00
Remote IR Sensor Kit w/25' Cable	150.00

\* Includes (1) RGB Sync (H & V)/10 pin module plus empty slot for additional module

\*\* Switcher includes remote control board, power supply 120/240VAC, and 100MHz output with space for six boards. Includes rackmounting adaptor brackets

\*\*\* Case/power supply module converts any interface module to freestanding unit. (Except Quad Std. Decoder which must be used with switcher)

# VIDEO GRAPHICS PROJECTION SYSTEM

ECP 2000

## ECP® 2000 Color Data/Graphics Projection System

- For computer or video tape projection
- Conveniently portable or ceiling mount
- Adaptable to most color and monochrome computers
- One cable plugs all computer and video tape signals
- Only three operating controls
- Adaptable to various screens
- Automatic positioning in relation to screen
- 1-button remote control automatic switching between computer and video tape images
- Removable modules simplify service
- Single lens dichroic design converges colors accurately inside the projector, not at the screen
- High gain front and rear screens may be used with no color shift due to viewing angle
- May be used with flat screens
- Electronic pincushion circuits correct separately for top, bottom, and side pincushion for flat screen display
- Throw distance of 87 1/2" (internally adjustable)
- Wide electronic size control allows 2 knob easy adjustment of picture size from 5' through 7' diagonal
- Keystone circuitry to correct picture for projection angles up to  $\pm 15^\circ$  vertically from screen axis. Easy 1 knob adjustment

The ECP 2000 color data/graphics and video projection system projects high resolution data and graphics or video from computer terminals, video cameras or video-cassette recorders. With its single lens design the colors are converged automatically within the unit rather than at the screen as with common three lens projection systems. As a result, set-up time is minimal and the image is in perfect convergence at all times. By mounting the unit on an optional wheeled cart, it becomes easily portable and can be moved from room to room for various presentations.

## Specifications

<b>Brightness:</b>	400 lumens/230fL 6' Diagonal 10 gain screen total light output
<b>Focused Data:</b>	300 lumens/175fL 6' Diagonal 10 gain screen total light output

# VIDEO/GRAPHICS PROJECTION SYSTEMS

## EDP-58XL

### Large Screen Monochrome Projection Monitor

- Precision f/1.0 lens is user focusable for 4' to 10' (1.2m to 3m) diagonal screens
- Precision optics and high speed electronics provide up to 1300 line resolution capability for sharp data/graphics display, exceeding 80 characters/line
- Scan reverse switch for rear screen projection
- Easy to use operator controls are on the rear panel; service controls are accessible through the control panel
- Video loopthrough
- Keystone adjustment
- DC restoration
- Data approved P53 green phosphor is standard. Optional phosphors available to match terminal manufacturer standards
- May be used on many different screen materials and sizes, including flat and rear projection screens
- Optional accessory 6', (1.8m) high gain, curved screen for viewing in higher ambient light areas
- Rugged and durable
- Washable reflecting surface
- Adjustable wall mounting hardware
- Accessory legs available for freestanding display applications
- Compact 24.75" x 14" x 8"
- Weighs only 45 lbs.
- Designed for ceiling, pedestal or desk stand mounting, the unit offers tremendous flexibility for display presentations
- Case and trim are made of aluminum and molded plastics
- Rear carrying handle
- Front trim protects the precision lens
- Compatible with composite video signals in NTSC, PAL, CCIR and SECAM systems
- Large monochrome pictures may be displayed directly from most VTR, Videodisc and television camera outputs

The EDP-58XL monochrome projection monitor is specifically designed for large screen, high resolution video displays of alphanumeric and graphic information from computer generated signals. It is uniquely designed to synchronize with almost all CRT-type computer terminals available today.\*

Extremely compact, the high brightness monochrome projector permits large group viewing in normal office lighting environments. Crisp, big picture impact replaces the need for several conventional sized monitors.

The EDP-58XL is ideal for demonstrations of new computer hardware and software developments. Classroom teaching of computer programming is made easy. It is equally dramatic for customer or trade show presentations.

This modular, solid-state unit is versatile, rugged and reliable, matching today's fast moving information needs. Set-up and operating ease, even by non-technical personnel, is inherent in the design of the EDP-58XL. It eliminates audience fragmentation and permits each viewer to enjoy maximum impact from data/graphics presentations.

Electronic circuitry in the EDP-58XL data/graphics projection monitor permits interfacing with almost all CRT computer terminals on the market today. The unit employs stabilized power supplies and picture-size circuitry that allows operation over a wide range of scanning frequencies without internal modifications.

EDP-58XL

For some terminals not supplying composite video outputs, an economical interface module may be used. The module simply supplies the necessary composite video (via coaxial cable) to input on the EDP-58XL.

The functional, easy-to-use control panel (shown) features convenient loopthrough BNC inputs to interface directly either with video terminals or the interface module.

Convenient user controls located on the rear control panel include Power Switch, Brightness and Contrast.

Other less frequently required set-up controls—Electrical Focus, Keystone Correction, Picture Size, Vertical, Horizontal Hold—are recessed to allow access for set-up adjustments. Easy rear panel optical focusing of the lens permits use with various screen sizes.

### PERFORMANCE DATA AND SPECIFICATIONS

#### Resolution

- Up to 1300 lines resolution

#### Brightness\*

##### Maximum

- 500 lumens/300 foot lamberts 6' diagonal  
10 gain screen. Total light output

##### Focused Data

- 235 lumens/135 foot lamberts 6' diagonal  
10 gain screen. Total light output

\*Measured on 20% raster

#### Display

- Green P53 phosphor standard, other phosphors available on special order
- Throw distance approx. 1.25x screen diagonal size
- Continuously focusable from 4.5' (1.4m) diagonal projected picture to 10 ft. (3m) diagonal
- Aspect ratio 3:4
- Keystone circuitry to correct picture for projection angles up to  $\pm 10^\circ$  vertically from screen axis

#### Operating and Service Controls

##### Front External

- Curved/flat screen lens focus adjustment

##### Rear External

- Single knob optical lens focusing
- Power on-off switch
- Brightness control
- Contrast control
- Video input 75  $\Omega$  termination switch
- AC power input
- Electrical focus

##### Rear Internal (accessible)

- Keystone correction
- Vertical size (height)
- Vertical hold
- Horizontal size (width)
- Horizontal hold
- Primary fuse (1.5A slow blow std.)
- Reversed Scan Switch for rear screen projection

##### Internal

- 120/220/240/AVC plug connection (120 VAC std.)
- Vertical Linearity adjust
- Dynamic Focus adjust (Horizontal)
- Dynamic Focus adjust (Vertical)
- Horizontal Video Centering adjust
- D.C. Restoration switch: 1. back porch clamp (STD) 2. sync tip clamp
- G2 bias supply adjust

#### Video Circuits

##### Input

- 2 BNC connectors (looped through)
- 75  $\Omega \pm 1\%$  terminated
- 25k ohm shunted by 12pf open
- Input level 0.5 to 2.0V p-p sync negative
- Differential (floating) input rejects 14 V p-p of power line hum voltage

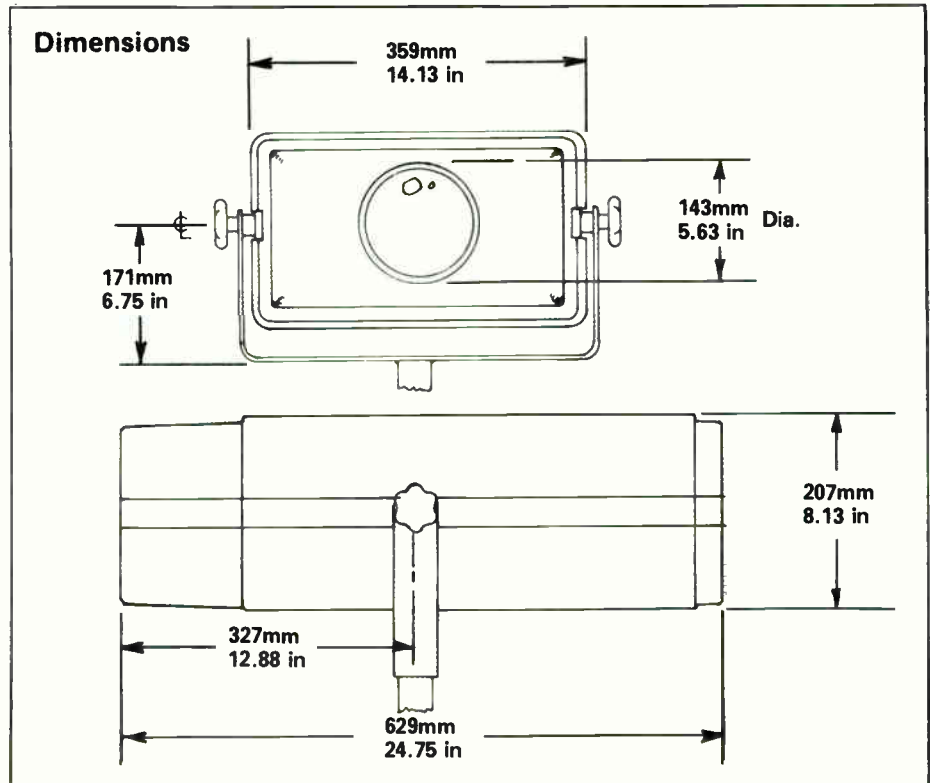

##### Frequency Response

- 20MHz bandwidth  $\pm 3$ dB

##### D.C. Restoration

- Back porch keyed clamp internally switchable to sync tip clamp

#### Dimensions

#### Gain

- Min. video gain 40 dB or 100X
- Max. video output 110V p-p drive

#### Deflection Circuits

##### Vertical Deflection

- Size: adjustable from 20% overscan to 10% underscan
- Frequency range: from 45 Hz to 90 Hz
- Retrace time less than 0.5 milliseconds

##### Horizontal Deflection

- Size: adjustable from 20% overscan to 10% underscan
- Frequency range: 15 kHz to 33 kHz
- Retrace time: less than 6 microseconds

#### High Voltage

- 32.0 KV regulated to better than  $\pm 1\%$

#### Power Requirements

- 120 VAC  $\pm 10\%$  can be internally re-connected for 220 VAC  $\pm 10\%$  or 240 VAC  $\pm 10\%$
- Line Frequency 50 or 60 Hz nominal
- Power 120 watts max.

#### Environment

##### Maximum Operating Range

- Temperature: 0° to 35°C
- Humidity: 0-90% non condensing
- Altitude: 0-10,000 ft. (3,000m)

##### Storage

- Temperature: -30° to 65°C
- Weight: 33 lbs.

This product is designed to meet or exceed safety standards and regulations of: FCC, DHHS, HWC and is CSA certified and U.L. Listed.

This product is covered by U.S.A. patent 439336. Canadian patent in 1984. Other patents pending.

# MONOCHROME VIDEO MONITORS

## MONOCHROME MONITORS

- Front operated A-B switching
- 18MHz bandwidth
- Scanguard\* circuit for size stability
- Primary and major secondary controls front accessible
- Internal/external sync capability
- Excellent black level stability
- Common mode rejection
- AC cord winder (9", 12", 15", 17")
- Switchable power supply for 110/220/240V operation
- Universal AC interlock
- Long life LED pilot light
- Wide variety of options
- P4 or P31 phosphor CRT (9" and 23")
- Antiglare panel (AG)

This full range of monochrome video monitors is designed to international performance standards. Cabinets are constructed of a Steltext textured steel for added durability. Attractive beige and earth brown tones have been utilized to further enhance the styling of each monitor design.

\*Scanguard is a special development for EVM 19/20 models to keep picture sizes constant over a wide range of brightness changes.

## Operation and Service

### Front Controls and Features:

On-off Switch  
LED Pilot Light  
Reduced Scan Switch  
VTR Switch  
Horizontal Hold  
Focus (screw driver adjust)  
Vertical Hold  
Height (screw driver adjust)  
Brightness  
Contrast  
A-B Switch  
Volume Control: (only with optional audio module).

### Rear Panel:

Input "A"-2 BNC Connectors, loop-through  
Input "B" or Ext. Sync  
2 BNC connectors, loop-through  
2 Termination Switches  
Ext.-Int. Sync Switch  
AC Connector  
Fuse Holder  
Width Control

### Internal Controls:

Preset Contrast  
Preset Brightness  
Black Level Control  
Vertical Linearity  
Horizontal Frequency centering Control  
Horizontal Phase (video centering)  
AC-DC Coupling Link (Factory set to DC position)  
Voltage Regulator Control  
Size Regulation Control  
Reduced Scan Width Coil

## Video Circuits

### Input Circuits:

Input via BNC connectors with isolated signal ground.  
Termination:  $75\Omega \pm 5\%$   
Return Loss:  $\geq 26\text{db}$   
Common Mode Rejection: better than 40db up to 6Vp-p.

### Video Amplifier:

Input Signal: 0.5-2Vp-p sync negative  
Gain: 35db  
Bandwidth: 9" & 12" CRT: 100Hz-18MHz  $\pm 3\text{db}$  at 30Vp-p at CRT cathode.

15" CRT: 100Hz-18MHz  $\pm 3\text{db}$  at 30V p-p.  
17" CRT: 100Hz-18MHz  $\pm 3\text{db}$  at 30V p-p.  
23" CRT: 100Hz-18MHz  $\pm 3\text{db}$  at 30V p-p.

## Deflection Circuits

### Vertical Deflection:

Adjustable from 130% to 65% of scan.  
Adjustment by size switching circuits and height control.  
Vertical Rate: Adjustable from 40Hz to 65Hz by vertical Hold control.  
Vertical Retrace: 650  $\mu\text{sec}$

### Horizontal Deflection:

Adjustable from 115% to 80% of scan  
Adjustment by size switching circuits and width controls  
**Horizontal scan rates:**  
Standard 15.75 KHz to 18KHz  
Option 18 KHz to 22.5 KHz  
Horizontal Retrace: 7.5  $\mu\text{sec}$

### Deflection Angles:

9" & 12" CRT's 90°  
15" & 23" CRT's 110°  
17" CRT 114°  
NOTE: For operation of the monitors at horizontal scan rates other than standard TV rates consult the Service Manual.

## Display

### Display:

All monitors have 4:3 aspect ratio.  
Front switchable from 105% to appr. 85% of full picture size.  
**Vertical linearity:**  $\leq 2\%$  of picture height  
**Horizontal linearity:**  $\leq 2\%$  of picture height

**Geometry:**  $\leq 2\%$  by EIA Ball chart.  
**Interlace:** 45/55 non tunable.  
Picture Size Stability:  $\leq 2\%$  change from 0 to 30ft/l peak brightness at 90% APL  
**Resolution:** (Anti-glare tube and P4 phosphor)  
15", 17" and 23" CRT's: 1000 TV

lines centre, 800TV lines corners at 30 ft/l (300 lux).  
Standard 9" CRT's 750 TV lines centre 600 TV lines corners at 30 ft/l (300 lux).  
Standard 12" and Optional 9" CRTs. 800 TV lines centre, 650 TV lines corners at 30ft/l (300 lux)

## Power Supply

### High Voltage:

9" & 12" CRT's 12KV at 0 $\mu\text{a}$   
15" CRT's 17.5KV at 0 $\mu\text{a}$   
17" CRT's 18KV at 0 $\mu\text{a}$   
23" CRT's 19.5KV at 0 $\mu\text{a}$

### Input Power:

9" & 12 CRT's 120V (220.240V), 50/60Hz 45 Watts  
15", 17" & 23" CRT's 120V (220/240V) 50/60Hz 60 Watts

### Asynchronous Operation:

All V19 and V20 monitors are designed for asynchronous operation e.g. there is no discernible movement of the display if the vertical and power line frequency differ.

## Environment

### Maximum Operating Range:

0° C to +50° C  
Humidity: 90% non-condensing  
Altitude: to 10,000 feet (3040 meters)

### Storage: -40° C to +65° C

Electrohome's policy is to meet or exceed safety standards and regulations of: CSA, HWC, FCC, DHHS, UL. Television standards: EIA, CCIR.

All performance specifications apply for line variations from 100 to 132V (200-260V)

# COLOR VIDEO MONITORS

1300 Series

1900 Series

## ECM 1310, 1311, 1312 High Resolution Color Video Monitors

- High resolution .31mm dot pitch
- Automatic adjusting horizontal scan rate 15.0 to 34.0kHz
- Capable of resolving 720 dot x 540 lines
- 30MHz bandwidth
- 8  $\mu$ sec horizontal retrace
- RGB/RS170 and IBMTTL inputs
- Line operated, automatic degaussing
- Enhanced color board signals such as the Conographics Cono Color 40 and other add-on PC boards

At the leading edge of monitor technology, these high resolution 13" RGB monitors accept both RGB/RS170 and IBMTTL inputs. They also incorporate an Automatic Horizontal Scan Adjustment that senses the frequency of input from 15.0 to 34.0kHz and locks onto it. This versatility makes these monitors the only logical choice for CAD/CAM and other graphics generated from a multitude of different computer signals.

Now there is a monitor to meet a wide array of display requirements: CAD/CAM, business graphics, process control, personal computer color graphics, graphic art.

- ECM 1310: 13" short persistence, anti-glare CRT . . . . . \$1198.00
- ECM 1311: 13" long persistence, anti-glare CRT . . . . . 1198.00
- ECM 1312: 13" long persistence, polished CRT . . . . . 1198.00
- IBM Cable . . . . . 38.00
- ECM TS Tilt and Swivel Base . . . . . 54.00
- Analog Cable . . . . . 43.00

## ECM 1910, 1911, 1912 High Resolution Color Video Monitors

- High resolution .31mm dot pitch
- Automatic adjusting horizontal scan rate 15.0 to 34.0kHz
- Resolution: 1024 x 512 (non-interlaced)  
 1024 x 800 (interlaced)
- 35MHz bandwidth
- TTL and Analog inputs through 9-pin DIN connector

The ECM 1900 Series comprises a family of three 19" high resolution Vari-Scan monitors, ideally suited for large images generated for CAD/CAM and other business graphics applications where a larger viewing image is desirable. All monitors feature automatic horizontal and vertical frequency adjustments and the ability to interface to a PC using a variety of add-on color cards and software.

- ECM 1910: 19" short persistence, tinted, anti-glare CRT . . . \$2795.00
- ECM 1911: 19" long persistence, tinted, anti-glare CRT . . . . 2895.00
- ECM 1912: 19" long persistence, clear, polished CRT . . . . . 2895.00
- IBM Cable . . . . . 38.00
- Analog Cable . . . . . 43.00

# PROJECTION SYSTEMS

## ESPRIT™ SERIES PROJECTION SYSTEMS

### Features Common To All Models

- Greater video bandwidth and smaller spot size for sharp pictures and high contrast ratio
- User friendly remote control to facilitate set-up and operation
- 16 digit alphanumeric display of operational status and diagnostics
- Modular plug-in single function circuit board design with independent regulation for ease of servicing and reliability
- Automatic horizontal and vertical sweep frequency sensing with autolock
- Autosensing or manual selection of NTSC 3.58, NTSC 4.43, PAL and SECAM video formats
- RS-170 capability to accept RGB with autosensing for plus or minus sync
- Drift-free convergence that is immune to typical temperature, voltage and frequency variations
- Adjustable blue video enhancement to improve both foreground and background color resolution when used with personal computers
- Front and rear projection capabilities on flat or curved screens
- High efficiency thermally isolated switch mode power supply for cooler operation and longer life
- Dual 120/240V switchable input with built-in surge protection
- Throw distance approximately 1.5 times the image width
- Precision parallax optical system allows an adjustable image from 4' to 12' in width (up to 25' in width with an optional lens)
- Automatic video gain control
- Sweep direction LED indicators
- May be mounted in any position: floor, table, ceiling
- Vertical and horizontal focus modulation for improved corner resolution
- Adjustable four-sided blanking for sharp edges and elimination of VCR head switching noise

### Esprit 300 Color Video/Computer Projection System

- Upgradable to Esprit 535
- Simple installation with independent nine zone registration
- Compatible with most low resolution computers
- High light output—400 lumens (peak white)
- Self diagnostic capability
- Liquid cooled phosphors
- Large 16 character LCD operational status and diagnostics display
- Wide band RGB video amplifiers (13MHz bandwidth)
- ± 15° keystone correction
- Error diagnostics of all major circuit functions
- Electronic Resolution: 768 lines per picture width (RGB); 330 lines per picture width (NTSC)
- Scanning Rates: Horizontal—14kHz to 17kHz; Vertical—40Hz to 100Hz
- High resolution coated f/1.01 lenses

**Esprit 300 . . . . . \$5,995.00**

Esprit

### Esprit 535 Color Video/Computer Projection System

#### Same features as Esprit 300 plus:

- Compatible with most low and medium resolution computers
- 9 pin "D" TTL RGB input connector with loothrough connector (CGA and EGA compatible)
- RS-232 (computer control system compatible)
- Horizontal frequency width tracking
- Remote adjustable horizontal phasing
- Automatic keystone tracking
- Wide band RGB video amplifiers (30MHz bandwidth)
- Electronic Resolution: 1024 lines per picture width
- Scanning Rates: Horizontal: 14kHz to 36kHz

**Esprit 535 . . . . . \$9,995.00**

### Esprit 700 Color Video/Computer Projection System

#### Same features as Esprit 535 plus:

- High light output—350 lumens max.
- 6 element hybrid super-high resolution coated f/1.01 lenses
- Upgradable to Esprit 1000
- Compatible with most low, medium, and high resolution computers
- RS-232 network capability
- Sweep direction LED indicators
- Wide band RGB amplifiers (100MHz bandwidth)
- ± to 7° keystone correction
- Electronic Resolution: 4096 lines per picture width RGB
- Scanning Rates: Horizontal—14kHz to 48kHz; Vertical: 40Hz to 150Hz

**Esprit 700 . . . . . \$14,995.00**

### Esprit 1000 Color Video/Computer Projection System

#### Same features as Esprit 700 except:

- Internal frequency tracking test pattern generator
- 8 element ultra high resolution glass lenses
- Scanning Rates: Horizontal—14kHz to 75kHz

**Esprit 1000 . . . . . \$24,995.00**

# VIDEO SWITCHERS

69019 Rackmount

69021 Tabletop

## 69019/69021 High Definition Video Switchers

- Modular design
- 19" rackmountable
- Stereo audio switching
- Front panel controls
- Wired remote control station
- Bright LED channel indicator
- High impedance loopthrough capability for paralleling switchers
- Up to 8 RGB, video, and stereo audio input channels
- Micro-processor controlled
- Computer terminal control via RS-232 input
- Gain and brightness level adjustment on each RGB input to match output levels between channels
- All remote connectors are 6-conductor telephone modular connectors
- Front panel controls include channel selects, volume control, mute audio, main power/illuminated switch and momentary contact switches

### Options

- Modular input assemblies for system expansion
- Remote control extension cables available in 25' increments up to 100'
- Wired remote control
- Infrared wireless remote control
- Decor cabinet
- System interconnect cables available in 25' increments up to 100'
- Computer interface box for IBM-PC and PC compatible computers

This system has been developed to meet the needs of those who require wide bandpass control, and distribution of video, computer (RGB), and audio signals.

The system is housed in a 5 1/4" high, 19" wide rackmountable enclosure. It also can be supplied in an optional attractive decor cabinet for desk/tabletop installation.

The switcher is expandable to accommodate up to 8 computer (RGB) inputs and/or 8 video inputs with stereo audio. A high impedance feed-through feature allows the capability of paralleling multiple switchers for a multi-output switching matrix. Individual gain and brightness controls match all output levels.

The system is micro-processor controlled, accessed by front panel controls or remotely via an optional wired remote control station or an infrared wireless transmitter.

The switcher may be controlled also by a computer keyboard via RS-232 interconnect.

Pushbutton operation offers automatic switching between input signal channels. The effect is smooth and professional switching with no delays or adjustments. A bright LED digit channel indicator prominently displays which input channel has been selected.

### Specifications

- Power Requirements:** 115VAC, 60Hz  
220VAC, 50Hz
- Consumption:** 28W max.
- Input**
- Number:** Up to 8 video, 8 RGB (sync) and 8 stereo audio sources
- Impedance:** 15K ohms unterminated  
75 ohms terminated
- Level:** Up to 2.0V p-p video  
Up to 5.0V p-p RGB  
Up to 7.0V p-p sync
- Output**
- Adjustable:** Up to 3.0V p-p into 75 ohms
- Number:** Two, separate and buffered
- Impedance:** 75 ohms
- DC Component:** < ± 0.1VDC
- Tilt:** < 0.1%
- Video**
- Frequency Response:** 60MHz RGB  
15MHz video
- Noise:** > 40dB below 1.0V p-p
- Crosstalk:** > 40dB below 1.0V p-p to 40MHz
- Dimensions:** Rackmount 5 1/4" H x 19" W x 9" D  
Decor cabinet 6 1/8" H x 17" W x 18 3/4" D
- Audio**
- Responses:** 20Hz-30kHz
- Input Impedance:** 10K ohms terminated  
10M ohms unterminated
- Output**
- Impedance:** 600 ohm
- Gain Control:** 0 to unity (600 ohm load) 60dB range in 1dB increments
- Internal Controls**
- RGB Channels:** Gain 0 to 1.5—brightness 0V to 5V pedestal adjustment when using four wire RGB inputs
- 69019 Rackmount, basic 2-channel . . . . . \$2495.00  
69021 Tabletop, basic 2-channel . . . . . 2695.00

TCC 2-18/T

Troubadour

## TROUPING SERIES

### Trouping Control Consoles

- Standard crossfader or split faders • Independent Master and Grand Master • Split dipless crossfader each with an electronic time fader
- Independent master with dedicated electronic time fader • 3 Way channel selector switches • Portable trouping cases or desk configuration
- Any console may master other controllers • Any controller compatible with any EDI dimmers, 2.4, 3.6, 4.8, 6, 7.2 or 12kW
- Crossfader selector switch and a black-out switch • Each channel circuit may be assigned to normal two-scene preset operation, to the time-adjustable Independent Master, or to a third position of completely Independent operation • Electronic circuitry including front panel controls is modularized • Plug-in circuit cards • Calibration is a single adjustment

### Troubadour +™ Control Console

- Up to 1000 dimmers controlled by 100 control channels • 100 memories • 10 full inhibiting submasters • X, Y crossfaders and independent master with timers • Full 2-scene manual mode • Special effects module • Disk drive • Color video monitor • USITT standard serial digital output, analog backup • Double-sided circuit cards, through hole plated, U.L. recognized G-10 fiberglass, rated FR-4 • Modular design easily adaptable • In case of power failure, patching and other internally stored information is protected by a 10 year lithium battery • Versatile lighting controls for portable or permanent use

Controls are grouped in modules. Each console must contain a Main Function module, a Patch, and at least one Channel module (12 channels per Channel module). Troubadour + may also be ordered with analog output. With Troubadour + 's digital/analog converter, any 0-10VDC or 2 to 7.6VDC analog dimmer can be used.

### Scrimmerette-II™ Dimmer Packs

- Analog or digital control input • 15-pin Jones plugs; output connector allows daisy-chaining of packs • Load test outlet • One-step phase change block • 1.2kW to 12kW dimmers standard • Wall-mounted or portable • Interchangeable output panels • 20 Amp distribution
- Packs using digital control may be daisy-chained for separate address of up to 255 dimmers • Heavy-duty, iron-core, copper-wound toroidal chokes assure minimum lamp filibration and no interference • Fully magnetic primary breakers, one per dimmer • Plug-in type circuit breakers, double-sided, through-hole plated, U.L. recognized with G-10 fiberglass, rated FR-4

# LIGHTING CONTROL

## SEC-600 Special Effects Controller

- Compatible with any EDI Dimmer 1.2 through 12kW • 6-channel controller with a 6-channel chaser and a 3-channel sound-to-light function
- Chase unit has over 20 internal functions plus audio-triggered chase
- Audio trigger is selectable between bass (20Hz-100Hz), midrange (450Hz-2000Hz), and treble (3000Hz to 20,000Hz).
- Bump buttons for momentary full on of a channel and skip switches allow the user to skip over channels while chasing
- Standard control output is an 8-pin Cinch Jones.

SEC-600/WEP ..... \$650.00  
SEC-600/RM ..... \$675.00  
SEC-600/C ..... \$835.00

WEP = Wood End Panels, RM = Rackmount, C = Trouping Case

SEC-600

## Dimmex™ Series Dimmers

- Pack or plug-in style • Six 1.2kW, twelve 1.2kW or six 2.4kW capacity dimmers • Heavy-duty, oversized, optically isolated Triacs or SCRs • Front accessible calibration • Heavy-duty, copper-wound toroidal chokes • Optional 6-channel non-dim control, integral, single-scene controls or remote control unit • Portable, wall mount, rackmount, or road rack • Wide range of control voltage calibration capabilities (0-10VDC is standard) — a low end of 0-5 and a high end of 5-14 • 8-pin Jones plug connects dimmer pack and controller. (DX 12-1 has two 8-pin Jones plugs.) Jones plug(s) not included on terminal model unless specified • Choice of output connectors

# LIGHTING CONTROL

## Vision Lighting Control Console

Vision is a powerful memory console that's compatible with virtually every electronic dimmer ever built. It offers 100 control channels by 192 dimmers with a proportional softpatch. The memory holds 200 cues and the optional disk drive records 5 shows of 200 cues each. The two timed faders allow you to create overlapping fades and effects with Vision. Both faders allow for immediate manual override of fades in progress. Vision interfaces directly with most manual consoles, allowing cues set on a manual board to be recorded directly into the memory.

Vision is easy to learn and hard to forget. Its unique HELP system explains the board's features right on the monitor. Simply press HELP, followed by the button you don't understand, and receive a clear, concise description of what it does and an example of how to use it. In addition to the HELP system, Vision makes programming easy through the use of "prompt messages," which are always displayed on the monitor, telling the operator, step by step, what to do next. All of these onboard instruction features are backed by a written manual, unmatched in its clarity. Vision's manual includes a "Lessons" section, which leads the new user through the entire system, while providing a quick reference to Vision's features for the experienced operator.

You can upgrade your system to a full-function memory board, or own a backup computer that's compatible with your existing dimmers. From high school to off Broadway and industrial applications, Vision works as hard for your productions as you do.

## Specifications

**Cue Capacity:** 200 cues per show  
100 control channels  
192 dimmers  
Proportional softpatch  
5 shows on the optional disk

**Display Functions:** One monochrome RS-170 CRT:  
Fader status, Cue sheet, Stage display, Blind display, Softpatch display, Setup display, HELP display, RGB color monitor option

Vision

**Playback Controls** Two pairs of timed faders:  
.1 second to 99.59 split fade times, Instant manual override of upfade and/or downfade, Change only cues, Crossfade cues, Manual fades, LED fade progress indicators, Optional read-back from manual board, Grand master, Blackout function

**Keyboard Functions** Cue Functions:  
Clear cue, Split fade times, Linked sequences

**Channel Functions:**  
Channel selection, and and through functions, Remainder dim function, At full level entry function

**Interface** Input Options:  
Up to 96 analog channels

**Analog Output:**  
96 or 192 analog dimmers, 512 analog dimmers (with dimmer interface unit)

**Digital Output:**  
LMI digital protocol, Colortran digital protocol, DMX-512 digital protocol, Avab digital protocol, Kliegl K-96™ digital protocol

**Serial Analog Output:**  
AMX-192 (CD-80™), RS-232C printer output, Remote focus unit interface, Remote Go switch interface

**Power Supplies** Input Requirements:  
110VAC-120VAC at 5A max. (240VAC optional), 60Hz (50Hz optional)

## Impression Lighting Control System

**Cue Capacity:** 200 cues per show  
5 shows per micro floppy disk  
150 control channels  
Proportional softpatch to 512 dimmers

**Display Functions:** One monochrome RS-170 video output  
One color RGB video output

**Display Modes:**  
Stage display, Blind display, HELP display, Track sheet display, Softpatch display, Setup display menu

**Playback Controls:** Autofader Pairs (2) on 100mm potentiometers:  
.1 second to 99 min. 59 sec. programmable fade times, Manual override of upfade and downfade times, Manual fades, Pile on fades, Cross fades, Split time fades

**24 submasters:**  
Fully overlapping channel assignments, Proportional channel levels, Bump switches, Recordable fade and wait times, 12 submasters may be programmed for "inhibitive" operation, Grand master, Blackout function, Real time clock for programming of up to 10 events for play-back on prescribed days of the week

**Keyboard Functions** Cue Functions:  
Cue button selection for cue #'s, 1-999.9, Clear cue function (in blind), Sequence function, Fade type, Fade times. Discrete upfade and downfade times (00:00-99:59) for each cue, Link button to link a sequence of cues in any order, Delay button to allow the operator to set the time between the start of a cue and the start of the cue to which it is linked (lead and lag cues)

**Fader Wheel: Interfaces** Channel Functions:  
Channel button to allow channels to be selected by keypad, Group button to allow channels to be manipulated as proportionally balanced groups, And and through buttons for selection of channels, cues or dimmers, At button for entering intensity levels, Full button for selecting intensity of 100%, Dimmer button for selection of dimmers in soft-patch, Release button for release of captured channels, Remainder dim button to set all unselected channels to a level of 00%

For proportional intensity control of channels or groups

**Input Option:**  
Up to 96 analog inputs for load from manual or standalone patch

**Analog Output:**  
Up to 512 analog dimmer outputs, 0VDC-24VDC (192 internally)

**AMX-192 Output:**  
AMX dimmer outputs

**Digital Output:**  
LMI RD dimmers (internally), Colortran D-192 dimmers (512 internally), DMX 512 dimmers (512 internally), Kliegl K-96 dimmers (requires DIU), Parallel printer interface, RS-232 serial port for programming purposes, Remote focus unit interface, Remote Go interface

## Expression Lighting Control System

Expression is designed for use in applications in medium-to-large studios and theaters, road shows and concerts. It offers the sophistication you need for all types of program situations.

### High performance. Not high priced.

Five shows can be stored and accessed at any time, giving you up to 1000 cues for the events you need. Expression gives you immediate access to 250 channels controlling 1000 dimmers with proportional soft patch.

Two cue playback faders with independent controls for split fade times. The faders can also be utilized for dynamic control of effects. The rate and intensity of faders are completely variable.

Exciting and intricate special effects such as random fire effects or 24 part fade can be generated using the effects and subroutine packages. Expression can be used with virtually any dimmer available.

Twenty-four overlapping, proportional submasters allow control over any or all channels. This is especially important for live performances. All 24 submasters are provided with unique bump switches. The bump switches can be used for simple on/off control or can be programmed as timed faders, thus turning each of the 24 submasters into timed faders.

### Display modes keep you on top of the action

Six display modes are available and displayed on the color monitor. Confirm the current status of your program using the stage display. Preview an upcoming cue in the blind display. Look at any channel throughout a show as well as active dimmers in the track sheet and soft patch display. The setup display menu lets you customize a show to your particular hardware configuration. HELP screen offers on-line documentation.

### Sophisticated. Yet simple

You need a board that offers many control possibilities. You don't need to waste time learning and programming your show. Expression offers clear, concise operator prompts in plain language. There are no special codes to learn. HELP features provide on-line instruction every step of the way.

## Specifications

### Cue Capacity:

200 cues per show  
2 shows per micro floppy disk  
250 control channels  
Proportional softpatch to 1000 dimmers

### Display Functions:

One monochrome RS-170 video output, One color RGB video output

### Display Modes:

Stage display, Blind display, HELP display, Track sheet display, Softpatch display, Setup display menu

### Playback Controls:

**Autofader pairs (2) on 100mm potentiometers:**  
.1 second to 99 min. 59 sec. programmable fade times, Manual override of upfade and downfade times, Manual fades, Pile on fades, Cross fades, Split time fades

### 24 submasters

Fully overlapping channel assignments, Proportional channel levels, Bump switches, Recordable fade and wait times, 12 submasters may be programmed for "inhibitive" operation, Grand master, Blackout function, Real time clock for programming of up to 10 events for playback on prescribed days of the week

Expression

### Keyboard Functions

### Cue Functions:

Cue button selection for cue #'s, 1-999.9, Clear cue function (in blind), Sequence function, Fade type, Fade times. Discrete upfade and downfade times (00:00-99:59) for each cue, Link button to link a sequence of cues in any order, Delay button to allow the operator to set the time between the start of a cue and the start of the cue to which it is linked (lead and lag cues)

### Channel Functions:

Channel button to allow channels to be selected by keypad, Group button to allow channels to be manipulated as proportionally balanced groups, And and through buttons for selection of channels, cues or dimmers, At button for entering intensity levels, Full button for selecting intensity of 100%, Dimmer button for selection of dimmers in softpatch, Release button for release of captured channels, Remainder dim button to set all unselected channels to a level of 00%

### Effects Package:

User created, Full variability of intensity and rate during playback

### Fader Wheel:

For proportional intensity control of channels or groups

### Input Option:

Up to 192 analog inputs for load from manual or standalone patch

### Analog Output:

Up to 1,000 analog dimmer outputs, 0-24VDC (192 internally)

### AMX-192 Output:

Up to 1,000 AMX dimmer outputs

### Digital Output:

1,000 LMI RD dimmers (1,000 internally), 1,000 Colortran D-192 dimmers (512 internally), 1,000 DMX 512 dimmers (512 internally), 1,000 Kliegl K-96 dimmers (requires DIU), Parallel printer interface, RS-232 serial port for programming purposes, Remote focus unit interface, Remote GO interface

# VIDEO PRESENTATION SYSTEM

## Astron VP-10 Portable Video Presentation System

- Built-in 3" speaker • Modular design for quick and simple servicing • 2 rechargeable batteries • 4-head video provides studio quality freeze-frame, variable slow motion and frame-by-frame advance • 90 minutes playback/record on batteries; up to 8 hours on AC • "Soft Touch" function switches • 4" EIA standard (525 lines) color monitor for exceptional picture clarity • Pop-up monitor tilts 15° for easy viewing • Standard VHS cassette format • Rugged, lightweight aluminum alloy housing • LCD multi-function display • 12-function remote control unit • 15.5 lbs. without batteries and 18 lbs. with batteries • 8" H x 9.4" W x 13" L • Monitor has separate controls for Power/Volume, Contrast, Tint, Color, Brightness, and Vertical Hold

The Astron VP-10 is an industrial quality video system. It is completely self-powered, and that means no more extra cables or fumbling on hands and knees for a wall outlet.

The VP-10's videocassette recorder features state-of-the-art technology, and utilizes a 4-head video system driven by 4 individual quartz servo-controlled direct-drive motors. This system provides precise and reliable tape movement, and delivers studio quality reproduction of over 240 horizontal lines resolution. With the 4-head video cylinder, you get noiseless playback even when using the special effects modes.

Although the Astron VP-10 is compact, it has all the features you would expect on bulkier models, such as slow motion, freeze frame, frame-by-frame advance, video editing and audio dubbing. The entire VP-10 system fits neatly into an attractive, durable, soft carrying case that is designed so that you do not have to remove the VP-10 to make a presentation.

### Specifications

**Power Source:** 12VDC  
**Power Consumption:** VHS Recorder/Player: 6W at playback, 4.7W at recording. Color Monitor: 14W  
**Color Monitor:** 4" diagonal; EIA standard; built-in 3" speaker; Power/Volume, Contrast, Tint, Color, Brightness and Vertical Hold controls. Video/Audio in and out jacks. NTSC color signal  
**Video Rec. System:** 4 video heads, helical scanning system. Luminance FM azimuth recording. Color signal converted subcarrier phase shift recording  
**Audio Track:** 1 track  
**Tape Format:** VHS Tape width 1/2" (12.7mm) high density tape  
**Tape Speed:** SP-1<sup>5</sup>/<sub>16</sub> ips; LP-2<sup>1</sup>/<sub>32</sub> ips; SLP-7<sup>1</sup>/<sub>16</sub> ips  
**Rec./Playback Time:** 120 min. with T 120 (SP mode)  
**FF/Rew. Time:** About 4 min. with T 120

# CCD CAMERAS

EM-101

### EM-101 CCD Color Video Camera

- CCD image sensor and superb optical system have been combined in a small camera head measuring 0.69" (17.5mm) in diameter and 2.26" (57.4mm) in length • Weighs 0.93 oz. (26.5g) • Camera head can be installed anywhere, out of the way or out of sight • Camera head and its control unit are separate and are connected by the 16.4' (5m) connection cord for easy handling • 200,000 picture elements CCD image sensor assures a sharp and crisp picture without after-image or streaking • Sensitivity up function for shooting low light condition (15 lux), Negative-Positive conversion function, Auto-white balance function are all included • 1/2" Interline-transfer CCD pick-up device • 398 (horizontal) x 493 (vertical) picture elements • 2:1 interlaced • NTSC compatible • More than 240 TV lines (horizontal) • More than 350 TV lines (vertical) • Video output 1.0V p-p 75 ohm unbalanced VBS • 200 lux with f/1.6 3000°K (recommended) 15 lux with f/1.6 3000°K (minimum) • Better than 46dB S/N ratio • f/1.6 7.5mm (camera with f/2.0 15mm lens is available as option)

8953 EM-101 ..... \$4990.00

EC-201

### EC-201 CCD Color Video Camera

- CCD image sensor is built into a compact camera head measuring 1.5" x 1.26" x 1.46" (38 x 32 x 37mm) • Weighs 3.5 oz. (100g) • Camera head and its control unit are separate and can be placed anywhere. Most of standard C-mount lenses can be used • 200,000 picture elements CCD image sensor assures a sharp and crisp picture without after-image or streaking • Sensitivity up function for shooting low light condition (15 lux), Negative-Positive conversion function, Auto-white balance function are all included • 1/2" Interline-transfer CCD pick-up device • 398 (horizontal) x 493 (vertical) picture elements • 2:1 interlaced • NTSC compatible • More than 240 TV lines (horizontal) • More than 350 TV lines (vertical) • 200 lux with f/1.6 3000°K (recommended) 15 lux with f/1.6 3000°K (minimum) • Better than 46dB S/N ratio

8954 EC-201 ..... \$2990.00

ES-301

### ES-301 CCD Color Video Camera

- Camera head can be separated from its power unit (max. 32.8', 10m) • Compact and lightweight camera head can then be placed freely anywhere. Most of standard C-mount lenses can be used • 200,000 picture elements CCD image sensor assures a sharp and crisp picture without after-image or streaking • Noise reduction circuit for better S/N ratio and Linear-matrix circuit for better reproduction are standard • 1/2" Interline-transfer CCD pick-up device • 398 (horizontal) x 493 (vertical) picture elements • 2:1 interlaced • NTSC compatible • More than 240 TV lines (horizontal) • More than 350 TV lines (vertical) • 100 lux with f/1.2 3000°K (recommended) 10 lux with f/1.2 3000°K (minimum) • Better than 46dB S/N ratio

8956 ES-301 ..... \$1990.00

8400

### 8400 CCD Black-And-White Industrial Video Camera

- Compact size and lightweight • Distortion-free image • Negligible after-image • No sticking • Extremely durable against vibration and shock • Unaffected by electric or magnetic field • Low power consumption • High sensitivity and resolution • Long life • Quick starting • Replaces existing standard TV cameras • Solid-state CCD (Charge Coupled Device) image pickup element

The 8400 is ideal for such applications as office or store monitoring, surveillance, hazard protection, process control, image analysis and medical and scientific inspection.

# FILM-TO-VIDEO CONVERTERS

TransVideo R8

TransVideo S8

TransVideo 16

## TransVideo Film-to-Video Converters

Convert 16mm, Super 8mm, Regular 8mm movie film or 35mm slides to video with a compact, totally self-contained "TransVideo" Film-to-Video Converter.

Choice of models in each of the most popular formats.

Each TransVideo Converter is a complete Tele-Cine Transfer System consisting of a renowned, foolproof film transport mechanism. A state-of-the-art CCD (Charge Coupled Device) video pick-up element is combined with a special flat-field lens to produce a grainless aerial image. Color control, iris control, video and audio output are built-in.

The TransVideo eliminates the need of separate video cameras, multiplexers or transfer screens; simply connect the TransVideo's video and audio output jacks to any video tape recorder and make your transfer. Or, you may connect the TransVideo directly to any projection video system or closed circuit video system.

The versatile TransVideo Converter solves almost every Film-to-Video requirement.

Available in the following formats:

- 16mm sound or silent at 24fps
- Super 8mm sound or silent 18fps film to be played back for video at 20fps
- Regular (standard) 8mm silent 18fps (and 16fps) film to be played back for video at 20fps
- 35mm, 2 x 2 mount slide film

## Specifications:

<b>Optics:</b>	Special flat-field lens built-in 16mm for Super 8mm, Regular 8mm film and 35mm slides; 25mm for 16mm film
	<b>Iris Adjustment:</b> Manual with fine adjustment
	<b>Focusing:</b> Manual with fine adjustment
	<b>Light Source:</b> 6V-10W halogen lamp (film) 12V-6W halogen lamp (slides)
	<b>Shading:</b> Less than 10%
<b>Video:</b>	<b>Pick-up Element:</b> 1/2" CCD built-in
	<b>Video Output:</b> 1.0V p-p 75 ohm
	<b>Resolution:</b> 240 TV lines
	<b>S/N Ratio:</b> More than 46dB
	<b>Color Compensation:</b> Red/Blue
	<b>Video System:</b> NTSC
<b>Sound:</b>	<b>Playback System:</b> Optical/Magnetic (16mm) Magnetic/Optical (Super 8mm) Silent only (Regular 8mm)
	<b>Audio Output:</b> 400mV, 600 ohm
	<b>Frequency Response:</b> Optical — 50Hz to 7kHz Magnetic — 50Hz to 12kHz (16mm) 50Hz to + 10kHz (Super 8mm)

# TELE-CINE EQUIPMENT

## Tele-Cine Projectors

### 16-CL TC 16mm

A professional 16mm Tele-Cine Projector with 24fps synchronous motor, 5-bladed shutter, and 2000' film capacity. A unique channel loading system makes threading and viewing safe and simple. A 15fps version is available as an option.

### GS-1200 TC Super 8

The ultimate Super 8 Tele-Cine Projector featuring a 24fps crystal controlled motor, 5-bladed shutter, 1200' reel capacity, magnetic/optical sound with magnetic stereo sound playback capability.

### ST-180 ETC(S) Super 8

Super 8 Sound Tele-Cine Projector for films taken at 18fps. Features a 20fps speed motor with fine speed adjustment, 3-bladed shutter, magnetic/optical amplifier, auto threading and 600' reel capacity. A 24fps version is available as an option.

### ST-180 ETC(R) Regular 8

Regular 8 Silent Tele-Cine Projector. Features 20fps projection speed with fine speed adjustment, auto threading and 600' reel capacity. A 15fps version is available as an option.

### Omnigraphic 300 ETC 35mm Slide

Heavy-duty Tele-Cine Slide Projector. Rugged diecast housing with professional 3-motor drive system, opal light diffuser, uses standard circular tray. Remote control and timer optionally available.

8246	16-CL TC, 16mm Tele-Cine Projector, M/O playback, 24fps sound speed, 5-bladed shutter with synchronous motor and f/1.4 20mm lens (to be used with ELMO Tele-Cine Screen Units). Lenses also available for other manufacturers' systems) . . . . .	\$2490.00
8246-15	16-CL TC, 16mm Tele-Cine Projector, 15fps silent speed with 4-bladed shutter . . . . .	2610.00
1271	f/1.4 20mm lens (to be used with ELMO Tele-Cine Screen Units) . . . . .	180.00
1288	f/1.2, 50mm lens . . . . .	180.00
1274	f/1.8, 75mm lens . . . . .	180.00
Adaptor-4	49.5-55mm adaptor ring for use with user supplied + 2 close-up (required by some non-ELMO transfer systems). . . . .	29.95
1196	1600' aluminum auto reel . . . . .	33.00
1352	2000' aluminum auto reel . . . . .	39.00
1284	ELC halogen lamp (24V/250W) . . . . .	25.94
1179	BRK exciter lamp for 16-CL (ETC) . . . . .	10.26
8900	GS-1200 TC, heavy-duty Super 8 Tele-Cine Sound Projector, crystal controlled, 5-bladed shutter, 1200' capacity, 24fps. Remote control available. With f/1.0, 12.5-30mm lens (to be used with ELMO Tele-Cine Screen Units. Lenses also available for other manufacturers' systems) . . . . .	\$1890.00
8347	ST-180 ETC, Super 8 Tele-Cine Sound Projector, with variable speed and 3-bladed shutter for use with 18fps Sound or Silent Super 8 film at 20fps. 600' reel capacity. Supplied with f/1.3 15-25mm lens for use with ELMO Tele-Cine Screen Units . . . . .	\$749.95
8348	ST-180 ETC, Regular 8 Tele-Cine Silent Projector with variable speed motor and 4-bladed shutter for use with Silent Regular 8 film at 15fps. 600' reel capacity. Supplied with f/1.3 15-25mm lens for use with ELMO Tele-Cine Screen Units . . . . .	\$749.95
8348-15	As above, modified for 15fps with 4-bladed shutter . . . . .	814.95
4125-TC	Omnigraphic 300 ETC, 35mm slide projector standard. Opal diffusion condenser, 85mm lens plus two close-up lenses and adaptor, 80 slide circular tray . . . . .	549.95
4126-TC	Omnigraphic 300AF ETC. As above with auto focus . . . . .	649.95
2280	ELMO zoom, f/1.3 15-25mm . . . . .	68.50
2560	Super Hi-Fi zoom lens, f/1.0 12.5-30mm. . . . .	250.00
2558-TC	Super Tele-Cine zoom lens, f/1.2 25-50mm. . . . .	250.00
2253	400' auto reel with case . . . . .	8.50
2191-1	600' auto reel . . . . .	14.50
2163-1	800' auto reel . . . . .	10.90
2155	1200' aluminum auto reel . . . . .	32.50
2356	ESC halogen lamp (24V/200W) for GS-1200 TC/ETC . . . . .	30.09
1169	BRS exciter lamp . . . . .	10.06
2255	EFP halogen lamp (12V/100W) for ST-180 ETC and SC-18 ETC. . . . .	31.47

## ETC Multi Video Transfer Station

Designed for use with various ELMO Tele-Cine Projectors, 16mm/8mm/35mm, either individually or in combination for titles or special effects. It features projector alignment slots to eliminate the need for time consuming optical alignment.

Each projector module is designed to accept a specific TC projector eliminating the need to adjust for height or optical axis, which enables you to be ready to transfer in seconds after installing the proper projector for your needs.

### System Requires:

8300-1	Tri-Port Screen Unit . . . . .	\$700.00
8300-2	Screen Unit Base . . . . .	65.50
<b>Plus one or more of the following stations, which fasten to the Screen Unit Base:</b>		
8300-3	Primary Base Unit—Used for 16-CL TC (16mm) with 20mm lens and required for any other Projector Base . . . . .	\$66.50
8300-5	Projector Base for ST-180 ETC (either Super 8mm or Regular 8mm) . . . . .	49.50
8300-6	Projector Base for Omnigraphic Slide Projector with 70-125mm Pro-Zoom . . . . .	54.50
8300-4	Projector Base for GS-1200 TC with 12.5-30mm Lens . . . . .	49.50
<b>Note:</b> Screen Unit Base accepts up to three auxiliary projector bases, two of which can be used simultaneously.		
8373	Tele-Cine Screen Unit (ETC) III with height-adjustable, free-standing pedestal base . . . . .	119.00

# ELECTRONIC COPYBOARD

## EB-101 Data-Saver Electronic Copyboard

- **Education:** The Data-Saver Copyboard ends the need for constant note taking and focuses the group's attention where it belongs
- **Sports:** The coach can demonstrate his plays live, then place them right into the hands of the players, making it easy for them to understand and memorize
- **Medical:** Formulas, and any medical information can now be easily preserved with the Data-Saver
- **Advertising:** Using the Data-Saver copyboard you can fine tune layouts and designs, make more dramatic client-presentations and get your selling message across
- **Engineering:** Diagrams of new designs can be shared with a small group or sent around the world
- **Corporate:** Chairman of the Board. No matter what type of business-needs you have, the Data-Saver can meet them. It can be used for making charts, graphs, or other corporate presentation material at any size meeting

This remarkable copyboard makes an exact copy of everything you put on it. Everything that is written or drawn on its 34 1/2" x 50" surface can be reduced, in seconds, to a sharp, crisp, black and white 8 1/2" x 11" duplicate, which can be copied in large quantities and distributed, or put on a telefax machine and sent anywhere in the world.

This rugged, attractive copyboard, because of its vertical design, is easy to move from room to room (or even from floor to floor), takes up much less space than horizontal boards...and, the copy fits a standard size page format. The writing surface is made of a durable white, erasable material, with faint grid lines, (which can be seen close-up, but are not visible to the audience) for making accurate and neat presentations.

The board uses standard dry-erase whiteboard markers, which come in a variety of colors and erase easily with a single stroke.

The Data-Saver is actually two boards in one. The "Turn" button rotates the board to a second writing surface, without smearing or erasing your original. This doubles the amount of writing surface, allowing you to continue your presentation on the new surface. At any-time during your presentation, you can just push the "Turn" button and the original screen can be called back.

### Specifications

Size:	80.7"H x 41.3"L 31.5" (leg width)
Weight:	121 lbs.
Power Required:	115VAC, 60Hz
Power Consumed:	Approx. 75W non-operating Approx. 180W operating

Ambient Temperature:	50° to 90°F (10° to 35°C) (for operation) 0° to 140°F (-20° to 60°C) (for storage)
Ambient Humidity:	30 to 95% Relative Humidity
<b>White Board</b>	
Size of Each Screen:	50.0"L x 34.6"W

## 70 Series Console Mount Clocks and Timers

ES 172 Six Digit—12 Hour Clock. Three setting controls: Fast Advance, Slow Advance, and Hold.

ES 172.....\$183.00

ES 174 Six Digit—24 Hour Clock. Otherwise identical to the ES 172.

ES 174.....\$183.00

ES 370 Four Digit, One Hundred Minute Up/Down Timer. Six controls: Count Up, Count Down, Stop, Minutes Advance, Seconds Advance, Reset.

ES 370.....\$233.00

ES 371 Up/Down Timer. Similar to the ES 370 except with Leverwheel Preset capability for faster setting of the desired time.

ES 371.....\$370.00

ES 570 Four Digit, Sixty or 100 Minute Timer. Select 60 or 100 minute mode on rear connector. Start, Stop and Reset controls. Runs continuously unless stopped. Reset will return all displays to zero. Unit will run if reset while running or will stay at zero if reset when stopped.

ES 570.....\$174.00

ES 572 Six Digit—12 Hour Clock or Timer. Five controls: Start, Stop, Reset, Fast Advance, Slow Advance. Will run continuously to 12:59:59. Advances to 1:00:00 and continues as clock unless stopped or advanced.

ES 572.....\$223.00

ES 574 A 24 hour version of ES 572.

ES 574.....\$223.00

ES 575 Exactly like ES 570, with the addition of a "freeze" button. When the button is released, the display "catches up" with the correct elapsed time. Dimensions: 2.16" H x 4.5" W x 4.13" D.

ES 575.....\$223.00

## ES 562E/564E Six Digit Clock/Timer with Memory

ES 562E/564E is a combination six digit clock and 24 hour timer with memory, allowing the user to set the clock to the correct time of day, switch to timer mode, then switch back to time of day by pushing one button; time of day will be correctly displayed, in hours, minutes and seconds. Six pushbutton controls are mounted on the top of the unit, near the front of the desktop case. When panel mounting is specified, they will be mounted on the front panel, below the display. The controls may also be remoted, through two rear-mounted five pin connectors (Option R or Option D). These controls are Reset, Timer, Fast/Start, Slow/Stop, Hold and Clock. Display: Six digits of .55" Planar Gas Discharge Display.

562E/564E.....\$362.00

## ES 112E/124E Digital Clock

ES 112E (12 hr.) and ES 124E (24 hr.) are solid-state, six digit clocks. Can drive 80 Series and 90 Series slaves. Displays are gas discharge, .55" high. Dimensions: 2 1/2" H x 8" W x 6" D.

ES 112E.....\$191.00

## 80 Series Jumbo Clocks and Timers

Large, bright 1" gas discharge displays provide effortless long distance viewing from 40 feet.

ES 182E Six Digit—12 Hour Clock. Three rear-mounted setting controls: Fast Advance, Slow Advance, and Hold.

ES 182E.....\$315.00

ES 184E Six Digit—24 Hour Clock. Otherwise identical to the ES 182E.

ES 184E.....\$315.00

ES 380AE Four Digit, 100 Minute Up/Down Timer Displays minutes and seconds, with rear-mounted connector to allow remote wiring of six momentary SPST Controls: Count Up, Count Down, Stop, Minutes Advance, Seconds Advance and Reset. Other features similar to ES 301E.

ES 380AE.....\$349.00

ES 381AE Up/Down Timer. Similar to ES 380E, except that leverwheel preset is used.

ES 381AE.....\$482.00
