AUTHORIZED RCA DISTRIBUTORS

NATIONAL DISTRIBUTORS OF INDUSTRIAL ELECTRONICS

46 YEARS OF RELIABLE SERVICE

Your Dependable Source for Dependable Test Instruments by

TRIPLETT

The world's most complete V-O-M line

MODEL 310
Complete Miniature V-O-M

630

630-PLK

666-R

NEW!
MODEL 600
TVO
Transistorized

Start with these Models

. . . the 310, Miniature V-O-M; the 630, Standard V-O-M; the 630-PLK, streamlined V-O-M with transistorized overload protection; and the 666-R, handsize V-O-M. Add to these the all new 600 TVO, solid state Volt-Ohmmeter with F-E-T amplifier and 11 megohm input impedance; the 850, vacuum tube voltmeter; the 630-M, one million ohms per volt V-O-M and the other standard models shown in this catalog and you will find the exact Triplett instrument for your needs. Triplett offers the broadest line of multitesters in the industry.

MODEL 850
VTVM

New Flexible Panel Meter Design

G SERIES
2½", 3½", 4½"

Two Mounting Styles

An all new meter design that features flexibility and interchangeability, with optional mounting bezel for modern "Picture Window" appearance.

Self-shielded, Exact, Reliable—DC instruments have the famous Triplett BAR-RING movements—more torque, faster response, greater ruggedness.

Modern design provides a dominant scale with plenty of dial area.

MODEL 630-M
One Million Ohms per volt

630 630-A 630-L 630-PL 630-APL 630-NA 630-NS 630-M 630-PLK 631 310 310-C 800 666-R

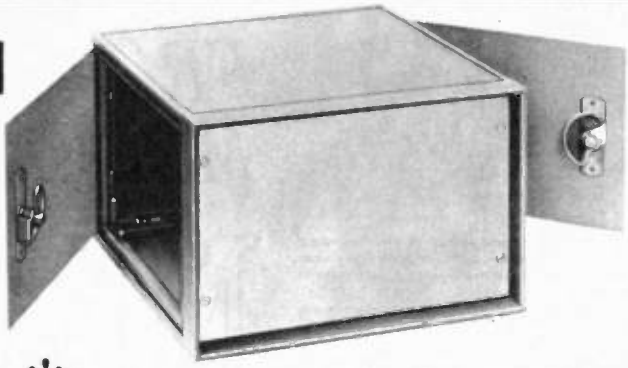
YOUR PRODUCT *Belongs* IN A BUD CABINET

Need them now? Get them now!

* Inventories at Newark in Cincinnati, Grand Rapids, Detroit, Denver, Chicago, and Inglewood, California provide for immediate delivery of these new cabinets as well as all Bud products.

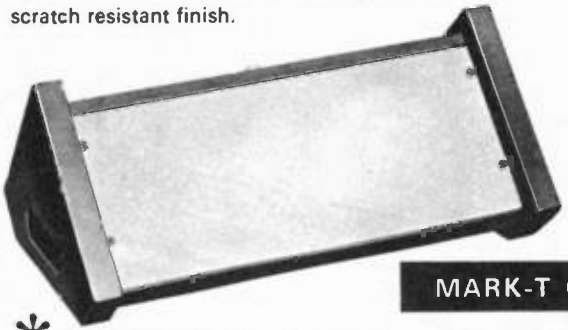
• See pages 586 to 596 for complete information on these and all other BUD products.

TUDOR CABINETS



* A cabinet is not expensive, regardless of price, when it provides value!! The Tudor cabinets fill the need for a top quality housing to compliment sophisticated equipment. Unique construction features and clean lines continue to provide a sophisticated silhouette. Unusual design affords access from either side through hinged doors; thus installation, inspection and servicing of contents is greatly simplified. Slender extruded aluminum framework yields greater net cubic area without sacrificing strength. Vinyl texture scratch resistant finish.

MARK-T CABINETS



* An exciting departure from ordinary cabinet design with many applications as enclosures for controls. Planned so that the entire contents are visible when door is open. Angle of both panel and door permit comfortable observation of dials, meters, lights, switches, etc. All welded construction with removable panel and hinged door. Vinyl texture charcoal gray body with light gray panel and door.

TILT-A-VIEW CABINETS

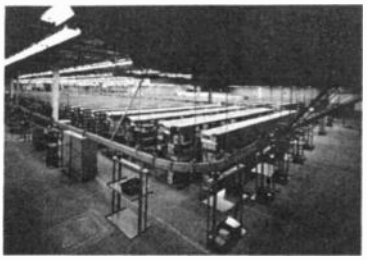
* New cabinets featuring slanted front panel for the installation of meters, dials, controls and recorders. Use of detachable legs permits changing the angle of vision. Unique two-piece construction permits immediate access to interior. Top and bottom section interlock, NO fasteners appear on the front or rear panel. Vinyl texture charcoal gray body with light sand color front and rear panels.

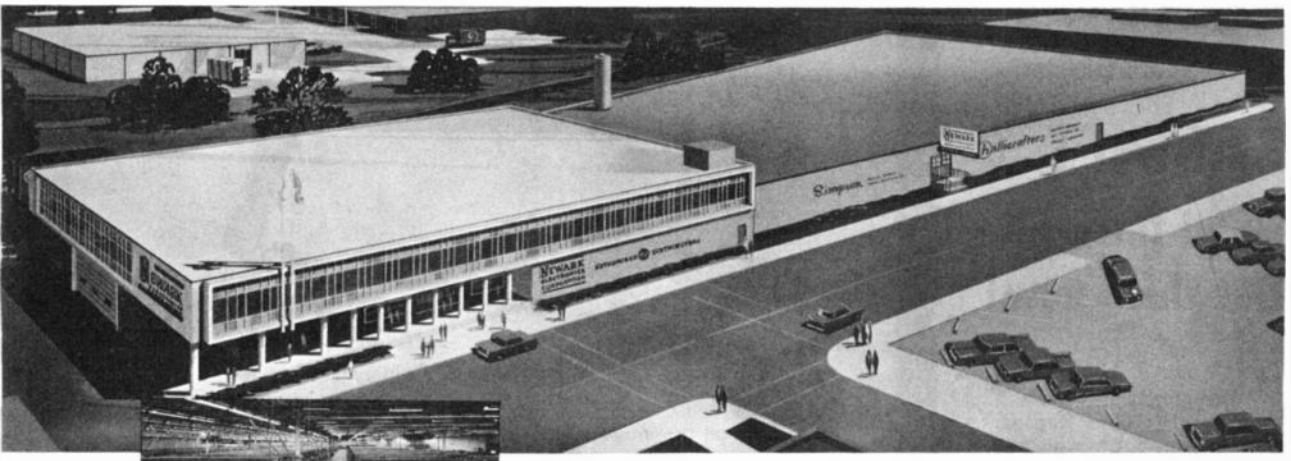
FROM THIS NEW MODERN FACILITY

NEWARK

PROVIDES THE FASTEST, MOST COMPLETE INDUSTRIAL ELECTRONIC DISTRIBUTION SERVICE AVAILABLE ANYWHERE!

The automated conveyor system in the foreground contains two miles of track and the order filling racks are individually programmed to stop at each location where an item is to be picked.





Shipping section and terminus of conveyor system. The active stock, on over 17 city blocks of steel shelving, is in the background.

A portion of the Industrial Sales department where over 1000 phone orders are handled daily.

- Computerized order processing and inventory control
- Programmed, conveyorized order-filling system
- Dataphone communication with all branches provides same-day back-up shipments of quantities not available at branches
- Over $7,000,000 inventory of 500 product lines
- Same day complete shipment on 95% of all orders

NEWARK IS YOUR SOURCE FOR MORE THAN 70,000 STANDARD BRAND ITEMS WITH THE FAMOUS DOUBLE GUARANTEE— THE MANUFACTURER'S AND NEWARK'S!

All these services have made Newark the nation's leading 1-point source for brand-name Industrial Electronic Products:

- Telex, TWX and WATS lines for instant communications
- Factory OEM pricing
- 47 years of experience and progress
- AAA-1 rated company
- Ultra-modern facilities
- Outstanding reputation for leadership

AND THESE SPECIAL SERVICES FROM NEWARK!

- Emergency department for special handling of your critical replacement needs.
- "Custom Stocking" Program—tailored to your requirements. Tell us your projected requirements. We'll build our inventory around your needs.
- Fast, firm quotations from our Bid Department on quantities larger than listed, or items not shown in catalog. Credit available to rated companies. All non-catalog items must have return authorization before return.

FAST EFFICIENT SERVICE FROM ALL 10 NEWARK STOCKING WAREHOUSE FACILITIES!

INTEGRATED CIRCUIT BREADBOARDS

These 16-socket breadboards are designed to allow rapid interconnection and evaluation of individual integrated circuits or complete logic designs. With three supply voltages at each socket, double pin jacks, 22-pin PC edge connector or a 11BNC coaxial connector Input/Output arrangement, plus banana plugs for power connection between boards. Complete breadboarding flexibility with simple "plug in-plug out" changes possible. Designed using 11/16" glass epoxy with 2 oz. gold plated runs. rated for DC to 50 mc freq. and —65°C to +150° temp. performance.

Type	Function	1-9	10-24	25-up
XC63	16 10-pin sockets for TO-5 cases.	150.00	120.00	100.00
XC72	16 14-pin sockets for 10 and 14-pin flat packs	240.00	192.00	160.00
XC73	16 14-pin sockets for 14-pin dual in-line pkgs.	210.00	168.00	140.00

MHTL INTEGRATED CIRCUITS
(Operating Temperature Range: —30°C to +75°C
Plastic Package — Case E)

Type	Function	1-999	1000-4999

INTEGRATED CIRCUITS DEVICE DESIGNATIONS

When you order a Texas Instrument integrated circuit, the designation must contain three (and may contain four) parts.

1. PREFIX 2. UNIQUE DEVICE DESCRIPTION 3. PACKAGE 4. SPECIAL INSTRUCTIONS (optional)

EXAMPLE: SNR • S4H72 • F • 02

PREFIX
MUST CONTAIN TWO OR THREE LETTERS

SN	Standard Prefix
SNR	Hi-Rel processing without Group B and C
SNT	Hi-Rel processing with B and C
SNX	Preliminary Device prefix

UNIQUE DEVICE DESCRIPTION
MUST CONTAIN THREE, FOUR, OR FIVE CHARACTERS

EXAMPLES:	15930	52709
	74H72	5473
	510B	521A
	777	5161B

PACKAGE
MUST CONTAIN A SINGLE LETTER ONLY —F THROUGH 2

F	Flat package	Kovar	10 or 14 leads std.
R	Flat package	Kovar	10 or 14 leads long
L	TO-5 type	.....	8 or 10 leads
N	Dual in line	Plastic	14 or 16 leads

SPECIAL INSTRUCTIONS
MUST CONTAIN TWO NUMBERS ONLY IF PACKAGE DESIGNATION IS "F" OR "R"

No.	Formed leads	Insulator	Mech Pak	Tinned leads
00	No	No	No	No
01	Yes	Yes	No	No
02	No	No	Yes	No
03	No	Yes	Yes	No
04	Yes	No	Yes	No
05	Yes	Yes	Yes	No
06	No	Yes	No	No
07	Yes	No	No	No
10	No	No	No	Yes
11	Yes	Yes	No	Yes
12	No	No	Yes	Yes
13	No	Yes	Yes	Yes
14	Yes	No	Yes	Yes
15	Yes	Yes	Yes	Yes
16	No	Yes	No	Yes
17	Yes	No	No	Yes

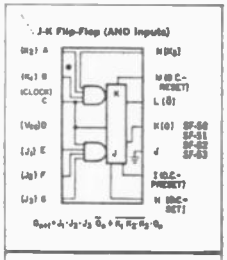
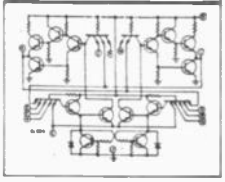
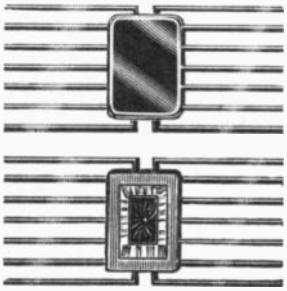
SN7501	Sense amplifier with Flip-Flop output	37.00	29.75	24.25
SN7502	Sense amplifier wth one shot output	37.00	29.75	24.25
SN7510	Monolithic wide band video Amplifier	6.50	5.15	4.40
SN7510L	Monolithic wide band video Amplifier	6.50	5.15	4.40

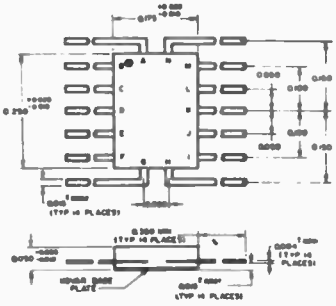
THIS INTEGRATED CIRCUIT LISTING IS COMPLETE TO THE DATE OF PRINTING, AUGUST 15, 1967. BUT NEW ITEMS ARE CONTINUALLY BEING DEVELOPED AND ARE ADDED TO THE NEWARK STOCK. CHECK WITH THE NEWARK INDUSTRIAL DEPARTMENT FOR ANY NEW INTEGRATED CIRCUITS NOT LISTED. ORDERS WILL BE BILLED TO YOU AT THOSE PRICES IN EFFECT AT TIME OF SHIPMENT.

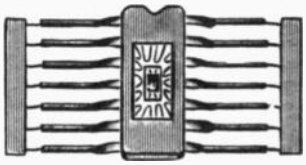
Sylvania Integrated Circuits

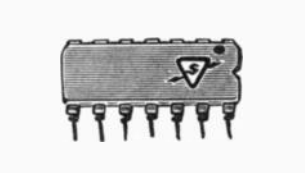


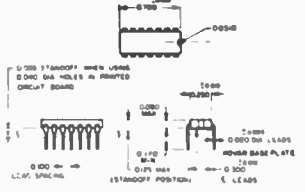












SUHL circuits characterized into two temperature ranges: —55°C to ±125°C for military applications and 0°C to +75°C for industrial and commercial use. SUHL I circuits designed for applications up to and including 20 megacycles, with gate propagation delays within 10 nanoseconds.

Single chip high speed (20 mos) Si planar epitaxial, hermetically sealed units. Low speed-power product. Provides fan-in capabilities as high as 18. Use suffix —02 for standard flat package and suffix —03 for Plug-In package when ordering types with SF, SG, SM and SA.

SUHL I

MIXING PRIVILEGES

Pricing for mixed quantities of integrated circuits: Price benefit given where single order consists of mixture of Integrated Circuit types on the price list and in the same type package. Types within the following groups may not be added to any other group in calculating price cut.

A:—SA10 and SA11
B:—SA20, 21
C:—Any SF or SG prefixed types Except series SF100, SF110, SF120, SF130
D:—SM10, SM20, SM30, SM40 series
E:—SM50 series
F:—SM60 and SM70 series
G:—SM80 series
H:—SM100, SM110, SM120, SM130 series
I:—Any S-prefixed types

SPRAGUE Integrated Circuits

THE MARK OF RELIABILITY

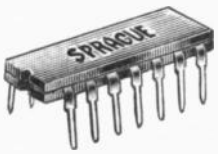

FIG. A

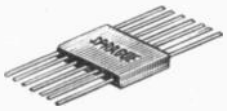

FIG. B

● NEW SERIES USN 7400A (0°C to +70°C) Fig. A COMPATIBLETTL LOGIC HIGH SPEED LOW POWER

All gates of classical TTL design utilizing multiple-emitter input transistors for optimum switching speed. Compatible and interchangeable with other similar TTL logic.

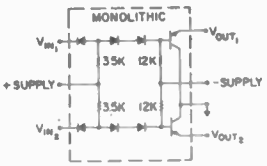
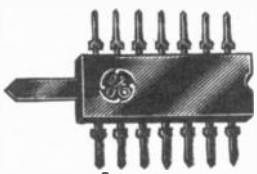
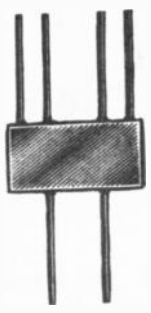
GENERAL ELECTRIC



PA345, PA358

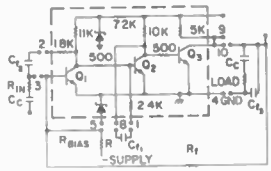


A

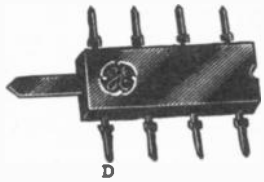


B

C



PA116



D

LOW LEVEL SWITCHES 6-LEAD FLAT PACK

Contains 6 diodes, 4 resistors and 2 transistors. Feature extremely low offset voltage, low capacitances, and low leakage current. PA345 is tighter spaced than PA-358.

Type	1-9	10-99	100-999
PA345	44.75	29.95	19.90
PA358	39.40	26.25	17.50

PA189—DUAL IN LINE PACKAGE

IF amp/detector with 80 db @ 4.5 Mhz. Flexible configuration-quadrature dection or regular amplifier.

Type	1-99	100-999
PA189	3.60	2.40

PA237—DUAL IN LINE PACKAGE

2 Watt audio amplifier. Wide supply voltage capability, 12-26V. Tap provided for heat linking. Output noise level <5 mV rms.

Type	1-99	100-999	1M-Up
PA237	3.98	2.65	2.38

PA222—DUAL IN LINE PACKAGE

One watt audio amplifier featuring feedback loop that eliminates thermal runaway. Current drain of 6 mA to 25 mA and typical input impedance of 55K ohms. Uses supply of 19V to 25V.

Type	1-99	100-999
PA222	3.70	2.45

PA113—TO-5

3 Stage direct coupled amplifier featuring high current and high power gains. Easy application of either negative feedback for high gain stability or postve feedback for monostable, bistable or astable applications. Uses power supply of 4.5 to 15V.

Type	1-9	10-99	100-999
PA113	15.15	10.10	6.75

PA230—DUAL IN-LINE PACKAGE

Low level amplifier. May be used as pre-amp or op-amp .12V or 6V power supply. 9.5V peak/peak output. Low input noise voltage and high open loop voltage gain.

Type	1-99	100-999	1M-Up
PA230	3.30	2.20	1.98

PA116—TO-5

Summing amplifier featuring high gain and accurate addition of AC signals. Circuit can also be used as a stable high gain voltage amplifier. Low input and output capacitances with a large output voltage swing. Current gain bandwidth without feedback; 100 Mhz.

Type	1-9	10-99	100-999
PA116	73.10	48.75	32.50

PA223—DUAL IN LINE PACKAGE

High performance operational amplifier. Features high open loop voltage gain. Darlington input configuration, ±12V power supply operation.

Type	1-99	100-999
PA223	7.05	4.70

PA424—DUAL IN LINE PACKAGE

Zero voltage synchronous switch used to pulse Triac of SCR and eliminate radio frequency interference. Input terminals allow wide variation of control functions. Load must be resistive.

Type	1-99	100-999
PA424	3.60	2.40

Newark-Denver Electronics Supply Corp., 2170 So. Grape St., Denver, Colo. 80222

½ WATT COMPLEMENTARY AMPLIFIER

Model PCA-2-9. Similar to PCA-2-14 at right except for the minor changes necessary for 9 volt voltage supply.

Stock No.	Type	1-9	10-99
59F1452	PCA-2-9	5.90	4.40

1-WATT COMPLEMENTARY AMPLIFIER

Model PCA-1-9. Provides 1 watt output when connected to a crystal cartridge. Use 3 stage direct coupled circuit with a complementary output. Highly stable for interchangeability and uses negative feedback. Very low idle current allows long battery life. Supply voltage. 9 VDC Load impedance: 8-16 ohms. Input impedance: 600K ohms avg.; 220K ohms min. Frequency response: 100 Hz — 50 KHz @ —3db. Size: 1 9/16 x 3 3/16 x 2 5/8".

Stock No.	Type	1-9	10-99
59F1450	PCA-1-9	7.20	5.35

2-WATT COMPLEMENTARY AMPLIFIER

Model PCA-1-14. Provides 2 watts output when driven by crystal cartridge. Uses 3 stage direct coupled circuit with a complementary output. Low idle current allows low temperature operation and low heat output. Supply voltage: 14 VDC. Load impedance: 8-16 ohms. Input impedance 600K ohms avg.; 220K ohms min. Frequency response: 100 Hz — 40 KHz @ —3 db. Size: 1 9/16 x 3 3/16 x 2 5/8".

Stock No.	Type	1-9	10-99
59F1451	PCA-1-14	7.00	5.20

4 WATT COMPLEMENTARY AMPLIFIER

Model PCA-3B-18-1. Provides 4 watts output per channel when driven by a crystal cartridge. Unit has dual volume, bass and treble controls, plus balance control. Circuit is highly stablized DC coupled 3 stage, complementary amplifier with neg. feedback. Temperature stabilized by thermistor and uses special low noise silicon input transistor. Circuit built on 7½ x 3½" printed circuit board; contains all power supply components. Supply voltage: 18 VDC. Load impedance: 8 ohms. Input impedance: 1 megohm avg.; 300K ohms min. Frequency response: 45 Hz — 20 KHz @ —3 db. 1½ x 7½ x 3½".

Stock No.	Type	1-9	10-99
59F1454	PCA-3B-18-1	19.20	14.45

20 WATT COMPLEMENTARY AMPLIFIER

Model PCA-8-36. Provides full output with ½ volt input at high input impedance to make it compatible with a transistor type preamp. DC coupled circuit. Complete 20 watt amplifier except for power transformer. 5" x 4½" printed circuit board. Supply voltage: 36 V. Input impedance: 1 megohm avg. Frequency response: 20 Hz to 40 KHz @ —3db. 2⅜ x 5⅜ x 4½".

Stock No.	Type	1-9	10-99
59F1465	PCA-8-36	18.85	14.20

● *NEW* 4-TRANSISTOR UTILITY AMP

Model PCA-4-18A. Three stage four transistor amplifier provides a 3-watt output. High sensitivity permits use with a simple AM tuner, magnetic guitar pick-up or high impedance dynamic mike. Circuit is temperature compensated and contains power supply components for AC operation. 1% distortion at normal level.

Stock No.	Type	1-9	10-99
59F1466	PCA-4-18A	9.52	7.12

● *NEW* TAPE PLAY BACK AMPLIFIER

Model PCA-9-18. 10 transistor amplifier provides 3.0 watts output per channel when driven by a tape playback head. Pre-amp is properly equalized for 3¾ ips tape speed. 3 controls are volume, balance, and tone. Low noise transistors assure wide band frequency response.

Stock No.	Type	1-9	10-99
59F1467	PCA-9-18	25.30	18.95

LOW COST 1 WATT AMPLIFIER

Model PCA-2-14. Incorporates direct coupled circuit to provide exceptional frequency response: 80 Hz — 25 KHz @ —3 db. Temperature stabilized with thermistor. Low idle current and low temperature rise operation. Connections may be made to printed circuit board with solderless connectors. Supply voltage: 14 VDC. Load impedance: 12-16 ohms. Input impedance: 220K ohms min. Size: 1 9/16 x 2 x 2 7/8".

Stock No.	Type	1-9	10-99
59F1453	PCA-2-14	5.90	4.40

1 WATT HIGH GAIN AMPLIFIER

Model PCA-4-9. Three stage, 4 transistor unit—a high sensitivity version of PCA-1-9 at left. Can be used with simple AM tuner or ceramic cartridge. Supply voltage: 10 VDC. Load impedance: 8 ohms. Input impedance: 25K ohms avg. 20K ohms min. Frequency response: 50 Hz — 20 KHz @ —3db. 1½ x 4½ x 2".

Model PCA-4-9A. Same as above, but with tone control.

Stock No.	Type	1-9	10-99
59F1455	PCA-4-9	8.30	6.20
59F1456	PCA-4-9A	9.20	6.90

2 WATT HIGH GAIN AMPLIFIER

Model PCA-4-14. Three stage, 4 transistor amplifier—a high sensitivity version of the PCA-1-14 at left. Can be used with a simple AM tuner or ceramic cartridge. Supply voltage: 14 VDC. Load imp. 8-16 freq. ¼ ohms. Input imp. 25K ohms avg. 20K ohms min. Freq. response: 40 Hz —18 KHz @ —3db. Size: 1½ x 4½ x 2".

Model PCA-4-14A. Same as above, but with tone control.

Stock No.	Type	1-9	10-99
59F1457	PCA-4-14	8.30	6.20
59F1458	PCA-4-14A	9.20	6.90

2 WATT STEREO AMPLIFIER

Model PCA-5A-14. A stereo version of the PCA-1-14 at left. 2 watt output per channel when connected to a crystal cartridge. Volume, balance, tone controls. Supply voltage: 14 VDC. Load impedance: 8 ohms. Input impedance: 600K ohms avg. 300K ohms min. Freq. res.: 100 Hz —40 KHz @ —3 db. Size: 1⅝ x 7¼ x 2".

Stock No.	Type	1-9	10-99
59F1459	PCA-5A-14	15.80	11.90

10 WATT STEREO AMPLIFIER

Model PCA-6A-25. 8 watts output per channel when driven by ceramic cartridge. Also used with a tuner input since sensitivity is 0.5 volt. Volume, balance, bass and treble controls. Separate preamp stage for each channel. Supply voltage: 25 VDC. Load impedance: 8 ohms. Input impedance: 500K ohms avg. Freq. res.: 30 Hz — 40 KHz @ —3db. 1⅝ x 7⅝ x 4¾".

Model PCA-6A-25SCS. Same as above, but with separate preamp strip to allow mounting in compact phonographs.

Stock No.	Type	1-9	10-99
59F1460	PCA-6A-25	30.10	22.60
59F1461	PCA-6A-25SCS	31.80	23.80

STEREO PREAMP

Model PCA-7B-18. Designed for use with 8 track stereo tape playback unit. Input sensitivity of 700 uv in adjustable output up to 1.5 v. An ideal link between tape head and low cost phono amplifiers listed on this page. Properly equalized for 3¾" speed. Supply voltage: 14-18 VDC. Input impedance: >20K ohms. Output impedance: <10K ohms. Size: 4⅞" long x 2 9/16" wide.

Model PCA-7C-18. Same as above, but without the adjustable output stage. Has an output of 40 mv.

Stock No.	Type	1-9	10-99
59F1463	PCA-7B-18	12.00	9.00

400 mW DIFFUSED ZENER DIODES

All have standard tolerances of 5, 10, and 20% — no suffix is ±20% tolerance; "A" suffix is ±10% tolerance and "B" suffix is ±5% tolerance. Except 1N4370, 4371, 4372 which are featured in standard tolerances of 5 and 10%, no suffix is lower priced and has a standard tolerance of ±10%. "A" suffix (*) has a standard tolerance of ±5%.

Motorola Regulator Diodes

● *NEW* LOW COST 500 mW "SURMETIC 20" VOLTAGE REGULATOR DIODES

DO-7 Case. Features higher ratings, tighter limits, better operating characteristics. Silicon-oxide-passivated junctions. Axial lead, transfer molded plastic package. Junction and storage temp: —65 to +200°C. Based on dc measurements at thermal equilibrium; lead length=⅜"; thermal resistance of heat sink=30°C/W. Vf=1.1 max @ If=200 mA for all types. Surge power: 10 Watts (Non-recurrent square wave @ PW=8.3 ms, Tj=55°C. Ta=25°C. Standard 20% tolerance. Suffix "A" is for ±10% tol; "B" is for ±5% tol.

Newark-Dallas Electronic Corp., 707 Easy St., Garland, Texas 75040

● *NEW* EPICAP VOLTAGE VARIABLE CAPACITANCE DIODES — CASE 51

Designed specifically for AFC in home entertainment equipment, as FM radios, TV tuners where high Q and very low cost are essential. BV=20 V min @ 10 μA; IR=0.1 μA max @ 15 V. Tuning Ratio: C2/C20.

● *NEW* REFERENCE AMPLIFIERS (ASSEMBLIES) — PNP & NPN

For use in regulated power supplies as a combination voltage reference element and error voltage amplifier, providing temperature compensation for excellent reference voltage stability. Operation over three different temperature ranges: 0 to 75°C, —55 to +100°C, —55 to 150°C. Tj, Tstg = —65 to +175°C. Izt= 5.0 mA. **Suffix P for PNP or N of an NPN transistor.**

THYRISTORS

● *NEW* SENSITIVE GATE 800 mA PNPN THYRISTORS (LOW CURRENT)

CASE 29(10) Plastic. Designed for operation in low voltage mA μA switching and detection circuits. Tj = —65 to +125°C.

Type	Vrrm(rep) Volts	1-99	100-999
2N5060	30	.51	.43
2N5061	60	.55	.47
2N5062	100	.64	.54
2N5063	150	.85	.72

● *NEW* 8.0 AMPERE TRIACS SILICON BI-DIRECTIONAL THYRISTORS

Cases 85 (MAC1's), 86 (MAC2's), and 87 (MAC3's). For full wave AC control applications such as heating or lighting. Switch from a blocking to a conducting state for either polarity of applied anode voltage with + or — gate triggering.

Type	Peak Block Vbom	Ibom mA Max	Iho mA Max	1-99	100-Up

● NEW PLASTIC SILICON 3-LAYER BILATERAL TRIGGERS, CASE 29B

Annular, 2-terminal device exhibits symmetrical negative resistance switching characteristics. Developed for use in thyristor triggering circuits and signal switching and detection circuits. Made of durable plastic. Pd = 300 mW @ Ta = —40 to +25°C. *Both Directions. Ibr12 means term 1 is pos.

TEXTBOOKS AND HANDBOOKS

SEMICONDUCTOR DATA BOOK. 1536 page book includes the latest Motorola devices, max ratings, complete elec-mech specs, case outlines, and more. EIA registered type number index and short form spec table.
52F860. NET **3.95**

POWER CIRCUITS TEXTBOOK. 196-page guidebook offers working circuits or design ideas when using semi's, for power inverters and converters. RF transmission, automotive ignition systems, light and motor control.
52F861. NET **2.00**

SILICON RECTIFIER HANDBOOK. Highlights computing single and multi-phase circuit values; heat sinking proper device cooling; voltage and current surge protection 216 pp.
52F856. NET **1.50**

SWITCHING TRANSISTOR HANDBOOK. 365 pages. Provides design procedures for saturated-mode and avalanche mode circuits.
52F862. NET **2.50**

INTEGRATED CIRCUITS TEXTBOOK. 385 pp. Covers both IC design, philosophy and practical production know-how.
52F102. NET **12.50**

MEG-A-LIFE—HIGH RELIABILITY ASSURANCE FROM MOTOROLA

MEG-A-LIFE II Program is designed to provide the aerospace and industrial equipment manufacturer with a practical means of meeting demands of high-reliability assurance, low cost, and short lead time. The high reliability specifications demanded under the Meg-A-Life program require the application of some form of 100% electrical screening and sample life and also environmental tests. The lot acceptance testing is the same as Group A, B, and C test of the military specification applicable to particular zener or reference diodes. Great flexibility is assured by the three standard levels offered. A variety of optional tests may be specified to meet the buyer's needs and desires.

MEG-A-LIFE II, LEVEL 3, presents the highest level of reliability assurance. Level 3 products meet applicable military specifications and are given a 240-hour power burn-in to stabilize characteristics. Further electrical testing assures that devices meet electrical specs of MIL Group A. Level 3 devices are supported by complete test data, including results from the actual acceptance lot from which the devices are supplied.

MEG-A-LIFE II, LEVEL 2, are zener and reference diodes which receive the same 100% screens (including the 240-hour power burn-in) as the Level 3, but the acceptance test data is from a recent lot which passed MIL tests.

MEG-A-LIFE II, LEVEL 1, are similar to the Level 2 units, but not subjected to the 240-hour burn-in.

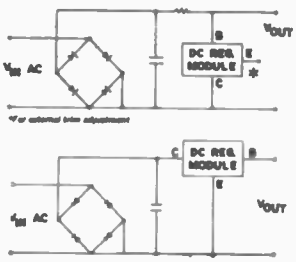
DC SERIES REGULATOR MODULES

Revolutionary! Brand new DC Series Regulator Modules places a complete DC voltage regulator in one small, compact TO-3 transistor package. "Miniaturized" card-type and hand wired circuits. Each module contains a complete silicon, solid state comparator amplifier assembly —weighs only ½ ounce! 1-amp modules come as series regulators of 5, 6, 12, 18, and 24 volts, or as shunt regulators of 5, 6, 9, and 12 volts. TO-3 configuration fits all standard socket and heat sinks.

Load Regulation: No load to full load, ±1%.
Maximum Power Dissipation: 25 watts with 25°C case.
Temperature Coefficient: 0.04% per °C typical.
Output Noise: 500 μV RMS typical with no external filter.
Maximum Output Current: 1 amp.
AC Output Impedance: 20 Hz to 10 KHz = 0.1 max, 20 Hz to 40 KHz = 0.25 max. Typically less than 0.1 from 20 Hz to 40 KHz with output filter capacitor.
Operating Temperature: —30°C to +125°C case.
Weight: 0.5 ounce.

APPLICATION SCHEMATICS



AVAILABLE IN TO-3 CASE OR CARD-TYPE ASSEMBLY.

ENCAPSULATED NPN SILICON POWER TRANSISTORS

The Bendix B-5000 plastic Encapsulated Silicon power transistor is a new concept in solid state power handling. This reliable low-cost device is taking over many new applications where silicon power formerly could not be considered.

HIGH RELIABILITY PLASTIC ENCAPSULATED TRANSISTORS

- **Plastic packages**
- **One-piece construction**
- **Heat and moisture resistant**
- **Reduce cost of electronic systems**

Cutaway model at left shows simple, rugged TO-92 package. The solid, one piece construction provides excellent protection for active element and fine connecting wires, assuring stable performance under condition of severe shock or vibration. The plastic compound meets MIL-STD 202-C, for moisture protection. The model at right shows the TAB-PAC package, which is used in the TAB-PAC SILECT power transistors. Provides 10 watts at 75°C case temperature.

PLANAR SILICON PHOTO DEVICES

Type LS-400. Microminiature. Designed for photo switch-switching, tape-read-out, differential amplifiers, and proportional control. VR, 30 volts.; BVR, 50 volts at 100 ua; BVF, 8 volts at 100 ua. **Type LSX600.** Ideally suited for line read-out application, and high density matrix equipment. Velocity indicators, encoders, tape and card readers. Coll. Emit. v., 50 v; emit-coll. v., 7 v.

● NEW SK SERIES REPLACEMENT SEMICONDUCTORS

For replacement purposes in line-and-battery-operated portable radios, phonographs, tape recorders, TV receivers, and af Amplifiers. Usually installed w/o changes in mechanical mtng. arrangements, circuit wiring, or operating conditions. Transistors replace more than 6500 types. Rectifiers replace over 2300 selenium and silicon rectifiers. *Description and application apply to both items. † Means drift-field. RF, IF amplifiers are applications of the SK3006, SK3007, SK3008, and SK3011.

RECTIFIER STACKS

FIGS. E AND F

GERMANIUM LOW CURRENT STACKS

TYPE 4JA211

Small and lightweight, with excellent regulation. May be arranged in stacks of up to 12 fins for more than 160 various circuit configurations. Output up to 6 amps at 55° C ambient. Up to 630 PRV.

SILICON LOW CURRENT STACKS

TYPE 4JA411, 4JA1011

High temperature operation, up to 150° C. Ratings up to 18 amps at 25° C ambient, up to 3360 PRV. Offer high efficiency plus excellent regulation. Hundreds of stack combinations for a variety of circuit conditions. 4JA10011 35 amp. one cycle surge rating.

SCR COMBINATION STACKS

Packaged building blocks include silicon controlled rectifiers, compatible rectifiers, heat sinks, interconnections and all hardware. Installation requires only mounting bolts and connections.

SERIES C3512 and 13, C4012 and 13, C1012 and 13, C1112 and 13, C1212 and 13

Rated up to 13.65 amps per fin free convection cooled, up to 23.5 amps per fin forced cooled at 25° C ambient. In two fin sizes, 3"x3: and 5"x5", and five SCR types.

SERIES C15014, C18015

Provide up to 102 amps per fin free convection cooled at 30° C ambient. Specially designed aluminum extrusion for maximum **heat dissipatlon when used with C150 or C180, SCR. Available in hundreds of circuit configurations.**

SILICON MEDIUM CURRENT STACKS WITH 5" FIN

TYPE 4JA3512

Square fin assembly for optimum use of 1N2154 series, 25 amp cell. Provides wide range of power applications with DC outputs up to 108 amps at 55° C ambient, up to 1800 PRV.

SILICON MEDIUM CURRENT STACKS

TYPES 4JA2011, 4JA2511, 4JA3511

For wide range of power applications. Type 4JA2011 provides up to 32 amps at 55° C ambient, up to 1800 PRV. Type 4JA2511 gives up to 50 amps at 55° C ambient, up to 1800 PRV. Type 4JA3511 gives up to 65 amps at 55° C ambient, up to 1800 PRV.

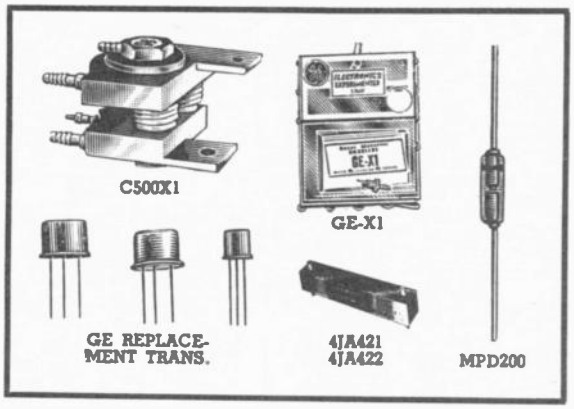
SILICON HIGH CURRENT STACKS

TYPE 4JA7012, 4JA7013

Lightweight stacks provide up to 165 amps DC at 40° C ambient up to 1000 PRV. Type 4JA7012 uses 5"x5"x⅛" flat copper fin heat sink. Type 4JA7013 has 7"x7"x⅜" flat aluminum fin.

For Ordering Information Concerning G.E. Rectifier Stocks See Following Page

CONTINUED NEXT PAGE



RECTIFIER STACKS CONTINUED
TYPES 4JA7014, 4JA9015

Designed for free convection cooled applications which require a maximum amount of current in a relatively small space. Fin is anodized aluminum, 4" x 4" x 5".

TYPE 4JA9013

DC outputs up to 420 amps at 40° C ambient, up to 1000 PRV Free convection cooled with 7" x 7" x 3/8".

TYPES 4JA421, 4JA422 POTTED RECTIFIER CIRCUITS

Rectangular design with solder lug. Available in wide variety of circuit configurations. Use Types 1N536-540, 1N1095 silicon cells.

Type	Current up to	Ambient Temp.	PRV. up to
4JA421	0.65 amp	25° C	10,000
4JA422	1.50 amps	25° C	2,000

TYPES A723 AND A725 HIGH VOLT SERIES

A7 Controlled Avalanche Rectifiers available in convenient pre-assembled, potted assemblies with wire lead terminals. Available up to 10,000 PRV. Up to 820 ma at 50°C ambient. Self-protected against normal voltage transients. Available in many circuit configurations. Type A723 is rectangular block series. A725 is axial lead cartridge series.

Ordering rectifier stacks: order by series type number (e.g. 4JA1011) and include required current, voltage, transient voltage, max. ambient temp., phases, circuit configurations, and load. SCR series specify connection and/or supply circuit diagram.

GE-504A UNIVERSAL RECTIFIER—DO-3

A silicon rectifier with a 60 amp surge rating. PRV is 600 volts; max. Idc, lamp. Shpg. wt., 2 oz.

Type GE504A. NET ..... **.66**

EXPERIMENTAL/HOBBYIST ELECTRONIC COMPONENTS

Featuring electronic components for the experimenter, with schematic diagrams for building battery charger, tachometer, SGR ignition system, flashers, stereo amplifier, all-band receiver, plug-in speed control for tool or appliances, light dimmer, and other items. Most of these projects are described in the new Electronic Components Hobby Manual listed below.

Type	DESCRIPTION	Net
GE-X1	SILICON CONTROLLED RECTIFIER. 117-volt solid state switch. Controls up to 4.7 amps.	2.60
GE-X2A	LIGHT ACTIVATED POWER switch. It will conduct up to 1/4 ampere, up to 25 volts.	2.80
GE-X3	HIGH CURRENT SILICON CONTROLLED RECTIFIER. For up to 13 amps @ 50 PIV.	4.00
GE-X4	CONVENTIONAL HIGH CURRENT SILICON RECTIFIER. 20 amp rating. For up to 200 PIV.	1.60
GE-X5	HIGH SENSITIVITY SILICON CONTROLLED RECTIFIER. For special circuits up to 1.6 amps and 50 volts. Activated by extremely low signal power (a momentary sig. power of 200 micro watts or less).	2.30
GE-X6	PHOTO CONDUCTIVE CELL. Cadmium sulfide end-illuminated. Up to 250V peak. AC/DC.	1.40
GE-X7	REED SWITCH. Carries from 15 volt-amperes to micro-amps. External magnetic acuation.	.80
GE-X8	MED. SPEED, NPN TRANSISTOR. Germanium. For low level switching and amp.	.70
GE-X9	MED. SPEED, PNP TRANSISTOR. Germanium alloy. For medium powe ramplification and switching at low frequency.	.70
GE-X10	UNIJUNCTION TRANSISTOR. Three-terminal semiconductor. Has low value of firing current, stable negative resistance, stable firing current, high pulse current capability.	1.35
GE-X11	ZENER DIODE. Rated 8.2 volts at 1 watt.	1.80
GE-X12	TRIAC—With schematic for building remote control for appliances.	4.50
GE-X13	DIAC—With schematic for building lamp dimmer or AC motor control.	1.60
GE-X14	THYRECTOR—With schematic for building dual voltage power supply.	1.15
GE-X15	THERMISTOR—With schematic for building adj. temp. alarm.	3.45
GE-X16	SILICON CONTROLLED RECTIFIER — With schematic for building battery-operated fluorescent light.	3.45
2N107	AUDIO PNP TRANSISTOR. Alloy junction.	.75
	AUDIO PNP TRANSISTOR. Low voltage, high frequency transistor.	.75
2N170	UNIJUNCTION TRANSISTOR.	1.02
C2	10,000 T #39 Wire-825Ω.	1.60

GENERAL ELECTRIC

ECONOMY PLASTIC ENCAPSULATED TRANSISTORS — PLANAR PASSIVATED

General Electric Transistor Industrial Kit No. D16KT1300. Ideal for prototype design at roughly one-third the cost. Contains 106 transistors from 10 transistor families and includes 26 different types: 2N2926, 2N3391-94, 2N3402, 2N3414-16, 2N3605-07, 2N3662-63, 2N3854A-56A, 2N3858A-59A, 2N3860, 2N3877-77A, 2N3975-76 D16U3/D16U4. Four of each type except eight of 2N2926. Complete with printed specifications.

D16KT1300. NET **25.00**

SILICON MULTI-PELLET DIODES

Planar epitaxial passivated with tightly controlled conductance, controlled stored charge, and low leakage. Two, three or four pellets mounted in series in a subminiature double heatsink package. Useful as low voltage regulator diodes, amplifier non-linear bias elements, signal limiters or level shifting diodes in transistor logic circuits, and DC coupling devices in DC amplifiers and digital circuits such as multivibrators. Max. reverse current 30 volts at 25° C nA: 30. Min. breakdown at 5 uA V. MPD200—30; MPD300—60; MPD400—90.

Type	Forward Voltage @0.010 mA	Forward Voltage @100 mA	Stored Charge at 1 mA Min. pC	Stored Charge at 1 mA Max. pC	1-99	100-999
MPD200	0.90-1.00	1.60-1.76	75	400	1.21	.81
MPD300	1.40-1.54	2.40-2.65	75	400	1.49	.99
MPD400	1.82-2.01	3.16-3.49	60	300	1.62	1.08

SOLID STATE AC SWITCH

Economical solid state control of AC power. Water cooled C500X1 switches 1.5 megawatt loads. Blocking Volts: 1800 Max. Avg Power Watts: 1850.

Type	I rms AMP	Peak I. 1 Hz Surge	Water Flow gpm	1-9	10-24	25-Up
C500X1	1200	7000	1	1000.00	750.00	500.00

C35D	35	17.10	11.40

STANDARD TRIAC SUB-ASSEMBLIES

Power control circuits ready-to-use. Sub-assemblies can be built or added for control of incandescent lights, motors, resistance heaters, etc. Use of these sub-assemblies offers quick solutions to control problems without investment in engineering time. Each sub-assembly is 2 inches high, and 3 inches long complete with electrically isolated heatsink. *RFI suppressed.

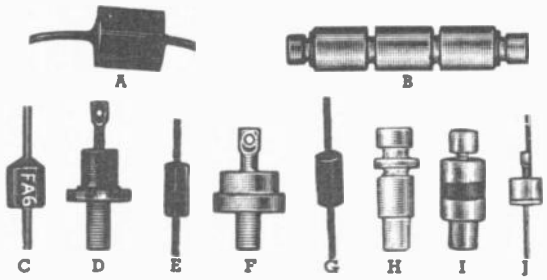
Newark-Electronics Center, Inc., 160 Fifth Ave., New York, New York 10010

Avalanche Regulators & Rectifiers Sarkes Tarzian



Silicon rectifiers for high temperature applications. All are now avalanche type. They provide "built in" protection against reverse transient overvoltage spikes. Use of avalanche type rectifiers eliminates need for protective components and circuitry normally used to protect standard rectifiers. Elimination of such crutch type components, reduces costs, saves space.

"CENTRE-KOOLED" SELENIUM RECTIFIERS

Featuring center cooling by means of spacers. Each spacer acts as an individual spring to guarantee constant assembly pressure. Higher leakage resistance assured by protective end plates of bakelite. Color coded for polarity identification. All rated at 130 volts. Av. wt., 6 oz.

Type	DC mA	Net

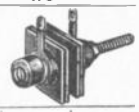
KLIPVOLT SUPPRESSORS

Reduces transient voltages to as low a value as possible without changing circuit characteristics or adding excessive cost. S-594 has mounting stud on each end and others have single stud. Peak discharge current 2.5 amps.



Type	Max. Clamping Voltage	Rated RMS Volts	Klipvolt Overall Length*	1-9	10-99	100-up

S-594	1190	490	3 3/16"	5.03	4.53	4.02

SINGLE PHASE BRIDGE RECTIFIERS

Compact efficient assemblies for quick easy installation in single phase full wave bridge applications. All offer the built-in transient protection advantage of avalanche characteristics. Ratings: 2.0 Z to 6A. 200 to 900 PIV. (Higher current and PIV ratings available on special request.)

1 WATT ZENER VOLTAGE REGULATORS (FLANGELESS)—DO-13

These zener regulators are designed primarily for continuous feeding in automated assembly processes. All of the units are process-selected so that they may assure extremely sharp zener "knees" and excellent voltage regulation over the entire operating temperature range. These devices have ±20% tolerance. Add "A" to type number for ±10% tolerance.

CONANT COLOR-CODED INSTRUMENT RECTIFIERS

Series 500. Designed for use in apparatus drawing up to 30 milliamps. Reverse voltage, 2.25 DC. Disc diameter, 500'. Active area, .15 square inches.

Series 160 and 160-C. Designed for applications requiring better than average frequency response. Recommended for conventional circuits using meter movements drawing up to 5 milliamps. Disc dia., .166". Active area, .019 square inches.

ERIE RECTIFIERS

FULL WAVE RECTIFIER ASSEMBLIES

Fig. A
- Full Wave Bridge Rectifier Circuit

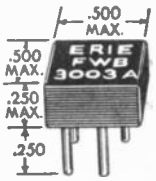

Fig. B
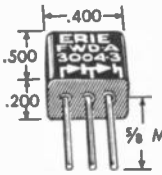
- Full Wave Voltage Doubler Circuit



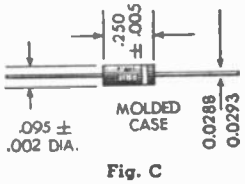


Fig. C

A miniature series of bridge and doubler modules designed for printed circuit applications. Double seal assures moisture resistance to environmental specs of MIL-STD-750A, FWB types (bridge rectifiers) measure ½x½x¼", with pin leads ¼" long; FWD types (doublers) measure .50x.40x.20" with ⅝" pin leads.

MINIATURE SILICON DIFFUSED RECTIFIERS — Fig. C

General-purpose diffused silicon rectifiers featuring high forward conductance, low leakage currents, and reliable performance. Unique methods of encapsulating the rectifier assure permanent resistance to parameter degradation due to moisture diffusion. Meet or exceed environmental testing per MIL-STD-750A. Surge current rating: 25A. Operating temperature range: —55 to +100°C. Body size: .250x.095"; 1.110" leads.

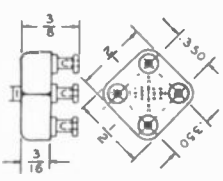
● *NEW* UNIVERSAL FULL WAVE BRIDGE RECTIFIERS

Miniature series of bridge and doubler modules designed for printed circuit applications. Rate at average rectifier currents of .5, .75, and 1.0 Ampere. Double seal insures moisture resistance to MIL-STD-750A, Method 1021.1. Reverse current (μa) per leg @ PIV @ 25°C: 20. **Note on ordering: No suffix** letter attached to the type number means that Io = 1.0 Amp @ 25°C, Vf = 1.5 Volts. **"A" suffix** attached to type number means that Io = 1.5 Amp @ 25°C, Vf = 1.3 Volts. **"B" suffix** attached by the customer to type number indicates Io = 2.0 Amp, Vf = 1.1 Volts.



Type	Avalanche V/leg @ 100 μA	PIV Work. Volts	Max Applied rms V	1-99	100-999

NPN PHOTO DUO-DIODE—TYPE 1N2175

The 1N2175 is a sub-miniature, symmetrically diffused silicon photo readout device. The two junctions are symmetrical so that either diode terminal can be baised either positively or negatively. Due to this unique design, AC or DC bias voltage can be used. The samll size and high light sensitivity of this unit makes it particularly useful in high speed readout of punched cards.

1 AMP SILICON CONTROLLED RECTIFIERS

Hermetically sealed devices in TO-5 package. All diffused silicon planar construction. Operating temp. range: —65°C to +150°C. Max. peak pulse current: 15 amps one cycle.

Type	Frwd. Breakover V. and Reverse Wkg. Voltage	1-99	100-999
2N2345	50 volts	8.95	6.70

PNPN SILICON CONTROLLED RECTIFIERS—TO-5 CASE

Absolute maximum ratings (@80°.): avg. FWD. current 1 amp; peak recurrent forward current, 3.3 amp; surge current, 1 cycle @ 60 cps, 15 amp; Temp. range —65 to +125°C. Specs. (@ 25°C.) min. BVf. BVr, 120% rated voltage (—65 to +125°C.); max. If (off), Ir, .25 ma; max. Vf@ If=1 amp, 2V; max. Igt, 10 ma; max. Vgt, 3V; max. Ih, 25 ma. All ratings below for case temp. —65 to +125°C

Type	Vf (off)	Vr	Peak Gate Current	1-99	100-999
2N1595	50	50	100 ma	2.70	2.00
2N1596	100	100	100 ma	4.10	3.05
2N1597	200	200	100 ma	8.40	6.30

200mA SILICON CONTROLLED RECTIFIERS

Sensitivity miniature units ideally suited for use in critical logic and control circuits where space is limited. All diffused silicon planar constructed. Hermetically sealed TO-18 package. Operating temp.: —65°C to +150°C.

Type	Frwd. Breakover V and Reverse Wkg. Voltage	1-99	100 999
2N877	30 volts	6.80	5.10
2N878	60 volts	7.95	5.95
2N884	15 volts	8.00	6.00
2N885	30 volts	8.70	6.50
2N886	60 volts	9.80	7.35
2N887	100 volts	11.90	8.95

1.6 AMP SILICON CONTROLLED RECTIFIERS

Hermetically sealed devices in TO-5 package. All diffused silicon planar construction. Operating temp. range: —65°C to +150°C.

Type	Frwd. Breaker V and Reverse Wkg. Voltage	1-99	100-999
2N2323	50	3.10	2.30
2N2326	200	9.34	7.00
2N2327	250	11.50	8.65

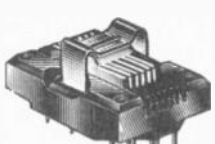
CAMBION



FLAT PACK HOLDERS

Accepts any std. 14-lead flat pack.

Molded diallyl base; raised platforms prevent moisture trapping. Available with .025" gold plated pins for soldering, or plug-in, or .025 square wire wrapped contacts. Size: 1.200" x .776" x .625" (less pins).

Stk. No.	Type No.	Contact Type	1-9	10-49	50-99

300 SERIES RADIAL RECTIFIER COOLERS

Radial fin coolers for rectifier or stud mounting transistor applications. Adaptable to stack arrangements. Uses standard teflon insulating washers. Accommodates press-fitted and stud-mounted rectifiers and transistors up to 11/16" hex case. Semiconductor mounting surface and one mounting foot unanodized. Type no. suffix indicates mtg. accommodations: see following page for key.

SERIES 680 CIRCUIT BOARD COOLERS

Provides optimum natural convection cooling per unit volume occupied above the circuit board. Mounting in any position is possible since it permits free air flow in any direction. All have 1.81" sq. base with 1.50" bwtn. mtg. holes. 1.3 to 1.9 oz.

DELTA BOND 152 THERMALLY CONDUCTIVE ADHESIVE

Type 152. High conductivity adhesive used: As general adhesive, for bonding semi-conductors to chassis heat sinks, fabricating heat sinks or thermal linds, for permanent bonding of all materials with highly thermal conductive interface. Porous and nonporous surfaces. Excellent dielectric strength. Bond shear strength, 1" overlap psi, 30 immersion in water unaffected. Temp. range —70°F to +300°F.

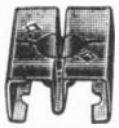
Semiconductor Cooling Units and Ovens

WAKEFIELD

SNAP-ON CIRCUIT BOARD HEAT SINKS



Series 140 supplements the Series 200 Featherweight Heat Sinks. Types 140, 141, and 142 fit popular press fit diodes and SCR's as well as JEDECTO-8. Case dia. ranges from .480 to .505. Provides thermal resistance as low as 10°c/w. Material: highest thermally conductive aluminum. Finish: black anodize is standard. Wt.: 140—.14 oz.; 141—.20 oz.; 142—.42 oz.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999

CIRCUIT BOARD COOLER FOR TO-5 TRANSISTORS

Type 150. Ideal for use where space is limited. Requires only 0.375 in.² area. In applications permitting 1⅜" height above the circuit board, this lightweight, economical Cooler has good performance characteristics with TO-5 cases: case rise 34°C @ 1 w with black anodized finish. Wt.: .10 oz.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999
58F379	150	1.375 x 1.00 x .375	.061	.051	.041	.036

THERMAL CLAMP FOR TO-1 CASES

Type 255. For push/pull driver or low power output applications. Gives retention of cases to chassis or heat sink. 2 cases can be mounted. 3°C/w per TO-1 transistor or 1½° C/w for both. Mtg. ctr.; .687, tols. ±.001 or ±.005. Material: 1100 aluminum alloy. Finish: none. Wt.: .10 oz.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999
58F380	255	1.726 x .375 x .476	.063	.053	.043	.038

● *NEW* SERIES 258 THERMAL LINK

Thermal Link for fused glass diode. Copper solder points are isolated from, but bonded to the aluminum U-form. Dielectric coating extends down the legs to provide long creepage path. 100% tested at 1000V hypot. Incr. cur. rating: 3 to 5 times. Screw mounted. Wt.: .05 oz.

Stk. No.	Type	Size	1-24	25-49	50-99	100-499

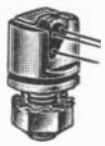
THERMAL RETAINERS FOR TO-5 CASES

254S



254S1

254T

254P
254D

The TO-5 case style, including the Kovar header type, is best heat sinked at the bottom face of the flange, and all Series TR-254 Heat Sinks provide this preferred method. All five types intended as thermal links from transistor case to a cooler or chassis member acting as the heat sink. Type 254-SI has built-in electrical insulation. Material: Type 254-SI; 6061-T6 aluminum with gold irridite finish.

Stock No.	Types	Weight Oz.	1-99	100-499	500-999	1000-2499	2500-4999

● *NEW* SERIES 256 BRASS CLIPS

Type 256-ST

Type 256-DT

Type 236-D

Clips for use as electrostatic shields and/or thermal retainers. For one or two plastic T1 or other plastic transistor or .20" dia. and .16" across the flat. Dual clip maintains 2 transistors at the same temperature.

Ttock No..	Type	Dia. x Length	Weight Oz.	Packages of 1000 1-2	3-4	5-9	10-24
58F338	256-ST	.20" x .16"	.0005	16.25	14.50	13.00	11.50

● *NEW* SERIES 170 INSULATING WAFERS

For TO-3 transistors. Features thermally conductive dielectric coating providing excellent thermal path between the case and heat sink. Shipped on a carrier holding 40 wafers. Scored for fast, easy breakoff from the carrier.

Stock No.	Type	Finish Description	Pkgs. of 100 Pcs. 1-9	10-24	25-49
58F341	170	Hard Coat	11.50	9.50	8.00
58F342	170	Delta Coate 151H	10.50	8.50	7.00

● *NEW* THERMAL SPRING RETAINERS FOR TO-18 CASES

2 TO-18 spring retainers bonded together with Delta Bond to obtain electrical separation and to provide equalized case temp. Copper finish. Cadm. plated. Weights: .014 to .018 oz.

Stk. No.	Type	Size	1-49	50-99	100-249	250-499	500-999

NEWARK Maintains Ten Giant Warehouses to Insure Fastest Delivery From Stock.

KLIXON

SELF-REGULATING COMPONENT OVENS

Statitemp Series. Provides a stable thermal environment .Temperature gain (defined as ratio of change in ambient temp. to change in control temp. at constantvoltage and component dissipation, as measured by the temp. dependent characteristic of the component) is 30:1 for 115°C. types, 15:1 for 80° models. Low power drain; unaffected by component current. Operate from 24VDC. Aver. wt. approx. 5 gms.

For temperature stabilization of DO-7 and DO-5 semi. components.

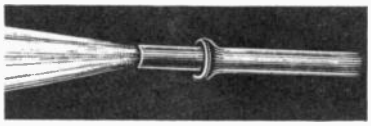
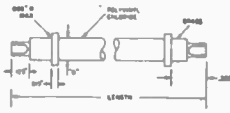
FIBER OPTICS

● *NEW* FIBER OPTICS "LIGHT WIRES"





Permits transmission of light beams around corners and thru intricate bends. Numerous applications exist in aerospace R & D, photography, electro-optics, automation, and production systems. Extremely useful in optimizing photocell performance by channelling light onto photosensitive surfaces; may be used as "transmission lines" for modulated light signals, eliminating the need for complex, delicate systems of lenses and prisms. Each "wire" is made of a bundle of 100 to 1,000,000 tiny 40μ diam.) fibers; each fiber consists of a core covered with a cladding of slightly lower index of refraction — light is channelled from one end of the bundle to the other by a process of total internal reflection. Because of this core/clad combination, dirt, oil, tar, and most other contaminants will have practically no adverse effect on light transmission. To provide mechanical protection, the bundles are encased in PVC or crush resistant aluminum tubing and furnished with brass end fittings. Will transmit the visible and near-infrared portions of the spectrum, but are not practical in the UV region. Temp. range: —40 to +200°F.

● *NEW* FIBER OPTICS "FLEXISCOPE"

Permits examination of internal details in areas where periscopic instruments are useless. Probe fits into any 1/2"D or larger opening, and can be bent around curves, threaded thru the most complex systems, even tied in a knot, without affecting its image-transmitting capability. Two bulbs in the probe provide illumination of the area under inspection. The probes connect to a rugged metal casing containing the focusable viewing eyepiece, batteries (use transformer adapter and transformer for applications requiring high-intensity or continuous-duty illumination) and switch. Example applications: insert into spark plug holes to inspect cylinder walls and piston heads without tearing down engine; check for defective teeth in gearboxes; examine interior surfaces of pipes; attach probe to shake table and hold viewer stationary to observe component failure during vibration testing. Resists shock, corrosion, dirt, grease, oil, and water. Inexpensive, replaceable faceplate protects the end of the probe. Comes with bulbs, batteries, spare faceplate, probe wrench, and manual. Less probe.

● *NEW* EXPERIMENTAL KIT

Special kit for experimenters, designers and engineers. Explore first-hand the wide range of applications for Fiber Optics. Kit contains four standard light wires (1 each 32-01-06, 32-02-12, 32-03-18, and 32-13-24) plus ten feet of continuous light wire, 12 ferrules, and crimping tool, for fabricating custom-made light wires of any desired length.

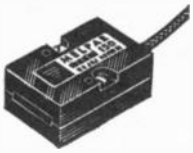
Readers, Choppers, Oscillators & Solar Cells

MELPAR, INC.



● NEW PHOTOELECTRIC READER

Consists of light source, lens and photocell. Utilizes the advantages of detection by reflected light. Lamp, 6v at 0.2 amp; dc recommended; nominal life 10,000 hr at 5.4v. Photocell; nominal input, 20vdc. Max. inupt, 300 vdc. 50 mv max. dissipation. Nom. response: 7250 angstroms, std. Maximum counting rate on std. unit; 300 counts per second. Versatile; counts, cues, sorts and inspects. Features small size (0.6 cu. in.), and insensitivity to ambient light.

99F850	150 Reader	24.50	21.00	18.50	17.00	16.00

● NEW MODEL 200 PHOTOELECTRIC READER

Companion to the 150, designed for use in automatic control systems where target detection at ranges from 1" to 100' is required. See specifications above.

Stk. No.	Description	1-9	10-24	25-49	50-Up
99F851	200 Reader	36.95	32.95	29.95	28.95

● NEW PHOTOELECTRIC CONTROL UNITS

Transistorized photoelectric control units provide high reliability at low cost for automatic control systems using the companion photoelectric readers 150, and 200. These control units feature long life, ease of maintenance and highly simplified installation. In one compact unit are contained a power supply, amplifier and controlled switching.

Model 155. Control unit companion to the 150 photoelectric reader. Input power: 115V, 60HZ, 6W. The control relay is SPDT, 115V 2A non-inductive. The maximum operating rate is 1000/Min. Complete with 5' cord. Case size: 4" x 2⅞" x 1½".
Model 205. Control unit companion to the 200 photoelectric reader. Input power: 115V, 60HZ, 17W. The control relay is SPDT, 115V 2A non-inductive. Maximum operating rate: 1000/Min. 5' cord included. Case size: 6¼" x 3¾" x 2".

● NEW SERIES LIGHT L10 CHOPPER

Economical light chopper used for light beam modulation, pulsing, scanning, sweeping, and control. Exclusive features: Compact size, jeweled bearing, lower power input, wide angle of excursion (up to 20°), optical quality, high reflectivity and replaceable mirror and bearings. Specifications: Input power: Sine wave, 1½ v. (typical). Power consumption: 25 milliwatts. Mirror finish: aluminized front surface or optical mirror. Mirror size, 1 Cm^2. Frequency to 500 Hz std. Size 1 29/32" x 1 15/32" x .8".

● NEW TUNING FORK OSCILLATORS

A combination of tuning fork and high gain amplifier circuit which generates a sine or sq. wave output with the application of dc voltage. Accuracy; .005%± @ 0 to 65°C std., —40° to +100° operational. Input voltage: 12VDC. Output: Square wave, approx. 50% p-p min. of output voltage into 10K external load. The terminals are solder hooks which can be cut off to pin for printed circuit mounting. Typical applications: lab. std., test equipment, motor control, timers, etc. Stable, rugged and reliable.

Four tuning fork oscillators available:

All others are 1 29/32" x 1 15/32" x .4".
* Divided to 60HZ from 480 HZ.

● NEW MEL-INK PERMANENT MARKING COMPOUND

Typical uses include identifying nomenclature on printed circuit boards, sheet metal chassis, and most components. Non-conducting.
Type M-100A. Epoxy based compound eliminates smeared stencils, resists the action of ultrasonic solutions and intensive salt spray. Can be sprayed on metals, plastics, glass and wood. Meets or exceeds MIL-STD-130 without a protective coating.
Type M-300. Hard-setting epoxy with a viscosity suitable for machine and hand stamping, as well as silk screening. Prevents smearing of stamped information on completion of the curing cycle. Excellent solvent resistance.

GENERAL ELECTRIC PHOTOCONDUCTIVE CELLS

Hermetically sealed after evacuation and back filled with dry air to reduce the moisture content to approx. .015%. Cells come in three basic sizes, four power ratings, and multiple resistance ratings. Wide range enables the designer to select a maximum power dissipation of 75, 250, 300 or 600 mw. By using cells to operate many devices directly, amplifying stages can be eliminated and overall circuits greatly simplified. Cells have very high sensitivity and spectral response peaks in the visible light range. Near maximum response obtained over large portion of the spectral region. All are in glass-metal packages. Have flexible leads and small size to dissipation ratio. No external shields required. May be used for annunciators, anemometers, camera aperture control. * Dia. excludes flange.

† Plastic encapsulated (not hermetically sealed), cadmium-selenide device.

PHOTOCONDUCTIVE CELL-LAMP COMBINATION

Photoconductor-lamp combination includes cadmium-sulfide (PL5C1 is cadmium-selenide) photoconductive cell and a variable illumination source enclosed in a light-tight package. Photoconduction is controlled by varying the voltage to the light source. Intended to be used for circuit isolation as a potentiometer free of moving-contact noise, and for low-level switching.

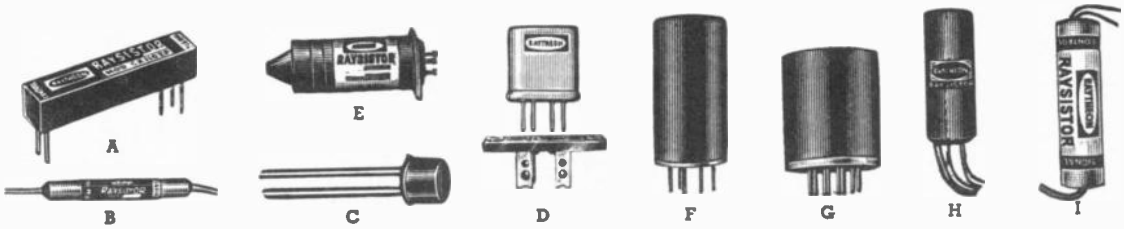
RAYTHEON Raysistors & Photoconductive Cells

RAYTHEON RAYSISTORS



• Ideal replacement for Switches — Relays — Potentiometers

Four terminal optoelectronic device which performs a variety of control functions, providing noise-free control of AC or DC signals over a wide dynamic range without transients or contact (or wiper) chatter. Since there are no moving parts, the Raysistor is exceptionally rugged and has inherently long life in typical applications as variable resistors, solid state switches, relays and voltage or signal isolators. Unit operates on the principle of controlled light acting on a photoresistive element. No electrical or mechanical connection exists between the control and signal circuit. * With Socket.

RAYTHEON PHOTOCELL

Hermetically-sealed solid-state light dependent resistor using a cadmium selenide photosensitive material designed for use in optoelectronic control circuitry. Fast switching speed suitable for chopper and other control and switching appliances requiring operation up to one kilocycle. Coupled with a high voltage capability, provides a very low noise variable resistor which is ohmic over a wide range of voltage and illumination. The TO-5 package permits use of standard mounting hardware.

	Resistance in Ohms						Response Time at 100 ft. cdles.

RAYTHEON

¼" GLASS VIAL PHOTOCELLS

Are hermetically sealed in glass cases and are available with cadmium selenide and cadmium sulfide sensors. Rugged mechanical construction, small size and light weight provide ease in mounting. Wide range of characteristics and high voltage capability provide a low noise, completely ohmic light dependent variable resistor, useful over a wide range of voltage and illumination. Cadmium selenide cells, having faster switching speeds are especially suitable for chopper and other control or switching applications requiring operation up to one kilocycle per second. Color response covers the visual light range and extends well into the infra-red. Cadmium sulfide cells, having a lower temperature coefficient, are especially suitable where stability over a wide temperature range is required. The improved temperature stability and more linear response to illumination makes this type particularly good for applications requiring better stability in hostile environments.

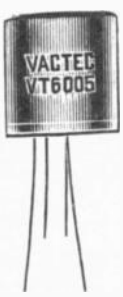
VACTEC PHOTO CELLS



VT 6005

● *NEW* VACTROL PHOTOCELL LAMP CONTROL MODULE

Package capable of circuit board mounting, for electronic amplifier use. Epoxy sealed metal enclosure. .100" standard lead centers. Minimum off-res: 100 megohms. Dia. 9/16". VT-6005 equal to the Clairex CLM4006; VT10030 like the CML5012.

Stock No.	Type	Max. on Ohms	Rise	Max. Lamp V	1-49	50-499	500-2499

● *NEW* SELENIUM PHOTOVOLTAIC CELLS

Constructed of steel Selenium, molecular layers of CdS and CdO. #30AWG vinyl coated wire leads on unmounted cells. May tolerate 100°C. "L" in type indicates soldered leads. Type A — long-lived, most resistant to chemical fumes, more sensitive to shorter wavelengths; Type B — for higher current output and less fatigue. * indicates 100 Ft-C, 150 Ohms, 75"F, light source 28508K. ** means Epoxy (clear). *** Hermetic, glass to metal case.

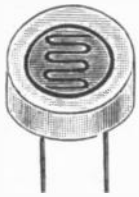
VACTEC Photo Cells

VT100



VT100E

VT200

VT300

● *NEW* CdS AND CdSe VT PHOTOCONDUCTIVE CELLS

Cells ideal for circuit board mounting. Second digit indicates spectral peak 0=CdS5650A, 1=CdS7350A, 2=CdS5150A, 3=CdS5150A, 4=CdSe6750A, example: VT312 is type 1CdSe7350A. All have a maximum voltage of 300 except (*) 200 and (†) 100 (**) in tab head indicates the minimum dark resistance (in ohms) 5 seconds after 2 Ft-C.

PAMOTOR MINIATURE AXIAL FANS

Long life-20,000 + operational hours. Continuous Duty at 45°C without maintenance. Higher air delivery at greater static pressures. All metal construction. Shaded-Pole and Induction type motors. Impedance protected 50-60-400-cycle operation. 3½", 4½" & 5½" models with air-delivery from 50 to 300 CFM. Universal 4⅛" mounting on all 4½" models. Conforms to applicable portions of Mil Specs and U/L standards. One year warranty against defects in workmanship and material.

IMC MAGNETICS CORP.

● NEW IMC MINI BOXER FAN

Model MWS2107F. A New IMC bearing design that assures constant lubricant flow, extra long life, and cool, quiet operation. Provides a low profile cooling, and meets a wide variety of custom cooling and circulating requirements. Only 3⅝" square and 1½" in depth with a unit weight of 1.6 lbs. Mini Boxer Fan can be mounted inside of the unit around utilizing the flanges at either end. No filter or screen kits available. phase, 60 hz. Supplied with mounting kit. See (accessories) for screen and filter kits.

STANDARD BOXER FAN

Standard model delivers 115 cfm free air from any operating position. Only 4 11/16" square and 1½" deep with rugged, all metal frame for greater heat dissipation and longer fan life. Heavy duty terminals, easily accessible with reversible air-flow. Up to 5 years at + 70 F for standard models. Lightweight 1 lb., 8 oz. Shpg. wt. 2 lbs. See (accessories) below for filter and screen kits.

60F1600	WS2107F	14.60	13.20	11.85	10.50	9.80

LOW SPEED BOXER

For many industrial and commrecial applications where low noise operation is essential, such as audio equipment. Free air delivery 66 cfm. Rated for 115 VAC, 1 phase, 50/60 cps. See (accessories) below for filter and screen kits.

60F1625	WS2107-2	15.00	14.10	12.75	11.30	10.55

HI FI BOXER

Model WS2107-9. Very low noise level for hi-fi equipment. Free air delivery 50 cfm; will exhaust avg. enclosure 10-30 times per minute. Metal housing resists breakage and acts as efficient heat sink. Impeller aerodynamically efficient 5-blade design. 115 VAC, 1 phase, 60 hz. Supplied with mounting kit. See (accessories) below for screen and filter kits.

IMCair CENTRIFUGAL BLOWERS — Models B2 and B3

Designed for applications where low air flows are required at relatively high pressures. Compactly designed, metal housings will not distort under heat. Continuous duty operation, single phase shaded pole motor with bearing life of 10,000 hours at 125° F. Size: B2, 7/8" h. x 4¾" w. x 3½" d. B3, 5⅝" h. x 5⅞" w. x 5" d. For operation from 115 volts, 50-60 cycles. Shpg. wt.: B2, 2½ lbs.; B3, 3½ lbs.

Industrial & Special Purpose Tubes

INDUSTRIAL RECEIVING-TYPE PREMIUM TUBES

PREMIUM TUBES. For critical industrial and other equipment requiring exceptional stability of tube characteristics, long tube life, and reliable performance. RCA Premium Tubes, superior to their corresponding commercial prototypes, are subjected to special test and controls on critical characteristics, environmental test (such as shock, fatigue, vibration, altitude) and also to special life test.

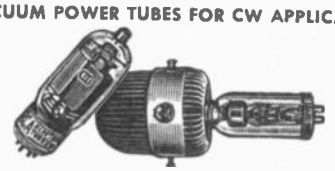
RCA VACUUM POWER TUBES FOR CW APPLICATIONS—TYPICAL CLASS C TELEGRAPHY SERVICE (CCS)



891R

6146A

6161

7650

RCA manufactures one of the world's largest lines of power tubes. The complete line ranges from small, low-power, glass-envelope types to huge, super-power, ceramic-metal types.

RCA CAMERA TUBES

A broad choice of tube design features are available: field or non-field mesh design; glass, thin-film semiconductive, or special long-life targets; precision construction; anti-ghost image section design; microdamp construction; tube size; and matched sets for color pickup.

MAKE NEWARK YOUR DEPENDABLE SOURCE FOR ALL ELECTRONIC COMPONENTS

Whether ordering in quantity for production or in small lots for specialized use, make Newark your headquarters for every electronic component. — Get the exact part you need from an inventory of over 70,000 units! Top Quality, Lowest Prices, Fastest Service.

Industrial & Special Purpose Tubes

NEW LONG-LIFE BIALKALI PHOTOCATHODE IMAGE ORTHICONS

Superior Color — Black & White TV Pickup

- **High sensitivity over the visible spectrum**
- **Electronically conducting glass target**
- **Improved "anti-ghost" image section**
- **Field mesh connection**

Type 8673. High capacitance target assembly and designed specifically for color or black & white telecasting at the light levels available in color TV studios.

Type 8673 (Black & White)..... **1800.00**
Type 8673/S (Color)..... 1915.00

Type 8674. Has higher sensitivity than 8673 and is intended for color and black & white studio or remote TV pickup at light levels available in black and white TV studios.

Type 8674 (Black & White)..... **1800.00**
Type 8674/S (Color)..... 1915.00

NEW RCA 8685 IMAGE ORTHICONS

For Portable, Broadcast, Scientific or Industrial TV Pickup Service

- **2" Diameter—Ideal for compact TV cameras**
- **Bialkali Photocathode—High sensitivity over the entire visible spectrum**
- **Electronically conducting glass target achieves non-sticking pictures and long life**
- **Constant sensitivity and resolution throughout tube life**
- **Separate field mesh connection**
- **Low power "dark-heater" requires only 0.6 watts**

Elimination of infrared response prevents color masking by the infrared—allows gray-scale rendition of colors in realistic tonal gradations. Specifically designed to operate with 16mm film camera optics.

Type 8685..... **1440.00**

3 Major Advantages of RCA BIALKALI PHOTOCATHODE TUBES For Upgrading Systems Capabilities

1. Higher Quantum Efficiency
2. Lower Dark Current
3. Improved Pulse Height Resolution

RCA-8575 Photomultiplier Tube featuring Bialkali Photocathode Construction.

Directly Interchangeable Replacement Types For Most Popular Sizes from ¾" to 5"

New Type	Replaces	Nom. Size	Description	Anode Luminous Sensitivity 2370°K (A/lm)	Anode Dark Current (A)	Q.E.	EACH
4516	RCA-7767	¾"	Head-on type having fast time characteristics. For use in probes, and biological tracer studies.	27	2×10^{-10} @ 7A/lm	22% @ 4000A	165.00
4517	RCA-6199	1½"	Head-on, flat-face types having small size for use in portable scintillation counters.	33	3×10^{-10} @ 7A/lm	22% @ 4000A	79.00
4518	RCA-6342A	2"	Head-on, flat-face types. Especially useful for fast coincidence scintillation counting.	33	3×10^{-10} @ 7A/lm	22% @ 4000A	93.00
4523	RCA-8053	2"	Head-on, flat-face types having venetian-blind dynode structure. For general scintillation counting applications.	27	5×10^{-10} @ 13A/lm	22% @ 4000A	125.00
4524	RCA-8054	3"	Head-on, flat-face types having venetian-blind dynode structure. For general scintillation counting applications.	27	1×10^{-9} @ 13A/lm	22% @ 4000A	145.00
4525	RCA-8055	5"	Head-on, flat-face types having venetian-blind dynode structure. For general scintillation counting applications.	27	1.5×10^{-9} @ 13A/lm	24% @ 4000A	190.00
and the standard of the industry RCA-8575		2"	Head-on type having an in-line electrostatically focused dynode structure, very low noise, and fast time characteristics.	300	1×10^{-9} @ 200A/lm	28% @ 3850A	315.00

VIDICONS

Tube Type	Description	1-4
GL-7038	For film pickup applications . . . monochrome or color . . . a direct replacement for the 6198A	170.00
GL-7038v	For use in Chroma channel of the GE Model PE24 camera.	170.00
GL-7325	High sensitivity for live pickup . . . lower lag at low light . . . ideal for industrial use	170.00
GL-7735A	Highest sensitivity, lowest lag at low light levels . . . for studio or remote pickup	165.00
GL-7735B	Hightest sensitivity, lowest lag at low light levels, for studio or remote pickup, has higher resolution.	170.00
GL-7697	For cameras with automatic sensitivity control . . . similar to 7735A	170.00
GL-7226	Low heater power . . . for transistorized cameras . . . good live pickup	315.00
GL-7262A	Low heater rating of 0.6 watt . . . excellent sensitivity and low lag at low light	215.00
GL-7263A	Specially designed to withstand severe shock, vibration and high humidity	370.00
GL-8484		170.00
GLZ-7911	Designed for televising live scenes in educational, commercial, industrial and closed circuit television applications; high sensitivity and low lag photoconductive surface.	75.00
GL-8507	Separate Field Mesh 7735A	215.00
GL-8541	For transistorized cameras . . . similar to GL-8507 except 0.6 watt rating . .high sensitivity, low lag	310.00
GL-8572	Broadcast film pickup Sep. field mesh of 7038.	215.00
GL-8572v	Luminance Channel GE Camera Model PE240	215.00
GL-8604	Similar to 8572, except low heater power.	310.00
GL-8573	Live industrial—high sensitivity, short length, low heater power. Sep. field mesh.	275.00

Special Purpose & Industrial Tubes

DIODES AND RECTIFIERS

Type	Description	1-4	5-18	19-49	50-99
2-01C	Diode, 5V, .3A Fil. 1kV max. peak inverse v.	18.00	17.01	.....	.....
2-25A	High vacuum diode for high peak inverse voltage rectifier circuits.	27.00	25.52	.....	.....
250R	As above exc. 5V, 10.5A Fil. 60kV max. inv. v. 250 MA avg. 2.5A peak pl. current.	42.00	.....	.....	.....
575A	Half wave mercury-vap. rect. 5V 11.5A fil.	20.15	19.04	.....	.....
673	Half wave mercury-vap. rect. 5V 11.5A fil.	20.15	19.04	.....	.....
869B	Half wave mercury-vap. rect. 5V 21A fil.	138.00	.....	.....	.....
869BL	Half wave mercury-vap. rect. 5V 21A fil.	138.00	.....	.....	.....
6894	Half wave mercury-vap. rect. 5V 11A fil.	25.00	23.63	.....	.....
8020/100R	As 250R exc. 5V, 6.5A Fil. 40kV max. inv. v. 100MA avg. 1.5A peak pl. curr.	26.50	25.04	.....	.....
KY21A	Grid controlled mercury vapor-rect. 2.5V, 10A Fil. 750 MA avg. 3 peak pl. curr.	33.80	31.94	30.42	.....
RX21A	Half-wave mercury vapor-rect. 2.5V, 10A Fil. 750 MA avg. 3A peak pl. curr.	32.80	31.00	.....	.....

TRIODES

2C39A	High mu, ceramic-metal plan. triode 100W pl. diss. 6.3V 1A Fil. 1000V max. pl.	20.75	19.61	18.68	17.64
2C39WA	Suited for use in grid-isolated VHF and UHF circuits.	29.00	27.40	26.10	24.65
3-400Z/8163	Small 0-bias pwr. triode providing 1kW pep as a low distortion class B linear.	34.00	.....	.....	.....
3-1000Z/8164	Larger vers. of 3-400Z. 7 5V 21A Fil. No bias with plate v. below 3000V.	78.00	.....	.....	.....
3CPN10A5/7815	High mu ceramic-metal planar triode for pulse serv. to 3 GC 6V 1A Fil.	30.75	29.06	27.67	26.14
3CX100A5/7289	Improved version of 2C39.	26.50	25.27	.....	.....
3CX2500A3	Ceramic Med.-mu pwr. triode, forced air cooled. 7500W output up to 110MHz with 4000 plate v. 7.5V 54A Fil. 2500W plate diss.	200.00	.....	.....	.....
3CX2500F3	Same as 3CX2500A3 exc. flexible leads to simplify grid & fil. conn. Ceramic type.	205.00	.....	.....	.....
3CX3000A1	Ceramic-metal replacement for discontinued glass metal type 3X3000A1	210.00	.....	.....	.....
3CX3000F1	Ceramic-metal replacement for discontinued glass metal type 3X3000F1	220.00	.....	.....	.....
6C21	Pulse-modulator triode. Radiation and forced air cooled. 8.2V 18A Fils. 30kV max. pl. v. 15A max. pulse pl. curr., 300W pl. diss.	99.00	93.56	89.10	84.15
100TH	High-mu pwr. triode. Full ratings to 40 MHz 5V, 6.3A Fil. 100W plate diss.	28.00	24.57	.....	.....
250TH	High-mu pwr. triode. 1KW in class C with 39W drive. 5V 10.5A Fil. 250W plate diss.	45.00	.....	.....	.....
250TL	Low-mu version of 250TH.	45.00	.....	.....	.....
304TH	Med.-mu pwr. triode. Up to 1200W class C with 53W drive. No forced air below 40 MHz 5 or 10V, 25 or 12.5A. Fil. 3000V max. on pl. 300W pl. diss.	83.00	78.44	74.70	70.55
304TL	Low-mu version of 304TH.	83.00	78.44	74.70	70.55
450TH	High-mu pwr. triode, up to 1800W class C with 46W drive, cooled by pl. radiation and convection. Ratings to 40 MHz 7.5V 12A Fil. 6000V max. on pl. 450W pl. diss.	85.00	.....	.....	.....
450TL	Low-mu version of 450TH.	85.00	.....	.....	.....
592/3-200A3	Med.-mu pwr. triode. Ratings to 150 MHz. Cooled by radiation and forced air. 10V 5A Fil. 3500V max. on plate 200W plate dissipation.	55.00	51.98	.....	.....
750TL	Med.-mu pwr. triode. 7.5V 23A Fil. 10kV max. on plate. 750W plate dissipation.	224.00	.....	.....	.....
25T	Med.-mu triode. Full Ratings 60 MHz 6.3V 3A Fil. 2000V max. pl. v. 25W plate diss.	37.00	34.97	.....	.....
35T	High-mu triode. Full Ratings to 100MHz 5V 4A Fils. 2000 max. pl. v. 35W plate diss.	41.00	38.75	.....	.....
1000T	High-mu pwr. triode. 3000W class C 60W drive. Forced air cooled. 7.5V 16.5A Fil.	172.00	.....	.....	.....
5867A	Pwr. triode, 350 W PL .Diss. 5V. 15A. fil.	30.60	.....	.....	.....
6696A	Hi Pwr. triode,, 60 KW PL. Diss. 13V. 220A fil.	1105.00	.....	.....	.....
7211	Same mech. as 2C39 but 1/3 larger elect. 6.3V 1.3A Fil. 100W pl. diss.	75.00	70.88	67.50	63.75
7289/3CX100A5	Same as 3CX100A5.	30.75	29.06	27.67	26.14
7698	Same as 7211 except has no air cooler on anode.	75.00	70.88	67.50	63.75
7815/3CPN10A5	Same as 3CPN10A5.	30.75	29.06	27.67	26.14

TETRODES & PENTODES

4-65A/8165	Pwr. tetrode. Full Ratings to 150MHz 6V 3.8 Fil. 3kV max. on pl. 65W pl. diss.	27.00	25.65	.....	.....
4-125A/4D21	Rad. beam pwr. tetrode. Ratings to 120 MHz 375W class C with 2.5W drive. 5V 7A Fil. 3000V max. on pl. 125W plate dissipation.	36.00	34.20	32.40	30.60
4-250A/6D22	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 MHz 1kW Class C with 2.5W drive. 5V 14.5A Fil. 4000V max. on pl. 250W pl. diss.	46.50	44.18	41.85	39.53
4-400A/8438	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 MHz 1100W Class C with 6 W drive. 5V 14.5A Fil. 4000 V max. on pl. 400 W pl. diss.	48.00	45.60	.....	.....
4-1000A/8166	Rad. beam pwr. titiode. Forced air cooled. Ratings to 110 MHz 3400W Class C with 15W drive. 7.5V 21A Fil. 6000V max. on pl. 1000W pl. diss.	131.50	.....	.....	.....
4CX250B/7203	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2000V max. on plate. 250W pl. diss.	35.60	33.82	.....	.....
4CX250K/8245	Compact pwr. Tetrode. Coaxial construc. for cavity oper. Forced air cooled. Ratings to 500 MHz. Useful to 1500 MHz 6V 3A Fil. 2kV max. on pl. 250W pl. diss.	64.00	60.80	.....	.....
4CX250R/7580W	Rugged compact pwr. tetrode. Forced air cooled. Ratings to 500 Mc. 6V 3A Fil. 2000V max. on plate. 250W plate dissipation.	44.50	42.85	.....	.....
4CX300A/8167	Pwr. tetrode. Air cooled. 6V 3A Fil. 2500V max. on pl., 300W pl. diss.	54.00	51.03	.....	.....
4CX350A/8321	Like 4CX250B but higher gain and power. Ratings to 500 MHz. Forced air cooled. 6V 3.6A Fil. 2000V max. on plate. 350W pl. diss.	48.50	46.08	.....	.....
4CX350F/8322	Same as 4CX350A/8321 except has 26.5V 800 MA Fil.	51.50	48.67	.....	.....
4CX1000A/8168	Pwr. tetrode. Forced air cooled. Excellent high gain and low distortion Ratings to 110 MHz 6V 10A Fil. 3000V max. on plate. 1000W pl. diss.	181.00	.....	.....	.....
4CX1000K/8352	Ident. to 4CX1000A, but gives better UHF performance to over 400 Mc.	193.00	.....	.....	.....
4CX3000A/8169	Pwr. tetrode. Ratings to 150 MHz 10V 48.5A Fil. 3KW pl. diss.	420.00	.....	.....	.....
4CX5000A/8170	High pwr. tetrode. Forced air cooled. 16KW class C with 150W drive. Ratings to 110 MHz 7.5V 78A Fil. 7500V max. on pl. 5000W pl. diss.	495.00	.....	.....	.....
4CX10000D/8171	Electrically ident. to 4CX5000A/8170, but larger anode radiator to reduce cooling air requir. or permit up to 10KW pl. diss.	575.00	.....	.....	.....
4E27A/5-125B	Pwr. pentode with neutralization requir. simplified or eliminated. Ratings to 75 MHz 375W class C with 2W drive. 5V 7.5A Fil. 4kV max. on pl. 125W pl. diss.	45.00	42.75	.....	.....
4PR60B/8252	Pulse mod. tetrode. Replaces 715C and 5D21. Supersedes 4PR60A. 300KW pulse pwr with less than 1KW drive. 26V 2A Fil. 20kV max. on pl. 60W pl. diss.	107.00	.....	.....	.....
4PR65A/8187	Tetrode for pulse mod., amp., or osc. 6V 3.8A Fil. 15kV max. on pl. 65W pl. diss.	43.00	40.64	.....	.....
4X150A/7034	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2kV max. on pl. 250W pl. diss.	23.15	21.99	.....	.....
4X500A	Pwr. Tetrode for VHF. 500 W. PL. Diss. 5V. 14A. fil.	127.50	.....	.....	.....
7203/4CX250B	Identical to 4CX250B/7203.	35.60	33.82	.....	.....

UHF-TV POWER AMPLIFIER KLYSTRON

4KM70LA	4 cavity, 12.5 KW output, for channels 14 to 36.	5880.00	.....	.....	.....
4KM100LA	4 cavity, 25 KW output, for channels 14 to 36.	9030.00	.....	.....	.....
4KM150LA	4 cavity, 50 KW output, for channels 14 to 36.	11550.00	.....	.....	.....

PENTA LAB

PL-175A

PL-177A

PL-8295/PL172

PL-8432

PL-195

Power tetrodes, except: § power triodes, # high vacuum rectifier, † beam pentodes. Beam pentodes feature patented Penta vane-type suppressor grid—used by leading manufacturers of commercial, military, and Amateur single-sideband equipment.

CATHODE RAY TUBES

Line width measured at the center face by the shrinking raster method at the current or brightness specified. Reference MIL-E-1, Par. 4.12.6.1. The brightness shown for 3" and 5" round tubes is for 2"x2" raster size. Useful scan is limited on this axis to a value less than full screen dimension. All voltages are measured with respect to cathode.

AMGLO INDUSTRIAL FLASHTUBES

U-35-B

ARA-400

H-88.0

HD-2

MT55

ST-25

FLASHTUBES

Flashtubes ideal for aircraft strobe beacons, photographic speedlight, etc. Operating volt: 450-900. Max. Input: 125 joules/ flash. Max. Power: 10 watts. Output: 4500 Lumen sec at 125 joules; 10 joules—1 million lumens.

Stk. No.	Type	Description	1-9	10-49
62F2200	H-88-0	Tube only	9.25	8.35
62F2201	H-88-T	With Trig. Band	9.80	8.80
62F2202	H-88-B4	With 4 Pin Plug In-Base	10.50	9.50

HD SERIES REFLECTIVE BASE FLASHTUBES

Ultra high efficiency, increase in reflector working area. Neoprene mounting. Xenon filled pyrex tube with pyrex cover for up to 100,000 flashes.

Stock No.	Type	Description	Max. Input	1-9	10-49
62F2203	HD-1	U-shaped	50J/ 450V	12.00	10.80
62F2204	HD-2	1-turn Helical	150J/ 450V	13.00	11.70
62F2205	HD-2A	2-turn Helical	200J/ 900V	14.85	13.35

U-35 SERIES STROBOSCOPIC TUBES

Use 1-2 MFD for high flashing rates and 2-4 MFD at rates to 30 per second. Volt 300-600 VDC. Max. Joules Flash — 50 Joules Trigger coil ST-25 Min self-ion. V: 1500

Stk. No.	Type	Description	1-9	10-49
62F2207	U-35-O	Tube only	8.15	7.35
62F2208	U-35-T	With Trig Band	8.70	7.80
62F2209	U-35-B	As above Mounts in 78S6 socket	9.25	8.35
62F2210	U-35-BS	Similar to U-35-B Silver stripe to facilitate trig.	9.75	8.75

ENERGY STORAGE CAPACITORS

CE52545C. 525 MFD. 450 Volt. 53 Joules storage.
62F2215. 1-9 13.00 10-49 11.70

CE10045C. 100 MFD at 450 VDC. 10 Joules storage.
62F2216. 1-9 6.00 10-49 5.40

TRIGGER TRANSFORMERS

Stk. No.	Type	Application	1-9	10-49	50-99
62F2221	ST25	For V-35/H-38 HD Series	2.95	2.65	2.35

POWER SUPPLIES

AC-5000. 0-5000 V adjustable energy storage charging supply. Charge 800 J. in 10.5 sec. Input: 115 VAC.
62F2218. EACH **295.00**

TAC-101. Trig Box. 12000 V output. External trig. & Scope trig. outputs.
62F2219. EACH **49.95**

Aluminum construction 86% reflective efficiency. 4-pin plug-in base (78S4 socker). T in part no. denotes ST-25 trigger coil in bases. Uses H-88 tube. 350-600 VDC. 150 Joules max. input.

FLAT FIELD REFLECTOR ASSEMBLIES

ARA400SD-H88-P4. Flat field Semi-diffused finish for photographic or industrial use Reflector dia: 4-7/32" depth, 3-⅞". Voltage 350-600 VDC. Tube used: H-88.
62F2211. 1-9 ..... **19.00** **10-49** **17.10**

ARA-400-S-H-88-TP4. 4" Reflector with trigger coil & bright fin. for stroboscopic use where "hot spot" is desired.
62F2212. 1-9 ..... **22.50** **10-49** **20.25**

ARA-400-S-H-88-P4. As above without trigger coil.
62F2213. 1-9 ..... **20.00** **10-49** **18.00**

ARA300SD-88-TP4. 3" Reflector with trigger coil. Semi-diffused finish for use as a many wheel balancer type of equipment.
62F2214. 1-9 ..... **20.75** **10-49** **18.67**

National Electronics Special Purpose Tubes

READOUT TUBES

Cold cathode neon glow discharge tubes for in-line display of numbers, letters or symbols. Red-orange neon glow has best readability even under high ambient light. Simplicity, ruggedness and long life for effective display at low cost. No variation in colors or intensity, readout tubes are the only active display that will not fade with age. Manufactured under license from Burroughs Corp.

"Wide-Vue" Panel Meters Simpson

All have self-shielded type movement. DC Ammeters up to 50 amps are self-contained. All meters are accurate ±2% of FS .Model 1227 and model 1257 mount in 2.17" dia. hole. Models 1329, 1349, and 1359 mount in 2.75" dia. holes. Plastic Covers for maximum protection of meter face. Average shpg. wt., 1 lb.

DC GALVANOMETERS

Top-quality Simpson panel meters meet exacting requirements. Models 1227 and 1327 Wide-Vue type with 2.5" and 3.04" scale length respectively and self-shielding type movement. Model 27 has Iron-Vane type external movement. When ordering for use on steel panel, specify panel thickness and add $1.65 for recalibration. Model 27 scale length 1.8". All are accurate within 2% F.S., have rect. faces. Range 50-0-50. Average shipping wt., 1 lb.

Simpson Panel Meters

"WIDE VUE" PANEL INSTRUMENTS

TAUT-BAND "WIDE VUE" DC MICROAMMETERS

These panel meters have 25% fewer parts thus reducing chance of failure; built to conform to Simpson's rigid quality and performance standards. Performance tested for equivalent of 30 years of actual use without a single failure. Higher sensitivity with lower resistance; high accuracy with better repeatability. Accuracy ±2%. Spade pointer with case construction of molded black phenolic base with high temp. black plastic cover. Supplied with mounting and terminal hardware. Shipping weight: 6 oz. (1227 T), 8 oz. (1327 T), 10 oz. (1329 T).

1½" WIDE-VUE PANEL INSTRUMENTS

Simpson's popular Wide-Vue styling is now available in 1½" size in DC, AC rectifier type, and as VU Models 1212 and 1214 have the Simpson self-shielded movement (calibrations not affected by stray magnetic fields). 1212 accurate to 2% of full scale. 1214 accurate to 3% of full scale at 25°C. Both models mount in 1.50" dia. holes. Size: 1.76"x1.76"x1.32". Scale length is 1.5" at 90° Arc (38.1 mm). Standard calibration either magnetic or non-magnetic panel with lance type pointer. Base constructed of molded black phenolic plastic with high temperature cover. All models are supplied complete with the necessary mounting and terminal hardware. 8-32 studs are used for terminals. Average shipping weight, 3½ oz.

EDGEWISE PANEL METERS

Core magnet meter movement. Self shielded. Needs ½ the panel area of usual 2½" meter; yet comparable scale length (1⅞). Complete mtg. hardware. DC acc.: 2% of full scale. Standard scale—Black numbers on a white background. Dustproof, molded lucite case.

Accurate comparative readings by mounting meters side by side. Saves space—makes every square inch count. Quick, simple mounting. Meters are supplied complete with mounting hardware. Terminals: Solder (ammeters, stud). Shpg. wt., 5 ozs.

Simpson Panel Meters

● *NEW* "DESIGNER" SERIES

Model 523

Breaking away from traditional panel-meter styling, these instruments have space-saving rectangular faces. On crowded panels, where height is limited, a clean, crisp, uncluttered design is presented. Rugged, dependable pivot - and - jewel movements provide ± 2% full-scale accuracy. Knife-edge pointers permit extra-precise readings. All models come in molded black phenolic cases with glass windows, and are supplied with all necessary mounting and terminal hardware. Dimensional data: Model 523 (3½" nominal width) requires only 2.438" panel height and occupies 1.811" behind-panel depth; scale length is 62 mm. Model 524 (4½" nom. width) is 2.84" high and 1.811" behind-panel; scale length 90 mm. Shipping wt: 11½ oz. for Model 523, 12 oz. for Model 524.

● *NEW* RUGGED SEAL CONTACTLESS METER RELAYS

- **Single or Dual Control, With "Fail-Safe" Feature**
- **Foolproof Optical Actuation**

For alarm control or limit applications on equipment designed for unattended operation. Intended for applications in which utmost reliability of operation on small differential or small power is desired. Set points are adjusted thru external, front-adjusted gear drive. Set point is indicated by separate lance pointers. Sensing is accomplished thru an infinite life lamp and photoconductors. A solid-state switching circuit and DPDT slave relay are provided (internally) for each control point. Control circuitry is "fail-safe": control relays open in event of power failure. Slave relays will switch 10 amps at 115 VAC (resistive load). Control point adjustment: the single-control model is adjustable over the complete arc; The double-control model has low limit variable from 0-95% while the high limit can be located from 5 to 100% of arc; control points can be adjusted within 5 of each other. Meter indication is continuous unaffected by control point setting; calibration accuracy is ± 2% of full scale. Control point differential: difference between "on" and "off" is within 0.5% FS. DC power for control circuitry is provided by an external power supply furnished with each double control relay; operates from 115 V, 50-500 cycle AC; single control models have self contained power supply. Average shpg. wt., 1 lb.

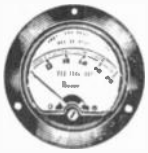
LABORATORY QUALITY "JEWELED BEARING" PANEL METERS

Model 27

Model 29



Model 25

All DC meters have the Simpson self-shielded movement (Calibration not affected by stray magnetic fields or magnetic mounting.) *External Multipliers, Model 183, are furnished on 3½" and 4½" DC meters 1000 volts and higher. All others are self-contained. DC ammeters are self-contained for ranges up to and including 50 amperes. † Higher ranges DC ammeters (50MV) listed are calibrated for 5 ft. leads and require external shunts. Accuracy: ±2% of full scale; Scale Length: Model 25 & 27—2.5" (63.7mm), Model 29—3.9" (99.0mm). Average shpg. wt. 1 lb.

Simpson Panel Meters

LABORATORY QUALITY AC INSTRUMENTS

Manufactured to high standards of accuracy to insure long life and excellent performance. All instruments listed below have moving iron vane type movements —no rectifiers are used. Reasonable accuracy with any waveform; with sinusoidal input the accuracy is guaranteed to ± 3% of full scale. External resistors furnished with meters having a range of 500 volts or higher. All models mount in 2¾" holes. Other dimensions same as DC counterparts. Mounting template and hardware furnished with all meters. Average shipping weight, 1 lb.

SQUARE RUGGED AND SEALED METERS

3½", 4½" Models

Metal cased panel instruments are ideal for use in field test equipment or wherever rigorous environmental conditions are encountered. They are completely sealed, commercially ruggedized, glass window, metal cased and shielded, not affected by steel panel mounting. The movement shielded by steel enclosure will not be affected by magnetic panel materials or stray R F. Accuracy: ±2% F.S. @ 25° and 60 cy. Sine Wave. For durability and long service life the meters are of metal construction Scale Length: Size 3½"=2.9" (74 mm); Size 4½"=3.9" (101 mm); Size 4"x6"=4.7" (120 mm). Average shpg. wt. 1 lb.

RUGGED SEAL SEGMENTAL PANEL METERS

4" x 6" Models

Segmental Voltmeters make it possible to measure very small changes in input conditions. Significant portion of the overall voltage or frequency range is expanded to occupy full scale length. Thus, only that segment of the range that is important appears. AC Segmental Voltmeters are available in either average sensing or true R.M.S. sensing units. When working with sine wave currents or when other measurements will be made with average sensing equipment averages sensing meters are preferred. When working with distorted waveforms true R.M.S. sensing meter would probably be preferred. Average shpg. wt. 1 lb.

WATTMETERS — DYNAMOMETER TYPE

Self contained, dynamometer-type. Measure DC and single-phase AC power to 250 cps. Normally calibrated for non-magnetic panels. Available in magnetic panel calibration. Frequency range of 25-125 cycles. Mount in 2¾" holes. Scale length. 2.3 inches. Accuracy 2% of full scale. Shpg. wt. 1 lb.

3½" ELAPSED TIME PANEL METERS

Widely used by research labs, manufacturing plants, broadcasting stations, etc., to keep life and performance records based on operating time. Meters use self-starting synchronous motors. They indicate up to 99999.9, then recycle and begin again at 00000.0. Model 55-3½" round. Model 57-3½" rectangular. Case depth for all models: 2 9/16".

● NEW MODEL 29 AND MODEL 3324 4½" PYROMETERS & THERMOCOUPLES

Model 29

Model 3324

Simpson now presents two versions: Standard bakelite Model 29 and Model 3324 Rugged Seal for extreme conditions. Models compensated for ambient temperature changes and include copper circuit compensation. Also calibrated for use with iron constantan thermocouples. Pyrometers of —150 to +250°F (—100 to +120°C) are calibrated for 5 ohm thermocouple resistance. All other units are calibrated for 10 ohm thermocouple resistance. Furnished with an external adjustable series resistor to permit use of lower resistance thermocouples in the field. Shpg. wt.: ½ lb.

● NEW THERMOCOUPLES

All thermocouples are iron-constantan, calibrated to 5 or 10 ohms, ±1% per table.

TYPES 21221 and 21224. Iron constantan thermocouple wire in stainless steel overbraid for rugged service application where flexing or abrasion could cause deterioration of standard units. **TYPES 21222 and 21223.** Glass cloth overbraid. Suited for most general purpose use or for permanent mounting in protected sheaths or conduit. Shipping weight: ¼ lb.

Stock No.	Mfr. No.	Resistance	1-9	10-24	25-49	50-up

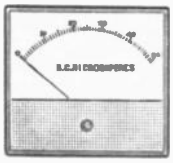
NEWARK provides the customer with ten great stocking warehouses to serve America's industrial electronics needs.

Panel Meters



G SERIES PANEL INSTRUMENTS

Three sizes; 2½", 3½", and 4¼" models with black molded plastic cases and clear molded plastic fronts. An all new meter design that features flexibility and interchangeability, with optional mounting bezel for behind panel mounting. Self shielded, exact, reliable—DC instruments have the famous Triplett BAR-RING movements—more torque, faster response, greater ruggedness. Provides a dominant scale with plenty of dial area for multiple scales. DC Scale lengths: 4½ in., 4.035", 3½ in., 3.163", 2½ in., 2.536". AC Scale lengths: 4½ in., 3.43", 3½ in., 2.688", 2½ in., 2.155".

TRIPLETT

G/P SERIES PORTABLE INSTRUMENT FOR SCHOOL OR LAB

• Diodes protect against instantaneous overloads on DC movements.
Now you can make all types of electrical measurements right in your own lab or shop set-up with these new economically priced portable instruments. ±2% accuracy on DC and AC Iron Vane Type. ±3% accuracy on AC Rectifier Type and Ohms.

• Bar-Ring construction in DC movements assures self-shielding.
Five-way binding posts. Knife-edge pointers. Rugged case and movement construction safeguards against rough handling. Overload protection of all models guards against electrical damage from misuse. Case dim. 4¼"x3⅞"x4¼".

T AND S PANEL METERS

Ideal for communications equipment and industry. All feature polished jewel bearings. DC meters are of the D'Arsonval type, with exclusive Bar-Ring self-shielded construction and one piece die-cast frame. AC instruments are of the moving van type, and have a light moving system. Long life under adverse conditions. Meters are accurate within ±2%.

CONTROL DESCRIPTIONS

ON-OFF CONTROLS

Models 503-KH (Single set point) and 503-KD (Double set point). Compacks packaged complete with power supply, control circuitry and load relays coupled to an Optical Meter Relay. Screw type terminal connections are at rear of meter barrel. (ill.) All circuit components wired fail safe below set point on KH and between set points on KD. Units easily converted from automatic on-off control to push button reset latching circuit. SPDT relay contacts-load rating: 5 A. resistive at 115 VAC. Dial arc: 4". *Taut Band movement.

‡ AC Load Compack Meter range is 47 Ma AC, matching secondary of current transformers (below). Dial reads 0-150% Load. Operates with any transformer listed. Use to monitor or control by measuring motor lead. Be sure to order appropriate transformer for each unit. Above 50 Amps. two transformers are required; the full load range plus a 5 amp. unit (55F4622) to step down between the large transformer and the meter. Wt. 2 lbs.

ON-OFF TEMPERATURE CONTROL

Models 603-KH (single set point) and 603-KD (double set point). Same circuit description as 503-KH & KD with addition of electrical cold junction compensation, automatic thermocouple break protection & copper error correction. Medium resistance thermocouple actuated pyrometers. Taut Band. Damped against vibration. Dual Fahrenheit-Centigrade mirrored scales. Dial arc 5". Adjustable for thermocouples 0-10 ohms. For control or alarm applications. Wt. 2 lbs.

TIME PROPORTIONING-TEMPERATURE CONTROL

Model 603-KTP. Compensation and Thermocouple break protection same as 603-KH & KD but control circuit provides proportional control from relay output. Ratio of relay on time to "off" time proportional to deviation from set point. PR Band approx. 3%. Time cycle settable to 5, 10, or 15 seconds. Capable of straight line control better than ±1 degree F. Taut Band, damped against vibration. Wt. 2 lbs.

SUPER CALIBRATED TAUT BAND PANEL METERS

This listing offers the largest available selection of Taut Band meters in two different calibration types: 0.5% Tracking and 1% Accuracy. Choice of 4½ in. or 5½ in size. All have high sensitivity self shielding bar ring movements, Taut Band suspension, frictionless design allows near perfect repeatability. Easily converted from front panel mount to recessed Stylist mount with bezel kit

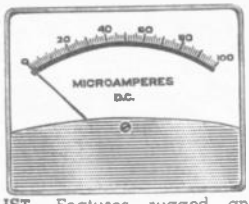
TRACKING VS ACCURACY

Most electronic meter applications require better tracking (electrical linearity) instead of full scale accuracy. Tracking is a meter's ability to divide a full scale indication. Example. a 100 micro-amp. 1% tracking meter with a 100 division scale. Used in a VTVM may require 102 micro-amps to indicate full scale. Exactly ½ that full scale indication (51 micro-amps) should put the pointer at 50 divisions ±1 and 25.5 micro-amps at 25 division ±1. Tracking is more important in any application where zero or full scale indication is electrically set; tachometers pH meters, thermistor bridge temp. meters, etc. Meters with good full scale accuracy are used for absolute measurements like volts, amps, thermocouple temp. readings, etc. 502-1 & 602-1¼ 1% accuracy. 602-11. 0.5% tracking. 2% accuracy. All have mirrored scales and knife edge pointers.

METER DIMENSIONS

Model	Height	Width	Barrel Dia.	Barrel Depth
502	4.15	4.60	2.79"	1.85"
602	4.25"	5.62	2.79"	1.85"
503	4.27"	4.71"	2.79"	1.86"
603	4.36"	5.75"	2.79"	1.86

STYLIST. Crisp clean lines for easier readings. Panel hides bottom third of meter, increasing dial area.



PANELIST. Features rugged anti-static plastic case. Standard meter dimensions.

STYLIST BEZEL KITS

With addition of bezels, Panelist Models 502 and 602 become respectively, Stylist Models 1502 and 1602.

Panel Cutout: 1502 (4.81x2.78") 1602 (5.86x3.14")

MOD METER

1% tracking movements in all DC ranges. 2% on AC. Scales slide quickly into a sealed capsule which accurately positions scale and seals the movement from contamination. Makes possible a drastic reduction in meter inventory. Use multiplier resistors, current shunts, or transformers to produce an infinite number of voltmeters and ammeters from just 3 or 4 Mod-Meters. Each meter has a built-in mirror plate for use with slotted scales. 47 maAC meter requires use of AC trans. on facing page.

Detailed lettering instructions are enclosed. Meters supplied with 100 division blank scales and will operate with any of scales listed. A lettering kit below allows production of finished scales in 10 minutes. Rugged taut band construction. Black phenolic cases.

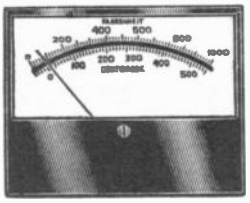
API

MODEL 503 PYROMETER 2% ACCURACY



Thermocouple pyrometers are medium resistance, have automatic bi-metal cold junction correction and copper error compensation. External resistor adjusts for varying thermocouple resistance up to 10 ohms. Mirror scale reading in Fahrenheit and Centigrade. I/C is Iron Constantan; Cu/c—Copper Constantan; C/A—Chromel alumel. Knife edge pointers. Dial arc is 4". Phenolic case. See table for dimensions. Shpg. wt.: 1 lb.

MODEL D-1 PORTABLE PYROMETER

Pocket size thermocouple actuated pyrometers designed for checking laboratory ovens, oil baths, appliances, refrigerators, air conditioners, solder pots, furnaces, etc. Features Taut Band frictionless meter, highy resistant to shock. Mirrored dial reads in F° and C°. Movements have bi-metal cold junction correction and copper error compensation. Tough vinyl covered case has aluminum trim (5½x3¾"). Supplied complete with plastic handled chromel constantin needle probe, 3 ft. leads. Shpg. wt.: 1 lb.

MODEL B PYROMETER

Ideal unit for checking temperature of solder pots, furnaces, ovens, ranges, refrigerators and other appliance! Meter has rugged taut band movement. Dials calibrated in both Fahrenheit and Centigrade. Sealed phenolic case, mirrored 5" dial with knife pointer, glass window. Complete with wood grain case, 5' thermocouple, 8½x6½; wt. 3 lbs.
Thermocouples: Iron Constantan (I/C), Chromel-Constantan (CR/C), and Chromel Alumel (C/A).

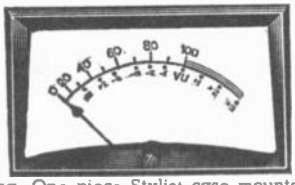
STYLIST VU METERS



Model 361 and Model 561. VU Meters, for measuring amplitude of audio signals. Two scales, **Type A** scale; for recording uses. **Type B** scale emphasizing percent modulation for broadcasting. One piece Stylist case mounts thru rectangular panel cutout. Illuminated from behind thru a lucite window at top of case. 6 volt illumination bracket is included. Conforms to ASA C16.5-1954 specs.

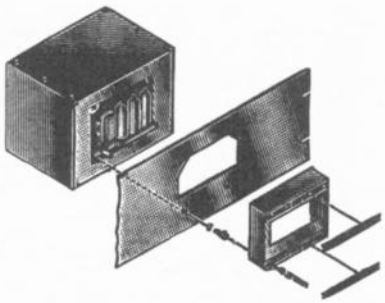
WESTON

● *NEW* MODEL 1270 DIGITAL PANEL METER



"all electronic" digital panel meter designed to provide the user with the accuracy of digital presentation and the reliability to solid state circuitry. Meter has simplicity of panel meter with inherent advantages of digital devices. Versatility permits it to be easily adapted for most applications and will provide an up-dating of existing panels. Provides linearity, stability, and easy readability. Instrument is a general purpose, 3-digit Nixie device suitable for various current and voltage measurements; can also be used with a variety of transducers. Slope adjustment—transforms input signal into direct engineering unit terms. Range may be adjusted up to 50%. High pulse print command is produced. Remote command—may be achieved by contact closure or application of a 5 volt pulse. Output is compatible with industrial RTL micrologic or its equal. The A/D conversion may be adjusted over a maximum range of ± 8 counts around a nominal 999 counts for a 1 VDC input. Standard display is 2 readings/second with optional 10 readings/second. Sample rate is 14 times/second. Input: power—120 VAC, 60 hz. Output— print command—1.5 VDC pulse; 1-2-4-8 BCD code. Power drain—12 watt overall.
Accuracy —0.1% ±1 digit. Resolution —1 part in 1000 (100uv on 100 MV range) Rejection—Common Mode 100 db; Series Mode 35 db @ 60 hz. Stability—0.05%. Calibration—Venier range adjustment from front of panel. Dim.—Front: 3 5/16"H x 4⅛"W x 1⅛"T; Back: 4 3/16"H x 6¼"W x 4⅛"T. Approx. shpg. wt. 2 lbs. Available after 10/15.

Weston Panel Meters

PIVOT-JEWEL PANEL INSTRUMENTS 1900 SERIES

The 1900 Series is an integrated line of a-c and d-c panel instruments, providing selected sizes, scales, and ranges. All instruments are provided with zero correctors. Clear plastic fronts. Specially treated Alnico 5 magnets provide long term reliability and stability. Spring back jewels with locking nuts for fine adjustment. 3½" size has scale length (100° arc) of 2.7". 4½" size has scale length (100° arc) of 3.9". Lance pointers on all models except 1946, which has knife-edge pointer. 2% accuracy with plain scales and lance pointers or 1% accuracy with mirrored scales and knife-edge-pointers.

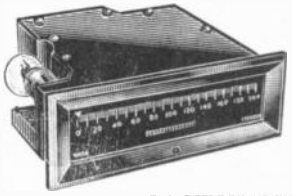
Weston Meters & Accessories



SERIES 1201 EDGEWISE PROJECTED MOVING POINTER PANEL METERS

A true flat scale edgewise instrument at a price comparable to mechanical pointer types. Since the pointer is projected on the same plane as the scale divisions, parallax errors are eliminated. All-glass optical system. Self-shielding CORMAG movement—these units can be mounted side-by-side with no loss of accuracy, are unaffected by panel material, normal magnetic fields. With lamp (5V, 2.86A AC/DC req.); bulb life 10,000 hrs. Choice of horizontal or vertical mounting. All units white markings on black background, ±1% full-scale accuracy, except *±2%. Scale length 4½". Wt. 1 lb.

WESTON SERIES 1209 PROJECTED MOVING SCALE PANEL METERS

- Large Scale in a Small Package
- Self-Shielded "Cormag" Movement
- 1% Accuracy
- Eliminates Parallax Errors
- Self-Illuminated

This moving-scale instrument provides an 8" meter scale in only 2½ inches of panel width. Simple, foolproof optical system projects moving scale onto a coated window. Because the hairline is on the same plane as the scale image, these meters may be read at oblique angles without parallax errors associated with pointer-type meters. With standard #44 pilot lamp (requires 6-8 volts AC/DC, .25 amp). Lamps are easily replaced from front of panel. All units feature ± 1% accuracy and employ Weston "Cormag" self-shielded movements. Scales have 100 divisions, choice of white markings on black background or black on white. Solder terminals. HxWxD: 3x2⅜x4²⁷⁄₆₄".

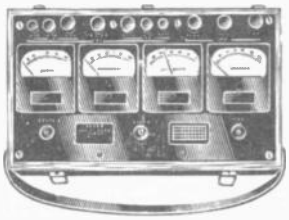
Weston Test Instruments

PORTABLES & MULTIMETERS

● *NEW* AC INDUSTRIAL ANALYZER



Model 639-9900002. An accurate self-contained power analyzer for those engaged in general industrial testing and installation work. Measures AC current & voltage in single or polyphase circuits. Uses 4"x 4½" instruments: Voltmeter, ammeter, power factor meter, and wattmeter. Ammeter has adjustable pointer stop for measuring instantaneous current surges. Ranges: 600/300/150 V, 125/25/5 amps., 100/50/25/20/10/5/4/2/1 kw. Power factor: .30 lag through unity to .80 lead. Freq: 25-125 hz. Size: 18⅞"x10⅞"x6⅞". Shpg. wt. 32 lbs.

62F1475. NET. **920.25**

● *NEW* INDUSTRIAL CIRCUIT TESTER

Model 785-9900008. Multipurpose industrial analyzer with 28 ranges. Current and potential leads connected simultaneously. DC sensitivity: 20,000 ohms/volts. AC sensitivity: 1000 ohms/volt. DC accuracy: ±2%. AC accuracy: ±3%. Binding post available at 100 millivolts. Ranges: DC V: 1/10/50/200/500/K; AC V: 5/15/30/150/300/750; DC amps: 50 micro, 1/10/100 milli, 1/10; AC amps: .5/1/5/10; Ohms: 3k/30k/300k/3M/30M-full scale, 25/250/2.5k/25k/250/-center scale. In polished wood carrying case. Size: 13"x12½"x5½". Shpg. wt. 13½ lbs.

62F1476. NET. **217.25**

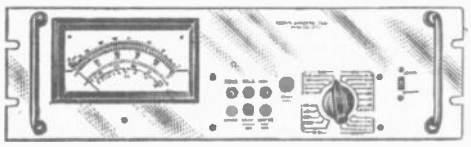
● *NEW* INSULATION TESTER

Model 799-9900001. Self-contained tester for measurements up to 10,000 megohms at low voltage with a maximum test potential of 50 volts DC. A shield connection and lead are provided to eliminate error due to leakage currents. Supplied with three test leads with insulated clips, tube, and batteries. Comes with a handsome polished wood carrying case, instructions, and carrying strap. Range: 0-10,000 megohms (logrithmic scale). Size: 3⅜"x5¼"x5". Shpg. wt. 3.8 lbs.

62F1477. NET. **116.25**

MODEL 80 SERIES MULTI-RANGE ANALYZERS

Model 81



Model 80-R

Model 80

The first multimeter design in years incorporating features wanted by the man on the bench. Extremely easy to read, these units offer maximum operating convenience, ruggedness, and unusually high accuracy (1% on most ranges). Portable types have panel and scale slanted at an ideal viewing angle. All types have 5½" meters with a unique refractive anti-parallax face. With fuse and diode overload protection, polarity reversing switch. Model 80 types supplied with test leads. Model 81 and 82 types less leads, with 5-way binding post terminals spaced to accept standard double banana plugs. Model 80-R is for standard 19"x5¼" rack mounting; portable models measure 8¹⁄₁₆"x6⅝"x7⅜". Approx. wt., 3 lbs.

MODEL 80-R RACK MOUNTING VOM

Non-custom made rack mounting 1% VOM. Ranges: DC volts, 5KV/1KV/250/100/50/25/10/2.5/1/.25 (at 20K ohms/volt); AC volts, 5KV/1KV/500/250/50/10/2.5 (at 5000 ohms/volt; DC current, 10/1 amps/100/10/1 ma/50 ua; ohms. 5 ranges from 2K to 20 megohms; DB scale, —10 to +10 DB .1% accuracy on ohms and DC scales; AC scales, 1.5%; 1 & 5KV scales, 2% DC and 2.5% AC.

62F1092. Type 80-9008002. **NET** **94.50**

MODEL 80 VOM

Identical electrically to Model 80-R, but for portable or bench service.

62F1085. Type 80-9008001. **NET** **89.50**

MODEL 81 DC VOLTMETER

Ranges: 1000/250/100/50/25/10/5/2.5/1/.25 at 20,000 ohms/volt. Accuracy is ± 1% (except ± 2% on 1000 volt range).

62F1086. Type 81-9008102. **NET** **73.25**

MODEL 81 DC MILLIAMMETER/AMMETER

Ranges: 10/3/1 amps/300/100/30/10 ma (10 ma range has 50 mv drop for use with external shunts). Accuracy is ± 1%

62F1087. Type 81-9008101. **NET** **73.25**

MODEL 81 DC MICROAMMETER/MILLIMETER

Ranges: 100/30/10/3/1/.3/.1 Ma. Accurracy is 1% on all ranges.

62F1088. Type 81-90081003. **NET** **73.25**

MODEL 82 AC VOLTMETER

Ranges 1000/500/250/50/10/2.5 volts at 5000 ohms/volts. Overall accuracy is 1.5%; use of film resistors and selected germanium diodes results in temperature and frequency error less than 1% for a change of 10°C, and frequencies from 25-2000 hz. Ranges below 250V are usable to 15 khz.

62F1089. Type 82-9008201. **NET** **76.50**

MODEL 82 AC MILLAMMETER/AMMETER

Ranges: 5/2/1 amperes/500/200/100/50 ma. Transformer-rectifier circuit causes losses less than 1.5 va for 5 amp range at 60 hz Accuracy: 2%, 60-400 hz 1.5% from 25-100 hz usable to 5 khz.

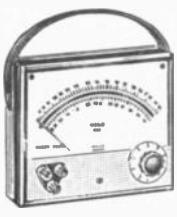
62F1090. Type 82-9008202. **NET** **76.50**

MODEL 9959 CARRYING CASE

Leather carrying case with handle, for portable Models 80, 81 and 82.

62F1091. Type PN250753. **NET** **10.50**

PORTABLE/PANEL MULTI-RANGE INSTRUMENTS



Models 911 & 912. Features CORMAG self-shielding mechanism, with spring back jewels. Large, easy to read 7.2" mirroback scale with maximum natural illumination. Employs long-life components, including precision metal film resistors. Accuracy: ±1% of full scale on DC Voltmeters (±2% of FS on 300 and 1000 volts DC) ±2% of full scale value on rectifier type AC voltmeters (±3% on 1000 volt range). Heavy duty, grey finished steel case. Front-clear plastic. 7½x6½x2⅜".

Model 911 DC Voltmeter. Range: 1/3/10/30/100/300/1000 V @ 20,000 ohms/V.
62F1229. NET. **73.25**

Model 911 DC Ammeter. 1/3/10 amps, 10/30/100/300 milliamps.
62F1230. NET. **73.25**

Model 911 DC Milliammeter. .1/ 3/1/3/10/30/100 milliamps.
62F1231. NET. **73.25**

Model 912 AC Voltmeter. Range: 3/10/30/100/300/1000 V @ 5000 ohms/V.
62F1232. NET. **84.00**

Model 912 AC Rectifier Ammeter. Range 5/2/1/0.5/0.2/0.1/0.05 amps.
62F1225. NET. **84.00**

POCKET CLAMP AC VOLT-AMMETER

Model 749. Measures AC current and voltage without breaking circuit. Accommodates conductors up to 1" round or 1¾x⅜" rectangular. Features: core magnet shock mounted mechanism with spring back jewels, large smooth action trigger; shatterproof wraparound plastic window; bright red pointer for easy reading; positive action range selector switch. AC Voltage ranges 0-150, 300, and 600; Current ranges, 0-6, 15, 30, 60, 150 and 300 amperes. Fully insulated for 750 V service. Bakelite case. With carrying case, voltage test leads with insulated battery clips. Shpg. wt., 2½ lbs.

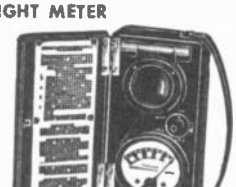
LIGHT METER



Model 614 Foot-Candle Meter. For measurements requiring a wide range of light values. Any type of commercial lighting can be measured directly with this compact Foot-Candle Meter. The photo-electric (Phottronic) cell is mounted on a hinge, so that it will pick up measurements from a wall or ceiling without unnecessary moving of the meter. Three ranges: 0 to 100 —0 to 250 and 0 to 500 foot candles each with a separate scale. With Viscor and cosine correction filters. Entirely self-contained in a sturdy bakelite case. Size: 7x3⅜x2½". Shpg. wt. 2 lbs.

62F474. NET **175.50**

MODEL 1092 SENSITROL RELAY

Operates on low input. Can be set close to any DC value from 0-50 micro-amps at drop of 0-100 millivolts. Can be connected to make on either increasing or decreasing current-zero right to left. Handles 100 milliamps at 120 VAC or DC w/o chatter. Once set, will repeat within narrow limits (±0.2 microamps attainable). 3½" rd. flush case—1½" D. Weight, 3 ozs.

• *NEW* FAIRCHILD MODEL 7050 3½ DIGIT DIGITAL MULTIMETER

- Meosures Volts ond Ohms
- Six Somples per Second
- Integroted Circuit Reliobility
- Optionol DC Current Meosurement
- Automotic Polority Adjustment
- 0.1% Accurocy
- Disploy Storoge
- Infinite Disploy Time

The latest design concepts are incorporated in this accurate, compact instrument, ideal for production, quality control, servicing and educational applications. Use of integrated circuits results in exceptionally low cost and high dependability. Rugged and easy to operate: overload protection (1000V may be applied to any voltage range without damage) and automatic polarity switching permit use by students or untrained personnel. Measures DC volts and ohms; optional external shunts provide DC current ranges. Dual slope integrating technique combines the noise rejection capabilities of integration with the accuracy and stability of automatic comparison to an internal standard; 6 sample/second measurement speed assures fast response time. Readout: three digits and one over-range digit (equivalent to 50% over-ranging with no degradation of accuracy), plus decimal point and polarity indicators. Other features include input impedance greater than 1000 megohms on most sensitive range, floating input which may be operated 500V above ground, readout storage (non-blinking display) and remote controlled infinite display time. DC Voltage ranges: 0-1.5 (1 mv resolution) at 1000 megohms min. input impedance, 0-1S, 0-150, 0-1000V at 10 megohms; accuracy ±0.1% of reading, ±1 digit. Resistance ranges: 0-1.5K (1 ohm resolution), 0-15K, 0-1S0K, 0-1.5 megs, 0-15 megs. Size 3¼ x 6¼ x 7¼"; shpg. wt., 4 lbs. requires 115 VAC, 50-400 hz, 7 watts.

SIMPSON CHART RECORDING INSTRUMENTS

• *NEW* 603 SERIES SINGLE RANGE CHART RECORDERS

• Portable or Rack Mount **• High Speed 3-12-24-36 IPH**

Accurate, compact, and extremely easy to operate, these units use 3" wide pressure sensitive chart paper for trouble-free inkless recording. Meter scale permits use as indicating instrument when not recording. Movement is shockproof annular type with taut-band suspension moving-coil system. The movement is self-shielding to eliminate the effects of stray magnetic fields. Chart speed selector enables the operator to choose one of four paper speeds (3, 12, 24, and 36 inches per hour) while the recorder is in operation; it is not necessary to shut down or disassemble the unit to change speeds. Cycle indicator device permits use as an event recorder. Self-starting synchronous motor for chart drive. DC indication accuracy is ±1.5%, recording accuracy ±2.5% full scale. AC types have ±3% FS indication and ±4% recording accuracy; frequency response flat ±2% from 50 to 20,000 hz. Color-coded power and test leads cannot be plugged into the wrong socket. Unbreakable polycarbonate case measures 7½ x 4$\frac{9}{16}$ x 2$\frac{25}{32}$". Unit is suitable for portable use, or may be rack mounted (necessary hardware supplied). Wt., 2½ lbs.

604 "MULTICORDER" RECORDING MULTIMETER

• 22 Ranges—AC and DC **• Inkless Recording** **• Three Chart Speeds**

Accurately measures and permanently records a wide range of voltage and current values. The ideal instrument for university and industrial research labs, and other situations where permanent records of varied measurements are needed. Inkless recording using fast sequential impressions on pressure-sensitive paper — no pen-and-ink maintenance problems. Three chart speeds: 1"/3"/12" per hr.; impressions made every 2 sec. High torque, shock-proof taut-band meter movement. Ranges: DC volts: 0-.1, .5, 2.5, 10, 25, 100, 250, 500, at 20,000 ohms/v. AC volts; 0-10, 25, 100, 250, 500 at 5000 ohms/v. DC microamperes 0-50, 250; DC ma: 0-1, 5, 25; DC amps: 0-1, .25, 1.0. AC current: 0-2 ma. Chart drive: self-starting synchronous motor. operates from 115 VAC 60 cps. Chart paper width, 2.3". Unique marking system indicates range in use, avoids confusion. Accuracy of recording: ±2.5% F.S. AC response flat from 15-10,000 cps. Temp. deviation: 1% of reading per 10°C., max. Size: 9¾x4¾x4:. Complete with No. 7500 test leads and two rolls of chart paper. Wt. 5½ lbs.

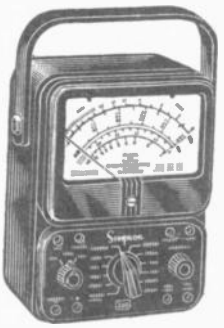
Simpson 260 Series VOMs

260 VOM SERIES 5



- New Ruggedness From Spring Back Jewels
- Greater Repeatability
- Diode Overload Protection
- Higher Accuracy ±2% DC ±3% AC
- Input Protected With an Internal 1 Amp Fuse

Simpson 260. Volt-Ohm-Milliammeter. Handier, more sensitive, more accurate Polarity Reversing Switch for faster, easier DC measurements. Full-Wave Bridge Rectifier System gives more accurate VAC measurements. Easy access to all components. Ranges—VDC (20,000 ohms-per-volt); 0-250 MV, 0-2-5 V, 0-10V 0-50V, 0-250V, 0-1000V, 0-5000V, VAC (5000 ohms-per-volt): 0-2 5V, 0-10V, 0-50V, 0-50V, 0-250V, 0-1000V, 0-5000V; VAF (0.1 uf internal series capacitor): 0-2.5V, 0-10V, 0-50V, 0-250V; DB Vol. (0 DB to 1 MW across 600-ohm line): —20 to +10DB, —8 to +22DB, +6 to 36DB, 20 to 50DB; 600-ohm line): —20 to 10DB, —8 to 22DB, 6 to +36DB, +20 to +50DB; DC Resistance: 0-2000 ohms (12 ohms center), 0-2000,000 ohms (1200 ohms center); Direct Current: 0-50 μa, 0-1 MA, 0-10 MA 0-100 MA 0-500 MA, 0-10 amp Size: 5"x7"x3⅛". 3½ lbs. with Leads.
62F300. NET **58.00**

62F305. 260 Series 5M. As above but mirror scale. **NET** **60.00**

ROLL-TOP SIMPSON 260 RT

Lightweight carry-anywhere unit, same as Model 260 above, but has bakelite roll-top cover and convenient test-lead compartment. Shipping weight, 9 lbs. Note: "Add-A-Tester" adapters (listed below) cannot be used with the roll top model.
62F303. NET **64.00**

See Simpson accessory listing for cases and test leads for above units

OVERLOAD PROTECTED 260-5P

A virtually "goof-proof" overload protected version of the world famous 260 VOM. The 260-5P incorporates electronic circuit protection which senses overload conditions and trips a protective relay. The entire tester is protected — even when 110 volts is applied to the 1 milliamp or 50 milliamps range, no damage is caused. No chance of "fooling" this protection, either as with some other "burnout proof" V O M.'s It can't be reset — even momentarily — until the overload has been removed. A "must" for labs, schools, shops or wherever mortality rate of V.O.M.'s is apt to be high Complete with test leads and operator's manual Size: 5¼ x 7 x 3⅛. Wt. 9½ lbs.
62F1191. NET **88.00**

270-3 INCREASED ACCURACY VOM

- Taut-band Movement
- Knife-edge Pointer
- Temperature Compensated
- Mirror Scale

30-range multi-scale instrument. Includes all of the excellent features of the world-famous 260, plus a mirrored scale; knife-edge pointer; and printed circuit. It offers dependability and repeatability, ruggedness, and the higher accuracy necessary for many production and laboratory applications. The instrument has an easy-to-read 4½" meter at top of front panel. 3 operating controls and 8 circuit jacks are located directly below the meter. 7 DC voltage ranges (at 20,000 ohms per volt) are: 0-250 MV, 2.5V, 10V, 50V, 250V, 1000V, and 5000V. 6 AC ranges (at 5,000 ohms per volt) include: 0-2.5V, 0-10V, 0-50V; 0-250V, 0 1000V, and 0-5000V. 4 AF output voltages with 0.1μf internal series capacitor are 0-2.5V, 0-10V, 0-50V, 0-250V. Three resistanceranges: 0-2000 ohms center), 0-200,000 ohms (1200 ohms center), and 0-20 megohms (120,000 ohms center. 4 volume levels include —20 to +10 db., —8 to +22 db., +6 to +36 db., and +20 to +50 db. Variable resistance to ohmmeter circuit is used to compensate for aging of internal batteries. Heavy bakelite case is black with reinforced walls for maximum durability. Entire instrument slips inand out of case in one piece. Size: 5¼x7x3⅛". Shpg. wt., 4.2 lbs.
62F380. NET **70.00**

Model 261. Same as 270. but with pivot-and-jewel movement.
62F309. NET **68.00**

270-3RT ROLL TOP VOM

Same as Model 270 above. but has safety bakelite roll top case.
62F381. NET **76.00**

250 LOW MILLIVOLT DROP VOM

- **FITS 260 LINE ADAPTERS AND ACCESSORIES**
- **TAUT-BAND MOVEMENT**

Perfect VOM for transistor circuitry. Model 250 contains all of the built-in features of Simpson's well-known model 260. and includes low millivolt drop on current ranges. Has provision for using the entire line of "add-a-tester" aadpters, high voltage probes, and other 260 series accessories. Ranges: DC volts: 0-50, 0-2050 mv; 0-2.5, 10, 250, 500, 1000 volts at 20K-ohms/v.; AC volts 0-2.5, 10- 50, 250, 500, 1000 volts at 5,000 ohms/v. DC microamperes: 0-50 (with both 50 and 250 mv drop); DC ma: 0-1, 10, 100, 500 (50 mv drop); DC amps; 0-10 (50 mv drop). AC volts: 0-2.5, 10, 50, 250, 500, 1000; DB (1 mw into 600 ohms ref. level): —20 to +10; —8 +50. Resistance: 0-2K, 200K. 20 meg-:o +22; +6 to +36; +20 to ohms. Self-shielding, diode-protected, taut-band movement. Complete with test leads and operator's manual. Size: 5¼x7x3⅛". Wt. 3½ lbs.

SIMPSON 160 "HANDI-VOM"

This compact version of the world-famous 260 gives you the ranges, conveniences, and sensitivity of a full-sized VOM in a palm-sized package. Self-shielded taut-band movement assures high accuracy and freedom from influence of external magnetic fields. Recessed range switch never gets in the way. With diode overload protection, and polarity reversing switch — may be safely operated by inexperienced personnel or students. Low DC voltage ranges make this tester ideal for solid state R&D and troubleshooting. Ranges: DCV: 0-1¼, 1, 2.5, 10, 50, 250, 500, 1000 at 20,000 ohms per volt; ACV: 0-2.5, 10, 50, 250 500, 1000 at 5000 ohms/V; DC microamps: 0-50; DC ma: 0-1, 10, 100, 500; DB: —20 to +10, —8 to +22, +6 to +36, +20 to +50 ("O" reference: 1 mw into 600 ohms); resistance: x1, x10, x100, x1000, x10K (30 ohms center-scale). Accuracy: ±3% FS on DC ranges, ±4% on AC. AC frequency response is flat within +1 DB 30-1 mhz on the 2.5 and 10V ranges, to 150 khz on the 50V range, and to 50 khz on the 250V range. Size, only 4⁹⁄₁₆ x 3⁵⁄₁₆ x 1¾; wt., 12 oz. With leads.

MICRO-TESTERS

"MIDGETESTER" VOLT-OHMMETER

Model 355. VOM, ideal for radio, appliance and TV servicemen. Sensitivity 10,000 ohms per volt on both AC/DC. Accuracy 3% on DC, 5% on AC of full scale voltages. Ranges: AC/DC volts 0-3, 12, 60, 300, 1200; Ohms 0-10K, 100K, 1 meg, 10 meg. Compactness and sensitivity made possible by 100-micro-amp self-shielded core meter movement. Sturdy, polished styrene case. Size 2¾x4½x1". Complete with set of probe leads and instruction manual. Shpg. wt., 1 lb.

Model 240-3

Model 362

Model 387

240-3 COMPACT AC-DC VOM

Designed for radio testing. Sensitivity 1000 ohms-per-volt on AC and DC Ranges: DCV, 0-15-150-300-750-3000; ACV, 0-15-150-750-3000; ma, 0-15-150-750; ohms 0-3000 (center scale 30), 0-300,000 (center scale 3,000). Accuracies: DC volts +3% F.S.; AC volts ±5% F.S.; DC Resistance ±3% of arc from absolute value of resistance measured. Complete with testleads and operator's manual. Black bakelite case. 3x5⅞x2½". Shpg. wt., 3 lbs.

62F313. NET **40.00**

370 AC AMMETER

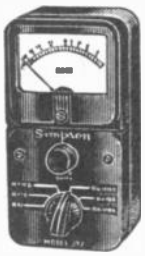
Built-in current transformer. Measures current drain of appliances, motors, heating elements, radios. etc. Ranges: 0-1-2.5-5-10-25 amperes. Bakelite case, 3x5⅞x2½". 60 Hertz application. Less leads. Wt. 3 lbs.

62F319. NET **35.00**

372 WIDE-RANGE OHMMETER

0.2 ohm—50 megohms. Ohms adjuster compensates for battery variation. 85 micro-amp. sensitivity. Range: 0-500-5000-50,000-500,000 oms & 0-5-50 megaohms. 3x5⅞x2½". Batteries & leads. 3 lbs.

62F318. NET **35.00**



Model 372

373 PORTABLE DC MILLIAMMETER

General purpose tester. Valuable in many applications such as plate and screen grid measurements on vacuum tubes. Accuracy ±3% of full scale. Provides DC current measurements from 1 to 1,000 MA Ranges: 0-1, 5, 10, 25, 50. 100, 250, 1000 milli-amperes, 3x5⅞x2½". Shpg. wt. 3 lbs.

62F323. NET **35.00**

390 AC VOLT-AMP-WATTMETER

For measuring AC/DC volts, AC amps, and AC watts with one meter. Built for continuous full-load operation. Tests power consumption on all types of appliances. Ranges: 0-150-300 ACV; 0-3-15 amps.;0-300-600-1500-3000 W. 60 Hz operation, 3" meter. 3x5⅞x2½". With plugs and leads. Wt., 4 lbs.

62F317. NET **60.00**

Model 390

374 DC MICROAMMETER

Basic movement sensitivity 50 microamperes with self contained shunts for all other ranges. Can be used with external resistors or multipliers as a high sensitivity voltmeter at 20,000 ohms per volt. Can be shorted out of circuit by use of "short" selector knob. 0-50, 100, 250, 500, 1000 μa. 3x5⅞x2½". Shpg. wt., 3 lbs.

62F361. NET **35.00**

362 LOW OHMMETER

Two ranges. Very accurate readings from 0.1 to 25 ohms. Ideal to check motor armatures and fields; switch and relay contact resistances; shorts between generator windings and grounds; shorts in TV and radio chassis wiring; industrial electrical equipment. Accuracy ±3% full scale. Complete with test leads. Shpg. wt., 3 lbs.

62F368. NET **35.00**

378 AC MILLIAMMETER

(Self-contained current transformer.) Five separate ranges make it suitable for a wide variety of testing; 0-5, 25, 100, 250, 1000 ma. 3x5⅞x2½". Shpg. wt.. 3 lbs.

62F365. NET **35.00**

379 BATTERY TESTER

Provides accurate indications of the condition of all standard flashlight; Transistor-Radio andl Hearing Aid batteries. With leads. 3x5⅞x2½". Shpg. wt. 3 lbs.

62F366. NET **35.00**

APPLIANCE TESTER
387 DC MILLIVOLTMETER

Checks safety thermocouples on gas-fired units—Furnaces — Boilers—Heaters—Hot Water Heaters'—Dryers—Refrigerators. Gas unit servicing faster, accurate, simply place the probe across the thermocouple terminals and test for the correct value. Ranges are 10, 30, 100, 300 and 1000 millivolts. Accuracy 3% fullscale from 50° to 120° F. 3x5⅞x2½". With leads and operator's manual. Shpg. wt., 3 lbs.

62F367. NET **35.00**

371 AC VOLTMETER

Designed primarily for testing voltages applied to motors, heating equipment and many other industrial applications. Accuracy: ±3% of full scale. 0-150, 0-300, 0-600 volts. Size: 3x5⅞x2½". Shpg. wt., 3 lbs.

62F360. NET **35.00**

375 DC AMMETER

Provides a complete range from a fraction of an amp to 2.5 amps without the necessity of using auxiliary external shunts. 0-1, 2.5, 5, 10, 25 amps. 3x5⅞x2½". Wt., 3 lbs.

VACUUM TUBE VOLTMETERS

312 EXTRA HIGH IMPEDANCE WIDE SCALE VTVM

- **16 Megohm Input Impedance**
- **500 mv Solid-State Test Range**
- **Easy-to-Read Seven Inch Scale**

The input resistance of this instrument is 16 megohms, not 11 megs as in most other VT-VM's. 40% higher input impedance means 40% less circuit loading and correspondingly greater accuracy in readings. Extra-large, easy to read seven-inch scale. Has 500 mv scale to meet today's solid state testing requirements. Specially designed circuit protects the meter against burnout. Voltage ranges: DC 0-500 mv, 0-1.5, 5, 15, 50, 150, 500, 1500 volts at 16 megohms input resistance. AC RMS: 0-1.5, 5, 15, 50, 150, 500, 1500 volts at 1 meg minimum input impedance; peak-to-peak; 0-4, 14, 40, 140, 400, 1400, 4000 volts. Resistance ranges R x 1 x 10 x 100, x 1K, x 10K, x 100K, x 1 meg, 10 ohms center scale. Accuracies are ±3% of full-scale value on all voltage ranges, ±3% of arc on resistance. Frequency response is flat ±3% from 51 cps to 3 megacycles on AC voltage ranges through 150 volts; with special RF probe, range can be extended to 250 mc. Operates from 105/125 VAC, 50/60 cycles. Modern smartly designed case measures 7¾ x 6¾ x 3¾". Comes complete with No. 0150 AC/ohms/DC probe and operator's manual. Wt. 4¾ lbs.

62F1688. NET **90.00**

311 VACUUM TUBE VOLT-OHMMETER

Multirange all purpose VTVM. Accessory RF probe extends range to 100 mhz. High voltage breakdown exceeds 2000 volts. ACCURACY: VDC ±3% of full scale; VAC ±5% of full scale; DC Resistance ±3% of linear arc. RANGES: VDC and VAC 0-1.5, 5, 15, 50, 150, 500, 1500 volt. AF Voltage: 0-1.5, 5, 15, 50, 150, 500, 1500. RF Voltage (with probe): 0-1.5, 5, 15, 50, 150 (50 cps to 100 MC.) Peak-to-Peak voltage: 0-4, 14, 40, 140, 400, 1400, 4000; resistance: 7 ranges. Complete with No. 7594 AC/DC/Ohms probe, No. 0733 ground lead and operator's manual. Size: (HWD) 7½"x5⅝"x4½". Shpg. Wt. 6 lbs.

62F375. NET **85.00**

715 HIGH SENSITIVITY AC VTVM

Sensitivity: 10 millivolts full scale on lowest range. Input impedance: Minimum of one megohm at 1 KC. Frequency response: flat within one decibel between 10 cps and 400 KC. Meter scale provides DB markings on both the voltage range positions. AC rms volts 0-0.1, 0.03, 0.1, 0.3, 1.0, 3.0, 10, 30, 100 and 300. Decibels total range, —52 to +52 DBM (at Zero DBM reading is one millivolt across 600 ohms). Scale reads —12 DB to +2 DB. Accuracy on all ranges: ±5% of full scale. Unit requires 110-125 VAC, 50-60 cycles. 7½"W x 5½"H x 3"D. Gray hammertone finish. Complete with operator's manual, and shielded input cable. Shpg. Wt. 3 lbs.

62F1182. NET **75.00**

303 VACUUM TUBE VOLT-OHMMETER

10 megohm input imp. on DC. Zero-center scale for FM discriminator adjustment. AC & DCV: 0-1200, in 5 ranges, AF volts 0-1.2-12-60, flat to 100 khz, resistance to 1000 megs, in 5 ranges; DB —20 to +63, 5 ranges. 4½" meter. Polarity switch. With all necessary probes and manual. For 105-125 VAC. 7x5¼x3⅛", 6½ lbs.

62F304. NET **90.00**

303 RT. As above, in roll top case.

OSCILLOSCOPES AND CAPACITOR CHECKER

466 5" PORTABLE OSCILLOSCOPE

A small, handy scope designed to take on practically any radio-TV service job. Vertical amplifier. ±1 db 15c to 100kc, 6 db down at 250 kc, usable to 1 mc. Maximum vertical deflec. sensitivity: 30 mv/inch. Sweep range 15c to 80 kc. Maximum input voltage 400 v peak. Calibrating voltage (at 117.5 VAC source voltage) 1 v. peak-to-peak, ±10%. Horizontal amplifier has flat response within ±1 db, 15c to 20 kc; down 6 db at 100 kc. Maximum horizontal deflection sensitivity is 0.7 volt/inch. Sensitivity with Z-axis (intensity) modulation. 20 volts rms extinguishes beam. Input resistance (with attenuator set at x1) 0.1 megohm (with attenuator at x100) 0.5 megohm input capacitance, 40 mmf. Operates from 117 VAC 50/60 cycle, 50 watts. Supplied complete with input cable No. 0100 and operator's instruction manual. Unit weighs 19 lbs., shpg. wt. 40 lbs. Size: 7⅞"x12"x16⅛".

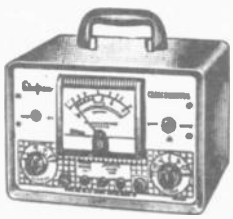
62F347. NET **180.00**

458 7" COLORSCOPE

- **Response Flat ‡ db to 4.5 MHz**
- **Better than 40mv/in Vertical Sensitivity**

Specially designed for color TV trouble shooting. Frequency response is flat within ±1 db to 4.5 mhz under wideband operation; color burst frequencies are faithfully displayed with greater than 40 mv (rms)/inch vertical sensitivity. On narrow band operation; response is flat within ±2 db, 10 to 300,000 hz, sensitivity greater than 15 mv/inch. Has horizontal sweep to 250 khz, and 1v p-p calibrating voltage. Seven-inch CRT is a boon for the myopic. With vernier and compensated decimal step attenuator; provision is made for Z-axis modulation. 105/125 VAC, 50/60 cycle. Size, 11x16½x14½"; wt., 29 lbs., shpg. wt. 38 lbs. Complete with operator's manual.

62F339. NET **390.00**



383A "CAPACOHMETER" CAPACITOR CHECKER

- **In-Circuit check, under load conditions**
- **Pulse technique detects marginal units**

In-circuit capacitor leakage tester utilizes a pulse technique to detect many "marginal" capacitors. Measures the leakage resistance of defective paper, micra or ceramic capacitors; indicates directly the capacitance of good ones over a range of 10.0 mf to 10.0 mf. All measurements are made under load conditions. Avoid tedious adjustment of bridge circuitry and balancing controls. Borderline capacitors which cause costly "callbacks" are detected immediately with the pulse test. Operates from 105/125 VAC, 50-60 cycle. Comes complete with test leads. Shpg. wt. 12 lbs.

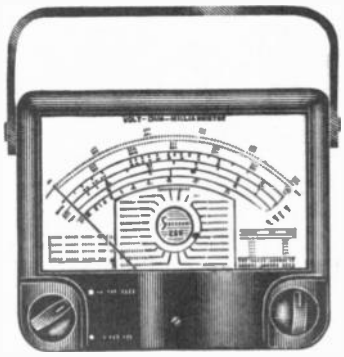
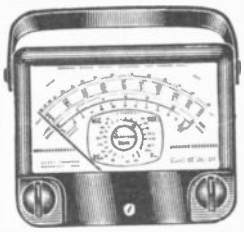
263 DUAL SENSITIVITY 7" VOM

- **20,000 or 10,000 ohms/V DC**
- **10,000 or 5000 ohms/V AC**
- **±1½% Accuracy on DC ranges**
- **Diode Overload Protection**



Dual sensitivity Volt-Ohm-Milliammeter with accuracies of ±1.5% DC and ±3% AC full-scale. Overlapping ranges offer greater accuracy expressed as a percentage of reading. Diode overload protection prevents movement burnout on overloads as great as 200,000%; fuse provides additional input protection. Uses 1½-volt alkaline battery to insure greater stability on low ohms scale. External battery compartment makes battery replacement easier. Measures DC volts 0-.15/ 75/3/7.5/30/75/300/750/3000 at 20K Ω/V, 0-.3/1.5/6/15/60/150/600/1500/6000 at 10K Ω/V; AC volts 0-2.5/7.5 30/150/750 Ω at 10K V, 0-5/15/60/300/1500 at 5K Ω/V; DC μa 0-75 at 150 mv drop, 0-150 at 300 mv; DCMA 0-.75/7.5/75/750 at 150 mv, 0-1.5/15/150 at 300 mv; DC amps 0-7.5 and 0-1.5/15; resistance 0-50 megohms in 6 ranges; DB —20 to +75½ in 10 ranges. Accuracies: ±1.5% on DC current and voltage to 1500V (2.5% on high voltage scales) and ±3% on AC; resistance ±3° of arc on xl scale, ±2.5° of arc on higher scales. Scale length 6.2 inches; knife-edge pointer. Size, 6 x 7¼ x 3". Complete with No. 0115 test leads and operator's manual. Wt. 4 lbs.
62F1193. NET. 88.00

269-2 100,000 OHMS/V VOM



Improved high-impedance VOM incorporates self-shielded meter movement with spring-backed jewels, eliminating shock and vibration damage. Measures 0-4000 VDC in 8 ranges (100KΩ/V) 0-800 VAC in 6 ranges (5KΩ/V), DC μa 0-160, DC MA 0-160, DC amps 0-8, DB —12 to +45½, resistance 0-200 megs in 6 ranges (12 ohms center-scale for better coverage). Accuracy ±2%, except ±3% on AC and high DC volts ranges, and ±2½° of arc on resistance (±3° on low ohms). External battery compartment makes battery replacement easier. Input protected by an internal 1.5 amp fuse. Scale length 6.2 inches. Size, 6 x 7¼ x 3", wt , 4 lbs. Comes complete with No. 0115 test leads, 4000V probe extension and operators manual.

62F330. NET. 90.00

267 & 268 7-INCH VOMs

Model 267. General-purpose large scale volt-ohm-milliammeter. Internal 1 amp fuse protects input. Measures 0-1000 VDC (20KΩ/v) in 7 ranges, 0-1000 VAC (5KΩ/V) in 6 ranges, 0-50 μa (mu), 0-120 ma (3 ranges), and 0-12 amps DC. Also has four DB scales covering —12 to +50, and three resistance ranges to 20 megohms (12 ohms center-scale). Accuracy ±3% on DC scales, except 2% on microamperes, and ±5% AC. Resistance accuracy ±3° on Rxl scale, ±2½° on higher ranges. Comes complete with No. 7500 test leads (alligator clips) and operator's manual. Size 6 x 7¼ x 3", net wt., 4 lbs.
62F395. NET. 65.00

Model 268. Same features as Model 267 above, but with slightly different coverage: DCV 0-1200 (6 ranges), ACV 0-1200 (6 ranges), DCμa (mu) 0-60, DCma 0-120)3 ranges), DCA 0-12, DB —12 to +50. Resistance scales same as 267.
62F394. NET. 65.00

TEMPERATURE METERS

388-3L THERM-O-METER

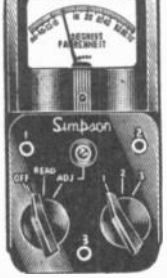
The Therm-o-meter measures the temperature of air, gases, liquids, or solids by means of thermocouple type leads from —50°F to +100°F. Both Fahrenheit & Centigrade readings can be made in 15 to 30 sec. and up to a distance of 7½". A selector switch on the 388-3L connects any one of the three leads into the meter circuit. The lead wires are small enough to pass through a closed door and gasketing. The meter movement is self-shielding. A compensator circuit automatically corrects room temperature effects from 60 to 100° F. With one general purpose lead, battery, and operator's manual. 7 15/16x6x2 15/16". Shipping weight. 4 lbs.
62F350. NET 75.00

DUAL RANGE THERM-O-METER

Model 389-3L may be used to measure temperatures of gases, liquids, or solids in many fields; frozen food packaging, ice manufacturing, freezer storage, refrigeration, photo processing, air conditioning, and numerous others. Using the three leads, readings may be made in three different locations at once. There are two ranges. A low from —50°F. and a high from 100°F to 250°F. Accuracy is within 3°F in any position, near center of scale within 2°F or better. Compensation for room temperature effects. Large easy to read 7" meter. Self shielded core magnet, minimizes heavy electrical interference. Includes sensing probes with thermistors, tip and 15' lead, and batteries. Black bakelite case. 7 15/16x6x2 15/16". Wt., 6 lbs.
62F391. NET 70.00

385-3L TEMPERATURE METER

- **Temperature Checks from —50° to +70°F**
- **Light Weight, Portable**
- **Takes Three Separate Inputs**



Simpson 385-3L is ideal for those fast, accurate temperature checks from —50°F to +70°F. Light weight, portable, fits easily in your hand. Three lead model. Takes temperature readings in three different locations with a simple flick of the selector knob. Standard Model has Fahrenheit scale. Supplied with one No. 0010, 15 ft. thermistor lead and operator's manual. Size: 3" x 5⅞" x 2½". Wt., 1½ lbs.
62F1195. Type 385-3L. NET 40.00

255 VOM WITH TEMPERATURE SCALE

Ideal for heating and utility servicemen. This tester includes the VOM functions of the popular model 260, as well as providing a temperature measurement range of +100 to +1050°F. Has low millivolt drop on the DC ranges; ideal for checking transistorized equipment. DC ranges: 0-50, 0-250 millivolts; 0-2.5, 0-10, 0-50, 0-250, 0-1000 volts; 0-50 microamperes (with both 50 and 250 mv drop); 0-1, 0-10, 0-100, 0-500 MA with 50 mv drop. AC ranges: voltage: 0-2.5, 0-10, 0-50, 0-250, 0-1000; amps: adapter available to read to 500 amps. Resistance ranges: 0-2K, 0-200, 0-20 megohms. Diode-protected taut-band movement. Complete with test leads, 5 ft. thermocouple lead and operator's manual. Size: 5¼ x 7 x 3⅛"; wt. 3½ lbs.

RCA TEST EQUIPMENT

POWER LINE MONITOR

- **Invaluable to repair and laboratory shops, where the current of power line must be known at all times.**

Model WV-120A. The RCA Power Line Monitor is designed for use by radio-TV repair shops, laboratories, and industries where it is important to know the power line voltage at all times. Used in conjunction with the RCA WP-25A Isotop isolation transformer on a 50-60 cycle power line, the WV-120A is a valuable aid in selecting line voltages for such applications as TV servicing, test instrument calibration, and the operation of electronic equipment that requires a known line voltage supply. Size: $3\frac{13}{16}$x5x$3\frac{1}{16}$". Ship. Wt. 2½ lbs.
62F058. Model WV-120A. **NET** **16.50**

COLOR-BAR/DOT-CROSSHATCH GENERATOR

Model WR-64B. Produces time-tested color bar signals needed for adjusting and troubleshooting color TV circuits as well as dot and crosshatch patterns for adjusting convergence in color receivers, and for adjusting linearity and overscan in both color and black and white receivers. Crystal-controlled RF Oscillator for stable picture carrier. Crystal-controlled synchronizing pulses. Crystal-controlled sound carrier for accurate adjustment of receiver fine tuning. Fixed number of dots and lines for ease in checking overscan. PATTERN control (Color-Bar/Dot/Crosshatch). CHROMA control to check receiver color sync-lock action. FUNCTION control with OFF—STANDBY—PATTERN—PATTERN + SOUND positions. Convenient panel switches for shorting out the red, blue, or green guns of the color picture tube. Complete with RF output cable, cable-carrying bracket attachment, three leads for connection to red, blue, and green grid connections, and instruction booklet. Width 13½", height 10", depth 8", weight 13¼ lbs.

62F085. Model WR-64B. Factory wired and tested. **NET** **189.50**

CRYSTAL-CALIBRATED MARKER GENERATOR

Model WR-99A. Supplies a fundamental frequency RF carrier of crystal accuracy for use in aligning and trouble-shooting TV (color and black and white) and FM receivers and other electronic equipment operating in the range of 19 to 260 MHz in 8 bands on fundamental frequencies. Built-in crystal calibrator, heterodyne detector, amplifier and speaker provides calibrating beates at 1 MHz or 10 MHz intervals throughout entire tuning range which is covered by 8 bands. A built-in 4.5 Mc crystal provides necessary accuracy for alignment of intercarrier-if amplifier and discriminators. At least 0.1 volt output VFO ranges; 0.05 volt crystal frequencies, into a termination of 90 ohms. Provides signals for adjusting vertical or horizontal linearity. Precision matched impedance/resistance pad attentuator, 0-60 dB in 5 db steps. Special modulation input available for re-transmission Provision for use as Heterodyne Frequency Meter. Provides dual markers 4.5 MHz apart for bandwidth checks and RF alignment. Triple markers for sound-if alignment and bandwidth checks. Adjustable dial pointer for accurate registration with crystal-calibration check points. Wt. 21 lbs.

62F054. Model WR-99A. Factory wired and tested. **NET** **256.50**

TELEVISION/FM SWEEP GENERATOR

Model WR-69A. For visual alignment of both TV and FM receivers. Has preset switch positions for all VHF TV channels, the FM broadcast band, and TV video, chrominance, and IF frequencies. VHF output is on fundamental frequencies only; no beat notes or harmonics are used. Exceptionally good linearity is provided by a precision vibrator capacitor. Continuously adjustable sweep width and flat output make for accurate sweep response displays. Special sample-voltage terminal on panel permits use with marker-adder units in alignment. Dual-piston attentuator provides smooth even attentuation over 60 dB range for TV and FM channels and 70 dB range for IF and video. IF/Video output frequency continuously tunable from 50 KHz to 50MHz in 6 ranges. Sweep-frequency bandwidth continuously adjustable from 50 KHz to 20 MHz on IF/Video and FM; 12 MHz max. on TV channels. Return trace blanking. Two continuously adjustable bias voltages, 0 to —12 volts, available on front panel. Width 13⅜", height 10", depth 7", weight 16 lbs.

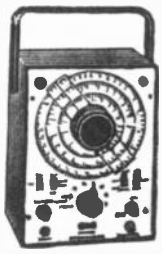
62F071. Model WR-69A. Factory wired and tested. **NET** **295.00**

RF/IF/VF MARKER ADDER

Model WR-70A. For RF, IF, and video sweep alignment of both color and black and white TV receivers. Provides sharp, easy-to-read markers for alignment. A choice of four different marker shapes is available, permitting use of marker type best suited to the response curve. Designed for use with conventional marker and sweep generators and the WR-59 and WR-69 series TV sweep generators. Marker signal is added to the sweep-response curve after the sweep signal is taken out of the receiver under test. Eliminates or reduces distortion of sweep curve by the marker. Permits trap alignment without marker "suckout." Hi-Q markers — high in amplitude, narrow in width. Power supply voltage stabilized for rock-steady trace display. Wt. 11 lbs.

62F072. Model WR-70A. Factory wired and tested. **NET** **87.00**

RF SIGNAL GENERATOR WITH SWEEP FEATURES

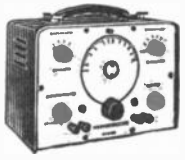


Model WR-50B. Designed for maintenance, troubleshooting and instructional purposes. Provides an accurate source of CW or amplitude-modulated signals from 85 KHz to 40 MHz. Suited for aligning and signal tracing AM, FM, Hi-Fi and Citizens' Band and amateur radio receivers. A 400-cycle output provides a practical means for checking audio amplifier circuits. Built-in crystal calibrating oscillator circuit with front panel crystal socket. Permanently attached shielded RF output cable. Built-in DC blocking capacitors. Two-step RF attenuator switch plus a continuously variable attenuator control. Vernier tuning. Sweep output is provided at 455 KHz and 10.7 MHz for sweep alignment both AM and FM IF circuits. A return-trace blanking circuit is included to provide a zero reference line. Width 5⅜", height 7¾", depth 4¾", weight 5 lbs.

62F086. Model WR-50B. Factory wired and tested. **NET** **65.00**

62F089. Model WR-50B(K). As above KIT FORM. **NET** **45.00**

AUDIO SIGNAL GENERATOR SINE/SQUARE WAVE OUTPUT



Model WA-44C. For measurement of frequency response characteristics of audio amplifiers, and testing of loudspeakers and enclosures or finding impedance of LC combinations. Switch selection for sine-wave or squarewave output. Simple one-scale dial. Separate 60 cps line frequency output for intermodulation distortion measurements. Wide frequency range, 20 Hz to 200,000 cps. Less than ½ of 1% distortion over the audio-frequency range. Operated from a 50/60 cycle, 105-125 volt source; covers in four bands a range from 20 Hz to 200,000 Hz. The circuit of the sine-wave function consists of a "Bridged-T" oscillator with a cathode follower output stage. The square-wave output is developed by using the sine-wave oscillator output to drive a clipping and shaping circuit. Produces a stable signal with an amplitude variation of not more than ±1.5 dB. Total harmonic distortion is limited to 0.5% over the range of 30 Hz to 15 KHz. Width 10¹¹⁄₁₆" height 7", depth 6⅛", weight 10½ lbs.

62F013. Model WA-44C. NET **98.50**

COLOR PICTURE TUBE TESTER

Model WT-115A. Designed specifically for testing TV color picture tubes, tests each gun for emission quality interelectrode leakage, and shorts. Readily portable large, 3-color, sensitive meter with two scales: Red/green "quality" scale, with reference marks from 0 to 10, separate yellow scale to indicate interelectrode leakage. Sensitive meter and cut-off adjustment control for evaluating the true emission of each gun. Neon shorts indicator. AC line-voltage adjustment for accurate measurements. Test procedure includes 2-minute and 4-minute tests for determining warm-up performance of tube. Tests color picture tube in-set or out-of-set. Built-in cable and socket assembly. Wt. 8 lbs.

62F1780. Model WT-115A. NET **89.50**

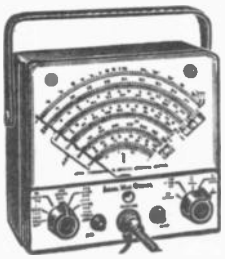
STEREO FM SIGNAL SIMULATOR

Model WR-52A. Designed to generate signals required for service, alignment, and maintenance of mono and stereo FM receivers and multiplex adaptors. Provides the following signals: Composite stereo output for either right or left channel; FM stereo output for either channel (100 MHz FM carrier is adjustable to permit selection of a quiet point in the FM band, RF deviation is adjustable 0-75 KHz; Monaural FM output (a switch is provided to disable the 19 KHz oscillator for low-distortion mono output); 100 MHz sweep output to check receiver RF/IF alignment (sweep rate is 60 Hz, sweep width is adjustable 0-750+KHz; Audio signals of 400 Hz, 1 and 5 KHz. Crystal-controlled 19 KHz and 38 KHz signals for multiplex circuit adjustments; 67 and 72 KHz output signals for SCA trap circuit adjustments; special internal test signal to check phase adjustment of stereo signal. Direct unterminated cable is used with composite stereo and audio signal outputs, and a terminated cable for RF output to 75 or 300 ohm antenna input. Complete with connecting cables. Size 13½x10x8"; shpg. wt., 21 lbs.

62F1785. NET **284.00**

RCA Test Equipment

SENIOR VOLTOHMYST



Model WV-98C. Provides direct reading of peak-to-peak voltages of complex waveforms found in video, sync, and deflection circuits. Measures 0.2 to 4200 volts in 7 overlapping ranges, RMS values of sine waves from 0.1 — 1500 VDC, 0.2 Ω to 1000M Ω Input resistance: 11 megohms. Freq. response: 30Hz to 250 MHz with WG-301A Crystal Diode Accessory probe — +1 dB to 30 Hz to 3 MHz (1.5 and 5 VAC ranges). Electronic protection against burnout. Size: 7 x 6½ x 3¾". Shpg. wt. 8 lbs.

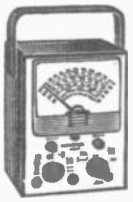
VOLTOHMYST



Model WV-77E. Flat frequency response ±5% from 40 Hz to 5MHz on the 1.5, 5 and 15 volt RMS ranges and the 4, 14, and 40 volt peak-to-peak ranges. Measures DC from 0.02 volt to 1500 volts, RMS AC from 0.1 volt to 15,000 volts, and resistance from 0.2 ohm to 1000 megohms—all in seven overlapping ranges. Full-scale accuracy is ±3% on DC and ±5% on AC. Fuse in ohms circuit prevents burnout. Ultra-slim probes and extra-flexible cables are included. Instruction sheet is provided.
62F075. Model WV-77E. **NET.** **52.00**
62F076. Model WV-77E(K). As above, kit. **NET.** **38.00**

SUPER PORTABLE OSCILLOSCOPE

Model WO-33A. This 3" Oscilloscope is the "all purpose" scope. All bandwidth you need for servicing color TV, video broadcast monitors and cameras; and for square-wave testing of audio and ultrasonic equipment. All the gain you need for low-level audio work. With vertical amplifier in narrow-band position. Sensitivity is 3 RMS millivolts/inch; bandwidth within —3dB, 20 Hz to 150 KHz. Wide band position: sensitivity 100 rms millivolts/inch; bandwidth within —3dB. 5.5 Hz to 5.5 MHz. Sweep circuit: sawtooth range from 15 Hz to 75Hz sync; external, ± internal; line sweep —160° adjustable phase; sync range to 4.5 MHz. Size: 6½x8¾x10¼". Shipping wt. 16 lbs.

62F048. Model WO-33A(K). **NET.** **99.00**

AC VACUUM-TUBE VOLTMETER

Model WV-76A. A high-sensitivity ACVTVM for hi-fi and other audio applications. Designed for measuring AC voltages from 0.0002 volt to 500 volts over the frequency range of 10 Hz to 1.5 MHz. Offers nine overlapping AC voltage ranges from 10 millivolts to 100 volts full scale. Provides approximately 38 dB gain throughout the frequency range from 10 Hz to 500 KHz with probe in "Low-Cap" position and 10 Hz to 1.5 Hz with probe in "Direct" position. Probe and cables are supplied in "Direct" position probe measures up to 100 volts; in "Low-Cap" position, probe can be used to measure up to 500 volts or +56 dB. Size: 5⅜x7⅜x4¾". Ship. wt. 6 lbs.
62F088. Model WV-76A. **NET.** **79.95**

VOLT-OHM MILLIAMMETER

Model WV-38A. Extra large 5¼" meter. Protected meter movement. Has an input resistance of 20,000 Ω/V on DC; 5,000 Ω/V on AC; ±3% of full scale on DC, ±5% of full scale AC. Regular scales: 2.5, 10, 50, 250, 1000, 5000 VAC/VDC; 50 μ amp, 1, 10, 100, 500 mA, 10 amp (DC); plus extra scales of 250 mV and 1 volt DC. Resistance ranges 0-20 meg Ω in 3 ranges. Size: 5"x6⅞x3⅛". Ship. wt., 4 lbs.
62F052. Model WV-38A. **NET.** **52.00**
62F051. Model WV-38A(K). As above, kit. **NET.** **38.00**

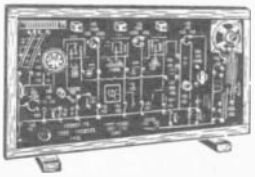
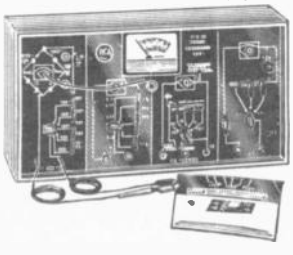
TRANSISTOR RADIO DYNAMIC DEMONSTRATOR KITS



- **Special silver-plated spring connectors provide mechanical and electrical connection . . . assure easy component installation.**
- **Inherent operational simplicity assures ease of service checks and tests . . . exceptionally easy component substitution.**

The RCA WE-93A (K) and WE-92A (K) are AM superheterodyne transistor radio receivers converted into kit form for educational and instructional purposes. Once assembled they become actual operating AM receivers. Designed to provide the student with easy-to-follow, step-by-step instruction, the RCA Transistor Radio Dynamic Demonstrators are extremely easy to assemble. No previous kit assembly experience is required. The circuit diagram is drawn in an easily understood manner. The wiring diagram on the reverse side helps avoid mistakes. Ship. wt. 22 lbs.
62F1782. Model WE-93A (K). 12 x 24". **NET.** **39.95**
62F1783. Model WE-92A (K). 24 x 48". **NET.** **69.50**



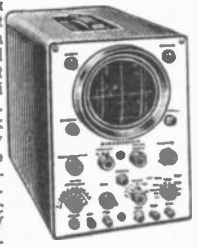
V-O-M DYNAMIC DEMONSTRATION KIT

Model WE-95A (K). A dynamic aid for teaching the principles of meter and metering circuits an actual test instrument that can be used to test and service. Size: 12x 24x5¾". Shpg. wt. 10 lbs.
62F1781. Model WE-95A (K). **NET.** **37.95**

Newark-Houston Electronic Corp., 6902 Harwin Drive, Houston, Texas 77036

5" OSCILLOSCOPE

- **Flat response from 10 cps to 4.5 Mc**
- **Adjustable sweep oscillator has excellent linearity**

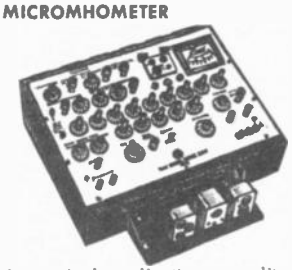


Model WO-91B. The RCA WO-91B is a reliable, heavy duty, precision instrument especially suited for use in production and servicing both black and white and color TV receivers, monitors, broadcast equipment, TV distribution systems, hi-fi systems and communications equipment. A multi-scale graph screen makes peak to peak voltage measurements as easy as with a VTVM. Applications include waveforms analysis, square wave testing, and observation of circuit and vacuum tube characteristics. A 2-stage sync separator makes it easy to check TV horizontal and vertical sweep synchronization. Complete with WG-300B Direct/Low cap. probe and cable, ground cable, alligator clip, clip insulator, green-graph screen, instruction book. Size: 9x13½x16½". Ship. wt., 35 lbs.

62F058. NET **269.00**

ELECTRON-TUBE MICROMHOMETER

- **Measures transconductance up to 100,000 micromhos in six ranges.**
- **Meter completely burnout proof.**

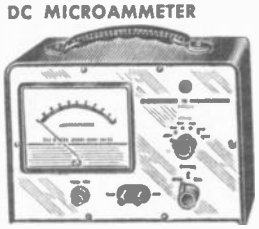


Model WT-100A. A precision laboratory measuring instrument which tests tubes under typical operating conditions as specified in the tube manufacturers' technical manuals. It is particularly useful in production line testing, design and development work, pre-selecting for critical applications, quality control programs, and preventive maintenance. Measurements performed: AC heater current from 0.02 ampere to 10 amperes; DC filament current up to 250 ma. voltage drop across rectifier tubes and semiconductor diodes; transconductance from 10 micromhos to 100,000 micromhos. Within the range of its facilities it will test: vacuum tubes-diodes, triodes, tetrodes, pentodes, heptodes, hexodes, octodes, and multi unit types; gas tubes-thyratrons, voltage regulators, cold-cathode and hot cathode rectifiers; semi-conductor diodes—small dry-disc rectifiers, germanium and silicon diode types. Size: 23½x8x18½". Ship. wt., 65 lbs.

62F055. NET **989.00**

ULTRA-SENSITIVE DC MICROAMMETER

- **Six direct-current ranges for measuring current from 0.0002 to 1000 microamperes.**
- **Voltage drop for full scale deflection only 0.5 volts.**
- **Low Drain Tubes**

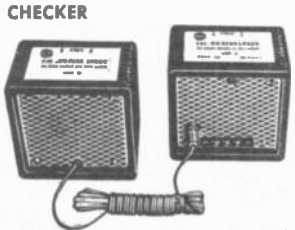


Model WV-84C. Application: a battery operated vacuum tube microammeter designed for measuring minute direct currents, for making current and voltage measurements in electrolysis and corrosion investigations, and for checking currents in light meters, ultra-violet and infrared detectors, and spectrophotometric devices. When used as a voltmeter, suited to measurements in circuits where loading is a critical factor. Size: 7½x8¾x10¾x6½". Ship. wt, 10 lbs.

62F006. NET **110.00**

PHASE CHECKER

- **Sound powered.**
- **Permits dynamic check of output phasing.**



Model WG-360A. Checks the phasing of low frequency and mid-range speakers in hi-fi, stereo, and PA systems. One of the principal applications for the WG-360A is in checking the phasing between the speaker assemblies of the left and right-hand channels in stereo systems. Provides an overall dynamic check on phasing, including everything from input source to soundwave output from speakers. Size: 5½x6¾x5". Ship. wt., 5 lbs.

62F1784. NET **14.95**

TV ISOTAP

Model WP-25A. Speeds up servicing (especially useful in service shop for duplicating various line-voltage conditions found in homes), prevents damage to test equipment. May be used as a high-medium-low voltage isolation transformer. Supplies outputs of 130, 115, & 105AC volts at max. load. Tapped to match line voltage from 105 to 130 in 5 volt steps. Ship. wt.: 13 lbs.

62F047. NET **27.50**

TV BIAS SUPPLY KIT

Model WG-307B (K). Provides three output voltages, and is designed for use in servicing and aligning color and black and white TV receivers. Three separate output voltages, adjustable from 0 to —15 volts are provided for application in RF, IF, and AGC bias circuits. Ship. wt., 2 lbs.

62F027. NET **11.95**

PROBES AND RESISTORS

Model WG-289. High voltage probe. For use with WV-77A, WV-77B, WV-77C, WV-97A, WV-87A, and WV-87B, WV-98B, WV-98C, Volt-Ohmysts. Ship. wt., ½ lb.

62F020. NET **13.50**

Model WG-297. High voltage probe. Similar to above, for use with RCA model WV-77E, WV-77E (K), WV-38A, WV-38A (K). Shipping wt., 8 oz.

62F057. NET **11.95**

Model WG-206. Megohm multiplier resistor. For VTVM's having 11 megohm input. Shipping wt., 2 oz.

62F082. NET **3.50**

Model WG-210. Megohm resistor. Multiplies 5,000 volt DC range of 20,000 ohms per volt VOM's by a factor of 10.

62F083. NET **3.50**

Model WG-211. Megohm resistor. Multiplies 250 volt DC range of 20,000 ohms per volt VOM's by a factor of 100.

62F084. NET **3.50**

Model WG-299D. DC/AC Ohms probe and cable. For use with Volt-ohmysts except WV-77E and WV-77E (K).

62F061. NET **9.00**

Model WG-354A. Capacitance-type voltage divider probe. The WG-354A used with the WG-300B probe and cable extends the range of oscilloscopes so that signal pulse amplitudes up to 5000 volts can be observed.

62F067. NET **7.50**

Model WG-350A. Probe for use with WO-33A for demodulation and signal tracing of radio/TV, RF, and IF signals.

62F092. NET **5.25**

Model WG-302A. RF/IF/VF signal tracing probe. "Slip-on" type high frequency probe designed for use with WG-300A and B to permit visual signal tracing for rapid isolation of trouble in radio receivers and in TV IF and video stages.

62F064. NET **9.00**

Model WG-351A. Crystal diode probe for extending RF measuring capability of the WV-77C, WV-77E and WV-77E (K) to 100 Mc.

62F059. NET **5.25**

Model WG-300B. Direct/low capacitance probe and cable. For use with RCA WO-91A, & B WO-88A and WO-78B scopes.

62F062. NET **11.00**

Model WG-301-A. Crystal diode probe. Slip on type used with WG-299 to increase frequency range to 250 Mc.

● *NEW* RCA ADAPTERS

Model WG-352A. Diode Probe. For use with RCA VOM in rf applications from 100kHz to 100MHz. Provides output which can be read directly from the meter scales.

62F1650. NET. **2.95**

Model WG-356A Balanced RF Diode Probe. For use with oscilloscope for checking the bandpass and gain characteristics of VHF TV rf preamplifiers. Frequency range: Up to 250 MHz.

62F1651. NET. **3.95**

WG357A IF Diode Probe. Unbalanced detector demodulator for use with an oscilloscope in displaying the sweep output from an if/video sweep generator. Usable up to 100 MHz Also used to observe the rf/if response of individual amplifier stages.

62F1652. NET. **3.95**

WG-361A Current Measuring Adaptor. For use with any VTVM having a 0.5 VDC range. 6 current ranges: 0-50 μA, 0-500 μA 0-5 MA, 0-50 MA, 0-0.5 Amp, 0-5 Amp.

62F1653. NET. **4.95**

Model 630-M

HIGH IMPEDANCE VOLT-OHM-MICROAMMETER

Model 630-M. The input impedance of a VTVM with the convenience of a VOM. The 630-M's sensitivity is derived from the singular achievement of its basic 0-1 DC micro-ampere movement. The 630-M incorporates no amplifiers, has no zero drift, no warm-up, and no power requirements. 1,000,000 ohms per volt, DC for greater accuracy on high resistance circuits. 20,000 ohms per volt AC. 1 mu-a Suspension Meter Movement: no pivots, bearings, or rolling friction. Extremely rugged. Greater sensitivity and repeatability. 61 ranges, usable with frequencies through 100 hz. Temperature compensated. ±1½% DC accuracy, ±3% AC. Current measurements from 20 nanoamperes. Voltage measurements from 5 mv. VDC: 0-.6-3-12-60-300 at 500,000 ohms/volt. 0-.3-1.5-6-30-150 at 1,000,000 ohms/volt. 0-1200 at 125,000 ohms/volt. 0-6-600 at 250,000 ohms/volt. VAC: 0-3-12-60-300-1200 at 10,000 ohms/volt. 0-1.5-6-30-150-600 at 20,000 ohms/volt. DB: —20 to +63 in 10 ranges. DC MICROAMPERES: 01 at 300 MV. 0-60-600 at 300 MV. 0-120 at 600 MV. DC MILLIAMPERES: 0-6-60-600 at 300 MV. 0-1.2-12-120-1200 at 600 MV. DC AMPERES: 0-6 at 300 MV. 0-12 at 600 MV. OHMS: 0-1K-10K-100K (4.4-44-440 at center scale). MEGOHMS: 0-1-10-100- (4400-44,000-440,000 ohms center scale.) Shpg. wt. 5 lbs.

HIGH ACCURACY VOLT-OHM-MILLIAMMETER

Model 630-APLK. Transistorized Electronic Switching Circuit guards against accidental burnouts! Comprehensive overload protection. Polarity reversing switch and suspension Meter Movement. One selector switch minimizes chance of incorrect settings. Transistorized overload sensing device does not load circuit under test, eliminating possibility of damaging circuit components. Rugged 0-50 microampere suspension type movement. Diode network across meter protects against instantaneous transient voltages. Automatically checked by using X100K ohms range. One 20 position range switch turns in either direction to obtain desired range. Special meter shorting feature on "OFF" position for high damping when moving tester. Accuracy ±1½% on DC, ±3% AC. Flush mounted controls, jacks and meter. DC VOLTS: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt 0-0.25 at 100 microamperes. AC VOLTS: 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt. DC MICROAMPERES: 0-100 at 250 Mv. DC MILLIAMPERES: 0-10-100-1,000 at 250 Mv. DC AMPERES: 0-10 at 250 Mv. Ohms: 0-1,000-10,000 (4.4-44 at center scale). Megohms: 0-1-100 (4,400-440,000 at center scale). Output Volts (AC): 0-3-10-50-250 at 5,000 ohms/volt; jack with condenser in series with AC ranges. Case: Molded, fully insulated; 3 11/32" x 5½" x 7½". Shpg. wt., 5 lbs.

Model 630 APLK

VOLT-OHM-MILLIAMMETER

Model 630-PLK. Transistorized relay circuit provides protection from burn-outs; overload sensing device does not load circuit under test. Life of transistor circuit battery is nearly that of shelf life. Automatically checked by using X100K ohms range. 20 position range switch turns in either direction. Patented Bar-Ring Movement provides self-shielding; not affected by stray magnetic fields; usable with frequencies through 500 hz Sensitivity: 20,000 ohms VDC, 5,000 ohms VAC. Resistors directly connected to switch to form a simplified unit. Jacks located on lower corners of panel, permitting greater accessibility to control knob. Banana type leads for low-contact resistance at jacks. Leads are 50 inches long, test prods with removable alligator clips. DC Volts: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt; 0-0.25 at 100 microamperes. AC Volts: 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt. Decibles: —20 to +11 +21, +35, +49, +61, +75; "O" DB at 1 MW on 600 ohm line. DC Microamperes: 0-100 at 250 Mv. DC Milliamperes: 0-10-100-1000 at 250 Mv. DC Amperes: 0-10 at 250 Mv. Ohms: 0-1000-10,000 (4.4-44 at center scale). Megohms: 0-1-100- (4,400-440,000 at center scale). Output Volts (AC): 0-3-10-50-250-1000 at 5000 ohms/volt; jack with condenser in series with AC ranges. ±2% DC, ±3% AC accuracy. Size: 3 11/32"x5½"x7½". Shipping weight, 5 pounds.

AC CLAMP-ON AMMETER ADAPTER FOR 310 VOM

Model 101

Model 10

Model 10. Checks all line loads instantly, accurately, safely—without breaking the circuit or interrupting work. Easy range switch. RANGES: 0-6-12-30-60-120-300. Clips around single wire to read AC amperes direct. Use with Adapter 101 to divide instantly two-conductor cords. A lever securely locks the Model 10 to Model 310 when used in combination. Model 10 can be left attached to Model 310 when the latter tester is used as an AC-DC VOM only. The only necessary change is to remove the lead plug from the Model 310 VOM jack and insert it in the jack provided in the Model 10 housing. Case is black molded plastic with engraved white markings. Ideal for checking wiring circuits, motor loads, appliance loads. Its use expanded with leads below.
62F235. NET **18.00**

No. 611. Long lead attachment for using Model 10 as clamp-on ammeter with any VOM having a 3-volt AC scale at 5,000 ohms per volt, such as 630, 630-A, 630-NA, 630-PL, 630-APL, 631, etc.

● NEW SOLID STATE VOLT-OHMMETER

Model 600. Lightweight and transistorized test instrument which has the portability of a VOM with the high input impedance of a VTVM, wide frequency ranges and low cost battery power. Features include: a brushed aluminum front panel with black range markings; molded case of high impact material; a carrying handle of extruded aluminum which doubles as a stand; removable back permits easy access to the working circuitry. One compact probe is used for all functions. The probe has a built-in switch which places a resistor in series with the instrument on DC voltage readings. The easily readable meter is 5" wide, Typical battery life is 4000 hours, in normal operation. Battery complement consists of: 3—1.5 V batteries (1 D, 2 AA) and 1—9 V transistor battery. Batteries included. Frequency range: 15 hz to 2 Mhz. 11 Megohm resistance on all DC ranges except .4 and .8. AC impendance is minimum of .75 megohms. Plug-in ground lead insures good grounding of the circuit under test. Ranges: DC—0-0.4-0.8-1.6-4-8-16-40-160-400-1600; AC—0-4-8-16-40-160-400-800; Resistance—0-1,000-10,000-100,000-1 Meg.—10 Meg. Precision Apparatus Test Equipment

● *NEW* SWEEP GENERATOR AND MARKER ADDER

Model E-410C. A wide range, frequency modulated signal source combined with complete Marker Adder circuitry. Designed for the alignment and maintenance of TV, FM and other high frequency wideband receivers and circuits. Sweep generator solves marker visibility and overloading problems by incorporating built-in Marker Adder circuitry. Allows Absolute control of marker width and amplitude. Frequency coverage: Band A: 3 to 7 MHz. Band B: 6 to 14 MHz. Band C: 13 to 33 MHz. Band D: 35 to 85 MHz. Band E: 80 to 213 MHz. Band E5: 400 to 1080 MHz. Internal blanking. Automatic gain control provides flat output over entire band. Extra shielding prevents radiation leakage. Operates 117 VAC 50/60 standard. 220 VAC, 50/60 Hz also available. Furnished with a 4.5 mc crystal and 5 output cables. 13" x 8½" x 7". Shipping weight: 15 lbs.

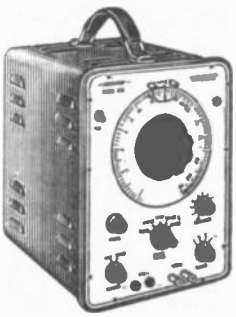
WIDE RANGE SINE AND SQUARE-WAVE GENERATOR



Model E-310. Used for amplifiers, PA, transmitter modulation response tests, input and output impedance measurements, ultrasonic voltage source, and loudspeaker resonance tests. All tubes preaged to assure long term stability of calibration. Logarithmic, etched dial scale with Vernier and Fast tune dials provides accurate resetability. Frequency Range: Sine and square waves from 5 Hz to 600 kHz in 5 decimal bands. Output Level: Sine Wave, 10 V. RMS into 600 ohms; Square Wave, 10 V. P-P, 4 position step attenuator and continuous amplitude control. Calibration Accuracy: ±2% or 1 Hz. Distortion: Less than 1% from 5 kHz to 600 kHz. Supply Voltage: 117 VAC 50/60 Hz standard; 220 V. AC 50-60 Hz. available. Heavy-gauge, steel case, blue-grey ripple and aluminum panel and tuning dial. 11½"x9"x11¼". Ship. wt. 24 lbs.

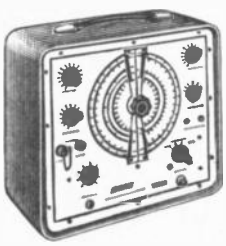
MULTI-BAND SIGNAL MARKING GENERATOR



Model E-200C. Exceptionally stable and accurate, this general purpose RF signal generator serves in conjunction with PRECISION Sweep Signal Generators or other similar sweep signal generators. Frequency coverage: 88 kc to 440 mc (to 110 mc on fundamental). 6½" brushed aluminum dial: direct reading in 10 bands up to 440 mc —1% accuracy. 0-1000 point vernier scale: direct reading to 1 part in 1000 for hand-calibration & frequency spotting. Circuit: 6AU6 in stable ECO circuit; 6U8 sine-wave audio oscillator-modulator; 5Y3 full wave rectifier. 400-cycle sine wave audio oscillator. Dual-shielded RF attenuators. Four types of signals: Unmodulated RF; 400 cps; modulated RF; Externally modulated RF; 400 cps audio output. Built-in AVC-AGC bias substitution. 117V, 50/60 cycles, AC. 13"x11½"x6⅝". Weight: 16 lbs.

VACUUM TUBE VOLTMETER

Model V7S. For general use in schools, labs, production lines, radio-TV and appliance service shops. Polarity reversal switch for time saving diode leakage checks and other work in semiconductor circuitry. Transit switch position for meter movement protection. Built in battery eliminator. No ohmeter battery required. Single high-impact Cycolac Dual Purpose Uni-Probes for withstanding rugged production service, and lab use. Inherent protection from its vacuum tube insures no harm from application of a wrong input voltage. DC Volts: ±0-1.5, 5, 15, 50, 500, 1500. AC V. (RMS) 0-1.5, 5, 15, 50, 150, 500, 1500. Resistance: Full Scale 1000; 10,000; 100,000, 1, 10, 100, 1,000 Megohm. Mid-scale 10, 100, 1000, 10,000. 100,000 ohm, 1 meg. 10 meg. Accuracy: ±5% full scale AC and ±3% full scale DC. Operates on 117 V. 50/60 Hz. Dimensions: 7½"x5⅜"x4¼". Weight: 6 lb.

● *NEW* DC TO 5 MHz WIDE BAND OSCILLOSCOPE

Model S-55A. Features both DC and AC coupling, 5 sweep ranges to 500 KHz, built-in regulated calibration voltage, automatic synchronization and an illuminated screen graticule. High sensitivity DC push-pull vertical amplifier circuitry and large cathode ray tube screen area, adapts the system to rapid TV and FM alignment procedures, and provide low-distortion display of non-sinusoidal waveforms. Especially applicable to labs, schools, production lines, and service shops. Vertical amplifiers (3-stage, push-pull) sport the following sensitivities: DC: 70 millivolts/inch; AC: 25 millivolts/inch. Frequency response (Sine wave): DC — within 3 db from DC to 4.5 MHz; within 5 db at 5 MHz. AC — within 3 db from 1 Hz to 4.5 MHz; within 5 db at 5 MHz. Intensity modulation: Input on front panel. Blanking on negative signal excursion.

WIDE BAND OSCILLOSCOPE

Model ES-550B. For general purpose use for lab., schools, production line, and service shop; for color and b&w TV servicing. For multiplex alignment and solid state and vacuum tube equipment. Has 5mc wide vertical frequency response and 5" scope screen, 3-position vertical & horizontal step attenuator, freq. compensated: x100, x10, x1., response: 10 Hz. to 5 mHz. 3000-V. intensifier anode potential: amplified Auto-Sync Circuit. Four-way sync selection (internal neg., internal pos., external, and line) Direct-reading P-P voltage calibrator permits oscilloscope tube used as vacuum-tube voltmeter. Vertical pattern reversing switch, linear multi-vibrator sweep circuit 10 Hz to 100 kHz; automatically synchronized 30 Hz & 7875 Hz. sweep for TV sync-pulse analysis; amplified sweep retrace blanking. Built-in 60 Cps, phasing & blanking controls. Vertical sensitivity: 10 mv RMS for 1" display. Power input: 117 VAC 60 Hz standard; High contrast filter-type illuminated graticule. Dimensions: 18½" x14½"x8¼". Shipping weight 47 lbs.

SENCORE Test Equipment

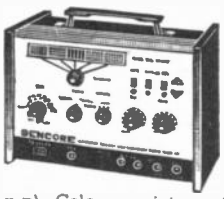
STANDARD TEST EQUIPMENT

IN-CIRCUIT TRANSISTOR TESTER

Model TR-139. Checks Transistors or diodes in-circuit without disconnecting a single lead. The same procedure is used for in-circuit and out of circuit testing. Transistors can be matched, sorted, and selected for specific required values of beta and ICBO. True AC beta reading on a large 6-inch meter. Measures the ratio of AC signal on the base of the transistor to that obtained on the collector. Beta reading slightly more accurate when checked out of the circuit. Gives leakage current (ICBO) of any transistor directly on the meter. Checks both rectifiers and diodes either in or out of the circuit. In-circuit test gives a "go or no go" indication. Out of circuit testing measures the actual front to back conduction in microamps. A special circuit protects even the most delicate transistors and diodes, even if the leads are accidentally hooked up to the wrong terminals in the transistor. Clip type test leads included. Plug in jacks on front panel for adaptation to other applications. Large 6" face sensitive 200 microamps. Zener diode regulated power supply. All steel case, leatherette covered. 9"x7½"x6". Weight 8 lbs.

62F748. NET **89.50**

● *NEW* CA122B ANALYZER



Model CA122B. Produces ten standard keyed color bars (RCA type), 14 horizontal lines, 10 vertical lines, crosshatch, white dot (adjustable) patterns. Variable RF output, channels 2-6; calibrated-variable. IF output, 20-50Mc. For tuner substitution or injection directly into any IF stage. Unmolded video, chroma, horizontal and vertical syncpulses (all +30 V p-p). Color gun interrupters using lead-piercing alligator clips; 4.5 Mc crystal output for audio IF; 900 hz audio for injection at any stage up to the speaker. Vacuum tube operated for proper impedance match when injecting signals into high impedance circuits. All steel case and chrome panel with large lead compartment features functional modern styling. Size: 10"x 14"x8". Weight, 15 lbs.

62F1450 NET **182.50**

● *NEW* MODEL FE14

Model FE14. Field effect solid state volt ohm and milliamp meter. Features extremely high input impedance on AC & DC. Peak to peak scales for measuring complete waveforms as well as RMS scales for sine. Uses field effect transistors in differential circuit. Meter: 4½", 100 microamp ±2%, diode protected and insulated from input. Accessories: High Voltage Probe (39A19) extends 300 volt range to 30KV (Not Supplied). Size: 5x7 5/16 x 3 1/16. Wt., (Less Batteries) 3¼ lbs.

62F1451 NET **59.95**

● *NEW* MODEL BE113 DUAL TV BIAS SUPPLY

Model BE113. Single or two separate 0 to 20 volts DC bias supplies without interaction. Well filtered; effectively pure DC with less than 1/10 of 1% ripple-calibration accuracy better than equivalent battery tolerance. Size: 4x2x2". Wt. 1 lb.

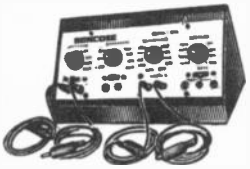
62F1452 NET **12.75**

TR-115 TRANSISTOR CHECKER

Test transistors for leaks,opens and shorts. (Out of circuit only) Ratio check as well as Beta, good-bad. Equivalent check data for Japanese type and all American made transistors. Size: 5"x4½"x2½". Shipping wt., 2 lbs.

62F735. NET **24.95**

● *NEW* MODEL RC146



Model RC146. Seventy-five frequently used values of carbon resistors, capacitors, electrolytics, power resistors, and universal selenium and silicon rectifiers for fast on the spot substitution. Power resistors of 20 watts from 2.5 to 15,000 ohms and a universal .5 amp silicon and selenium rectifier make the RC 146 the utmost in parts substitution. The "Handy 75". Overall size 10¼" x 4¾" x 4¾". Shipping weight, 3½ lbs.

62F732 NET **44.95**

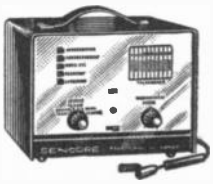
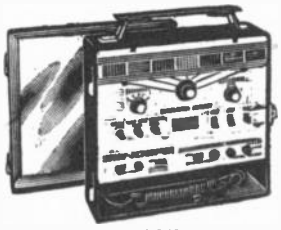
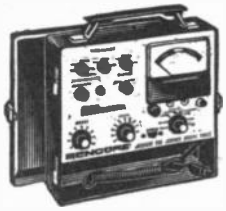
COLOR TV TEST EQUIPMENT



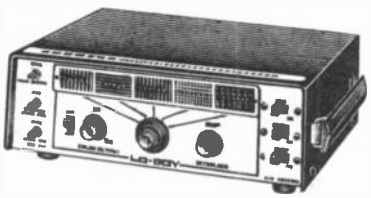
CG126



CG141



CR143



CG10

● *NEW* CG126 STANDARD COLOR GENERATOR

Model CG126. Portable generator produces ten standard keyed color bars (RCA type), dots (size adjustable), crosshatch, 10 vertical and 14 horizontal lines. RF output injected into channel 4 through antenna terminals, output can be retuned for channels 3 or 5. Reserve chroma output of up to 200% available to force signal through defective circuits; counting circuits retimed right on TV set. Size, 11" x 9" x 6". Wt., 10 lbs.

62F1454 NET **109.95**

● *NEW* CG141 DELUXE COLOR GENERATOR

Model CG141. Provides all standard patterns, including standard RCA color bars with chrome control, crosshatch, adjustable size dots, horizontal lines, and vertical lines for centering rasters and checking overall dynamic convergence. Recommended 4.5 MHz crystal controlled signal modulated into FR for setting fine tuning on a receiver. Color gun interruptors with switches on front panel. Composite video output on front panel for injection of any pattern into chroma section to eliminate front end noise and isolate defects in receiver. Positive or negative picture phase, 7 volts peak to peak, to drive chroma circuits in latest sets. Lightweight and housed in a vinyl covered steel case with removable protective lid. 10x9x3½". Wt., 9 lbs.

62F746 NET **149.95**

CR143 CRT CHAMPION

Model CR143. Compact, lightweight instrument checks black-and-white, color and new rectangular color picture tubes for emission, interelement shorts, control grid cut-off, gas and expected life. Two replaceable plug-in cables: one color, one black-and-white with all necessary sockets. Three rejuvenation positions insure user any length to save a faulty tube or equalize gun currents in color tubes. Filtered DC avoids damage and reading errors. Size: 10x9x3½". Wt., 11 lbs.

62F422 NET **99.50**

LO-BOY COLOR BAR GENERATOR

Model CG10. Compact easy-to-use design provides 10 standard RCA type color bar patterns, full crosshatch, 10 vertical and 14 horizontal lines, and adjustable white dots . . . all with a flick of a switch. Interlace control stops dot bounce. All-silicon solid state construction for low warm-up time; eliminates need for internal timer controls (brought out to front panel for simple operator adjustment). Uses long-life C cells with regulated output; permits wear down from 12 V to 9 V with full circuit response. All-steel, low silhouette design with tough vinyl finish. Wt. 7 lbs.

LABORATORY OSCILLOSCOPE

Model 770A. 5" wide-band and general purpose oscilloscope. Calibrated 4Mhz DC vertical amplifier with 8-step and vernier attenuator. Three operational modes of internal sweep generator: free-running, driven, and automatic. Eighteen direct reading calibrated sweep rates from 0.5 sec/div to 1 usec/div. 5 times sweep magnifier, accuracy within ±3%. Model has vertical and horizontal deflection systems and incorporates sweep magnification on internal sweep functions. Internal calibrating signal provides 60 hz square wave. Flat-faced, post-accelerated CRT. Illuminated, calibrated graticule. Works with 105-125 volts, 50/60 hz; 130 watts furnished complete with operating manual. 60 hz line sweep adjustable over about 180°. Shipping weight, 53 lbs.

AM-FM SWEEP AND MARKER GENERATOR

Model 288AX. Provides the necessary signal voltages for servicing AM and FM receivers as well as TV receivers. A crystal controlled 100khz and 1000khz oscillator provides an accurate frequency standard. A wide choice of frequency ranges, sweep widths and methods of modulation plus a new ultrasonic range of 35khz to 110 khz, make this a versatile generator. High output voltage permits visual stage by stage alignment of IF stages, limiter, and discriminator on both AM and FM receivers. Power and voltage measurements, as well as determination of resonance in alignment work, are materially aided by a self-contained decibel meter with range of —10 to +38 db. Sweep synchronizing voltage is brought out to front panel. Output control; vernier control w/decade steps of 1, 10, 100. Pwr. requirements: AC 110v, 50-70 hz. Complete w/crystal, cable assm. meter leads instruction book, 16x13x7". Wt., 33 lbs.

HIGH SPEED GM TUBE AND TRANSISTOR TESTER

Model 6000A. Tests all the new tubes including Compactrons, Novars, Nuvistors, and 10-pin headers. A high speed, extremely accurate tester. Instant line adjust and automatic short indication. Covers 3.000 to 15,000 μmhos in 3 ranges. Shows gas evaluation. Able to determine the reserve capacity of tubes which could cause trouble in the future. A filament continuity button to check for open filaments. Filament voltage from 0.6 to 117 volts in 19 steps. Complete with removable socket plate that accommodates practically all tubes in use today. (7-pin, octal, loctal, 7- and 9-pin noval, Novar, Compactron, Nuvistors, 10-pin "headers.") Inter-element leakage registered instantly on 5 neon lamps, identifying elements involved. Red leatherette portable case size: 16¾"x11¾"x7½". Panel gold anodized. For 105-125 VAC, 60 HZ, 40 watts. Shpg. wt., 21 lbs.

62F171. NET **259.50**

DYNAMIC BETA IN-CIRCUIT TRANSISTOR TESTER

Model 890. Unique circuit measures AC Beta with equal accuracy in or out of circuit. Measures parameters: AC Beta; Rin (transistor input resistance); Z Ohms (base-emitter circuit impedance); Ic. Measures AC Beta, Ic and Icbo out-of-circuit. In-circuit AC Beta measurement accuracy ±5% (150 ohms minimum circuit impedance). Portable and completely self-contained. Utilizing on AC bridge principal with the transistor input circuit elements as one arm of the bridge, the total impedence is nulled. With the circuit impedances as low as 150 ohms, this effectively removes these elements from the circuit. Useful for incoming inspection of transistorized products and sub-assemblies. Beta Ranges: 0-50, 0-100, 0-200. Furnished complete with test cable. AC Test Signal: Variable 1000 HZ sine wave-Calibration setting at 5 ua. 100 mv, protected against overload. Portable carrying. 6½"H, 9"D, 10¾"W. Wt. 8 lbs.

62F102. NET **155.00**

PORTABLE TRANSISTOR TESTER

Model 870. Features two units in one. Measures large signal DC Beta on power transistors as well as small signal AC Beta on low and medium power transistors. Has variable collector voltage. Collector test current is variable up to 2 amps, permitting Beta measurements on power transistors rated at 5 amps or more Tech Spec: Beta ranges 0-100 & 0-300, extendable to 600. Beta test collector voltage variable from 0-5 volts. Accuracy within 5% for both AC & DC Beta. Requirements—115 volts AC, 40 watts. Ic variable, 5 ma up to 2 amps. Vce variable, 0-5 volts. Input sensitivity of A-C bridge circuit amplifier is 50 milli-volts peak-to-peak or 17.6 millivolts Rms for full deflection of meter. Size: 7⅞x11¾x14½". Shpg. wt., 22 lbs.

LABORATORY VTVM AND CAPACITANCE METER

Model 209C. Ranges: DC volts, 0.5, 1.5, 5.0, 15, 50, 150, 500, 1500 volts; AC volts, 1.5, 5.0, 15, 50, 150, 500, 1500 volts; DC current, 0.5, 1.5, 5.0, 15, 50, 150, 500, 1500 ma; Ohms, x1, x10, x100, x1K, x10K, x100K, x1M; Capacity, x10, x1, x0.1, x0.01, x0.001ufd, x10 and x100uufd. Frequency response: within 3 db. 10 HZ to 200μHz. Accuracy: ±3%, full scale Ohms and capacity, ±3° of arc. Power supply is self contained and is safe for all transistor and diode usage. The VTVM is grounded. Large 9" meter. Complete with AC and DC probe assemblies, test leads, and instruction book. Furnished in enameled steel portable case. Size: 11"Hx15"Wx7½"D. Power requirements, 117 volts ±10% 50-60 HZ, 10 watts. Shpg. wt., 20 lbs.

62F106. NET **184.50**

PORTABLE VTVM

Model 470A. High sensitivity range for transistor bias testing. AC and DC ranges are: 0-.5, 1.5, 5, 15, 50, 150, 500, 1500 volts. Peak to peak ranges: 0-1.4, 4, 14, 40, 140, 400, 1400, 4000 volts. Resistance ranges (center scale = 10). X1, X10, X100, X1000, X10,000, X100,000, X1 meg. X10 meg. Input resistance: DC volts, 17.7 megohms; AC volts 17.7 megohms paralleled with approximately 150 mmf. Frequency range: 15 Hz to 2.5μ Hz. Includes 48" long removable test lead and probe. Has range switch for use on AC, DC and Ohms range: 15 Hz to 2.5 ma. Includes 48" long removable test lead and probe. Has range switch for use on AC, DC and Ohms ranges; and 48" long common lead. For 115 VAC, 50/60 HZ 15 watts. 6⅜"x7½"x4½". Shpg. wt., 10 lbs.

FULLY TRANSISTORIZED DIGITAL MEASURING SYSTEM

MAIN FRAME

- **Contains digital display system and power supply**
- **Obsolescence-proof plug-in design**

Model DMS-3200. The main frame contains the digital display system, power supplies, and an access port for plug-ins of the DP series. A three-digit display makes maximum use of the high accuracy capability of the analog-to-digital converters in the system. The display is fully electronic, using bi-quinary type neon display tubes. Reliability and long life are achieved through the use of solid-state circuitry throughout and all transistors and diodes are silicon type. Counter has a response of 1 Mhz, assuring reliable count and readout of input pulse trains. A self contained power supply supplies all operating voltages for the main frame circuitry as well as plug in units. All critical voltages are zener-regulated. A combination of sturdy die-cast front and rear panels along with heavy-duty extruded aluminum side sections provides a rugged, yet light weight housing. Both top and bottom sections can be removed for full access to all components and printed circuit boards. Front panel carrying handles help make it an ideal portable instrument. Flip down stand for improved viewing angle is another added feature. Size: 9¼W x 6⅜H x 12⅞"D. Weight: 10 lbs.

Stock No.	Type No.	1-9	10-24
62F1761	DMS-3200	320.00	304.00

PLUG-IN MODULES

- **Add plug-in modules for variety of applications**
- **Slips into main frame for one unit convenience**
- **Save money — Only buy units you need.**

Model DP-100. Voltmeter plug-in provides digital display of DC voltages from 0.1 millivolt to 1000 volts when used with DMS-3200 Main Frame. Accuracy specification of ±0.1% F. S. Five ranges: 0.00 to 99.9 millivolts; .000 to .999 volts; 0.00 to 9.99 volts; 00.0 to 99.9 volts; 000.0 to 999. volts. Excellent AC rejection for accurate and rapid 100 milliseconds reading time. Photo chopper stabilization assures no drift or zero offset. Size: 3H x 8¼W x 10"D. Weight: 3¼ lbs.

Stock No.	Type No.	1-9	10-24
62F1762	DP-100	175.00	166.25

Model DP-140. Event counter and slave plug-in unit. As an event counter the DP-140/DMS-3200 combination permits display of a totalized count of events in production counting applications. Random events can be converted to pulses and counted and displayed with this system. The count can be returned 000 at any time. As a slave plug-in, a multi-pin connector on the panel of the DP-140 permits it to be driven from a DMS-3200/DP-150 combination. When operated in this way, decimal point location is automatically positioned properly and readout is directly in hz or Khz. Fully transistorized. Sensitivity: 100 mv minimum. Includes interconnection cable. Size: 3H x 8¼W x 10"W. Weight: 2¾ lbs.

Stock No.	Type No.	1-9	10-24
62F1766	DP-140	75.00	71.25

Model DP-150. 1 Mhz Counter plug-in. Provides a digital display of both frequency and period measurements when used with DMS-3200 Main Frame. Sinewaves, squarewaves, pulses, or other complex waveforms, with frequencies of 00.1 hz up to 1.0 Mhz and periods of 0.1 msec. to 999 seconds, may be measured. Provision for event totalizing and manual reset input; 1 megohm shunted with 40 pf, overload protected. Has provision for internal check at 1 hz, 1 Khz, and 100 Khz. Size: 3H x 8¼W x 10"D. Weight 3½ lbs.

Stock No.	Type No.	1-9	10-24
62F1763	DP-150	195.00	175.00

Model DP-170. Ohmmeter Plug-in, when used with the DMS-3200 Main Frame, provides digital display of resistance measurements from 0.01 ohms to 1,000 meg-ohms. The wide range of resistance measurements, coupled with accuracy of ±0.1% F.S. ±0.2% of reading, makes this a remarkable unit. Four terminals are provided so that lead resistance does not cause inaccuracies on extremely low resistance measurements. In addition a guard terminal is provided so that spurious leakages in components are automatically balanced out. Aluminum case. Size: 3" x 8¼" x 10". Shpg. wt. 3½ lbs.

Stock No.	Type	1-9	10-24
62F1764	DP-170	240.00	238.00

Model DP-200. Capacity meter Plug-in when used with the DMS-3200 Main Frame, provides digital display of capacity measurements from 1 picofarad to 9,999 microfarads. Design is all solid state. Eight ranges: 000. to 999, picofarads.; 0.00 to 9.99 nanofarads; 00.0 to 99.9 nanofarads; 000. to 999. nanofarads; 0.00 to 9.99 microfarads; 00.0 to 99.9 microfarads; 000. to 999. microfarads; and 0.00 to 9.99 millifarads. Size: 3" x 8¼" x 10". Ship. wt. 3½ lbs.

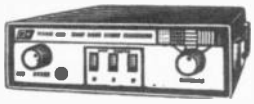
PLUG-IN
MODULES

COLOR GENERATOR

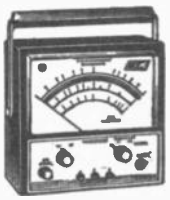
Model 1245. For quick and easy checking and adjustment of: convergence, demodulator alignment, color sync, color fit, horizontal and vertical size, linearity and overscan. Small, lightweight solidstate. Dots only one raster line high and .25μ sec. wide. Free of retrace lines. Station quality waveforms for absolescence protection and least convergence time through minimizing needs for brightness, contrast and fine tuning readjustment. Precise waveforms permit accurately setting color of killer control without a B&W telecast. Built-in gun killer works on any picture tube Output is at RF with more than 5,000 μ V of signal on Channel 3, 4 or 5. This generator provides crystal-controlled keyed rainbow color bar display; dot, crosshatch, horizontal line and vertical line patterns. Size 2⅞" h x 8½" d x 8⅞" w. Shpg. wt., 3 lbs.
62F561. NET **134.95**

● *NEW* COLOR GENERATOR



Model 1242. Output is at RF with more than 5,000 microvolts of signal on Channels 3 and 4 (factory-tuned to Channel 3). The generator has a transformer-type power supply with zener and power transistor regulation. A pilot light indicates power on. The transistorized generator provides gun killer controls that will work with any picture tube. Size of generator is 2"H x 6¾"W x 9¾"D. Generator has cable compartment for all leads. Operates from 105-125 VAC, 60 hz. Shipping weight, 2½ lbs.
62F596 NET **99.95**

● *NEW* DYNAMIC TRANSISTOR ANALYST

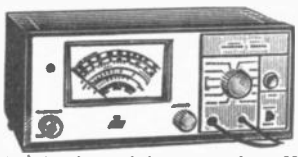


Model 161. In-circuit testing for AC Beta. With same procedure, 161 makes out-of-circuit test; including: Icbo (current leakage) and front-to-back conduction of diodes and rectifiers. Special circuitry protects all parts, even if leads are connected incorrectly. 7" mirrored meter insures accurate readings on three separate scales. Two ranges check AC Beta from 2 to 500. For leakage tests, Icbo range is 0 to 5000 microamps, on an expanded scale. Just flick a switch to find out if an unknown is an NPN or PNP type. Included with analyst are: the new edition of Howard Sams' Transistor Specification Handbook and the B&K Basic Course on Transistors. Entire package comes with: personalized handle, test leads, and instruction manuals. For 117 VAC, 60 hz. Size: 7⅛"H x 7¼"W x 3⅝"D. Shpg. wt., 6 lbs.
62F597 NET **89.95**

TV ANALYST

Model 1076. Provides RF and IF test pattern signals to trouble shoot. Check resolution, bandwidth, shading and contrast capabilities with test pattern in flying spot scanner. 4.5 mc, 400 cycle FM modulated sound signal. Sync signal adjustable to ±50 volts. Sweep pulses; yolk and transformer test; high voltage indicator. White dot, crosshatch and color bar patterns for color sets. Bias supply and AGC keying pulse. 17"x10¼"x10". Shpg. wt., 36 lbs.
62F555. NET **329.95**

B & K CAPACITOR ANALYST



Model 801. Measures capacitance and leakage resistance both in-circuit and out-of-circuit. Designed to operate on 105-125 volts 60 cycle AC, but will operate from 90 to 140VAC after a 2 min. warm-up. Can detect "shorts" in normal circuits where the capacitor tested is shunted by more than 25 ohms. Detects "Opens" in circuits where the capacitor tested is more than 25 pfd or shunting resistance is more than 50 ohms. Unique circuit determines how capacitor stores energy and returns it to the circuit. Spots marginal electrolytics that need replacement and predicts the life expectancy of electrolytic capacitor of 3 volts or more. Meter movement is protected against overloads. Easy to test low-voltage transistor circuit capacitors as well as those in vacuum-tube circuits. Electrolytic tests up to 2000 mfd, using a balanced bridge. One knob makes it easy to select the desired function and range. Simplified internal design, easily portable. Weight, 8¾ lbs.
62F588. Model 801. NET **109.95**

DYNAMIC MUTUAL CONDUCTANCE TUBE TESTER

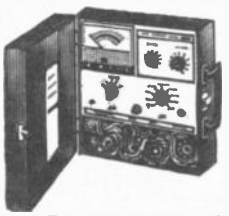
- Multiple socket selection
- Simplified switch selection

Model 707. Provides multiple socket selection to quick check most TV and radio tubes. Simplified switch selection. Includes provisions for future new sockets. Tests all types of tubes. Automatic compensation for line voltage variation. 4½" meter with "Replace-Good" scale. Lists common tube types on socket panel. Complete reference chart in cover. 7, 9, and 10 pin straighteners on panel. Checks each section of multi-section tubes separately. Tests for all shorts, grid emission, leakage and gas. Grid emission test is adjustable, with sensitivity to over 100 megohms. Makes quick "life" test. Professional, dynamic mutual conductance tube tester that combines multiple-socket speed with high Gm accuracy— plus obsolescence protection. Size: 16 ⅛ x 15¾ x 5⅞". Shpg. wt., 15½ lbs.
62F589 ..... **189.95**

DYNA-JET TUBE TESTER

Model 606. This multiple socket design has reduced the number of settings for testing each tube from 17 required in many other types of testers to only 4. You can test for all shorts, grid emissions, leakage and gas; and check cathode emission the accurate way—under simulated load conditions! With the really portable Model 606, you won't reject the good tubes, and you'll quickly find the bad ones, reducing call backs, selling more tubes, and increasing service profit. You'll find "tough dogs" and weak tubes with the exclusive adjustable grid emission test, which has the sensitivity of over 100 megohms. Molded tube sockets have phosphor bronze contacts for long, trouble-free life. Simplified heater voltage setting with power-on indicator. Each section of a multiple section tube is checked. Size 11"w x 8½"h x 4⅞"d. Operates from 105-125v., 50-60 hz. A.C. Shipping wt., 8 lbs.
62F562. NET **79.95**

CRT TESTER AND REJUVENATOR



Model 465. Tests and rejuvenates black & white and color TV picture tubes without removing tube from set. Provides correct filament voltage (0-13 v.) for all tubes. Tests and rejuvenates all hi G-2 and low G-2 tubes including those requiring a G-2 voltage as low as 25 volts. Tests new rectangular color tubes. Corrects each color gun separately. Uses DC on all tests. 4½" meter and neon bulb indicators for easy reading. Leatherette 10½"x11½"x4½" luggage type case. For 117 VAC, 50/60 hz. Shpg. wt., 10 lbs.
62F563. NET **89.95**

● *NEW* "PROFESSIONAL" VTVM

Model 177. DC Volts: ±0-0.5, 1.5, 5, 15, 50, 500, 1500. AC Volts: (RMS) 0-0.5, 1.5, 5, 15, 50, 150, 500, 1500. AC Volts: (peak-to-peak) 0-4, 14, 40, 140, 400, 40K. Response: ±1db. 40 hz to 3mhz. Resistance: Full Scale: 1K, 10K, 100K ohms; 1, 10, 100, 1K, 10K, 100K megohms. Mid-scale: 10, 100, 1K ohms; 1, 10 megohms. Input Resistance: 11 meg (1 meg in probe). Accuracy: ±3% full scale DC, & 5% full scale AC. Zero center scale. Single AC/OHMS/DC test probe with switch and ground lead. VTTM has metal case and carrying case with handle. Operates on 117V 50/60 hz. Size: 7⅛"H x 7¼"W x 3⅝"D. Shpg. wt., 7 lbs.
62F598. NET **79.95**

VOLT OHM MILLIAMMETER

Model 120. The most comprehensive unit of its type ever offered in its price range. It features 61 ranges and functions specifically designed for use in industry, laboratories, maintenance shops and schools. 20,000 ohms per volt DC. 5000 ohms per volt AC. Rugged 50 microamp meter: ±2% accuracy. Extra-low resistance and voltage ranges. Wide frequency response AC and db ranges. Mirrored scale, burn-out proof meter. Size: 7"x 5⅜"x3⅜". Shpg. wt., 4 lbs.
62F564. NET **56.00**

H. H. Smith Test Leads, Prods and Adapters

ALL-PURPOSE TEST LEAD KIT

Type 610. 48" of 5000 volt heavy duty rubber covered test lead wire. Plastic handles with solderless prods. Other end supplied with standard #204 banana plugs which are interchangeable with the phone tips, alligator clips, or spade lugs which are supplied. Shpg. wt., 6 oz.
35F929. NET **1.80**

SOLDERLESS TEST PROD—THREADED TYPE

NEWARK Saves You Time and Money—One Purchase Order To One Source

TEMPERATURE RECORDER

Model 133. A self-contained temperature recording instrument which produces a high resolution, accurate recording of temperatures. Used with Thermistor probes. Standard 1" per hr. 1/16" per hr., to 450" per hr. on order. 105-130V, 60 cycles. Accuracy 2% of span. Stability ½% of span. Temperature range —50°F to 300°F on special order. Shpg. wt. 5½ lbs.

Stk. No.	Type	Temp Span	Net
62F1216	133	90-115°F	180.00
62F1217	133	30-105°F	180.00
62F1218	133	100-200°F	180.00

NICKEL WIRE PROBE RECORDER

Model 144. Temperature recording instrument for high resolution accurate recording of temps. from —100°F to 600°F. Sensing device of fine nickel wire. Thirty standard spans available on special order; 115V, 60 hz. Model 144 supplied with Model 1442 probe & 15 ft. extension cable. Model 1441 & 1442 probes interchangeable with standard extension cable Model 1441 utility probe of 304 stainless steel; will withstand pressure of 150 p.s.i. Model 1443 stainless high pressure fitting for inserting Model 1441 probe to pressure vessel.

Stk. No.	Type	Temp. Span	Net
62F1335	144	0-100°F	185.00
62F1336	144	150-250°F	185.00

DC AMPLIFIERS

Amplifiers are chopper stabilized vacuum tube types, which increase the versatility of the chart recorders. 5 thousand ohm; 5V max. output. Amplifiers are the same size as recorders. General sensitivity ratings are for a one milliamper recorder or galvanometer. Frequency response from DC to 5 hz. Using a 200 microampere galvanometer increases the sensitivity 5 times. Shpg. wt. 5 lbs.

MULTIPLIER BOX

Model 111A. Consists of multipliers and shunts with a selector switch. Standard Rustrak 1 MA recorder will give the following readings when used in conjunction with this box: 1-5-10-50-100-500-1000 volts or milliamperes DC.
62F1237. NET **49.50**

Model 111B. Same as above, but has readings. 3-15-30-75-150-300-750V or Ma. DC.

AMPROBE SNAP-AROUND VOLT-AMP-OHMMETERS

The most popular and asked for tools of their type. Only one volt or amp range is revealed in its unbreakable plastic window at any one time. Rotary scale eliminates guesswork and reading errors. Currents may be measured instantly and accurately. Pointer-lock freezes needle at the reading with the flick of a switch. Allows you to take readings in darkness or hard to see areas and then read away from the conductor. A valuable tool in balancing circuits, tracing faults and grounds, and diagnosing operating troubles without shutting down equipment. Built-in 25 ohm mid scale ohmmeter on RS-3 and RS-1000. Accuracy within ±3% FS. One hand operation. With case and leads.

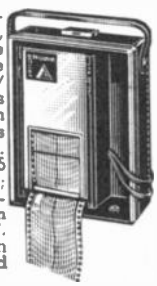
AMPROBE RECORDERS



Rugged, compact instruments in their own genuine leather case. Designed for high accuracy, dependability, and ease of operation. Small size and easy loading plus a unique design feature permits them to be used either as monitoring/recording devices or as indicating instruments making these recorders extremely versatile. Can be used as round the clock trouble shooters without the need for an operator to be present. Power requirements: 115VAC, 60 cycles, 2.5 watts. Accuracy: AC amps and volts ±3% FS; AC expanded scale volts ±1.25% FS; Temperature ±3%F on +20°F to +100°F; ±4°F on −50°F to +20°F; ±5°F on +50°F to 250°F. Chart Speed is 12"/hr. Supplied with 1 roll each of the necessary strip charts. Other chart speed available. Weight 20 oz.

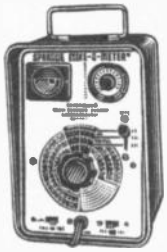
SPRAGUE TEST EQUIPMENT

● *NEW*

MODEL M-3 COMPACT CAPACITOR ANALYZER



Handy instrument outmodes troublesome methods of checking capacitors with ammeters, voltmeters, and wattmeters, and then referring to charts to establish results of different meter readings. A twist of the dial tells you whether capacitors are good or bad, giving you actual capacitance and power factor measurements by the accurate, Wein Bridge method. Safe operation assured by automatic discharge of capacitor when test switch is released. For use on 110-125 VAC, 50-60 hz. Rugged steel case finished in blue. Shpg. wt.6 lbs.

62F628. NET. **39.95**

Model TCA-1

TRANSFARAD CAPACITOR ANALYZER

Model TCA-1. Specifically designed to safely test capacitors used in transistor and other low volt, circuits. Capacitance and power fatcor are measured without danger of overheating. Low AC bridge. Cap.: 1 mmfd to 2000 mfd. in 5 ranges. Power factor: 0-50%. Dual regulation of power supply assures shorttime stability. Specially processed etched circuits and complete encapsulation of critical bridge null amp. insure long time stability. Sensitivity control for magic eye null detector permits accurate measurement of small capacitances. Cap. discharged after testing. Shpg. wt. 28 lbs.

62F633. NET. **197.50**

Model TO-6

MODEL TO-6 TEL-OHMIKE

Capacitor analyzer measuring up to 2000 mf in five overlapping ranges. 1.35 AC test voltage for use with capacitors in transistorized circuits. 10,000 Megohm at 30 volts for low-voltage check and 50,000 megohm at 150 volts for high voltage check. Electrolytics checked directly on 4-range Ma. scale (0-60Ma) Magic eye tube for balancing. 3-ranges of DC polarization, variable to 600VDC. Instant discharge automatically protects the user. Charcoal-gray panel with white designations. 8⅞x14⅝x6⅛". For operation from 115VAC 50-60 Hz. Shpg. wt. 13 lbs.

BASIC OSCILLOSCOPE UNITS

Millen's complete self-contained portable oscilloscopes are basic components for permanent incorporation into more specialized equipment. As transmitter modulation monitors, no additional equipment or accessories are required. The well known trapezoidal monitoring patterns are secured by feeding modulated carrier voltage from a pickup loop directly to the vertical plates of the cathode ray tube and audio modulating voltage to the horizontal plates. By the addition of such units as sweeps, pulse generators, amplifiers, servo sweeps, etc., all of which can be conveniently and neatly constructed on companion rack panels, the original basic scope unit can be expanded to serve any conceivable application. Sensitivity: vertical 100 volts P to P; horizontal, 120 volts P to P. Controls: intensity, Focus, Horizontal Centering, Vertical Centering, Power and Horizontal Input Selector. For 105-125 volts, 60 Hz AC. Less CR tube. Shpg. wt., 13 lbs.

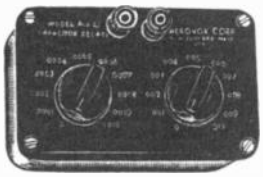
AEROVOX DECADE BOXES

• Provide Accurate Standards of Resistance, Capacitance & Inductance

Type ALD-42

Type ARD-15



Type ACD-23

Type ARD-41

All units provide accurate standards of resistance, capacitance, and inductance. Ideal for laboratory and experimental use. Decade boxes of the highest quality are available in ranges most needed for electronic and electrical laboratories for a price below that of equivalent quality standards. Boxes are available in 11 units; 4 resistance decades, 3 capacitance decades, and 4 inductance decades. Face plates are black with white numerals for maximum legibility. Heavy duty construction of seamless, drawn steel and gray enamel housing insure trouble free operation and unimpaired accuracy. Resistance model **ARD-41** is housed in special high impact plastic case which is capable of rugged handling.

In "Use" column of the following table, C indicates the Capacitance Decade Box, L the Inductance Decade Box, and R the Resistance Decade Box. Except for ALD-42 the Capacitance Decade Boxes have operating ranges of 400 to 20,000 cps. ALD-42 has a range of 400 to 5,000 cps. The new decade box, ARD-41, has a range of 0 to 1.1 megohms in 1 ohm steps, combining all the three other resistance decades into one compact box. Multiple-dial Capacitance Decade Boxes have the highest value multiplier to the left so that readings are instantly visible.

CAPACITOR AND RESISTOR DECADES

CDE decade instrument boxes provide a reliable and accurate source of precision selected values for breadboarding and substitution. Featuring common size heat and shock-resistant phenolic individual boxes, direct-reading value ranges, six-way molded nylon terminal posts, and calibration chart for capacitance boxes, these handy units are widely used in electronic and electrical application work. Size: 3 1/16 x 5 x 3 5/16, weight 2 lbs.

CDT TANTALUM BOX

CDT decade capacitors provide a reliable source of precision selected capacitance for substitution purposes in a wide variety of applications. Features CDE capacitors, smooth range selection, & heat- and shock-resistant phenolic cases. Capacitance tol: ±5% (10-100 mfd.), ±10% (100-1000 mfd.). Capacitor Dielectric: Polarized Tantalum Foil—10-100 mfd. Plain; 100-1000 mfd. etched. Max. Voltage: 50 VDC Polarized. Capacitance, mfd.: Min.—10; Max.—1100; Step—10. 2 Rotary Switches. Shpg. wt. 7 lbs.

● *NEW SOLID STATE ELECTRONIC KITS*

Create with your own hands a wide variety of electronic devices. Easy to build electronic kits that require no technical knowledge or experience to enjoy building. All kits are completely professional. Only the complexity has been reduced. Kits feature: solid state circuitry, printed circuit boards and step by step instructions for easy assembly. Projects are expandable by adding kits together. Your imagination is the only limitation.

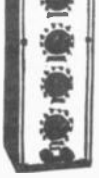
MODEL 1100-K EIA RESISTANCE SUBSTITUTION BOX KIT

Permits rapid substitution of a wide range of EIA resistance values in an operating circuit to determine the resistance required for best performance . . . determines the value of unmeasurable resistors. 36 EIA 1 watt, 10% resistors, arranged in Hi and Lo decades give resistance ranges of 15 ohms-10 megs in decade multiples of 15, 22, 33, 47, 68 and 100 ohms 5-way jack-top binding posts for connection of practically any type of test lead. Molded black bakelite cabinet with 2 color deep etched aluminum panel. With all parts, less solder and leads. Size 3¾x6½x3½". Wt., 2 lbs.
62F809. NET **8.95**
Model 1100W. As above but Factory wired.
62F807. NET 13.95

MODEL 1020K POWER AND BIAS SUPPLY KIT

Power supply includes power transformer, full-wave silicon diode rectifier circuit, heavy R-C filtering, plus two power transistors in a unique cascaded filter circuit. Ripple is reduced to 1/200 of 1% at full load. Provides continuously variable output voltage to 30 volts monitored by a dual range voltmeter (0-6, 0-30 VDC). Max. load current varies from 150 ma. in the 1-12V range to 300 ma. in the 24-30V range. Uses include hum-free operation of sensitive transistor radios, hearing aids, preamp, instruments. As a variable bias supply for transistors or tubes in circuit development; to offset AVC and AGC voltages in the alignment of TV and radio receivers or to cut off the color burst amplifier in color TV adjustment. Grey case. Size: 5x4x5½". Wt. 5 lbs.
62F856. NET **25.95**
Model 1020. As above but Factory wired.
62F857. NET **34.95**



1171-K RESISTANCE DECADE BOX KIT

Permits changing resistance in a working circuit at the flip of a switch. May be used alone or in conjunction with the model 950-K RC bridge. Supplies resistance values from 0 to 99,999 ohms. Uses ½% resistors. Separate comparator position and binding posts permit instant substitution. Steel case, 3½x12x3". With diagrams, instructions and all parts; less solder and leads. Wt., 3 lbs.

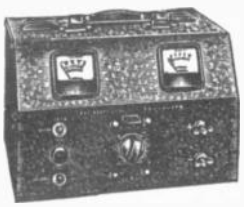
Model 1171. As above but Factory wired.
62F802. NET **34.95**

MODEL 1064K BATTERY ELIMINATOR AND CHARGER KIT

Delivers smooth, undistorted DC necessary for servicing transistorized equip., or for any application where minimum ripple, is essential. Two DC voltage ranges: 0-8v. and 0-16v. Automatic switching of appropriate ammeter range as you select either of the 2 voltage ranges. Separate volt meter and dual-range ammeter for more accurate reading. 105-125v. AC, 50/60 Hz; 150 watts. Grey steel cabinet. Size: 8½x5¾x7½". Same current, ripple ratings as Model 1060. Wt. 16 lbs.
62F870. NET **49.95**
Model 1064. As above but Factory wired.
62F871. NET 59.95

MODEL 1060-K BATTERY ELIMINATOR AND CHARGER KIT



Battery substitute for operation and servicing of battery operated transistorized, also "hybrid" and vac.-tube equip. Separate output ammeter and voltmeter. Has extra low ripple filter. Output 0-8V, @ 10 amps continuous, 0-16V @ 6 amps continuous 0.3% ripple @ 2 amps. Size: 8¾"x:0½"x7¾". With instructions, less leads 18 lbs.
62F852. NET **42.95**
Model 1060. As above but Factory wired and tested.
62F853. NET 52.95

1120K CAPACITOR SUBSTITUTION BOX

Enables rapid substitution of a wide range of RETMA capacitance values from .0001 to 0.22 mfd. in an operating circuit to determine value needed for optimum performance and to find value of badly damaged or illegible capacitors. Minimum accuracy 10%. Convenient 5-way, jack top binding posts. Size: 3¾" high x 6½" wide x 3½" deep. Shipping weight, 2 lbs. Less leads.

AC VOLT-WATT METER KIT

Model 261K. Excellent for audio design and production line applications. Provides measurements of amplifier gain/response, amplifier power output, network response and output level. Specs. VOLTMETER: Ranges: 0.01, 0.03, 0.1, 0.3, 1, 3, 10, 30, 100, 300, 1000 RMS volts. Frequency reponse: ± 0 db 10 hz-150 khz, —3 db at 500 hz, Input Impedance: 2 Megohm; Accuracy: ±4%. Specs, WATTMETER: Ranges: 0.15 mw, 1.5 mw, 15mw, 150mw, 1.5W, 15W, 150W; Frequency Response: ± 0 db, 10 hz—100 khz. Accuracy: ±5%; Internal loads: 4, 16, 600 ohms for 40W and 8 ohms for 80W. External Loads: 4, 8, 16, 600 all to 150W. The DB scale reads directly in dbm on 600 ohms load (—20 to +2 db). Relative voltage db on the same scale (0 db = 0.774 volt). Successive power ranges are 10 dbm apart. Power: 105/125V, 50/60 hz. 15W. Size: (HWD) 8½x5¾x7". With instructions. Shpg. wt., 7 lbs.

MODEL 250K AC VTVM AND AMPLIFIER KIT

Model 250K. High sensitivity, wide-band AC VTVM and AMPLIFIER of laboratory accuracy and quality. It measures AC voltage from 100 microvolts to 300 volts in 12 ranges. A function selector switch on the panel converts the instrument to a wide-band amplifier with a gain of 60 db on the 1 MV range, and a maximum output of 5 volts RMS. Stabilized power supply incorporate voltage regulator; DC-biased filaments and hum-adjust pot. Voltmeter voltage ranges: 1, 3, 10, 30, 100, 300 RMS m.v. and 1, 3, 10, 30, 100, 300 RMS volts. Max. Hum and Noise. —40 db @ 2 mv in. Amplifier max. output v. 5 RMS v. Power Reg. 105-125 VAC, 50/60 hz. 15 watts drain. Grey steel cabinet. Kit complete with instructions. Size: (HWD) 8½"x5¾"x7" Wt., 9 lbs.
62F874. Model 250K. Kit. **NET** **49.95**
62F875. Model 250. Factory wired and tested. **NET** 79.95

MODEL 232-K PEAK-TO-PEAK VTVM KIT

Features high circuit stability and accuracy. Uses 1% precision resistors throughout. Directly measures p-p voltage of complex and sine waves on scales of 0-4, 14, 42, 140, 420, 1,400 and 4,200 volts. Resis. ranges: 0-1,000 megs in 7 steps. 7 non-skip ranges on the 4 functions of: +DC volts, —DC volts, AC volts, Ohms. Frequency response: 30 Hz to 3 mc. Up to 250 mc with PRF-11 probe. DC-RMS sine voltage ranges: 0-1.5-5-15-50-150-500-1,500 volts. 4½" meter in a burnout-proof circuit. Zero center for TV-FM discriminator alignment. Input impedance 11 megohms. Calibrates without removal of cabinet. Complete with all parts, less solder. Compact in size: 8½x5x5". For 110-120 V. 50-60 Hz AC. Kit complete with instructions. Wt., 5 lbs. With Uni-Probe, ground lead and battery.

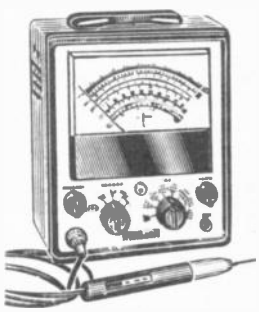
Model 232. As above but factory wired and tested. Ready to use.
62F812. NET 49.95

MODEL 235K VTVM KIT



Excellent for servicing all FM, AM, mono/color TV, and precision electronic equipment; especially qualified for the exacting measurements found in solid-state circuitry. Measures as little as 0.01 v on large easy-to-read 6" meter on its' ½ volt scale. Both peak-to-peak and RMS AC voltages are read on separate scales in 7 overlapping ranges up to 4.2KV. Frequency response: 30Hz to 3MHz. High input impedance (more than 11 megohms) assures negligible circuit loading in precision DC voltage measurements from 0.0. volt to 1.5KV in 8 overlapping ranges. Features: ceramic switches to assure non-arcing at all inputs, 1% tol. resistors, zero center for TV-FM sound detector alignment, and others. 8½" x 7½" x 5". 9 lbs.

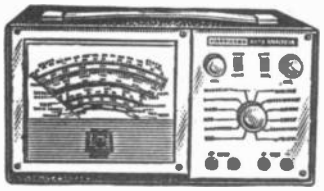
EICO® Test Equipment & Kits

● *NEW* 888 SOLID STATE UNIVERSAL ENGINE ANALYZER KIT



• Tunes Up and Trouble-Shoots Any Car or Boat

Totally portable, compactly self contained, self powered engine analyzer. Useful for all 6- or 12-volt; 4, 6, or 8 cylinder engine; negative or positive ground. Checks storage battery, generator, alternator, voltage regulator, alternator diodes, starter, starter solenoid, distributor, points, condenser, ignition coil, spark plugs, dwell angle, carburetor, all electrical wiring and accessories. Includes dwell angle meter function, tachometer function and voltmeter function with 2 accurate scales for 0-3.2 V and 0-16 V. Ammeter and ohmeter function are also offered. Requires 4 "D" batteries, a sturdy metal cabinet ,and a "how to use" manual with both test and calibration leads. 5¾ x 11½ x 5". Weight 6 lbs.

MODEL 378K AUDIO GENERATOR KIT

Extreme versatility and positive error elimination are now yours for any application where a stable, accurate audio sine wave must be used. Precisely metered output controlled by 8 position decade and fine attenuators. Highly accurate, switch - selected frequencies from 1hz to 110 Khz in 1 hz steps. Positive setting detent switches need no interpretation. Frequency accuracy: ±5%. Distortion less than 0.1% (20hz-20kc). Output voltage ranges: 0-3, 10v into hi-z (10k min.); 0-.003, .01, .03, .1, .3, 1V into ext. 600Ωload—or with int. load into ext. hi-z. Output meter accuracy: ±5% of full scale. Power requirements: 120V, 50/60 hz, 40 Watts. Size: (HWD); 8½" x 12½" x 9". Weight, 16 pounds.

UTILITY TESTER KIT MODEL 540-K

• Neon lamp AC leakage test circuit

• Multi-range AC/DC voltmeter

A versatile instrument that can be used as a multi-range AC/DC voltmeter, an ammeter, an ohmmeter, a wattmeter, and a leakage detector. 3½" meter. All voltage ranges (0-7.5-15-150-300 volts) and current range (0-15 amps) are AC/DC. 0-1000 direct reading ohms. Neon lamp ac leakage test circuit permits continuity check of resistors between 1000 ohms and 2 megohms and capacitors above .0005 mfd. Direct reading of power line voltage up to 300 volts AC/DC. Panel outlet permits metering current up to 15 amps drawn by any appliance. Provides "good-bad" readings on 6 or 12 volt storage batteries. Size: 3¾x6½x3½". With instructions. 3 lbs.

62F846. NET **12.95**

Model 540. As above, factory wired and tested.

62F847. NET **15.95**

IMPORTANT NOTE:

All probes supplied less connector — requires MC1F for EICO VTVM's (except 221).

Newark-Detroit Electronics, Inc., 20700 Hubbell Ave., Detroit, Mich. 48237

MODEL 965 FARADOHM BRIDGE/ANALYZER

Model 965. Nine-range low-voltage (0.45 VAC) capacitance-resistance bridge safely measures even 1-volt electrolytics. Capacitance range 5 pf-5000 μf; resistance range .5 ohm-500 megs. Metered bridge balance, leakage test voltage (6 DC VTVM ranges; 1.5-500V), leakage current (11 DC VTAM ranges: 0.15 μA 15 mA). DC VTVM (10 megohm input Z) and DC VTAM (75 mu drop) both externally usable. Electronically filtered leakage test supply with less than 8.5% ripple and V/A metering is ideal for transistor/diode testing supplying transistor circuit breadboards, or as a transistor battery eliminator. Complete overload protection. Requires 115 VAC, 60hz, 32 watts. 8½x12x9"; wt. 18 lbs.

62F782. Model 965. Wired and tested. **NET** **129.95**

Model 965

MODEL 369-K TV/FM SWEEP MARKER GENERATOR KIT

The EICO 369 feeds sweep signal only to i.f. strip being aligned. At the output end of the circuit a demodulator cable picks off the signal, demodulates it, and feeds the demodulated signal to a mixer stage inside the generator where the markers are added. It means that a TV technician can align TV and FM i.f. strips faster and more accurately. Five Ranges: 75-220 Mhz; 36-95 Mhz; 16-42 Mhz; 6-16 Mhz and 3-7.5 Mhz. All five ranges are fundamentals and tuning the desired frequency is simplified by a 6:1 vernier dial and a 330° scale. Output impedance is 50 ohms. A 6BQ7-A sweep oscillator and rf output cathode follower, a 12AT7 variable and crystal marker oscillator, a 12AX7 blanking diode and first agc amplifier, a 6DR7 second agc amplifier and agc series regulator. For 110-120v A.C. Shpg. wt. 18 lbs.

EXTRA RESISTANCE BULBS

Model SA-309. Plastic, moisture-sealed 8' polyethylene ribbon lead.
55F689. NET **4.50**

Model SA-162. Copper clad element, 14 ft. polyethylene ribbon lead, and spade terminals. Interchangeable with SA-309.
55F690. NET **6.50**

LIGHTING LEVEL INDICATOR

Model 7902-FC. Handy pocket-size meter, 3¼"x2⅛"x1⅛", for checking lighting level of various work areas. Simply place meter on working surface, and it quickly shows if the light level is adequate for efficient operation, or if eye strain or fatigue may result because the level is too high or too low. Also usd by custodial maintenance staffs, lamp and fixture manufacturers, and others concerned with providing suitable lighting. With certain modifications the indicator has applications in some phases of photography. The light meter was developed in colaboration with utility members of Edison Electric Institute for their light promotion courses.

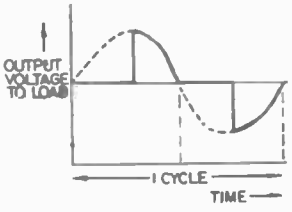
PILLAR CORPORATION

Terminal connectors are standard on all "PILLAR" Power-Pac

● *NEW* STATIC A.C. POWER CONTROLLER

Features:
- **All solid state AC power controlled**
- **Rugged design fully protected**
- **Ample overload capacity**
- **High surge rating**
- **Variable voltage DC available with additional rectifiers**



The basic A.C. CONTROLLER-PAC is an all static power controller, designed for operation on 120V-240V, 60 hz. Power supplied by means of phase controlled solid state switches Static power switching and control elements employed to provide a reliable and efficient power switch or proportional power controller.

Figure 1 indicates the principle of operation. Input control signal may be derived by means of a simple relay closure, a potentiometer setting, or an isolated low level D.C. control signal. At full input power, a 60 hz sine wave is impressed upon the load; at lower power levels, output wave is like SCR phase controller.

Completely self contained in a single compact package, measuring 7 15/16" x 6¾" x 3⅜" for 15 amp models and 7 11/16" x 6¾" x 6¾" for 30 amp models. Line power and load connections, as well as input control connections, are the only external terminations necessary for the operation. Full rated up to 40°C, derated at .25A/°C over this temp.

Figure 1

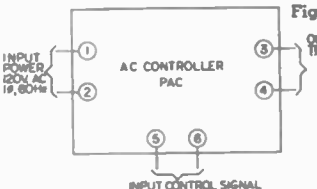


Figure 2

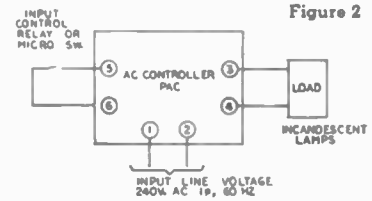

Figure 3

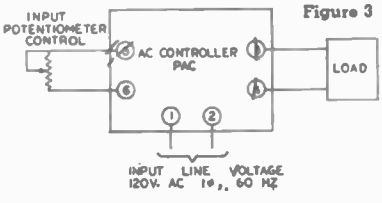

● *NEW* CONTROL CONFIGURATIONS

C-1 INPUT. Simple relay or contact closure, not isolated from AC line. Contact rating required of input switch is 2 mA with less than 50 mA peak requirement.

C-1 OUTPUT. From 0 to 98% of input V when input control switch is closed.

C-3 INPUT. Potentiometer adjustment with potentiometer, rated, 2 W, use 250K ohms for 120V & 800K ohms for 240V.

C-3 OUTPUT. Output V comes onto load as a function of input potentiometer setting.

APPLICATION EXAMPLES FIG. 2

System application requires that full power be applied instantly to the load when the input control relay is closed. No power should be applied to the load when the input control relay is open.

APPLICATION EXAMPLES FIG. 3

Control the power to a UNIVERSAL motor from "OFF" to full "ON" (120 volts, 6 amps, 60 hz). as a function of an input potentiometer setting.

FOUR MOUNTING HOLES 0.281" dia. between centers are 4" and 7¼". Mounting feet available to allow proper ventilation, and must be used, if unit is operated on a bench top.

FIG. D ELECTRONIC POWER TYPES

Available in electronic-power component types providing a regulated source of plate and filament voltages. The CVF series provides 6.0 or 6.3 volts of output regulated within ±1% over line variations of ±15%. The series CVE series, a combination of the plate and filament types, regulates within ±3%. Both series, which include filaments with stabilized voltage supplies, operates reliably, feature long component life, and need less servicing than competitor's materials.

Transformers & Power Supplies

SOLA ELECTRIC SB
DIVISION OF SOLA BASIC INDUSTRIES

TYPE CVN NORMAL HARMONIC TYPE TRANSFORMERS

CVN type transformers provide the same ±1% regulation as the sinusoidal series. Contain an average of 20% rms harmonic content and are especially recommended for electrical loads not affected by harmonics, such as solenoids, relays, filaments, and where rectification is required. †indicates 95-130. (*) indicates 95-130/175-235/190-260. (**) indicates an input voltage of 190-260/380-520. (***) indicates 95-130/190-260. (††) indicates 190-260.

FIG. E. FIXED CONSTANT VOLTAGE DC POWER SUPPLIES

Will withstand high transient overload without damage or output voltage drop. Output regulation ±1% or less over 100-130v. input range. 1% repple except 281200 and 281250 which are ½%. Load regulation less than 4% from 20% to full load. Efficiency approx. 75%. Output impedance approx. .5 ohm. Mounted on standard 19x5¼x9¾" rack panel. Input 100-300, 60 hz. AC.

CV MULTI-TAP TRANSFORMER

112 rectifier outputs from one transformer with live regulation of ±1% or less. Eliminates tandem-hook-ups and special transformers for proto-typing, lab work, and short production runs.

A power source to both AC and DC outputs. Typical AC outputs (Regulated): 3.;4,27.2, 24.0, 22.0, 1.4, 36.0, 14.9, 13.4, 12.6, 11.6, 10.8.

Superior Variable Transformers

"POWERSTAT" VARIABLE TRANSFORMERS

An autotransformer of toroidal core design with a movable brush-tap riding on the Gold-plated bared portion of the winding.. Delivers from 0 to or above line voltage. Operating temp. rise is less than 50°C above ambient. Special Gold plated plating and polishing process produces a glass-smooth commutator surface which is forever free of oxides.

(F) with fuses in the output brush leads and terminal boards enclosed. Knock-outs in enclosures permit wiring with BX or equivalent. (T) terminal boards enclosed. (2PF) parallel blade plug. (3PN) standard 3-blade plug. (-2) 2-gang. (-3) 3-ganged. Single phase except where otherwise noted. All 136-236 and 1156-1256 units have POWERKOTE coils for greater stability.

METERED KNOB ASSEMBLIES FOR BACK OF PANEL MOUNTED UNITS

Can be combined with standard cataloged POWERSTAT variable transformers that are designed or adaptable for back panel mounting. Easily adapted for retrofitting existing installations. Large functionally designed knob turns freely while meter remains stationary. Accurate voltmeter insensitive to stray magnetic fields. Consists of metered knob, mounting screws and complete wiring and installation instructions.

VS150—Where 120 volt duty is required. Has 0-150 meter scale.

VS300—Where 240 volt duty is required. Has 0-300 meter scale.

METERED KNOB POWERSTAT® VARIABLE TRANSFORMERS

Designed for back-of-panel or general utility mounting. Excellent for use in laboratories, and inspection and test applications where voltage must be controlled without the necessity of installing a separate way of measuring voltage. Have knobs which include a stationary direct-reading voltmeter; Accuracy of ±3% of full scale. 240 volt types have 0-300 volt scales. 120 volt types have 0-150 volt scales.

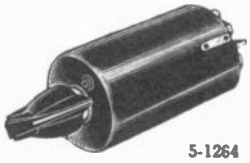
Superior Transformers

POWERSTAT 400/800 HZ TRANSFORMERS

5-1262



5-1264

For high-frequency uses in aircraft, ships, missiles, and industry. Single- and three-phase 400/800 hz, manual and motor-driven air-cooled 28-120-, and 480-v models in 56 VA to 7.3 KVA ratings. Operate at —55° to +40° ambient at full rated load (reducing to +80°C); altitudes to 50,000 ft.: up to 95% rel. humidity; vibration, shock and inclination per MIL-T-17113; corrosion resistance per QQM-115-A and other military specs. Manual units knob-operated, but screw-driver slot method of turning optional for HS and HMQ single phase. Open construction unless specified * enclosed. † indicates square frame construction. Specify mtg. when ordering.

VARIABLE TRANSFORMER WITH ISOLATED SECONDARY

Powerstat type LW-136B is a double wound assembly. The one phase unit can be connected for either 120-volt or 240-volt, 50/60 cycle input; source of 0-30 volts isolated output; either a 120-volt or 240-volt line corrector; or either a 120-volt or 240-volt limited range "buck-boost" variable transformer. The three-phase, three-gang unit can be connected for either 240-volt or 480-vole, 60 hz input or source of 0-60 volts isolated output; either a 240-volt or 480-volt line corrector; or either a 240-volt or 480-volt limited range "buck-boost" variable transformer. Gray enamel finish. Shpg. wt., LW136B—25 lbs. LW136B-3—77 lbs. Features POWERKOTE coils.

MULTI-PURPOSE POWERSTAT

Type 5-1011. Miniaturized for 400/1600 hz, 1 phase service has connections for use as limited range variable transformer, low voltage output variable transformer, and line corrector. As limited ranae variable transformer with 115-volt input, may connect for output of 83-113 V, 2.6 amp., 0.29 max. KVA; 98-130 V, 2.6 amp. 0.34 max. KVA; or 116-149 V, 2.6 amp., 0.39 max. KVA. As low voltage output variable transformer with 115 V, input may connect for an output of 0-26 V, 2.6 amp., 0.068 max. KVA. As line corrector may connect to correct to output of 115 volts, 2.6 amp., 0.30 max. KVA from input of 90-113 volts, 104-133 volts or 117-149 volts. Only 1 13/16" in dia., 2 11/16" depth behind panel. Wt., 1 lb.

Stk. No.	Type	Net Ea.

SUPERIOR TYPE UC1MB VOLTBOX

Type UC1MB

Type UC1MB. Voltbox. For AC variable voltage testing up to 10 amps. Has Powerstat, direct reading voltmeter. Input: 120 volts, 50/60 hz. Output: 0-140 volts, 1.4 KVA. Includes renewable fuse, 6-foot cord-plug. Size: 7 7/8x8½". Sh. wt., 17 lbs.

Stk. No.	Type	1-5	6-24	25-99
5F820	UC1MB	80.00	72.00	68.00

SUPERIOR POWERSTAT VARIABLE VOLTAGE TRANSFORMERS

Rotation of brush tap delivers a continuously-adjustable voltage from AC power lines over range efrom zero to or above line voltage. Manual and motor-driven, open and enclosed air-cooled types are available for 120, 240 and 480 volt, 25, 50/60 cycle, single and three phase service in rating from 1.8 KVA to 2.1 KVA. Current rating available over entire range of output voltage. Zero waveform distortion, negligible maintenance. gold-alloy plated commutator, excellent regulation, POWERKOTE coils. ††Uncased.

FOR 120 VOLT, 50/60 Hz SINGLE-PHASE

FLEXIFORMER PACKAGED TRANSFORMERS PRIMARY

Model TP150. This transformer is a self-contained toroidal primary coil incased in durable high impact plastic; the center opening permits hand-winding the proper number of secondary turns for the desired turns ratio. The primary consists of a strip-wound silicon-steel core having a coil of 400 turns of copper wire. Input rating: 120V, 50/60 hz at 150VA. As a current transformer, maximum primary current is 400A. With 5-way binding posts for connections. Size, 6 x 5¾ x 4⅜"; shpg. wt., 6 lbs.

5F770. 1-1 NET EACH **30.00**

12-99 NET EACH **25.50**

Model TP1000. Similar to above, except rated 1000VA at 120V 50/60 hz. Maximum input voltage: 175V, 60c- 145V, 50c.

5F645. 1-11 NET EACH **85.00**

12-99 NET EACH **73.75**

NEWARK — dependable service

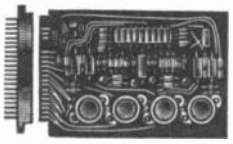
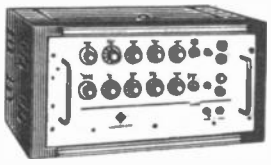
Superior Regulators & Transformers

● NEW TRANSLATOR MODULES



Plug-in printed circuit board with logic capability for stepping motor in increments of 1.8°. Requires 30V, center-tapped dc supply with max. ripple of 5%. Depending on regulation of power supply, voltage may have to be varied to maintain rated voltage to motor. The units can be triggered by a 10-15 V negative change of voltage with min. pulse width of 50 msec. Input imped. 500Ω. STM1800V is similar to STM1800 but with built-in oscillator adjustable to drive motor to speeds from 4 steps/sec. up to max. motor speed. Dropping resistors are needed with all motors. Shpg. wt. 1 lb.

Stock No.	Type Number	Net Each
5F750	STM1800	55.00
5F751	STM1800V	65.00



2SP1800-4

2SP1800B-4

● NEW SLO-SYN PRESET INDEXERS

SLO-SYN Preset Indexers are used for controlling indexing operations in applications using bifilar SLO-SYN motors for positioning. They automatically provide correct switching sequence needed to drive motors the required number of steps and have provisions for actuating external equipment needed to perform related operations. Dials on control panel can be set to provide desired number of steps. May be operated in any ambient temp. from 0°C to +40°C. Dropping resistor required. Shpg. wt. 19 lbs. except * 63 lbs. and † 64 lbs.

IES SERIES VOLTAGE REGULATOR

Regulates output voltage through controlled firing of inverse parallel pair of SCR's connected in the shunt leg of an autotransformer. Solid state circuitry and smaller, lighter units are featured. No vacuum tubes, motors, blowers or relays are used. Wide operating frequency range: 50 or 60 cycles ±10%. Maintains output voltage within 100 millivolt rms band for any combination of input voltage and load current changes and for changes in load power factor from 1.0 to 0 lagging. Distortion will not exceed 3%. Speed of response instantaneous for most applications. Time constant response: 30 milliseconds. Operated at ambient temperatures from 0 to 50°C. Temperature coefficient: 0.01%/°C; output voltage will change 0.01% for a degree C change. Mounted in cabinet. All except Type IES9115 have cabinets which can also be rack mounted by removing the feet. Provisions for remote sensing. Also features a removable plug-in circuit board. High VA efficiency (up to 95%). Includes an overcurrent protection circuit which senses the magnitude of flowing current in SCR leg and removes gate drive from SCR's when current exceeds pre-set magnitude.

SLO-SYN SYNCHRONOUS/STEPPING MOTORS

Standard Types. Rugged bi-directional motors that can be used either as AC constant-speed motors or DC stepping motors. Rated for continuous duty at 40°C max. Types with suffix P1, P2, etc. have planetary gear speed reduction assemblies mounted on motor to lower speed and increase torque; assemblies are in dustproof enclosure, employ nylon gears. Types with RC suffix have built-in phase shift network for single-phase operation; other units operate from 2-phase current, require external RC network for 1-phase use (see below for components). Avg. shpg. wt., 6½ lbs.

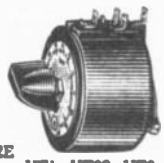
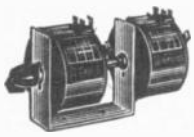
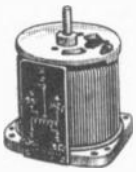
OHMITE "V.T." VARIABLE TRANSFORMERS

VT02E
In Case VT1, VT02, VT3

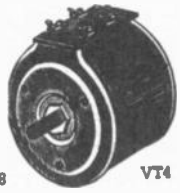




VT02-2



VT8



VT4

VT20

Six sizes for a wide range of electrical ratings. Excellent regulation at any point within the rated load. Output free of wave form distortion. Deliver full rated current at any brush setting. Have overvoltage feature, except those marked "No Overvoltage", and high-current low-voltage to meet transistorized power supplies and high current applications.

All units single phase except Two-in-Tandem. All may be used to over 400 hz. Screw terminals and solder lugs on all models except types VT1, VT02, and VT3 which have solder lugs and accept push on connectors and have 3/8-32 threaded bushings for single mount. Shafts may be extended from the brush or base side. VT20 has a collet shaft lock for repositioning without scoring shaft. Dials on overvoltage models calibrated for overvoltage and normal line connection. Knob, dial, mounting hardware supplied.

SPRAGUE

TRIGATE PULSE TRANSFORMERS FOR LOW-COST SCR CIRCUIT APPLICATORS

For SCR triggering applications where excellent low cost performance is required. Balanced pulse characteristics and energy transfer from primary to secondary and tertiary windings. Min. saturation effect. Fast pulse rise time and increased current capability to prevent SCR di/dt failure. Transformer leads polyuretiane insulated magnet wire. May be soldered directly to terminals or other circuit components without need for removal of wire insulation. For operation over temp. range of —10°C to +70°C.

NEWARK NOW HAS TEN GREAT WAREHOUSES AROUND THE COUNTRY TO GIVE YOU QUALITY PRODUCTS CONVENIENTLY.

MAKE NEWARK YOUR DEPENDABLE SOURCE FOR ALL ELECTRONIC COMPONENTS

Whether ordering in quantity for production or in small lots for specialized use, make Newark your headquarters for every electronic component. — Get the exact part you need from an inventory of over 70,000 units! Top Quality, Lowest Prices, Fastest Service.

Voltage Regulation & Control Devices

G-E "VOLT-PAC" VARIABLE TRANSFORMER

Provides continuously adjustable output voltage. Handles short duration current surges up to 10 times rated current and overload current up to 2 times rated current for approximately ¼ hour without overheating. Maximum output currents applicable up to 100% voltage. Core consists of high grade strip wound silicon steel, plus moulded phenolic winding form to insulate coil from form. Types for 50-60 cycles, except (*) for 60 cycles only. Cased units with enclosed terminal boards, plug-and cord-set units, motor-operated units, multiple-core units, three-phase units, and automatic control units are available through Newark.

120V INPUT — UNCASED, SINGLE CORE

All units provide 0-140V overvoltage output except * 0-132V, † no overvoltage, 0-120V only. "Max. amps": output into constant-Z load at or below 120V; at overvoltage "rated" current should not be exceeded. Uncased, with exposed terminals.

Stock No.	Type No.	Max. Amps.	Rated Amps.	Shpg. Wt.	1-9	10-24	25-99	100-Up

AC VOLTAGE STABILIZERS

Static-magnetic transformer-type units provide voltage maintained within ± 1% while input fluctuates ±15%. Unfiltered output waveform is relatively flat-topped, with 15-20% harmonic content; filtered types provide near-sinusoidal output, maximum harmonic content 3%. **All units are for single-phase, 60 cycle AC only; stabilized output 118V except as noted. Completely enclosed, with enclosed terminals, except** units rated below 250 V-A have insulated **cable leads.**

Unfiltered Types. All have 118V output except * 118/236V.

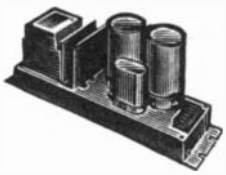
REGULATED DC POWER SUPPLIES



Furnish fixed DC output voltage within ± 1% tolerance while input AC voltage varies ± 15%. All units feature rugged magnetic and semiconductor circuitry and are designed for chassis or standard 19" rack mounting. Short-circuit current is limited to approximately twice the rated value. Can be installed with either polarity grounded. Input voltage range: 97-130VAC, 60 cps, 40°C ambient. Output ripple level 1% rms max. Efficiency 70-85% for normal output levels; efficiency may decrease for unusually low output levels.

STACO VARIABLE AUTOTRANSFORMERS

Wide selection of autotransformers designed to deliver variable output voltages with high efficiency, reliability, and minimum maintenance. The optimum core and coil design used in these transformers result in higher current ratings and greater overload capabilities. Units are designed to deliver output voltages of zero to line voltage, or zero to 17%. Above line voltage. Terminals permit connection for increasing voltage in either clockwise or counterclockwise rotation of knob. Regulation is substantially independent of the load; zero wave form distortion. Moderate temperature rise. Precious metal plating of the commutator surface eliminates oxidation and deterioration. All units are designed for 50/60Hz operation unless otherwise noted. *60Hz only at over-voltage, factory connection for line voltage output. **60Hz operation only.

STACO DELUXE LINE

Exclusive line of variable transformers feature diode-protected meters (to guard against accidental burnout); insulated banana jacks on all metered units: easy to read, bold type facilitates accurate measurements. Positive stops are built into all control knobs to insure against internal damage and to assure no loss of index on the calibrated dials. Circuit breakers are employed to avoid the inconvenience and cost of fuse replacement, with the exception of the E171, which is fused. Enclosures are tamper-proof and movements are accurate within 2%. Pilot lights are provided with each unit at no extra cost. Efficiency is as high as 98%, and under maximum-output-voltage conditions at rated current, better than 5% regulation can be attained. Convenience outlets on most units add versatility to your work area. Conservative ratings allow continuous operation with a 10% to 17% output voltage above input. Available are variable autotransformers for every industrial, classroom, or laboratory application. Ammeter, voltmeter, or wattmeter, or a combination of all these are available. A selector switch is provided for use with dual scale meters to assure greater accuracy in meter readings. All units are supplied with a ventilated case, constructed of extruded aluminum and baked epoxy painted 18-gauge steel. The front panel is aluminum with permanently etched legends. The convenient carrying handle is anodized, rugged extruded aluminum. All units are designed to meet UL and CSA standards of safety.

Note: Types E501, E501VA, E501VAW, E1010V, E1010VA, E1010VAW have both a convenience AC and DC output of 10% of the output current rating of the unit. Outputs are available at banana receptacles. EJ401V, EJ901V also have a 0-120VDC output at full rated current available at banana receptacles. All convenience outlets provide 120VAC at 10 AMPS minimum.

● NEW LOW CURRENT CONTROL TRANSFORMERS

Versatile series of low current control transformers suited for flot lamps, miniature relays, low current-low voltage power supply application. Primaries 117 volt, 50-60 hz. Three isolated 12-volt secondaries (one with a center tap). Can be series or parallel connected.

Chicago-Stancor Transformers

POWER TRANSFORMERS

Shielded against magnetic and electrostatic fields by one piece drawn steel cases. Vac. impreg. coils, compound filled under heat and pressure to resist moisture. Cores are high grade, non-aging silicon steel. All transformers are guaranteed to operate at rated values with EIA heat rise standards. For operation from 110-120 volts, 50-60 cps. AC. Type PCC-250 has 2nd fil. 5 Volts/2 amp.

Type PCC
Type PCR

Type PSR
Type PSC

STEPUP-STEPDOWN AUTOTRANSFORMERS

Type PSU. Designed specifically for use with air conditioners in converting a 208 volt unit to a 230 volt line. 60 cycle operation, 208 v/230 v, 230 v/208 v. Converting from 230 volt unit to a 208 volt line is done by a simple connection inside outlet box. Unit is for air conditioners using 1 to 2 hp motors.

MINIATURE TRANSFORMERS

Top efficiency miniature transformers. Designed for a wide range of civilian and government applications. Used by many manufacturers of hearing aids and a variety of miniature electronic devices where maximum efficiency is necessary. Ideal for original equipment and for replacement.

TRANSISTOR BLOCKING OSCILLATOR-CONVERTERS

Designed specifically for use in single transistor blocking oscillator circuits. The DC output voltage of TR-464 is rated for a quadruple rectifier circuit and may vary some due to bias.

CONVERTER-EPOXY MOLDED TOROID-DC to DC

Ideally suited for powering all kinds of battery operated equipment, these transistor power supply transformers give a wide range of voltage and power from which to choose. Complete instructions included. All case Type TM1.

PULSE TRANSFORMERS — TRANSISTOR TYPE

Built to meet MIL-T-2103B specifications. All have 5/16 Diameter and 5/16 Height. RAV-7 Case.

MILITARY STANDARD TRANSFORMERS

These transformers bear government classification and part numbers as shown below. Dimensions, mounting centers, terminal arrangements, and markings are all in accordance with government specifications. All units will meet the requirements of Grade 4 MIL-T-27B specifications for Class R operation. Input, Output, and Interstage Transformers are 300 to 10000 CPS; Maximum Altitude 50000 ft. Case style AJ.

INPUT

MIL-T-27B LOW FREQUENCY HIGH Q INDUCTORS

Units have magnetic shielding as well as humbucking construction. Designed to a Q of 40 or more on frequencies ranging from 60 to 300 cycles. Split winding termination.

ALIGNAIRE INDUCTORS—VARIABLE

Ideally suited for hard to align or frequently changed circuits. Applicable to mid-audio tuned freq. circuits. Case type AL-1—$1\frac{7}{32}$x$1\frac{1}{8}$x$2\frac{5}{32}$ except * case type AL-3—$1\frac{1}{16}$x$1\frac{7}{32}$x$1\frac{11}{32}$ (not illus.).

TYPE HS-HSM HERMETICALLY SEALED TRANSFORMERS

HS-HSM series transformers are designed to meet MIL-T-27B requirements. Equip. using these transformers need not be redesigned to submit for MIL. approval.

These transformers are permanently marked with electrical and test data as specified in MIL-T-27B. All are "Climatite" treated. Avg. wt. 10 oz.

CASE Z

TYPE R COMBINED PLATE AND FILAMENT TRANSFORMERS—Primary 115 Volts, 50-60 Cycles

All types are "Climatite" treated for protection against moisture and for elimination of lamination chatter. Hold temp. rise below 55°C. Only copper foil static shields, grounded to the case and core, are used. Leads are UL approved. All connection data permanently marked on case.

"Red Spec"

TYPE SP "RED SPEC" TRANSISTOR TRANSFORMERS

Type SP. Designed especially for use in transistorized and printed circuit applications, these units come in tough epoxy-molded cases, weigh 1/10 oz.! Incorporate .020" dia. strong nickel-alloy leads spaced on standard 1/10" grid ctrs. to fit printed circuit boards. Base dimensions: .310x.410". Lead length: ¾". Meet MIL-T-27B specs. *SP-66 is an output-isolation transformer. Shpg. wt., 1 oz.

EC Series

EC SERIES. Powdered nickel alloy dust cores closely approach perfect inductor with high "Q", high stability with level and temp. High res. to shock and vibration. Ind. coils held to 2% inductance tol. Supplied in molded epoxy to meet MIL-T-27B. Size: 1 5/16 dia. x 23/32" ht. Shpg. wt., 1½ lbs. EK series comes with plastic coated leads. Size: 1 11/16D. x ⅞H.

PM SERIES "PICO MINIATURE" TRANSFORMERS

For use in impedance matching applications. Frequency response ±2 db 300 hz to 100 khz. PM-F types are open-frame construction with wire leads, resin impregnated, MIL type TF6RX; size .406 x .250 x .375", wt., .05 oz. PM-M types are epoxy molded, with gold-plated leads on .1" centers for printed circuit applications, Mil type TF5RX; size .410 x .465 x .310", wt., .1 oz. PM90 is mu-metal shield can for PM-M types only; provides 20 db magnetic shielding.

MM-M

M & MT SERIES MINIATURE AUDIO AND TRANSISTOR TRANSFORMERS

M-A types are aluminum cased, MIL TF3RX, .875D x 1⅜16" H, wt. 1¼ oz. M-FB types are open frame with mtg. channel (1⅜" ctrs.), MIL TF6RX, wt. 1 oz. 1⅝32 x ⅞ x ⅞", MIL TF5RX, wt. 1¾ oz. M-AG types have compression sealed ceramic terminals in MIL-T-27B AG case, TF4RX. M90 shield can fits M-A types, provides 25 db shielding.

Collins Toroidal Coils

MOLDED PLASTIC TYPE MPF

Molded in high temperature resin. All have tinned brass terminals. Excellent Q characteristics. Normally used in the range of 1 Khz to 15 Khz. Useful for filters, oscillators, and tuned transformers. Mounts with 3-48 screw. Tapped hole. Ambient temperature range: —55°C to +105°C. Size: 0.738"H. x 0.688"L. x 0.375"W. VALUES OF INDUCTANCE IN 20% INCREMENTS ARE AVAILABLE FROM 5mh TO 3H.

MOLDED PLASTIC MP-206 TOROIDS—FOR FREQUENCIES UP TO 20 KHZ

Commonly called the Wedding Ring. Excellent Q characteristics compatible with size and weight requirements of portable and airborne equipments. Molded in hi-temp resin. Terminals are tinned brass. Mounts with 6-32 screw. Tapped hole. Ambient temp. range. —55°C. to 105°C. Normally used in the range of 1 Khz to 20 Khz. Dia.: 1 1/16" ±1/64. Thickness: 1/2" ±1/64".

VALUES OF INDUCTANCE IN 20% INCREMENTS ARE AVAILABLE FROM 5mh TO 3h.

Newark-New Orleans Electronic Corp., 100 Jefferson Hwy., New Orleans, La. 70121

Collins Toroidal Coils

TYPE MIC TOROIDS

Meets MIL-T-27B Grade 4, Class R. For almost any application requiring a high Q miniature inductor. Essentially no external magnetic field and no capacitive coupling to nearby circuitry. Automatic machine insertion. Insulation resistance is 10,000 megohms minimum at 100 v DC. 100 v RMS dielectric strength. Ambient temperature range is —55°C to +85°C. Inductance change with temperature is ±2% over range of —20°C to ±85°C. AC and DC saturation—Ultra linear to high excitation levels.

TYPE MIH MICRO INDUCTORS

These inductors may be used in most applications requiring a high Q and miniature size. Hermetically sealed tall TO-5 type transistor case. Standard inductance values are available in 20% increments from 1μH to 1 MH for frequencies to 10 MHz.

MOLDED PLASTIC TYPE MP-254 TOROIDS—FOR FREQUENCIES UP TO 8KC

Molded Plastic Type MP-254. Features exceptional Q below 5KC. Useful for critical filters, oscillators and tuned transformers in the above range. Provides filters of sharp characteristics and highest power capabilities. Molded in hi-temp resin. Tinned brass terminals. Mounts with 8-32 screw. Tapped hole. 2" dia., 1" thk. Values of inductance in 20% increments are available from 20Mh to 36th.

MOLDED PLASTIC CORE TYPE MP-848 TOROID—FOR FREQUENCIES UP TO 100 KHZ

Low permeability core material for use in the frequency range of 2hz to 100hz. Molded in hi-temp resin. Tinned brass terminals. Coefficient of Inductance: ±180 PPM/° C over AN. Mounts with 6-32 screw. Tapped hole. Ambient temp. range: —55°C. to 105°C. Values of industance in 20% increments are available from 2mh to 500mh.

MOLDED PLASTIC TYPE MP-930 TOROID—FOR FREQUENCIES UP TO 10 KHZ

Provides higher Q, power level and stability, with only slight increase in weight and volume. For use in frequency range of 500 hertz to 10kh3. Molded in hi-temp resin. Tinned brass terminals. Ambient temp. range: —55°C. to +105°C. Mounts with 6-32 screw. Tapped hole. 1 9/16"D.x 7/32" Thk. Values of inductance in 20% increments are available from 5mh to 17.5h.

Miniature Transformers

"SUB-OUNCERS"

Tiny transformers for use in hearing aids, pocket radios, etc. Measure only 2 3/32 x 7/8 x 1 1/32"H. Weight .03 lb. each. Frequency response, ±3 db. 200-5,000 cps.
**Indicates split winding.

DI-T TRANSISTOR TRANSFORMERS
Meet MIL-T-27B-TF4RX

DI-T. Smaller than the DO-T Deci-Ouncers. Power ratings and other characteristics identical to DO-T's, except frequency response is approximately ±2 db, 260-20khz. Hermetically sealed; rated for Class R (105°C max. operating) temp. conditions. Size 5/16D x 1 1/4"H, wt. 1/15 oz.
DI-T200. As above, with uninsulated leads spaced on .1" radius for printed circuit boards. Size 5/16D x 3/8"H., wt. 1/15 oz.

"OUNCER" AUDIOS

Famous one ounce audio transformers represent the acme in compact quality transformers. High fidelity from 30-20,000 cps. Maximum output level +8 db at 6.3 mw. Application: Input and Mixing, Interstage and Output Transformers. Fully impregnated and sealed in a drawn aluminum housing. Size: 7/8" dia. x 1 3/16". Wt. 1 oz.

DO-T TRANSISTOR TRANSFORMERS

Provides unprecedented power handling capacity, reliability, plus ultra small size. Hermetically sealed, metal cased to MIL-T-27B-TF4RX. Greater power rating, ±2 db, 200 cps —20KC. Low distortion. Anchored leads stand 10 lb. pull test; tinned and insulated copper conductors. For transistor use only. Size: 1 3/32" long; 5/16" diameter. Weight 1/10 oz.

● NEW PIL ULTRAMINIATURE AUDIO TRANSFORMERS & INDUCTORS

These transformers and inductors incorporate the same construction as the DO-T units. PIL units are hermetically sealed to MIL-T-27B, are metal encased. Grade 4. All units terminated in insulated, tinned solid copper leads. Split winding inductors; inductance values shown are for 0 ma dc. 23/64 D. x 1/4" H. Actual wt. 1/20 oz.

400-CYCLE FILAMENT TRANSFORMERS

These new transformers combine smallness of size and lightness of weight with the maximum possible reliability. These versatile midgets are suitable for either ground or airborne use applications. Molded specifically to meet MIL-T-27B-TF5SX specifications. Primary, 105/115 volts, 380-1000 cycles per second. Secondary, 6.3 volts, center tap.

MINIDUCTORS

MIL-T-27B-TF5RX

Hi Q in miniature form. Ideal for transistor use and printed circuits. High temp. stability (—55°C to 100°C). ML-0 to 4, MO-.1 to 1 are medium low frequencies—400 cyc., MM and MW for medium frequencits and MH for high frequencies. ML case 7/16 x 31/64 x 7/16". Wt. 1/5 oz. MM and MH cases 7/16"D x 1/4"H. Wt. .07 oz. MO case 3/4"" x 1 1/16" x 13/16"H. Wt. 1 oz. MW case 29/32"D x 13/32"H. Wt. 1/4 oz.

VARIABLE INDUCTORS

Variable units for use in tuned audio circuits. Adjustment of set screw on side of case permits change in inductance of +85% to —45% of mean value shown. In die-cast case. Size: 1 11/32x1 1/4x1 7/16". Current rating shown is max. MADC. Weight, 5½ oz.

TVC HERMETIC VARIDUCTORS

TVC Inductors are identical to the HVC units below but provide taps at 30% and 50% of total turns. Manufactured and guaranteed to MIL-T-27B by full environmental testing. Ideal for oscillator circuits impedance matching, and phase inversion where high Q and adjustable inductance are required. Dimensions: 1⅛ x 25/32 x 1 9/32". Approximate weight: 2 ounces.

UTC HIGH Q TOROID INDUCTORS

The MQ series are ideal for audio, carrier and supersonic fields. Laboratory adjusted to 1% tolerance, inductance is virtually independent of frequency, temperature and vibration. Low hum pickup. Shielded case affords high permeability. Hermetically sealed to meet MIL-T-27B. Case similar to HVC above.

‡Indicates inductances expressed in mhy.

OSCILLOSCOPE TRANSFORMER

Type H-198. Highly shielded scope transformer in hermetically sealed Mil-T-27BTF4RX specs. 800, 1600 & 2400 V. plate windings (no CT) supply approx. 1000, 2000 or 3000 V. DC at 5 ma. allowing great flexibility in application. Has 1.25 V. .2A rect. fil. winding connected to one end of HV winding. Separate 6.3 V. .6A fil. winding insulated to withstand anode voltages. Pri. 115V 50/60 cycle. Case similar to SM. Size 3 1/16x2 5/16x4 1/4".

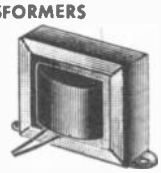
FILAMENT/TRANSISTOR TRANSFORMERS



Type FT Channel Frame. Primary: 115 volts 50/60 Hz. Test Volts RMS: 1500 All units are low temperature rise, vacuum-sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Approximate weight 2 lbs. FT13, FT14, FT15 & FT16 have taps on primary to modify nom. sec. V. ±6%, +12%.

POWER LINE ISOLATION TRANSFORMERS

Ultrashielded hermetically sealed units. Less than 1/10th mmfd. effective capacity between primary and secondary permits isolation formerly obtained only from battery power. Separate terminal for each shield. Input and output terminals on opposite sides of case. Primary & secondary—115 V 50/60 Hz.

TYPE AFH TWIST PRONG ELECTROLYTICS

Designed for filter audio bypass applications in radio-TV and amplifier equipment. Also used in many industrial applications. Manufactured to exceed requirements of EIA Spec. RS-154. 85°C operation; high purity aluminum foil throughout; moisture-resistant seal. For use over a wide temperature range with minimum change capacitance. Positive lugs on bakelite base. Can serve as common negative terminal with twist lugs for upright mounting on metal chassis. Bakelite metal mounting washers furnished. Shpg. wt., 4 oz.

AEROVOX Capacitors

Ultra miniature tubular aluminum cased electrolytics with tinned copper leads. Ideal for use in by-pass, filters and coupling applications. Temp. range: —30°C to +85°C. All welded construction and high purity ingredients insure low leakage, long shelf life. Furnished with heat shrinkable mylar tubing. SIZE: Diameter x length.

TYPE AEP PLUG-IN ELECTROLYTIC

Hermetically sealed, aluminum can with 4-pin octal base mounting. Commercial equivalent of Type CE51's, 2's, & 3's as listed in MIL C62A. Size: 1 9/32x2½" except (*) 1⅜x2½", (†) 1⅜x3½", (††) 1⅜x4¼", (**) 1⅜x3". Av. Shpg. wt., 5 oz.

NEWARK STOCKS THE WORLD'S MOST COMPLETE INVENTORY OF INDUSTRIAL ELECTRONIC EQUIPMENT

Newark-Detroit Electronics, Inc., 20700 Hubbell Ave., Detroit, Mich. 48237

TYPE K323Z METALLIZED POLYCARBONATE CAPACITORS

Hermetically sealed Polycarbonate film provides high capacitance stability, low dissipation factor, low dielectric absorption and high insulation resistance. Self-heals in the rare case of dielectric breakdown. Operating temperature: —65°C to +125°% of full rating. Standard tolerance is 20%. Other tolerances available on special order.

TYPE QE—COMPUTER GRADE ELECTROLYTICS

High reliability, long life, 65°C operating aluminum electrolyte capacitor for energy storage use. For computers, power supplies, industrial use in control and test equipment. Manufactured under controlled conditions with highest purity ingredients.
Hermetically sealed with pressure type safety vent. Low screw inserts and heat shrinkage mylar tubing keep overall size near to can size shown. Shipping weight 5-14 oz. depending on can size.

METALLIZED MYLAR "WRAP & FILL" CAPACITORS

Type V146Z. Light weight, high insulation resistance, long stable life. For use in printed assemblies and light weight portable and airborne equipment of all types. Can be mounted in banks using a minimum amount of space. Self-healing and are of instrument quality. All leads are solder-coated copper-weld wire. Tolerance: ±10%.

MAKE NEWARK YOUR ONE DEPENDABLE SOURCE
FOR EVERYTHING IN INDUSTRIAL ELECTRONICS

AEROVOX Capacitors

TYPE PTT PEE-WEE ELECTROLYTIC

Miniature polycap electrolytic encased in polycap tubes with special Aerovox plastic end-fill which binds to the ceramic case. Operating temp. range is minus 30°C plus 65° C. Cap. at 25° is minus 10% plus 250%. *Sizes A: 1/4x5/8", B: 1/4x3/4", C: 1/4x7/8", D: 5/16x5/8", E: 5/16x3/4", F: 5/16x7/8", G: 3/16x1", H: 3/8x3/4", I: 3/8x7/8", K: 3/8x1", M: 3/8x1 1/4", N: 3/8x1 3/8", O: 3/8x1 1/2", P: 7/16x7/8".

TYPE V146XR AEROFILM "WRAP & FILL" MYLAR CAPACITORS

Aerovox V146XR capacitors offer high resistance to humidity and excellent stability with temperature where a metal case is not needed. Extremely small size makes these ideal for use in miniaturized circuits. Mylar wrapped, epoxy end filled.

Standard tolerance is ±10%. Power factor will not exceed 1% at 25°C. Operating temperature range of —65°C to 85°C at full voltage rating and to 125°C with derating. Extended foil construction. Leads are solder-coated Copper-Weld wire.

Rely on Newark for All Your Electronic Needs

Newark-Detroit Electronics, Inc., 20700 Hubbell Ave., Detroit, Mich. 48237

V161 AEROFILM TUBULAR CAPS

High quality units in Polycap (Polyester Film) casing material which have high insulation resistance, low dielectric absorption and power factor. Relatively small capacitance change over 0° to 85°C. Epoxy end fill will not flow, soften, or melt at any operating temperature. Tolerance ±20%. Operating temp. —30° to +100°C. Aver. shpg. wt., 2 oz.

TYPE P123ZN METALLIZED PAPER CAPACITORS

Hermetically sealed metal cased metallized paper capacitors. 50 VDCW units specifically designed for transistor applications and low voltage operations. Oper. temp.: —55°C to +100°C with no derating, up to 125°C derated to 75%. Standard tolerance of 50 VDCW ±10%; 200, 400 & 600 VDCW, .01 and lower ±25%; .015 and up ± 20%. Other tol. and insulated sleeve available on special order.

AEROVOX Capacitors

CERAFIL CERAMIC CAPACITORS

Ultraminiature ceramic capacitors. Meets MIL-C-11015C. Oper. temp. —55°C to +85°C or derate 50% to +125°C. Temp. Coeff. 100 volts applied +10 —35%. Power factor 2.5% max. Leads 1½ inch min. tinned copper. Below .01 mfd, 26 gauge. .01 and above 22 gauge. Tolerance: ±20%. 100 VDCW. 300 VDCT. Aver. Shpg. wt., 4 oz.

CERALAM CAPACITORS

Type MC91 and MC905.

These capacitors have greater volumetric efficiency and unique characteristics for inherent reliability. Units have a temperature range of —55° to +125°C. Capacitance change at 0 VDC is +10% and —15% at rated voltage +10%, and —30%. Maximum power factor is 2.5%. Gold dumet leads are standard 100WVDC except (*)50 WVDC.

CHIP CAPACITOR ENGINEERING KIT

Model AKC800. Facilitates development of hybrid circuits. Contains 125 chip capacitors in capitance values from 1pf to 100,000 pf. Three basic temperature characteristics. The featured Ceralam cap. can be soldered or welded directly into the circuitry. Includes four types with capacitance of @ 25 VDC listed below.
Type ULA 102. 5 Each of 1.0±.5Mmf. & 10±20%. 10 Each, ±20% at values 50, 100, 500, 1000, 2200, 5000, 10,000 **Type ULA 302.** 5 Each, ±% at values 500, 2200, 22,000. **Type ULA 502.** 5 Each, ±20% at values 1000, 2200, 10,000, 100,000. **Type ULA 702.** 5 Each, ±20% at values 5000, 50,000.
16F959. NET Each per kit..... 59.95

CORDWOOD TYPE MC70 AND MC705 CERAMIC TUBULARS

Operating temp. —55°C to +85°C. Derate 50% at +125°C. Temp. Coeff. varies with capacity Leads ±26 Gauge Gold Plated Dumet 1½" min. for soldering or welding. Size: .250 x .100. Aver. Shpg. wt., 4 oz.

100 VDCW—Except (*) 50 VDCW

TYPE P95ZN MICRO-MINIATURE METALLIZED PAPER CAPACITORS

Type P95ZN. Metallized paper miniature units offer small size, rugged construction and high reliability. Special construction offers strong lead connections and dipped resinous conformal coating provides good moisture barrier. Standard tolerance ±20% Operating temperature —55°C to +125°C.

MIL-TYPE CK05-CK06 CAPACITORS

CK05 is .200 square by .100 thick. CK06 is .300 square by .100 thick. Molded for improved humidity protection and reliability. Tolerance is ±10% (K) or ±20% (M) as noted. 200VDCW. —55° to +150° to meet MIL-C-11015.

TYPE P 30M BATHTUBS

High-quality bypass capacitors recommended for applications where high reliability and superior performance is required. Drawn metal cases, hermetically-sealed with neoprene bakelite terminals. These units are Hyvol M impregnated for operation at temperatures from —55°C to +25°C. Standard tolerances +20% - —10%. Wt., 8 oz

Available on special order with terminals on top or bottom.

TYPE P09—AEROVOX HYVOLS

Immersion-proof units in sturdy rectangular metal can. High voltage screw type pillar terminals fitted with soldering lugs. Intended for heavy-duty continuous service in transmitters, amplifiers, etc. Type MB bracket is supplied unless otherwise specified except on units with base sizes 3¾x 3⅜" and 3¾x4⁹⁄₁₆" where type MS bracket is supplied. MSB bracket is available for all sizes on request. Standard tolerance +20 —10%. Average weight 5 pounds.

HIGH-K TYPES

Designed for By-Pass and Coupling applications where additional capacitance will not affect circuit operation. Combine small electrical value with high voltage rating in smallest physical size 5HK-S15 thru 5HK-P10, 5HK-2S20 500 WVDC. All other 5HK are 1000 WVDC. Capac. Tol.: GMV. Size: ½x½x⁹⁄₁₆".

MINIATURIZED DISC TYPES FOR TRANSISTORIZED CIRCUITRY

Tiny ceramic capacitors for by-pass and coupling application. Low self inductance and flat plate construction permits higher self-resonant frequency and high by-pass efficiency in all TV and transistorized circuitry. Good performance under severe conditions of humidity and vibration. TH dia. .335 to .905, TG dia. .275 to .655.

SPRAGUE
THE MARK OF RELIABILITY

Ceramic and Electrolytic Capacitors

POWERLYTIC ALUMINUM ELECTROLYTICS

Type 39D. End seals are made of molded phenolic, which is an important feature in establishing long life. Designed for operation at temperatures up to 85°C. Have very low effective series resistance and leakage current.

CERAMIC CAPACITORS

Series 5 GA. Low self-inductance of silvered flat-plate design means very high by-pass efficiency in all TV circuits. Designed for 85° C (185°F) continuous operation. Higher self-resonant frequency than tubular ceramic or molded mica capacitors. Moisture proof coating. Tol. ±20%. 1000 WVDC

J-135 "CERAMICENTER" CERAMIC ASSORTMENT KIT

- **Handy metal drawers — Save Time and Effort**

710 capacitors of 57 different values in handy reusable "Kleer-Pak" plastic boxes. Kit includes: 290 Type 5 GA, 1000 WVDC ceramic disc capacitors in 31 different values from 5 mmf to 20,000 mmf; 145 Type 5HK "High K" bypass and coupling capacitors in 7 different values from .001 mfd. to .01 mfd. @ 1000 WVDC and .02 mfd. to .1 mfd. @ 500 WVDC; 100 Type 10 TS, 1000 WVDC temperature stable capacitors in 12 different values from 100 mmf to 20,000 mmf; and 175 Type TG, 50 WVDC disc capacitors in 7 different values from .005 to .1 mfd. Cabinet, 30¾ x5½x11¾". Ship. wt., 29 lbs.

HIGH-VOLTAGE DOORKNOB CERAMICS

Has female threads for interchangeable screw-in terminals. Molde plastic. Guard rings lengthen surface creepage path.
Type 20DK-T5. Complete with 7 terminals. 1" dia. x 31/32".
Type 30DK-T5. Complete with 2 terminals. 1⅛" dia. x 1¼".

Newark-Herrlinger Electronics Corp., 112 E. Liberty St., Cincinnati, Ohio 45210

HYPERCON CERAMIC DISCS

Ultra-miniature ceramic discs ideal for use in transistorized circuitry. Designed for bypass and coupling applications but particularly well-suited for any low voltage use where high capacitance and low power factor are important considerations. Superior to electrolytic capacitors of similar capacitance value because of the very low power factor of Hypercon Capacitors. Capacitance Tolerance: GMV.

FORMULATION C-23 MONOLYTHIC CERAMIC CAPACITORS

Monolythic ceramic capacitors for transistorized circuitry. C-23 formulation insures high K—these units provide high capacitance in small physical size. Solid homogeneous blocks are protected against moisture and mechanical damage by a resin dip. Well suited for use in all frequency ranges through 1000 mc.

196D SOLID TANTALUM EPOXY DIPPED

Low-cost solid-electrolyte tantalum capacitors suitable for mounting printed wiring boards in transistorized commercial, and industrial electronic equipment. Furnished in sizes which permit coverage of a broad range of capitance ratings, from 0.1μF through 330μF. The standard capitance tolerance of these capacitors is ±20%. Operating temperature range —55° to +85°C low leakage current. The maximum dissipitation factor is 10%. Standard capacitors are furnished with long straight leads. Leads are electro-tinned nickel for ease in soldering. Solid-electrolyte tantalum pellet construction allows plug-in mounting on pirnted wiring boards Highly resistant, and insulated epoxy resin coating.

HYPASS SUPPRESSION CAPACITORS

Exclusive 3-terminal Network-Feed-thru capacitors assure very effective VHF current by-passing. Bypass VHF oscillation up to 150 MC. Suppress TVI from Short-Wave Transmitters, Diathermy Machines, Electronic Heating Apparatus, etc. Eliminate interference caused by Line-conducted radiation between neighboring TV sets. Temperature operation: —40°C to +85°C. Currents up to 20 amps. (*) Have female screw terms. Bulkhead mounting. Shipping wt. 2 oz.

SUBMINIATURE—TYPE 96P—VITAMIN Q

Inserted tab construction. Glass-to-metal hermetically sealed. Operates from —55°C to +125°C. Terminals are insulated from metal case. Impregnated with vitamin Q. Tolerance of ±10%. Meets "latest" MIL-C-25 specs. Section insulated from can.

Depend on NEWARK for all Sprague Capacitors

- To Serve You Better

Ten Stocking Warehouses from Coast-to-Coast

- Lowest Prices — Fastest Service

Miniature Capacitors

SPRAGUE TYPE TE LITTL-LYTICS (30D)

SPRAGUE THE MARK OF RELIABILITY

Ultra-small electrolytic capacitors made for transistor circuitry and other sub-min. applications. Temp. Range: —20°C to +85°C. Ultra-low leakage current. Clear Plastic Sleeves.

SPRAGUE
THE MARK OF RELIABILITY

TVA Atom Electrolytics

The only small size electrolytic especially designed for 85°C (185°F) operation on voltages to 450 working volts D.C. Unit is engineered to withstand extra high temperature, high ripple currents, plus high surge voltages. Metal case construction with outer insulating tube. Wt., 3 oz.

SINGLE UNITS 6 WVDC

TYPE 600D HIGH GRADE ALUMINUM ELECTROLYTICS — PLASTIC INSULATING SLEEVE

Offer combination of extended temperature range and high voltage rating. Dual rated may be used for 85°C or 125°C operation. Withstands 2000-hour life test at either temperature, and corresponding working voltage. And vibration from 10 to 2000 cycles at 15 g. Features excellent capacitance stability, dissipation factor and DC leakage current after high temperature shelf testing. Closely approximate electrical requirements of MIL-C-3965 tantalum foil capacitors, at about half the cost. Compact size, weighs only about one-third as much as equivalent tantalum types. Tolerance is —10%, +75% up to 75 WVDC; —10%, +50% for 100 WVDC up. Sizes shown in chart are for bare can only: add 1/64" to dia. and 1/16" to length for insulating sleeve. Avg. shpg. wt., 3 oz.

Capacitors

36D "POWERLYTIC" ALUMINUM ELECTROLYTICS

For applications requiring maximum capacitance in a given case size. Low ESR and leakage current; extremely long shelf life. Withstands military environmental conditions including —55°C storage tests. Tol. 3-50v, +75% to —10%; 75-450v, +50% to —10%. Av. shpg. wt., 4 oz. With plastic outer tube.

SIZES FOR 36D CAPACITORS
D. x L. Including plastic outer case

AA, 1 13/32 x 2 3/16	BC, 2 1/32 x 4 3/16	DC, 3 1/32 x 4 3/16
AB, 1 13/32 x 3 3/16	CB, 2 1/32 x 3 3/16	DD, 3 1/32 x 4 11/16
AC, 1 13/32 x 4 3/16	CC, 2 1/32 x 4 3/16	DF, 3 1/32 x 5 11/16
BB, 2 1/32 x 3 3/16	CD, 2 1/32 x 4 11/16

STANDARD SERIES 150D & MILITARY TYPE CS13

Type CS13. Hermetically sealed solid tantalum capacitors to Mil-C-26655 Revision 2D. Plastic insulating sleeves. Extremely low leakage current and stability with both temperature and time. Temperature range: —80°C to +85°C; +125°C with 1/3 voltage derating. Combines true miniaturization with characteristics previously unobtainable in electrolytic capacitors. Type 150D same as above except commercial series.

ORANGE DROP, DIFILM DIPPED TUBULARS

Dual dielectric impregnated with exclusive HCX. Produces rock-hard capacitor section. Double dipped in Bright Orange Epoxy Resin — beats heat and humidity. Shpg. Wt. 4 oz.

TYPE 118P DIFILM METALIZED CAPACITORS

Unique dual dielectric rated for operation at 125°C without voltage derating. High insulation resistance and capacitance is 10 megohm-microfarads for 200 V units or 40 megohm-microfarads for 400 and 600 V units. Hermetically sealed, with glass to metal solder seal terminals. Tolerance: ±10%.

192P "PACER"—MINIATURE "FILMITE E" CAPACITORS

Nearly three times smaller than conventional paper-film tubulars. Sizes are the same as composition resistors. Entire unit insulated by heat shrinkable mylar sleeve. High insulation resistance. Operating temp. range —55°C to +85°C. Derate 50% @ 105°C. Tolerance ±10%. Average shipping wt. 2 oz.

80 VOLTS DC

121P METALIZED PAPER CAPACITORS

Designed to operate at 125°C without voltage derating. High insulation resistance—at 85°C minimum product of insulation resistance and capacitance is 20 megohm microfarads. Tol. ±10%. 150WVDC.

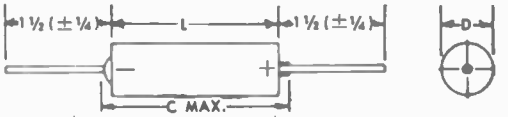
Texas Instruments Solid Tantalum Capacitors



No. 22 (0.025 +0.005 −0.001) No. 24 (0.020 +0.005 −0.001)
AWG SOLDERABLE LEADS

Parent Device System. Established to simplify your ordering and stocking procedures. Parent device types can be used for any working voltage equal to or less than those listed in tables below.

Type SCM. A capacitor of completely dry construction (no liquid or paste is used), offering the chemical stability of tantalum and its oxides. All available from Newark stock with Mylar insulating sleeves.

TYPES TJU, TJL, TJH DYKANOL TRANSMITTING CAPACITORS
DC PAPER CAPACITORS TYPE T

● **Similar to CP70 specifications**

For power supply filter specifications. Solder seam styles, rectangular cased. Operating temp: —55°C to + 85°C. CDE reserves the right to supply type T with a 1/8" variation in case height from that shown in the listing. Ship. wt., 5 lbs. Order Brackets separately from table below, right column: *2 needed per condenser.

TYPE DYR OIL FILLED BATHTUBS

Widely used in military, communications, and industrial electronic equipment. All types are drawn case "bathtub" configurations provided with integral drilled mounting flange. Available in F (—55°C to +85°C). All styles supplied with terminal style B, non-removable soldered lug. Single, dual and triple capacitance units available.

CDE Cornell-Dubilier Capacitors

TYPE BBR AND BR "BLUE BEAVER" ELECTROLYTIC CAPACITORS

Type BR

Type BBR

Compact aluminum cased, cardboard insulated DC electrolytics. Type BR section tabs and leads are riveted. Type BBR negative lead is riveted and positive lead is solidly crimped to an aluminum stud. Voltage ratings up to and including 150 volts feature etched cathodes. Operating temperature range is —20C to +85C up to 450 volts and to +65C for higher voltage.

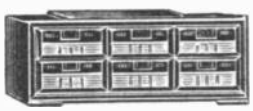
TUBULAR ELECTROLYTIC ASSORTMENT KIT



Assortment of tubular electrolytics widely used in entertainment repair. Single and dual sections—plus one wide-range printed circuit unit for 8 standard 150V capacitors and covers a multitude of service replacements. Types are: BBR, BR, BBRD.

NON-POLARIZED ELECTROLYTICS

Suitable for use when no DC polarized voltage is present. Units are physically similar to the type BR-axial lead, hermetically sealed in aluminum cases with cardboard insulating sleeves. For use in crossover networks and in boot-strap filtering applications.

Cornell-Dubilier Capacitors

CDE

COMPUTER GRADE HIGH CAPACITANCE TYPE FAH

Designed for use in computer power supplies and other applications where banks of high capacitance filters are required. Low leakage current, minimum ESR, high 120cps ripple currents, molded terminal block with safety vent seal, provided with screw terminals, plastic insulating sleeve. Dual rated as shown, minimum operating temperature 20°C.

NLW ELECTROLYTIC CAPACITORS

Type NLW. Rugged physical construction. Hermetically sealed aluminum foil electrolytic capacitors. Low leakage currents; freedom from shorts. Long shelf and operating life. Suitable for printed circuits. Tinned copper leads with plastic sleeves. Temperature range, —40°C to +85°. Tol. —10% to +150%.

WIDE-RANGE ELECTROLYTIC TYPE ESS7515

Type ESS wide range printed circuit electrolytic is an exact replacement for eight original standard electrolytics used in home receivers. A replacement for units of 150 V: 50-30 mfd.; 70-30 mfd.; 75-30 mfd.; 60-40 mfd.; 80-40 mfd.; 50-50 mfd.; 70-50 mfd.; 80-50 mfd. A good replacement for many single and dual units within the ratings indicated. Size: 1"D.x2 1/2L.

Stock No.	Type	1-24	25-49	50-99	100-499	500-999
15F538	ESS	1.20	.80	.73	.58	.52

Electrolytic Capacitors

WIDE APPLICATION RANGE TWIST-PRONG ELECTROLYTIC CAPACITORS

Wide application range Twist-Prongs provide proper replacement for any electrolytic marked with a capacitance within range on wide application label. Proper replacement instantly available. Highest purity materials.

Tolerance from nominal rated capacitance:

Rated DC Voltage	Capacitance Tolerance
3-50 volts, inclusive	—10% to +150%
51-350 volts, inclusive	—10% to +100%
351-500 volts, inclusive	—10% to +50%

CERAMIC CAPACITORS

Models CK05 & CK06. Ultra-miniature rectangular cased. Meets requirements of MIL-C-11015. Rated at 200V DCW over operating temp. range: —55C To +150C. High reliability packaged in small sizes. The temperature characteristic is MIL CW specified as maximum capacitance change of —22%, or +56% when the temperature cycled is per MIL-C-11015. Units are stocked and are available in the latest revision of MIL-C-11015 with a tolerance of ±10%. These tiny capacitors come in a premolded case. Size: CK05, .2x.2x.1. CK06, .3x.3x.1.

MYLAR DIELECTRIC FILM ENCASED

Type WMF. Encased in a Mylar film wrapping and end sealed with a high density thermosetting plastic. A desirable unit where a metal case unit is not indicated miniscule in size, has high resistance to humidity and excellent capacitance stability with temp. and life. Temp. range: —55°C to +125°C. Tolerance: 10%.

CDE Cornell-Dubilier Capacitors

TYPE MFP SPACE-SAVER FLAT-OVAL POLYESTER FILM CAPACITORS

Type MFP is similar to WMF. It is designed however, with an oval figure useful in many applications requiring its space saving characteristics. In ratings of 0.01 mfd. and above, the MFP is often used as an alternative to type WMF of the mil. type CTM. The unit is highly moisture and humidity resistant. Max. operating temp. range: —55° to 125°C—85°C at full rated voltage with deratings of 10% and 50% at 100°C and 125°C respectively. Standard tolerance is ±20%, 1½" min. copperweld leads. Thickness and width tolerances are: up to and incl. .484", ±.032"; .500" to and incl. 1.000", ±.062"; larger than 1.000", ±.093".

DPMS DIELECTRIC SIDE-LEAD TUBULARS CAPACITORS

Type DPMS has two dielectrics—Mylar Polyester Film and a film of high grade paper. Features a "dipped" rock-hard casing which holds wire leads rigidly at fixed spacings. High humidity resistance. Crimped side leads for uniform mounting. —55°C. to +125°C. Derate working voltage 25% for +125°C operation.

200 VDCW ± 10% Tol.

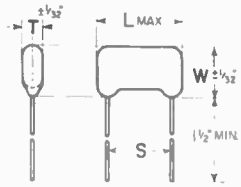
MINIATURE RADIAL-LEAD POLYESTER FILM CAPACITORS



A flat space saving configuration, excellent for ultracompact assemblies. MYLAR dielectric. Dipping process assures high moisture and humidity resistance. Epoxy impregnated casting. Fix-fil-impregnated capacitor section—no impregnation leakage even at maximum operating temperatures. Uniform dip coating control assures protection of capacitor section—no possibility of shorts caused by contact of an uncoated case to chassis. Max. operating temperature is 125°C-85°C at full rated voltage. 10% derated at 100°C and 50% derated at 125°C. Leads are #22 AWG including 0.068/100V; 0.047/200V; 022/400V, and 0.068 at 600V. Above these ratings, leads are #20 AWG. Tol. ±20% or ±10%. Wire lead spacing: 9/16" for ¾" dim. L and 5/16" for 1⅛" dim. L.
