TASK-MASTER INDUSTRIAL SERIES

Designed for today's market, these Task-Master units have been quality engineered to sell at prices competitive with painted units. Finished in lifetime porcelain enamel, Task-Master is available for use with new Power-Groove, SHO or VHO lamps. As an added feature, the new easy-up hanger can cut installation time to minutes.

Description	Cat. No.	Each

CORRALUME®, CORRALINE® AND CORRALOUVER® SURFACE MOUNTED CORRIDOR UNITS

Smart and modern one-lamp fixtures for single unit or continuous installations. Designed for lighting corridors, book shelves and similar long narrow traffic areas.

Corralume and Corraline have hinged plastic enclosures reinforced at top edges and ends by die-formed steel rails and end plates. Corralouver has hinged all-metal louvered enclosure. Louver assembly and reflectors are completely inter-locked for strength and stability.

Supported by separable hinges and can be completely removed and hinged from either side. All metal parts rust-inhibited and finished in Hot-Bonded Super-White enamel.

Equipped with HPF certified CBM Rapid-Start ballasts. Individually wired for single unit or continuous installations.

VAPORLUME INDUSTRIAL FIXTURES

Ideal for use in dairies, meat packing plants, laundries, bottling plants, paper mills, bakeries, textile mills, canneries, parking garages and many other areas where cleanliness, sanitation or enclosed lamps are important. Available on special order with "low temperature" ballasts for operation to 0° F.

The one-piece seamless polyester housing is non-corrosive and designed with minimum surfaces to collect dust and dirt. A neoprene gasket between body and enclosure assures a positive seal to keep out foreign matter and allows fixture to be washed down. Shock hazard is eliminated during washing since entire chassis and enclosure is isolated and material is electrically non-conductive.

DAY-BRITE MERCURY FIXTURES

INDUSTRA INDUSTRIAL FIXTURES

A complete product line of 175, 250, 400 and 1000 watt units designed with a new look, by new principles, for new values in industrial lighting. All the extruded aluminum power packs are completely prewired, fused and contain constant wattage (lamp wattage $\pm 4.5\%$ over an input voltage range of $\pm 10\%$) ballasts.

Designed to operate continuously at 40° C (104° F) ambients. High temperature power packs for ambients up to 55° C (131° F) are available. Specular Alzak reflector furnished for 1000-W, diffuse Alzak and porcelain enamel reflectors available for all other voltages. Sturdy louver rings, for maximum comfort and wire guards are available. U.L. listed.

DAY-BRITE "HYDEE" FIXTURE HANGER

Hanger can be used with all chain suspension mounted industrial fixtures. Furnished complete with 15-A, 125-V. receptacle for 2-wire grounding plug, two 5' chains, "S" hooks and cord clamps. Two screws hold hanger to the ears of a standard outlet box or plaster ring. Fits both 3 1/4" and 4" outlet boxes.

No. 5988 "Hydee" Hanger.....each \$1.58

UNI-FRAME® SQUARE RECESSED FIXTURES

Incandescent lens unit for recessing into ceiling, providing medium spread distribution for commercial and residential use.

Box is one piece 20 ga. deep drawn steel. Side mounted outlet box. Pyrex lens is retained by four stainless steel clips in a concealed inner frame which is detachably hinged. Frame is held closed by a spring clip. Reflector is one-piece deep drawn Alzak aluminum which provides mounting for porcelain medium base socket. Type AF wire is attached to socket and terminated in outlet box. Socket for 25 watt nite-light is optional. Box finished in hot-bonded baked aluminum gray enamel. Frame is baked flat white. Anodized aluminum frames in brass or natural aluminum.

GRAYBAR distributes the quality products of hundreds of famous manufacturers. Our association with some of these manufacturers has been in effect ten, twenty, fifty and, in several instances, over ninety years.

DAZOR FLOATING-ARM FLUORESCENT LAMPS

Dazor Floating Fixtures may be raised, lowered, pushed, pulled, turned, tilted to the desired position by a mere touch. Wherever moved, they stay put — held firmly by the Dazor Floating Arm.

Listed by Underwriters' Laboratories, Inc.

For Operation on 118V-60C.

Model numbers with prefix "P" indicate units with high power factor.

UNIVERSAL MODELS

The Universal base may be clamped or screwed to any flat surface — horizontal, vertical or inclined. Dual-clamp fittings are removable; screws furnished.

DAZOR POLAROID* FILTER

Fits 2-tube, 15-W Floating Lamps; consists of light-control film, endpieces and screws. Standard packing, 1; shipping weight, 1 lb.

Model No. F-570.....each \$7.80

* ©Polaroid Corp.

DAZOR FLOATING-ARM COMBINATION LAMPS

Air-Cooled

REFLECTOR

For Operation on 118V-60C, using a T9 22-W Circline tube and any A-19 size bulb.

With fluorescent and incandescent lighting combined, true color values are retained, and the good, seeing qualities of both light sources are kept in balance. If either is desired alone, it may be switched on independently. The Air-Cooled reflector is equipped with a porcelain socket.

UNIVERSAL MODELS

The Universal base for machine, bench or desk may be clamped or screwed to any flat surface—horizontal, vertical or inclined. Dual-clamps are removable; screws furnished.

Model No.	Arm Extension	Standard Packing	Shipping Wt., Lbs.	Each
2C-2124	24"	1	10	\$29.00
2C-2134	34"	1	10	29.00

DESK MODEL

The Desk base is weighted, does not require fastening down. It may be placed on a flat-top desk, table or other horizontal surface. Felt on underside.

M-1400	1	½	\$6.60

DAZOR MAGNIFIER WITHOUT LIGHTING

A low-cost sight booster for close inspection and periodic checking. Lens has same qualities as Circline model above. Finish: gray.

Model No.	Arm Extension	Standard Packing	Shipping Wt., Lbs.	Each
M-1106	31"	1	6	\$21.40
M-1107	20"	1	6	21.40

TOP-MOUNTED REFLECTOR WITH FLEXIBLE ARM

This Air-Cooled model may be clamped, screwed or bolted to any horizontal or vertical surface. Clamp fittings are removable. Uses 60-W bulb. Finish: gray.

Model No.	Flexible Arm	Std. Packing	Shipping Wt., Lbs.	Each
1075	18"	1	5	\$12.40

Prices do not include bulbs or tubes.

DAZOR DESK AND TABLE LAMPS

FLUORESCENT

PIVOTING-REFLECTOR DESK MODELS

Twin arms thrust the light over the working area. Swivels permit the shade to be tilted up or down. The small steel base allows more workable space. Heavy felt on underside. Finish: frost-green; others on special order.

Model No.	15-W Tubes	Standard Packing	Shipping Wt., Lbs.	Each
2002	2	1	9 1/2	\$19.80
2001	1	1	9 1/2	17.40

Listed by Underwriters' Laboratories, Inc.

FLEXIBLE-ARM DESK MODELS

Twin flexible arms easily locate the reflector in the zone of normal usage, 8 to 14" above work area. Heavy felt on underside of base. Finish: statuary-bronze; others on special order.

Model No.	15-W Tubes	Standard Packing	Shipping Wt., Lbs.	Each
1000	2	1	10	\$19.80
1001	1	1	10	17.40

SHELF- or WALL-MOUNTED FLUORESCENT

May be mounted on any vertical or inclined surface or to underside of a shelf. It is an ideal student lamp where a small study desk is used, such as in dormitories. Finish: statuary-bronze; others on special order.

Model No.	15-W Tubes	Standard Packing	Shipping Wt., Lbs.	Each
7000	2	1	9	\$19.80

Fluorescents operate on 118V-60C.

INCANDESCENT

← Air-Cooled Wide Reflector Model 2068

Air-Cooled → Bullet Reflector Model 3068

AIR-COOLED SOLID BRASS ARM MODELS

These lamps have long, graceful, solid-brass arms that have swivel at base. The wide reflector spreads the light, the bullet concentrates it. Finish: frost-green; others on special order.

Model No.	A-19 Bulb	Standard Packing	Shipping Wt., Lbs.	Each
2068	100-W	1	14	\$17.40
3068	100-W	1	11	17.40

AIR-COOLED FLEXIBLE-ARM MODELS

Model 2069, illustrated →
Model 3069, Bullet Reflector

Here's a choice of models to fit the individual or job requirements. Select the reflector which gives you the spread of light you desire. The flexible arm allows adjustment. Finish: frost-green; others on special order.

Model No.	A-19 Bulb	Standard Packing	Shipping Wt., Lbs.	Each
2069	100-W	1	14	\$15.40
3069	100-W	1	12	15.40

AIR-COOLED MODELS FOR MACHINE OR BENCH

Model 1075, illustrated →
Model 3075, Bullet Reflector

These ventilated reflectors and the 18" flexible arms bring personalized light to the low-priced market. Model 3075 has a porcelain socket. Both may be clamped or screwed to horizontal or vertical surface. Finish: gray.

Model No.	Bulb Size	Standard Packing	Shipping Wt., Lbs.	Each
1075	60-W	1	5	\$12.40
3075	100-W	1	7	14.40

Prices do not include tubes or bulbs.

DAZOR FIBER GLASS INCANDESCENT LAMPS

Broad, direct lighting, softened by a fiber glass diffuser, distinguishes these matching lamps with a choice of solid-brass or color-matching arm.

- A. The perforations in the top permit air to carry bulb heat away for cooler lighting, safe handling.
- B. The fiber glass diffuser provides softened illumination. The bottom opening admits air for natural ventilation and aims a beam of light onto the working area.
- C. Swing-Arm models revolve 360°. Nylon slides permit vertical adjustment

Listed by Underwriters' Laboratories, Inc.

SWING-ARM PEDESTAL MODELS

The arm on this Dazor swings freely and completely around. It slides up or down on the 45" pedestal to give the brightness desired. A wear-resistant nylon slide holds the arm firmly in place.

Model No.	Arm Length	Standard Packing	Shipping Wt., Lbs.	Each
With Solid-Brass Arm				
2005	13"	1	17½	\$33.80
With Color-Matching Arm				
2010	13"	1	17½	29.80

CLASSIC TABLE AND DESK MODEL

This symmetrical design is decorative in any setting. Lamp has solid-brass cone housing, and the center post has solid-brass rings at top and bottom.

Model No.	Height	Standard Packing	Shipping Wt., Lbs.	Each
2055	13"	1	6	\$15.40

SWING-ARM DESK AND TABLE MODELS

Like the floor model, the Swing Arm turns completely around, slides up or down on a 12" post. Nylon slides hold the arm firmly in place.

Model No.	Arm Length	Standard Packing	Shipping Wt., Lbs.	Each
With Solid-Brass Arm				
2004	13"	1	14	\$27.80
With Color-Matching Arm				
2008	13"	1	14	23.80

GRACEFUL DESK AND TABLE MODELS

This charming, decorative lamp, 14" high, adds brightness to any room.

Model No.	Height	Standard Packing	Shipping Wt., Lbs.	Each
With Solid-Brass Arm				
2003	14"	1	6	\$21.40
With Color-Matching Arm				
2006	14"	1	6	17.40

SWIVEL-ARM DESK AND TABLE MODEL

This executive-type Dazor locates the light wherever desired. Its solid-brass arm extends from the solid-brass cone housing to the swivel knob.

Model No.	Arm Length	Standard Packing	Shipping Wt., Lbs.	Each
2056	13"	1	11½	\$22.60

Standard Finish: Frost-green baked enamel over bonderizing, combined with brass. Optional: frost-tan, statuary-bronze, Pacific coral, colonial white, gray or ebony.

Prices do not include bulbs.

GOTHAM RECESSED AND SURFACE COMMERCIAL INCANDESCENT LIGHTING

Auxiliary Junction Box on Mounting Frame Available at Added Cost. To Specify, Add Prefix JB to Catalog No.

RECESSED MICRO-GROOVE DOWNLITES

General service or silvered bowl lamp, Alzak reflector, square aperture baffle.

Optically precise instrument designed to produce wide-angle distribution with sharp visual cut-off at 45°. Perfectly spaced micro-grooves trap spill light which usually produces glare.

9800		8060

579-300	Surf.	Side Prong 300W PAR-56	4 1/2 x	10 3/8	52.25
580R	Surf.	Side Prong 150W PAR-38 or R-40	4 1/2 x	11	29.26

*In certain localities codes require accessibility to these units from above the ceiling.

CYLINDERLITE SERIES

Two basic types: precisely contoured black specular Alzak reflector which redirects all spill light into useful zones, or 3M velvet black finish to eliminate surface glare and reduce brightness at aperture. Exterior finish is satin white baked enamel.

Cat. No.	Flood Lamp	Reflector Interior	Each
P958B	150W PAR-38	Alzak	\$37.49
P9581	150/300W R-40	3M	26.56
W958B	150W PAR-38	Alzak	37.49
W9581	150/300W R-40	3M	26.56
S958B	150W PAR-38	Alzak	28.62
S9581	150/300W R-40	3M	18.09

Letter "P" preceding catalog number indicates Pendant mounted, letter "W" for Wall mounted and letter "S" for Surface mounted.

GUTH LIGHTING FIXTURES

PRISMAROUND®

Prismaround has self-cooling action—engineered to overcome excessive operating temperatures. The polystyrene “basket” design is a rugged 3/8" thick shield. Baskets can be hinged from either side. All 40W units are U.L. listed for Low Density Ceilings with thermal reset ballasts.

All units feature Acrylic White finish, baked-on. Wired for 120-volt, 60 cycle A.C. operation. High-power-factor series type, CBM/ETL listed, internally-fused 40W Rapid Start and 75W Slimline ballasts.

Cat. No.	Lamp Wattage	Nominal Size, In.			Each

WYTELINER INDUSTRIALS

Units are available with either 10% or 25% uplight for industrial applications. Cross ribbed reflectors provide extra strength. Select from 3 different reflector finishes, 310°F baked-on Thermosetting-Acrylic white enamel, White Porcelain enamel or Alzak aluminum. Self retaining reflector latches simplify removal of reflectors for cleaning and maintenance. Handsome drop end plate. One-piece 4' and 8' channels fabricated of heavy gauge steel for extra strength. Some models available with Kolorkoded light windows to direct and protect employees — write for complete information.

HOLOPHANE RECESSED FLUORESCENT LUMINAIRES

HOLOFLUX® RECESSED 6400 SERIES

(Underwriters Approved)

No. 6400 Series—Prism Border Type

The Holophane No. 6400 Series provides recessed HOLOFLUX® units with two lens patterns and is available in two installation constructions. Both types are designed for 2, 3 or 4-F40T12/RS fluorescent lamps.

The two basic CONTROLENS® types are:

1. Prism border (Nos. 6400, 6410.)
2. Flat (Nos. 6440, 6450.)

The two construction types are:

1. For plastic ceilings.
2. For grid type ceilings.

Lighting Performance

High efficiency; Useful output over 60%.
Glare free; Visual comfort over 90%.
Ceiling illuminated; Luminous Prism Border Lens.
Wide range of lighting levels: Choice of 2, 3 or 4 lamp units.

Appearance

Prism Border Lens; Highly attractive, low brightness.

Smooth Crystal PRISMALUME® Controlens; Injection molded acrylic.

Mechanical Construction

Sturdy fixture housing; Die formed, light weight.
Extruded aluminum door rails and trim; Assures perfect alignment.

Positive door closure; Quick acting spring latches.
Shallow recessing depth; 4¾" to top of framing members.

Cool ballast operation; Ballasts mounted at far corners.

Simple installation; Parts designed for speedy assembly.

6453-4	3	By Ceiling	68.79
6454-4	4	Grids	68.79

For suspended type units cross-supports and brackets are furnished as part of the catalog number.

All plaster frames are furnished on separate order.

All HOLOFLUX units are wired. Standard voltage rating is 110v. to 125v. Specify when other voltages are required.

HOLOPHANE SURFACE MOUNTED FLUORESCENT LUMINAIRES

"62" SERIES — FOUR FOOT SQUARE

The "62 Line" offers a 4' x 4' surfaced attached complete Holoflux luminaire arranged for use with 4, 6 or 8 F40T12/RS fluorescent lamps. Outstanding light control and attractive appearance result from Prismalume lenses, prismatic T-bar and luminous side panels with satin-chrome corner supports. Ideal for large interiors such as: banks, auditoriums, department stores, libraries, lobbies, offices, churches, terminals, etc.

Here is a light weight unit providing simple surface attachment, giving the effect of recessed large area panels. Special refinements in design offer added features such as:

The panelled sides of the unit do not go up to the ceiling line, but are dropped down to provide more light on the ceiling. The use of an acrylic prismatic T-bar as a cross support for the four acrylic Controlens makes the entire area a luminous light controlling surface. Relamping is simple; light-weight acrylic lenses are lifted and slid over one another giving access to lamps or interior.

Highly efficient (approximately 60% in 0°-60° zone), the "62 line" also is the lightest-weight fixture of this size available.

—Concave Lens—		—Flat Lens—		Lamp Wattage	—Dimens., In.—	
Cat. No.	Each	Cat. No.	Each		L.-W.	D.
6224	\$161.65	6254	\$152.18	4-40	50 7/8	5 7/8
6226	170.66	6256	161.19	6-40	50 7/8	5 7/8
6228	179.67	6258	170.18	8-40	50 7/8	5 7/8

Flat lenses are acrylic plastic in 2' x 4' modules.

All units are wired and can be connected for switching two lamps at a time to obtain various levels of illumination. Standard voltage 110-125 volts. Specify when other voltages are required.

7100 SERIES HOLOFLUX® III

High efficiency utilization coefficients over 70% mean higher footcandle levels with fewer luminaires. Complete visual comfort—over 15,000 individual cone prisms in each PRISMALUME® CONTROLENS® eliminate glare from every viewing angle. Has unique lamp concealment—special prismatic construction eliminates reflected lamp images and provides best "hiding power" to conceal light sources, without sacrifice of efficiency. Uniform illumination even on wide spacings.

Ultra-thin contour—slim, modern, clean lines. Injection-molded acrylic, single piece, four-foot, frameless lens provides totally invisible latching and hinging. A well-balanced combination of linear and cone prisms looks attractive whether lighted or cold.

Continuous luminous runs and ends. No readily apparent mullions between adjacent sections of continuous runs.

Cat. No.	Lamp Wattage	—Dimens., In.—			Each
		L.	W.	D.	
7100-4	2-40	48 5/8	8 5/8	4 3/4	\$28.82
7100-8	4-40	97 1/4	8 5/8	4 3/4	56.13

NOTE: Catalog designations end in a number which give the nominal length in complete feet. Continuous runs can be made up of the appropriate number of 4' and 8' sections. Ballasts are internally fused, grounding lugs are provided and units are prewired. Single stem hanger available on separate order. Specify type and stem length required.

6000 SERIES — DECOLITE®

The Decolite®, No. 6000 Series, surface-mounting fluorescent luminaire, features high lighting efficiency, striking appearance and mechanical excellence. The basic 4-foot unit is composed of 2 acrylic PRISMALUME® Controlens, each accommodating 2 fluorescent lamps—four lamps in the complete fixture. The lenses hinge along the central metal ballast chamber cover, and so provide easy access for servicing. A minimum of metal is visible, emphasizing the even luminosity of the PRISMALUME lenses. Luminaire provides an intensive light distribution. Light from the sides of the lenses illuminates the ceiling, relieving contrast. Additional sections available and easily attached for continuous runs.

Listed by UL for direct installation on low density fibre tile ceilings.

HOLOPHANE IN-BILT RECESSED INCANDESCENT LUMINAIRE

PAL — POSITIVE AUTOMATIC LATCHING

The Nos. F-1564 — F-1567 series of recessed Controlens units feature a mechanical innovation —PAL—(Positive Automatic Latching). This feature makes relamping easy. The door is opened

simply by pushing against the Controlens which releases the latching mechanism, allowing the door to swing open, slowly and smoothly. The lamp can be serviced from the floor with a standard lamp changer pole. No springs are involved, the entire operation is accomplished by positive pressure against an activating lever and a clasp that automatically closes the Controlens door.

Optically, the PAL series offers two types of Controlens: one, a concave design (F-1564 series) the other, a flat lens (F-1567 series) to meet the users preference. An intensive light distribution results from either type of Controlens. Sized to fit standard 12" ceiling openings, housing is furnished complete with widely adjustable mounting straps.

HOLOPHANE COMMERCIAL LIGHTING UNITS

RECESSED — CONCAVE LENS

No. F-1570 Series

answer for low ceiling construction. Unit employs prismatic reflector working in conjunction with concave lens. Recommended for "general lighting" where uniform illumination of the working area is required. A great variety of luminaires is available: 9 3/4" lens for 150 watt (F-1559 units); 13 3/8" lens for 300 watt (F-1570 units); F-1570 singly or in multiple construction; a lift-off top construction (F-1570-TS) to permit above-ceiling servivings. A prewired integral outlet box 150 watt unit (FB-1560) is also available.

The F-1570 series, with its low brightness and outstanding efficiency, is the most modern of all incandescent In-Bilt lighting systems. It is the

All Plaster Flanges supplied on separate order. Units are supplied unwired. †For 100-watt A-21 lamp use, (SO-88) 3/4" socket extension. *Medium base—6" light center clear lamp recommended. **Existing ceiling requires 14 1/2" sq. opening for No. 0264 Plaster Flange. †Existing ceiling requires 15" sq. opening for No. 0321 Plaster Flange. ‡Existing ceiling requires 10 3/4" sq. opening for No. 0263 Plaster Flange.

**HOLOPHANE SURFACE MOUNTED
FLUORESCENT LUMINAIRES**

PRISMATIC INCANDESCENT CEILING LUMINAIRE

Holophane CUBIC® is an incandescent acrylic plastic one-piece unit available in two sizes. Provides efficient, glare-free lighting; ease in handling and cleaning. Lamp enclosure accommodates two 100 watt lamps in No. C-868 and two 60 watt lamps in No. C-866. Hinges and latches easily; mounts directly on 3 1/4" and 4" outlet boxes. Suitable for restaurants, dormitories, classrooms, corridors, lobbies, stairways, washrooms, etc.

**HOLOPHANE INDUSTRIAL
LIGHTING UNITS
INDUSTRIAL VAPOR TIGHT LUMINAIRES**

No. 02420

No. 02454, 02456

No. 02444

Dust and vapor tight units for several wattages (100, 150 and 200 watts) and light distribution. Nos. 02454, 02456 and 02420 have compression-tension holding method without threaded neck. No. 02420 has aluminum cover, can be used indoors or outdoors; No. 02423 omits cover, provides upward light. Units easily relamped and serviced. Other listings consist of threaded

metal fitters and prismatic light controlling elements.

LIGHTING UNITS**

**HIBAY® HEAVY DUTY UNITS FOR
HIGH MOUNTING**

Typical Hibay Reflector

Foundries, turbine rooms, airplane hangars, armories or steel mills and similar areas require special high mounting (over 30') lighting that can meet the severe operating conditions of heavy industry. Thermally stable prismatic HIBAY® reflector units, highly efficient and unequalled for their permanent reflecting qualities, are available for use with incandescent and mercury lamps. Based on the spacing, concentrating, medium or widespread light distributions are selected. Mechanical features include: rugged tripod reflector holder, ventilated socket design and metal drip cover.

LOW BAY LIGHTING

682 Series

A group of highly efficient prismatic reflector units for mounting up to 20'. This series of luminaires provides flexibility of application for areas such as general industrial lighting, lighting of machines and materials, or gymnasiums.

LOBAY® reflectors should be selected according to the spacing arrangements and the light distribution required. All are tapped for 1/2" conduit.

Cat. No.	Lamp Wattage	Max. Spacing Ratio	Dimens., Inches (over rods)		Each
Extensive Distribution

Suffix "AL" denotes aluminum covered reflectors. **300 W., 6" light center, medium base lamp. †Mogul base lamp.

HOLOPHANE INDUSTRIAL LIGHTING UNITS

MERCURY LUMINAIRE
With Integral Ballast

No. 625

No. 630

Holophane PRISMPACK® combines efficient prismatic glass reflectors with specially designed ballasts to form an integral unit. Balanced appearance of reflector and ballast capsule presents an attractive luminaire for use in all areas where styling counts.

Choice of 5 Controlled Distributions — Prismatic controlled light distributions allow precise engineering solutions for specific applications.

Wide Spread Uplight — Ballast capsule specifically designed to permit spreading of 12% of lamp output across ceiling, to relieve contrast.

Completely Prewired — Socket and ballast are factory connected. Only two luminaire wires need to be spliced to line wires in wiring chamber provided.

Drip Cover Protection — PRISMPACK® luminaires are available with a permanently mounted drip cover where protection against moisture (condensation, leakage, etc.) is desirable.

Steady Light Output — Useful light output of lamp is held constant within 4½% for line voltage fluctuations of as much as 10%.

TWIN-MERCURY LUMINAIRE
With Integral Ballast

“Out of the carton — on to the ceiling” mounting ease of the prewired PRISMPACK® concept has been incorporated into a twin reflector unit. Durable cast yoke supports ballast capsule and twin reflectors. Economical two-lamp ballast in twin mercury units; single lamp ballast in combination mercury-incandescent units. Light controlling features as given for PRISMPACK®.

Single catalog number represents luminaire complete with two reflectors and ballast. (last three digits indicate primary voltage).

Suffixes Added to Cat. Nos. For Special Features:

- A—Flat Anopal glass.
- B—Dished Opal bowl, 1 1/4" deep, in 614, 1207, 1208, 1211, 1212, 1511, 1611-V.
- C—Flat Kirlin lens, concentrating, in 1208, 1211, 1212, 1511, 1611-V series.
- CHROME — Polished frame, Satin available.
- CO—Convenient outlet on 508-NL.
- D—Dished Kirlin lens semi-concentrating, in 1208, 1211, 1212, 1511, 1611-V.
- DC—Dished Corning, ceramic coated, in 1211, 1511, 1611-V series.
- DC-SR-SYM—Dished, symmetric, shock-resisting Corning lens, in 1211, 1511, 1611-V series.
- DC-SR-ASY—Dished, asymmetric, shock-resisting Corning lens, in 1211, 1511, 1611-V series.
- EX—Extra socket, nite-lite circuit.
- EXT—Extension flange for use with "SUR" fixtures installed on exposed conduit or Wiremold.
- G—Clear glass behind louvers in 508-NL. Anopal panels in bottom of 3506 and for down-lite in 4507 exits.
- Hg—For use of 400 watt mercury lamp in 1218 series.
- L—Egg-crate, alum. louver, 45°-45°, white finish.
- P—Pull-Latch door on 1218.
- R—Removable top. For servicing from above on 1208, 1211, 1212, 1218, 1611-V.
- SR—Shock-resisting lenses on 1208, 1211, 1212, 1218, 1511, 1611-V series.
- SUR—Surface type 1208-SUR, 1211SUR, 1218SUR.
- T—Fast-latch door 1211, 1511, 1611-V series.
- TP—Tamper-proof key type stainless steel door screws.
- U—Unwired (no outlet box).
- UM—Troffer mtg. bracket for metal construction.
- UW—Troffer mtg. bracket for wood construction.
- V—Vertical lamp, 1611-V.
- W — Weather-resisting, alum. box, special protective finish, for outdoor use and in concrete.
- WG — Weather - resisting, (galv.) box on 1218; galv. frame on 1218, 514, 1218SUR, 4507.

KEYSTONE FLUORESCENT FIXTURES

"NEUTRON" SERIES

New, expanded line of prismatic wrap-arounds with completely enclosed shielding of patterned prismatic bottom and linear sides. Features "Shift-Lok" design for continuous row mounting without tools or chase nipples plus new 20 watt units in both 11" wide 2-lite and 17" wide 4-lite.

"PATTERN-LITE" RECESSED TROFFERS

A complete new line of troffers featuring a new, simplified "positive" hinging arrangement for easy installation and removal without unsightly clips or latches showing. New, easy-to-use "uni-lug" standard with flange type units. 1x4 units available in 8 varied shieldings for 2 or 3 lamps. 2x2 and 2x4 units available in 7 different shieldings for 2, 3, 4 or 6 lamps. Flat prismatic shielded units also available in "frameless" type "Refractolens".

All units equipped with HPF-ETL ballasts.

AUTOMATIC SPRING-LOADED DOOR LATCH. Nearly invisible nylon latch, has been tested for 200,000 operations.

HINGES FROM EITHER SIDE. Shielding frame held positively in place by sliding frame pin into housing slot.

SQUEEZE-TYPE BALLAST COVER. No tools or fasteners required.

LITHONIA FLUORESCENT LIGHTING FIXTURES

CHIEF-LITE SERIES

CL296M

CL296P

Economical high brilliancy (89%) fixture die-formed of heavy-gauge cold rolled steel coated with Crys-Coat for rust prevention, and finished in hot-bonded white enamel. Ribbed channel inter-lock ends for positive alignment and permit use of tong hangers for flexible suspension. Metal sides welded to end plates. Plastic sides models have snap-in styrene panels which are removable Louver sections, 4 ft. Employ finger-touch spring latches and safety chains. The fins interlock with V-Channel for rigidity. Numerous knockouts and mounting holes make easy single or continuous installation, surface or suspended mounting. For both metal and plastic sides the 2-lamp fixtures have 35°-25° cutoff, and the 4-lamp have 40°-25° cutoff.

LITHONIA FLUORESCENT LIGHTING FIXTURES

SHALLOW DEPTH SERIES

SD240M

Features extremely shallow depth: 3 3/4". For flush or stem mounting; metal or plastic sides; open top or top reflectors; with architectural simplicity and high efficiency.

Metal louvers have 30°-45° cutoff, are removable by releasing spring latch and are supported by chains for relamping. Channel is ribbed for suspension by tong hangers.

Die-formed of heavy gauge cold rolled steel, and welded. Finished in high reflectance hot-bonded white enamel over Crys-Coat film for rust prevention. Channel ends mechanically interlock, assuring positive alignment. Wire rods interlock louver fins with V-Channel for rigidity. Snap-in side panels are light stabilized polystyrene.

TROFFERS

2F440PL

Recessed Troffers, especially designed for all ceiling suspension systems with easy installation in mind. Die-formed of heavy gauge cold rolled steel, and welded. All are coated with Crys-Coat for rust prevention and finished in hot bonded white enamel, with 90% reflectivity.

The flush seating door frame hinges from either side, or is completely removable. Features new inconspicuous sliding cam latch. Foam plastic seal attached to shielding frame eliminates light leakage. Shielding media available in eight designs in the industry's most advanced material.

All troffers available for lay-in grid ceilings. Order G instead of F.

LITHONIA FLUORESCENT LIGHTING FIXTURES

M SERIES

2M240P-PL

Attractive surface fixture die-formed of heavy gauge cold rolled steel, and welded. All are coated with Crys-Coat for rust prevention and finished in bonded white enamel, with 90% reflectivity.

The flush seating door frame hinges from either side, or is completely removable. Foam plastic seal attached to shielding frame eliminates light leakage. Shielding media available in six designs, in the industry's most advanced material.

Sizes are 1'x4' — 2'x2', 2'x4'. Ballasts are HPF or LPF, approved by UL or ETL. Lamps are Trigger Start, Rapid Start and Slimline. Adequate knockouts to simplify wiring make for ease of installation. All are UL approved.

Metal sided units also available.

LANCER SERIES

L240

Economical, highly efficient industrial fixture in 4' Rapid Start and 8' Slimline. Die-formed of heavy gauge cold rolled steel. Finished in hot bonded white enamel, 90%.

The reflector is heavily embossed for rigidity and has captive latches, allowing for easy removal from the channel. All of the light is directed downward by the reflector, providing abundant illumination to the working plane.

Fixtures come equipped with convertible snap-on connector strap/end plates and reflector aligner straps for use individually or in continuous rows.

This series is equally suitable for either surface or suspension mounting.

LUMINOUS CEILING LIGHT DIFFUSERS AND SUSPENSION SYSTEMS

A variety of light diffusers and suspension systems to achieve almost any effect in large luminous sections. Meet the rigid requirements of leading Architects, Engineers and Contractors.

**LEAF-LITE**

A non-modular louver-type of luminous ceiling with complete color selectivity.

**SQUIGGLE**

A non-modular plastic louver-type of luminous ceiling without visible support.

**PARABOLIC ALUMINUM LOUVER**

(23 $\frac{3}{8}$ " x 23 $\frac{3}{8}$ ") or (23 $\frac{3}{8}$ " x 47 $\frac{3}{8}$ ") or (35 $\frac{3}{8}$ " x 35 $\frac{3}{8}$ ") or (47 $\frac{3}{8}$ " x 47 $\frac{3}{8}$ ") in a variety of finishes, with $\frac{3}{4}$ " parabolic-shaped cells.

**TEXTURE-LUMINUS ALUMINUM LOUVER**

(23 $\frac{5}{8}$ " x 23 $\frac{5}{8}$ ") or (23 $\frac{5}{8}$ " x 47 $\frac{5}{8}$ ") or (35 $\frac{5}{8}$ " x 35 $\frac{5}{8}$ ") in painted white or anodized clear, in $\frac{5}{8}$ " cell size with 45° to 55° shielding.

 **$\frac{5}{8}$ " CELL VINYL LOUVER TEXTURE-LUMINUS**

(23 $\frac{5}{8}$ " x 47 $\frac{5}{8}$ ") or (23 $\frac{5}{8}$ " x 23 $\frac{5}{8}$ ") in white, with 45° to 55° shielding. (Also available as closed panel.)

 **$\frac{9}{16}$ " CUBE POLYSTYRENE PLASTIC LOUVER**

(35 $\frac{3}{4}$ " x 47 $\frac{3}{4}$ ") or (23 $\frac{3}{4}$ " x 47 $\frac{3}{4}$ ") or (29 $\frac{3}{4}$ " x 59 $\frac{3}{4}$ ") in white, with 45° shielding.

 **$\frac{1}{2}$ " or $\frac{3}{8}$ " CUBE ALUMINUM LOUVER**

(23 $\frac{5}{8}$ " x 23 $\frac{5}{8}$ ") or (25 $\frac{5}{8}$ " x 47 $\frac{5}{8}$ ") or (47 $\frac{5}{8}$ " x 47 $\frac{5}{8}$ ") in painted white or anodized clear, with 45° shielding.

**ACRIGLAS FLAT**

(47 $\frac{3}{4}$ " x 47 $\frac{3}{4}$ ") .094" thick, special acrylic-fiberglass panel, in matte white.

**ACRYLIC DISHED PANELS**

(23 $\frac{3}{4}$ " x 23 $\frac{3}{4}$ ") or (23 $\frac{3}{4}$ " x 47 $\frac{3}{4}$ ") or (35 $\frac{3}{4}$ " x 35 $\frac{3}{4}$ ") or (47 $\frac{3}{4}$ " x 47 $\frac{3}{4}$ ") in white or matte white .125" thick.

**ACRYLIC OR POLYSTYRENE LENSES**

(23 $\frac{3}{4}$ " x 23 $\frac{3}{4}$ ") or (23 $\frac{3}{4}$ " x 47 $\frac{3}{4}$ ") in clear or white .125" thick.

**POLYSTYRENE PARAHX**

(23 $\frac{11}{16}$ " x 23 $\frac{5}{8}$ ") or (23 $\frac{11}{16}$ " x 47 $\frac{9}{16}$ ") in satin aluminum, specular and white in parabolic $\frac{9}{16}$ " x $\frac{3}{8}$ " x $\frac{1}{2}$ " deep cell size with 45° shielding. (Also available in Acrylic.)

MOLDCAST LIGHTING

First in outdoor lighting — with the widest selection of die cast aluminum weatherproof fixtures — offering beautifully designed, ruggedly constructed fixtures for every outdoor lighting application.

DELUXE BULLET

131 Series. Side swivel for PAR-38 and R-40 medium base lamps, 75 to 300 watt.

7½" long bullet with 5¼" dia. x ½" high canopy plate. Die cast aluminum, weatherproof. Silicone weatherseal.

Cat. No.	Finish	Each
ML-131	Luster Light*	\$7.63
MP-131	Baked Enamel**	5.44
M-131	Aluminum Spray	4.69

*MLA — Polished Aluminum; MLS — Satin Aluminum.

**MPB — Black Wrinkle; MPG — Green Wrinkle; MPW — White.

SUPER BULLET

231 Series. Side swivel for PAR-38 and R-40 medium base lamps, 75 to 300 watt.

Sleek 11" long super bullet provides a 45° light cutoff with R-40. Modern bold design with silicone weatherseal. 5¼" canopy plate furnished.

Cat. No.	Finish	Each
ML-231	Luster Light*	\$12.69
MP-231	Baked Enamel**	8.31
M-231	Aluminum Spray	7.13

*MLA — Polished Aluminum; MLS — Satin Aluminum.

**MPB — Black Wrinkle; MPG — Green Wrinkle; MPW — White.

PORTABLE BULLET

Complete with 6' of 3-wire outdoor cord and plug and 8" lawn stake. To beautifully illuminate your garden, trees, backyard, patios, etc. Fixture completely encloses PAR-38 or R-40 lamps.

Cat. No.	Finish	Each
MPB-9563	Black Wrinkle	\$6.30

"TOP QUALITY" LAMPHOLDER

Silicone weatherseal, serrated and calibrated swivel. Heat dissipating ribs in a rugged die cast aluminum housing. For PAR-38 or R-40 lamps.

Cat. No.	Finish	Each
M-430	Weatherbrite Alum. Paint	\$1.88

300 WATT FLOODLIGHT

Spring toggle clamps hold lamp and allow free air movement within housing for long lamp life. Protective lens assembly allows for up or down lighting. For PAR-56 lamp.

Cat. No.	Finish	Each
MA-156	Weatherbrite Alum. Paint	\$11.85

PERFORATED HOUR GLASS

Encloses two PAR-38 lamps. MPB-76 clear lens protective assembly and 5¼" canopy plate. Both cones weatherproofed with silicone weatherseals. Cast aluminum.

Cat. No.	Finish	Each
ML-869	Luster Light*	\$27.50
MP-869	Baked Enamel**	23.00
M-869	Aluminum Spray	21.25

*MLA — Polished Aluminum; MLS — Satin Aluminum.

**MPB — Black Wrinkle; MPG — Green Wrinkle; MPW — White.

TRIANGULAR WALL BRACKETS

A complete new line of cast aluminum wall brackets for outdoor and indoor use. With unique triangular design, cast aluminum guards, vapor-proof construction and a choice of clear anodized finish or Moldcast Luster Light finish in Satin Aluminum.

 "Handblown" glass in Flame, Smoke Gray, Blue, Matte White, Ruby or Green. 9" dia. x 12 1/4" high. Overall suspension 52" max. Matte White canopy is standard.

100W

A-101-E \$14.95
 Metal, White finished outer shade. Brushed Brass or Copper inner shade. Also Matte Black outer shade w/ Brushed Nickel. 7 3/4" dia. x 8 3/4" high. 50" overall suspension. A-101-E with 3-tone Green or Brown finish **\$13.00**

60-100W

A-101-B \$12.35
 Metal shade in Red, Green, Gunmetal or Matte Black. 7 1/2" sq. x 9 1/2" high. Overall suspension 52" max.

100W

A-101-K \$11.05
 White Satin opal inner glass. Perforated metal shade in Brushed Nickel, Brass or Copper. 9" dia. x 13 1/4" high. Overall suspension 50 1/2" max. A-101-K in Gunmetal or Matte Black. **\$9.75**

60-100W

A-101-Y \$13.33
 White Satin opal inner glass. Outer glass in Flame, Amber, Blue, Clear Cracked Crystal, Clear Smoke, or Ruby. 8 3/4" dia. x 13" high. O.A. suspension 52" max.

Maximum suspension shown. Cords easily shortened, longer cords available. Diecast canopies designed for 3 1/4" or 4" outlet box mountings.

SILVRAY-LITECRAFT LIGHTING FIXTURES

S9 SERIES SURFACE MOUNTED FLUORESCENT FIXTURES

A fluorescent, surface mounted fixture which can be used individually, in patterns or in rows. Constructed of heavy gauge steel. Door hinges from either side. Foam gaskets protect against light leakage and dust penetration. All parts sprayed with Perma-white enamel and baked to assure permanence and durability. Depth, 3 3/8" except Dished Acrylic fixtures which are 5 1/8".

IMPERIALE SERIES TROFFERS

U.L. Approved

Imperiale with Prismatex Diffuser

Imperiale offers quality troffer lighting for any interior with its perfectly level envelope door, extra gasketing protection, steel bonderized after fabrication, stainless steel hinges, a wide range of lens and diffusers. Recessed depth only 4 3/8".

Ceiling Types

To order the proper fixture for a particular ceiling type, insert the letter that designates that ceiling type in the space left blank in the catalog number. (Example RE121-240).

- Type A — Exposed grid, Inverted T
- Type E* — Concealed Mechanical Expansion
- Type F* — Metal Pan, Snap-In T
- Type G* — Plaster Ceiling

*Yokes available making recess depth 5 3/8".

TIEMPO SURFACE-MOUNTED FLUORESCENT FIXTURES

Tiempo is extremely shallow—2½" deep and 12" or 18" wide—perfect for today's low ceilinged spaces. Optically engineered to provide a comfortable lighting environment at higher foot candle levels. Its precision made injection molded and extruded acrylic or styrene lenses direct low brightness light downward through finely spaced prisms. In addition, the sides send illumination to the adjacent ceiling, reducing harsh brightness contrast.

The crystal clear lens swings down for relamping from either side without the use of tools. Safety stops prevent accidental dislodging of the lens when hinged. Has snap-in ballast cover.

SILVRAY-LITECRAFT LIGHTING FIXTURES

DELUXE SERIES CONCENTRIC LOUVER UNITS

For Silver Bowl Lamps

For schools, offices, public buildings, superb engineering yields a 90.5% ETL-Proved efficiency, with low brightness readings to satisfy the most rigid specifications. Finishes are permanent, heat resisting — twice sprayed, and twice infrared baked.

Heavy-gauge louver rings are seamlessly butt-welded, and from non-twist Hanger down to Stem-Lok Socket Cap, each fixture is completely Lock-tite, cannot twist or turn. The Stem-Lok Socket Cap saves installation time; permits simple on-location stem shortening — no need for threading or special tools.

Earthquake-proof Swivel Aligner guarantees plumb suspension from ceilings sloped up to 45°, and lamp alignment is insured by the sturdy extruded aluminum husk, ventilated for added cooling effectiveness.

Underwriters' Laboratories approved. 1500W/660V mogul porcelain socket. Union wired (IBEW-AFL). Additional stem lengths, when required, available to order.

Cat. No.	Description	Lamp	Length Inches	Dia. In	Each
A103	Close-up	200W	12	19	\$ 9.65
A104	Pendant	200W	30	19	10.20
A105	Close-up	300/500W	14	19	9.85
A106	Pendant	300/500W	30	19	10.40

Additional stem length for Pendant Unit available at \$0.60 user cost per foot.

Collar available for surface mounted outlet boxes at slight additional cost.

DOMELITES

A functional as well as a decorative lighting fixture. Domelites provide their own reflecting surface without regard to ceiling surface or color condition. Finish: top of dome, Dusk Gray; balance of fixture, Satin Aluminum. Other finishes to order.

Cat. No.	Lamp	Length Inches	Dia. In.	Each

SMITHCRAFT LIGHTING FIXTURES**DOMINAIRE SERIES DMA & DMP**

A new shallowness in lighting fixtures. Apparent depth of only 1½" simulates a panel lamp or recessed fixture without visible attachments. When used in rows, free-flowing uninterrupted lines of light are obtained. The uniform low brightness of the acrylic or styrene lens provides shadowless, non-glaring illumination for offices, schools and stores. The Dominaire is also an excellent lighting panel for residential applications in kitchens and family rooms.

AVANT GARDE SERIES AGA & AGP

A shallow semi-direct lensed fixture with an extremely well controlled light distribution. The linear and rectangular prisms direct and control the light to produce a high degree of visual comfort. The lens has a rich textured low-bright sparkle that produces an atmosphere of visual pleasantness.

SMITHCRAFT LIGHTING FIXTURES

FRAMED TROFFERS SERIES PP

Fastest installing troffer, effecting substantial savings in hours and dollars for electrical contractors. Maintenance costs for owners are also greatly reduced because of the simplicity and ease of maintenance. These troffers go far beyond any recessed lighting previously available in improvements and refinements; literally in a class by itself.

SMITHCRAFT LIGHTING FIXTURES

FRAMELESS TROFFERS SERIES LP

A larger expanse of clean, uninterrupted illuminated area surrounded by a minimum of metal trim for virtually all ceilings. By eliminating the shielding door frame, these troffers provide 11" x 47" (or 23" x 47") of recessed lighting free from hardware or the possibility of light leaks. In inverted tee grid systems, the illuminated shielding is surrounded only by the exposed members of the ceiling itself. In other type ceilings, only a single, narrow band of metal outlines the fixture in the ceiling. Diffusers are self-hinging and access to the interior of the unit is simple and trouble-free.

FRAMELESS TROFFERS SERIES RP

A larger expanse of clean, uninterrupted illuminated area surrounded by a minimum of metal trim for virtually all ceilings. By eliminating the shielding door frame, these troffers provide 11" x 47" (or 23" x 47") of recessed lighting free from hardware or the possibility of light leaks. In inverted tee grid systems, the illuminated shielding is surrounded only by the exposed members of the ceiling itself. In other type ceilings, only a single, narrow band of metal outlines the fixture in the ceiling. Diffusers are self-hinging and access to the interior of the unit is simple and trouble-free.

TRIMLESS® TROFFERS SERIES LP & LA

The ultimate in architecturally clean recessed lighting design. No frame, no flange, no trim. A simple, absolutely uncluttered sheet of light in the ceiling without surrounding metal of any kind. A full 12" or 24" illuminated area. For virtually all ceilings supported by concealed members. Shielding opens or closes from either side or may be completely removed without any tools or visible hardware.

SLENDEX RECESSED SERIES RSX

These units are an extremely practical solution where minimum-cavity, low-ceiling conditions exist. They recess only 1 3/8" . . . eliminate cutting of existing ceiling members . . . go in flat with no depth required for tilting. New injection-molded dishes have clean, crisp lines, uniform thickness, greater break resistance. Illumination is clean and uniform with no light leaks. An interesting triangular pattern eliminates dark areas. Plastic panel may be hinged from either side. Opens and closes easily and quickly without tools or loose parts.

SMITHCRAFT LIGHTING FIXTURES

APERTURE RECESSED CONTROLLED BRIGHTNESS DOWNLIGHTS

These units provide uniform illumination with even spacing to height ratio. Alzak aluminum reflector and conical baffle combine to produce a well defined beam light with 45° optical cut-off. General service lamps with various baffle finishes produce visual effects through a range of controlled brightness and colors.

WAKEFIELD PHOTOMETRIC ON-SURFACE LUMINAIRES

PHOTOMETRIC II

A completely new injection-molded refracting luminaire for on-ceiling or stem mounting in schools, colleges, offices, libraries, etc.

Snap-in-and-off reflector and ballast covers. Snap-in-and-out sockets. Refractor removable from either side without tools. All steel parts white enameled. CBM/ETL, HPF ballasts. IBEW, UL/CSA labeled.

Cat. No.	No. of Lamps	Description	Each
With Styrene Refractor			
PHR-214	2-F40	4' On-Surface, RS	\$26.90
PHR-218-T	4-F40	8' On-Surface, RS*	53.80
With Acrylic Refractor			
PHR-214-AA	2-F40	4' On-Surface, RS	30.75
PHR-218-TAA	4-F40	8' On-Surface, RS*	61.50

*Tandem.

PHOTOMETRIC IV

An injection molded refracting luminaire modular in length 48" ± 3/8", 96" ± 3/8". Approximately 75% of the light is directed downward and 25% upward. Brightness is fully controlled in the direct glare zone. Reflection factor of the baked enamel is .88.

The 4' refractor is removable from either side without tools or squeezing—simply lifts, slides and removes with a hinging action for ease of maintenance. The 8' unit uses two 4' refractors. Units form completely luminous rows without visible metal separation.

The Photometric is designed for either close ceiling or stem mounting; facilitated by a sliding clamp hanger. The ballast covers snap on or off without tools. Socket supports snap in or out for easy replacement. The ballast is designed to meet CBM higher output standards. There are no visible screws, nuts, bolts, rivets, welds, or knockouts to blemish this luminaire. Channel is rigidized 20 gauge steel. Limitations: Check code before mounting direct to combustible ceilings. Use No. 61, 1 1/2" ceiling hanger if required.

Body depth—4 5/8".

WITH ACRYLIC REFRACTOR
On-Surface, Rapid-Start

Cat. No.	No. of Lamps	Description	Each
PHR-414-AA	4-F40	4'	\$51.55

PHR-418-T	8-F40	8' Tandem	81.45

WAKEFIELD OMNI LUMINAIRES

An all purpose luminaire. May be used inside or outside.

Housing is seamless, one-piece anodized aluminum. The pressure formed Plexiglas* shielding which encloses the bottom of the housing carries a 15 year guarantee for light stability. An 18 gauge steel plate supporting the ballast and lampholders is mounted in the housing. A moisture and dust tight joint is formed between the housing and the shielding by a cushion type neoprene rubber seal. Nylon safety straps permit maintenance without removing shielding.

*Trademark

Cat. No.	No. of Lamps	Description	Each
ONR-214	2-F40	4' Rapid Start	\$32.90
For 277V ballasts, suffix "D" to Cat. No. and add \$0.75.

For 277V ballasts, suffix "D" to Cat. No.—no extra charge.			

SMOOT-HOLMAN COMMERCIAL LUMINAIRES

"PERFECT VISION" LUMINAIRES

May be mounted within 12" of ceiling. Finish is baked-on white Permalux over rust inhibited metal. Depressible lamp sockets for easy relamping from above. HPF ETL certified ballast. Plastic bottom panels or louvers as desired. 110/125 Volt AC. Other voltages available. Width 30 3/8"; normal depth, ceiling to bottom of unit 18". IBEW and U/L labels. Patent pending.

Cat. No.	Lamps Required	Hanger Spacing, In.	Each
*PV-288	2-F96T12HO	96	\$57.50

†PVC-264	2-F72T12	72	49.39

*Units supplied with end caps and 2 hangers for individual installation. Every continuous row also requires one of these.

†Units supplied with one hanger and no end caps for continuous rows. Order one PV basic unit and one less PVC units than the total number of units in the row.

If plastic louvers having 40° x 40° cut-off instead of luminous plastic panels are desired change catalog number prefix from "PV" to "PVL" and add \$5.25 to prices shown.

WAKEFIELD PRISMATIC ON-SURFACE LUMINAIRES

The Wakefield Prismatic on-surface fluorescent luminaire is designed for virtually every commercial and institutional application. Body is of formed 20 gauge steel. The finish, which is undercoated for corrosion protection, is sprayed white enamel using latest spraying and baking techniques. The panoramic diffuser is 1/8" thick clear lens in choice of acrylic or styrene plastic, and is quickly and easily removable without tools of any kind.

I.B.E.W., U. L./CSA labeled. CMB/ETL, HPF thermally protected non-resetting ballast. For on-ceiling, close (1 1/2") to ceiling, and suspension mounting.

LIMITATIONS:

Available for 4-ft. C/W or W/W Rapid Start lamps only. Local code may require #11 (1 1/2" drop) when used on combustible ceilings.

SPECIFYING POINTS FOR ARCHITECTS AND ENGINEERS:

Diamond pattern clear lens plastic. Diffuser easily removed without tools. Socket assembly snaps out without removing fixture from mounting.

WAKEFIELD PANELMETRIC ON-SURFACE LUMINAIRES

Panelmetric luminaires are available in six sizes—in 1, 2, and 4 foot widths, and with solid steel sides, and in a wide variety of shielding media.

All units are modular and shallow. All the frame and diffuser assemblies are interchangeable with Wakefield troffers, permitting standardization advantages for purposes of appearance and maintenance.

Hinges are completely invisible and may be inserted on either side of the unit. The entire frame assembly can be disconnected for easy cleaning and will not fall when swinging free. An inconspicuous cam-lever lock holds the frame in place. The frame and reflector construction form a positive light seal. All electrical components, ballasts, sockets and wires carry UL/CSA labels.

Specifying points for architects and engineers: All units are modular, 20 gauge steel construction. Framed diffuser assembly hinges from either side and is interchangeable with recessed troffers. CBM listed ballasts are standard.

Body depth—3 3/4".

APPLETON DAY-ARC ALUMINUM FLOODLIGHTS

DAY-ARC 1000 (Less Ballast)

U. S. Pat. No. 3,149,785
Can. Pat. No. 684,120

The Appleton DAY-ARC floodlights have been specifically developed for use with the new metallic vapor lamps. The unique feature of these floodlights is the reflector, which has been designed around the physical dimensions of the arc stream itself! They are equally suitable for standard clear or color-improved mercury vapor lamps.

 †For shock-absorbing lampholder, suffix catalog number with -SHB and add \$0.24 to price.

BENJAMIN LIGHTING EQUIPMENT

TURNLOX REFLECTOR UNITS

Listed by Underwriters' Laboratories, Inc.

The Benjamin weatherproof TURNLOX construction allows the reflector and lampholder assembly to be removed from hood by only a quarter turn and taken down as a unit for servicing on the floor. Positive electrical and mechanical contact is assured by the engagement of the bayonet coupling in the terminal base. Any TURNLOX hood will take any medium or mogul base reflector assembly. Rigid, porcelain lampholder.

Reflectors are porcelain enamel steel; white outside, reflecting white inside. Pendant and angle hoods are tapped $\frac{1}{2}$ " I. P. size; ceiling hoods fit $3\frac{1}{4}$ " or 4" octagonal outlet boxes.

For unit with shock-absorbing lampholder, suffix catalog number with -SIB and add \$0.31; for medium base, pull-chain, suffix with -PUL and add \$1.35. For pendant or angle unit tapped $\frac{1}{4}$ " I.P. size, suffix catalog number with - $\frac{1}{4}$.

BENJAMIN LIGHTING EQUIPMENT

SOCKET-REFLECTOR MEDIUM BASE LAMP HOLDERS

Listed by Underwriters' Laboratories, Inc.

KEYLESS TYPE

660 Watts—600 Volts
 No. 2366, Rigid Assembly (tapped 1/2" I.P.S.) is standard on most Benjamin medium base units with "X" type separable fittings, including: "SOCKET - REFLECTOR" type; "RR" type with Pendant Steel Hood. No. 2368 Rigid Assembly (tapped 3/4" I.P.S.) is optional for No. 2366.

No. 2371 Shock-Absorbing Assembly (tapped 1/2" I.P.S.) is optional equipment for No. 2366; No. 2373 Shock Absorbing Assembly (tapped 3/4" I.P.S.) is identical to No. 2371 except for tapping. Shock-Absorbing Assemblies cannot be used in Elliptical Angle Units.

All type 66 Sockets are designed for long life and easy installation. Wiring is extremely simple as the molded Bakelite cover is easily unscrewed for convenient access to heavy terminal screws. The lampholder need not be removed from the lower flange of the fitting when wiring. The single wire opening takes No. 12 or No. 10 wire. A unique finger type lamp grip is provided.

The "X" type fitting consists of a cast aluminum lower flange, a cast aluminum threaded cap and two gaskets.

Shock-absorbing Lampholders have a bronze shock-absorbing spring to counter-act vibration and prolong lamp life.

Cat. No.	Tapping I.P.S. In.	Description	Std. Pkg.	Each

SOCKET-REFLECTOR MOGUL BASE LAMP HOLDERS

1500 Watts—600 Volts

No. 4657 Rigid Assembly (tapped 1/2" I.P.S.) is standard for the following Benjamin mogul base units: "SOCKET - REFLECTOR" type; Type "RR" with Pendant Steel Hoods. No. 4666 Rigid Assembly (tapped 3/4" I.P.S.) is standard for mogul base, Elliptical Angle "SOCKET - REFLECTOR" Units and optional for units using No. 4657. No. 4670 Shock-Absorbing

Assembly (tapped 1/2" I.P.S.) is optional for units using No. 4657. No. 4672 Shock-Absorbing Assembly (tapped 3/4" I.P.S.) is optional for units requiring 3/4" tapping. Shock-Absorbing Assemblies will not fit Elliptical Angle Units.

Lampholders are of 2-piece, porcelain construction with a finger-type lamp grip. Shock-Absorbing lampholders have a bronze shock-absorbing spring between the lampholder and fitting to counter-act vibration and prolong lamp life. The "X" type fitting consists of a cast aluminum lower flange, a cast aluminum threaded cap and two gaskets.

Cat. No.	Tapping I.P.S. In.	Description	Std. Pkg.	Each
Keyless Rigid

45° UNIVERSAL JOINT OUTLET BOX ALIGNER

Listed by Underwriters' Laboratories, Inc.

No. N3380

These fittings allow lighting units to hang plumb when suspended from outlet boxes mounted on sloping ceilings. They also provide a flexible suspension which will give under the glancing blows of ladders, etc. Nos. N-3380 and N-3381 are for standard 3 1/4" and 4-inch outlet boxes; No. N-3385 for standard 4-inch square outlet boxes.

Aligner consists of a steel pipe bushing which swings forward or back on two pivot studs joining it to a steel cup. Steel parts are finished aluminum paint applied over electro-plate.

Cat. No.	Fits	Size Tap'd In.	Std. Pkg.	Each
N-3380	3 1/4" and 4" Octagon Box	1/2	10	\$1.20

3622	4" Octagon Box.....	20	\$0.45

MECHANICS' SWIVEL ATTACHMENT PLUG

Listed by Underwriters' Laboratories, Inc.

660 Watts — 250 Volts

The chuck type bushing of this plug takes a firm grip on any of the standard portable cords $\frac{3}{4}$ to $\frac{1}{2}$ inch outside diameter. Attachment is made without kinking or turning cord because the swivel shell is the only part that rotates. This plug has large molded ring which can readily be grasped with a gloved hand.

It is adaptable for rough service such as found in railroad shops and yards, industrial plants, etc.

Cat. No.	Accommodates Cord	Std. Pkg.	Each
916	$\frac{3}{4}$ " to $\frac{1}{2}$ " inc.....	10	\$1.85

LAMPHOLDER EXTENSIONS AND REDUCERS

Listed by Underwriters' Laboratories, Inc.

MOGUL BASE LAMPHOLDER EXTENSION

1500 Watts — 600 Volts

With this device the lampholder is extended 2½ inches. It allows units designed for 750-1500 watt lamps to be used with the same character of distribution. Porcelain body.

Cat. No.	Description	Std. Pkg.	Each
4396	Lampholder Extension Only.....	10	\$2.25

MEDIUM BASE LAMPHOLDER EXTENSION

660 Watts—250 Volts

No. 91 permits the efficient use of 75, 100 and 150 watt lamps in reflectors designed for the next larger size lamp, by lowering the lamp $\frac{1}{8}$ inches. The bead on body also affords a means of attaching glassware to flush receptacles. Finish is bright brass lacquered.

BENJAMIN LIGHTING EQUIPMENT

EXPLOSION-PROOF UNITS

†Listed by Underwriters' Laboratories, Inc. for Class I, Groups C and D Hazardous Locations

No. 7512CX

No. 7512

Class 1, Group C locations are atmospheres containing ethyl-ether vapors, ethylene or cyclo-propane. Class 1, Group D locations are atmospheres containing gasoline hexane, naphtha, benzine, butane, propane, alcohol, acetone, benzol, lacquer solvent vapors or natural gas.

Units are designed to withstand the pressure of internal explosions without breaking down or permitting flame, gases or sparks to escape and ignite surrounding atmosphere.

Porcelain enameled steel reflectors attach to cast aluminum body and are held in place by an aluminum band. Inner auxiliary aluminum reflectors fit around lamp neck and prevent light loss.

Lampholder forms a barrier between globe and hood so that explosions originating in either place cannot be transmitted to other. Hoods have removable inspection plug.

Lampholder and globe have metal gaskets formed onto them. All joints are close fitting, deep flanged and threaded sufficiently to prevent escape of flame.

Hoods tapped 3/4" I.P.S. standard; 1/2" when specified. Reflectors are white outside, white inside.

*200-Watt A-25 lamps may be used in 150-Watt Explosion-Proof Units. In such instances, prefix 150-Watt catalog number with "N-"; special lampholder will be furnished at no extra cost.

**Medium Base Lamp.

BENJAMIN FLUORESCENT LIGHTING

TYPE II-G DUST-TITE SERIES

Corrosion-resistant construction: This series in addition to having a completely covered porcelain enameled housing, also utilizes the following special materials: Cover frame hardware is monel metal or stainless steel. The cover frame itself is finished in porcelain enamel. The lampholder casings are fabricated of monel metal.

Standard construction: The standard construction varies from the corrosion-resistant units in that the steel cover frame is finished in white baked paint enamel. The cover hardware is electroplated and the lampholder casing is white baked paint enamel over steel.

Mounting: Two gasketed cast-iron flanges mounted on 47 1/2" centers are tapped 1/2" IP size standard (3/4" tapping is available).

FOSTORIA LOCALITES

**MODEL
55-BH-701**

For lighting relatively small critical work areas on variety of machine tools such as lathes, grinders, drill presses, assembly work benches. Provides oval light pattern, 290 footcandles at 12" from reflector. Overall length 36". Flexible, rugged. Finish vista green with white interior reflector. Uses 100 watt lamp max. Levolver switch.

Model 55-BH-701, each\$13.45

Model 5 BH-701, same as above but 26" overall length, each\$11.15

Listed by Underwriters' Laboratories, Inc.

**MODEL
55-BP-701**

For quick, accurate and comfortable seeing for machinery, assembly, inspection and other tasks requiring wide angle, high level lighting in 24" diameter circular pattern with 300 footcandles at 12" from reflector. Reflector 6 7/8" diameter. Finish vista green, white interior reflector.

Model 55-BP-701, each\$14.35

Listed by Underwriters' Laboratories, Inc.

**MODEL
18-HX-400**

Lighting characteristics and reflector identical to model 55-BH-701. Different base and arms. Overall length 26 1/2". Flexible arm. Finish vista green.

Model 18-HX-400, each\$12.45

Listed by Underwriters' Laboratories, Inc.

**MODEL
55-F28M-701**

For sewing machines, business machines, chart tables, other small areas where medium intensity, coolness and compactness are necessary. Reflector excellent for black light when equipped with BLB lamps. Provides 18" rectangular light pattern 155 footcandles at 12" from reflector. Uses two T-5 eight watt fluorescent tubes. Finish vista green. Reflector interior reflective white.

Model 55-F28M-701, each\$23.85

**MODEL
8-VCX-702**

Top ventilated, cool reflector with wide angle distribution and high level illumination. Recommended for larger critical seeing areas on machine tools, assembly and inspection benches. Mounting base 12 1/4" high. Horizontal arm 18" long. Provides

circular light pattern 28" in dia. 260 footcandles at 12" from reflector. Reflector dia. 6 7/8". Uses 100 watt lamps max. or R30 reflector lamp. Finish vista green with white interior reflector.

Model 8-VCX-702, each\$13.45

Listed by Underwriters' Laboratories, Inc.

**MODEL
55-VCX-701**

Lighting characteristics and reflector identical to Model 8-VCX-702. Different base and arms. Overall length 31 3/4". Very flexible and rugged. Levolver switch.

Finish vista green, white interior reflector.

Model 55-VCX-701, each\$14.95

Listed by Underwriters' Laboratories, Inc.

**MODEL
29-R-901**

Attractively styled of high impact "Durez" plastic — cool to touch. For critical work area lighting on industrial sewing machines, small machine tools, office machines. Circular light pattern 20" dia. 150 footcandles 12" from reflector. Reflector

black with white interior. 15" flexible chrome plated arm. Uses 60 watt lamp max.

Model 29-R-901, each \$6.60

INNER SHIELD FOR VCX REFLECTORS

Provides extreme coolness when using 100 watt lamp. An accessory easily attached inside of VCX Ventilated Reflector. Made of aluminum with high mirror finish.

Model VCX Inner Reflector Shield..\$3.65

NYLON KOOLSHIELD FOR BH and HX REFLECTORS

Fits all old model as well as new model Localites with half shade reflector. Positive protection from hot reflector when using 100 watt lamp.

Nylon Koolshield\$1.25

FOSTORIA LOCALITES

**MODEL A
MAGNIFIER VIEWER**

Illuminated viewer combines quality, distribution-free magnification with independently controlled fluorescent lighting to give sharp, clear view of finest work details. 6" x 6" optically ground acrylic lens. Independent adjustment of lens and light. Uses two T-5 4-watt

fluorescent tubes. Two 10" adjustable arms. Finish hammerine silver enamel. Reflector interior reflective white.

Model A Magnifier, each\$60.00

**MODEL D5
MAGNIFIER
VIEWER**

Lens and light same as model A Magnifier. Portable. Ideal for for sales counters, artists, dentists, physicians and industrial uses. Base has rubber

feet. Overall size 12" x 10" x 9" high.

Model D5 Magnifier, each\$53.25

**MODEL
16-BM-702**

For industrial sewing machines and other critical work areas where high intensity (8" diameter pattern) concentrated illumination of 240 footcandles, at 6" distance from reflector is required.

Mounting base 12 1/4" high. Horizontal arm 21" long. Reflector is high impact Durez plastic with inner reflector of alum. Reflector dia. 3 3/8". Uses T-8 25 watt double contact candelabra lamp. Also low voltage lamps. Finish, black.

Model 16-BM-702, each\$11.10

**MODEL
230-F**

Floating arm model for many uses in home, office and factory including drawing boards, desks, study lights for students. 7" dia. shade provides circular light pattern. Can be quickly and easily positioned and "stays put." Weighted table base 8 1/2" x 8 1/2". Extended length 30". Also available in 45" extended length. Other models with clamp bases. Finish pearl grey, black, tan, California White.

Model 230-F, each\$27.75

**MODEL
745**

Floating arm model for assembly minute parts, fine needlework, quality control inspection, delicate repairs. Combines light and 5" dia. precision ground lens. Magnifies 2, 3 or 4 diopter. Extended length 45". Also available in 30" extended length. Uses 22-watt circline fluorescent tube. Quickly and easily positioned. Clamp base. Finish pearl grey, black, tan, California white.

Model 745, each\$44.50

TYPE FEA EXPLOSION-PROOF FLOODLIGHTS

Explosion-Proof and Weather-Resistant (Raintight)
Class I, Groups C and D

Housings are of copper-free aluminum construction and are easy to handle in portable use. Body adjustment is 360° horizontal and 270° vertical movement. Ratings: 150 watts and 300 watts.

Also available with portable adjustable tripod and for permanent mounting without wheel base.

The front glass ring screws into the body and is provided with lugs at four points to facilitate removal for lamping. The plain, heat resistant front glass is clamped into position by means of an internal ring.

VAPOR-TIGHT PIT AND SUBWAY FLOODLIGHTS

For Flush or Surface Wall or Ceiling Mounting

Provide perfect lighting for pits, tunnels, under-passes, subways, wash-racks, etc. Plain, heat and impact resisting front glass, with smooth, flat surfaces on both sides. Reversible hinged wire guard, when specified.

Types listed below have a 1/2" conduit hub at each end, but can be tapped 3/8", 1" or 1 1/4", when specified, at no extra charge. Blank hub on back can also be tapped up to 1 1/4" when specified.

Body is copper-free cast aluminum, natural finish and cover is ferrous alloy, cadmium plated.

Lamps used are 100-watt A-21, 150-watt A-23 or 200-watt A-25.

TYPE 15360 SEALED BEAM GYRALITE®
360 Degree Dual Flash Revolving Beam
Patent Nos. D-177,470 & 2,846,663

Heavy Duty Copper-free Aluminum Alloy Housing with Glass Enclosure. For use on various types of moving equipment or to mark hazardous areas. The beam of the sealed beam lamp is reflected at right angles by the dual inclined plane reflector, projecting 96 flashes per minute in a horizontal plane. Available for service voltages ranging from 6 to 110 volts.

Complete information on pipe mounting base, colors, construction, and prices will be furnished on request.

THOMPSON CABLE AND CHAIN FITTINGS
TERMINAL LINKS

9000-9002

9010-9012

Terminal links are required at the terminal or operating end of each hanger operating line.

For Chain

Cat. No.	Description	Wt. Lbs. Per 100
9000	Link and Clevis, light, will pass through pulleys, 3/4" conduit.....	2.19
9002	Link and Clevis, heavy, stop link for No. 33 and No. 4 chain only.....	4.75

For Cable

9010	Link only, light, will pass through pulleys and 3/4" conduit.....	1.32
9012	Link only, heavy, stop link only.....	4.63

CHAIN AND CABLE TERMINAL FITTING

No. 8135 Locking Hook

For either size terminal link. Drilled for padlock with 1/4" bail or 5/8" rod (when mounted in groups). Malleable iron, hot dipped galvanized. Mounting holes for 5/8" bolts. Weight, .20 lbs.

SERVING SLEEVES

Cat. No.	Description	Wt. Lbs. Each
9200	Serving Sleeve, required for all cable servings02

AIRCRAFT CABLE

1/8", 7 x 19, preformed aircraft cable is the most satisfactory material for hanger operating lines.

Preformed to prevent fraying when cut. Its low weight per foot permits longer runs between pulleys for maximum installation economies.

Size In.	Material	Rated Strength Lbs.	Wt. Lbs. Per 100'
1/8"	Steel, Galv.	2000	2.88
1/8"	Stainless Steel	1900	2.88

THOMPSON SERVING TOOL AND CABLE CUTTER

SERVING TOOL

The only satisfactory tool for applying 9200 Serving Sleeves.

Cat. No.	Description	Wt. Lbs. Each
9260	Serving Tool	5

CABLE CUTTER

Recommended as the most satisfactory cutter for field use with 1/8", 7 x 19 aircraft cable.

Cat. No.	Description	Wt. Lbs. Each
9280	Cable Cutter	3

CHAIN AND HAND-LINES

CHAINS

Arc Lamp

Machine

Available in two types: cut-link arc lamp chain and welded-link machine chain. Arc lamp chain is available in either steel, hot dipped galvanized, or stainless steel; machine chain in hot-dip galvanized finish only.

Size No.	Construction	Rated Tensile Strength		Wt. Lbs. Per 100'
		Steel	Stainless Steel	
35	Arc Lamp	550	650	7
33	Arc Lamp	725	9
4	Machine	750	13

HAND-LINES

Hand-lines are fabricated at the factory from either No. 4 machine chain or 1/8", 6 x 42, plow steel, galvanized, tiller rope. A choice of connecting fittings, depending on type of terminal link to be used, also is available.

Chain	Cat. No. Cable	Connecting Fittings	For Terminal Links No.
4-A*	9525*	9025-SS Connecting Link	9000, 9010
4-B**	9533**	9300 Snap Hook	9002, 9012

*Will pass through pulleys and 3/4" conduit
**Stop Link.

THOMPSON DISCONNECTING AND LOWERING HANGERS

For Indoor and Outdoor Use

The Thompson Hanger is essentially a latching type overhead disconnecting switch and a fixture raising and lowering device combined. It consists of two members, upper and lower.

The upper member carrying the upper contact assemblies to which the current feed wires are attached, is firmly secured to the supporting structure.

The lower member carries the engaging lower contact assemblies wired to the lighting fixture which it supports.

Suitable for hand-operated installations only. 60 pounds maximum recommended gross weight. For use with aircraft cable or types and sizes of

chain listed on a following page. Standard Fixture Adapter for 2-pole hangers: Type M 1/2" male pipe thread; for 4-pole hangers: Type M 3/4" male pipe thread. Specify adapter type required as suffix to hanger catalog number: AL-2370-M1/2".

Ratings: Underwriters' Laboratories: 15 Amps., 600 Volts; 30 Amps., 250 Volts, A.C. 10 Amps., 250 Volts, D.C.

Note: 2-pole hangers are for single 2-wire circuits only. 4-pole units can be used in any combination of circuits within capacity ratings: (1) two circuits 2-wire each, (2) two circuits 3-wire and (3) three circuits 4-wire.

OPEN-FACE MODELS

The most flexible and universally applicable design, the open face sheave housing provides for chain or cable delivery at any desired vertical angle from 15° above to 90° below horizontal—except as limited by the diameter of the reflector. This versatility is identical in both 2-pole and 4-pole types.

THOMPSON PULLEYS

Thompson pulleys are required for almost all installations of Thompson Hangers, as a means of making necessary changes in direction of the hanger operating lines, by-passing obstructions, as well as supporting long horizontal runs of chain or cable. Pulley housings are of cast aluminum alloy, heat treated and aged. The housings closely shroud the wheels which are deeply grooved. Wheels are of special composition, hard rubber. Axles are of high strength aluminum alloy.

CORNER PULLEY

Supplied with all Unit Packages. Bolt hole spacing to take U-bolts for 1 $\frac{1}{4}$ " or 1 $\frac{1}{2}$ " pipe brackets as specified.

THOMPSON SHOCK ABSORBERS

X-Ray View of Shock Absorber Showing Method of Wiring Model No. 50

The Thompson Shock Absorber is designed to afford lamp filaments and the entire lighting fixture, the maximum of protection from shocks and vibration so frequently found in industrial applications. These shock absorbers are flexible as to movement in all directions, easy to apply, compact, of ample strength, safe and long lived. The construction is simple. There are but four parts, and since there are no bolts, screws, or nuts used in the assembly, there are no parts to work loose, fall out, or rust in place.

The parts are a bell-shaped body, an open spring plate and a stem, all of cast 220T4 aluminum alloy; and a steel spring. All springs are heavily cadmium-plated. The design of the stems incorporate two safety features. The guiding ribs which engage appropriate guiding notches in the spring plates, prevent the rotation of lighting fixtures and consequent twisting and damage to conductor wires. The spring seat collar at the top prevents the stem from passing through the opening in the spring plate in case of spring breakage. The design of the body and spring plate is such that even with a broken spring it would be practically impossible for the two parts to become disengaged under any normal movement.

The Junior, or smaller of the two sizes, with three interchangeable springs, each of different load-carrying capacity is designed for fixture weights from 1½ to 12 pounds. The Heavy-Duty size has four interchangeable springs, each having a different load-carrying capacity, to cover the range of fixture weights from 5 to 75 pounds.

There are two models of the Junior size and six models of the Heavy-Duty size. The differences are in the top and bottom connections with the exception of Model No. 70 with the loop top in which a split-top stem is used to permit direct wire entrance. This shock absorber also serves as a fixture adapter. This type of stem may be used if desired, in Models No. 50 and No. 60 shock absorbers, but the stem of the "50" and "60" cannot be used in the Model No. 70.

Two sizes of bottom or fixture connection of all shock absorber models is now available, ½" and ¾" male pipe thread. Where a larger fixture connection is desired, a suitable bushing is used.

Experience has proved Thompson Shock Absorbers are outstanding for prolonging lamp life and reducing fixture maintenance. They also accomplish similar results with many other suspended devices in a wide variety of useful applications.

HUB WIDE BEAM FLOODLIGHT

300/500 watt diffuse pattern floodlight for use as tonal flood on teaser batten or for medium intensity floodlighting elsewhere on stage. With 15" matte surface ellipsoidal Alzak reflector, color frame grooves, yoke adjustments for angling, 3' asbestos lead, 15A or 20A, 2-pole plug.

No. 8360 Floodlight.....each \$26.48

CAPITOL STAGE LIGHTING EQUIPMENT

No. 901

**No. 901 FOLLOW SPOTLIGHT
(1000-1500 watt)**

Rugged, versatile. Designed to throw an even white 18" head-spot at distance of 100' or to flood an entire stage. (No special wiring required). Rear operated precision iris instantly adjust size of spot. Rear operated shutter masking device for special effects. 6 magnetically held color-frames in built-in color box. Hinged hood. Three-legged castered base. Lamp includedeach \$250.00

MARK IV

MARK IV TROUPER CARBON ARC FOLLOW SPOTLIGHT

Designed for theatres where distance from booth to stage is approx. 200'. Spotlight is complete as illustratedeach \$1300.00

**6" ELLIPSOIDAL SPOTLIGHTS
(500-750 watt)**

No. 650 — Front accent light. FEATURES: four built-in framing shutters, two 6"x9" heat resistant lenses, alzak reflector, color frame, yoke and pipe clamp.....each \$60.00

No. 651 — Shall include one 6" step lens with ceramic painted riserseach \$55.00

No. 652 — Shall include one mounted 3" iris.....each \$76.50

No. 653 — Shall include one mounted 3" iris with a follow handleeach \$77.50

No. 654 — Same features and shall be fitted to receive pattern templateseach \$77.50

No. 655 — Same features and shall include only one 6"x9" heat resisting lens.....each \$55.00

No. 6504 — Same features but with two 4 1/2"x6 1/2" plano convex lenseseach \$60.00

No. 850 8" ELLIPSOIDAL SPOTLIGHT

(500-750-1000 watt)

Front accent light for distance of 40' to 60'. FEATURES: Same as No. 650 but with one 8"x10" heat resistant lens.....each \$95.00

No. 8508 8" ELLIPSOIDAL SPOTLIGHT

(1000-1500-2000 watt)

Front accent light for distances to 100'. FEATURES: Same as No. 850 but with mogul prefocus socketeach \$130.00

No. 195 6" PLANO CONVEX SPOTLIGHT

(1000-1500 watt)

A most effective follow spotlight mounted on a stand. Designed for use up to 50', this is also a basic unit to receive revolving color wheels and special effect devices. FEATURES: 6" plano convex lens, 25' of cable with full connector, long focusing device for simplicity of operation, full telescoping stand. Color box is availableeach \$82.00

No. 195

**No. 1001 FOLLOW SPOTLIGHT
(2100 watt)**

The most powerful incandescent ever made. An ideal follow spot for distance to 150'. Comes with magnetically held 6 color changer, step down transformer, rear controlled iris and shutter handles, 25' rubber cable and plug. (No special wiring required)....ea. \$550.00

No. 1001

**No. 904 FRESNEL SPOTLIGHT
(75-150 watt)**

For photo highlights or displays. FEATURES: reflector, color frame, variable external focus, yoke and base, frame and 6' of cord and plug.....each \$14.00

**No. 280 6" FRESNEL SPOTLIGHT
(250-500-750 watt)**

High intensity center for dramatic stage fill or area lighting. FEATURES: 6" fresnel lens, lead wires, hinged front door, frame yoke and pipe clamp, variable external focus, medium prefocus socketeach \$24.00

No. 904

**8" FRESNEL SPOTLIGHTS
(1000 watt)**

No. 905 — Designed to throw to 40'. FEATURES: mogul screw socket, variable external focus, asbestos leads, 8" fresnel lens, specular reflector, yoke and pipe clampeach \$60.00

No. 905A — Same but with mogul prefocus socket.....each \$60.00

No. 905OV — Same but with oval beam lens.....each \$68.00

No. 905-PO — Same with screw feed. Pole operated.....each \$92.00

**12" FRESNEL SPOTLIGHTS
(1000-2000 watt)**

No. 912 — An efficient soft edged spotlight designed for areas where high intensity is required. A basic TV studio light, it is a perfect unit for back, top or key lighting from 15' or more.....each \$170.00

No. 912-PO — Same but with pole operated features...ea.\$199.00

No. 913 — Same features as No. 912 and includes telescoping stand and balanced caster base instead of the pipe clamp, 25' of rubber cable and built-in fully enclosed switcheach \$257.00

No. 280

No. 905

**No. 916 16" CAPCOLITE
(5000 watt)**

Largest fresnel spotlight made by Capitol. Provides an immense "punch" of light that can be controlled from 20' to 55'. Same features and flexibility as the 2000 watt Capcolites but with the greatly increased intensity provided by the 16" lens and 5000 watt bulb.....each \$260.00

**No. 1 OLIVETTE
(500-1000-1500 watt)**

Stage side light for even uniform scene illumination. FEATURES: telescoping stand, reflector, double color frame grooves, universal swing bracket, base and 25' cable and plug.....each \$45.00

No. 1

CAPITOL STAGE LIGHTING EQUIPMENT

No. 6614

**No. 6614 SCOOP FLOODLIGHT
(300-500 watt)**

An intense flood for photographic work, TV studio or theatrical eye lighting. FEATURES: 14" ellipsoidal reflector, asbestos leads, frame holder, yoke and pipe clampeach **\$31.00**

No. 661

**No. 661 SUPER SCOOP
(750-1000-1500 watt)**

For theatrical or TV lighting where intense wash or backdrop fill is required. FEATURES: same as No. 6614 but with 18" ellipsoidal reflectoreach **\$39.00**

BORDERLIGHTS

For general stage lighting and toning.

AL — For stages with height exceeding 35'. Equipped with reflectors and frames, 300-500w lamps**\$21.00/ft.**

AB — For stage height of 30'-35'. Equipped with reflectors, frames and hangers, 150-300w lamps**\$21.00/ft.**

PR40 — For stage height of 20'-30'. Combination frame with glass roundels, available in 3 or 4 colors complete with hanging devices, 75-300 R40 lamps.....**\$17.00/ft.**

520 — For low ceiling stages, 4½" on center, complete with reflectors and colored glass roundels, 75w general service lamps**\$14.00/ft.**

528 — For stage height of 15'-25'. Equipped with reflectors, glass roundels, retaining ring, hangers and splice box, 75-100-150w lamps**\$15.00/ft.**

532 — For stage height of 20'-35'. Same features as the above No. 528**\$17.00/ft.**

MINI-PORT DISPLAY SPOT

One of the world's smallest and most versatile fresnel, the 616 unit consists of an approved molded receptacle with capability to accommodate a 75, 100 or 150 watt G-16½ single contact bayonet base lamp; a spherical special processed aluminum reflector, a Capitol heat resistant 3" diameter fresnel type lens. All enclosed in a streamlined cast aluminum housing not larger than 8¾" in length, 6½" knob to knob width and 7½" in height.

No. 616 — Includes 3" diameter fresnel type lens.....each **\$21.00**

No. 617 — Includes a single 1¾" x 3¾" double convex narrow beam lens, two plano convex lenses, 1½" x 2¼"; objective spread is 15 degreeseach **\$46.00**

No. 618 — Includes two 1¾" x 3¾" double convex medium spread lenses, two plano convex lenses, 1½" x 2¼"; objective spread is 28 degreeseach **\$47.00**

No. 619 — Includes three 1¾" x 3¾" double convex wide spread lenses, two plano convex lenses, 1½" x 2¼"; objective spread is 45 degreeseach **\$48.00**

No. 520

No. 528

No. 532

No. 616

No. DS-100

DISAPPEARING FOOTLIGHTS

The DS-150 — 150 watt footlights are 5'2" sections. Each section contains 9 sockets, wired for 3 colors. Diffused spun aluminum alzak processed reflectors with natural colored, heat-resisting glass roundels held in place by slip-type retaining rings. Mercury switches in each section automatically turn off the light when the footlight troughs are closed. The DS-100 for 60, 75 or 100 watt lamps are built and wired the same as the DS-150, except that each section contains 12 sockets and reflectors. These disappearing footlights should be installed within the stage flooring and therefore are generally used in new construction or in remodeling.

DS-100 Footlight.....each **\$137.50**
DS-150 Footlight.....each **145.00**

No. 191

REVOLVING CRYSTAL BALLS AND SHOWERS

These units always add color, sparkle, mood and intrigue wherever and whenever used. Simple to use, just plug it in. A must for every school dance function.

Countless tiny colored lights seem to float in an ever-changing pattern when several colored spots are directed at the shower or ball. Available sizes are:

No. 191 18" Shower ..ea. **\$150.00**
No. 286 24" Shower ..ea. **175.00**
No. 193 30" Shower ..ea. **280.00**
No. 194 18" Ballea. **285.00**

No. 194

GRIDIRON JUNCTION BOXES

Constructed of 14 ga. cold rolled steel and measure 15"x10"x4". Finished in flat black. All units furnished with cable clamps and knockouts.

No. DS-150

CENTURY EDKOTRON® LIGHTING CONTROL PACKAGED SYSTEM

The EDKOTRON is a low-cost, lightweight, modular, portable, electronic dimming system. It is a complete control facility which may be expanded as budget or other requirements dictate. The system can include either 1800 watt or 3000 watt silicon controlled rectifier dimmers. It provides remote control at low cost. Two-scene presetting is possible by adding additional units. A six-1800 w dimmer cabinet, with its control unit, weighs less than 40 pounds and is easily portable.

CONTROL UNIT

One Control Unit will control six dimmers in one #260 Dimmer Unit or six dimmers in two #266 Dimmer Units.

The Control Unit includes individual calibrated controllers, individual function switches ("Independent-Off-Master"), a master controller, a blackout switch, and a key switch.

DIMMER UNIT

The Dimmer Unit contains controlled rectifier electronic dimmers with no forced draft fans or blowers required. They provide full intensity variations from 0 to 115 volts.

Dimmer Units come in two wattage classifications. The #266 series dimmer units will accept a combined load of up to 3000 watts. Series #260 will control up to 1800 watts. There are six 1800 watt dimmers contained in the 260 Series; three 3000 watt dimmers are found in each 266 Dimmer Unit. Two 266 Dimmer Units may be controlled by one Control Unit. Dimmer Units may be supplied with several types of load connectors.

MASTER CONTROL UNIT

The Master Control Unit serves two purposes.

1. As a master, it can control up to a maximum of six #261 Control Units. In this condition, each individual controller has a master handle (located on the Control Unit), and all Control Units have a grand master (located on the Master Control Unit).
2. The Master Control Unit will also operate as a cross fader; this allows presetting of Control Units. In this case, two Control Units are attached to the same Dimmer Unit. The Master Control Unit allows the operator to cross fade between the two Control Units, thus permitting the presetting of the Dimmer Unit controls not "in use."

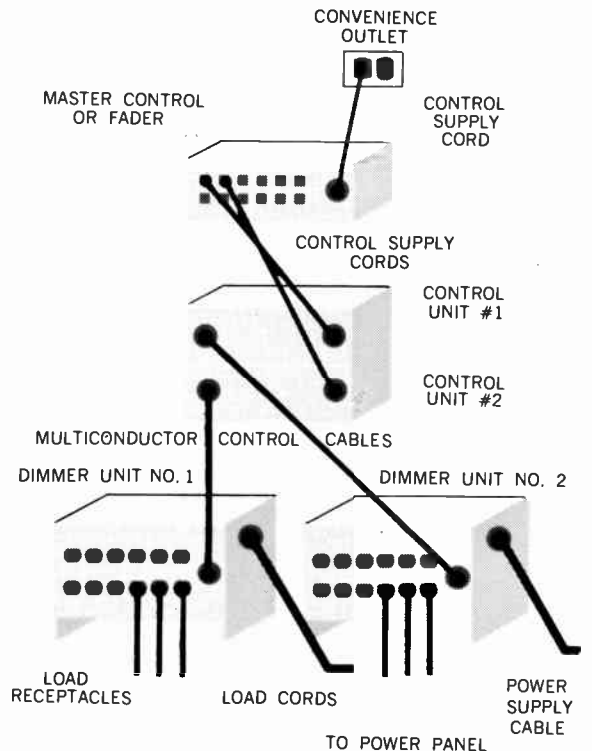

SINGLE DIMMER UNIT AND CONTROL

SINGLE DIMMER UNIT WITH TWO SCENE PRESETS AND FADER

SEVERAL DIMMER UNITS AND UNIT CONTROLS CONNECTED TO ONE MASTER CONTROL

KLIEGL ARCHITECTURAL LIGHTING EQUIPMENT

KLIEGL WALL WASHERS

Smooth illumination from ceiling line to floor line with inconspicuous light source. Spacing of 3 1/2' from wall on 3 1/2' centers provides uniformly even light wash.

Cat. No.	Lamp	Price
2174	75R/FL	\$35.00
2175	150R/FL	55.00
2177	150/300R/FL	75.00
2178	Q500T3	85.00

NOTE: Supplied with plaster ring and greenfield connector. For mounting in tile ceilings, add Suffix "T" to number (for overlap plate and bar hangers). Add \$5.00 List.

KLIEGL LENS STRIPLIGHTS

Delivers uniformly even wash of light over vertical surfaces. Used close to vertical surfaces, behind valances or recessed in ceilings. Accommodates standard 25 or 40 watt T-10 reflector lamps above heat-resistant Fresnel lenses. Limited beam direction adjustment possible. Lengths in 6" increments. Prices on application.

KLIEGL ADJUSTABLE BEAM DOWNLIGHTS VERTICAL MODEL

Ellipsoidal type units with slide-in shutters for shaping beam. Wide-beam units for general lighting where some cut-off of spill light is desirable; narrow-beam units for high ceilings or coverage of small areas, with tight beam control.

Cat. No.	Beam Spread	Watts	Lamp No.	Price
2164	65°	{250	{250/T14/9	\$ 63.50
2164NB	28°	{500	{500/T14/7	63.50

KLIEGL specializes in custom-engineered equipment for a wide variety of applications. Contact GRAYBAR for recommendations and assistance.

KLIEGL ARCHITECTURAL LIGHTING EQUIPMENT

KLIEGL PINHOLE DOWNLIGHTS

Vertical Projection: Choice of bottom or top relamping models for recessed ceiling installation—both available with tungsten-halogen lamps for high-intensity lighting or standard lamps for low-intensity lighting. Objective lens systems and adjustable shutters that permit shaping of beam to circular, square, or irregular patterns. Primarily effective for dramatic accent lighting above tables, lecterns, displays, models, pianos, special furniture arrangements.

Angular Projection: Choice of bottom or top relamping models—both available with tungsten-halogen lamps for high-intensity or standard lamps for low-intensity lighting. Direct illumination over sharply defined area adds unusual decorative strength to pictures, murals, fountains, sculpture. Adjustable shutters for full light-pattern control. Greater brilliance of tungsten-halogen units permits use under brighter ambient light conditions.

Cat. No.	Projection	Relamping	Watts	Lamp No.	Price
2144	Vertical	Top	100	100G16½DC	\$51.00
2145	Vertical	Bottom	100	100G16½DC	55.00
2146	Angular	Bottom	100	100G16½DC	55.00
2147	Angular	Top	100	100G16½DC	55.00

2151Q*	Angular	Top	250	250Q/CL	72.00

(NOTE: Standard wide beam unit has field 12' in diameter at 10' throw. For narrow beam, add suffix "N" for 7' field diameter at 10', and increased brightness.

Plaster frame, and greenfield connector supplied.

For Dry Ceiling mounting, add suffix "T", and \$5.00 list for overlap face plate and bar hangers.

*Fireproof construction only.

KLIEGL PICTURE-LIGHTING PROJECTORS

Fitted with an optical system and four-way adjustable cut-off shutters. Size and shape of light beam easily regulated to confine illumination to particular area or object. Variety of mounting arrangements (specify wall bracket or round base). Furnished with attachment plug and 9' extension cord. Adjustable yoke.

Cat. No.	Wattage	Diameter of Field @ 10'	Lamp	Price
276	100	6'	100G16½DC	\$37.00
277	250	7'	250Q/CL	50.00
277NB	250	3'	250Q/CL	60.00

KLIEGL RECESSED LENS Open Cone Type Downlights

Soft but intensely directed lighting from ceiling up to 20' high, Alzak reflector and Fresnel lens arrangement—with black-painted risers for low surface-brightness and maximum beam control. Virtually no side glare at normal viewing angle.

SHALLOW TYPE

Shallow units are available in the 8" lens Open Cone Type for use where ceiling depth is limited and standard units cannot be used. Standard finish; white.

			1000	1M/T24/12	

NOTE: Complete with greenfield connector, mounting plate, and plaster ring for aperture.

KLIEGL SCR SYSTEM

Architectural Lighting Control

Remotely controlled solid state incandescent dimming system for restaurants, ballrooms, lecture halls, museums, commercial exhibits and displays. Complete with r.f. and line noise filters, but without secondary circuit breakers. (2400-watt-capacity dimmers require no secondary circuit breaker on load side of panel.) Dimmers convection cooled; low-voltage wiring to control.

R-67/26C	2	6.0 KW	12.0 KW	785.00
R-67/36C*	3	6.0 KW	18.0 KW	1125.00

NOTE: Panel Size: 18" wide, 28" high, 6" deep. For surface or semi-recessed mounting, as ordered.

Panel complete with primary circuit breaker protection for each dimmer. For single or three phase service.

*Control voltage power supply external to panel, and included.

1—Low Voltage Remote Control Station (for each dimmer) is included with the panels as listed. Custom control on application.

KLIEGL THEATRICAL—TV LIGHTING EQUIPMENT

KLIEGLIGHTS

Units project high-intensity field of light and provide well-defined illumination cut-off. Ellipsoidal reflector and lens system coordinated with adjustable framing shutters. All units complete with yoke, C-clamp, 36" leads, and grounded connector.

1340 SERIES—Quartz Lamps

KLIEGL THEATRICAL AND TELEVISION CONTROL SYSTEMS

SYSTEM 70—Rehearsal/Performance Memory Lighting Control. Infinite Presetting.

CARD-READER CONTROL — Multi-Scene Presetting System with re-usable 36 channel preset cards.

SAFPATCH—Automatic "cold-patch" cord and plug type cross-connect system.

ROTOLECTOR—Automatic "cold-patch" rotary switch type cross-connect system.

KLIEGL SCR DIMMERS—Self-contained, plug-in dimmers in 3KW, 7KW, and 12KW modules. Automatic current-sensing protection. Adjustable dimming curve.

KLIEGL R-67 DIMMERS—Panel-mounted SCR dimmers in 2.4KW, 3KW, and 6KW capacities. Low voltage remote control. Architectural dimming applications.

KLIEGL TV FRESNEL SPOTLIGHTS

For quartz lamps, color or monochrome broadcasting. Used for key or back lighting. Variable focus from minimum spot to maximum flood with smooth beam and soft-edged field.

Cat. No.	Wattage	Lamp	Lens Dia.	Price
3507	650	FAD	6¾"	\$ 43.00
3525	1000	FER	8"	79.00
3527	2000	FEY	12"	151.00

NOTE: High performance units preferred by color broadcasters. All units with yoke, c-clamp, diffuser grooves, 36" leads with grounded connector.

KLIEGL SCOOPS

Smooth base light at high intensity levels. Includes yoke and C-clamp, 36" leads, grounded connector. Units use tungsten-halogen lamps. Shown on pantograph.

Cat. No.	Wattage	Lamp	Price
3450	500	Q500T3/4	\$43.40
3451	1000	Q1000T3/4	48.00

"Punch Scoop" — High-intensity narrow beam unit.

3440	1000	FER	\$68.00
------	------	-----	---------

PANTOGRAPHS: Movable, counter-balanced fixture support.

Cat. No.	Maximum Load	Price
111TV	10 lbs.	\$55.00
112TV	20 lbs.	55.00
113TV	33 lbs.	75.00

KLIEGL Q-LITE FLOOD

For Quartz. Constricted-space applications; base and key lighting. Intense, adjustable light. Sharp barn-door cut-off permits framing RP screens with no spill.

Cat. No.	Wattage	Typical Lamp	Price
3430	500/1000	FDF	\$67.00

NOTE: Furnished with pipe clamp, 3' cable, grounded connector. Available with barn doors, at extra cost.

KLIEGL NOOK LIGHTS

For Quartz. Specifically designed for unobtrusive placement to permit concentrated flood lighting from cramped quarters. Easily mounted and dismantled.

Cat. No.	Wattage	Typical Lamp	Price
3432	300/500	EHN	\$50.00

NOTE: Furnished with end brackets, 3' cable, and grounded connector.

CROUSE-HINDS FLOODLIGHTS

MODEL GAL MERCURY PROFILE LIGHT™

General area mercury and metallic additive floodlights. Provide predictable rectangles of even, efficient light. Asymmetrical (off-center) reflector punches light away from pole. Designed to get the most out of the new, smaller metallic vapor light source and better control of today's mercury vapor lamp. With metallic vapor lamp, gives astonishing color quality.

Sleek design adds esthetic appeal to any project. Aluminum housings can be color-customized (optional) for added distinction. Integrated design permits blending of different sizes into a single compatible system.

More than 85% of the beam generated by the reflector is utilized on the surface to be lighted—fewer poles and fewer fixtures in many areas. Can be equipped with the new 400-watt Lucalox lamp by General Electric, offering 105 lumens per watt with maximum optical control.

Cast aluminum door frame with tempered glass lens. Alzak aluminum main reflector hinged to door frame. Pre-wired integral ballast. Galvanized steel trunnion arm.

Unretouched photographs* shown below illustrate comparisons of controlled beam in Profile Light with other types of floodlights.

Profile Light

Predictable rectangular pattern—even intensity over the entire pattern—covers large area.

Controlled beam—minimum of waste and glare—85-100% of beam is usable—good punch away from pole.

Rectangular Floodlight

Beam spread wide, but thin—uneven lighting—drops off in intensity away from pole.

40% of beam is wasted in spill and glare.

Street Light Luminaire, Type IV

Highest intensity directly under pole—no punch away from pole.

Not a controlled beam.

Elliptical Floodlight

High elliptical beam spot at center—uneven lighting.

25% of beam is wasted in spill and glare.

Parabolic Reflector Floodlight

Extreme hot spot at center of beam.

25% of beam is wasted in spill and glare.

*These unretouched photographs were taken from the same location at the same camera exposures on the same film with all floodlights using metallic vapor lamps and mounted at the same height.

CROUSE-HINDS FLOODLIGHTS

MODEL MVE MERCURY FLOODLIGHTS

Heavy duty mercury and metallic additive floodlights. Cast aluminum corrosion-resistant housing and door; weatherproof. Alzak aluminum reflector. Choice of lenses. Cable included.

Cat. No.	Reflector	Lens	List Each
Model MVE-14 — 400 Watt			
48089	Wide Beam	Smooth Beam	\$103.00
48090*	Wide Beam	Wide Spread	103.00
48091	Wide Beam	Diffusing	103.00
48092	Narrow Beam	Smooth Beam	103.00
Model MVE-16 — 1000 Watt†			
48093	Wide Beam	Smooth Beam	129.00
48094*	Wide Beam	Medium Spread	129.00
48095*	Wide Beam	Wide Spread	129.00

*Spread lenses are installed for maximum spread in horizontal plane. If so specified on order, they will be installed for maximum spread in vertical plane at no extra charge. Some MVE series floodlights meeting U.L. Standard 595, "Marine Type Electric Lighting Fixtures", are available. Information on request.

†Maximum lamp size: 700 watts when floodlight is directed upward above horizontal.

MODEL MVF MERCURY FLOODLIGHTS

General purpose mercury and metallic additive floodlights. Die cast aluminum receptacle housing. Alzak aluminum front and rear reflectors; rear reflector hinged for relamping. Weatherproof. Heat and impact-resisting lens. Cable included.

Cat. No.	Description	List Each
Model MVF-4—400 Watt		
48096	Narrow Beam Reflector	\$69.00
48097	Medium Beam Reflector	61.00
48098	Intermediate Beam Reflector	59.00
48099	Wide Beam Reflector	54.00
Model MVF-10—1000 Watt		
48100*	Medium Beam Reflector	85.00
48101	Wide Beam Reflector	56.00

*Has heat-resistant smooth beam lens held by clamp ring; others have heat-tempered lens, spun-sealed to reflector.

CROUSE-HINDS FLOODLIGHTS

MODEL QB QUARTZ FLOODLIGHTS

Heavy duty quartz floodlights. Cast aluminum corrosion-resistant housing and door with heat and impact-resistant glass. weatherproof. Alzak aluminum reflector. Stem or trunnion mounting.

Cat. No.	Reflector	Mounting	List Each
Model QB500 — 500 Watt†			
47793	Narrow Beam	1/2" Stem	\$29.00

48147*	Wide Beam	Trunnion	42.00
48149	Same as No. 48147	except with spec. high temp. lens	51.00

†200 watt, T2 1/2 clear or 500 watt, T3 clear or frosted.

††1500 watt, T3 clear or frosted, 208, 220, 240, or 277 volts. Or 1250 watt, T3 clear or frosted.

*Do not aim above horizontal. If aiming above horizontal is required use unit with special high temperature lens as indicated.

**Do not aim above horizontal.

MODEL QBE QUARTZ FLOODLIGHTS

Explosion-proof quartz floodlights for Class I, Groups B and D locations. Cast aluminum corrosion-resistant housing and door which includes threaded lens ring enclosing heat and impact-resistant glass lens. Cast aluminum base is joined to housing by factory-sealed coupling. Alzak aluminum reflector. Can be rotated 360° horizontally with 135° vertical range. Lamps: 200 watt, T2 1/2 clear or 500 watt, T3 clear or frosted.

Cat. No.	Description	List Each
47903	With Polished Alzak Reflector	\$148.00
47904	With Etched Alzak Reflector	148.00

DISCOUNT: 25%

CROUSE-HINDS FLOODLIGHTS

MODEL FLA INCANDESCENT FLOODLIGHTS

General purpose incandescent floodlights. Die cast aluminum receptacle housing. Alzak aluminum front and rear reflectors; rear reflector hinged for relamping. Weatherproof. Heat and impact-resisting lens. Cable included.

Cat. No.	Description	List Each
For 750, 1000 or 1500 Watt, PS-52 Lamps		
47711	Medium Beam Reflector	\$54.00
47712	Intermediate Beam Reflector	52.00
47713	Wide Beam Reflector	47.00
47714	Narrow Beam Reflector	62.00
For 1500 Watt, G-48 Lamp		
47726	Very Narrow Beam Reflector	66.00

DISCOUNT: 25%

MODEL LCQ QUARTZ TARGETEERTM

General purpose quartz floodlights. Lens gasketed to die cast aluminum housing; weatherproof. Alzak aluminum reflector. 1/2" stem or mounting base. Lamp: 250 watt, T4, Mini-can screw base, clear or frosted.

Cat. No.	Description	List Each
LCQ2	1/2" Stem Mounting	\$13.60
LCQ2B	Ground or Wall Mounting with 6' of 3/C, #18 Cord and Plug	17.20

MODEL SEQ QUARTZ DIALBEAMTM

General purpose quartz floodlights. Adjustable beam spread. Lens and gasket sealed to Alzak aluminum reflector; weatherproof. Cast aluminum body. 1/2" stem or mounting base. Lamps: 250 watt or 500 watt, T4, Mini-can screw base, clear or frosted.

Cat. No.	Description	List Each
SEQ25	Adjustable Medium to Wide Beam, 1/2" Stem Mounting	\$23.70
SEQ25B	Adjustable Medium to Wide Beam, Ground or Wall Mounting with 6' of 3/C, #18 Cord and Plug	27.30

DISCOUNTS: Std. Pkg.—37 1/2% Bkn. Pkg.—20%

CROUSE-HINDS FLOODLIGHTS

MODEL SL KNIGHT-LIGHTTM

Sign light for metallic additive lamps. Alzak aluminum reflector/housing; weatherproof. Heat and impact-resistant glass lens. Quick disconnect feature. Pre-aimed.

Cat. No.	Description	List Each
175 Watt Fixtures		
SL175	Complete w/Quick Disconnect	\$50.00
ML3365	Less Female Part of Disconnect	38.80
400 Watt Fixtures		
SL400	Complete w/Quick Disconnect	52.50
ML3364	Less Female Part of Disconnect	41.30

DISCOUNT: 25%

PAR38F & PAR40F LAMP FLOODLIGHTS

Utility, protective and decorative purpose incandescent floodlights. Die cast aluminum housing and mounting stem; gasketed swivel joint. High temperature silicone rubber lamp gasket with aluminum snap ring.

Cat. No.	Description	List Each
PAR38F	For 75, 100, 150 Watt, PAR38 or 75, 150, 300 Watt, R (Medium Base) Lamps, 1/2" Stem Mounting	\$3.00
PAR40F	For 300 Watt, R40 (Mogul Base) Lamp, 1/2" Stem Mounting	6.00

PAR56 & PAR64 LAMP FLOODLIGHTS

Utility, protective and decorative purpose incandescent floodlights. Cast aluminum mounting stem, housing and door; door hinged to housing. Heat-resistant glass lens with gasket.

Cat. No.	Description	List Each
For 300 Watt, PAR56 Mogul End Prong Lamps		
PAR56F	1/2" Stem Mounting	\$15.00

APPLETON FLOODLIGHTING ACCESSORIES

Wall Mounting Bracket

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-1035	1	5	\$12.70

Galvanized steel bracket furnished with mounting bolts. Four 5/8" holes.

Pole-Top Adapter for Round-Can Ballast

G-6310

For mounting round-can ballasts, together with an Appleton Day-Arc floodlight, in one single weather-proof assembly. Heavy duty, compact adapter has a built-in stop that permits entry of a 2" to 2 1/2" dia. iron pipe to a depth of 3". For use with DAY-ARC 1000, a G4147 Bracket is required. See DAY-ARC listings.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-6310	1	6	16.40

Ballast Adapter with Plated Steel Crossarm

G-6315

For mounting two flood lights. 24" spacing between mounting holes 2 "CG" watertight cable connectors.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-6315	1	13	37.40

1 1/2" to 2" Pole Top Slip Fitter

GSF20

Malleable iron and cast aluminum. permits full 360° horizontal adjustment. With mounting bolt and 3 square head cup joint clamp screws.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
GSF20	1	1	5.80

Cast Aluminum Multiple Slip Fitter With Blank Cover

G-SF200

Base is secured to 1 1/2" or 2" vertical conduit by 3 steel set screws. For mounting one to four Quartzlites. Four 1/2" conduit openings at right angles around perimeter with set screw.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-SF200	1	225	4.65

Cast Aluminum Adapter for G-SF20Q Slip Fitter

G-SFA200

For additional clusters one above the other receives 1 1/2" extension conduit.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-SFA200	1	50	3.15

Cast Aluminum Single Slip Fitter

G-810

Fits 1 1/2" or 2" pole. Set screws secure to pole. 1/2-inch threaded hub at top receives conduit connection to unit.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-810	1	50	2.10

Malleable Iron Crossarm Mounting Bracket

G-1045

180° horizontal positioning. Permits floodlight to be mounted on Combination Bracket, Cross arm, or other flat surfaces when ballast is remotely mounted. With bolts, lock washers.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-1045	1	2	2.50

Malleable Iron Combination Pipe and Wall Mounting Bracket

G-VB100

For use with No. G-1045. For 1" to 2" pipe. Can use without U bolt to mount directly on flat surface. 2 mounting bolts.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-VB100	1	3	5.25

Cast Aluminum Wall or Base Mounting Bracket

G-BM100

With scale for mounting in horizontal position. Not to exceed 15° from level.

Cat. No.	Std. Pkg.	Wt. Each	Price Each
G-BM100	10	1/2	2.05

Photocell for Automatic Light Control

G-4148

For mounting on ballast housing or flood light swivel cap. Manually-adjustable light-level slide. Furnished with std. 1/2" tee with locknut. Three wire leads color-coded. Photocell should face north and avoid any artificial light.

Cat. No.	Std. Pkg.	Wt. Each	Price Each

GENERAL ELECTRIC FLOODLIGHTS

POWERFLOOD® MERCURY FLOODLIGHTS

P-400A

P-400A and P-1000A Powerflood floodlights are designed for applications requiring a heavy-duty floodlight with a uniform, wide beam spread. P-400A is suited for parking lots, building exteriors, construction sites, small sports areas, industrial plants and landscape lighting. P-1000A is ideal for lighting large outdoor recreational, commercial, and industrial areas such as golf courses and driving ranges, football fields,

shopping centers and commercial parking lots, outdoor storage areas, and new- and used-car lots.

Where more light per unit is desirable, and 2000-hour lamp life is acceptable, the P-1000A unit can be provided with a special ballast to operate 1000-watt lamps (clear and phosphor-coated only) at 1500 watts.

Features include die-cast aluminum housing, weather-proof construction with long-life heat-resistant gasketing, faceted aluminum reflector, adjustable lamp socket, tempered heat- and shock-resistant clear cover glass, heavy-gage galvanized-steel trunnion mounting with vertical degree scale and repositioning stop, and prewired terminal board.

PERFORMANCE

Lamp Type	Lamp Designation	Beam Spread (Hor) x (Vert) Deg	Lamp Type	Lamp Designation	Beam Spread (Hor) x (Vert) Deg
400-Watt			1000-Watt		
Color Improved	H400C33-1	138 x 117	Color Improved	H1000C36-15	132 x 110
Clear	H400A33-1	128 x 96	Clear	H1000A36-15	122 x 95

Data shown represents performance for normal factory-set socket position. Slightly narrower (wider for P-1000A with diffuse reflector) beam spread can be obtained after floodlight installation by adjustment to other socket positions.

400- and 1000-watt white mercury lamps may also be used. For 1500-watt operation, initial beam lumens and average maximum candlepower may be obtained by pro-rating 1000-watt photometric data by 1.5.

FLUOROFLOOD® LUMINAIRE

The Fluoroflood fixture is adaptable to a wide variety of fluorescent applications such as poster panels, building fronts, loading docks and platforms, highway guide and direction signs, minor sports areas, service stations and servicing areas, and entrances. It is simple to install and maintain. Allows angular aiming through 360 degrees. Colored lamps are available in certain types for special architectural lighting effects, and clear plastic cover kits are available as an accessory.

GENERAL ELECTRIC FLOODLIGHTS

QUARTZ-FLOOD* FLOODLIGHTS

QF-500A (500-watt)

QF-1500A (1500-watt)

New Types QF-500A and QF-1000A floodlights are designed for applications requiring a wide horizontal and relatively narrow vertical beam spread.

Applications include building facades, signs and poster panels, protective lighting, recreational areas, outdoor residential lighting, stadiums and race tracks, industrial yards, and airport service aprons.

The clean-line design, compact size, and light weight of these new floodlights enhance the appearance of an installation and minimize the wind loading on poles and other mounting arrangements.

Beam Spread		Reflector Finish	Lamp Designation	Cat. No. (Less Lamp)	List Price, Each

* Trade-mark of General Electric Co.

TYPE L-69A FLOODLIGHT

The L69A floodlight is suitable for practically all types of outdoor floodlighting applications. It features an Alzak aluminum reflector, with a faceted rear portion to produce a uniform beam without source-image projection. The socket housing is of die-cast aluminum, complete with an external wiring box to facilitate wiring. The trunnion is of galvanized steel with a vertical degree scale and a handy, built-on wrench which eliminates the need for tools for most aiming operations. Relamping is done from the rear.

Beam Spread		Lamp Designation	Catalog Number (Less Lamp)*	List Price, Each
Pattern	Horizontal } x { Vertical Degrees Degrees			
Filament—1500-watt

W	100 x 92	1500	C508G033	48.45

*Indicate if units are to be aimed above horizontal.

TYPE L-55A FLOODLIGHT

This inexpensive open unit is ideally suited for all types of close-range outdoor lighting applications. A faceted rear reflector eliminates source-image projection. The socket housing is of die-cast aluminum. A strong galvanized-steel trunnion bracket with a vertical degree-marking scale, built-on wrench, and repositioning stop permits easy aiming and mounting of these units.

Beam Spread		Lamp Designation	Catalog Number (Less Lamp)	List Price, Each

GENERAL ELECTRIC AREA LIGHTING LUMINAIRES

POWERGLOW® LUMINAIRES

General Electric offers a complete line of Powerglow luminaires of the proven Power-Pack design. For vapor-lamp operation from 175 to 4000 watts, the luminaires employ the superb lighting abilities of vapor-source lamps, provide excellent lighting with minimum glare. The smart, family appearance of the Powerglow line makes uniform design possible throughout large or small lighting projects.

A-250 units (175 and 250 watts), *smallest* of the Powerglow line, are ideally suited for walkways, malls, pool decks, and small parking areas, where high-level attraction-getting light is not normally a necessity. They are recommended for mounting heights of 12 to 20 feet.

A-4000 units (4000 watts), *largest* of the line, are designed for high intensity, uniform illumination of shopping centers, parking areas, malls, and other large areas where attraction-getting is a commercial necessity. Recommended mounting heights are from 35 to 40 feet.

A-1000 units (400 and 1000 watts), *newest* of the Powerglow line, are designed for 20-to-30-foot mounting heights and are especially suited for middle-sized, narrow, or irregular shaped parking areas and malls.

Entrance roads, walkways, parks, apartment or housing developments, small parking areas, or other applications calling for units combining high night-time efficiency with stylish day time appearance can be selected from these units.

†Distribution for mercury luminaires based on phosphor-coated lamps, for filament luminaires on clear lamps.

‡Other finishes available in following colors at additional cost of \$3.34 list each: space blue, coral, aqua, wood beige, twilight gold.

§Also available with photoelectric control receptacles.

PM luminaires for operating 400-watt mercury vapor lamps are also available.

TC-100 "TOWN AND COUNTRY" LUMINAIRE

This new luminaire gives modern lighting with a traditional flair. At mounting heights of 8-14 feet, it is ideal for residential streets, apartment areas, industrial sites, and motels. It is suitable for use with 75-175 watt phosphor-coated mercury lamps.

The mercury light is controlled by Lexan® prismatic panels, which produce a Type III distribution pattern. The panels resist breakage and are interlocked at their vertical edges to keep dirt out. Dirt does not enter through the top, either, since the canopy is gasketed to the main housing. However, loosening a single captive screw is all that's necessary to lift up the canopy for maintenance. It is securely hinged to the lower housing.

Durable materials make maintenance even easier. The canopy, lower housing and slipfitter are durable die-cast aluminum, coated with black paint. The decorative brass knobs are coated to keep their lustre.

The slipfitter is designed for a three-inch O.D. pole top.

Standard electrical parts are used to give you proved performance inside this elegant new design. Ballasts are General Electric's efficient Bob-Lam design. Standard locking-type control receptacle accommodates the G-E Quick Response photoelectric control. The control is hidden under the formed-aluminum cupola to maintain the traditional appearance.

* Trade-mark of General Electric Co.

GENERAL ELECTRIC AIRPORT LIGHTING

L-819 HIGH INTENSITY RUNWAY LIGHTS

The G-E fixed-focus bi-directional high-intensity runway light consists of a one-piece optical assembly, lamp socket and lampholder assembly, a frangible coupling and a base-plate mounting assembly. The runway light is furnished complete for a 12-inch or 16-inch diameter light base and transformer housing.

L-802 MEDIUM INTENSITY RUNWAY LIGHTS

The General Electric medium-intensity runway light consists of a one-piece asymmetric lens, lamp socket and lampholder assembly, a frangible coupling and a base plate or anchor stake mounting assembly. The clear lens is for runway edge lighting and the green lens for threshold lighting. The units can be mounted on a 12-inch light base and transformer housing or on an anchor stake.

NOTE: After April 1, 1967 order C948G106A, 107A, 109A for similar units.

LIGHT BASE AND TRANSFORMER HOUSING

The light base and transformer housing consist of a cylindrical body with top flange, 2-inch cable entrance hubs and a one-piece bottom plate. The bases form the mounting surface for certain types of airport lighting fixtures and hold insulating transformers presently used in airport runway lighting applications.

L-811, L-812, L-813 STATIC TYPE CONSTANT-CURRENT REGULATORS

The General Electric static type constant-current regulators consist of a transformer-reactor assembly and resonant-circuit capacitors. This network converts constant-potential power to a constant-current output.

Specification
The static type constant-current regulators are constructed in accordance with the requirements of the following FAA Advisory Circulars:

Rating	Advisory Circular No. or L-Spec	Title-specification for:
4 kw	AC 150/5345-18 (L-811)	Static Indoor Type Constant Current Regulator with Brightness Control and Runway Selection for Direct Operation
4 kw } 7 1/2 kw }	AC 150/5345-11 (L-812)	Static Indoor Type Constant Current Regulator with Brightness Control for Remote Operation
4 kw } 7 1/2 kw }	AC 150/5345-21 (L-813)	Static Indoor Type Constant Current Regulator for Remote Operation of Taxiway Lights

GENERAL ELECTRIC FILTERGLOW™ SEALED INDUSTRIAL LUMINAIRES

The Filterglow industrial luminaire's unique design and construction features combine to provide the lowest total cost of light—first cost, installation cost, operating cost, and maintenance cost—consistent with the lighting job to be done. And they take into full consideration the people who are going to work under that lighting—their visual comfort, and the immediate and long-term effects of the lighting on their efficiency. Filterglow luminaires also offer a broad range of units to choose from, and simplified installation and maintenance.

Among its many new features are:

1. Activated charcoal filter keeps inside elements clean for longer high-level illumination.
2. ALGLAS™ reflector resists dirt and stains, stays brighter longer.
3. Up-light windows reduce background contrast to increase visual comfort.
4. Detachable cover, mounted directly to conduit, supports unit during conduit wiring.
5. Special cast-aluminum compartment isolates sensitive electronic components required for Lucalox ballast to keep them cool.

†Photocell Control and PrismaScope.
 ‡Standard primary voltage is 120. For other voltages, specify 208, 240, 277, or 480 as suffix to catalog number; i.e., 480-208. Integrally ballasted units with Photocell Control in 120 and 240 volt primaries only.
 *For indoor use.

REFRACTOPACK® WIDE-SPRED® UNITS

REFRACTOPACK® units offer the choice of an integrally ballasted constant wattage luminaire for 400 watt mercury vapor lamp, or an unballasted unit for 500 watt incandescent lamp and/or 400 watt mercury vapor with remote ballast.

Refractor is one-piece prismatic light controlling element, molded of ENDURAL® — thermal, shock-resistant glass. Stainless steel spring hinge and positive pressure latch firmly hold refractor assembly against gasketed weather tight hood.

Three distinct prismatically controlled light patterns available, either asymmetric, square, or long and narrow distribution, to assure a wide range of outdoor lighting solutions. Uniform coverage of corners and edges of area accomplished by square distribution.

Basic size is 17 3/8" greatest diameter (at top), 15 1/2" depth (add 2 1/4" to depth for photocell receptacle). Slip fit accommodates 1 1/4" pipe. Top entry has 1 1/4" tapered pipe thread.

HOLOPHANE OUTDOOR LIGHTING UNITS

WALLPACKETTE® WIDE-SPRED UNITS

No. 400

No. 410

WALLPACKETTE® series offers a selection of wall mounted, asymmetric fan-shaped distribution luminaires to accommodate 150-200 watt incandescent and 100 watt mercury and 250 watt quartz-iodine lamps. Designed to blend with modern, as well as traditional architecture. Added feature — baked enamel or metallic finishes on special order — state color: black, bronze, blue, green, etc.

On-and-off automatic PRISMASCOPE® control on Nos. 408, 410, 412 and 414; diode illumination control on Nos. 400, 408 and 414. Excellent lighting and mechanical performance; simple mechanical and electrical installation.

SQUARE-POSTOP® UNITS

SQUARE-POSTOP® outdoor units with square light patterns are available in two series. Attractive, square, well-proportioned styling reflects modern trend toward simple lines. Heavy duty, cast aluminum fixture body supports single-piece square prismatic refractor of ENDURAL® thermal shock resisting glass. Die-formed top cover, anchored to cast collar completes the luminaire. Designed to fit a wide range of standard poles.

Socket, ballast and PRISMASCOPE® — on and off control (when included in the catalog number) are factory connected; only two wires need to be spliced to line wires. Choice of lamp types and wattages is indicated in the table below.

REVERSE LIGHTING EQUIPMENT

CONCEPT SERIES

Appearance-Matched Mercury Luminaires, Poles and Brackets in Eight Colors

Concept Series is the only appearance-matched family in outdoor lighting. The 100-watt mercury (200-watt incandescent) unit is ideal for low level use in gardens or along malls and walkways. Three large units are designed for parking areas and building perimeters.

Luminaires may be mounted on canted davit poles, straight poles or matching wall brackets.

Housing and decorative front grills on all fixtures are constructed of aluminum. Diffusers of the three larger luminaires are fabricated of heat and ultra-violet resistant translucent plastic. The 100-watt model has a diffuser of impact and heat-resistant glass.

Available with or without built-in ballast.

NOTE: 400 and 1000 watt fixtures can be mounted direct on Revere canted davit poles and wall bracket. Adaptor available for straight pole mounting. The 100, 175 and 250 watt fixtures are supplied with mounting adaptor.

(1) Catalog numbers are for Silvermist aluminum finish. Seven additional colors available at no extra charge. Lamps and poles are not included.

(2) Additional ballasts available including 175 watt units. Ballast type abbreviations: CWA—Constant Wattage Autotransformer—High Power Factor; HRN—High Reactance—Normal Power Factor; RH—Reactor—High Power Factor.

(3) Catalog numbers are for Concept-5 design with pyramidal diffusers. Other designs available.

SERIES 403 CANTED DAVIT STEEL POLES

Series 403 Canted Davit poles as shown in the photo at left provide aesthetic, coordinated mounting for Concept Series luminaires or street lights. Fabricated from preformed tapered steel channels, all poles are available with anchor base mounting and are shipped with four anchor bolts and nuts. Poles are furnished inside and outside with red oxide primer. Brushing enamel in the eight Concept colors is available. Hand holes are provided.

REVERE LIGHTING EQUIPMENT

ULTRA-LITE MERCURY LUMINAIRES

No. 5442

Provides modern, efficient illumination for shopping center plazas, parking areas, parks, drive-ins, school and city playgrounds. Reduces pole requirements, facilitates maintenance.

Lamps are positioned for optimum uniformity and intensity at grade level. Light patterns overlap to increase fringe intensities, provide uniformly high light levels.

Prismatic pressed crystal glassware, in combination with specially designed parabolic reflectors, provides low luminaire brightness, reducing glare. No light-absorbing prisms are used.

1600-Watt Standard Ultra-Lite No. 5440

For four 400-watt mercury lamps. The 52" dia. steel dome is finished in porcelain enamel. Slipfitter for 3 1/2" pipe (4" O.D.). Standard color is green. Other colors available.

Ballast and lamps not included.

No. 5440 Luminaireeach **\$278.00**

1600-Watt 15°-Tilt Ultra-Lite No. 5442

For four 400-watt mercury lamps. The 72" dia. spun aluminum dome is available in natural aluminum color only. Reflectors and glassware are tilted 15° for uniform, overlapping light patterns. Slipfitter for 3 1/2" pipe (4" O.D.).

Ballast and lamps not included.

No. 5442 Luminaireeach **\$360.00**

4000-Watt 15°-Tilt Ultra-Lite No. 601-A1013

For four 1000-watt mercury lamps. Standard unit features 62" dia. aluminum dome in natural aluminum finish and slipfitters for 3" pipe (3 1/2" O.D.). Optical system tilted 15°. Steel dome with enamel finish available on application.

Ballast and lamps not included.

No. 601-A1013 Luminaire.....each **\$445.00**

FIXED-POSITION FLOODLIGHT

Ideal underneath lighting for signs, buildings, etc. Consists of a polished aluminum reflector and special 180° prismatic control lens, held in proper relationship with the lamp, giving a maximum to minimum ratio of 3 to 1.

Mounting plates furnished for attaching to walls or other flat surfaces. Medium screw base socket. Use with PS-30, 200-300 watt or 3" to 6" L.C.L. lamps.

No. 651-W1000 Floodlighteach **\$48.00**

SERIES 1100 MERCURY FLOODLIGHTS

Front View

Side View

This revolutionary new floodlight puts more light where you need it. It produces a wide horizontal beam with an exceptionally sharp vertical cutoff. These ruggedly constructed luminaires may be purchased separately, with modular ballasts, or with ballasts for remote mounting. The ballast assemblies are suitable for many other mercury floodlights.

Both 400 and 1000-watt Series 1100 Floodlights feature built-in protractors, sighting planes, and hinged lens covers. A wide variety of brackets and poles permit limitless mounting variations.

GARDEN-LITE — SERIES 4370-4380

Offered in two sizes, the 4370 and 4380 provide matched garden and parking or walkway lighting.

The dark green plastic tops of the diffusers are firmly cemented to the white, translucent lower portions to prevent entrance of moisture, dust, and insects.

Units with 24" diffusers operate on 110/125 volt lines and accommodate three 60-watt incandescent lamps. The 30" luminaires use three 60-watt incandescent lamps or a single 100-watt mercury lamp. Mercury units feature built-in ballasts. The Garden-Lite slips 2" slip fitters.

Cat. No.	Dia. In.	Lamps	Voltage	Ballast Type (1)	Each
Luminaires for Incandescent Lamps

(1) Ballast type abbreviations: HRN—High Reactance—Normal Power Factor. RN—Reactor—Normal Power Factor.

GARDEN-LITE — SERIES 4301

The lines of the Series 4301 Garden-Lite make this fixture an impressive addition to traditional and contemporary surroundings.

Available for use with either 200-watt incandescent or 250-watt mercury lamps with remotely mounted ballasts, the luminaires slip 2" pipe.

Two concentric louvers on the Series 4301 are perforated to add a distinctive effect. The 34" steel reflector and the louvers are internally finished in a high reflectant white paint. The dark green exteriors blend with most outdoor settings. (Other colors are available on special order).

Cat. No.	Lamps	Base	Each
4301	200W A-25	Medium	\$60.00
4301-M	250W Mercury	Mogul	70.00

REVERE LIGHTING EQUIPMENT

"GPF" SERIES 510 AND 512 FLOODLIGHTS

For 300-1500W Incandescent, 400W Mercury and Metallic Vapor Lamps

Series 510 and 512 floodlights feature spun aluminum reflectors in diffused and specular finishes. Cast aluminum socket housings are designed for rapid dissipation of lamp heat. The 18" dia. hinged lens is mounted in a corrosion resistant ring and held to the reflector with three spring latches. Degree marked protractor and aiming sight provided. Open reflector units are hinged so that lens assembly, if desired, can be added after installation.

SERIES 199 HINGED STEEL POLES

Because their tapered square steel tubing construction permits them to be lighter at the top, the poles are strongest where the stress is greatest.

Counterbalance arm is made of steel side bars and pivot on hinged pins. Hinge pin and wiring are enclosed by an aluminum cover with gasket. Lockup strap at base of arm has a formed loop for attaching lower chain.

Four strengths are available to meet individual loading requirements. Light weight "G" duty poles are designed for lampholder combinations or one general purpose floodlight. Heavier "M" and "H" duty poles are designed for area lights or three to five ballasted mercury floods. Extra heavy "X" poles are recommended for large area lights, such as Ultra-Lites, or up to 8 floods with inline bracketing. All poles finished inside and outside with red oxide primer. Anchor bolts and nuts provided.

SUN BRIGHT 300 AND 400 WATT

This rugged, compact unit is about the size of a grapefruit weighing only 18 oz. Use inside or outside, permanent or portable. Easily adjusted vertically and horizontally with swivel and gasketed knuckle. Standard 1/2" thread assures easy mounting. Reflectivity of reflector material is superior to any comparable reflector on the market, and will not deteriorate under any climatic condition. Unique design of die-cast aluminum housing gives maximum heat dissipation. No lens cover required when the 400-watt fixture is operated below the horizontal plane. The available lens cover must be installed when operating fixture above the horizontal plane. Comes wired, ready for installation; packaged in individual carton.

Price on Application

STEBER UTILITES

Listed by Underwriters' Laboratories, Inc.

PAR-38 AND R-40 LAMPHOLDERS

Utilites are available for every application: counter, ceiling, wall or outlet box mounting. Fully adjustable, they accommodate PAR-38 and R-40 reflector, flood and spot lamps, infrared heat and drying lamps, sun lamps, etc. Rugged construction with weatherproof finish, assures long and satisfactory service.

No. 2 UTILITE

No. 2

No. 2-SO

Weatherproof outdoor holder for use with PAR-38 lamps, equipped with flat round gasket to permit watertight fit between lamp and holder. Made of drawn steel with weatherproof finish, and special means of dissipating heat at socket terminals. Universal adjustment. Mounted on 3 1/4" or 4" base plate punched for wall bracket or outlet box mounting. Approved cord and plug. Lamp not included.

Cat. No.	Mounting Provision	Each
2	Base Plate for surface or outlet box mounting	\$1.60
2-O	Same as No. 2 but without cord and plug	1.16
2-SO	Base Plate and Ground Spike	1.72
2-S	With Ground Spike only	1.60
2-BSO	Same as No. 2-SO except packaged in plastic bag	1.80

No. 3 UTILITE

For indoor use with R-40 lamps for displays and window lighting, or for infrared, heat and sun lamps. Universal adjustment. Holes provided for permanent attachment to any flat surface or to 3 1/4" or 4" outlet box. Approved cord and plug. Lamp not included.

Cat. No.	Mounting Provision	Each
3	Base Plate for surface or outlet box mounting	\$1.44

No. 4 UTILITE

A pin-up, stand-up, fully adjustable Utilite for PAR-38 and R-40 lamps. Designed for indoor holiday decorative lighting.

Heavy gauge steel wire stand is formed to facilitate wall hanging or surface mounting. Socket housing, with medium base porcelain socket is attached to support by two wing nuts

for easy, firm adjustment. Rubber bumpers are provided on forward feet.

Attractively finished in gold and black. Equipped with 6' cord and plug.

No. 4 Wall-Surface Stand each \$1.60

No. 12 ALL ALUMINUM UTILITES

For indoor or outdoor service where extreme moisture or salt air are prevalent. Aluminum socket housing attractively finished in jet black.

No. 12 has base plate for wall or surface mounting; base plate punched to fit 3 1/4" or 4" outlet box. No. 12-S furnished with aluminum ground spike. No. 12-SO furnished with both base plate and ground spike.

All units furnished with attached weatherproof cord and plug and lamp gasket. Wing nuts provide universal adjustment.

Cat. No.	Mounting Provision	Each
12	With Base Plate	\$2.04
12-S	With Ground Spike	2.00
12-SO	With Base Plate and Ground Spike	2.16

No. 8 SWIVEL-TYPE UTILITE

Adjustable to any desired position — 360 degrees horizontal, 180 degrees vertical — without damage to conductors. Swivels freely and holds position without set screws.

No. 8 Utilite with cast aluminum base attaches directly to 3 1/4" or 4" outlet box.

No. 8 Swivel-Type Utilite each \$1.76

STEBER UTILITES

SHALDA OUTDOOR LIGHTING

FLOODLIGHTS

Multi-purpose open type floodlights for Incandescent and Mercury Vapor lamps, 1500 Watts maximum. Heavy spun aluminum reflector with Alumilite finish. Adjustable Universal mounting bracket. Mogul base socket.

Cat. No.	Description	Each
612	12" dia. 500 watt max.....	\$ 9.79
614	14" dia. 500 watt max.....	13.02
616	16" dia. 1500 watt max.....	14.35

PORTABLE FLOODLIGHTS

Furnished with aluminum reflector, medium base porcelain socket, 6' cordset, adjustable yoke bracket and universal base plate.

Cat. No.	Description	Each
108	8½" diameter, 150 watt maximum..	\$ 3.47
108-4N	8½" diameter, 150 watt maximum, weatherproof cordset	5.33
110	10" diameter, 300 watt maximum....	2.95

100 WATT MERCURY LAMPHOLDERS

For effect lighting using 100 watt PAR 38 H44-4 Mercury lamps. Consisting of die cast aluminum Bullet lampholder with lens, cast aluminum box with 120 Volt transformer. Black finish.

Cat. No.	Description	Each
309-8	Conduit mount with ½" NPT hub....	\$41.54
309-10	Portable with 6' cordset.....	42.47

PAR 56 UNDERWATER LIGHTS

All cast bronze lamp housing, face ring, adjustable yoke and 12" dia. base. Mogul prong socket and 9' #16-3 submersible cord. For 120 volt lamps. 8¾" dia. clear lens, colored lenses available.

Cat. No.	Description	Each
422-5	For 300 watt PAR 56 lamp.....	\$48.98
424-5	For 500 watt quartz PAR 56 lamp..	51.15

UNDERWATER LIGHTS

For medium base lamps, cast bronze construction with adjustable yoke. 10" dia. base and 9' #18-3 submersible cord. 6½" dia. clear lens, colored lenses available.

Cat. No.	Description	Each
418-5	For max. 150 watt PAR 38 lamp	\$48.98
420-5	For max. 300 watt R40 lamp	58.28

BOX COVERS

Die cast aluminum. Fits 3½"-4" outlet box. 4½" diameter, ½" NPT hub. Furnished with gasket.

Cat. No.	Description	Each
206-BC	Single ½" hub.....	\$0.39
206-BC2	Two ½" hubs.....	.65
206-BC3	Three ½" hubs.....	.80

ADAPTOR BOXES

Die cast aluminum, 4¼" diameter with gasketed aluminum cover. ½" NPT hubs and two closure plugs.

Cat. No.	Description	Each
204	With 4 hubs @ 90°.....	\$ 1.55
204-2	#204 box with wall mounting lugs....	1.70
206	With 6 hubs @ 60°.....	2.32
206-S	#206 with locking set screws at hubs	2.97

POLE TOP ADAPTOR BOXES

Cast aluminum, slipfits 1½"-2" (1.9 O.D.—2.375 O.D.) pole top. Splice box with gasket cover, 5½" NPT tapped hubs.

Cat. No.	Description	Each
208	Standard box	\$ 3.59
208-S	Provided with hub set screws.....	4.24
218-4	Extra large box with hub set screws	6.85

UNDERGROUND JUNCTION BOXES

Galvanized cast iron box and cover with neoprene gasket. ½" NPT hubs, stainless hardware.

Cat. No.	Description	Each
1414	With 2 hubs @ 180° & cover hub. \$	7.19
1414-12	With 2 bottom hubs & cover hub..	7.19
1414-14	With 4 hubs @ 90°.....	7.84

WALKWAY LIGHTS

Attractive diffused pole top area light for use with incandescent or mercury lamps. Spun aluminum top reflector, acrylic diffuser. Cast aluminum fitter for 2.375" O.D. pole top. (Also available for 3" O.D. pole top).

Cat. No.	Description	Each
801-2	26" dia. med. base max. 300 watt....	\$35.34
801-2MV	26" dia. mog. base max. 250w. M.V.	35.65
803-2	18" dia. med. base max. 150 watt....	31.00

BALL LIGHTS

Acrylic ball fixture with medium base socket and cast aluminum fitter for 2.375" O.D. pole top. The acrylic ball will retain its high luster and will not yellow.

Cat. No.	Description	Each
808-12	12" diameter, 100 watt maximum.....	\$29.70
808-16	16" diameter, 200 watt maximum.....	55.74
808-22	22" diameter, 300 watt maximum.....	70.68

SHALDA OUTDOOR LIGHTING

UP LIGHTS

Copper and bronze lamp-holder for medium base PAR and R lamps, 150 watt max. Provided with glare tube and clear gasketed lens, colored lenses available.

Cat. No.	Description	Each
531	Conduit mount, 1/2" NPT male swivel.	\$54.90
531-2	Portable, spike and 6' cordset.	60.73
531-3	#531 with junction box, two 1/2" NPT hubs @ 180°.	61.91

FLUSH WELL LIGHTS

Copper and bronze lampholder with transite burial and junction box with two 1/2" NPT hubs @ 180°, 120 volts.

Cat. No.	Description	Each
532	For 150 watt medium base PAR & R lamps	\$48.33
532-MV	For PAR 38 H44-4 M.V. lamp. Includes ballast	81.75

BORDER LIGHTS

Decorative copper and bronze light with acrylic diffuser, staff and direct burial junction box with two 1/2" NPT hubs @ 180°. Medium base socket and 60 watt lamp. Exclusive antique "Verdi" finish.

Cat. No.	Description	Each
534	Heavy spun copper canopy.	\$33.45
536	Cast bronze canopy.	37.17

MUSHROOM LIGHTS

Decorative all copper and bronze spread light. Includes medium base fixture, staff and direct burial junction box with two 1/2" NPT hubs @ 180°. Exclusive antique "Verdi" finish.

Cat. No.	Description	Each
540	16" dia. x 27" high 100 watt max.	\$43.37
540-3	16" dia. x 39" high 100 watt max.	44.61
541	23 1/2" dia. x 51" high 300 watt max.	71.89

FLUORESCENT LIGHTSCAPERS

15 watt fluorescent fixture, all aluminum construction, 21" long. 129 volt ballast. Exclusive antique "Verdi" green finish. Includes green T-8 lamp.

Cat. No.	Description	Each
598	Conduit mount, two 1/2" NPT female swivels	\$23.56
598-2	Portable, spikes and 6' cordset	24.18

LOUVER LIGHTS

Die cast aluminum louvers and body, 6 1/2" diameter. Vaportight gasket globe and medium base socket. Baked acrylic finish, specify green or black.

Cat. No.	Description	Each
583	Three louver, 1/2" NPT hub. 100 watt max.	\$ 5.52
583-2N	Portable, #583 with spike and 6' cordset	8.37
587	Two louver, 1/2" NPT hub. 75 watt max.	6.97
587-2N	Portable, #587 with spike and 6' cordset	8.21
589	Single top louver, 1/2" NPT hub. 75 watt max.	4.96
589-2N	Portable, #589 with spike and 6' cordset	8.06

MUSHROOM LIGHTS

15" diameter mushroom shade and die cast body with medium base socket, 60 Watt maximum.

Cat. No.	Description	Each
511	Fiberglass shade, green or chartreuse, 1/2" NPT hub.	\$5.54
511-13	Aluminum shade, green or black, 1/2" NPT hub.	5.54
512N	Portable #511, 15" staff with spike, 6' cordset.	8.64
512-13N	Portable #511-13, 15" staff with spike, 6' cordset.	8.64

MUSHROOM LIGHTS

16" diameter aluminum shade, vaportight gasket globe, diffuser, die cast aluminum base with medium base socket 100 Watt maximum. Baked acrylic finish. Specify green or black.

Cat. No.	Description	Each
584	Conduit mount, 1/2" NPT hub, 15" leads	\$ 9.26
584-2N	Portable, 15" staff with spike, 6' cordset	12.36

ACCENT LIGHTS

3" diameter floodlight. Aluminum housing with clear lens (colored lenses available). Verdi green finish. Includes 30 Watt R20 lamp.

Cat. No.	Description	Each
504	Conduit mount, 1/2" NPT male swivel	\$ 7.40
504-2N	Portable, spike and 6' cordset	9.88

WIDE-LITE FLOODLIGHTS

SW SERIES

**Floodlights for
Conventional Mercury Vapor,
Metallic Additive and
G. E. Lucalox® Lamps
Anodized Aluminum Finish**

Wide-Lite® SW Series floodlights are designed specifically to take advantage of the greater lumen output of modern light sources. Available in 400 and 1000 watt models, the SW is a gracefully styled, pre-wired fixture ready for installation as soon as it is removed from its carton. SW floodlights will accommodate all mercury vapor and metallic additive lamps now available, as well as newer lamps now under development. The entire SW floodlight, including the mast fitter and assembly rivets, is now anodized to offer the best known protection against corrosion. Outstanding features include a choice of either vertical or horizontal mounting position, integral ballasts (designed for operation in ambient temperatures as high as 150° F.), exclusive "flue" cooling, pre-wiring for faster installation, patented. Stabilux® lamp socket, rugged die-cast aluminum construction with cast-in cooling fins, anodized gray-bronze finish, tempered glass lens, and a calibrated mast fitter for quick, accurate aiming.

NOTE: CHOICE OF "A," "B," "C" OR "D" REFLECTORS AVAILABLE ON ALL SW MODELS. "A" and "B" reflectors are generally used with phosphor-coated lamps. Order "A" reflector for maximum width of beam without loss of uniform light distribution; "B" reflector when width is important but higher centerline intensity is needed; "C" reflector, designed for newer lamps, corresponds to "A" characteristics; and "D" corresponds to "B" pattern characteristics. Specify reflector with first letter in third part of catalog number. Example: to order fixture with "C" reflector, specify catalog number SW-1000-CWB.

WIDE-LITE FLOODLIGHTS

PL SERIES

Protective Lights for One Mercury Vapor and Two Incandescent Lamps

"Wide-Lite" 1000 and 400 watt Protective Light models use one mercury vapor and two incandescent lamps, wired independently. These models permit economical use of mercury lamps in temperatures below -20° F., and the incandescents provide an auxiliary light source for security installations.

PEDESTALS

The Pedestal is a new concept in pole design, combining great strength with graceful styling. It is constructed of three upright members joined by welded castings at intervals along its length. Aluminum and steel models are available in four fixture mounting heights of from 30 to 50 feet. Pedestal Crowns (pole top mounting brackets) are available for mounting from one to four fixtures on the Pedestal.

Pedestals also are available with epoxy-base coating of any color desired. For more information see your "Wide-Lite" representative.

Pedestal prices include precision aligned and welded AA-1 anchor assemblies with double nuts and aluminum nut covers.

Catalog Number	Description	Net Wt.	Est. Shpg. Wt.	Each

MERCURY "4000" SERIES

Designed for the operation of four 1000 watt mercury vapor lamps, the Mercury "4000" fixture will effectively illuminate more than an acre. The Mercury "4000" is pre-wired with a pair of #18 wires for each lamp, and each fixture includes support brackets with mast fitter. A choice of clear or embossed glass lenses is offered.

Catalog Number	Description	Each

WIDE-LITE LUMINAIRES AND BALLASTS

ID SERIES

Indoor Luminaires for Metallic Additive and Conventional and Mercury Vapor Lamps

"A" and "C" pattern reflectors are available on all models. "A" reflector is made of specular Alzak and generally used with phosphor-coated lamps. It gives a medium spread pattern (1.0 spacing to mounting height ratio). "C" reflector is made of brushed Alzak. With phosphor-coated lamps, "C" reflector gives a spread pattern (1.4 ratio); with metallic additive lamps, a wide spread pattern (1.6 ratio). Specify reflector with the first letter in the third part of catalog number. Prices for fixtures are the same with either type reflector. Example: to order 1000 watt indoor luminaire with "C" reflector, specify catalog number ID-1000-CWB.

BALLASTS — OUTDOOR AND INDOOR MODELS

"Wide-Lite" indoor and outdoor ballasts for mercury vapor lamps are designed and constructed to provide years of trouble-free performance, and are available in models for integral use with "Wide-Lite" fixtures or for remote mounting. Potted construction and cast-in cooling fins on outdoor models. Class B transformer insulation and aluminum enclosures for protection from corrosion enable the Wide-Lite Corporation to guarantee its ballasts for THREE YEARS instead of the usual one year. And all "Wide-Lite" ballasts are designed for operation in ambient temperatures as high as 150° F.

THREE-YEAR PRODUCTS WARRANTY

Wide-Lite Corporation warrants its products against defects in material and workmanship. Without charge, Wide-Lite Corporation will either repair or replace (Wide-Lite Corporation reserves the right to decide between repair or replacement) any properly installed "Wide-Lite" product which fails under normal operating conditions within THREE years from date of installation, provided it is returned to the factory, transportation prepaid, and our inspection determines it to be defective under terms of this warranty.

The warranty covers only equipment manufactured by Wide-Lite Corporation and does not extend to transportation, installation or replacement charges; nor does it apply to any equipment of another manufacturer used in conjunction with "Wide-Lite" equipment. No other warranty, expressed or implied, exists beyond that included in this statement.

GENERAL ELECTRIC STREET LIGHTING LUMINAIRES TYPE M MERCURY LUMINAIRES

Closed and open position of new M-250A/M-400 Powr/Door™ assembly. Type M mercury luminaires offer a complete family (100 watts to 1000 watts) of bracket-mounted fixtures for all types of roadway and area lighting applications. In each the reflector is precisely contoured and highly specular for optimum light on the ground. All units feature built-in ballasts to simplify installation.

General Electric's new M-250A and M-400A Powr/Door luminaires accommodate today's mercury lamps or new-design Multi-Vapor* and Lucalox® lamps. The unique design of the Powr/Door assembly protects your luminaire investment from obsolescence. Upgrading to more advanced lighting is accomplished with minimum trouble and expense by merely adjusting the socket and changing the replaceable Powr/Door assembly, which contains ballast and control. Useful luminaire life is thus greatly lengthened.

Features of Powr/Door Luminaires

- Powr/Door Assembly**—Easy to change. Loosen a captive screw and it lifts off.
- Reflector Door**—Redesigned to ease installation and servicing.
- Reflector**—Largest in the industry, gives greater visual comfort.
- Activated Charcoal Filter**—Maintains high light output.
- Adjustable Sockets**—Universal adjustment permits choice of lamp and light distribution pattern.
- Astrodome® Photoelectric Control**—Gives greater reliability, improved appearance.
- Adjustable Slipfitter**—Two-bolt adjustment speeds installation.
- Safety-guard Terminal Board**—Protects linemen, makes wiring easier and faster.
- Compatible Appearance**—Identity with style-setting predecessor maintained to keep streetlighting attractive and uniform.
- Bob-Lam Ballasts**—Have long life, high reliability.

 § Factory wired for 120 (nominal)-volt operation of ballast and photoelectric control.
 ¶ Factory wired for 3-wire, 120/240-volt supply, 120 volts to photoelectric receptacle and 240 volts to ballasts.
 * Trade Mark General Electric Co.

GENERAL ELECTRIC STREET LIGHTING LUMINAIRE

POWR/BACKET* LUMINAIRES

Powr/Bracket luminaires are streamlined private-lighting units for commercial, industrial, home and farm applications. The

units are all assembled and prewired, and include built-in ballast, Astrodome photoelectric control, mercury lamp, hardware, and wire.

In 175- and 400-watt designs, these Powr/Bracket luminaires are easily and quickly mounted on wood or metal poles or on walls. To install on wall, just attach the adapter, put in two more bolts, and attach two leads. Pole mounting is even easier. All major electrical components are mounted on the drop-down door for easy access.

**KAISER ALUMINUM
ELECTRICAL PRODUCTS**
TAPERED ALUMINUM LIGHTING STANDARDS

New design in tapered aluminum standards for use in public, commercial and private lighting. Attractive appearance of spun poles at appreciably lower cost. Greater strength than spun poles for withstanding fatigue loads.

UNIFORM SHEET FORMED—Formed from aluminum sheet in alloy 5086, favored in marine use for excellent corrosion resistance. Uniform sheet thickness assures high, consistent strength at all points, full length of pole. Once formed, pole is seam welded, planished, brushed — seam becomes invisible under good-looking brushed finish.

New tapered standards weigh nearly 20% less than spun poles, with greatest weight advantage gained by more efficient use of metal. New base design allows larger base diameter without increasing size of mounting-bolt circle. Usual moment of inertia is maintained, but with less weight per foot of pole.

TESTS SHOW STRENGTH — Comprehensive standard/base failure tests have demonstrated superior strength of Kaiser Aluminum's new tapered standards:

Static Load Test: Withstood 6 to 33% more load than spun type poles.

Cyclic Load Test: Without failing, bore more than 3 times the cycles that caused failure in spun poles.

Impact Test: Auto-bumper area dented 33 to 40% less, under constant ft.-lb. impacts, than spun poles.

All arms are 2" nominal pipe. Wind brace rods are 3/8" dia.

Supporting arms for luminaires can be single or dual, per table below.

Foot of new tapered standard fits OVER anchor base (cast of A356 alloy). The two are factory epoxy-bonded. No circumferential base welds to produce weakened areas. Nor are structural bolts or rivets used.

New standards also engineered for transformer base mounting, or in smaller sizes, for direct burial.

20 VARIATIONS — ONLY 4 BASIC STANDARDS

Wall Thickness: .188 inch in every shaft except where otherwise stated.

*Wall Thickness: .219 inch.

**Wall Thickness: .250 inch.

Includes Projected Area of Lights and Brackets.

See mounting Arrangement Table and select proper catalog number for complete assembly.

FLOODLIGHT APPLICATION • PROPER SHAFT SELECTION

Method of Determining Proper Shaft for a Specific Application

Cat. No.	Tenon Pipe Size	No. Lights	Effective Projected Area (Square Ft.)
63-001	1½"	one	0.0
63-002	2"	one	0.0
63-003	1½"	two	0.7
63-004	2"	two	0.7
63-005	1½"	three	1.3
63-006	2"	three	1.3
63-007	1½"	four	1.9
63-008	2"	four	1.9

KNOWN:

1. Mounting height
2. Type and number of lights

PROCEDURE:

- Step 1. Add the Total Projected Area of Lights.
- Step 2. Select arm and add the Effective Projected Area of the required arm to the total obtained in Step 1.
- Step 3. From the "Total Allowable Projected Area of Equipment" column, select the proper shaft size to support the total value from Step 2.

Price on Application

EXAMPLE:

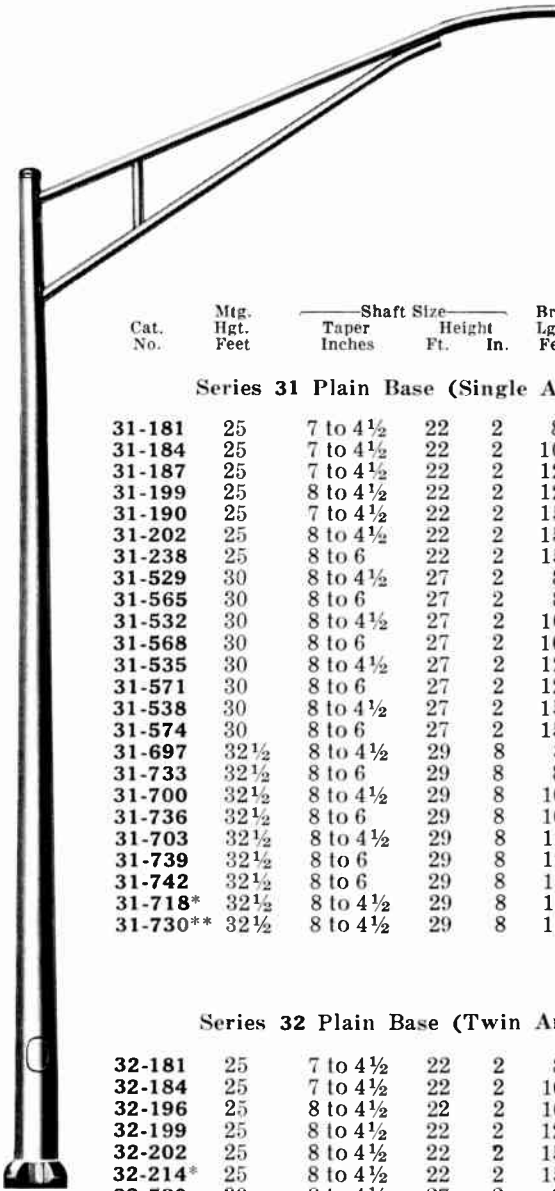

KNOWN:

1. 30' Mounting height — Plain base
2. 3 Lights — 2.3 square feet Projected Area each

PROCEDURE:

1. Total Projected Area of Lights — 6.9 square feet.
2. Arm required — 63-006 (3-tenon). Total Effective Projected Area — 6.9 plus 1.3 equals 8.2 sq. ft.
3. From catalog column, an 8"x4½"x .219" shaft is required to support 8.2 square feet Projected Area at 30 feet. (61-060)

RIPLEY SUNSWITCH
TUBELESS STREET LIGHT CONTROL

With "Prismatic-Eye" Light Adjustment. Conforms to EEL-NEMA. Built-in lighting gap arrestor. Fail-safe operation. Rugged - weatherproof - plastic housing, will not discolor, crack or craze. Delayed circuit response. Hermetically sealed cadmium sulphide cell controlling time-tested relay. Exclusive phenolic base design isolates 3-prong plug against flash-over.

Supply Voltage: 105-135 volts, 50/60 cycles. Load Rating: 1000 watts. Inrush Current Rating: 100 amperes.

Std. Factory Setting: Turn-on 1:25±.5 foot candles.

Power Consumption: Average less than 0.5 watts.

Notes on Union Metal Monotube Poles

- *For limitation of luminaire weight and size for each design pole consult Graybar salesmen or Union Metal Mfg. Co. Catalog No. 100.
- Most popular pole types are shown. Other types and sizes are available.
- For mast arm poles, twin-bracket designs are available. Specify, if required.
- Specify handholes, if required.
- Brackets are arranged for 2" slipfitter type luminaire, unless otherwise specified.
- Post top poles are arranged to receive a 3" slipfit luminaire.
- Anchor base poles include anchor rods. Transformer bases for same designs are available.
- Steel poles have a shop coat of rust-resistant paint.
- Aluminum poles are polish-finished and tire-wrapped with a heavy, water-resistant paper for protection during shipment and erection.
- A black and gray terrazzo finish is standard on concrete poles.
- When ordering, specify both Design and Catalog Number.

UNION METAL MONOTUBE STEEL AREA LIGHTING POLES

These floodlighting poles are specifically designed to carry today's modern floodlights. Proper lighting requires proper choice of pole and mounting arrangements. Union Metal's careful engineering, design experience, and fabricating craftsmanship make these poles safe, economical and adaptable for supporting floodlights for any shopping center, parking lot, sportsfield, tennis court or airport.

WELLMADE CARPET OF LIGHT

ROAD-LEVEL LIGHTING . . . for median barrier or side rail installation

THE PRINCIPLE

This luminaire operates on the principle of projecting a beam from an aperture lamp through a Fresnel focusing lens on to the outer reaches of the highway. The closer area is lighted by incidental light contributed by other surfaces of the lamp which are at points other than the focal point, and is spilled from the lens on to the roadway. The combination of these two provides a blanket of light of unusual uniformity over the width of the roadway.

**QUALITY ENGINEERING
PRECISION CRAFTSMANSHIP**

Road-Level Luminaire...features rugged construction...precise beam control...ten foot two-piece housing of extruded aluminum alloy. The computer designed lens of virgin acrylic is manufactured to precise specifications by Holophane.

WELLMADE Road-Level Lighting gives driver comfort, even illumination, clear visibility and sharp definition of lane markings, curbs and rails. Eliminates glare, pools of light and unsightly poles on elevated structures.

WELLMADE Master Mount* for easy installation of fixtures... facilitates interchanging fixtures on the job for maintenance or repair. *Patent applied for.

The Wellmade Road-Level Luminaire is designed to operate at either 800 MA or 200 MA as desired. One ballast operates a pair of ten foot luminaires mounted end to end. The power requirements for each of the operating levels is listed below:

LIGHTING LEVEL	FIXTURE LENGTH	BALLAST INPUT	WATTS PER LINEAR FOOT
800 MA	10' tandem (20')	254 W	12.7 W
200 MA	10' tandem (20')	97 W	4.9 W

PRICE PER PAIR (20 feet)	
WITH MASTER MOUNT \$436.00	WITH RACEWAY \$484.00

FIXTURES COMPLETE WITH LAMPS INSTALLED

OPTIONAL WIREWAY

Integral bottom Wireway for applications where service is not otherwise provided. Aluminum extruded, combination Wireway* and Master Mount provides adequate space.

*Patent applied for.

VERSATILE INSTALLATION FEATURES

Versatility of mounting hardware provides for application on new or existing roadways and bridges.

McGILL FLUORESCENT LAMP CHANGERS

No. 173-S

No. 171-C

Easy to handle and operate to replace fluorescent lamps requiring 90° rotation or endwise movement. Lamps up to 1½" diameter can be removed with a twist of the wrist. Complete unit No. 174 consists of changer head, four-section, 8-foot pole and starter changer.

Cat. No.	Description	Each
174	Complete changer unit for lamps up to 1½" diam.	\$22.02
170-P	Pole section only, 24" long	2.47
171-C	Changer head only for lamps up to 1½" diam.	13.35
173-S	Starter changer only..	.73

McGILL ADAPTABLE LAMP CHANGERS

With Rubber Covered Fingers and Coil Spring

For more convenient replacement of light bulbs in any location. Coil spring around ends of rubber covered fingers grip bulb firmly. Nos. 150-CA and 151-CA have angle adjustment on heads for bulbs in horizontal position. Other models are furnished without angle adjustment.

Cat. No.	Lamp Size	Wt. Oz. Each	Each
With Angle Adjustment			
150-CA	15- 25-w	8	\$5.36
151-CA	100- 200-w	9	5.36

160-P	Steel Interchangeable, 5 ft. sections	14	\$3.74

Note — Not for Fluorescent Changers.

LAMP BASE REMOVER

Provides a fully insulated, safe and sure way to remove bases of broken lamp bulbs without possibility of

injury to hands from shock or broken glass. Fits lamp changer pole and will handle standard and mogul lamp base.

Cat. No.	Description	Wt. Oz. Each	Each
200	Lamp Base Remover.....	4	\$1.49

CENTRIBLAST FLUORESCENT TUBE CRUSHERS

Dispose of burnt out tubes instantly. Simply feed tubes into unit. High speed impeller breaks them into small fragments in a fraction of a second.

Save space and hauling costs. Over 350 4-ft long tubes fit into container of less than 4 cu. ft. capacity.

Safe — less handling of fragile tubes. May be located at waste disposal station or equipped with casters and moved to work location. Receptacles have sockets for casters. Heavy duty construction. Impeller is hard faced for wear resistance. No air borne dust. Vertical filter bag is self-cleaning. One year guarantee against defects in material and workmanship.

Motor is 1/3 h.p., 110-volt, totally enclosed, single phase A.C., with self-contained switch. Height, 67½ inches; with casters, 70 inches. Receptacle diameter, 19 inches.

Cat. No.	Description	Shp. Wt., Lbs.	Each
G-150	For 1½" Dia. Tubes	95	\$229.50
G-225	For 2¼" & 1½" Dia. Tubes	102	249.50
G-100	Set of 4 Casters.....	10	8.00

WASH-A-MATIC CLEANER/DESTATICISER

For cleaning lighting diffusers and reflectors. Automatically washes, scrubs, rinses, destaticises and sheet dries 1500 lighting diffusers and reflectors in the time normally required to clean barely 100.

Quiet, self-contained and portable for on-the-spot use. Models available for cleaning louvers and diffusers of all sizes plus a special model for painted and porcelain enamel industrial reflectors. All hoods are interchangeable with one tank.

Cat. No.	Description	Each*
Wash-A-Matic Units		
WAM-18	Especially designed to wash industrial reflectors, RLM type, porcelain enamel and painted, up to 8" thick.....	\$2025.00
WAM-24	For diffusers up to 24" wide, not more than 5½" deep. Length not important.....	2025.00
WAM-36	For diffusers up to 36" wide, not more than 5½" deep. Length not important.....	2025.00
WAM-48	For 4' x 4' diffusers not more than 5½" deep.....	2170.00

*Rollaway stacking and drying trays not included in price.

GENERAL ELECTRIC BALLASTS FOR FLUORESCENT LAMPS

MOST POPULAR STANDARD BALLASTS (60-CYCLE)

General Electric Bonus Line ballasts are designed to prevent leaking, smoking — any of the unpleasant conditions that occasionally occur at ballast end of life. The need for individual ballast fusing is eliminated.

Built into each of these new Bonus Line ballasts is an integrated Thermal Protection System that takes the ballast off the line — permanently — whenever the extreme temperatures which sometimes characterize ballast end of life are detected. General Electric engineers have been careful, however, to make sure that every hour of life has been delivered by each Bonus Line ballast before the Protection System activates. The ballast is de-energized only when failure is inevitable and already in progress.

Additionally, a new power capacitor in Bonus Line ballasts offers design features that increase the life of the capacitor — contributing to *substantially longer average life* for the ballast.

JEFFERSON INDOOR MERCURY LAMP BALLASTS

GUARANTEE — The Jefferson Electric Company agrees to correct by repair or replacement, at company's option, any transformer which shall fail in service within a period of two years from date of manufacture, provided conditions of operation have been normal at all times and that the transformer has not been subjected to abnormal stresses from such causes as incorrect primary voltage and frequency.

The Jefferson Electric Company's obligation under this guarantee, which is in lieu of all other warranties, expressed or implied, is limited to replace or repairing defective parts free of charge provided they are returned to the factory.

N.E.M.A., U.L. and A.S.A.: Jefferson mercury ballasts meet or surpass all standards. Many ratings are listed with the Underwriters' Laboratories. These bear the U.L. label. All Jefferson mercury ballasts are designed, built and tested in accordance with N.E.M.A. and A.S.A. standards.

JEFFERSON OUTDOOR MERCURY LAMP BALLASTS

Universal Mounting

GUARANTEE — The Jefferson Electric Company agrees to correct by repair or replacement, at company's option, any transformer which shall fail in service within a period of two years from date of manufacture, provided conditions of operation have been normal at all times and that the transformer has not been subjected to abnormal stresses from such causes as incorrect primary voltage and frequency.

The Jefferson Electric Company's obligation under this guarantee, which is in lieu of all other warranties, expressed or implied, is limited to replace or repairing defective parts free of charge provided they are returned to the factory.

N.E.M.A., U.L. and A.S.A.: Jefferson mercury ballasts meet or surpass all standards. Many ratings are listed with the Underwriters' Laboratories. These bear the U.L. label. All Jefferson mercury ballasts are designed, built and tested in accordance with N.E.M.A. and A.S.A. standards.

GENERAL SERVICE LAMPS

115, 120 and 125 Volts

Inside Frosted

For most general lighting purposes. Inside Frosted diffuses the light and helps eliminate shadows and glare. Light output is practically the same as for clear lamps. Outside surface is smooth and easily cleaned.

GENERAL ELECTRIC LAMPS

REFLECTOR LAMPS
For General Lighting

R-52 reflector lamps are designed for general lighting applications, particularly where dirt conditions are severe. Dust and dirt collection on the sides of the bulb do not affect light output since the metallic reflector coating is inside the lamp.

The 1M/RB52 has a double contour reflector design which permits using 1000 watts in the R52 bulb size. All R52 lamps require a shield to protect lamps from moisture or physical contact.

REFLECTOR LAMPS
120 Volts

75R30/SP 150R/SP 300R/FL/1 300R/3FL

Reflector Lamps are self-contained spot and flood lamps employing a silver reflecting surface. Some are made of ordinary soft glass, others of heat-resistant glass for better performance with high wattage filaments and for out-door use. Even heat resistant bulbs should be protected from falling moisture when used outdoors.

60	A-21	Amber Green, Blue or Ruby	60A21/N*	120 2.86

* Substitute color symbol in place of * in ordering abbreviation. Thus: 10S14/NR is the ruby color.

TUBULAR LAMPS
120 Volts

These low-wattage tubular lamps are for showcase lighting, in shallow-depth displays, and in small trough-like reflectors. The SHOWCASE REFLECTOR lamps have a built-in reflecting surface and a spring-contact base for positioning.

GENERAL ELECTRIC LAMPS

BLACK LIGHT LAMPS

Mercury Lamps. Four types of mercury lamps are commonly used for black light effects: the BL4 uses a red-purple glass filter for the outer bulb and the H100-SP4 Spot (H100-FL4 flood); H250-A5 and H400-E1 require separate filters.

Filament Lamp. A 250-watt filament lamp in a red-purple bulb is available for black light effects. Known as the Purple X lamp, it is designed for intermittent service only.

Fluorescent Lamps. Black light fluorescent lamps contain a special phosphor whose radiation peaks in the near-ultra-violet region of the spectrum. Lamps often used with filters to reduce visible light. Available with BLB glass for use without filters.

SUNLAMPS

Used in homes, offices and solaria.

●RS — Medium Screw Base. 275 watts. Is in a bulb with self-contained reflector and operates directly from 50-60 cycle, 110-125 volt a-c current with no auxiliary ballast required.

R-40, Inside Frosted bulb. Standard package, 6. Each \$9.95

MERCURY LAMPS

G-E Mercury lamps have high efficiency and long life and are applicable for general lighting in many industrial areas and for street and flood lighting. They are intended for use in conventional high bay lighting units. Auxiliary equipment required to operate.

HIGH VOLTAGE LAMPS

Durability and efficiency are less than with 110-125 volt lamps, but are lamps designed for use in the few locations where only the higher voltage is available. Some rough service lamps and R-52 and R-10 lamps also are available in 230 and 250-volt designs. Lamps listed below also available in clear bulbs.

† Marker
* Wind Direction
‡ Boundary Marker
o Obs. Marker.

Effective functioning of aviation lighting equipment requires accurate positioning of the light source. Bi-post and prefocus bases provide a high degree of accuracy.

Note: For low intensity, semi-flush Airport Runway Marker lights, about 2-in. high, use A-21 lamps. For medium intensity elevated lights, about 2-ft. high, use T-10 lamps. For higher intensity elevated lights, on runways where instrument landings are made, use 6.6A/T14P lamps.

GENERAL ELECTRIC LAMPS

**ROUGH SERVICE AND VIBRATION LAMPS
120 Volts**

50A/RS 100A/RS 150/RS

Rough Service lamp withstands shock and bumps, such as received when used as a portable light on extension cord. Some Rough Service Lamps available in 230 and 250 volts.

Watts	Bulb	Finish	Base	Length, Inches	Lamp Ordering Abbreviation	Std. Pkg. Qty.	Each

TRAIN AND LOCOMOTIVE LAMPS

200P-25

15514/IF 100A21/3
40A19

200 PAR

Trainlighting: Voltage regulating devices should be adjusted to maintain rated lamp voltage at the socket. 30 and 60-volt are best adapted to the voltage conditions normally encountered in trainlighting service.

Locomotive Headlight: Should be operated at rated voltage in headlight equipment protecting it from excessive vibration. The bulb must be protected from water which might strike it while hot, except in the case of the 200-watt PAR-56 lamp, which is of heat-resistant glass. Two sealed-beam type lamps are used on road locomotives, one on switchers. The 250-watt lamp is designed for road locomotives equipped with reflectors. The 100-watt is recommended for switching locomotives.

Locomotive Cab: For all-steam locomotive lighting purposes except headlighting.

GENERAL ELECTRIC LAMPS

OZONE LAMPS

G-E Ozone Lamps emit ultraviolet energy through the special glass bulb which changes some of the oxygen of the air to ozone. This masks odors in many areas such as kitchens, rest rooms, closets, offices, stores, elevators, basements, etc. Use one lamp for each 1000 cubic ft. of space.

Lamps require a ballast to limit current during operation. This can be a choke-coil, a 10-watt light bulb or a resistance of the correct size.

GENERAL ELECTRIC LAMPS

PHOTOFLOOD LAMPS
(also see Quartzline Lamps)
115-120 Volts

3100°K Photoflood Lamps give maximum light for the amount of current used. Designed for use with Type A color materials, but are also ideally suited for black and white photography.

3200°K Lamps are for general studio use with either black and white film or professional types of indoor color materials.

Reflector Photo Lamps have built-in reflectors. Beam spreads of these lamps vary from 20° for the PH/RSP2, to 90° for the PH/RFL2.

ARROW STAPLERS

WIRE & CABLE STAPLE GUNS

Specially designed for safe, speedy and efficient installation of electrical wires and cables. Powerful single stroke action shoots staples in 1/1000 of a second—imbeds them firmly and evenly, legs spread to lock tightly in wood, without twisting or bending the staple. Rosin-coated for greater gripping power. Driving blade automatically stops staple at right depth of penetration to prevent damage to wires and cables. Rugged all-steel construction with chrome finish. Patented jam-proof mechanism.

No. T-75 Staple Gun for non-metallic sheathed cables up to 1/2" diameter. Use 5/8" staple for 2 or 3 conductor 14; 3/8" staple for 2 or 3 conductor 12; 1/8" staple for very hard woodseach **\$14.40**

No. T-25 Staple Gun for fastening wires up to 1/4" diameter (bell, thermostat, telephone, intercom, burglar alarm type wires, etc.). Tapered striking edge gets into close corners and other tight places.each **\$14.40**

STAPLES

T25- 1/8"	5000	4.50	20.00

No. T-50oc OUTWARD CLINCH STAPLE GUN

Shoots a Flared Staple

Staple enters soft material and locks inside without penetrating through. Specially designed for jobs where external "anvil-in-base" staplers cannot be used, such as: stapling shipping tags, inventory control tags and receiving papers on corrugated containers; fastening butt or over-lapping insulation around steam pipes, boilers and air ducts; fastening display materials to corrugated or cardboard backdrops and numerous other jobs requiring a blind clinch.

Features patented internal sliding anvil for long life capacity in outward clinch staple forming; adjustable set screws for changing degree of curl on staple legs.....each **\$16.00**

PLIER-TYPE STAPLERS

Operate with powerful cam-actuated leverage for tireless short stroke and fast clinch stapling action. Designed with deep 2 3/4" throat for reaching into hard-to-get-at places. Both are built of all-steel with hardened steel working parts. Jam-proof easy-to-get-at mechanism for cleaning. Hand guide loop for greater maneuverability. Adjustable gauge attachment available for measured or spaced stapling.

No. P-35 — Suitable for sealing burlap, jiffy insulated and heavy kraft bags; fastening pipe and duct insulation in heating and air conditioning; rug binding in carpet workshops; fastening extended carton flaps for packing and shipping.each **\$8.40**

No. P-35S — Same design and construction as No. P-35 with additional feature of spear-pointed anvil arm which penetrates edges of corrugated containers for clinching staples inside. Serves to seal and strengthen container with damaging contents.each **\$11.15**

APPLETON-BENFIELD BENDERS AND HICKEYS
HICKEYS FOR STEEL OR ALUMINUM RIGID CONDUIT

Appleton-Benfield Hickeys bend rigid conduit only. Will bend to any radius. Short radius for shallow slabs and confined areas, long radius to aid in wire pulling, and varied radii for peculiar contours. The HB-7 bends 90° angles in one sweep. Both feature an automatic plumb-bob degree of angle indicator.

Cat. No.	Cond. Size	Handle	Std. Pkg.	Wt. per 100	Price
HB-7	1/2" and 3/4"	1"	10	375	\$7.44
HB-8	1" and 1 1/2"	1 1/2"	2	1200	16.00

Tigergrip Hickeys for Rigid Steel or Aluminum Conduit

An efficient, yet economical hickey for steel and aluminum rigid conduit. Available in two sizes to meet most application needs.

Cat. No.	Cond. Size	Handle	Std. Pkg.	Wt. per 100	Price
B-5075	1/2" and 3/4"	1"	10	210	\$3.31
B-100	1"	1"	10	550	10.13

APPLETON-BENFIELD BENDERS

Appleton-Benfield benders can be used for EMT rigid steel or aluminum conduit. They feature a solid non-skid hook, degree scale for fast precision offsets, outriggers to stabilize the bender, built-in back-pusher for minor degree adjustments, clear symbols and a five year guarantee. The standard model features one piece construction while the Powr-Jack model has a booster step that doubles the leverage ratio for larger size conduits.

Cat. No.	Rigid Size	EMT Size	Std. Pkg.	Wt. Per 100	Price
Standard Model					
B-1	1/2"		10	229	\$4.47

INDENTER CONNECTOR AND COUPLING TOOLS

Indenter tools for securing indenter fittings to thinwall. Small, light tools secure fitting with two quick squeezes of the handles.

Cat. No.	EMT Size	Std. Pkg.	Wt. per 100	Price
BMT50	1/2"	1	100	\$5.00
BMT75	3/4"	1	125	6.25
BMT100	1"	1	150	7.50

CHANNELLOCK TOOLS

CHANNELLOCK TONGUE AND GROOVE PLIERS

Interlocking principle positively prevents slipping under any load — the heavier the job, the greater the interlocking action. Wide base lugs. Nose design provides greater utility for gripping small objects. Patented design of tension edge provides more strength and eliminates stress concentration at channels. New interlocking design minimizes stress on joint bolt. Precision machined interlocking surfaces provide perfect fit, thus distributing pressure evenly. "Rite Angle" teeth guarantee maximum bite and minimum wear. Polished steel finish.

Cat. No.	Size In.	Jaw Cap. In.	Adj's.	Each

*Smoothjaw.
 †Govt. Specs. GGG-P-471c — Type II, Class 1, Style A. Size 5" (No. 424); Size 10" (No. 420).
 No. 460-G furnished only with blue dipped plastic grips. All others shown available with plastic grips at extra cost.

No. 349 WIREMASTER PLIER

Joint rivet closer to cutting edges gives 40% more cutting power than standard pliers. Enclosed joint construction for perfectly matched cutters.

No. 349 — Length, 9"each **\$6.80**

No. 88 ELECTRICIANS' HAMMER

Drop forged. Polished finish. NuRed enamel neck and under claw. Best quality hickory handle.

Size	Weight	Carton	Each
1	18 oz.	6	\$4.20

GRIPLOCK CLAMPING TOOL

Operates with one hand, easily, quickly, positively. Has fingertip release, tension adjustment, spring operation and jaw operator. No screws to adjust. Drop forged of high grade steel.

Cat. No.	Size In.	Jaw	Each
910	10	Straight	\$4.90
910-C	10	Curved	4.90

CRESCENT TOOLS

CRESCENT WIRE GRIPS

Parallel jaws give a firm, non-slip grip that will not injure the wire. Safety latch adds strength, prevents grip from dropping off wire. All parts heavily built and drop forged for extra strength.

Each grip tested to full load capacity.

For Bare and Insulated Steel or Copper Wire, With Serrated Jaw

Cat. No.	Capacity Inches	Safe Load Lbs.	Wt. Lbs.	Each
383	5/8 to 1 1/8	5000	1 3/4	\$13.75

1950-8" I	Insulated	8	17	4.07

CRESTOLOY WRENCHES

Single End Model

Wrenches made of Crestoloy steel are 30 percent thinner than those of ordinary steel. This thinness does not mean less strength, as the Crestoloy wrench is 200 per cent stronger than wrenches of the conventional type. Standard finish is a heavy plating of chromium.

Single End Wrenches

* Available in regular (1 1/2" cutting depth) and deep hole cutting (1 3/4") models. Add "D" to catalog number when ordering deep cutting hole saws. Example: S14D.

IDEAL FISH TAPE REELS AND PULLERS

Invaluable for building construction and industrial work. Reel serves as handle to give a firm grip in pulling on fish tape, eliminating special pullers, or dangerous bare-hand pulling. Saves 50% of workman's time. Keeps tape fully protected. Tape

is locked in reel when not in use and cannot spring loose.

Cat. No.	Lgth. and Size of Tape	Each
31-007	50 ft. x 1/8 x .045 (3/8")	\$3.30
31-008	50 ft. x 1/8 x .060 (1/8")	4.80
31-009	100 ft. x 1/8 x .060 (1/8")	8.15
31-011	100 ft. x 1/4 x .060 (1/8")	9.80
31-016	200 ft. x 1/8 x .060 (1/8")	11.95

IDEAL FISH TAPES

Highest grade tempered spring steel is used. No curling. Flexible and easy to use on long runs of conduit having several bends.

Cat. No.	Lgth. and Size of Tape	Each
31-004	50 ft. x 1/8 x .060 (1/8")	\$2.05
31-036	100 ft. x 1/8 x .060 (1/8")	3.60
31-038	200 ft. x 1/8 x .060 (1/8")	7.05
31-050	100 ft. x 1/4 x .060 (1/8")	5.70
31-052	200 ft. x 1/4 x .060 (1/8")	11.30
31-078	50 ft. x 1/8 x .045 (3/8")	1.70
31-079	100 ft. x 1/8 x .045 (3/8")	3.00
31-082	Fish Tape Leader	2.95
31-083	Fish Tape Ball (for flat tape)	1.15

IDEAL FISH TAPE WINDERS

This handy attachment will make your Ideal Fish Tape Reel easier and safer to use. Fits completely around reel and provides comfortable hand grip for sure, safe handling. Easy to use. Simply "push" to wind and "pull" to unwind. Saves on tape, helps prevent kinks. For use on reels with flat tapes. Made of tough Lexan* plastic.

Cat. No.	Description	Each
31-183	For 8 7/8" Reels No. 31-008 & 31-408	\$2.90
31-184	For 12" Reels No. 31-009, -011, -016, -409, -416	2.90

*Registered Trademark of General Electric Co.

IDEAL VOLTAGE TESTER

Safest, easiest-to-use voltage tester made. Designed for rugged daily use. Tests for: Voltage (110 to 550V. AC; 110 to 600V. DC), Frequency (25 to 60 Cycles), AC or DC, Circuit Continuity, DC Polarity, Blown Fuses, Grounding or Leakage. Solenoid calibrated voltage indicator functions separately from neon test lamp for safety. Case is seamless plastic with no surface metal. Yellow in color for safety. Prods have no-slip grips and 30" polychloroprene leads. Handy dual mounts allow placement of prod in either side of case. When tester is not in use

mounting wells provide storage space for prods.

Cat. No.	Description	Each
61-055	Tester, 2 prods	\$8.25
61-056	Tester, 1 prod, 1 ins. clip	9.75
61-057	Special Tester†, 2 prods	9.25
61-009	Vinyl Plastic Carrying Case	1.35
61-010	H-D Leather Carrying Case	2.75

†Has all the extra-safe features of above models, plus special current-limiting resistors in each prod. Resistors act as fuses in case of accidental shorts or breakdowns, and limit current in leads to prevent dangerous arcing. Lexan* case.

IDEAL ELECTRICIANS' PLIERS

WITH CRIMPING DIE

8 1/2" Electricians' Pliers with built-in crimping die — can be used for crimping Ideal Crimp Connectors. New England nose easily gets into hard-to-reach places, can be used for twisting wires and deburring conduit. Special plastic grips giving comfortable, powerful hold. Shipping wt. 1 lb.

No. 30-420 Pliers.....each \$4.75

IDEAL LOW COST T-TYPE WIRE STRIPPERS

A handy addition to every electricians' tool kit. Sturdy, compact, constructed of hardened steel for rugged duty and long service. Comfortable plastic grips for sure handling and safety. Also used for cutting and "looping" wires. Overall size: 6". Flat design for convenient fit in pocket or tool kit.

Cat. No.	Description	Each
45-120	For #10 to 18 ga. solid wire	\$1.95
45-121	For #16 to 26 ga. str. wire	1.95

IDEAL STRIPMASTER® WIRE STRIPPER

The only hand type wire stripper with automatic single-squeeze operation. Exclusive automatic feature holds jaws open after stripping to permit removal of wire and prevent crushing. A single squeeze of the handles strip wire clean up to a full 7/8". No nicking or fraying.

Blades can be changed with the removal of only two screws.

Strips building, fixture or telephone wire. Automotive, radio and aviation wire.

Cat. No.	Wire Gauge	Weight	Each
45-090	8 to 12	14 oz.	\$5.95
45-091	10 to 18	14 oz.	5.95
45-092	10 to 22	14 oz.	5.95
45-093	14 to 22	14 oz.	5.95
45-095	SP & SPT	14 oz.	5.95
45-097	16 to 26	14 oz.	5.95
L-5270	Adjustable Wire Stop		1.00
	Extra Blades for Stripmaster (pr.)		1.25

IDEAL CONTINUITY TESTER

Unit is powered with two pen-lite batteries and gives light signal to indicate completed circuit. Has 4' removable cord equipped with alligator clip. 5 1/2" long, weight, 3 oz.

No. 61-030 Tester (less batteries).....each \$2.75

IDEAL TEST-GLO™

Circuit tester for 80 to 600V. AC or DC. Long, thin handles permit deep probing and have "no-slip" safety rings. 24" lead wire (rated 10,000V) permits wide span. Cement sealed and moisture proof.

No. 61-040 Test-Glo Tester.....each \$2.75

IRWIN BITS

No. 415T SINGLE TWIST POLE BITS

Special bit steel, heat treated full length. Special cutting head with single spur and side lip. Rust resistant black oxide finish with edges polished.

Designed to bore through creosoted telephone and power poles without clogging or binding. Also for use in heavy construction at mines, docks and bridges.

Adapter Shank permits use in bit braces or electric drills. Length of twist 12", length overall 18".

Size In.	Wt. Lbs. Box	Each	Size In.	Wt. Lbs. Box	Each

16/16" and smaller, 6 in a box; 17/16", 3.

No. 88 SPEEDBOR DRILL BITS

Forged from one piece of tool steel, heat treated full length, fully polished. Hollow ground point bores faster, cleaner holes. Precision ground shank, will not wobble; six flats on shank.

Size marked on head; Hang-A-Bit hole in head.

1" and smaller, 6 $\frac{1}{8}$ " long; 1 $\frac{1}{8}$ " and larger, 6 $\frac{3}{4}$ " long. All sizes packaged in Sellopak display jacket.

1" and smaller, 6 in a box; 1 $\frac{1}{8}$ and larger, 3.

MICRO-DIAL EXPANSIVE AUGER BITS

Exclusive micrometer dial size adjustment. Drop forged in one piece from special analysis steel; heat treated full length. Medium slow screw pitch. Easy-reading dial markings; positive blade lock. Highly polished finish, red tang. In individual display boxes with hang-up tab.

No. 21 — Small size with two cutters, one cutting 5/8" to 1", the other 1" to 1 $\frac{1}{4}$ ". Wt. each 3/8 lb. each \$2.67

No. 22 — Large size with two cutters, one cutting 7/8" to 1 $\frac{1}{2}$ ", the other 1 $\frac{1}{2}$ " to 3". Wt. each 1/2 lb. each \$2.94

One in a box.

IMPACT WRENCH WOOD BITS

Hex drive type for quick change chucks. Single spur, single twist. Forged from solid bars of special tool steel—no welds. Heat treated full length. Bores clean through. No clogging, no binding, no stopping to clear chips.

TILDEN ROTARY KONKRETE KORE DRILLS

Tungsten carbide cutters set in the perimeter of the drill penetrate concrete and other masonry materials as fast as 6 inches per minute with a one inch bit. Patented core slot from 1/2-inch up. Spiral fluting clears the hole.

Drills reinforcing bars. Up to 300 inches without resharpening. Used in ordinary drill motors. Interchangeable shanks, 1/8" up for any depth holes.

Rawl Grips are made of live, hard rubber and are easily applied to No. 14 and No. 20 Rawl drill Holders. They give safe, comfortable and firm cushion grip.

BLACK & DECKER

3/8" HEAVY-DUTY HOLGUN® DRILL

Cat. No. 643 — \$67.00

Our highest quality 3/8" Pistol Grip Drill. Heavy-duty construction throughout—a continuous-duty drill. Extra-long brush life. Special alloy heat-treated gears. Precision geared chuck.

Bearings: 5 ball, 1 needle. Capacity: steel 3/8", hardwood 3/4". Speed: no-load 1000 R.P.M. Length: 8 5/8" Weight: net 3 3/4 lbs., ship. 5 1/4 lbs. 600 R.P.M. Special no-load speed

1/4" DRILL

Cat. No. 711 — \$13.00

Our most economical 1/4" Drill. For light industry, and farm repair jobs. Bearings: 1 Ball-Thrust, 4 lubricant-impregnated. Capacity: steel 1/4", hardwood 1/2", hole saws 1 1/8". Speed: no load 2250 R.P.M. Length: 7 7/8". Net wt. 3 lbs., ship. wt. 3 3/4 lbs. 115V AC only.

1/4" ALL-INSULATED DRILL

Cat. No. 880 — \$36.00

All parts that you touch are completely insulated. Housing is made of fiberglass reinforced polyester. No grounding needed. Bearings: 1 roller, 1 roller-thrust, 2 needle, 1 ball-thrust. Capacity: steel 1/4", hardwood 1/2". Speed: 2250 R.P.M. Length: 8 1/2". Net Wt. 3 3/8 lbs.

lbs., Ship. Wt. 4 lbs. Voltages: ("universal motor"): 115V or 220V AC only.

1/4" HEAVY-DUTY HOLGUN® DRILL

Cat. No. 457 (1700 R.P.M.) — \$57.00

Cat. No. 460 (600 R.P.M.) — \$65.00

Our highest quality 1/4" Pistol Grip Drill. Heavy-duty construction throughout—a continuous-duty drill. Extra-long brush life. Special alloy heat-treated gears. Precision chuck. Bearings: 5 ball, 1 needle.

Catalog No.	457	\$57.00	460	\$65.00

1/2" H.D. RIGHT ANGLE DRILL KIT

Cat. No. 756 — \$99.00

Drills in places inaccessible to straight-line drills. Head swivels 360°—locks in any position. Converts to a 1/2" End Handle Drill. Bearings: (in head) 2 ball, 2 needle; (in Drill) 3 ball, 5 needle.

Capacity: steel 1/2", hardwood 1 1/8", masonry 3/4". Speed: (High R.P.M. end) no-load 675 R.P.M., (Low R.P.M. end) 300 R.P.M. Drill Speed: (w/o Rt. Angle Head) 450 R.P.M. Length: 14 3/8". Weight: with steel Kit Box): net 19 lbs., ship. 20 3/8 lbs. Drill net wt. 11 lbs.

1/2" H.D. REVERSIBLE R.A. DRILL KIT same features as above unit with reversing switch. Cat. No. 756R—\$109.00

1/2" SUPER-DUTY DRILL

Cat. No. 575 — \$125.00

Capacity: steel 1/2" with chuck, 3/4" with #2 M.T.S.; hardwood 1 1/2" with chuck. Speed: no-load 450 R.P.M. Bearings: 6 ball, 2 needle. Weight: net 15 3/4 lbs.; shipping 20 lbs. Length: 16 1/2". Height: 13 3/8". Optional: No. 2 M.T.S. instead of chuck. Special Speeds: 375, 650, 900, 1200 and 3000 R.P.M. 1"-8 thread spindle model also available with 450 R.P.M.

3/8" HEAVY-DUTY 2-SPEED DRILL

Cat. No. 795 — \$52.00

Two tools in one.

2-Speed Shift gives you correct drilling power or torque at both high and low speeds. Increase torque 2 1/2 times just by shifting gears. Bearings: 1 ball, 3 needle, 2 roller. Capacity: steel 3/8", wood 3/4". Speeds: High 2500 R.P.M. no-load, Low 1000 R.P.M. no-load. Length: 9 1/2" Weight: Net 4 3/4 lbs., Ship. 5 1/4 lbs.

- Cat. No. 884—1/2"—\$79.00
- Cat. No. 884R—1/2" REV.—\$90.00

All-Insulated . . . special armature construction provides two independent insulating barriers between electrical windings and the spindle. Units are double insulated against internal and external electrical hazards. No straight line access through air slots to live parts. Fiberglass reinforced polyester housing will withstand same heavy-duty use as metal housing. End Handle design permits direct straight line pressure to bit. Newly designed cooling system. Quality ball and needle bearing construction throughout. Long life heavy-duty gearing. Warm to handle in cold. Cool to operate continuously.

BLACK & DECKER

1/2" DRILL

Cat. No. 815 — \$29.00

Compact, powerful and lightweight. Convenient side handle permits better control while drilling. Precision geared chuck. Dust shield on chuck end and commutator end. Will handle 1/2" twist bits in mild steel, 3/4" self-feed augers in wood and up to 1" power bore bits. Perfect for maintenance and repair work. Rated for intermittent use.

Bearings: 7 sleeve, 1 needle spindle, 1 ball thrust. Switch: single pole trigger.

Speed: no-load 550 R.P.M. Length: 9". Net Weight: 3 3/4 lbs. Shipping Weight: 4 lbs.

REVERSIBLE 1/2" SPECIAL DRILL

Cat. No. 687 \$60.00
Same as No. 679 except reversible.

1/2" SPECIAL DRILL

Cat. No. 679 — \$52.00

Lightweight, compact, high output. Well balanced for perfect control. Removable spade handle for easy commutator inspection. Precision geared chuck.

Bearings: 6 lubricant-impregnated. Capacity: steel 1/2", hardwood 1", masonry 3/4". Speed: no-load 600 R.P.M. Length: 14" (w/o handle 10 3/4"). Weight: net 7 1/2 lbs., ship. 10 lbs.

1/4" IND. CORDLESS HOLGUN® DRILL (6 V)

Cat. No. 906 — \$120.00

Completely cordless. No belt pack or heavy external battery to carry.

Versatile, use anywhere. Safe. Quiet running. Charging time for an uncharged Power Pack is approximately 10 to 12 hrs.; less time is required for an already partially charged Power Pack. Precision geared chuck.

Fit B&D No. 22148 Drill Stand. Duty Rating: continuous heavy-duty use.

Bearings: 3 ball, 3 needle. Switch: H.D. trigger. Std. Equip.: Cat. No. 51800 6-volt Industrial Power Pack; geared chuck and key; chuck key clip.

Cat. No. 906NP 6 volt one pack Industrial Power Pack Charger-----\$40.00

3/8" SPECIAL DRILL

Cat. No. 854 — \$24.00

Powered and geared especially for Mechanics, Installation Men, Maintenance Crews, etc. Perfect with hole saws. Quality geared chuck. Comfortable handle. Bearings: 1 needle, 1 Ball-Thrust, 5 lubricant impregnated. Capacity: steel 3/8", hardwood 3/4", masonry bits 1/2", hole saws 5/8" to 1 1/2". Speed: no-load 1000 R.P.M. Length: 8 1/16". Weight: net 3 1/2 lbs., ship. 3 3/4 lbs.

1/4" H.D. SHORTY® DRILL

Cat. No. 668 — \$60.00

Smallest, most compact drill on the market. Unique offset head permits close drilling on flush work. Paddle switch. Cool operation

twin fans. Lightweight, powerful. Bearings: 3 ball, 1 needle.

Capacity: in steel—1/4"; in hardwood—1/2". Weight: Net—3 1/4 lbs.; Shipping—4 1/4 lbs. Speed: No-load—2000 R.P.M. Length: 8 3/8"; Width (spindle end): 3 1/16".

1/4" HEAVY-DUTY END HANDLE DRILL

Cat. No. 702 (geared chuck) — \$65.00

Cat. No. 703 (keyless chuck) — \$77.00

Heavy-duty construction throughout — a continuous-duty drill. Extra-long brush life. Powered for toughest drilling jobs. Handle design permits maximum pressure behind drill bit. Cool running.

Bearings: 3 ball, 3 needle. Speed: no-load 2000 R.P.M. Length: 12 1/2". Weight: net 6 3/4 lbs., ship. (No. 702) 7 1/4 lbs., (No. 703) 7 3/4 lbs.

1400 R.P.M. Special no-load speed, keyless chuck...Cat. No. 703-14—\$85.00

3/8" DRILL

Cat. No. 813 — \$18.00

This Drill has the same quality features as its companion Drill, the 854, with the exception of bearings. The 813 carries 1 Ball-Thrust and 6 Lubricant Impregnated Bearings.

3/8" STD. HOLGUN® DRILL

Cat. No. 653 — \$45.00

Ideal for the man who does occasional heavy-duty drilling, but does not need a continuous-production unit. Perfect for maintenance and installation work, etc.

Bearings: 1 ball, 3 needle, 2 caged roller. Capacity: Steel—up to 3/8"; Hardwood—5/8". Speed (no-load): 1100 R.P.M. Length: 8 1/2". Weight: Net—3 3/8 lbs., Shipping—4 1/4 lbs.

BLACK & DECKER

TWISTON* HOLE SAWS

NOW BLACK & DECKER HIGH SPEED STEEL TWISTON* QUALITY HOLE SAWS SAVE 30-45% AFTER YOUR INITIAL PURCHASE... FOR AIR CONDITIONING, ELECTRICAL HEATING AND PLUMBING CONTRACTORS, METAL FABRICATORS, INDUSTRIAL PLANTS and OTHER HOLE SAW USERS. You don't buy a new hole saw every time the blade needs changing! Black & Decker's exclusive Driver Plate is designed so that only the blade has to be replaced.

HEAVY-DUTY DRYWALL SCREWDRIVER

Cat. No. 740-2 — \$95.00

Drive mounting screws to an exact pre-set depth. Prevent marred screwheads and damaged wallboard surfaces. Use with 1" and 1 1/8" Steel Studing Screws, 1 1/4" Wood Studing Screws and Acoustical Tile

Screws. Speed: no-load 2500 R.P.M. Bearings: 8 ball, 2 needle. Length: 11 1/2". Weight: net 4 lbs., ship. 5 3/4 lbs.

Cat. No. 740-1 H.D. Drywall Screwdriver with 25 ft. cord ----- \$94.00

Cat. No. 740 H.D. Drywall Screwdriver, 1700 R.P.M. \$89.00

No. 10

PISTOL-GRIP SCRUGUN® SCREWDRIVER

Cat. No. 630 — \$75.00

For assembly and disassembly operations that require moving in or around the work. Has same operating features as Center-Drive Scrugun® Screwdrivers but not as suitable for suspension line. Fits Micro Clutch Assembly.

Capacity: Wood Screws ----- up to No. 10 x 2" Machine Screws and Nuts ----- up to No. 12 Self-tapping Screws ----- up to No. 12

Standard Equipment: 3-wire cable and plug, No. 13207 bit with protector, centering and spring sleeves. Voltage Available: 115V or 220V AC only.

ELECTRIC IMPACT WRENCHES

Longer life, fewer maintenance costs, cooler running than any Electric Impact Wrench on the market.

Nos. 624-4 and 624-5 12 Volt Impact Wrenches plug into B&D No. 54700 12 Volt Wet Cell Battery (see accessories below) so that you can use them anywhere electrical outlets are not available. Perfect for utility pole work, boat building, etc.

Nos. 724-1 and 625-1 Impact Wrenches equipped with Quick-change Chucks are perfect for installing utility pole hardware; general construction work; boat building, prefab building erection, etc. Bore deep 7/16" to 1/16" diam. holes in wood without operator torque reaction. Reversing switch permits easy, safe bit removal.

and Rip Fence.

Lightest, most powerful professional saws ever made. Built for cost-cutting superiority. Equipped with electric brake that stops instantly.

FEATURES

Greater blade visibility from motor side for more precise and accurate cutting. Balanced for perfect control at all times. Fast, easy access to every component. Baffled air inlets protect motor from wood chips, etc. Detachable wrap-around shoe supports saw and is removable for close cuts. Handle, control knobs and trigger switch insulated for safety. Simple, easy depth and angle adjustments. Built for a long life. Chrome-plated saw blades for longer, better cutting.

CIRCULAR SAW BLADES

COMBINATION

Specifically designed for general-purpose ripping and cross-cutting. Fast, smooth cuts.

CROSSCUT

Perfect for smooth, fast cross-cutting. Makes smoother cuts than Combination Blade.

RIP

Fast for rip cuts. Minimum binding and better chip clearance given by large teeth.

PLANER

Hollow-ground for Very Smooth ripping and cross-cutting. Ideal for interior woodwork, etc.

FLOORING

Use where nails may be encountered — floors, reclaimed lumber, opening crates, etc.

CARBIDE-TIPPED

Fastest, smoothest, longer sawing without blade sharpening. Tungsten carbide tips stay sharp up to 50 times longer than steel. Have 8 teeth. Cuts wood, Transite, Cemesto Board, asbestos, Formica, Masonite, composition siding, roofing materials, etc.

METAL-CUTTING

Teeth shaped and set for cutting aluminum, copper, lead; other soft metals.

PLYWOOD

Hollow-ground to give an exceptionally smooth cut in plywood. No binding or splintering. Sheds rosin and glue

FRICTION

Perfect for corrugated galvanized sheets. Faster, less dirt than with abrasive blades. Taper ground for clearance. Note difference in diameters. For best results, use blade diameters recommended in chart.

FRAMING

A medium pitch combination blade for fascia, roofing, siding, sub-flooring, framing, form-cutting, (standard equipment blade for worm drive saws).

ABRASIVE BLADES

Highest quality grit gives Longer Life, Faster Cutting — real time and money savers. Efficiently cut or slot materials below. Reinforced with fiberglass to give Safe Performance and Longer Life — makes blades highly break-resistant.

Blue Label: aluminum oxide; cuts ferrous metals (steel, cast iron, stainless steel) & hardened non-ferrous (hard brass, aluminum, bronze).

Red Label: silicon carbide; cuts masonry materials, concrete, soft brick, cinder block, asbestos cement, concrete block, gypsum wallboard, Transite, limestone, sandstone, corrugated plastic, and soft non-ferrous metals.

Green Label: silicon carbide; cuts glazed and ceramic tile, terrazzo, hard brick, roofing and structural tiles, terra cotta, marble, granite, slate, etc.

"SELECT QUALITY" BLADES

Low priced combination blades for general-purpose ripping and cross-cutting. Fast, efficient.

Cat. No. 92 — \$90.00

For Medium Industrial Use

Designed for general-purpose industrial service. Ball-bearing equipped throughout. Use with 7" Abrasive Discs, 4" Wire Cup Brushes, 7" Rubbing Pads. Spindle: 5/8"-11". Length: not including pad — 17 3/4". Weight: net 10 5/8 lbs.; shipping — 13 lbs.

Speed: no-load — 4250 R.P.M. Standard Equipment includes spindle locking pin; trigger switch with locking button; reversible side handle; strap-metal stand; 7" Quick-Change Super-Flexible Backing Pad and Washer.

Voltages Available: 115 volts or 220 volts AC/DC.

HEAVY-DUTY INDUSTRIAL SANDER

Cat. No. 890-5 — \$114.00

Specifications	No. 890-5 \$114.00
Backing pad diameter	6 3/4"
Switch type	lever
No-load RPM	5000
Length w/o pad	18 5/16"
Rubbing backing pad	4 3/4"
Net weight lbs.	14 1/4
Shipping wt. lbs.	18 1/8

SUPER-DUTY ANGLE GRINDER

Cat. No. 797G-8 — \$176.00

Superior power. Special motor laminations give most power per pound. Outperforms all others in doing jobs fast. Longest life. Does jobs not possible before. Built-in circuit breaker, special resin and varnish on motor wire given double overload protection.

Specifications (5/8"-11 spindle thread)	Cat. No. 797G-8 \$176.00
Depressed center wheel	7" x 1/4"
Instant release lever switch	Yes
No-load R.P.M.	8000
Length w/o pad	20 1/4
Net weight lbs.	18 3/4
Shipping weight lbs.	24

Std. Equip.: depressed center wheel, guard assembly, hard rubber stand, reversible side handle, spindle lock, clamp washer, spanner wrench.

Voltages Available (universal motor): 115V or 220V AC only (for DC operation remove circuit breaker).

HEAVY-DUTY ROTARY HAMMER

Cat. No. 719 — \$315.00

Drives core bits up to 6" in diameter. No rig, no water, no experience necessary. Lowest cost per hole of any hammer in its class. Friction Drive prevents operator injury if bit jams in material. Cuts reinforcing rods with core bit. Longest life. Hole Drilling Capacity (percussion carbide bits) 3/4" to 1 1/2", (core bits) 4"; Blows/min. (no-load) 3600, Rated-load RPM 485; 17" long; 19 1/2 lb. net.; 29 5/8 lb. ship. wt. Std. equip.: depth gauge; tool retaining spring; reversible side handle; 4 oz. can of oil; dust shield; sturdy fiber carrying case; 4 oz. plastic bottle of oil; pump oiler.

Voltages Available (universal motor): 115V or 220V AC/DC.

HEAVY-DUTY ROTARY HAMMER

Cat. No. 718 — \$240.00

Lowest cost, most powerful, lightest weight hammer in its class. Exclusive compact design (patent pending). Easiest to handle. Friction Drive, externally adjustable, prevents operator injury if bit jams in material. Use with percussion bits or forged hammer tools. Longest life. Hole Drilling Capacity (percussion carbide bits) 1/4" to 1 1/2", (core bits) 2"; Blow/min. (no-load) 3350, Rated-load RPM 700; 13 3/4" long; 12 7/8 lb. net wt.; 24 lb. ship. wt.

Std. Equip.: depth gauge; tool retaining spring; reversible side handle; 4 oz. can of oil; dust shield; sturdy fiber carrying case; 4 oz. plastic bottle of oil; pump oiler.

Voltages Available (universal motor): 115V or 220V AC/DC.

SUPER-DUTY HAMMER

Cat. No. 109 — \$390.00

Extra Heavy-Duty Construction, Performance

Lowest possible maintenance costs and longest service life in its class. Outstanding as a demolition tool. Improved from end to end.

Std. Equip.: turning handle; tool retaining yoke mounted on barrel; trigger switch; can of oil; carrying case.

Operating Range (hole diam.)	Blows per min.	No. of times faster than hand drilling	Length	Net Wt.	Ship. Wt.
1 1/16" to 2 1/2"	1750	32	22 1/2"	31 1/4 lbs.	45 3/4 lbs.

Std. voltages: ("Universal" motor): 115V or 220V AC/DC.

HEAVY-DUTY ELECTRIC HAMMERS

Cat. No. 102 — Cat. No. 103-1 — Cat. No. 104-1 — 1/2" — \$165.00 1" — \$205.00 1 1/2" — \$265.00

Greatly speeds up any drilling or cutting operations requiring a hammer action. For drilling and channeling in concrete, stone or brick; removing form marks from concrete surfaces; caulking joints and seams in tanks; pipe lines, etc.; and removing scale in boilers, tanks, etc.

Std. Equip.: chuck wrench; dust shield; 2 tool retaining springs; drift key; can of oil; carrying case.

Std. voltages: ("Universal" motor): 115V or 220V AC/DC.

Cat. No.	Model	Operating Range (hole dia.)	Blows /min.	Lgth. ins.	Net Wt.	Ship. Wt.	Prices
102	1/2"	3/4" to 3/4"	2400	12 3/8	5 3/4 lbs.	13 lbs.	\$165.00
103-1	1"	1/4" to 1 1/8"	2300	14 5/8	10 3/4 lbs.	21 lbs.	\$205.00
104-1	1 1/2"	1/2" to 2"	2200	18 1/8	19 1/4 lbs.	32 lbs.	\$265.00

BLACK & DECKER

ELECTRIC SHEARS Cat. No. 259 — \$145.00

Cut ferrous and non-ferrous sheet metal with a powerful scissors-like action—up to 30 feet per minute in cold rolled steel. Follow pattern lines perfectly, only a light forward pressure is needed. Built for top output on production work.

No. 16 Shear	
Capacity in steel	16 gage (.0598")
— in Monel or Stainless	18 gage
Strokes per Minute	No-load, 3300 full load, 2500
Min. Cutting Radius	3/8"
Weight	net — 6 3/4 lbs. ship. — 8 lbs.
Size	11" lg., 9 1/4" high
Catalog No.	259
	\$145.00

Standard Equipment: Instant-release trigger switch with locking button; 3-conductor cable and plug; pair of tool-steel shear blades.

Voltages Available: 115 volts or 220 volts A.C. or D.C.

HEAVY-DUTY NIBBLERS

Cat. No. 632 — \$165.00

No. 632

No. 632—For Continuous Production Cutting in all types of sheet metal. Up to 18 ga. (20 ga. for Monel or Stainless Steel); 16 ga. for intermittent heavy-duty cutting of steel (18 ga. for Monel or Stainless Steel). Cuts many types of corrugated metals, plastics, composition materials.

Specifications	No. 632 H.D. Nibbler Cat. No. 632 \$165.00
Capacity in steel	U.S. Std. 16 gage
— in Monel or Stainless	U.S. Std. 20 gage
Non-ferrous metals	—
Strokes per Minute	no-load 3300 rated-load 2500
Min. Cutting Radius	1" outside edge, 1 1/16" inside
Net Wt.	5 1/2 lbs.
Size	9 1/4" long, 7 1/2" high

HEAVY-DUTY SABRE SAWS

Cat. No. 682-6 6-Speed — \$110.00

Cat. No. 682-2 2-Speed — \$100.00

Cat. No. 682 1-Speed — \$95.00

Cuts wood, metal, plastics, etc. Most powerful on the market. Has many Exclusive B&D features. Available in 1-Speed, 2-Speed and 6-Speed models—the correct speed for every job. Stroke Length: 1"; Stroke per min.: (1-Speed) 2300; (2-Speed) 2300 High, 1100 Low; (6-Speed) 2300 High, 980 Low. Capacity: (Wood) heavy timbers, (steel) 1", (scroll cutting) down to 1/4" radius. Length w/o blade 15"; Net wt. 8 3/4 lbs., Ship. wt. 9 3/4 lbs. Std. Equip.: Nos. 49122 & 49115 Blades. Voltages Available (2-Speed & 6-Speed Saws) 115V or 220V AC; (1-Speed Saw) 115V or 220V AC/DC.

Cat. No. 49304 Blade Clamp Nut and Clamp Screw ----- \$1.10

Cat. No. 49303 Hex Socket Blade Clamp Wrench—\$.35

STANDARD JIG SAW Cat. No. 41 — \$45.00

Low Priced, Light Weight, Versatile, Fast Cutting. Makes 45° angle cuts. Air keeps cutting line visible. No splintering of upper wood surface.

Efficiency Rating: up to 2 1/2" in soft wood; 3/4" in Aluminum; 1/4" in Steel.

Length of Stroke: 5/8".

Speed: 3000 strokes per min.

Size: 7" long, height w/o blade: 6 7/8". Wt.: 4 1/2 lbs. net, 5 3/4 lbs. ship. Std.

Equip.: No. 49491 Fine

Tooth Metal Cutting Blade; No. 49493 Medium Tooth Wood Cutting Blade; combination rip fence and circle cutting guide; wrench for blade changing.

Voltages Available: 115 Volts or 220 Volts AC only.

HEAVY-DUTY JIG SAW

Cat. No. 11 — \$115.00

Fast-working, powerful. Designed for heavy-duty, continuous production operations. Makes bevel cuts up to 1 3/8" on either side. Long service-life.

VACUUM FISH TAPE SYSTEMS Patents Pending

Equipped with the

POWERFUL NEW HEAVY-DUTY HI-AIR-FLO Vacuum Cleaners

Cat. No. 990-1

Cat. No. 990-3

Cat. No. 52387
Vac. Fish Tape
Kit only

Cat. No. 990-2

Cat. No. 990-4

- Low cost, fast, safe way to run pull-lines through conduit. All parts reusable.
- Compact, lightweight. Works in tight places (closets, scaffolds, ladders).
- Powerful vacuum cleaner suction pulls carrier (with rope attached) through 1/2" to 6" nominal I.D. conduits.
- Collects foreign matter, including water, in tank. Cleans Conduit.
- Carriers are non-conductors, no electrical hazards. Safe.

Please see B&D Catalog Folder No. 1018 for complete information.

CAT. NO. 990-1 VACUUM FISH TAPE SYSTEM — \$320.00

Contents: 165-1 H.D. Vacuum Cleaner; Vacuum Fish Tape Kit; No. 33058 15 ft. 1 1/2" I.D. Semi-flexible Extra Heavy-Duty Hose; No. 49326 Water Shut-off Valve.

CAT. NO. 990-2 VACUUM FISH TAPE SYSTEM — \$335.00

Contents: No. 165-2 H.D. Vacuum Cleaner; Vacuum Fish Tape Kit; Nos. 33058 Hose and 49326 Water Shut-off Valve.

CAT. NO. 990-3 VACUUM FISH TAPE SYSTEM — \$365.00

Contents: No. 165-3 H.D. Vacuum Cleaner with stainless steel tank resistant to acids and corrosion and a convenient drain at rear of tank; Vacuum Fish Tape Kit; Nos. 33058 Hose and 49326 Water Shut-off Valve.

CAT. NO. 990-4 VACUUM FISH TAPE SYSTEM — \$380.00

Contents: No. 165-4 H.D. Vacuum Cleaner with stainless steel tank resistant to acids and corrosion and a convenient drain at rear of tank. Vacuum Fish Tape Kit; Nos. 33058 Hose and 49326 Water Shut-off Valve.

CAT. NO. 52387 VACUUM FISH TAPE KIT — \$87.75

Contains all of the equipment needed to convert your Black & Decker Heavy-Duty Industrial Vacuum Cleaner into a Vacuum Fish Tape System. Ship. Wt. 15 lbs.

**ROCKWELL
"WELL-NUT"®**

**A VERSATILE BLIND FASTENER THAT
SEALS LEAKS, DAMPENS VIBRATION, MUFFLES
NOISES—FASTENS ANYTHING ANYWHERE**

Well-Nut is a blind fastener and does not require access to the rear of the material. Gives equally satisfactory results in a hole in thin material or a cavity in thick material. Is air- and water-tight. Dampens vibration and muffles noises. Has locknut action and electrical insulating properties and holds in panels that are too thin for regular screws or other ordinary fasteners. Well-Nut is oil-resistant and functions in a wide temperature range. Has excellent aging qualities—the neoprene bushings lasting for many years under normal conditions. Easily removable and is reusable.

Figures are approximate
*With or without screws—
all other sizes without screws.

RESEARCH AND DEVELOPMENT KIT

Solve fastener problems easier when you visualize and test the various sizes of Well-Nuts available. Metal kit contains 15 different styles (over 100 fasteners) with specifications.
Research and Development Kiteach **\$10.84**

**WELLSAW®
METAL CUTTING BAND SAWS**

MODEL No. 8

Shown with optional wet cutting system.

For production line cut-off work or general maintenance service. Counter-balanced frame and hydraulic stabilizer provide adjustable uniform feed. Sturdy design assures accuracy and dependability.

Capacity, rectangular, 9" x 16"; capacity, rounds, 9"; selective speeds, fpm, 50, 100, 175, 275; motor size, 1/2 H.P.; blade width, 3/4"; shipping weight 650 lbs.
Model No. 8 Wellsaweach **\$720.00**

MODEL 600

Designed for utility service, this model gives excellent service on medium production jobs. Adjustable, uniform gravity feed is provided by hydraulic stabilizer and special coil spring.

Shown with optional wet cutting system.

Capacity, rectangular, 6" x 13"; capacity, rounds, 6 3/4"; selective speeds, fpm, 50, 90, 160, 250; motor size, 1/2 H.P.; blade width, 5/8"; shipping weight, 425 lbs.
Model 600 Wellsaweach **\$520.00**

MODEL 58B

Converts to an upright saw with optional work table.

As a horizontal cut-off saw, this model features quick action vise and adjustable guides. For vertical use, just swing head into upright position and install the optional work table. Wet cutting system available.

Capacity, rectangular, 6" x 10"; capacity, rounds, 6"; selective speeds, fpm, 76, 141, 268; motor size, 1/2 H.P.; blade width, 1/2"; shipping weight, 270 lbs.
Model 58B Wellsaweach **\$395.00**

MODEL 300

Use as a horizontal cut-off machine or swing the head to vertical position and use as upright band saw. Has positive action vise and automatic shut-off after each cut.

Capacity, rectangular, 3 1/2" x 6"; capacity, rounds, 3 1/2"; selective speeds, fpm, 54, 100, 190; motor size, 1/4 H.P.; blade width, 1/2"; shipping weight, 133 lbs.
Model 300 Wellsaweach **\$280.00**

TRUCO DRILLING EQUIPMENT

TRUCO MODEL BH

Drills holes 1" to 16" diameter. Drill head pivots 360°, allows 26" of travel. Column extends from 5'2" to 11'8". Four wheeled base has four leveling screws and two holes for anchoring. Superstructure and base (no motor), shipping weight 225 lbs., \$425.00. Superstructure only, shipping weight 115 lbs., \$250.00. Base assembly complete, shipping weight 110 lbs., \$175.00. Motor prices upon request from your local Graybar office.

TRUCO MODEL BL

Drills holes 1" to 10" diameter. Drill head pivots 360°, allows 26" of travel. Column extends from 5'2" to 11'8". Two wheeled base has four leveling screws and four slots for anchoring. Superstructure and base (no motor), shipping weight 155 lbs., \$375.00. Superstructure only, shipping weight 40 lbs., \$125.00. Motor prices upon request from your local Graybar office.

TRUCO MODEL S DRILL STAND CRADLE MOUNT

Drills holes 1" to 6½" diameter. 23" drill travel. "T" handle for locking motor mount. Two wide-track wheels on the base plus four leveling screws and slot for anchoring. Choice of electric or air power. Drill stand (no motor), shipping weight 64 lbs., Part No. TDSA, \$195.00. Motor prices upon request from your local Graybar office.

TRUCO MODEL SM MACHINE MOUNT

Drills holes 1" to 8". Drill stand (no motor), shipping weight 60 lbs., Part No. TDSM, \$195.00. Motor prices upon request from your local Graybar office.

TRUCO MODEL QV

For use in restricted areas, anchor holes and installing ornamental iron work. The vacuum pump and fittings actuate a built-in vacuum pad that creates 600 lbs. (approx.) hold-down power. Drills holes 1" to 4" dia. 19" drill travel on steel gear rack and column. 8" x 16" cast aluminum base has four leveling screws and anchoring hole. Drill stand and vacuum (no motor), shipping weight 67 lbs. Part No. TDSQV, \$312.50. Motor prices upon request from your local Graybar office.

TRUCO MODEL Q

Same as model QV except without pump and fittings. Drill stand (no motor), shipping weight 45 lbs. Part No. TDSQ, \$182.50. Motor prices upon request from your local Graybar office.

ENERPAC®

TOOLS FOR ELECTRICAL CONSTRUCTION

Combination, One-Shot and Sweep Benders are now available in Eject-O-Matic® or Regular Models

ENERPAC Eject-O-Matic® Bending

This is the Exclusive Enerpac concept that lets you eject the pipe hydraulically, as quickly and easily as you bend it. This unique two-hose bending feature eliminates the time and trouble of hammer-out pipe removal.

Other exclusive ENERPAC features:

- Faster bending
- Fewer parts to lose
- Choice of Hi-Speed Hand or Electric Pump operation
- Easy correction of Overbends
- Optic Angle Gage
- All-aluminum frames and shoes
- Push-button Pivot pins

COMBINATION ONE-SHOT/SWEEP BENDERS — 1" THROUGH 5"

S-359

S-309

No.	Description	Each
S-351	Eject-O-Matic set. Bends 1¼"-4" one-shot plus 5" sweep. With High Speed P-84 Hand Pump	\$1,100.00
S-353	Eject-O-Matic set. Bends 1¼"-4" one-shot plus 5" sweep. With PE-641 electric pump for remote pushbutton control	\$1,440.00
S-359	Eject-O-Matic set. Bends 1¼"-4" one-shot plus 2½", 3", 3½", 4", 5" sweeps. With PE-641 electric pump for remote pushbutton control	\$1,769.00

No.	Description	Each
S-337	Eject-O-Matic set. Bends 1¼"-3" one-shot, 3½"-4" sweep. With PM-641 elec. pump	\$1,157.00
S-347	Eject-O-Matic set. Bends 1¼"-4" one-shot, 3½"-4" sweep. With PM-641 elec. pump	\$1,517.00
S-349	Same as S-347, but with PE-641 elec. pump for remote pushbutton control	\$1,703.00

No.	Description	Each
S-308	Regular set. Bends 1"-2" one-shot, 2½"-4" sweep. With P-39 hand pump	\$491.00
S-309	Eject-O-Matic set. Bends 1"-2" one-shot, 2½"-4" sweep. With P-84 hand pump	\$598.00
S-327	Eject-O-Matic set. Bends 1¼"-3" one-shot, 3½"-4" sweep. With P-84 hand pump	\$800.00

ONE-SHOT BENDERS — ½" THROUGH 4"

S-343

S-333B

No.	Description	Each
S-320	Regular set. Bends ½"-2" With PM-621 electric pump	\$685.00
S-321	Eject-O-Matic set. Bends 1"-2". PM-641 electric pump	\$769.00
S-335	Eject-O-Matic set. Bends 1¼"-3". With PM-641 electric pump	\$1,032.00
S-343	Eject-O-Matic set. Bends 1¼"-4". With PM-641 electric pump	\$1,386.00

No.	Description	Each
S-316	Regular set. Bends ½"-2". With P-39 hand pump	\$281.00
S-317	Eject-O-Matic set. Bends 1"-2". With P-84 hand pump	\$365.00
S-333B	Eject-O-Matic set. Bends 1¼"-3". With P-464 Hi-Speed hand pump	\$805.00
S-339	Eject-O-Matic set. Bends 1¼"-4". With P-84 hand pump	\$1,052.00

No.	Description	Each
S-300	Regular set. Bends 1"-2". With compact P-39 hand pump	\$250.00
S-306	Regular set. Bends 1¼"-4". With compact P-39 hand pump	\$475.00

ENERPAC®

TOOLS FOR ELECTRICAL CONSTRUCTION

NEW POWERED CABLE PULLING STATION

Eliminates jury-rigging methods in pulling cable since it sits on the floor and pulls from the floor. All-directional extension arms telescope the puller to the work for fast, easy, safe control in all pulling jobs through 5,000 lb. pulls.

CP-400 \$900.00

Lighter duty economy puller consisting of same rugged tripod frame for easily installing your existing powerhead on the base frame. Portable power threading units may also be adapted. CP-402 powerhead may be adapted to base frame.

CP-401 \$650.00

TWIN PULLING SYSTEM

OPTIONAL ACCESSORY SNATCH BLOCKS

Z-1410 5" Size \$28.00

Z-1411 9" Size \$39.00

Z-1412 14" Size \$69.00

NEW VACUUM

"ZIP-FLO" SYSTEM faster, easier and more efficient way to fish lines for conduit or EMT in sizes 1/2" through 6".

VA-100 \$265.00

Same contents as Model VA-100 but equipped with a VA-103 mobile power unit which features a stainless steel tank for resistance to acids and extreme corrosive exposure.

VA-101 \$301.00

ENERPAC HI-HOIST®

HH-113. Portable mechanical "elevator." Rolls easily anywhere in the plant. Raises 100 lbs. of material to a height of 13 ft. Simple crank action lifts load and holds it into place. Tubular, telescopic stand easily dismantles for portability. Each \$165.20

CABLE CUTTERS

CS-100. Enerpac Cable Cutter Attachment. Converts hydraulic knockout set into cable cutter. Will cut up to 1,000,000 C.M. cable and high voltage cable up to 2" outside diameter. Aluminum and copper cable only. With case. Does not contain hydraulics. Each \$88.60

HS-100. Complete Enerpac hydraulic Cable Cutter Set. Includes CS-100 cutter attachment, SB-70 pump and ram set, Z-1221 pull rod, Z-1223 nut, and Z-1337 metal box. Each \$219.00

S-34

S-34 THINWALL BENDERS

Designed for E.M.T. Conduit, sizes 1 1/4" through 2". With lightweight aluminum bending shoes and supports.

No.	Description	Each
S-34	Regular set. Bends 1 1/4"-2". With P-39 hand pump.....	\$370.00

Bends 2" Thinwall!

BT-200

"MILWAUKEE BENDERS"

New mechanical ratchet-type benders for 2" E.M.T. and other sizes.

No.	Description	Each
BT-200	Bends 2" thinwall.....	\$235.00
BR-300	Bends 1/2"-2" thinwall, 1/2"-1 1/2" rigid, 2" alum....	\$595.00

SB-62

KNOCKOUT PUNCH SETS

No.	Description	Each
SB-62	Master set (10 sizes). Punches holes 1/2"-4". With P-14 hand pump.....	\$296.00
SB-61	Basic set (6 sizes), 1/2"-2". With P-14 hand pump.....	\$161.00

GREENLEE BENDERS, KNOCKOUT PUNCHES, CABLE PULLING EQUIPMENT

CABLE CUTTER

Cuts up 1000 MCM standard copper or aluminum power cable. 11-ton ram power. Jaws cannot overtravel and lock. Operates with hand or power pump.

Cat. No.	Description	Each
750-H-767	Hydraulic Cable Cutter — hand pump	\$158.00
750-E-915	Hydraulic Cable Cutter — power pump	446.00

Convert your Greenlee No. 7646 Hydraulic Knockout Driver to a cable cutter.

751	Cutter Head unit	58.00
1-7543	3/4" Piston Shaft	3.00

KNOCKOUT PUNCHES

Punches holes in metal up to 10 gauge.

Cat. No.	For Conduit Size	Each	Cat. No.	For Conduit Size	Each
735 Set	1/2, 3/4, 1, 1 1/4"	\$11.40	741	3 1/2"	\$42.50
737 Set	1 1/2", 2"	12.30	742	4"	52.00
738	2 1/2"	16.00	743	5"	78.50
739	3"	21.60			

KNOCKOUT PUNCH DRIVER

Driver develops 11 tons of ram force. For use with all Greenlee Knockout Punches 1/2-5".

Cat. No.	Description	Each
7646	Hand Pump, hose, ram in metal box, no punches	\$110.00
7306	Hand Pump, hose, ram 6 punches 1/2-2" in metal box	134.00
7310	Hand Pump, hose, ram 10 punches 1/2-4" in metal box	244.00
7304	Four Knockout Punches 2 1/2-4" in metal box	110.00

SPECIAL PURPOSE PUNCHES

Cat. No.	Description	Each
734	1 1/8 x 1 3/8" Double "D" Punch for electrical receptacles	\$27.00
730-T	3 1/8" Round Panel Punch for reset timers	28.00
730-S	1 3/4" Metal Punches for oiltight control units	5.50
731-M	2" Square Punch for Micro-Switch® manual control units. Must be used with a Greenlee No. 7646 Hydraulic Punch Driver	65.00

ONE-SHOT KNOCKOUT PUNCH DRIVERS

Eliminate predrillings and set-up punching. 8" throat. Made of high-strength aluminum and steel. Operate with Greenlee hand or power pump.

Cat. No.	Description	Each
1731	Driver with dies and punches 1/2, 3/4, 1" in metal box. Without pump	\$102.00
1732	Driver without punches and pump. For punching holes 1/2-4"	196.00
1731-G2	No. 767 Hand Pump for use with No. 1731 Knockout Punch Driver	45.50
7132-G1	No. 755 Hand Pump for use with No. 1732 Knockout Punch Driver	84.00

RATCHET KNOCKOUT PUNCH DRIVER

Ten times faster than wrench operation. For use with Greenlee Knockout Punches 1/2-3".

Cat. No.	Description	Each
1804	Driver without punches in metal box.	\$57.00
1806	Driver with knockout punches 1/2-2" in metal box	81.00

HAND AND POWER PUMPS

POWER PUMPS

Cat. No.	Description	Each
940SA-PS	1-hp Hydraulic Power Pump for use with Greenlee benders and other hydraulic tools having spring return. 115/230 v, a-c motor	\$430.00
960SA-PS	1 1/2-hp Hydraulic Power Pump for use with Greenlee benders and other hydraulic tools having spring return. 115/230 v, a-c motor	480.00
915 PS	Compact Hydraulic Power Pump for use with Greenlee one-shot knockout drivers and benders (except Nos. 884 and 885). 115 v, a-c/d-c motor. Weighs only 22 lbs.	320.00

HAND PUMPS

767	Hand Pump for use with Greenlee knockout punch driver and other tools in its power range	35.00
755	Hand Pump for use with Greenlee one-shot knockout drivers and benders (except Nos. 884 and 885)	65.00
1726	Hand Pump for use with Nos. 884 and 885 benders.	102.00

TOOLBOXES

All-welded, 16-gauge steel construction, fully weathertight with heavy-duty tamperproof hardware. Large steel carrying handles. Rubber-tired casters optional at extra cost.

Cat. No.	Description	Each
663	Toolbox 36 x 32 x 60"	\$190.00
664	Toolbox 26 x 26 x 72"	151.00
665	Toolbox 24 x 24 x 48"	88.50
667	Toolbox 14 x 18 x 31"	42.25
666	Rubber-Tired Caster Set	29.00

UTILITY CABINET

Cabinet has four shelves, 50 cu. ft. of storage space, heavy-gauge metal sides, tamperproof hardware. Rubber-tired casters provide easy portability.

Cat. No.	Description	Each
669	Utility Cabinet	\$252.00

GREENLEE BENDERS, KNOCKOUT PUNCHES, CABLE PULLING EQUIPMENT

CONDUIT HICKEYS

Safe, one-piece construction. Heavy-duty handle permanently welded to cast steel head.

Cat. No.	Description	Each
508	1/2" Rigid Hickey	\$ 5.85
512	3/4" Rigid Hickey	6.95
516	1" Rigid Hickey	12.20

FISH TAPE SYSTEM

Complete system handles conduit, pipe, and E.M.T. conduit 1/2-4"; 5 and 6" optional. Blows line or pulls it with vacuum, cleans conduit of debris. One-man operation. Weighs only 40 lbs. All components stored in vacuum tank. Uses inexpensive throwaway nylon line. Powerful, yet safe.

Cat. No.	Description	Each
690	Fish Tape System for 1/2-4" conduit..	\$273.00
618	Piston for 5" conduit	6.40
619	Piston for 6" conduit	11.80

CABLE AND WIRE PULLING SYSTEMS FOR EXPOSED CONDUIT

The Greenlee No. 670 Power Puller Package for pulling from exposed conduit consists of the following items:

- No. 640 Cable Puller — weighs only 60 lbs. Heavy-duty electric motor. Two speeds: 15 and 30 ft. per min.
- No. 649 Pipe Adapter Sheave allows you to pull cable beyond the end of conduit for "make up."
- No. 680 Polypropylene Rope 3/4" dia., 300 ft. lengths, nonconductor.
- No. 644 Rope Reel Stand
- No. 665 All-Welded Steel Box — 24 x 24 x 48", weathertight.

FOR CONCEALED CONDUIT AND EXPOSED CONDUIT

The Greenlee No. 686 Complete Power Puller Package for pulling from exposed or concealed conduit consists of all items listed above plus the No. 682 Extension Boom Kit and Flexible Adapters 2-4".

Cat. No.	Description	Each
670	Power Puller Package (for exposed conduit)	\$776.00
686	Power Puller Package (for exposed and concealed conduit)	910.00
682	Extension Boom Kit	137.00
640	Power Puller	497.50
649	Pipe Adapter Sheave	127.00
680	3/4" Polypropylene Rope, 300 ft.	75.00
644	Rope Reel Stand	15.50
665	Toolbox 24 x 24 x 48"	88.50

LIGHTWEIGHT WIRE PULLER

This portable ratchet-action puller weighs only 29 lbs. Has 1500 lb. pulling capacity.

Cat. No.	Description	Each
766	Wire Puller	\$85.00

WIRE AND CABLE GRIPS

Simple positive pulling grips lock on all sizes of conductors up to 1000 MCM. Use only 4" of costly conductors.

Cat. No.	Description	Each
677	Wire and Cable Grip Set. Consists of Nos. 674, 675, and 676 Cable Grips, No. 678 Rope Clevis, screws, and wrenches. Packed in metal box..	\$78.00
674	Wire Grips for 2 and 2 1/2" conduit	18.50
675	Wire Grips for 3 and 3 1/2" conduit	23.00
676	Wire Grips for 4 and 5" conduit	29.25
678	Rope Clevis for connecting pulling rope to wire grip 8000-lb. capacity..	10.00

SHEAVES

All-welded steel frame. High-strength aluminum alloy sheave. Cast steel hook.

Cat. No.	Description	Each
650	6" Hook-Type Cable Sheave	\$21.60
651	12" Hook-Type Cable Sheave	35.00
652	18" Hook-Type Cable Sheave	74.00
653	24" Hook-Type Cable Sheave	85.00
648	Manhole Sheave, 8 ft.	170.00
671	Manhole Sheave, 10 ft.	275.00
672	Manhole Sheave, 12 ft.	320.00

REEL JACK STANDS

Reels are raised by heavy-duty acme thread lift screws. Telescoping reel stands are adjustable for height. One-man operation. Reels cannot creep on spindle.

Cat. No.	Description	Each
683	Screw-Type Telescoping Reel Stand. Capacity per reel stand 2500 lb. For 48 to 96" dia. reels (2 req.)	\$76.00
684	76" Reel Stand Spindle, 2 1/2" dia.	45.50
687	Screw-Type Telescoping Reel Stand. Capacity per reel stand 2500 lb. For 28 to 56" dia. reels (2 req.)	51.00
647	62" Reel Stand Spindle	35.00

GREENLEE BENDERS, KNOCKOUT PUNCHES, CABLE PULLING EQUIPMENT

ELECTRIC BENDER

For 1/2 - 2" rigid conduit and pipe. Optional shoes for E.M.T.

Bends 1/2-2" conduit up to 180° in one shot. Makes 90° bends in 2" galvanized conduit in 20 seconds—loads in less than 10 seconds. Two shoes handle six sizes of rigid steel or aluminum conduit.

Optional "shotgun" shoes bend four sticks of 1/2 and 3/4"; three sticks of 1" rigid conduit and pipe in 20 seconds . . . 100 or more elbows per hour. Fully portable.

Cat. No.	Description	Each
555	Electric Bender for 1/2-2" rigid conduit and pipe complete	\$990.00
501 7977.2	Optional Shoe for 1/2 - 1 1/4" thin-wall (E.M.T.)	112.00
501 7986.1	Support Roller required	20.00
501 7988.8	1/2" Shotgun Shoe for bending four pieces of 1/2" rigid conduit or pipe—3" radius	116.00
501 7994.2	1/2" Support Roller required	23.00
501 7989.6	3/4" Shotgun Shoe for bending four pieces of 1/2" rigid conduit or pipe—4" radius	116.00
501 7995.0	3/4" Support Roller required	23.00
501 7975.6	1" Shotgun Shoe for bending three pieces of 1" rigid conduit or pipe—5 3/4" radius	116.00
501 7985.3	1" Support Roller required	23.00

LIGHTWEIGHT HYDRAULIC BENDERS

Bend aluminum or steel conduit and pipe. Easily carried, set up, and operated by one man. Operate with hand or power pumps. Attachments available for bending thin-wall conduit (E.M.T.) and bus bar.

90° ONE-SHOT BENDERS

Cat. No.	Description	Each
880-H-755	1/2-2" Bender with hand pump	\$285.00
880-H-915	1/2-2" Bender with power pump	540.00
883-H-755	1 1/4-3" Bender with hand pump	625.00
883-E-940	1 1/4-3" Bender with power pump	990.00
883-G4	Conversion Kit for No. 883 Bender to segment bend 3 1/2 and 4" conduit	320.00
884-E-960	1 1/4-4" Bender with power pump	1,363.00
884-H-1726	1 1/4-4" Bender with hand pump	985.00
884-G5	Conversion Kit for No. 884 Bender to segment bend 5" conduit	195.00

COMBINATION ONE-SHOT AND SEGMENT BENDERS

Cat. No.	Description	Each
777-HC-755	1 1/4-2" One-Shot and Segment 2 1/2-4" Bender with hand pump	\$500.00
777-HC-915	1 1/4-2" One-Shot and Segment 2 1/2-4" Bender with power pump	755.00
883-4H-755	1 1/4-3" One-Shot and Segment 3 1/2 and 4" Bender with hand pump	710.00
883-4E-940	1 1/4-3" One-Shot and Segment 3 1/2 and 4" Bender with power pump	965.00
885-E-960	1 1/4-4" One-Shot and Segment 5" Bender with power pump	1,433.00
885-H-1726	1 1/4-4" One-Shot and Segment 5" Bender with hand pump	1,055.00

ATTACHMENTS FOR 777, 880, AND 883 BENDERS

Cat. No.	Description	Each
EMT-G1	1 1/4-2" E.M.T. Attachments for Nos. 880 and 883 Benders—90° radius shoes	\$258.00
EMT-G2	1 1/4-2" E.M.T. Attachments for No. 777 Bender—90° radius shoes	263.00
BB-G1	3/4 x 4" Bus Bar Attachment for Nos. 880 and 883 Benders	88.00

THIN-WALL CONDUIT BENDERS

Make 90° bends in one shot in 1 1/4-2" E.M.T. One-piece construction—frame, ram, and roller are assembled as a single unit.

Weigh only 29 lbs.

Operate with hand or power pump.

Cat. No.	Description	Each
882-H-755	1 1/4-2" E.M.T. Bender—hand pump	\$395.00
882-E-915	1 1/4-2" E.M.T. Bender—power pump	650.00

RATCHET BENDERS

Make up to 90° bends in 1/2-1 1/2" conduit or pipe. Ratchet action permits short power strokes. Equipped with two rubber-tired wheels.

Cat. No.	Description	Each
1800	1/2, 3/4, and 1" Ratchet Bender	\$140.00
1801	1 1/4 and 1 1/2" Ratchet Bender	177.00

"LITTLE KICKER" BENDERS

Make accurate offsets for exposed installations in 1/2 and 3/4" E.M.T. Eliminate costly offset connectors.

Cat. No.	Description	Each
1810	1/2" E.M.T. Little Kicker	\$18.85
1811	3/4" E.M.T. Little Kicker	28.50

GREENLEE BENDERS, KNOCKOUT PUNCHES, CABLE PULLING EQUIPMENT

CONDUIT AND PIPE RACK

Tree-type pipe and conduit holder folds down for easy storage. Holds up to 1000 lbs. of conduit and pipe. Rubber-tired casters provide easy portability.

Cat. No.	Description	Each
668	Pipe and Conduit Rack	\$174.00

TRAY-TYPE CABLE HANDLING SYSTEM

System eliminates danger of overstressing trays or pulling out hangers. Protects sheathing and prevents damage to insulation.

All-welded steel frame with 4, 6, or 8 high-strength aluminum alloy sheaves depending on radius of conveyor.

Cat. No.	Description	Each
636	16" radius Right-Angle Conveyor Sheave	\$ 87.50
637	24" radius Right-Angle Conveyor Sheave	134.00
638	36" radius Right-Angle Conveyor Sheave	175.00
639	9 3/4" radius Right-Angle Twin-Yoke Sheave	93.00
658	4 1/4 x 6" Tray-Type Sheave	18.50

TOLEDO-BEAVER TOOLS
Nos. 100 & 110 CHOP SAWS

No. 100 — 1 H.P., 115/230 V., 60 Cycle, heavy duty motor.

No. 110 — 2 H.P., 230 V., 60 Cycle, heavy duty motor.

Capacity 4" DWV Tubing (3" without turning). Quick acting, integral 4" vise. Precision ball bearing spindle. Ball bearing trunnion shaft. Completely wired. Weight 116 lbs., size 28" high, 16 1/2" wide, 32" long.

Cuts copper and aluminum tubing, DWV tubing, aluminum extrusions with steel wheel and steel shapes and small solids with abrasive wheel. All controls within easy reach.

Cat. No.	Description	Each
100	Chop Saw less Cutting Wheel.....	\$267.25

PIPE VISE STANDS

Light weight, easily carried, easily set-up or taken down. Folding steel tray locks legs. No. 7C with Chain Vise; No. 7Y with Yoke Vise. Can be converted from chain to yoke or from yoke to chain easily. Compound leverage applied to chain. Minimum turns on screw.

Model No.	Description	Each
7-C	Vise Stand with Chain Yoke Vise.....	\$52.40
7-Y	Vise Stand with Yoke Vise	51.80
	Conversion Kit 7-C to 7-Y.....	14.00
	Conversion Kit 7-Y to 7-C.....	13.15

TOLEDO PIPE TOOLS

No. 12 RATCHET THREADING DEVICE

Capacity—1/2 to 2-inch Pipe

This ratchet tool is light and compact and it reaches the difficult corner job. Threads pipe easily and produce perfect tapered threads. Die heads are changed instantly by pulling the ratchet pawl knob, dropping out one head and inserting desired size. Die segments can be removed when dull and be easily reground or replaced at small expense without having to order complete new die heads.

Can be furnished with special dies for threading 1/2, 3/4, 1, 1 1/4, 1 1/2 and 2-inch electric conduit. Is an excellent tool for threading brass or copper.

Complete tool consists of the ratchet handle, 1/2, 3/4, 1, 1 1/4, 1 1/2 and 2-inch die heads with dies. 1/8, 1/4 and 3/8-inch sizes can be furnished.

Description	Sng. Wt. Lbs.	Each
No. 12, Complete 1/8 to 2 inches	25	\$100.80

2 -inch Die Head with R.H. Dies	4	13.25

No. 68 POWER DRIVE

This unit operates most standard die stocks with special adaptors that can be supplied. Ample power to operate even geared threaders. Weighs only 33 pounds. Easily carried to the job anywhere.

No. 68 Power Drive With 115 Volt Electric Motor	each	\$242.00
No. 68 Power Drive With Air Motor, each		760.75

RIDGID PIPE TOOLS

DROP-HEAD RATCHET THREADERS

OO-R, 111-R & 12-R Exposed Ratchet

Unusually handy, efficient drop-head dies. Head locks in or releases by pull of ratchet knob. Separate sets of alloy steel chaser dies, quickly removed or reversed for close-to-wall threads. Convenient carrier free with complete sets except 12-R. Unless otherwise specified NPT dies are furnished. NPSM straight dies are available.

RIDGID PIPE TOOLS

No. 300 POWER DRIVE

Lightweight—heavy-duty. Capacity: 1/8" to 2" pipe and conduit; 1/4" to 2" bolts and rod; 2 1/2" to 12" pipe with drive attachments and geared tools. Patented speed chuck. 3-jaw rear centering device turns with and supports pipe, assuring straight threads and cuts. Two adjustable heavy-duty tool support bars. Housing of one-piece, lightweight alloy aluminum casting. 1/2 H.P. Universal type motor, single-phase, 25-60 cycle AC or DC, 115 volt. Bump-proof reversible switch. Full 15-ft. oil-resistant power cord. Complete with one gallon Ridgid Thread Cutting Oil and three Allen Wrenches.

Cat. No.	Description	Shpg. Wt. Lbs.	Each
300	Power Drive	96	\$242.00
1206	Stand for No. 300	31	31.20

No. 535 PIPE AND BOLT THREADING MACHINE
Capacity: 1/8" to 2" Pipe; 1/4" to 2" Bolts

Ideal for bench or stand mounting, here's a truly complete pipe workshop, all in one compact unit. It threads, cuts and reams . . . even cuts close nipples when you use a No. 19 Nipple Chuck. Popular Speed Chuck sets and releases by hand . . . holds tight, forward or reverse. 3-jaw rear centering device centers even long lengths for true threads and cuts. Pipe can be chucked from front. All tools operate independently, swing up out of way when not in use. Lathe-type adjusting handle moves carriage accurately, smoothly. Easy-to-read length gauge gives fast, exact cut-offs. Oil reservoir contains reversible vane-type pump that recirculates and cleans thread cutting oil for big savings. 1/2 h.p. single phase 115 volt, AC or DC, 25-60 cycle Universal motor is reversible at switch. 230 volt motor available. Armature has extra large brushes and commutator for longer brush life. All RIDGID quick-opening Pipe and Bolt Machine Die Heads and Dies can be used.

Cat. No.	Description	Wt. Lbs.	Each
535	Machine with all standard equipment (cutter, reamer, 3 gals. RIDGID Thread Cutting Oil, 4 Allen type wrenches, 1 spare cutter wheel, and 1 tube of Gear Grease), but less all Die Heads and Dies	289	\$489.90
535	Machine with All Standard Equipment and 1 Universal Die Head with 2 sets of R. H. Pipe and Dies for 1/2" to 2" Pipe	303	\$546.75

THREE-WAY THREADERS

For small pipe and conduit. Convenient compact threaders, with handy reversal of chasers for close-to-wall threads. Alloy tool steel chasers easily removed for grinding.

Cat. No.	Description	Wt. Lbs.	Per Set
30-A	Threads 3/8, 1/2, 3/4-in. pipe	8 1/4	\$21.00
31-A	Threads 1/2, 3/4, 1-in. pipe	10	24.25

THREADERS FOR USE WITH POWER DRIVES

New quick-opening threader for power use — with one set of dies — fast, easy adjustment to size (also over and undersize) regardless of position of quick opening lever. No slow backing off or stopping power-drive. Quick-opening lever retracts dies instantly. No lead screws to jam.

For 1/2" and 3/4" Pipe Only

Cat. No.	Description	Wt. Lbs.	Each
502	With 1 Set Regular Dies	13	\$47.15
502	Dies Only	3/4	8.70
502	High Speed Dies	3/4	16.00

For 1" to 2" Pipe Only

504	With 1 Set Regular Dies	23 3/4	60.30
504	Dies Only	1 1/4	10.70
504	High Speed Dies	1 1/4	16.00

DIE HEADS FOR RIDGID THREADING MACHINES

Quick-opening No. 515 Die Heads—3 die heads with full-width dies, for 1/8" pipe, 1/4 and 3/8-inch pipe, and 1/2 and 3/4-inch pipe—each with one set of dies . . . each \$40.65

Quick-opening Monotype Die Heads — Separate die heads and dies for 1/8, 1/4, 3/8, 1/2, 3/4, 1, 1 1/4, 1 1/2 and 2-inch pipe . . . each \$40.65

Quick-opening Bolt Die Heads—2 die heads, one for 1/4 to 1-inch dies, one for 1 1/8 to 2-inch dies . . . each \$42.65

L.H. Dies and 8, 12 and 16 Pitch Dies available. 8, 12, and 16 Pitch Dies up to and including 2 1/2-inch can be furnished.

1" Meter, \$43.50 extra.

POWER UNITS

For reels up to 2500 lbs. 3/4 H.P., 29 RPM, 115/130V., 1-phase. Right angle worm gear-motor with 300% overload starting torque. Complete with pre-wired reversing and safety-guard foot control switch. Conversion fittings available to adapt unit to all previous Wemco machines. Adaptable to powerize units 3118, 5100, 2100. No. 6000 Power Uniteach \$273.50

JET LINE® PRODUCTS

GUN & CARTRIDGE KIT

No. 1110

Compact, safe, easy to use kit. For large conduit. Releases CO2 cartridge which lays nylon line up to 300 ft., double this distance when shooting both ends.

Contains Gun, Cartridges, Line Packages, Can Holder, Nose Cones and extra Needles.

No. 1110 Gun and Cartridge Kit each **\$31.50**

LINE PACKAGE AND LINE CAN

510-N Cartridge is tied to loop end of No. 2254 Tag-Along and tows package through pipe, laying a line as it goes, for runs exceeding 125 ft. long. Line Can contains approximately 1400' of nylon line, for use in dry conduits up to 125 ft. with gun and cartridge.

Cat. No.	Description	Per 100	Cat. No.	Description	Per 100
2254	Line Package	\$37.00	1703	Line Can	\$207.00

POLY ROPE AND REEL

Saves time pulling—does any "rope job" better. Jet Line Poly Rope is waterproof, lightweight and non-conductive. Handles easily, won't kink.

There is a Poly Rope for every job from 3/32" with 200 lb. pulling strength up through 3/4" diameter with 8000 lb. pulling strength. Convenient pulling eye spliced at factory.

Available in lengths from 250 ft. to 5000 ft. Standard diameters and lengths are reel-mounted. Cat. No. 732-N—250' of 5/8" Jet Line Rope, 500 lbs. pulling strength, on reel stand, **\$18.95**; No. 721-N—250' of 1/4" Jet Line Rope, 1100 lbs. pulling strength, on reel stand, **\$24.95**; No. 710-N—empty 8 1/2" dia. spool and reel stand, **\$12.00**; No. 715-N—empty 10 1/2" dia. spool and reel stand, **\$19.95**.

WIRE PULLER

No. 124

Lets one man do the work of 6 without strain. Complete with 200 feet 3/8" 2000 lb. test Jet Line rope. Puller weighs only 12 lbs.

No. 124 Wire Puller.....each **\$124.00**

PRO-PUL INSTANT WIRE PULLING LUBRICANT

Pressurized cans. Squirt directly into the conduit. No waste—no mess. Two second shot sufficient for most pipes. Keep in your tool box.

Cat. No.	Capacity	Each
WP-14	14 Ounces	\$1.45
WP-19	19 Ounces	1.90

PIPE PLUGS

Made of compressible urethane foam, used during construction to keep dirt, cement, plaster and all foreign matter out of pipe. Three sizes fit all pipe 1/2" through 4".

Cat. No.	Sizes	Per 100
FP6	1/2" through 1"	\$ 3.50
FP7	1 1/4" through 2"	6.75
FP8	2 1/2" through 4"	23.95

PIPE SLEEVES

Jet Line Pipe Sleeves are factory-made of strong, heavy-gauge galvanized steel and cost less per unit than sleeves hand-made in the shop. They nest 10-in-one to save space, are easier to handle and store. Pre-cut flanges make bolting obsolete. Closure caps give greater strength and protection. Factory Stock 1 1/2" thru 12" diameters in 4", 6", 9" and 12" heights. Special sizes and shapes available on request. Due to extensive range of sizes, contact your local Graybar office for prices.

PIPE STRAPS

One-size Jet Line Pipe Strap eliminates large, costly inventory of many sizes and kinds—fit all shapes through 1 1/4" tubing or 1" pipe. Versatile, easy to install and use. Manufactured in brass, stainless steel and galvanized steel. Standoff keeps pipe off wall—fits all straps up to 1" pipe size.

Cat. No.	Description	Per 100
PS-10	Galvanized Metal Strap	\$ 4.50
PS-11	All Stainless Steel Strap	10.00
PS-12	Brass Strap	10.00
SO-10	Stand-Off	4.00

JET LINE® PRODUCTS

CO2 KITS

No. 1210

No. JL-50

No. SK-3

Save up to 70% wire pulling costs. Jet Line system lays a strong nylon line through any kind, size or length of conduit with a short blast of CO2 gas.

Cat. No.	Cylinder	Description	Each
SK3	5#	Starter Kit	\$ 60.00
JS2	5#	Complete Kit	105.00
1210	20#	Complete Kit	234.50

RV-2	Refill Attachment	3.00
RV-3	Refill Attachment	8.95
1212	Underground Kit	135.00

AIR MASTER

Pushes line through conduit, pulls water out. Extra-high speed motor (17,500 r.p.m.); high vacuum (5 p.s.i.). Deposits line in large or small pipe. Air Master is lightweight (14 lbs.) and may be used with or without drum. 23-gallon replaceable drum recovers 18 gallons of water.

Drum is cart-mounted. Designed for one-man operation. Accessory Kit available for use with any blower-vacuum motor.

Cat. No.	Description	Each
AM-100	Complete Kit	\$264.50
DC-200	Drum & Cart Only	74.50
MK-300	Motor & Acces. Kit	190.00
AK-400	Accessories Only Kit	60.00

AIR BLOWER KIT

Useful for blow-down cleaning of dust and dirt collections, even in hard to reach places. The high-pressure high-velocity air output can be directed easily wherever needed.

No. AB-30 Air Blower Kiteach \$56.50

AIR LINER KIT

No. AL-25

The Air Liner is a compact, rugged hand tool. Used with Line Packages and Line Cones, the Air Liner will deposit a line in all types of conduit. An excellent companion tool to Jet Line CO2 Kits, the Air Liner Kit AL-25, will do 90% of conduit fishing jobs.

No. AL-25 Air Liner Kiteach \$69.50

LINE PACKAGES

Power Saver Line Package

Foam disc on end seals around package to save CO2 or air pressure. Low friction allows maximum possible shots. Disc also holds package in position in pipe, even in vertical runs. In assorted lengths of 75' to 450' for pipe 1/2", 3/4" and 1" diameter.

For Larger Pipe

For long runs in all type of conduit 1 1/4" through 6". Deposits a line as it is carried through pipe by Line Cone, above or below grade. Use only with Line Cone.

Due to extensive range of sizes of Line Packages, please contact your local Graybar office for prices.

LINE CONES

No. 1201

No. 1203

No. 1207

Carry line packages in all types of conduit 1 1/4" and larger. Are cut to size of conduit and re-used many times. Line Cone Guide for use in pipe 2 1/2" or larger keeps cone in center of pipe.

Per 100: No. 1201, \$90.00; No. 1203, \$100.00; No. 1207, \$70.00.

RIGID ROPES

Fish any conduit easier, faster, safer, and for less cost. Non-conductive — all poly braided jacket over solid core. Flexible, easy to push — easy to grip for pulling. Durable—long lasting. Can't rust or mildew.

Cat. No.	Length	Each
RR3	25 ft.	\$ 3.95
RR4	50 ft.	7.45
RR5	100 ft.	12.45

LYON TOOL STANDS

LYON MODULAR DRAWERS

Quickly and easily convert 24" deep Lyon steel shelving to rugged, full suspension, visible drawer storage.

Corner Guide Supports attach easily to shelving uprights. Two heights — 18" and 36". (36" cannot be used in counter high shelving.)

Drawers available in five heights — see below. All are interchangeable and may be used in any combination of heights that adds up to the 18" or 36" height of corner guide supports. A wide range of partitions and dividers is available to subdivide drawers into a multitude of compartment sizes to meet your individual requirements.

Drawers fit 36" wide by 24" deep shelving sections. Inside dimensions of all drawers are 31⅞" wide, 22⅞" deep. Gray baked-on enamel finish.

A 36" high unit as it appears in a rack of Lyon 24" deep shelving

GRAYBAR PACKAGE RACKS

Manufactured by Palmer-Shile

PROVIDE UNEQUALLED ERECTION SIMPLICITY WITH MAXIMUM STORAGE VERSATILITY

Designed to provide the finest possible answer to storage problems in factories, garages, plants, warehouses . . . you name it . . . is the versatile Graybar Package Rack.

Available in two basic units — PR7224 which is 72" high x 24" deep x 96" wide and PD9630 which is 92" high x 30" deep x 96" wide—this outstanding

rack system has only two parts to assemble . . . upright frames and shelf beams. (Upper right). These interlocking components are readily assembled in minutes by one man without welding or requiring special tools.

CONVENIENT DROP-IN SHELVES

. . . EXTENSION UNITS

Just as versatile as the racks are the sturdy drop-in galvanized steel shelves (lower right) which provide fast, solid decking. They're available in packages containing 12 deck pieces . . . enough for one shelf. To insure against obsolescence, this easy-to-use rack system can also be extended to any workable length by utilization of extra upright frames and extra pairs of shelf beams. In other words, you can start with the basic rack and increase the size of your rack system to meet growing inventories or load changes.

GRAYBAR PR9630 PACKAGE RACK

(96" high x 30" deep)
2 upright frames—4 pr. shelf beams
Weight 240# \$90.75

GRAYBAR PD3012

(12—8" x 30" Deck Pieces for 1 shelf)
Weight 37# \$20.60 Pkg.

GRAYBAR PR7224 PACKAGE RACK

(72" high x 24" deep)
2 upright frames—3 pr. shelf beams
Weight 182# \$76.25

GRAYBAR PD2412

(12—8" x 24" Deck Pieces for 1 shelf)
Weight 30# \$19.60 Pkg.

SAVE SPACE, TOO, WITH LOW-COST GRAYBAR VERTICAL STORAGE RACKS

Here is a full nine square feet of highly compact, easy-to-use storage space for vertically stacking such hard-to-store items as conduit . . . pipe . . . lumber . . . eaves-troughing . . . bar stock, etc.

These handy space-savers are easy to install . . . can be used with or without pallets . . . back-to-back . . . side-by-side . . . or both. They increase storage efficiency, save space and contribute to good house-keeping.

INTERLAKE STEEL

SLOTTED ANGLE AND RACK KITS

Slotted Angle Bolts Together To Frame Anything

REEL RACK

Interlake All-Purpose Rack quickly converts for convenient reel storage with the addition of the 1A-0901 or 1A-0905 Reel Holder Accessory. When located against wall, it must be lagged to wall using the Rigid Wall Fix Accessory. For free-standing installation, the reel rack frame base (small photo) is available and will be engineered to provide the proper size for your requirements. Specify frame size, number of reels, weight and size of reels to be stored.

Call your local Graybar office for engineering and pricing to meet your exact needs.

VERTICAL BAR STOCK RACKS

Vertical Type Rack Kits offer maximum storage area for bars, rods, tubes, etc., from limited floor space.

SINGLE ENTRY

Kit No. 5200
84" high x 24" deep x 36" long \$23.95
(60 lbs.)

DOUBLE ENTRY

Kit No. 5201
84" high x 48" deep x 36" long \$33.55
(75 lbs.)

SLOTTED ANGLE

Three Sizes to Meet Every Framing Requirement. Packages of Interlake Steel Slotted Angle include 75 nuts and bolts.

LIGHTER DUTY

150-74 Steel—for smaller size racks, carts, benches, equipment mounts, etc. 1½" x 1½" x .074".
10' lengths (pkg. of ten) \$23.75
12' lengths (pkg. of ten) \$28.20
15' lengths (pkg. of eight) \$28.20

STANDARD DUTY

225-80 Steel—for majority of everyday projects 2¼" x 1½" x .080". (Available in aluminum.)
10' lengths (pkg. of ten) \$31.25
12' lengths (pkg. of ten) \$37.50
15' lengths (pkg. of eight) \$37.50

HEAVY DUTY

300-104 Steel—for jobs demanding heavier load capacity.
10' lengths (pkg. of ten) \$44.25
12' lengths (pkg. of ten) \$52.90
15' lengths (pkg. of eight) \$52.90

FLAT PUNCHED STRIP

For tensioning units diagonally for extra rigidity. Also for crates and beams horizontally or vertically as a load divider on storage units . . . or as a hanger.

10' lengths (pkg. of ten) \$11.90

NUTTING TRUCKS

FIG. 1152-DPL

14x47" High Steel Tubing Frame
 Overall Width 21"
 Approx. Wt. 35 lbs.
 Roller bearing demountable,
 semi-pneumatic rubber tired
 wheels.
 Wheel Size 10x2 3/4"
 Capacity 320 lbs.
 Nose Length 7"
 Each \$29.90

FIG. 16-12

Steel Strapped Hardwood Frame
 Handle Length 52"
 Overall Width 20"
 Nose Length 4 1/2"
 Approx. Wt. 70 lbs.
 Wheel Size 8x2"
 Capacity 800 lbs.

Roller bearing demountable rubber tired wheels.
 Each \$44.10

FIG. 831-30

Rack Ht. 35"
 Hardwood Deck Ht. ... 8"

Ball bearing demountable rubber tired wheels.

PC-24F	24	1 1/2	137	534.95

PULLMAN LITTERBUGGY®

4 H.P. heavy-duty performance for large area clean-up, for faster handling, for time and labor savings. Works as fast as a man can walk; swallows litter and debris into king-size easy-empty bag. Available gasoline driven or propane powered.

Model JB-20 Gasoline Litterbuggyeach \$349.95
 Model JB-22 Liquid Propane Litterbuggyeach 449.95

ADAMS POLE AND ANCHOR HOLE DIGGERS

Front or Rear Mounted

For digging holes up to 20-in. diameter to a depth of 9 ft. either vertical or at an angle, and can be maneuvered for digging on hills, in gullies or other rough terrain.

Can be operated by regular line from any line truck carrying pole derricks.

Operator has complete control of auger speed, direction and depth. Hand control lever with

five operating positions in a 180° arc permits operator to work from the most desirable position.

Has 8 H.P. engine mounting assembly which clamps on truck bed — easily removed — no power take-off needed. Power is transmitted through automatic clutch providing automatic overload control — engine will not stall if auger strikes obstruction (therefore no shear pins to replace). Nor does auger flight start to rotate until operator brings engine up to predetermined operating speed.

All steel construction, with casting of electric furnace steel. Uses 9, 12, 16 or 20 inch augers and digs holes up to 9 feet deep at distances to 15 feet from truck. (Augers not included).

Shipping weight approximately 525 lbs.

Cat. No.

Description

P.E. Digger, including Standard Transmission, Standard (1) Piece 16-Ft. Long Flexible Drive Shaft, Engine Mounting Assembly and Torque Arm.

Also available same as above except with a (1) piece 19 or 20-ft. flexible drive shaft or with (3) piece sectional flexible drive shaft in place of standard.

ADAMS TRAILERS

POLE TRAILERS

Model P-3T: With short stake assembly. Light, sturdy, all-steel trailers that can be converted to many uses. Easily towed by ½, 1 or 1½-ton trucks. Capacity, 3000 lbs.

Model P-8-T: Have all the features and strength to carry the occasional heavy load of poles, yet light enough in construction to handle average or light loads economically. Capacity, 8000 lbs.

ADAMS TRAILERS

COMBINATION POLE AND REEL TRAILERS

Model PCP: Developed specially for companies having limited need for standard cable reel trailers. Bolsters with sliding-cam locking stanchions quickly mounted or unmounted. Reel saddles can be attached quickly and easily; reel capacity 34-38 inches. Track, 76½ inches. Capacity, 10,000 lbs.

Model PCP2: Reel capacity 44-48 inches; track 84¾ inches. Capacity, 12,000 lbs.

REEL TRAILERS

Model PWCP: For quick, efficient loading and transportation of extra-heavy, unwieldy cable reels. Reel capacity 44-48 inches. Track, 84¾ inches. Capacity 10,000 lbs.

Model PWD: Reel capacity, 34-38 inches; track 76½ inches. Capacity, 6,000 lbs.

Model PWD2: Reel capacity, 44-48 inches; track 84¾ inches. Capacity, 8000 lbs.

ADAMS COLLAPSIBLE POWER REELS

Type CR

Used for quick easy winding and stringing of small diameter cable and wire. A half-turn of the locking handle collapses the outer rim segments and reduces the diameter allowing removal or mounting of the coils.

Because of its strong lightweight alloy construction and bayonet locking device this reel can be easily and quickly mounted on extended winch drum shaft and

operated by one man.

All parts are precision machined to insure easy and trouble-free operation.

A feature is the box section and reinforced edge of the outer rim segments made from high tensile heat-treated aluminum.

Spindle plug has precision ground threads giving a positive fit and more accurate alignment of the locking handle. Locking handle and sliding spider are made of cast steel. Fixed spider and yokes are heat-treated aluminum alloy. Spindle assembly is of seamless carbon steel tubing precision ground for ease of operation.

Type	Dimensions, Inches			Winch Drum Shaft

Shipping weight, approx. 75 lbs. Finish — Red.

Prices and complete information on request.

**AMERICAN POWER-PULL
HOIST-PULLER**

1-Ton Model Handles Over 2000 Lbs. 1-Ton BX Model Handles Over 2000 Lbs. 2-Ton Model Handles Over 4000 Lbs.

Stretches, pulls, lifts and lowers. One man can handle jobs that two or more might find difficult. Constructed of high strength alloys, hardened pivot points, manganese bronze fittings, air-craft test cable, stainless steel springs, rust-resistant throughout. Notch-at-a-time release. Factory tested to 50% overload.

Can be used to string wire and cable, set and guy poles, hoist work platforms, handle reels, raise or lower material, help fell or trim trees, move equipment, tie down cargo, release or apply tension, exert force.

Note: All Power-Pulls are available in reverse pull. Suffix R.P. to Model No. when ordering.

POWER-PULL ACCESSORIES

Plastisol Handle

3/32" to 1/8" thick Plastisol bonded insulation — protection against momentary hotline contact. Extra \$1.00

Safety Hooks

For added safety in place of regular hookseach \$1.00

"AMERICAN BRAND" AND "AMCO"

A pure manila rope made of selected long-fibre hemp that is clean and always uniform in size and strength; waterproofed with a special cordage solution to make it extremely resistant to moisture and drying out, thereby insuring long life and serviceability.

We can also furnish "American Brand" premium-grade utility rope and "Amco", a treated waterproof rope, both specially designed for utilities in a full range of sizes.

AMERICAN® SYNTHETIC ROPES

In the most popular FLOTEROPE category, American produces polypropylene and patented PNX lines. The standard polypropylene construction provides a lightweight, strong, flexible general purpose line. The heavy duty construction offers a heavier, firmer and stronger pulling line for the really tough jobs. PNX was designed to insure surface softness, better gripping properties, improved flexibility and increased abrasion resistance.

THREE STRAND UTILITY ROPES

Half Coils of sizes 1/2" and larger contain 600 feet. 4-Strand rope weighs approximately 7% more than 3-strand. Safe working load is 20% of breaking strength.

**BARTLETT
COMBINATION PRUNER AND SAW**

Octagon Sitka Spruce

Consists of two separate tools as head sections, each mounted on a short length of octagon spruce with a round steel ferrule attached to the lower end, and extra 4, 6, or 8 ft. spruce extension sections.

Pruner head sections, 30" overall, are compound-lever design, single pulley type, with 1 1/4" cutting capacity. Pole saw head section, 30" overall, supplied with No. 4402-16" blade having peg tooth, 7 teeth per inch.

WE Combination Pruner and Saw

No. 1-WE-30 in. Pruner Head Section ... each \$16.45
No. 44-WE-30 in. Pole Saw Head Section each 12.40

BARTLETT WIRE RAISING TOOL

Designed for use with octagon spruce extension sections, listed above, for simultaneous placing of steel strand and open telephone line.

No. LC-65 Wire Raising Tool ... each \$5.50

BARTLETT TWO-HAND PRUNERS

Both blade and hook are hardened, drop-forged crucible tool steel. Length overall 31 1/2 in. Furnished either with white ash handles with strap ferrules, or fiberglass handles with plastic hand grips.

No. 777, 26" white ash handles, each \$10.20

No. 777F, fiberglass handles, each \$17.95

**BARTLETT
COMBINATION PRUNER AND SAW**

Rectangular Fiberglass

Features two separate tools as head sections, each mounted on a short length of orange fiberglass with a rectangular brass ferrule attached to the lower end, and extra 4, 6, or 8 ft. fiberglass extension sections.

Pruner head sections, 30" overall, are square-end mount, and offer a choice of either the No. 1-FWE single pulley type with 1 1/4" cutting capacity, or the No. 2-FWE double pulley design with 1 1/2" capacity. The Pole Saw head section is also the square-end mount design, 30" overall, with brass reinforcement under the head. Polypropylene pull rope, 3/8" diameter, is standard equipment on both the No. 1-FWE and No. 2-FWE Pruner Head Sections.

B & L STAR BRAND TACKLE BLOCKS AND FITTINGS

MORTISE WOOD BLOCKS FOR MANILA ROPE
Round Loose Hooks

Connections are drop forged with japanned or galvanized finish. Available with iron, roller or graphite bronze bushings. Other connections are also available.

METAL BLOCKS FOR MANILA ROPE
Round Loose Hooks

Connections and shells are drop forged. Edges of shell are rounded to prevent chafing of rope. Shell constructed to prevent rope from jamming between shell and sheave. Straps extend to the bottom of shell; sides are recessed covering ends of sheave pin. Available with iron, roller or graphite bronze bushings. Japanned or galvanized finish. Other connections also available.

Specifications

Length Shell In.	For Diameter Rope In.	Size Sheave, Inches		
		Outside Diameter	Thick-ness at Rim	Center Pin Diameter

ALUMINUM SHELL CONDUCTOR STRINGING SNATCH BLOCKS

No. 5072H

This block combines lightness with strength and may be used to string aluminum conductors without abrasion of the cable, which only comes in contact with the aluminum alloy sheave and shell. Drop forged flatted stiff swivel hook and connections. Either drop link or safety locking available. Ball bearing sheave with polished scores for aluminum cable. Bronze inner sleeve over the sheave pin increases strength and rigidity of the block. Also available with wood shell.

When ordering specify: figure number, size sheave, size cable.

B & L STAR BRAND TACKLE BLOCKS AND FITTINGS

SAFETY LOCKING WIRE ROPE SNATCH BLOCKS

Graphite bronze bushed; iron or steel sheaves. Galvanized finish. Drop forged flatted stiff swivel hook and connections. Shells designed to prevent rope from jamming; rope guard keeps wire in score of sheave.

For Diameter Rope In.	Size Sheave, In.—		Center Pin Diameter
	Outside Diameter	Thickness at Rim	
3/8—1/2	6	1	3/4
1/2—5/8	8	1 1/4	7/8
5/8	10	1 1/2	1

No. 5042H

FORGED STEEL CONDUCTOR STRINGING SNATCH BLOCKS

Shallow score sheaves; drop forged 5/8" round swivel hooks. Either japanned or galvanized finish. Available with iron or graphite bronze bushings.

Block No.	Size Sheave In.	Dia. M.R. In.
5101	3x 3/4 x 3/8	5/8
5102	3x1 x 1/2	3/4

No. 5101

No. 5102

LINEMAN'S SNATCH BLOCK

For stringing light conductor wire. Galvanized finish. Can be furnished drop link or safety locking; with or without locking spring. Hook fits around insulator pin; hook fits in insulator hole. Can be easily driven into pole or cross arm. Roller or graphite bronze bushed or ball bearing bushed with pressure grease lubrication.

No. 5022

LOOSE SWIVEL COME-ALONG HOOK

Galvanized finish. 1/2" size for use with 3" single, double, triple and 4" single blocks. 5/8" size for use with 4" double and triple blocks.

Size In.	Length Overall In.	Hook Opening In.
1/2	7	1 3/4
5/8	8 3/4	1 7/8

No. 5012

BOSLOC WINCH ROPE HOOK

For pulling and lifting poles. Serves as a choker at end of truck mounted winch line. Drop forged steel. Quickly installed in small loop splice — point of hook inserted through splice and allowed to pass along hook until stopped by button.

Size In.	Length Overall In.	Opening at Narrowest Point, In.
1/2	8	1 3/8

Note: Hook can be made to order for 5/8" winch line.

No. 5#15

AERIAL HAND LINE

No. 5041

Used to transport safety tools and equipment to a man aloft. Consists of one roller bushed galvanized metal block, two snap hooks, one ring, two thimbles and one missing link.

SNUBBING BLOCKS

No. 5021

Takes slack out of light wire. Galvanized finish. Snap hook easily and safely engages come-along; anchor hook fits around insulator pin. For use with 3/8" dia. manila rope or number 10 sash cord. Iron, roller or self-lubricating bronze bushed. Sheaves may easily be replaced. Working load 700 lbs. Furnished without rope and anchor hook.

LIGHT WIRE BLOCKS

No. 5023

Takes slack out of light wire. Galvanized finish. Locks when fall line is pulled to one side and is released when pulled to a straight position. For use with 3/8" dia. rope or number 10 sash cord. Roller bushed sheaves which can easily be replaced. Furnished without rope.

CABLE ROLLERS

No. 5061 No. 5062 No. 5063 No. 5064 No. 5065

Single type for use in medium span construction and with pin type insulators. Double type for use with long pulls or on curves. Latch opens easily and locks securely. When ordering, specify size of cross arm.

Price on Application

CHANCE CONDUCTOR AND INSULATOR COVERS

For Voltages Through 15KV

CONDUCTOR COVERS

Chance 15 KV Conductor Covers are made of orange linear polyethylene, the same material used in higher voltage Chance Cover-Up Equipment. This flexible plastic material is very lightweight and extremely durable.

These versatile Covers fit over conductors up to 1" in diameter, slide endwise over armor rods 1 3/8" in diameter. They can be quickly installed by hand using rubber gloves; or, there's a clamp on each end for a Gripall.

Interlocking is an important feature of these covers. They will interlock with one another to increase the protected area. The large end will lock on the Deadend Cover, the small end on the Insulator Hood.

Cat. No.	Overall Length	Conductor Size	Approx. Wt. Lbs.	Each
M4946	60"	636 MCM ACSR (Max.)	4	\$21.00

INSULATOR COVER

Designed to cover all 15 KV pin or post type insulators, the Insulator Hood can also be suspended to cover wire-holders on auxiliary arms. They interlock with Conductor Covers and give a completely shielded area around the insulator.

A rope snubbing ring on one end of the cover serves as an attachment for the Gripall Stick as well as for securing a rope. In storage, these covers can be nested to save space.

Cat. No.	For Insulator Sizes	Approx. Wt. Lbs.	Each
M4947	15 KV Pin or Post Type	3	\$10.00

CHANCE TELEFAULT

A compact instrument that will exactly locate shorts of all kinds, damp spots, crosses, grounds, split pairs — in fact every kind of cable trouble except "opens."

Very easy to operate — uses only one dry cell battery (Battery not included).

Because of the inductive field created it does not "noise" up other pairs.

With the instrument connected, the exploring coil is

moved along the cable until a point is reached where the woodpecker tapping tone cannot be heard in the earphone, which indicates the exact location of the fault. The woodpecker tapping tone is very distinct and cannot be confused with other inductive noises. Maximum voltage under 5 volts.

Expertly constructed of finest material obtainable for the purpose. Hardwood, nicely finished. Size 4 x 7 1/4 x 10-in.

Cat. No.	Description	Each
L	Telefault, complete with Coil, Cord and Receiver; weight 15 lbs.	\$120.00
	Extra Exploring Coil only; wt. 2 lbs.	22.25
	Extra Receiver only; Wt. 2 lbs.	11.00

CHANCE DEADEND COVERS

For Voltages Through 15KV

Deadend Covers are used to cover deadending assemblies consisting of the first insulator, the dead-ending clamp and the hardware used to connect them. The conductor end interlocks with M4931 or M4946 Conductor Covers to extend the protected area. Made of orange linear polyethylene, each Cover measures 26" in length, is 20" high and 11" wide.

The simplest installation angle is made possible by using a Gripall Adapter (furnished) on the universal type fitting on either side of the Cover.

Cat. No.	For Insulator Sizes	Approx. Wt. Lbs.	Each
M4948	4 1/4" through 10 1/4"	5 1/2	\$38.00

CHANCE POLE COVERS

Made from extruded 6" polyethylene tubing, Chance Pole Covers have excellent memory retentive properties. This means that they form a firm clamp on the pole and give about 19" of circumferential protection from energized conductors. Two Covers can be overlapped to completely cover around the pole. They can also be used to cover crossarms.

Four sizes are available, in lengths of 12", 24", 30" and 60". The 60" model has a locking feature for splicing the sections together. Hand grips made of rope are supplied with each unit.

Cat. No.	Length	Circum.	Approx. Wt. Lbs.	Each
M4936-12	12"	19"	1	\$10.00
M4936-24	24"	19"	1 3/4	13.50
M4936-30	30"	19"	2 1/4	14.75
M4936-60	60"	19"	4 1/4	28.50

CHANCE TELEHEIGHT

This handy little instrument will save valuable time in quickly and accurately figuring heights of poles, trees, wires, buildings or other objects. No moving parts. Eliminates guessing.

Used by power companies, municipalities, electrical contractors, telephone and telegraph companies, and railroads.

Highly recommended for appraisal work. Real estate men use them for figuring cubical contents of buildings.

Finest quality materials and workmanship. Complete with leather carrying case. Size 1 x 2 1/4 x 5 1/4-in.

No. CW — Weight Each 1 lb.each \$15.50

CHANCE PIKE POLES

Epoxiglas® poles give years of maintenance-free service because they do not absorb moisture. Reversible safety point pike poles eliminate the hazard of exposed, sharp points during transportation and handling prior to use. Points may be replaced when worn. Wire lift is available for maneuvering telephone or secondary conductors during installation.

CHANCE HAND LINE HOOKS

Can be attached any place along the hand line by the two large holes. Long point accommodates most items to be raised or lowered at the pole. Working load of the hook is 500 pounds. Weight, 1/2 lb.

Cat. No.	Each
M1849 Hand Line Hook	\$2.00

CHANCE DISCONNECT STICKS

Disconnect sticks provide insulation safety for linemen in opening and closing disconnect switches and cutouts. They are also used for installing and removing openlink fuse links. Poles are made of Epoxiglas®. NEMA-standard heads of cast bronze are of three types — switch head, disconnect head, or spliced disconnect head.

For convenience in transporting and/or where greater length is required, Spliced Disconnect Sticks are available. The splice is strong and rigid . . . easy to put together and easy to take apart.

*Head only.

CHANCE Grip-All CLAMPSTICKS

Heavy-duty aluminum head castings accommodates the longer screws of larger grounding clamps. It is covered with a black linear polyethylene tube which features stabilized dielectric strength, is unaffected by exposure to atmospheric elements or rain, does not lose its toughness in coldest weather. Round fiberglass operating rod is fitted with threaded metal ferrules to provide positive adjustment.

✓LINEMAN'S PREFERENCE (LP) — Recommended by Chance Hot Line Tool Demonstrators.

EXTENSION

Designed specifically to fit over the Epoxiglas H1964 and H1966 Series tools, it will fit the 1864 and 1865 model tools using a split sleeve adapter.

The Extension consists of an inner rod of glass-reinforced epoxy resin, one end of which is fitted with a ferrule and eye to accept the jaws of the clamp stick. The other end is secured to a jaw holder within the head housing of the Epoxiglas pole.

For attaching wire tong clamps where it is necessary to mount wire tongs on crossarms. Clamp attachment swivels. Adjustable.

Cat. No.	Wt.	Each
M4744	6 lbs.	\$23.00

CHANCE WIRE TONGS

Made with Epoxiglas poles. Epoxiglas poles are an exclusive product of Chance engineering. They are stronger than wood poles and will not absorb moisture; therefore, need no drying rooms. Wire tong castings are made of heat-treated aluminum alloy, separated by bronze wear rings.

Where extra length is needed, a strong Spliced Wire Tong is available (Cat. No. H4657-5). Poles splice together in seconds — breaks down to two 8-foot poles for space-saving transportation and easy handling.

AMERTONG

FOR WESTON MODEL 633 AMMETER

For holding and manipulating ammeter when taking readings on or near energized conductors where insulation is necessary or for reaching inaccessible points. Holds ammeter at 120° angle for easy reading. May be converted to fit other ammeters.

Cat. No.	Pole Size	Wt. Lbs.	Each
H1968-4	1 1/4" x 4'3"	3 1/2	\$26.50
H1968-6	1 1/4" x 6'3"	4	32.25
H1968-8	1 1/4" x 8'3"	4 1/2	38.00

CHANCE STRAIN LINK STICK

For lifting or helping to lift heavy conductor loads on high voltage suspension or deadend insulator changes. Butt ring for attaching rope blocks. Rounded jaws to prevent scarring conductors. Aluminum fitted; voltage tested.

Cat. No.	Pole Dia. & Lgth.	Jaw Opening		Max. Work Load, Lbs.	Approx. Wt., Lbs.	Each
		Min.	Max.			
H4715-1	1 1/4" x 2'	.22	.75	3500	3 3/4	\$22.00

✓LINEMEN'S PREFERENCE (LP) — Recommended by Chance H. L. T. Demonstrators.

CHANCE ROLLER LINK STICKS

Used to spread and hold conductors aside at mid-span when locating poles.

Also useful for measuring span clearances to ground. Hook opening, 1 1/4". Will roll over maximum wire size of 605 MCM ACSR. Working load, 1000 lbs.

Cat. No.	Pole Dia. & Overall Length	Approx. Wt. Lbs.	Each
H4714-4*	1 1/4" x 4'10"	3 3/4	\$30.00
H4714-6	1 1/4" x 6'10"	4 1/4	33.00
H4714-12*	1 1/4" x 12'10"	5 3/4	43.50

*Recommended by Chance H. L. T. Demonstrators.

CHANCE WIRE-HOLDING STICKS

Used on or around energized lines for forming, bending, and positioning jumper wires; for holding conductors during splicing operations; for pulling tie wires tight before tying. Many other similar and related applications, and can often be used on jobs usually done by hand. Strong, tool will bend 4/0 ACSR. Gripper has eye. Can handle No. 8 solid copper through 4/0 ACSR.

Tested to 100,000 volts per foot. Aluminum and bronze castings. 1 1/2" diameter.

Cat. No.	Pole Dia. & Overall Length	Conductor Capacity	Approx. Wt. Lbs.	Each
H1960-6	1 1/4" x 6'5"	.162" to 1"	6	\$41.25
H1960-8	1 1/4" x 8'5"	.162" to 1"	6 3/4	46.75

CHANCE SCREW GROUND ROD

High-conductivity, copper-clad rod.

Cat. No.	Rod Dia.	Screw Length	Overall Length	Wt. Lbs.	Each
G3370	.590"	14"	6'	15	\$18.50

CHANCE HOT LINE CLAMPS

Provide secure, high-conductivity connections. Current carrying capacity is in proportion to that of the maximum jumper wire for which each clamp is designed.

Protected Thread "P.C." Clamps: Have protective hood over all working parts and include a sealed waterproof thread chamber filled with corrosion-resistant compound. Clamps may be easily removed from the line after long periods of exposure and use.

Wide jaws assure good current distribution. Secure contact assured by locking spring. Jumper terminal above the conductor balances the eye screw to alleviate torsional stress.

"P.C." Clamps are available with contact surfaces pre-coated with Chance z.l.n. 100 Electrical Contact Aid. Each clamp is sealed in a transparent plastic bag to protect it from damage and foreign matter.

Clamps with "AA" suffix have heat treated aluminum bodies for aluminum to aluminum connections, "AC" are for aluminum to copper connections, "AGP" have a high density Fortified plating for general purpose connections. Clamps with "CC" suffix are copper alloy bodies for copper to copper connections, "GP" have a Fortified plating for general purpose connections.

*For Packaged Clamps add prefix "P" in place of "S".

**Straight or Preformed Armor.

CHANCE ALUMINUM BAIL CLAMPS

850 Series

820 Series

The contoured main line contact securely grips the conductor. This adds to the resilience of the gripping action and protects against possible conductor cold flow due to line tension, ice loading or surge effects. Clamping bolts secure bail ends, as well as the conductor, to prevent loosening under thermal or vibrational effects.

Installation is facilitated by the snap-on action of the Chance Bail Clamp. The clamp is suspended above the line and snapped on using a Grip-All stick. It is then swung down and the Grip-All stick removed. The clamp holds itself on the line, enabling the lineman to quickly and easily tighten the bolts.

Cat. No.	Conductor Range (ACSR)	Hardware	Ship. Wt. Lbs. Per 100	Each

CHANCE ELECTRICAL CONTACT AID

z.l.n. 100 Electrical Contact Aid was developed by the A. B. Chance Co. to improve and stabilize aluminum copper, and bi-metal connections. This high quality compound guards against galvanic corrosion and inhibits oxidation when used with all types of connectors.

z.l.n. 100 is available in handy 4 and 8 ounce plastic squeeze bottles. The compound spreads evenly and smoothly because the squeeze-type bottle permits a controlled flow, eliminating waste and mess. Each bottle is refillable and equipped with a cap to seal off the compound when not in use.

Cat. No.	Description	Wt. Lbs.	Each

M1920-2	1-Gallon Can	11	9.50
M1920-3	8-Ounce Bottle	3/4	.93
M1920-4	4-Ounce Bottle	1/2	.75

CHANCE MASTIC CONNECTOR COVERS

Seal-A-Conn

Super Seal-A-Conn

Seal-A-Conn is designed to seal out moisture and protect the electrical connection from erosion, dirt accumulation and chemical attack. It provides optimum protection against corrosion and galvanic action on application such as distribution taps, transformer terminals, service connectors, ground rod clamps and wedge clamps. The Mylar backing keeps Seal-A-Conn from sticking on gloves as it is formed around the connection.

Regular Seal-A-Conn can be applied at temperatures within a range of +32° to 150° F. Super Seal-A-Conn is used in colder climates and can be applied at temperatures of +10° to 150° F. and will retain adhesion as low as -50° F.

SEAL-A-CONN

M1931-30	Dispenser Box of 30' x 4" Roll	9 3/4	9.60

CHANCE TEMPORARY GROUNDING EQUIPMENT

This series of clamps can be easily applied by "snapping" on to the conductor. The spring-action of the duck-bill jaws make an immediate pressure contact on the conductor. Snap-On Clamps are available mounted on 1 1/4" x 6' Epoxiglas® poles. Unmounted clamps can be installed with a Grip-All or Positive Grip Clamp Stick.

Single Clamps, Small Series

Cat. No.	Description	Jumper Max.	Jumper Min.	Approx. Wt. Lbs.	Each
Main Line: Max. — 1000 MCM Cu. or 900 MCM (1.162"); Min. — 6 Sol. Cu.					

G3622-1	Eyescrew	4/0 Grd.	2 Grd.	1 1/2	\$ 7.00

HG3901	Mounted	Cable*	Cable*	12 7/8	63.50

Single Clamps, Large Series

Main Line: Max. — 2 1/2" Dia.; Min. — 3/4" Dia.

G3623	Eyescrew	300 MCM*	4"	2 1/4	13.50
HG3623-1	Mounted	(3/8" Dia.)	(3/8" Dia.)	4 1/4	23.00

*With ferrule.

Recommended installation torque — 300 inch lbs. — line and tap.

TOWER GROUND CLAMPS

A natural cleaning action is provided to remove paint or oxides when the T-handle is screwed into the under side of the structural member. By rotating the terminal adapter a scraper contact cleans the top side of the structural member thus assuring good contact points on both sides. The front retainer insures that the clamp will not be thrown due to magnetic forces. Retainer rotates 90° to hold 2" through 4" structural angles or any I-beam or channel structure.

Cat. No.	Description	Wt. Lbs.	Each
Range: Angles and Beam Flanges Up to 1 1/2" Thick			
G3364-02SJ	2 Grd. Cable Ferrule	4	\$22.00
G3364-10SJ	1/0 Grd. Cable Ferrule	4	22.00

G3364-SJ	No Ferrule	3 3/4	20.00
G3364-1SJ	Replacement Scraper Contact	4 1/2	1.25

FLAT BUS BAR CLAMPS

Designed for use on flat or round bus bars. Wide jaw opening permits their use on 1/2" x 4" flat bus bars or 2" diameter round bus bars. Jaws will close to take a No. 6 wire. Maximum jumper contact is 4/0 grounding cable with ferrule and minimum is No. 2 grounding cable with ferrule.

Cat. No.	Description	Wt. Lbs.	Each
G3368	Eyescrew, Aluminum	2 1/2	\$12.50
HG3368-1	Epoxiglas Mounted	4 1/4	27.00

CHANCE CLAMPS

ALL ANGLE GROUNDING CLAMPS

The jaws of the clamp pivot approximately 75° left or right so that it can be installed in substations or tower deadends where the lineman cannot get into position to install grounds in the normal manner.

Small, sharp serrations are on the jaw inserts so that conductor surfaces are cleaned as the clamp is rotated on the conductor.

Cat. No.	Main Conductor		Ground Cable		Each
	Max.	Min.	Max.	Min.	
Clamp With Eyescrew					
G4228-10SJ	2 1/2 IPS	2 Cu.	4/0*	#2	\$32.00
Clamp Mounted on 1 1/4" x 6' Epoxiglas Pole					
HG4228-16SJ	2 1/2 IPS	2 Cu.	4/0	#2	45.50
Replacement Jaw Assembly**					
G4228-101SJ					4.50

*With Ferrule.

**One set of jaw inserts with hardware.

FLAT-FACE GROUNDING CLAMP

T-handle or eyescrew, each clamp is provided with a cup-point set screw for applications on painted or rusted surfaces where cleaning is impractical or undesirable. Clamp is not effective on Cor-Ten steel. Conductor or structural range is: flanges and flat or square bus, 1 1/2" to 1/8"; tube, 1 1/2" to 1/4".

Tap: 2 Grd. Cable with Ferrule to 4/0 Grd. Cable with Ferrule (or complete lug)*

Cat. No.	Type	Body	Wt. Lbs.	Each
G3363-1	Eyescrew	Cu.	2 1/2	\$9.00
G3363-2	T-Handle	Cu.	2 1/8	9.25
G3363-3SJ	Eyescrew	Al.	1 7/8	9.50
G3363-4SJ	T-Handle	Al.	1 5/8	9.75
G3363-101SJ	Replacement Insert Jaws		1/8	2.10

*A compression lug with 3/8" diameter hole may be used in place of the pressure screw terminals.

COMBINATION CLAMPS

These clamps securely grip either round or flat surfaces. They will accommodate bars up to 3/4" diameter on the round side and 5/8" thickness on the flat side. Upper jaws have sharp serrated edges to provide a low resistance connection. Set screws which project from the lower jaws bite through rust and painted surfaces, but will not satisfactorily penetrate Cor-Ten.

Durable clamp bodies are made of high strength bronze. Jumper Contact: No. 2 Grd. cable with ferrule.

Cat. No.	Description	Flat	Round	Wt. Lbs.	Each
G3620-1	Eyescrew	5/8"	3/4"	1	\$ 7.40
G3620-2	T-Handle	5/8"	3/4"	1	7.50

SUBSTATION BUS BAR CLAMPS

These clamps with removable inserts are adaptable to various sized bus bars. Available unmounted for use with a Grip-All Clamp Stick or mounted on 1 1/4" x 6' insulated pole, both bronze and aluminum-bodied clamps have high-strength bronze eyescrews and bronze terminals. Terminals take grounding cable from 4/0 with ferrule to No. 2 Copper with ferrule.

Bus Size: Max. — 2 1/2" O.D.; min. — No. 4 Str. Cu.

Cat. No.	Description	Wt. Lbs.	Each
G3367-1	Bronze, Unmounted	5 5/8	\$21.00
G3367-2	Aluminum, Unmounted	2 3/8	20.00
HG3367-3	Bronze, Mtd. on Epoxiglas Pole	7 1/2	38.00
HG3367-4	Alum., Mtd. on Epoxiglas Pole	4 1/4	36.00

CHANCE HOT LINE TIE STICKS

Four Tie Heads Available:

Chance Hot Line Tie Sticks are fitted with the tie-heads shown at the top of the page. Each tie stick has certain design features that make it desirable for different linemen. Rotary Prong Tie Sticks, most linemen find, are speedier and easier to operate than a fixed prong for handling looped ties.

Two-Prong Tie Sticks are preferred by many linemen for handling hot ties with loops. Fixed Blade Tie Sticks are particularly suited for undoing close ties that do not have looped ends. Sharp notched blades pry tight ties loose.

Rotary Blade Tie Sticks have a swivel action that permits greater freedom of movement than the fixed-blade type.

EPOXIGLAS® POLES

Epoxiglas Hot Line Tie Sticks are made for maximum safety; these poles are invulnerable to interior moisture, as well as being strong, durable and virtually maintenance-free.

Cat. No.	Pole Dia.	Head	Tie Sticks End	Overall Length	Approx. Weight Lbs.	Each

CHANCE UNIVERSAL POLES

Chance Universal Poles are made for use with universal tools. The splined heads of universal poles interlock with the splined fittings on universal tools . . . to form rigid connections.

Most universal tools can be adjusted at angles up to 90° or more on each side of the pole head. Thus, a tool can be adjusted on the pole to suit the particular job.

Cat. No.	Description	Pole Dia.	Overall Length	Weight	Each
H1760	Universal Pole with One Head Tie Wire Assistant	1 1/4"	8' 2"	3 lbs.	\$19.00

CHANCE CHAIN HOISTS

Chance Hoists are made in One-Ton and Two-Ton models. Both models give 5 1/2 feet of lift. The 14-pound One-Ton Hoist, proof-tested to 3,000 pounds, is rated to lift loads

up to and including 2,000 pounds. The 28-pound Two-Ton Hoist, proof-tested to 6,000 pounds, is rated to lift loads up to and including 4,000 pounds.

CHANCE EPOXIGLAS® PLATFORMS

Chance Epoxiglas Platforms were designed to give utility companies a superior product with greater dielectric strength. Adjustable models have a nylon strap instead of chain to

secure the bottom twin braces, avoiding possible short circuiting to secondaries. Epoxiglas Platforms are 10" wide and have a load rating of 800 pounds.

Both the adjustable and the Pivot-Type platforms have the same boards and receiving attachments. Made of high-strength aluminum and bronze alloys, these attachments are interchangeable on all Chance Platform boards. There are two tower leg attachments and one pole attachment for both adjustable and pivot-type platforms.

Platform railings provide additional security for linemen working on a platform, especially when necessary to work from an off-balance position. Rope railing is constructed of polypropylene rope, Epoxiglas poles, rope blocks and bronze alloy castings. The all-Epoxiglas railing, a superior design, is constructed to add structural strength to the platform while giving body support.

Cat. No.	Description	Length	Approx. Wt. Lbs.	Each

*Fits up to 4" x 4" Tower Legs.

CHANCE INSULATED JUMPER CLAMPS

7.8 and 15 KV

Chance Insulated Jumper Clamps are used for by-passing working areas and equipment under repair, making temporary connections during storm trouble, or handling other emergency jobs.

Semi-elliptical shape contacts improve contact with wide range of conductor sizes.

Tough polyethylene insulation for impact strength and durability, high electrical insulation values, resistance to weathering.

Polyethylene has a wax-like surface which will not absorb moisture.

Locked-in-place compression terminals cannot vibrate loose from clamp body. Cables installed with either .840 compression die or Nico-press 88 tool with H5 head.

Performance tests: Continuous current 400 amps. with 4/0 copper jumper. Surge current tests to 30,000 amps, 15 cycles. Corrosion and weatherometer tests for satisfactory resistance to corrosive and weathering influence.

7.8 KV — 400 Amp Capacity
Conductor Range: No. 6 (.162") to 336.4 ACSR (.721")

Cat. No.*	Description	Approx. Cont. Current, Amps**	Ribbed Handle (2 Clamps) Length	Approx. Wt. Lbs.	Each

FORREST LINE MARKERS

Forrest Line Markers reduce overhead line crossing hazards.

Easily installed.

Assure maximum visibility.

Conical markers — 20", 23"* and 30"* diameters.

*Designed to meet FAA requirements.

Kept in motion by air currents, permanently impregnated with bright Aviation color, Forrest Line Markers help avert collisions by low-flying aircraft with lines crossing lakes, rivers, and gorges as well as with obstacles adjacent to airports and airlines. Also excellent to mark power lines over factory and mill yards where cranes and other high equipment operate.

Size, Inches	Shipping Information	Each
20 x 20	10 per ctn., 60 lbs., per ctn.	\$21.00
23 x 23	10 per ctn., 60 lbs., per ctn.	22.50
30 x 30	5 per ctn., 60 lbs., per ctn.	28.50

FOB: Dillard, Oregon

Forrest Line Marker Features:

Optimum Visibility

- Bright Aviation Orange Color.
- Conical design permits free movement of marker by air currents.
- Designed to meet FAA requirements.

No Maintenance

- Color impregnated fiberglass never needs painting.
- Non-corrosive metal connectors—stainless steel springs.
- Light weight:

- 20" cone and hardware — 6 lbs.
- 23" cone and hardware — 6 1/2 lbs.
- 30" cone and hardware — 10 lbs.

Long Life

- Solid color impregnated fiberglass and non-corrosive metals assure long life.

Economical

- Low initial cost.
- Low installation cost.
- Long, maintenance-free service life.

Easy Attachment to Line—Available in Two Types of Attachments

A. Standard suspension clamp tightens positively to transmission lines with two bolts, permitting about 5" length of clamp in contact with line. Line Marker is attached to suspension clamp by means of stainless steel spring and bolt.

Standard suspension clamp connectors will accept line sizes from 3/8" to 3/4" diameter. Larger sizes available at additional cost.

B. Split bolt connector accommodates line sizes 1/4" to 3/8". Clamp tightens positively with a single nut. Line Marker is attached to suspension clamp by means of a stainless steel spring and bolt. Larger sizes available at additional cost.

*Chance Insulated Jumper Clamps are available with cable capacity assembled. No extra charge is made for assembly time. If cable is desired, add suffix "-A" to catalog number and specify voltage rating, size, and length of cable for complete assembly.

**Current rating limited by jumper cable and 80° F ambient.

COFFING HOISTS

MODELS MA, RA AND G LEVER HOISTS

Model MA Disc Brake Type -- Capacities $\frac{3}{4}$ to 6 tons. A safety pull sealed aluminum lever hoist with efficient disc brake and link-type chain. Five special seals protect brake mechanism against moisture, chemicals, oil and dirt so that brake performance remains constant under exposure conditions. Aluminum frame for additional corrosion resistance and light weight.

Model RA Ratchet and Pawl Type -- Capacities $\frac{3}{4}$ to 6 tons. A safety pull aluminum lever hoist of ratchet and pawl design with link-type chain. Ratchet and pawl system provides safe, easy operation and freedom from maintenance. Body and handle of high-strength aluminum alloy for light weight and corrosion resistance.

Model G Ratchet and Pawl Type -- Capacities $\frac{3}{4}$ to 15 tons. A safety pull lever hoist of ratchet and pawl design with roller-type chain. Ratchet and pawl construction assures safe, sure operation and freedom from maintenance. Body and handle of certified malleable iron.

*Special malleable swivel hook available at no extra charge if desired. Order with "W" suffix to catalog number. Reduces minimum distance by approx. 1".

†Double pawls -- can be operated with half strokes of lever for use in close quarters.

Note: All Model G multiple chain hoists through 6 tons can easily be converted to the next smaller capacity for longer lift and faster operation.

SUPER POWER MODEL LEVER HOISTS

Super Power Model

Super Power Model Ratchet and Pawl Type -- Capacities 1 $\frac{1}{2}$ to 5 tons. Designed to employ a patented compound leverage principle for transmission of power to the load hook. Gears are eliminated. Sealed in lubrication increases service life, reduces maintenance. Ratchet and pawl construction assures safe, efficient operation.

Note: All Super Power Model multiple chain hoists through 6 tons can easily be converted to the next smaller capacity for longer lift and faster operation.

MIDGET PULLER

Capacities $\frac{1}{4}$ and $\frac{1}{2}$ tons. Provides great pulling power in a small, light weight unit. Handle can be used as a lever or high-speed crank. MP-5 has safety snap hooks. MP-10 has open throat hooks. Easily portable -- can be carried in tool box measuring 3 $\frac{1}{2}$ " x 5" x 13".

Cat. No.	Rated Cap. Tons	Std. Takeup In.	Approx. Net Wt. Lbs.	Each

FD	6	19 $\frac{1}{2}$	28	62.25

COFFING HOISTS

LIGHTWEIGHT AND STANDARD HAND CHAIN HOISTS

Model CB

Model YCT

Models CA and CB Porta-Hoists — Capacities ½ to 12 tons. A strong, light weight hoist designed for efficiency and freedom from maintenance. Exclusive Spiroid® gear system puts more teeth into contact under load, yet has fewer wearing parts. Rugged aluminum alloy housing for light weight, easy portability.

Model M-25 Midget — Capacity ¼ ton. A safe, powerful hoist that weighs only 12 pounds yet can raise its full load seven feet in just a few seconds. Low in cost but built for long use and freedom from maintenance. Swivel safety hooks for load and suspension are standard equipment.

Model YCT Spur Gear — Capacities ¼ to 25 tons. A rugged hoist designed for years of heavy-duty service. Equipped with Timken tapered bearings for smooth operation and safe, sure lifting. All internal moving parts are made of special heat-resistant alloy steel. Automatic brake stops load smoothly. Spark and corrosion-resistant parts are available upon request.

MODEL JF QUIK-LIFT ELECTRIC HOISTS

Capacities ¼ to 2 tons. A rugged, easily portable hoist for quick, precise lifting. Its specially designed pistol grip push-button control station permits one-hand operation so that operator has one hand free. Housing and frame are of tough die-cast aluminum alloy for light weight; construction in sections to permit easy access to interior. Limit switch can be adjusted easily. Brake is instant release type for safe, sure operation. Gearing is large and sturdy. Quick-connect terminals facilitate changing voltages. Shifting from single to double chain, or changing from hook to lug, is accomplished by merely removing four screws. All models are weather-resistant.

*Double-chain hoist.
 †This dimension allows for 2" clearance between load block and underside of hoist for the single-chain hoists, and 1" clearance for the double-chain hoists.

EAGLE

FOUR-IN-ONE TRAILER

Save money by investing in only one trailer to do four different jobs. Used for hauling cargo, cable reels, stringing wire and hauling poles. Change from one type of trailer to another in a few minutes.

Maximum reel capacity, 48" wide by 64" dia. Overall width of bolsters, 68". Overall height with cable reel supports in place, 60". Overall length, 124". Tires 8.25 x 20, 10 ply. Rated capacity 3 ton. Weight of trailer, 2000 lbs.
 No. 8637 Trailer.....Base Price **\$870.00**

POLE AND CABLE REEL TRAILERS

The W-PCP Model can be quickly converted from a pole hauling trailer to a cable reel trailer by removing one bolster and attaching the cable reel saddles and reel spindle as illustrated. Handles reels size 48" x 84", or 15 poles.

Width overall, 95½". Height overall, 70". Overall length, 148". Tread, 84". Tires, 10.00 x 20, 12-ply. Capacity, 5 tons, 15 poles. Brakes, 5" electric. Weight, 3400 lbs.

No. W-PCP Trailer.....Base Price **\$2125.00**
 No. WD, same as W-PCP except not equipped with bolsters and stanchions.....Base Price **\$1825.00**

ALL STEEL SERVICE BODIES

All steel construction, electrically welded throughout. Weather proof doors are double panel construction. Slam action locks are keyed alike. Finish painting to customer's color specifications. Mounted on customer chassis at factory or shipped direct.

Cat. No.	Length In.	Truck Size	Each
B-75	75	½ Ton	\$525.00
B-93	93	¾ & 1 Ton	600.00
B-104	104	1 Ton	625.00

POLE DINKEY

Designed for high speed operation with heavy loads. Maximum strength without unnecessary weight is obtained through using a square axle and tubular tongue. Both bunks are equipped with clevises for tying load quickly and securely.

Width overall, 72". Height overall, 37". Height to top of bunk, 27". Overall length, 117". Tread, 58". Tires, 6.50 x 20, 8-ply. Capacity, 3 tons, 9 poles. Brakes, 3" electric. Weight, 1130 lbs.
 No. 1485 Pole Dinkey.....Base Price **\$660.00**

CABLE SPLICER'S CART

All steel construction, electrically welded throughout. Cabinet made of 18-gauge steel. Weather tight doors lined with ½" plywood. Compartments and bins easily accessible.

Length overall, 80½". Height overall, 48". Width overall, 57". Length, body only, 45½". Width, body only, 34½". Tread, 50". Tires, 6.00 x 15, 4-ply. Capacity, 2000 lbs. Weight, 550 lbs.

Cat. No.	Description	Each
9000	Cable Splicer's cart, less fenders.....	\$475.00
9000	Cable Splicer's cart, with fenders....	500.00

EAGLE

UNIVERSAL SHEAVE BLOCK AND OVERHANGING SOCKET

Unit permits cable pull upward, downward or sideways without the use of snatch blocks. Assembly consists of a specially designed sheave with two square shanks which lock into the overhanging socket fastened to the rear of the truck floor body floor.

Removable lock pin attached to socket with chain locks sheave in socket.

- No. 9Y651B Universal Sheave Block...each \$50.00
- No. 9Y648 Overhanging Socketeach 25.00

COLLAPSIBLE REEL

Designed to pick up wire in neat, compact rolls. Attaches to the winch shaft by means of a combination pin and bayonet type socket. Reel arms and supporting spiders are cast of aluminum alloy for light weight and maximum strength. Reel spindle is made of seamless steel tubing. Reel can be furnished with divider so that two different kinds of wire can be picked up at the same time.

Drum diameter, 20 in. Overall diameter, 28". Throat (between flanges) 6 in. Winch shaft diameter, 2 1/8 in. Weight, 70 lbs. No. 176-A-78 "CR" Reel.....each \$115.00

PORTABLE POLE BINDER

A handy time-saving tool for binding logs, poles and bulky loads. The pawl and ratchet provide a safe binding which may be tightened or slackened at any instant without danger of losing the load. Drum holds 18 feet of 3/8 inch cable. Heavy

spurs cast integral with steel base seat themselves in pole, holding the load in a firm, non-slip grip. Weight, 21 lbs.

No. 172-A-51 Pole Binder.....each \$29.50

JUNIOR BODIES

For mounting on pick-up trucks. All steel construction, electrically welded throughout. Weather proof doors equipped with slam action locks all keyed alike. Various size compartments accommodate tools and supplies. Inside, silvertone finish. Outside, prime or finish painted. Width, 12 1/2". Height, 16".

Cat. No.	Length In.	Truck Size	Each
JB-78	78	1/2 Ton	\$140.00
JB-96	96	3/4 and 1 Ton	180.00
JB-105	105	1 Ton	205.00

POLE SETTING DERRICKS

Eagle steel derricks are constructed of Shelby tubing having a tensile strength of 90,000 lbs. per square inch. Cable sheaves have bronze self-lubricating bushings. All models have cable guide rollers to permit handling of poles from either side of truck.

Tripod Type Derricks

Cat. No.	For Poles up to ft.	Approx. Lift ft.	For Trucks, Tons	Wt. With Stiff Leg	Wt. With Telescoping Leg
M40	45	20	2 to 5	381	520
M45	55	22 1/2	3 to 5	521	600
M2870	70	28	3 to 5	830	950

- No. M-40 with one-piece side legs...each \$340.00
- No. M-40T with telescopic side legs...each 390.00
- No. M-45 with one-piece side legs...each 400.00
- No. M-45T with telescopic side legs...each 435.00
- No. 2870 with one-piece side legs...each 575.00
- No. 2870T with telescopic side legs...each 650.00

Above type derricks made of aluminum are available at slightly higher prices.

T-Type Derricks

Designed for use with double drum winch. One drum raises and holds the derrick in position — the other drum operates the hoisting line. Can be installed on 1 1/2 ton trucks and larger. Will handle poles up to 55 feet in length.

- No. T-45 including ground prop, prop extension and spacers.....each \$560.00
- No. T-45, less ground prop, extension and spacerseach 500.00
- Complete mounting bracket kit for T-45 derrick 150.00

WINCH LINE HOOK

One piece drop forged steel hook. Inserts easily into loop at end of winch line. Provides a quick, safe method for picking up poles and other loads. Used on cable up to 3/4" diameter. Overall length, 8". Net weight, 4 lbs.

No. 206-B-24 Winch Line Hook.....each \$4.50

EAGLE

POLE TRAILERS

Exceptionally rugged trailers featuring maximum dependability. Furnished with stationary bolsters and sliding uprights. Extension tongue can be extended 11'-8". Width overall, 86". Height overall, 61¾". Height to bolster, 42¾". Minimum overall length, 182". Tread, 69". Tires, 7.50 x 20, 8-ply. Capacity, 3 tons (10 poles). Brakes, 5" electric. Weight, 2250 lbs.

- Model M Pole Trailer.....Base Price, **\$1150.00**
- Model H Pole. Same as Model M except tires are 8.25 x 20, 10-ply. Overall height is 64", height to bolster is 44¼". Capacity is 5 tons (16 poles), weight is 2860 lbs.
- Model H Pole Trailer.....Base Price **\$1350.00**

POLE DINKEY

Light weight all steel trailer designed for high speed handling in light construction work. Wide tread prevents snaking and whipping at high speed.

Width overall, 68". Height overall, 33½". Height to top of bunk, 20¼". Overall length, 104". Tread, 56". Tires 6.50 x 16, 6-ply. Capacity, 1 ton, 6 poles. Weight, 325 lbs.

- No. 1775 Pole Dinkey.....Base Price **\$275.00**

CARGO TRAILER

Structural channel framing and sturdy steel box make this an ideal trailer for cargo hauling. Body is long enough for 8-foot cross arms. Pole saddle front and rear equipped with clamps to hold pole securely. Removable end boards.

Inside body measurements, 8'-7" x 47" x 12". Overall width, 70". Overall height, 39". Overall length, 15'. Tread, 62". Tires 6.50 x 16, 6-ply. Capacity, 1 ton. Weight 800 lbs.

- Model 7163 Cargo Trailer.....Base Price **\$570.00**

DRAWBARS

The Eagle type L drawbar is designed to attach easily, quickly, and positively to the end of the pole. The chain and tightener provide positive lashing with the four studs firmly imbedded in the pole. Designed primarily for use with trailer of 1 and 1½ tons capacity.

Length overall, 28½". Size of bar, 1" x 3". Chain (2 lengths) each, 36". Pintle ring, inside diameter, 2⅝". Pintle ring, outside diameter 5⅝". Distance between tighteners, 15". Weight, 31 lbs.

- No. 106160 "L" Drawbar.....each **\$75.00**
- No. 165-A-100 "H" Drawbar similar to "L" Drawbar, but longer and heavier. Wt. 55 lbs.each **\$85.00**

The CB drawbar serves both as a drawbar and a load binder. Two standard lag screws are inserted through the holes drilled in the drawbar channel, securing the drawbar to the king pole. The remaining poles, loaded around the king pole are lashed securely to the king pole with the cable of the pole binder. Designed for heavy duty service.

Length, 43". Size of bar, 1¾" x 3¾". Pole binder cable ⅝" x 8". Pintle ring inside diameter, 2⅝". Pintle ring outside diameter, 5⅝". Weight, 63 lbs.

- No. 101847 CB Drawbar..... each **\$70.00**

PINTLE HOOKS

Designed especially for heavy duty. Built to handle the most severe hauling jobs. One-piece drop forged hook, with positive lock type latch. Wrought steel braces complete with bolts and nuts. Only 7 bolts are required to install on truck. Wt. 62 lbs.

- No. 1417each **\$60.00**

Forged steel hook with large cast steel bracket for mounting under rear cross member of truck frame. Bracket is slotted to provide a strong mounting and to prevent hook from turning off center. Complete with bolts and nuts.

- No. 169-A-66 (BU) Weight, 55 lbs.....each **\$60.00**

**GAMBLE BROS. ELECTRICALLY SAFE
TYPE D LADDERS**

Wood laminated I-beam construction. Non-conductive, lightweight, straight-grained Sitka Spruce side rails. Tough, high-strength hickory, laminated to rail faces with 100% waterproof adhesive. High-strength, lightweight aluminum alloy rungs. Factory-finished with green pigmented water-repellent, wood preservative.

Description	Wt. Lbs.	Each
20' Ladder, Extension, Type D	39	\$94.29
24' Ladder, Extension, Type D	45	103.33
28' Ladder, Extension, Type D	52	114.67

10' Ladder, Single Section	19	49.50
12 Ladder, Single Section	22	54.28
14' Ladder, Single Section	25	60.16

Additional charges for optional equipment to be added to above prices when specified:

Equipped with Strand Hooks	\$12.67
Equipped with Spurs	3.67
Equipped with Safety Shoes	6.40

**ELECTROLINE STEEL DUCT
RODDING EQUIPMENT**

This equipment is made of oil-tempered spring steel wire in any length desired. To one end is attached the pick-up or female fitting. To the other end is attached the leader or male fitting. The female fitting is made of tubular steel, in sizes to

fit various sizes of ducts and is equipped with spring-bound steel fingers to admit the male fitting. When the leader enters the pick-up fitting, the steel-fingers lock the connections securely and make one continuous rod which can be pulled or pushed from either end. Rods are marked off every twenty-five feet.

Set consists of: 1 Reel and Base with 300 feet of wire, 1 Reel and Base with 400 feet of wire, 1 Pick-up Unit, 1 Reclaiming Tool, 1 Hand Feeding Tool. Shipping weight 600 lbs.

No. 6000 Complete Seteach \$325.00

DILLON MODEL AN DYNAMOMETER

A valuable instrument in checking tension of messenger, guy wires, underground cable, etc. One side clamps to wire by means of buffalo grip and the other side goes to chain hoist or winch. Dynamometer reads instantly in pounds the moment load is applied against it. Red maximum pointer remains at peak capacity for checking purposes.

All models have a rapid manual reset knob. The dial is protected by a shatter-proof crystal and the entire instrument has built-in overload safety factor so that loads up to 25% above capacity can be sustained without altering calibration.

Has more than 100 different uses in addition to line stringing work. Compact size and light weight make it easy to carry and use. Each capacity equipped with shackles and pins, available in two dial sizes, 5" diameter or 10" diameter.

Capacity Lbs.	5" Dial		10" Dial

**MAINCO DISTANCE MEASURING
WHEEL**

Easy to operate by one man. Better, quicker, less costly than two men with chain or tape.

Accurate. Lightweight aluminum, but sturdily built for enduring service. Wheel is 36" circumference. Flat rubber tire prevents slipping. Quality Veeder counter capacity up to 100,000 feet, but easily reset at will. Inches on stationary disc. Brake keeps wheel locked while taking readings.

Weight, 5 1/2 lbs.
Mainco Distance Measuring Wheel.....each \$85.00

GENERAL MACHINE PRODUCTS

TYPE F CABLE LASHER

The most versatile automatic lasher available for aerial cable up to 3 1/4" dia. Will lash cable to suspension strand of from 1/4" to 1/2" dia. and, with removal of certain parts, can be used for dual lashing. A new tensioning device assures traction on strand far superior to any previous lasher. Two or more cables can be lashed to one strand, if total diameter of cable assembly does not exceed 3". Unit holds two 1200 ft. coils of .045" lashing wire at one loading, and can be used for double lashing, if required.

One man can easily operate lasher from the ground. A built-in brake prevents backroll when lashing cable up-grade. The pulling mechanism pivots about the axis of the rear driving roller and applies a hold down force on the strand roller approx. 2.2 times the forward component of the towing force.

Modification for double lashing with .065" stainless steel wire is available providing an additional set of tensioning pulleys to accommodate the larger size wire.

Cat. No.	Description	Wt. Lbs.	Each
7992	Furnished Complete With Pulling Rope and No. 7378 Case	43	\$550.00
7992-M	Modification for Double Lashing	40.00

TYPE C CABLE LASHER

A compact, light-weight cable lasher for cables up to 1 1/2" dia. on suspension strands from 5/16" to 7/8" and, when equipped with peanut strand drive roller, may be used on 1/4" messenger. Holds two 1200 ft. coils of .045" lashing wire at one loading.

Precision-built machine for easy, trouble-free operation. Three simple steps prepare the lasher for work. Provides a smooth, non-chafing, even lashing which always stays tight. Equipped with brake to prevent backroll when lashing cable up-grade.

Modification for double lashing with .065" stainless steel wire is available providing an additional set of tensioning pulleys to accommodate the larger size wire.

Cat. No.	Description	Wt. Lbs.	Each
7142	Furnished Complete With Pulling Rope and No. 7143 Case	33	\$495.00
7142-M	Modification for Double Lashing	40.00

TYPE D CABLE BLOCK

Supports aerial cable to 3" dia. on suspension strand prior to lashing cable. Frame is of heat-treated aluminum alloy. Strand hooks have steel inserts on bearing surfaces. Sheave is of heat-treated aluminum alloy with Oilite bearings. Locking lever is reversible; block can be locked in either position so cable can be pulled in the opposite direction. Wt. 3 3/4 lbs.

Cat. No. 7268.....Each \$12.75

TYPE F CABLE BLOCK

Supports aerial cable on suspension strand prior to lashing cable, and can be used in dual lashing. Frame is of heat-treated aluminum alloy. Strand hooks have steel inserts on bearing surfaces. Sheave is of heat-treated aluminum alloy with Oilite bearings. Locking lever is reversible; block can be locked in either position so cable can be pulled in the opposite direction. Wt. 3 3/4 lbs.

Cat. No. 8093.....Each \$14.00

AERIAL CABLE GUIDE

Used ahead of the cable lasher to raise cable in position for lashing to strand. The shoe is an aluminum casting with steel insert for wear, suspended by steel straps from two strand rollers locked on the strand, and can be used in dual lashing. Ideal for cable of 1" dia. All steel parts have plated finish. Wt. 11 lbs.

Cat. No. 8007.....Each \$45.00

AERIAL CABLE GUIDES

Used ahead of the cable lasher to raise cable in position for lashing to strand. The shoe is an aluminum casting with steel insert for wear, suspended by steel straps from two strand rollers locked on the strand. An ideal tool in construction using cable of 1" dia. or less. All steel parts have plated finish. Wt. 11 lbs.

Cat. No. G1012.....Each \$28.00

Cat. No. G1024.....Each 90.00

Similar to No. G1012 except will accommodate up to 3" dia. cable. Wt. 28 lbs.

GENERAL MACHINE PRODUCTS

TYPE CR COLLAPSIBLE POWER REEL

Slips easily on the extension shaft of a 2 7/8" winch, and is ideal for rapidly rewinding or stringing wire or small diameter cable. Coils are mounted or removed quickly with a half turn of the locking member, which collapses the movable segments. Fixed spider, yokes and segments are of heat-treated aluminum alloy. Reel I.D. is 20"; O.D. of expanded reel is 28". Wt. 62 lbs.

Cat. No. 176A80
Each\$110.00

TYPE C DROP WIRE REEL

Consists of a tubular frame which will hold the reel in either a vertical or horizontal position; the spokes are shaped and provided with springs to securely hold a coil of wire having 15" dia. coil eye. Inner flange is permanently mounted on the spindle and equipped with an adjustable brake. Outer flange is adjustable to two positions on the spindle and can be removed for loading reel with coil of wire and equipped with handle for turning the reel when taking up wire. Finish—green paint. Wt. 38 lbs.

Cat. No. 7598.....Each \$44.00

CABLE FEEDER AND FEEDER NOZZLES

Cable feeder protects cable being pulled into underground conduit. Consists of a main section and extension section, ordered separately. Main section is a 4" flexible metal hose with bell mouth on one end and sleeve for nozzle on other end. Extension section consists of a 4" hose with bell mouth on one end and tube on other end.

Separate bell-mouthed split type steel nozzles are available for both round and square conduit in different diameters.

Cat. No.	Description	I.D.	Lgth.	Wt. Lbs.	Each
6058-A	Feeder Main Section...4"		90"	35	\$32.50
6058-B	Feeder Ext. Section...4"		43 1/4"	18	30.00
6058-C	3" Nozzle.....2 5/8"		6 1/4"	7	26.00
6058-D	3 1/4" Nozzle.....2 7/8"		8 1/8"	8	27.50
6058-E	3 1/4" S Nozzle.....3 1/8"		5 3/4"	5	30.00
6058-F	4" Nozzle.....3 7/8"		8"	10	55.00

TYPE B CABLE LUBRICATOR

For applying lubricant to underground cable by passing the cable directly through the lubricator. Consists of a sheet steel funnel for holding the lubricant, a flexible leather tube for spreading and controlling the amount of lubricant applied, and a hose clamp for attaching the tube to the funnel. Funnel is equipped with two handles. Wt. 7 lbs.

Cat. No. 7287.....Each \$20.00

CABLE LUBRICANTS

These lubricants are especially designed for ease in pulling or placing cables into conduit. Available in two types: one for lead sheathed cable; the other is Bentonite for lepeh or synthetic sheath material and is available in two grades, regular and winter. Specify type of sheath when ordering.

Cat. No.	Description	Wt. Lbs. 5-Gal. Drum	Per Drum
7437-L	For Lead Sheath..	40	\$17.00
7437-PB	Bentonite Regular	40	10.00
7437-PC	Bentonite Winter	40	15.00

RUBBER CONDUIT PLUGS

Made of soft, expansible rubber with galvanized steel plates and bolts, these plugs are ideal for providing a positive seal in underground conduit against water and gas. Available in two shapes—round or square and two types—split for slipping around cable, and solid for plugging unused ducts. A wide range of sizes is available. When ordering, specify shape and type, as well as size.

Cat. No.	Description	Each
6668	Split for 3 1/2" and 3 13/16" Round Ducts.....	\$10.25
6668	Split for 4" and 4 1/2" Round Ducts.....	11.00
6668	Solid for 3 1/2" and 3 13/16" Round Ducts.....	9.00
6668	Solid for 4" and 4 1/2" Round Ducts.....	9.50
6668	Split for 3 1/4" Square Ducts.....	14.25
6668	Solid for 3 1/4" Square Ducts.....	9.00
6668	Solid for 4 1/4" Square Ducts.....	9.50

TYPE G CABLE BENDERS

Two sizes for making compound bends in cable up to 4" or 5" dia. Frame is aircraft alloy steel tubing. Saddles are swivel-mounted for making any kind of bend, including spiral. Can be rotated around cable in restricted areas. Center section is arched to bend cable without harm. Hardened steel ratchets have deep-cut teeth. Safety catch on top of rack prevents center section from becoming detached when lowering into manhole.

Cat. No.	Description	Wt. Lbs.	Each
G1111	4" Bender	70	\$310.00
G1112	5" Bender	80	385.00

GENERAL MACHINE PRODUCTS

CABLE SHEAVE

This rugged cast aluminum sheave easily handles cable up to 5" dia. It is equipped with self-lubricated bushings.

Cat. No.	O.D.	Wt. Lbs.	Each
7171-5	2 1/2"	75	\$120.00

TYPE B SOAP BUCKET

A dispensing container for soap solution used in pressure testing cable. Consists of an aluminum can with a funnel-shaped well and bail for suspending the bucket. Funnel is removable for cleaning. Well accommodates a brush with a rubber stopper permanently attached to the handle. Replacing the brush automatically covers the soap solution. Wt. 1 lb.

Cat. No.	Description	Each
7271	Bucket w/Brush	\$6.60
7272	Brush only	2.00

COMPOUND KETTLE

Consists of a double-jacketed, 5 qt. kettle for melting compounds. Outer jacket keeps material at correct pouring temperature for a long period. Heat-conductor tube allows gases to escape and assures even melting of compound. Doubling on bail permits raising and lowering for manhole or aerial work. Wt. 6 1/2 lbs.

Cat. No. 6130.....Each \$18.00

MANHOLE GUARD RAILS

Made of 3/4" standard steel pipe. All fixed joints are welded. Seamless steel tubing used throughout for sleeves and hinges. Furnished with two steel chains, warning mast holder, and wing bow locking brace, which assures strong, rigid protection and permits the use of chains on one side. Finished in yellow enamel. Wt. 50 lbs.

Also available in aluminum for optimum handling ease. Wt. 24 lbs.

Cat. No.	Description	Each
6867	Steel Pipe	\$48.00
6867-AL	Aluminum	POA

TYPE B WARNING SIGN

Unusual feature is the method of increasing its stability. The 18" square panel is pivoted on the A frame so that wind pressure will exert a downward force, anchoring it more firmly. The panel is free to move 35° from the vertical position; frame is held in the open position by spreaders. A socket at the side can support a warning flag or signal. All steel, hot dip galvanized finish. Wt. 23 lbs.

Cat. No. 7358.....Each \$14.75

30" x 30" MEN WORKING SIGN

This large, diagonal sign meets the size recommendations of the National Joint Committee on Uniform Traffic Control Devices. Made of aluminum, the panel is fluorescent yellow for optimum visibility day or night. The panel pivots 35° from its vertical position on the A frame so that wind pressure exerts a downward force, anchoring it more firmly. A pair of panel-centering springs help to further stabilize the sign. When not in use, the sign folds to 30" x 15" and slips into the center of the collapsible frame for easy storage in existing sign racks on utility trucks. Frame is all steel, hot dip galvanized finish. Wt. 32 lbs.

Cat. No. G1121.....Each \$40

TYPE H AERIAL TENT

Complete tent consists of a fire-, water-, mildew- and weather-resistant duck cover with vinyl after-finish and a translucent top. Frame has a rigid center bow and two side bows of aluminum tubing with two plastic-covered canvas straps attached to the bows. Guy ropes on side bows anchor the tent in position. Tent is 52" across strand, 8 ft. 8" high and 47 1/2" along strand. Wt. 34 lbs.

Cat. No. 8231.....Each \$96.00

LADDER STAND

Collapsible stand that when mounted on a ladder produces a firm platform for the mechanic to stand on when splicing cables. Wt. 11 lbs.

Cat. No. 7024.....Each \$32.00

MINERALLAC

"Volt-Telling" STATISCOPES

These three types of statiscopes meet every possible current detection need. Each lights up and warns the worker when held in any alternating electrical field. They indicate the presence of voltage in AC and pulsating DC circuits . . . x-ray equipment . . . static in belting . . . high frequency . . . condenser discharges . . . automotive ignition, etc.

**POCKET-TYPE
STATISCOPES FOR
UNDERGROUND
CABLE WORK**

Gives positive indication on 1000 volts and up, when in direct contact with the conductor insulation, also at a point several times the flashover distance on non-insulated conductors. It is not necessary to touch this sensitive instrument to conductors carrying high potential. In testing, such interfering factors as lead on underground cables, metal switch cabinets, grounded framework or anything that absorbs or destroys the static field should be removed.

Pocket Type Statiscopes each **\$6.90**

**OVERHEAD EXTENSION
STATISCOPES**

Designed for overhead lines, this statiscopes has an extension telescopic cover. It is suitable for direct contact up to and including 2300 volts, when held in operator's hand. Red fibre ring is placed on cover to mark handle position. (Illustration shows statiscopes in the opened and closed positions.)

Overhead Type Statiscopes each **\$15.50**
Replacement Tube each **2.70**

STATION TYPE STATISCOPES

Recommended for high voltage use in stations and sub-stations and designed to give positive indication on 2000 volts and up. Breakdown is well over 75,000 volts. Direct contact with conductor is not necessary . . . will indicate at a point well over the flashover distance. Entirely self-contained, the sensitivity is independent of external capacities and may be attached to extension handle to reach distant conductors. Made from hard rubber rod, no metal is exposed.

Station Type With Periscope each **\$21.85**
Station Type Only each **15.50**

PERISCOPE ATTACHMENT

Used with the station type statiscopes in daylight or brightly lighted places where glow-tube would be indistinct.

Periscope Only each **\$6.50**

**JOHN H. GRAHAM PRODUCTS
SNAP-CUT TELEPHONE & UTILITY
TREE TRIMMERS**

Strong, durable, 18 ft. tree pruning unit. Capacity of 1". Consists of No. 11 Head, No. 102 Head pole, two No. 103 Extension poles, and polypropylene operating rope. Selected 1 1/4" octagon spruce poles have positive locking, seamless aluminum telescoping joints.

Cat. No.	Description	Each
11-18	Complete—Head, head pole, 2 extension poles (18' reach)	\$18.25
11	Head Only	5.50
102	6' Head Pole	3.75

TELEPHONE & UTILITY
POLE PRUNING SAW**

A complete POLE SAW unit consists of No. 20 Head, No. 102 Head pole, and two No. 103 Extension poles, making the total unit 18' long.

Cat. No.	Description	Each
20-18	Complete POLE SAW unit	\$19.00

SNAP-CUT PROFESSIONAL LOPPING SHEARS

TIFFANY

MULTI-POWER

New, heavy duty lopping shears with the same easy double cut "draw-in" action as our original "Tiffany." Hammer forged throughout with new shaped hardwood handles that properly fit the hands for easy use. Handles are permanently pinned through the tangs so they can't come off. Patented lock nut keeps proper tension. Ideal for all rough pruning work.

Cat. No.	Description	Each
528	28" overall	\$ 9.50

A quality pruner employing the patented "Multi-Power" compound lever action. All cutting parts are forged alloy steel, heat treated, polished and ground. Shanks of heat treated tool steel. Northern ash handles. "Smooth slicing power." Easily cuts 1 3/4" to 2" branches.

Cat. No.	Description	Each
75	Handles 22", overall 31"	\$13.50

KELLEMS PULLING GRIPS

ROTATING EYE PULLING GRIPS

Forged steel swivel eye, swaged to the strands of the Grip; varied mesh, tubular protection and endless weave (no pigtails). Made of improved plow steel strand.

CONDUIT RISER GRIPS

Kellems Conduit Riser Grip is made of tin-coated bronze wire with a tin-coated bronze Ring that seats on the end of the conduit. The Grip slips inside the conduit. A cap or bushing can be threaded on the conduit over the Ring. The perfect support for riser cable in conduit. Made in Single or Double Weave Closed, and Double Weave Split (with lacing) or Single Weave Split (with Rod Closing). In ordering give conduit size and cable size.

Conduit riser and ring grips are available in closed single weave; closed, double weave; double weave, split with lacing; and rod closing single weave, in conduit sizes from 1 1/4" to 6".

SERVICE DROP GRIPS

The "Concentric" support for modern service cable, round or oval.

1628-16BP

"CHICAGO" GRIPS FOR LARGE DIAMETER CONDUCTORS

For hollow conductors and other large diameter cables, jaws must be shaped to provide maximum contact with the circumference of the cable. We hold grips in blank and finish as necessary. Allow 30 days for delivery.

ORDERS MUST SPECIFY EXACT OUTSIDE DIAMETER OF CABLE. MADE FOR ONE SIZE CABLE ONLY.

Cat. No.	Max. Cable Size	Min. Cable Size	Approx. Max. Opening	Safe Load	Each
1628-16BP	605,000CM A.C.S.R.	2 A.C.S.R. (.316")	1.06"	15,000 lb.	\$42.00
1628-30	1,033,500CM A.C.S.R.	477,000CM A.C.S.R. (.833")	1.35"	20,000 lb.	68.50
1628-30B	1,033,500CM A.C.S.R.	477,000CM A.C.S.R. (.833")	1.35"	20,000 lb.	88.00
1628-40	1,590,000CM A.C.S.R.	1,033,000CM A.C.S.R. (1.246")	1.60"	25,000 lb.	92.00
1628-40B	1,590,000CM A.C.S.R.	1,033,000CM A.C.S.R. (1.246")	1.60"	25,000 lb.	124.00
*1628-50	2,500,000CM A.C.S.R.	666,600CM A.C.S.R. (1.00")		25,000 lb.	97.00
*1628-50B	1,780,000CM A.C.S.R.	666,600CM A.C.S.R. (1.00")		25,000 lb.	128.00

B indicates bronze lined jaws.

*Furnished with removable floating jaw, which allows maximum coverage of cables and eliminates conductor damage, particularly under heavy loads. The removable jaw is held in place by a bolt swaged into the lever arm grip secured by a nut and catter pin. It is necessary to remove the jaw of the grip to insert the cable.

1628-5AT

"CHICAGO" GRIPS BELL SYSTEM TYPE

Cat. No.	Max. Cable Size	Min. Cable Size	Approx. Max. Opening	Safe Load	Each

OSHKOSH TOOLS

BARROW REELS

Made of heavy material for heavy wire and heavy work. Fine quality hardwood, braced and reinforced with steel. A wide bearing, with long pivot and sleeve permits reel to turn easily no matter how heavy the coil of wire on the reel. The friction developed by this bearing is not sufficient to prevent the reel from turning easily, but keeps reel from paying out the wire too fast and tangling it. Strong steel legs.

Reel pins adjustable for 12, 18 and 24 in. coils. Dimensions: 72 in. long, 42 in. wide; height over all 31 in.

No. 900—Shipping Weight 80 Lbs.each **\$63.35**
 No. 901—Extra Guard Pins; Weight Set 1½ Lbs.Per Set of 4 **5.90**

PAY-OUT REELS

For mounting in gangs on wagons or trucks when paying out several wires simultaneously.

Finished hardwood braced and reinforced with sheet steel. Overall dimensions: Diameter 34 in.; height 19 in.

Reels are adjustable for 12, 18 and 24 inch reels.

No. 902—Shipping Weight 40 Lbs.each **\$32.00**

FOLDING TAKE-UP-REELS

A handy tool to have on a truck. When taking down good wire it will coil it neatly in standard sized coils entirely undamaged. Even when taking down or picking up wire to be sold as scrap it is easier to handle and takes up less space when in coils, and takes no longer to coil with the reel as to throw it loosely on the truck.

The reel is made of malleable iron and steel. The stand is hardwood, mortised and framed, and reinforced with steel. Both the reel and the stand collapse, so that when not in use takes up very little space.

Dimensions: Stand is 36 in. high, 19 in. wide; collapses to 4½ x 19 x 39 in.

For 21 inch coil.
 No. 897—Shipping Weight 42 Lbs.each **\$43.60**

FOLDING BARRICADE

Height In.	Width, Bottom Open	Size Folded	Wt. Lbs. Per Pair	Per Pair
32	20½ x 22¾	3 x 2 x 35	25	\$17.60
42	25 x 29	3 x 2 x 44	32	22.40

WARNING SIGNS

A lightweight, extremely durable sign, the legs of which are made of ½ in. high carbon steel and will not bend. Has 1¼ in. flange around the edge of sign that acts as a reinforcement and protects the lettering from damage when being transported in trucks.

Each sign is equipped with two convenient handles for adjusting the angle of the legs. Handles are hollow and can also serve as flag sockets. Each handle is also fitted with a handy lantern lock.

The solid black 5½-in. letters on a 20 x 20-in. background of brilliant traffic yellow flashes a signal which cannot be ignored.

The sign proper can be made luminous for night use and still be as efficient for day time use. (For prices see below).

Dimensions: 43 in. high 28 in. wide. Folds to 28 x 28 x 1¼ in. Shipping weight 23 lbs.

No. 3513—Plaineach **\$17.20**
 No. 3513L1—Luminous, One Side Onlyeach **23.20**
 No. 3513L2—Luminous, Both Sideseach **28.40**

SAFETY EXTENSION LADDERS

Designed and built especially for public utilities.

When extending the ladder, the locking device lifts up automatically to allow the rungs to pass; but, the instant operator lets go of rope, the locking device drops in place and the top section is firmly locked. To lower, the operator gives a slight pull on rope, then lets top section descend slowly—it cannot drop accidentally.

Side rails are straight-grained, properly seasoned airplane spruce. Rungs are tough Mountain Hickory, absolutely straight-grained. Each rung has a shouldered tenon joint which is pressed tightly into side rails, assuring a safe, tight fit. The side rails of each section are connected at top, middle and bottom with steel tie rods.

Each section is equipped with safety-tips and pikes and either section can be used as an individual ladder.

Other exclusive safety features: rubber faced tips; transparent safety finish; safety pole grippers; rubber guarded safety pikes. All metal parts are parkerized.

For Straight Side Rails add letter "S" to number; for Flared Side Rails add letter "F".

For Straight Side Rails add letter "S" to number; for Flared Side Rails add letter "F".

POLE HOLE SHOVELS

Straight Patterns

These shovels are absolutely straight from end to end. This makes them stiff and much handier in lining up the sides of hole.

Handles are selected second growth Northern white ash, or tough strong Highland Hickory as below. They are 1 1/8-in. diameter. (All have foot-age marks to indicate depth hole.)

Blades and straps are natural black finish. Straps 22-in. long, riveted.

Note: For hickory handles, add "H" to catalog number.

POLE HOLE DIGGERS

No. 2050

No. 2051

Will dig a hole 6 in. in diameter. Handles are conveniently marked to enable workman to determine depth of hole.

Special alloy steel blades securely welded to fulcrum members which are heavy channel-shaped steel forgings. One pivot point on each side of blade give greater leverage and durability. Handles are straight-grained hardwood 8 ft. long.

Made in two models — with split handles or with two solid handles.

No.	Type Handle	Ship. Wt., Lbs.	Each

COMBINATION PAY-OUT AND TAKE-UP REELS

An extremely lightweight, strong and durable Pay-Out and Take-Up Reel all in one. Steel tubing frame. The guide pins fold flat and the entire reel is compact and easy to carry or slide on truck.

Guide pins are easily and quickly adjusted to take coils of wire as below.

Automatic Brake—as the wire is pulled the brake releases and the wire pays out freely. The instant tension is slackened the brake sets and prevents back-lashing.

Easily converted into a take-up reel by using two braces furnished to hold reel in upright position. Hand crank, which is also furnished makes possible a fast and easy job of taking-up.

Carrier frame easily removable so that reel can be bolted to truck. A thumbscrew terminal is provided for grounding reel.

Will hold coils of wire—inside diameter 13 to 27 in.; outside diameter 34 in.

Dimensions: Length overall 63 in.; width 34 in.; height overall (guides up) 13 3/4 in.; guides down, 8 3/4 in.

PIKE POLE GUARDS

For guarding the dangerous point on pike poles. Will fit either the 2" or 2 1/2-inch poles.

The guard works very easy and fastens securely in either guarding or open position. When in guarding position it locks automatically in place and affords complete protection from pike point. When not in guarding position it fits snugly around the pole completely out of the way.

(Can be attached to Pike Pole at Cost of guard only.)

No. 10—Shipping weight 3/4 lb.each \$2.80

EZ-UP POLE CRADLE

This is a device used in connection with a Cant Hook for lifting poles into position for operating or bolting on cross-arms or anything else which might require one end of the pole to be lifted off the ground to work on it.

Used in connection with a Cant Hook, it is very easy for the operator to use; prevents injury from lifting strain and will hold the pole so that it will not roll while they are working on it.

OSHKOSH TOOLS

SECTIONAL LADDERS

These ladders are handy to have around for miscellaneous uses where a long extension ladder cannot be used. For small service trucks, one or two of these sections can be hooked on and carried all the time for emergency use.

The sections join together interchangeably. One section fits into the other at either end as shown in illustration. The joint is stiff, solid and secure. Do not use more than three sections to make one long ladder.

The material used in these ladders is the same as in Safety Extension Ladders, but do not include any of their safety features. Sections lap 1-ft. when joined together.

Length 6 feet. Outside width, top, 16½ in.; inside width, bottom, 17 in. Rungs 1½ in. diameter. Rails 1¼ v 2¼ in. Wt. 11 lbs.

Special length sections can be furnished if wanted; also rubber pikes on special order. Contact Graybar for specials.

No. 3595-102—6-Ft. Lengthper section **\$13.55**

ALLEY ARM LADDERS

These ladders are for use on some of the most difficult jobs; one of the most common uses being high line tower arms. Can be furnished with aluminum hooks having 3¼" radius and opening to 4¾" at the widest part. Also can furnish with folding hooks made of ½" steel bar stock and bent with a radius of 3", with opening at the hook end of 8¾".

HKP HARD METAL CUTTER

This is a standard hard metal cutter with a swing-a-way keeper recommended for cutting guy wire, (galvanized steel strand). The keeper prevents cable from spreading and deforming and insures clean, complete cutting of all strands. Cuts medium steel, hard steel, reinforcing rod, bolts, rivets, screws, stainless steel, tempered spring wire.

Tool No.	Length Inches	Capacity Inches	Wt. Lbs. Each	Price Each
390MCK	36	$\frac{7}{8}$ *	14 $\frac{1}{2}$	\$38.00
590MCK	42	$\frac{1}{2}$ **	18 $\frac{3}{4}$	56.00

* $\frac{7}{8}$ " medium steel. ** $\frac{1}{2}$ " medium steel.

HKP WIRE ROPE AND CABLE CUTTERS

CABLE CUTTER — RATCHET TYPE

Designed especially for fast, smooth shearing cuts of copper, aluminum, rubber and lead covered power and communication cable. Combination ratchet and chain allows jaws to cut and hold cable firmly while handles are opened and closed. Ratchet applies increased cutting pressure.

Capacities: Telephone Cable (Except self-supporting) — 2".

Tool No.	Length Inches	Jaw Opening Inches	Wt. Lbs. Each	Price Each
8690FS	27 $\frac{1}{2}$	2	9 $\frac{1}{2}$	\$95.00

CABLE CUTTER — HARD CABLE — RATCHET TYPE

Fast, smooth shearing cuts of hard cable with no flattening, no distortion, no burrs or sharp edges. Gentle pressure opens and closes handles and ratchet moves up chain.

Capacities: Telephone Cable (including self-supporting) — 1 $\frac{3}{8}$ " Specification Strand — 16M ($\frac{7}{8}$ "), Common Steel Strand — $\frac{1}{2}$ ", Soft Steel Rods, Bolts — $\frac{1}{2}$ ", Wire Rope — $\frac{3}{8}$ ".

RYAN WIRE AND CABLE LAYERS

Ryan plows have a self contained, nationally serviced, powered hydraulic system and can be towed directly behind tractor or on winch line through mud and water. A patented leveling mechanism for leveling plow on side slope is standard equipment on both the Super C and the D Plows.

RYAN SUPER C PLOW

Seven Blade Sizes for Model C Plow
1" thick in 1/2" steps up to 4" thick O.D. Blades available w/maximum tube I.D. 3 1/2". Maximum depth reach 38" to 44".

RYAN MODEL D PLOW

Five Blade Sizes for Model D Plow
1" thick in 1/2" steps up to 3" thick O.D. Blades available w/maximum tube I.D. 2 1/2". Maximum depth reach 36" to 42".

Optional Equipment for Both Models

Cable controlled down pressure assembly-remote controls — electric brakes and lights — roller bearing reel arbor — hyd. powered tongue jack and couler wheel cylinder — double tubes for laying two separate cables — special blades made to order, including special blades for plowing in steel pipe lines.

Other products offered by Ryan Mfg. Co. are the Ryan Lawn Plow for laying house services and the Ryan Model E Plow, a light weight plow to lay wire and cable or identification tape.

Prices on Request

RATCLIFF SAFETY HOISTS

RATCHET AND PAWL TYPE

For lifting, lowering, pulling, dragging, stretching. These hoists can be used horizontally, vertically or at any in between angle, and in an upside down position.

Housing is alloy steel. One man easily pulls rated load. Load is moved or held by alloy steel pawl. Extremely resistant to shock. If service is needed, hoist can be completely disassembled and put back together in five minutes.

Hoist will not free-chain under load, even if control lever is tripped accidentally; nor will hoist free an interrupted load.

Minimum headroom — only 10% on 1¼-ton models; 1¼-ton and 2½-ton models can be used flush with wall, pole, or other working surface.

Has single control for raise, lower or free-chain. Handle operates in twelve positions. Has special speed lift.

RATCLIFF LOAD BINDER

MODEL A

The only ratchet binder with minimum 15,000 pound tensile strength that one man can comfortably and safely use. Tension can be adjusted without releasing binder. No cheater required.

Minimum tensile strength.....	15,000 lbs.
Take-up or let-out per stroke.....	½"
Standard take-up	15"
Chain sizes	¼" thru ¾"
Headroom	7"
Face room	3½"
Weight, binder	8 lbs.
Weight, handle	1½ lbs.
Handle length	22"
Price, complete	\$39.60
Price, binder alone	\$35.20
Price, handle alone	\$ 4.40

SAGER LINEMEN'S GLOVES

No. 427-2 LINEMEN'S GLOVE

Made of comfortable, long wearing elk leather, assuring maximum flexibility and service. Finger tips are protected with special davey tips, elastic in back, approximately 14" overall length.

Gloves and heavy leather gauntlets available in all sizes pr. **\$5.10**

No. 246-CFX LINEMEN'S GLOVE

Cream grain leather linemen's work glove, economy style, all inseam, made of soft, flexible grain leather with waterproof laminated gauntlet. Approximately 12½" overall length, available in all sizes pr. **\$2.85**

SALISBURY RUBBER PRODUCTS
ORANGE SALCOR CORONA RESISTANT
PROTECTIVE EQUIPMENT

UBANGI SYSTEM
For Glove or Hot Stick Application

The Ubangi System contains the most versatile protective equipment available and is preferred by many for use on today's higher distribution voltages because it can be applied either with rubber gloves or hot line tools. It remains flexible even at -20°F and provides the ultimate resistance to ozone as well as the aging effects of sun, heat and weather.

SALISBURY RUBBER PRODUCTS

100 SERIES LINEMEN'S GLOVES

The curved hand style offers linemen the advantage of greater comfort and convenience and the large gauntlet allows extra room for bulky winter clothing.

Standard length is 14" in solid maroon color, also available in 16" and 18" lengths and in black color or two-color combinations of yellow/black or red/black.

One finger mittens also available in the same lengths in black and two-color combinations. To specify mittens, use prefix "M" before the catalog number.

All gloves are steam cured, seamless and form fitting with finger lengths and widths adjusted to best meet average conditions. Guaranteed to meet A.S.T.M. specifications.

TAGGING DEVICE

For tagging out open disconnect switches. "Hold" cards are fastened to this warning device and the unit is applied with a switch pole.

Cat. No.	Description	Each
MT	Marshall Tagging Device	\$1.55

SALISBURY RUBBER PRODUCTS
HOODED LINEMEN'S RAINSUITS

Hood slips over hard hats and may be pulled snug with draw strings. Sleeves are extra wide to fit over rubber gloves. A pure gum wristlet innersleeve prevents water from running up the linemen's arm. Non-metallic buttons and inside pocket on jacket.

Made in a choice of two fabrics, heavy duty neoprene on nylon or lightweight polyurethane coated nylon. Yellow color only. Sizes: S-M-L-XL.

Cat. No.	Description	Wt. Lbs.	Each
N-784	Neoprene on Nylon	3	\$22.40
P-501	Polyurethane on Nylon	1½	27.65
N-420	Utility Suit Neoprene Yellow or Black (No Hood)	4	16.35

NON-SPILLABLE — P.B. COMPOUND POTS

Made of semi-hard durable rubber. They are non-conducting, non-breakable and not affected by usual P.B. compounds. Safer, more convenient, brush and compound in one unit.

Will stand upright or can be hung on wire, bus bar or brace. Inner flange prevents spillage during rough handling.

Cat. No.	Description	Each
PB1	Single Compartment Paint Pot (1 Pint)	\$6.50
PB2	Double Compartment Paint Pot	7.00
JP1	Joint Paste Pot	3.80

RE-MAR STOWKIT TOOL BUCKETS

Handle is ½" manila rope. 4" wide fiber rim with rolled top, paint impregnated to withstand all weather conditions, nylon stitching. 6" x 6" inside pocket with two 1" tucks (opens to 6" x 8") bound and double stitched in place. Bottom is of one piece formed oak leather, wax impregnated, ⅛" thick, extending 2" up the side, with nylon stitching. Completely telescopically collapses for convenient storage.

The "Super" Stowkit has leather reinforcements on the side seams and is made of No. 6 Duck.

The "Special" Stowkit is made of No. 4 Duck.

Cat. No.	Description	Dia. In.	Hgt. In.	Each

SP-10-120	With Inside Pocket	10	12	8.60

RE-MAR TELEPHONE SERVICE BAG

Four large outside pockets cover the circumference of the bag. Two standard size pockets placed on the inside of the bag. All pockets first bound then double stitched in place and reinforced with rivets at points of stress. Entire bag is made of No. 4 Duck.

Polypropylene rope handle. Heavy fibre rim and molded leather bottom stitched with nylon thread. Swivel safety snap fastened to center of rope handle. Rubber liner cushion in bottom of bag. Size: 10"x12".

No. SP-10-300 Telephone Service Bag, each 11.50

REVERE NYLON TARPS

Made of Sun Chemical Co. "Facilon", a vinyl-nylon laminate specially developed for protective covering use.

Lightweight . . . half the weight of canvas.

Strong . . . twice as strong as canvas.

Waterproof . . . not merely water resistant.

Non-absorbent . . . keeps clean, dries fast.

Fire Retardant . . . self-extinguishing.

Unaffected by mildew, salt water, grease, many chemicals.

Serviceable in temp. range — 30 to 120F.

Made with electronically welded leakproof seams, non-metallic vinyl grommets for tiedown, every 3 feet approximately. Available from stock in following styles:

General Purpose (10 Oz.)

Extra Heavy Duty (18 Oz.)

Size	Cat. No.	Size	Cat. No.
6' x 8'	GP68	6' x 8'	HD68
10' x 12'	GP1012	10' x 12'	HD1210
12' x 18'	GP1218	12' x 18'	HD1218
20' x 20'	GP2020	20' x 20'	HD2020

Standard Color: Yellow
Other sizes and colors to order.

Uses: Outside storage covers, equipment covers, splicers' sunshades, salvage tarps, ground and lawn covers, manhole surrounds, welding curtains, etc.

Custom fitted covers to special order.

SAWYER-TOWER SAFETY AND PROTECTIVE CLOTHING

INDUSTRIAL SUITS

TUFFLON™

Medium Weight Neoprene Coated Nylon

Best quality nylon fabric Super Bond coated, then multi-coated on outside only with duPont neoprene—ideal for abrasion, tear and snag hazards and in warm climates and areas.

Particularly Recommended For: normal industrial contamination—where abrasion is a problem—where extra light weight is needed.—where snagging, tearing are hazards.

- No. 80-326 — Jacket — Raglan sleeves, buttons-on collar for attaching hood. Yellow, Black and Hunters Greeneach **\$7.85**
 - No. 81-325 — Overall — bib-style, safety-fly front, web suspenders. Yellow, Black and Hunters Greeneach **\$7.95**
 - No. 83-333 — Sou'wester — soft sweat band, no lining, tie strings. Yellow only.....each **\$2.25**
 - No. 88-001 — Hood — button-on style, draw string, buttonholes. Yellow, Black and Hunters Greeneach **\$2.25**
- Weight of suit with hood, under 2 lbs.

SEE-FOX™

Fluorescent Orange Vinyl Hycar Rubber-Coated Cotton

Brilliant coloring lasts lifetime of garment. Abrasion resistant, have superior adhesion qualities, excellent resistance to acids, alkalies, chemicals. Coated inside and out. Very flexible, resists tearing and snagging. Won't peel or crack.

Particularly Recommended For: high visibility — construction — Utilities — acid and alkali resistance — municipal workers.

- No. 20-326 — Jacket — see features for 80-326. Orange onlyeach **\$7.55**
 - No. 21-325 — Overall — bib-style, elastic suspenders, safety-fly front, Orange only.....each **\$7.35**
 - No. 23-300 — Sou'wester — sweat band, tie strings, unlined. Orange only.....each **\$1.75**
 - No. 28-001 — Hood — button-on style, draw string, buttonholes. Orange only.....each **\$1.50**
- Weight of suit with hood approx. 3 lbs. 5 oz.

YELLOW DRAGON™

Vinyl Hycar Rubber-Coated Rayon

Versatile protective clothing that can withstand severest hazards. When tested according to methods used in 5903 CCC-T-191b (Federal Specification, Textile Test methods for flame resistance) it is essentially self-extinguishing — having flame and afterglow of less than 2 seconds after removal of ignition source.

Lightweight, highly resistant to 103 chemicals, acids. Multi-coated inside and out.

Particularly Recommended For: Flame resistance — Utilities — water hazards — acid resistance — general industrial use.

- No. 60-326 — Jacket—see features for 80-326. Yellow onlyeach **\$7.55**
 - No. 61-325 — Overall—bib-style, same features as 21-325 except self-material suspenders with elastic inserteach **\$7.35**
 - No. 63-300 — Sou'wester—same features as 23-300. Yellow onlyeach **\$1.75**
 - No. 68-001 — Hood—unlined, drawstring, button-on style, attach to 60-326. Yellow onlyeach **\$1.50**
- Weight of suit with hood approx. 3 lbs. 5 oz.
Available in S-M-L-XL-XXL sizes. Add 10% for XL and 15% for XXL sizes.

LINEMEN'S SUITS

SUPER TUFFLON™

Heavyweight Neoprene Coated Nylon — Yellow Only

For light weight, maximum protection against oil and grease, mild acids, solvents, abrasion, snagging and tearing. Finest Nylon fabric, Super Bond coated, then multi-coated inside and out with duPont neoprene.

Inside coating protects during cleaning, guards against static electricity and prolongs wear. All seams double-locked stitched, spray-sealed and cured. Tension points reinforced.

Particularly Recommended For: all Utilities — mild acids, petroleum products — roughest industrial use — warm climates.

- No. 80-34 — Jacket and Hood — gusset front, pull-over hooded jacket, drawstrings in hood and at bottom, slit sleeve with take-up buttons, no metal trimmings, raglan sleeves, left chest pocket flapeach **\$12.55**
 - No. 81-07 — Overall — bib-style, patch pocket with flap on right, front cuff straps, side openings, safety fly, full elastic suspenders, no metal trimmingseach **\$11.75**
- Weight of suit approx. 2 lbs. 10 oz.

TUFFPRENE™

Medium Weight Neoprene Coated Cotton — Yellow Only

Select lighter weight cotton sheeting, multi-coated on outside (inside saturation coat) with DuPont neoprene. Provides rugged protection in all weather, resists tearing, snagging, abrasion. Flexible, smooth machine-coated finish.

Particularly Recommended For: Utilities—where cost is a factor—general industrial use.

- No. 50-334 — Jacket and Hood — same features as 80-34, except set-in sleeves.....each **\$10.55**
 - No. 51-307 — Overall — bib-style, same features as 81-07, except web suspenders.....each **\$8.75**
- Weight of suit approx. 3 lbs. 6 oz.

SUPER RHINO-LITE™

Polyurethane Coated Nylon — Yellow Only

For minimum weight, maximum flexibility, finest quality. Outside coating is a super-smooth, abrasive resistant finish—sheds water, repels dirt, gives double the wear. Lineman's suit weighs only 1½ lbs. Fade resistant and flexible in any temperature. Seams double needle stitched, polyurethane spray sealed.

Particularly Recommended For: Waterproof protection—all Utilities—warm climate—areas where absolute minimum weight needed.

- No. 90-334 — Jacket and Hood—see features for 80-34each **\$12.35**
 - No. 91-307 — Overall—bib-style, see features for 81-07each **\$11.55**
- S-M-L-XL-XXL sizes. Add 10% for XL and 15% for XXL sizes.

SCHLUETER PORTABLE WATER CASKS

Stainless Steel Lined

No. G5CLL
5 Gallon

No. 21 Mounting Bracket

No. 23 Truck Bracket

Keeps cold water cold. Specially designed for utility working crews. Lock-on, umbrella type, dust proof, fully insulated lid is attached to cask. Drop type, safety lock handles. Exterior is of heavy galvanized steel, with deep corrugations, enameled Bell Green. Interior is heavy stainless steel, with rounded bottom. Double wall, foam insulation. Non-movable inset support bottom.

Completely recessed, high impact polypropylene spigot is non-heat conducting and has sanitary one-finger operation.

All casks equipped with side hold down lugs and universal paper cup dispenser lug.

STAMPINGS, INC.

POW-R-SPADE TRENCHERS

MODEL 1903 POW-R-SPADE

For cable burial in shallow trenches. Digs a trench 3 in. wide from 1 in. to 24 in. deep, or 4 in. wide to 18 in. deep. Easily maneuvered in confined areas. Digs around obstructions in curves or circles with a radius over 3 feet. Digs 1 1/2 to 17 feet per minute depending on soil conditions. Powered by 4 H. P., four cycle engine. Can be operated and loaded by one man. Weighs only 250 lbs. Overall size is 33 in. wide; 38 in. high; and 84 in. long. Every Pow-R-Spade is equipped with hand winch for use when trenching in a straight line. Shipped completely assembled. Digging teeth are high tensile steel, heat treated, easily removable for replacement.

Model 1903 Pow-R-Spade.....each \$489.00

MODEL 7200 POW-R-SPADE

For all trenching requirements. Completely self-propelled. Digs trenches 4 in. wide to 6 ft. deep; 6 in. wide to 5 ft. deep; 8 in. wide to 4 ft. deep; and 12 in. wide to 3 ft. deep. Digs 1 1/2 ft. to 15 ft. per minute depending on soil conditions, and width and depth of trench. Ruggedly built for reliable service and long life. Powered with a 12 1/2 H. P. engine. Dependable transmission has four digging speeds and reverse. Overall size is 52 in. wide, 10 1/4 ft. long (boom upright in transport position). Pow-R-Spade is equipped with trailer hitch-towing bar for fast easy transport to and from job location. Weight 1,050 lbs. Digging teeth are heat treated high carbon steel easily removable for replacement.

Model 7200 Pow-R-Spade.....each \$2,000.00

T & B UTILITY PRODUCTS

POLE GROUND PLATE

Has four moisture-retaining cups embossed on a large area solid copper plate .025" thick. These cups, along with weight and natural vibration of the pole, tend to hold ground moisture around the plate—maintaining a better ground.

Cat. No.	Std. Pkg.	Wt. Per 100	Per 100
5575	50	44	\$100.00

T & B JOINT COMPOUND

For Use On Aluminum Connections

For low resistance, air and moisture tight connections. Use as a contact aid and oxide inhibitor on aluminum conductor connections, also ideal as thread lubricant. The compound is an easily workable mixture of fine metallic particles suspended in a high temperature grease. It is stable over a wide temperature range — 60°F to 500°F. Packaged in a convenient plastic squeeze

bottle with hang-up strap.

No. 21059 ½ Pt. Bottle, wt. 1 lb
Price on application.

TEMPLETON, KENLY & COMPANY

LEVER AND SCREW TYPE REEL JACKS
for cable, rope or belting

All ratchet lowering simplex reel jacks have laminated, oil treated oak bases for protection against splitting and warping. No. 320A—5 tons, single acting—for warehouse and shop service. Handles 20 to 60-inch diameter reels; has one 2½ inch lifting hook and 2 for 2 inch spindles. No. 321—10 tons, single acting—handles 20 to 96-inch diameter reels. Has 5 lifting hooks; 1 for 3½ inch; 1 for 3 inch and 3 for 2½ inch spindles. No. A1029—10 tons, single acting—T-shaped base area of 319 sq. in. for non-rocking foundation. Built with right and left hand bases; handles 36 to 84-inch diameter reels. Has 3 lifting hooks; 1 for 3 inch and 2 for 2½ inch spindles. Housing is aluminum. "A" frame screw type. Spindle cap for 2¼ inch spindle. No. 1CR for reels 40 to 60 inches diameter and No. 2CR for reels 60 to 92 inches in diameter. No. 3CR for 50 to 84 inch reels. 3-Way Nut for speed.

PINE HYDRAULIC PUMPS
MANUALLY OPERATED

for rams, jacks, presses, jigs and fixtures
Pumps available with or without reservoirs
All-steel construction with NPT inlets and outlets. Many models available in stainless steel, also to meet Mil-Specs.

Model No. 160

Single piston pump with 160 cu. in. reservoir on 8" by 8" base plate. Piston sizes from ¾" through 1½". Available in stainless steel. Net weight 25 lbs.

RATCHET LOWERING JACKS
Single acting — standard type

No. 24A
15 tons

No. 22
10 tons

No. 84A
5 tons

These are the most versatile general purpose jacks on the market. Rugged construction permits safe lifting, lowering, skidding, moving and leveling with the important Simplex feature that these jacks will lift full capacity on the toe as well as on the cap.

Double lever sockets permit operation in close quarters and angular lifting. Made of best materials, precision machined and heat-treated. Other features include adjustable cadmium plated springs and links, shorter fulcrum centers, larger toe lifts, lubricated trunnion bearings, multiple toothed pawls, and reinforced inner-ribbed housings.

TEMPLETON, KENLY & COMPANY

SIMPLEX "ROL-TOE" FOOT LIFT HYDRAULIC JACKS

10, 25 and 50 ton capacities

Exclusive design accounts for the success of this series of jacks. The roller bearing in the toe transmits eccentric toe loading to the flat milled surface on the housing. This minimizes scoring action which is inherent in conventional toe lift hydraulic jacks. Lifts full capacity on toe or cap.

Double pumps provide both speed and power. A safety by-pass prevents overloading. Ideal for lifting heavy machinery and transformers with minimum jacking clearances. Can also be used horizontally.

Model No.	Capacity tons	Closed height inches	Travel inches	TOE			Base inches	Weight lbs.	Price
				Min. height inches	Width inches

Also available as a remote control toe Jack. Information on request.

HYDRAULIC JACKS 1 1/2 TO 150 TON

No. 12HJ

Neoprene seals

Pressure tested bases

Spring controlled ball valves

No. 100B

All Simplex hydraulic jacks will operate in a horizontal or vertical position—every model ruggedly designed for heavy-duty use, for safe, easy jacking on tough jobs. Ball valves, other interior parts readily accessible for cleaning. The 25, 30, 50 and 100 ton models have high and low speed pumps which can be operated singly or in unison, and solid steel bases. The 25, 30, 50 and 100 ton models have new self-leveling ram cap which moves through 10 degree included angle to compensate for eccentric loading.

SIMPLEX RE-MO-TROL HYDRAULIC PUMPS AND RAMS

Hand operated pumps and rams

A Simplex Re-Mo-Trol Unit consists basically of a powerful pump and a remotely controlled hydraulic ram, connected by a high pressure hose. It offers extremely simple operation for a thousand and one applications that it does better. Re-Mo-Trol's adaptability is unlimited because it can be used to apply force in any direction. Available to 1200 tons.

JOURNAL AND BRIDGE JACKS

Each jack furnished with heat-treated steel lever bar

No. 3510B

Journal jacks — low height — high capacity

Alloy steel forgings, special bronze nuts, greater gear ratio. Ratchet mechanism fully enclosed except on No. 1510B, A2510B, A3510B, and A5010B have aluminum housings.

No. 2515B

No. A2515B has an aluminum housing, weighs only 42 pounds. It has a lift of 9 inches which eliminates resetting in bridge work.

Model No.	Capacity tons	Height inches	Lift inches	Weight lbs.	Price

**STANDARD RAILWAY FUSEE
LINEMEN'S FLARE LIGHT**

YELLOW LIGHT

For Night Repairs and Line Patrol

These Flare Lights burn with brilliant yellow light for approximately thirty minutes. They are equipped with friction cap ignition for instantaneous lighting, without matches. Not affected by wind, rain or snow.

They are invaluable during outages or other emergencies which require a quick, general illumination. Equipped with spike points, they can be quickly placed on a post or tree, or on the cross-arm of a pole, where they afford ample illumination for safe, speedy work. May be carried in the hand on line patrol.

3025	30 Min.	72	57	\$32.40

RED FLARE LIGHT

Protection On The Highways After Dark

An unmistakable warning signal for use in case of highway accidents, truck breakdowns, or when power lines are down on thoroughfares. Equipped with friction cap ignition and spike points. Serves the two-fold purpose of warning the public of existing danger and protecting men and equipment on the highways at night.

Cat. No.	Burning Time	Std. Pkg.	Shpg. Wt. Lbs.	Per Case

WILLSON® HEAD PROTECTION

POLYCARBONATE "ALL PURPOSE" CAP

with Geotec® Suspension System

Style 50STC

This rugged, all-purpose cap meets or surpasses all impact, penetration and other mechanical requirements of the American Standards Association, Federal Specifications and the Edison Electric Institute.

50STC features the exclusive Willson Geotec suspension system. This patented dual-suspension design provides greater head protection from both direct and glancing blows. One set of webbing is permanently fixed to maintain a safe 1¼" clearance between top of wearer's head and protective shell. Second webbing can be adjusted to conform to size and shape of head.

Style 51STH

Hat version of the cap described above.

FIBER GLASS HEADGEAR with Geotec Suspension

Light and cool, with a smooth, nonsnagging surface. Very high tensile strength-weight ratio, impervious to moisture and most chemicals.

ALUMINUM HEADGEAR with Geotec Suspension

Most comfortable safety cap for workers wanting the coolest head protection in hot weather. This cap meets USDA Forest Service Specification 177a.

NEW FEATHER-KAP™ HEAD PROTECTION

Style 62BC

This featherlight bump cap is made of sturdy polyethylene plastic. The 62BC FEATHER-KAP has a nylon webbing suspension. Molded, vinyl-covered, sponge-backed sweatband is perforated for cool comfort. Nape strap holds cap firmly on head.

WILLSON KWIK-KLIP® HEADGEAR ATTACHMENTS

A patented line of headgear attachments lets you quickly adapt additional protective devices to safety hats and caps.

Style V30-64

Popular Kwik-Klip attachments provide both eye and face protection. This model includes a Kwik-Klip headgear with a plastic visor mounting strip. Visor V64—replacement lens for V30-64—6" visor, snaps into the mounting strip.

WINTER LINER

Style WL18

For wear with dielectric hats and caps. Popular fleece-lined chino khaki gabardine. Plastic buckles. Adjustable chin strap. Large or small size.

Style WL11 LINER, economy, gold-color, fleece-lined twill. Specially treated to be flame retardant. Single universal size.

Style WL20 QUILTED LINER for wear with dielectric hats and caps in extremely cold weather. Universal size. Plastic buckles.

BENJAMIN ROTA-REEL

ELECTRIC EXTENSION CORD REELS

For Use with Power Tools

MODEL 800-4

Cord set 25 feet long SJO 16/3, equipped with female connector, rated 10 amps, weight 10 lbs.

Also available for junction box and wall mounting.

Model 800-4 each **\$23.95**

MODEL 995-T

Cord set 20 feet long, SJO 18/2, equipped with handle and guard and tool tap, rated 7 amps, weight 4½ lbs.

Also available for junction box and wall mounting.

Model 995-T each **\$11.95**

MODEL 800-50-DK

Cord set 50 feet long, SVO 18/2, rated 7 amps, weight 10 lbs.

Suitable for use with microphones.

Model 800-50-DK each **\$20.95**

MODEL 800-3

Cord set 30 feet long, SJO 18/3, equipped with handle and guard and tool tap in handle, rated 7 amps, weight 10 lbs.

Also available for junction box and wall mounting.

Model 800-3 each **\$23.50**

GROUNDING REELS FOR STATIC DISCHARGE

SERIES 700-H

Accommodates 3/8" diameter aircord steel galvanized cable having a tensile strength of 1000 pounds. Standard 100 ampere clip furnished, not balled unless otherwise specified. 200 amp clip also available. 2 1/8" wide x 8" x 8".

GROUNDING REELS FOR STATIC DISCHARGE

SERIES 3000

Available with 3/8" diameter galvanized aircord steel cable and a "Y" 15 feet back. Can also be supplied with speedometer cable or No. 12 neoprene jacketed oil resistant single conductor flexible wire or nylon jacketed 1/8" diameter cable.

Each end of "Y" is equipped with a 50 or 100 amp. clip, not balled, unless otherwise specified.

Eyelet or roller guide arrangement, dependent on cable specified, supplied.

Overall dimensions 6" or 7" wide x 17" x 17".

Letter "A" after Model No. designates galvanized steel aircraft cable, letter "R" No. 12 neoprene jacketed wire, letter "S" speedometer cable, letters "SS" stainless steel cable, letters "NY" nylon jacketed cable.

SERIES 200

For field installation the reel is equipped with an adaptor to secure it to a 5/8" diameter grounding rod. A ball-stop is furnished with the overhead models. 100 amp. clips with the balled feature, to fit ball studs are furnished with each reel unless otherwise specified and are made so that they can only be fastened to the ball stud.

SERIES 300

For Aircraft Fuel Servicing Coupling Nozzles

Furnished complete with a 30 inch length of spring tempered stainless steel, with a 50 amp. clip on one end of the "Y" and a NATO plug on the other end. "Y" is stainless steel cable. Reel can usually be mounted on the nozzle by use of a screw, provided for grounding cable.

APPLETON PORTABLE REELITES

RE-7S2 PORTABLE REELITE

RE-7S2

Re-designed throughout, the RE-7S2 Portable Reelite is the finest 7-inch reel ever sold. Outstanding among its many features is its continuous swiveling action. Double silver alloy collector brushes permit free rotation of the entire reel in either direction without power interruption or tangling of cord. Designed for vertical pendant mounting. Fits neatly over 4-inch octagonal outlet box; installation is quick and easy. Bracket RE-WB1 permits wall mounting.

Available with a wide variety of accessories (see table), such as hand-

lamps in molded plastic, or rubber, with or without switches and receptacles.

RE-7P2 PORTABLE REELITES

RE-7P2

This portable reelite with handlamp has all the features of the 7S Series, differing only in the method of installation. The 7P Series reelite consists of a universal type mounting bracket, which gives unlimited flexibility for use in hundreds of applications. The upper part of this mounting bracket has four holes, for screws when a wall installation is desired. To convert the reelite to the ceiling is accomplished by simply removing a pin and hooking the reelite into the screw-eye that is supplied with each 7P Series reel.

There is no need to remove the bracket from the wall. Wiring is also easy, as there is a standard cord plug extending from the reelite side.

RE-7SV2 VAPORPROOF TYPE

In this model are incorporated the extra safety features that safety engineers everywhere have wanted. The 7SV2 Vaporproof Reelite is furnished complete with handlamp attached as shown. Equipped with 20 feet of 18-gauge 3-conductor SJO Cord, one conductor being grounded to reel frame. This grounding feature insures the safety of the user in areas with steel flooring or walls. Ideal for wet, steamy areas, the hand-lamp is fully vaporproof, with heavy plastic handle, heavy-duty wire guard and vaporproof globe. Takes lamps up to 100 watts in the A-19 style. A world of safety and convenience at modest original cost.

RE-7SV2G GROUNDED

1500 SERIES PORTABLE REELITES

This series of portable type Reelites offers most of the features of the 7S series, except continuous swivel action. No. RE-1532 is a 5½-inch Reelite with 12 feet of cord, for use where space is limited. The 1500 Series also includes several models 10 inches in diameter, housing up to 50 feet of cord and servicing a 100-ft. circle. Finished in durable baked gray enamel.

APPLETON "YS" REELITES

FOR FURNISHING PORTABLE POWER TO ELECTRIC HOISTS FOR CABLE LIFT OR SUSPENSION

YS

Designed principally to furnish power to traveling electric hoists operating on straight or curved tracks. Furnished complete with cord assembly and swivel base. Skinned leads with solderless lugs connected directly to terminal block on reel drum side.

Swivel base has cast stop lug limiting rotation to approximately 335°. Not recommended for endless monorail systems which require collector rings for continuous rotation. Durable two-tone black and orange baked-enamel finish. Cords furnished in maximum length only. For installations where constant tension is not desired, a gravity-type ratchet is available at extra cost.

RL-104	4	30	25	25	79.00

APPLETON HAND-OPERATED REELITES

Hand-operated reelites are particularly useful for application on fire lighting trucks, mine lighting apparatus, trailers, carts, television and telephone trucks, etc., where extra long lengths of cable are required and where the cable rests on the ground. As no springs are used, a geared hand winding unit is furnished. Rails and roller outlet are eliminated as the

operator guides the cable on to the reel drum by hand.

All types of hand-operated reelites are equipped with a drag brake which provides a drag on the reel drum when unreeling cable only, thereby preventing the loosening of the layers of cable remaining on the drum. This brake cannot be used for holding purposes as the reel is not recommended for lifting service. Special hand-operated reelites are available for lifting service by adding a manually-operated drum lock.

APPLETON MOTOR DRIVEN REELITES

TORQUE MOTOR-DRIVEN REELS have the motor drive geared to the cable drum and operate in a manner similar to the spring-operated reel. They are used mainly for cable pick-up applications supplying power or control to electrically operated machines traveling at a constant rate of speed. In this type of drive, constant tension is maintained on the cable while winding or unwinding. Torque motors are designed and rated for a definite time stall period and are available for intermittent or continuous duty cycles depending on the operating characteristics of the moving machine.

CONSTANT SPEED MOTOR-DRIVEN REELS WITH SLIP CLUTCH may be used in place of the torque motor drive where reel is mounted overhead and cable is to be lifted. This type of drive winds the cable automatically at a constant rate of speed through a mechanical or fluid type slip clutch. This clutch compensates for variations in drum speed and provides constant tension on the cable. Cable drum may rotate in either direction even though motor drive is operating only in the forward direction.

CONSTANT SPEED MOTOR-DRIVEN REELS WITH MANUAL REVERSING DIRECT DRIVE are recommended for overhead mounting where electrical receptacles, controls, or push button stations are to be raised and lowered. In these installations, the motor is controlled by the operator at the working level. A limit switch is available for limiting travel in both raise and lower directions.

**TQ LIFT-BALANCE REELS
AUTOMATIC REWIND**

A heavy-duty spring-operated unit designed to lift-balance 15 to 65 lbs. in working range of 5 to 20 feet.

Reel furnished less $\frac{3}{16}$ " cable, steel with ratchet stop, cable stop and rubber bumper. Cast malleable iron brackets, heavy gray enamel.

Cat. No.	Capacities	Std. Pkg.	Wt. Lbs.	Price

APPLETON SN REELITES

**AUTOMATIC REWIND CABLE LIFT & PICK-UP REELS
WEATHERPROOF - FOR TYPE SO CABLE - 20 AMPS., 440 V.**

Weatherproof and dust-tight for both indoor and outdoor applications. Collector ring housing and wiring chambers have threaded covers to prevent entrance of dust. Covers quickly removed for easy access to collector ring chamber for wiring or maintenance.

Lifetime lubricated springs are enclosed in dust-tight housing. Heavy duty cast aluminum and malleable iron construction. Black and orange enamel finish.

APPLETON BW, CW, DW AND EW REELITES

**8 TO 2 GA. - TYPE W CABLE - 2 TO 4 CONDUCTORS
100 AMPS., 600 VOLTS**

Spring-driven reel for lift and pick-up applications. Cast aluminum and malleable iron with orange and black enamel finish.

To order, specify: (1.) Catalog number. (2.) Length, gauge and number of conductors of cable, regardless if cable is or is not to be furnished. (3.) Type of cable outlet. Guide roller outlet regularly furnished. Other outlets available. (4.) Ratchet. For installations where constant tension is not desired, a gravity-type ratchet may be furnished at extra charge. Orders must specify mounting position of Reelite base.

APPLETON OUTLETS AND SWIVEL BASES

360° Continuous Swivel

A wide range of reelite cable outlets and swivel bases are available for each and every requirement. Complete data, information, and prices furnished upon request.

APPLETON HOW AND HOL REELITES
TYPE W CABLE - HOW, 100A, HOL, 200A-600V

FOR PICK-UP APPLICATIONS

Type HOW and HOL overhung reelites have type 'W' cable range of 4 to 4/0 gauge and 2 to 4 conductors. Rating of the HOW is 100 amperes, 600 volt. The HOL is 200 amperes, 600 volt. It is constructed of structural steel, cast brackets and spring housings. The HO series may be used with type 'G' series cable where extra conductor is grounded through a collector ring must be specified.

WITH AUTOMATIC CABLE GUIDE

FOR PICK-UP APPLICATIONS

TYPE W CABLE

100 AMPS., 600 VOLTS

Appleton F, G, and H series automatic rewind cable reels are available for both 'SO' and type 'W' cable. Type FS series for SO cable range from 14 to 10 gauge, 2 to 4 conductors with a rating of 35 amperes, 600 volt. Type FW and GW reelites for type 'W' cable range from 8 to 1 gauge and 2 to 4 conductors with a rating of 100 amperes, 600 volt.

APPLETON AIR-LIQUID HOSE REELS
1/4" TO 1" I.D. OIL-RESISTANT HOSE

Automatically wind and maintain constant tension on hose lines. Can be mounted on wall or ceiling. Furnished with positive self-adjusting swivel air joint. Strong, hose has ample strength to withstand high pressures and pulsation loads.

The HRL is compactly designed, especially valuable in locations where headroom is at a premium. Sturdy overhung aluminum frame provides greater strength and reduces weight. The CF light duty Air-liquid reel is particularly useful for light pneumatic tool and blow gun applications.

The CTL is designed for heavy duty applications. Ideal for furnishing power to traveling air-motor hoists and moving machinery using pneumatic power.

Series C
13" dia. Flange

Series D & E
19" dia. Flange

Series F
24" dia. Flange

All reels are heavy duty precision made reeling devices designed for industrial applications. Lifetime lubricated spring motor gives constant tension for all types of portable power applications. Positive contact slip rings rated 35 amps, 600 volts. Optional features are explosion proof models, models with ratchets, and either 330° or 360° pivot base. Other models available up to 50 conductors and cable lengths as required.

WERNER

**FIBERGLASS-NON-CONDUCTIVE
REINFORCED SINGLE AND
EXTENSION LADDERS**

High strength non-conductive, glass reinforced polyester resin side rails, 3 1/2" wide, 1 3/8" flange. Slip-resistant, serrated 1 1/4" O.D. extruded aluminum rungs, spaced on 12" centers.

Gravity type, automatic, spring-loaded die-cast aluminum safety locks grip two rungs. Internal nylon coated guides are employed for free sliding action of base and fly section. Extra heavy vinyl bonded orange end caps. Free swinging, self-aligning, safety shoes with corded rubber, slip-resistant treads and ice pick feet.

Rungs are hydraulically swaged into rung plates by the ALFLO® (patented) HYDRO-LOK™ process which insures a TWIST-PROOF™ assembly. After the rungs and plates have been assembled the plates are securely riveted at the four corners into the fiberglass side rails with solid high strength aluminum rivets.

Electrical Characteristics

- A — Dielectric strength of web is 46KV or 350 volts/mil.
- B — Dielectric strength of flange is 48KV or 240 volts/mil.
- C — Between the rungs 12" apart, flash over occurs at 90KV.
- D — Between the rungs 24" apart, flash over occurs at 182KV.

No. TX-11 — Complete with No. TX-2 burner unit and cylinder. Weight each, 3 1/4 lbs.\$5.53

No. TX-9 TORCH REFILL CYLINDER

Interchangeable on all propane appliances.

I.C.C. approved. One inch threaded top with center sealing and pressure relief valve. Weight each, 2 1/8 lbs.

No. TX-9\$1.33

BERNZ-O-MATIC PROPANE GAS LANTERN

Dual Beam

Built-in reflector — 300° frontal light beam, 360° base light beam; genuine Pyrex heat-resistant globe. Complete with disposable fuel cylinder.

No. TX-750 Lantern — 11" high, 5 1/4" wide; weight each, 8 lbs.....\$12.66

BERNZ-O-MATIC COOKSTOVES

Light a match, turn a valve, start to cook. No filling or spilling, pumping or priming. Operates on safe, disposable fuel cylinders. Cleans easily, no carbon clogging. Complete with two disposable cylinders.

No. TX-850 — 20 3/4" wide, 14 1/2" deep, 4 1/4" high; weight each, 19 lbs.....\$21.66

DYMO TAPEWRITERS®

MODEL M-75
For 3/4" Vinyl Tape

Embosses letters a full 1/2" high on 3/4" vinyl tape. "Pull-Tab" backing remover. Prints 104 characters (52 horizontally and 52 vertically) all within same wheel. Cast

aluminum body, 7" high, 14" wide, 11" deep. Baked enamel finish. Complete with one magazine of tape.
No. 1075 Tapewritereach **\$124.95**
No. 7701 Tool 'N Tape Kit consisting of M-75 Tapewriter and 9 magazines of No. 5134 tape (assorted colors in a carrying case).....each **\$174.95**

MODEL M-11
For 1/2" Metal or Vinyl Tape

Comes with hardened steel embossing wheel. Includes built-in 3/2" hole punching device. Embossing wheels easily changed. Aluminum alloy body. 10 3/8" long, 3 1/2" wide. Chrome finish. Complete with square cut-off and hole punch, one steel horizontal wheel and one plastic horizontal wheel.

No. 1011 Tapewritereach **\$49.95**
No. 7593 Tool 'N Tape Kit consisting of M-11 Tapewriter, one steel vertical wheel, one plastic special character wheel, 5 rolls contrast aluminum tape (assorted colors) and 5 rolls vinyl tape (assorted colors) in carrying case.....each **\$69.95**

MODEL M-20
For 3/8" and 1/2" Vinyl Tape

Dual track is built into tool to allow for quick changes of tape widths. Has space selector knob — spacing between letters can be varied. "Snap-in" embossing wheels can be changed without removing parts. Die cast zinc body. 11 3/8" long, 3 1/2" wide. Chrome finish. Complete with giant letter embossing wheel, one standard size letter horizontal wheel and one roll 1/2" tape.

No. 1085 Tapewritereach **\$34.95**
No. 7301 Tool 'N Tape Kit consisting of M-20 Tapewriter with one giant letter embossing wheel, one vertical wheel, one standard size horizontal wheel, 5 rolls 1/2" tape (red, green, blue, black and woodgrain) and 5 magazines 3/8" tape (red, green, blue, brown and black) in handy carrying case each**\$49.95**

MODEL M-10
For 1/4" and 3/8" Vinyl Tape

Allows for quick changing of tape track internally by movement up or down of one selector pin. Space selector permits wide or regular letter spacing. Rapid change embossing wheels and "pull-tab" cut-off. Die cast zinc body. 9" long, 3" wide. Chrome finish, charcoal blue trim. Complete with optimum size letter wheel, standard size letter wheel and one magazine 3/8" tape.

No. 1082 Tapewritereach **\$19.95**
No. 7350 Tool 'N Tape Kit consisting of M-10 Tapewriter with optimum sized letter wheel, 5 magazines 3/8" tape, 5 magazines 1/4" tape (assorted colors), one standard sized letter wheel, one vertical wheel in custom fitted carrying case. ea. **\$29.95**

KENCO® High Volume, 2" Discharge HEAVY-DUTY PUMP

Ideal for emergency high-volume pumping as well as a sewage pump, Model 139 has a heavy-duty 1/2 h.p. motor, non-clog 2-vane (each 1 1/2" deep) impeller and special volute. Has same one-piece cast-bronze base with built-in leg supports and moves sewage, semi-solids and debris dependably, economically.

MODEL 139

KENCO® Heavy-Duty 1/2-H.P. All-Bronze COMMERCIAL SUMP PUMP

MODEL 65

This all-bronze workhorse of a pump is designed to do the big sump jobs in industry, construction, commercial units, shopping centers, schools, motels, etc. With its non-clog bronze impeller, 1 1/2" discharge and 1/2-h.p. motor, this power-packed pump can move great quantities of liquid or septic tank effluent plus the trash or debris that falls into pits or sumps.

KENCO® Multi-Purpose, All-Bronze RUGGED SUBMERSIBLE PUMP

MODEL 64

Built to move fluids fast, this all-bronze submersible pump delivers dependable pumping power for domestic and industrial sumps, septic tank effluent pumping, loading docks, pedestrian underpasses, utility tunnels, elevator pits, transformer vaults, ruptured water mains.

KENCO® Portable, Weighs only 18 lbs. SELF-POWERED, SELF-PRIMING PUMP

MODEL 61

Small in size, big in pumping power, Kenco's Model 61 is ready to pump anywhere any time. Has cast-iron volute, bronze impeller and 3/4-h.p. 2-cycle engine that runs 40 minutes on a single filling.

Perfect for pumping out flooded areas or basements especially when power fails; excellent for swimming pool clean-out, pumping out cisterns, sprinkling emergency bilge pumping; useful at camp sites to pump water for kitchen use or showers; ideal for contractors, public utilities, plant maintenance crews.

KENNEDY TOOL KITS
520 Machinists' Case

Seven drawers, felt lined, with super-compound drawer slides. Drawers may be instantly removed for cleaning. 100 key change cabinet lock. Brown ripple finish.

Nos. 520 Overall Dimensions, Inches 20 L x 8 1/2 W x 13 H Each \$25.71

MECHANICS' KITS

4 tray mechanics kit. Double seamed ends. Piano-type hinge. 3 skid rails on bottom. Roller bushed tray levers. Brown ripple finish, tray smooth green finish.

Nos. 1017 Overall Dimensions, Inches 17 L x 8 W x 10 H Each \$12.05
1018 18 L x 10 W x 12 5/8 H \$13.66
1022 22 L x 10 W x 12 5/8 H \$15.80

UTILITY KITS

CS-16/19

CS-16 and CS-19 have cantilever trays that open with lid. S-19 has lift out tray. Full grip steel handle.

S-19

Nos. CS-16 Overall Dimensions, Inches 16 L x 7 W x 7 H Each \$5.48
CS-19 19 L x 7 W x 7 H \$5.91
S-19 19 L x 7 W x 7 H \$5.91

COMBINATION UNIT—526 MACHINISTS' CHEST AND 278 ROLLER CABINET

Machinists' chest double walled for strength. Removable felt lined drawers. Multiple change pin type tumbler lock. Sturdy handles on ends.

Roller cabinet has eight full size drawers. Drop front panel with lock. Cabinet rolls easily anywhere.

Nos. 526 Overall Dimensions, Inches 26 1/2 L x 8 1/2 W x 13 1/2 H Each \$32.00
278 27 L x 18 W x 33 3/8 H \$72.36

EAGLE SAFETY CANS

TYPE I

Approved — Listed — Labeled

Underwriters' Laboratories, Inc. — Factory Mutual

Made from 24 gauge terne coated steel. Bodies and breast seamless drawn, electrically welded together. The UI-25 and UI-50 have free swing handles. The UI-2, UI-4 and UI-10 have trigger type handles.

No.	Trade Capacity	Packed In Shipping Ctn.	Weight Per Dozen	Each

Screenseach			.83

EAGLE STAINLESS STEEL LAB CANS

A quality safety can for handling hazardous laboratory fluids - - -

- All Stainless Steel Construction
- Explosion-Proof Flame Arrester
- Curled-Bead Bottom for Stability
- Tight Seal Teflon Gasket
- Large-Diameter Pour Spout
- Leakproof Design

No. 1301 →

Factory Mutual
"FM" Listed & Approved

The Eagle "Crown Seal"* Stainless Steel Lab Can will prevent laboratory explosions resulting from ignition of vapors in the use of flammable liquids. It is a top-quality safety can of durable stainless steel construction and leakproof design, tested and approved by Factory Mutual. All seams are welded under electronic control to provide an airproof can. The special oblong shape conserves valuable lab shelf space. The wide 1½" pour spout enables this safety can to be filled and emptied easily. A double-walled flame arrester provides additional safety when pouring, and protects the contents against ignition caused from external sparking.

*Eagle trademark

Also available long-terne steel, painted red: 1 gal. cap.

Model No.	Material	Trade Capacity Gal.	Dimension In. H.	W.	L.	Approx. Wt. Lbs.	Packed Doz.	Each

JUSTRITE SAFETY CANS

1 Pint and 1 Qt. Sizes

½ Gallon and 1 Gallon Sizes

2, 3, and 5 Gallon Sizes

Non-explosive Cans — for using, handling and storing gasoline, benzine and other explosive or flammable liquids. Approved, inspected and labeled by Underwriters' Laboratories, Inc. Approved by Factory Mutual Fire Insurance Companies (as below). Finished in baked Red Enamel. Made of 24 gauge steel, lead coated. Large nozzles, easy to fill. "No-Spill" pouring lip. Balances for easy carrying. Seven sizes.

Cat. No.	Capacity	Wt. Lbs. Each	Each
10000	1 Pt.	2	\$5.33
10100	1 Qt.	2½	5.48
10200	½ Gal.	3	6.23
10300	1 Gal.	4	6.38
10500	2 Gal.	7	7.88
10700	3 Gal.	8	8.25
10800	5 Gal.	9	8.70

Used with or without "non-flash-back" baffle Screens. Screens are easily removed or inserted — can be purchased separately (\$1.30 each): not required by Underwriters' Laboratories, Inc., but are required by Factory Mutual in 1, 2, 3 and 5 gallon sizes.

JUSTRITE OILY WASTE CANS

For safe handling of waste, rags and other flammable materials. Approved and labelled by Underwriters' and Factory Mutual Insurance Companies. Body of 24 gauge galvanized sheet steel, cover No. 22 gauge. 4-inch legs, and handles, are of ½-inch band iron (1 inch wide).

With Foot Lever Attachment

Cat. No.	Size, Inches Excl. of Legs	Cap. Gal.	Shpg. Wt. Lbs.	Price Each

SAFETY STORAGE CABINET FOR FLAMMABLE LIQUIDS

The safe way to store cans of flammables indoors. Meets Nat'l. Fire Protection Ass'n. Code 30. Capacity 45 gals. Size: 65" high x 42" x 18". Two shelves — double walls — double doors — air vents. 18 ga. steel, baked yellow enamel. One in carton, 270 lbs.

No. 25450...each \$395.00

**INTERNATIONAL CREOSOTING AND CONSTRUCTION COMPANY
PRESSURE-TREATED SOUTHERN YELLOW PINE POLES**

Old Lines of International Creosoted Pine Poles

In Above Lines — 6712 Poles — 1/2 of 1 Per Cent Replaced in 25 Years of Service

Graybar Electric Company brings to the telephone and utility industries the highest quality in treated pine poles and submits in support of this statement the fact that International has more long-time service-records of poles without failures than any treating concern. Low annual cost, reliability, the fact that in times of financial stress or weather hazard telephone and utility companies need lines that will stand without failure, all of these features have dominated us in our pressure-treating pine pole policy.

International as a Supplier

The International Creosoting and Construction Company, organized in 1875, is one of the largest commercial creosoting companies in the business, with an outstanding record and a dominant place in the treating industry. Your attention is invited to the records of old and new lines cited in the photographs of International Poles shown above. These are typical examples of the many available.

International operates in one of the finest timber producing areas of the Southwest, and added to its advantages of natural resources and location are the skills of resourceful and experienced graduate chemical engineers and treating operators.

Work is conducted in modern and well-equipped plants and laboratories. Pioneered and trained by a background of 92 years experience, International timbermen select the cream of the timber area (surpassing even the quality of lumber logging operations) for the manufacture of Graybar-International poles. Production moves to conditioning yards at the treating plants by means of a highly developed and well organized concentrating system. The yards themselves have been built in conformity with Government seasoning recommendations.

International always uses the best grade preservative, whether it be pure coal-tar creosote, creosote-pentachlorophenol, or pentachlorophenol in petroleum distillate, in the treatment of its poles; and has stood against every tendency toward any departure in quality or reduction in quantity of the preservative that would make of the user's line an experimental laboratory.

Graybar-International treated pine poles have gone to almost every state of the union and without exception have given outstanding service.

Reasons for the Standing of the International Pine Pole

- | | |
|-----------------------|------------------------|
| 1. — Long Life | 5. — Cleanliness |
| 2. — Low Annual Cost | 6. — Fire Resistant |
| 3. — Great Strength | 7. — Bird Resistant |
| 4. — Lasting Strength | 8. — Termite Resistant |

The utilities of the United States use more pressure treated pine than all other treated pole species combined. Only briefly need their qualifications be given to account for this preference. The tall straight pine trees of the South are natural poles. They grow with a gradually tapering stem, practically without branches and when sheared of their bark and browned as the result of treatment, they present a stately appearance in the line. Their wood is the strongest of the poles commonly used in line construction. Fortunately pine is a wood into which a preservative goes very deeply during the course of a scientifically controlled treating operation and the depth of this protection is the reason for the exceedingly long life of the pine pole. The depth of this protection is the explanation also of pine's resistance to termite attacks, for the checks which open in every wood and expose it to the ravages of these insects do not go past the deep penetration in the pine pole.

Appearance and Cleanliness

Early in the history of the development of creosoted pine poles the question was raised to their use on city streets. It was believed that the bleeding of some of the poles might cause trouble if the clothing of pedestrians rubbed against them. Such objections are heard no longer either in protest or propaganda.

International's care in timber selection, the skill of its production and manufacturing forces, and advances in the science of timber treatment have all contributed to overcome these objections and to give to business districts and residential areas the economy and security of the treated pine pole.

Graybar-International poles are in use in the business and residential districts of the largest cities of the United States, and in thousands of the smaller ones.

The present-day pole is clean, smooth, shapely, and stands with the appearance of tapered wrought-iron pipe, rather than of processed trees.

**Composite Poles,
For Extra Height³**

The Choice of Preservative

Creosote, the oldest known preservative in the wood preserving field, has stood the test of time and has had such wide-spread use as to prove its effectiveness under all conditions. It remains well in the wood whether the service condition is a dry area, a swamp, or even in salt-water where poles are subject to marine-borer attack. International pole lines twenty, thirty, forty years in service, still in perfect preservation, attest to creosote's lasting qualities. CREOSOTE stands as the time-established pole preservative.

Pentachlorophenol (often called Penta) is having increasing acceptance by users because it presents a somewhat cleaner pole and can be painted, if desired, after a few years of service. How the service-life will compare with poles treated with creosote no one knows and it will take years to have a definite answer to that question. As preservatives go, pentachlorophenol is comparatively young, whereas creosote does have a long established record. In all indications from the test work that has been done, pentachlorophenol is an excellent preservative.

Retention

A final retention of 8, 10, or 12 pounds of preservative per cubic foot of wood is most commonly used. Of these, the 8 - pound treatment is frequently specified. The 10 - pound and 12 - pound final retentions give a greater quantity of preservative in the wood at little extra cost. Important pole lines, costing more all the time to build, merit the higher retention.

For areas that are climatically severe; that is, high humidity or prolonged warm temperatures, or areas of heavy rainfall, 10 - pound or 12 - pound final retentions are urged. While the 8 - pound treatment, even in these areas, gives superb service the small cost of the additional preservative to protect poles and pole lines, whose value is constantly increasing, is an investment in efficiency.

1. For economical decorative street lighting, International poles are having wide use because of their straight, clean appearance and reliability.
2. For EHV — wood construction gives economy, flexibility, desirable electrical characteristics.
3. The Composite Pole for extra height. Increasingly used, well tested, are an investment in efficiency for long spans, dam crossings and river crossings.

CHARACTERISTICS OF QUALITY PINE POLES

Value of Penetration

**Uniform Penetration
is a Criterion of Good
Treatment**

**Deep Penetration means
Long Life for the Poles**

Several factors are important, particularly the grade of preservative, but no single factor has such bearing on the life and the quality of treated pine poles as the *depth* and the *uniformity* of treatment penetration. Untreated wood of any species commonly used will decay eventually and the only preventive is to have the penetration of the preservative deep, uniform, and of proper grade. This is accomplished only when skilled technicians analyze the creosote and apply the treating process to well seasoned poles.

**Poles are Uniformly Stacked for Care and Seasoning
In Accordance to Size and Length**

INTERNATIONAL PRESSURE TREATED SOUTHERN YELLOW PINE POLES

Standard Specifications

The accepted standard specification for determining the class, size and dimensions of poles is that of the American Standards Assn. dated May 5, 1963. The treating specification most used is the pole treating specification of the American Wood Preservers Assn. When the user has a special specification and orders are accepted thereon, we will comply with the user's specification.

Dimensions of Southern Pine Poles (Based on a Fiber Stress of 8,000 psi)

What an Order Should Show

To avoid delays and prevent the possibility of error, an inquiry or an order for International poles should contain the following information:

1. Name of Consignee.
2. Destination of Shipment and Type of Delivery.
3. Date Shipment is Desired.
4. Number of Poles Required.
5. Length and Class or Minimum Top Diameter.
6. Type Preservative and Number of Pounds Retention required per cubic foot of wood.
7. Type of Framing Desired. A sketch is preferable. Poles can be framed more economically at the treating plant before treatment than in the field at point of installation. Insofar as possible, therefore, complete framing instructions are desirable.

Price on Application

CHANCE EPOXIGLAS® AUXILIARY ARM

Epoxiglas Construction for Greater Strength

The Epoxiglas Auxiliary Arm is used to change crossarms, insulators, or poles on short spans up to and including 15KV. No. M4740-5 wire tong saddles can be used to mount the mast to the pole.

The arm has a balanced load of 600 lbs. Unbalanced, 150. Each wireholder is rated at 150 lbs. The same load ratings apply to the larger Epoxiglas Auxiliary Arm Assemblies providing side braces are used.

The adjustable wireholders can be installed to receive the conductor from either side and above or below the arm.

Cat. No.	Description	Wireholders (4) Capacity	Weight Lbs.	Each
H4862-6	2½" x 4' 11" mast			
	2½" x 6' arm	2" max.	26	\$130.00
H4862-8	2½" x 4' 11" mast			
	2½" x 8' arm	2" max.	28	136.00
H4862-61*	2½" x 10' mast			
	2½" x 6' arm	2" max.	51	238.00
H4862-81*	2½" x 10' mast			
	2½" x 8' arm	2" max.	53	244.00

*Also includes two 1½" x 6' side braces equipped with two 2½" pole clamps and one M1728-5 Wire Tong Clevis. Includes number of wireholders shown, but saddles must be ordered separately.

CHANCE EPOXIGLAS® EXTENSION ARM

The Epoxiglas Extension Arm is designed for use on voltages up to and including 15 KV where reconductoring or insulator replacement is necessary. The Epoxiglas Extension Arm can be used on voltages up to 34.5 KV providing the wireholder is insulated with the M4805-7 insulator.

The 2½" diameter pole is suspended under the crossarm by brackets to enable the conductor to be removed from the original crossarm and placed in the wireholder mounted on the Epoxiglas Extension Arm. This arm adjusts to fit crossarms from 3¼" x 4½", to 3¾" x 4¾".

Cat. No.	Description	Weight Lbs.	Each
H4800-60	5' Arm — one wireholder	11½	\$37.50
H4800-72	6' Arm — two wireholders	13	48.50
M4805-7	wireholder — insulator only	3½	7.00

RAINIER DOUGLAS FIR CROSSARMS

Indispensable characteristics in crossarms are strength and durability. Rainier fir crossarms meet these requirements. Crossarm blanks are carefully sawed from the sections of the log which provide proper density and grain slope. They are graded to eliminate any strength reducing defects then seasoned to approximate equilibrium moisture content. They are seasoned slowly with constant control throughout, the seasoning process insuring that the moisture content of the interior is substantially the same as in the surface on the arm.

American Crossarm & Conduit Company maintains excellent dry kilns and kiln control equipment, and all operations are carefully supervised by specialists who are expert in drying fir crossarms. Completely equipped manufacturing facilities and substantial lumber stocks permit prompt service to users in all parts of the country.

For those customers who prefer air dried arms the company maintains properly designed drying sheds with controlled ventilation and precision instruments for checking the character of drying while the lumber is being conditioned for manufacture into crossarms.

Rainier fir crossarms can be furnished either untreated or treated with Pentachlorophenol or Creosote of specified pressure or hot and cold dip or five-minute hot dip.

Price on Application

RAINIER WOOD CROSS BRACES

Wood cross braces increase the transverse strength of H-frame structures. Steel fittings are tapped to insure static-free performance and are double-dip hot galvanized. Wood is structural grade Rainier fir.

RAINIER "VEE" BRACES

No. 2000
(3 3/8" x 4 3/8" cross section)
No. 2100
(3 3/8" x 5 3/8" cross section)

RAINIER KNEE BRACES

No. 2300
(3 3/8" x 4 3/8" cross section)
No. 2400
(3 3/8" x 5 3/8" cross section)

The mounting holes for Knee and Vee Braces may be punched for 5/8, 3/4, or 7/8 inch mounting bolts. Specify size of hole and give dimensions S & D when ordering.

Knee and Vee Braces are identical except for angle fitting on one end. Knee Braces fit against side of pole and top of wood filler block. Vee Braces fit against side of pole and side of metal spacer fitting. Mounting bolts for both Knee and Vee Braces are ordered separately as they are not included with the brace assembly.

RAINIER TRANSMISSION LINE FIR CROSSARMS, TIMBERS AND BRACES

Type No. 601

69KV TRIANGULAR Z-TYPE SINGLE POLE STRUCTURE

Type No. 700

TANGENT STRUCTURE

Adaptable for voltages from 69 to 154 KV

Type No. 702

TANGENT STRUCTURE WITH BRACES

Adaptable for voltages from 69 to 154 KV

American Crossarm & Conduit Company cross-arms for transmission lines are manufactured from carefully graded Douglas Fir and are furnished both in solid and laminated timbers.

Douglas Fir from the Pacific Northwest grows in dense stands and produces a clear, straight grained heartwood that is materially stronger than the average wood of its weight. Because of its close, tight grain, it is highly resistant to weather in any climate and has the strength and long-lasting qualities so vital to a transmission line structure.

Seasoning operations are scientifically controlled by expert timber engineers, and each piece of wood is conditioned for long years of service in the line. Laminated members are fabricated with modern equipment employing adhesives of proven performance on transmission structures.

Each of the manufacturing plants of the American Crossarm and Conduit Company is fully equipped for precision manufacture of transmission line crossarms, timbers, and braces.

DOUBLE UPSET BOLTS

Type A

Used for long span secondaries in rural construction work. The double collar spaces the insulator away from the pole. For service take offs a clevis is mounted on the threaded end of the bolt outside the insulator. Furnished with square nut, round washer, and cotter key on short end, and a square nut and M-F locknut on long end. Collar to short end is 4 5/8". Collar to collar is 1 1/2". 5/8" diameter and 1 3/8" thread on short end. Hex section between collars permits the bolt to be held while tightening the nut. Used with insulator No. 255 (not included). Wires extend about 3" from pole.

*Minimum diameters shown are with inside nuts removed from bolts.

GROUND WIRE BAYONETS

Used for supporting the overhead ground wire on wood or steel poles.

All bayonets have two $\frac{1}{8}$ -inch holes for $\frac{5}{8}$ -inch diameter through bolts with the upper holes $\frac{1}{8}$ -inch diameter which allows the use of Nos. 5450 and 5451 Ground Wire Clamps. The through bolt holes in the bayonets are slotted $\frac{1}{8}$ -inch wide by $1\frac{1}{2}$ inches long to allow for any inaccuracy in boring bolt holes in the poles.

OVERHEAD GROUND WIRE SUPPORT

The Overhead Ground Wire Support is made from heavy steel rods and is designed to carry static wires. The bracket bolts securely through the pole. It is made

in four sizes for poles from 6 to 14 inches in diameter. The load plate is welded to the rods while the back plate can be adjusted to fit the pole. A suspension clamp can be hung from the forged link on the bracket.

FLEXIBLE GROUND WIRE CLAMPS

Hot galvanized steel. Has two 1/2" x 1 5/8" clamp bolts and 5/8" diameter U-bolt which fits bayonets with 1 7/8" hole spacings. 3 1/2" long.

Chance	Cat. No.	Oliver	Hubbard	Bayonet Hole Spacing In.	Wt. Lbs. Per 100	Per 100
5460				1 7/8	172	\$242.91

GROUND WIRE CLAMPS

The J Type, Belcher Clamp for bayonets provides a secure fastening for the ground wire and will not injure it in any way, as the wire comes in contact with only the rounded surfaces of the clamp. Economically installed, as use of temporary snatch-blocks is entirely avoided, the ground wire being strung through the clamps for several spans at a time and the clamps tightened after pulling up.

The U Type Belcher Clamp is used for clamping overhead ground wires to steel towers and has the same advantages as those of the J Type.

Holding power equivalent to the breaking strength of a 3/8-inch steel strand is attained through the use of two clamps on each wire. This clamp will accommodate strands with diameters as large as 1/2 inch.

SINGLE UPSET BOLT

This type of insulator bolt is used for supporting neutral grounded wires for rural work. A rack type insulator is used on the collar end of the bolt and is installed in a horizontal position. 6" of thread at one end, 1 1/2" the other. 1 3/8" diameter collar. Collar to short end is 4 7/8". 5/8" diameter. Used with insulator 255 (not included).

THREADED ANCHOR RODS

Thimbleye

Twineye

Threaded anchor rods can be used with all types of expanding anchors and all types of cone anchors. Rods are forged with either the new improved thimbleye, twineye or tripeye for maximum strand protection. Threads are rolled on rods to 3/4" diameter inclusive. Rods 1" and over have a cut thread. Drop forged steel, hot dip galvanized.

Conform to E.E.I. Specification TD-2. Length of rod indicated near head.

NEVER CREEP ANCHOR RODS

Thimbleye

Twineye

Never Creep rods are designed for use with the Chance Never-Creep Anchor. This combination of plate and rod makes the most efficient anchoring device known for normal conditions. Rods are drop forged with a thimbleye, twineye, or tripeye plus a Never Creep point which fits into the anchor socket and provides a spear head for each drawing. Rounded eye prevents the strand from flattening under tension and aids in slack pulling.

Conform to E.E.I. Specification TD-2. Length of rod indicated near head.

TRANSPOSITION POINT TYPE BRACKETS
Hot Galvanized

Left Hand Bracket
1" Lead Thread

An effective means of transposing wires for carrier or multi-channel frequencies on crossarms is provided by this style bracket. The slots permit mounting on crossarms for 10" or 12" spacing. Wire spacing is 6 3/4". Each bracket has two low insulator positions which are diagonally opposed, permitting a wire clearance of approximately 2" between wires on the cross over. The bracket is furnished with two 1/2"x6" mounting bolts.

POLE LINE HARDWARE

**TRANSPOSITION BRACKETS
Tandem Type**

No. 8277 No. 8278

Straight bracket No. 8277 is recommended for straight sections and corners where the "pull" is 15 feet or less. Made from 3/8" flat steel, it has 1 1/8" square arm mounting hole and 1/8" diameter pin mounting holes.

Offset bracket 8278 is used at corners where the "pull" is 15 to 50 ft. Arm mounting hole is 1 1/8" square and pin mounting

holes are 1/8" diameter. Tandem Brackets are used with transposition insulators. Mounting bolts and pins are not included.

**UNIVERSAL TRANSFORMER
MOUNTING BRACKETS**

The 15 Series are for mounting transformers with 12" EEI-NEMA Type A lugs on a single bracket and are shipped complete with 8B adapter plates. The 50 Series are for mounting transformers with 12" or 24" EEI-NEMA Type A and B lug spacings. The 100 Series are for mounting transformers having four lugs and are supplied with one R2B adapter plate for each segment on the brackets.

Mounting plate of all standard segments is 6" from pole. May be ordered with mounting plate 9" from pole. If extended segment is desired for all positions, add "E" in front of catalog number. If two of the three positions are to be extended, add suffix "969" to catalog number. Prices on application.

BONDING CLAMPS

Chance guy ground clamps or bonding clamps make a dependable mechanical and electrical pressure contact between guy strand and anchor rods for use when guys are part of a grounding system. Reduces radio trouble by keeping guy to ground contacts tight. Also used on angle thimbleye and thimbleye bolts on the poles to keep hardware to guy contacts tight. Also used to prevent excessive wear on guy strands and to protect galvanizing. Made to fit thimbleye, twineye or tripleye rods.

CASE ALUMINUM TRANSPOSITION BRACKETS

Cross Arm Type

Span Type

Cross arm type bracket for 8-inch wire spacing mounts on standard cross arms with two 1/2 x 6-inch machine bolts, with 2-inch square washers, order separately. The bracket is designed to mount on cross arm with pin spacing from 8 to 12 inches.

Combination cross arm and mid-span bracket is designed for 4-inch wire spacing.

Case span type bracket for 8-inch wire spacing is used between poles for open wire and Carrier circuits and long span rural construction. Regularly ordered with roller type glass insulators with rubber bushings, or with rubber insulators when specified. Insulators to be ordered separately.

High strength span bracket is for use on extremely long spans over river crossings, gorges, etc. It has a tension resistance of 4,000 lbs. per conductor.

OHIO BRASS STRATLINE CLAMPS

No. 87650

These clamps provide an inexpensive and effective means for dead-ending distribution primaries and stations buses. Easily covered for hot-line work, they can be detached from supporting insulators simply by removing cotter pin and rivet. Holding power meets the requirements of primary distribution service where larger sizes of aluminum cable are involved.

OHIO BRASS ANGLE CLAMPS

No. 81460

No. 82860

Angle clamps are suitable for turning angles from 10° to 120°. Keeper-piece is reversible for best conductor fit. Clamp body and keeper are made of malleable iron; bolt is steel. All parts are hot-dip galvanized.

OHIO BRASS HOOKS

No. 78420

No. 85465

No. 79270

For attachment of suspension insulators to supporting structures. No. 78420 is self-locking, in that the interconnecting insulator cap, when installed, closes a major portion of the 1 3/4" opening and prevents disconnection from the tower as long as the hook is assembled with the insulator. Forged steel, hot-dip galvanized.

Cat. No.	Ultimate Strength Lbs.	Wt. Lbs. Per 100	Per 100
78420	30,000	110	\$63.60
85465	30,000	140	84.80
79270	30,000	140	84.80

OHIO BRASS CLEVIS EYES

For connecting suspension and strain clamps to clevis type insulators or for similar applications. Made of malleable iron or drop-forged steel, hot-dip galvanized.

INSULATED SCREW EYES

The porcelain ring has a diagonal opening which allows the easy insertion of wires and when pulled taut they cannot become released from the ring.

The porcelain is glazed on the interior surface of the ring and on the surfaces of the slot. Screw eye is hot galvanized.

KEARNEY FIBERGLAS STRAIN INSULATORS

Fig. 1

Fig. 2

Flashover Resistant — Withstand repeated flashovers without damage. The fibreglas does not track. Contains no moisture, so there is no explosive fracturing by lightning. Mechanical and electrical characteristics are not affected by length of service or environment. Excellent rain washing action.

Faster installation — Kearney strain insulators are smaller and lighter in weight than wood. They are much easier to handle. No field assembly of parts required. Large color coded labels provide instant identification of the strength rating.

Individually tested — Every Kearney fibreglas strain insulator is mechanically tested at its full rated strength.

COPPERWELD GROUND RODS

The only ground rods with a thick copper covering inseparably Molten-Welded to a strong steel core, they provide stiffness for easy driving and rust resistance for long life. Copper-to-copper contacts throughout assure low resistance.

COPPERWELD TRIPOD GROUND ROD DRIVER

Price on Application

COPPERWELD PIGTAIL GROUND RODS

The Copperweld Ground Rod with an annealed Copperweld pigtail was developed for use where pigtail connections are preferred for subscriber station grounds. These rods are regularly furnished in 5- and 6-foot lengths with 18-inch pigtails. Also available with 36" pigtails.

The pigtail connections are firmly attached to the rod by means of a heavy copper sleeve which is compressed on the rod and pigtail. The assembly is dipped in lead-tin alloy solder to further seal and strengthen the connection. Secured to the rod one inch from the top end, the pigtail does not interfere with driving. On these rods it is only necessary to bend the wire upward to make the connection. The wire is attached to the rod so that it is well protected while handling in the storeroom and in the field, yet is convenient both for driving and for making a ground connection.

Copperweld Pigtail-Type Ground Rods With Annealed Copperweld Pigtails

**COPPERWELD
GROUND ROD CLAMPS**

Copperweld Type AB Ground Rod Clamps are strong, non-rusting, low-cost clamps that provide a high-pressure contact between the rod and the grounding wire. The rugged, one-piece cast bronze clamp body will withstand unusual abuse. They can be easily disconnected to measure the resistance of the ground.

The non-ferrous set screws are cupped so that when tightened, the clamp cannot slip on the rod.

Clamps are supplied with either hexagonal-head or tamper-proof safety set screws. Special wrenches are supplied free of charge with each shipment of safety set screw clamps.

COPPERWELD ANCHOR RODS

The strong holding power of these non-rusting anchor rods is always the same . . . protecting your overhead lines year in and year out. The threaded ends are heavily coated with pure tin to permit the use of ferrous or non-ferrous fittings. Copperweld Anchor Rods are available in the three sizes shown below:

Nominal Diameter Inch	Rated Breaking Strength Lbs.	ASA Thread Size
5/8	18,500	5/8-11
3/4	26,500	3/4-10
1	45,000	1-8

Ordering Information

When ordering Copperweld Anchor Rods, specify the catalog number listed below for the desired diameter and length. The 5/8-inch and 3/4-inch rods are packed in bundles of five each; 1-inch rods, three to a bundle. Plastic caps are used to cover the threaded ends of the rods and protect them from damage in shipment.

Fittings are packed and shipped separately, and should be ordered to suit the requirements of the particular type of anchor used. Catalog numbers are listed below for the non-ferrous fittings that are available.

TELEPHONE AND TELEGRAPH INSULATORS

Methods for testing glass insulators are those established by A.S.T.M. D-468-42 Standard Methods of Testing Pin-type, Limeglass Insulators. These insulators will also meet product specifications of various utilities companies and the Association of American Railroads specification for double-petti-coat glass Insulators 1-A-33.

*See diameter and recommended lengths for various post sizes listed with each insulator in table of mechanical characteristics. NOTE: Where either 5/8 in. or 3/4 in. studs are recommended, these

can be interchanged for special applications. The 7/8 in. stud is not interchangeable with other sizes. Recommendations are based on cantilever strengths listed in mechanical strength tables.

OHIO BRASS NEUTRAL CLAMPS

Equipped with a seat for neutral conductor, with eyes on each side for dead-ending service, and with an upper groove for ground wire or neutral secondary service wire. Clamp body is tapped so that clamping pressure on the conductor will be independent of pole shrinkage. Malleable iron, hot-dip galvanized. Pole bolt not furnished.

CHANCE ANCHORS AND GUYING MATERIALS

**POWER INSTALLED
SCREW ANCHOR**

Anchors are installed by attaching the P.I.S.A. wrench to the Kelly bars of power diggers. The anchors can be quickly screwed down with the anchor wrench transmitting the torque from the digger to the anchor hub. Anchor rods need be only large enough to hold the load. Both one- and two-helix anchors are available for matching holding power with construction requirements. Anchors are available with Thimbleye, Twineye, or Tripleye guy wire attachments.

Cat. No. Tripleye*	Helix Size, In.	Area Sq. Inches	Rod Size	Each

+Yield Strength of Rod.

NO WRENCH SCREW ANCHOR

Chance no wrench screw anchors consist of a drop forged galvanized steel thimbleye or tripleye rod double arc welded to a high strength structural steel blade. Blade in each size anchor is correctly pitched for best installation and holding power. Small hub minimizes earth disturbance. A bar is used as a wrench for installing the anchor.

Tripleye Cat. No.	Size In.	Area Sq. In.	Rod O'v'all Size Lgth. In.	Wt. Lbs. Per 100	Each

THE 8-WAY EXPANDING ANCHOR

The Chance 8-way steel expanding anchor has eight steel blades that expand to form a cone shaped square. They distribute the load evenly all the way around the anchor. There are no non-holding areas between blades. The construction of the anchor is sturdy but simple. There are no hinges, moving parts, or mechanical devices to hinder its smooth operation. A nut retainer on the base helps in pushing the anchor down into the hole and reinforces the base plate. Anchors

are coated with a special asphalt paint to protect them during handling and to guard against corrosive conditions when installed.

CHANCE NEVER CREEP ANCHORS

Chance Never Creep anchors hold against solid undisturbed earth. Installation method consists of boring a hole at a 45° to 60° angle with the ground line boring toward the pole to be guyed, driving the rod at right angles to the pole and hanging the blade on the ball point of the rod. Dipped in asphalt paint, order rods separately.

EVERSTICK EXPANDING ANCHORS

Easy to install. Drop anchor in hole and expand by striking with tamping bar. For use with standard galvanized anchor rods.

CHANCE EXPANDING ROCK ANCHOR

Chance rock anchors are designed to expand and hold firmly against the sides of a drilled hole 1/8" to 1/4" larger than the closed anchor. Once expanded the pull on the rod tends to wedge the anchor tighter against the edge of the hole. These anchors provide a method for guying in solid rock without the need for concrete or lead grouting. The anchor is malleable iron, dipped in corrosion resistant asphalt paint. Rods are drop forged steel with large triplex to accommodate bar for wrench in expanding the anchor. This eye will accept one to three guy strands. Holding power limited to rod strength of 25,000 pounds.

ALUMOWELD STRAND

Alumoweld Guy and Messenger Strand is designed to last as long as the pole it guys or the cable it supports. Each wire of this low-cost strand has a thick aluminum covering inseparably welded to the strong steel core, giving

Alumoweld the same permanent protection against corrosion as solid aluminum wire.

Alumoweld is as strong as steel, weighs 15% less, and lasts far longer. It's easy to handle, easy to install.

Modulus of Elasticity: Strand, 23,000,000 Coefficient of Linear Expansion: .0000072 per degree Fahrenheit.

Strand sizes to provide higher strengths can be designed and furnished. In these cases, contact your Copperweld Steel Company representative or Copperweld's Engineering Department at Glassport, Pa.

Packing and Marking

Lengths of strand to be furnished shall be agreed upon at the time of placing individual orders.

When ordered on reels, the material shall be properly packed and lagged to prevent damage to the strand in ordinary handling and transportation. Each reel shall contain one continuous length of strand.

When ordered in coils, each unit of shipment shall be thoroughly wrapped with strong paper, so as to be protected against damage in ordinary handling and transportation.

Reels and coils shall be marked as required by ship-

ping instructions, and in addition, shall include the manufacturer's name, the purchaser's order number, the size, the length and the weight. Coils shall also have a tag inside the wrapping showing the manufacturer's name, the size, the length and the weight.

Orders shall specify whether shipment is desired on reels or in coils. When coil length is not specified, lengths as carried in stock will be furnished. Reel lengths for 3, 7, 19 and 37-wire strands shall be agreed upon at time of placing the order.

Price on Application

CRAPO GALVANIZED STEEL 7 WIRE STRAND

All wire used in forming a particular size and grade of Crapo galvanized steel is produced from steel of selected properties. Scientifically processed under laboratory supervision and galvanized by the Crapo process. Wire and strand subjected to laboratory tests for tensile strength, elongation, galvanizing, ductility and gauge to insure high uniform quality in the finished product.

Furnished in the following standard lengths: $\frac{3}{8}$ -in. diameter and smaller in 250, 500 and 1,000-ft. coils and 2,500 and 5,000-ft. reels; $\frac{7}{8}$ -in. diameter and larger in 250 and 500-ft. coils and 1,000, 2,500 and 5,000-ft. reels. When ordering specify size and grade, method of packing (coils or reels) and number of feet per coil or reel.

Available in Class A, B, and C galvanized coatings (in sizes and grades below):

CRAPO MID-SPAN TRANSPOSITION BRACKETS

Designed and developed specifically for use on insulated wires with four inch or greater spacing this bracket is made of durable weather-resistant plastic and is easily installed over regular plastic vibration dampers without the use of special tools or equipment. These brackets give increased fidelity of transmission by minimizing cross talk and other objectionable noise from outside interference.

Cat. No.	Description	Each
TB-102	Mid-Span Transposition Bracket	\$6.05

Combination Transposition Unit designed as either span or cross arm type for 8" spacing of bare open wire, physical or carrier circuits, can be easily thrown left over right or right over left. Light weight reduces sag and eliminates glass insulators avoiding accidental breakage or vandalism. High strength bracket can be used on new long span construction.

Cat. No.	Description	Each
TB-104	Mid-Span Transposition Bracket	\$7.25

CRAPO TELEPHONE LINE WIRE

High-Tensile Steel

These high-tensile, low-resistance telephone line wires make possible longer-span, lower-cost construction on new lines; provide stronger spans, with lower maintenance expense, on present lines.

Galvanized by the Crapo Process, which produces a heavy, dense, uniform coating of zinc that adheres tenaciously to the wire and provides dependable protection against corrosion.

HTL-85, HTL-135 and HTL-195 furnished in 1/2 mile coils without splices or joints. Galvanized steel compression-type sleeves are recommended for splicing these wires.

Crapo HTL-85

Used extensively for both new construction and for replacement. When used on existing pole structures it tends to increase strength of line, lessens hazard of ice and wind, minimizes service interruptions and reduces maintenance costs. No. 12 B.W.G. size makes possible spans of 210 ft. in heavy loading, 330 ft. in medium loading, and 440 ft. in light loading districts.

Size B.W.G.	Nominal Diam., In.	Approx. Wt. Per Mile Lbs.	Minimum Breaking Strength Lbs.	Resistance Per Mile Ohms	Per 100 Lbs.
9	.148	314	1462	18.47	\$17.83
10	.134	258	1199	22.45	18.25
12	.109	170	793	34.12	18.47
14	.083	99	460	58.59	19.87

Crapo HTL-135

Possesses two and one-half times the strength of standard B.B. wire; makes possible spans of 350 feet in heavy loading districts, 540 feet in medium loading districts, and 650 feet in light loading districts. The effective resistance at voice frequencies with currents of voice frequency magnitude is superior to that of the older grade.

Size B.W.G.	Nominal Diam., In.	Approx. Wt. Per Mile Lbs.	Minimum Breaking Strength Lbs.	Resistance Per Mile Ohms	Per 100 Lbs.
12	.109	170	1213	38.23	\$19.49

Crapo HTL-195 — Extra High-Tensile Lower Resistance Line Wire

Provides a combination of telephonic transmission qualities and physical strength never before attained in a galvanized steel telephone wire. Makes possible spans to 600 feet in Heavy, 650 feet in Medium and 700 feet in Light Loading Districts. Superior voice transmission.

Size B.W.G.	Nominal Diam., In.	Approx. Wt. Per Mile Lbs.	Minimum Breaking Strength Lbs.	Resistance Per Mile Ohms	Per 100 Lbs.
12	.109	170	1800	38.8	\$23.50

CRAPO CABLE LASHING WIRE

Corrosion Resistant Stainless Steel

Crapo

Developed specifically to meet demands for a spinning wire with a high strength to weight ratio and superior resistance to corrosion.

Crapo Type 430 Stainless Steel Cable Lashing Wire, is furnished to the following specifications: .045-in. diameter is furnished primarily for use in Western Electric Type "C" Cable Lasher and in General Machine Products Company's Types "C", "D" and "E"

Lashers. Each coil contains 1200 feet of wire plus or minus 30 feet. Nominal weight per Coil, 6.42 Lbs.

.061-in. diameter in coils designed for tapered or straight hub reels, coil length 735 feet plus or minus 20 feet. Nominal weight per coil, 7.17 pounds.

.065-in. diameter in coils designed for straight hub reels, coil lengths 650 and 450 feet plus or minus 20 feet. Nominal weight per 650 foot coil, 7.25 lbs; 450 foot Coil, 5 lbs.

Crapo Stainless Steel Cable Lashing Wire can also be furnished in Type 302 and Type 316.

Type 430

Catalog Number	Size Inches	Standard Package Feet	Per Coil
45CR1200	.045	1200	\$ 7.06
61CR735	.061	735	10.44
65CR450	.065	450	7.54
65CR650	.065	650	10.44

Galvanized Steel C Coated

Manufactured specially for lashing cable to messenger strand by the modern spinning method. Crapo C Coated Cable Lashing Wire is produced in .091-in. and .061-in. Diameter. Put up in neat compact, thread-lay coils with either straight or tapered arbor holes.

Coil Dimensions: Arbor hole for straight hub, 1 1/4 in. minimum; tapered hub, approx. 2-in. Outside diameter of coil (nominal) 6-in.; width nominal 1 1/2-in. Length of wire in coil: size .091-in., 325 ft. plus or minus 10 ft.; size .061-in., 650 ft. plus or minus 10 ft. Nominal weight of coil: size .091-in., 7.2 lbs.; size .061-in., 6.45 lbs.

Catalog Number	Size Inches	Standard Package Feet	Per Coil
C-091-S	.091	325	\$2.25
C-091-T	.091	325	2.25
C-061-S	.061	650	2.70
C-061-T	.061	650	2.70

GALVANIZED BB GRADE TELEPHONE WIRE

Size B.W.G.	Nominal Diam., In.	Approx. Wt. Per Mile Lbs.	Minimum Breaking Strength Lbs.	Resistance Per Mile Ohms	Per 100 Lbs.

INDIANA TELEPHONE ACCESSORIES

CRAPO PRE-TIED SPLINTS

Crapo pre-tied splint, tie wire and insulator can be pre-assembled in the shop or warehouse on production line basis, or on the ground at project site. Insulators with splint attached are then installed on crossarms or brackets.

Painted end of stick is made with left hand spiral, the opposite end with right hand spiral for ease of application. Applied splint grips line wire securely preventing slippage.

Protects line wire against wear and abrasion. Simplifies re-sagging problem. Line wire can be removed, re-sagged, and replaced without disturbing tie wire.

Available in galvanized steel for use with galvanized line wire and in copper/steel for use with copper/steel or copper line wire. Galvanized steel splints are made of spring steel wire with extra heavy Class B zinc coating. Copper/steel splints manufactured from 30% extra high strength copper/steel.

Cat. No.	Pre-Tied Splints For:	Per 100
109PT134	.109" (12BWG) Galv. Steel Line Wire	\$8.10
080PT114	.080" Copper/Steel	7.60
102PT128	.102" or .104" Copper/Steel	8.85

CRAPO DOUBLE V TIE SPLINTS

These splints are available in galvanized steel for use with galvanized line wire and in copper/steel for use with copper/steel or copper line wire. The steel splints are made of spring steel wire with extra-heavy Class "C" galvanized coating. The copper/steel splints are produced from 40% high strength copper/steel wire.

Cat. No.	Double V Tie Splints For:	Per 100
038VS109	.038" (14BWG) Galv. Steel Line Wire	\$5.90
109VS134	.109" (12BWG) Galv. Steel Line Wire	7.40
134VS134	.134" (10BWG) Galv. Steel Line Wire	8.85
080VC102	.080" Copper/Steel	6.00
102VC102	.102" or .104" Copper/Steel	7.05
128VC128	.128" Copper/Steel	9.85
165VC144	.154" Copper/Steel	13.35

CRAPO SPIRAL TIE SPLINTS

Provide a simple, economical means of reinforcing and protecting telephone line wire from abrasion and wear at the insulator. An important function is to prevent stress concentration at points of support and reduce the possibility of failure due to vibration. The splints are preformed from spring steel wire. Especially designed for long span construction.

Cat. No.	Spiral Tie Splints For:	Per 100
134SP136	.134" (10BWG) Galv. Steel Line Wire	\$6.60
109SP109	.109" (12BWG) Galv. Steel Line Wire	4.80
83SP94	.083" (14BWG) Galv. Steel Line Wire	3.50

CRAPO TANGENT SUPPORTS FOR "C" RURAL WIRE

Preformed from tough, springy, corrosion-resistant stainless steel wire, and coated with neoprene. Provides the simplest and most effective method of suspending plastic-coated one-pair parallel telephone wire.

The support is formed from a large, single stainless steel wire (.109" dia.) with a nominal length of 14". The oval-shaped spirals conform to the shape of the conductor and provide a closer, more uniform gripping action.

The reinforced loop in the center of the support is made with two complete turns of the .109" diameter wire. The eye makes it possible to attach the support to the pole easily and quickly with a drive hook.

Specially designed for use with the following plastic-coated one-pair rural telephone distribution wires of copper/steel or galvanized steel.

Cat. No.	Standard Support For:	Each
064CRW109	2/14 AWG (.064") Copper/Steel	\$0.33
080CRW109	2/12 AWG (.080") Copper/Steel	.34
083CRW109	2/14 BWG (.083") Galv. Steel	.34

CRAPO LONG NECK SUPPORT

For attaching second parallel pair to hook, or other support, already holding one-pair parallel wire. Designed like the regular Tangent Support except for extending neck measuring 4 3/4".

Cat. No.	Long Neck Support For:	Each
064LN109	2/14 AWG (.064") Copper/Steel	\$0.40
080LN109	2/12 AWG (.080") Copper/Steel	.41
083LN109	2/14 BWG (.083") Galv. Steel	.41

CRAPO UNDER ARM SUPPORT

This unique support for plastic-coated one-pair parallel telephone wire is designed to straddle a standard 3 1/4" x 4 1/4" cross-arm. Used primarily to add a circuit to existing lines. A short section of plastic tubing usually is used to protect the wire under the cross-arm.

Cat. No.	Under Arm Support For:	Each
064UA134	2/14 AWG (.064") Copper/Steel	\$0.45
080UA134	2/12 AWG (.080") Copper/Steel	.45
083UA134	2/14 BWG (.083") Galv. Steel	.45

CRAPO DEAD-ENDS FOR "C" RURAL WIRE

Designed specifically to hold the rated breaking strength of one-pair parallel rural telephone distribution wire with high density linear polyethylene coating. The dead-end consists of two pieces of tough, springy, corrosion-resistant stainless steel wire formed into hair-pin shaped sections. Each of the four spiraled legs is coated with neoprene to increase friction and reduce the possibility of slippage.

The preformed spirals are oval-shaped to conform to the oval shape of the conductor. The extra length of the dead-end tends to distribute the load over a greater area and reduce stress.

Cat. No.	Dead-Ends For:	Each
DE-064	2/14 AWG (.064") Copper/Steel	\$0.69
DE-080	2/12 AWG (.080") Copper/Steel	.77
DE-083	2/14 BWG (.083") Galv. Steel	.77

AWAC ALUMOWELD-ALUMINUM CONDUCTORS

Combining the best properties of Alumoweld and aluminum wires, AWAC conductors have the highest strength of any aluminum-type conductor. Since the Alumoweld wires also have the corrosion resistance of pure aluminum, they can safely be used in exterior as well as interior positions in the strand to provide a wider range of strengths and conductances. In AWAC all wire surfaces are aluminum and completely compatible with each other, assuring a conductor that is always strong and safe.

AWAC permits you to design longer, stronger spans with savings on poles, accessories, and construction costs.

For information on larger sizes contact your nearest Graybar office.

- ① Choose suspension clamps or pin insulators with grooves that will provide a snug fit. The grooves should preferably be not more than 15 per cent greater than dimension D.
- ② Armor rod clips (V-bolt type) or armor rod clamps are required for holding the ends of the armor rods. On high voltage lines, where corona is a factor, armor rod clamps are preferred. Order two clips or two clamps per set of rods.
- ③ Wrench size "E" with integral die may be used for these sizes.

- ④ Wrench size "D" with integral die may be used for these sizes.
- ⑤ These straight armor rods are recommended for use only on relatively short spans and on pin insulators. For long spans use tapered armor rods as shown.
- ⑥ Armor rods for double supports.
- ⑦ Straight armor rods are recommended alternatively for use on relatively short spans and on pin insulators.

1. Straight and tapered armor rods are shipped in bundles tied in sets.

2. Where double supports are widely spaced, as sometimes occurs when two strings of suspension insulators are used, armor rods of special length may be required. When ordering such special armor rods, specify distance between centers of supports.

Extensive field experience and exposure tests show that if a suitable type joint compound is liberally applied over and round the contact area, copper-to-aluminum electric connections can be made satisfactorily with aluminum clamps without copper bushings. Alnox is especially recommended.

INSTRUCTIONS FOR USING SELECTION CHART

1. Select chart reference number from Tables No. 1, 2 or 3 using as a basis the larger aluminum conductor to be connected.

A connection is chosen by locating the intersection of the line on which the reference number appears and the vertical column above the smaller conductor size to be connected.

Example:

To select a clamp from the chart for connecting No. 1/0 ACSR to No. 4 ACSR, the reference number is 9 from Table 2. Line 9 intersects the column above No. 4 ACSR in the area covered by the Cat. R192 or Cat. 198 clamp.

† Bolts, nuts and washers are aluminum.

INSTALLATION INSTRUCTIONS

1. Especially if the installation is on an old conductor clean the strands with a wire brush or emery cloth.
2. Apply a liberal coating of Alnox Electrical Joint Compound to the conductor and grooves.
3. Bolt the clamp to the conductors. Tighten the nuts "finger-tight" then partially tighten each nut alternately until all are equally torqued.
4. Do not remove the joint compound that squeezes out when the clamp is tightened.

SPECIFICATIONS FOR ORDERING

When ordering specify the size, stranding, and material of both conductors.

When one groove for copper conductor is specified, that groove will be bushed with copper unless otherwise ordered.

In choosing a parallel groove clamp for connecting two different sizes of conductor, determine the clamp required for each size of conductor. Order the larger of the two clamps indicated.

Recommended tightening torque for aluminum bolts with No. 205 Alumilite finish and No-Ox-Id coated, for conductor accessories.

Bolt diameter, inch	Torque, ft-lb	Bolt diameter, inch	Torque, ft-lb
3/8	13	5/8	40
1/2	25	3/4	60

‡ Extensive field experience and exposure tests show that if a suitable grease type joint compound is liberally applied over and around the contact area, copper-to-aluminum electric connections can be made satisfactorily with aluminum clamps without copper bushings.

CHANCE EXTRUDED PARALLEL GROOVE CLAMPS

SPG105

SPG130

SPG135

A high performance line of extruded aluminum parallel groove clamps with excellent electrical and mechanical properties for use on both distribution and heavy service connections.

Chance SPG Clamps consist of two high strength, corrosion-resistant, aluminum alloy extrusions, a flat washer

and a bolt. The bolt and washer are available in galvanized steel or aluminum alloy.

Resilient bolt-retaining feature eliminates lock washer and enables clamps to be removed and reinstalled at other locations.

V-GROOVE CLEANING BRUSH

Have stiff steel brushes that provide excellent two-sided, pressure cleaning action. As brushes wear they can be rotated by loosening the anchor screws so that unused bristles will come in contact with the conductor. Can be fitted for attachment to universal poles.

Cat. No.	Description	Each
M1889	Hand Brush	\$ 5.30
M4455-63	Universal V-Groove Brush	5.00

SAFETY TUBE CLEANING BRUSH

Enables linemen to clean the entire circumference of the conductor with no more than two hand or tool positions. The same brush with a universal adapter can be used with a universal tool on higher voltages.

Cat. No.	Description	Each
M4455-92	Universal Safety	\$ 6.75
M4455-93	Safety Hand	3.75

When a damper is required with a clamp for mounting on larger than normal conductor diameter, such as the case where proper damper location requires placement over armor rods, the proper catalog number may still be determined from table.

- 1) Select the applicable damper size from the basic range table as shown—first four digits.
- 2) Select the clamp size related to the larger conductor diameter—final digit or digits.

e.g., Normal damper for 4/0 ACSR (diameter .563")
—Cat. 1703-4

Damper for 4/0 ACSR mounted over preformed armor rods (diameter of .927")—Cat. 1703-8.

BOLTED TEE CONNECTOR

SPECIFICATIONS FOR ORDERING

State catalog number and also the size, stranding and material of conductor for which dimensions "A" and "B" are to be furnished. Groove specified for copper conductor will be copper bushed unless otherwise ordered.

INSTALLATION INSTRUCTIONS

- Especially if installation is to be made on old conductor, clean the strands with a wire brush or emery cloth.
- Coat the grooves of the clamp and the conductor liberally with Alnox.
- Bolt the tap clamp to the conductors. Tighten the nuts "finger-tight," then partially tighten each nut alternately until all are equally torqued.

INDIANA PREFORMED ARMOR RODS

The simplest, most economical method for effectively reinforcing and protecting overhead conductors and static wire at supports is made possible by mechanically accurate IS&W Preformed Armor Rods.

By forming a tight-fitting sheath around the conductors or static wire Preformed Armor Rods eliminate chafing and abrasion, substantially reduce the concentration of bending stresses at the points of support and minimize the possibility of conductor fatigue failure. Completely armoring the conductor against wear at these vulnerable points with IS&W Preformed Armor Rods prolong conductor life. They also protect conductors against arcing and flashovers, help eliminate service interruptions and lower repair costs.

IS&W Preformed Armor rods are made of round, spring-type metals such as aluminum alloy, galvanized steel, copper/steel and bronze. They are manufactured to exacting specifications and are produced to prescribed length and pitch to exactly fit the conductor or static wire to which they are to be applied. Each rod is formed into a spiral with an inside diameter smaller than the conductor so that it grips tightly throughout the conductor's entire life.

The rods, when applied in sets, provide a snug-fitting, compact cylindrical armor over the conductor or static wire and greater clamping area to grip the conductor along the entire rod length. This means increased holding power against imbalanced tensions.

IS&W Preformed Armor Rods are preferred by linemen because they can be applied quickly and easily by hand to cold lines. With a rotary motion of the hands, the rods are "wrapped" along the conductor in both directions. All IS&W Rods are center-marked for easy application. No tools, clamps or clips are required.

PACKAGING

IS&W Preformed Armor Rods are:
 1. Prepacked in marked sets with either "Twist-Ems" or adhesive tape, or
 2. Bulk packed for lower cost purchasing.
 Two packages are available: heavy cardboard cartons with color coded labels for easy warehousing, or water-resistant paper for construction site delivery.

With IS&W "Twist-Ems," a set of Preformed Armor Rods can be worked just as easily with gloves as bare handed. Do not even untwist — just push the paper-wire tie off the end of the set to make each rod ready for installation.

Complete specifications and prices covering the various types and sizes of Preformed Armor Rods are available upon request.

INDIANA PREFORMED LINE-GUARDS

Formed from aluminum alloy wire of smaller diameter and shorter in length than regular Preformed Armor Rods, Line-Guards are designed for shorter spans where working tensions are comparatively low. They provide conductors with effective and economical protection against damaging abrasion and wear at support points. They are generally used in urban distribution systems where problems of vibration are secondary and where insulated wires pass through trees. IS&W Preformed Line-Guards are also available for ACSR and all-aluminum conductors.

**COPPERWELD
TELEPHONE LINE WIRE**

Use Copperweld Line Wire wherever you need to combine strength with good conductance. It is non-rusting, light in weight, easy to handle and economical to string.

Copperweld's voice transmission characteristics are better than any other high-strength conductor. The permanent high strength of Copperweld permits safer long spans that stand up under severe weather conditions.

For long distance and carrier current lines, the recommended sizes are .128-in. 40% conductivity High Strength and .104-in. 40% conductivity High Strength. The choice usually depends on electrical requirements. For short subscriber loops, the .080-in. 30% conductivity Extra High Strength Copperweld Wire has adequate conductance and is most economical. For longer loops where the electrical requirements are more demanding, use .104-in. 40% or .080-in. 40% High Strength Copperweld.

Diameter In.	Breaking Strength Lbs.	Weight		DC Resistance Ohms Per 1000 Ft. at 68° F.	Cross Section Sq. In.
		Lbs. Per 1000 Ft.	Lbs. Per Mile		
H. S. 40% Conductivity

E. H. S. 30% Conductivity					
.080	900	17.76	93.77	5.509	.005027

**COPPERWELD
GRIP-FLEX INSULATOR TIES**

Use Copperweld Grip-Flex Ties wherever Copperweld line wires are being tied to pin-type insulators. This preformed tie assures uniformity of construction—reinforces the conductor over the entire length of the tie and prevents chafing of conductors. It's strong, non-rusting, simple in design, easy and inexpensive to apply. When ordering specify the size of the line conductor. Each tie consists of one preformed Copperweld Reinforcing Wire plus a length of straightened, annealed Copperweld Binding Wire sufficient for making a pigtail type of binding on any standard type of side groove insulator.

Complete Grip-Flex Tie packed in bundles of 100.

No.	Approx. Weight Per 100 Ties	Line Wire Size, In.
GFC-78	14 Lbs.	.128
GFC-910	8 Lbs.	.104
GFC-1012	7 Lbs.	.080

**ALUMOWELD
TELEPHONE LINE WIRE**

Alumoweld's low initial cost and high tensile strength (almost 200,000 psi) make it an ideal choice for rural telephone lines. The rugged strength of Alumoweld permits use of extra-long spans for economical construction, while its thick aluminum cladding (10% of the wire's radius) provides permanent protection against corrosion and excellent transmission qualities. In fact, at carrier frequencies, Alumoweld's electrical properties are equal to or better than those of solid aluminum wire.

**Table of Characteristics
Alumoweld Wire**

Size Awg	Nominal Dia. Inch	Breaking Load (Lbs.) (Minimum)	Lbs. per 1000 Ft.	Lbs. per Mile	Resistance Ohms per 1000 Ft. at 68° F.	Cross-Section	
						Cir. Mils	Sq. In.
8	.1285	2,529	37.03	195.6	3.089	16510	.01297
10	.1019	1,590	23.29	123.0	4.912	10380	.008155
11	.0907	1,261	18.47	97.52	6.194	8230	.00646

Coefficient of linear expansion: .0000072 per degree Fahrenheit.
Modulus of Elasticity: 23,500,000 lbs. per square inch.

Weight of Coils or Reels

The wire shall be shipped in coils or on reels, continuous for their entire length, with no joints or splices therein.

Shipments shall be made up of coils or reels with weights as follows:

Nominal Weight	90% or more of total of coils or reels in a shipment will have weights within the range:		10% or less of total coils or reels in a shipment may have a minimum weight as follows*
	Lbs.	Minimum Lbs.	Maximum Lbs.
300	260	340	200
200	175	250	125

*In small shipments of less than 10 coils or reels, one coil or reel may be in this category. The nominal weight of coils or reels desired shall be specified on the purchase order.

Packing and Marking

Each coil shall be thoroughly wrapped with strong paper, so as to be protected against damage in ordinary handling and transportation. Each coil shall have a tag attached showing type and size of wire, the weight of the coil, the name and address of the purchaser and purchaser's order number.

Price on Application

BURNDY ELECTRICAL CONNECTORS

TAPIT® TYPE UC-R

Aluminum parallel groove clamp for all combinations of copper, aluminum, and ACSR. Each Tapit accommodates a wide range of aluminum, Copper, ACSR, ACSR over armor rod, Copperweld, Amerductor, and steel conductors in any combination.

Stripsealed Tapits are also available, filled with Penetrox A at the factory and sealed with special plastic coating. They may be ordered by adding suffix "S" to the catalog numbers listed below.

Cat. No.	Groove A		Groove B		Cat. No.

**Maximum recommended combinations: 4/0 aluminum or ACSR RUN—#2 Str. copper TAP.

TAPIT TYPE UCG-RS

For All Combinations of Copper, Aluminum, ACSR, AAAC and 5005 Within Diameter Range

These parallel groove clamps for overhead line and service connections are factory-filled with Penetrox A and Stripsealed.

Each Tapit accommodates a wide range of aluminum, copper, ACSR, ACSR over armor rod, copperweld, Amerductor, and steel conductors in any combination. High strength, high conductivity, non-copper bearing aluminum alloy of which Tapits are made eliminates stress corrosion.

Also available without Stripseal—to order, omit "S" from the Catalog Number.

CABELOK CRIMPIT® TYPES YP-U AND YPC-U

For Combinations of Copper, Aluminum or ACSR

For copper, aluminum and ACSR—Range-taking design reduces number of sizes necessary for all conductor combinations. Movable spacer locks connector on conductor. Side entrance facilitates hot-line installations. No tabs to bend. Penetrox filled.

UNIVERSAL CRIMPIT® TYPE YPC

Extra wide range universal connector. One die and 4 connectors take run sizes 250-600, and tap sizes 6-400. Wide range made possible by long ram travel of Burndy Hypress tools. Figure "6"-shape separates run and tap wires, and minimizes galvanic corrosion of conductors. Connector can be gripped in tool and slipped over line for easy installation. Prefilled with Penetrox joint compound and Stripsealed.

†Will accommodate compresto ACSR.

‡Will accommodate compresto aluminum.

5/8" LINKIT® TYPE YSU

Heavy-walled aluminum tubing with solid barrier minimizes galvanic corrosion of conductors. Accommodates neutral strands of Type SE Service Entrance conductor as well as other conductors. Installed with standard tooling. Color coded, Prefilled with Penetrox joint compound and Stripseal.

.840" LINKIT TYPE YSD

Aluminum compression sleeve with solid center barrier. Designed for commercial and heavy residential services. Installed with standard tooling. Prefilled with Penetrox joint compound, and capped.

Price on Application

BURNDY ELECTRICAL CONNECTORS

DEADEND CLAMP CLIPIT TYPE UW-R

High strength aluminum casting with galvanized steel U-bolt, extra long soft aluminum spacer, and caps that confine strands. Holding strength of installations using two Clipit deadends exceeds rated breaking strength of conductor.

Cat. No.	ACSR AAAC	Aluminum	Per 100
UW2R	6-2	6 str.- 2 str.	\$48.30
UW25R	6-1/0	6 str.-2/0 str.	56.40

DEADEND CLAMP TYPES CUW-A-E AND CUW-R-E

High strength aluminum clamp for deadending primary distribution lines. Straight-line design, with hot stick lifting-eye, pulling-eye, and captured, angle U-bolts, facilitates

installation and maintenance, especially on hot-line work. Snub-pocket, V-shaped, range-taking conductor groove and galvanized steel U-bolts provide high holding strength.

Cat. No.	Aluminum	ACSR, AAAC, 5005	Per 100

FLAT BAR AND TUBULAR BUS FITTINGS

Illustrated on this and the following page are typical Burndy bus connectors available through Graybar. Connectors for flat, square, angle or tubular bus, for cable and for connections between the various conductor types can be furnished to meet your particular installation requirements. For complete information on these and other types, contact your nearest Graybar office or warehouse.

FLAT BAR FITTINGS

Bar clamps distribute pressure over a wide area. Available for flat bars, or for flat bar to cable, tube or special shapes. Connectors for taps from multiple bars also available.

Either the 4-bolt and cap, or special clamping eye and cap elements are recommended for joining cables to flat bar.

Slots between clamping bolts on many of the connectors shown here cause multiple areas of high-pressure contact, thus assuring minimum contact resistance and minimum heat losses.

Price on Application

BURNDY ELECTRICAL CONNECTORS**FULL-TENSION SLEEVE**

Full tension sleeves for splicing copper, aluminum, ACSR and aluminum alloy cable. Designed to develop full rated breaking strength of the conductor. Order type YDS for copper, YDS-R for ACSR, YDS-A for aluminum. Specify conductor type, size and stranding.

JUMPER SLEEVE

Jumper or loop splice sleeve for copper, aluminum, ACSR and aluminum alloy cable. Designed to withstand jumper loop-tensile and vibration stresses. Order type YCS for copper, YCS-R for ACSR, YCS-A for aluminum. Specify conductor type, size and stranding. Aluminum and ACSR sleeves pre-filled with Penetrox joint compound and sealed.

REPAIR SLEEVE

Repair sleeve for copper, aluminum, ACSR and aluminum alloy cable. Designed to restore conductivity to damaged overhead conductors. Does not restore cables rated breaking strength. Order type YCU, YOU for copper, YCU-R, YOU-R for ACSR, YCU-A, YOU-A for aluminum. Specify conductor type, size and stranding.

JUMPER SLEEVE REDUCER

Jumper sleeve reducer-splice for copper, aluminum, ACSR and aluminum alloy cable. Order type YCR for copper to copper and type YCR-R-G for combinations of copper, aluminum, and ACSR conductors. Type YCR-R-G pre-filled with Penetrox joint compound and sealed. Specify conductor types, sizes and strandings.

COMPRESSION TERMINAL

Compression terminal for joining copper, aluminum, ACSR and aluminum alloy conductors to copper or aluminum equipment pads. Order type YCA for copper, YCA-A for aluminum and YCA-R for ACSR. Types YCA-A and YCA-R pre-filled with Penetrox joint compound and sealed. Specify conductor type, size and stranding.

COMPRESSION DEADEND TYPE YDW-R

Full-tension compression deadend ACSR conductor. Designed to develop the full rated breaking strength of the conductor. Available with single or double tongue. Assembly consists of aluminum body, threaded steel insert with steel sleeve and clevis pin. Filler-hole and plug provide for injection of Penetrox joint compound prior to compression of the aluminum outer body.

DISCONNECTABLE T-TAP TYPE YTA-R-2N

Aluminum primary T-tap connector with slotted tap pad designed for easy disconnecting of tap connector. Tap pad accommodates compression terminals Types YKA-R-2N and YKA-A-2N, and has positioning socket for proper alignment. On sizes larger than 336.4 ACSR, the YTA-R-2N run element has two-piece interlocking key with lifting eye that simplifies hot line installations. Catalog number does not include mating terminal.

**DISCONNECTABLE TERMINAL TYPES
YKA-R-2N AND YKA-A-2N**

Aluminum compression terminal with fixed hardware and positioning pin for making disconnectable tap or jumper connections. Used with slotted YTA-R-2N T-tap or YSA-R-2N terminal. Supplied with aluminum bolts and washer-face, self-locking nuts. Prefilled with Penetrox joint compound and capped.

**DISCONNECTABLE TERMINAL TYPES
YSA-R-2N AND YSA-WA-2N**

Aluminum compression terminal with slotted pad and positioning socket for making disconnectable tap or jumper connections. Used with YKA-R-2N fixed hardware terminal. Prefilled with Penetrox joint compound and capped.

Price on Application

BURNDY COMPRESSION TOOLS

Y10M HYTOOL®

Light, powerful and easy to use, this Hytool cuts wire, strips insulation, compresses Hydent connections on wire sizes #22 thru #10. Tool also closes insulation grips, and has effective bolt and thread-chaser. Weight: 10½ oz., Length: 9¾".

MY29-3 HYTOOL

Sturdy steel, universal, hand-operated Hytool for installing Hydent connectors. Accommodates range of copper conductor #8 str. to 250 Mem. Aluminum conductor range accommodates #8 Str. to 4/0 Str. No removable dies required. Indexing plate located on side of tool is used for setting adjustable nest die to correct position for each assembly. Weight: 6½ lbs.

Y34A HYPRESS®

Portable, manually operated, neoprene insulated, hydraulic Hypress for installing connectors on #6 Str. through 500 Mem. copper cable. Develops 18,000 lbs. Depth of indentation automatically controlled. Supplied with metal carrying case. Separate nest die required to install each conductor size. Dies must be ordered separately. Weight: 9 lbs. Length: 18¾".

OH25 ONE-HAND TOOL

For installing INSULINK and LINKIT connector — only one crimp per end. Develops 5500 lbs. of force, with a series of easy ratchet controlled strokes. Depth of indent automatically controlled. Weight 2½ lbs. Length 12". Leather holster available — order separately Cat. #4583.

MD6-8 HYTOOL

Standard HYTOOL with "fixed" 0 and D3 grooves. Installs all CABELOK CRIMPIT connectors without changing dies, with W-BG die insert INSULINK and LINKIT connectors with one squeeze per end. Installs tension sleeves thru 4/0 with replaceable die inserts.

Y35 HYPRESS

Hook-head hydraulic Hypress for overhead line and industrial requirements. Develops over 12 tons of force, weighs 13 lbs., body completely covered with molded neoprene insulation. Accommodates a full range of connectors from #8 solid aluminum and copper through 477 ACSR. Crimp depth is controlled by butting of dies and overload valve.

COMPRESSION HEADS

Y35L

Y45L

Y48BH

Y60BH

Four compression heads capable of installing industrial, service or transmission type connectors. Each head requires a separate hydraulic pump. Units operated by air, electricity, hydraulic or gasoline are available for these heads.

Type Y35L, Y35BH12 ton capacity
Type Y45L, Y4515 ton capacity
Type Y48BH, Y486RBH40 ton capacity
Type Y60BH60 ton capacity

ELECTRICALLY DRIVEN PUMP

Y-AC-2H

Y-EP

The electrically driven pump is available as a light weight automatic portable (Y-AC-2H) or a heavy duty (Y-EP). The Y-AC-2H features the unique "HOLD", "CRIMP" and "OFF" remote control system. "HOLD" advances ram to gently grip the connector, "CRIMP" completes cycle and shuts pump off. Y-EP has remote control for off/on operation. Both types available with 6,000, 8,800, or 10,000 PSI settings.

AIR HYDRAULIC PUMP

Y-NP

Y-GP

Type Y-NP air hydraulic pump particularly suited for use in areas where an air compressor capable of producing 150 psi at 15 C.F.M. is available. Type Y-GP gasoline driven pump is ideal for operation in remote areas where external power sources are not available. Type Y-FP foot pump is a light weight, portable, economical pump ideally suited where an automatic unit is not required.

Price on Application

PREFORMED

PREFORMED Splices*

PREFORMED Splices for guy and messenger strand provide a fast, simple and economical means of repairing strand or messenger damage plus the assurance of a uniform application every time. No tools required, no guesswork involved and all applications can be checked visually. Will permit the spinner to travel over the splice without adjusting the gates or lifting the spinner over the splice.

They are made of the same material as the strand. Maximum strength and excellent fatigue characteristics result in longer life for strand and messenger.

Galvanized Steel

Catalog No.	Nominal Strand Size & Type	Units Per Carton

**PREFORMED Dead-Ends and
Tangent Supports (C-Rural)**

PREFORMED dead-ends provide a positive and inexpensive way of dead-ending one-pair aerial distribution wire to a drive hook, eye bolt or through-bolt.

Catalog No.	Nominal Conductor Size
NDE-8502	2 No. 14CW
NDE-8503	2 No. 12CW (or .083 steel)

PREFORMED standard loop and elongated loop tangent supports provide a fast, easy way to hang and separate two one-pair aerial wires on a common drive hook. The one-piece crossarm tangent support cradles and protects the wires against contact with the crossarm without the use of separate protective material. For use on long spans for greater ground clearance, and on poles where climbing clearance is needed.

PREFORMED Drop-Wire Dead-Ends

Drop-Wire dead ends are made of stainless steel with a neoprene coating which cushions and effectively protects the conductor insulation. They provide a low radial pressure over the entire holding area which prevents slippage and eliminates a cause of resagging. Drop-Wire dead ends can be used with reinforced or non-reinforced drop wire. The multiple-wire loop gives extra strength and prevents fatigue failure. These Drop-Wire dead-ends can be removed and reused.

Stainless Steel—Neoprene Coated

Catalog No.	Overall Length
NDE-9500	13"
NDE-9501	14"

**For Messenger or Guy Strand
GUY-GRIP dead ends**

GUY-GRIP dead-ends installed at the top, breaker, or anchor provide a modern method for securing guy strands. Neat in appearance, free from bolts or high-stress holding devices. Applied in seconds without the use of tools.

The assembly is complete and permanent, assures positive grip under the most extreme conditions. GUY-GRIP dead-ends are made of the same material as the strand to which they are applied and hold the full-rated breaking strength of the strand.

Galvanized Steel

PREFORMED Dead-Ends and Splices

For Rural Distribution Wire

(FIGURE 8 OR REGULAR)

PREFORMED Dead-Ends permit economical dead-ending of stripped messenger without cutting the messenger wire. They eliminate concentrated stress points which can cause premature fatigue failure. Quickly and easily applied by hand, they hold the full rated breaking strength of the messenger.

Catalog Number	Wire Gauge	Diam.	Length (Inches)	Color Code
GDE-2501	12BWG	.109"	12	Black
GDE-2502	11BWG	.120"	13	Green
GDE-2503	10BWG	.134"	14	Orange
GDE-2504	9BWG	.148"	14	Blue

PREFORMED Splices offer a fast, economical way to join sections of messenger of B-Rural wire. They are applied by hand and will hold the full RBS of the messenger.

Catalog Number	Wire Gauge	Diam.	Length (Inches)	Color Code
GLS-3101	12BWG	.109"	12	Black
GLS-3102	11BWG	.120"	14	Green
GLS-3103	10BWG	.134"	14	Orange
GLS-3104	9BWG	.148"	17	Blue

When ordering, show complete catalog number (e.g., GLS109) and specify wire size.

**PREFORMED Dead-Ends
For False Dead-Ending**

There is no need to cut messenger... no strand to thread... no bolts to tighten or clamps to slip... no jaws to seat, and no concentration of stresses. Neat in appearance, they are easily applied without tools and are designed to hold the full RBS of extra high strength strand.

RELIABLE STRANDWISE FEED-THRU DEADENDS

Universal Strandwise is for those 7-wire and 3-wire strands and solid wires identified by name brands, or coatings, or types of steel, and within diameter ranges listed.

Alumoweld — Galvanized — Bethalume —
Aluminized — Corrosion Resistant (CR) —
Stainless Steel

Yoke and Cartridge—Heat treated aluminum alloy.

Jaws—Case hardened, plated steel alloy.

Solid Bails—Stainless steel, Type 304.

All-Purpose Flexible Bails—Class C coated extra high strength, short-lay steel strand. The lobes are stainless steel compressed on the bail ends.

RELIABLE SQUEEZ DEAD-ENDS

Consists of a Squeeze splicing with a factory assembly loop (bail) in one end. The other end is for the line wire and only the line wire is installed by the lineman. The loop, or bail, is a specially prepared, high strength, D-shaped stainless steel wire which is factory assembled to one-half of the sleeve. Thus you have a pre-fabricated loop dead-end, ready for insulator or other dead-end fixture.

RELIABLE

TENSION SPLICES

Tension Splices transmit current from line conductor to line conductor via the chucks and tubes that comprise Reliable's mechanical compression splices. The electrical connections, with minimum required tension, will show a resistance through the length of the splice less than an equal length of the conductor.

Pressures, set up by tension, wedge the tapered chucks in the controlled tapers of the tube and make a permanent electrical connection. Only momentary tension is necessary.

Splices are made for ACSR, All-Aluminum (AAC), Aluminum Alloy (AAAC), Copper, Type A Copperweld, and Amerductor line conductors.

"55" SERIES TENSION SPLICES

For Solid and Stranded Conductors — All-Aluminum, Aluminum Alloy (AAAC) and Copper

These Splices are designed to prevent improper installation of stranded conductor. These splices test to values that always exceed 90% of the book rated strength of any of the conductors for which they are listed.

These are mechanical-compression splices and require minimum tension to set the tapered chucks into the conductor and in the tapered tube ends. Tension representing a minimum of 15% of the rated strength of the conductor is required to assure a permanent low resistance electrical connection. This can be an induced momentary tension if sag tensions are light.

The "55" Series has no release slots. All working parts and surfaces are protected with an inhibitor lubrication. Splices are enclosed in individually sealed plastic containers.

7650 SERIES TENSION SPLICES FOR ACSR AND AAAC

The patented 7650 Series Tension Splices are designed for standard ACSR, ACSR "Comprosto", EC Grade All American (AAC), All Aluminum Comprosto conductors and All Aluminum Alloy (AAAC). A patented strand guide is assembled to all of the 7650 Series Splices to guide the conductor into the pilot cup. Chuck and tube are aluminum alloy. Strand guide is plastic.

RELIABLE FEED-THRU DEADENDS

For ACSR and AAAC

The Series No. 7651 through No. 7658 Deadends are mechanical-compression type deadends. Both the chuck and tube have long shallow tapers. The conductor is held by the embossed teeth on the chuck. As tension is applied, the tapers produce great compressive forces on the aluminum strands, which in turn compress on and securely hold the core wire. There is no need to bare or otherwise separately prepare the core wire. A strand guide, which greatly eases conductor insertion, is factory installed at the end of the tube. A metal pilot cup in the base of the strand guide caps the conductor end as the conductor is inserted. If the strand guide admits the conductor, it will always enter the pilot cup. The continuing thrust sends the capped conductor on through the chuck and tube into the clevis or bail area. Any desired length of conductor can be fed through to serve as a jumper.

For All-Aluminum and Aluminum Alloy Conductors

Reliable deadends are made for ACSR, AAC, AAAC, "Compresto", Copper, Copperweld and some composite conductors. Component materials are wholly compatible with the types of conductors. There is an assortment of clevis and bail types and designs to suit the various requirements for attachment and suspension.

SERVICE WEDGE CLAMPS

Support and hold the bare neutral of Triplex type service drops. Each size will test to the values listed under "Typical strength column" in

the charts. These clamps are available in several sizes to handle the most widely used sizes of service conductors.

For Bare Neutral Service Drops Stainless Bail

ACSR	Neutral		Copper		Range

*Hex head screw not slotted.

DISTRIBUTION CLAMPS

For Aluminum to Copper and Aluminum to Aluminum

These clamps are used to make tap or distribution connections on aluminum conductors with either aluminum or copper conductors. The design of the clamp, based on the mass anode principle reduces galvanic corrosion to insignificant proportions. This eliminates the need for copper liners for copper to aluminum connections.

The range of conductor sizes and types is clearly stamped on the body of each clamp. The hex head square shank galvanized steel bolts permit tightening one wrench against another. The square shank also allows one wrench application where desirable. This type bolt affords a gripping surface for hot line application and makes possible the use of a socket stick for tightening.

Factory lube-coated bolts assure constant pressures for given torques. Clamps are available with factory applied No-Melt grease. When clamps with this particular grease are used on clean conductors, the best and most permanent connection is assured. The No-Melt grease has high film strength and will not break down with temperature and age. Greased clamps are individually packaged in plastic bags. Both grooves contain a measured amount of No-Melt grease.

Cat. No.	Conductor Range				Per 100
	Solid, Strand or ACSR		Tap		
	Max.	Min.	Max.	Min.	
Single Bolt					
6052	1/0	8	1/0	8	\$48.65

RELIABLE

TWO-BOLT CONNECTORS

These connectors have a cast aluminum-bronze body and bridge with silicone-bronze machine bolts. Connectors assemble to conductors in one piece. The bridge swings open to admit conductors. One bolt is staked and the second bolt is held captive by a neoprene retaining ring. Both bolts have pilot points for easy thread engagement.

All connectors are clearly marked to show range of conductor sizes. The clean threads, with a minimum of friction, develop pressures necessary to make an efficient electrical connection.

RELIABLE

GALVANIZED STEEL GROUND ROD CLAMP

Designed for use on galvanized steel ground rods. The clamp consists of two galvanized malleable iron castings which are bolted together in a cantilever arrangement. The clamp can be used on 3/8" and 1/2" diameter rods and provides a large surface contact with the ground rod.

The ground wire connection is made by inserting a No. 4 or No. 6 ground wire approximately 9/16" into the hole provided for that purpose. The ground wire is locked into the hole in the clamp with a locking set screw.

CHANCE

UNICLAMP CONNECTORS

ALUMINUM UNICLAMP

COPPER UNICLAMP

Made in cadmium-coated and uncoated aluminum-bodied and copper-alloy bodied styles.

One-piece construction means there are no loose parts to drop. Castings swivel independently for easy installations.

For connecting large size copper or aluminum wires from No. 1/0 to 1000 MCM.

Series 500 are available with contact surfaces pre-coated with z.i.n. 100 Electrical Contact Aid. Each clamp is sealed in a transparent plastic bag to protect it from damage and foreign matter. Linemen can remove clamp without removing their gloves by snipping end of bag with sidecutters.

Standard box is 100.

"B", "C", "D" and "J" in catalog number indicates die groove.

TENSION TYPE COMPRESSION SLEEVES

Compression-type sleeves pressed in a compression tool make the surest splices for communication wires. This combination is time proven for both physical and electrical requirements.

RELIABLE

COPPER SPLIT BOLT CONNECTORS

For Copper and Copperweld Conductors

All connectors having the letter "F" in the catalog number are cold-forged to produce high strength connectors that provide continuous dependable pressure on conductors and have a reserve strength for abnormal conditions. The cold-forging produces a close-grained, formed structure free of sharp edges and with highly accurately embossed threads. Well designed pilots simplify the positioning of the nut in relation to the thread for easy reassembly. Deviation from a true hex on the forged head provides two generous flats for greater leverage when tightening the connectors.

Basic Connectors Without Accessories
(Cat. No.'s. 2F, 4F, 6F and 8F will take 3 Solid Wires)

Cat. No.	Max. Wire Size		Copper-weld	Per 100

T & B UTILITY PRODUCTS

SHURE SPLICER

T&B Shure Splicer Connectors meet or exceed Class A-2 requirements of EEL-NEMA Standard TDJ-162, when properly installed on aluminum or aluminum to copper connectors. A solid center barrier provides for quick and easy wire positioning, proper distribution of inhibitor

around the wire, and current equalization on stranded conductors. Self-insulated Shure Splicer Connectors have an extruded nylon cover with a dielectric strength exceeding service drop cable insulation.

For Service Entrance Splicing

H TYPE COMPRESSION TAPS

With Fillerlok™

T&B "H" type taps are used for service drop, secondary or primary tap and grounding installations on all combinations of aluminum to aluminum or aluminum to copper conductors. (Cat.

No. UB214 is designed for making multiple street lighting connections.) They are also used as dead end clamps on aluminum, ACSR or aluminum alloy conductors.

Because of the extra deep groove and fillerlok design, each tap accepts a wide range of conductor sizes so that fewer taps are needed to cover a specific range. For example, the OB102 accommodates 75% of the wire combinations in today's service drop connections. The Fillerlok device, which is an integral part of the connection, acts as a metal filler and permanently locks itself in place upon compression. Properly installed these connectors exceed Class A requirements of EEL-NEMA Standard TDJ-162.

PIN TERMINALS

Aluminum Barrel — Tin Plated Copper Pin
T&B Pin Terminals have wide applications in wiring aluminum and ACSR to copper alloy equipment clamps, designed for use with copper. Cold flow problems of aluminum in copper clamps are eliminated. Heavy knurling on pin under factory compression secures pin to aluminum body. After installation of aluminum conductor in the terminal barrel, the pin is installed in the equipment clamp.

Price on Application

CHANCE TYPE "D" DISTRIBUTION SWITCH

3-Pole, Single Throw, 600 AMP — 7.8, 15 and 27 KV

The Chance Type "D" Distribution Level Switch is the latest advance in applying the "Load Management" concept to distribution switching. The availability of the Saf-T-Gap expulsion type interrupter permits these gang-operated switches to change or to sectionalize circuits carrying currents up to 600 amperes to provide the maximum continuity of service to power users.

This sectionalizing switch is designed to interrupt load currents a maximum design recovery voltages, to interrupt transformer magnetizing currents, line charging currents and capacitor bank currents.

The Saf-T-Gap interrupter can be purchased as a part of the original switch or can be added later when the specific installation might require Load Management. Catalog numbers include the interrupter.

This side-break switch is available in 7.8, 15 and 27 KV ratings with a continuous current capacity of 600 amperes. The use of aluminum in the bases, controls and insulator fittings makes it a lightweight switch that is easy to install.

The switch is furnished complete with interphase, vertical control shafts, handle, lock plate, guide plate and 2 1/4-inch bolt circle Sky-Glaze post insulators. Standard NEMA 2-hole terminal pads come with the switch and without terminals or attachment hardware.

CHANCE TYPE F2 CUTOUTS

The modernized Chance F2 cutout features interchangeability of 100 and 200 amp fuseholders; this is an important factor in considering tomorrow's increasing loads. A single mounting used in each voltage rating takes either a 100 amp or 200 amp fuseholder, or a 300 amp disconnect blade.

The F2 employs a high speed link ejector, high pressure contacts and a small bore fuseholder with an expendable disc-type cap in the higher interrupting ratings. Fuseholders accept any standard make or type of universal fuse link and assure that the circuit will be cleared according to the time-current characteristics of the link.

Chance cutouts are available in a sky-blending blue-grey insulator, "Sky-Glaze," to help improve overhead line appearance. Research, testing and field-use have proven the consistency of the Chance F2 cutout design in meeting or exceeding all industry standards for interrupting performance.

**CHANCE HOOKSTICK
DISCONNECTING SWITCHES**

Single-Pole, Single-Throw **TYPE BT**
400 — 600 — 1200 AMP — Full NEMA-Rated

Full substation and line applications where maximum mechanical and electrical reliability are required.

Rigid blade design and self-aligning contacts mean positive closing even when operated with heavy side thrusts.

Feature blade latching, pryout opening and centered contact pressure. Switches through 23 KV have high pressure silver-to-copper contacts; 34.5 KV has silver-to-silver contacts.

Channeled base furnished as standard; flanged base also available when specified.

Specify size and type of conductor on order.

*With standard NEMA cap and pin insulators. When specified, station post insulators will be furnished at no extra cost; add prefix "S" to catalog number.

TYPE BTL

200 Amp — NEMA — Insulated

An economical unit for light-load circuits where full NEMA insulation is required. Has "big switch" features for ease and reliability of operation. Rigid truss blade resists side thrusts; has 90° stop. Positive latch holds blade in closed position; opens with pryout action.

Multi-finger contacts are self-wiping; have phosphor bronze back-up springs. Galvanized flanged base has pull-off eyes for dead-ending direct to switch. General purpose terminals take No. 6 to 4/0 copper or No. 6 to 3/0 ACSR.

Crossarm hanger No. 92851 also available, \$2.00 each.

*With cap and pin insulators. When specified, station post insulators will be furnished at no extra cost; add prefix "S" to catalog number.

**CHANCE TYPE M2L
DISTRIBUTION HOOKSTICK SWITCH**

Single-Pole, Single Throw, 600 AMP — 7.8, 15, 27 KV

The Chance Type "M2L" hookstick switch, equipped with the Saf-T-Gap expulsion type interrupter, is a highly reliable, long-life method of changing or sectionalizing circuits carrying currents up to 600 amperes, and is available in 7.8, 15 and 27 KV ratings.

Its application is to interrupt load currents at the maximum design recovery voltage across the switch as well as interrupting transformer magnetizing and line charging currents.

The switch is equipped with a socket so that the Saf-T-Gap interrupter can be removed or installed with a hookstick. The M2L switch can be purchased without the interrupter and added later when the installation may require Load Management. Post insulators are 2¼-inch bolt circle and have a blending "Sky-Glaze" to give a clean appearance; and installed for either underhung or vertical mounting. Aluminum base and insulator fittings make the Type M2L a lightweight switch that is easy to install. Comes with Standard NEMA 2-hole terminal pads, and without terminals or attachment hardware.

G & W POTHEADS

Single Conductor

CAPNUT POTHEADS

Capnut potheads are applicable to all solid type cable terminations, and are available for either single or multi-conductor, indoor or outdoor application. Interchangeable aerial lugs, hoodnut-connector assemblies, porcelain, bodies and cable entrance fittings may be assembled into various combinations to accommodate different type and size cables. Adequate safety levels are provided by establishing and maintaining safe creepage and clearance distances.

ENTRANCE FITTINGS

Wiping Sleeve "WS"

Inverted Wiping Sleeve "WSV"

Stuffing Box "RS"

Stuffing Box "RSF"

Stuffing Box "DP"

Interchangeable cable entrance fittings, conduit couplings, and armor clamps are available according to the individual requirements. There are two basic types of entrance fittings; a wiping sleeve or stuffing box. The wiping sleeve is used for a wiped joint to lead sheathed cables and the stuffing box is used for a compression seal to lead or non-lead sheathed cables.

Price on Application

GENERAL ELECTRIC TYPE HR AUTOMATIC CIRCUIT RECLOSERS

2,400-14,000 VOLTS (LINE-TO-LINE), 60 CYCLES—SINGLE- AND THREE-PHASE

These reclosers provide over-current protection for rural and suburban distribution systems. They are designed for dependable year-round co-ordination between reclosers in series; and between reclosers and sectionalizing fuses, branch fuses, and external or internal transformer fuses.

The rating of the recloser to be used is based primarily on normal load and maximum short-circuit current at the point of application.

The continuous current rating of the recloser should at least equal the normal load current. It is preferable to select a rating approximately 1/3 higher than the load current to allow for future load growth. Reclosers

have no overload rating and should not be applied beyond their continuous current rating.

Reclosers are available with different time-delay operating characteristics, providing a choice for "hold-closed" applications or for co-ordinating with reclosers of other manufacture.

LIGHTNING PROTECTION OF RECLOSERS

Protection is required to limit to safe values voltage surges caused by lightning. Requirements are similar to those for distribution transformers on the same system.

It is preferable to provide complete protection by installing arresters on both sides of a recloser. One additional arrester is an especially good investment whenever the recloser serves a sizeable number of consumers.

The arresters should be of the valve type which permits no sizeable 60-cycle follow-up current after a lightning surge. This will avoid unnecessary operations of the reclosers and needless blowing of fuses.

* Recloser Cat. No. does not include special mounting material; add from Table 3.
 † Single-shot Lockout may be added by adding the suffix "SS" to the catalog number and increasing the price \$6.60 net per phase for 14.4-kv, 50- and 100-ampere frame size and \$6.60 net per phase for 14.4-kv 200-ampere and all 23-kv frame sizes.
 § Example: to specify a Type HR recloser, 1-phase, 50 ampere frame,

35-ampere rating with "hold-closed" operation, the catalog number would be HR1-50-35-21HC.
 † In lieu of time delay, Single-phase only.
 ⊕ Maximum interrupting rating at 2400 and 4800 volts is 2800 amperes for 70-ampere continuous-current rating and 3000 amperes for 100-ampere rating.
 Δ Maximum interrupting rating at 2400 and 4800 volts is 6000 amperes.

TABLE 2—TRIPPING SEQUENCES

Sequence Number	Sequence Desired
13	One instantaneous and three time delay.
22	Two instantaneous and two time delay.
31	Three instantaneous and one time delay.
40	Four instantaneous and no time delay.
04	Four time delay.
21HC	Hold-closed operation.

‡ This sequence number is to be added to the basic recloser Cat. No. to designate the desired tripping sequence.

GENERAL ELECTRIC LIGHTNING ARRESTERS

THYRITE® MAGNE-VALVE DISTRIBUTION ARRESTERS

With disconnector

With external gap

For lightning and surge protection of distribution transformers, regulators, capacitors, cables, and other apparatus on distribution circuits. Magne-valve action limits voltage stresses to values far below the apparatus impulse-test levels, and prevents system short circuits or outages as the result of lightning discharges. They are available with either a ground-lead disconnect or an external gap for positive-line lockout protection. Both types come with standard EE1-NEMA mounting bracket.

Arrester Rating (Kv)	With Disconnecter		With External Gap	
	Model No.	Each	Model No.	Each

20	9LA22A01	32.00	9LA21B01	34.00

FORM 28 THYRITE® MAGNE-VALVE DISTRIBUTION-CLASS ARRESTERS

These Form 28 arresters provide the most economical protection for dry-type transformers and small a-c motors and generators. The Form 28 is a directly connected unit, normally furnished with a ground-lead disconnecter. When protecting small a-c rotating machinery, protection capacitors of suitable voltage ratings should also be used. EE1-NEMA brackets are furnished.

Arrester Rating (Kv)	Model No.	Each

20	9L28AHJ201	52.25

MAGNE-VALVE ARRESTERS WITH DURABUTE® OPEN CUTOUTS

Combination units are available with arrester mounted horizontally, for mounting on crossarms with three-phase circuits where space is at a premium, or with arrester mounted vertically, for either crossarm or direct-to-pole installation.

*Fuse not included in price. †Bolts for clamping arrester to transformer are not furnished.

SECONDARY ARRESTERS

Thyrite® and pellet secondary arresters are for the protection of farm, residential, and low-voltage industrial electrical systems, and they safeguard equipment against damage by lightning.

All secondary arresters are low in initial cost, and feature sealed-unit construction for long life.

* Includes EE1-NEMA Standard mounting bracket.
† The use of these 100-amp cutouts as load-break devices is optional.

HEAVY-DUTY ENCLOSED FUSE CUTOUTS

These indicating fuse cutouts are particularly applicable for use on banks of transformers that feed industrial plants, or for sectionalizing heavy feeders. They can be converted to 600-amp disconnect cutouts by replacing the fuseholder door with a disconnect door.

Max Volts, Kv	Current Rating, Amp	Current Interrupting Rating	Model No.	Each

DURABUTE® OPEN DROPOUT FUSE CUTOUTS

Durabute open dropout cutouts represent a major advance, and are notable for their unique triangular design and utilization of two Hy-Bute/60® insulators molded on a glass-fiber epoxy core. They eliminate porcelain breakage, provide 40% lighter weight, 40% improved strike and creep, nontracking insulators, and 95% less leakage current under wet contamination.

PORCELAIN OPEN DROPOUT FUSE CUTOUTS

For overcurrent protection and switching on higher voltage primary distribution systems where exposure of live parts is not objectionable. The hinged fuse holder drops 180 degrees for positive indication of a blown fuse, and to provide maximum electrical clearance between contacts.

GENERAL ELECTRIC CUTOUTS

OIL CUTOUTS

For rack mounting

For metal-enclosed assemblies

G-E oil cutouts (fused switches) provide positive, yet economical, over-current protection and load-break operation in distribution systems. They can be installed in buildings, in manholes, on poles, on unit substations.

Vented cutouts are used in all areas not requiring watertight or explosion-proof equipment.

Sealed cutouts are used only for applications where complete submersion in water is possible or in hazardous areas. They are furnished with expansion chamber, petrolatum, and cable terminations for rubber- or lead-covered cable.

FUSED OIL INTERRUPTER SWITCHES

For indoor or outdoor use where economical load break and high interrupting capabilities are required. Oil cutouts in series with EJO-1 current-limiting power fuses provide economical fuse changeout for high-resistance secondary faults.

Typical applications are hospitals, industrials, schools, shopping centers, and high-rise buildings.

Rating of Oil Contents		Model No.	Each

**GENERAL ELECTRIC
DURABUTE® LOADBREAKER**

The new Durabute Loadbreaker provides the ideal means of breaking load current where and when it is required. It does not break the fuse link, does not require a special switchstick to make it operate; all that is required is a standard switchstick inserted in the fuse-holder eye ring and the standard opening downward pull. The loadbreaker is rated 15 kv, 200 amp for 200 operations. The arc chute is Delrin acetal resin, and the unit is a standard sky-gray color.

**GENERAL ELECTRIC
DURABUTE® SECTIONALIZER**

The new Durabute Sectionalizer is a unique product that utilizes the design of the Durabute cutout frame to hold the "oil-free" sectionalizer. It is a self-contained solenoid coil with a device to count recloser operations, and a dropout trip mechanism. The unit performs the basic sectionalizer function of opening a faulted lateral, preventing loss of a complete feeder.

CHANCE UNDERGROUND PEDESTALS

FIBERGLASS FLUSH-MOUNTED UNITS

This fiberglass pedestal can be installed in a number of different ways to provide a waterproof connection housing for electrical, telephone or CATV underground systems. The strong fiberglass shell makes a neat appearing, completely safe, long life installation that will not rust, and is resistant to the effects of lawn sprinkling, fertilizers, and vehicles. The green color blends with the landscape and is completely impregnated through the outer shell.

The two-piece construction of the basic flush-mounted unit provides a watertight design working on the same principle as a drinking glass immersed upside down in water. The lighter weight polyethylene inner bell is mechanically attached to the lid so that it can be easily removed for access to the service connections.

A similar unit consisting only of the lid and outer shell is also available.

Cat. No.	Description	Wt. Lbs.	Each
CF600	Outer Shell, Inner Bell & Lid	24	\$18.95
CF601	Outer Shell & Lid	22	15.45

CONNECTOR BLOCKS & COVERS

These 6-hole connector blocks can be installed using either an adjustable wrench or 1/2" hex socket wrench. The plastisol cover provides insulation between the blocks within the pedestal.

Cat. No.	Description	Conductor Range	Each
938	Al. Block	#2 to 366.4 MCM	\$ 3.00
941	Cu. Block	#2 to 350 MCM	5.15
939	Connector Cover		1.10
942	Al. Connector Package*	#2 to 366.4 MCM	11.95
943	Cu. Connector Package*	#2 to 350 MCM	18.40

*Includes 3 connector blocks, 2 insulated covers and 4 oz. tube of z.l.n. 100.

FIBERGLASS UPRIGHT MOUNTED UNITS

CF501

CF502

CF500

These fiberglass pedestals are designed for use where above ground installations are practical. The units can be supported by galvanized or stainless steel stakes or by a fiberglass anchoring device which is mounted at right angles to the back plate. The back plate is shaped so that the pedestal can be mounted at the base of a pole to provide a splicing box when taking more than one underground service from overhead lines.

The inside dimensions of the pedestal are 8" x 8".

Three different mounting heights are available for electrical, telephone or CATV installations.

Cat. No.	Description	Wt. Lbs.	Each
CF500	Low Profile, 32" Long	15 1/2	\$14.40
CF501	44" Long	19 1/2	19.40
CF502	Low Profile with 44" Back Plate	17	15.90

OTHER PEDESTAL ACCESSORIES

These accessories for Chance Fiberglass Pedestals provide a number of mounting options.

**COOK ELECTRIC BURIED PLANT
TERMINAL HOUSING**

TYPES CO2, CO3 AND CO5

These Cook Electric buried plant terminal housings are available in three basic sizes to accommodate extremely large as well as small requirements. Rigid above-ground housing makes unauthorized entry difficult. Easy to install and service.

Ground line cover mounts on the back plate by means of studs and bayonet type slots. Upper cover hooks over the top and engages stud on back plate. Retainer screw fastens the upper cover securely to back plate.

Back plate and both upper and ground line covers are fabricated from 14 gauge galvanized steel. An additional top coating of durable green colored vinyl is available if desired.

Interiors provide ample clear space for installing and terminating cable and wire, loading, and grounding.

For pedestal type mountings, two lengths of stakes are available. 58 inches and 72 inches. Fabricated from 10 gauge galvanized steel.

For pole or wall mountings, brackets are provided.

Overall dimensions of three complete units are indicated in the following diagram. The units shown are standard pedestal mounted units. However, the measurements for the housings will also apply for the pole or wall mounted units. Required depth of penetration of the pedestal, below the ground line, is indicated for the three sized units.

COBD2

COBD3

COBD5

Capacities of the new series of buried plant terminal housings are as follows:

Type of Housing	Unprot. Qty. Size	Washer Prot. Qty. Size	Gap Carbon or Gas Prot. Qty. Size	Load Coils or Inductors	Cable Splice Pairs	Gauge
CO2						
CO2-V						
COBD2

INDIANA TELEPHONE TERMINAL HOUSINGS

CABLE TERMINAL HOUSINGS

A complete line of quality engineered Telephone Terminal Housings having capacities for loading, terminating or splicing up to 600 pair cables, is manufactured, for both pole or stake mountings.

Model 18 — Pole or Stake Mounted Housing

FEATURES: Self-opening-closing weatherproof enclosure of hot-dipped galvanized-after-forming steel; tilt-out, in-line, terminal mounting strip with insulated section; 3-position plated ground connector; auxiliary ground bolt location; more than 9" of space between cable clamp and terminal strip for cable pressurization equipment; 2 rubber grommets near top of back channel for aerial service drop wires.

CAPACITY: Large interior space accommodations for up to 25 pairs of splicing; up to 10 pairs of loading; up to 18 pairs of termination; or a combination of the three.

These are produced in hot-dipped galvanized steel and are designed for simplified installation and easy servicing of cable and equipment.

Model 60 — Pole or Stake Mounted Housing

FEATURES: Self-opening-closing weatherproof enclosure of hot-dipped galvanized-after-forming steel; tilt-out, in-line terminal mounted strip and auxiliary cross-mounting bar for maximum loading coil and/or equipment mounting space; 3-position plated ground connector; auxiliary ground bolt location; more than 9" of space between cable clamp and terminal strip for cable pressurization equipment; 2 rubber grommets near top of back channel for aerial service drops; terminal mounting strip mounted over 3" from back channel so that cable splices can remain undisturbed.

CAPACITY: Large interior space accommodates up to 600 pairs of splicing; up to 172 pairs of loading; up to 60 pairs of termination; or a combination of the three.

Model 36 — Pole or Stake Mounted Housing

FEATURES: Self-opening-closing weatherproof enclosure of hot-dipped galvanized-after-forming steel; tilt-out, in-line terminal mounting strip with insulated section and auxiliary cross-mounting bar for maximum loading coil or equipment mounting space; 3-position plated ground connector; auxiliary ground bolt location; more than 9" of space between cable clamp and terminal strip for cable pressurization equipment; 2 rubber grommets near top of back channel for aerial service drop wires.

CAPACITY: Large interior space accommodates up to 150 pairs of splicing; up to 50 pairs of loading; up to 36 pairs of termination; or a combination of the three.

Model 41 — Stake Mounting with Provision for CATV

FEATURES: Self-opening-closing weatherproof enclosure of hot-dipped galvanized-after-forming steel; tilt-out, in-line, terminal mounting strip with insulated section; 3-position plated ground connector; auxiliary ground bolt location; space between cable clamp and terminal strip for cable pressurization equipment; space for CATV components; mounting bolt location for universal back-to-back mounting with power housings.

CAPACITY: Large interior space accommodates up to 150 pairs of splicing; up to 50 pairs of loading; up to 18 pairs of termination; or a combination of the three.

NOTE: All carry U.S. Patent No. 3,149,198.

RELIABLE

POWER PEDESTALS

Back plate is bolted to a stake. The lower cover section is fastened to the back plate and is buried a minimum of 10" in the ground to provide protection for the cables as they come out of the ground. The upper cover is 21" long and when removed leaves the interior completely open for making service connections.

There is sufficient space in the Series 4000 Pedestals to distribute up to four circuits from the secondary main using as large as 350MCM stranded conductors on all circuits. The upper cover is equipped with a hasp so that it can be padlocked. Available with a special dark green painted finish. Connecting blocks must be ordered separately. To order the green finish, add the letter "B" to the catalog number.

Cat. No.	Dimension, Inches			Each
	Width	Depth	Height	
4000	6	7	46	\$12.35
4001	8	7	46	13.65
4002	8	8	46	14.00

COMMUNICATIONS BURIED WIRE PEDESTAL TERMINALS

No. 3550 Buried Wire Pedestal Terminal is supported by its own support post. There is room to mount two 2-pair terminal blocks or four 1-pair terminal blocks. Two single pair loading coils may also be installed.

No. 3560 Buried Wire Pedestal Terminal is mounted on a pole or post. It is equipped with four neoprene-grommeted drop wire entrances. Two 2-pair terminal blocks or four 1-pair terminal blocks or two single load coils may be mounted.

Materials — units are formed out of 13 gauge (.089") mill galvanized steel which is then bonderized and given a green alkyd paint finish.

No. 3550 Buried Wire Terminal with mounting stake and one 5562-P two-pair connecting block. Weight 22½ lbs.each \$6.65

No. 3560 Buried Wire Terminal for pole mounting, with one 5562-P two-pair connecting block. Weight 6½ lbs.each \$4.05

UTILITY PRODUCTS CABLE CLOSURES

R.E.A. APPROVED CLOSURES

RE-2A (BD-2A type) Pole Mounting Unit
RE-2 (BD-2 type) Pedestal Unit

Weatherproof Closure, hot-dipped galvanized after fabrication. Tilt-out keyhole. Mounting strip for 3-6 pr. Terminal Blocks. Two 3/4" rubber grommets at top of back channel for aerial service wires.

Capacity 136 cu. in.

- A. Looping — 50 pair — 22 gauge cable or equivalent for distribution or loading purposes.
- B. Mounting — 3-6 pair blocks or equivalent in loading coils and/or terminal blocks. *Blocks not included.*

	Each	Wgt.
RE-2A	9.00	15#
RE-2	10.25	21#

RE-3AC (BD-3A type) Pole Mounting Unit

RE-3C (BD-3 type) Pedestal Unit

Weatherproof Closure, hot-dipped galvanized after fabrication. Tilt-out keyhole mounting. Strips for 6-6 pr. Terminal blocks. Two 3/4" rubber grommets at top of channel for aerial service wires.

Capacity 550 cu. in.

- A. Looping 150 pair — 22 gauge or equivalent for distribution or loading purposes.
- B. Mounting—6-6 pr. Terminal blocks or equivalent in loading coils and / or terminal blocks. *Blocks not included.*

RE-4A (BD-4A Unit)

Pole Mounting Type

RE-4 (BD-4 Unit) Pedestal Unit

Same as RE-3AC and RE-3A except mounting strips will hold 10-6 pr. terminal blocks.

Capacity

- A. Looping—600 pr.—22 gauge cable or equivalent for distribution or loading purposes.
- B. Mounting—10-6 pair Terminal Blocks or equivalent in loading coils and/or terminal blocks. *Blocks not included.*

	Each	Wgt.

RE-4A	17.90	36.5#
RE-4	19.15	42.5#

Cat. No. RE-5 (BD-5 type) Pedestal Unit

Large, hot-dipped closure galvanized after fabrication with removable sides.

Capacity — 2400 cu. in.

- A. Looping — 600 pair — 22 gauge cable or equivalent for distribution or loading purposes.
- B. Mounting — 10-6 pair terminal blocks or equivalent in loading coils. *Blocks not included.*
- C. Splicing — Maximum size Polyethylene insulated conductor cable.
 600 pr. — 22 gauge
 900 pr. — 24 gauge

	Each	Wgt.
RE-5	32.40	58#

RE-4A

BURIED WIRE CLOSURE

Cat. No. 6PM

For buried wire termination. Max. capacity — 6 pair loading, 2 pair — protecting 6 pair. Bracket provided for pole mounting (when used in place of 4 PM). Finish—Mill galvanized, 14 gauge steel with vinyl primer and dark green alkyd finish. Hot-dipped galvanized swing out mounting plate. *No blocks furnished.*

Cat. No. 4PM

Same as above, but for pole mounting.

	Height	Width	Each	Wgt.
6PM	72"	4 1/2"	7.50	21#
4PM	12 1/4"	4 1/2"	4.25	6#

6PM

Cat. No. B-12, B-36, B-60

All B type domes fit the same Base Plate. To expand service, a change of dome and internal brackets is all that is required. B-12 Closures furnished with mounting bracket for 1 six pair block only. B-36 furnished with mounting bracket for 6 six pair blocks only. B-60 furnished with mounting bracket for 10 six pair blocks only.

Base Plate fingers provide continuous ground when cable sheath is anchored to Base Plate with grounding clamp.

Each

B-12 - \$7.80, B-36 - \$10.40, B-60 - \$12.95

B-12

No Blocks Furnished — Specify Separately

Cat. No.	Dia.	Height	Cable Size	Recommended Capacity

BURIED CLOSURE POST

Cat. No. P-72

Buried Closure Post — Post and Cover Assembly provides maximum protection for Buried Cable up to 2" O.D. from a minimum of 6" below ground level up through the base plate. Two piece cover for easy field installation*. Finish — mill galvanized 13 gauge steel Utility Standard "A" finish.

Each — \$6.00

*Flanged for extra strength — split design eliminates condensation.

P-72

Cat. No. C Post

C Post is for splicing cables up to 2" in diameter. Splicing area is 3 1/2" ID x 28" long. Overall length of Post is 72". Designed to remove splicing from terminating area. Post Cover can be removed to get at splicing area or Dome can be removed to get at terminating area. Finish is mill galvanized 13 gauge steel — Utility Standard "A" finish. May be used with B12, 36 or 60 for termination. **Each \$8.95.**

C POST

UTILITY PRODUCTS CATV CLOSURES

Telephone and Power Combination

These units may be used individually or jointly with the PT Post, for back to back installation. Each unit consists of a back and two-piece cover. Utility Standard Finish A.

U-GUARD

U-Guards

Available in both hot dipped galvanized after fabrication (REA Approved) or in the longer life at less cost mill galvanized with Utility Products standard green finish. Prices on application.

SUPERIOR FIBER GLASS BURIED PLANT TELEPHONE TERMINAL HOUSINGS

Fiber glass housing, 4" wide, 3 3/4" deep x 34" high. Accommodates 3 six-pair terminal blocks or equivalent.

No. F-2 (REA Type BD2)—Complete with 48" galvanized steel stake. Standard package, 8; weight 107 lbs.
..... each **13.75**

No. F-2A (REA Type BD2A) — Complete with pole-mounting kit. Standard package, 8; weight 45 lbs.each **11.75**

No. F-2F — Complete with 48" fiber glass stake. Standard package 8; weight 64 lbs.
..... each **15.90**

No. F-2S — Complete with 48" stainless steel stake. Standard package 8; weight 83 lbs.
..... each **21.00**

Note: To specify green color, add suffix -G to catalog number. To specify orange color, add suffix -O to catalog number.

Fiber glass housing, 7 1/2" wide x 3 3/4" deep x 44" high. Accommodates 6 six-pair terminal blocks or equivalent.

No. F-3 (REA Type BD3) — Complete with 60" galvanized steel stake. Standard package 8; weight 167 lbs.
..... each **22.10**

No. F-3A (REA Type BD3A) — Complete with pole-mounting kit. Standard package 8; weight 75 lbs.each **17.75**

No. F-3F — Complete with 60" fiber glass stake. Standard package 8; weight 103 lbs.
..... each **23.05**

No. F-3S — Complete with 60" stainless steel stake. Standard package 8; weight 111 lbs.
..... each **29.90**

Note: To specify green color, add suffix -G to catalog number. To specify orange color, add suffix -O to catalog number.

Fiber glass housing, 7 1/2" wide x 7 1/4" deep x 44" high. Accommodates 12 six-pair terminal blocks or equivalent.

No. F-4 (REA Type BD4) —Complete with 60" galvanized steel stake. Standard package 4; weight 99 lbs.each **27.05**

No. F-4A (REA Type BD4A) — Complete with pole-mounting kit. Standard package 4; weight 52 lbs.each **22.65**

No. F-4F — Complete with 60" fiber glass stake. Standard package 4; weight 67 lbs.
..... each **28.00**

No. F-4S — Complete with 60" stainless steel stake. Standard package 4; weight 83 lbs.
..... each **35.00**

Note: To specify green color, add suffix -G to catalog number. To specify orange color, add suffix -O to catalog number.

PROTECTO WRAP DUCT JOINING TAPE

This tape is the answer to sealing duct sections when using the practical and low cost straight-in duct.

The tape consists of a woven glass fabric impregnated with a bitumen and synthetic resins. Furnished in strip form, 6 inches wide and 70 feet in length, wound into rolls and packaged 4 rolls per carton. Each roll is interwound with a paper separator to insure easy unrolling regardless of the temperature. The separator paper should remain between the strips of precut tape to prevent sticking.

Duct Joining Tapeper roll **\$6.39**

DUCT JOINING PRIMER

Duct Joining Primer is used to bond the tape to the conduit surface. The primer should be tacky when the tape is applied to the conduit.

Price Per Gallon

PERMAGUM

Permagem is a putty-like compound which is permanently non-hardening, non-oxidizing, and non-corrosive to metals, rubber, plastic, lacquer and paints.

Readily workable, it can be thumbed into any opening and formed for sealing around inspection plates, conduits, openings, cable joints.

Service temperature range is minus 30°F. to 400°F. Non-oxidizing, remains soft and plastic for an indefinite period at 70°F.

Quick, clean and easy to use, non-poisonous and non-injurious to the skin.

Size	Price Per Lb.*	Size	Price Per Lb.*	Wt. Lbs. Per Ctn.
1 Lb. Pkg.	\$0.31	5 Lb. Bag	\$0.26	50

*Price in quantities of 200 to 1000 lbs.

RUSSELL UTILITY TYPE MANHOLE FRAMES AND COVERS

Designed for underground electric or telephone construction. The horizontal bearing surfaces of the frame and cover are machined, and there is no rattle or rock in any position. Ventilated covers are available, and covers may be inscribed with special lettering or emblems as may be required.

Where resurfacing of asphalt surfaces is necessary, extension rings for use with these castings are available. The extension ring repositions the cover to the new elevation. Manhole sumps are also available.

BURNDY ELECTRICAL CONNECTORS

ZM SERIES MOLE®

The Burndy Mole is a compact pre-insulated junction for secondary network cables. Accommodates a minimum of two cables. Cable is terminated at the Mole by means of a socket, cone and nut assembly. Taping operations are greatly simplified by use of Burndy Notape sleeve or Mole insulating sleeves.

STUD MOLE

The Burndy Stud Mole is designed to terminate cable at the studs of distribution transformers, network protectors and other similar equipment. Insulated except for the stud clamping element. Properly installed, the Stud Mole assembly is impervious to damage by flooding. A separate clamping cap on the stud element permits work to be done on the equipment without disturbing the cables.

INSULATED HYCRAB™

Compact, compression type HYCRAB pre-insulated junction for secondary network cables. Two outlets, one on either side ready for immediate use, all others sealed with vulcanized plugs. Easily taped, eliminates difficult crouch taping. Two basic sizes, 4/0 and 500 Mcm., cover range of 6-500 Mcm. using Y-R reducing adapters.

BARE (NEUTRAL) HYCRAB TYPE YNM

Uninsulated compression type HYCRAB for joining bare neutral underground cables. Two basic sizes, 4/0 and 500 Mcm., cover range of 6 to 500 Mcm. using Y-R reducing adapters.

LIMITER LUG ASSEMBLY TYPE YFA

The Limiter Lug is a terminal and a fuse. The fuse, a non-replaceable element, will clear when overloads are great enough to damage conductor insulation. Unlike a fuse, it will not clear on minimal or short duration overloads. Cable is installed with Burndy compression tools.

LIMITER ASSEMBLY TYPE YFS

The Limiter assembly is a splice and a fuse. The fuse, a non-replaceable element, will clear when overloads are great enough to damage conductor insulation. Unlike a fuse, it will not clear on minimal or short duration overloads. Cable is installed with Burndy compression tools.

MOLIMETER® ASSEMBLY TYPE YFM

The MOLIMETER is used to terminate and fuse cable at Mole. The cable end is installed with Burndy compression tools. The other end is joined at the Mole outlet with a socket, cone and nut assembly. The fuse, a non-replaceable element, will clear when overloads are great enough to damage conductor insulation.

LIMITER HYCRAB TYPE YF-M

The Limiter HYCRAB provides protection for six or eight 4/0 or 500 Mcm. cables. Each cable end is attached to a separate fusible element by compression. The entire assembly is insulated. Insulating caps are available to protect unused outlets. Caps are slipped over outlets and held in place by a few turns of rubber tape.

Price on Application

BURNDY ELECTRICAL CONNECTORS

**UNDERGROUND RESIDENTIAL DISTRIBUTION
URD MOLE TYPE RDM**

Compact, completely insulated URD Mole designed specifically for residential or light industrial underground services. Available with four or six outlets. Sealing caps supplied on all but one outlet. Completed assembly can be directly buried or, used with URD-4 enclosures. URD Mole tap kits are used to terminate cable and insulate the joint.

RDM4-28 \$4.90/ea. RDM6-28 \$5.55/ea. Carton quantity 3 per box.

URD MOLE TAP ASSEMBLY

URD Mole tap kits used to join aluminum or copper cable at URD Mole outlets. Each kit consists of a HYLUG, heat-shrink sleeve and mounting hardware. Eight sizes cover range of 4 str. to 350 Mcm. Propane or electric heat gun (500°F) used to shrink sleeve not acetylene. Installed with MD6, Y35, Y34A.

**BELOW GRADE SERVICE
ENCLOSURE TYPE URD-4**

The URD-4 Service enclosure assembly consists of a cast iron cover, polyethylene bell jar and a bituminized fiber enclosure. Can be installed at or below grade level. Can withstand 7,500 lb. weight and a 30,000 lb. axial crushing force. 14" I.D. provides ample working space for installing a wide variety of connector types and sizes. Compression type Y-LOK (J1592) available to secure cover after installations are completed.

**ABOVE GRADE SERVICE
ENCLOSURE TYPES DDP-B, DDP-K**

The above grade enclosure consists of a rugged, corrosion resistant aluminum-alloy dome and a cast-in or bolt-on type mounting ring. Two basic assemblies type DDP11 and DDP16 have 11" and 16" inside diameters respectively. Both accommodate a large variety of connectors.

**URD SERVICE TAPS
MECHANICAL TYPE KP-C, K-P-UC**

Compact, mechanical type URD Service taps for use with URD-4 or DDP service enclosures. Type K-P-C for copper services, type K-P-UC for copper or aluminum services. Both types are sold complete with insulating covers. Installed with Allen wrench the individual clamping elements allow cables to be connected or disconnected without disturbing adjacent connections.

COMPRESSION TYPE YPC-C, YPC-U

Compact, compression type URD service taps for use with URD-4 or DDP type service enclosures. Type YPC-C for copper services, type YPC-U for combinations of copper and aluminum surfaces. Installed connectors are easily taped. Figure 6 configuration separates run and tap conductors. YPC29C26 (copper) has range 2/0 Str.-250 run, 4 str.-3/0 Str. tap. YPC-U line has 5 connectors covering 6 Sol.-400 Mcm. range.

Price on Application

RELIABLE

URD INSULATING CLOSURES

A PVC Insulating closure for use in insulating and water-proofing the Reliable Circular Connecting Blocks. Provides a water-tight insulating cover and can be used above grade, at grade or below grade so as to meet any types of soil and climate conditions.

For copper or aluminum services. Accommodates cable sizes ranging from No. 2 through 350MCM.

Color Coded — Closures are orange color for phase conductors; white for neutral conductors.

Cover and base are polyvinyl chloride; cable clamps are stainless steel, 300 series.

Units contain: Cover, body, cover clamp, 2 secondary clamps and 1 service clamp.

Cat. No.	Description	Wt. Lbs.	Each
4040	Insulating Closure, Orange	1½	\$4.60
4040-W	Insulating Closure, White	1½	4.60

URD POWER VAULT

The Reliable No. 4010 Power Vault is the other part of the Reliable Total Underground Residential Distribution System. The sleeve is non-conductive and wholly resistant to corrosion, thawing, freezing and micro-organisms.

The Power Vault provides a good protective housing for the insulated connecting blocks and can be used at or below grade. The cast iron cover is secured to the fibre sleeve with stainless steel bolts.

Cover — cast iron, painted green to blend into landscape when used on grade. Sleeve — Bituminized fibre sleeve, 24" deep x 16" diameter, 18-8 stainless steel bolt.

Cat. No.	Description	Wt. Lbs.	Each
4010	Power Vault	45	\$16.50

ISOLATOR

Allows service disconnects to be made without removing the service conductor.

P-12223	Used on AL4026 series	.65

PVC INSULATED ¼-INCH HEX DRIVE WRENCH

No. P-11420each \$0.50

URD CIRCULAR FLOATING CONNECTING BLOCKS

These connecting blocks are supported only by the terminated conductors. The conductors are clamped in the connectors by set screws and floating saddles. The set screws are driven by a ¼" Allen wrench or with the Reliable PVC Insulated Wrench. Available is a line of Premium Heavy Duty and Light Duty Connecting Blocks for both aluminum and copper conductors.

URD RECTANGULAR FLOATING CONNECTING BLOCKS

Made only in aluminum. It accommodates service conductors from No. 6 through 4/0 and secondary conductors from 1/0 through 350 MCM. Conductors are clamped in by floating saddles, which are driven by two set screws for the secondaries, one set screw for the service conductors.

T & B UNDERGROUND FITTINGS

UNDERGROUND TRANSFORMER ADAPTERS

No. UTA35040

Six-bore mechanical set screw connectors manufactured of wrought aluminum, with a NEMA-drilled pad suitable for bolting to transformer spade terminals. The two bores nearest the pad on the adapters have a conductor range of 350MCM stranded maximum and #2 solid minimum. The four outer bores have a conductor range of 4/0 stranded maximum and #4 solid minimum. All wire bores contain M54 oxide inhibitor. These fittings have a dull zincate finish, with an inhibitor film coating for corrosion resistance and efficient heat transfer.

They are designed for bolting to transformer spade terminals, bus bars, or other aluminum or copper devices having $\frac{3}{8}$ " holes— $1\frac{1}{4}$ " on centers. Two conductors up to 350MCM stranded and four additional conductors up to 4/0 stranded maximum may be connected to this fitting.

Advantages

Adapter is made of wrought aluminum, not cast. All set screws are of two-piece construction, featuring a non-rotating saddle. This saddle eliminates conductor damage during installation and assures maximum applied force on contact surfaces. Dull zincate finish reduces operating temperature as much as 20°C. All wire bores contain M54 oxide inhibitor.

UNDERGROUND BLOCKS

No. UTB61

Terminal blocks which will accommodate up to six XT series wrought aluminum underground terminals. The XT series terminals have a wire range of #6 solid through 4/0 stranded aluminum or copper conductor. The terminal blocks are manufactured from high conductivity wrought aluminum and have a dull zincate finish, with an inhibitor film for corrosion resistance and efficient heat transfer. They are packaged in individual plastic bags complete with six $\frac{3}{8}$ " x $\frac{3}{4}$ " long aluminum bolts and six lockwashers.

They are designed to be used with XT series underground terminals in pedestals, vaults, enclosures, hand holes, etc. on underground distribution systems. They will meet the requirements of those who insist on compression connections on aluminum conductors, yet want to mechanically connect house services to secondary feeders.

Advantages

Block is made of wrought aluminum, not cast. Compression connections on conductors—however, individual house services may be disconnected and reconnected to terminal block. Dull zincate reduces the operating temperature as much as 20°C. Center surfaces of block furnish additional area to radiate heat.

UNDERGROUND PEDESTAL BLOCK CONNECTORS

No. UPB35040

Mechanical set screw block connectors made of wrought aluminum. The two center bores have a conductor range of 350MCM stranded maximum #2 solid minimum. The four corner bores have a conductor range of 4/0 stranded maximum and #4 solid minimum. All wire bores

contain M54 oxide inhibitor. These blocks have a dull zincate finish, with an inhibitor film coating for corrosion resistance and efficient heat transfer.

They are designed for use in pedestals, vaults, enclosures, hand holes, etc. on underground distribution systems. They permit up to four 4/0 services to be tapped from a 350MCM or smaller feed. Another feeder or fifth service may be tapped from the remaining large bore.

Advantages

Connector is made of wrought aluminum, not cast. All set screws are two-piece construction, featuring a non-rotating saddle. This saddle eliminates conductor damage during installation and assures maximum applied force on contact surfaces. Dull zincate finish reduces operating temperature as much as 20°C. All wire bores contain M54 oxide inhibitor.

UNDERGROUND TERMINALS XT SERIES

Compression terminals made of high conductivity wrought aluminum. The pads of these terminals have been specially tempered to resist cold flow. The bores are pre-filled with T&B M54 oxide inhibitor and covered with a plastic cap to eliminate contamination. These fittings may be used with T&B

underground terminal block #UTB61 and have many other applications on distribution systems. Seven catalog numbers cover a wire range from #6 solid to 4/0 stranded aluminum or copper.

They are used to attach aluminum or copper conductors to terminal blocks, equipment pads, or other devices on underground or overhead distribution systems.

Advantages

One common die will install all seven lugs. Specially tempered pad to resist cold flow. Pre-filled with T&B M54 oxide inhibitor. Easy to remember catalog numbers—first letter indicates installing die (TX), second letter identifies fitting as a terminal. Numerals indicate largest size stranded conductor fitting will accept.

Wire Range (Aluminum or Copper)

Cat. No.	Solid	Concentric Str.	Compressed Str.	ACSR	Instal-ling Dies	No. Compressions

PORTER OUTDOOR SUBSTATIONS

(DELTA-STAR)

22 to 115 KV (Incoming) — 7.2/12.47 (Outgoing)

Substation installations are generally unique having requirements singular to the location. To this point we state that a tailor-made arrangement can be furnished to suit your individual need. You are not compelled to purchase an unwanted "standard". On the other hand, we must recognize that many substations can have the majority of their contents the same or similar. Thus, stereotypes approach the status of "standards" and can be offered with a clear indication of arrangement and content with minimum engineering.

Figure 1 illustrates a typical radial feed rural type substation, suitable for a maximum of four low voltage feeders. A high voltage arrangement for tapping a loop system is also available. Other low voltage arrangements will provide 3, 5 or 6 feeders. A high voltage arrangement for tapping a loop system is also available. Other low voltage arrangements will provide 3, 5 or 6 feeders. Space between structures is normally suited to three single-phase transformers plus one spare. A horn gap vertical break switch, fuses, and lightning arresters are provided for the high voltage side. OCR disconnects, fuse bypassing, and distribution lightning arresters are provided for the feeders. Regulation and metering are normally provided for the low voltage bus with hookstick regulator by pass switches included. Two overhead shield

wires provide direct stroke protection.

Also illustrated are two forms of radial feed terminals, usually applied to small industrial plant substations. Either the fuse (Figure 2) or OCB (Figure 3) protection arrangement is available and suitable disconnect and/or bypass switches are provided.

Lightning arresters are normally included and optional masts and peaks provide direct stroke protection if required.

Above and below grade grounding materials are normally provided, based on our estimate of the grounding requirements.

Variations in design and arrangement are available. They can be quoted after receipt of appropriate information.

Your inquiry should include the following information:

1. A one-line diagram indicating all present and future equipment with ratings desired, system voltage and fault current available and an asterisk by any item not to be quoted.
2. A plot plan indicating size and shape of area available, line direction and tensions desired and any overhead clearance limits.

MK-40 Vertical break disconnect available in ratings up to 750 KV and 6,000 amperes.

A complete line of disconnect switches to meet every need is available, in voltage ratings up to 750 KV and current ratings up to 6,000 amperes with standard or custom engineered operating mechanisms. The use of the finest materials and production methods insure the highest quality products to provide long life and trouble free service under adverse operating conditions. Bus supports are available to support any type of conductor such as a bar, round or square tubing, stranded cable, solid wire or structural shapes. Bases can be supplied for mounting supports on flat surfaces, pipes or structural sections. All ferrous parts are hot-dip galvanized after fabrication.

PMB-40 Single side break switch available in voltage ratings up to 161 KV and current ratings up to 1,200 amperes.

B-2M Hook operated disconnect available in voltage ratings to 69 KV in 600 and 1,200 ampere ratings.

15 KV, 600 ampere EV disconnect switch.

Outdoor Bus Supports for any type conductor or mounting surface are available.

ROYAL ELECTRIC SUBSTATIONS — STANDARDIZED OR CUSTOM

At this Royal-designed substation, the entire top framework, together with all equipment, was pre-assembled on the ground. The complete unit was then lifted into position in a single operation. This procedure saved man hours and costs, and simplified installation and inspection.

Aluminum is the material used at this rural substation. The structural framing is aluminum, and Royal aluminum connectors join aluminum runs and taps.

A-frame design provides strength and economy at this Royal substation in the Southwest.

With over a half century of experience in substation design and equipment, Royal Electric Manufacturing Co., Inc., is a prime source for superior outdoor substations. During this long period, Royal has built a reputation for engineering and manufacturing excellence. Royal substations combine the advantages of safety and accessibility with long operating life and low maintenance.

Royal has designed, and supplied components for, hundreds of substations. From these designs Royal has developed a variety of plans for "packaged" stations, which can often be utilized with little or no adaptation. This procedure saves design expense, and it helps speed up planning and construction time.

Royal is also prepared to design new substations in accordance with the special requirements of individual systems. With the present rapid growth in the need for broadened electric power supply, Royal is accustomed to design to special standards or unusual operating requirements.

ROYAL STANDARDIZED SUBSTATIONS

Capacities and Voltages — Common ratings for substations engineered and supplied by Royal are 1000 to 3000 kva, with high voltages of 23, 34.5, 46, or 69, and low voltages of 7.5/12.5 kv.

Royal, too, is fully experienced in filling special and unusual requirements and in equipping for extra high voltages. The ratings and voltages listed above by no means represent the limits of Royal's capability.

Bus Arrangements — Basic strung bus arrangements can be utilized for one, two or three high-voltage incoming lines. Low voltage arrangements have a maximum of four incoming lines.

Versatility — Many combinations of designs are available for incoming lines and outgoing feeders. Royal standardized substations are engineered for economy and practicality in power distribution. They have been developed to provide for equipment protection and disconnecting.

Codes — Royal standardized substations conform to NEMA, AISC and REA standards.

Call Graybar for Complete Details

ROYAL ELECTRIC SUBSTATIONS — STANDARDIZED OR CUSTOM

Royal engineering results in neat, compact substations, with designed-in safety and accessibility.

Simplicity — Royal's standardized stations are designed for simplicity. Royal's basic standard arrangements meet exacting requirements. Yet each unit is compact, electrically and mechanically coordinated to secure fast, easy handling at the site, and to reduce field assembly costs.

Flexibility — Royal designs are planned for adaptability. As additional needs arise, bays and takeoff points can be added without rebuilding the original structure. When specified in an order, bolt holes are pre-punched in each chord member. These allow for ready enlargement of the supporting structure.

Structural Materials — Royal regularly furnishes either steel or high-strength aluminum alloy as framing for substations, in accordance with customer preferences.

Royal has been the leader in evaluating the various aluminum alloys for their suitability for substation components. As a result of these studies, Royal is highly experienced in the selection and fabrication of aluminum alloys best suited for conditions at each site. Royal aluminum substations have proved themselves in service. The light weight of the aluminum members simplify erection procedures and reduce construction costs. Shipping costs also are less, and savings can be realized on supports, footings and foundations.

Bills of Material — With standardized drawings, Royal also supplies bills of material. These indicate exactly those components which Royal is supplying. Royal Switches and Power Connectors, either bronze or aluminum, are quality-built for long, dependable service.

A typical Bill of Material for a multiple incoming line substation is shown in the last column.

Accessibility — Royal engineers have designed Royal substations with service and safety in mind. Every possible means for eliminating maintenance has been taken into account. Accessibility to all operating equipment has been planned in advance.

One Reliable Supplier — In the building of a new substation or the enlargement of an existing station, it is very advantageous to have all materials provided from a single dependable source. Royal makes a point of producing high-quality electrical equipment — and delivering it to the site on time and in prime condition.

CUSTOM SUBSTATIONS

Similar standards apply to Royal's individual designs for substations where special requirements,

unusual conditions or high current demands call for individual designs and special engineering.

Royal has total capability in handling exacting, custom requirements. Royal engineers are accustomed to working closely with clients in the development of original solutions to unusual problems of power distribution. Voltages range to 161 kv.

Royal also manufactures a full line of aluminum and bronze power connectors, special electrical devices, hook operated and group operated switches.

GENERAL ELECTRIC AUTOMATIC VACUUM OR OIL CIRCUIT RECLOSERS

Type VIR vacuum circuit recloser

Type OR oil circuit recloser

Type VIR vacuum circuit reclosers and Type OR oil circuit reclosers are heavy-duty, Power Class Type for use in applications on distribution circuits within their voltage, continuous-current ratings, and interrupting capability. The interrupting ampere rating of the reclos-

ers must be at least as great as the maximum short-circuit current they may have to interrupt.

These high-speed reclosers reduce chance of line burn-down with fast interruption of higher current faults on the initial operation. Interruption time of Type VIR vacuum units is 2 cycles, Type OR oil units is 3 cycles.

Cont Current Rating (Amp)	Interrupting Ratings—RMS Symmetrical Amperes [§]

Application and ordering information for vacuum reclosers in Bulletin GEA-7813 for oil reclosers in Bulletin GEC-1735. Or call Graybar for complete details

GENERAL ELECTRIC VACUUM OR OIL POWER CIRCUIT BREAKERS

Type VIB vacuum power circuit breakers and Types FKD-14.4 and FKD-23 oil power circuit breakers are suitable for medium-duty applications on distribution circuits within their voltage and continuous-current ratings and interrupting capability. The interrupting current rating of the breakers must be at least as great as the maximum short-circuit current they may have to interrupt.

The new high-speed vacuum breakers, Type VIB, operate on 2-cycle (plus relay time) interruption of higher current faults; interrupting time of the oil breakers is 5 cycles.

Type VIB vacuum circuit breakers

Type FKD-14.4 oil circuit breakers

Breaker Type	Rating			Interrupting Time Cycles	List Price, Each*			Gallons of Oil	Net Wt in Lb for Item 1 †	Approx Ship. Wt in Lb for Item 1 ‡
	Kv	Amp at 60 Cycles	Interrupting		Non-Reclosing Non-Relayed Basic Breaker (Item 1)	Non-Reclosing Relayed Feeder Breaker (Item 2)	Reclosing Feeder Breaker (Item 3)

FKD-23-500	23	1200	500 mva	5	5630	6690	7380	65	1750 (incl oil)	1500 (less oil)

* For estimating purposes only. For current price information, consult Graybar.

† The net weight of oil is 7.45 lb per gallon; oil shipping weight in drums is 9 lb per gallon.

‡ Add 300 lb for Item 2 and Item 3 weights.

§ The breaker is rated on a symmetrical basis and is capable of interrupting any asymmetry associated with the symmetrical rating with an X/R ratio of 17. (15,600-ampere total short-circuit current based on 1-cycle opening time and 1/2-cycle relay time.)

Application and ordering information for vacuum reclosers in Bulletin GEA-7813 for oil circuit breakers in Bulletin GEA-7755. Or call Graybar for complete details. The above items are subject to 20% Discount.

GENERAL ELECTRIC OUTDOOR POWER CIRCUIT BREAKERS

TYPE FKA, 14.4-46 KV—OIL BLAST, SUBTRANSMISSION TYPE, FRAMEWORK-MOUNTED

Type FKA oil circuit breakers are used for the rapid interruption of power circuits in the voltage range 14.4 to 46 kv inclusive.

For applications involving switching of static capacitor banks, cable circuits, or reactors, consult Graybar.

Breakers can be used in altitudes to 10,000 feet, and in temperatures down to -10 F for 24 hours or less. For lower temperatures, design details will differ slightly.

STANDARD RATINGS, BASIC BREAKERS

Type	Kv	Mva	Amperes	List Price Each*
FKA	14.4	1000	1200	\$10200
FKA	34.5	1500	1200	10500
FKA	46	1500	1200	12000

* For estimating purposes only. For current price information, consult Graybar.

Type FKA-34.5—1500 oil circuit breaker rated 1200 amperes, without terminal connectors.

Item	Breaker Type	Ratings				60-cycle Interrupting Rating		Short-time Rating Amperes		Withstand Test Kv		Total Oil Gallons Required	Net Wt Incl. Oil In Lb §	Ship. Wt Less Oil In Lb §	
		Kv	Amp at 60 Cycles	Maximum Design Kv	Minimum Operating Kv at Rated Mva †	Mva	Rms Total Amperes		Momentary	4-sec	60-cycle Dry				Impulse
							At Rated Voltage	Max Rating

GENERAL ELECTRIC CONVENTIONAL DISTRIBUTION TRANSFORMERS

Single-phase, Type HS

500 Kva and Below

Below 5 Kv 60 Cycles

Smaller, lighter, more efficient, lower priced—that's General Electric's Permalax® 65 distribution transformer. This higher-temperature (65C rise) transformer is another step in General Electric's continuing program to help you lower your distribution transformer total owning cost. For instance, here's how the new 25-kva, 12,470GrdY/7200-volt, no-tap unit affects your total owning cost:

- lower installation, maintenance, and changeout costs—more compact (8 inches shorter, 60 pounds lighter than the previous G-E design).
- lower overhead costs.
- lower purchase price—13% below that of the previous 25-kva unit.
- lower "built-in" costs—17% lower total losses than the initial Permalax transformer design, improved impedance and regulation.

DIMENSIONS

Typical Type HS oil-immersed transformer with high-voltage rating below 5000 volts

GENERAL ELECTRIC SELF-PROTECTED DISTRIBUTION TRANSFORMERS

Single-phase, Type HSBA

100 Kva and Below

15 Kv and Below 60 Cycles

CLASS A

COMPLETE WITH: Two h-v bushings, two magnetic-valve lightning arresters, 1v neutral gap, internal h-v fuses, 1v circuit breaker, overload signal lamp, and emergency overload reset device (5 kva and above)

Application

For use on delta and Y circuits.

DIMENSIONS

Fig. 1
Type HSBA, Class A, with h-v rating below 5000 volts
(*Class B-1 transformers, omit one h-v arrester)

Application

For use on solidly grounded common-neutral circuits with tank solidly grounded.

DIMENSIONS

Fig. 2
Type HSBA, Class A, with h-v rating above 5000 volts

Fig. 3
Type HSBA, Class B-2, single-mounting position

Fig. 4
Type HSBA, Class B-3, two-mounting position

When ordering self-protected transformers consideration must be given to the application to determine the "class" desired. The table below spells out the difference, in features, of each of the three classes.

Class	H-V Bushings	Lighting Arresters	Gap on L-V Neutral Bushing	Clamp-Terminal Tank-Grounding Connector	Low-Voltage Neutral Link Clamped to Outside of Tank	Signal Light and Emergency Overload Reset Device
A	2	2	YES	NO	NO	YES— 5 kva and above
B-1	2	1	YES	NO	NO	YES— 5 kva and above
B-2	1	1	NO	YES	YES	YES—10 kva and above
B-3	Same as B-2 except 2 mounting positions.					

All classes have a low-voltage circuit breaker internal high-voltage fuse.

GENERAL ELECTRIC REC DISTRIBUTION TRANSFORMERS

Single-phase

25 Kva and Below

60 Cycles

Type HS

Fig. 1

For use on solidly grounded, common-neutral distribution systems where system and transformer protection is provided by the use of separately mounted distribution lightning arresters and cutouts.

Type HSBA, Self-protected

Fig. 2

For use on solidly grounded, common-neutral distribution systems. Contains h-v distribution arrester and bushing fuse and l-v circuit breaker.

GENERAL ELECTRIC ML-32 STEP-VOLTAGE REGULATORS

Single-phase 60 Cycles

General Electric ML-32 regulators, the culmination of over 50 years' experience with regulator design, offer accurate, dependable, and economical automatic voltage regulation in ratings particularly suitable for branch and rural circuits.

With the exception of the 13,800-volt ratings, all regulators listed below are insulated for the corresponding Y voltages. When three regulators are operated in a 3-phase, Y-connected bank, the neutral of the regulator bank must be solidly tied to the system neutral.

Note: The control cabinet is designed to permit mounting either on the regulator or separately.

† All Type ML-32 regulators are shipped oil-filled.

§ All standard 5000-volt regulators are furnished with taps in the control circuit to operate at 2500 and 4330 volts at rated current. No reduction in price for the omission of this feature.

¶ All standard 7620-volt regulators can be operated at 7960, 7620, 7200, 6900, 5000, 4330, and 2500 volts at rated amperes. Shipped connected for 7200-volt operation.

⊙ These regulators are capable of supplying current corresponding to rated KVA, up to a maximum current of 600-amperes, when operated at 6900/11950Y volts.

⊕ For weights and dimensions contact Graybar.

*Registered trade-mark of General Electric Company.

GENERAL ELECTRIC INDUCTROL® VOLTAGE REGULATORS

Single- and Three-phase

General Electric's Inductrol voltage regulators are induction devices designed for industrial use. They can be used to accurately hold constant load voltage when supplied from fluctuating supply voltage or, to provide a variable load or utilization voltage from a relatively constant supply voltage. Either of these functions can be automatically controlled, or can be manually controlled by means of motor drive or hand cranks.

They consist basically of a laminated steel stator, on which is wound the regulating (series) winding, and a laminated steel rotor on which is wound an exciting (shunt) winding. By changing the position of the rotor, the magnitude of the voltage induced in the series winding is controlled, adding or subtracting from the supply voltage to produce the required output voltage.

FEATURES

Higher reliability because there are no brushes to wear out or to cause maintenance trouble. Simple and rugged, the induction principle of operation provides an infinite number of voltage steps.

The Inductrol voltage regulator does not introduce harmful wave-form distortion.

Has no effect on the output voltage of Inductrol voltage regulators.

Voltage automatically held to within $\pm 10\%$ band width. Compensating controls on the Inductrol voltage regulator make it unnecessary to continually reset voltage level.

Electrically, the Inductrol voltage regulator will withstand up to 25 times normal currents.

Will withstand a 100% overload for one hour, while maintaining excellent long-life operating characteristics.

TYPICAL APPLICATIONS FOR INDUCTROL VOLTAGE REGULATORS

- | | |
|---------------------------|-----------------------------|
| TV Transmitters | Air Conditioning |
| Radio and Radar Equipment | Simulated Flight Trainers |
| Induction Heaters | Calculators |
| Lighting | Office Machines |
| Radar | X-Ray Equipment |
| Resistance Heaters | Laboratory Equipment |
| Rectifiers | Welders |
| Crane Control | Film Processing |
| Heat Treating | Wire Enameling |
| Electrolytic Processes | Equipment Testing |
| Blueprinting | Instrument Calibration |
| Spectrographs | Carrier Telephone Equipment |
| Corona Detection | Motor Speed Controller |
| Photoengraving | |

Note: Information on Inductrol voltage regulators for other ranges of regulation are available on request.

AUTOMATICALLY OPERATED INDUCTROL VOLTAGE REGULATORS

These regulators are ideally suited for maintaining constant voltage on long secondary runs supplying lighting or power, especially where wide variations in load occur on various circuits, as in mills and factories, large office and apartment buildings. Where lighting and power are both supplied from the same bus, these Inductrols will compensate for change in power load, maintaining illumination at normal level.

Standard automatic Inductrol regulators are adjusted at the factory to hold output voltage within band width of $\pm 1\%$. Within $\frac{1}{2}$ second after voltage goes outside this band width, correction is initiated by the Inductrol regulator. Since the time of operation from the maximum lower position to the maximum raise position is 45 seconds, the time required to make a correction depends on the magnitude of the voltage deviation. On the average feeder, the majority of corrections are completed in approximately one second.

Automatically operated Inductrol voltage regulators can also be used for the following: a-c voltage control; a-c current control; rectifier control for d-c output voltage; rectifier control for d-c output current; temperature control; electronic control for mobile applications; vernier control for wide-range induction regulators; process control for cyclic industrial processes.

Inductrol voltage regulators provide a convenient source of variable voltage for the calibration of meters, relays, and other instruments, also for testing vacuum tubes.

When used in circuits supplying high-voltage transformers, they facilitate the control of the applied voltage while tests on insulating materials are being made.

These Inductrol voltage regulators offer smooth control of light for such applications as theater ceilings, photo-printing, blueprinting, etc.

Current-transformer and oil-circuit-breaker testing combined with high-current transformers provide variable current for testing current transformers, tripping mechanisms of oil circuit breakers, and the current-carrying capacity of contacts.

They are particularly valuable for industrial processes, such as the control of resistance furnaces and induction furnaces.

They may be used wherever a smoothly variable voltage source is needed. Inductrol regulators for these applications are usually arranged for 100% raise and 100% regulation: that is, they vary the supply voltage uniformly over a range from 0 to 200% of normal.

Shown above is a typical Inductrol Voltage Regulator.

Call Graybar for Complete Details

GENERAL ELECTRIC DRY-TYPE GENERAL-PURPOSE TRANSFORMERS

Types B, QM, M, and QH

TYPE B

RATINGS—KVA—.025 through 3, single-phase. Frequency—50/60 cycles.

APPLICATION—Type B transformers rated 2 kva and below are designed for Step Down service only. If transformers are for Step Up service, the order must so specify.

INSTALLATION—UL listed for indoor installation; also suitable for outdoor installation. Open-end slot on bottom, two slots on top for mounting on walls or panels.

TYPE QM—Single Phase

RATINGS—KVA—5 through 25. Frequency—60 cycles. Some units designed for 50/60 cycle operation.

INSTALLATION—All applicable ratings are UL listed for indoor or outdoor installation. Key-hole mounting slots for easy mounting on walls or panels. Lifting groove to facilitate handling.

TYPE M—Three Phase

RATINGS—KVA—3 through 15. Frequency 60 cycles.

INSTALLATION—All applicable ratings are UL listed for indoor or outdoor installation. Key-hole mounting slots on top and open end slots on bottom for mounting on walls or panels. Lifting eyes facilitate handling.

TYPE QH

RATINGS—KVA — 37½ through 167, single-phase. 30 through 1000, three-phase. Frequency 60 cycles.

INSTALLATION—Type QH transformers are designed for indoor installation. Modified units are available for protected outdoor use. Where outdoor use is expected, care should be exercised that the models used are those listed for protected outdoor service. All units are suitable for floor or platform mounting. Units through 75 kva also have built-in provisions for wall mounting with key-hole slots at the top. External lifting eyes and provisions for easy fork truck handling are also built-in.

INSULATION SYSTEM

ASA standards state that the average temperature rise of the winding shall not exceed the following when operated in a 40 C ambient:

- 55 C rise system— 55 C temperature rise
- 115 C rise system—115 C temperature rise
- 150 C rise system—150 C temperature rise

All units meet UL limitations on maximum surface temperature rise.

Sound Level in Decibels†

Kva	General Electric Average	General Electric Maximum	ASA Standard
0-5	30	33	40
6-9	34	37	40
10-25	36	40	45
26-50	42	45	45
51-150	42	45	50
151-225	42	45	55
226-300	45	48	55
301-500	51	55	60

†Measured per ASA-C89.1—1961—2.7.3-4.

CONSTRUCTION
Types B, QM, and M

Core and coils are contained within a nonventilated weather-proof enclosure. The single-phase Type QM units feature encapsulated core and coils.

Type QH

Units are enclosed in a drip-proof metal enclosure with natural-draft ventilation. Core-and-coil assembly is mounted on rubber isolation pads to reduce noise.

INDUSTRY STANDARDS

Applicable ratings (through 10 kva) of all QHT transformers are UL listed suitable for installation with all types of standard cable, including 60 C rated cable. In addition, each transformer meets all ASA C89.1-1961 and NEMA ST 1-4-1961 requirements.

For further information ask Graybar for GEC-1090.

HEVI-DUTY OIL FILLED TRANSFORMERS

FOR DISTRIBUTION AND POWER SERVICE
Ratings to 5000 KVA — to 15000 V.

1000 KVA oil immersed power transformer 3 phase 60 Hz 4160 delta - 480 delta

These transformers are available as station type for overhead line termination, loadcenter unit substations service, or numerous specialty applications such as rectifier service — or as a component in AC or DC industrial power supply systems. Requirements for high current or multiple voltage outputs, along with special tank construction, dimensions, or performance characteristics can be quoted on receipt of specifications. These transformers are suitable for most outdoor installations and for indoor service where locations meet NEC requirements. Standard accessories include tap changer, liquid level gage temperature indicator, pressure vacuum gage, drain filter valve, handhole and lifting lugs. Terminations may be made to top or side mounted bushings, potheads, throats or special terminal boxes. Circuit protective devices can be incorporated when required.

500 KVA oil immersed power transformer 3 phase 60 Hz 26400 delta - 4160Y/2400

225 KVA oil immersed distribution transformer 3 phase 60 Hz 12470Y - 208Y/120 primary oil fused cutouts and air filled terminal chamber

HEVI-DUTY ASKAREL FILLED TRANSFORMERS

FOR DISTRIBUTION AND POWER SERVICE
Ratings to 5000 KVA — to 15000 V.

Askarel is a non-flammable liquid with high dielectric strength suitable for use as a transformer coolant and insulating medium. These transformers are suitable for indoor application where environmental conditions dictate the use of a liquid immersed core and coil structure for maximum protection and longest life. These are available as station type, loadcenter unit substation service, or specialty applications. Prices will be quoted on receipt of specifications.

750 KVA Askarel immersed power transformer 3 phase 60 Hz 4160 - 408Y/227 primary and secondary air filled terminal chambers

HEVI-DUTY SEALED DRY TYPE TRANSFORMERS

NITROGEN OR FREON FILLED
FOR DISTRIBUTION AND POWER SERVICE
Ratings to 5000 KVA — to 15000 V.

750 KVA 13200 V. delta primary 480Y/277V 3 phase freon filled sealed dry type transformer with primary and secondary throats for loadcenter unit substation application

2000 KVA 15,000 V. primary 240 V. delta reconnectable 80 delta secondary 3 phase 60 Hz. Nitrogen filled sealed dry type transformer.

Sealed dry type transformers filled under slight pressure with an inert gas, usually nitrogen or freon combine the best features of both liquid and dry type units. Sealed dry types provide maximum protection from adverse environmental conditions with the welded tank construction while eliminating the normal maintenance associated with liquid filled equipment. In addition, the reduced weight and absence of fire hazards make them suitable for many indoor applications without the necessity of making expensive special provisions for installation location. Prices are available on receipt of specification data.

HEVI-DUTY INDUSTRIAL POWER SUPPLY SYSTEMS

100KW DC Power Supply
Adjustable

Hevi-Duty Industrial Power Supplies are custom built to regulate voltage, current or power. The output may be either AC or DC. These power supplies provide the precise control necessary for each industrial process. All units are engineered and constructed to provide years of dependable, trouble-free service under demanding operating conditions. Hevi-Duty power supplies are built to meet applicable NEMA, AIEE, National Electrical Code and ASA Standards.

ACUVOLT® STATIC TYPE LINE VOLTAGE REGULATOR SINGLE OR THREE PHASE

The Acuvolt® Static Line Voltage Regulator is available in ratings up to 5000 KVA and on power systems up to 15000 V. It can also be built to step upon step down voltage while maintaining output voltage at ± 1% during input voltage variations as high as ± 10%. Response is practically instantaneous and with no moving parts it is free of normal maintenance.

Prices on request with specification data.

Illus. "E"

Illus. "F"

Powerformers are backed by a full Jefferson guarantee — Jefferson's reputation for quality is your finest guarantee of satisfaction, and Jefferson backs it with this explicit guarantee: The Jefferson Electric Company agrees to correct by repair or replacement, at company's option, any Powerformer which shall fail in service within a period of one year from date of shipment, provided conditions of operation have been normal at all times and that the Powerformer has not been subjected to abnormal stresses from such causes as incorrect primary voltage and frequency or overload. The Jefferson Electric Company's obligation under this guarantee which is in lieu of all other warranties, expressed or implied, is limited to replacing or repairing defective parts free of charge provided they are returned to the factory.

Powerformers meet or surpass all standards — Applicable ratings are listed with the Underwriters' Laboratories. The nameplates bear the U.L. label. All Jefferson Powerformers are engineered, built and tested in accordance with N.E.M.A. and S.S.A. standards, and meet or surpass all requirements. Customers are invited to request and inspect copies of certified test reports covering the guaranteed requirements.

JEFFERSON TRANSFORMERS

MACHINE TOOL TRANSFORMERS

Jefferson's terminal-type machine tool transformers are specifically designed to reduce 480 or 240 volt sources to 120 volts to allow for the operation of: contactors, relays, solenoids, timers, lights and similar devices. The relatively low impedance in the design allows each unit to meet high peak demands of the total load without jeopardizing secondary voltage characteristics.

The panel board can accommodate either a fuseholder or circuit breaker. Both circuit breakers and fuseholders are mounted virtually without tools. In both assembly of fuseholder and circuit breaker, they are placed in series with the terminals of the secondary circuit, and mounted on the terminal panel which is readily accessible at the side and top of the transformer.

GENERAL ELECTRIC POWER CAPACITORS FOR KILOVAR SUPPLY

INDIVIDUAL PYRANOL® CAPACITORS

For Primary and Secondary Distribution Feeders
 Primary and Residential Secondary Units
 For Single- or Three-phase, 60-Cycle Circuits
 Primary—2400 to 14,400 Volts, 100 and 50 Kvar
 Residential Secondary—240 Volts, 3, 5, 7.5, and 10 Kvar

Compact and easily installed, with hangers available for crossarm mounting or for direct bolting to the pole, these units are especially suited for gaining kw carrying capacity and reducing voltage drop on distribution circuits.

They permit extremely effective distribution of the capacitor kvar in small blocks and at many points over an entire feeder. In small blocks, they supply reactive kva economically and with great flexibility for future arrangement.

For further information, ask for Bulletin GEA-7197.

INDIVIDUAL ENCLOSED UNITS—TYPE EDT AND EWT

For Low-voltage Industrial Application
 Single-phase or Polyphase, 60 Cycles
 230 Volts, 0.5, 1, 2.5, 5, 7.5, 10, and 15 Kvar
 460 and 575 Volts, 1, 2, 5, 7.5, 10, 15, 20, 25, 35, and 50 Kvar

These units are for indoor and outdoor application for improvement of power factor directly at individual motors or other small loads. Group installations, consisting of a small number of enclosed units, can be made if the kilovars required exceed those of a single unit.

For larger loads, enclosed units may be grouped in a bank. However, small housed equipments (Type LSO and DPS) are often recommended for these applications. For further information on EDT and EWT units, ask for Bulletin GEA-7198.

Dustproof design, Type EDT with fuses Weatherproof design, Type EWT with fuses

SMALL RACK-TYPE EQUIPMENTS—TYPE DPS AND LSO

For Low-voltage Industrial Application
 Single-phase or Polyphase
 230 Volts—30 to 180 Kvar
 460 and 575 Volts—50 to 300 Kvar

In the improvement of plant power factor, it is often desired to locate capacitor equipments in one or more groups on the low-voltage buses where the total kvar rating needed generally exceeds the output of a single individual capacitor unit. For such applications, these equipments are available in indoor, and outdoor designs. Single tier DPS equipments (230 v, 30 to 90 kvar; 460 and 575 v, 50 to 200 kvar), suitable for ceiling mounting, are also available. The single tier DPS may also be floor-mounted, in which event it can be stacked three equipments high.

For further information, ask for Bulletin GEA-7198.

Dustproof design for indoor service, Type DPS

OPEN-TYPE STACK-RACK EQUIPMENTS

For High-voltage Transmission Lines and Substation Application, 2400 to 333,000 Volts

Factory-assembled racks minimize installation time and provide reliability and economy where housed equipments are not required. A wide range of kvar and voltage ratings may be obtained by omitting units or combining racks. Each individual rack is a complete, "building-block" assembly and is designed so that relocation or changes in bank size may be easily accomplished. The racks consist of capacitors, individual bus-mounted fuses, interconnecting material, and insulators.

Small three-phase packaged equipments rated 600, 900, 1200, 1800, 2400 and 3000 kvar, 2.4 to 13.8 kv, are available to improve power factor at distribution substations rated below 15 kv. They include an assembled three-phase rack, three switches, and an eight-foot elevating structure.

For further information, see Bulletin GEA-7197.

SMALL EQUIPMENTS—TYPE HWT

For High-voltage Industrial & Substation Applications
 Three-phase, 2400 Volts and 4160 Volts
 25, 50, 75, 100, 125, 150 Kvar

Type HWT equipments are for use on indoor or outdoor circuits where small blocks of power-factor-improvement capacity are desired.

In the application of capacitors on circuits of 2300 volts and higher in small industrial plants, ratings 150 kvar and less are often desired. These small Type HWT equipments are ideal for this purpose, and in large plants a number of these installed at various load centers may prove more advantageous than one large equipment. Ask for Bulletin GEA-7198 for complete information.

OPEN POLE-TYPE EQUIPMENTS

For High-Voltage Power-distribution Lines
 Single- and Three-phase, 60 Cycles
 2400-24,900 Volts, 150-1800 Kvar

Fixed pole-type equipments are an economical source of base kilovars on distribution circuits. Automatically switched pole-type equipments are available for locations where it is desirable to switch capacitors to provide peak-load kilovars and contribute to improved voltage regulation.

Two standard designs of pole-type equipments are available: single-row equipments up to 1200 kilovars, and three-segment cluster equipments up to 1800 kilovars. Ask for Bulletin GEA-7197.

Call Graybar for Complete Details

GENERAC NIAGARA ALTERNATORS

Niagara alternators feature a new complete line of high performance light weight generator sets which offer more watts per dollar and more watts per pound.

The alternators are advance design, rotating field type which offer numerous advantages. Close voltage regulation is possible through the use of rectifier-reactor type excitation and this excitation circuit also provides for 25% reserve surge capacity for electric motor starting. Full power is taken from stationary stator coils, not through slip rings and brushes.

The elimination of the commutator along with complete inter-changeability of common parts greatly simplifies maintenance. Radio and TV interference has been reduced to a minimum. The use of high temperature insulation greatly improves operating efficiencies and generator life.

MODEL 5182 — 5000 WATT

This unit is conservatively rated at 5000 watts with 25% surge capacity and is capable of delivering continuous power at either 115 or 230 volts. Weighs only 215 lbs.

Type — Revolving field alternator. Voltage Regulation — Reactor type. 5%. Rectifier — plug-in type. Output Receptacle — Two 115

volt 2-prong polarized, one 115 volt twist-lock and one 230 volt twist-lock. Power Factor — All rating are based on unity power factor. Unit — CSA approved.

Model No.	Watt Rating	Type Start	AC Volts	Engine	Net Wt. Lbs.	Each
5182	5000	Rope	115/230	Lauson 215		\$383.25
5183‡	5000	Electrical	115/230	Lauson 220		447.75

MODEL 5056 — 2500 WATT

The model 5056 is powered by a dependable four cycle, single cylinder, air cooled engine. The power unit accessories considered standard include washable air cleaner element, recoil starting, low tone muffler and mechanical governing for close frequency regulation, carrying handle, and vibration isolating mounting base. 115/

230 volt, single phase, 60 cycle, 3600 RPM.

Model No.	Watt Rating	Type Start	AC Volts	Engine	Net Wt. Lbs.	Each
5056	2500	Recoil	115/230	Lauson 108		\$259.50

5081‡	2500	Electric	115/230	Lauson 128		318.00

*With LPG Carburetion. ‡All Electric Start units have Battery Charging feature.

GENERAC NIAGARA ALTERNATORS

MODEL 5055 - 1750 WATTS

The model 5055 is powered by a dependable four cycle, single cylinder, air cooled engine. The power unit accessories considered standard include washable air cleaner element, recoil starting, low tone muffler and mechanical governing for close frequency regulation, carrying handle, and vibration isolating mounting base.

Alternator — single phase, 115 volt AC. 15.2 amps., 3600 RPM, 60 cycle. Output receptacle — two 115 volt, 2-prong polarized.

Model No	Watt Rating	Type Start	AC Volts	Engine	Net Wt. Lbs.	Each
5055	1750	Recoil	115	Lauson	78	\$184.50

GENERAC NIAGARA ELECTRIC CHAIN SAW

For home, farm and construction. Powerful enough for tough jobs, yet light enough for ease of handling.

Features high temperature motor insulation, turbine fan cooling, hardened gears, heavy duty bearing with ball bearing thrust on armature shaft, hardened drive sprocket — plus the manual reset overload protector to guard against motor burn outs.

Model 5394 — 10-Inch Saw — non-oiler — 115 volt — AC motor. Weighs only 12 lbs. Motor draws 11 amps. 6 foot cord and 3-wire polarized plug included.

Shpg. wt. 14 lbs.each \$69.50

No. 25247 Replacement Chaineach 15.75

Model 5395 — 13-Inch Saw with plunger-type oiler — 115 volt, AC. Motors draws 13 amps. Motor 35% larger than the 10" saw. Weighs only 14 lbs. 6 foot cord and 3-wire polarized plug included.

Shpg. wt. 16 lbs.each \$84.50

No. 25563 Replacement Chaineach 18.75

Model 5396 — 16" Saw with plunger-type oiler — 115 volt, AC. Weighs only 16 lbs. Motor draws 15 amps. Motor 35% larger than the 13" saw and 70% larger than 10" saw. 6 foot cord and 3-Wire polarized plug.

Shpg. wt. 18 lbs.each \$98.50

No. 25565 Replacement Chain.....each 21.50

ZEUS PORTABLE ELECTRIC POWER UNITS

Primarily Designed for Public Utility Applications

Model ZA-1500-GBT

Model ZA-1500 GCE

The heart of every Zeus generator is the maintenance-free, heavy-duty Zeus Permanent Magnet Alternator which has only one moving part. Eliminated are brushes, armature windings, slip rings and commutators, major sources of wear and tear that cut the life of old style generators. It also can absorb extreme surge overloads without damage. Because of the alternator, Zeus generators weigh 24% less than comparable old-fashioned electric generators.

Other features are an extra-heavy welded steel frame, extra-quiet muffler, weather-protected electrical connections, and reliable powerful Lauson engines.

Standard Equipment includes: Visual Fuel Gauge and Visual Oil Level Indicator, Integral Duplex Receptacles, Carrying Cradle, Rubber Shock Absorbing Feet, Recoil Starter. Instruction book and a 1 year warranty. Approximate weight: Net — 106 lbs., Shipping — 120 lbs.

CADIZ ELECTRIC PLANTS

FOR PRIMARY OR STANDBY POWER

200KW Standby Diesel Generator — 120/208 Volts

For the utmost in dependable primary or standby power, alternators of the latest design are combined with engines of well known manufacturers to form conservatively rated power units which will deliver their intended output year after year.

Generator units are available for operation with diesel, gasoline, natural gas, or LPG fuels.

All appropriate accessories are available for all types of installations including automatic transfer switch and automatic starting controls.

Cadiz Diesel Generator Sets
Standby or Continuous
10KW to 400KW

Cadiz Gasoline Generator Sets
Standby or Continuous
5KW to 100KW

POWER-LINE GENERATORS

PLG-2000 GENERATOR

POWER — wherever and whenever needed.

The Power-Line Generator will operate as many as four ½" electric drills at one time, or jig saw, sander and Skil saw at once. Most plug-in type electrical appliances can operate from this powerful unit.

Operation — Powered by vehicle fan belt or by adding extra pulley and belt to DC generator.

Controls — Panel contains on-off switch, AC voltmeter, outlet and cable.

Output — Maximum 2500 watts at 4500 RPM
2000 watts at 3600 RPMS, 60 cycle.

Amperes — 15.5 AC — Field Current — 10 Amp.
DC. Shipping weight 40 lbs.

Size: 10½" x 5½".

GENERAL ELECTRIC INSTRUMENT TRANSFORMERS

General Electric's Hy-Bute/60* instrument transformers set industry wide standards for quality, service, and versatility. All G-E butyl-molded instrument transformers conform to ASA insulation standards.

Butyl requires no maintenance, G-E transformers will not corrode, harden or crack with age or extreme weather; never need painting; are easy to clean, have no porcelain insulators to break.

Butyl lowers installation costs. Tough, flexible butyl construction protects against mechanical shock, damage; are up to 50% smaller, 33% lighter than other units of equal ratings for fast, easy handling.

Butyl cuts inventory costs. Any-angle mounting of G-E's butyl-molded instrument transformers supersedes bottom, top, and side-connected designs . . . simplifies stocking and ordering.

Butyl increases safety. Butyl cannot catch fire or explode. And at high voltage, Hy-Bute/60 insulation prevents creep-tracking.

These transformers are available in a wide variety of types to meet all application needs: current; potential; indoor-outdoor; window; bar; bar; wound; miniature; fused or unfused; 600 to 15,000 volts.

CURRENT TRANSFORMERS

Type JCH-O

Type JCW-O

POTENTIAL TRANSFORMERS

Type JVP-O

Type JWV-3
(Types JWV-4 and JWV-5 are similar in appearance.)

Type	Transformer Rating†		Cat. No.	List Price, Each	Application	
	Primary Voltage	Ratio			Circuit Voltage Line-to-Line	Permissible Transformer Primary Connection
Indoor-Outdoor Transformer						
JVP-O	480	4:1	760X32G4	\$78.00	480	Δ or Y
Outdoor Transformers						
JWV-3	2400	20:1	680X1	\$183.00	2400	Δ or Y
JWV-4	7200	60:1	685X55	303.00	7200	Δ or Y
JWV-5	14400	120:1	685X59	350.00	14400	Δ or Y

† For continuous operation, the transformer primary-voltage rating should not be exceeded by more than 10%. Under emergency conditions, over-voltage must be limited to 1.25 times the transformer primary-voltage rating. It is recommended that the system line-to-line voltage not exceed the transformer insulation-class voltage.

GENERAL ELECTRIC WATTHOUR METERS

General Electric provides a complete line of single-phase and polyphase watthour meters and watthour demand meters and meter sockets.

Extended-range current capacity of 15-ampere meters is 100 amperes (Class 100), and of 30-ampere meters is 200 amperes (Class 200).

Both the single-phase and polyphase families of meters incorporate magnetic suspension systems which provide time-proven savings in maintenance and sustained accuracy of calibration. For installation of watthour meters refer to Pocket Guide GET-2669.

INDEX OF TYPES FOR ALTERNATING CURRENT

SINGLE-PHASE, SINGLE-STATOR, 60-CYCLE
Types I-60, I-55 and I-50

Type I-60-S

Type I-55-A

The single-phase Types I-60, I-55 and I-50 watthour meters include models which meet all single-phase metering needs. Each of these meters incorporates magnetic suspension bearings, surge relief, rigid permanent assembly, and long-term sustained accuracy.

Both the I-55 and the Certi-Seal* I-60 meters are sealed against entrance of dust, insects, and other maintenance-causing contaminants, thus offering virtually maintenance-free performance for the life of the meter.

Approximate shipping weights: for "S" type, 5 1/2 lb.; for "A" type, 6 lb.

*Trade-mark of General Electric Co.

TWO-STATOR, 3-WIRE, 60-CYCLE
TYPE V-62-S

Type V-62-S

Type V-62-S 240-volt and 480-volt meters for 3-wire, 3-phase circuits are rated for service installations of 100 or 200 amperes when used with appropriate 5-terminal sockets. The 120-volt meters are for 3-wire, 120/208-volt network service, 100 or 200 amperes.

Approximate shipping weight, 10 lb.

Type V-62-S Meters with 5-Dial x1 Registers†

TWO-STATOR, POLYPHASE, 3-WIRE, 60-CYCLE
TYPES V-63-S AND V-63-A

Type V-63-S

Type V-63-A

Type V-63 meters in both self-contained and transformer ratings are intended for use on 3-wire, 1-, 2-, or 3-phase circuits. Transformer-rated meters are provided with potential-indicating lamps.

Type V-63-A is for bottom connection and the Type V-63-S is for socket mounting (8-jaw socket).

Approximate shipping weights: for "S" type, 10 lb.; for "A" type, 13 lb.

GENERAL ELECTRIC TYPE IB-10 PORTABLE STANDARDS, 60-CYCLE

This G-E standard combines, for the first time, the capacity essential for the testing of both high- and low-current-rated meters with the light weight and small size of the best low-capacity standards.

Wide operating range and excellent testing flexibility have been obtained by the use of four current coils. All coils will carry 20-per-cent current continuously. Thus, service meters of all ratings up to 100 amperes can be tested.

The Type IB-10 standard represents advancement in all details. It has a completely new electromagnet with low inherent errors and excellent load, voltage, and temperature characteristics. Excellent balance (accuracy) between current circuits is inherent in the design.

The IB-10 is the first standard to use the G-E anti-parallax arrangement of dial and pointers. This promotes speed and accuracy because the reading is always the same regardless of the angle from which the scale is viewed. The large sweep hand, coupled to the disk shaft, makes one revolution for each one of the disk. The antiparallax scale is divided into 100 clearly marked divisions in order that readings even closer than one one-hundredth of a revolution can easily be taken. Small dials within the large one make it possible to take readings up to 100 revolutions of the disk.

GENERAL ELECTRIC TYPE MC PHASE-SHIFTING TRANSFORMERS

For Var (reactive volt-ampere) Metering

Class 10 watt-hour meters rated 120 or 240 volts can be used to measure reactive power; i.e., kilovar-hours when their potential coils are connected to a proper MC phase-shifting transformer. Use a Type MC-63, MC-65 or MC-66 transformer on the respective V-60, DS-50 or DS-60 meter. For example, an MC-63 transformer with a V-63, DS-53 or DS-63 meter.

Usually the var-hour meter should be equipped with a detent.

The transformers listed below are equipped with an internal test switch.

Voltage		Frequency, Cycles	Cat. No.	List Price, Each

SOCKETS FOR POLYPHASE METERS
Type SV-60 Ringless Sockets

These outdoor Type SV-60 sockets are for use with transformer-rated (Class 10) and self-contained (Classes 100 and 200) polyphase watt-hour meters having 7, 8, or 13 blades. The socket connectors are suitable for use with either copper or aluminum wire.

Square Sockets
Die-cast
Type S-1 100-amp
Vertical or Horizontal Mounting

S-1 square socket with cover, 4-jaw

To convert from vertical to horizontal mounting:

1. Remove socket cover.
2. Interchange adjacent line jaws.
3. Interchange adjacent load jaws.
4. Rotate meter socket 90 degrees (so that hubs appear on sides, rather than on top, of socket).
5. Replace cover so that rain lip is on top and locking clip is on bottom.

① Lower right location provided with blank cover.
② Solderless connectors #4 — #1 AWG copper only.
③ Bottom mounted breaker box. Change prefix to "TBLB".
④ Units shipped with AB phase connected. BC or CA phasing can be made in field by repositioning connection link between vertical bus and C phase.

BROOKS PLASTIC PADLOCK SEAL

design requires no sealing tool. Plastic will not corrode, while its light weight makes for easier handling.

Plastic Padlock Seals feature colors for coding and a partial assembly for preventing tangling of hasps. The unique, self-locking

Price on Application

GENERAL ELECTRIC

HOOK-ON VOLT-AMMETERS

General Electric Types AK-4 and AK-5 hook-on volt-ammeters indicate a-c volts when attached to circuit by leads provided, and a-c amperes when hook is placed around current-carrying conductor. Each unit comes with 3½-foot voltmeter leads, and a black-leather carrying case.

FEATURES

- Single scale for each range.
- One-hand operation.
- Low current range—5 amperes.
- Pointer-stop mechanism—(AK-4 only) for measuring starting current surges and voltages at short duration.
- Insulated hook—eliminates possible grounding.
- Wound hook—minimizes position error.
- Dovetail joint—reduces possibility of errors due to dirt in gap or improper closing of hook.
- Shock resistant—case is molded of rubber phenolic.
- Screw-in voltage leads—provides maximum safety to operator.

Type No.	Range of Measurement	Catalog Number	List Price, Each
AK-4	10 /30 /100 /300 /800 amp a-c 150 /300 /750 volts a-c	583X63	\$ 39.00
AK-5	5 /20 /80 /350 amp a-c 150 /300 /750 volts a-c	583X64	64.00

BUSADA PLASTIC WATTHOUR METER COVERS

Cuts replacement costs. Constructed of unbreakable clear plastic. Will not shatter.

Withstands rough usage. Has high impact strength. Resists outdoor weathering.

Easier to install — safe to handle.

A seal-tight rim eliminates the use of a gasket. Provision is made for tamper-proof integral locking.

Price on Application

SQUARE D VOLTAGE TESTER

The Square D Voltage Tester is the safest, most durable, most dependable voltage tester ever made. It may be dropped, jolted and generally mistreated and yet will still indicate the correct voltage. Both the 5008 (non-fused) and the 5008-S (fused) voltage testers are designed for daily general purpose testing of secondary residential, commercial and industrial circuits with extreme reliability.

APPLICATION: For secondary distribution systems rated from 110-550 volts AC at 60 cycles and from 125-600 volts DC.

SPECIFICATIONS: Mechanism: Solenoid type with magnetic polarity indicating cap. Construction: One piece molded case with slotted receptacle for mounting prods. 30 inch oil resisting rubber covered leads. Easy-to-read, color-coded, non-metallic indicating scale. 6 inch probe with retractable prod cover. Rating: AC — 110-220-440-550 volts, DC — 125-250-600 volts.

always call GRAYBAR first!*

AMPROBE INSTRUMENTS

ROTARY SCALE MODELS

Offer you these outstanding features. • Only the Ohms scale plus one voltage scale or current scale is visible at any one time, providing greater reading speed and accuracy; on models other than RS-3 or RS-1000 only scale selected appears. • Magnified unbreakable window. • Pointer-lock "freezes" pointer at reading. • Accurate within $\pm 3\%$ full scale reading. • One hand operation.

MOEEL	RANGES	PRICE
RS-1	0-6/15/40/100 Amps A.C. 0-150/600 Volts A.C.	\$43.85

Deca-Tran A50-1	one	one	—
Price	\$94.50	\$103.85	\$76.85

PHASE SEQUENCE ADAPTOR

The Model PSA-1 Phase Sequence Adaptor is used to determine the phase sequence of polyphase circuits. When used in conjunction with any AMPROBE RS model it permits you to determine phase sequence of motors and other electrical equipment using three phase lines up to 550 volts. Price w/ case: \$11.85

AMPROBE® DECA-TRAN

The Model A-50-1 AMPROBE Deca-Tran can be used with any model AMPROBE to extend the amperage ranges 10 times up to 1200 amps, intermittent, 600 amps continuous.

Model A-50-1 w/2' Line Cord Price: \$30.50

AMPROBE® JUNIOR TEST-MASTER KITS

The AMPROBE Jr. Test-Master Kit consists of a specially designed leather case that contains one of the all new YO AMPROBE Jr. voltage testers, an AMPROBE Energizer, battery attachment and test leads.

The New YO models are the only precision instruments in their price class that measure voltage, amperage and resistance, instantly and accurately on a calibrated scale. Price: \$37.85

MODEL	3 AMMETER RANGES (full scale) BASIC INST.	2 VOLTAGE RANGES

AMPROBE® JUNIOR LINE-PROBE

Unique, versatile four-in-one pocket-sized tester. Not only lets one man trace up to 10 circuits at one time... it measures voltage ($\pm 3\%$ FS)... gives current readings "in-a-snap"... and checks for continuity. Pick from four models... all furnished with 10 station markers, two station marker holders, voltage leads, grounding leads, fused battery attachment and case.

Price: \$38.50

MODEL	VOLTS, AC	AMPS, AC
ALP50	0-125/250	0-50
ALP550	0-150/600	0-50

AMPROBE® ENERGIZER

The Model A-45L ENERGIZER permits current readings on permanently wired low-current electrical equipment by simplifying series connection. It increases the sensitivity of your ammeter 5x or 10x for more precise readings directly at outlets by "splitting" double conductor line cords while the appliance is connected to the line. Capacity 10 amps. Price w/weatherproof pouch: \$6.75

AMPROBE SERVICE AND INDUSTRIAL RECORDERS

CASED MODELS (Fig. 1)

Supplied with permanently attached motor line cord and one roll each of necessary strip charts. Meter line cord, extensions, adaptors, transducers, etc. supplied when indicated.

FLUSH-MOUNTING MODELS (Fig. 2)

Supplied with one roll each of necessary strip charts and mounting hardware. Transducers, probes, etc. supplied when indicated. Motor leads not furnished.

*Indicates the availability of this model in flush-mount version. Ranges and Specifications same as Leather cased models. See fig. 2 for configuration First prefix letter "L" of model number indicates Leather Cased. Prefix letter "F" indicates Flush-Mounting.

BIDDLE ELECTRICAL TESTING AND SPEED MEASURING INSTRUMENTS

MEG TYPE OF MEGGER® INSULATION TESTERS

The hand-operated model shown, rectifier-operated instruments and dual-operated testers are available with ranges up to 10,000 megohms and 1000 volts d-c. All available with divide by 10, ohm scale, and capacitance discharge switch.

Cat. No.	Description	Each
7679-1	0 to 1000 megohms, 500 volts d-c, complete with No. 7699 Fabrikoid Case and 12 ft. leads	\$370.00

MAJOR MEGGER® INSULATION TESTER

For the great majority of insulation and continuity tests. Four voltages (100, 250, 500 and 1000 volts) in the 200 megohm low range model and three voltages (250, 500 and 1000 volts) in the 2000 megohm high range instrument. Ohm scales for continuity measurements also included on both models.

Cat. No.	Range	Each	Cat. No.	Range	Each
70154	Low	\$250.00	70158	High	\$275.00

Both models complete with case and 12 ft. leads.

MARK III MEGGER® INSULATION TESTER

A handy, constant voltage tester available with 100 megohm range at 500 volts d-c. Ohm scale with range to 10,000 ohms also available. The convenient camera-type case contains instrument and test leads — operate without removing case.

Cat. No.	Test Voltage	With leather case & 12 ft. leads
805	500	\$140.00
With Ohm Scale and Selector Switch		
805-1	500	165.00

BATTERY MEGGER® TESTER

This new, completely transistorized, portable testing instrument provides continuous measurement from 0 to 5 megohms for resistance tests and 0 to 200 megohms for insulation tests. It is powered by six size AA (Penlite) cells.

Applications include testing of all forms of electrical equipment, electronic components and wiring circuits. Ideally suited for making insulation resistance tests in accordance with the National Electrical Code.

Cat. No.	Description	Each
822	0 to 200 megohms, 500V. DC	\$125.00

Complete with leads and leather case.

MEGGER® (NULL BALANCE) EARTH TESTER

A new, highly sensitive method of measuring earth resistance. The accuracy of this instrument is not affected by electrode resistance up to 1500 ohms — a guard terminal is provided for use when probe resistances are above 1500 ohms. The range is 0.1 ohm to 9990 ohms in four overlapping ranges. Accuracy ± 1% of range in use — digital read-out at a glance.

Cat. No.	Description	Each
63220	Megger Earth Tester	\$290.00
63850	Leather Case	35.00
63579	Accessory Kit consisting of No. 63578 Carry-all, No. 63576 Leads and No. 63580 Ground Rods	80.00

MOTOR ROTATION TESTER

For determining:
 ... direction of rotation 1-, 2-, or 3-phase motors before connecting to line.
 ... phase rotation or sequence of energized power circuits.
 ... polarity of instrument and power transformers.
 ... phase and polarity of unmarked windings in motors.
 Connect at once — correctly — any size motor. Also use it to test circuits, check phase sequence and identify windings or multi-speed or multi-voltage motors.

Cat. No.	Description	Each
80060	50 and 60 Cycles (0-600 volts)	\$130.00

BIDDLE SPEED INDICATORS

Biddle Chronometric Speed Indicators indicate average speeds directly, without any calculations for speeds up to 100,000. The spindle is set in ball bearings and requires no lubrication.

Cat. No.	Range RPM		Each
	Large Dial	Small Dial	
9915	0 to 100	0 to 1000	\$65.00
9920	0 to 1000	0 to 10,000	65.00

BIDDLE ELECTRICAL TESTING AND SPEED MEASURING INSTRUMENTS

TACHOMETERS

These easy-to-read and handy tachometers for continuous speed readings have accuracies of within $\pm \frac{1}{2}\%$ of full scale deflection of the selected range. On the Cat. 461 the range-changing device on the barrel is color coded to the three range figures on the scale for quick identification and reading.

Both instruments have open easy-to-read scales.

Cat. No.	Range	Each
	Eddy-Current Type — 3 Ranges	
461	0 to 800, 0 to 1600, 0 to 4000.....	\$115.00
	Centrifugal Type — 5 Ranges	
554	30 to 120, 100 to 400, 300 to 1200, 1000 to 4000, 3000 to 12,000.....	95.00

FRAHM RESONANT REED TACHOMETERS

For checking speeds quickly and accurately without contacting moving parts. They are safe and dependable. No moving parts to wear out — no maintenance — no oiling.

Cat. No.	Range RPM	Each
2516	1000 to 4000 (2 rows of 21 reeds).....	\$ 50.00
3205	1000 to 6000 (2 rows of 61 reeds).....	145.00

FRAHM RESONANT REED FREQUENCY METERS

The inherent simplicity low cost and unflinching accuracy of these instruments has earned wide acceptance for them in many fields. Even in applications requiring continuous operation for many years they perform accurately and dependably with little or no adjustment, maintenance, or repair of any kind.

With new techniques, employing improved methods of tuning and fabrication, our standard instruments have consistently outperformed comparable equipment under varying conditions. Standard meters have a permanent accuracy of 0.3% calibrated to 0.2%.

Cat. No.	Range CPS	Size	Each
2997	(115 v.) 380 — 420	2 1/2"	\$44.00
4967	(115 v.) 55 — 65	3 1/2"	31.00

15 KV DIELECTRIC TEST SET

15 kv/2-5 ma

Maximum output current 2 ma for continuous and 5 ma for 12 min service. This set is designed for maximum safety with all protection devices. It is easily portable (37 lbs.) and is built for withstanding hard service in the field without lowering performance standards.

Cat. No.	Output	Each
22015	0-15 kv	\$790.00

**SIMPSON MULTI-TESTERS
AC-DC VOLT-OHM MILLIAMMETER**

20,000 Ohms per volt DC—
5,000 Ohms per volt AC.

Voltage Ranges

DC: 0-250 mv; 0-2.5v; 0-10v; 0-50v; 0-250v; 0-1000v;
0-5000v.

AC: 0-2.5v; 0-10v; 0-50v;
0-250v; 0-1000v; 0-5000v.

AF: 0-2.5v; 0-10v; 0-50v;
0-250v.

DB: —20 to +10 db; —8 to +22 db; +6 to +36 db; +20 to +50 db. (1MV—600 ohms.)

Current Ranges

DC: 0-5ua; 0-1 ma; 0-10 ma; 0-100 ma; 0-500 ma; 0-10 amps.

Resistance Ranges

0-2000 ohms (12 ohms center); 0-2000K ohms (1200 ohms center); 0-20 meg. (120K ohms center.)

Accuracies

DC volts $\pm 3\%$ F.S.; AC volts $\pm 5\%$ F.S.; DC resistance $\pm 3\%$ of arc from absolute value of resistance measured.

Size: 5 1/4" x 7" x 3 1/8". Weight: 3 1/2 lbs. With roll-top safety case; test leads and operator's manual.

Model 260RT AC-DC VOM.....each \$64.00

MODEL 230 AC-DC VOLT-OHM-MILLIAMMETER

The small size of Model 230 VOM makes it a handy, multipurpose appliance tester in shop or home. You can use it for checking shorts in home wiring, motors, starting condensers and switches, relays, light switches, thermostats, solenoids, light cords, control equipment, etc.

AC Volts: 10,250,1000 (400 ahms per volt). DC Volts: 10,50,250,1000 (1000 ohms per volt). DC Milliamperes: 10,50,250. Ohms: 0-1000, 0-100,000.

Model 230 AC-DC VOM.....each \$40.00

MIDGETESTER AC-DC VOLT-OHMMETER

Rugged core magnet meter movement. Ideal for appliance repair, radio-TV service, etc. Self shielded. Fits easily into shirt pocket.

Voltage Ranges

DC: 3v; 12v; 60v; 300v; 1200v.
AC: 3v; 12v; 60v; 300v; 1200v.

Resistance Ranges

0-10K ohms (120 ohms center); 0-100K ohms (1200 ohms center); 0-1 megohms (12K ohms center); 0-10 megohms (120K ohms center).

Accuracies

DC volts $\pm 3\%$ F.S.; AC volts $\pm 5\%$ F.S.; DC resistance $\pm 3\%$ of arc from absolute value of resistance measured.

Size: 2 3/4" x 4 1/2" x 1". Weight: 10 oz. Complete with test leads and operator's manual.

Model 355 Midgetester.....each \$47.00
No. 6355 Leather Zip Case.....each 5.00

EMERSON ELECTRIC MOTORS

40°C BELTED FAN AND BLOWER MOTORS

Split-Phase, Resilient Mount

Capacitor Start, Resilient Mount

Resilient base, automatic overload protector, sleeve bearing, reversible. Convenient terminal board. Quiet, smooth operation.

GENERAL ELECTRIC FORM G AND FORM G2 A-C MOTORS

NEMA 48-, 56-, 56H- and 56HZ-Frame

NEW FORM G2, OPEN, SPLIT-PHASE, TYPE XB, 60 CYCLES

Type XB motor with resilient base

Features
Shorter, lighter motor with open (dripproof) construction, continuous duty, quiet all-angle sleeve bearings, attractive blue-gray enamel finish, detachable base.

Where to Use

General Purpose Motors—Specially suited for loads which need moderate starting torque (approx 130% of full-load torque). Starting current is normal and meets all electrical codes for automatically controlled devices. Service

factors of 1.25 to 1.40 permit motors to handle loads above nameplate rating. This is advantageous if maximum load is doubtful. Typical applications are furnace and air-conditioning fans and blowers, office machines, and similar devices.

Special Service Motors—Can be used on loads requiring moderately high starting torque (approx 200% of full-load torque). They have high starting currents and should be used only on applications where starting is infrequent. Since service factor is 1.0, motors should not be used continuously over rated horsepower. Typical applications are summer cooling fans, evaporative coolers, small drill presses, jig saws, grinders, etc.

‡230-volt ratings also available.

OPEN, CAPACITOR-START, TYPE KC, 60 CYCLES

Type KC motor with solid base

Features
Open (dripproof) construction, continuous duty, quiet all-angle sleeve bearings, blue-gray enamel finish, detachable base.

Where to Use

General Purpose Motors—Specially designed for applications requiring exceptionally high starting torque (up to approx 350% full-load torque).

Starting current is normal. Service factors of 1.15 to 1.35 provide load-carrying ability above nameplate rating. These extra-heavy-duty motors are ideal when maximum load is doubtful. Typical applications are pumps, air-conditioning compressors, conveyors, industrial equipment, etc.

Special Service Motors—Recommended for use on hard-to-start loads (starting torque 250% of full-load torque). Starting current is normal. Since service factor is 1.0, motors should not be used continuously over rated horsepower. Typical applications are evaporative coolers, milking machines, attic fans, saws.

*Motor rated 115 volts and is NEMA 48 frame.

†Motor has double shaft extension (1 1/2 in. by 1/2 in. each end).

‡Motor has double shaft extension (1 1/8 in. by 3/8 in. each end).

§Motor has moderate starting torque.

¶Motor has ball bearings.

ΔMotor has welded-on-base.

φMotor has two capacitors.

θMotor has outboard fan.

¶Motor has service factor 1.0.

OPEN, THREE-PHASE, TYPE K, 60 CYCLES

Where to Use
For continuous-duty application where power supply is three-phase. Normal torque for starting, high pull-up torque for inertia loads, and high breakdown torque for peak-load conditions.

Features
Continuous duty, all-angle sleeve bearings for moderate thrust or heavy-duty ball bearings with 10-year lubrication for heavy thrust, attractive blue-gray enamel finish.

Type K open motor

GENERAL ELECTRIC TRI/CLAD[®] 700 LINE POLYPHASE INDUCTION MOTORS

Type K, Normal Starting Torque, NEMA Design B 60 Cycles -230/460 Volts*—Class B Insulation, 40 C Ambient

These advanced design motors are manufactured to new NEMA standards, and they offer lighter weight, smaller size, longer bearing life, and a host of other advantages.

Motors in frames 143T through 184T in dripproof and standard enclosed constructions feature precision diecast aluminum frames with integrally cast feet, and cast-iron end shields. They offer excellent corrosion resistance in most industrial atmospheres.

Motors in frames 213T through 447T feature cast-iron frames and end shields and a new Class B insulation system that offers greater moisture resistance and high dielectric strength for long life.

General Electric offers selected "off-the-shelf" super-standard Tri/Clad 700 Line motors at economy prices. The prices shown apply only to the model numbers given. The only allowable modification is for voltage as explained in the footnote to the table. For any other deviation whatever, and for ratings not included, consult Graybar.

GENERAL ELECTRIC TRI/CLAD[®] 700 LINE SINGLE-PHASE INDUCTION MOTORS

Type KC motors are capacitor-start motors. Starting currents are of NEMA Design L. Type KC motors are suitable for use on fans, blowers, pumps, air compressors, conveyors, masonry saws, and other general-purpose applications.

Type KCJ motors are capacitor-start motors designed with high breakdown torques and high overload capacities to meet requirements of specific equipment such as farm applications, refrigeration compressors, sanding machines, hammer mills, and other applications requiring higher-than-standard torques. Consult Graybar for application recommendations before applying Type KCJ-motors.

Type KC dripproof, Tri/Clad 700 Line

Type KC dripproof, Tri/Clad '55'

TRI/CLAD SUPER-STANDARD DRIPPROOF MOTORS

115/230 Volts, 60 Cycles

Class B Insulation, 40 C Ambient

General Electric offers selected "off-the-shelf" standard a-c dripproof motors at new economy prices. The prices shown in this box apply only to the model numbers given. For any deviation whatever, and for ratings not included, consult Graybar.

GENERAL ELECTRIC PACKAGED ELECTRIC ADJUSTABLE-SPEED DRIVES

G-P 100*SCR D-C ADJUSTABLE-SPEED DRIVE, 1-15 HP

General Electric's new GP-100 Drive answers the need for a low-cost d-c adjustable-speed system. It is designed for those applications previously restricted, by initial cost considerations, to less versatile, higher maintenance drives. The GP-100 Drive is ideally suited for use with machine tools, conveyors, pumps, compressors, presses, paper converters, testing machines, welding positioners, packaging equipment, food machinery, and process line auxiliaries.

GP-100 Drive includes three basic components: a wall-mounted power unit, a remote wall-mounted operator's control station, and a d-c motor in either drip-proof or totally enclosed construction. For 1-5 hp applications, a completely new Kinamatic[®] motor is used. This motor has been specifically designed to minimize the problems of ripple and form factor normally encountered in operations on single-phase rectified power.

For applications 7½-15 hp, three-phase, a Kinamatic motor and a slightly larger power unit are employed.

both drives offer:

Wide speed range: stepless, controlled operation over a 30:1 speed range; up to 100:1 with a tachometer modification.

Excellent speed regulation: 2% of motor base speed with a 95% load change over the entire speed range. Regulation is improved to 1% with Tachometer modification.

Rated torque is available over entire speed range.

Adjustable linear timed acceleration from 2.5 to 10 seconds (within the torque capabilities of the drive).

Adjustable current limit from 80 to 150% rated current (torque), protects the driven machine as well as the drive.

*Trade-mark of General Electric Company

KINATROL[®] speed variator 1-750 HP

The Kinatrol Speed Variator is an eddy-current coupling adjustable-speed drive that operates directly from a standard industrial a-c power line. The incoming power goes to an induction motor. The constant-speed input of this induction motor drives an eddy-current coupling which electromagnetically provides an adjustable-speed output. Speed of the output shaft is adjusted by controlling the excitation on the coupling field coil.

The Kinatrol line includes both air-cooled and water-cooled couplings, and brakes with scores of modification possibilities.

Air-cooled 1-7½ hp drives are especially designed for those applications where size is an important factor. These ratings use the G-E Thinline* a-c motor, and in overall dimensions the drive unit is only slightly larger than a standard a-c motor.

Air-cooled 10-125 hp drives are similar to the 1-5 hp designs, but utilize a standard a-c induction motor.

Water-cooled 15-750 hp drives offer wide speed range in all ratings, and are applied where the required speed range cannot be provided by air-cooled units. Water-cooled units are especially recommended where adverse environmental conditions exist or where minimum noise is a requirement.

Drive unit and control modifications may be combined to suit virtually any application where sturdiness, low maintenance, minimum installed cost, and the versatility of an electric drive are vital.

CENTURY ELECTRIC COMPANY

**182-445U FRAME
TYPE SC—THREE PHASE INTEGRAL HP MOTORS**

**60/50 CYCLE • 208-220/440 VOLT • CLASS A INSULATION
40°C RISE DRIPPROOF • 55°C RISE ENCLOSED • BALL BEARING
NEMA DESIGN B NORMAL STARTING TORQUE
GENERAL PURPOSE • CONTINUOUS DUTY**

In addition to the basic line of motors listed, Century Electric Co. manufactures a complete line of motors and generators including apparatus designed for specific commercial and industrial applications:

- Close coupled pump
- Crane and hoist
- Oil burner
- Sump pump
- Vertical
- Multi-speed
- Fan and blower
- Brakemotor
- High torque

The typical speed-torque curves of Design B (Type SC) and Design C (Type SCH) show the higher starting torque of the Type SCH. The Type SC will start loads requiring less than 150% of full load torque at start. The Type SC has considerable higher pull-out torque. At full load the two types are very similar. Specific ratings may vary somewhat from the curves.

**PRICES LISTED APPLY TO
STANDARD MOTORS ONLY**

For modified or special motors refer to your local Graybar office for price and availability.

GENERAL ELECTRIC POLYDYNE® DRIVES—MECHANICAL A-C ADJUSTABLE-SPEED

The Polydyne drive is a low-cost, a-c motor driven device which permits adjustment of the output speed by a mechanical means. It employs a belt transmission consisting of two adjustable pulleys (one mounted on a driven shaft and one on a driving shaft), which are connected by a rubber belt loop. Speed adjustment is accomplished by mechanically sliding the pulley halves on a splined shaft. This permits the belt to "ride" closer to, or farther from, the center of the pulley, and changes the effective diameter of the two pulleys thereby producing a speed reduction or increase.

The Polydyne drive can be applied wherever an adjustable-speed need exists. In general, those applications include conveyors of all types, continuous-process manufacturing, metal-work equipment and mixing, pumping and proportioning operations. A partial list of specific applications include:

Packaging machines, Grinders, Punch presses, Extruding equipment, Belt conveyor, Chemical mixers, Printing presses, Buffing machines, Tumbling barrels, and Wire-forming machines.

Hp Range	Range of Output Speeds, Rpm (Based on 1750-Rpm Motor Input)	Controls	Description
Parallel Shaft			
¼ thru 50 (A-c)	4200 to 5 (approximate)	Local or remote. Types Available: Mechanical Electrical Pneumatic	A-c motor is flange mounted to belt transmission housing, consisting of two adjustable pulleys connected by a belt loop. Unit can be geared or nongeared depending on required output speed.
Right Angle Shaft			
¼ thru 2 (A-c)	500 to 0.9 (approximate)	Local or remote. Types Available: Mechanical Electrical Pneumatic	A-c motor is flange mounted to belt transmission housing, consisting of two adjustable pulleys connected by a belt loop, unit is geared with the output shaft at a right angle to the motor shaft.

GENERAL ELECTRIC GEAR-MOTORS

A-c and d-c gear-motors are available in a wide range of speeds, horsepowers, motor characteristics, and designs to meet compact, low-speed, and high-torque drive requirements for such applications as:

Powered conveyors (all types), mixers, hoists, crushers, agitators, tumbling barrels, machine tools, pumps, presses, feeders, elevators, and disposal equipment.

Basically, three common characteristics apply to the line:

- Compactness—the drives, consisting of motor and gear train are offered as one easy-to-install package.
- Low-speed operation—gear motors efficiently reduce standard motor input speeds to meet lower speed requirement.
- High torque delivery—since gear motors provide positive transmission of lower speeds through a gear train, they function essentially as torque multipliers.

The integral type and all-motor designs provide maximum power efficiency at the output shaft, while the right-angle unit saves mounting space. In addition, the all-motor unit permits fast motor replacement.

Hp Range	Range of Output Speed, Rpm (Based on 1750-Rpm Motor)	Gear-motor Type	Description
⅓ to 75	780 to 13.5	Integral Type	Motor is flange mounted to gear to form integral type unit. A-c or d-c.
1 to 75	350 to 13.5	All-motor Type	Standard NEMA footed motor mounts on supporting base direct coupled to gear reducer. A-c or d-c.
⅓ to 5	197 to 6	Right-angle Shaft	Motor is flange mounted to gear. Output shaft is at right angles to motor input shaft. A-c or d-c.

GENERAL ELECTRIC SPEED REDUCERS

FOOTED SPEED REDUCERS

Footed speed reducers, due to their prime mover and connection flexibility, are applicable on a wide range of applications from agitators to windlasses. It is an extension of the parallel-shaft gear-motor line and is available from 1 to 200 rated horsepower, from 520 thru 13.5 rpm (based on 1750-rpm input). The unit is designed particularly for applications where mounting space is at a premium. It can be belt, chain, or direct-connected to electric motor, gasoline, or diesel engine prime movers, or to the driven machine. Output speeds may be varied simply by changing belt or chain ratios.

Price on Application

SHAFT-MOUNTED SPEED REDUCERS

The shaft-mounted speed reducer is designed for applications where it is advantageous to mount the geared speed-reduction unit directly on the driven shaft. Typical applications include conveyors, bucket elevators, rotary screens, apron feeders, car unloaders, gravel classifiers and agitators.

It is available from ¼ to 4 rated horsepower, from 420 thru 10 rpm (based on 1750-rpm input).

GENERAL ELECTRIC MANUAL REVERSING DRUM SWITCHES

CR102—2 Hp Max, 600 Volts Max

CR102 Type A

CR102 Type B

FEATURES

- Compact size.
- Shock-resistant construction.
- Wrap-around cover with 180-degree accessibility for easy installation.
- Large, easy-to-use, screw-type terminals.
- Separate conduit openings for incoming and outgoing leads.
- Easy-to-operate handle; Type B forms may be mounted in any of four directions.
- Four mounting holes in back of enclosure.
- Conversion of Type A forms from maintained contact to momentary contact in the field, without additional parts or tools.
- Cover can be removed by loosening one captive screw.

The Above Items Are Subject to 15% Discount

GENERAL ELECTRIC MANUAL MOTOR STARTERS
CR1062—Single and Polyphase, 7½ Hp Max, 600 Volts Max, 60 to 25 Cycles

FEATURES

- Front-connected, clamp-type terminals for easy wiring.
- Sturdy, vibration-resistant, anti-snap-action operating mechanism.
- Operating mechanism trips free on overload—can't be held closed.
- Barriers isolate contacts—quickly snuff arcs.
- Plenty of wiring room in enclosure.

ORDERING DIRECTIONS

1. Order motor-starting switch by nomenclature designation, CR and form no.; Example: CR1062S1A.
2. For 3-phase switches, order two overload-relay heaters by Cat. No.
3. For single-phase switches, order one overload-relay heater by Cat. No.

HOW TO SELECT HEATERS

From the table below select the device and type of enclosure desired. This will tell you what column to use in the table to the right to select the heaters needed.

‡ Size 1 only.

For continuous rated 40 C motors. For continuous rated 50 and 55 C motors, multiply full-load current of motor by 0.90 and use this value to select heater.

To protect the starter and motor during

short circuit, provide motor-branch-circuit protection in accordance with the National Electrical Code. In no case should the fuse rating exceed three-and-one-half times the motor full-load current.

* Specify coil voltage and cycle.

† For 380 volts, use 440-volt rating, but over 50 hp reduce hp rating to 85% of 440-volt value.

GENERAL ELECTRIC COMBINATION MAGNETIC STARTERS

CR107, CR108 Non-reversing—NEMA Sizes 0-5

FEATURES

- Reduced installation time—starter and disconnect or circuit breaker are installed in one, compact enclosure.
- Full front accessibility—hinged door opens full 180° for greater accessibility.
- Visual indication of operation—position of switch handle indicates whether device is "ON" or "OFF".

ORDERING DIRECTIONS

1. Specify starter by complete CR nomenclature. Specify coil voltage and cycles.

† Horsepower rating when time delay fuses are used.
 Δ For starting duty only. Long-time acceleration requires larger fuse or higher breaker trip rating.

‡ Includes 2 overload heaters and holding interlock, but not push button or fuses; heaters may be omitted or additional ones ordered at \$1.50 each list.

* Specify coil voltage and cycles.

† Based on NEC rules for single-element NEC fuses and for thermal magnetic trip circuit breaker except as indicated by (†).

The Above Items Are Subject to 15% Discount

GENERAL ELECTRIC MAGNETIC REVERSING CONTROLLERS

CR109 Across-the-line—NEMA Sizes 00-5

FEATURES

- Eliminates short circuits—interference-type of mechanical interlock prevents one starter or contactor from picking up while the other is energized.
- Cross electrical interlocking for additional protection—available in momentary contact push-button stations.

ORDERING DIRECTIONS

1. Specify controller by complete CR number and form. Specify coil voltage and cycles.

GENERAL ELECTRIC MAGNETIC CONTACTORS AND SWITCHES

CR105, CR2810 and CR2811 Forms

No Control Wiring—includes one NO Auxiliary Contact

FEATURES

- Straight-through wiring—line leads connected at top, load leads at bottom, to speed installation.
- Snap-slide disassembly—allows for contact inspection in 10 seconds, coil change in 30 seconds—without tools!
- Vertically-slanted contacts—resist contact contamination and bounce, increase starter life.

ORDERING DIRECTIONS

1. Specify contactor or magnetic switch by CR number and Form. Specify coil voltage and cycle.

GENERAL ELECTRIC HEATER SELECTION TABLES FOR FULL-VOLTAGE STARTERS

Overload Relay Heater Selection (Air Break Controls Only)

To select heaters for 1.15 service factor rated motors, use the actual full-load current of the motor and pick the heater catalog number from the "Heater Selection Table." For other motors, use the multipliers from the "Service Factor Conversion Table."

Example: Motor rated 1.2 ampere, 1.15 service factor
Starter—CR106, size 0, enclosed
Select heater CR123 C1.48A

Example: Motor rated 1.2 ampere, 1.00 service factor
Starter—CR106, size 0, enclosed
Select heater CR123 C1.31A

(Overload relays for size 5 starters and controllers may be selected direct from the "Selection Table" without the use of the "Conversion Table.")

Service Factor Conversion Table

A-C Motor Type	General Purpose Open 1.15 serv. factor	Totally Enclosed or Totally Enclosed Fan-cooled—1.00 service factor				
		Cont and Type KR	1 Hr.	30 Min.	15 Min.	5 Min.
Multiply Motor Amperes by and use "Heater Selection Table" below.	Use Table as Listed	0.90	0.80	0.75	0.70	0.60

Conversion Factors 1 Hp and Smaller Motors (Service Factor Greater than 1.15)

Horsepower	1	¾	½	¼
Multiply Name plate Current by and use table below.	1.1	1.1	1.1	1.15

How To Select Fuses

Provide motor branch circuit protection in accordance with Table 430-146 of the National

Electrical Code. In no case should fuse rating exceed 4 times full load motor current for magnetic starters; 3.5 times for manual starters.

HEATERS FOR FULL-VOLTAGE DEVICES

Heater Nomenclature	List Price, Each
CR123 C or F	\$1.50

Various types of enclosures help determine overload relay heater ratings. This table should be used to determine which column of motor full-load amperes applies for heater selection. Select in order, the device, the NEMA type of enclosure used and finally the column (A or B) to be used in the proper NEMA Size table.

Basic Device	NEMA Type of Enclosure	Use Heater Table Column	Quantity of Heaters Required
CR106	Open 4, 7, 9 1, 12, Flush Mt'd. (all)	A	2+
CR106		B	2+
CR107, CR108		B	2
CR109	Open, 4, 7, 9	A	2
CR109	1, 12	B	2

† 1 required for single-phase forms.

GENERAL ELECTRIC STANDARD-DUTY PUSH BUTTON STATIONS

CR2943 and CR2941—A-c or D-c, Continuous Current 10 Amp, 600 Volts Max.

FEATURES

- Offer dependable, economical control for a-c magnetic starters in NEMA Sizes 00-4.
- Easy-to-operate buttons.
- Positive make and break.
- Easy wiring and installation.

GENERAL ELECTRIC HEAVY-DUTY PUSH BUTTONS

CR2940 and CR2941—A-c or D-c, Continuous Current 10 Amp, 600 Volts Max.

FEATURES

- Offer dependable control for contactors and starters through NEMA Size 5.
- Units interchangeable within a station, and can be used with any of six color rings.
- Provide flexibility of application and color coding with a minimum stock.
- Full 180-degree accessibility.
- Back-mounted contact blocks.
- Choice of units.

*Specify coil voltage and cycles.

†May also be used in 3-phase circuit (3rd line goes directly to motor). Max hp: 1 1/2 hp at 220, 440, and 550 volts.

‡Circuits must be of same polarity.

ORDERING DIRECTIONS

Specify relay by complete CR nomenclature.

CR120 J RELAYS

FEATURES

- Multicircuit flexibility—Available in 16 forms from 1 to 4 circuits.
- Small, compact size—1 1/8 in. wide by 2 5/8 in. high.
- Easy to install—Two-hole mounting makes installation or conversion fast and easy.
- Convenient wiring—Large screw-type terminals.

GENERAL ELECTRIC GENERAL-PURPOSE COMPACT RELAYS

CR120 H—230 Volts Max A-c, 110 Volts Max D-c; 60 Cycles Max

FEATURES

- Variety of Forms—5-amp, 10-amp relays and latch forms and current sensitive relays.
- Not Position Sensitive—relays will operate in any position.
- Mounting Flexibility—forms available for front- or back-connection, plug-in or channel-mounting. Open relays either stud- or screw-mounted.
- Small Size—occupies only 3 to 5 cubic inches.

GENERAL ELECTRIC GEARED ROTARY LIMIT SWITCHES

CR115 E

FEATURES

- **Long Life**—Switch equipped with rugged bearings and shaft extension on either or both sides.
- **Rapid Reset**—Requires fewer turns to reset than other switches of this type.
- **Easy Adjustment**—Trip points of operating cams can be quickly and easily adjusted with standard screwdriver.
- **Versatility of Control**—Up to four precision snap-acting switches available; each will control independent function.

ORDERING DIRECTIONS

Specify CR number of limit switch from nomenclature table. Select shaft extension (by type of shaft end and desired side) and substitute suffix number in place of ** in device nomenclature.

GENERAL ELECTRIC INDUSTRIAL STRONG-BOX SOLENOIDS

FEATURES

- **Life**—New and unequalled mechanical life proven by many test hours.
- **Strong-box Coil**—Moisture-, oil- and shock-resistant.
- **Small Size**—Occupies 22 percent less space than previous forms.
- **Flexible Mounting**—Solenoids can be mounted in any of five different ways.
- **Versatility of Wiring**—Provisions for either lead or terminal type connection.

GENERAL ELECTRIC TRACK-TYPE LIMIT SWITCHES

CR115 G

**CR115 G
Lever Type**

**CR115 G Top
Plunger Type**

New CR115 G limit switch line is ideal for automatic machine functions and for all general-purpose applications wherever linear motion is to be controlled.

Switches may be ordered with any one of 60 different operating arms. Lever type momentary contact forms are universally convertible to clockwise operation,

counter-clockwise operation, or operation in both directions.

Oil-tight switch body is made of die-cast aluminum for rugged service. Terminals are out-front and identified.

Forms with 1NO-1NC contact arrangement have 1/2-inch conduit tap. Forms with 1NO-2NC or 2NO-1NC contacts have 3/4-inch conduit tap.

ORDERING DIRECTIONS

Order CR115 G forms by complete catalog nomenclature. Order CR115 GP forms and CR115 GB forms by description.

LEVER FOR CUSTOM ARMS

Has two 10-32 tapped holes for customer-mounting of own operator. No rollers.

Nomenclature	List Price
CR115 G56	\$2.00

*Uncoated rod may be cut to shorter length.

GENERAL ELECTRIC VANE-OPERATED LIMIT SWITCHES

FEATURES

- Has no arms, levers, or shafts—gives unlimited mechanical life.
- Switch completely encapsulated.
- Mounts in any position, with either the switch or vane on the moving equipment.

GENERAL ELECTRIC INDICATING LIGHTS

CR103 SQUARE INDICATING LIGHTS

CR103 square indicating lights are available in full voltage and transformer types in a variety of colors. Lenses may be translucent type or transparent type used with a diffuser. Legends can be engraved and filled on translucent lenses. Film legends, on material suitable for 120 C, may be inserted in transparent lenses. A colored filter may be used with clear or white lenses to show color only when the light is on.

GENERAL ELECTRIC CONTROL AND TRANSFER SWITCHES

TYPE SB-1

The SB-1 is a rotary, cam-operated device designed for a wide range of applications including control of electrically operated circuit breakers, small motors, magnetic switches, and transfer of meters, instruments, relays, etc. Two electrically separate contacts per stage offer wide range of contact arrangements. Navy approved SB-1N switch is manufactured for use in accordance with MIL-S-18396A.

SB-1 is rated 600 volts, 20 amp continuous, or 250 amp for three seconds.

Special enclosures are available including watertight housing, explosion-proof housing, and fabricated metal housing.

TYPE SB-9

The SB-9 is designed to fulfill the needs of industrial applications requiring unusually large numbers of repetitive operations, such as in steel mills, pulp extruder controls, and process controls.

This switch is similar to the SB-1 except that it has a more positive positioning device. It is furnished with a maximum of 16 stages and a maximum of 12 positions. A-c and d-c motor-operated mechanisms are available.

TYPE SB-10

The SB-10 combines contacts operated by rotation of the shaft and contacts operated by a lateral push or pull of the shaft, for such applications as motor-control

centers where lateral contacts eliminate need for separate STOP-START push-button station.

Rotary contacts operate independently of the lateral contacts. Only two lateral positions of the shaft are possible. Maximum of four stages push-or-pull; maximum of 12 stages permitted including rotary.

GENERAL ELECTRIC CONTROL AND TRANSFER SWITCHES

TYPE SBM

The SBM is a rotary, cam-operated, panel-mounted device for circuit breakers, motor controls, or instrument transfer. Its compact design affords close center-to-center line mounting to reduce

switchboard-space requirements. Two electrically separate and mechanically independent contacts per stage offer greater versatility of contact arrangement. Self-enclosed stage eliminates need for separate covers. Small opening in bottom allows quick contact inspection.

The SBM is rated for a mechanical life of 500,000 operations. Electrical ratings are 600 volts a-c or d-c, 20 amp continuous.

† Removable handles are not included in the price of the switch. These handles must be ordered as a separate item on the requisition at an additional charge of \$2.50 each.

HOW TO PRICE "SB" SWITCHES

The listed model switches are priced as follows:

Type	Base—Net Price Each*	Adder/Stage—Net Price Each*
SBM	\$16.00	\$2.50
SB-1	20.00	2.50
SB-9	33.00	2.50
SB-10	30.00	2.50

Each switch consists of a frame, shaft, fixed handle, escutcheon, and a number of stages consisting of a maximum of two contacts and a barrier all enclosed in a Textolite® cover. SBM construction provides its own enclosure not requiring a Textolite cover. Special housings and mechanisms require price adders to the above prices. Switches are described in Bulletin GEA-4746.

DIMENSIONS

GENERAL ELECTRIC IC8070 PLATE-TYPE FIELD RHEOSTATS

IC8070 Rheostat

These G-E plate-type field rheostats are field-control devices for all types of direct-current rotating equipment. They can be used to adjust the output voltage of a-c or d-c generators, and the speed of d-c motors.

Plate-type field rheostats are suitable for use in textile mills, paper mills, machinery manufacturing, steel mills, switchboard building, educational institutions and laboratories, etc. They are available for open-type,

totally enclosed, open-type concentric, totally enclosed concentric, open-type sequence operation, and totally enclosed sequence operation—all for front- or back-of-board mounting.

Features include (1) *constant resistance*—maintained by using resistance material affected only slightly by temperature; (2) *long mechanical life*—since contact segments and brushes are made of special alloy material with long-wearing qualities; (3) *versatility*—employing two adjustable stops, one at each end.

When ordering, include ohms resistance, maximum amperes, and voltage for rheostat required. If for use with d-c motor, include information on motor rating (Model No. or Serial No.), together with speed increase desired. If rheostat is to be used with other than a G-E motor, the order should state maximum shunt-field current and ohms resistance necessary to insert in the field current to give maximum speed increase. For detailed information, request Bulletin GET-3375.

Field Rheostats for Use with D-c Motors on General-purpose Applications*

GENERAL ELECTRIC IC2800 D-C CONTACTORS

Heavy duty and accessibility are the two special features of this line of d-c contactors, as regards their use by switchboard builders and panel assemblers for industrial service with machine tools, textile machinery, and the like.

IC2800 contactors are rated at 25-100 amp, 600 volts maximum.

Both single-pole and multipole contactors in all forms are unit-mounted, supplied already assembled in a sturdy steel base drilled for surface mounting. All

connections are made from the front.

Unit-style interlocks are available, factory-mounted, or separately for field mounting. These can easily be changed from normally open to normally closed; or from normally closed to normally open. For detailed information, request Bulletin GEA-6621.

GENERAL ELECTRIC LIMITAMP® CONTROL

One-high Limitamp control

Portable contactor lift used with three-high Limitamp control

Three-high Limitamp control

- | | | |
|--|--|-----------------------------|
| 1. Low-voltage compartment (swing-out panel in one-high) | 4. Shutters covering high-voltage terminals | 8. ON-OFF operating handle |
| 2. High-voltage compartment | 5. Cable compartment | 9. Snapout door lintel |
| 3. Barrier-separating components | 6. Power fuses | 10. Portable contactor lift |
| | 7. Drawout contactor with swing-open feature (rollout in one-high) | |

Limitamp control is high-interrupting capacity high-voltage control used throughout industry to control and protect squirrel-cage, wound-rotor, and synchronous motors. It can also be used to feed transformers and other power-utilization circuits.

Typical applications are in paper, steel, cement, rubber, mining, petroleum, chemical, and utility-type industries. Limitamp control is also typically used in water and sewage plants and public buildings for air conditioning, pumps and compressors.

Limitamp control is designed to meet NEMA requirements. It employs fast-acting current-limiting power fuses, a 400-ampere drawout air-break contactor, and ambient-compensated overload relays for complete control and protection of motors used on modern power-utilization systems with high available short-circuit currents.

Relaying, ground-fault protection, and lightning arresters are typical of available modifications.

FEATURES

- **Drawout Construction**—Contactor and power fuses form a single drawout assembly. No bolts to remove or cables to disconnect.
- **New Design Contactor**—New contactor is more compact and has unique swing-open feature providing almost instant inspection and maintenance.
- **1- or 3-high Selectivity**—Limitamp control is available in either one-high or three-high enclosures to meet the needs of the application.
- **NEMA Rated**—Limitamp control is fully rated and designed to meet the requirements of NEMA Class E-2 controllers.
- **Built-in Power Bus**—Vertical power bus is a standard feature of Limitamp control. Horizontal power bus is available within standard 90-inch height and lines up with that of previous designs.

- **Installation Ease**—Drawout construction, straight cable runs from top or bottom, ample room to enter enclosure make installation fast and easy.
- **Safe, Simple Operation**—A unique interlocking system is tied in with the positive ON-OFF operating handle to provide safe and simple operation.
- **Dependable Performance**—Limitamp control is coordinated to provide the required motor functions and offer reliable overcurrent protection against the damaging effects of overloads and short circuits.
- **Fast, Easy Maintenance**—Every component is accessible and removable from the front for simple inspection and maintenance. The drawout contactor swings open for rapid tip and shunt inspection and maximum access when maintenance is required.

RATINGS

Limitamp control is designed for operation on the following power systems.

System Utilization Voltage	Maximum Motor Hp		Interrupting Rating Kvd Symmetrical 3-phase 60 or 50 Cycles
	Induction, Wound-rotor, Synchronous 0.8 PF	Synchronous 1.0 PF	
2300 volts	1500	1750	200,000
4000 volts	2500	3000	360,000
4600 volts	2500	3000	400,000

Controllers are designed to meet NEMA Standards of 60-kv base impulse levels at voltages up to 4600 volts. The contactor is fully rated at 400 amperes (open rating) and 50-mva interrupting capacity.

Call Graybar for Complete Details

GENERAL ELECTRIC LIMITAMP® CONTROL

Limitamp motor control offered below is available in both 1-high and 3-high constructions except for RVNR synchronous motor control, which is available in 1-high construction only.

GENERAL ELECTRIC IC9516 A-C BRAKES

The IC9516 a-c brake is a shoe-type holding brake operating on the shaft extension of an electric motor or other

IC9516-460 brake

rotating machine. The brake is especially designed for small a-c cranes; for spinning equipment in textile mills; and for use in laundries, bakeries, food processing plants, small assembly plants, and metal-working plants.

Features of the IC9516 brake include (1) *long mechanical life*—wear-resistant wheels and linings; (2) *easy torque adjustment*—achieved by adjusting nuts at end of spring which sets brake; (3) *solenoid-coil connections protected*—metal connection and conduit box mounted adjacent to solenoid.

The brake may also be used for stopping duty, if proper application rules are followed.

Brake shoes are lined with woven asbestos. Because the shoes operate at low unit pressure, lining wear is reduced, and normal time between relinings is lengthened.

Brakes are spring-set type electrically released by solenoid or Thrustor® mechanism. Thrustor mechanisms, which are used on larger sizes, are especially smooth in operation, and in most ratings provide a time-delay adjustment.

BUCHANAN MINIATURE (MIN) SECTIONAL TERMINAL BLOCKS

For Wire Sizes #12 or Smaller

End Section

Contact Section

Maximum number of contacts in minimum space: ¼" center-to-center contact spacing allows 48 circuits per foot. Each contact section is only ⅜" high and ⅞" wide. Completely eliminates lugging. Tubular contact has captive clamp. Simply insert wires. Rated at 300 Volts NEMA General Industrial Control Devices; 600 Volts NEMA Limited Power Circuits. Molded of tough durable high-dielectric nylon. Packaged 2 blocks of 25 pre-assembled sections per carton.

Section	Type of Contact	Shpg. Wt.		Cat. No.	Per 100
		No.	Lbs./M		
Contact Tubular (Captive) Clamp		125	15		\$25.00
End None		130	5		10.00

BUCHANAN MEDIUM DUTY (MD) SECTIONAL TERMINAL BLOCKS

For Wire Sizes #22 thru #8*

Snap-Fit Sections With Integral Painted Marking Strips

End Section

Contact Section

Three Types of Contacts

Strap Screw #8 or smaller*	Tubular Screw #18 thru #8*	Tubular Clamp #22 thru #10*
----------------------------	----------------------------	-----------------------------

Easy-to-handle pre-assembled lengths of 20 sections. Can be combined with Buchanan Heavy Duty (HD) contact sections to form continuous block. 10 circuits in only 4 7/8" (plus 3 1/2" for complete block).

Type of Contact	Flat Base		Dovetail Base

PRECISION MICRO SWITCHES

Each switch is a precision snap-acting mechanism consisting of molded-in brass terminals, fixture-hardened beryllium copper springs, and fine silver contacts. Internal spring characteristics are adjusted for specific applications to give accurate repeatability for millions of actuations.

Series "A" and "B" momentary-contact switches illustrated are single-pole double-throw. These switches are also available as single-pole single-throw versions either normally open or normally closed.

Precision Switches are available in the following ratings:

Type — Electrical Rating: Series "A" or Series "B"

A	Underwriters' Laboratories Inc. Listed: 15 Amperes	125,250 or 480 Volts A.C.
B	Underwriters' Laboratories Inc. Listed: 20 Amperes	125,250 or 480 Volts A.C. 1 H.P. 125 Volts A.C. 2 H.P. 250 Volts A.C.
C	Underwriters' Laboratories Inc. Listed: 10 Amperes	125,250 or 480 Volts A.C.
D	Underwriters' Laboratories Inc. Listed: 22 Amperes	125,250 or 480 Volts A.C. ¾ H.P. 125 Volts A.C. 1½ H.P. 250 Volts A.C.
E	Underwriters' Laboratories Inc. Listed: 22 Amperes	125,250 or 480 Volts A.C.

TYPES OF SWITCHES

PIN PLUNGER

Designed for applications involving limited motion and very accurate operating characteristics.

COMPACT OVERTRAVEL PLUNGER

Allows 1/8" overtravel by means of a spring loaded plunger.

RIGID LEVER

Provides a low operating force and long overtravel. A return spring dampens the effect of vibration.

LOW FORCE SWITCH

Similar to the Rigid Lever Switch except the return spring is eliminated to effect an extremely low operating force.

LONG LEVER ACTUATOR

Applicable in situations involving excessive impact and overtravel, where critical actuation is not required.

PRECISION MICRO SWITCHES

FLEXIBLE LEAF

Permits lower operating forces and greater actuating movement than plunger actuated switches. Overtravel is limited to 1/8".

ROLLER LEVER

Designed for operations requiring rolling contact with the actuating means, as well as long overtravel and low operating forces. A return spring is provided to dampen the effect of vibration.

SHORT ROLLER LEVER

Similar to Roller Lever Switch. The actuator is shorter for more compact design and faster repeatability.

ROLLER LEAF

Applicable where a low operating force and large operating movement are required.

PANEL MOUNT PLUNGER

Features a bushing mounted plunger which may be manually or mechanically actuated and permits adjustment of operating point.

SERIES A GENERAL PURPOSE SWITCHES

Designed for applications which do not involve high inrush currents. This series is particularly well suited to applications requiring low operating forces and minimum pretravel and overtravel characteristics.

SEALED ACTUATOR AND COVER SWITCHES

Switches in this group have a silicone boot that seals the clearance between the case and the plunger as well as a permanent seal around the cover that prevent the entrance of moisture and contaminants into the switching chamber.

HIGH SENSITIVITY SWITCHES

Switches in this group are characterized by extremely small movement differential and low actuating force. They are carefully assembled and closely adjusted for use in thermostats and delicate instruments or devices.

SERIES B HEAVY DUTY SWITCHES

Switches in this group have a steady state current rating of 20 amperes at voltages up to 480 volts A.C. They are specifically designed to handle heavy duty electrical loads, including 2 H.P. at 250 volts A.C. with an inrush up to 75 amperes.

OTHER TYPES OF SWITCHES

Contact Graybar for complete information and prices.

Price on Application

SQUARE D MANUAL STARTERS AND SWITCHES
FRACTIONAL HORSEPOWER MANUAL STARTERS — CLASSES 2510 AND 2512
MELTING ALLOY OVERLOAD RELAYS

Fractional horsepower manual starters are used whenever it is desired to have overload protection as well as Off-On control of small ac single phase or dc motors. The motor is started at line voltage. The open starter without pilot light fits in a standard switch or conduit box, and can be used with a standard flush plate.

MANUAL MOTOR STARTING SWITCHES — CLASS 2510

WITHOUT OVERLOAD PROTECTION

Manual motor starting switches are used to control small motors not requiring overload protection. The open switch without pilot light fits in a standard switch or conduit box and can be used with a standard flush plate.

± For cavity mounting only — does not fit standard switch box.

* Handle guard kits are available for field addition to Types FF, FG, FS and FSJ enclosures. Handle guard is standard on all Type K enclosed switches with toggle operator.

± Pilot light kits are available for field addition to Types FF, FG, KF and KG.

● Fits standard two gang switch box.

▲ Fits standard three gang switch box.

Prices include one overload relay thermal unit per starter. Deduct \$1.50 if thermal unit is omitted.

The above items are subject to 15% Discount.

SQUARE D MANUAL STARTERS AND REVERSING DRUM SWITCHES
CLASS 2510 AC MANUAL STARTERS

Line voltage manual starters are used where it is convenient for the operator to start and stop small single phase or polyphase motors by pressing push buttons mounted in the cover of the starter enclosure. Low voltage protection and low voltage release are not available with the manually operated mechanism.

Class 2510 NEMA 12 Industrial Use Enclosure

Drum Switch in General Purpose Enclosure

CLASS 2601 REVERSING DRUM SWITCHES

Class 2601 reversing drum switches may be used for across-the-line starting and the reversing of ac polyphase, ac single phase, or dc motors. They are compact and inexpensive but ruggedly constructed.

The Type AG-3 breaks two lines to the motor; Types AG-1, AG-2 and BG-1 break three lines. These switches do not provide overload protection or low voltage protection. Maintained contact operation is standard. "Spring Return to Off" operation can be obtained by unscrewing the handle, removing the hub, and turning the shaft 180°. The hub and handle can then be replaced.

**SQUARE D AC MAGNETIC STARTERS — CLASS 8536 — LINE VOLTAGE TYPE
MELTING ALLOY OVERLOAD RELAYS**

Line voltage magnetic starters are used when full starting torque and the resulting current inrush is not objectionable. Motor overload protection is provided by melting alloy type thermal overload relays. Type S starters should be used where small size and increased flexibility are required.

Prices include two overload relay thermal units. Deduct \$1.50 each if thermal units are omitted.
 * Trip settings and frame sizes do not apply to combination starters in Spin Top enclosure. Circuit breakers in Spin Top enclosure are adjustable instantaneous magnetic trip only.
 ★ Standard devices do not include external reset for overload relays. External reset will be furnished as an optional feature, on special order, at no additional charge.
 ▲ Refer to factory, giving motor horsepower, full load current, and locked rotor current or KVA, to select proper breaker trip unit.
 ● These NEMA Type 9 enclosures are of the bolted type construction or of sheet steel construction.
 ◻ For starters of 1½ hp or less in Spin Top enclosures, refer to the nearest Square D field office for Type designation, price the same as the 2 hp starter.

CLASSES 8538 AND 8539 ORDERING INFORMATION REQUIRED

1. Class and Type number.
2. Horsepower, voltage, phase, frequency and full load current of motor.
3. Control voltage and frequency if different from line voltage.

**Class 8538, Type S
 NEMA 12 Enclosure,
 Fusible Type with
 Control Transformer**

**Class 8539, Size 1
 in NEMA 12
 Enclosure**

The above items are subject to 15% Discount.

SQUARE D HIGH VOLTAGE MAGNETIC STARTERS — CLASS 8198
AIR BREAK • 5000 VOLT MAXIMUM • WITH CURRENT LIMITING FUSES (NEMA E2)

CONTROL CENTER CONSTRUCTION

Each vertical section (90" h. x 37" w. x 34" d.) will accommodate any of the following equipment arrangements.

- 3 Full Voltage Starters for squirrel cage motors.
- 1 Reduced Voltage Starter for squirrel cage motor.
- 1 Synchronous and 1 Squirrel cage Starter (both full voltage).

WALL MOUNTING STARTERS

30" High
 37" Wide
 34" Deep

For applications which require only a single full voltage squirrel cage motor starter a Class 8198 Type CFNG-1 starter can be supplied. A separate pull box is provided for convenience during installation.

★Does not include charge for vertical sections. Single vertical section has 3 space units and is priced at \$300.

*Prices of reduced voltage squirrel cage motor starters rated from 700 to 2500 hp and reduced voltage synchronous motor starters are available on request.

The above items are subject to 15% Discount.

SQUARE D AC REVERSING MAGNETIC CONTACTORS AND STARTERS

Reversing line voltage magnetic contactors and starters are used to start, stop and reverse ac squirrel cage motors where full motor starting torque will not damage the driven machinery and where the starting inrush current is not objectionable. Motor protection on starters is provided by melting alloy type thermal overload relays. Type S contactors and starters should be used where small size and increased flexibility are required.

*Sizes 6, 7 and 8 also available.

**Class 8736 Type SCO-8
Size 1, 3 pole reversing starter**

**Type DO-2
Size 2 Horizontal
Arrangement**

ORDERING INFORMATION REQUIRED

1. Class and Type number.
2. Horsepower, voltage, phase, frequency and full load current of motor.
3. Control voltage and frequency if different from line voltage.
4. Any special features required.

The above items are subject to 15% Discount.

**SQUARE D CLASS 9001 CONTROL STATIONS
STANDARD DUTY**

Standard duty control stations are designed for use with magnetic motor starters to govern the starting, stopping, or reversing of all types of electric motors. Push buttons are momentary contact unless otherwise indicated. Selector switches are maintained contact.

● Rated 600 V. AC, 250 V. DC. ▲ Pullbox not available. Δ Without mechanical interlock.
⊕ Other contact sequence available.
⊖ Enclosures are yellow. To order black or red enclosures substitute letter "B" or "R" respectively for letter "Y" in Type No.

HEAVY DUTY

Heavy duty stations are intended for use in the control circuits of magnetic starters or control relays and are available in almost any combination of momentary or maintained contact push button units, selector switches, and indicating lights. Heavy duty stations are well adapted for frequent operation and severe service.

SQUARE D AC MAGNETIC CONTACTORS — CLASS 8502
WITHOUT OVERLOAD PROTECTION

Magnetic contactors may be used for electric motor loads within the horsepower rating shown, if overload protection is not required, or if other provision is made for it. A holding circuit interlock for three wire control is provided on all of these Class 8502 magnetic contactors. Type S contactors should be used where small size and increased flexibility are required.

CURRENT RATINGS FOR FLUORESCENT LAMP LOADS
300 VOLTS OR LESS

The characteristics of fluorescent lamps are such that it is not necessary to derate contactors below their normal 8 hour ampere rating.

ORDERING INFORMATION REQUIRED

1. Class and Type number.
2. Line voltage, phase and frequency.
3. Control voltage and frequency if different than line voltage.
4. Special features or modifications.

‡Size 00 and Type S contactors available with 50 or 60 cycle coil only.
 * Sizes 6, 7 and 8 also available.

The above items are subject to 15% Discount.

SQUARE D 300 VOLT AC MACHINE TOOL RELAYS — CLASS 8501

Class 8501 Type G systems relays feature small size, convertible contacts, modular construction, timer and mechanically held attachments. These relays make their own duct channels and a simple duct cover is available.

★Also available in NEMA 1, General Purpose Enclosure. To order, change Type No. from GO to GG and add \$3.00 to open type price. DC relays are also available.

Four Pole Relay with Mechanically Held Attachment

Four Pole Relay with Timer Attachment

Universal Pole Attachment

Mounting Track

*Relay operated pneumatic timers or timing attachments have a timing range of .2 seconds to 1 minute with an accuracy of within ± 15% of timer setting. Type GD timer attachment can be converted to Type GE or vice versa in the field without any additional parts. Contacts are single pole, double throw and must be used on circuits of same polarity. Pneumatic timer attachment fits 2, 3 and 4 pole ac relays. When adding a pneumatic timer attachment to a standard relay, the relay coil must be changed from a 2-4 pole coil to a 6-8 pole coil. DC relay operated timers must be factory assembled.

†Solid state timer attachment has a timing range of from .2 seconds to 30 seconds with an accuracy of ± 2%.

‡The dc mechanically held attachment has intermittent rated coil. Basic relay must have one extra normally open contact which must be wired in series with the latch attachment coil.

‡When universal pole attachment is added to a 2, 3 or 4 pole relay, an 8 pole coil must be used.

ORDERING INFORMATION REQUIRED:

1. Class and Type Number.
2. Voltage and frequency of operating coil.

The above items are subject to 15% Discount.

SQUARE D 600 VOLT AC MACHINE TOOL RELAYS—CLASS 8501

One Way Lever Arm

† Many other types of operators also available.

★ Nylon wheel on slider assembly can be rotated to provide sequencing or overlapping contacts.

☛ Direction of operation can be converted by removing turret head and moving cam pins to proper holes as shown on Service Bulletin 285AS furnished with each switch.

SQUARE D PRESSURE SWITCHES

INDUSTRIAL APPLICATIONS

For control of pneumatic or hydraulic machines — welders, machine tools, lubricating systems, etc. These SPDT devices are used as piloting controls for magnetic starters. Rating: AC single phase: 115V, 15 Amps; 230V, 10 Amps. DC: 115V, 0.5 Amps; 230V, .25 Amps. NEMA 12 enclosures are cast aluminum. Cast iron NEMA 7 and 9 available.

**9012
ACW**

COMMERCIAL AND DOMESTIC APPLICATIONS

For control of electrically driven water pumps and air compressors. Class 9013 devices cover the important electrical ratings for the direct control of motors in the usual pump and compressor applications. Two pole, opens both lines. Standard 1/4" - 18 NPSF connector. Contacts open on increasing pressure. Diaphragm actuated. NEMA 1 enclosures.

SQUARE D FLOAT SWITCHES

Used for the control of electrically driven pumps in liquid level control applications. Class 9035, 9036 and 9037 Float Switches cover the important electrical ratings for the direct control of motors in the usual pumping applications. Class 9035 type BW devices are suitable for most outdoor open tank operations. Unit comes complete with float and rods. Class 9036 Float Switches are for open tank control with sump or standard operation. Float and rod accessories must be purchased separately (see below). Class 9037 controls are primarily used on closed tank condensate pumping applications. Float movement is through a bellows seal. Flange mounted unit comes complete with float and rod.

SQUARE D CLASS 9080 TERMINAL BLOCKS

TERMINAL BLOCK KITS — 300 VOLT CHANNEL MOUNTED AND DIRECT MOUNTED TYPES

For Customer Assembly*

Description	Type	List Price Each	Minimum Order Quantity
Nylon Terminal Section with Pressure Wire Connectors Wire Size #22 to #14	KB-1	\$.34	50
Nylon Terminal Section with Flat Terminal Wire Size #22 to #14	KBB-1	.32	50
Nylon Terminal Section with Solderless Box Lug — With Pressure Plate Wire Size #22 to #14	KBA-1	.36	50
Nylon Terminal Section with Solderless Box Lug Without Pressure Plate Wire Size #22 to #14	KBC-1	.34	50

Each Terminal block consists of:

- 1—Required number of Type K—sections. Sections can be intermixed either when channel mounted or direct mounted on panel.
- 2—Parts included in Type K-3 or K-4 assembly kit.
- 3—Required length of mounting track, if channel mounted.
- 4—Transition barrier if mounted on same track as 600 volt sections.

TERMINAL BLOCK KITS — 600 VOLT CHANNEL MOUNTED TYPE

For Customer Assembly*

Each Terminal block consists of:

- 1—Required number of Type K—sections. Sections can be intermixed on same track.
- 2—Parts included in Type K-1 assembly kit (and KH-2 kit if Type KE-1 or KH-1 used).
- 3—Required length of mounting track.

Description	Type	List Price Each	Minimum Order Quantity
Terminal Block Section with Pressure Wire Connectors Wire #10 and smaller	KC-1	\$.37	50
Terminal Block Section with Flat Terminal Wire #10 and smaller	KCB-1	.35	50
Terminal Block Section with Solderless Box Lug Wire #10 and smaller	KCA-1	.45	50
Terminal Block Section with Solderless Box Lug Wire #14-4	KD-1	.84	50
Terminal Block Section with Solderless Box Lug Wire #10-0	KE-1	1.20	None
Fusible Terminal Block Section with Pressure Wire Connector Wire #10 and smaller	KH-1	1.50 ★★	None

Assembly Kit.....	KH-2**	.15	None

* Includes miscellaneous parts required in assembly of complete terminal block. Individual parts are packaged in convenient kit form for small users who do not require larger bulk quantities of parts listed above.

** Includes parts required in addition to Type K-1 kit when Type KE-1 or KH-1 sections used.

★ Factory assembled 2-36 circuit terminal blocks also available.

MOTOR CONTROL CENTERS

Control centers provide an ideal means for centralizing motor control and switching operations where motors are used in quantity. Some of the added advantages of using centralized control systems are:

Safety — Buses are fully enclosed, rigidly supported; individually enclosed plug-in units; dead front construction; safety door handle for maximum operator safety.

Increased Flexibility — Control centers simplify conversions; modular design permits addition or replacement of units as desired.

Installation Economy — Reduces cost — only one set of feeder cables or duct required; factory installed bus distributes power to branch circuits; loadside wires easily laid in handy wiring troughs — no wire fishing.

Neat Appearance — One enclosure contains all devices for electrical installation — no unsightly grouping of separate pieces.

Simplified Maintenance — Lowers cost . . . centrally located control units provide greater accessibility for systematic inspection and maintenance . . . no scattered control locations.

Compact Installation — Less floor space used. Each vertical 90 inch high section accommodates up to 8 combination starter units. Back to back construction allows for minimum space.

Lower Maintenance Costs — Location away from work areas helps prevent damage from dust, chips, oils or other materials as well as accidental damage from normal production activity.

CLASSES AND TYPES OF MOTOR CONTROL CENTERS

Motor control centers are made in one of the following classes and types and include the corresponding features.

Class I Type A

1. No terminal boards for the load or control connections.
2. Connection diagrams only for each combination controller or control assembly.
3. Sketches of the overall dimensions of the control centers.

Class I Type B

1. Type B is similar to Type A, except that a unit control terminal board is provided. Unit load terminal boards are also provided for size 3 combination controllers or smaller. These terminal boards are mounted on or adjacent to each unit. No load terminal boards for feeder tap units.
2. Connection diagrams only for each combination controller or control assembly.
3. Sketches of the overall dimensions of the control centers.

**MOTOR CONTROL CENTERS
CLASSES AND TYPES OF MOTOR
CONTROL CENTERS**

Class I Type C

1. Master section terminal boards including load terminals for size 3 combination controllers or smaller, and all control terminals for all combination controllers or control assemblies in each vertical section are mounted on the stationary structure; also complete wiring between combination controllers or control assemblies and their master terminal boards. No load terminal boards for feeder tap units.
2. No wiring between sections or between any master terminals.
3. No interconnecting between any combination controllers or control assemblies. All outgoing wires from any unit will be carried to the master terminal board, except wiring for size 4 combination controllers or larger.
4. Connection diagram for each combination controller or control assembly.
5. Sketch of main terminal boards showing general location of terminals.
6. Sketches of the overall dimensions of the control centers.

Class II Type B

1. Unit control terminal board is provided. Unit load terminal blocks are also provided for size 3 combination controllers or smaller. These terminal boards are mounted on or adjacent to each unit. No load terminals for feeder tap units.
2. The necessary interconnecting wiring between combination controllers and control assemblies in the same or other sections.
3. A connection diagram of the complete control assembly.
4. Sketches of the overall dimensions of the control centers.

Class II Type C

1. Master section terminal boards, including load terminals for size 3 combination controllers or smaller, and control terminals for all combination controllers or control assemblies in each vertical section are mounted on the stationary structure; also complete wiring between combination controllers or control assemblies and master terminal boards. No load terminal boards for feeder tap units.
2. The necessary interconnecting wiring between combination controllers and control assemblies in the same or other sections.
3. A connection diagram of the complete control center.
4. Sketches of the overall dimensions of the control centers.

105 Series

General purpose plug-in relay. Light transparent blue butyrate dust cover. Available with B-3 hold down spring for special mountings. 1/8" dia. silver cadmium oxide contacts, gold flashed. 5 amps., 3/16" dia. silver cadmium oxide contacts, gold flashed, 10 amps. Mountings: Standard 8 and 11 pin plugs.

900 Series

Power relay. Long life, rugged construction. UL File No. 37066. CSA File No. 20690.

100ML/101ML Series

General purpose magnetic latching relay. Positive magnetic latch. UL approved. Up to 6PDT, 5 or 10 amp contact rating. Standard solder or 3/16" quick-connect terminals.

**102ML Series
(Not UL Listed)**

General purpose magnetic latching relay. Positive magnetic latch. Up to 6PDT, 5 or 10 amp contact rating. Standard solder or 3/16" quick-connect terminals. Specify 100ML or 101ML for UL listed AC relay.

STRUTHERS-DUNN DRY REED RELAYS

MINIATURE

Minimum size and long life for dry, logic and light load switching. CONTACTS: Form "A" — normally open, Form "B" — normally closed; RATINGS: 4 watts max. non-inductive to 250 volts or 125 ma. INSULATION 250 rms V. AC. COILS for 6, 12 or 24 volts DC are standard (approx. 125 MW/pole).

MRR types, epoxy molded, axial terminals, wrap around magnetic shielding, form "A" contacts only.

MRRS low profile types, epoxy molded, internal magnetic shielding P/C terminals, form "A" contacts only.

MRR-M types, magnetically shielded envelope, non-magnetic P/C terminals, 1 & 2 pole, form "A" & "B" contacts.

Relay	Contacts	Dimensions ("Max.")	Each
MRR1A	1 Form "A"	1 1/8 x .425 dia.	\$4.20*
MRR2A	2 Form "A"	1 1/8 x .515 x .430	6.20**
MRR4A	4 Form "A"	1 1/8 x .810 x .535	10.60
MRRS1A	1 Form "A"	1.30 x .50 x .350	4.00
MRRS2A	2 Form "A"	1.30 x .625 x .350	6.10
MRRS4A	4 Form "A"	1.30 x 1.0 x .350	7.70
MRR1AM	1 Form "A"	1 1/8 x .50 x .500	5.70
MRR2AM	2 Form "A"	1 1/8 x .50 x .500	6.80
MRR1BM	1 Form "B"	1 1/8 x .50 x .500	5.90
MRR1A1BM	1 Form "A" & "B"	1 1/8 x .50 x .500	7.70

*with 24v. coil \$6.20
**with 24v. coil 7.70

STANDARD SIZE DRY REED RELAYS

Maximum life and higher CONTACT ratings for logic and control switching of loads from dry circuit to 100r 15 watts resistive, up to 1 amp or 250 volts max. Insulation: 400 rms volts AC. COILS for 6, 12 or 24 volts DC. (Approx. 6.5 watts/pole.)

RR TYPES epoxy molded, axial terminals, CONTACTS: 15 watts, form "A" — Normally open, form "B" — Normally closed, Single pole relays may be form "A" or "B". Multipole relays are form "A" only.

RR-M RELAYS, magnetically shielded package, non-magnetic terminals. CONTACTS: form "A" and "B" combinations, 10 Watt rating.

Relay	Contacts	Dimensions ("Max.")	Each
RR1A	1 Form "A"	1 7/8 x .655 dia.	\$3.20
RR1B	2 Form "B"	1 7/8 x .655 dia.	4.10
RR2A	2 Form "A"	1 7/8 x .840 x .670	5.00

STRUTHERS-DUNN COMMERCIAL RELAYS

A minimal listing from the world's greatest variety of relays for industry. Conservatively rated silver contacts are self wiping. Insulating base. Stud terminals with wiring hardware. Long life, high reliability. Replaceable contacts and coils. Custom quality.

GENERAL PURPOSE RELAYS transfer when energized and spring return when de-energized. Continuous duty coils.

B1BXX General Purpose **51BXX46** Latching **B11BXX** Sequencing

MIDGET SIZE

Compact "MIDGET" RELAYS for control circuitry and small and medium size loads. CONTACTS: 6A @ 24V DC & 115V AC; 3A @ 230V AC non-inductive. 300V spacing. COILS for 6, 12, 24, 115 & 230V 60 cps AC (6va) and 6, 12, 24 & 115V DC (3W) continuous duty, except B11 FR. COILS are for 24, 115 & 230V 60 cps AC (7va) and 24 & 115V DC (6W) intermittent duty.

Relay Type	Contacts	Base	Each
General Purpose

B11AXA	1 N.O. in N.C.	3 1/8 x 2	24.20

LATCH RELAYS have two coils, one for transferring the contacts in each direction. A momentary pulse is sufficient to operate, but coils are for continuous duty.

SEQUENCE RELAYS have cam operated contacts, which transfer in accordance with a predetermined sequence initiated by momentary pulses. Single coil is intermittent duty.

8BXX General Purpose **A5HXX46** Latch **C85AXA** Sequence

POWER SIZE

A complete line of heavy duty custom quality relays combining light load reliability with heavy duty load handling capability. Available functional types and features are same as for "midget" control circuit relays. COILS for 24, 115, 230 & 440 V60 cps AC and 24, 115 & 230V DC are standard.

STRUTHERS-DUNN INDUSTRIAL HEAVY DUTY PLUG-IN RELAYS

A complete matching line of rugged plug-in electrical control components for machine tool, machinery, processing and other industrial control panels. All are mounted on the same 12 pin plug and fit the same socket. Transparent polycarbonate covers provide dust, dirt, moisture and mechanical protection. A friction type locking clip on the plug fits a socket cavity to provide polarization and remarkable "hold-in" ability. Base dimensions of all relays — 2 3/8" x 1 1/2" max.

bonate covers provide dust, dirt, moisture and mechanical protection. A friction type locking clip on the plug fits a socket cavity to provide polarization and remarkable "hold-in" ability. Base dimensions of all relays — 2 3/8" x 1 1/2" max.

No. 27390 Sockets with full 10 ampere current handling capability screw terminals with underhead clamping plates to accommodate up to two No. 14 wires. Price \$2.20. Base 2 1/2" x 2 1/8" x 1 1/2" deep.

No. 219 FRAME GENERAL PURPOSE RELAYS life expectancy of 20 million mechanical operations, min. Epoxy encapsulated coils. INSULATION: 1500 rms V. HEIGHT 2 1/2" (less pins & clip) or 3 1/2" O/A. CONTACTS: 10 amps. @ 115V AC and 24V DC & 0.25 amps. @ 115V DC. COILS for 12, 24 & 115V 60 cps AC (approx. 5 VA) and 12, 24 & 115V DC (1.8W). U.L. listed.

No. 255 FRAME LATCH RELAYS have 2 coils and mechanical latch. A momentary pulse to one coil transfers contacts to latched position. Pulse to other coil releases latch, allowing contacts to return. Coils can be energized continuously. All contacts operate from same armature to avoid overlapping. 10 million mechanical operations minimum.

No. 211 FRAME SEQUENCE RELAYS have cam operated contacts which change position on each impulse. Hold last position until next impulse. LIFE EXPECTANCY 10 million mechanical operations. CONTACTS: 5 amps. @ 115 frame AC or 24 DC non-inductive. Continuous duty. COILS for 12, 24, 115 & 230V 60 cps AC and 12, 24, & 115V DC.

No. 235 and 236 FRAME TIME DELAY RELAYS combine epoxy encapsulated solid state timing elements with 219 frame relays in a single plug-in package. Relay operates following a pre-determined time delay, which starts when the unit is energized, and is ready for recycling within 50 milliseconds after unit is de-energized. Internal time setting is screw driver adjustable over 90:1 range with terminals brought out for optional external resistor adjustment. CONTACT INSULATION & RATINGS same as 219 frame relays. NO HI-POT ON TIMING-CONTROL CIRCUIT. OPERATING CIRCUIT for use on 115V. 60 cps AC only.

*Except with 115V DC coil.

No. 214 FRAME plug-in relays, small, light and low in cost, for use in control circuits and on small to medium loads. Clear plastic cover. DIMENSIONS: Base 1 3/8" square x 2 1/2" high without pins, or 3 3/8" overall. CONTACTS: 5 amps., 115V AC non-inductive. COILS for 6, 12, 24, 115 & 230 volts 60 cps AC and 6, 12, 24, and 115 volts DC.

No. 415XBX compact rugged DP-DT power relay with wiping contacts for reliable operation in control circuitry and weld resistant contact material for high inrush loads. CONTACTS: 15 amp. @ 115V AC, 10 amps. @ 230V AC, non-inductive. INSULATION: 1500V AC & UL spacing for 300 volts. COILS for 6, 12, 24, 115 and 230V 60 cps AC (6VA) 6, 12, 24, & 115V DC (3W). BASE: 2 3/8" x 1 1/8". Each \$7.20.

No. 4HXX56H3 TELEPHONE AUXILIARY RELAY SET consisting of a relay and condenser mounted and wired in a sheet-metal housing. Operates on 8 ma at 76-90 volts, 20 cycle from a telephone ringing circuit. SP-DB-NO contacts are used to operate audible and/or visual signals from a separate power source. CONTACTS: 10 amps. @ 115V DC, non-inductive. Each \$30.50.

415XBX Compact Power

4HXX56H3 Telephone Auxiliary

275KXX Compact Reversing

No. 275 FRAME 1 H.P. reversing contactor consists of two 3 pole contactors on a common frame mechanically interlocked to prevent simultaneous closure. Quick disconnect terminals (male 0.25). 275KXX74 has SP DB DT auxiliary contacts on each solenoid for electric lock-up and/or interlock. MAIN CONTACTS: 1 HP maximum motor load on 110, 120, 240 or 480V AC. Non-inductive current ratings are 15 amps. @ 120V, 10 amp. @ 240V & 5 amp. @ 480V.

275KXX	Reversing Contactor	\$16.50
275KXX74	With Aux. Contacts.....	19.80

Also Available:

- 300 Volt Industrial Relays
- 600 Volt Modular Contact Relays
- Size "00" Special Purpose Contactors
- Size "0" through "4" General Purpose Motor Contactors

H-B MERCURY PLUNGER RELAYS

Approved by Underwriters' Laboratory Inc.

Fig. 1

Fig. 2

Fig. 1. This consists of a mercury-plunger tube and coil mounted on a heavy bakelite base, 2½-in. x 5-in. x ¾-in., which has 2 mounting holes. Through terminal bridges for one side of both the load and coil circuits are provided for convenience in wiring.

Fig. 2. This model is supplied for "switchboard" or other mounting. It consists of the tube, coil and mounting bracket.

Cat. No.	Mounting	Load Circuit*	Load Rating in Amps.		Coil Voltage	Each

7260-H	N/C	30	20	220/60	18.55

T-P PHASING UNITS

Many areas now being provided with single-phase power only, may possibly be serviced with three-phase power at some future date. With a T-P Phasing Unit any power user may purchase his three-phase equipment now — either for permanent use or until three-phase service becomes available.

Features: Reduced initial and maintenance costs as compared to single-phase motors — permits compactness of three-phase motors — ease of installation and maintenance — utilizes all the protective devices of a standard motor controller — reduces surge on the line during starting period — improves power factor.

T-P Special Unit

Recommended when full 100 percent nameplate power is required from the motor. These units are delivering a fine job with air-conditioning, deep-well pumping, and other tough applications. External auto-transformer taps and a capacitor terminal board make it easy to balance the three-phase currents for any specific installation.

T-P Standard Unit

This low cost converter permits a three-phase electric motor to develop approximately 85 percent of nameplate rated power. The cost of a "Standard" and a three-phase motor is usually less than the cost of a single-phase motor of the same size.

H.P.	Voltage	—Standard Unit—		—Special Unit—

40	440	160	667.50
50	440	180	751.00

T-P ROTATING TRANSFORMER

Also available now is the T-P Rotating Transformer, a true multi-motor phase converter, from which you may operate several three-phase motors, either singly, all together, or in any combination, with no adjustments necessary when the load is changed.

Ideal for farms, quarries, machine shops, garages, and other operations requiring several electric motors at locations limited to single-phase service.

GENERAL ELECTRIC SILICON AC-DC POWER-CONVERSION UNITS

General Industrial silicon-diode rectifiers are used to supply a reliable source of constant-potential d-c power. Several of the most common applications for this type rectifier are:

1. General purpose shop d-c power including small d-c motors for machine tools.
2. Crane power supplies.
3. Magnet power supplies including lifting magnets, magnetic chucks, clutches, etc.
4. Freight and passenger elevators in shops and commercial buildings.

NOTE: These units meet or exceed applicable NEMA Standards for this class of equipment.

PERFORMANCE DATA

- Ripple—6.5 percent rms maximum
- Regulation—Below 8 percent light load to full load
- Efficiency—Up to 95 percent minimum
- Power Factor—93 percent minimum at full load
- Ambient—40 C maximum

GENERAL ELECTRIC SCR REGULATED BATTERY CHARGERS

The General Electric SCR (Silicon Controlled Rectifier) regulated battery charger is a completely static device. Each design utilizes all silicon semiconductors to attain the ultimate in reliability and long life.

These highly regulated, convection-cooled battery chargers are designed for float-charging nickel-cadmium and lead-acid storage batteries. The completely automatic voltage regulation and automatic current limit provide safe unattended charging of general-purpose storage batteries for:

- Switchgear control
- Telephone Service
- Emergency Light and Power
- Microwave Power
- Fire Alarm
- Signaling

FEATURES

The General Electric SCR regulated battery charger offers many advantages to the user. The excellent voltage regulation results in longer battery life and less battery maintenance. The automatic current limit protects the charger and battery and provides for maximum safe re-charging speed.

The silicon-controlled rectifier (SCR's) provides the same control function as a magnetic amplifier with less weight and less volume, while resulting in higher efficiency and better power factor.

Removable control circuits provide for ease of service and test. All necessary control adjustments and connections are easily accessible through a hinged front panel.

The voltage reference is obtained from a hermetically sealed zener diode. Voltage control is maintained from no-load to 100 percent rated current. Current-limit control takes place at about 110- to 120-percent of rated current to below 87 percent nominal voltage.

These chargers can handle a complete short circuit or dead battery without opening the d-c output breaker.

INTERNATIONAL RECTIFIER—ELECTRICAL POWER CONVERSION

Semiconductor components, for replacement in Welders, Motor Drives and Speed Controls, Electro-Chemical and Plating Equipment, Power Supplies, Battery Chargers, Electro-Metallurgical applications, etc.

SILICON CONTROLLED RECTIFIERS

Specific applications for these devices include: Phase controlled rectifiers, such as regulated power supplies, and dc motor armature drives; AC switching; Inverters, low to high frequency; cycloconverters; and DC choppers and pulse modulators.

SOLID STATE IGNITRON REPLACEMENT

Type 200IR70
Replaces Ignitron Types
FG238B, WL653B, 5555, AX5555/653B, WL5555/653B, GL5555/FG238B, GL5555
The International Rectifier Silicon Solid State Ignitron Replacement type 200IR70 is designed to replace ignitrons in existing 250/275 volt dc power supply systems where phase control is not required. The 200IR70 is mechanically interchangeable with the ignitron it replaces and is electrically superior.

KLIP-SELS—TRANSIENT VOLTAGE SUPPRESSORS

All known electrical systems and equipments are subject to transients of widely varying magnitudes, causes and repetition frequencies. Since many of these transient disturbances can result in voltage spikes of sufficient energy content to degrade or destroy semiconductor devices, it is often necessary to apply transient suppression circuit accessories to protect a system or equipment and to improve reliability. Such a device is IR's Klip-Sel, a selenium transient voltage suppressor.

SCHAUER
FULLY REGULATED TRANSISTORIZED
POWER SUPPLIES FOR COMMUNICATIONS AND
INDUSTRIAL SERVICE

These fully transistorized, series regulated power supplies provide exceptional accuracy, stability and freedom from noise, ripple, transients and oscillation. They are fully protected against load faults. Regulation 0.05%; Recovery time 50 microseconds or less; Silicon and germanium semiconductors; DC Voltmeter and Ammeter optional.

OUTPUT REGULATED POWER SUPPLIES

Provides well filtered direct current for communications or industrial service. Relatively constant output voltage under varying load conditions obtained through use of saturatable reactor type regulator. Output filtered so that there will be no objectionable hum in an audio circuit.

Silicon rectifiers; ripple 35 mv or less; regulation 5%; voltmeter

LOW CAPACITY NON-REGULATED POWER SUPPLIES

These power supplies provide a well filtered, low capacity source of direct current to operate many classes of equipment where the load is fairly constant or where variations in the output voltage due to line and load changes are of minor importance.

Optional features include A.C. bell ringing taps for telephone service and transfer relay to

automatically switch to stand-by batteries in case of power failure.

Metallic rectifier; ripple 35MV or less.

For low voltage (3-6-9 volts) and low current (150MA maximum) requirements, select from this group:

Type A3V (3 Volt)...\$9.00 A6V (6 Volt)...\$13.75
 A9V (9 Volt)...\$19.25

AUTOMOTIVE TYPE BATTERY CHARGERS

Schauer Mfg. Corp. has available a large assortment of chargers for automotive, marine, farm and industrial uses. These range in size from a 1 amp. slow charger to an 80 amp. fast charger. Quality

SCHAUER
CHARGERS OR POWER SUPPLIES
LOW CAPACITY NON-REGULATED TYPE

This group offers low capacity output for battery charging, or as a source of direct current for operation of equipment of the non-audio type. A filter choke reduces the ripple sufficiently to permit float charging of batteries in telephone service.

BATTERY CHARGERS-OUTPUT REGULATED

For communication or similar service where minor variations in the charging rate due to line voltage variations are permissible, and where the output must be filtered to that degree where the combined effect of the battery and

charger filter permits operation without the introduction of an objectionable hum in the audio circuit. The magnetic regulator circuit will adjust the charging rate automatically to maintain the batteries at a fairly constant level. An equalizing charge can be applied at intervals by a simple switching arrangement.

MAGNET LITES

Holds fast to steel — leaves hands free. Exclusive Magnet Switch combination — easy-to-use.
 No. 5MF (2-D Cells) w/o batteries.....\$1.33
 No. 7MF (2-D Cells) w/o batteries..... 1.66

UTILITY LITE

Resists oils, most chemicals — for tool box or shop. Insulated case. Non-breakable lens. Bulb protector.
 No. 330 (2-D Cells) w/o batteries.....\$0.70

MAGNET UTILITY LITE

Magnet-switch combination — easy-to-use. Resists oils, most chemicals. Insulated case. Non-breakable lens. Bulb protector.
 No. 337 (2-D Cells) w/o batteries.....\$0.94

TORCH LITES

Comes with 5" or 3" signal wand, visible up to 1/2 mile. Piercing white beam. Jumbo switch.
 No. 2T3 (2-D Cells, 3" wand) w/o batteries...\$0.99
 No. 2T5 (2-D Cells, 5" wand) w/o batteries... 1.05

"EVEREADY" 2-CELL FLASHLIGHT WITH CONTINUITY TESTER

Continuity Tester has plug, clips and insulated leads for instant use.
 No. 308CT (2-D Cells) w/o batteries..\$4.15

INDUSTRIAL FLASHLIGHTS

Heavy duty "safety-glo" lens guard. Rugged case will not shatter, crack or dent.
 No. 1251 (2-D Cells) w/o batteries.....\$1.93
 No. 1351 (3-D Cells) w/o batteries..... 2.19

INDUSTRIAL "SAFETY" FLASHLIGHTS

Approved by U.S. Bureau of Mines. Listed by Underwriters' Laboratories. Same features as No. 1251 with special "safety" extras.
 No. 1259 (2 D-Cells) w/o batteries.....\$2.74
 No. 1359 (3 D-Cells) w/o batteries..... 2.89

STANDARD ALL-METAL FLASHLIGHTS

Deluxe 3-way switch. Chrome finish.
 No. 2251 (2-D Cells) w/o batteries.....\$1.30

ECONOMY SEARCHLIGHTS

Low price. Ring hanger, end-loading. Non-rolling head. All-metal case. Jumbo switch.
 No. 5352 (3-D Cells) w/o batteries.....\$1.97
 No. 5552 (5-D Cells) w/o batteries..... 2.64

TOUCH-TIP PENLIGHT

All chrome.

 No. 315 w/o batteries..... .85

BULLS-EYE HEAD-LITE

Frees hands. Long-range beam. Rustproof. Rain-proof battery pouch fits on strap or belt. Uses No. 510S "Eveready" battery and No. PR13 lamp.

No. 3452 Head-Lite w/o batteries\$2.14

No. 1348 Battery Pouch53

"EVEREADY" LANTERNS

"BIG JIM" LANTERNS

Powerful beam. Weather-proof construction. Red warning flasher. Uses 1 No. 731 "Eveready" battery, No. 4564 Headlamp, No. 407 Signal lamp.
 No. 100 (w/flasher)\$6.45
 No. 101 (w/o flasher) 4.80
 No. 731 Battery 1.96

"ALL AMERICAN" WEATHERPROOF LANTERN

Tough "Cordahide" polyethylene case. Powerful searchlight — easy-grip handle. Unbreakable lens, bulb protector, reflector will not tarnish. Weather-proof push-button switch.
 No. 108 Lantern*\$2.53
 No. 509 Battery92
 *Without battery.

"CAPTAIN" LANTERNS

Stainless steel, weatherproof construction. Gives 2 1/2 times greater light output. Uses 1 No. 520 "Eveready" Alkaline Battery, No. 4618 Headlamp, No. 407 Signal lamp.

No. 150 (w/flasher)\$8.39
 No. 151 (w/o flasher) 7.19
 No. 520 Battery 3.31

RAY-O-VAC FLASHLIGHTS

Z21P 2-CELL PENLIGHT

Uses 2 No. 7R or 7AA batteries and No. 222 bulb. Patented rotary switch. Standard package 24; weight 2¼ lbs.

No. Z21P Penlight, less batteries..... \$1.13

Z22R 2-CELL SPOTLIGHT

Uses two 2D batteries and No. PR2 bulb. Standard package, 24; weight 9½ lbs.

No. Z22R Spotlight, less batteries..... \$1.34

WF22 HEAVY DUTY FLASHLIGHT

With Switch Guard

Features new switch guard to prevent accidental turn-on when slipped into pocket. Special plastic housing is oil and chemical resistant and switch is replaceable. Standard package 24, weight 9½ lbs.

No. WF22 Flashlight, less batteries \$1.44

DUAL ACTION SAFETY HEAD FLASHLIGHTS

Cat. No.	Description	Bulb Used	Battery Used	Wt. Lbs. Std. Pkg.	Less Battery
BM22	2-Cell	PR6	2 — 2D	16	\$3.44
BM32	3-Cell	PR7	3 — 2D	9½	3.55

SAFETY LIGHTS

Heavy-duty safety light approved by Underwriters and Bureau of Mines for use in explosive atmospheres. Completely replaceable parts. Standard package 12.

Cat. No.	Description	Bulb Used	Battery Used	Wt. Lbs. Std. Pkg.	Each
AN22	2-Cell	PR6	2D or 3D	6½	\$3.44

WORKMAN* FLASHLIGHT

Heavy-duty flashlight, highly resistant to breakage, chemical action and extreme temperature ranges. Spare lamp holder in removable end cap. Standard package 12.

Cat. No.	Description	Bulb Used	Battery Used	Wt. Lbs. Std. Pkg.	Each
N22	2-Cell	PR6	2D or 3D	6	\$2.40

*Reg. U.S. Pat. Off.

BR22 PREFOCUSED SPOTLIGHT

Has rubber end cap and hood and fibre barrel. Uses PR2 bulb and two 2D or 3D batteries. Standard package, 24; weight 11¼ lbs.

No. BR22 Spotlight, less batteries\$1.53

G22 2-CELL PREFOCUSED SPOTLIGHT

Uses PR6 bulb and two 2D or 3D batteries. Standard package, 24; weight 15½ lbs.

No. G22 Spotlight, less batteries\$2.64

RAY-O-VAC NITE HAWK® HEADLITE

Weighing only three ounces, the Nite Hawk has a three inch reflector, lucite lens, adjustable head band. Uses 6-volt lantern battery No. 941 and bulb PR13.

Available in individual cartons or three on display card. No. L298 Nite Hawk Headlite.....each \$2.64

BATTERY POUCH

For Nite Hawk Headlite

Made of water resistant vinyl, the L19 features a cover flap with snap fastener plus sturdy belt loop. Packed in individual cartons, the L19 is designed to accommodate one No. 941 6-volt lantern battery.

No. L19 Battery Poucheach \$0.67

RAY-O-VAC LANTERNS

No. 303 SPORTSMAN LANTERN

Sealed beam lantern. Red signal flasher positions to any angle on swing-swivel mounting. Shock absorber mounted sealed beam. Separate switches for head and flasher. Uses sealed beam No. 4546 or 4506 and flasher bulb No. 407.

No. 303 Lantern, with battery \$8.90
No. 301 Lantern, same as No. 303 but without Red Signal Flasher, with battery 7.55

No. 304 SPORTSMAN LANTERN

Prefocused lantern. Combination flood lamp and spotlight. Cast a bright pool of light when head is in vertical position or piercing beam when head is swiveled to a horizontal position. Uses prefocused bulb No. PR15, PR13 or PR12.

No. 304 Lantern, with battery \$6.98

No. 305 Lantern—Same as No. 304 but with Red Flasher, with battery..... 7.55

BIG BEAM FLASHERS AND HAND LAMPS

BIG BEAM FLASHERS

Compact, low-cost quality unit. Ideal for highway emergencies. Uses 6-v. dry cell battery.

108F

Transistorized barricade flasher. Weeks of continuous operation. Can be mounted on most barricades. Two directional 7" amber beacon lens. Uses two 6-v. dry cell batteries.

TF7

No.	Description	Each*
108F	360° red flare	\$ 3.96
103/3	Kit with three 108F flares in case	15.40
TF4	Transista flasher, 4" amber lens	14.00

TF360	Transista flasher, 360° amber fresnel	12.76
200	6-v. dry cell battery	1.13

BEACON LAMP

Penetrating sealed beam or standard bulb and red flasher. Sturdy steel case, red baked enamel finish; beacon arm, head, handle chrome plated. Requires one 6-v. battery. Weatherproof switches with protective rubber boots.

164

No.	Description	Each*
164	Sealed beam w/beacon	\$8.76
104	Standard bulb w/beacon	8.36
166	Sealed beam less beacon	6.36
111	Standard bulb less beacon	6.00
200	6-v. dry cell battery	1.13

BIG BEAM MOUNTY BATTERY MOUNTED HAND LAMP

664

Super 40,000 candle power sealed beam, visible one mile. Red safety flasher. Lamp clamps on metal cased, twin-pack battery. Chrome plated, heavy gauge steel.

No.	Description	Each*
664	Sealed beam w/beacon	\$8.60
666	Sealed beam less beacon	6.40
202	Twin-Pack 6-v. battery	2.66

GENERAL SERVICE LAMP THROWS POWERFUL 1500 FOOT BEAM OR BRILLIANT SPREAD LIGHT

211

Quality built with 5" chrome-plated head and triple plated reflector. Switch controls main and auxiliary bulbs. Simple focus allows choice of 1500 ft. beam or spread light. Holds two 6-v. batteries, one as spare.

No.	Description	Each*
211	Main and auxiliary bulb	\$11.16
287EX	All brass, explosion-proof lamp; approved by UL, Class 1, Group D. Approved by U.S. Coast Guard.	27.00
200	Set of 2 6-v. dry cell batteries	2.26

*Prices less batteries

POWERFUL INDUSTRIAL HAND LAMP PENETRATING 2000 FOOT BEAM

700A

Engineered for hard use by fire departments, railroads, general industry. 6" true parabolic reflector projects 2000 ft. beam. Pre-focused bulb, heavy-duty case.

No.	Description	Each*
700A	2 bulbs, chrome head and handle	\$17.56
700	1 bulb, black enamel head	15.96
6	Set of 4 1½-v. dry cell batteries	4.86

POWERHOUSE HEAVY DUTY CLAMP-ON LAMP

1711C

Ideal for utility, municipalities, railroads, industrial and service use. Clamps on 7½-v. battery. Lamp features: Head that swivels 270°; switch guard; 2000 ft. beam; main bulb and auxiliary bulb.

No.	Description	Each*
1711	Main and aux. bulbs, gray finish	\$14.36
1711C	Main and aux. bulbs, chrome finish	15.96
1766	Sealed beam, gray finish	14.36
1766C	Sealed beam, chrome finish	15.96
751	7½-v. dry cell battery	6.53

MOST POWERFUL DRY CELL LAMP

1000

World's most powerful dry cell hand lamp. A 9-v. dry cell gives a 2500 ft. beam with pre-focused bulb or sealed beam. Auxiliary bulb conserves power. Adjustable head has fingertip control for each bulb. 7" chrome-plated head.

No.	Description	Each*
1000	Main and aux. bulb	\$20.76
1066	Sealed beam bulb	20.76
466	9-v. dry cell battery	7.43

BIG BEAM "NIGHT LARK" PORTABLE POWER FAILURE LIGHT

817

When power fails "Night Lark" goes on instantly. Can also be used as portable hand lamp, operates over 3 hours on 6-v. twin-pack battery. Projects white light 180°. 25,000-hour life indicator bulb. Heavy gauge steel case.

No.	Description	Each*
817	Beige baked enamel finish	\$18.36
818	White baked enamel finish	18.36
819	Turquoise baked enamel finish	18.36
820	Pink baked enamel finish	18.36
202	6-v. dry cell battery	2.66

*Prices less batteries

See U-C-Lite Catalog Page Featuring Automatic Emergency Lights

KOEHLER WHEAT

RECHARGEABLE LIGHTS

Economical — Rechargeable 500 times, eliminates dry cell replacements and pays for itself in 40 hours use.

Dependable — Powerful, long lasting, non-fading light. Always ready at full power, like having a new battery for each use.

Rugged — Polished stainless steel construction, tough high impact polycarbonate battery case, sturdy lens guard. Proven by years of hardest use and abuse by miners, fire departments, utilities, construction workers, industry, railroads, airlines, Armed Forces, U.S. Government, etc.

Automatic Charging — Simply connect to Wheat Charger.

Lightweight — Compact — Less than six pounds, battery size 2" x 5" x 7".

Belt Loops — Neatly molded in for user convenience.

SPOTLIGHTS

Adjustable focus, shock-proof handle, 6 hours light per charge, waterproof switch, stainless steel housing.

130-G2

- Model 130-G2 Spotlight (Battery included)each **\$41.95**
- Model 175-G1* Safety Spotlight.....each **49.95**
- Model 125-G1 Charger for Models 130-G2, 175-G1each **\$31.90**

*Similar to Model 130-G2, approved by U. S. Bureau of Mines, Coast Guard.

SAFETY CAP LAMP

5100-G2

U. S. Bureau of Mines approval. 12 hours light per charge, adjustable focus, stainless steel construction.

- Model 5100-G2 Battery included (Cap not included)each **\$41.95**
- Model 1578 Charger for Model 5100-G2...each **31.90**

VEHICLE-MOUNTED, PORTABLE LIGHTING EQUIPMENT

Fully automatic, completely dependable. Keeps Wheat Lights on vehicle fully charged. For use with Koehler Wheat Lights — Models 130-G2, 160-G1 or 175-G1. Charger and light permanently mounted on vehicle. Light is recharged automatically with transistorized charger with power from 6 or 12 volt vehicle electrical system. Battery drain is negligible. Circuit can't be shorted, fouled or overcharged. Meter indicates state of charge. Ideal for fire, police, municipal, utility, industrial cars and trucks where an economical, dependable, rugged light is needed. Charger size, 3" x 4" x 6"

- Model 202-G1 Negative Groundeach **\$32.00**

**"SCOTCH" BRAND NO. 471
PLASTIC FILM TAPE**

A vinyl plastic tape with either transparent or yellow, white, black, red, blue, green, orange, red-orange or brown backing. Highly conformable; vivid colors withstand heavy abrasion. Resistant to most common solvents; avoid ketones, chlorinated hydrocarbons and esters. Not recommended for use on vinyls or other plastics containing migrating type plasticizers.

**"SCOTCH" BRAND NO. 267
PRINTABLE FLATBACK TAPE**

A treated flatback paper tape with a surface color-coating of either light green, red, light blue, white, orange, or yellow. Printable by the "Print-Seal" process. It combines high tensile with the best packaging type adhesive available on any colored paper tape sold today. Removes easily after aging; has good resistance to plasticizer migration; is relatively non-staining.

1. ROLL LENGTH: 100 ft. on 1 1/2" dia. core.
2. 1 SQUARE equals 100 sq. ft. (12" x 100'); 6 rolls 2" x 100 ft. = 1 sq.; 3 rolls 4" x 100' = 1 sq.
3. CASE PACKING: 308 only available in widths listed below; 306 and 307 available in up to 38" widths.

Size	Squares Per Case	Rolls Per Case
1" x 100' (1/12 sq.)	4	48
2" x 100' (1/6 sq.)	4	24
3" x 100' (1/4 sq.)	4	16
4" x 100' (1/3 sq.)	4	12

PERMACEL manufactures more than 300 different tapes, dispensers and electrical insulating materials all available from Graybar. Contact Graybar for more information.

GENERAL ELECTRIC TIME SWITCHES

LOW-COST CR121 TYPE A (TSA-47) FOR REGULAR-DUTY INDOOR APPLICATIONS—UL LISTED

Best choice for a variety of timing jobs such as advertising signs, store windows, floor lighting, poultry houses, heating, air conditioning, refrigeration, and motor starting.

Features include heavy-duty 40-amp tungsten-rated contacts; mech-

anism that snaps in and out of case in seconds to make mounting easy; wide temperature span of -20F to +150F (-29C to +66C); omitting device to permit skipping one or more days per week; 24-hour plain dial or

astronomic (complete astronomic-dial switch or separate dial assembly).

Switch action is minimum ON one hour, minimum OFF one hour. Unit is 7-61/64 by 5 by 3-21/32 inches; net weight is 3 3/4 lb.

60 Cycles — 120 and 240 Volts AC

Accessories include flush-mounted case with or without lock; surface-mounted duplex case without lock; omitting device kit; extra trippers ON, OFF, OFF with omit. Optional features include factory-set trippers; omitting screws factory-assembled into star wheel; motor voltage 24 or 277 volts, 60 cycles; extra trippers.

RAIN-TIGHT CR121 TYPE B (TSA-41) FOR REGULAR-DUTY OUTDOOR APPLICATIONS—UL LISTED

Ideal time switch for such jobs as street lighting; sign, store, floor lighting; irrigation and pump control; motor control; etc.

With all-weather protection, this is industry's only regular-duty switch

with UL listed rain-tight case. Contacts, temperature range, omitting device, and dial selection are the same as for TSA-47.

Switch action is minimum ON one hour, minimum OFF one hour. Size is 9-19/32 by 6-5/32 by 4-11/32 inches; net weight is 3 3/4 lb.

Omitting device kit is available as an accessory. Optional features include windowed case; non-removable cover; factory-set trippers; omitting screws factory-assembled into star wheel; motor voltage of 24 or 277 volts, 60 cycles; extra trippers; separate motor terminals (SPST only); separate motor leads (SPDT, DPST).

RUGGED CR121 TYPE C (TSA-40) FOR HEAVY-DUTY INDOOR OR OUTDOOR APPLICATIONS—UL LISTED

Ideal for street, sign, and floor lighting; capacitor switching of heating, air conditioning, refrigeration; pump and motor control; etc.

This is the "workhorse" of G-E's time-switch family. Case is UL listed rain-tight and contacts are UL listed 40-amp tungsten-rated. Omitting de-

vice permits skipping one or more days. 24-hour plain dial or astronomic dial (ON at dusk, OFF at 10 PM to 2 AM or dawn, as the seasons vary). Minute dial for precision setting.

Switch action is minimum ON 15 minutes, minimum OFF one hour and 15 minutes. Size is 9-19/32 by 6-5/32 by 4-11/32 inches, net weight is 4 3/4 lb.

Omitting device kit is available as an accessory. Optional features include windowed case; non-removable cover; factory-set trippers; omitting screws; 60-minute, 120-minute, 12-hour, 48-hour, and 7-day dials; motor voltages of 208 and 277 volts; extra trippers; separate motor terminals (SPST, SPDT); separate motor leads (DPST, DPDT).

ASTRONOMIC DIAL* *NOTE: When ordering switch with astronomic dial or astronomic dial unit itself, specify city and state in which it will be used.

The astronomic dial unit itself can be purchased separately, and easily interchanged in the field with standard plain dial on any TSA-47 or TSA-41 time switch. ON at sunset, OFF at 10 PM to 2 AM or sunrise, it automatically follows seasonal changes each day to give accurate sunset

to sunrise switching service. Just set it once and forget it. Contacts are UL listed 40-amp tungsten-rated.

PARAGON® TIME CONTROLS

40 AMP. T-RATED TIME SWITCHES

4000 Series

The ideal switch for use on all lighting applications, incandescent or neon, pumps, blowers, etc. and many other industrial and central station uses. Compact case measures only 7¼"x4½"x2½". Quick-set dial — easy-add dial trippers. Spring clutch. Molded terminal blocks — king size terminal screws. Heavy-duty timing motor — sealed-in mechanism and lubricated for life.

Operations: Up to 14 (7 "on" — 7 "off") operations per day. Two trippers furnished as standard.

PARAGON® TIME CONTROLS

MULTI-PURPOSE, 7-DAY CALENDAR DIAL

7000 SERIES

The ultimate for all heating, ventilating and air-conditioning applications. 40 amp. per pole non-inductive load. The 7000 Series allows automatic ON-OFF operation at different hours each day if desired. Any day or days can be entirely omitted. Settings can be made a week in advance and changed if necessary. 4-pole construction allows the same control to be used for all switching combinations.

Indoor case.

Operations: Up to 28 ON-OFF operations per week or 4 ON-OFF operations per day. Completely adjustable. 3-hour minimum between operations. Available with Spring Wound Carry-Over. Keeps preset schedules ON time for a minimum of 10 hours during power failure.

Dimensions: 7000 Series — 10 7/8" high, 7 3/8" wide, 3 5/8" deep. 7200 Series (Carry Over Model) — 10 1/4" high, 7 3/8" wide, 4 3/8" deep.

Finish: Grey case, black and silver dial.

PARAGON® PROGRAM INSTRUMENTS

23000-S SERIES

Provides pre-warning and main signals, adjustable from 4-60 seconds at 5-minute increments — skip-a-day omitting device — manual On-Off lever — 24-hour dial. Ideal for programming audible signals in school, stores, offices, institutions and for daily testing of volunteer fire alarm systems.

Operations — 23000S Program Instrument: 24-hour dial in 5-minute increments; main and pre-warning signals adjustable 4-60 seconds; pre-warning signal adjustable 1-3 minutes before main signal.

25000-S SERIES PROGRAM TIME SWITCH

For precision timing at 5-minute On-Off intervals — for control of music systems in plants, offices, restaurants and institutions—church bells —process timing in food, etc.

Operations—25000S Program Time Switch: 24-hour dial in 5-minute increments; contact closure in 5-minute On-Off intervals. Skip-A-Day feature standard on both series.

Specifications: 23000-S and 25000-S Series:

Dimensions: 10 7/8" high, 7 3/8" wide, 3 5/8" deep. Finish: Case — Two-tone Grey; Dial — Black and silver. Shipping weight: 8 1/2 lbs. each.

PARAGON® MANUALLY PRESET INTERVAL TIMER

2900 SERIES

Manually preset interval timer to open or close a load circuit after a preset interval. Excellent answer to many commercial and industrial timer problems. Has 7 time ranges between 5 minutes and 20 hours plus visual and audible signal devices as accessory features. Accurate to less than 1% of total dial range.

Dimensions: 8" high, 4 3/4" wide, 3" deep.

Finish: Case: Gray. Dial: Silver and Black. Shipping Weight 4 lbs. each. Load Cap.

Model	Time Range	Volts 60 Cy.	Watts	Each
2904-0	0-5 minutes	120	1000	\$18.28
2905-0	0-15 minutes	120	1000	18.28

2909-0	0-10 hours	120	1000	18.28
2910-0	0-20 hours	120	1000	18.28

Note: Available for 240 volts. Change last digit in catalog number to "3" when ordering. Add \$0.85 to suggested price.

PARAGON® AUTOMATIC RESET CYCLE REPEATERS

516 SERIES

A single timer with two concentric dials to set ON and OFF times separately. Ideal for cycle repeater application requiring a wide variety of timing or very short ON periods at relatively infrequent intervals. Each dial can have different ranges.

Dimensions: 10" high, 5 5/8" wide, 3 1/8" deep.

Finish: Grey case, silver and black timing dial, yellow and black frequency dial. Shipping weight 6 lbs. each.

120 Volts, 60 Cycle

Note: Available for 240 volts. Change last digit in catalog number to "3" when ordering. Add \$1.70 to suggested price.

PARAGON® 500 SERIES AUTOMATIC RESET AND TIME DELAY TIMERS

For Sub-Panel Mounting

A complete series of automatic reset timers to meet a variety of control and automation applications. Five time ranges: extreme accuracy; 2-SPDT switches rated at 720 VA Pilot Duty each. Dimensions: 4 3/8" long, 4 1/8" deep, 4 3/8" high.

SANGAMO TIME SWITCHES

**TYPE L — SYNCHRONOUS
TYPE W — SYNCHRONOUS CARRYOVER**

Type LHE-21

Sangamo Hysteresis, high-torque self-starting motor, slow speed 450 r.p.m. unaffected by extreme temperatures. Pure cadmium silver contacts, conservatively rated 35 amperes on Types 11, 12, 21. Two pairs of setting levers, 90 minutes between "off" and "on", 30 minutes between "on" and "off". Reversible time

limits if ordered. Gasket sealed, rain proof case. Dimensions: 10 1/4 inches high, 5 1/4 inches wide, 4 inches deep overall. Shipping weight, approximately 7 lbs. Type W, by combining synchronous timing with reserve spring clock operation, provides accurate timing during power outages up to 10 hours and eliminates necessity of resetting of dial.

Type	Poles	Throw	AC Amperes per Circuit	Each
L-11*	Single	Single	35	\$23.77
L-21*	Double	Single	35	26.25

WG	Reverse Time Limits, no extra charge.			

*U.L. Approved.

TYPES NL AND NW SYNCHRONOUS FLUSH-MOUNTING

Synchronous time switches housed in a flush-mounting case for panel or wall installation. Time switch movement is standard Type L or Type W (automatically-wound spring carryover). Same options available. Case is deep-drawn steel. Lock available. Gray-enamel finish. Size: 12 1/2 x 6 1/2 x 4 1/2 inches. Add \$15.00 list to desired L or W time switch for N case.

Standard Motors: Specify 120 or 240 volts, 60 cycle. Special motors: 50 cycle, add \$0.75; 24 volt, add \$0.75; 480 volt (60 cycle) on 11, 12, 21 types add \$7.50.

**2-CIRCUIT TYPES LY AND WY
(Supersedes KAY and VSWY)**

Type LY

Type	Description	A.C. Amp. Per Circuit	Each
LY-11	Two Circuit	35	\$43.00
WY-11	Two Circuit	35	67.00

The synchronous Type L and carry-over Type W in two circuit construction. The "on" and "off" operations of each circuit are independent, (except when Omitting Device or Astronomic Dial is required). Equipped with 2 pairs of tripping levers.

TYPES FLZ AND GLZ COMBINATION WITH OVER-CURRENT PROTECTION

FLZ and GLZ time switches combine a standard L synchronous time switch with entrance switch and overcurrent protection in an outdoor enclosure, eliminating the need for three units. FLZ is fused, GLZ has circuit breakers. Weatherproof, sealable metal case with hinged front cover. Conduit knock-outs in sides and bottom; 1-inch threaded bushing in top. Size: 14 3/4 x 8 x 4 inches (GLZ); 16 1/4 x 5 1/4 x 4 1/4 inches (FLZ).

Type	Poles	Throw	A.C. Amp. per Circuit	Each
FLZ-21	Double	Single	30	\$70.80
GLZ-11	Single	Single	15†	77.00
GLZ-21	Double	Single	15†	97.90
GWZ-11	Single	Single	15†	101.00
GWZ-21	Double	Single	15†	

†20 or 30 amp. when specified.

ASTRONOMIC DIAL

When a Sangamo Time Switch is fitted with an Astronomic Dial it will automatically turn light "on" at sunset and "off" at sunrise, compensating progressively day by day for the change in seasons. Or, this dial permits the "off" operation at any time between 9:30 p.m. and 2:15 a.m.

Ideal control for: outdoor advertising, street-, flood-, air-beacon, light house-, and yard-lighting. For latitudes 20°, 27 1/2°, 30°, 32 1/2°, 35°, 37 1/2°, 40°, 42 1/2°, 45°, 50° and 52°, add \$11.00. The latitude or geographic location must be specified.

**TORK TIME CONTROLS
ASTRONOMICAL DIAL TYPE**

Completely pre-set. Turns ON automatically at sunset in city of use. OFF time — 8:30 PM to 3:30 AM or at sunrise. Entirely mechanical. Ideal for signs, show windows, parking lots, etc. Positive assurance ON time will occur when needed. No re-setting necessary. Can skip selected days. Shipping weight, 4 lbs.

Model No.	Switch	Amps. per Pole	Each
7100Z	SPST	40	\$20.12
7200Z	DPST	40	22.72
7300Z	3PST	40	32.47
7120Z	SPDT	40	22.72

TZ120	SPDT	20	45.50
TZ200	DPST	20	61.75
TZ300	3PST	20	71.50

*Includes manual override 3-way switch, one per pole.

7 DAY CALENDAR DIAL — W SERIES

Dial revolves once a week permitting longer or shorter periods of operation for each individual day of the same week, as well as omitting any day. This is required in commercial applications where working hours vary from day-to-day such as

stores and shopping centers. Includes all features of plain dial models. 7-day dial. Minimum setting, 1 hour. Shipping weight 11 lbs.

Model No.	Switch	Amps. per Pole	Each
W-100	SPST	40	\$22.07
W-200	DPST	40	23.37
W-300	3PST	40	27.92
W-120	SPDT	40	23.37
W-220	DPDT	40	25.97
TW-120*	SPDT	20	45.50
TW-220*	DPDT	20	61.75
TW-300*	3PST	20	71.50

*Includes manual override 3-way switch, one per pole.

MOMENTARY CONTACT TIME SWITCH

For automatic switching of lighting or other circuits where control is used with push-button operated contactors, both mechanically-held and magnetically-held. Separate circuits for ON and OFF pulses are pro-

grammed from any one of three dial options, 24 hour, weekly calendar, or astronomical (sunset-ON).

All models have option to omit lighting on selected days. Also suited for low voltage control systems (specify 24 volt AC).

Model No.	Voltage	Dial	Each
1837W	120	7-day	\$61.10
2-1837W	240	7-day	67.60
4-1837W	24	7-day	67.60
1837SK	120	24-hour	39.65
1837ZSK	120	Astronomic	52.65

**TORK LIGHTING CONTROL CENTERS
T-900 SERIES**

Combines all the advantages and versatility of photocontrol and time switch control providing considerable flexibility over straight time or photocontrol.

Lighting comes ON automatically at the time it is needed, regardless of the season or the weather, without the need to keep lighting on until dawn as with straight photoelectric control. Lighting goes OFF at any preset time—OFF can be individually set for each day of the week. Days can be skipped entirely.

Switching is SPDT — can control either mechanically held or magnetically-held contactors or 2000 Watts incandescent direct. Available with additional dusk-to-dawn safety lighting circuits. Manual bypass switches prewired in each circuit. Photoelectric control unit is separately mounted, so both Photocontrol and time switch are easily adaptable to almost any conditions existing on the job and can be installed wherever convenient.

Model No. Includes Both Photo and Time Control

Model No.	Description	Each
T901	Dusk-ON — preset OFF	\$ 78.00
T902	With All-Night Safety Lighting Circuit added	91.00
T903	Above plus Third Circuit, preset ON — preset OFF	104.00

INTERMITTENT PROGRAM TYPE

For control of ventilating fans, pumps, program heating, poultry feeding, irrigation, traffic signals and special applications. 96 tabs on 24-hour dial permit 15-minute switch changes. Easily set by tilting tabs in or out by hand. When adjacent tabs are set alike switch remains ON or OFF as set. Up to 96 operations per day. Minimum ON or OFF time 15-minutes—maximum 23 hours, 45 minutes. Available with and without week-end skip features. Shipping weight 4 lbs.

Model No.	Switch	Description	Each
8001	SPDT	Daily Operation	\$20.12
8007SK	SPDT	Skips Selected Days	23.37
60M8001	SPDT	One-Hour Dial	19.47

TORK REPEATING CYCLE TIMERS

Percentage Calibrated

For controlling various industrial machinery and processes such as chemical feeding, product life testing, intermittent lighting, animated displays, vending machines, conveyors, etc., or any operation requiring one contact closure per cycle, single or multiple circuit.

Available in almost any cycle from 30 seconds to several hours.

Price on Application

TORK TIME SWITCHES

7000 SERIES

Turns any electrical circuit ON and OFF automatically each day. Available up to 3-pole 40 Ampere, and Double Pole, 55 Ampere capacity. Provided with week-end and holiday skip feature (skips 1 to 6 days). Skip feature does not have to be used. Switch operates every day unless set to skip selected days. Extra heavy-duty timing motor operates from -60° to +200° F. Fast, easy installation. "Quick-Out" feature enables instant removal of mechanism from enclosure without tools. K.O.'s on top of case as well as side, bottom. Lug type terminals take up to #6 wire without bending. Fully rated for incandescent lamp loads. Convenient manual operation any time without disturbing automatic settings. Minimum setting 20 minutes. Shipping weight 4 lbs. 120 volts, 60 cycle.

Model No.	Switch	Amps. per Pole	Each
7100	SPST	40	\$12.32
7200	DPST	40	13.62
7200H	DPST	55	22.72
7300	3PST	40	22.72
7120	SPDT	40	13.62
7220	DPDT	40	25.97

RESERVE POWER FEATURE

(Available On Most Models)

To keep time during power interruptions up to 16 hours, add suffix "L" for spring-wound reserve. Rewinds automatically on restoration of power.

Price adds:
 120 volt, 60 cycle.....\$35.75
 240 volt, 50/60 cycle.....42.25

TORKMASTER SERIES

Similar to #7000 Standard Line. Twenty-four hour dial. Same ON-OFF time each day. Cannot skip selected days. Shipping weight 4 lbs.

Model No.	Switch	Amps. per Pole	Each
1191	SPST	40	\$9.07
1962	DPST	40	10.37
2-1962	DPST	40	11.02

TORK PHOTOELECTRIC CONTROLS

Lighting is automatically turned on at dusk or when local weather and sky luminosity require artificial illumination, and is turned off at daybreak. Tork photo-electric controls are accurate, dependable, and economical, and they don't need resetting after a power failure. SPST rated 1500 watts incandescent.

Model No.	Voltage 50 or 60 Cycles	Description	Switch	Each
2100	105-130V	½" Fitting	SPST	\$9.72
2102	208-240V	½" Fitting	SPST	10.37
2000*	105-130V	Lock Plug	SPST	11.02
2002*	208-240V	Lock Plug	SPST	11.67

*For adapter bracket for pole mounting with lock receptacle add "B" to Model No. and \$6.50.

SANI-DRI ELECTRIC HAND DRYERS

Sani-Dri eliminates all towel expense; saves thousands of service-cost dollars over cloth and paper toweling.

Sani-Dri drastically reduces costly maintenance man-hours spent in waste clean-up, ordering, storing and refilling towel cabinets — automatically eliminates the cost and time consuming problems caused by waste paper fire hazards, clogged plumbing, etc.

Clinical tests prove electric air drying more sanitary. Sani-Dri's revolutionary engineering means an end to messy, cluttered washrooms, assures un-failing, trouble-free 24-hour performance.

WALL MODEL No. 12-5

The very latest in fast, efficient, automatic drying. Decorator styled to blend perfectly with today's most modern washrooms. Available in 115 or 230 volts.

Push Bar Starter with automatic shut-off. White porcelain enamel finish. Die cast aluminum. Bright Chrome plate finish nozzle and push bar.

Size: 10 1/8" wide x 8 3/4" high.

Extends: 9" from wall.

Shipping weight: 20 lbs.

No. 12-5 — Surface Mounted, 110-Volt. each \$133
 No. 12-5A — Surface Mounted, 220-Volt. each 133

SEMI-RECESSED MODEL No. 12-6

Especially suited to new construction. Unit takes less space. All wiring is concealed. Available in 115 or 230 volts.

Push Bar Starter with automatic shut-off. White porcelain enamel finish. Die cast aluminum Bright chrome plate finish nozzle and push bar.

Size: 15 1/4" wide x 11" high.

Extends: 6 3/8" from wall — 3 1/8" into wall.

Wall opening: 14 1/2" x 10 1/8".

Shipping weight: 60 lbs.

No. 12-6 — Recessed, 110 Volt.....each \$139.50
 No. 12-6A — Recessed, 220 Volt.....each \$139.50

CORDLEY ELECTRIC WATER COOLERS

"CORDWALL WALL-HUNG"

mounts on the wall with a full 19 inches of clearance between cooler and floor. This feature, combined with flush-to-wall mounting, eliminates unreachable areas to collect dust. Plumbing enclosed, yet easily accessible. Mount at any desired lower height to accommodate children. Extra outlet provided for companion fountain. Hanger bracket and template furnished. Measures 15 $\frac{3}{4}$ " wide, 13" deep, 20 $\frac{1}{16}$ " high.

Model No.	(1) Capacities Gals. per hr.	Approx. Domestic shp. wgt.	Price
Air cooled:			
WHA-6	6.0	83	\$175.00
WHA-8	8.0	85	176.50
WHA-12	12.0	87	182.50
WHA-15	15.0	89	189.00
Water cooled:			
WHA-10W	10.0	85	206.00
WHA-17W	17.0	87	222.50

(1) Std. rating conditions: Room Temp., 90°F., Water in 80°F., Water out 50°F. Listed by Underwriters' Laboratories.

CORDLEY "COMPACT" SERIES

The newly styled "COMPACT" requires only one-square foot of floor space. Measures 40" in height. Lower in cost without sacrificing quality, lighter in weight without sacrificing sturdiness. Plumbing accessible at rear, without removing cabinet. Foot pedal available as factory-installed accessory at extra cost. Glass filler available as optional accessory, except for Model HA-4.

Model No.	(1) Capacities Gals. per hr.	Approx. Domestic shp. wgt.	Price
Static cooled			
HA-4	3.9	75	\$138.00

CORDLEY COMPACT BOTTLE TYPE

EASILY INSTALLED, light weight, portable . . . Cordley Compact Bottle Coolers require no plumbing: just plug in power cord. Cabinet finished in Sandalwood baked enamel. Accommodates 2, 3, or 5-gallon bottle. **HOT & COLD MODEL** GH-1S has safety cut-out thermostat to protect against overheating. *Hot water delivery is 60 six-ounce cups hourly at 180°F.*

Model No.	(1) Capacities Gals. per hr. of 50° Water	Approx. Domestic shp. wgt.	Price
G-1S	1.0	59	\$ 89.00
GH-1S		65	145.50
GA-2S	2.2	69	114.50

(1) Std. ratings at 90° room temp. Listed by Underwriters' Laboratories. Bottles not furnished with bottle type coolers.

Other models include an explosion proof series for hazardous locations; refrigerated compartment types; a semi-recessed style for new building construction, and packaged water chillers for remote type installations.

OASIS WATER COOLERS

Oasis water coolers are available in a wide range of capacities for every conceivable need . . . in industry, the office and the home — cold only or Hot 'N Cold models. Hot 'N Cold models double the usefulness, delivering hot water for instant beverages as well as cold water.

A complete line of accessories also are offered including glass filler and foot pedal options.

Ebeo Manufacturing Company's Five Year Warranty covers the entire water cooler against defects in materials and workmanship, under normal use and service.

The models illustrated and listed below represent only a sample of Oasis coolers available through Graybar. For details and specification sheets on the complete line, see your nearest Graybar branch.

FREE STANDING PRESSURE MODELS

Model 7P

Oasis Constellation series water coolers are available in capacities of 7 and 13 gallons per hour to meet a wide variety of needs. The handsomely styled, heavy gauge steel Mocha Tan cabinet makes the cooler attractive enough for office installation, yet durable enough to withstand factory use. And for extra corrosion protection, a stainless steel cabinet is available. A special "Low Boy" model is only 31" high, just right for children and wheelchair patients.

Model OCP3H

CHALLENGER MODELS

Lower initial cost, economical operation, and compact design make these coolers suitable for home and office. Available in three capacities, they require only one square foot of floor space. Cabinets of heavy gauge steel are sturdy enough to withstand normal industrial use. OCP3H has Hot 'N Cold feature, providing 45 cups of piping hot water per hour. Glass filler adaptor kits are available for field installation except on model OCP3H.

AGAINST-A-WALL MODELS

Model ODP8A

Functional, yet smoothly styled in Mocha Tan cabinet with delicate front panel fluting, the unit can be used flush against a wall or as a free standing cooler. When installed flush against the wall, all plumbing connections are concealed saving as much as 30% of the floor space. Two coolers can also be installed back to back. Available in eight (ODP8A) and thirteen (ODP13A) ghp cold water capacities. Provision made for field installation of glass fillers on models ODP8A and ODP13A. ODP8AH has Hot 'N Cold feature.

SPECIAL PURPOSE MODELS

Model ODP15W-SCP

Explosion Proof models, Dust and Heat Resistant models, Stainless Steel models — OASIS has them all. Model ODP15W is water cooled for use where dust, dirt, lint and severe heat are problems. MODEL ODP10X is excellent for use in locations where explosive conditions prevail. MODEL ODP20 combines big 20 gph capacity and modern attractive cabinet. All these models are available in stainless steel for use where corrosion may result.

OASIS HUMIDIFIERS & DEHUMIDIFIERS

Oasis Dehumidifiers pull excess moisture from the air in basements and other enclosed areas — help stop "sweating" walls, musty odors, rust and corrosion. Three new models, two capacities: OD-100 and OD-200 remove 13 pints of water from air daily; OD-300 removes 24 pints. Five Year Warranty — NEMA certified performance.

Oasis Humidifier Model OH-600 brings new winter comfort to home or office. Enjoy trouble-free, automatic humidity control without costly equipment and installation. Walnut grain vinyl-on-aluminum cabinet is an attractive addition to any setting.

Model OH600
\$64.50

Model OD200

GRAYBAR is the world's largest independent distributor. As such, we can offer you or your electrical contractor the widest selection of quality electrical products, coordinated deliveries and unbiased recommendations.

ILG VENTILATING FANS

**TYPE PF
PROPELLER
EXHAUST
FANS**

New Type PF belted propeller fans — low in price, but having quality features for high performance and long life such as: pre-drilled steel panel, unique angle braced construction, 6 bladed wheel, close coupled motor and drive, permanently lubricated motor and shaft bearings, baked enamel finish, full venturi and NEMA motors used. Optional guard and discharge shutters are available on request.

Motor and drive shipped in separate box.

Ilg's line of extra quiet Centrifugal ceiling ventilators features the new size 80. In adding size 80 to the present line of 60 and T60, there are 3 sizes to select from. Ceiling Centrifugal fans are the most simple and satisfactory means of ventilating conference rooms, individual offices, washrooms and other small areas. With Ilg's Centrifugal ceiling design, you can easily install the unit in new or old ceilings. To prevent maintenance and maintain longer, quiet life, all motors are permanently-lubricated, all moving parts are balanced, and vibration isolated from the housing. The aluminum grille and flange blend into any color scheme, and are easy to keep clean. Optional features include roof or wall caps for use with sheet metal ducts.

ILG VENTILATING FANS

TYPE PDX EXPLOSION-PROOF FANS

Constant Speed, 60 Cycle

Type PDX combines the features of Type PD fans with explosion-proof motors, which are suitable for all Class 1, Group D hazardous applications. Square steel panel on Type PDX has pre-drilled mounting holes, and is designed to fit recessed or surface mountings. Quiet running.

**TYPE U-PDE PROPELLER
DIRECT DRIVE**

5060 to 33,300 CFM

New design Type U-PDE roof ventilators feature high speed, high air capacities for exhaust ventilation on industrial applications where noise levels are not critical. Unit has sturdily constructed heavy gauge weatherproof steel housing and frame with rust resistant aluminum finish.

Ilg's totally enclosed ball bearing motors direct-connected to aluminum airfoil bladed wheel gives maximum performance with minimum operating cost and maintenance. 1-phase motors are thermal overload protected.

ILG VENTILATING FANS
HIGH-SPEED INDUSTRIAL COOLING FANS

Ideal for industrial cooling where noise is not a factor — bringing refreshing relief to shop "hot spots" and break up pockets of stale air in confined places. Two types—Pedestal Model 245 for floor mountings and Model 245U for ceiling and wall installations. Five bladed propeller is protected by rugged steel venturi. Safety type guard meets all codes. New tilting head can be easily adjusted to change direction of air flow.
C.F.M.* — 13040 R.P.M. — 1140.

ILG CENTRIFUGAL AIR CURTAIN FANS

Keeps flies out — customers in
The B15FF (Air Curtain Fan) spreads an invisible curtain of air that is gentle enough not to bother people, but powerful enough to repel flying insects.

Available with 1-speed or 2-speed motors, standard or optional recessed housing. The direct connected Ilg permanently lubricated, split-capacitor motor — eliminates maintenance.

Keep warm air out — cold air in

Now you can lower the operating cost of your cooling plant, by stopping the loss of your cooled air, and preventing warm air from entering through open doors. The B15FF Air Curtain Fan with refrigerator door kit, is the simplest and most economical way to accomplish this. The curtain of air creates a thermal barrier, preventing temperature and humidity loss.

NOTE: For extra heating capacities up to 122,832 BTU we offer a larger model in sizes 9KW to 36KW. Complete selection data and prices on application. Request Catalog No. DB5-100.

- Catalog #7317 Control is a one pole thermostat and catalog #7361 is a two pole thermostat — each has ½° differential. All other controls use a one pole thermostat with contactor and have a 1½° differential.
- Price of control, manual or automatic types except catalog number 7361, includes contactor and three position pilot switch. If pilot switch is not required, deduct \$14.00 from list price and state on order "control less pilot switch."
- All controls, except 1½ and 2 KW for 120-volt operation, break all lines to the heater.
- For 480 volts and up, heater control requires a 120-volt control circuit. If this circuit is not available, the following transformers can be furnished: For 7322 and 7323 use 50 V.A., 480/120 V. No. 2308-2500A at \$23.00 or 600/120 V. No. 2308-2501A at \$24.00 list.
- Where motor voltage differs from heater voltage by more than the nominal rated voltages (208-230 or 240-220), a separate motor circuit transformer is furnished with the heater.
- All heaters have motor leads accessible for the customer to connect to a separate circuit for summer operation when desired.

The Above Items Are Subject to 47% Discount

ILG CENTRIFUGAL FANS

TYPE B BLOWERS

Type B Util-A-Set Centrifugal Fans are suitable for all types of blow-in or exhaust duty where low pressure, small volume quiet operation are required. Particularly adapted for applications in offices, toilets, projection booths, telephone booths, kitchens, etc., where air is moved through ducts.

Standard construction for sizes B9 to B15 will handle 190°F. air; sizes B18 and 21, up to 250°F. air.

EMERSON ELECTRIC AIR CIRCULATORS AND ACCESSORIES

FOR CEILING-WALL-FLOOR AND COUNTER MOUNTING

5 Year Factory to User Guarantee—Listed by Underwriters' Laboratories, Inc.

Efficient, quiet, economical to operate. Adjustable through a 98° range. Fully enclosed, 2-speed streamlined motors, prelubricated for approximately 6000 hours operation. Designed for large area circulation—retail stores, shops, restaurants, hotels, taverns, and for industrial plants, recreation areas, churches, etc. Ruggedly built for continuous operation at either high or low speed. Four types of mountings—floor column, counter or display case column, ceiling, and wall. Both floor and counter types have rubber covered extension cords and soft rubber plugs. Special, decorative, 2-piece, heavy gauge spiral safety guard with Catalog Nos. CSG241 and CSG301 Air Circulators.

SPECIFICATIONS

Motor: Capacitor type, full enclosed, streamlined design. Male section of receptacle located in motor (for connecting female section of cord furnished with floor-column and counter-column mountings.)

Shaft: Solid steel shaft 5/8" diameter.

Bearings: Ball bearings, grease packed.

Lubrication: As shipped from the factory, fans will give several normal seasons of service before relubrication is necessary. (Approximately 6000 hours).

Switch: Levolver switch in back cover of motor.

Blades: All types—3 blades of formed heavy gauge aluminum.

Guard: Two-piece ornamental guard of heavy gauge wire, spot welded. Both the 24" and 30" fans are available with close spaced spiral safety guard.

Adjustment: Mounting yoke is insulated with rubber. Can be tilted from 8° below horizontal to 90° above horizontal when used with column mountings, or vice versa in ceiling mounting.

Finish: Finished in baked metalescent-bronze wrinkle enamel. Bright plated guard. Blades finished in bronze lacquer.

MOUNTING ACCESSORIES

Ceiling Mounting Fittings: Consist of motor socket, round malleable flange hanger tapped for 1" pipe with four lag screws and ceiling canopy. Canopy is finished in metalescent bronze lacquer (no hanger pipe nor cord) female section of cord connector furnished.

Floor Column Mounting: Adjustable from minimum 4'11" to maximum 8'4", from floor to center of blades. Base drilled for attachment to floor. 20' of rubber covered cord and plug. Base packed separately. Base, lower column and coupling finished in baked metalescent bronze wrinkled enamel, seamless steel tube finished in polished chromium plate.

Counter Column Mounting: Center of blades 1'8" from the bottom of the base. Base drilled for attachment to counter and equipped with protective felt. 12' of rubber covered cord and plug. Base finished in baked metalescent bronze wrinkled enamel, motor socket and column finished in polished chromium plate.

Wall Bracket Mounting: Furnished complete with stud, motor socket and lag screws for attachment to wood construction. Extends 14" from wall and provides swivel adjustment to either side. Bracket is finished in baked metalescent bronze enamel. No cord furnished. Female section of cord connector furnished.

EMERSON ELECTRIC FANS

CEILING FANS

5 Year Guarantee

Standard in America since the early nineties for quietness, efficiency, dependability and low cost. Slow speed fans gently move large volumes of air without annoying drafts.

Current-saving capacitor motors with lifetime lubricated ball bearings and seasoned wood blades make these fans perfect for use on porches, covered patios, stores or wherever cool breezes are welcome and insects are not.

Ideal for installation on low ceilings — fans are designed for mounting with a minimum of only 12" from ceiling to bottom of blades on the 36" fan and only 13" on the 52" fan.

Furnished complete with ceiling canopy, ceiling hook, insulated hanger eye. Controlled with 2-speed pull switch mounted in the fan. 2-speed wall switch is available as an accessory where fans are to be installed for wall switch control. Fans are tapped for 1/2" hanger pipe (pipe not furnished). Hook with adapter to fit 3/8" fixture stud can be supplied.

Attractively finished in beige baked enamel over motor and trimmings. Wood blades finished to match.

For 120 Volts 60 Cycles

Fans will operate satisfactorily on voltage 10% above or below rated voltage. Performance data subject to vary without notice.

CFM — Cubic feet of air per minute.

*Two-speed fans furnished with 2-speed rotary switch. Listed by Underwriters' Laboratories, Inc.

EMERSON-PRYNE EXHAUST FANS

VENT-A-BATH EXHAUST BLOWER

Low cost vent-a-bath exhaust blower with 6" Blo-Fan Impeller. Utilizes slip strap mounting. HVI certified—60 CFM. Mounts in either ceiling or 4" wall. Grille is closed type louver in anodized aluminum. Automatic damper—3" duct.
 No. 221 Exhaust Faneach **\$11.28**

CEILING VERTICAL DISCHARGE

Ceiling mounted vertical discharge fan, complete with shutter assembly as integral part of fan. Utilizes easy slip strap mounting. Adapts to 7" round duct. Phosphatized housing, anodized aluminum grille. HVI certified. 200 CFM.
 No. 256 Exhaust Faneach **\$12.85**

SIDE WALL FAN

Square design for easier installation, greater efficiency. Tru air-foil styrene blade provides maximum CFM with minimum noise. Anodized aluminum grille conceals interior mechanical parts. HVI certified. 250 CFM.
 No. 252 DeLuxe Ceiling Faneach **\$15.78**

ROOF MOUNTED BLOWER

Powerful two-speed fan generates 700/350 CFM—suitable for heavy duty hoods—Bar-B-Quees. Two speed wall selector switch and pilot light. Unit can be wall mounted with VA-10 accessory. Low silhouette—can be painted to match roof color. 9 3/4" high, 16 3/8" x 22 5/8". Adapts to 8" round duct. HVI certified. 1100/700 RPM.
 No. RMV-1 Roof Mounted Blowereach **\$60.52**

THOMAS INDUSTRIES

Bathroom Heaters/Ventilators/Light Combinations

T-300 Heater-fan-light. Two separate motors for fan-forced heater and ventilating fan. Use heater, fan or light alone, or in any combination. 1500W heater delivers 5118 BTUs. 60 CFM fan. Uses 3" duct. Built-in damper. Alba-Lite lens in aluminum trim. Housing 11 1/2" square, 8" deep. **30.25**

T-301 Heater-light combination. Same as T-300, without ventilating fan. **23.70**

T-302 Ventilating fan-light combination. Same as T-300, without heater. **20.95**

Installation

Exclusive plug-in feature simplifies installation. Housing supplied with adjustable bar hangers for 16" center joists.

Power unit hooks on hinge pins; swings up into housing and plugs in automatically.

Ventilating Fans for Wall and Ceiling

T-320 60 CFM Ceiling Fan, for bathrooms up to 55 sq. ft. Built-in damper. Stainless steel grill 7 7/8" square. Pre-wired housing 6 1/2" x 9". Uses 6" round duct. **8.31**

T-321 50 CFM Ceiling or Wall Fan, for bathrooms up to 45 sq. ft. Pre-wired 8 3/4" x 9" x 4" housing. Anodized aluminum grill 10 1/4" square. Uses 3" round duct. **9.51**

T-322 60 CFM Blower. Same as T-321. For bathrooms up to 55 sq. ft. **12.15**

T-323 80 CFM Blower. Same as T-321. For bathrooms up to 75 sq. ft. **13.71**

T-310 Infrared heat lamp. Pre-wired, recessed steel housing. 8" diameter, 7 1/2" depth. Use 250W R40 infrared lamp. **1.80**

RU-315 Shower light. Aluminum with white bottom glass and water-tight gasket. Box diameter 5 1/2", depth 6 5/8". 1-60W. **4.35**

R-316 Pre-wired shower light. Housing 8 1/8" square, 5 3/4" deep. Outlet box extends 4". O.D. drop opal glass. 1-60W. **7.17**

Accessories

T-350 Switch for T-300, above. Three independent circuits permit any combination of heater-fan-light operations. Stainless steel wall plate. **4.80**

T-360 Wall cap. Adapts to 3" round duct. Built-in bird screen. Baked enamel finish. **1.75**

T-361 Ventilation roof jack. Adapts to 3" or 4" round duct. Built-in damper and bird screen. Enamel finish. **2.30**

THOMAS INDUSTRIES
Range Hoods and Accessories

Three-Speed Dual Blower Hoods

King-size air delivery. Easy to reach controls for recessed light and 3-speed twin squirrel cage blowers. NO SEAMS: Front corner seams are Heliarc-welded. Two aluminum filters snap out for easy cleaning. Built-in spring-loaded damper prevents back-drafts. Discharges horizontally or vertically through 3 1/4" x 10" duct. Height 8 1/4". Extends 18 1/2" 120V, 60-cycle, U.L. listed. 325 CFM. 1-100W lamp.

WIDTH 30"	T-1030 W	44.35	White finish.
	T-1030 S	60.15	Stainless steel.
	T-1030 C	44.35	Shaded coppertone finish.
WIDTH 36"	T-1036 W	45.65	White finish.
	T-1036 S	63.50	Stainless steel.

CHOICE OF SPEAKERS

5" Inside Speaker — Model 2027. Rotary Volume Control. Privacy setting. No eavesdropping. Talk-Listen button for Intercom and door-answering. 8 1/2" x 6 3/8" x 2 1/8". Desert Sand finish.**Each \$ 6.00**

8" Inside Speaker — Model 2021. "Break-Away" Panel removes to mount as Remote Control. Rotary Control. Talk-Listen button for Intercom and door-answering. Remote Control fits 2-gang wall box. 12" sq. x 2 3/8" deep. Desert Sand finish.**Each \$15.60**

8" Patio Speaker — Model 2014. Includes Remote Control which mounts in 2-gang wall box or special surface-mounted #2013-A. Can be used inside with #2411-A frame and painted. 13 3/4" sq. x 2 3/8" deep. Weatherproof Aluminum.**Each \$15.47**

Built-In Door Speaker — Model 2007. Has 3-position Talk-Listen switch. Center for "off" or low listening level. 4 3/8" x 6 1/8" x 1 3/8". Gold Anodized finish.**Each \$ 9.67**

Built-In Door Speaker — Model 2008. New and highly stylized with 2-position Pushbutton for Talk-Listen instead of "slide" switch. 4 3/8" x 6 1/8" x 1 3/8". Weatherproof Gold Anodized finish.**Each \$ 7.87**

Surface-Mounted Door Speaker — Model 412. For all NuTone Systems. Can mount on wall, ceiling or soffit, with Talk-Listen button installed in door jamb. 4 3/8" x 3 3/8". Desert Sand & Gold finish. Weatherproof.**Each \$ 9.47**

Built-In Door Speaker — Model 2006. Has 2-position switch. 4 3/8" x 5 7/8" x 1 1/4". Gold Anodized Weatherproof finish.**Each \$ 5.27**

Use NuTone 3-Conductor Wire — 200 ft. #2040: \$4.80, 1000 ft. #2042: \$17.32. Outdoor FM Antenna #2420: \$8.47.

Model 2073 Record Changer can be used with ANY of these Systems!

NOTE: Model Nos. are for finished units. Order proper Rough-In Kits.

NUTONE "COMMU-NI-COM" — New Solid-State Intercom System!

Can Be SURFACE-MOUNTED or BUILT-IN!

For offices, shops, Nursing Homes, and Institutions; Factories, new or Remodeled Homes!

Master Unit Model 470

Inside Speaker Model 472

Door Speaker Model 471

Commu-Ni-Com offers step-saving convenience of Intercom for up to 12 locations. The ideal system for light commercial and institutional use, and homes where music is not wanted as part of a room-to-room Intercom System.

Master Unit can install on the surface. Inside Remote Speakers can be built-in or surface-mounted. Where convenience and protection of door-answering are desired, there's a surface-mounted Door-Speaker controlled by each inside remote, to insure complete safety and privacy. A NuTone Electronic Door Chime may be connected.

Commu-Ni-Com Master Unit — Model 470. Amplifier for up to 12 remote speakers. No controls needed. Requires a transformer (see below). 4 3/8" x 7 3/8". Egg-Shell White & Brushed Aluminum finish.**Each \$23.00**

Commu-Ni-Com Inside Speaker — #472. For built-in or surface-mounting. Remarkable clarity of normal voice-level. Volume Control, plus 1 switch for room-to-room Intercom, another for door-answering. 4 3/8" x 6 3/8". Egg-Shell White & Gold finish.**Each \$ 7.40**

Commu-Ni-Com Door Speaker — Model 471. Mounts on wall, ceiling or soffit. No lever needed. Caller uses Door Chime; control is at inside speakers only. 3 3/8" x 4 3/8". Egg-Shell White & Gold finish.**Each \$ 6.00**

Accessories:
6-Conductor Wire, 200 ft. #447: \$10.33, 1000 ft. #448: \$46.00.

2-Conductor Wire, 50 ft. #2422: \$1.27.
16-Volt Transformer, 15 w. (VA), #105N: \$2.50.

NUTONE BUILT-IN SOLID STATE STEREO SYSTEM

*Master Unit Model 2071. Amplifier, Stereo-FM, FM and AM Tuner. Dual-channel, centralized system. Ten Selector-Switches for built-in speakers. Stereo and monaural music, room-to-room Intercom. Door-answering from any speaker. "Locator" selects stereo broadcasts. 38 solid state components. AFC. Output 10w. Input 110-130v., 60 cycle, 15w. (No speaker) 15 3/4" x 9 1/2" x 3 3/8" deep. **Each \$227.33**

†"Fold-In-Wall" Stereo Record Changer — Model 2073. Mono-Stereo Hi-Fidelity. Fold out for use; folds into wall, out of sight. Plays all speeds. Intermixes 10" and 12" of the same speed. Diamond stylus for Stereo and LPs, Sapphire for 78 RPMs. 110-130v. AC, 60 cycle, 15 w. 15 3/4" Sq. x 4" deep. **Each \$63.66**

†"Fold-In-Wall" Stereo Tape Recorder/Player — #2406. Plays and records 4-Track Stereo and monaural Tape, favorite radio, records, speeches, etc., with up to 7" reels at 1 1/2, 7 1/2 and 3 3/4 IPS. Transistorized preamplifiers. Automatic shut-off. Accurate Numerical Counter. Fits #2074 Cabinet. No speaker. Portable for recording! 110-130v. AC, 60c., 55w. 15 3/4" sq. x 4" deep. Cabinet is extra (see below). Tape Recorder/Player. **Each \$192.67**

†"Fold-In-Wall" Storage Cabinet — Model 2074. Holds up to 40 phonograph records. Is prewired to contain Model 2406 Tape Recorder/Player, see above. 15 3/4" square x 4" deep. **Each \$38.00**

*Walnut & Gold Finish. †Walnut & Desert Sand Finish.

CHOICE OF SPEAKERS

8" Hi-Fi Inside Speaker Model 2081. Has "Break-Away" controls. For Stereo plus Intercom (when used in same room with #2082). Monaural music plus Intercom when used alone. Controls both channels. "Talk-Listen" button for Intercom and door-answering. "Break-Away" Control can be mounted separately. 12 3/4" x 12 1/4" x 2 5/8". Egg-Shell White frame, Fabric Grille. **Each \$20.93**

8" Hi-Fi Inside Speaker Without Controls, Model 2082. Used with and controlled by #2081 in same room, for Stereo. Same size & finish as #2081. **Each \$13.53**

5" Inside Speaker — Model 2027. For rooms where Intercom is primarily desired. Volume-Control; Talk-Listen button for Intercom and Door-answering. 8 1/2" x 6 3/8" x 2 5/8". Desert Sand finish. **Each \$6.00**

8" Patio Speaker With Controls — Model 2084. Music, Intercom and door-answering from the patio! Use with #2085 for Stereo. Includes Remote-Control. Weatherproof. 13 3/4" sq. x 2 5/8" deep. Aluminum. **Each \$20.27**

8" Metal Speaker Without Controls Model 2085. Used with and controlled by #2084 for Stereo. Can also be used inside with a different rough-in kit. Same size and finish as #2084. **Each \$12.27**

Deluxe High-Fidelity Speaker System — Model 2419. One 12" woofer, 1 lb. magnet, two 3 1/2" tweeters. Use two for

Stereo-FM+Stereo Records+ Stereo Tape+ Intercom

Master Unit, Amplifier, Tuner

Stereo, one for monaural. Control volume and Intercom with Remote Unit #2083. 17 1/8" x 28 1/8" x 3 3/4". Walnut frame, fabric Grille. **Each \$63.00**

DOOR SPEAKERS let you answer strangers from inside, or the patio; check on child activities; monitor outside sounds at night. (Door-speakers not designed for music).

Surface-Mounted Universal Door Speaker — Model 412. For use with all NuTone Systems. Can mount at arm height, or out of reach on ceiling, wall or soffit with Talk-Listen button installed in the door jamb. 4 5/8" x 3 3/4". Desert Sand & Gold finish. **Each \$9.47**

Built-In Door Speaker — Model 2007. Has 3-position Talk-Listen switch. Center is "off". 8 1/2" x 6 3/8" x 2 5/8". Desert Sand finish. **Each \$9.67**

Built-In Door Speaker — Model 2008. Highly stylized. Has 2-position Push-Button instead of "slide" switch. 4 5/8" x 6 1/8" x 1 5/8". Gold Anodized finish. **Each \$7.87**

Built-In Door Speaker Model 2006: 2-position switch. 4 5/8" x 5 5/8" x 1 3/4". Gold Anodized. **Each \$5.27**

NOTE: Model Numbers are for finished units only.

Be sure to order proper Rough-In Kits. Use NuTone 5-Conductor flat Wire — 200 ft. #2078: \$8.13. 1000 ft. #2079: \$36.33. Outdoor FM Antenna #2420: \$8.47.

NUTONE 8-WIRE SOLID-STATE MUSIC INTERCOM SYSTEM

DELUXE BUILT-IN FM-AM MODELS N-2561, N-2562

Superb tone! Crisp, clear room-to-room Intercom and radio music for the entire home, plus door-answering from any speaker. Needs no room-selector switches at the Master. Eight-wire cable. Wires from one station to another; not always back to Master. Saves hours of costly "on-the-job" time! Removable, Walnut-grain frame included. Master Station available in Silver or Copper finish. 17 3/8" x 9 5/8" x 1 1/4".

*Model N-2561 FM-AM Master Station, Silver Finish. **Each \$129.86**
 *Model N-2562 FM-AM Master Station, Copper Finish. **Each \$129.86**

(Record Changer shown above can be used with this System)

OUTSTANDING FEATURES

25 Solid State Components. No tubes to replace. Turn off music at any station and still send or receive Intercom calls and door-chime signals (When a NuTone Door-Chime is connected to system). Answer Intercom without walking to a speaker. Music is silenced when Intercom is being used. No outside controls needed at Door-Speakers. Permits at least 16

Remote-Speaker Stations. Largest Master Station Speaker: 9" x 6". Twice as powerful; twice as sensitive. Plug-in "B" Unit. Removes easily for servicing. "Sealed-in" metallic finishes will not corrode. Automatic Frequency Control prevents station-drift. Two phono-jacks: One internal, one external.

CHOICE OF SPEAKERS

Model 2570 — Wide Range 5" Inside Speaker. Rotary Controls. Privacy-setting prevents eavesdropping. Talk-Listen Levers for Intercom and door-answering. 9 1/4" x 6 1/2" x 1 1/2". Desert Sand finish. **Each \$ 11.80**

Model 2572 — Hi-Fi 8" Inside Speaker. "Break-Away" Control removes to mount as a Remote-Control. Includes "snap-in" panel to replace panel in speaker. Rotary Controls. Talk-Listen Levers for Intercom and door-answering. Bezel Frame furnished for mounting "Break-Away" Panel, if used as a Remote. 12" sq. x 2 5/8" deep. Desert Sand finish. **Each \$ 18.93**

Model 2571 — Door Speaker. Mounts in wall, ceiling, or soffit. Weatherproof. 4 5/8" x 6 1/8" x 1 3/4". Black and Gold Anodized finish. **Each \$ 9.00**

Model 412 — Surface Mounted Door Speaker. For size, and description, see above. For this system, discard Talk-Listen button and use replacement insert (included). **Each \$ 9.47**

Model 2573 — Hi-Fi 8" Patio Speaker. Weatherproof Aluminum. Includes Remote-Control: Talk-Listen levers, Rotary-Controls. Permits Speaker to be mounted out of reach. 13 3/4" sq. x 2 5/8" deep. **Each \$ 18.94**

*Master Stations include AM Antenna Wire, FM omni-directional Antenna, 50 ft. of lead-in wire, mounting hardware, low-voltage power transformer. Use NuTone 8-conductor wire — 50 ft. #2421: \$4.33, 250 ft. #2424: \$12.33, 1000 ft. #2425: \$49.00. Outdoor FM Antenna #2420: \$8.47

EMERSON-RITTENHOUSE SOUND SYSTEMS

AM or AM/FM ALL TRANSISTOR
RADIO-INTERCOM SYSTEM

Privacy switching, monitoring, door answering service. Hi-low and off switching on master. Plug in your record player and "pipe" your favorite music to any room—anytime. Package consists of master, 3 indoor speakers, 1 outdoor speaker, transformer, mounting frames, and 120 foot cable. Many optional accessories. Ebony and black or brown and copper.

No. RM-20 AM Radio, complete package \$70.19
No. RM-22 AM/FM Radio, complete package 104.94

OUTERCOM SYSTEMS

No. DS-1

No. DS-2

The DS-1 Emerson-Rittenhouse Door Sentry provides convenience and security. This attractive "outercom" system allows the door to be answered in complete privacy—no more unexpected or unwelcomed surprises. You know "who's there" before the door is opened. For use on existing homes.

No. DS-1 Door Sentry complete includes indoor remote station and outdoor remote station, 30' of 5 conductor cable. Wt. 3 lbs. \$21.32

The DS-2 system Door Sentry outercom is simple to install and operate. Uses standard door chime wire and 16 volt chime transformer. For use in new construction.

No. DS-2 Door Sentry complete includes indoor and outdoor remote stations. Wt. 3 lbs. \$18.05

CHROMALOX CARTRIDGE HEATERS

TYPE C

Suitable for dies, platens, plastic molds, process machinery, etc., operating temperatures up to 600° F. Used wherever it is necessary to concentrate heat in confined areas by inserting heaters in close fitting, drilled holes. Drill holes to the proper length and nominal cartridge diameter and ream plus .003" max.—minus .000".

Construction consists of a helical coil of nickel chromium resistance wire embedded in refractory material which is encased in a metal sheath. Brass sheath is standard. Maximum safe sheath temperature 750° F. Sheath operating temperature is dependent on both the particular application and the watts per square inch of sheath.

Cat. No.	Sheath Diameter		Sheath Length Inches	Watts	Each

*120 volts only. All others 120 or 240 volts.

Type A Terminal Construction

TYPE A (3/8" TO 3/4" DIA. INCL)

Lead Length: 10 Inches

Type A Lead—is standard on all standard units 3/4 inch dia. or less. Lead wires are flexible for easy installation in confined areas. Stranded manganese nickel wire is asbestos covered to withstand high temperatures.

CHROMALOX ELECTRIC BASEBOARD HEATERS

BB-A AND BB-B BASEBOARD HEATERS

Safe, efficient Chromalox wrapped-fin heating element. Gentle warmth provided automatically. Heavy-duty steel construction. Continuous linear thermal cutout prevents overheating. Heater can be mounted without removing cover. Integral junction boxes form end caps and provide for wiring at either end. Front and back baffles removable as one piece.

Compact size and design — only 6" high x 2 1/8" deep. Coral Tan baked-on enamel. Can be painted to match any color.

UL labeled and NEMA verified.

CHROMALOX THERMOSTATS TYPES WR-80 AND WR-90

Control room temperature by automatically turning electric heater off when desired temperature is reached. Can be used to control heater within thermostat rating. WR-80 has range of 40° to 80° F and has finer appearance for residential use. WR-90 has range of 20° to 90° F. Both have capacity of 3000-watts at 120-volts A.C. WR-80 is rated 5280 watts and WR-90 is 4800 watts at 240-volts A.C. For higher ratings use magnetic contactor.

Type WR thermostat should be wall-mounted (inside wall) 4 or 5 feet above the floor. Contacts open or close with a 3 degree temperature change.

WR-80 or WR-90 Thermostat.....each \$15.55

CHROMALOX P'RIM-TRIM DRAFT BARRIER HEATER

Gentle warmth at window area overcomes immediate heat loss for more even comfort, without drafts. P'rim-Trim is extremely compact — hugs the window like a molding — only 4' long, 3" high, 1 1/2" deep. Continuous linear thermal cutout. Design allows for right or left hand wiring with entry back or end. Units may be individually mounted or adjoining.

Differential: Adjustable
1/2°F. to 2°F.
Electrical Rating:
30 volts A.C. Max.
Adjustable Heat Anticipator: .2 to 1.0 amps.

No. WR-1E30each \$6.50

CHROMALOX FAR-INFRARED ELECTRIC COMFORT HEATERS

Decorative ceiling-type mounting for stores, bowling alleys, offices and other commercial uses.

Heating element is a totally enclosed, refractory insulated Chromalox Tubular element. The element housing is a specially designed rigid aluminum extrusion; the reflector is highly polished aluminum designed for easy access and removal from the face side. Fixture stems provide minimum 12" spacing below combustible ceiling; each stem has canopy and fixture for attachment to standard conduit box.

Stainless steel grille for protection against accidental contact is shipped as standard equipment on each heater. UL listed.

Cat. No.	Length, In. Heated	Overall	Watts	Each
120, 208, 240 Volts				
SKR-2083	16 1/2	24 3/4	800	\$19.50

SKR-6303	65 3/4	73 3/4	3000	33.47
SKR-7363	78	85 3/4	3600	35.88

Underwriters' listing applies to Type SKR Heaters installed with these minimum spacings: 12" from ceiling as provided with fixture stems, six feet from floor, and 24" from walls.

CHROMALOX RADIANT HEATERS

TYPE RAD

Heat source is a Chromalox enclosed tubular element, alloy sheathed and with triangular cross-section, located at the focus of a parabolic reflector and mounted on secondary insulating bushings to withstand high voltage. Aluminum reflector is held in an all-metal housing. Sliding steel clamps can be positioned anywhere along the heater length. Connectors and mounting clamp assemblies are furnished.

TYPE QR HIGH INTENSITY QUARTZ RADIANT HEATERS

Type T-3 Quartz element is mounted on special porcelain at the focus of parabolic aluminum housing, to direct rather uniform radiation outward. Housing has tapped opening for power connections to each end. Mounted like RAD heaters.

Designed for use as personnel comfort heaters and for industrial heating purposes. This high intensity heater, producing 100 watts output per lineal-inch of heated length, may be operated in banks facing-up, down or sideways, but the element must be mounted in a horizontal position. Heater produces both near-infrared and far-infrared radiation, absorbed by surfaces of most colors.

CHROMALOX THERMWIRE

THERMWIRE STEP DEFROSTER MATS

This ready-to-install assembly is designed especially for imbedding in concrete steps to clear snow and ice from this hazardous area. The two-step and three-step mats can be combined for four or more steps. Or use on landings by closing space between heated sections. Each mat has 10' lead wire and 10' ground wire, each with ends stripped. All are Underwriters' Laboratories listed for snow-melting.

FAN-HEATER-LIGHT 5010-1 SERIES

Has 1500 watt nickel-chrome element mounted in bright aluminum reflector, 2—60 watt lamps, and super quiet squirrel-cage blower. Positive action, fully automatic diverter closes exhaust part when used as heater. Lights and exhaust work independently or together and in combination with heating function. Chrome grille finish with white opal flat glass lens. Blower HVI rated 70 CFM each \$35.05

ELECTROMODE HEATING

Low-LEVEL BASEBOARD HEAT

For every installation, Electromode Low-Level Baseboard is engineered to meet all your requirements. The Golden Bronze finish and slim, Low-Level design give it a stylish, up-to-date appearance. Cushioned mounting permits quiet operation. Pre-wiring and pre-punched mounting holes make installation quick and easy.

Long life and hazard-free operation are guaranteed by the exclusive protection of the patented Electromode Safety-Grid and the heavy gauge steel construction. A thermal limit switch provides temperature control and protection along the entire length of the baseboard. Automatically cuts off service to the heater in event air flow is blocked at any point from any cause.

DOWN-FLO WALL HEATERS

Recessed Model

For large rooms, foyers, entrances and other areas requiring electric heaters in the 1.5 to 4 kilowatt range.

Has exclusive cast aluminum heating grid, precision hydraulic action thermostat, fan delay switch and thermal limit safety switch.

The "Down-Flo" principle of warm air circulation results in a more uniform, comfortable temperature throughout a room or area without drafts.

Charcoal Brown and brushed satin aluminum finish. Heavy gauge steel construction.

QUARTZONE TUBE ELECTRIC HEATERS

Controlled, economical area heating indoors or outdoors. Designed so that the infra-red rays emitted from the Quartzzone Tube may be directed to a specific area. Has great utility in industry for keeping people warm in exposed areas. Also used for spot heating, drying, food warming. This heater can be controlled by simple on-off switch, time switch or thermostat.

Made with a louvered, weatherproof housing, bonderized and finished in golden-bronze. The inside of the heater is finished with highly reflective aluminum, and is designed to direct rays over a rectangular area. The heaters are supplied with universal brackets for chain suspension or for bolting to ceiling and wall brackets. Heater is equipped with a chrome plated guard, easily removed for cleaning.

COMMERCIAL AND INDUSTRIAL ELECTRIC HEATERS

Model CI-10A

Model CI-5A

Electromode has combined the powerful output of an industrial heater with the handsome styling of their modern domestic line. Provide ample warmth for stores, gas stations, offices, etc. where the heating system is in view of the public.

Adjustable deflectors permit directing the fan driven heat where desired. Does not blow cool air during initial operation. Quiet operation. Built-in thermostat. Finish: Golden Bronze.

Model CI-5A—This 5KW model is designed to be suspended on a swivel-type bracket. Has rubber bumpers on base and can be used as a portable with the addition of a suitable cord and plug. Size: 9" deep, 15¹/₂" wide, 17¹/₂" high.

Model CI-10A—This 10KW model is basically two 5 kilowatt units fixed side by side, each retaining its thermostat control. Size: 9" deep, 29" wide, 17¹/₂" high.

Dimensions: Length 20CC—24", 30CC—36", 40CC—48".
Height 19½", Depth 6¾".

*Available in 1 or 3Ø.

Factory-Installed Options:

Suffix L — Overtemperature protection (not available 480v or 3Ø).

Suffix T — Built-In Thermostat, key operated through 480v.

Suffix R — Zone Control Relay for external 120v. control available in 208, 240, 480v, 1Ø and 3Ø.

Trim Frame available for semi-recess.

Please call your local Graybar office for installed option pricing.

AUTOMATIC PORTABLE HEATERS (Type RPB)

Famous "electric chimney" elements provide well-balanced radiant convection heat with extra dependability and no maintenance. Sensitive built-in thermostat.

Cat. No.	Wattage	Length	Overall	Height	Each
			Height		
15RPB	1500	12½"	18"	18"	\$31.03
20RPB	2000	16"	18"	18"	35.01
30RPB	3000	16"	18"	18"	35.01
30RPB-3	3000	22"	18"	18"	40.52
40RPB	4000	22"	18"	18"	40.71
40RPB-4	4000	27½"	18"	18"	48.99
48RPB	4800	27½"	18"	18"	48.99

Voltages: 240 (120 or 240 on 15RPB).

30RPB available with 2 or 3 elements (30RPB-3).

40RPB available with 3 or 4 elements (40RPB-4).

3-wire cord and cap set through 4 kw. 3-wire cord only over 4 kw.

Type RWC

Type RW

RW RADIANT CONVECTOR

Element is visible through grille for direct radiation — approximately 15% of heater output.

RWC CONVECTOR

Baffled grille covers radiant component for approximately 100% convection and allows close furniture placement.

Cat. No.	Wattage	Wall Opening		Each

Price on Application

WESIX ELECTRIC HEATERS BASEBOARD HEATERS (HBG Series)

HBG

Easy 3½-minute installation! Special mounting brackets fasten to wall—automatically locate proper height for heater. Baseboard slips onto the brackets without disassem-

bly. Aluminum fin element assures silent operation. Pale beige finish is factory-baked and can be painted. Over-temperature protection and ten-year element warranty.

AUTOMATIC SNOW MELTING CONTROL

Automatic switch designed to detect first few flakes of snowfall and automatically turn on Sno-Melter electric heating mats. When snow has stopped falling and ice and snow have been completely melted, the Automatic Switch turns off electricity and the heating units remain off until more snow or freezing rain begins to fall.

Requires 24 volt 45 VA power supply for operation.

Cat. No.	Description	Each
EZ-AS-1	Sno-Melter Automatic Switch less transformer	\$98.11
EX-PS3-2	Power Contactor 120 amps. 240V. AC with built-in 24V. 100VA transformer and external auto-off-on selector switch and pilot light	69.38

ELECTRIC HEAT BANDS

Moisture proof vinyl band with heater wire each side spaced 1/2" apart in separate insulated channels. AB and B models with 12" cold lead and plug. AU' and U' with 5' leads and stripped ends. All for 120 or 240 volts. AB and AU include thermostats. AU' and U' models U.L. listed.

Price and Order Procedure: To determine mat area for pricing, use longest length and width dimensions. Prices apply to each individual unit and style. Unit areas are not to be combined for pricing.

1. Specify style A, B, C, or D. If other than Style A, enclose sketch showing all dimensions for L, W & N as indicated on drawings below.

2. Assign a part number for all mats as shown below. Use longest length and width dimensions.

Typical Part Number: 20-D-24-2-56 (N)

20- Length in Feet
D- Series "D" Mat
24- Width in Inches
N- For Notched Mats only

Volt Designation: 1 — 120V., 8 — 208V., 2 — 240V., 7 — 277V., 4 — 480V.

Maximum 20 amps per mat.

FEDERAL PACIFIC ELECTRIC HEATERS

All FPE heaters are built with the contractor, as well as the ultimate user, in mind. Ease of installation that saves the contractor both time and money is a major feature in all FPE heaters.

BASEBOARD HEATERS

Save 25% on installation costs. Mount baseboards without expensive disassembly time. Work within a 50% larger terminal box. Has 15% more fin area for even cooler operation. Floating suspension and nylon "silencers" bushings allow expansion and contraction of heating unit without metal stress. Reduces noise, eliminates call backs.

Also most models available in 208 and 480 volt. 6 through 20 KW heaters include built-in contractors.

INFRARED LAMP HEATERS

Infrared rays, like the rays of the sun, do not heat the air through which they pass. Instead, infrared rays warm only the objects that absorb them. This makes infrared lamp heaters ideal for heating high ceiling factories or for outdoor use where conventional heating is impracticable or too costly.

240V. Cat. No.

	Watts	Amps.	Beam Spread Degrees	Each*
IQL1690	1600	6.67	90	\$26.90

EDWARDS SIGNALING DEVICES

THE CATALINA

The Catalina with its contemporary lines and neutral gray coloring and gold insert, is a chime sure to add a pleasing note to any home. Two notes for front door, one note for the rear, it operates from an Edwards #990 transformer.

Cat. No. **C-75**

Model Catalina Each **\$3.66**

THE CORINTHIAN

This beautiful chime adds a modern Grecian touch to any home, harmonizing nicely with both contemporary and traditional decor. Its attractive ivory colored shield is accented by brass side grilles. Two notes for front entrance, one for rear.

Operates from 16V, 10 watt transformer.

Cat. No. **C-79**

Model Corinthian Each **\$6.00**

THE BRIARCLIFF

A handsome chime with a distinctive and pleasing tone. Finished in cherry grain, with brass-colored vinyl center, it blends with any decorative motif. Two note front door signal, and one note for the rear door. Operates from an Edwards #992 transformer.

Cat. No. **C-87** Model Briarcliff Each **\$8.25**

THE CLASSIC

This beautiful chime in its rich mahogany case accented with a decorative golden grille over beige fabric is enriched with a symphonic, resonant chime tone. Signals for front and rear entrances, it operates from an Edwards #992 transformer.

Cat. No. **C-84**

Model Classic Each **\$7.40**

THE IVANHOE

C-106

Knob and shield of aluminum anodized gold finish. Twist mechanical chime with smooth acting mechanism. No. C-107 has Family-Gard™ Viewer affording home protection by means of a wide angle lens which provides view of either side of doorway. Two note. 6½" x 3" x 2⅞".

Cat. No. **C-106**
C-107

Model Ivanhoe Each **\$3.70**
Ivanhoe (with Viewer) **5.85**

THE CLEF

A smartly styled flush chime with two and one note signals. White-sand, molded plastic cover snaps into position, spring clips allow for adjusting mounting depth. Noiseless nylon bearings.

Cat. No. **C-82** Model Clef Each **\$4.40**

DOORBELL, CHIME AND SIGNALING TRANSFORMERS EASI-MOUNT

U. L. listed for mounting on any outlet box or cabinet with ½ inch knockouts, or alone on any surface without box, exclusive Easi-Mount feature for fast installation.

All have built-in self-restoring circuit breakers which protect against overload. Edwards Easi-Mount transformers are 25% smaller and lighter than previous types.

Cat. No.	Volts	Watts	Each
990	10	5	\$1.65
992	16	10	2.02
996	6, 12, 18	7.5	2.52

EASI-MOUNT FLUSH TRANSFORMERS

Mounts in multi-gang outlet boxes, eliminates long wire runs. Ideal for apartment house applications. Can be mounted in same outlet box with variety of flush signals. U. L. listed.

Cat. No.	Volts	Watts	Each
991	10	5	\$2.68
993	16	10	3.05

TRI-VOLT TRANSFORMER

A surface mounted transformer with primary wire leads and exposed secondary terminals. Designed for applications where an unusually long wire run exists.

Cat. No.	Rated	Each
998	20 watts at 8 volts 30 watts at 16, 24 volts	\$3.96

STANDARD SIGNALING TRANSFORMERS

Self-contained in sturdy metal housing, these transformers are designed to form their own barrier between high and low voltages, and adequately meet all safety and U. L. codes. Large, conveniently placed binding posts on both primary and secondary eliminate splicing, soldering, and taping. Secondary voltages of 4, 8, 12, 16, 20, or 24 volts provided. Knockouts provided for easy entrance with BX conduit. 88-50 and 88-100 are U. L. listed.

Cat. No.	Watts	Each
88-50	50	\$11.30
88-100	100	18.30
88-250	250	46.20
88-500	500	71.20

EDWARDS SIGNALING DEVICES

HIGH VOLTAGE PUSHBUTTONS

U. L. listed, normally open or closed, high voltage pushbuttons, either AC or DC up to 250 volts. Rugged construction with either snap-fit or locknut. 5421	104	125V DC	42.00
5421	104	24V or 250V DC	42.00

DESK TOP PUSHBUTTONS

Available in one to twelve button models with or without six foot cord and connector block. Molded of French Gray styrene, they will not crack or chip. Long-life silver contacts for positive action and rubber mat to prevent slipping. Suffix "C" designates cord and connector block. All models are available in either AC or DC and are rated 12, 24, and 48 volts at 4, 4, 2 amps AC, or 4, 2, and 1 amps DC.

ADAPTAHORN®

No. 370 Flush Type

No. 372 Projector Type

Amp for amp . . . the loudest horn on the market. Easily adjusted, never changes once it's set. Grille type for general installations. Projector horn directs the signal to specific areas. Flush horn gives a more attractive appearance. Specify voltage when ordering.

No. 374 Grille Type

Cat. No.	Description	Decibels at 10 ft.	Volts	Each
370-A	Flush	96	24 or 120, 60 cycle	\$24.37
372-A	Projector	95	24 or 120, 60 cycle	17.72
374-A	Grille	98	24 or 120, 60 cycle	15.12
371-L	Flush	95	All DC voltages to 250V	19.45
373-L	Projector	95	All DC voltages to 250V	19.45
375-L	Grille	95	All DC voltages to 250V	16.00

EDWARDS SIGNALING DEVICES

STRAP MOUNTED RELAY

This DPDT, strap mounted relay is available in 10 ratings to serve up to 60 different applications. Strap mounting permits a quick, permanent mounting in outlet box, but can be removed easily for panel mounting. All contacts are silver with diffused surface of pure gold,

and are rated at 10 amps. Terminations are pre-tinned solder lugs.

Cat. No.	Volts	Current Rating	Each
970	6V DC	10a resistive	\$5.85
971	12V DC	10a resistive	5.85
972	24V DC	10a resistive	5.85
973	125V DC	.5a resistive	6.40
980	6V AC	10a resistive, 6a tungsten	5.85
981	12V AC	10a resistive, 6a tungsten	5.85
982	24V AC	10a resistive, 6a tungsten	5.85
983	120V AC	10a resistive, 6a tungsten	5.85
984	250V AC	10a resistive, 6a tungsten	6.40

ANNUNCIETTES

672

82

Ideal for homes, offices, restaurants, rest homes, motels, and dormitories to indicate location of call. Low voltage momentary duty only. Audible signal included in both models with terminals for extension signal. Standard 12 volts, 60 cycles. Finish of No. 82 is wrinkle gray. No. 672 baked enamel. Much smaller and neater than older styles. Box on flush model is 3" deep, trim 7/8" larger than wall cut. Both models reset manually.

HOSPITAL SYSTEMS

Edwards hospital systems provide the efficiency and safety today's modern hospital demands. Edwards hospital systems include:

- Doctors in-out registers
- Ansercall®, Audio-visual nurses call
- Fire alarm systems
- Psychopathic alarms
- Silent paging
- Clock systems

Ansercall, Edwards' audio-visual nurses call, provides faster patient care and more efficient utilization of nurses time. Nurse has complete control of Ansercall, can answer calls from sickest patients first. New bedside stations permit integration with TV-radio systems of any make or model.

AUDIBLE PAGING SYSTEMS

Edwards Lokator® and Lokette® are audible paging systems employing coded signals such as chimes, bells and horns to selectively page individuals. Ideal for offices, factories, banks, and any business where key people may be away from their work stations. Coded paging provides privacy not possible with voice paging systems.

LOKATOR

5240 mounting bracket (No. 5205) also available.

Available in 20 (No. 5220), 40 (No. 5240), and 80 (No. 5280) call models, the Lokator is handsomely finished in office-matching gray. It offers both manual and automatic operation, and requires no warm-up time. Modern printed circuit code wheel assures you of long dependable service. Switch

LOKETTE

5210 from selector unit as desired. Available in either flush or surface models. Operates at 24V and 120V AC.

A compact 10-call unit (No. 5210) manually operated. Wonderful for smaller businesses where anticipated expansion will not exceed ten people.

Power unit for either the Lokator or Lokette can be installed as close or as far away

New electronic power unit (No. 5202) designed for use with audio-amplifier systems adapts the Lokator or Lokette for use with existing paging or sound systems. It sounds a normal, high, or low pitch chime tone, depending on background noise, without interrupting music or use of microphone. It plugs into any AC line, and connects with Lokator or Lokette and amplifier.

Cat. No.	Description	Each
5200	Power Unit, Surface	\$60.30
5201	Power unit, flush	60.30
5202	Electronic Power unit	47.50
5205	Mounting bracket	8.10
5210	Lokette	52.50
5220	20-call Lokator	92.50
5240	40-call Lokator	157.50
5280	80-call Lokator	281.25

ZONALARM

Automatically warns of fire and notifies you of its source. Fully automatic, provides 24-hour warning system, switches to battery operation if power fails. Any number of automatic thermal detectors may be used. Zonalarm provides the features of big system protection at a small system price. Intruder alarm features, and extension signals available.

Cat. No.	Style	Each
F-401	Zoned warning panel, flush on surface	\$48.25
F-402	Power unit control panel	50.50
445	135° detector	2.70
446	190° detector	2.70

BENJAMIN SIGNALING EQUIPMENT

MODUTONE VIBRATING HORNS

Now a complete range of sound in one signal. These new units can be adjusted from a quiet buzzer to a loud howler without affecting other signals on the line. AC or DC units available.

*AC units in 12, 24, 120 or 240 volts. Add suffix voltage to Cat. No.

MOTOR DRIVEN SIREN

Listed by Underwriters' Laboratories, Inc.

Sound is produced by a rotor fan driven by a powerful, high torque, series wound motor within a port housing. AC-DC. Not for coding uses.

Housing is tapped for 1/2" conduit; supplied with built-in junction box and wiring terminals. Finish is baked gray hammered enamel.

Cat No	Volts	Grille	Each
8199-115V	115	20-Ga. Steel	\$59.15
8199-230V	230	20-Ga. Steel	63.25

WATERTIGHT HEAVY-DUTY PUSH BUTTONS

Listed by Underwriters' Laboratories, Inc.

Suitable for use with any Benjamin signal or any electrical device with a similar rating. Positive acting with a quick make-and-break mechanism. Casing is tapped top side only for 1/2" conduit entrance; can be tapped for 3/4" conduit, "straight-through" or in bottom only for either 1/2" or 3/4" conduit when specified.

Cat. No.	Description	Each
8493	Single Button, Open Circuit	\$6.20
8874	Single Button, Closed Circuit	6.20

MOTOR DRIVEN WEATHERPROOF HOWLER

Listed by Underwriters' Laboratories, Inc.

Howler has ample power to make its call heard into most noisy industrial locations, clear and vibrant in tone. High torque, series wound motor. Starts and stops instantly with the current impulses. AC-DC. Not for code-calling.

Housing is tapped for 1/2" conduit; supplied with built-in junction box and wiring terminals. Finish is baked gray hammered enamel.

Cat. No.	Volts	Type Projector	Each
8170-115V	115	5 1/2" Single Bell	\$52.80
8170-230V	230	5 1/2" Single Bell	56.95
8170-250V	250	5 1/2" Single Bell	62.45

TYPE EXH EXPLOSION-PROOF HOWLER

Listed by Underwriters' Laboratories, Inc. Class I, Groups C and D; Class II, Groups E, F and G; Class III Hazardous Locations

Howler has ample strength in every part to withstand the tremendous pressure of internal explosions without breaking down or permitting flame, hot gases or sparks to escape and ignite surrounding atmosphere.

Housing is tapped one side only for 1/2" conduit entrance; can be tapped one side for 3/4" conduit or "straight-through" for either 1/2" or 3/4" conduit when specified. Finish is baked gray hammered enamel. AC current only.

Cat. No.	Volts	Type Projector	Each
8130-24V	24*	5 1/2" Single Bell	\$55.00
8130-115V	115	5 1/2" Single Bell	55.00
8130-230V	230	5 1/2" Single Bell	59.15

*Unsuitable for use with low voltage signals. Signaling transformers are required.

TYPE SWP WEATHERPROOF HEAVY-DUTY BUZZER

Listed by Underwriters' Laboratories, Inc.

Buzzer has a distinctive tone and is ideal for code-calling. Sound-producing mechanism starts and stops with the current impulses. AC and DC units available. Do not have muting mechanism.

Housing is tapped one side only for 1/2" conduit entrance; can be tapped one side for 3/4" conduit or "straight-through" for either 1/2" or 3/4" conduit when specified. Finish is baked gray hammered enamel.

FEDERAL ELECTRIC SIGNALS

VIBRATONE BELLS

Vibrating, Single Stroke and Chime

Radical modular design uses one basic mechanism with option of 4", 6" or 10" gongs. Modular accessories for a wide variety of mountings are same as used with Vibratone Horns. Basic model also mounts on standard outlet boxes.

Top quality, unexcelled performers for heavy duty but low current consumption. Available for AC or DC, single stroke, as well as standard vibrating type. AC models have no contacts. Single stroke AC in 700 and DC in 800 number series correspond to, and conform respectively in price to, vibrating models listed below.

Federal bells, except the chime, carry the same price for all standard voltages from 6 to 250. Exact voltage required must be specified on order.

Model No.		Description	Price
A.C.	D.C.		
4-Inch Bells			
504	604	Basic unit	\$13.20
504N	604N	Interior type	14.10

506SF	606SF	Semi-flush	19.50
506CC	606CC	Concealed conduit	19.50
506F	606F	Flush	29.10
10-Inch Bells			
510	610	Basic unit	\$22.80
510N	610N	Interior	23.70
510W	610W	Weatherproof	25.80
510SF	610SF	Semi-flush	23.70
510CC	610CC	Concealed conduit	23.70
510F	610F	Flush	37.20
101	201	Chime	19.80

For industries and municipalities, wherever a loud distinctive general alarm or code signal is desirable.

For short codes or prolonged alarms, Federal air horns are ideal. Each successively

larger whistle has a deeper and more powerful tone. Projectors are specially machined cast bell bronze. Horns are available for specific pressures ranging from 15 pounds upward.

Diaphragms of special metal will last almost indefinitely at proper working pressure. Hand valves or electric valves also are available at prices depending on current and pressure characteristics required.

Numerals in Model Nos. indicate diameter of diaphragm. Letters H, M, or L indicate high, medium or low pitch. For example, Model 10-L is a 10-in. diaphragm low pitch horn, etc.

WARNING LIGHTS

For permanent mounting where regular 115V. 60 cycle line-voltage is available. Serve any signaling or warning function, indoors, or out, supplementing or supplanting audible signals. Range and intensity far exceeds non-rotating lights.

Model 271 — A super powerful 200 watt sealed beam lamp rotates beneath a colored dome, optionally red, green, blue, amber or clear white. Lamp may be adjusted to any angle from 9° below horizontal to almost vertical. Rugged cast aluminum case radiates heat and design permits instant inspection and relamping. Approved by Underwriters' Laboratories. Mounts on 1" pipe or any flat surface.

Model 27S — A smaller, less expensive, but very effective Beacon Ray. Rotating reflector revolves beam from a 75 watt spot lamp. Mounts on 1/2" pipe or conduit.

Model 121-S — A compact light with revolving reflector and 25 watt bulb. Many times more effective than flashing lights of much greater wattage. Same color choices as Model 271. Mounts on 1/2" conduit.

Model 27X — An explosion-proof Beacon, similar in appearance to Model 271 but mechanically similar to Model 27S. For hazardous location. Constructed to Underwriters' standards but approval pending.

Valves are available for any common voltage in D.C. from 6 to 250 volts; for 60-cycle A.C. in 24, 110, 208, 220, and 240 volts; and for 25-cycle A.C. on 110, 220, and 440 volts.

FEDERAL ELECTRIC HORNS

Offered in a variety of types and models. Excellent for coding or alarm. Vibratone horns produce the familiar industrial horn tone. Resonating horns, twice as loud, have a trumpet tone. Motor driven horns, less powerful, and not satisfactory for coding, provide a third distinct sound.

Available in standard voltage 60 cycle AC and also DC between extremes listed. 25 cycle AC also available. All have tapping or knockouts for 1/2" conduit and are finished in gray enamel.

VIBRATONE HORNS

A radical new design. The basic unit plus accessories produces all types and optional mountings. Add the flush box and grille for a completely flush horn. Add one or two projectors for single and dual projector models.

The most powerful vibratory horn on the market, factory tuned to maximum volume. Can be cut down to a whisper by rotating adjusting screw. Self compensating. Good for continuous duty. Lowest current consumption. Fits any standard 4" square outlet box. Specify any standard voltage from 6 to 250.

FEDERAL ELECTRIC INDUSTRIAL SIRENS AND CONTROLS

TYPE A SIREN

A long-time favorite for all purposes. Has quick pick-up to high maximum pitch for contrast with industrial and traffic noises. Has 1/2 horsepower sound output at 150 watts. Complete with adjustable bracket and weatherproof housing. Choice of voltages includes 6, 12, 24, 48 and 110, for 25 to 60 cycle AC, or DC. Siren length, excluding bracket 11 1/2"; diameter 10 1/2". Net weight 13 lbs. Shipping weight 15 lbs.

Type A Sireneach **\$69.00**

TYPE J SIREN

Similar to the type A but has heavy duty motor for severe services on cranes and other heavy industrial equipment. Choice of 110, 220 or 250 volts, 25 to 60 cycle AC, or DC. Length 12". Diameter 11 1/2". Net weight 15 1/2 lbs. Shipping weight, 18 lbs.

Type J Siren.....each **\$81.00**

TYPE D SIREN

Also similar to the types A and J but with a more powerful motor. Produces 1/2 horsepower sound output on 215 watts. Its deeper tone carries farther and provides better contrast where ambient noises are high pitched. Weatherproof construction and adjustable bracket included. Choice of 6, 12, 24, 48 or 110 volts, 25 to 60 cycle AC or DC, 12" long and 9 1/2" in diameter. Net weight 14 lbs. Shipping weight 17 lbs.

Type D Siren.....each **\$75.00**

TYPE L SIREN

The heavy duty version of the type D Siren, for heavy industrial use and higher voltages. Choice of 110, 220 or 250 volts, 25 to 60 cycle AC or DC. Length 11 1/2"; diameter 11 1/2". Net weight 16 1/2 lbs. Shipping weight 19 lbs.

Type L Sireneach **\$87.00**

MODEL AX EXPLOSION PROOF SIREN

Similar in sound output to the models A and J siren. Meets rigid Underwriters specifications for use in Class I group D and Class II groups F & G hazardous locations, 110 volts only AC or DC. Length 10"; Diameter 7". Net weight 16 lbs. Shipping weight 19 lbs.

Model AX Explosion-Proof Sireneach **\$207.00**

VERTICAL SIRENS

5 H.P. Siren

Large vertical sirens are excellent and comparatively inexpensive signals for fire, air raid, and other alarm purposes in industry or municipality. The vertical design distributes sound waves radially over distances averaging 1/2 to 2 miles, depending on local conditions. Specially designed ball bearing motors assure quick pick-up and high output. The two horsepower universal motor will also operate on DC. All others are for 60 cycle AC operation with choice of voltages as tabulated below. The model STH-10 differs radically in design and appearance. With sound output proportionately higher than its horsepower indicates.

Model	H.P.	Phase	Voltages	Shpg. Wt. Lbs.	Each
2	2	1	110 Or 220	70	\$337.50
5	5	3	220/440	300	594.00
5	5	1	220	325	774.00
STH-10	10	3	220/440	450	855.00
STH-10	10	1	220	470	1035.00

REMOTE CONTROL RELAYS

Must be used with all large sirens to permit remote operation by push-button, timers, alarm boxes, or program clocks.

Description	Each
Remote Control for No. 2 Sirens.....	\$43.20
Remote Control for Nos. 5 and ST Sirens—3 phase	81.00
1 phase	103.50

FIRE ALARM PULL BOX

A pull of the handle winds the clockwork actuated contacts to sound the siren up and down scale for 2 minutes and then stop. No voltage limitations.

Description	Each
Pull Lever Box (as illustrated).....	\$86.40
Pull Lever Box—Weatherproof	88.20

PREDETERMINED GENERAL ALARM CONTROL

Operates the siren up and down scale for 2 1/2 minutes but can be actuated by one or more remotely located start only push buttons. Choice of 110 or 220 volts.

Description	Each
Preetermined General Alarm Control, ea.	\$97.20
Push Button for above	6.30
Push Button in weatherproof break glass box	27.90

PROGRAM CLOCK

Can be set to blow the siren one blast at a time or test signal at any five minute interval in a 24-hour day. Choice of 110 or 220 volts, 60 cycle A.C. Has self-starting motor.

Description	Each
Model 75 Program and Test Clock	\$102.60

BURGESS-DAY

**NOISE-FREE TELEPHONING
WITH BURGESS-DAY ACOUSTI-BOOTH®**

- Kills noise
- Privacy without doors
- Minimum maintenance
- Built-in fluorescent light
- Open-space ventilation
- All-metal

Model 45 Acousti-Booth has the best overall performance for most locations. It has full acoustical efficiency even in highest noise level areas, and provides the "quiet zone" for telephone calls anywhere.

You are the door of the Acousti-Booth. You can handle phone conversations in comfort and privacy regardless of outside noise. The combination of the patented booth design and the sound-absorbing characteristics of the booth walls reduces outside noise to minimum levels.

There is almost no maintenance on the Model 45 Acousti-Booth. The rugged all-steel construction requires only occasional surface wiping. There are no doors, no hardware, no fans to maintain.

Colors: Gray, green or beige — all with white interior. Gray is shipped if no color is specified.

Illumination: Built-in fluorescent light.

Outside Dimensions: 35½" W., 32" D., 36" H.

Net Weight: 125 lbs.

Shipping Weight: 147 lbs.

Cat. No.		Each
45	Acousti-Booth — for wall mounting.....	\$139.50
45	Acousti-Booth — with tubular legs — set of 3.....	169.50
45	Back Mounting Bracket (1 required)....	17.00
45	Side Mounting Bracket (1 required)	20.00

Model 45 Acousti-Booth with legs — Three heavy gauge tubular steel legs provide rigid off-the-floor mounting.

Below: Many floor plan variations are available with Model 45 . . . side wall mount, back mount and an infinite number of cluster variations.

Four Model 45 Acousti-Booths take up much less space than door-type booths.

**Model 602
ACOUSTI-BOOTH
FOR MEDIUM
NOISE LEVELS**

Model 602 is an all-metal Acousti-Booth that is the perfect answer for limited space and low budget. It is extremely effective in offices, corridors, stores, lobbies, dormitories and restaurants.

Colors: Gray, green or beige — all with white interior. Gray is shipped if no color is specified.

Outside Dimensions: 28" W., 26" D., 32" H.

Net Weight: 75 lbs.

Shipping Weight: 92 lbs.

Cat. No.		Each
602	Acousti-Booth	\$98.00

**Model 601
ACOUSTI-BOOTH —
WHERE WOOD
DECOR IS DESIRED**

This all-wood Acousti-Booth is similar in size, design and function to Model 602 Acousti-Booth, shown above. You can obtain Model 601 in unfinished birch and finish it to your specifications, or it is available in walnut stain.

Outside Dimensions: 28" W., 26" D., 32" H.

Net Weight: 50 lbs.

Shipping Weight: 68 lbs.

Cat. No.		Each
601	Acousti-Booth, Walnut Stain.....	\$122.00
701-UF	Acousti-Booth (unfinished)	110.00

**Model 211
ACOUSTI-BOOTH —
HEAVY DUTY
FLOOR BOOTH**

For use in areas where low-frequency noises predominate, such as noisy plants having very heavy machinery, pumping stations and generating plants where power source is large, slow-moving engines.

Color: Gray only — with white interior.

Illumination: Built-in fluorescent light and shelf.

Outside Dimensions: 31" W., 38½" D., 79¾" H.

Net Weight: 320 lbs.

Shipping Weight: 360 lbs.

Cat. No.		Each
211	Acousti-Booth, with light.....	\$315.00

STROMBERG-CARLSON SOUND POWERED TELEPHONE SETS

EQUIPPED WITH MAGNETO-HOWLER CALL

The voice of the user supplies all the power necessary to operate sound powered telephones. The voice causes fluctuations in the magnetic circuit of transmitter creating alternating current. This current is transmitted to receiver where sound waves are created, reproducing speaker's voice.

Designed to withstand exacting shock, vibration, salt water corrosion, temperature and pressure tests. Molded parts are of impact material. Metal parts made of non-corrosive materials whenever possible.

No. 702019-520

Each station consists of a sound powered telephone handset mounted on a waterproof cast aluminum case, which contains a 1000 cycle magneto generator, a howler unit with connecting horn, the necessary terminal blocks and, if selective ringing is required, a rotary selector switch.

**COMMON TALKING — COMMON RINGING
No. 702019-455 STATION**

Four stations per system with maximum separation between any two stations of four miles. Wiring reduced to minimum. Two twisted pairs per system of No. 22 AWG or larger. One for calling and one for the telephone. To call, turn generator crank, this operates howlers at all stations except originating station. To talk simply press and hold down button on handset.

**COMMON TALKING — SELECTIVE RINGING
No. 702019-505 AND 702019-520 STATION**

No. 702019-505: Maximum number of stations per system is eight. No. 702019-520: Maximum number of stations per system is sixteen. Twisted pairs of No. 22 AWG or larger recommended for both telephone and calling lines to avoid cross talk. To call simply turn selector switch to desired station and turn generator handle. Howler operates only at selected station. To talk, press and hold down the button on the handset.

**MASTER STATION SYSTEMS
No. 702019-445 SUBSTATION**

Designed to be used in conjunction with a master station. Any selective ringing station. No. 702019-505 or 702019-520 may be used as master stations. Master station may call any substation, but substation may only call master station. Three twisted pairs wiring required between each substation and master station.

Price on Application

APPROVED BY BUREAU OF MINES

These sound powered telephone stations have been tested and approved by the Bureau of Mines, U.S. Department of the Interior, for use in mines. The Bureau states: "Permissible" as used in the schedule means formally approved by the Bureau for use in mine atmospheres that may contain methane or coal dust. The approval plate will be placed on all stations listed below. No shielding or special protection is required to make these systems explosion-proof throughout, other than caution against contact with power or light lines noted on the approval plate.

No. 702019-535 Station
With No. 701000-677 Hood

**COMMON TALKING — COMMON RINGING
No. 702019-535 STATION**

Four stations per system with maximum separation between any two stations of four miles using No. 22 AWG wire will give good performance. 11 1/4" long, 10 3/4" wide, 4 3/4" deep. Approximate weight 9 lbs.

**COMMON TALKING — SELECTIVE RINGING
No. 702019-545 STATION**

Maximum number of stations per system is eight. Specifications similar to 702019-505 but is supplied with terminal tube. 11 1/4" long, 10 3/4" wide, 5 3/4" deep. Weight 10 lbs.

No. 702019-555 STATION

For sixteen station common talking — selective ringing system. Specifications similar to No. 702019-520 station but is supplied with terminal tube. 11 1/4" long, 10 3/4" wide, 5 3/4" deep. Approximate weight, 10 lbs.

No. 701000-677 HOOD

Can be used with any station listed on this page. It is particularly useful in mine areas where falling rocks or dirt is an ever-present hazard.

JACK BOXES

No. 702019-400: Watertight brass enclosure. Equipped with single jack on cover to accommodate No. 702004-234 plug and with molded phenolic terminal block in case.

No. 702019-401: Same except has two jacks on cover.

No. 702019-402: Same except has four jacks on cover.

STROMBERG-CARLSON SOUND POWERED TELEPHONE SETS AND ACCESSORIES

SOUND POWERED HANDSETS

No. 702019-675

No. 702019-675 WEATHERPROOF HANDSETS

With built-in press-to-operate switch, recommended for heavy duty uses or where portability is desired. When button of press-to-operate switch is depressed, the handset is connected to the line. Supplied with 4 ft. of rubber covered cord. Weight without cord is 22 ounces.

No. 702019-575 WEATHERPROOF HANDSET

Without built-in switch. Has 4 feet of rubber covered cord. Weighs 20 ounces without cord.

No. 702019-003 UNDERWRITERS' LABORATORY HANDSETS

With built-in press-to-talk switch. Approved by Underwriters' Laboratories, Inc. for hazardous locations Class I, Group D. Supplied with 4½ foot rubber covered cord. All other interconnecting lines are to be enclosed in grounded rigid metal conduit to safeguard against accidental contact of telephone circuits with power lines or other circuits.

No. 702019-075 TYPE 333 APPROVED COAST GUARD HANDSETS

A weatherproof sound powered handset for use where Coast Guard approval is required.

SPECIAL HANDSETS

Handsets providing special switching requirements can be made-up on order as can handsets with three or four conductor cords.

MOUNTING HOOKS

No. 701012-300

No. 701002-947

No. 701002-947 Mounting Hooks: Standard mounting hook for left hand mounting. Stainless steel. Weight 2¾ ounces.

No. 701002-948 Mounting Hooks: Similar to No. 701002-947 but for right hand mounting.

No. 701012-300 Mounting Hooks: For use where there is motion, vibration or shock. Receiver end of handset is held by a rubber padded fork; transmitter end by a coil spring covered by bakelite rollers. Aluminum frame is finished black. Weight is 9½ ounces.

No. 702019-134/141 Mounting Hooks: Similar to No. 701012-300, but provides for various switching arrangements in base which are activated by removing or replacing the handset.

For more complete information contact GRAYBAR.

HEAD-CHEST SETS

No. 702019-855: Heavy duty design, recommended as an all around instrument wherever it is desirable to have operator's hands free.

Furnished with built-in press-to-talk switch which controls transmitter only. Supplied with 10 feet rubber cord.

No. 702019-905: Sound powered weatherproof single receiver head-chest set is same as 702019-855 except has single receiver.

Headsets

No. 702019-245: A sound powered weatherproof double receiver headset supplied with 19" rubber covered cord. Weight without cord, 16 ounces.

POCKET TELEPHONE

No. 702019-090

This sound powered pocket telephone is a combined receiver and transmitter that is easily carried. Convenient for tests or periodic reports.

Equipped with 3½ feet rubber covered cord. Weight without cord is 7 ounces.

INSTRUMENT UNITS

No. 702020-050/066

Sound powered units serve as microphone and receiving units in diversified products such as gas masks, power megaphones and geophysical instruments. Standard units available with variable frequency impedances of approximately 6 to 25,000 ohms. Supplied with a chemically treated aluminum diaphragm grill and nylon cover.

When ordering, specify exact requirements.

PLUG AND PANEL MOUNTED JACK

No. 702004-234

No. 702003-453

No. 702019-390

No. 702004-234 Plug: Designed for use with portable sound powered telephone equipment and can be supplied separately or attached to telephone cord.

No. 702003-453 Portable Jack: For use with 702004-234 plug.

No. 702019-390 Panel Mounted Jack: For use with 702004-234 plug.

Price on Application

LYNCH COMMUNICATION SYSTEMS

REMOTE STATUS
MONITORING SYSTEMS — B1100

Lynch B1120 Multiple Station Status Monitoring System Master Receiver including Detailed (function) Display, Station Synopsis Display for eight Remote Stations, Station Selector Switch, Decoder, Audible Alarm, Power Supply and (8) B770 Data Tone Receivers. Price on application.

The Lynch B1100 Series of Remote Status Monitoring Systems provides an integrated family of equipment designed to continuously report and display, or transfer the status of, any number of functions from one or more remote locations.

The Lynch B1100 can monitor any condition that can be represented by contact closure or an electrical voltage. All functions are monitored continuously, eliminating the need for either manual or automatic interrogation cycles with sequential readouts. Erroneous displays of status functions are minimized through this method of constant reporting supplemented by continuous error-checking provisions. The function inputs determine the individual station's continuous code, which is transmitted as detailed point-by-point information to the master station by means of a Lynch B770 solid-state tone channel, utilizing wire-line, cable or microwave transmission facilities.

Typical applications include: the transmission of binary-coded data and/or the monitoring of: circuit breakers, motor-driven valves, hazardous atmosphere-sensing devices, communication equipment, pressure switches, level switches, over-or-under voltage switches, flow switches and valves.

DATA TONE TRANSMISSION SYSTEMS — B770

The Lynch B770 is a transistorized, frequency shift, narrow band carrier communication system designed for reliable and economical transmission of digital (binary) data, control and teletype information at rates up to 300 bauds (bits-per-second).

B770 (CONTINUED)

The B770 transmits on-off, high-low, ready-operate, start-stop, raise-lower, etc., type information by shifting the carrier frequency. Insensitivity to noise and phase variations; reduction of bias distortion; toleration of wide variations in line and path attenuation; and minimization of false operation due to spurious signals is provided by this frequency-shift type of transmission. Reliability is further enhanced by the 35 db (minimum) adjacent channel receive filter rejection which reduces cross-fire, crosstalk and noise to a minimum.

There are 116 frequency allocations to choose from with the Lynch B770 to provide up to 89 simultaneous data channels from 420 to 30,500 cycles. Twenty-four of these channels are in the voice frequency band and an additional 65 high frequency channels are available for direct application to the transmission medium. The same B770 transmitters and receivers may be used on cable, wire line or microwave because the transmitter level may be adjusted from +5 dbm for wire line or cable to -35 dbm for microwave. Corresponding receiver sensitivity is adjustable from -10 dbm to -50 dbm.

Optional equipment includes: telegraph terminating unit and hub jackfield to provide half-duplex, full duplex or polar service with hub repeaters; three-frequency keying (mark, center, space) transmitters and receivers; dial selective control system for control of up to 18 on-off functions; and the Lynch Transmission Interference Eliminator which is designed to: (1) detect and discard a message subject to transient or impulse noise interference of short duration; (2) inhibit readout of false information in the presence of an abnormally high thermal noise level; (3) provide an alarm of unreliable data transmission conditions.

POWER LINE CARRIER SYSTEM — E500

Sixteen single sideband, toll quality; full duplex communication circuits are now available on one power line phase wire for voice, relaying or data transmission. Lynch "Powerwave" baseband line treatment and a new high pass coupling technique provided a usable spectrum of almost 160 kc on a single phase wire without tuned traps or other narrow band devices.

Proven Lynch carrier systems and directional filters are utilized to accomplish duplex operation over the simplex phase wire with this new coupler to provide the full 16 channels of communication. A series of Lynch "Powerwave" baseband dividing filters accommodate the branching of circuits at line taps to provide intermediate points of communication.

This new sixteen-channel Power Line Communication System consists of (1) a high inductance, untuned carrier current coupling inductance; (2) a high capacity coupling capacitor; (3) a coupling unit; (4) repeat coil assemblies for matching impedances between the entrance cable and the carrier equipment; (5) directional band pass filters built into the carrier equipment; (6) auxiliary directional band filters for special applications; (7) dividing filters for impedance separation at branch-taps; (8) 12 channels of the Lynch E500 Carrier System, a modified version of the B500 single sideband "O" type carrier; and (9) four channels of B60PL single sideband, power line carrier. Any of the four-channel carrier allocations may be utilized to provide approximately 40 kc for relaying channels and required filters. Balanced cable (RG22 or equal) is recommended at the carrier terminating points to remove the presence of 60 cycle ground currents and reduce noise induction in the system.

LYNCH COMMUNICATION SYSTEMS

MICROWAVE MICROPLEX — B910B

The Lynch B910B Type Multiplexing Equipment is a solid state, high density radio multiplexing system using single-sideband, suppressed carrier transmission to provide a maximum number of channels on a minimum cost-per-channel basis.

In conformance with CCITT recommendations, the B910B system will provide 600 channels of communication between 60 and 2540 kc, with the channels spaced at 4 kc intervals and derived in the form of basic 12 channel groups. Five such groups are then combined to form a supergroup. Ten supergroups are then combined to form the 600 channel system. Additional channels below 60 kc may be individually added to provide the full 612 channel complement.

The B910B system is available with either individual channel oscillators or master frequency generators; standard or regulating group modems; inband 2600 cps or out-of-band 3825 cps signaling for E & M, AC ringdown or one-way loop dial signaling; four-wire terminating sets with or without A & B leads; top-of-bay terminal blocks with interconnecting cables; optional wideband 8 kc channels for data applications; and a telephone terminating test panel to provide talking and signaling facilities at carrier and drop terminations.

The B910B is available in three modulation plans so that the most economical system may be selected for a particular application. The Lynch "A" and "B" plans provide 120 and 96 channels, respectively, without supergroup equipment in the spectrum from 60 to 552 kc occupied by CCITT supergroups 1 and 2. In addition, plan "A" may be expanded to 600 channels and "B" plan to 480 channels. The "B" plan provides for economical breakout and reinsertion of 12 channel groups, or less, at repeater points along the microwave path by means of dividing filters inserted directly into the microwave baseband without the loss of channels within the 12-channel group. The third modulation plan conforms exactly to CCITT recommendations.

MICROWAVE BASEBAND DIVIDING FILTERS

Passive baseband treatment with extensive line of dividing filters provides drop and insert capability without using active equipment. Minimum out-of-band rejection for each filter selection is 35 db. Over 30 types of filters available.

B910B Microwave Multiplex

36 Channels with individual oscillators, 3 Regulating Group Modems; 24 B850 Inband Signaling Units with built-in 4W Terminating Sets; 12 B840 Out-of-Band Signaling Units; 4W VF and 2W VF and Signaling Jackfields with HF Line and equipment jacks for Channel and Group buses; a K103D Telephone Terminating Test Panel; and Top-of-Bay Terminal Blocks in a 7" 6", 19" rack. Price on application.

MICROWAVE BASEBAND COMBINERS

Passive branching networks provide up to six four-wire microwave baseband facilities on a party line basis, each with a frequency response of 300 cycles to 3 megacycles. Optional redundant wide-band amplifiers and pad assemblies available as required.

SIGNALING SYSTEMS

INBAND SIGNALING SYSTEM — B850

Transistorized, single frequency, inband signaling system provides signaling on a compatible basis with Western Electric single frequency "E" type signaling for use on wire line, cable or microwave circuits.

OUT-OF-BAND SIGNALING SYSTEM — B840

Transistorized. Provides CCITT 3825 cycle out-of-band signaling for economical application on Lynch B410 cable carrier or B910B multiplex.

TELEPHONE TERMINATING TEST PANEL — K103

An on-location testing facility at carrier terminals, the K103 can be used to talk and signal over E & M dial carrier or trunk; subscriber loop dial carrier to switchboard or termination; AC ringdown channel termination. Operates on 48 or 24 VDC battery or 117 VAC.

FILTERS AND FILTER ASSEMBLIES

The most complete selection of filters in the industry. Filters for wire line, cable and microwave applications. High Pass, Low Pass, Band Pass, Line Filter Network, Line Filter with special Simulating Networks, Band Elimination for Carrier or Tone Channels, High Voltage, High Pass Transfer, Line Coupling Networks, Dividing, Low Pass Roof Filters and Way Station Filters. Mounting Assemblies for Pole Mount or Rack Mount available.

Contact Graybar for Complete Information

TOTAL GRAYBAR LIGHTING

LIGHTING TIPS

1. For good distribution of light, distance between outside rows of fixtures and walls should not be more than half the space between rows of fixtures.
2. Ends of fixture rows should come within 1 or 2 feet of walls.
3. Fixtures should not be placed farther apart than their mounting height for uniform light. Closer spacing will result in better distribution of light and fewer shadows.
4. For best visual comfort in offices and schools, fixtures should be installed with luminous sides so that workers can see fixture ends in main viewing direction instead of sides.

5. Properly designed metal-sided fixtures with good end shielding can be installed in most any direction.
6. Recessed troffers and industrial fluorescent fixtures without louvers are most comfortable viewed from the sides.
7. Maintained light is important . . . lighting maintenance means adequate lighting for the entire installation. Scheduled fixture cleaning and relamping is important.
8. Wall colors and environmental effects should be included in your plans for effective, pleasant and comfortable lighting.

GRAYBAR OFFERS TOTAL LIGHTING

Well balanced lighting for every application is available from Graybar . . . from the most minute tasks to illuminating building facades and sports areas. Good lighting improves efficiency, eliminates many accidents and errors . . . aids security and accentuates the value and beauty of materials. Graybar can supply TOTAL LIGHTING for all applications . . . industrial, stores, schools, home . . . in explosive areas or vapor conditions . . . anywhere lighting is needed.

HOW MUCH LIGHT IS NEEDED?

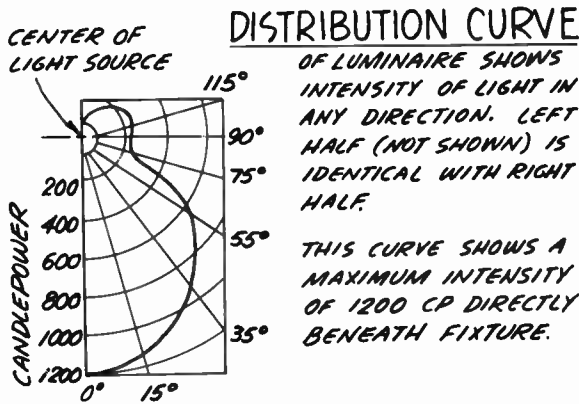

The following is a listing of the current IES minimum requirements. If needed, please ask your local Graybar office for a more comprehensive listing of recommended illumination levels.

TOTAL GRAYBAR LIGHTING
LIGHTING TIPS

LIGHT DISTRIBUTION— This is the pattern of light output from the luminaire. Uniformity of lighting level over an area is important in many installations where visual tasks are rigorous and continuous. In such cases, the width of light spread from the fixture must be related to the number of luminaires to be used, the mounting height of the units and the spacing between units — all factors related to uniform footcandle intensity over the lighted area. But, where design calls for accent lighting of local areas and for definite light coverage in a vertical plane — such as lighting of the wall at the back of a work bench — the problem of luminaire selection is quickly narrowed down to luminaires which have the required distribution pattern.

LUMINAIRE CLASSIFICATIONS

Control of light by a luminaire is a function of the particular construction of the luminaire. A luminaire for an incandescent or a gaseous discharge lamp may have one or more aluminum, porcelain or baked white enamel interior reflecting surfaces which redirect various portions of the lamp lumen

DESIGNED LUMINAIRE
SURFACES

output. Louvers or baffles may be used to diffuse the light, to shield the bare lamp and to eliminate objectionable surface brightness of the unit. A wide range of diffusing glass and plastic and various lighting control lenses are in common use for shielding and control.

LIGHT QUALITY— The quality of the lighting result in any installation will usually limit the number of luminaire types from which selection must be made. For instance, to minimize direct glare into the eyes of office workers, say, a flush-mounted (recessed) or surface-mounted luminaire will often be preferred over a stem-mounted unit because the higher mounting position on or in the ceiling will place the unit above the normal viewing angle — above the natural cut-off effect of the worker's eyebrows. Or, a luminaire with luminous side panels or a side-lighting component may be used to reduce the brightness contrast between the unit and its surroundings, such as the ceiling area adjoining a surface-mounted ceiling fixture.

ELECTRICAL SYMBOLS FOR ARCHITECTURAL PLANS

In Accordance with American Standards Association Standard ASA Y32.-9-1943

GENERAL OUTLETS

Symbol		Description
Ceiling	Wall

→	Home Run to Panel Board. Indicate number of Circuits by number of arrows.
<p>Note: Any circuit without further designation indicates a two-wire circuit. For a greater number of wires indicate as follows: +++ (3 wires) ++++ (4 wires), etc.</p>	
—	Feeders. Note: Use heavy lines and designate by number corresponding to listing in Feeder Schedule.
≡	Underfloor Duct and Junction Box. Triple System. Note: For double or single systems eliminate one or two lines. This symbol is equally adaptable to auxiliary system layouts.
⊙	Generator.
⊚	Motor.
⊙	Instrument.
⊙	Power Transformer. (Or draw to scale.)
⊞	Controller.
□	Isolating Switch.

AUXILIARY SYSTEMS

□	Push Button.
□	Buzzer.
□	Bell.
◇	Annunciator.
◀	Outside Telephone.
◀	Interconnecting Telephone.
◀	Telephone Switchboard.
⊙	Bell Ringing Transformer.
⊙	Electric Door Opener.
⊞	Fire Alarm Bell.
⊞	Fire Alarm Station.
⊞	City Fire Alarm Station.
⊞	Fire Alarm Central Station.
⊞	Automatic Fire Alarm Device.
⊞	Watchman's Station.
⊞	Watchman's Central Station.
⊞	Horn.
⊞	Nurse's Signal Plug.
⊞	Maid's Signal Plug.
⊞	Radio Outlet.
⊞	Signal Central Station.
⊞	Interconnection Box.
⊞	Battery.
⊞	Auxiliary System Circuits.

Note: Any line without further designation indicates a 2-Wire System. For a greater number of wires designate with numerals in manner similar to 12 — No. 18W-3/4"-C., or designate by number corresponding to listing in Schedule.

□_{a,b,c} Special Auxiliary Outlets.
 Subscript letters refer to notes on plans or detailed description in specifications.

ELECTRICAL FORMULA FOR DETERMINING AMPERES, HORSEPOWER, KILOWATTS AND KILOVOLT-AMPERES

Desired Data	Alternating Current	
	Single Phase	*Two-Phase Four-Wire
Kilowatts	$I_x E_x \cos. \theta$	$I_x E_x 2x \cos. \theta$
	1000	1000
Kva.	$I_x E_x$	$I_x E_x 2$
	1000	1000
Horsepower Output	$I_x E_x \% \text{Eff.} x \cos. \theta$	$I_x E_x 2x \% \text{Eff.} x \cos. \theta$
	746	746
Amperes when Hp. is Known	$H_p. x 746$	$H_p. x 746$
	$E_x \% \text{Eff.} x \cos. \theta$	$2x E_x \% \text{Eff.} \cos. \theta$
Amperes when Kilowatts is Known	$K_w. x 1000$	$K_w. x 1000$
	$E_x \cos. \theta$	$2x E_x \cos. \theta$
Amperes when Kva. is Known	$K_{va.} x 1000$	$K_{va.} x 1000$
	E	2xE
Desired Data	A-C. Three-Phase	D-C.
Kilowatts	$I_x E_x 1.73x \cos. \theta$	$I_x E$
	1000	1000
Kva.	$I_x E_x 1.73$
	1000
Horsepower Output	$I_x E_x 1.73x \% \text{Eff.} x \cos. \theta$	$I_x E_x \% \text{Eff.}$
	746	746
Amperes when Hp. is Known	$H_p. x 746$	$H_p. x 746$
	$1.73x E_x \% \text{Eff.} x \cos. \theta$	$E_x \% \text{Eff.}$
Amperes when Kilowatts is Known	$K_w. x 1000$	$K_w. x 1000$
	$1.73x E_x \cos. \theta$	E
Amperes when Kva. is Known	$K_{va.} x 1000$
	1.73xE

*In two-phase, three wire circuits the current in the common conductor is 1.41 times that in either other conductor.
 Note: E = Volts; I = Amperes; %Eff. = Per Cent Efficiency; Cos.θ = Power Factor.

WIRING FORMULA

For determining the correct wire size for an installation, an adaptation of ohms law may be used. The formula below affords a means of computation which includes the effect of voltage drop.

Equation 1 — Circular Mils = $\frac{R \times L \times I}{VD}$

Where —

L = Length of Wire in Feet

- (a) For single phase — use twice the length of the circuit.
- (b) For three phase circuits, use 1.73 times the length of the circuit.

I = Current per conductor.

VD = Allowable or desired voltage drop in circuit.

R = Resistance per mil-foot of conductor at 20 degrees centigrade.

FOR COPPER WIRE — 11 ohms
 FOR ALUMINUM WIRE — 17.25 ohms

MISCELLANEOUS INFORMATION

- Latent heat of vaporization of water = 970 BTU per lb.
- Latent heat of melting of water = 144 BTU per lb.
- To evaporate 1 lb. water from and at 212° = 16.859 Kw. minutes.
- To evaporate 1 lb. water from and at 212° = 0.281 Kw. hours.
- Weight per cu. ft. of water = 62.42 lb.
- Weight per gallon of water = 8.33 lb.

UNITS OF MEASURE

The following mechanical units of the Metric system are International Standards. From these Metric units electrical units are derived and converted for engineering use.

Meter—The fundamental unit of length in the Metric system; one ten-millionth of the distance along a meridian from the pole to the equator; approximately 39.37 inches.

Gram—The fundamental unit of mass or, practically, of weight. Equals the weight of a cubic centimeter of water at a temperature of 4 degrees Centigrade.

Second—A unit of time, 1/60 of a minute; a unit of angular measure, 1/60 of a minute of arc.

ELECTRICAL UNITS

Volt—The practical unit of electromotive force; the electrical pressure which will cause a current of one ampere to flow through a resistance of one ohm. The force which will charge a condenser of one farad capacity with a coulomb of electricity.

Ohm—The practical unit of the resistance of a material to the flow of current. That resistance which will permit the flow of one ampere when a voltage of one volt is imposed across the resistance.

Ampere—The practical unit of the rate of flow of electrical charge; one coulomb per second across any given cross-section of a circuit. The current that will flow in a resistance of one ohm when an electromotive force of one volt is impressed across the resistance.

Coulomb—A quantity of electrons; the quantity of electrons passing any given cross-section of a circuit when a current of one ampere flows for one second. The quantity of charge stored in a condenser of one farad when subjected to an e.m.f. of one volt.

Farad—The practical unit of electrical capacity. The capacitance of a condenser whereby a stored charge of one coulomb produces an e.m.f. of one volt.

Watt—The practical unit of electrical power. The rate of expenditure of electrical energy. One joule per second.

Joule—The practical unit of energy or work. The work done to raise the potential of one coulomb one volt.

THE CIRCULAR MIL

The standard unit of wire cross-section in English and American wire tables. Equals the area of a circle whose diameter is one mil (0.001 inch).

To obtain the number of circular mils in a solid wire of a given diameter, express the diameter in mils and then square it.

To obtain the diameter of a solid wire having a given number of circular mils, take the square root of the circular mils and the result is the diameter in mils.

One circular mil equals 0.7854 square mils.

OHM'S LAW

The relationships between current, voltage and resistance in a circuit are expressed by Ohm's law. Where I = current in amperes, E = voltage in volts, and R = resistance in ohms, the following relations permit any one value to be found when the other two are known:

(1) To find the current through a circuit when the voltage across the circuit and the resistance of the circuit are known:

$$I = \frac{\text{Voltage } E}{\text{Resistance } R}$$

(2) To find the voltage across a circuit when the resistance of the circuit and the current through it are known:
 E = Current x Resistance = IR

(3) To find the resistance of a circuit when the current through it and the voltage across it are known:

$$R = \frac{\text{Voltage } E}{\text{Current } I}$$

Notes: Table calculated for 110 volts, direct current. The footages shown are approximate for single-phase and two-phase at unity power factor. For three-phase the above footage may be increased by approximately 12%.

The following factors may be used for other voltages: 220 volts, multiply by 2; 440 volts, multiply by 4; 550 volts, multiply by 5; 2200 volts, multiply by 20.

For 1% drop allow one-third the footage shown. For 2% drop allow two-thirds the footage shown.

1 Adapted from Table 430-146, N. E. C. Code.
 2 The N. E. C. classifies motors by code letters. The values shown are for motors with code letters F to V inclusive and motors without code letters. For motors with code letters A to E inclusive refer to N. E. Code, Tables 430-146 and 430-152.
 3 Adapted from Table 430-153, N. E. C. Code.
 4 For the grouping of small motors under the protection of a single set of fuses see Section 430-53 N. E. Code.
 5 For the running protection of motors of 1 H.P. and less see Section 430-32 N. E. Code.

NEMA† DESCRIPTIONS OF ELECTRICAL EQUIPMENT ENCLOSURES

Type 1—General Purpose

A general purpose enclosure is intended primarily to prevent accidental contact with the enclosed apparatus. It is suitable for general-purpose applications indoors where it is not exposed to unusual service conditions.

Type 2—Drip-Tight

A drip-tight enclosure is intended primarily to prevent accidental contact with the enclosed apparatus and, in addition, is so constructed as to exclude falling moisture or dirt.

Type 3—Weatherproof (Weather-Resistant)

A weatherproof enclosure is intended to provide suitable protection against specified weather hazards. It is suitable for use outdoors.

Type 3R—Raintight

A raintight enclosure is intended primarily to meet the requirements for raintight (definition No. 7 of appended list) apparatus. It is suitable for general applications outdoors where sleet-proof construction is not required.

Type 4—Watertight

A watertight enclosure is designed to exclude water applied in the form of a hose stream (ASA C42-1941, 95.90.145)*. It is suitable for application where the apparatus may be subjected to a stream of water during cleaning operations and the like.

*Where a section has adopted its own test description, it may be substituted for the ASA identification.

Type 5—Dust-Tight

A dust-tight enclosure is so constructed as to exclude dust.

Type 6—Submersible

A submersible enclosure is intended to permit the enclosed apparatus to operate successfully when submerged in water under specified conditions of pressure and time.

Type 7 (A, B, C, or D)* Hazardous Locations—Class I—Air Break

These enclosures are designed to meet the application requirements of the National Electrical Code for Class I Hazardous Locations which may be in effect from time to time. In this type of equipment, the circuit interruption occurs in air.

*The letter or letters following the type number indicates the particular group or groups of hazardous locations (as defined in the National Electrical Code) for which the enclosure is designed. The

type designation is incomplete without a suffix letter or letters.

Type 8 (A, B, C, or D)* Hazardous Locations—Class I—Oil Immersed

These enclosures are designed to meet the application requirements of the National Electrical Code for Class I Hazardous Locations which may be in effect from time to time. The apparatus is immersed in oil.

*The letter or letters following the type number indicates the particular group or groups of hazardous locations (as defined in the National Electrical Code) for which the enclosure is designed. The type designation is incomplete without a suffix letter or letters.

Type 9 (E, F, or G)* Hazardous Locations, Class II

These enclosures are designed to meet the application requirements of the National Electrical Code for Class II Hazardous Locations which may be in effect from time to time.

*The letter or letters following the type number indicates the particular group or groups of hazardous locations (as defined in the National Electrical Code) for which the enclosure is designed. The designation is incomplete without a suffix letter or letters.

Type 10—Bureau of Mines—Explosion-proof

This enclosure is designed to meet the explosion-proof requirements of the U.S. Bureau of Mines which may be in effect from time to time. It is suitable for use in gassy coal mines.

Type 11—Acid- or Fume-Resistant—Oil Immersed

This enclosure provides for the immersion of the apparatus in oil such that it is suitable for application where the equipment is subject to acid or other corrosive fumes.

Type 12—Industrial Use

An industrial use enclosure is designed for use in those industries where it is desired to exclude such materials as dust, lint, fibers and flyings, oil seepage or coolant seepage.

Type 13—Dust-Proof

A dust-proof enclosure is intended primarily to prevent accidental contact with the enclosed apparatus and, in addition, is so constructed that dust which may enter will not interfere with the operation of the apparatus. The construction of the enclosure can be defined only in relation to the apparatus and to the amount and kind of dust present.

NEMA† DEFINITIONS OF QUALIFYING TERMS

1. Acid-resistant (C42) 95.91.165

Acid-resistant means so constructed that it will not be injured readily by exposure to acid fumes.

2. Dustproof (C42) 95.91.126

Dustproof means so constructed or protected that dust will not interfere with its successful operation.

3. Dust-tight (C42) 95.91.130

Dust-tight means so constructed that dust will not enter the enclosing case.

4. Fume-resistant (C42) 95.91.116

Fume-resistant means so constructed that it will not be injured readily by exposure to the specified fumes.

5. Moisture-resistant (C42) 95.91.140

Moisture-resistant means so constructed or treated that it will not be injured readily by exposure to a moist atmosphere.

6. Oil-tight

Oil-tight means so constructed that oil will not enter the enclosing case.

7. Rain-tight (C42) 95.91.175

Rain-tight means so constructed or protected that exposure to a beating rain will not result in the entrance of water.

8. Sleetproof (C42) 95.91.170

Sleetproof means so constructed or protected

that the accumulation of sleet will not interfere with its successful operation.

9. Splashproof (C42) 95.91.160

Splashproof means so constructed and protected that external splashing will not interfere with its successful operation.

10. Submersible (C42) 95.91.148

Submersible means so constructed that it will operate successfully when submerged in water under specified conditions of pressure and time.

11. Watertight

Water-tight means provided with an enclosing case which will exclude water applied in the form of a hose stream under specified conditions.

12. Weatherproof (Outside Exposure)

(C42) 95.91.186

Weatherproof means so constructed or protected that exposure to the weather will not interfere with its successful operation.

†National Electrical Manufacturers Association.

NOTE: Definitions in the above list bearing the identification "C42" are selected from the Group 95 definitions proposed by Subcommittee 18 of Sectional Committee C42 for inclusion in the next edition of the "American Standard Definitions of Electrical Terms." Numbers at right of each definition refer to "American Standard Definitions of Electrical Terms," published by American Institute of Electrical Engineers, approved by American Standards Association.

TYPICAL AC SYSTEMS

The sketches below illustrate the more common systems of electrical transmission.

Single phase, Two Wire

Three phase, Three Wire, Delta

Single phase, Three Wire

Three phase, Three Wire, Star

Two phase, Three Wire

Three phase, Four Wire, Star

Two phase, Four Wire

E = Voltage, phase to phase

I = Line current

I_n = Neutral current

Some of the systems may be grounded as indicated thus

All of the above based on balanced circuit.
