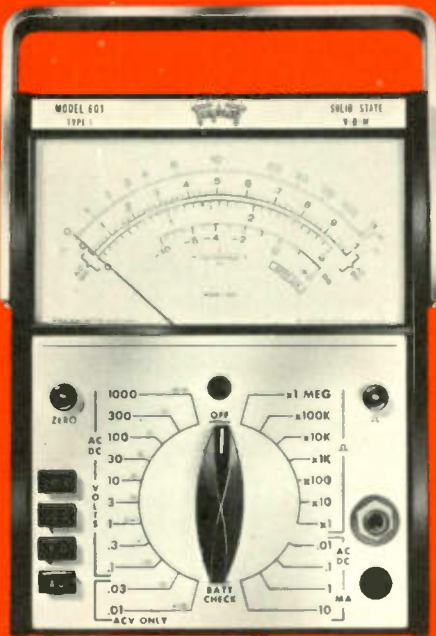
48 YEARS OF SERVICE

RCA Authorized Distributor

NEW!

MODEL 601



1. **14 Ohmmeter ranges with 7 Low-Power ranges (LPΩ) at 75 mV DC for Transistorized and Integrated circuits.**

2. **Voltage ranges from 10 mV AC and 100 mV DC full scale; plus AC & DC Current ranges from 10 uA full scale.**

3. **Modern Easy-To-Use push button selection of DC Polarity, AC, and Low-Power Ohms (LPΩ) functions.**

Triplett announces the Model 601, a new addition to its already large family of multimeters. The 601 is revolutionary in design as it uses the latest developments in solid state technology, namely the Field Effect Transistor, to combine the portability and ease of operation of a V-O-M with 11 megohm input impedance. An entirely new concept in popular priced V-O-M's is Triplett's use of four functional push-button selector switches located conveniently at the left side of the aluminum front panel. The Triplett "Low Power Ohms" feature is designed to prevent electrical damage to IC's. In-circuit resistance measurements can be easily made without the usual diode or transistor loading. A total of 52 selections including "off" and "battery check" can be accomplished using the single range switch. The test ranges that the 601 can measure include: D.C. volts: 0-.1-.3-1-3-10-30-100-300-1000, at 11 megohms. AC volts: 0-0.01-0.03-0.1-0.3-1-3-10-30-100-300-1000 at 11 megohms. Ohms: 0-1K-10K-100K-1meg-10meg-100meg-1000meg (std. 1.5V), (low power .01mW, 75mV) ctr. scale 10 ohms on X1 range. AC-DC current: 0-10-100-1000-10,000 ua, DB: (decibel) −40 to +60. In short, the Triplett 601 has been designed to fit the many present and advanced circuit measurement requirements of television and high fidelity service and test technicians, circuit designers, instrument evaluation, production quality control, industrial processing, etc.

Your Dependable Source for Dependable Test Instruments by

TRIPLETT

The world's most complete V-O-M line

MODEL 310 AND 310-C

1. **One selector switch.**

2. **20,000 ohms per volt DC sensitivity.**

3. **Shirt pocket size VOM with provision for attaching AC clamp-on ammeter.**

Triplett's ever-popular 310 VOM series has been improved by the addition of a taut-band meter movement to the 310-C. These miniature VOMs feature an interchangeable test prod which fits into the tester top becoming the common probe, freeing one of your hands. Unbreakable plastic window protects the self-shielded meter movements. Standard sensitivity is 20K ohms/volt DC and 5K ohms/volt AC (15K ohms/volt, 310-C). Voltage ranges: (AC & DC): 0-3-12-60-300-1200 (600, 310-C). Resistance ranges: 0-20K-200K-2meg-20meg. DC current: 0-600ua-6ma-60ma-600ma. Molded, fully insulated case, 2¾"x4¼"x1-5/16". Comes complete with batteries, test leads, and instruction manual. Model 10 clamp-on ammeter-plugs directly into the tops of these units—the perfect combination for the home appliance repairman.

Model 310. 62F230. NET 42.00
Model 310-C. 62F292. NET 53.00

MODEL 600

1. **F-E-T Circuitry—Portable Battery Operated with 11 Megohm Input Impedance (Field Effect Transistor). Stable; Low Drift.**

2. **One Selector Switch minimizes chance of incorrect settings and burnouts. DC Polarity reversing.**

3. **Human engineered for ease of use. Clean uncluttered scale, excellent range overlap, for more accurate readings.**

This versatile member of the Triplett family combines semiconductor circuit technology with advanced Triplett electrical measuring engineering knowhow to bring you an unparalleled transistorized voltohmmeter (TVO) in an economically priced, portable unit. The model 600 gives you the high input impedance necessary for today's advanced electronic testing, including low voltage semiconductor testing, without the inconvenience of a line cord. The ranges are as follows: DC volts: 0-.4-.8-1.6-4-8-16-40-160-400-1600. AC volts: 0-4-8-16-40-160-400-800. Resistance: 0-1K-10K-100K-1Meg-10Meg-100Meg. All of this versatility is combined with an input impedance (DC) of 11 megohms. The Triplett model 600 truly combines all of the qualities of the past with the requirements and conveniences of the future in a single, portable unit at low cost.

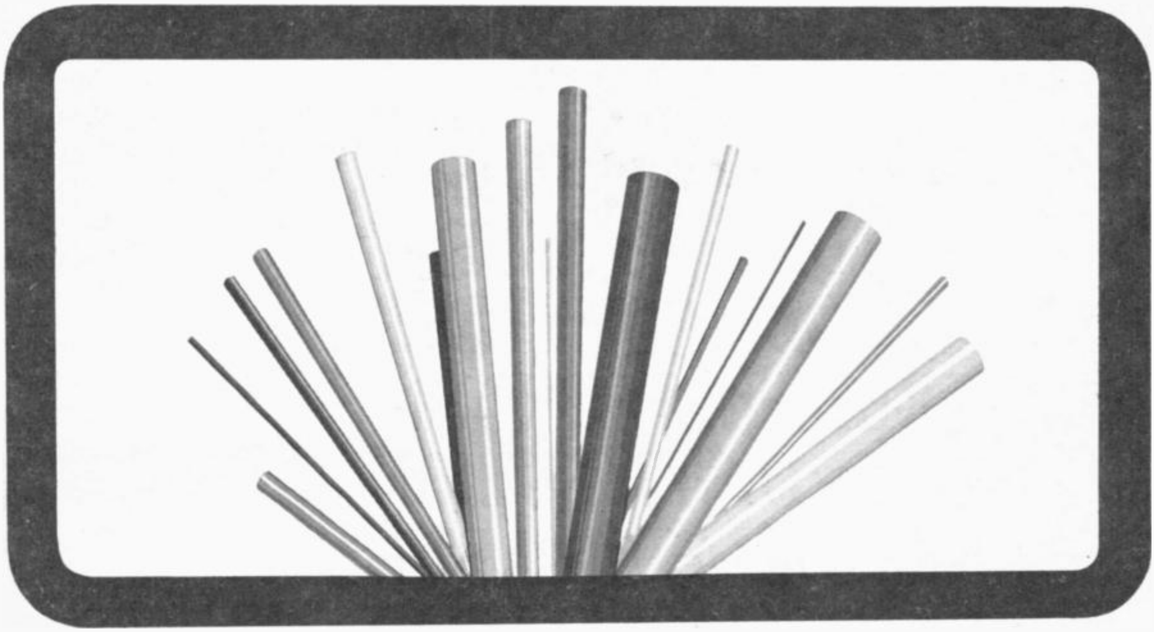
alpha

your most complete source for
plastic tubing



ALPHLEX Polyvinylchloride Tubing—40 sizes, up to 2½ I.D., up to six colors.

ALPHLEX Teflon Extruded Tubing—49 sizes, 0—30 wire size, smaller sizes in choice of 4 colors.

ALPHLEX Zipper Tubing—12 sizes, ¼"—2" I.D., including low temperature and RF shielded types.

ALPHLEX Impregnated Fiberglass Tubing—30 sizes, up to 1" I.D., for severe environmental applications.

ALPHLEX FIT Heat Shrinkable Tubing—7 Basic materials, covering a broad range of physical and environmental applications.

ALL ALPHA WIRE, CABLE, AND TUBING IS IN STOCK AT NEWARK

- MILITARY HOOK-UP WIRE
- AIRCRAFT WIRE
- COAXIAL CABLE
- CONTROL & INSTRUMENTATION
- AUDIO CABLE
- POWER CORDS, SETS
- HEAVY INDUSTRIAL CABLE
- SHIELDING & BRAIDING
- GEN. WIRE & CABLE
- PVC & TEFLON TUBING
- LACING CORD
- FIT SHRINKABLE TUBING

See Index For Complete Listing of Alpha Products

FROM THIS NEW MODERN FACILITY...

NEWARK
PROVIDES the FASTEST MOST COMPLETE INDUSTRIAL ELECTRONIC DISTRIBUTION SERVICE AVAILABLE
ANYWHERE

- Computerized order processing and inventory control
- Programmed, conveyorized order-filling system
- Dataphone communication with all branches provides same-day back-up shipments of quantities not available at branches
- Over $7,000,000 inventory of 500 product lines
- Same day complete shipment on 95% of all orders

NEWARK IS YOUR SOURCE FOR MORE THAN 70,000 STANDARD BRAND ITEMS WITH THE FAMOUS DOUBLE GUARANTEE—THE MANUFACTURER'S AND NEWARK'S!

All these services have made Newark the nation's leading 1-point source for brand-name Industrial Electronic Products:

- Telex, TWX and WATS lines for instant communications
- 49 years of experience and progress
- Ultra-modern facilities
- Factory OEM pricing
- AAA-1 rated company
- Outstanding reputation for leadership

Shipping section and terminus of conveyor system. The active stock, on over 17 city blocks of steel shelving, is in the background.

FAST EFFICIENT SERVICE FROM ALL 11 NEWARK STOCKING WAREHOUSE FACILITIES!

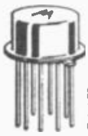
NEWARK'S Semiconductors and Integrated Circuit Directories Are Complete As of August 15, 1968.

- For current price changes and New Device Information Contact NEWARK'S Industrial Department.
- Over 11,000 Devices in Stock.
- Orders Will Be Billed To You At Those Prices In Effect At Time of Shipment.
- Depend on NEWARK for Speedy Delivery.

Motorola Integrated Circuits

5-Pin Designated by Suffix G after Type Number.

Case 89



8-Pin (TO-99) Designated by Suffix G after type number.

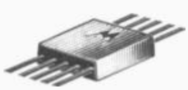
Case 96

10-Pin. Designated by Suffix G after type number.

Case 71, 71A, 96A

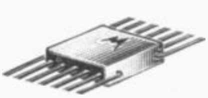
12-Pin Designated by Suffix G after type number.

Case 98



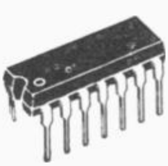
Case 72, 73

TO-91. Designated by Suffix F after type number.



Case 83, 609

TO-86. Designated by Suffix F after type number.



Case 93

Plastic Dual-In Line. Designated by Suffix P after type number.

DIGITAL INTEGRATED CIRCUITS

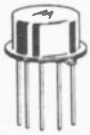
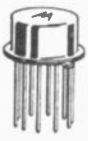
Motorola Integrated Circuits



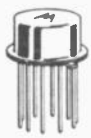
5-Pin Designated by Suffix G after Type number.

Case 89



8-Pin. (TO-99) Designated by Suffix G after type number.

Case 96

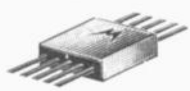


10-Pin. Designated by Suffix G after type number.

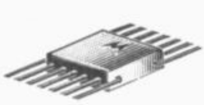
Case 71, 71A, 96A

12-Pin. Designated by Suffix G after type number.

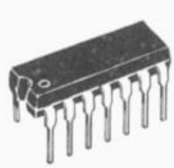
Case 98



Case 72, 73
TO-91. Designated by Suffix F after type number.



Case 83, 609
TO-86. Designated by Suffix F after type number.



Case 93
Plastic Dual-In Line. Designated by Suffix P after type number.

INTEGRATED CIRCUIT BREADBOARDS

16-socket breadboards are designed for rapid interconnection and evaluation of individual integrated circuits or complete logic designs. Include provision for distribution of three supply voltages to each socket, and use double pin jacks for interconnections. An input/output arrangement using a 22-pin PC edge connector or 11 BNC coaxial connectors, plus bananna plugs for power connection between boards gives the designer complete breadboarding flexibility with simple plug-in and plug-out change possibility. Broadboards rated for dc to 50MHz, and —65 to +150°C performance.

IMPORTANT ORDERING INFORMATION: When ordering specify case desired by stating Suffix F for Flat-Pack; Suffix G for Can; and Suffix P for Plastic.

Integrated Circuits

Hybrid circuits made by utilizing transistors and diode elements in combination with thin film resistors and capacitors. Offer optimum performance, reliability and spacesaving possibilities. All integrated circuits feature planar epitaxial passivated construction, fabricated with diffusion techniques in a single silicon eqitaxial monolithis substrate. All MOS devices are P-channel enhancement mode. In hermetically sealed packages. (See illustrations in center column). *Also include heat sink tab.

MEDIUM FREQUENCY AMPLIFIER—TO-5

D12X207-1. Amplifier with 3 very high gain transistors and 5 thin-film resistors. 10 Ohms min. Min. of 30 V required. Noise voltage: 400-100,000 Hz @ 10 mV.

Type	1-99	100-999
D12X207-1	75.00	50.00

MEDIUM FREQUENCY AMPLIFIER—TO-5

D12X207-2. Same as 12X207-1 above, but min. voltage required is 20 V; voltage gain with Eu = 1 mV. 400 Hz is 350/700 mV; and max output volts is 4.5.

Type	1-99	100-999
D12X207-2	60.00	40.00

FUNCTIONAL AMPLIFIER

D12X218. Active functional amplifier circuit featuring unity voltage gain with minimum input resistance of 50 ohms. Voltage required: 43 V. Temp. range: —25° +125°. 12 lead flat package.

Type	1-99	100-999
D12X218	82.50	55.00

VIDEO AMPLIFIER—TO-5

D12X257. Video amplifier with 2 trans. with ft's in excess of 600 MHz. Has broadband capabilitier for frequencies up to 25 MHz. 8 lead TO-5 package.

Type	1-99	100-999
D12X257	45.00	30.00

IF AMPLIFIER—DUAL IN-LINE PACKAGE

PA189. 80 db gain at 4.5 MHz, will also provide for 40+ db at 40 MHz in tuned circuit. Operates at voltages up to 30 V. Uses include and wide range of industrial applications.

Type	1-99	100-999	1000-9999
PA189	3.60	2.40	2.16

ONE WATT AUDIO AMPLIFIER — DUAL IN-LINE

PA222. Features feedback loop that eliminates thermal runaway. Use 18/25V supply voltage. Input impedance typically 55 K-ohms, current drain 6-25 mA. Dual in-line package.

Type	1-99	100-999	1000-9999
PA222	3.70	2.45	2.20

HIGH PERFORMANCE OPERATIONAL AMPLIFIER

PA223. Features differential Darlington input with input impedance of 2.5 megomhs. ±12V input supply operation with ±10V output swing. Other features include 8000 open loop voltage gain and 80-nA bias current.

Type	1-99	100-999
PA223	9.05	4.70

LOW LEVEL AMPLIFIER — DUAL IN LINE PACKAGE

PA230. Designed and specified for low signal audio prosucts. Supply voltage: +12V, output 10 V p-p. 7000 ioen loop voltage gain Also excellent as general purpose dc amplifier.

Type	1-99	100-999	1000-9999
PA230	3.30	2.20	1.98

ONE WATT AUDIO AMPLIFIER — DUAL IN LINE

PA234. Utilizes only three capacitors and three resistors for performance operation. Suitable for both battery and line cord circuits — operates from supply voltage 9V-25V. Tab on package allows for direct heat transfer to printed circuit board.

Type	1-99	100-999	1000-9999

Circuit Diagram

TWO WATT AUDIO AMPLIFIER — DUAL IN LINE

PA237. Capable of operating from a wide variety of supply voltages (9 to 27V) into numerous load impedances. Features excellent sensitivity, 8 - mV open loop, 2% distortion. Versatile circuit may also be utilized as servo amplifier or voltage reg.

Type	1-99	100-999	1000-9999
PA237	3.98	2.65	2.38

OPERATIONAL AMPLIFIER — DUAL IN LINE

PA238. Economy amplifier provides performance associated with more expensive counterparts. ±6V input supply, ±5V output swing, 7000 open-loop voltage gain. Input is differential.

Type	1-99	100-999
PA238	3.30	2.20

ZERO VOLTAGE SWITCH — DUAL IN LINE

PA424.. A synchronous switch used to pulse thyrsitor and at ac zero voltage crossing thus eliminating radio frequency interference. Excellent for precision temperature control applications with thermistor as input device.

Type	1-99	100-999
PA424	3.60	2.40

PHASE CONTROL — DUAL IN LINE PACKAGE

PA436. For application in Triac gating when controlling resistive or reactive loads. Feedback operation provides continuous precision control. Circuit is adjustable for various input and sensitivity combinations. Operates directly from AC line.

Type	1-99	100-999
PA436	5.17	3.45

DIODE SHUNT QUAD — DUAL IN LINE PACKAGE

PA908. For gating and ring demodulation uses. 4 lead package.

Type	1-99	10-99	100-999
PA908	9.65	6.45	4.30

MOSFET FREQUENCY DIVIDER — DUAL IN LINE

PD455. Six stage bistable divider providing cascade stages of 3, 2, and 1. Excellent for organ, low frequency timing applications. Inputs are zener diode protected. Operating features include 2 K-ohm output impedance, asynchronous logic and dc to 1 Meg. Hz. toggle frequency.

Type	1-99	100-999
PD455	5.25	3.50

FIG. A
PLASTIC DUAL-IN-LINE

FIG. B
FLAT-PACK

SERIES 7400 A TTL
COMPATIBLE HIGH SPEED DIGITAL (0° TO +70°C)

All gates of classical TTL design utilizing multiple-emitter input transistors for optimum switching speed. Compatible and interchangeable with other similar TTL logic.

TYPE ULN—2111A UNICIRCUIT
FM DETECTOR AND LIMITER

This linear device comprises a three stage limiter and a balanced product detector. Applications include TV sound channels, FM receivers, AFC systems, communication receivers, and radar etc. . . . Only one low cost single winding tuning coil necessary. Frequency range 5kHz to 50kHz.

14-LEAD DUAL-IN-LINE PACKAGE

Type	1-24	25-99	100-999
ULN-211A	2.65	2.10	1.75

SERIES SP 600A (0° TO +75°C)
COMPATIBLE DTL —INDUSTRIAL/COMMERCIAL

Noise margin of 700m V to 2V, high speed. Low power and high performance. Recommended power supply 5 Volts.

Type Number	Circuit Function	1-24	25-99	100-999	1000-4999
SP616A	Dual 4-Input NAND Gate	1.80	1.45	1.20	1.15

SERIES SE 8000J (—55° TO +125°C)
COMPATIBLE DESIGNERS CHOICE LOGIC (DCL)

These circuits offer high speed TTL, slower low power TTL with high AC noise immunity, and low power DTL with high DC noise margins.

14 LEAD TO-88 'J' FLAT PACK

COLLINS

HYBRID THIN FILM CIRCUITS

Microelectronic system of tantalum thin film elements and active semiconductor chip devices. Tantalum film gives stability for uses in high speed computer logic, digital frequency synthesizers. I.F. and R.F. stages and special digital and analog circuitry. Encased in 1" x 1" x .155" hermetically sealed ceramic case. Insulations furnished.

Stk. No.	Type	Description	1-4	5-24	25-49

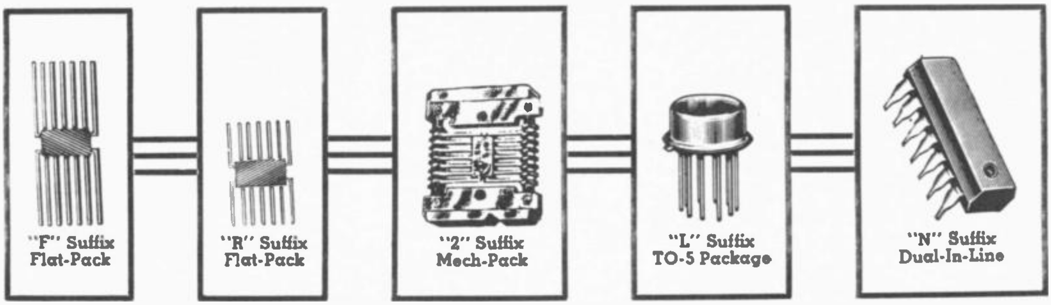
Texas Instruments Integrated Circuits



"F" Suffix Flat-Pack | "R" Suffix Flat-Pack | "2" Suffix Mech-Pack | "L" Suffix TO-5 Package | "N" Suffix Dual-In-Line

INTEGRATED CIRCUITS DEVICE DESIGNATIONS

When you order a Texas Instrument integrated circuit, the designation must contain three (and may contain four) parts.

1. PREFIX 2. UNIQUE DEVICE DESCRIPTION 3. PACKAGE 4. SPECIAL INSTRUCTIONS (optional)

EXAMPLE: SNR • 54H72 • F • 02

PREFIX

MUST CONTAIN TWO OR THREE LETTERS

SN	Standard Prefix
SNR	Hi-Rel processing without Group B and C
SNT	Hi-Rel processing with B and C
SNX	Preliminary Device prefix

UNIQUE DEVICE DESCRIPTION

MUST CONTAIN THREE, FOUR, OR FIVE CHARACTERS

EXAMPLES:	15930 74H72 510B 777	52709 5473 521A 5161B

PACKAGE

MUST CONTAIN A SINGLE LETTER ONLY —F THROUGH 2

F	Flat package	Kovar	10 or 14 leads std.
R	Flat package	Kovar	10 or 14 leads long
L	TO-5 type	....	8 or 10 leads
N	Dual in line	Plastic	14 or 16 leads

SPECIAL INSTRUCTIONS

MUST CONTAIN TWO NUMBERS ONLY IF PACKAGE DESIGNATION IS "F" OR "R"

No.	Formed leads	Insulator	Mech Pak	Tinned leads
00	No	No	No	No
01	Yes	Yes	No	No
02	No	No	Yes	No
03	No	Yes	Yes	No
04	Yes	No	Yes	No
05	Yes	Yes	Yes	No
06	No	Yes	No	No
07	Yes	No	No	No
10	No	No	No	Yes
11	Yes	Yes	No	Yes
12	No	No	Yes	Yes
13	No	Yes	Yes	Yes
14	Yes	No	Yes	Yes
15	Yes	Yes	Yes	Yes
16	No	Yes	No	Yes
17	Yes	No	No	Yes

AMPLIFIERS — 700 SERIES

Add suffix "T" for TO-5 only.

Type	Description	1-99	100-999
HSC702	Wide Band DC Ampl.	6.00	4.00
HSM709	High Gain OP Ampl.	15.00	10.00
HSC709	High Gain OP Ampl.	7.50	5.00
HSM710	High Speed Diff. Comp.	12.00	8.00
HSC710	High Speed Diff. Comp.	6.00	4.00
HSC711	Dual Diff. Comparator	7.50	5.00
HSC4709	Mono Dual High Gain Diff. Ampl.	30.00	20.00
HSC4710	Mono Dual High Gain Diff. Ampl.	24.00	16.00

DTL — 930 SERIES

Add suffix "J" for flat pack; suffix 'D" for Dual In-Line, or suffix "T" for 10 pin TO-15.

Type	Description	1-49	50-99	100-999
HSC930	Dual 4-Nand Gate	3.81	3.05	2.53
HSC932	Dual 4-Buffers	4.58	3.67	3.04
HSC933	Dual 4-Input Expander	3.40	2.72	2.20
HSC944	Dual 4-Power Gates	4.58	3.67	3.04
HSC945	Clocked Flip Flop	5.34	4.27	3.55
HSC950	AC Binaries	7.20	5.76	4.78
HSC951	Monostable Multivibr.	7.20	5.76	4.78
HSC962	Triple 3-Nand Gate	4.22	3.38	2.80

DTL — 2000 SERIES

Add suffix "D" for Dual In-Line Package.

Type	Description	1-99	100-999
HSM2000	Quad. Level Translator	15.00	10.00
HSM2001	High V High Curr Driver	15.00	10.00
HSM2002	Lamp Driver	18.00	12.00

DTL — 6100 SERIES

Add suffix "T" for TO-15 Package.

Type	Description	1-49	50-499	500-999
HSM6172	Dual 3-Nand w/Nodes	6.35	5.08	4.22
HSM6175	Hex Gate (1 Node input/gate)	8.90	7.12	5.91
HSM6176	Hex Gate (1 Node input/gate)	8.90	7.12	5.91
HSM6178	Triple 2-Nand (1 Node on 1 Gate)	7.03	5.63	4.67
HSM6179	Triple 2-Nand (1 Node on 1 Gate)	7.03	5.63	4.67
HSM6180	Quad 2-Nand (Dual 2 & Dual 1)	7.03	5.63	4.67
HSM6181	Quad 2-Nand (Dual 2 & Dual 1)	7.03	5.63	4.67
HSM6184	Triple 2-Nand (Third Diode 1 Gate)	7.03	5.63	4.67
HSM6185	Triple 2-Nand (Third Diode 1 Gate)	7.03	5.63	4.67

HLT 2L-0-99

Add suffix "J" for Flat-Pack or suffix "D" for Dual In-Line Package.

Type	Description	1-24	25-99	100-999
HSG43	Dual 4-Nand Gates	4.62	3.69	3.14
HSG53	Expandable Quad 2-Input or Gate	4.62	3.69	3.14
HSG63	Single 8-Nand/Nor Gates	4.62	3.69	3.14
HSG73	Expandable Dual Output Dual 2-Nor Gates	5.62	4.49	3.82
HSG93	Exclusive OR Gates w/Complement	5.62	4.49	3.82

HLT²L/100-199 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSG103	Expandable Triple 3-Inputs OR Gates	4.62	3.69	3.14
HSG113	Expandable Dual 4-Inputs OR Gates	4.62	3.69	3.14
HSG123	Expandable Single 8-Nand/Nor Gates	4.62	3.69	3.14
HSG133	Dual 4-Nand/Nor Drivers	5.62	4.49	3.82
HSG143	Quad 2-Nand/Nor Gates	4.62	3.69	3.14
HSG153	Quad 2-Inputs & OR Expanders	4.52	3.61	3.07
HSG163	Triple 2-Inputs Buss Drivers	5.62	4.49	3.82
HSG173	Dual 4-Inputs OR Expanders	4.52	3.61	3.07
HSG183	Dual 4-Inputs OR Expanders	4.52	3.61	3.07
HSG193	Triple 3-Nand/Nor Gates	4.62	3.69	3.14

HLT²L/200-299 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSG213	Expandable Nand/Nor Gates	4.95	3.96	3.36
HSG223	Nand/Nor Gates	4.95	3.96	3.36
HSG233	Quad 2-Inputs Nand/Nor Expanders	4.52	3.61	3.07
HSG243	Nand/Nor Gates	4.95	3.96	3.36
HSG253	Expandable Nand/Nor Gates	4.95	3.96	3.36
HSG263	Nand/Nor Gates	4.95	3.96	3.36
HSG273	Dual 4-Inputs Nand/ Nor Gates	4.52	3.61	3.07

HLT²L/0-99 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSF13	Set-Reset Flip Flops	4.62	3.69	3.14
HSF23	S-R Clocked Flip Flops	5.62	4.49	3.82
HSF33	Single-Phase S-R-T Flip Flops	6.16	4.94	4.19
HSF53	Nand Input J-K Flip Flops	6.87	5.50	4.67
HSF63	OR Input J-K Flip Flops	6.87	5.50	4.67

HLT²L/100-199 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSF103	Sep. Clock 35 & 50 MHE	10.17	8.15	6.93
HSF113	Com. Clock Dual J-K/F-F	10.17	8.15	6.93

HLT²L/200-299 SERIES

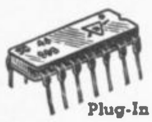
Add suffix "D" for Dual-in-Line package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSF253	Nand Input J-K Flip Flops	7.54	6.03	5.13
HSF263	OR Input J-K Flip Flops	7.54	6.03	5.13

NOTE: All of the above types and more are available in standard flat packs, TO-5, 14 Pin DIP.

Sylvania Integrated Circuits

SUHL I AND II



Plug-In

SUHL circuits characterized into two temperature ranges: —55°C to ±125°C for military applications and 0°C to +75°C for industrial and commercial use. SUHL I circuits designed for applications up to and including 20 megacycles, with gate propagation delays within 10 nanoseconds.

Single chip high speed (20 mos) Si planar epitaxial, hermetically sealed units. Low speed-power product. Provides fan-in capabilities as high as 18. Use suffix —02 for standard flat package and suffix —03 for Plug-In package when ordering types with SF, SG, SM and SA.

MIXING PRIVILEGES

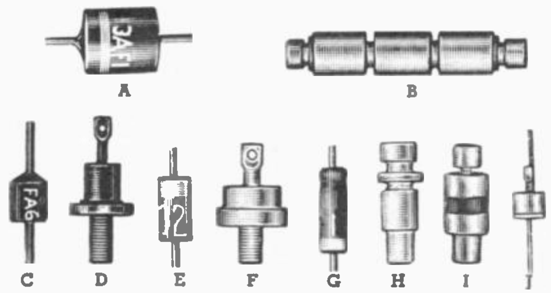
Pricing for mixed quantities of Integrated circuits; Price benefit given where single order consists of mixture of Integrated circuit types on the price list and in the same package. Types with-in the following groups may not be added to any other group in calculating price cut.

A: SA20, 21
B: Aand SF or SG prefixed types Except series SF100, SF110, SF120, SF130.
C: SM10, SM20, SM30, SM40 Series
D: SM90 Series
E: SM60 and SM70 Series
F: SM80 Series
G: SM100, SF110, SF120, SF130 Series.

NEWARKS' Semiconductor Listings are current as of August 15, 1968. New types are continually being added to NEWARKS' complete stock, and billing will be at those prices in effect at time of shipment. When ordering, supply type number along with desired manufacture for quickest and most efficient handling of your order from NEWARK —

YOUR ONE POINT SOURCE FOR ALL YOUR SEMICONDUCTOR NEEDS.

Sarkes-Tarzian Semiconductors



Silicon rectifiers for nigh temperature applications. All are now avalanche type. They provide "built in" protection against reverse transient overvoltage spikes. Use of avalanche type rectifiers eliminates need for protective components and circuitry normally used to protect standard rectifiers. Elimination of such crutch type components, reduces costs, saves space.

"CENTRE-KOOLED" SELENIUM RECTIFIERS

Featuring center cooling by means of spacers. Each spacer acts as an individual spring to guarantee constant assembly pressure. Higher leakage resistance assured by protective end plates of bakelite. Color coded for polarity identification. All rated at 130 volts. Av. wt., 6 oz.

Type	DC mA	Net

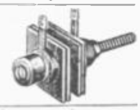
10	0	54
50	50	70

KLIPVOLT SUPPRESSORS



Reduces transient voltages to as low a value as possible without changing circuit characteristics or adding excessive cost. S-594 has mounting stud on each end and others have single stud. Peak discharge current 2.5 amps.

Type	Max. Clamping Voltage	Rated RMS Volts	Klipvolt Overall Length*	1-9	10-99	100-up

SINGLE PHASE BRIDGE RECTIFIERS

Compact efficient assemblies for quick easy installation in single phase full wave bridge applications. All offer the built-in transient protection advantage of avalanche characteristics. Ratings: 2.0 Z to 6A. 200 to 900 PIV. (Higher current and PIV ratings available on special request.)

All prices are current as of August 15, 1968.
For latest prices on Motorola Semiconductors, contact NEWARK'S Industrial Dept.

ORDERING INFORMATION

Specify tolerance desired by adding proper suffix to type number. When reverse polarity is desired, add "R" suffix to type number. For Meg-a-life II, level 1, add ML1 suffix; Meg-a-life II, level 2, add ML2 suffix; Meg-a-life II level 3, add ML3 to type number.

1 WATT SURMETIC ZENER DIODES—Case 59

Standard types are 10% tolerance; suffix A denotes 5% tolerance.

MEG-A-LIFE GERMANIUM PNP POWER TRANSISTORS

MEG-A-LIFE II. Program is designed to provide the aerospace and industrial equipment manufacturer with a practical means of meeting demands of high-reliability assurance, low cost, and short lead time.

MEG-A-LIFE II, LEVEL 3, presents the highest level of reliability assurance. Level 3 products meet applicable military specifications and are given a 240 hour power burn-in, to stabilize characteristics. Further electrical testing assures that devices meet electrical specs of MIL group A. Level 3 devices are supported by complete test data, including results from the actual acceptance lot from which the devices are supplied.

MEG-A-LIFE II, LEVEL 2, are zener and reference diodes which recieve the same tests performed on the level 3, but acceptance data is from a recent lot which passed the MIL tests.

MEG-A-LIFE II, LEVEL 1, are similar to the Level 2 units, but not subjected to the 240-hour burn-in.

MATCHED PAIRS JUNCTION N CHANNEL

Consists of two individual devices which have been carefully matched for critical applications, such as differential amplifier service. Each pair is packaged in a metal clip for pair identity.

DC SERIES REGULATOR MODULES

DC Series Regulator Modules places a complete DC voltage regulator in one small, compact TO-3 transistor package. "Miniaturized" card-type and hand wired circuits. Each module contains a complete silicon solid state compartor amplifier assembly—weighs only ½ ounce! 1-amp modules come as series regulators of 5, 6, 12, 18, and 24 volts, or as shunt regulators of 5, 6, 9, and 12 volts. TO-3 configuration fits all standard socket and heat sinks.

Load Regulations: No load to full load, ±1%.
Maximum Power Dissipation: 25 watts with 25°C case.
Temperature Coefficient: 0.04% per °C typical.
Output Noise: 500 μV RMS typical with no external filter.
Maximum Output Current: 1 amp.
AC Output Impedance: 20 Hz to 10 KHz = 0.1 max, 20 Hz to 40 KHz = 0.25 max. Typically less than 0.1 from 20 Hz to 40 KHz with output filter capacitor.
Operating Temperature: —30°C to +125°C case.
Weight: 0.5 ounce.

* 3% Setting Tolerance. +Minimum Input Current.

1 AMP DC SERIES BN-4100 REGULATOR MODULES

Features: Fixed Voltage ±10%. Low temperature coefficient of 0.1%/°C typical. ±2% load regulation from minimum to maximum load. Standard TO-3 package outline. Hermetically sealed. Corrosion resistant finish. Fits all standard sockets and heat sinks. Can be mounted in any position. Mounting Kit provided. Weight 0.4 ounce.
Load Regulation (no load to full load): = 2% maximum.
Temperature Coefficient: 0.1%/°C typical.
Output Noise (no external filter): 500 μV RMS typical
Storage Temperature: —55°C to +150°C case
Operating Temperature: —30°C to +125°C case

AUDIO AMPLIFIER

Designed for marine and automotive applications with battery voltages of 14 volts. Rated output will be sustained even under elevated temperatures and power supply voltages ranging from 11 to 16 volts. Operation with inputs of 5 millivolts eliminate the need for preamplifiers, while retaining minimum distortion.

Type	Output Voltage	1-24	25-99	100-999
BHA-0001	2 watt	7.35	6.10	4.90
BHA-0002	15 watt	9.40	7.50	5.60

THICK FILM POWER DRIVER MODULE

Designed to drive loads with high power requirements from relatively feeble digital signals. Modules consist of a high power, high gain amplifier coupled to the output of a 3 input expandable logic gate. Output circuits of module can switch power as high as 300W and voltages to 60 V. Typical applications include: DC Motors and Servos, Solenoids and Relays, Tape-perforators, Magnetic Cores and a variety of power switching functions.

Type	Output Voltage	Input Leakage Current @ 125°C	1-24	25-99	100-999

BHB-0006A	40V	100μA	18.45	15.40	12.30

10 AMP SILICON FULL WAVE BRIDGE RECTIFIER

Applications include power supplies, AC to DC converters and motor control circuits.

SK REPLACEMENT SEMICONDUCTORS

For replacement purposes in line-and-battery-operated portable radios, phonographs, tape recorders, TV receivers, and af Amplifiers. *Description and application apply to both items. † Means drift-field. RF, IF amplifiers are applications of the SK3006, SK3007, SK3008, and SK3011.

SILICON CONTROLLED RECTIFIERS

Ordering rectifier stacks: order by series type number (e.g. 4JA1011) and include required current voltage, transient voltage, max. ambient temp., phases, circuit configurations, and load. SCR series specify connection and/or supply circuit diagram.

RECTIFIER STACKS

FIGS. E AND F

GERMANIUM LOW-CURRENT STACKS

TYPE 4JA211

Small and lightweight, with excellent regulation. May be arranged in stacks of up to 12 fins for more than 160 various circuit configurations. Output up to 6 amps at 55° C ambient. Up to 630 PRV.

SILICON LOW-CURRENT STACKS

TYPE 4JA411, 4JA1011

High-temperature operation, up to 150° C. Ratings up to 18 amps at 25° C ambient, up to 3360 PRV. Offer high efficiency plus excellent regulation. Hundreds of stack combinations for a variety of circuit conditions. 4JA10011 35 amp. one-cycle surge rating.

SCR COMBINATION STACKS

Packaged building blocks include silicon controlled rectifiers, **compatible rectifiers, heat sinks, interconnections and all hardware.** Installation requires only mounting bolts and connections.

SERIES C3512 and 13, C4012 and 13, C1012 and 13, C1112 and 13, C1212 and 13

Rated up to 13.65 amps per fin free convection cooled, up to 23.5 amps per fin forced cooled at 25° C ambient. In two fin sizes, 3"x3: and 5"x5", and five SCR types.

SERIES C15014, C18015

Provide up to 102 amps per fin free convection cooled at 30° C ambient. Specially designed aluminum extrusion for maximum **heat dissipation when used with C150 or C180, SCR. Available in hundreds of circuit configurations.**

SILICON MEDIUM-CURRENT STACKS WITH 5" FIN

TYPE 4JA3512

Square fin-assembly for optimum use of 1N2154 series, 25-amp cell. Provides wide range of power applications with DC outputs up to 108 amps at 55° C ambient, up to 1800 PRV.

SILICON MEDIUM-CURRENT STACKS

TYPES 4JA2011, 4JA2511, 4JA3511

For wide range of power applications. Type 4JA2011 provides up to 32 amps at 55° C ambient, up to 1800 PRV. Type 4JA2511 gives up to 50 amps at 55° C ambient, up to 1800 PRV. Type 4JA3511 gives up to 65 amps at 55° C ambient, up to 1800 PRV.

SILICON HIGH-CURRENT STACKS

TYPE 4JA7012, 4JA7013

Lightweight stacks provide up to 165 amps DC at 40° C ambient up to 1000 PRV. Type 4JA7012 uses 5"x5"x1/8" flat copper fin heat sink. Type 4JA7013 has 7"x7"x3/8" flat aluminum fin.

RECTIFIER STACKS CONTINUED

TYPES 4JA7014, 4JA9015

Designed for free convection-cooled applications which require a maximum amount of current in a relatively small space. Fin is anodized aluminum,4" x 4" x 5".

TYPE 4JA9013

DC outputs up to 420 amps at 40° C ambient, up to 1000 PRV Free convection cooled with 7" x 7" x 3/8".

TYPES 4JA421, 4JA422 POTTED RECTIFIER CIRCUITS

Rectangular design with solder lug. Available in wide variety of circuit configurations. Use Types 1N536-540, 1N1095 silicon cells.

Type	Current up to	Ambient Temp.	PRV. up to
4JA421	0.65 amp	25° C	10,000
4JA422	1.50 amps	25° C	2,000

TYPES A723 AND A725 HIGH VOLT SERIES

A7 Controlled Avalanche Rectifiers available in convenient preassembled, potted assemblies with wire lead terminals. Available up to 10,000 PRV. Up to 820 mA at 50°C ambient. Self-protected against normal voltage transients. Available in many circuit configurations. Type A723 is rectangular block series. A725 is axial lead cartridge series.

SILICON MULTI-PELLET DIODES

Planar epitaxial passivated with tightly controlled conductance, controlled stored charge, and low leakage. Two, three or four pellets mounted in series in a subminiature double heatsink package. Useful as low voltage regulator diodes, amplifier non-linear bias elements, signal limiters or level shifting diodes in transistor logic circuits, and DC coupling devices in DC amplifiers and digital circuits such as multivibrators. Max. reverse current 30 volts at 25° C nA: 30. Min. breakdown at 5 uA V: MPD200—30; MPD300—60; MPD400—90.

GE-504A UNIVERSAL RECTIFIER—DO-3

A silicon rectifier with a 60 amp surge rating. PRV is 600 volts; max. Idc, 1amp. Shpg. wt., 2 oz.
Type GE504A. NET .... **.66**

EXPERIMENTAL/HOBBYIST ELECTRONIC COMPONENTS

Featuring electronic components for the experimenter, with schematic diagrams for building battery charger, tachometer, SGR ignition system, flashers, stereo amplifier, all-band receiver, plug-in speed control for tool or appliances, light dimmer, and other items.

Type	DESCRIPTION	Net
GE-X1	SILICON CONTROLLED RECTIFIER. 117-volt solid state switch. Controls up to 4.7 amps.	2.60
GE-X2A	LIGHT ACTIVATED POWER switch. It will conduct up to 1/4 ampere, up to 25 volts.	2.80
GE-X3	HIGH CURRENT SILICON CONTROLLED RECTIFIER. For up to 13 amps @ 50 PIV.	4.00
GE-X4	CONVENTIONAL HIGH CURRENT SILICON RECTIFIER. 20 amp rating. For up to 200 PIV.	1.60
GE-X5	HIGH SENSITIVITY SILICON CONTROLLED RECTIFIER. For special circuits up to 1.6 amps and 50 volts. Activated by extremely low signal power (a momentary sig. power of 200 micro watts or less).	2.30
GE-X6	PHOTO CONDUCTIVE CELL. Cadmium sulfide end-illuminated. Up to 250V peak. AC/DC.	1.40
GE-X7	REED SWITCH. Carries from 15 volt-amperes to micro-amps. External magnetic acuation.	.80
GE-X9	MED. SPEED, PNP TRANSISTOR. Germanium alloy. For medium powe ramplification and switching at low frequency.	.70
GE-X10	UNIJUNCTION TRANSISTOR. Three-terminal semiconductor. Has low value of firing current, stable negative resistance, stable firing current, high pulse current capability.	1.35
GE-X11	ZENER DIODE. Rated 8.2 volts at 1 watt.	1.80
GE-X13	DIAC—With schematic for building lamp dimmer or AC motor control.	1.60
GE-X16	SILICON CONTROLLED RECTIFIER — With schematic for building battery-operated fluorescent light.	3.45
2N107	AUDIO PNP TRANSISTOR. Alloy junction.	.75
	AUDIO PNP TRANSISTOR. Low voltage, high frequency transistor.	.75

SCHAUER SEMICONDUCTORS

● **NEW**
● **PLASTIC DIODES**
● **ZENER DIODE KIT**

$54.57 VALUE FOR ONLY $24.50

A 51-piece assortment of 1% tolerance, 1 watt reliable Schauer zener diodes covering the voltage range of 2.7 to 16.0V. Three diodes of each voltage are contained in reusable poly bags which are stored in a handy kit. Data sheet included. May be used over and over in laboratory prototypes as well as in precision test equipment. Close tolerances mean fixed impedances and temperature coefficients and permit voltage range tests for optimum design.

Kit SCH51 **24.50**

SILICON VARISTORS

Consists of two matched silicon junctions connected in parrallel and oppositely poled The junctions are molded into one small package with axial gold plated nickel leads. Surge: 25 amps peak 1/2 Hz; dissipation: 3/4 watt at 25°C.; TC of 2mv/°C. All have closely controlled forward conductance with log current characteristics.

1 WATT ZENER VOLTAGE REGULATORS (FLANGELESS)—DO-13

These zener regulators are designed primarily for continuous feeding in automated assembly processes. All of the units are process-selected so that they may assure extremely sharp zener "knees" and excellent voltage regulation over the entire operating temperature range. These devices have ±20% tolerance. Add "A" to type number for ±10% tolerance.

SCR FIRING CIRCUITS

IR's FC series of standardized SCR firing circuits provide hard-firing gate triggering pulse and eliminate SCR failure due to di/dt, false firing and interaction. Negative gate bias of 0.7V allows full utilization of SCR's dv/dt. Magnetic amplifier isolated gate signals permit use in full-wave DC or anti-parallel AC circuit applications. Dual wound transformers allow selection of input voltage. Units are suitable for firing all JEDEC SCR's rated 10 amps or more plus 40RCS series listed on this page. FC-100 is a single phase unit rated at 120/240 volts. Size: 5"x6"x2.54". FC-200 is a three phase unit rated at 240/480 volts. Size: 6"x9.5"x2". FC-300 is also a three phase unit rated at 240/480 volts. Size. 5"x6"x7.30".

KLIXON

SELF-REGULATING COMPONENT OVENS

Statitemp Series. Provides a stable thermal environment .Temperature gain (defined as ratio of change in ambient temp. to change in control temp. at constantvoltage and component dissipation, as measured by the temp. depentent characteristic of the component) is 30:1 for 115°C. types, 15:1 for 80° models. Low power drain; unaffected by component current. Operate from 24VDC. Aver. wt. approx. 5 gms.

For temperature stabilization of DO-7 and DO-5 semi. components.

Stock No.	Type	Fits	Oper. Temp.	Watts	1-4	5-9	10-24	25-99

ERIE RECTIFIERS

FULL WAVE RECTIFIER ASSEMBLIES

Fig. A
- **Full Wave Bridge Rectifier Circuit**

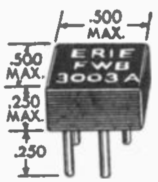

Fig. B
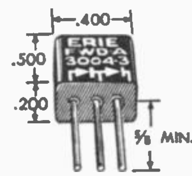
- **Full Wave Voltage Doubler Circuit**



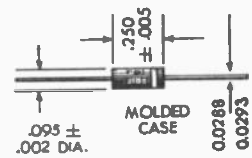


Fig. C

A miniature series of bridge and doubler modules designed for printed circuit applications. Double seal assures moisture resistance to environmental specs of MIL-STD-750A. FWB types (bridge rectifiers) measure ½x½x¼", with pin leads ¼" long; FWD types (doublers) measure .50x.40x.20" with ⅝" pin leads.

NPN PHOTO DUO-DIODE—TYPE 1N2175

The 1N2175 is a sub-miniature, symmetrically diffused silicon photo readout device. The two junctions are symmetrical so that either diode terminal can be biased either positively or negatively. Due to this unique design, AC or DC bias voltage can be used. The small size and high light sensitivity of this unit makes it particularly useful in high speed readout of punched cards.

Type 1N2175. 1-99 ....11.50 **100-999** 8.00

300 SERIES RADIAL RECTIFIER COOLERS

Radial fin coolers for rectifier or stud mounting transistor applications. Adaptable to stack arrangements. Uses standard teflon insulating washers. Accommodates press-fitted and stud-mounted rectifiers and transistors up to 11/16" hex case. Semiconductor mounting surface and one mounting foot unanodized. Type no. suffix indicates mtg. accommodations: see following page for key.

400 SERIES NATURAL CONVECTION COOLERS

Optimum fin design provides many semiconductor applications. Model NC441 with cooling area of 400 sq. in. provides thermal resistance of .54° c/w @ 100 watts. Type NC-433 has 70°C. rise at 100W power dissipation. Type no. suffix refers to mounting specs: see chart on following page.

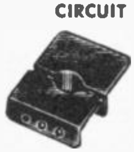
CIRCUIT BOARD COOLER FOR TO-5 TRANSISTORS



Type 150. Ideal for use where space is limited. Requires only 0.375 in.² area. In applications permitting 1⅜" height above the circuit board, this lightweight, economical Cooler has good performance characteristics with TO-5 cases: case rise 34°C @ 1 w with natural finish. Wt.: .10 oz.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999
58F379	150	1.375 x 1.00 x .375	.061	.051	.041	.036

THERMAL CLAMP FOR TO-1 CASES

Type 255. For push/pull driver or low power output applications. Gives retention of cases to chassis or heat sink. 2 cases can be mounted. 3°C/w per TO-1 transistor or 1½° C/w for both. Mtg. ctr.; .687, tols. ±.001 or ±.005. Material: 1100 aluminum alloy. Finish: none. Wt.: .10 oz.

58F380	255	1.726 x .375 x .476	.063	.053	.043	.038

SERIES 258 THERMAL LINK

Thermal Link for fused glass diode. Copper solder points are isolated from, but bonded to the aluminum U-form. Dielectric coating extends down the legs to provide long creepage path. 100% tested at 1000V hypot. Incr. cur. rating: 3 to 5 times. Screw mounted. Wt.: .05 oz.

Stk. No.	Type	Size	1-24	25-49	50-99	100-499

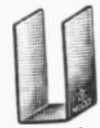
SERIES 630 HEAT SINKS FOR TYPES TO-3 AND TO-66 STYLE TRANSISTORS

NC-631

NC-632



NC-633

Series NC-630. Provides maximum cooling per unit cost. Units are pierced for TO-66 and TO-3 style transistors. Hole pattern suf. —3 for TO-3 and —66 is TO-66. Material type 1100-H14 aluminum with natural finish.

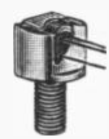
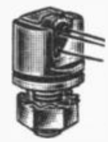
THERMAL RETAINERS FOR TO-5 CASES

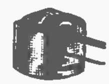


254S



254S1

254T



254P
254D

The TO-5 case style, including the Kovar header type is best heat sinked at the bottom face of the flange, and all Series TR-254 Heat Sink provide this preferred method. All five types intended as thermal links from transistor case to a cooler or chassis member acting as the heat sink. Type 254-SI has built-in electrical insulation. Material: Type 254-SI; 6061-T6 aluminum with gold irridite finish.

You Can Depend on NEWARK For Complete Stocks — Lowest Prices — Fastest Service and the Latest in Industrial Electronics

● NEW SERIES 260 CUP CLIPS

Cup clip for TO-5 and TO-18 case style transistors. Epoxy insulated (E) are economical. Beryllium Oxide insulated (B) are for application requiring low stray capacity to the heat sink. Non-insulated cup clips (no suffix) are soldered together with 63/37 tin lead alloy. Max. Temp. 300°F. all are for TO-5 units except (*) for TO-18. Beryllium copper cups with brass bases.

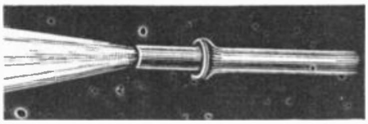
BAUSCH & LOMB

FIBER OPTICS "LIGHT WIRES"



Permits transmission of light beams around corners and thru intricate bends. Numerous applications exist in aerospace R & D, photography, electro-optics, automation, and production systems. Extremely useful in optimizing photocell performance by channelling light onto photosensitive surfaces; may be used as "transmission lines" for modulated light signals, eliminating the need for complex, delicate systems of lenses and prisms. Each "wire" is made of a bundle of 100 to 1,000,000 tiny 40μ diam.) fibers; each fiber consists of a core covered with a cladding of slightly lower index of refraction — light is channelled from one end of the bundle to the other by a process of total internal reflection. Because of this core/clad combination, dirt, oil, tar, and most other contaminants will have practically no adverse effect on light transmission. To provide mechanical protection, the bundles are encased in PVC or crush resistant aluminum tubing and furnished with brass end fittings. Will transmit the visible and near-infrared portions of the spectrum, but are not practical in the UV region. Temp. range: —40 to +200°F.

Photocells & Fiber Optics

RAYTHEON

1/4" GLASS VIAL PHOTOCELLS

Are hermetically sealed in glass cases and are available with cadmium selenide and cadmium sulfide sensors. Rugged mechanical construction, small size and light weight provide ease in mounting. Wide range of characteristics and high voltage capability provide a low noise, completely ohmic light dependent variable resistor, useful over a wide range of voltage and illumination. Cadmium selenide cells, having faster switching speeds are especially suitable for chopper and other control or switching applications requiring operation up to one kilocycle per second. Color response covers the visual light range and extends well into the infra-red. Cadmium sulfide cells, having a lower temperature coefficient, are especially suitable where stability over a wide temperature range is required. The improved temperature stability and more linear response to illumination makes this type particularly good for applications requiring better stability in hostile environments.

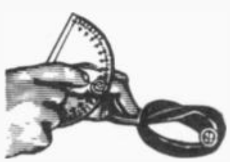
POLY-OPTICS



PREMIUM-GRADE IMAGE GUIDES

These synthetic fiber optic devices have fiber arrays which are coherent at either end and are capable of transmitting images, as shown. The .003" fiber image guides resolve 333 lines per inch, and the .010" fiber version resolves 100 lines per inch. Jacketing is neoprene. All units are tipped with metal ferrules, and are carefully polished for maximum optical efficiency. These durable devices can be twisted, knotted and subjected to indefinite flexure without fiber breakage or transmission degradation, and are useful for remote, flexible transfer of images of all kinds.

COMMERCIAL GRADE PLASTIC—FIBER OPTIC LIGHT GUIDE

Plastic light guides have numerous applications: photo control, switching, counting, non-explosive light source, dial lighting, light indicators, etc. Temperatures to 190°F can be withstood and exposure to humidity does not cause degradation. Termination is easily accomplished with a razor blade. Jacketing is polyethylene because of its moisture resistance and flexure characteristics. Line losses can be as low as 10% when using end treatment compound shown below. Transmission has been reported as high as 25 to 30% at 10 feet depending on termination methods.

Type No.	No./Size Of Fibers	I.D./O.D.	AREA (Sq. In.)

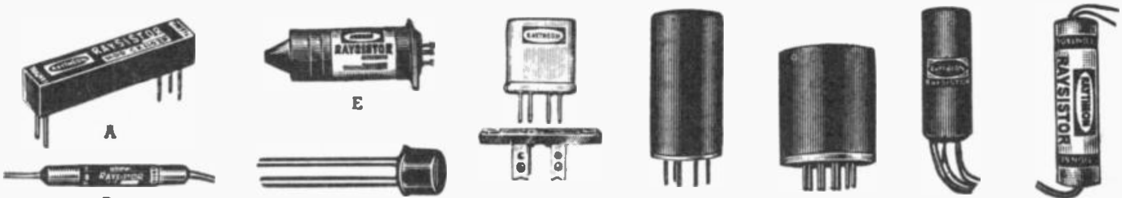
Raysistors & Photoconductive Cells

RAYTHEON

RAYTHEON RAYSISTORS



• Ideal replocement for Switches — Relays — Potentiometers

Four terminal optoelectronic device which performs a variety of control functions, providing noise-free control of AC or DC signals over a wide dynamic range without transients or contact (or wiper) chatter. Since there are no moving parts, the Raysistor is exceptionally rugged and has inherently long life in typical applications as variable resistors, solid state switches, relays and voltage or signal isolators. Unit operates on the principle of controlled light acting on a photoresistive element. No electrical or mechanical connection exists between the control and signal circuit. * With Socket.

RAYTHEON PHOTOCELL

Hermetically-sealed solid-state light dependent resistor using a cadmium selenide photosensitive material designed for use in optoelectronic control circuitry. Fast switching speed suitable for chopper and other control and switching appliances requiring operation up to one kilocycle. Coupled with a high voltage capability, provides a very low noise variable resistor which is ohmic over a wide range of voltage and illumination. The TO-5 package permits use of standard mounting hardware.

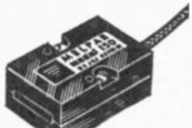
Readers, Choppers, Oscillators & Solar Cells

MELPAR, INC.

PHOTOELECTRIC READER



Consists of light source, lens and photocell. Utilizes the advantages of detection by reflected light. Lamp, 6v at 0.2 amp; dc recommended; nominal life 10,000 hr at 5.4v. Photocell; nominal input, 20vdc. Max. input, 300 vdc. 50 mv max. dissipation. Nom. response: 7250 angstroms, std. Maximum counting rate on std. unit; 300 counts per second. Versatile; counts, cues, sorts and inspects. Features small size (0.6 cu. in.), and insensitivity to ambient light.

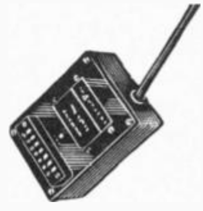
Replacement lamp for 200. 99F872 .... .75

PHOTOELECTRIC CONTROL UNITS



Transistorized photoelectric control units provide high reliability at low cost for automatic control systems using the companion photoelectric readers 150, and 200A. These control units feature long life, ease of maintenance and highly simplified installation. In one compact unit are contained a power supply, amplifier and controlled switching.

Model 155A. Control unit companion to the 150 photoelectric reader. Input power: 115V, 60HZ, 6W. The control relay is SPDT, 115V 1A non-inductive. The maximum operating rate is 1000/Min. Complete with 5' cord. Case size: 4" x 2 7/8" x 1 1/2".

Model 205A. Control unit companion to the 200A photoelectric reader. Input power: 115V, 60HZ, 17W. The control relay is SPDT, 115V 1A non-inductive. Maximum operatnig rate: 1000/Min. 5' cord included. Case size: 6 1/4" x 3 3/4" x 2".

SERIES LIGHT L10 CHOPPER

Economical light chopper used for light beam modulation, pulsing, scanning, sweeping, and control. Exclusive features: Compact size, jeweled bearing, lower power input, wide angle of excursion (up to 20°), optical quality, high reflectivity and replaceable mirror and bearings. Specifications: Input power: Sine wave, 1 1/2 v. (typical). Power consumption: 25 milliwatts. Mirror finish: aluminized front surface or optical mirror. Mirror size, 1 Cm². Frequency to 500 Hz std. Size 1 29/32" x 1 15/32" x .8".

Stk. No	Description	1-3	4-9	10-24	25-49	50-Up
99F854	L10 Chopper	55.95	47.95	38.95	33.95	29.95

TUNING FORK OSCILLATORS

A combination of tuning fork and high gain amplifier circuit which generates a sq. wave output with the application of dc voltage. Accuracy: ± @ 0 to 65°C std., —40° to +100° operational. Input voltage: 12VDC. Output: Square wave, approx. 50% p-p min. of output voltage into 10K external load. The terminals are solder hooks which can be cut off to pin for printed circuit mounting. Typical applications: lab. std., test equipment, motor control, timers, etc. Stable, rugged and reliable.

The 10HDN6 is 1 29/32" x 1 15/32" x 1 21/32".
All others are 1 29/32" x 1 15/32" x .4".
* Divided to 60HZ from 480 HZ.

Stk. No.	Model	HZ	1-9	10-24	25-49	50-Up

MEL-INK PERMANENT MARKING COMPOUND

Typical uses include identifying nomenclature on printed circuit boards, sheet metal chassis, and most components. Non-conducting.

Type M-300. Hard-setting epoxy with a viscosity suitable for machine and hand stamping, as well as silk screening. Prevents smearing of stamped information on completion of the curing cycle. Excellent solvent resistance.

GENERAL ELECTRIC

PHOTOCONDUCTIVE CELLS

Hermetically sealed after evacuation and back filled with dry air to reduce the moisture content to approx. .015%. Cells come in three basic sizes, four power ratings, and multiple resistance ratings. Wide range enables the designer to select a maximum power dissipation of 75, 250, 300 or 600 mw. By using cells to operate many devices directly, amplifying stages can be eliminated and overall circuits greatly simplified. Cells have very high sensitivity and spectral response peaks in the visible light range. Near maximum response obtained over large portion of the spectral region. Al₁ are in glass-metal packages. Have flexible leads and small size to dissipation ratio. No external shields required. May be used for annunciators, anemometers, camera aperture control. * Dia. excludes flange.

† Plastic encapsulated (not hermetically sealed). * cadmium-selenide device.

PHOTOCONDUCTIVE CELL-LAMP COMBINATION

Photoconductor-lamp combination includes cadmium-sulfide (PL5C1 is cadmium-selenide) photoconductive cell and a variable illumination source enclosed in a light-tight package. Photoconduction is controlled by varying the voltage to the light source. Intended to be used for circuit isolation as a potentiometer free of moving-contact noise, and for low-level switching.

Stk. No.	Type	Lamp Volts Current	Max. Volts	Resistance 20% V	Resistance 90% V	Temp.	1-249	250-up

DRY REED SWITCH

Contains a pair of magnetic overlapping, contact bearing cantilever reeds sealed in a glass tube filled with dry inert gas. Life expectancy 20 million cycles. Operating temperature —65° to 150°C. Shock without false operation. 40G's, except DR100, 15G's. Length, with leads 3.21", Dia. .215". Contacts; normally open. Max. voltage 250 Volts.

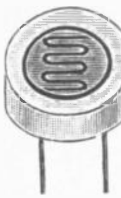
VT100



VT100E

VT200

VT300

CdS AND CdSe VT PHOTOCONDUCTIVE CELLS

Cells ideal for circuit board mounting. Second digit indicates spectral peak 0=CdS5650A, 1=CdSe7350A, 2=CdS5150A, 3=CdS5500A (for high speed switching), 4=CdSe6750A, example: VT312 is type 1CdSe-7350A. All have a maximum voltage of 300 except (*) 200 and (†) 100. (**) indicates the minimum dark resistance (inohms) 5 seconds after 2 Ft-C.

● NEW PAM-1 PHOTOCELL AMPLIFIER MODULE

Specifications @ 25°C Ambient

Input: 30VDC (center tapped) ±15MA
Output: 3V/vW or 6V/ft. C.
Sensitivity: Below 0.001 footcandles
Linearity error: ....2% to 10 fc.
Photometric response: 3V/μW (with 1
Rise time: ....100 microseconds
Temp. Coefficient: ....—2%/°C
Ambient Temp.: ....—25°C to +65°C

PAM-1 consists of a matched selenium photocell and a high gain amplifier which provides a short-circuit load for the photocell, causing linear operation. The output voltage is determined by the externally connected feedback resistor. The spectral response matches the sensitivity of the eye, but has considerable UV response. Sensitivity is equal to silicon photodiodes and superior to most vacuum or gas phototubes. This sensitivity coupled with the high gain amplifier provides a significant power level from this device.
61F1136. NET **71.00**

VACTROL PHOTOCELL LAMP CONTROL MODULE

VT 6005

Package capable of circuit board mounting, for electronic amplifier use. Epoxy sealed metal enclosure. .100" standard lead centers. Minimum off-res: 100 megohms. Min. off Resis on VT12002N is 1 meg. Dia. 5/16". VT-6005 equal to the Clairex CLM4006; VT10030 like the CML5012.

SELENIUM PHOTOVOLTAIC CELLS

Constructed of steel Selenium, molecular layers of CdS and CdO. #30AWG vinyl coated wire leads on unmounted cells. May tolerate 100°C. "L" in type indicates soldered leads. Type A — long-lived, most resistant to chemical fumes, more sensitive to shorter wavelengths; Type B — for higher current output and less fatigue. * indicates 100 Ft-C, 150 Ohms, 75°F, light source 28508K. ** means Epoxy (clear). *** Hermetic, glass to metal case.

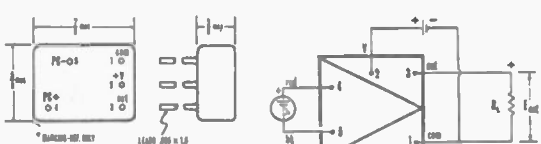
● NEW PHOTOCELL VOLTAGE MULTIPLIER



Model PVM-1. This amplifier when used with any of the special Vactec photocells, converts it to a constant current source. Combination of cell and PVM makes a solid state equivalent of gas or vacuum phototube. Large voltage changes can be readily obtained with high load resistances. Frequency response from DC to 15KHz available with small area cells. Low supply voltage and current drain make this unit ideal for battery operation. Input: 3-15VDC @ 200μA, Output: 4μA/fc/In² active cell area, Response: up to 10 usec., Peak Spect. Range: 5750°A, Temp. range: —25°C to +65°C.

Stock No.	Type	1-9	10-99	100-999
61F1137	PVM-1	3.50	3.00	2.75

PHOTOCELLS FOR USE WITH PVM-1

All cells furnished with 6" #30 AWG lead wires. Cells less than 0.045" thick and are coated with clear epoxy. Other cell sizes available on request. Peak spectral response occurs at approx. 574 millimicrons of wavelength.

● NEW ALL SOLID STATE VACTROL

The first light emitting diode/photoresistor control (LED-PC). The LED Vactrol utilizes a high efficiency light emitting diode to achieve high performance at a relatively low signal power. Operation with adequate resistance change down to 1 milliwatt of input power. Light-to-dark ratio of 1000:1 or greater. Operation at 75 milliwatts input power will permit a 40,000-hour life for the LED. No filaments to vibrate; high shock resistance. Available in TO-8 hermetically sealed enclosure or smaller axial configuration. Response time of photocell is proportional to input power. Vf for LED is 1.5VDC. Hermetically sealed model VT-005-8; axial configuration model VT-030-18A.

RCA Industrial & Special Purpose Tubes

INDUSTRIAL RECEIVING-TYPE PREMIUM TUBES

PREMIUM TUBES. For critical industrial and other equipment requiring exceptional stability of tube characteristics, long tube life, and reliable performance. RCA Premium Tubes, superior to their corresponding commercial prototypes, are subjected to special test and controls on critical characteristics, environmental test (such as shock, fatigue, vibration, altitude) and also to special life test.

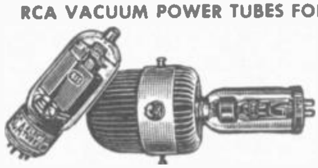
RCA VACUUM POWER TUBES FOR CW APPLICATIONS—TYPICAL CLASS C TELEGRAPHY SERVICE (CCS)



891R

6146A

6161

7650

RCA manufactures one of the world's largest lines of power tubes. The complete line ranges from small, low-power, glass-envelope types to huge, super-power, ceramic-metal types.

CAMERA TUBES — VIDICONS

FEATURES

- **Resolution—Up to 1100 TV lines limiting resolution or 60% response to 400 TV lines.**
- **Spectral Response—Panchromatic with high sensitivity in all chrome channels**
- **Highest sensitivity and lowest lag of any commercial vidicons**
- **Clean pictures—Due to stringent spot critieria**

RCA Type Application Notes

4478—low-cost vidicons for non-critical closed circuit applications

7038, 7735B—broadcast-quality pick-up for studio and closed-circuit applications

8507A—separate mesh variant of the 7735B featuring high resolution and high signal uniformity . . . primarily for military and industrial applications

RCA Type Application Notes

8572—separate mesh variant of 7038 featuring high resolution and signal uniformity; for broadcast film cameras

4493—live color pick-up in TK-42

4494, 4495—transistorized camera

8480/V1, 8134/V1—for color film pick-up in transistorized TK-27 . . . no other tube type will do

IMAGE ORTHICONS FOR MILITARY AND INDUSTRIAL SERVICE

2" — DIAMETER TYPES

Type	Typical Face-plate Illum. Footcandles	apllitude Resp. at 400 TV Lines Per Cent	typ. Signal-to-No Radio Bandwidth 4.5 MHz	Net Each
8685	7.5×10^{-2}	25	30:1	1440.00

3" — DIAMETER TYPES

Type	Typical Face-plate Illum. Footcandles	Amplitude Resp. at 400 TV Lines Per Cent	Typ. Signal-to-No Radio Bandwidth 4.5 MHz	Net Each
7629A	4×10^{-3}	50	32:1	1700.00

VIDICONS

For TV film studio pickup service and closed-circuit TV applications. Available in deflection and focus methods, ruggedized or non--ruggedized tubes, conventional or low power "dark heaterrs", photo--conductive surfaces, and tube size.

Industrial & Special Purpose Tubes RCA

CAMERA TUBES — IMAGE ORTHICONS

Use RCA BIALKON Image Orthicons when replacing your present Image Orthicons

LONG-LIFE BIALKALI PHOTOCATHODE IMAGE ORTHICONS

Superior Color — Black & White TV Pickup

- **High sensitivity over the visible spectrum**
- **Electronically conducting glass target**
- **Improved "anti-ghost" image section**
- **Field mesh connection**

Type 8673. High capacitance target assembly and designed specifically for color or black & white telecasting at the light levels available in color TV studios.

Type 8673 (Black & White) **1800.00**
Type 8673/S (Color) 1800.00

Type 8674. Has higher sensitivity than 8673 and is intended for color and black & white studio or remote TV pickup at light levels available in black and white TV studios.

Type 8674 (Black & White) **1800.00**
Type 8674/S (Color) 1800.00

RCA 8685 IMAGE ORTHICONS

For Portable, Broadcast, Scientific or Industrial TV Pickup Service

- **2" Diameter—Ideal for compact TV cameras**
- **Bialkali Photocathode—High sensitivity over the entire visible spectrum**
- **Electronically conducting glass target achieves non-sticking pictures and long life**
- **Constant sensitivity and resolution throughout tube life**
- **Separate field mesh connection**
- **Low power "dark-heater" requires only 0.6 watts**

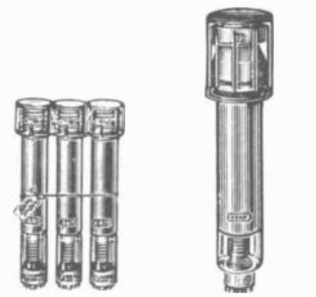
Elimination of infrared response prevents color masking by the infrared — allows gray-scale rendition of colors in realistic tonal graduations. Specifically designed to operate with 16mm film camera optics.

Type 8685 .... **1440.00**

RCA CAMERA TUBES

A broad choice of tube design features are available: field or non-field mesh design; glass, thin-film semiconductive, or special long-life targets; precision construction; anti-ghost image section design; microdamp construction; tube size; and matched sets for color pickup.

ORTHICONS



For Color Pickup at Black-and-White Studio Lighting Levels

Unmatched Picture Quality in Black and-White Pickup

IMAGE ORTHICONS FOR LIVE BLACK-AND-WHITE TELEVISION

Whether ordering in quantity for production or in small lots for specialized use, make Newark your headquarters for every electronic component. — Get the exact part you need from an inventory of over 70,000 units! Top Quality, Lowest Prices, Fastest Service.

RCA Industrial & Special Purpose Tubes

3 Major Advantages of RCA BIALKALI PHOTOCATHODE TUBES For Upgrading Systems Capabilities

1. Higher Quantum Efficiency
2. Lower Dark Current
3. Improved Pulse Height Resolution

RCA-8575 Photomultiplier Tube featuring Bialkali Photocathode Construction.

Directly Interchangeable Replacement Types For Most Popular Sizes from 3/4" to 5"

New Type	Replaces	Nom. Size	Description	Anode Luminous Sensitivity 2870°K (A/lm)	Anode Dark Current (A)	Q.E. @ 3600-4000°A	EACH
4516	RCA-7767	3/4"	Head-on type having fast time characteristics. For use in probes, and biological tracer studies.	27	2×10^{-10} @ 7A/lm	24%	185.00
4517	RCA-6199	1½"	Head-on, flat-face types having small size for use in portable scintillation counters.	33	3×10^{-10} @ 7A/lm	24%	85.60
4518	RCA-6342A	2"	Head-on, flat-face types. Especially useful for fast coincidence scintillation counting.	380	3×10^{-10} @ 7A/lm	24%	105.00
4523	RCA-8053	2"	Head-on, flat-face types having venetian-blind dynode structure. For general scintillation counting applications.	80	5×10^{-10} @ 13A/lm	24%	125.00
4524	RCA-8054	3"	Head-on, flat-face types having venetian-blind dynode structure. For general scintillation counting applications.	80	1×10^{-9} @ 13A/lm	24%	150.00
4525	RCA-8055	5"	Head-on, flat-face types having venetian-blind dynode structure. For general scintillation counting applications.	80	1.5×10^{-9} @ 13A/lm	24%	205.00
and the standard of the industry RCA-8575		2"	Head-on type having an in-line electrostatically focused dynode structure, very low noise, and fast time characteristics.	2500	1×10^{-9} @ 200A/lm	28%	315.00

Other RCA Photomultipliar Tubes are listed on page 169.

VIDICONS

Tube Type	Description	1-4
GL-7038	For film pickup applications . . . monochrome or color . . a direct replacement for the 6198A	170.00
GL-7038v	For use in Chroma channel of the GE Model PE24 camera.	170.00
GL-7325	High sensitivity for live pickup . . . lower lag at low light . . . ideal for industrial use	170.00
GL-7735A	Highest sensitivity, lowest lag at low light levels . . . for studio or remote pickup	165.00
GL-7735B	Hightest sensitivity, lowest lag at low light levels, for studio or remote pickup, has higher resolution.	170.00
GL-7697	For cameras with automatic sensitivity control . . similar to 7735A	170.00
GL-7226	Low heater power . . . for transistorized cameras . . . good live pickup	315.00
GL-7262A	Low heater rating of 0.6 watt . . . excellent sensitivity and low lag at low light	215.00
GL-7263A	Specially designed to withstand severe shock, vibration and high humidity	370.00
GL-8484		170.00
GLZ-7911	Designed for televising live scenes in educational, commercial, industrial and closed circuit television applications, high sensitivity and low lag photoconductive surface.	75.00
GLZ-7929	Replacement tube for chroma channels RCA TK 42 cameras	370.00
	Color matched set: red, blue, green	3165.00
GL-8134	Replacement tube for RCA closed circuit TV cameras	275.00
GL-8134V	For use in chroma channels RCA TK 27 cameras	370.00
GL-8507	Separaie Field Mesh 7735A	215.00
GL-8541	For transistorized cameras . . . similar to GL-8507 except 0.6 watt rating . .high sensitivity, low lag	310.00
GL-8572	Broadcast film pickup Sep. field mesh of 7038.	215.00
GL-8572v	Luminance Channel GE Camera Model PE240	215.00
GL-8604	Similar to 8572, except low heater power.	310.00
GL-8573	Live industrial—high sensitivity, short length, low heater power. Sep. field mesh.	275.00

TRIODES

Type	Description	1-4	5-18	19-49	50-99
2C39A	High mu, ceramic-metal plan. triode 100W pl. diss. 6.3V 1A Fil. 1000V max. pl.	20.75	19.61	18.68	17.64
2C39WA	Suited for use in grid-isolated VHF and UHF circuits.	29.00	27.40	26.10	24.65
3-400Z/8163	Small 0-bias pwr. triode providing 1kW pep as a low distortion class B linear.	34.00	....	....	....
3-500Z	Larger version of 3-400Z	34.00	32.13	30.60	....
3-1000Z/8164	Larger vers. of 3-400Z. 7 5V 21A Fil. No bias with plate v. below 3000V.	78.00	....	....	....
3CPN10A5/7815	High mu ceramic-metal planar triode for pulse serv. to 3 GC 6V 1A Fil.	26.50	25.27	....	....
3CX100A5/7289	Improved version of 2C39.	25.50	23.90	....	....
3CX2500A3/8161	Ceramic Med.-mu pwr. triode, forced air cooled. 7500W output up to 110MHz with 4000 plate v. 7.5V 54A Fil. 2500W plate diss.	200.00	....	....	....
3CX2500F3/8251	Same as 3CX2500A3 exc. flexible leads to simplify grid & fil. conn. Ceramic type.	205.00			
3CX3000A1	Ceramic-metal replacement for discontinued glass metal type 3X3000A1	210.00	....	....	....
3CX3000F1	Ceramic-metal replacement for discontinued glass metal type 3X3000FI	220.00	....	....	....
6C21	Pulse-modulator triode. Radiation and forced air cooled. 8.2V 18A Fils. 30kV max. pl. v. 15A max. pulse pl. curr., 300W pl. diss.	110.00	....	....	....
100TH	High-mu pwr. triode. Full ratings to 40 MHz 5V, 6.3A Fil. 100W plate diss.	26.00	24.57	....	....
304TH	Med.-mu pwr. triode. Up to 1200W class C with 53W drive. No forced air below 40 MHz 5 or 10V, 25 or 12.5A. Fil. 3000V max. on pl. 300W pl. diss.	83.00	78.44	74.70	70.55
304TL	Low-mu version of 304TH.	83.00	78.44	74.70	70.55
450TH	High-mu pwr. triode, up to 1800W class C with 46W drive, cooled by pl. radiation and convection. Ratings to 40 MHz 7.5V 12A Fil. 6000V max. on pl. 450W pl. diss.	97.00	....	....	....
450TL	Low-mu version of 450TH.	97.00	....	....	....
592/3-200A3	Med.-mu pwr. triode. Ratings to 150 MHz. Cooled by radiation and forced air. 10V 5A Fil. 3500V max. on plate 200W plate dissipation.	63.00	59.54	....	....
750TL	Med.-mu pwr. triode. 7.5V 23A Fil. 10kV max. on plate. 750W plate dissipation.	248.00	....	....	....
25T	Med.-mu triode. Full Ratings 60 MHz 6.3V 3A Fil. 2000V max. pl. v. 25W plate diss.	43.00	40.64	....	....
35T	High-mu triode. Full Ratings to 100MHz 5V 4A Fils. 2000 max. pl. v. 35W plate diss.	47.00	44.42	....	....
1000T	High-mu pwr. triode. 3000W class C 60W drive. Forced air cooled. 7.5V 16.5A Fil.	172.00	....	....	....
5867A	Pwr. triode, 350 W PL .Diss. 5V. 15A. fil.	32.00	....	....	....
6696A	Hi Pwr. triode,, 60 KW PL. Diss. 13V. 220A fil.	1105.00	....	....	....
7211	Same mech. as 2C39 but 1/3 larger elect. 6.3V 1.3A Fil. 100W pl. diss.	75.00	70.88	67.50	63.75
7289/3CX100A5	Same as 3CX100A5.	26.50	25.27	....	....
7698	Same as 7211 except has no air cooler on anode.	75.00	70.88	67.50	63.75
7815/3CPN10A5	Same as 3CPN10A5.	25.50	23.90	....	....

TETRODES & PENTODES

Type	Description	1-4	5-18	19-49	50-99
4-65A/8165	Pwr. tetrode. Full Ratings to 150MHz 6V 3.8 Fil. 3kV max. on pl. 65W pl. diss.	27.00	25.65	....	....
4-125A/4D21	Rad. beam pwr. tetrode. Ratings to 120 MHz 375W class C with 2.5W drive. 5V 7A Fil. 3000V max. on pl. 125W plate dissipation.	36.00	34.20	32.40	30.60
4-250A/5D22	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 MHz 1kW Class C with 2.5W drive. 5V 14.5A Fil. 4000V max. on pl. 250W pl. diss.	46.50	44.18	41.85	39.53
4-400A/8438	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 MHz 1100W Class C with 6 W drive. 5V 14.5A Fil. 4000 V max. on pl. 400 W pl. diss.	48.00	45.60	....	....
4-1000A/8166	Rad. beam pwr. titiode. Forced air cooled. Ratings to 110 MHz 3400W Class C with 15W drive. 7.5V 21A Fil. 6000V max. on pl. 1000W pl. diss.	131.50	....	....	....
4CX250B/7203	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2000V max. on plate. 250W pl. diss.	35.60	33.82	....	....
4CX250K/8245	Compact pwr. Tetrode. Coaxial construc. for cavity oper. Forced air cooled. Ratings to 500 MHz. Useful to 1500 MHz 6V 3A Fil. 2kV max. on pl. 250W pl. diss.	70.00	66.15	....	....
4CX250R/7580W	Rugged compact pwr. tetrode. Forced air cooled. Ratings to 500 Mc. 6V 3A Fil. 2000V max. on plate. 250W plate dissipation.	44.50	42.85	....	....
4CX300A/8167	Pwr. tetrode. Air cooled. 6V 3A Fil. 2500V max. on pl., 300W pl. diss.	54.00	51.03	....	....
4CX350A/8321	Like 4CX250B but higher gain and power. Ratings to 500 MHz. Forced air cooled. 6V 3.6A Fil. 2000V max. on plate. 350W pl. diss.	48.50	46.08	....	....
4CX350F/8322	Same as 4CX350A/8321 except has 26.5V 800 MA Fil.	51.50	48.67	....	....
4CX1000A/8168	Pwr. tetrode. Forced air cooled. Excellent high gain and low distortion Ratings to 110 MHz 6V 10A Fil. 3000V max. on plate. 1000W pl. diss.	200.00	....	....	....
4CX1000K/8352	Ident. to 4CX1000A, but gives better UHF performance to over 400 Mc.	210.00	....	....	....
4CX1500B/8660	Best for low I.M. distortion linear 6V F.I. 3KU plate.	205.00	....	....	....
4CX3000A/8169	Pwr. tetrode. Ratings to 150 MHz 10V 48.5A Fil. 3KW pl. diss.	420.00	....	....	....
4CX5000A/8170	High pwr. tetrode. Forced air cooled. 16KW class C with 150W drive. Ratings to 110 MHz 7.5V 78A Fil. 7500V max. on pl. 5000W pl. diss.	495.00	....	....	....
4CX10000D/8171	Electrically ident. to 4CX5000A/8170, but larger anode radiator to reduce cooling air requir. or permit up to 10KW pl. diss.	575.00	....	....	....
4E27A/5-125B	Pwr. pentode with neutralization requir. simplified or eliminated. Ratings to 75 MHz 375W class C with 2W drive. 5V 7.5A Fil. 4kV max. on pl. 125W pl. diss.	45.00	42.75	....	....
4PR60B/8252	Pulse mod. tetrode. Replaces 715C and 5D21. Supersedes 4PR60A. 300KW pulse pwr with less than 1KW drive. 26V 2A Fil. 20kV max. on pl. 60W pl. diss.	115.00	....	....	....
4PR65A/8187	Tetrode for pulse mod., amp., or osc. 6V 3.8A Fil. 15kV max. on pl. 65W pl. diss.	43.00	40.64	....	....
4X150A/7034	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2kV max. on pl. 250W pl. diss.	23.15	21.99	....	....
4X500A	Pwr. Tetrode for VHF. 500 W. PL. Diss. 5V. 14A. fil.	127.50	....	....	....
7203/4CX250B	Identical to 4CX250B/7203.	35.60	33.82	....	....

UHF-TV POWER AMPLIFIER KLYSTRON

Type	Description	1-4	5-18	19-49	50-99
4KM70LA	4 cavity, 12.5 KW output, for channels 14 to 36.	5880.00	....	....	....
4KM100LA	4 cavity, 25 KW output, for channels 14 to 36.	9030.00	....	....	....
4KM150LA	4 cavity, 50 KW output, for channels 14 to 36.	11550.00	....	....	....

National Electronics Special Purpose Tubes

READOUT TUBES

Cold cathode neon glow discharge tubes for in-line display of numbers, letters or symbols Red-orange neon glow has best readability even under high ambient light. Simplicity, ruggedness and long life for effective display at low cost. Readout tubes are the only active display that will not fade with age. Manufactured under license from Burroughs Corp. Std. Life 90 day warranty. Long life 2 years warranty.

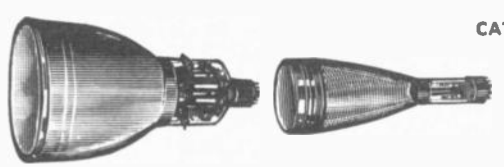
NEWARK CAN SUPPLY ALL SYLVANIA TUBES



CATHODE RAY TUBES

Line width measured at the center face by the shrinking raster method at the current or brightness specified. Reference MIL-E-1, Par. 4.12.6.1. The brightness shown for 3" and 5" round tubes is for 2"x2" raster size. Useful scan is limited on this axis to a value less than full screen dimension. All voltages are measured with respect to cathode.

● NEW DATAVUE INDICATOR TUBES

Raytheon Datavue numerical indicator tubes are reliable, in-line visual digital readout tubes, which display singly the numerals 0 through 9 and preselected symbols such as + and — signs. Datavue tubes are gas-filled, cold-cathode tubes employing the famous principle of the neon glow lamp. The numeric tube consists of 10 individual metallic cathodes formed in the shape of the numerals 0 to 9 and one common anode.

The cathode and anode are connected to base pin terminals. A DC voltage applied between the anode and one cathode causes the cathode to glow. Only the selected number is visible. The life expectancy in dynamic operation is 200,000 hours or more. Available in end or side mount.

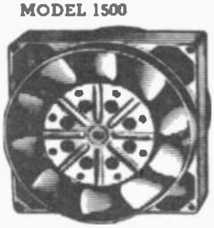
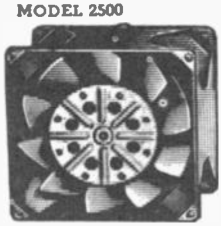
PAMOTOR MINIATURE AXIAL FANS

MODEL 1500



MODEL 2500



MODEL 3000

Long life—20,000 + operational hours. Continuous Duty at 45°C without maintenance. Higher air delivery at greater static pressures. All metal construction. Impedance protected 50-60-400-cycle operation. Universal 4⅛" mounting on all 4½" models. Conforms to applicable portions of Mil Specs. All fans shown below are U.L. Listed.

IMC MAGNETICS CORP.

THE "BOXER" — U.L. APPROVED CONSTRUCTION

Aerodynamically designed impeller delivers 115 cfm free air from any operating position, 15% more than comparable fans. Only 3⅝" square and 1½" deep with rugged all-metal frame for greater heat dissipation and longer fan life. Has heavy duty terminals, easily accessible. Can be resoldered as often as desired. Shock and vibration proof mounting. Bearings lubricated for life. **Two models: Boxer Standard and Boxer Ball Bearing for longer life.** Shpg. wt. 2 lbs.

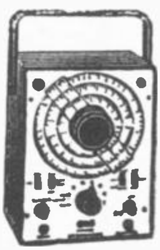
TRANSISTORIZED AUDIO SIGNAL GENERATOR SINE SQUARE WAVE OUTPUT

WV504A. Idealy suited for service, industrial laboratory, and educational applications. Frequency range extends from 20 to 200,000 Hz. Stable signal with an amplitude variation not exceeding ± 1.5 db. Total harmonic distortion of sine wave less than 0.25%. Can be used in a wide variety of applications including the direct measurements of frequency response characteristics of audio amplifiers, and testing speakers and enclosures. In addition instrument can be used of LC combinations and in determining the frequency or speed of vibrating or rotating bodies. Includes attached, shielded output cable, simple one scale dial. Complete with instruction manual. Size: 7¾x5¾x4¾. Shpg. 3 lbs.

62F1656. Factory wired and tested. NET.... **95.00**

RF SIGNAL GENERATOR WITH SWEEP FEATURES

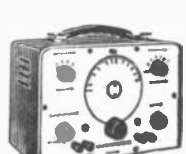


Model WR-50B. Designed for maintenance. troubleshooting and instructional purposes. Provides an accurate source of CW or amplitude-modulated signals from 85 KHz to 40 MHz. Suited for aligning and signal tracing AM, FM, Hi-Fi and Citizens' Band and amateur radio receivers. A 400 Hz output provides a practical means for checking audio amplifier circuits. Built-in crystal calibrating oscillator circuit with front panel crystal socket. Permanently attached shielded RF output cable. Built-in DC blocking capacitors. Two-step RF attenuator switch plus a continuously variable attenuator control. Vernier tuning. Sweep output is provided at 455 KHz and 10.7 MHz for sweep alignment both AM and FM IF circuits. A return-trace blanking circuit is included to provide a zero reference line. Width 5⅜", height 7¾", depth 4¾", weight 5 lbs.

62F086. Model WR-50B. Factory wired and tested. NET **65.00**

62F089. Model WR-50B(K). As above KIT FORM. NET **45.00**

AUDIO SIGNAL GENERATOR SINE/SQUARE WAVE OUTPUT



Model WA-44C. For measurement of frequency response characteristics of audio amplifiers, and testing of loudspeakers and enclosures or finding impedance of LC combinations. Switch selection for sinewave or squarewave output. Simple one-scale dial. Separate 60 Hz line frequency output for intermodulation distortion measurements. Wide frequency range, 20 Hz to 200,000 Hz. Less than ½ of 1% distortion over the audio-frequency range. Operated from a 50/60 Hz, 105-125 volt source; covers in four bands a range from 20 Hz to 200,000 Hz. The circuit of the sine-wave function consists of a "Bridged-T" oscillator with a cathode follower output stage. The square-wave output is developed by using the sine-wave oscillator output to drive a clipping and shaping circuit. Produces a stable signal with an amplitude variation of not more than ±1.5 dB. Total harmonic distortion is limited to 0.5% over the range of 30 Hz to 15 KHz. Width 10 11/16" height 7", depth 6⅛". Weight 10 lbs. With instruction booklet.

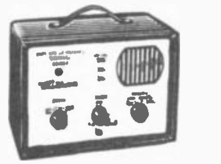
62F013. Model WA-44C. Factory wired and tested. NET **98.50**

STEREO FM SIGNAL SIMULATOR

Model WR-52A. Designed to generate signals required for service, alignment, and maintenance of mono and stereo FM receivers and multiplex adaptors. Provides the following signals. Composite stereo output for either right or left channel; FM stereo output for either channel, 100 MHz FM carrier is adjustable to permit selection of a quiet point in the FM band, RF deviation is adjustable 0-75 KHz; Monaural FM output (a switch is provided to disable the 19 KHz oscillator for low-distortion mono output); 100 MHz sweep output to check receiver RF/IF alignment (sweep rate is 60 Hz, sweep width is adjustable 0-750+KHz; Audio signals of 400 Hz, 1 and 5 KHz. Crystal-controlled 19 KHz and 38 KHz signals for multiplex circuit adjustments; 67 and 72 KHz output signals for SCA trap circuit adjustments; special internal test signal to check phase adjustment of stereo signal. Direct unterminated cable is used with composite stereo and audio signal outputs, and a terminated cable for RF output to 75 or 300 ohm antenna input. Complete with connecting cables. Size 13½x10x8"; shpg. wt., 21 lbs.

62F1785. Factory wired and tested. NET.............. **248.00**

COLOR-BAR/DOT-CROSSHATCH GENERATOR



Model WR-64B. Produces time-tested color bar signals needed for adjusting and troubleshooting color TV circuits as well as dot and crosshatch patterns for adjusting convergence in color receivers, and for adjusting linearity and overscan in both color and black and white receivers. Crystal-controlled RF Oscillator for stable picture carrier. Crystal-controlled synchronizing pulses. Crystal-controlled sound carrier for accurate adjustment of receiver fine tuning. Fixed number of dots and lines for ease in checking overscan. PATTERN control (Color-Bar/Dot/Crosshatch). CHROMA control to check receiver color sync-lock action. FUNCTION control with OFF—STANDBY—PATTERN—PATTERN + SOUND positions. Convenient panel switches for shorting out the red, blue, or green guns of the color picture tube. Complete with RF output cable, cable-carrying bracket attachment, three leads for connection to red, blue, and green grid connections, and instruction booklet. Width 13½", height 10". depth 8", weight 13¼ lbs.

62F085. Model WR-64B. Factory wired and tested. NET...... **129.00**

CRYSTAL-CALIBRATED MARKER GENERATOR

Model WR-99A. Supplies a fundamental frequency RF carrier of crystal accuracy for use in aligning and trouble-shooting TV (color and black and white) and FM receivers and other electronic equipment operating in the range of 19 to 260 MHz in 8 bands on fundamental frequencies. Built-in crystal calibrator, heterodyne detector, amplifier and speaker provides calibrating beates at 1 MHz or 10 MHz intervals throughout entire tuning range which is covered by 8 bands. A built-in 4.5 Mc crystal provides necessary accuracy for alignment of intercarrier-if amplifier and discriminators. At least 0.1 volt output VFO ranges; 0.05 volt crystal frequencies, into a termination of 90 ohms. Provides signals for adjusting vertical or horizontal linearity. Precision matched impedance/resistance pad attentuator, 0-60 dB in 5 db steps. Special modulation input available for re-transmission. Provision for use as Heterodyne Frequency Meter. Provides dual markers 4.5 MHz apart for bandwidth checks and RF alignment. Triple markers for sound-if alignment and bandwidth checks. Adjustable dial pointer for accurate registration with crystal-calibration check points. With RF output cables and instruction booklet. Wt. 21 lbs.

62F054. Model WR-99A. Factory wired and tested. NET...... **256.50**

TELEVISION/FM SWEEP GENERATOR

Model WR-69A. For visual alignment of both TV and FM receivers. Has preset switch positions for all VHF TV channels, the FM broadcast band, and TV video, chrominance, and IF frequencies. VHF output is on fundamental frequencies only; no beat notes or harmonics are used. Exceptionally good linearity is provided by a precision vibrator capacitor. Continuously adjustable sweep width and flat output make for accurate sweep response displays. Special sample-voltage terminal on panel permits use with marker-adder units in alignment. Dual-piston attentuator provides smooth even attentuation over 60 dB range for TV and FM channels and 70 dB range for IF and video. IF/Video output frequency continuously tunable from 50 KHz to 50MHz in 6 ranges. Sweep-frequency bandwidth continuously adjustable from 50 KHz to 20 MHz on IF/Video and FM; 12 MHz max. on TV channels. Return trace blanking. Two continuously adjustable bias voltages, 0 to —12 volts, available on front panel. Width 13⅝", height 10", depth 7". With Instruction Booklet and Cables. Weight 16 lbs.

62F071. Model WR-69A. Factory wired and tested. NET..... **295.00**

RF/IF/VF MARKER ADDER

Model WR-70A. For RF, IF, and video sweep alignment of both color and black and white TV receivers. Provides sharp, easy-to-read markers for alignment. A choice of four different marker shapes is available, permitting use of marker type best suited to the response curve. Designed for use with conventional marker and sweep generators and the WR-59 and WR-69 series TV sweep generators. Marker signal is added to the sweep-response curve after the sweep signal is taken out of the receiver under test. Eliminates or reduces distortion of sweep curve by the marker. Permits trap alignment without marker "suckout." Hi-Q markers — high in amplitude, narrow in width. Power supply voltage stabilized for rock-steady trace display. With instruction booklet and four coaxial cables. Wt. 8 lbs.

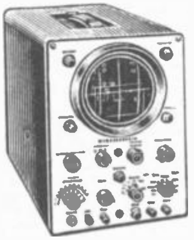
5" OSCILLOSCOPE

- **Flat response from 10 cps to 4.5 Mc**
- **Solid State Power Supply**



Model WO-91C. Reliable, heavy duty, precision instrument especially suited for use in production and servicing both black and white and color TV receivers, monitors, broadcast equipment, TV distribution systems, hi-fi systems and communications equipment. A multi-scale graph screen makes peak to peak voltage measurements as easy as with a VTVM. Applications include waveforms analysis, square wave testing, and observation of circuit and vacuum tube characteristics. A 2-stage sync separator makes it easy to check TV horizontal and vertical sweep synchronization. Has Solid State power supply. Complete with WG-300B Direct/Low cap. probe and cable, ground cable, alligator clip, clip insulator, green-graph screen, instruction book. Size: 9x13½x16½". Ship. wt., 35 lbs.

COLOR PICTURE TUBE TESTER

Model WT-115A. Designed specifically for testing TV color picture tubes, tests each gun for emission quality interelectrode leakage, and shorts. Readily portable large, 3-color, sensitive meter with two scales: Red/green "quality" scale, with reference marks from 0 to 10, separate yellow scale to indicate interelectrode leakage. Sensitive meter and cut-off adjustment control for evaluating the true emission of each gun. Neon shorts indicator. AC line-voltage adjustment for accurate measurements. Test procedure includes 2-minute and 4-minute tests for determining warm-up performance of tube. Tests color picture tube in-set or out-of-set. Built-in cable and socket assembly. Wt. 8 lbs.

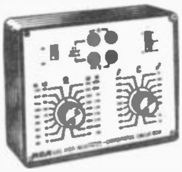
RCA Test Equipment

• NEW "CHRO-BAR" SOLID-STATE COLOR BAR GENERATOR

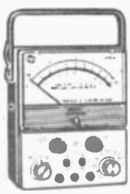
Model WR-502A. A solid-state, battery operated color bar generator, designed to provide the test signals required for adjusting convergence, color-phasing, matrixing, purity, and linearity of color television receivers. Patterns generated include color bars, dots, crosshatch, vertical lines, horizontal lines, and blank raster. The crystal calibrated solid-state circuitry is especially designed to provide stable patterns with no flicker. The instrument includes switches for killing the color guns of the picture tube. Leads are provided to the tube socket. A 4.5 MHz sound carier is added to the color pattern in the "PATTERN & SOUND" function. Size: 6½" x 7" x 4". Shpg. wt. 5 lbs.
62F2301. NET **168.00**

• NEW RESISTANCE/CAPACITANCE BOX



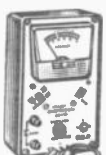
Model 412A. Provides a convenient selection of standard resistor and capacitor values availiable separately or in series/parallel RC combinations. Has 36 resistors ranging in value from 15 to 10 meg, from 18 capacitors with values ranging from 100pf to .22mf. Size: 7" x 5½" x 3⅜". Shipping weight: 2 lbs.
62F2302. NET **30.00**

● NEW IN-CIRCUIT/OUT-OF-CIRCUIT TRANSISTOR TESTER



Model WT-501A. Tests both low and high power transistors, and has both NPN and PNP sockets to allow convenient transistor matching for complimentary symmetry applications. Tests out-of-circuit transistors for DC beta from 1 to 1000, collector-to-base leakage as low as 2 microamperes, and collector-to-emitter leakage from 20 μa to 1 amp. Spectial low-impedance circuitry assures reliable in-circuit testing. Collector current adjustable from 20 microamperes to 1 ampere in four ranges, permitting most transistors to be tested at rated current level. A complete DC Forward Current Transfer Ratio Curve can be plotted. Three color-coded test leads are provided for in-circuit testing, and for out-of-circuit testing of transistors that will not fit into the panel sockets. Batteries are not included. Size: 6⅞" x 5¼" x 3⅛". Shipping weight: 3 lbs.
62F1655. NET **66.75**

• NEW TRANSISTOR/DIODE CHECKER



Model WC-506A. A compact, battery operated instrument providing quick, simple, checks of relative gain and leakage levels of out-of-circuit transistors. Tests PNP and NPN types. Panel switch provides checking high leakage types. Includes a transistor socket, color coded test leads, and a large meter with a single red/green scale. Also checks diode front/back ratio. Size: 3¾" x 6¼" x 2". Shpg. wt. 1 lb.
62F2303. NET **18.00**

PHASE CHECKER

- **Sound powered.**
- **Permits dynamic check of output phasing.**

Model WG-360A. Checks the phasing of low frequency and mid-range speakers in hi-fi, stereo, and PA systems. One of the principal applications for the WG-360A is in checking the phasing between the speaker assemblies of the left and right-hand channels in stereo systems. Provides an overall dynamic check on phasing, including everything from input source to soundwave output from speakers. Size: 5½x6¾x5". Ship. wt., 5 lbs.

Model 630-M

HIGH IMPEDANCE VOLT-OHM-MICROAMMETER

Model 630-M. The input impedance of a VTVM with the convenience of a VOM. The 630-M's sensitivity is derived from the singular achievement of its basic 0-1 DC micro-ampere movement. The 630-M incorporates no amplifiers, has no zero drift, no warm-up, and no power requirements. 1,000,000 ohms per volt, DC for greater accuracy on high resistance circuits. 20,000 ohms per volt AC 1 u-a Suspension Meter Movement: no pivots, bearings, or rolling friction. Extremely rugged. Greater sensitivity and repeatability. 61 ranges, usable with frequencies through 100 hz. Temperature compensated. ±1½% DC accuracy, ±3% AC. Current measurements from 20 nanoamperes. Voltage measurements from 5 mv. VDC: 0-.6-3-12-60-300 at 500,000 ohms/volt. 0-.3-1.5-6-30-150 at 1,000,000 ohms/volt. 0-1200 at 125,000 ohms/volt. 0-6-600 at 250,000 ohms/volt. VAC: 0-3-12-60-300-1200 at 10,000 ohms/volt. 0-1.5-6-30-150-600 at 20,000 ohms/volt. DB: —20 to +63 in 10 ranges. DC MICROAMPERES: 0-1 at 300 MV. 0-60-600 at 300 MV. 0-120 at 600 MV. DC MILLIAMPERES: 0-6-60-600 at 300 MV. 0-1.2-12-120-1200 at 600 MV. DC AMPERES: 0-6 at 300 MV. 0-12 at 600 MV. OHMS: 0-1K-10K-100K (4.4-44-440 at center scale). MEGOHMS: 0-1-10-100 (4400-44,000-440,000 ohms center scale.) Shpg. wt. 5 lbs.

62F1776. NET **220.00**

HIGH ACCURACY VOLT-OHM-MILLIAMMETER

Model 630-APLK. Transistorized Electronic Switching Circuit guards against accidental burnouts! Comprehensive overload protection. Polarity reversing switch and suspension Meter Movement. One selector switch minimizes chance of incorrect settings. Transistorized overload sensing device does not load circuit under test, eliminating possibility of damaging circuit components. Rugged 0-50 microampere suspension type movement. Diode network across meter protects against instantaneous transient voltages. Automatically checked by using X100K ohms range. One 20 position range switch turns in either direction to obtain desired range. Special meter shorting feature on "OFF" position for high damping when moving tester. Accuracy ±1½% on DC, ±3% AC. Flush mounted controls, jacks and meter. DC VOLTS: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt 0-0.25 at 100 microamperes. AC VOLTS: 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt. DC MICROAMPERES 0-100 at 250 Mv. DC MILLIAMPERES: 0-10-100-1,000 at 250 Mv. DC AMPERES: 0-10 at 250 Mv. Ohms: 0-1,000-10,000 (4.4-44 at center scale). Megohms: 0-1-100 (4,400-440,000 at center scale). Output Volts (AC): 0-3-10-50-250 at 5,000 ohms/volt: jack with condenser in series with AC ranges. Case: Molded, fully insulated; 3$^{11}/_{32}$" x 5½" x 7½". Shpg. wt., 5 lbs.

Model 630 APLK

VOLT-OHM-MILLIAMMETER

Model 630-PLK. Transistorized relay circuit provides protection from burn-outs; overload sensing device does not load circuit under test. Life of transistor circuit battery is nearly that of shelf life. Automatically checked by using X100K ohms range. 20 position range switch turns in either direction. Patented Bar-Ring Movement provides self-shielding; not affected by stray magnetic fields; usable with frequencies through 500 hz Sensitivity: 20,000 ohms VDC, 5,000 ohms VAC. Resistors directly connected to switch to form a simplified unit. Jacks located on lower corners of panel, permitting greater accessibility to control knob. Banana type leads for low-contact resistance at jacks. Leads are 50 inches long, test prods with removable alligator clips. DC Volts: 0-2.5-10-50-250-1,000-5,000 at 20 000 ohms/volt; 0-0.25 at 100 microamperes. AC Volts: 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt. Decibles: —20 to +11 +21, +35, +49, +61, +75; "O" DB at 1 MW on 600 ohm line. DC Microamperes: 0-100 at 250 Mv. DC Milliamperes: 0-10-100-1000 at 250 Mv. DC Amperes: 0-10 at 250 Mv. Ohms: 0-1000-10,000 (4.4-44 at center scale). Megohms: 0-1-100- (4,400-440,000 at center scale). Output Volts (AC): 0-3-10-50-250-1000 at 5000 ohms/volt; jack with condenser in series with AC ranges. ±2% DC, ±3% AC accuracy. Size: 3$^{11}/_{32}$"x5½"x7½". Shipping weight 5 pounds.

AC CLAMP-ON AMMETER ADAPTER FOR 310 VOM

Model 101

Model 10

Model 10. Checks all line loads instantly, accurately, safely—without breaking the circuit or interrupting work. Easy range switch. RANGES: 0-6-12-30-60-120-300. Clips around single wire to read AC amperes direct. Use with Adapter 101 to divide instantly two-conductor cords. A lever securely locks the Model 10 to Model 310 when used in combination. Model 10 can be left attached to Model 310 when the latter tester is used as an AC-DC VOM only. The only necessary change is to remove the lead plug from the Model 310 VOM jack and insert it in the jack provided in the Model 10 housing. Case is black molded plastic with engraved white markings. Ideal for checking wiring circuits, motor loads, appliance loads. Its use expanded with leads below.
62F235. NET **20.00**

No. 611. Long lead attachment for using Model 10 as clamp-on ammeter with any VOM having a 3-volt AC scale at 5,000 ohms per volt, such as 630, 630-A, 630-NA, 630-PL, 630-APL, 631, etc.

Test Equipment

● *NEW* **SOLID-STATE VOM.**

Model 601. Lightweight, portable, battery operated all solid state V-O-M with push-button function switches and field effect transistorized circuitry providing 11 megohm impedance on all AC and DC ranges. The 601 has an accuracy of ±2% of full scale on DC and ±3% on AC. Frequency response on AC ranges is 50 to 50K Hz. It also permits the operator to have at his disposal 7 conventional and 7 low power ohms ranges. The "Low Power Ohms" feature is designed to prevent electrical damage to IC's. In circuit resistance measurements can be easily made without the usual diode or transistor loading. In use, 75mv is applied across the device under test and max power applied is .1 mW. A total of 52 selections including "off" and "battery check" can be accomplished using the single range switch. The unit is furnished complete with batteries and leads. Ranges: Volts, AC & DC, 0-.1-.3-1-3-10-30-100-300-1000, (plus 0-.01-.03 AC); Ohms, 1-10-100-1k-10k-100k-1meg (10Ω center scale); Current, 0-10-100uA-1mA-10mA; Size: 6½x5⅛x3⅛". Shipping Wt. 4¼ lbs.

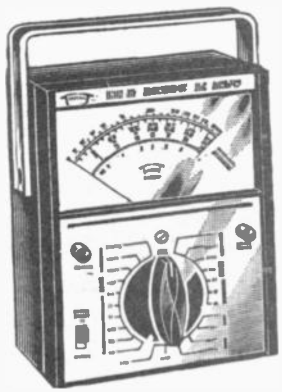
MODEL 600 SOLID STATE VOLT-OHMMETER



Model 600TVO. Lightweight and transisorized test instrument which has the portability of a VOM with the high input impedance of a VTVM, wide freqency ranges and low cost battery power. Features include: a brushed aluminum front panel with black range markings; molded case of high impact material; a carrying handle of extruded aluminum which doubles as a stand; removable back permits easy access to the working circuitry. One compact probe is used for all functions. The probe has a built-in switch which places a resistor in series with the instrument on DC voltage readings. The easily readable meter is 5" wide, Typical battery life is 4000 hours, in normal operation. Battery complement consists of: 3—1.5 V batteries (1 D, 2 AA) and 1—9 V transistor battery. Batteries included. Frequency range: 15 hz to 2 Mhz. 11 Megohm resistance on all DC ranges except .4 and .8. AC impendance is minimum of .75 megohms. Plug-in ground lead insures good grounding of the circuit under test. Ranges: DC—0-0.4-0.8-1.6-4-8-16-40-160-400-1600; AC—0-4-8-16-40-160-400-800; Resistance—0-1,000-10,000-100,000-1 Meg.—10 Meg. Size: 3 3/16" x 5⅛" x 6½". Weight: 2½ lbs.

LIQUID CARBONIC

ULTRASONIC LEAK DETECTOR

- **Translates ultrasonic sounds in the 36,000 to 44,000 cps range into audible sounds**
- **Probe and circuit case each operate on a 9 volt battery — life expectancy up to 1 year.**
- **Highly mobile . . . carries anywhere easily! Well suited for leak detection in hard-to-reach areas.**
- **Main circuit case weighs just 14 ozs.**
- **Detector effective up to 75 feet.**

Pressure turbulance sounds created by leak are detected, translated and amplified into audible signals. A 6 inch tubular probe locates the source of the leak, pinpointing it by changes in the sound level. Probe does not react to sounds from above, below or to the rear. Only frontal sounds activate the unit. The compact and lightweight amplifier unit may be carried in shirt pocket. A volume control is located on top of the unit for easy adjustment. The highly sensitive microphone in the unit responds to sound from 36 to 44 kilocycles per second. Detector incorporates dual transistorized circuit. There is a self-contained power supply in the circuit and, because of the low drain, gives approximately 100 hours of continuous operation. The Ultrasonic Detector is extremely effective in checking equipment using gas, under pressure, at high temperatures. Can also be used to locate mechanical difficulties in pipes involving valve action or bearing irregularities in moving machinery; for determining restrictions in pipes where fluid is moving; or any other disturbances causing sound in the 36-44 kilocycle range The detector is effective up to 75 feet from sound source. Probe and circuit case are in long wearing aluminum case. Entire unit includes headset, amplifier, probe and connecting cables. Two batteries power unit (not included). Narrow field adapter (not included) is used when it is necessary to pin point difficult to locate leaks. Shipping weight 2 lbs.

SIMPLE A-B-C OPERATION

1. Insert cable plug into rear jack of probe—plug at other end of cable into jack on top of amplifier. Plug headphones into amplifier.
2. Depress red "detect" button.
3. Rotate volume control unit the sound is heard.
4. Move probe back and forth. Sounds or leaks can then be pin-pointed. From changes in sound level heard through headphone, detection of leak is determined quickly, easily!

POMONA

● *NEW* CRT 30 KV TEST PROBE

Test probe featuring a built-in voltmeter. Easy to make high voltage adjustments; unit is small enough to fit in tool box or caddy. Ground the test probe instrument by attaching alligator clip to chassis, contact test probe tip to high voltage anode, read voltage from the built-in meter, and adjust as required. No batteries. Range: 30,000 volts DC. Sensitivity: 20,000 ohms/volt (50 ua) movement. Accuracy: ±3% full scale. Multiplier Resistance: 600 Megohms ±2%. Handle is made of high impact thermo plastic. Probe: high impact polystyrene. Length: 14¾" overall. Wt. 8 ounces.

NEW 2700 DIGITAL MEASURING SYSTEM

The new Simpson 2700 digital system has an outstanding combination of features. Basic unit has 4 DC voltage ranges capable of precise measurements from 0.0001 to 1000.0 volts. Plug-in units for DC current, AC voltage, resistance, and capacitance measurements will be available as soon as they are announced by the manufacturer. Convenience features include push-button front panel calibration check and automatic polarity selection (with indication). The 2700 is small and light weight, and its components and well-engineered design assure reliability. The circuit utilizes Integrated Circuits, and field-effect-transistor input. The four read-out lights are of long-life (200,000 hours) design. Accuracy is within ±0.05%, ±1 digit. Adjustable display time permits reading rates up to 5 per second. Ranges of basic unit: (DC voltage), 0-1.00-10.00-100.00-1000.0 volts full scale. Size: 4x8¼x11 inches. Shipping Weight: 9 lbs.

62F2267. NET **615.00**

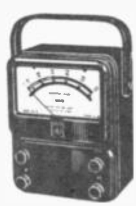
NEW LOW COST SECONDARY STANDARDS

These portable precision instruments are available in a wide variety of ranges to suit almost any requirement. Scales are hand drawn, individually calibrated, and easy to read. Parallax errors are eliminated by Knife edge pointers, painted black on one side and read against a mirror. All units are temperature compensated. They have hand-polished, hardened steel pivots and spring-backed, jeweled bearings. Units also feature a convenient handle and a rugged phenolic case. Size, all units: 5¼"x3½"x7". Shipping Weight: 3 lbs.

MODEL 9 DC INSTRUMENTS

Annular, self-shielded movements offer excellent linearity and freedom from errors caused by nearby magnetic fields. Shunts are milled from a single section of maganin for wide-range temperature stability. Multiple range units have a binding post for selection of each range. Accuracy of all DC models is 0.5% of full scale.

MODEL 10 AC INSTRUMENTS



All Model 10 portables use the Simpson magnetically damped repulsion-attraction iron vane movement. The movement, designed to provide essentially linear deflection through the upper 80% of the scale, has excellent damping and an extremely rapid response time. These characteristics make possible rapid, accurate readings. Model 10 portables are RMS—reading. They are within rated accuracy (1% of full scale, 0.25% on 60 Hz) over the frequency range of 25-125 Hz, except for the milliammeters and ammeters which are 25-500 Hz.

NEW 2701 DIGITAL VOM

The new Simpson 2701 digital volt-ohm-milliameter displays AC and DC voltage in six ranges, AC and DC current in 9 ranges, and resistance in 7 ranges . . . all at the touch of a button. Even unskilled personnel can make fast, accurate measurements with this VOM. Simply set the magnitude switch. Then press the button—reading appears as a three digit number, complete with polarity sign and decimal point. No errors; no time-consuming scale interpolation. Like all Simpson VOM's, the new 2701 is built for rugged dependability and maximum convenience. Solid state circuitry assures minimum maintenance problems. Decimal point automatically switches over three decade ranges. The Adjust-A-Vue handle folds down to use as a stand. The 2701 is replacing conventional VOM's in many laboratories, test bench, and production line applications. Ranges and specifications are as follows: AC and DC volts, 0.01 mV to 600V in 6 ranges. AC/DC current, 100 nanoamperes to 999 milliamps in 7 ranges. Resistance, 10 ohms to 999 megohms in 8 ranges. Accuracy: ±0.2% of full scale. Has built-in noise attenuation (high and low ranges). Size: 5½"x10"x10". Shipping weight: 16 pounds.

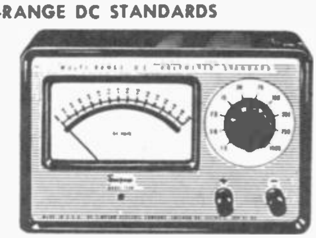
62F2268. NET **835.00**

NEW PRECISION MILLI OHMMETER

Model 1699. This instrument was designed to accurately measure low values of resistance. It determines the value of an unknown resistance by comparing it with a known standard internal resistance. The usual low-resistance measurement errors are avoided by using test leads terminating in Kelvin Clips coupled with a unique circuit which has separate current and volatge paths. This results in ±1% of full scale accuracy—even on the 0-0.05 ohm range. Ranges: 0-0.05-0.1-0.25-0.5-1.0-5.0-10.0-50.0 ohms. Size: 11⅜"x7⅜"x3¼". Shipping weight: 6 Pounds.

62F1189. NET **175.00**

NEW MULTI-RANGE DC STANDARDS



Designed for long-term accuracy under maximum usage. Spring loaded jewels and hardened pivots insure high shock resistance and low friction. The combination of a self-shielded, deep-core movement and a steel case makes these instruments impervious to magnetic fields. These standards use a knife edge pointer and a mirrored scale. A Rotary switch with solid silver contacts proivdes range-change in models 1700, 1702, 1703 and 1704 so that only 2 binding posts are necessary. On the Model 1701 ammeter a separate set of binding posts is provided for each range. All 1700 series standards are temperature compensated from 15°C to 35°C. They also feature ±0.5% accuracy. Scales are individually drawn and calibrated by hand. Each unit measures 11⅜"x7⅜"x3¼", and weighs 5 to 8 pounds. Shipping weight per unit: 9 pounds.

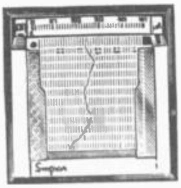
Simpson Chart Recorders

• NEW MINIATURE STRIP CHART RECORDERS



Model 2750. These chart recorders mount in less panel space than a 4½" meter. Mounting bracket is supplied with recorder and requires only one 3.6"x3.6" cut-out. In addition to recording, an edgewise scale gives clear visual readout. Uses specially formulated paper which requires no ink. The paper take-up reel is built-in. Optional snap-on window provides direct paper feedout. Two built-in chart speeds are switch selected. Synchronous motor uses 115 VAC, 60 Hz. Accuracy is 1.5%. Shpg. Wt. 4½ lbs. Supplied with line cord, panel mounting bracket, glass window with metal frame, and 2 rolls of chart paper.

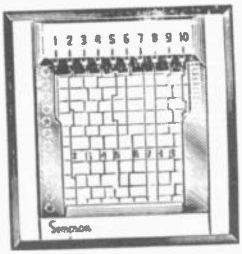
• NEW MINIATURE 10 CHANNEL EVENT RECORDER



Model 2755. Simultaneously records the on/off status (rather than magnitude) of 10 separate sources. Inkless, pressure sensitive chart paper continuously passes the 10 recording pens. Any function which is convertible to an electrical value can be recorded. Input signals for each of the 10 pens are connected to the corresponding numbered terminals on the rear of the instrument. The paper moves at a precisely known rate of speed. All 10 channels record simultaneously and continuously. This makes it possible to determine the exact time an event took place. The normally furnished chart speed is 20 mm/hr. which can be increased 6 times at the flick of a switch. Other gear assemblies are available left and below for chart speeds up to 600 mm/hr. After data has been recorded on the chart, it is visible in the window for 76.2 mm of travel. It is then wound on the built-in take-up reel. The standard drive motor voltage is 117 VAC, 60 Hz. Size: 3.78" x 9" x 3.78". Shipping weight: 5 lbs.

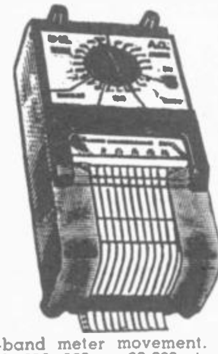
604 "MULTICORDER" RECORDING MULTIMETER

- 22 Ranges—AC and DC
- Three Chart Speeds
- Inkless Recording



604

Accurately measures and permanently records a wide range of voltage and current values. The ideal instrument for university and industrial research labs, and other situations where permanent records of varied measurements are needed. Inkless recording using fast sequential impressions on pressure-sensitive paper—no pen-and-ink maintenance problems. Three chart speeds: 1"/3"/12" per hr.; impressions made every 2 sec. High torque, shock-proof taut-band meter movement. Ranges: DC volts: 0-.1, 5, 2.5, 10, 25, 100, 250, 500, at 20,000 ohms/v. AC volts; 0-10, 25, 100, 250, 500 at 5000 ohms/v. DC microamperes: 0-50, 250; DC ma: 0-1, 5, 25; DC amps: 0-1, .25, 1.0. AC current: 0-2 ma. Chart drive: self-starting synchronous motor, operates from 115 VAC 60 cps. Chart paper width, 2.3". Unique marking system indicates range in use, avoids confusion. Accuracy of recording: ±2.5% F.S. AC response flat from 15-10,000 cps. Temp. deviation: 1% of reading per 10°C., max. Size: 9¾x4¾x4. Complete with No. 7500 test leads and two rolls of chart paper. Wt. 5½ lbs.

• NEW MULTICORDER 605

The 605 multicorder has dependable inkless recording. Low-cost chart paper has specially formulated hard wax surface, which will not blur or fog with age. Trace is made with fast sequential impressions. High torque taut-band movements are shockproof, for accurate recording and visual readout. These multi-range recorders, with three built-in chart speeds, eliminate the need for separate instruments. One switch selects the range desired with both the measured value permanently recorded. The 605 has 24 ranges. Ranges: DC millivolts: 0-12-30-60. DC volts: 0-3-15-60-300-600. AC volts: 0-6-30-150-300-600. DC uA: 0-600. DC mA: 0-1.5-3-6-30-150. DC amperes: 0-1.2-6. AC mA: 0-3-15-60-300. AC amps: 0-1.2-6. Accuracy: 2.5% of full scale. Identical in all other respects to the Model 604 at left.

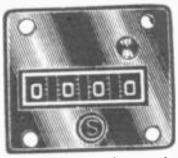
• NEW ELECTRO-MECHANICAL COUNTERS MODELS 103-104



Four-Digit Counters, conservatively rated at 10 Counts per second. The white-on-black numbers can be read easily from wide angles, and are reset to 0000 with a single push-button control. The black matte finish bezel is made from tough thermosetting materials which withstand high impacts. These counters are built to operate under actual field conditions of vibration, humidity, and extreme temperatures. Minimum pulse duration is 50 millisec. "on" and 50 millisec. "off." Size (HWD), 1.84" x 2.14" x 2.28".

260 VOM SERIES 5

- New Ruggedness From Spring Back Jewels • Greater Repeatability
- Diode Overload Protection • Higher Accuracy ±2% DC ±3% AC
- Input Protected With an Internal 1 Amp Fuse • Taut Band

Simpson 260. Volt-Ohm-Milliammeter. Handier, more sensitive, more accurate. Polarity Reversing Switch for faster, easier DC measurements. Full-Wave Bridge Rectifier System gives more accurate VAC measurements. Easy access to all components. Ranges—VDC (20,000 ohms-per-volt); 0-250 MV, 0-2-5 V, 0-10V, 0-50V, 0-250V, 0-1000V, 0-5000V, VAC (5000 ohms-per-volt): 0-2.5V, 0-10V, 0-50V, 0-50V, 0-250V, 0-1000V, 0-5000V; VAF (0.1 uf internal series capacitor): 0-2.5V, 0-10V, 0-50V, 0-250V; DB Vol. (0 DB to 1 MW across 600-ohm line): —20 to +10DB, —8 to +22DB, +6 to 36DB, 20 to 50DB; 600-ohm line): —20 to 10DB, —8 to 22DB, 6 to +36DB, +20 to +50DB; DC Resistance: 0-2000 ohms (12 ohms center), 0-2000,000 ohms (1200 ohms center); Direct Current: 0-50 μa, 0-1 MA, 0-10 MA, 0-100 MA, 0-500 MA, 0-10 amp. Size: 5"x7"x3⅛". 3½ lbs. with Leads.

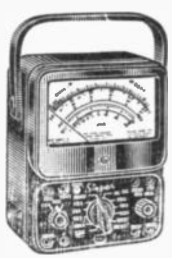
See Simpson accessory listing for cases and test leads for above units

OVERLOAD PROTECTED 260-SP—TAUT BAND



A virtually "goof-proof" overload protected version of the world famous 260 VOM. The 260-5P incorporates electronic circuit protection which senses overload conditions and trips a protective relay. The entire tester is protected — even when 110 volts is applied to the 1 milliamp or 50 milliamps range, no damage is caused. No chance of "fooling" this protection, either as with some other "burnout proof" V.O.M.'s. It can't be reset — even momentarily — until the overload has been removed. A "must" for labs, schools, shops or wherever mortality rate of V.O.M.'s is apt to be high. Complete with test leads and operator's manual. Size: 5¼ x 7 x 3⅛. Wt. 9½ lbs.

270-3 INCREASED ACCURACY VOM

- **Taut-band Movement**
- **Knife-edge Pointer**
- **Temperature Compensated**
- **Mirror Scale**

30-range multi-scale instrument. Includes all of the excellent features of the world-famous 260, plus a mirrored scale; knife-edge pointer; and printed circuit. It offers dependability and repeatability, ruggedness, and the higher accuracy necessary for many production and laboratory applications. The instrument has an easy-to-read 4½" meter at top of front panel. 3 operating controls and 8 circuit jacks are located directly below the meter. 7 DC voltage ranges (at 20,000 ohms per volt) are: 0-250 MV, 2.5V, 10V, 50V, 250V, 1000V, and 5000V. 6 AC ranges (at 5,000 ohms per volt) include: 0-2.5V, 0-10V, 0-50V; 0-250V. 0-1000V, and 0-5000V. 4 AF output voltages with 0.1μf internal series capacitor are 0-2.5V, 0-10V, 0-50V, 0-250V. Three resistanceranges: 0-2000 ohms center), 0-200,000 ohms (1200 ohms center), and 0-20 megohms (120,000 ohms center. 4 volume levels include —20 to +10 db., —8 to +22 db., +6 to +36 db., and +20 to +50 db. Variable resistance to ohmmeter circuit is used to compensate for aging of internal batteries. Heavy bakelite case is black with reinforced walls for maximum durability. Entire instrument slips inand out of case in one piece. Size: 5¼x7x3⅛". Shpg. wt., 4.2 lbs.

Simpson Test Equipment

SIMPSON 160 "HANDI-VOM"

This compact version of the world-famous 260 gives you the ranges, conveniences, and sensitivity of a full-sized VOM in a palm-sized package. Self-shielded taut-band movement assures high accuracy and freedom from influence of external magnetic fields. Recessed range switch never gets in the way. With diode overload protection, and polarity reversing switch — may be safely operated by inexperienced personnel or students. Low DC voltage ranges make this tester ideal for solid state R&D and troubleshooting. Ranges: DCV: 0-1/4, 1, 2.5, 10, 50, 250, 500, 1000 at 20,000 ohms per volt; ACV: 0-2.5, 10, 50, 250 500, 1000 at 5000 ohms/V; DC microamps: 0-50; DC ma: 0-1, 10, 100, 500; DB: —20 to +10, —8 to +22, +6 to +36, +20 to +50 ("O" reference: 1 mw into 600 ohms); resistance: x1, x10, x100, x1000, x10K (30 ohms center-scale). Accuracy: ±3% FS on DC ranges, ±4% on AC. AC frequency response is flat within +1 DB 30-1 mhz on the 2.5 and 10V ranges, to 150 khz on the 50V range, and to 50 khz on the 250V range. Size, only 4 9/16 x 3 5/16 x 1 3/4; wt., 12 oz. With leads.

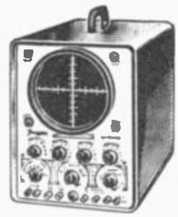
OSCILLOSCOPES AND CAPACITOR CHECKER

466 5" PORTABLE OSCILLOSCOPE

A small, handy scope designed to take on practically any radio-TV service job. Vertical amplifier: ±1 db 15c to 100kc; 6 db down at 250 kc, usable to 1 mc. Maximum vertical deflec. sensitivity: 30 mv/inch. Sweep range: 15c to 80 kc. Maximum input voltage: 400 v. peak. Calibrating voltage (at 117.5 VAC source voltage) 1 v. peak-to-peak, ±10%. Horizontal amplifier has flat response within ±1 db, 15c to 20 kc; down 6 db at 100 kc. Maximum horizontal deflection sensitivity is 0.7 volt/inch. Sensitivity with Z-axs (intensity) modulation: 20 volts rms extinguishes beam. Input resistance (with attenuator set at x1) 0.1 megohm (with attenuator at x100) 0.5 megohm input capacitance, 40 mmf. Operates from 117 VAC 50/60 cycle, 50 watts. Supplied complete with input cable No. 0100 and operator's instruction manual. Unit weighs 19 lbs.; shpg. wt. 40 lbs. Size: 7⅞"x12"x 16⅛".

62F347. NET **190.00**



458 7" COLORSCOPE

- **Response Flat ±1 db to 4.5 MHz**
- **Better than 40mv/in Vertical Sensitivity**

Specially designed for color TV trouble-shooting. Frequency response is flat within ±1 db to 4.5 mhz under wideband operation; color burst frequencies are faithfully displayed with greater than 40 mv (rms)/inch vertical sensitivity. On narrow band operation; response is flat within ±2 db, 10 to 300,000 hz; sensitivity greater than 15 mv/inch. Has horizontal sweep to 250 khz, and 1v p-p calibrating voltage. Seven-inch CRT is a boon for the myopic. With vernier and compensated decimal step attenuator; provision is made for Z-axis modulation. 105/125 VAC, 50/60 cycle. Size, 11x16½x14½"; wt., 29 lbs., shpg. wt. 38 lbs. Complete with operator's manual.

62F339. NET **420.00**

383A "CAPACOHMETER" CAPACITOR CHECKER

- **In-Circuit check, under load conditions**
- **Pulse technique detects marginal units**

In-circuit capacitor leakage tester utilizes a pulse technique to detect many "marginal" capacitors. Measures the leakage resistance of defective paper, micro or ceramic capacitors; indicates directly the capacitance of good ones over a range of 10.0 mf to 10.0 mf. All measurements are made under load conditions. Avoid tedious adjustment of bridge circuitry and balancing controls. Borderline capacitors which cause costly "callbacks" are detected immediately with the pulse test. Operates from 105/125 VAC, 50-60 cycle. Comes complete with test leads. Shpg. wt. 12 lbs.

62F345. NET **139.00**

VACUUM TUBE VOLTMETERS

● NEW SOLID STATE VOM

Model 313. New concept in VOMs, has input impedance of a VTVM combined with convenience features of a battery operated VOM. So stable, it's rarely necessary to touch the zero or ohms adjustment knob. Saves the time and frustration of calibration after each range change. The FET input handles large overloads without damage, and the taut-band meter movement is varistor protected from even 200, 000% overloads. The 313 uses just 1 9-volt transistor radio battery for over 300 hours of operation. A switch allows the battery condition to be checked instantly, and a "power on" indicator is provided. Another feature you'll like is the large, 7 inch scale, designed for fast accurate readouts. Rugged construction combined with built-in frequency and temperature compensation gives the 313 Simpson's famous "stay accurate" dependability. Ranges: AC and DC volts: 0-0.3-1-3-10-100-300-1000. DC milliamps: 0-0.1-1-10-100-1000. Resistance: Rx1, x10, x100, x1k, x10k, x100k, x1Meg, 10 ohm center scale. Accuracy: ± 3% of full scale on both AC and DC. Input impedance: 11 megohms on all ranges. Supplied with leads, istlating probe, battery, and manual. Sizes: 7¾" x 6¾" x 3¾". Shipping weight: 5 lbs.

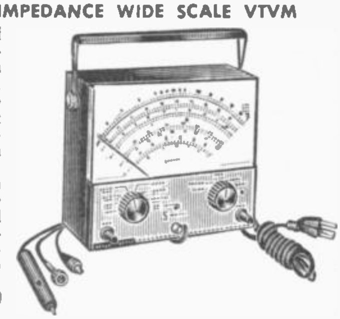
62F2273. NET **100.00**

715 HIGH SENSITIVITY AC VTVM

Sensitivity: 10 millivolts full scale on lowest range. Input impedance: Minimum of one megohm at 1 KC. Frequency response: flat within one decibel between 10 cps and 400 KC. Meter scale provides DB markings on both the voltage range positions. AC rms volts 0-0.1, 0.03, 0.1, 0.3, 1.0, 3.0, 10, 30, 100 and 300. Decibels: total range, —52 to +52 DBM (at Zero DBM, reading is one millivolt across 600 ohms). Scale reads —12 DB to +2 DB. Accuracy on all ranges: ±5% of full scale. Unit requires 110-125 VAC, 50-60 cycles. 7½"W x 5½"H x 3"D. Gray hammertone finish. Complete with operator's manual, and shielded input cable. Shpg. Wt. 3 lbs.

62F1182. NET **80.00**

312 EXTRA HIGH IMPEDANCE WIDE SCALE VTVM



The input resistance of this instrument is 16 megohms, not 11 megs as in most other VT-VM's. 40% higher input impedance means 40% less circuit loading and correspondingly greater accuracy in readings. Extra-large, easy to read seven-inch scale. Has 500 mv scale to meet today's solid state testing requirements. Specially designed circuit protects the meter against burn-out. Voltage ranges DC-0-500 mv, 0-1.5; 5, 15, 50, 150, 500. 1500 volts at 16 megohms input resistance; AC RMS; 0-1.5, 5, 15, 50, 150, 500, 1500 volts at 1 meg minimum input impedance; peak-to-peak; 0-4, 14, 40, 400, 1400, 4000 volts. Resistance ranges: R x 1, x 10, x 100, x 1K, x 10K, x 100K, x 1 meg. 10 ohms center scale. Accuracies are ±3% of full-scale value on all voltage ranges, ±3% of arc on resistance. Frequency responce is flat ±3% from 51 cps to 3 megacycles on AC voltage ranges through 150 volts; with special RF probe, range can be extended to 250 mc. Operates from 105/125 VAC, 50/60 cycles. Modern smartly designed case measures 7¾ x 6¾ x 3⅜". Comes complete with No. 0150 AC/ohms/DC probe and operator's manual. Wt. 4¾ lbs.

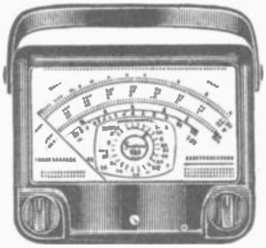
Simpson VOMs & Temperature Meters

● NEW 269-3 TAUT-BAND VOM

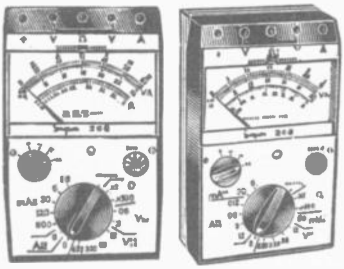


- **Taut-band meter movement**
- **2% DC accuracy, 3% on AC**
- **Overload protection on all ranges**
- **Mirrored scale eliminates parallax**

New, improved version of the ever-popular 269-2. Has a self-sheilded taut band meter movement that gives better repeatability, plus faster pointer action. This new meter movement is combined with a new mirror scale; and knife-edge pointer, eliminating parallax errors. Large, readable scale is over 6" long. Accuracy is ±2% DC and ±3% AC, with new range coverage too. One switch selects all 27 ranges. Battery replacement is quick and easy with the snap-on compartment. And the new 269-3 is protected from overloads with a replaceable 1.5 ampere fuse at the input, and a varistor at the meter movement. Sensitivity is 100k ohms/volt on DC and 5k ohms/volt on AC. The available ranges are as follows: DC volts: 0-1.6-8-40-160-400-800-1600-4000, AC volts: 0-3-8-40-160-400-800, DC microamps: 0-16-160, DC milliamps: 0-1.6-16-160, DC amps: 0-1.6-8, DB scale, (1Mw-600 ohms): —12 to +45.5 in 4 ranges. Resistance: 0-200-20k-200k-2meg-20meg-200 meg. Comes compelte with No. 00115 test leads, 4000 volt DC probe extension, and comprehensive operator's manual. Size: 6"x7¼"x3". Shipping Weight: 5 pounds.

62F330. NET ... **95.00**

● NEW HAND-SIZE VOMS



Models 208 and 209. Hand-size VOM's feature built-in AC current ranges. Separate inputs for voltage and current make volt-amp measurements as easy as flipping the range switch. Four lead input also makes it convenient to measure a DC voltage and its AC component. For continuity checks both models have light-up indicators for quick "yes" or "no" answers. One linear scale is used for all current and voltage ranges for clear and easy readouts. Shock-proof core magnet movement which is unaffected by stray magnetic fields. DC accuracy is ±1.5% of full scale. AC accuracy is ± 2.5% o ffull scale. Sensitivity of the 208 is10,000ohms/volt on both AC and DC; the 209 has a sensitivity of 1666 ohms/volt ranges. Range: **Model 208** — DC volts 0-0.6-3-12-60-300-600; AC volts 0-12-60-300-600; DC ma. 0-.6-6-30-120-600; DC amps 0-3; AC ma. 0-.6-6-30-120-600; AC amps 0-3; Ohms R x 1, x 100(28cntr). **Model 209** — DC volts 0-3-12-60-300-600; AC volts 0-12-60-300-600; DC ma 0-6-30-120-600; DC amps 0-3-12; AC ma 0-6-30-120-600; AC amps 0-3-12; Ohms R x 1 x 100(44cntr.). Size: (both units), 6" x 3⅝" x 1 11/16". Shipping weight, 1½ lbs.

255 VOM WITH TEMPERATURE SCALE

Ideal for heating and utility servicemen. This tester includes the VOM functions of the popular model 260, as well as providing a temperature measurement range of +100 to +1050°F. Has low millivolt drop on the DC ranges; ideal for checking transistorized equipment. DC ranges: 0-50, 0-250 millivolts; 0-2.5, 0-10, 0-50, 0-250, 0-1000 volts; 0-50 microamperes (with both 50 and 250 mv drop); 0-1, 0-10, 0-100, 0-500 MA with 50 mv drop. AC ranges: voltage: 0-2.5, 0-10, 0-50, 0-250, 0-1000; amps: adapter available to read to 500 amps. Resistance ranges: 0-2K, 0-200, 0-20 megohms. Diode-protected taut-band movement. Complete with test leads, 5 ft. thermocouple lead and operator's manual. Size: 5¼ x 7 x 3⅛"; wt. 3½ lbs.

62F1693. NET. ... **90.00**

263 DUAL SENSITIVITY 7" VOM

Dual sensitivity Volt-Ohm-Milliameter with accuracies of +1½% DC and 3% AC (of full scale). Overlapping ranges offer greater accuracy expressed as a percentage of reading. Diode overload protection prevents meter movement burn-out even on 200,000% overload. External battery compartment makes battery replacement easier. Uses 1½ volt alkaline battery to insure greater stability on low ohms scale. Ranges: DC volts: 0.15-.75-3-7.5-30-75-300-750-3000 @ 20k ohms/volt, 0-0.3-1.5-6-15-60-150-600-1500-6000 @ 10k ohms/volt. AC volts: 0-2.5-7.5-30-150-750 @ 10k ohms/volt, 0-5-15-60-300-1500 @ 5k ohms/volt. DC current: 0-75ua-150ua-.75ma-7.5ma-75ma-750ma-1.5ma-15ma-150ma-.15a-7.5a-15a. DB scale: —20 to +75.5 in 10 ranges. Resistance: 0-500-5k-50k-500k-5meg ohms. Accuracy: 1½%, (2½%, 3000, 6000 ranges). Size: 6" x 7¼" x 4". Shipping weight, 5 pounds.

TEMPERATURE METERS

388-3L THERM-O-METER

The Therm-o-meter measures the temperature of air, gases, liquids, or solids by means of thermocouple type leads from —50°F to +1000°F. Both Fahrenheit & Centigrade readings can be made in 15 to 30 sec. and up to a distance of 7½'. A selector switch on the 388-3L connects any one of the three leads into the meter circuit. The lead wires are small enough to pass through a closed door and gasketing. The meter movement is self-shielding. A compensator circuit automatically corrects room temperature effects from 60 to 100° F. With one general purpose lead, battery, and operator's manual. 7 15/16x6x2 15/16". Shipping weight. 4 lbs.

62F350. NET ... **80.00**

DUAL RANGE THERM-O-METER

Model 389-3L may be used to measure temperatures of gases, liquids, or solids in many fields; frozen food packaging, ice manufacturing, freezer storage, refrigeration, photo processing, air conditioning, and numerous others. Using the three leads, readings may be made in three different locations at once. There are two ranges. A low from —50°F. and a high from 100°F to 250°F. Accuracy is within 3°F in any position, near center of scale within 2°F or better. Compensation for room temperature effects. Large easy to read 7" meter. Self shielded core magnet, minimizes heavy electrical interference. Includes **sensing probes with thermistors, tip and 15' lead, and batteries.** Black bakelite case. 7 15/16x6x2 15/16". Wt., 6 lbs.

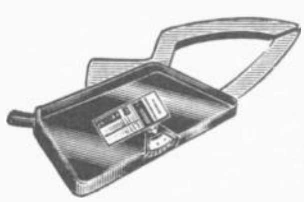
● NEW MODEL 150 CLAMP



Allows AC current measurements to be made wtihout breaking the circuit being tested. Just clamp onto one of the leads, no need to disconnect the circuit. The AMP CLAMP is easy to use with your Simpson 260, or any other VOM having a 5000 ohms/volt AC volt range of 0-2.5 or 0-3. Just plug it in. Readout is on the VOMs AC volt scale. Rugged construction, using top quality materials, assures long life and depenable operation. Ranges: when used with 0-2.5 AC volt range: 0-5-10-25-50-10-250 AC Amperes. When used with a O-3 AC volt range: 0-6-12-30-60-120-300 AC Amperes. VOM sensitivity required: 5000 Ohms/Volt. Leads have banana type plugs which match the inputs on Simpson and other makes of VOMs. Shpg. Wt.: 2 lbs.

JAMES COMMERCIAL CHOPPER

Model C-1800. Commercial type chopper for modulating low level micro-volt and millivolt signals. For use in DC amplifiers, recorders, experimental analog instrumentation and comparitors. Non-resonant reed assembly insures stable operation over environmental changes of temperature, vibration and shock experienced in test and control equipment. Its residual noise and drift have been minimized by careful material selection and advance techniques. Chopper is designed to maintain operational specifications with considerable driving frequency variations. SPDT with 150 ±15 degree closure. Drive is 6.3 volts RMS at 50-70 hz., octal base. Noise less than 8 mv. RMS into 1 megohm. Size 1½" dia by 2½".

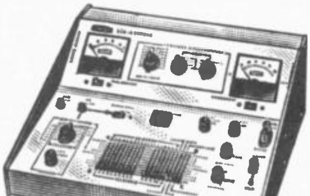
Beckman® Electronic Test Instrumentation

INTEGRATED CIRCUIT TEST INSTRUMENTS

● *NEW* MODEL 997 AUTOMATIC IC TESTER

The Model 997 automatic integrated circuit tester is ideally suited for production testing of all major families of digital IC's as well as other similar devices. It is fully automatic with all internal programming supplied. Output signals are compatible with most automatic IC handlers. The total test time for one device is less than 100 milli-seconds. The 977 will check most digital devices with up to 10 inputs and 6 outputs. Additionally, it removes all power from the device except when testing, thus preventing accidental burn-out of the device. All power supplies are short-circuit proof. Also featured are strobed outputs after all changes of state are made which eliminate chance of test error. Size: (HWD), 19½" x 13½" x 14". Shpg. wt. 20 lb. Uses adapters below—2 required.

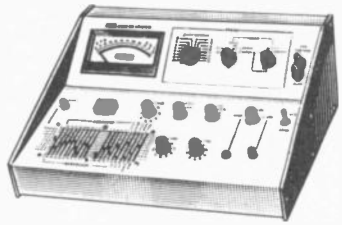
99F1258. NET **3995.00**



● *NEW* MODEL 998 LINEAR IC TESTER

The 998 linear integrated circuit tester provides the user with the most important considerations sought in the testing of linear integrated circuits. The 998 tests all important DC parameters including input offset voltage, input offset current, bias current, input voltage range, open loop gain, supply current, and power dissipation. In addition, device output voltage limits, output current capabilities, equivalent input noise voltage and output resistance may be measured. As opposed to "Go-No Go" testers, the 998 gives the exact value of the parameter under test. When used in conjunction with an oscilloscope and function generator, the transfer function of the device being tested may be graphically displayed. This enables the 998 to be used as a production IC tester. Size: 16½" x 7" x 12¼". Shpg. Wt. 10 lbs. Requires 1 adapter, see below.

99F1259. NET **945.00**



● *NEW* MODEL 999 DIGITAL IC TESTER

The 999 provides the user with every important consideration sought in an Integrated Circuit Tester. It tests input threshold levels, output current (both high and low levels), short-circuit output currents, input forward current, fan out, power dissipation and current drain from supply, noise immunity and truth tables. As opposed to complicated "Go-No Go" testers, the Beckman Model 999 gives the exact value of the parameter to be tested. Checks the whole Integrated Ciruit family, use for RTL, RCTL, DTL, modified DTL, TTL, LPDTL, CML, and ECL. A basic knowledge of integrated circuits is the only prerequisite to quick set-up and operation of the Model 999. Expensive and lengthy programming is eliminated. Size: (HWD), 7"x16½"x12¼". Shipping weight: 10 lbs. Requires 1 adapter, see below.

● *NEW* MODEL 6210A ACCUMULATOR

For direct counting, where control or alarm signals are not required. Counts and displays a running total of random events, counting events that occur as rapidly as 200,000 per second—or as slowly as you require. The model 6210 can "see" separate input pulses only 5 microseconds apart, and as short as 2.5 microseconds. Sensitivity: 100mV, 1V, and 10V, selectable at front panel; optional sensitivity of 10 mV, 0.1V, and 1V. Impedance: 100 kohms, shunted by 50 pf. AC overload: 150 Vrms. DC overload: 600V. Power: 115V rms ±10%, 50 to 400 Hz, 20 watts. Size: 7" high, 8½" wide, 10" deep. Shipping weight: 20 lbs. Rack and wall mount adapters on following page.

99F1269. NET **595.00**

● *NEW* MODEL 6215A PRESET CONTROLLER

The model 6215 preset controller is used whenever an output is desired at a pre-selected count. Generates an output signal and relay contact closure whenever the accumulated count coincides with the preselected number you set on the decade switches (from 1 to 9,999). At the same time that coincidence occurs, the controller will enter one of three modes of operation (internally selectable): Reset—accumualtor resets to zero and continues to count up to 200 kHz, without losing counts!); Hold—count is latched until manually reset; Limit—controller continues to count until manually reset. A BCD printer output is available at a rear panel connector. Size: 7" high, 8½" wide, 10" deep. Shipping weight: 20 pounds. Rack and wall mount adapters on following page.

99F1270. NET **795.00**

● *NEW* 6220A DUAL PRESET CONTROLLER

The model 6220 dual preset controller is similar to the model 6215, but includes a second group of four decade switches. Thus, two separate outputs are available at two separate counts. Reset, hold, or limit modes may be selected for either preset number. Logic signals and relay outputs at each level of coincidence, and a BCD output of the reading are provided on the back panel. Size: 7" high, 8½" wide, 10" deep. Shipping weight: 20 lbs. Rack and wall mount adapters on following page.

99F1271. NET **895.00**

● *NEW* MODEL 6225A EPUT METER

The model 6225 is a simplified EPUT meter for making frequency measurements from 3 Hz to 200kHz. Furnished with a four-digit glow-tube display. Utilizing an overflow lamp, this instrument actually indicates readings to 19,999. The display includes an illuminated, automatically positioned decimal point, and an appropriate legend, (Hz and kHz). A four-line BCD output for recording purposes is also available. The 6225 uses the power line frequency as a reference (60 hz). This results in an instrument with a basic stability of approximately ±0.1%. This EPUT meter has a totally enclosed, driptight cabinet, and is extremely rugged and functional. Size: 7" high, 8½" wide, 10" deep. Shipping weight: 25 pounds. Rack and wall mount adapters on following page.

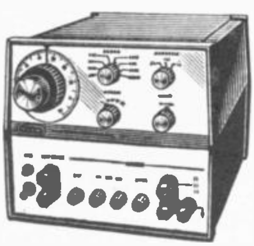
99F1272. NET **675.00**

● NEW MODEL 6235A PRESET EPUT METER

The model 6235 EPUT meter is an extremely useful instrument for industrial measurements. When a standard electronic counter is used to measure the output of a transducer, the reading displayed on the instrument is shown in Hz. or pulses per second. To derive the units you want, it is necessary to multiply the displayed count by a conversion factor. With the 6235, this multiplication step is eliminated. A set of four decade switches — and a multiplier selector — permit you to set a conversion factor before the measurement is made. The counter then multiplies the incoming signal by the preset conversion factor — and displays the results in terms of units you have selected. The 4 decade switches permit selecting any number from 00.01 to 99.99 — and then using the multiplier selector to multiply the setting by 1, 10, or 100. This gives a total preset range of from 0.01 to 9,999. Basically, the 6235 is a 200kHz frequency counter with provisions for externally controlling the time base from 10M to 99.99ms (x multiplier). With 100 mV sensitivity and input attenuators, a wide variety of transducers can be used. Using a 4-digit display with overflow, the 6235 counts to 19,999. Size: 7" x 8½" x 10". Shpg. wt.: 15 lbs. Rack and wall mount adapters below.

99F1273. NET **950.00**

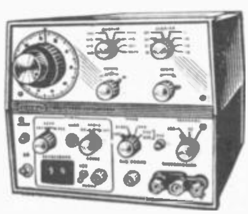
● NEW MODEL 9010 FUNCTION GENERATOR



The 9010 provides three basic signal waveforms: sinusoidal, square, and triangular. All outputs are available simultaneously at the front panel. The frequency is continuously variable from 0.005 Hz to 1 MHz in 8 ranges. In addition to the simultaneous outputs, a selectable, 30-volt output is provided with continuously variable level and DC offset controls. All outputs are short circuit proof. The simultaneous 5-volt square wave output is designed to drive digital integrated circuits. An output sync pulse is provided for precise triggering. The frequency of the Model 9010 function generator can be externally voltage controlled over a very linear 20/1 frequency range. The circuits have been conservatively designed for long life at ambients up to 55°C. Accuracy: 1% of full scale 0.005Hz to 100kHz, 2% of full scale 100kHz to 1MHz. Stability: ±0.05% per 10 minutes, ±0.25% per 24 hours. Amplitude response: 0.1 dB to 100kHz, 0.5 dB 100kHz to 1MHz. Time symmetry: 1% below 0.1 Hz and above 100 kHz. 0.5% above 0.1 Hz and below 100 kHz. Size: (HWD) 7" x 8" x 10". Shipping weight: 13 lbs. Rack and wall mount adapters below.

99F1274. NET **545.00**

● NEW MODEL 9030 MULTIPLE WAVE FUNCTION GENERATOR



The model 9030 function generator supplies sinusoidal, square, triangular and sawtooth waveforms over a continuously variable frequency range from 0.0005 Hz to 1MHz. All outputs are availiable in both phases at levels up to 30 V with ±5V offset capacity. A three-step attenuator allows reductions by factors of 10. The output impedance remains constant at 50 ohms. 8 auxiliary outputs including negative, positive, and bi-polar square waves are availiable simultaneously at BNC connectors on the rear panel. Gated, burst, and phase-lock modes of operation suppliment the normal mode. In the gated mode, the instrument produces an integral number of cycles in response to an external gating signal. In the burst mode, from 1 to 99 signal cycles can be generated upon receipt of a trigger input. (Burst and gated functions are also controlled by a front-panel pushbutton.) In the phase lock mode, the instrument is synchronized in frequency and phase with an external signal. Synchronization is possible from 10HZ to 1MHz. Phase control allows adjustment of generator phase angle. Size: (HWD), 7" x 8" x 10". Shipping weight: 13 pounds. Rack and wall mount adapters below.

62F1279. NET **895.00**

● NEW MODEL 9024 SINE WAVE OSCILLATOR

The model 9024 sine wave oscillstor is a portable instrument that produces low-distortion, sine-wave signals in the 10Hz to 10MHz range. The output is adjusted by a three-step attenuator and a vernier control, providing continuous adjustment from 10 millivolts to 10 volts. The output impedance is 50 ohms. Frequency selection is made by three rotary switches, a multiplier, and a vernier control. These controls simplify the process of setting up the instrument for a desired frequency, and additionally yield better resolution than the conventional rotary dial. To increase the utility of the sine wave oscillator, a square wave output of the same frequency as the sine wave output is supplied. The square wave output is compatible with digital integrated circuit logic levels. All circuits are precision designed for extended but stable operation at ambient temperatures up to 45° Centigrade. All semi-conductor devices are of silicon type. Power requirements: 120 VAC, ± 10%, 48 to 400 Hz, 8 watts. Size: (HWD), 3"x6"x5.2". Shipping weight: 4 pounds.

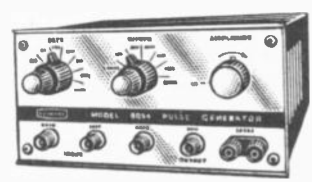
● NEW MODEL 9054 PULSE GENERATOR



The model 9054 pulse generator features a wide frequency range of 1Hz to 10Hz, with controllable pulse duration. Pulse widths from 50 ns to 50 ms are provided. Two continuously adustable signal outputs are availiable. The main output delivers buffered +5 V pulses to a 50 ohm load. Similarly, the secondary output delivers +2.5 V pulses to a 50 ohm load. Additionally, a +12 V sync output is provided. All outputs can be shorted indefinitely without damage. The output of the 9054 may be inhibited by a DC-coupled +3V external gate. A gated input occuring during a pulse period is not effective until the pulse has completed its cycle; operation resumes immediately upon removal of the inhibit gate. This insures that incomplete pulses never occur during gated operation. An external triggering signal of 3 V p-p produces synchronized output pulses. Operation is possible with trigger rates up to 10 MHZ. The Model 9054 pulse generator contains an easily-accessible printed-circuit board capable of driving more than 60 medium power DTL, TTL, or RTL gates. Power requirements: 120 VAC ± 10%, 48 to 400 Hz, 8 watts, nominal. Size: (HWD), 3"x6"x5.2". Shpg. Wt. 4 lbs. Rack and wall mount adapters below.

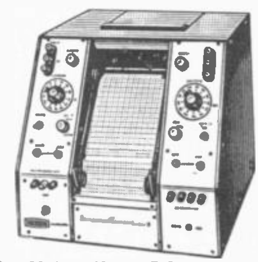
● NEW TYPE K DYNOGRAPH RECORDER



The type K Dynograph recorder is an ideal solid state instrument for the research laboratory, for production testing, and for equipment evaluation and maintenence. Number of channels: 2. Sensitivity: 2mV/div to 10 V/div. Measurement range: 2 mV/div. to 500 Volts/div. Chart speeds: off, 1, 5, 20, and 100mm per sec. Chart speed accuracy: Within 1% or less. Input impedance: 50 meg at 2-20 mV/div, 2.5 meg at .05-10 V/div. Response time: 6msec, 10%-90% of 40mm. DC linearity: within 0.5 to 1% of 40mm. Zero suppression: ±40/div minimum. Zero line stability: less than 0.1 mm/hr. Total drift 0.25 mm/8 hrs. or less, after 30 minute warm-up. Event markers: left: Operated by internal 1 pulse/sec timer. Timer on-off switch supplied. Right: Operated by contact closure external to recorder. Event marker manual coding: Marker button on front panel for manual coding of left event marker. Channel width: 50mm each channel. Power requirements: 115 Volts, 60 Hz, 100 watts maximum. Size: 12" x 13" x 14". Includes kit of accessories. Shpg. wt. 44 lbs.

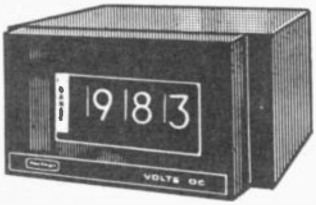
Beckman Electronic Test Instrumentation

PANEL MOUNTED INSTRUMENTS

● NEW MODEL 4025/4026 VOLTAGE AND CURRENT PANEL METER



Models 4025 and 4026 Voltage and Current Meters are panel-mounted instruments that convert analog voltage into an equivalent digital number. The result is displayed as a direct decimal readout on three glow tubes. This readout, with 0.1% resolution and accuracy, eliminates the need for interpolation. Models 4025 and 4026 can be used in the same manner as conventional panel meters. This digital concept provides linearity, accuracy, stability, and reading speed unmatched by analog meters. The Model 4026 provides isolation between it's analog and digital sections. This is achieved by pulse transformer-coupling and shielding the power transformer secondary windings. Up to 500 V can be applied. The buffered outputs featured on the Model 4026 provide output data lines compatible with RTL, TTL, AND DTL logic forms. Model 4025 is directly compatible with RTL logic levels. Normal input range of each instrument is 0 to 0.999 volts. Overrange to 1.800 volts, and underrange to —0.199 volts are also standard. Minus input voltages are indicated by their 9's complement values. The most significant digit is displayed by an overrange indicator. Each instrument is calibrated at the factory on the standard 0-100mV range. By selecting one of ten possible combinations of resistors supplied with the unit, the following ranges are available:

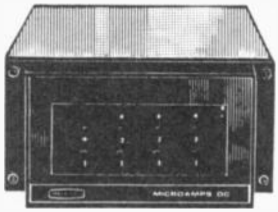
DC Voltage	DC Current
0-100 mV @ 10kΩ	0-10 uA @ 10kΩ
0-1V @ 100kΩ	0-100 uA @ 991Ω
0-10V @ 1 MΩ	0-1 mA @ 99Ω
0-100V @ 1 MΩ	0-10 mA @ 10Ω
0-1000V @ 1 MΩ	0-100 mA @ 1Ω

Accuracy: ±0.1% of 1,000 count full scale, ± 1 digit. Conversion rate: 1.5 per second, minimum 1 per 10 seconds with internal capacitor changes. Size: (HWD), 3"x6"x5.2". Shipping weight: 3.75 lbs.

99F1250. Model 4025. **NET** **345.00**

99F1251. Model 4026. **NET** **395.00**

● NEW MODEL 4027 ANALOG-TO-BINARY CONVERTER



The Model 4027 Analog-to Binary converter, converts analog voltage or current into an equivalent binary number. The result is displayed on storage-type neon lamps. The 4027 has a ±1000 count bi-polar capability with a range of 100mV (or 10μA) full scale with an over-range of 24 counts. Standard zero setting is at mid-span (1024 counts). However, zero may be calibrated to any part of the positive zero span. A buffered PRINT COMMAND pulse of 60 μsec duration is generated at the end of each conversion to synchronize accessories. External control of the conversion process is availiable. Different operating ranges are availiable by using one of 10 combinations of the resistors supplied. (See 4025/4026 above for ranges available.) Size: (HWD), 3"x6"x5.5". Shipping weight: 4 pounds.

99F1252 NET **450.00**

● NEW 4034 DIGITAL FREQUENCY METER

The Model 4034. Frequency meter measures frequencies up to 1MHz. The result is displayed on 4 digital glow tubes. A total of 9,999 counts can be stored, and on the next count, an OVERFLOW indicator lights. The register resets to 0000 and again counts to 9999, representing a total of 19,999. Six gate periods ranging from 1 millisecond to 100 seconds are availiable. A GATE indicator illuminates for the duration of the gate period. The 4034 can also be μsec to measure time intervals. Accurate timing pulses from 10 μsec to 100 sec in decade steps are availiable. External pulses up to 1 MHz may be substituted. Readings may be taken at the measurement rate, delayed 400 milliseconds, or held indefinitely. Buffered BCD 1-2-4-8 form output. Size: (HWD), 3"x6.05"x7.18". **Shipping wt. 4.5 lbs.**

99F1253. NET **450.00**

● NEW MODEL 4038 ACCUMULATOR

The Model 4038 accumulator totalizes repetitive, recurrent, or random events occurring during a programmed interval. It displays the total on four digital glow tubes. It totalizes input counts of any rate up to 1 MHz. A total of 9,999 fills the register, and on the next count, an OVERFLOW indicator lights. The register returns to 0000 and again counts to 9999, representing a total of 19,999. 1-2-4-8 BCD outputs are buffered and short-circuit proof. Fot applications requiring more 19 999 events, a second 4038 may be connected to receive a CARRY output from the first accumulator. The second accumulator thus counts the number of times the first accumulator "spills over". Other accumulators may be similarly connected, with each one increasing the capacity by a factor of 10^4. Minimum pulse width: 200 nsec. Impedance: 20K shunted by 50pf. Sensitivity: 0.5 volts pp. AC overload: 150V rms, DC over-load: 600V. Power requirements: 120V rms ±10%; 50 to 400 Hz; 15 watts. Size: (HWD), 3"x6.05"x5.78". Shipping weight: 4.5 pounds.

99F1254. NET **425.00**

● NEW MODEL 4050 DIGITAL CLOCK

Six-digit in-line glow tube digital display gives real time or system time in seconds, minutes, and hours with precision accuracy. The clock operates from a 60 Hz line source, or an external timing standard, and converts the input signal into standard time format for display and electrical output. Buffered 1-2-4-8 BCD outputs covering tenths-of-seconds to hours are available at a rear connector. A 100 μsec print command is selectable from any BCD time output. Inputs are provided for programming or controlling the clock from a remote location. These include set, reset, hold, run, and set speed control lines. Accuracy is slaved to the power line frequency tolerance which is usually about 86,400 Hz/24 Hrs. with a deviation of ± 0.02 Hz. Max input frequency: 500kHz. Size: (HWD), 3"x5"x6.05". Shipping weight: 3.75 pounds.

99F1255. NET **375.00**

● NEW MODEL 4060 BINARY-TO-DECIMAL CONVERTER

The model 4060 converts binary numbers, up to 13 bits plus sign, to an equivalent BCD number. It converts positive numbers, negative numbers in one's compliment, or negative numbers in two's compliment form. Four glow tubes and sign indicator provide a decimal readout of up to 8191 counts. The 4060 is designed for positive true logic inputs but by changing one strap it will accommodate negative-true logic. The conversion cycle may be initiated from an external source, triggered internally at the line frequency, or recycled as programmed. The conversion rate is 1 μsec per bit and 4 μsec for control. The 4060 is compatible with DTL, TTL, or RTL gates. Outputs are buffered and short-circuit proof. Size: 3"x6.05"x7.18". Shipping weight: 4.5 pounds.

99F1256. NET **495.00**

● NEW MODEL 4070 DIGITAL COMPARATOR

The Model 4070 Digital Comparator compares incoming BCD data with 2 preselectable limits. Incoming information can be up to 4 decades in 8-4-2-1 form. Each of the preset values is selected by means of 4 front-panel decimal switches. Relay and logic outputs from the comparator indicate whether the input BCD data is less than the preset limits, or equal to or greater than the preset limits. Front-panel indicators, (LO IN HI), provide a direct visual display of the comparison states. Typically, the command that initiates the comparison process is the PRINT output of the associated digital device. The comparison process is the PRINT output of the associated digictal device. The comparison process requires less than 100 μsec. The comparison result is stored until a subsequent COMPARE command is received. Inputs: 16-line BCD, compare command, auxiliary inverter. Size: (HWD), 3.4"x6.05"x5.78". Shipping Weight: 4.5 lbs.

99F1257. NET **475.00**

PORTABLE TRANSISTOR TESTER

Model 870. Features two units in one. Measures large signal DC Beta on power transistors as well as small signal AC Beta on low and medium power transistors. Has variable collector voltage. Collector test current is variable up to 2 amps, permitting Beta measurements on power transistors rated at 5 amps or more. Tech Spec: Beta ranges 0-100 & 0-300, extendable to 600. Beta test collector voltage variable from 0-5 volts. Accuracy within 5% for both AC & DC Beta. Requirements—115 volts AC, 40 watts. Ic variable, 5 ma up to 2 amps. Vce variable, 0-5 volts. Input sensitivity of A-C bridge circuit amplifier is 50 milli-volts peak-to-peak or 17.6 millivolts Rms for full deflection of meter. Size: 7⅞x11¾x14½". Shpg. wt., 22 lbs.

62F149. NET **395.00**

DYNAMIC BETA IN-CIRCUIT TRANSISTOR TESTER

Model 890. Unique circuit measures AC Beta with equal accuracy in or out of circuit. Measures parameters: AC Beta; Rin (transistor input resistance); Z Ohms (base-emitter circuit impedance); Ic. Measures AC Beta, Ic and Icbo out-of-circuit. In-circuit AC Beta measurement accuracy ±5% (150 ohms minimum circuit impedance). Portable and completely self-contained. Utilizing on AC bridge principal with the transistor input circuit elements as one arm of the bridge, the total impedence is nulled. With the circuit impedances as low as 150 ohms, this effectively removes these elements from the circuit. Useful for incoming inspection of transistorized products and sub-assemblies. Beta Ranges: 0-50, 0-100, 0-200. Furnished complete with test cable. AC Test Signal: Variable 1000 HZ sine wave-calibration setting at 5 ua, 100 mv, protected against overload. Portable carrying. 6½"H, 9"D, 10¾"W. Wt. 8 lbs.

62F102. NET **215.00**

PORTABLE LAB TUBE TESTER

Model 539C. Industrial and laboratory portable Gm tube tester. Tube sockets: 4, 5 6, 7-pin, octal, loctal, 7, 9, and 10-pin miniature, 7-pin inline and 8-pin miniature. Compactron, Novar, 5 and 7-pin Nuvistor. Socket savers provided for 7 and 9-pin and octal. Gm ranges: 60,000; 30.000; 15,000; 6000; 3000; 600 micromhos. Rectifier diode and VR ranges. Inter-element leakage indicated on meter or neon lamp, sensitivity: 50 megohms. Test voltages: filament, 0-117 VC in 20 steps; signal, .025, 0.5, 1, 2.5 RMS; plate, 66 and 150 VDC; screen, 56 and 130 VDC; fixed bias variable 0 to —40 VDC. Self bias terminals on panel. Roll chart has data for latest industrial and entertainment tubes. Gas test measures grid current detecting the most minute amount of gas in a tube. Cathode reserve can be determined to indicate future life of the tube. Three 1% accuracy Hickok meters: Gm. VR voltage and leakage; line voltage; twin range bias meter. Size 16¾Wx18⅜Lx7½"D. For 105/125 VAC, 50/400 HZ, 40 watts. Black leatherette, portable case. Shpg. wt., 35 lbs.

62F133. NET **595.00**

HIGH SPEED GM TUBE AND TRANSISTOR TESTER

Model 6000A. Tests all the new tubes including Compactrons, Novars, Nuvistors, and 10-pin headers. A high speed, extremely accurate tester. Instant line adjust and automatic short indication. Covers 3,000 to 15,000 µmhos in 3 ranges. Shows gas evaluation. Able to determine the reserve capacity of tubes which could cause trouble in the future. A filament continuity button to check for open filaments. Filament voltage from 0.6 to 117 volts in 19 steps. Complete with removable socket plate that accommodates practically all tubes in use today. (7-pin, octal, loctal, 7- and 9-pin noval, Novar, Compactron, Nuvistors, 10-pin "headers.") Inter-element leakage registered instantly on 5 neon lamps, identifying elements involved. Red leatherette portable case size: 16¾"x11¾"x7½". Panel gold anodized For 105-125 VAC, 60 HZ, 40 watts. Shpg. wt., 21 lbs.

62F171. NET **279.50**

LABORATORY OSCILLOSCOPE

Model 770A. 5" wide-band and general purpose oscilloscope. Calibrated 4Mhz DC vertical amplifier with 8-step and vernier attenuator. Three operational modes of internal sweep generator: free-running, driven, and automatic. Eighteen direct reading calibrated sweep rates from 0.5 sec/div to 1 usec/div. 5 times sweep magnifier, accuracy within ±3%. Model has vertical and horizontal deflection systems and incorporates sweep magnification on internal sweep functions. Internal calibrating signal provides 60 hz square wave. Flat-faced, post-accelerated CRT. Illuminated, calibrated graticule. Works with 105-125 volts, 50/60 hz; 130 watts furnished complete with operating manual. 60 hz line sweep adjustable over about 180°. Shipping weight, 53 lbs.

62F1760. NET **675.00**

WIDE BAND SERVICE TECHNICIAN'S OSCILLOSCOPE

Model 677. Has calibrated screen with full astigmatic correction to facilitate use in both waveform and peak to peak observations and measurements. Has preset horizontal and vertical sweep positions. Vertical amplifier has frequency response flat to within 3 db from 5 hz to 4.5 Mhz. Sensitivity 40 MVRMS. Horizontal amplifier has response within 3 db from 5 hz to 350 khz. Power input: 117VAC, 50/60 hz, 90 watts fused. Size: 14"x9½"Wx18½"D. Shpg. wt., 36 lbs.

62F1750. NET **249.50**

INDUSTRIAL AND COMMUNICATIONS TUBE TESTER

Model 752A. Portable mutual conductance tube tester providing fast and accurate evaluation of an electron tube. Tests VR tubes for firing point, regulating voltage, and current range. Takes 4, 5, 6, 7, 9, and 10-pin miniature, 7-pin in-line and 8-pin round subminiature acorn, Compactron, Novar 5 and 7-pin Nuvistor tubes. Gm ranges: 0-1500; 3000; 6000; 15,000; 30,000 micromhos. Inter-element leakage indicated on meter, sensitivity 10 megohms Test voltages: Filament, 0-117 VAC in 19 steps; signal, 0.25, 0.5, 1.25, 2.5 VAC; plate, 75 and 150 VDC; screen 56 and 130 VDC; Grid bias variable 0 to —40 VDC; extra negative supply, —40 VDC; diode test, 20 V RMS; 0Z4 test; 287 V RMS. Cathode activity/life test. Dual section tubes tested without setup change. Self-bias test jacks on panel. Bias and line fusing. Illuminated meter and roll chart. Roll chart lists over 1600 types. Power requirements: 105-125 volts 50-60HZ, 40-70 watts. Complete with leads and instructions. Size: 16¾Hx18⅜Wx7½"D. Shpg. wt., 27 lbs.

AM-FM SWEEP AND MARKER GENERATOR

Model 288AX. Provides the necessary signal voltages for servicing AM and FM receivers as well as TV receivers A crystal controlled 100khz and 1000khz oscillator provides an accurate frequency standard. A wide choice of frequency ranges, sweep widths and methods of modulation plus a new ultrasonic range of 35khz to 110 khz, make this a versatile generator. High output voltage permits visual stage by stage alignment of IF stages, limiter, and discriminator on both AM and FM receivers. Power and voltage measurements, as well as determination of resonance in alignment work, are materially aided by a self-contained decibel meter with range of —10 to +38 db. Sweep synchronizing voltage is brought out to front panel. Output control; vernier control w/decade steps of 1, 10, 100 Pwr. requirements: AC 110v, 50-70 hz Complete w/crystal, cable assm. meter leads instruction book, 16x13x7". Wt., 33 lbs.

HICKOK Digital Test Equipment

FULLY TRANSISTORIZED DIGITAL MEASURING SYSTEM

MAIN FRAME

Contains digital display system and power supply. Model DMS-3200A. The main frame contains the digital display system, power supplies, and an access port for plug-ins of the DP series. A three-digit display makes maximum use of the high accuracy capability of the analog-to digital converters in the system. The display is fully electronic, using Nixie display tubes. Integrated circuits along with discreet transistors constitute the all solid state circuitry, providing high reliability and long life. Counter has a response of 5 Mhz, assuring reliable count and readout of input pulse trains. A self-contained power supply furnishes all operating voltages for the main frame circuitry as well as plug-in units. All critical voltages zener-regulated. A combination of sturdy die-cast front and rear panels along with heavy-duty extruded aluminum side sections provides a rugged but lightweight housing. Both top and bottom sections can be removed for access to all components and printed circuit boards. Front panel carrying handles help make it an ideal portable instrument. Flip-down stand for improved viewing angle. Size (HWD): 6⅞ x 9⅝ x 12⅞". Wt.; 10 lbs.
62F1761. NET **375.00**

SHOWN WITH DP-100 DC VOLTMETER

Model DMS-3200P. Same features as the DMS-3200A plus, non-blinking display through use of buffer-storage circuitry. Rear panel switch selects either buffered or unbuffered display mode. Also includes printer output. 10-line decimal data is provided on a rear-panel connector along with decimal location, polarity, wrong polarity indication, over-range indication and print command data. Outputs are fully buffered and can be used to operate an external printer, such as the HICKOK PR-4900 Digital Printer or to drive other interface equipment.
62F1550. NET **450.00**

PLUG-IN MODULES

- **Add plug-in modules for variety of applications**
- **Slips into main frame for one unit convenience**

Model DP-100. Voltmeter plug-in provides digital display of DC voltages from 0.1 millivolt to 1000 volts when used with DMS-3200A Main Frame. Accurary specification of ±0.1% F. S. No loss in accuracy for up to 60% over range. Five ranges: 0.00 to 99.9 millivolts; .000 to .999 volts; 0.00 to 9.99 volts; 00.0 to 99.9 volts; 000.0 to 999 volts. Excellent AC rejection for accurate and rapid 100 millisecond reading time. Photo chopper stabilization assures no drift or zero offset. Size: 3"H x 8¼"W x 10"D. Shpg. Wt. 3½ lbs.
62F1762. NET **175.00**

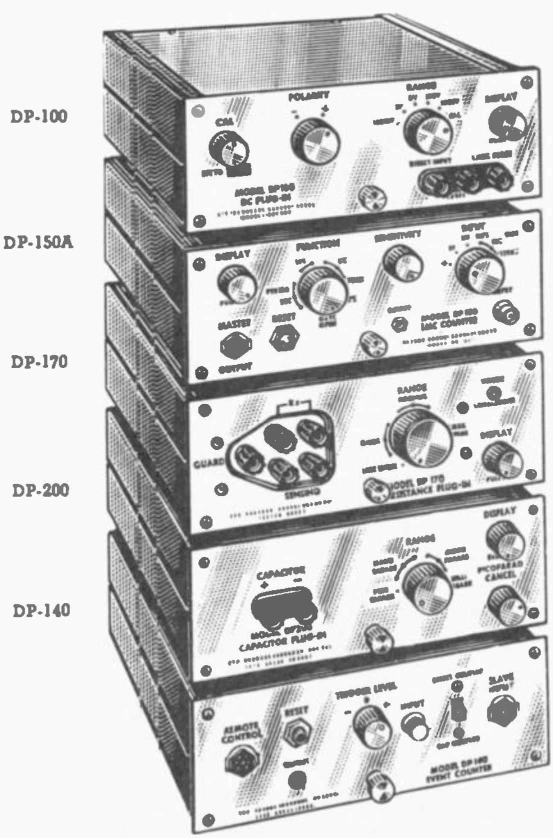
Model DP-150A. 1 Mhz Counter plug-in. Provides a digital display of both frequency and period measurements when used with DMS-3200A Main Frame. Sine waves, square waves, pulses, or other complex waveforms, with frequencies of 00.1 hz up to 1.0 Mhz and periods of 0.1 msec. to 999 sec. may be measured thru infinite scaling. Provisions for event totalizing and manual reset. Input: 1 megohm shunted with 40 pf, overload protected. Has provisions for internal check at 1 hz, 1Khz, 100Khz. Incorporated I'Cs and descreet components. Accuracy: ±.005%. Size and weight same as above.
62F1763. NET **230.00**

Model DP-170. Ohmmeter Plug-in, when used with the DMS-3200A Main Frame, provides digital display of resistance measurements from .001 ohms to 1,000 megohms. Accuracy 0.1%. Four terminals are provided so that lead resistance does not cause inaccuracies on extremely low measurements. In addition a guard terminal is provided so that spurious leakages in components are automatically balanced out. Size and weight same as DP-100.
62F1764. NET **275.00**

Model DP-200. Capacity meter plug-in when used with the DMS-3200A Main Frame; provides digital display of capacity measurements form 1 pf to 9,999 mf. In eight ranges. 000. to 999 pf, 0.00 to 9.99 nf; 0.00 to 9.99 mf; 00.0 to 99.9 mf; 000. to 999. mf; and 0.00 to 9.99 millifarads. Accuracy 0.1%. Size and weight same as above.
62F1765. NET **275.00**

Model DP-140. Event counter and slave plug-in unit. As an event counter the DP-140/DMS-3200A permits display of a totalized count of events in production counting applications. Random events can be converted to pulses and counted and displayed with this system. The count can be returned to 000 at any time. As a slave plug-in, a multi-pin connector on the panel of the DP-140 permits it to be driven from a DMS-3200A/DP-150A combination. When operated in this way, decimal point location is automatically positioned properly and readout is directly in hz and Khz. Sensitivity: 100mv minimum. Includes an interconnection cable. Size: same as above. Weight: 2¾ lbs.
62F1766. NET **90.00**

PLUG-IN MODULES

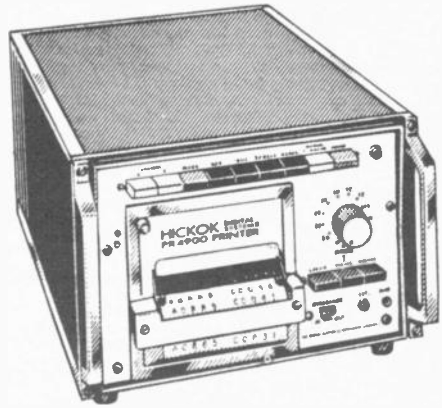


NEW HICKOK PLUG-INS WILL BE AVAILABLE AS ANNOUNCED

● NEW HICKOK MODEL PD 4900 IC DIGITAL PRINTER

The type PR 4900 Digital Printer provides print-out of up to 10 columns of digital information from one or two independent sources. The unit is a companion to the HICKOK DMS-3200A Digital Measuring System; however it may be used with **any** device which provides ten-line decimal or BCD coded data outputs. The printer is complete with integrated circuit, all solid state electronics permitting it to operate directly from low-voltage, low-level logic outputs. Both circuit boards and print wheel mechanisms are in modular plug-in form, thus providing the user with a variety of column, channel, and input code options. Options may be changed in the field if desired. Operation of the unit is simple and a number of function selections are available to the operator. Inputs may be taken from Two independent sources simultaneously or singly as preselected by a front panel push-button switch. The print command is also selected by the operator, permitting him to choose print command as external, manual, automatic, or at calibrated time intervals switched from the front panel in 36 steps from 10 seconds to 120 minutes. Maximum print rate from external command pulses is one line per second. Basic ten-line decimal logic is standard for the printer input. However, by adding the appropriate decoding board, BCD 1248 or 1224 codes may be used to drive the unit. Print is either by pressure sensitive paper, or by inked impression on standard paper. A replaceable ink cartridge provides 250,000 lines of printing on standard 3½" adding machine type paper rolls. The printing mechanism slides out from the front of the unit to permit changing of paper rolls and ink cartridges with ease. The PR 4900 Digital Printer is electrically compatible with the DMS 3200P Main Frame component of HICKOK'S DMS-3200A Digital Measuring System. Therefore the two units can simply be connected by a standard P300-3 cable to make the combination operational. A "P" type DMS Main Frame must be used since only that model supplies printer outputs.

● MAY BE USED WITH ANY DEVICE WHICH PROVIDES TEN-LINE DECIMAL OR BCD CODED DATA OUTPUTS



SPECIFICATIONS AND FEATURES

- gives 4-digit prinout of DMS System thru printout of "overrange" or "overspill" digit.
- also useable with other sources having digital outputs; input logic level compatible with those of many commonly used test instruments of other manufacturers.
- accuracy identical to input device used.
- eliminates need for a second printer—prints data from two independent sources simultaneously.
- operator can select print command source from front panel
  "AUTO"—prints each time source takes a reading
  "TIMER"—prints on a preset time interval basis
  "EXTERNAL"—printing actuated by remote control pulse
  "MANUAL"—prints each time button is pressed.
- single channel units easily changed to dual channel units in the field through the use of plug-in additions.
- easily read printed characters .10" wide x .16" high.
- pressure sensitive paper option permits printing without ink
- "slide-out" printer mechanism makes paper and ink replacement a simple, front-panel task.
- low-voltage, low-power data inputs permit operation directly from standard logic circuitry; data input—parallel entry, 10 line decimal (or BCD with decode board), positive logic "0" state must be less than +0.4 V and greater than —4.0 V "1" state must be greater than +0.9 V but less than +4.0 V. Nominal source requirement 1V at 200μA. Print Command: activated on positive going portion of +2.0V or —4.0V pulse. Minimum rise time (positive going portion) 10V/usec.
- data source inhibited during print cycle, 1.5V holdoff signal.
- rapid transfer time—17 milliseconds.
- Small size: 9⅝"W x 6⅞"H x 14⅜"D, incl. handles and feet.
- lightweight, only 21 pounds.
- low power requirements—115/230 VAC ±10% 50/60 Hz, 35 watts.

MODELS AND ACCESSORIES

Model PR 4900-04. SINGLE CHANNEL INPUT, 4-COLUMN PRINTER. Three columns of digit data and one column of code data (polarity, overrange, and decimal point location). 10 line decimal input to digit columns, code input to code columns. Less ink, paper, and connecting cable.
62F1551. NET **760.00**

Model PR 4900-05. Same as above but with additional digit column (prints "overspill" of fourth digit).
62F1552. NET **870.00**

Model PR 4900-44. Same as PR 4900-04 but with dual channel input capacity. Two sets of 4-column printout from 2 independent sources.
62F1553. NET **1040.00**

Model PR 4900-55. Dual channel input, dual 5 column printer. A dual channel version of model PR 4900-05.
62F1554. NET **1290.00**

Model P 100. Fourth digit plug-in assembly. Use to field convert PR 4900-04 to PR 4900-05.
62F1555. NET **130.00**

Model P-104. Second channel plug-in assembly. 4-column, use to field convert PR 4900-04 to PR 4900-44.
62F1556. NET **300.00**

Model P 105. Second channel plug-in assembly, 5-column, use to convert PR 4900-05 to PR 4900-55.
62F1557. NET **440.00**

Model P 220. Decode board plug-in. Use to convert any PR 4900 Printer to accept BCD 1248 code inputs instead of ten-line decimal. (Four column printers will give 3-digit print-out. Five column printers will give 4-digit printout. Code columns require separate input signal coding.
62F1561. NET **140.00**

Model P 230. BCD 1224 decode board plug-in. Same as P 220 but for use with 1224 code.
62F1562. NET **150.00**

Model P 300-3. Interconnecting cable, 3 foot. Cable with connectors used to connect PR 4900 printer with DMS Digital Measuring System main frame.
62F1558. NET **35.00**

Type P 401. Ink cartridge.
62F1559. NET **10.50**

Type P 402. Print-Out paper, (ink imprint), roll.

Voltage Regulators & Paraformer

PARAFORMER—A NEW CONCEPT IN A.C. POWER CONDITIONING

Provides voltage regulation and noise attenuation of over 50DB over a frequency range of 0 to 1 MHz. As shown by Equation #1, electromotive force, and hence the transfer of electrical energy can be achieved in two ways: (1) by flux coupling, or (2) by parametric coupling. Existing passive devices such as transformers and ferroresonant transformers depend almost exclusively on the flux coupling term of Equation #1. However, Wanlass Electric has now invented a new component, the ParaformerTM, which operates exclusively on the basis of parametric coupling and consequently is a device in which the flux coupling or mutual inductance is zero. (Thus, all energy is passed by the i dL/dt term of Equation #1.)

$$E = \frac{d}{dt}(Li) = \underbrace{\frac{Ldi}{dt}}_{\text{Flux Coupling Term}} + \underbrace{i\frac{dL}{dt}}_{\text{Parametric Coupling Term}}$$

The advantages are listed below in Table 1.

TABLE I

	Transformer	Ferroresonant Transformer	Paraformer
Line voltage regulation	None	±1%	±½%
Line filtering (noise)	No	Slight	Over 50 db
Load filtering (noise)	No	Slight	Over 50 db
Overload protection	No	Partial	Yes
Low line protection	None	None	Yes

As noted from Table 1, the ParaformerTM is inherently a line voltage regulator and line power filter. In fact, the Paraformer's most useful property appears to be its ability to prevent line voltage fluctuations from reaching the load. As will be noted from the above table, such fluctuations (noise, distortions, etc.) are atenuated by over 50 db for frequencies from a few cycles per second up to 1 megacycle per second.

Designed specifically for OEM applications. 60 & 400 Hz in ratings from 60VA to 1000 VA.

	60Hz	400Hz
A.C. Input:	115VAC ±10% (Nominal 10, 60Hz (50-150VAC)	115VAC ±10% (Nominal) 10, 400Hz (50-150VAC)
A.C. Output:	117VAC, 60Hz, 1 Phase	117VAC, 400Hz, 1 Phase
Regulation:	±0.5% Line; ±2.0% Load	±1% Line; ±2.5% Load

Having noted the outstanding advantages of the ParaformerTM, it is perhaps appropriate to note the simplicity of the device.

Input  Output

FIGURE 1

As shown in Figure 1, the Paraformer consists only of a primary winding, a secondary winding, a magnetic core and an AC capacitor. No other components are used. After reviewing the symbol, it is perhaps important to restate that the ParaformerTM is not a ferroresonant transformer. The mechanism for energy transfer is entirely different and most of the basic characteristics are entirely different.

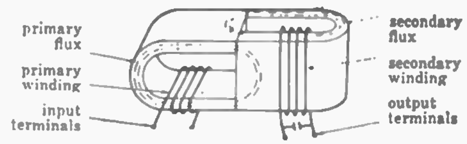

FIGURE 2

Note that the geometry is such that the primary flux does not link the secondary winding and that the secondary flux does not link the primary winding. (Accordingly, the classical flux coupling is zero). However, note that the primary flux does modulate the reluctance associated with the secondary flux and hence the primary does modulate the inductance of the secondary. This modulation can be achieved only by transferring electrical power from the primary to the secondary. This power in turn sustains the secondary oscillations and delivers power to the load. It is this unique parametric power transfer mechanism that makes the ParaformerTM a revolutionary new component.

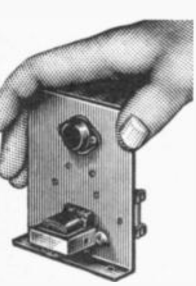
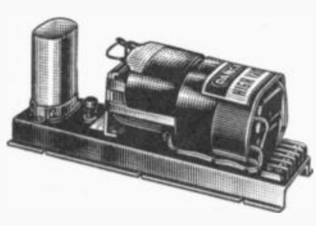
A.C. VOLTAGE REGULATORS



MODEL CVR-120

Solid state regulated A.C. power. All solid state Economy type voltage regulator completely static — priced considerably lower than ferroresonant type constant voltage transformers. Small size and light weight (approximately 10% of comparably rated units). Line and load regulated. Frequency and power factor insensitive. Peak regulated— (ideal for D.C. power supply pre-regulator applications). A.C. input: 100 to 130 volts, 47 to 420 Hz, 1 phase, A.C. output—Peak: 135 volts. RMS: 105 volts typical at 130 volts input and full load. Power capability: 120 VA. Regulation technique: Peak clipping. Line regulation (peak); ±1% for ±10% line change. Load regulation (peak): ±1% for no load to full load change. Operating temperature: up to 40°C. ambient at ful load —higher temp. with derating. Input & output terminations: self leads. Size: 4"w. x 4½"h. x 2½"d. Wt. 10 oz.

Stk. No.	Type	Power	1-9	10-24	25-49	50-99
99F1350	CVR-120	120V	23.00	21.85	20.70	19.50



MODEL VVR-1500

All static variable inductor type AC voltage regulators — frequency insensitive. Designed to replace ferroresonant type constant voltage transformers and silicon controlled rectifier type AC Regulators. High reliability — no SCR's or other solid state devices in power circuits; ideal for remote and unattended locations. Provides load and line regulation. True RMS regulation with RMS sensor and closed loop control. Ideal source for high starting loads and all linear loads. Provides line transient suppression by inherent characteristics of series inductor in the line. Produces no spikes or conducted RFI. AC input: 105-130 volts, 47-63 Hz, 1 phase. AC output: 120 volts RMS—1.5 KVA (Maximum 1.8 KVA at 80% duty cycle). Regulation: line—±1% for 105 to 130 V. line change. Load—±1% for 400 W. to 1500 W. load change (±1% for no load to full load with optional ballast inductor). Inherent short circuit protection. Inherently suppresses 200 volt transients protecting both regulator and load being powered. Oper. temp.: 0°C to 55°C up to 85°C (with 200 CFM of forced air cooling). Efficiency: Over 90% at full load. Size: 10" w. x 10" l. x 4.5" h. Wt. 32 lbs.

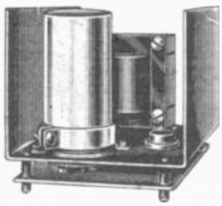
WANLASS

REGULATED D.C. POWER SUPPLIES



Type 60-OEM-2

D.C. power supplies in ratings of 30, 60 or 120 watts furnished in 4 discreet models in each power rating, which by means of transformer taps and a voltage adjustment potentiometer facilitates selection of any output voltage between 3.6 and 60 V.D.C. A.C. Input: 105-125V, 57-63Hz, 1 phase (47-440 Hz with derating). Regulation: ±1% for ±10% line changes ±1% for no load or for full load. Ripple: 0.1% +10MV RMS. Protection: Automatic short circuit protection. Grounding: Floating output; either + or — may be grounded. Construction: Open chassis type for Original Equipment Manufacturers' Systems.

Type 30-OEM Power— 30 Watts Size—5x5x 5". Shpg. Wt.— 5 lbs.
Type 60-OEM Power— 60 Watts Size—7x5x 7". Shpg. Wt.— 7 lbs.
Type 120-OEM Power—120 Watts Size—7x5x10". Shpg. Wt.—12 lbs.

PILLAR CORPORATION

STATIC A.C. POWER CONTROLLER

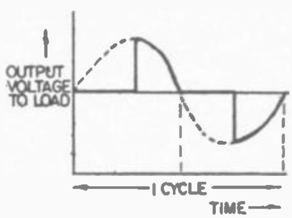

FIGURE I

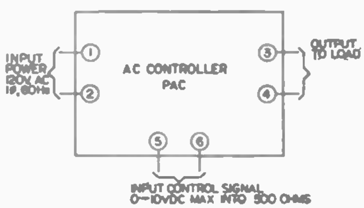

FIGURE II

Terminal connectors are standard on all "PILLAR" Power-Pac

Features:
- **All solid state AC power controlled**
- **Rugged design fully protected**
- **Ample overload capacity**
- **High surge rating**
- **Variable voltage DC available with additional rectifiers**

The basic A.C. CONTROLLER-PAC is an all static power controller, designed for operation on 120V-240V, 60 hz. Power supplied by means of phase controlled solid state switches Static power switching and control elements employed to provide a reliable and efficient power switch or proportional power controller.

Figure I and II indicate the principle of operation. Input control signal may be derived by means of a simple relay closure, a potentiometer setting, or an isolated low level D.C. control signal. At full input power, a 60 hz sine wave is impressed upon the load; at lower power levels, output wave is like SCR phase controller.

Completely self contained in a single compact package, measuring 7$\frac{15}{16}$" x 6$\frac{3}{4}$" x 3$\frac{3}{8}$" for 15 amp models and 7$\frac{11}{16}$" x 6$\frac{3}{4}$" x 6$\frac{3}{4}$" for 30 amp models. Line power and load connections, as well as input control connections, are the only external terminations necessary for the operation. Full rated up to 40°C, derated at .25A/°C over this temp.

APPLICATIONS

ON-OFF. Control of 60 Hz voltage to load. Particularly suited to replace power relays or contactors where repetitive operations or very severe environmental conditions cause maintenance and "short life" problems. See C-1 Control.

PROPORTIONAL. Control of 60 Hz voltage. Provides variable speed control of AC motors, (Universal or permanent split capacitor) for fan, blower or pump applications. Controls lighting level of incandescent lamps. Adjusts power levels on electric heater elements. The power set command is either a manually or remotely adjusted two-watt potentiometer. The output faithfully follows potentiometer setting. See C-3 Control.

CLOSED LOOP. Control of 60 Hz power. Applications include: Temperature Control for electric heating. Unit accepts 0-5MA instrument signal from any selected temperature set point controller. Line Regulators for power supplies to compensate for line voltage or load variations. "Feed back" signal for control need only be conditioned to provide 0-5MA for full control range requried. See C-4 Control.

FOUR MOUNTING HOLES 0.281" dia. between centers are 4" and 7¼". Mounting feet available to allow proper ventilation, and must be used, if unit is operated on a bench top.

CONTROL CONFIGURATIONS

C-1 INPUT CONTROL. Simple relay or contact closure, not isolated from AC line. Contact rating required of input switch is 2 mA with less than 50 mA peak requirement. Apply to terminals 5 and 6.

C-1 OUTPUT POWER. From 0 to 98% of input V when input control switch is closed. Apply to term. 3 and 4.

C-3 INPUT CONTROL. Potentiometer adjustment with potentiometer, rated, 2 W, use 500K ohms for 120V & 1 meg ohms for 240V. Pot to be wired as variable resistor and applied across terminals 5 and 6.

C-3 OUTPUT POWER. Output V comes onto load as a function of input potentiometer setting. Load applied across terminals 3 and 4.

C-4 INPUT CONTROL. Complete isolation is provided for the input control signal from both the power line and the load. The load presented to the input control signal is 2000 ohms and 0 to 5 MA will provide a full range of output from 0 to 95% of input voltage. Control signal is applied across terminals 5 and 6.

C-4 OUTPUT POWER. Output voltage is continuously variable with input control signal. Output is reduced to zero with 0 MA control signal and 5 MA produces 95% of input voltage.

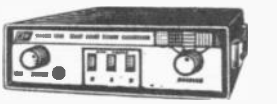
B&K Test Equipment

COLOR GENERATOR

Model 1245. For quick and easy checking and adjustment of: convergence, demodulator alignment, color sync, color fit, horizontal and vertical size, linearity and overscan. Small, lightweight solidstate. Dots only one raster line high and .25μ sec. wide. Free of retrace lines. Station quality waveforms for obsolescence protection and least convergence time through minimizing needs for brightness, contrast and fine tuning readjustment. Precise waveforms permit accurately setting color of killer control without a B&W telecast. Built-in gun killer works on any picture tube. Output is at RF with more than 5,000 μ V of signal on Channel 3, 4 or 5. This generator provides crystal-controlled keyed rainbow color bar display; dot crosshatch horizontal line and vertical line patterns. Size 2⅞" x 8½" x 8⅞". For 105-125 VAC 60 Hz. Shpg. wt., 3 lbs.

62F561. NET **134.95**

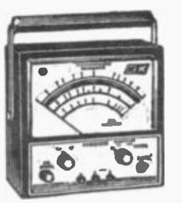
COLOR GENERATOR



Model 1242. Output is at RF with more than 5,000 microvolts of signal on Channels 3 and 4 (factory-tuned to Channel 3). The generator has a transformer-type power supply with zener and power transistor regulation. A pilot light indicates power on. The transistorized generator provides gun killer controls that will work with any picture tube. Size of generator is 2" x 6¾" x 9¾". Generator has cable compartment for all leads. Operates from 105-125 VAC, 60 Hz. Shipping weight, 2½ lbs.

62F596 NET **99.95**

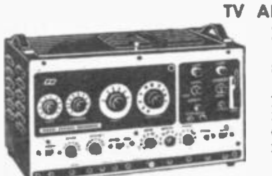
DYNAMIC TRANSISTOR ANALYST



Model 161. In-circuit testing for AC Beta. With same procedure, 161 makes out-of-circuit test; including: Icbo (current leakage) and front-to-back conduction of diodes and rectifiers. Special circuitry protects all parts, even if leads are connected incorrectly. 7" mirrored meter insures accurate readings on three separate scales. Two ranges check AC Beta from 2 to 500. For leakage tests, Icbo range is 0 to 5000 microamps, on an expanded scale. Just flick a switch to find out if an unknown is an NPN or PNP type. Included with analyst is the new edition of Howard Sams Transistor Specification Handbook. Entire package comes with: personalized handle, test leads, and B&K Basic Transistor Course/instruction manual. For 117 VAC, 60 hz. Size 7⅛" x 7¼" x 3⅝". Shpg. wt., 6 lbs.

62F597 NET **89.95**

TV ANALYST



Model 1076. Provides RF and IF test pattern signals to trouble shoot. Check resolution, bandwidth, shading and contrast capabilities with test pattern in flying spot scanner. 4.5 mc, 400 cycle FM modulated sound signal. Sync signal adjustable to ±50 volts. Sweep pulses; yolk and transformer test; high voltage indicator. White dot, crosshatch and color bar patterns for color sets. Bias supply and AGC keying pulse. 17"x10¼"x10". Shpg. wt., 30 lbs. For 105-125 VAC 60 Hz.

62F555. NET **329.95**

B & K CAPACITOR ANALYST

Model 801. Measures capacitance and leakage resistance both in-circuit and out-of-circuit. Designed to operate on 105-125 volts 60 cycle AC, but will operate from 90 to 140VAC after a 2 min. warm-up. Can detect "shorts" in normal circuits where the capacitor tested is shunted by more than 25 ohms. Detects "Opens" in circuits where the capacitor tested is more than 25 pfd or shunting resistance is more than 50 ohms. Unique circuit determines how capacitor stores energy and returns it to the circuit. Spots marginal electrolytics that need replacement and predicts the life expectancy of electrolytic capacitor of 3 volts or more. Meter movement is protected against overloads. Easy to test low-voltage transistor circuit capacitors as well as those in vacuum-tube circuits. Electrolytic tests up to 2000 mfd, using a balanced bridge. One knob makes it easy to select the desired function and range. Simplified internal design, easily portable. Size: 5½"x12¾"x6¾". Weight, 8¾ lbs.

62F588. Model 801. NET **109.95**

DYNAMIC MUTUAL CONDUCTANCE TUBE TESTER

- Multiple socket selection
- Simplified switch selection

Model 707. Provides multiple socket selection to quick check most TV and radio tubes. Simplified switch selection. Includes provisions for future new sockets. Tests all types of tubes. Automatic compensation for line voltage variation. 4½" meter with "Replace-Good" scale. Lists common tube types on socket panel. Complete reference chart in cover. 7, 9, and 10 pin straighteners on panel. Checks each section of multi-section tubes separately. Tests for all shorts, grid emission, leakage and gas. Grid emission test is adjustable, with sensitivity to over 100 megohms. Makes quick "life" test. Professional, dynamic mutual conductance tube tester that combines multiple-socket speed with high Gm accuracy. Size: 16⅛" x 15¾" x 5⅞". For 105-125 V., 50-60 Hz. A.C. Shpg. wt., 15½ lbs.

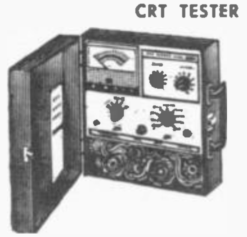
62F589 .... **189.95**

DYNA-JET TUBE TESTER

Model 606. This multiple socket design has reduced the number of settings for testing each tube from 17 required in many other types of testers to only 4. You can test for all shorts, grid emissions, leakage and gas; and check cathode emission the accurate way—under simulated load conditions! With the really portable Model 606, you won't reject the good tubes, and you'll quickly find the bad ones, reducing call backs, selling more tubes, and increasing service profit. You'll find "tough dogs" and weak tubes with the exclusive adjustable grid emission test, which has the sensitivity of over 100 megohms. Molded tube sockets have phosphor bronze contacts for long, trouble-free life. Simplified heater voltage setting with power-on indicator. Each section of a multiple section tube is checked. Size 11" x 8½" x 4⅞". Operates from 105-125v., 50-60 Hz. A.C. Shipping wt. 8 lbs.

62F562. NET **79.95**

CRT TESTER AND REJUVENATOR



Model 465. Tests and rejuvenates black & white and color TV picture tubes without removing tube from set. Provides correct filament voltage (0-13 v.) for all tubes. Tests and rejuvenates all hi G-2 and low G-2 tubes including those requiring a G-2 voltage as low as 25 volts. Tests new rectangular color tubes. Corrects each color gun separately. Uses DC on all tests. 4½" meter and neon bulb indicators for easy reading. Leatherette 10½"x11½"x4½" luggage type case. For 117 VAC, 50/60 Hz. Shpg. wt., 6½ lbs.

62F563. NET **89.95**

"PROFESSIONAL" VTVM

Model 177. DC Volts: ±0-0.5, 1.5, 5, 15, 50, 500, 1500. AC Volts: (RMS) 0-0.5, 1.5, 5, 15, 50, 150, 500, 1500. AC Volts: (peak-to-peak) 0-4, 14, 40, 140, 400, 1400, 4000. Response: ±1db, 40 Hz to 3 mHz. Resistance: Full Scale: 1K, 10K, 100K ohms; 1, 10, 100, 1K, 10K, 100K megohms. Mid-scale: 10, 100, 1K ohms; 1, 10 megohms. Input Resistance: 11 meg (1 meg in probe). Accuracy: ±3% full scale DC, & 5% full scale AC. Zero center scale. Single AC/OHMS/DC test probe with switch and ground lead. VTVM has metal case and carrying case with handle. Operates on 117V 50/60 Hz. Size: 7⅛ x 7¼" x 3⅝". Shpg. wt., 7 lbs.

62F598. NET **79.95**

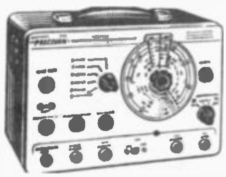
VOLT OHM MILLIAMMETER

Model 120. The most comprehensive unit of its type ever offered in its price range. It features 61 ranges and functions specifically designed for use in industry, laboratories, maintenance shops and schools. 20,000 ohms per volt DC. 5000 ohms per volt AC. Rugged 50 microamp meter: ±2% accuracy. Extra-low resistance and voltage ranges. Wide frequency response AC and db ranges. Mirrored scale, burn-out proof meter. Size: 7"x 5⅜"x3⅛". Shpg. wt., 4 lbs.

62F564. NET **59.50**

Precision Apparatus Test Equipment

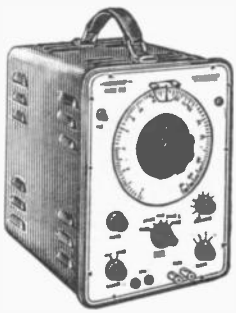
SWEEP GENERATOR WITH MARKER ADDER



Model E-410C. A wide range, frequency modulated signal source combined with complete Marker Adder circuitry. Designed for the alignment and maintenance of TV, FM and other high frequency wide-band receivers and circuits. Sweep generator solves marker visibility and overloading problems by incorporating built-in Marker Adder circuitry. Allows Absolute control of marker width and amplitude. Frequency coverage; Band A: 3 to 7 MHz. Band B: 6 to 15 MHz. Band C: 13 to 35 MHz. Band D: 33 to 90 MHz. Band E: 80 to 216 MHz. Band E_s. 400 to 1080 MHz. Internal blanking. Automatic gain control provides flat output over entire band. Extra shielding prevents radiation leakage. Operates 117 VAC 50/60 standard. 220 VAC, 50/60 Hz also available. Furnished with a 4.5 mc crystal and 5 output cables. 13" x 8½" x 7". Shipping weight: 15 lbs.

63F073. NET **189.95**

WIDE RANGE SINE AND SQUARE-WAVE GENERATOR



Model E-310. Used for amplifiers, PA, transmitter modulation response tests, input and output impedance measurements, ultrasonic voltage source, and loudspeaker resonance tests. All tubes pre-aged to assure long term stability of calibration. Logarithmic, etched dial scale with Vernier and Fast tune dials provides accurate resetability. Frequency Range: Sine and square waves from 5 Hz to 600 kHz in 5 decimal bands. Output Level: Sine Wave, 10 V. RMS into 600 ohms; Square Wave, 10 V. P-P, 4 position step attenuator and continuous amplitude control. Calibration Accuracy: ±2% or 1 Hz. Distortion: Less than 1% from 5 kHz to 600 kHz. Supply Voltage: 117 VAC 50/60 Hz standard; 220 V. AC 50-60 Hz. available. Heavy-gauge, steel case, blue-grey ripple and aluminum panel and tuning dial. 11½"x9"x11¼". Ship. wt. 24 lbs.

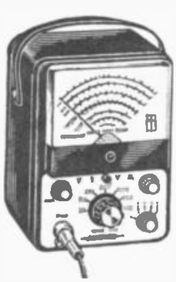
63F065. NET **199.95**

MULTI-BAND SIGNAL MARKING GENERATOR

Model E-200C. Exceptionally stable and accurate, this general purpose RF signal generator serves in conjunction with PRECISION Sweep Signal Generators or other similar sweep signal generators. Frequency coverage: 88 kc to 440 mc (to 110 mc on fundamental). 6½" brushed aluminum dial: direct reading in 10 bands up to 440 mc —1% accuracy. 0-1000 point vernier scale: direct reading to 1 part in 1000 for hand-calibration & frequency spotting. Circuit: 6AU6 in stable ECO circuit; 6U8 sine-wave audio oscillator-modulator; 5Y3 full wave rectifier. 400-cycle sine wave audio oscillator. Dual-shielded RF attenuators. Four types of signals: Unmodulated RF; 400 cps; Modulated RF; Externally modulated RF; 400 cps audio output. Bulit-in AVC-AGC bias substitution. 117V AC. 50/60 Hz. 13"x 11½"x6⅝". Weight: 16 lbs.

63F066 NET **149.95**

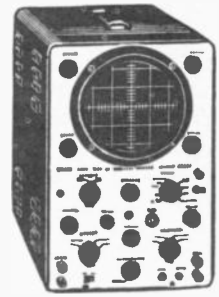
VACUUM TUBE VOLTMETER



Model V75. For general use in schools, labs, production lines, radio-TV and appliance service shops. Polarity reversal switch for time saving diode leakage checks and other work in semiconductor circuitry. Transit switch position for meter movement protection. Built in battery eliminator. No ohmeter battery required. Single high-impact Cycolac Dual Purpose Uni-Probes for withstanding rugged production service, and lab use. Inherent protection from its vacuum tube insures no harm from application of a wrong input voltage. DC Volts: ±0-1.5, 5, 15, 50, 500, 1500. AC V. (RMS) 0-1.5, 5, 15, 50, 150, 500, 1500. Resistance: Full Scale 1000; 10,000; 100,000, 1, 10, 100, 1,000 Megohm. Mid-scale 10, 100, 1000, 10,000. 100,000 ohm, 1 meg. 10 meg. Accuracy: ±5% full scale AC and ±3% full scale DC. Operates on 117 V. 50/60 Hz. Dimensions: 7½"x5⅜"x4¼". Weight: 6 lb.

63F067. NET **59.95**

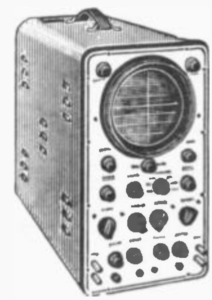
DC TO 5 MHz WIDE BAND OSCILLOSCOPE



Model S-55A. Features both DC and AC coupling, 5 sweep ranges to 500 KHz, built-in regulated calibration voltage, automatic synchronization and an illuminated screen graticule. High sensitivity DC push-pull vertical amplifier circuitry and large cathode ray tube screen area, adapts the system to rapid TV and FM alignment procedures, and provide low-distortion display of non-sinusoidal waveforms. Especially applicable to labs, schools, production lines, and service shops. Vertical amplifiers (3-stage, push-pull) sport the following sensitivities: DC: 70 millivolts/inch; AC: 25 millivolts/inch. Frequency response (Sine wave): DC — within 3 db from DC to 4.5 MHz; within 5 db at 5 MHz. AC — within 3 db from 1 Hz to 4.5 MHz; within 5 db at 5 MHz. Intensity modulation: Input on front panel. Blanking on negative signal excursion. For 117 VAC 50/60 Hz. 17¼"13⅜"x8¾". Ship. wt., 30 lbs.

63F074. NET **199.95**

WIDE BAND OSCILLOSCOPE



Model ES-550B. For general purpose use for lab., schools, production line, and service shop; for color and b&w TV servicing. For multiplex alignment and solid state and vacuum tube equipment. Has 5mc wide vertical frequency response and 5" scope screen, 3-position vertical & horizontal step attenuator, freq. compensated: x100, x10, x1., response: 10 Hz. to 5 mHz. 3000-V. intensifier anode potential: amplified Auto-Sync Circuit. Four-way sync selection (internal neg., internal pos., external, and line) Direct-reading P-P voltage calibrator permits oscilloscope tube used as vacuum-tube voltmeter. Vertical pattern reversing switch, linear multi-vibrator sweep circuit 10 Hz to 100 kHz; automatically synchronized 30 Hz & 7875 Hz. sweep for TV sync-pulse analysis; amplified sweep retrace blanking. Built-in 60 Hz. phasing & blanking controls. Vertical sensitivity: 10 mv RMS for 1" display. Power input: 117 VAC 60 Hz standard; High contrast filter-type illuminated graticule. Dimensions: 18½" x14½"x8¼". Shipping weight 47 lbs.

SENCORE Test Equipment

STANDARD TEST EQUIPMENT

IN-CIRCUIT TRANSISTOR TESTERS

Model TR139. In-circuit tester measures—AC gain and leakage. Checks all transistors, diodes and rectifiers either in or out of cricuit. Safe guard device protects meter from damage. No set up books or manual required. PNP and NPN types of transistors can be checked at a flick of a switch. Vinyl covered steel case. Chrome panel with 6" meter. Beta range: 2-Infinity; Icbo range: 0-5000 microamps. Size: 9x7¼x6". Wt. 8 lbs.

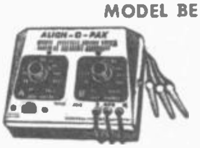
62F478. NET **89.50**

● *NEW!* TR15A IN-CIRCUIT TRANSISTOR TESTER

Similar to TR139 but has 4½" meter. In-circuit tester that measures the AC gain (Beta) and leakage (Icbo) of transistors, diodes, and rectifiers without disconnecting a single lead. Special circuitry protects even the most delicate transistors and diodes, even if the leads are connected incorrectly. Beta range, 2 to infinity; Icbo, 0 to 5000 microamps. All steel, vinyl covered case—5"x7⁹⁄₁₆"x3¹⁄₁₆". Wt. 4½ lbs.

62F749. NET **64.50**

MODEL BE113 DUAL TV BIAS SUPPLY



Model BE113. Single or two separate 0 to 20 volts DC bias supplies without interaction. Well filtered; effectively pure DC with less than ¹⁄₁₀ of 1% ripple-calibration accuracy better than equivalent battery tolerance. Size: 4x2x2". Wt. 1 lb.

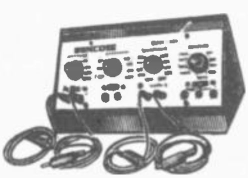
62F1452. NET **14.95**

TR-115 TRANSISTOR CHECKER

Test transistors for leaks, opens and shorts. (Out of circuit only) Ratio check as well as Beta, good-bad. Equivalent check data for Japanese type and all American made transistors. Size: 5"x4½"x2½". Shipping wt., 2 lbs.

62F735. NET **24.95**

HANDY "75"



Model RC-146. Seventy-five frequently used values of carbon resistors, capacitors, electrolytics, power resistors, universal selenium and silicon rectifiers for fast on the spot substitution. Power resistors of 20 watts from 2.5 to 15,000 ohms and a .5 amp silicon and selenium rectifier. Size 10¼"x4"x4". Wt., 3½ lbs.

62F732. NET **49.95**

MODEL RC145. Same as above but with 53 frequently used values. Weight, 3 pounds.

62F1453. NET **34.95**

TC142 MIGHTY MITE V

Model TC142. Checks over 3000 tube types (including foreign, Novars, compactrons, Nuvistors, and the latest 10 pin types) for gas condition and grid leakage up to 100 megohms. Also checks cathode current at operating levels and shorts or leakage up to 150,000 ohms between all elements. Streamlined steel case, 10"x9"x3½". Wt. 9 lbs.

62F427. NET **79.50**

FS-134 FIELD STRENGTH METER

Completely transistorized, battery powered portable. Frequency of 50-100MHz, 160-230MHz, 460MHz, 900-MHz (channel 2-channel 83) Sensitivity Zero adjustment nullifies noise. Input 75 ohms (300 with matching 0-6db. Band width 500KHz 4" logarithmic scale calibrated in 60 db range, 2-2000 MV range. Other controls include fine tuning, audio level, calibration. Indicates FM and AM signals. Size: 10x9x5". Shpg wt., 9 lbs.

62F743. NET **199.50**

5" OSCILLOSCOPE

Direct vert. peak to peak volt readout off of front panel. Vert. amplifier freq. response 10 Hz to 5.2 megahertz, ±1db at .055 microseconds, sensitivity of .017 volts rms per inch deflection. Horz .req. 3db from 10 hertz to 650 KHz., sweep to 500KHz in 5 ranges. High input impedence Z of 27 megohms shunted by 9pf. External inputs for horz. sweep and ext. sync. Also has horz. retrace, sync stability control and standby switch. All steel case with brushed chrome front panel. 11"x9"x15½", 22 lbs., 100 watts, 60 cycle, AC.

62F747. NET **199.50**

FE14 FIELD EFFECT VOLT-OHM METER

Featuers all of the advantages of a VTVM with the complete portability of a VOM. Input resistance: 15 megohms on DC and 10 megohms on AC. Current measurements up to one amp. Zero center scale as low as one half volt. Ranges: DC Volts: 0 to 1, 3, 10, 30, 100, 300, and 1000 full scale. AC Volts: (Rms) 0 to 1, 3, 10, 30, 100, 30,0 and 1000 full scale (Peak to Peak) 0-2.8, 8.4, 28, 84, 280, 840 and 2800 full scale. Ohms: 0-1000, 10K, 100K, 10 meg, and 1000 meg. D.C. current: 0-100ua, 1ma, 10ma, 100ma, and lamp. Mirrored scale. Unbreakable steel vinyl covered case with brushed chrome panel. Size: 7½x5¼x3¹⁄₁₆". Wt. 4 lbs.

62F1451. NET **69.95**

Model 39A19. High Voltage probe (for above) extends 300 Volt range to 30KV.

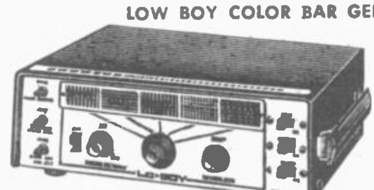
COLOR TV TEST EQUIPMENT

LOW BOY COLOR BAR GENERATOR



Model CG10. Compact design provides 10 standard RCA type color bar patterns, full crosshatch, 10 vertical and 14 horizontal, and adjustable white dots. Interlace control stops dot bounce. All-silicon solid state construction for low warm-up time; eliminates need for internal timer controls (brought out to front of panel for operator adjustment.) Uses long life C cells with regulated output; permits wear down from 12V to 9V with full circuit response. Vinyl finished steel case. Weight 7 pounds.

62F745. NET **89.95**

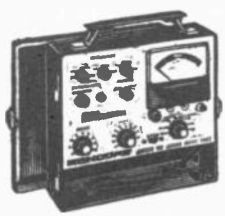
62F1455, Model CG12—AC operated. **NET** **109.95**

CG141 DELUXE COLOR GENERATOR

Model CG141. Provides all standard patterns, including RCA type, crosshatch, adjustable white dots and single cross for simplified static and dynamic convergence. Crystal controlled, 4.5 MHz, for fine tuning of sound carrier. "Temp Control" maintains a controled operating temperature, regardless of environmental temperature ."Snap Turner eliminates interference between channels and co-channels. Color gun interrupters on front panel. Positive and negative picture phase with 7 volts peak to peak. All steel, vinyl covered case. Size: 10"x9"x3½". Wt. 9 lbs.

62F746. NET **149.95**

CR143 DELUXE CRT TESTER

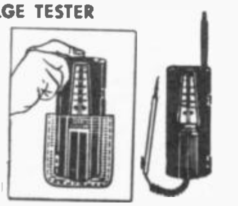


Model CR143. Tracking check is computed right on the face of the meter. All standard tests, shorts, emission test with pure DC, and life test. Rejuvenation and shorts removeable is accomplished with automatic control. Three step rejuvenations. Line adjust provided. All controls calibrated in actual DC volts. Complete with chrome panel and rugged all steel vinyl case with spacious lead compartment. Size: 10x9x3½". Wt. 11 lbs.

62F422. NET **99.50**

Amprobe Test Equipment

● NEW VOLTPROBE VOLTAGE TESTER



Type VT-100. Designed for convenient use for all residential and commercial circuits indicating nominal voltage levels from 115-550 VAC, 115-750 VDC. Voltage levels are shown "Thermometer Style", visual readout. Automatically shows correct DC polarity. Compact. Only 6" x 2¼" x ¾" Shpg. Wt. 5 oz.

62F986. NET **9.50**

AMPROBE SNAP-AROUND VOLT-AMP-OHMMETERS

The most popular and asked for tools of their type. Only one volt or amp range is revealed in its unbreakable plastic window at any one time. Rotary scale eliminates guesswork and reading errors. Currents may be measured instantly and accurately. Pointer-lock freezes needle at the reading with the flick of a switch. Allows you to take readings in darkness or hard to see areas and then read away from the conductor. A valuable tool in balancing circuits, tracing faults and grounds, and diagnosing operating troubles without shutting down equipment. Built-in 25 ohm mid scale ohmmeter on RS-3 and RS-1000. Accuracy within ±3% FS. One hand operation. With VL-11 leads and case.

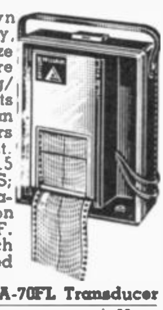
AMPROBE RECORDERS



Rugged, compact instruments in their own carrying case. Designed for high accuracy, dependability, and ease of operation. Small size and easy loading plus a unique design feature permits them to be used either as monitoring/recording devices or as indicating instruments making these recorders extremely versatile. Can be used as round the clock trouble shooters without the need for an operator to be present. Power requirements: 115VAC, 60 cycles, 2.5 watts. Accuracy: AC amps and volts ±3% FS; AC expanded scale volts ±1.25% FS; Temperature ±3°F on +20°F to +100°F; ±4°F on —50°F to +20°F; ±5°F on +50°F to 250°F. Chart Speed is 12"/hr. Supplied with 1 roll each of the necessary strip charts. Other chart speed available. Weight 20 oz.

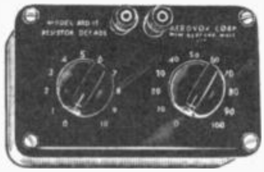
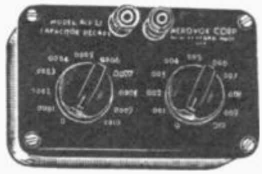
AEROVOX DECADE BOXES

• Provide Accurate Standards of Resistance, Capacitance & Inductance

Type ALD-42



Type ARD-15



Type ACD-23

Type ARD-41

All units provide accurate standards of resistance, capacitance, and inductance. Ideal for laboratory and experimental use. Decade boxes of the highest quality are available in ranges most needed for electronic and electrical laboratories for a price below that of equivalent quality standards. Boxes are available in 11 units; 4 resistance decades, 3 capacitance decades, and 4 inductance decades. Face plates are black with white numerals for maximum legibility. Heavy duty construction of seamless, drawn steel and gray enamel housing insure trouble free operation and unimpaired accuracy. Resistance model ARD-41 is housed in special high impact plastic case which is capable of rugged handling.

In "Use" column of the following table, C indicates the Capacitance Decade Box, L the Inductance Decade Box, and R the Resistance Decade Box. Except for ALD-42 the Capacitance Decade Boxes have operating ranges of 400 to 20,000 cps. ALD-42 has a range of 400 to 5,000 cps. The new decade box, ARD-41, has a range of 0 to 1.1 megohms in 1 ohm steps, combining all the three other resistance decades into one compact box. Multiple-dial Capacitance Decade Boxes have the highest value multiplier to the left so that readings are instantly visible.

CAPACITOR AND RESISTOR DECADES

CDE decade instrument boxes provide a reliable and accurate source of precision selected values for breadboarding and substitution. Featuring common size heat and shock-resistant phenolic individual boxes, direct-reading value ranges, six-way molded nylon terminal posts, and calibration chart for capacitance boxes, these handy units are widely used in electronic and electrical application work. Size: 3 13/16x5x3⅝, weight 2 lbs.

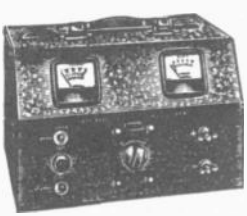
MODEL 1064K BATTERY ELIMINATOR AND CHARGER KIT

Delivers smooth, undistorted DC necessary for servicing transistorized equip., or for any application where minimum ripple, is essential. Two DC voltage ranges: 0-8v. and 0-16v. Automatic switching of appropriate ammeter range as you select either of the 2 voltage ranges. Separate volt meter and dual-range ammeter for more accurate reading. 105-125v. AC, 50/60 Hz; 150 watts. Grey steel cabinet. Size· 8½x5¾x7½". Same current, ripple ratings as Model 1060. Wt. 16 lbs.
62F870. NET **49.95**

Model 1064. As above but Factory wired.
62F871. NET **64.95**

MODEL 1060-K BATTERY ELIMINATOR AND CHARGER KIT



Battery substitute for operation and servicing of battery operated transistorized, also "hybrid" and vac.-tube equip. Separate output ammeter and voltmeter. Has extra low ripple filter. Output 0-8V, @ 10 amps continuous, 0-16V @ 6 amps continuous. 0.3% ripple @ 2 amps. Size: 8¾"x10½"x7¾". With instructions, less leads 18 lbs.

MODEL 1020K POWER AND BIAS SUPPLY KIT

Power supply includes power transformer, full-wave silicon diode rectifier circuit, heavy R-C filtering, plus two power transistors in a unique cascaded filter circuit. Ripple is reduced to 1/200 of 1% at full load. Provides continuously variable output voltage to 30 volts monitored by a dual range voltmeter (0-6, 0-30 VDC). Max. load current varies from 150 ma. in the 1-12V range to 300 ma. in the 24-30V range. Uses include hum-free operation of sensitive transistor radios, hearing aids, preamp, instruments. As a variable bias supply for transistors or tubes in circuit development; to offset AVC and AGC voltages in the alignment of TV and radio receivers or to cut off the color burst amplifier in color TV adjustment. Grey case. Size: 5x4x5½". Wt. 5 lbs.
62F856. NET **25.95**

Model 1020. As above but Factory wired.
62F857. NET **34.95**

SOLID STATE POWER SUPPLY

Model 1025 is completely transistorized, very low ripple, portable DC power. Monitored by a dual range voltmeter (0-6, 0-30 VDC), and 500 ma millampmeter. Maximum load current varies from 150 ma in the 0-12V range to 300 ma in the 24-30V range. Maximum ripple (120cps) at full load is only 0.005%. Fuse: ½ amp. will blow in case of short circuit to protect unit. Power Requirements: 117V, 60cps. Size: 3¾" h x 8"w x 4¾" d. Weight 5 lbs.

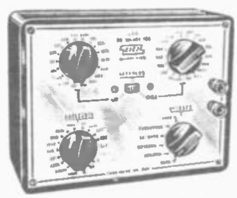
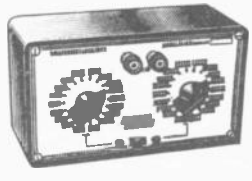
R-C COMBINATION BOX KIT



Model 1140-K. Combines Model 1100-K and Model 1120-K in one box for selection of either R alone, C alone, or series or parallel combinations of R and C (1350 combinations). Includes all EIA resistance values from 15 ohms to 10 megohms and all EIA capacitance values from .0001 to 0.22 mfd. Min. accuracy ±10%; resistors 1 watt carbon and capacitors silver-mica or molded / impregnated plastic, most rated at 600 volts. May be substituted in operating circuit to determine RC combination value, or just R or C value, needed for optimum performance. 5-way jack top binding posts. Satin-aluminum front panel. Shipping weight, 3 lbs.
62F860. NET **15.95**
62F861. Model 1140. Wired and tested. **NET** **24.95**

MODEL 1100-K EIA RESISTANCE SUBSTITUTION BOX KIT



Permits rapid substitution of a wide range of EIA resistance values in an operating circuit to determine the resistance required for best performance . . . determines the value of unmeasurable resistors. 36 EIA 1 watt, 10% resistors, arranged in Hi and Lo decades give resistance ranges of 15 ohms-10 megs in decade multiples of 15, 22, 33, 47, 68 and 100 ohms 5-way jack-top binding posts for connection of practically any type of test lead. Molded black bakelite cabinet with 2 color deep etched aluminum panel. With all parts, less solder and leads. Size 3¾x6½x3½". Wt., 2 lbs.

VTVM PROBES

Model PRF-11. An RF probe for all VTVM's listed. ½ lb.

62F816. Kit. **NET** **4.50**

62F817. Wired. **NET** **5.95**

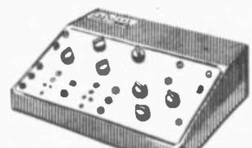
MODEL UP UNI-PROBE

Dual-Purpose AC/DC/Ohms Probe. Supplied less series isolating resistor or connector. Use 1 meg. for all VTVM's except 221, use 15 meg. for 221. VTVM's except 221 take MCIF connector; 221 must be modified.

62F864. Kit. **NET** **5.95**

62F865. Wired. **NET** **7.95**

• *NEW* 443K SEMI-CONDUCTOR CURVE TRACER KIT



Tests diodes, rectifiers, signal and power transistors. Adapts to any general purpose oscilloscope and displays the D. C. characteristics of semiconductor devices. Allows direct readout of most wanted data, in determining the usefulness and technical application for circuit designers and service technicians. Specifications: diode and rectifier forward voltage test; 2 ranges (O-lma) and (0-100ma), maximum 1 Amp forward current. 2 ranges (lua/Div), (10ua/Div), (100ua/Div), Peak Inverse Voltage (PIV). 5 ranges (1volt/Div), (10volts/DIV) (50volts/Div), and (100volts/Div); (200 volts/Div); PIV test voltages are variabel from 0-1000 volts. Transistor tests; family of 4 curves, BETA- 6 volts at 10 ma collector current maximum. For signal transistors 6 volts at 1 Amp. collector current maximum. 6 volts at 1 Amp. collector current maximum for power transistors. All solid state printed circuit construction. Shpg. wt. 10 lb.

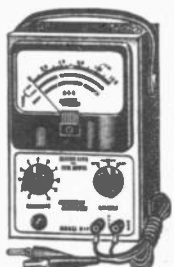
MODEL 944-K FLYBACK TRANSFORMER & YOKE TESTER KIT

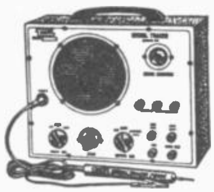


• **Checks inductive windings on chokes, transformers, coils, relays!**

Quickly and accurately troubleshoots horizontal circuits of TV receivers. Allows positive check of flybacks and yokes, in or out of the set. Has three separate colored "Good-Bad" scales on a large easy to read 4½" meter which operates on the extremely sensitive grid-dip principle. Shows up a single shorted turn. Checks inductive windings on many transformers, chokes, coils, solenoids, relays, etc. May be used as a proportional AC ohmmeter. Gray wrinkle steel case. 7x5x4". With all parts, 105-125 V. 60 hz. AC. 5 lbs.

62F832. Kit. Complete with instructions. NET **29.95**
62F833. Model 944. As above, but wired and tested. **NET** **39.95**

DELUXE MODEL 147-K MULTI-SIGNAL TRACER KIT



Transformer operated for isolation and safety. High gain RF and low gain audio with both visual and aural monitors, magic eye indicator and 5" PM speaker. Calibrated wattmeter circuit (fused) reveals abnormal total wattage consumption, open, or intermittent filament circuit, etc. Permits RF, IF and AF signal tracing in FM, AM and TV sets. Noise localizer circuit. Size 8x10x4¾". 105-125 volts AC, 50-60 hz., 40 watts. Kit. Complete with instructions. Shpg. wt. 10 lbs.

62F809. NET **34.95**
Model 147. As above, but factory wired and tested.
62F810. NET **49.95**

• *NEW* PSI SIGNAL INJECTOR PROBE

Pocket size, cordless, pen-type instrument generates and injects a signal covering the audio, IF and RF spectrum. Detects defective circuits fast. All solid state. Frequency: IKC approximately, with harmonics to 30MC. Output Impedance: 10K ohm. Supply Voltage: Uses two "AAA" 1.5V batteries. Battery Life: 2,000 hours normal use. Size: 5⅝" long x ½" O.C. Weight one ounce

62F754. PSIK Kit. **NET** **5.95**
62F775. PSI Wired. **NET** **9.95**

Test Equipment EICO

MODEL 965 FARADOHM BRIDGE/ANALYZER

Model 965. Nine-range low-voltage (0.45 VAC) capacitance-resistance bridge safely measures even 1-volt electrolytics. Capacitance range 5 pf-5000 µf; resistance range .5 ohm-500 megs. Metered bridge balance, leakage test voltage (6 DC VTVM ranges; 1.5-500V), leakage current (11 DC VTAM ranges: 0.15 µA 15 mA). DC VTVM (10 megohm input Z) and DC VTAM (75 mu drop) both externally usable. Electronically filtered leakage test supply with less than 8.5% ripple and V/A metering is ideal for transistor/diode testing supplying transistor circuit breadboards, or as a transistor battery eliminator. Complete overload protection. Requires 115 VAC, 60hz, 32 watts. 8½x12x9"; wt. 18 lbs.

62F782. Model 965. Wired and tested. NET **175.00**

Model 965

MODEL 369-K TV/FM SWEEP MARKER GENERATOR KIT

The EICO 369 feeds sweep signal only to i.f. strip being aligned. At the output end of the circuit a demodulator cable picks off the signal, demodulates it, and feeds the demodulated signal to a mixer stage inside the generator where the markers are added. It means that a TV technician can align TV and FM i.f. strips faster and more accurately. Five Ranges: 75-220 Mhz; 36-95 Mhz; 16-42 Mhz; 6-16 Mhz and 3-7.5 Mhz. All five ranges are fundamentals and tuning the desired frequency is simplified by a 6:1 vernier dial and a 330° scale. Output impedance is 50 ohms. A 6BQ7-A sweep oscillator and rf output cathode follower, a 12AT7 variable and crystal marker oscillator, a 12AX7 blanking diode and first agc amplifier, a 6DR7 second agc amplifier and agc series regulator. For 110-120v A.C. Shpg. wt. 18 lbs.

Model 369-K

MODEL 667-K DYNAMIC TUBE AND TRANSISTOR TESTER KIT

A mutual conductance tester with a peak emission test to give a single reading of tube quality. Spots bad transistors by gain and leak tests. Tests 5 & 7-pin Nuvistors; 7 & 8-pin subminiature, 7, 9, 10-pin miniature, octal, loctal, electronary and VR tubes; compactrons, novars, and pilot lights. 4½" meter indicates leakage betwen elements or Beta current amplifications of NPN, PNP transistors. Multi-circuit lever switch sets up plate, screen, and voltage controls. 13 pushbuttons alternate element setup of tube. Steel case. 12" x 15" x 4½". Wt. 22 lbs.

MODEL CRU UNIVERSAL CRT TEST ADAPTER

In conjunction with testers 667 and 628. Tests black and white (& color CRT's,) 70, 90 & 110°. Checks tubes without removal from set. Complete with 4-foot interconnecting test cable.

62F891. NET **9.95**

MODEL 628-K TUBE TESTER KIT

Simple test set-up procedure for checking emission, shorted elements, open elements, and continuity. 13 individual lever-type element switches for complete flexibility. 4½" meter with 3-color REPLACE-WEAK-GOOD scale, 0 to 100 scale for matching. Tests 7-9- and 10-pin miniatures, octal, loctal, 5- and 7-pin nuvistors novars, and compactrons. Types tested include series string, magic eye VR's. Adapter available for testing CRT's, both color and black and white. New 3-column wide roll chart for extra tube listing capacity. Snap-out chart window. Pilot light test socket (contact type). Line adjust control. Type of Tube Merit Test: Cathode conductance (emission). Tube Merit Indicator: Size (HWD): 9½" x 12½" x 4¼". Shpg. wt., 11 lbs.

MODEL 378K AUDIO GENERATOR KIT

Extreme versatility and positive error elimination are now yours for any application where a stable, accurate audio sine wave must be used. Precisely metered output controlled by 8 position decade and fine attenuators. Highly accurate, switch - selected frequencies from 1hz to 110 Khz in 1 hz steps. Positive setting detent switches need no interpretation. Frequencies accuracy: ±5%. Distortion less than 0.1% (20hz-20kc). Output voltage ranges: 0-3, 10v into hi-z (10k min.); 0-.003, .01, .03, .1, .3, IV into ext. 600Ωload—or with int. load into ext. hi-z. Output meter accuracy ±5% of full scale. Power requriements: 120V, 50/60 hz, 40 Watts. Size: (HWD); 8½" x 12½" x 9". Weight, 16 pounds.

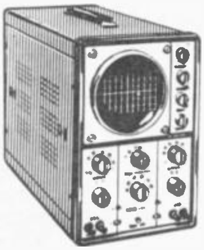
• *NEW* MODEL 465 PROFESSIONAL OSCILLOSCOPE



DC-to- 8MHz (useable to 10MHz). High gain vertical and horizontal AC/DC-coupled amps. Flat-face 5" CRT reduces parallax. V/H amplifier sensitivity: .05 volt P-P/CM. (DC-to-8MHz, +1, —5db). Push-pull amplification minimizes distortion. Coupled design eliminates low-frequency phase shift. Zener-diode controlled voltage calibration source. Accelerating potential is 1400 V. Sweep range selection from 10 hz to 100 Khz in four overlapping ranges. Pre-set TV-V and TV-H sweep positions (30cps and 7875cps.) Vertical amplifier: Freq. from dc to 8MHz (+1 —5db). Horizontal amplifier: Frequency from DC to 1MHz, +1 —3db. Sweep ranges: 10 to 100, 100 to 1K, 1K to 10K, 10K to 100Kcps; TV-VERT position (30cps) and TV-HOR position (7875cps.) Intensity Modulation Input: 3Vrms; Imp. 2.2 megohms. Size: (HWD) 12¾ x 8½ x 17½. Shpg. wt. 27 lbs.

LIGHTING LEVEL INDICATOR

Model 7902-FC. Handy pocket-size meter, 3¼"x2⅛"x1⅛", for checking lighting level of various work areas. Simply place meter on working surface, and it quickly shows if the light level is adequate for efficient operation, or if eye strain or fatigue may result because the level is too high or too low. Also usd by custodial maintenance staffs, lamp and fixture manufacturers, and others concerned with providing suitable lighting. With certain modifications the indicator has applications in some phases of photography. The light meter was developed in colaboration with utility members of Edison Electric Institute for their light promotion courses.

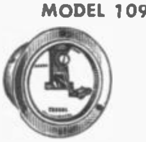
MODEL 1092 SENSITROL RELAY



Operates on low input. Can be set close to any DC value from 0-50 micro-amps at drop of 0-100 millivolts. Can be connected to make on either increasing or decreasing current-zero right to left. Handles 100 milli-amps at 120 VAC or DC w/o chatter. Once set, will repeat within narrow limits (±0.2 microamps attainable). 3½" rd. flush case—1½" D. Wt., 3 ozs.

62F1093. NET **30.40**

● NEW ILLUMINATION METER

Model 756-9901002. Portable instrument for light measurements requiring a high degree of accuracy over broad range of light values. All types of lighting, regardless of color composition, can be read directly — no correction factors are necessary. The VISCOR filter corrects for color, the COSINE filter, for angle of incidence. Calibration is by direct comparison to accurate reference standard lamps. This model is supplied in a sturdy leather carrying case with a compartment for the light target. Range: 0-20/100/500 foot-candles.

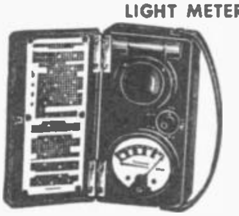
62F1400. NET **536.00**

● NEW SUNLIGHT ILLUMINATION METER

Model 756-9901003. Incorporates ranges of 0-120/1200/12000 foot-candles. Requires only 1 PHOTONIC cell equipped with a quartz filter so that ultra-violet portion of spectrum is included in the light measured. Includes carying case.

62F1401. NET **515.00**

LIGHT METER



Model 614 Foot-Candle Meter. Any type of commercial lighting can be measured dircetly. Photoelectric cell is mounted on a hinge, so that it will pick up measurements from a wall or ceiling without unnecessary moving of the meter. Ranges: 0 to 100 —0 to 250 and 0 to 500 foot candles each with a separate scale. With Viscor and cosine correction filters. Size: 7x3⅜x2½". Shpg. wt., 2 lbs.

62F474. NET **194.00**

DIRECT CURRENT PORTABLE

Model 931. Compact, light weight and accurate (within 0.5 of 1%). Hand calibrated mirror scale and knife-edge pointer. Self shielded permanent magnet moving coil type. Scale length, 4.04". Black bakelite case with handle. Size: 5½ x 5 x 3¼". Shpg. wt., 4 lbs.

POCKET CLAMP AC VOLT-AMMETER

Model 749. Measures AC current and voltage without breaking circuit. Accommodates conductors up to 1" round or 1¾x⅜" rectangular. Features: core magnet shock mounted mechanism with spring back jewels, large smooth action trigger; shatter-proof wraparound plastic window, 0-6, 15, 30, 60, 150 and 300 amperes. Shpg. wt. 2½ lbs.

● NEW LOW LEVEL ILLUMINATION METER

Model 8791-9901001. Transforms light energy directly into electrical energy which is then measured as foot-candles on a linear scale. Power is self-contained and supplied by 2 commonly available 2.7v batteries (included). Full scale sensitivity: 0.5 to 100 foot-candles. Range: 0.5/2/10/20/50/100. Accuracy within 5% of full scale. 8" x 7" x 8" approx. Shpg. wt. 4 lbs.

- Large Scale in a Small Package
- Self-Shielded "Cormag" Movement
- 1% Accuracy
- Eliminates Parallax Errors
- Self-Illuminated

This moving-scale instrument provides an 8" meter scale in only 2½ inches of panel width. Optical system projects moving scales onto a coated window. These meters may be read at oblique angles without paralax errors associated with pointer type meters. Standard #44 pilot lamps are easily replaced from front of panel. All units feature ±1% accuracy and employ Weston "Cormag" self-shielded movements. Scales have 100 divisions. Size: 3 x 2⅜ x 4²⁷⁄₆₄".

Weston Panel Meters

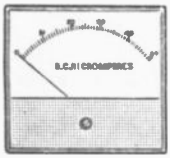
NEWARK SAVES YOU TIME AND MONEY

Triplett Panel Meters



G SERIES PANEL INSTRUMENTS

Three sizes; 2½", 3½", and 4¼" models with black molded plastic cases and clear molded plastic fronts. An all new meter design that features flexibility and interchangeability, with optional mounting bezel for behind panel mounting. Self shielded, exact, reliable—DC instruments have the famous Triplett BAR-RING movements—more torque, faster response, greater ruggedness. Provides a dominant scale with plenty of dial area for multiple scales. DC Scale lengths: 4½ in., 4.035", 3½ in., 3.163", 2½ in., 2.536". AC Scale lengths: 4½ in., 3.43", 3½ in., 2.688", 2½ in., 2.155".

"Wide-Vue" Panel Meters Simpson

All have self-shielded type movement. DC Ammeters up to 50 amps are self-contained. All meters are accurate ±2% of FS .Model 1227 and model 1257 mount in 2.17" dia. hole. Models 1329, 1349, and 1359 mount in 2.75" dia. holes. Plastic Covers for maximum protection of meter face. Average shpg. wt., 1 lb.

DC GALVANOMETERS

Top-quality Simpson panel meters meet exacting requirements. Models 1227 and 1327 Wide-Vue type with 2.5" and 3.04" scale length respectively and self-shielding type movement. Model 27 has Iron-Vane type external movement. When ordering for use on steel panel, specify panel thickness and add $1.65 for recalibration. Model 27 scale length 1.8". All are accurate within 2% F.S., have rect. faces. Range 50-0-50. Average shipping wt., 1 lb.

Simpson Wide Vue Panel Meters

These panel meters have 25% fewer parts thus reducing chance of failure; built to conform to Simpson's rigid quality and performance standards. Performance tested for equivalent of 30 years of actual use without a single failure. Higher sensitivity with lower resistance; high accuracy with better repeatability. Accuracy ±2%. Spade pointer with case construction of molded black phenolic base with high temp. black plastic cover. Supplied with mounting and terminal hardware. Shipping weight: 6 oz. (1227 T), 8 oz. (1327 T), 10 oz. (1329 T).

1½" WIDE-VUE PANEL INSTRUMENTS

1212 and 1214 have the Simpson self-shielded movement (calibrations not affected by stray magnetic fields). 1212 accurate to 2% of full scale. 1214 accurate of 3% of full scale at 25°C. Both models mount in 1.50" dia. holes. Size: 1.76"x1.76"x1.32". Scale length is 1.5" at 90° Arc (38.1 mm). Standard calibration either magnetic or non-magnetic panel with lance type pointer. Base constructed of molded black phenolic plastic with high temperature cover. All models are supplied complete with the necessary mounting and terminal harware. 8-32 studs are used for terminals. Average shipping weight, 3½ oz.

EDGEWISE PANEL METERS

Core magnet meter movement. Self shielded. Needs ½ the panel area of usual 2½" meter; yet comparable scale length (1⅞). Complete mtg. hardware. DC acc.: 2% of full scale. Standard scale — Black numbers on a white background. Dustproof, molded lucite case. Accurate comparative readings by mounting meters side by side. Saves space—makes every square inch count. Quick, simple mounting. Meters are supplied complete with mounting hardware. Terminals: Solder (ammeters, stud). Shpg. wt., 5 ozs.

Simpson Panel Meters

"DESIGNER" SERIES

Model 523

Breaking away from traditional panel-meter styling, these instruments have space-saving rectangular faces. On crowded panels, where height is limited, a clean, crisp, uncluttered design is presented. Rugged, dependable pivot-and-jewel movements provide ± 2% full-scale accuracy. Knife-edge pointers permit extra-precise readings. All models come in molded black phenolic cases with glass windows, and are supplied with all necessary mounting and terminal hardware. Dimensional data: Model 523 (3½" nominal width) requires only 2.438" panel height, and occupies 1.811" behind-panel depth; scale length is 62 mm. Model 524 (4½" nom. width) is 2.84" high and 1.811" behind-panel; scale length 90 mm. Shipping wt.: 11½ oz. for Model 523, 12 oz. for Model 524.

RUGGED SEAL CONTACTLESS METER RELAYS

Set points are adjusted thru external, front-panel gear drive. Set points are indicated by pointers. Sensing is accomplished by an infinite life lamp and photoconductors. A solid-state switching circuit and DPDT slave relay are internally provided for each control point. Control relays open in event of power failure.

Slave relays will switch 10 amps at 115 VAC, resistive load. Meter is unaffected by control point setting. Calibration accuracy is ±2% of full scale. Control point differential: within 0.5% of full scale. DC power for control circuitry is provided by an external power supply furnished with each double control relay; operates from 115 V, 50-500 Hz AC; single control models have self-contained power supply. Average shipping wt., 1 lb.

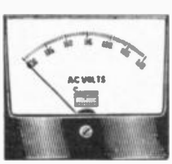
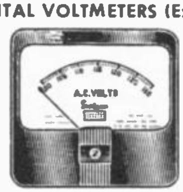
SEGMENTAL VOLTMETERS (Expanded Scale 100-130 AC Volts)

Model 1347C



Model 1349C



Model 49C

Units used primarily in monitoring AC line voltages. Operating Frequency: 20-2000 cps. Accuracy: ±.5% of center scale value at 25°C, and 60 cps sine wave. Sen.: 160 to 100 ohms/volt end scale values. Decreases as voltage increases. Av. Shpg. wt., 1 lb.

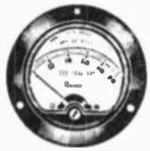
LABORATORY QUALITY "JEWELED BEARING" PANEL METERS

Model 27

Model 29



Model 25

All DC meters have the Simpson self-shielded movement (Calibration not affected by stray magnetic fields or magnetic mounting.) *External Multipliers, Model 183, are furnished on 3½" and 4½" DC meters 1000 volts and higher. All others are self-contained. DC ammeters are self-contained for ranges up to and including 50 amperes. † Higher ranges DC ammeters (50MV) listed are calibrated for 5 ft. leads and require external shunts. Accuracy: ±2% of full scale; Scale Length: Model 25 & 27—2.5" (63.7mm), Model 29—3.9" (99.0mm). Average shpg. wt. 1 lb.

Simpson Panel Meters

Model 77

WATTMETERS — DYNAMOMETER TYPE

Self contained, dynamometer-type. Measure DC and single-phase AC power to 250 cps. Normally calibrated for non-magnetic panels. Available in magnetic panel calibration. Frequency range of 25-125 cycles. Mount in 2¾" holes. Scale length: 2.3 inches. Accuracy 2% of full scale. Shpg. wt. 1 lb.

3½" ELAPSED TIME PANEL METERS

Widely used by research labs, manufacturing plants, broadcasting stations, etc., to keep life and performance records based on operating time. Meters use self-starting synchronous motors. They indicate up to 99999.9, then recycle and begin again at 00000.0. Model 55-3½" round. Model 57-3½" rectangular. Case depth for all models: 2⁹⁄₁₆".

MODEL 29 AND MODEL 3324 4½" PYROMETERS

Model 29

Model 3324

Simpson now presents two versions: Standard bakelite Model 29 and Model 3324 Rugged Seal for extreme conditions. Models compensated for ambient temperature changes and include copper circuit compensation. Also calibrated for use with iron constantan thermocouples. Pyrometers of —150 to +250°F (—100 to +120°C) are calibrated for 5 ohm thermocouple resistance. All other units are calibrated for 10 ohm thermocouple resistance. Furnished with an external adjustable series resistor to permit use of lower resistance thermocouples in the field. Shpg. wt.: ½ lb.

THERMOCOUPLES

All thermocouples are iron-constantan, calibrated to 5 or 10 ohms, ±1% per table.

TYPES 21221 and 21224. Iron constantan thermocouple wire in stainless steel overbraid for rugged service application where flexing or abrasion could cause deterioration of standard units. **TYPES 21222 and 21223.** Glass cloth overbraid. Suited for most general purpose use or for permanent mounting in protected sheaths or conduit. Shipping weight: ¼ lb.

METER MODIFICATION SERVICE

NEWARK can now accept modification orders on most of the Simpson meter listed in this catalog.

Call or Write your nearest NEWARK office for details.

LABORATORY QUALITY AC INSTRUMENTS

Manufactured to high standards of accuracy to insure long life and excellent performance. All instruments listed below have moving iron vane type movements—no rectifiers are used. Reasonable accuracy with any waveform; with sinusoidal input the accuracy is guaranteed to ± 3% of full scale. External resistors furnished with meters having a range of 500 volts or higher. All models mount in 2¾" holes. Other dimensions same as DC counterparts. Mounting template and hardware furnished with all meters. Average shipping weight, 1 lb.

SQUARE RUGGED AND SEALED METERS

Metal cased panel instruments are ideal for use in field test equipment or wherever rigorous environmental conditions are encountered. They are completely sealed, commerically ruggedized, glass window, metal cased and shielded, not affected by steel panel mounting. The movement shielded by steel enclosure will not be affected by magnetic panel materials or stray R.F. Accuracy: ±2% F.S. @ 25° and 60 cy. Sine Wave. For durability and long service life the meters are of metal construction Scale Length: Size 3½"=2.9" (74 mm); Size 4½"=3.9" (101 mm); Size 4"x6"=4.7" (120 mm). Average shpg. wt. 1 lb.

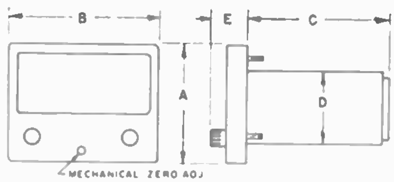
- Solid state circuitry, fail-safe wiring
- Taut Band movements in most ranges
- Fully continuous reading
- Complete package—no external components
- Unaffected by ambient light
- Gear drive-slip clutch set pointers



CONTROL DESCRIPTIONS

ON-OFF CONTROLS

Models 503-KH (Single set point) and 503-KD (Double set point). Compacks packaged complete with power supply, control circuitry and load relays coupled to an Optical Meter Relay. Screw type terminal connections are at rear of meter barrel. (ill.) All circuit components wired fail safe below set point on KH and between set points on KD. Units easily converted from automatic on-off control to push button reset latching circuit. SPDT relay contacts-load rating: 5 A. resistive at 115 VAC. Dial arc: 4". *Taut Band movement.

‡ AC Load Compack Meter range is 47 Ma AC, matching secondary of current transformers (below). Dial reads 0-150% Load. Operates with any transformer listed. Use to monitor or control by measuring motor lead. Be sure to order appropriate transformer for each unit. Above 50 Amps. two transformers are required; the full load range plus a 5 amp. unit (55F4622) to step down between the large transformer and the meter. Wt. 2 lbs.

ON-OFF TEMPERATURE CONTROL

Models 603-KH (single set point) and 603-KD (double set point). Same circuit description as 503-KH & KD with addition of electrical cold junction compensation, automatic thermocouple break protection & copper error correction. Medium resistance thermocouple actuated pyrometers. Taut Band. Damped against vibration. Dual Fahrenheit-Centigrade mirrored scales. Dial arc 5". Adjustable for thermocouples 0-10 ohms. For control or alarm applications. Wt. 2 lbs.

TIME PROPORTIONING-TEMPERATURE CONTROL

Model 603-KTP. Compensation and Thermocouple break protection same as 603-KH & KD but control circuit provides proportional control from relay output. Ratio of relay on time to "off" time proportional to deviation from set point. PR Band approx. 3%. Time cycle settable to 5, 10, or 15 seconds. Capable of straight line control better than ±1 degree F. Taut Band, damped against vibration. Wt. 2 lbs.

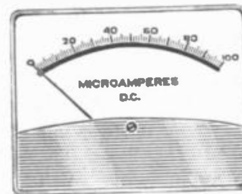
SUPER CALIBRATED TAUT BAND PANEL METERS

This listing offers the largest available selection of Taut Band meters in two different calibration types: 0.5% Tracking and 1% Accuracy. Choice of 4½ in. or 5½ in size. All have high sensitivity self shielding bar ring movements, Taut Band suspension, frictionless design allows near perfect repeatability. Easily converted from front panel mount to recessed Stylist mount with bezel kit.

STYLIST. Crisp clean lines for easier readings. Panel hides bottom third of meter, increasing dial area.



PANELIST. Features rugged anti-static plastic case. Standard meter dimensions.

TRACKING VS ACCURACY

Most electronic meter applications require better tracking (electrical linearity) instead of full scale accuracy. Tracking is a meter's ability to divide a full scale indication. Example: a 100 micro-amp. 1% tracking meter with a 100 division scale. Used in a VTVM may require 102 micro-amps to indicate full scale. Exactly ½ that full scale indication (51 micro-amps) should put the pointer at 50 divisions ±1 and 25.5 micro-amps at 25 divisions ±1. Tracking is more important in any application where zero or full scale indication is electrically set; tachometers, pH meters, thermistor bridge temp. meters, etc. Meters with good full scale accuracy are used for absolute measurements like volts, amps, thermocouple temp. readings, etc. 502-1 & 602-1 are 1% accuracy. 502-II and 602-II are 0.5% tracking, 2% accuracy. All have mirrored scales and knife edge pointers.

MOD METER

1% tracking movements in all DC ranges. 2% on AC. Scales slide quickly into a sealed capsule which accurately positions scale and seals the movement from contamination. Makes possible a drastic reduction in meter inventory. Use multiplier resistors, current shunts, or transformers to produce an infinite number of voltmeters and ammeters from just 3 or 4 Mod-Meters. Accepts either plain or mirrored scales, choice below. 47 maAC meter requires use of AC trans. on facing page.

Detailed lettering instructions are enclosed. Meters supplied with 100 division blank scales and will operate with any of scales listed. A lettering kit below allows production of finished scales in 10 minutes. Rugged taut band construction. Black phenolic cases.

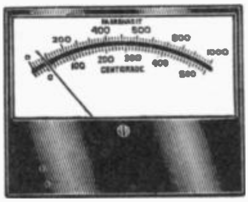
MODEL 503 PYROMETER 2% ACCURACY



Thermocouple pyrometers are medium resistance, have automatic bi-metal cold junction correction and copper error compensation. External resistor adjusts for varying thermocouple resistance up to 10 ohms. Mirror scale reading in Fahrenheit and Centigrade. I/C is Iron Constantan; Cu/c—Copper Constantan; C/A—Chromel alumel. Knife edge pointers. Dial arc is 4". Phenolic case. See table for dimensions. Shpg. wt.: 1 lb.

MODEL D-1 PORTABLE PYROMETER

Pocket size thermocouple actuated pyrometers designed for checking laboratory ovens, oil baths, appliances, refrigerators, air conditioners, solder pots, furnaces, etc. Features Taut Band frictionless meter, highy resistant to shock. Mirrored dial reads in F° and C° Movements have bi-metal cold junction correction and copper error compensation. Tough vinyl covered case has aluminum trim (5½x3¾"). Supplied complete with plastic handled chromel constantin needle probe, 3 ft. leads. Shpg. wt.: 1 lb.

MODEL B PYROMETER

For checking temperature of solder pots, furnaces, ovens, ranges, refrigerators and other asppliances! Meter has rugged taut band movement. Dials calibrated in both Fahrenteit and Centigrade. Sealed phenolic case, mirrored 5" dial with knife pointer, glass kindow. Complete with wood grain case, 5' thermocopule, 8½x6½; wt. 3 lbs.
Thermocouples: Iron Constantan (I/C), Chromel-Constantan (CR/C), and Chromel Alumel (C/A).

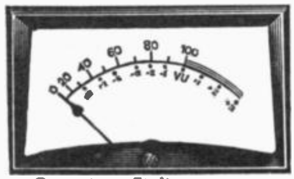
STYLIST VU METERS



Model 361 and Model 561. VU Meters, for measuring amplitude of audio signals. Two scales, **Type A** scale; for recording uses. **Type B** scale emphasizing percent modulation for broadcasting. One piece Stylist case mounts thru rectangular panel cutout. Illuminated from behind thru a lucite window at top of case. 6 volt illumination bracket is included. Conforms to ASA C16.5-1954 specs.

● *NEW* MODEL 110 MINIATURE GRAPHIC RECORDER

- **Use Panel Mounting or Portable**
- **Built in Chart Reader**
- **Taut Band**

Model 110. Features frictionless taut band movement inkless, and meter recorder with built in access window, disengageable clutch for intergral chart reading. All units are temperature compensated. Drive design eliminates paper tearing and hangup. Standard chart speed is 1 inch per hour; 63 foot chart provides 31 day record. Optional conversion kits allow higher speeds. Use with shunts multiplier resistors, current transformers for voltage, current readings, 2% D.C. accuracy; 3% on AC. Use portable or panel mounted.

Pyrometer (0/300°F to 0/2500°F) models are thermo couple actuated, have cold junction and copper error compensation. Adjustable for up to 10 ohms, lead resistance 2% accuracy.

Operates on 115 VAC, 3 watts panel cut is 4.375 x 4.06". Size 4¼" wide x 4" high x 7½" deep.

Auto Transformers

STACO® INCORPORATED

STACO VARIABLE AUTOTRANSFORMERS

Wide selection of autotransformers designed to deliver variable output voltages with high efficiency, reliability, and minimum maintenance. The optimum core and coil design used in these transformers result in higher current ratings and greater overload capabilities. Units are designed to deliver output voltages of zero to line voltage, or zero to 17% above line voltage. Terminals permit connection for increasing voltage in either clockwise or counterclockwise rotation of knob. Regulation is substantially independent of the load; zero wave form distortion. Moderate temperature rise. Precious metal plating of the commutator surface eliminates oxidation and deterioration. All units are designed for 50/60Hz operation unless otherwise noted. *60Hz only at over-voltage, factory connection for line voltage output. **60Hz operation only.

STACO DELUXE LINE

Exclusive line of variable transformers feature diode-protected meters (to guard against accidental burnout): insulated banana jacks on all metered units: easy to read, bold type facilitates accurate measurements. Positive stops are built into all control knobs to insure against internal damage and to assure no loss of index on the calibrated dials. Circuit breakers are employed to avoid the inconvenience and cost of fuse replacement, with the exception of the E171, which is fused. Enclosures are tamper-proof and movements are accurate within 2%. Pilot lights are provided with each unit at no extra cost. Efficiency is as high as 98%, and under maximum-output-voltage conditions at rated current, better than 5% regulation can be attained. Convenience outlets on most units add versatility to your work area. Conservative ratings allow continuous operation with a 10% to 17% output voltage above input. Available are variable autotransformers for every industrial, classroom, or laboratory application. Ammeter, voltmeter, or wattmeter, or a combination of all these are available. A selector switch is provided for use with dual scale meters to assure greater accuracy in meter readings. All units are supplied with a ventilated case, constructed of extruded aluminum and baked epoxy painted 18-gauge steel. The front panel is aluminum with permanently etched legends. The convenient carrying handle is anodized, rugged extruded aluminum. All units are designed to meet UL and CSA standards of safety.

E1010VAW

E171

Note: Types E501V, E501VA, E501VAW, E1010V, E1010VA, E1010VAW have both a convenience AC and DC output of 10% of the output current rating of the unit. Outputs are available at banana receptacles. EJ401V, EJ901V have 120VDC isolated output at full rated current available at banana receptacles. All convenience outlets provide 120VAC at 10 AMPS minimum.

ELECTRONIC POWER TYPES

Available in electronic-power component types providing a regulated source of plate and filament voltages. The CVF series provides 6.0 or 6.3 volts of output regulated within ±1% over line variations of ±15%. The series CVE series, a combination of the plate and filament types, regulates within ±3%. Both series, which include filaments with stabilized voltage supplies, operates reliably, feature long component life, and need less servicing than competitor's materials. Fig. D.

Transformers & Power Supplies

SOLA ELECTRIC SB
DIVISION OF SOLA BASIC INDUSTRIES

TYPE CVN NORMAL HARMONIC TYPE TRANSFORMERS

CVN type transformers provide the same ±1% regulation as the sinusoidal series. Contain an average of 20% rms harmonic content and are especially recommended for electrical loads not affected by harmonics, such as solenoids, relays, filaments, and where rectification is required. †indicates 95-130. (*) indicates 95-130/175-235/190-260. (**) indicates an input voltage of 190-260/380-520. (***) indicates 95-130/190-260. (††) indicates 190-260.

FIG. E. FIXED CONSTANT VOLTAGE DC POWER SUPPLIES

Will withstand high transient overload without damage or output voltage drop. Output regulation ±1% or less over 100-130v. input range. 1% repple except 281200 and 281250 which are ½%. Load regulation less than 4% from 20% to full load. Efficiency approx. 75%. Output impedance approx. .5 ohm. Mounted on standard 19x5¼x9¾" rack panel. Input 100-300, 60 hz. AC.

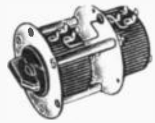
POWERSTAT VARIABLE VOLTAGE TRANSFORMERS

Type 146-246

Type 10B



Type 10B-2, 12-2

Type 116B, 117B, 216B

Type 21, 22

SERIES 146-246 HIGH-CURRENT VARIABLE TRANSFORMERS

Rated over 4 KVA, constant impedance load. 146 types are for 120VAC. 50/60 cycle input, deliver 30 amps to constant Z loads (35 amps without overvoltage). Type 246. 120 VAC 50/60 Hz input, delivers 15 amps up to 150 V; 240 V input, delivers 19 amps to 240 V. Size: 9$\frac{11}{16}$"wx10$\frac{17}{32}$" deep, except *11" deep. † requires T6053 choke. Feature POWERKOTE coils.

Superior Variable Transformers

"POWERSTAT" VARIABLE TRANSFORMERS

An autotransformer of toroidal core design with a movable brush-tap riding on the Gold-plated bared portion of the winding.. Delivers from 0 to or above line voltage. Operating temp. rise is less than 50°C above ambient. Special Gold plated plating and polishing process produces a glass-smooth commutator surface which is forever free of oxides.

(F) with fuses in the output brush leads and terminal boards enclosed. Knock-outs in enclosures permit wiring with BX or equivalent. (T) terminal boards enclosed. (2PF) parallel blade plug. (3PN) standard 3-blade plug. (-2) 2-gang. (-3) 3-ganged. Single phase except where otherwise noted. All 136-236 and 1156-1256 units have POWERKOTE coils for greater stability.

METERED KNOB ASSEMBLIES FOR BACK OF PANEL MOUNTED UNITS

Can be combined with standard cataloged POWERSTAT variable transformers that are designed or adaptable for back panel mounting. Easily adapted for retrofitting existing installations. Large functionally designed knob turns freely while meter remains stationary. Accurate voltmeter insensitive to stray magnetic fields. Consists of metered knob, mounting screws and complete wiring and installation instructions.

VS150—Where 120 volt duty is required. Has 0-150 meter scale.

VS300—Where 240 volt duty is required. Has 0-300 meter scale.

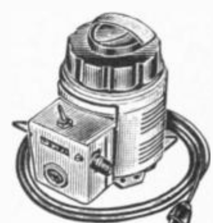
You Can Depend on NEWARK For Complete Stocks — Lowest Prices

METERED KNOB POWERSTAT® VARIABLE TRANSFORMERS



Designed for back-of-panel or general utility mounting. Excellent for use in laboratories, and inspection and test applications where voltage must be controlled without the necessity of installing a separate way of measuring voltage. Have knobs which include a stationary direct-reading voltmeter; Accuracy of ±3% of full scale. 240 volt types have 0-300 volt scales. 120 volt types have 0-150 volt scales.

Superior Transformers

POWERSTAT 400/800 HZ TRANSFORMERS

5-1262

5-1264

For high-frequency uses in air-craft, ships, missiles, and in-dustry. Single- and three-phase 400/800 hz, manual and motor-driven air-cooled 28-120-, and 480-v models in 56 VA to 7.3 KVA ratings. Operate at —55° to +40° ambient at full rated load (reducing to +80°C); al-titudes to 50,000 ft.: up to 95% rel. humidity; vibration, shock and inclination per MIL-T-17113; corrosion resistance per QQM-115-A and other military specs. Manual units knob-op-erated, but screw-driver slot method of turning optional for HS and HMQ single phase. Open construction unless specified * enclosed. † indi-cates square frame construc-tion. Specify mtg. when order-ing.

VARIABLE TRANSFORMER WITH ISOLATED SECONDARY

Powerstat type LW-136B is a double wound assembly. The one phase unit can be con-nected for either 120-volt or 240-volt, 50/60 cycle input; source of 0-30 volts isolated output; either a 120-volt or 240-volt line corrector; or either a 120-volt or 240-volt limited range "buck-boost" variable trans-former. The three-phase, three-gang unit can be connected for either 240-volt or 480-volt, 60 hz input or source of 0-60 volts isolated output; either a 240-volt or 480-volt line corrector; or either a 240-volt or 480-volt limited range "buck-boost" variable transformer. Gray enamel finish. Shpg. wt., LW136B—25 lbs. LW136B-3—77 lbs. Features POWERKOTE coils.

SUPERIOR POWERSTAT VARIABLE VOLTAGE TRANSFORMERS

Rotation of brush tap delivers a continuously-adjustable volt-age from AC power lines over range from zero to or above line voltage. Manual and motor-driven, open and enclosed air-cooled types are available for 120, 240 and 480 volt, 25, 50/60 cycle, single and three phase service in rating from 1.8 KVA to 2.1 KVA. Current rating available over entire range of output voltage. Zero waveform distortion, negligible main-tenance, gold-alloy plated commutator, excellent regulation, POWERKOTE coils. ††Uncased.

FOR 120 VOLT, 50/60 Hz SINGLE-PHASE

FLEXIFORMER PACKAGED TRANSFORMER PRIMARY

Model TP150. This transformer is a self-contained toroidal primary coil incased in durable high impact plastic; the cen-ter opening permits hand-winding the proper number of secondary turns for the desired turns ratio. The primary consists of a strip-wound silicon-steel core having a coil of 400 turns of copper wire. Input rating: 120V, 50/60 hz at 150VA. As a current transformer, maximum primary current is 400A. With 5-way binding posts for connections. Size, 6 x 5¾ x 4⅜"; shpg. wt., 6 lbs.

5F770. 1-11 NET **30.00**

12-99 NET **25.50**

Model TP1000. Similar to above, except rated 1000VA at 120V 50/60 hz. Maxi-mum input voltage: 175V, 60c; 145V, 50c.

5F645. 1-11 NET **100.00**

12-49 NET **85.00**

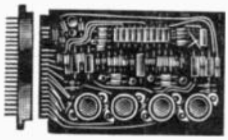
Superior Regulators & Transformers

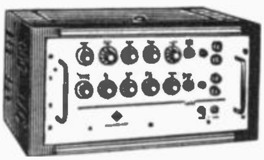
TRANSLATOR MODULES



Plug-in printed circuit board with logic capability for stepping motor in increments of 1.8°. Requires 30V, center-tapped dc supply with max. ripple of 5%. Depending on regulation of power supply, voltage may have to be varied to maintain rated voltage to motor. The units can be triggered by a 10-15 V negative change of voltage with min. pulse width of 50 msec. Input imped. 500Ω. STM1800V is similar to STM1800 but with built-in oscillator adjustable to drive motor to speeds from 4 steps/sec. up to max. motor speed. Dropping resistors are needed with all motors. Shpg. wt. 1 lb.

Stock No.	Type Number	Each
5F750	STM1800	65.00
5F751	STM1800V	75.00

SLO-SYN PRESET INDEXERS



2SP1800-4

2SP1800B-4

SLO-SYN Preset Indexers are used for controlling indexing operations in applications using bifilar SLO-SYN motors for positioning. They automatically provide correct switching sequence needed to drive motors the required number of steps and have provisions for actuating external equipment needed to perform related operations. Dials on control panel can be set to provide desired number of steps. May be operated in any ambient temp. from 0°C to +40°C. Dropping resistor required. Shpg. wt. 19 lbs. except * 63 lbs. and † 64 lbs.

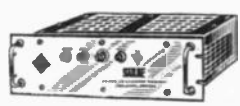
IES SERIES VOLTAGE REGULATOR



Regulates output voltage through controlled firing of inverse parallel pair of SCR's connected in the shunt leg of an autotransformer. Solid state circuitry and smaller, lighter units are featured. No vacuum tubes, motors, blowers or relays are used. Wide operating frequency range: 50 or 60 hz ±10%. Maintains output voltage within 100 millivolt rms band for any combination of input voltage and load current changes and for changes in load power factor from 1.0 to 0 lagging. Distortion will not exceed 3%. Speed of response instantaneous for most applications. Time constant response: 30 milliseconds. Operated at ambient temperatures from 0 to 50°C. Temperature coefficient: 0.01%/°C; output voltage will change 0.01% for a degree C change. Mounted in cabinet. All except Type IES9115 have cabinets which can also be rack mounted by removing the feet. Provisions for remote sensing. Also features a removable plug-in circuit board. High VA efficiency (up to 95%). Includes an overcurrent protection circuit which senses the magnitude of flowing current in SCR leg and removes gate drive from SCR's when current exceeds pre-set magnitude.

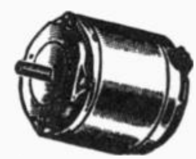
SLO-SYN SYNCHRONOUS/STEPPING MOTORS



Standard Types. Rugged bi-directional motors that can be used either as AC constant-speed motors or DC stepping motors. Rated for continuous duty at 40°C max. Types with suffix P1, P2, etc. have planetary gear speed reduction assemblies mounted on motor to lower speed and increase torque; assemblies are in dustproof enclosure, employ nylon gears. Types with RC suffix have built-in phase shift network for single-phase operation; other units operate from 2-phase current, require external RC network for 1-phase use (see below for components). Avg. shpg. wt., 6½ lbs.

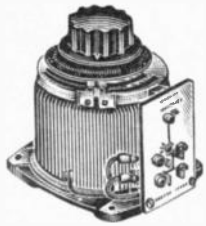
Voltage Regulation & Control Devices



G-E "VOLT-PAC" VARIABLE TRANSFORMER

Provides continuously adjustable output voltage. Handles short duration current surges up to 10 times rated current and overload current up to 2 times rated current for approximately ¼ hour without overheating. Maximum output currents applicable up to 100% voltage. Core consists of high grade strip wound silicon steel, plus moulded phenolic winding form to insulate coil from form. Types for 50-60 cycles, except (*) for 60 cycles only. Cased units with enclosed terminal boards, plug-and cord-set units, motor-operated units, multiple-core units, three-phase units, and automatic control units are available through Newark.

120V INPUT — UNCASED, SINGLE CORE

All units provide 0-140V overvoltage output except * 0-132V, † no overvoltage, 0-120V only. "Max. amps": output into constant-Z load at or below 120V; at overvoltage "rated" current should not be exceeded. Uncased, with exposed terminals.

AC VOLTAGE STABILIZERS

Static-magnetic transformer-type units provide voltage maintained within ± 1% while input fluctuates ±15%. Unfiltered output waveform is relatively flat-topped, with 15-20% harmonic content; filtered types provide near-sinusoidal output, maximum harmonic content 3%. All units are for single-phase, 60 cycle AC only; stabilized output 118V except as noted. Completely enclosed, with enclosed terminals, except units rated below 250 V-A have insulated cable leads.

Unfiltered Types. All have 118V output except * 118/236V.

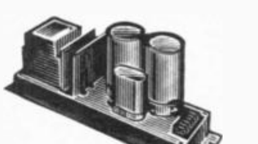
REGULATED DC POWER SUPPLIES



Furnish fixed DC output voltage within ± 1% tolerance while input AC voltage varies ± 15%. All units feature rugged magnetic and semiconductor circuitry and are designed for chassis or standard 19" rack mounting. Short-circuit current is limited to approximately twice the rated value. Can be installed with either polarity grounded. Input voltage range: 97-130VAC, 60 cps, 40°C ambient. Output ripple level 1% rms max. Efficiency 70-85% for normal output levels; efficiency may decrease for unusually low output levels.

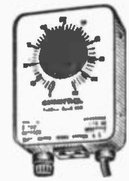
Write NEWARK For Information On The Complete Line Of GE Voltage Regulation & Control Devices.

Power Controls and Transformers

OHMITE

● *NEW* OHMITROL SOLID-STATE POWER CONTROLLERS



Power controls are adaptable to a variety of applications because the built-in trimmer sets the starting point of the control voltage anywhere between 0 and 70 volts for 1KW models; 0-200 on 2KW models. Infinitely smooth control is obtained from start to full line voltage. Two-way terminals accept quick connectors or soldering. Output is RFI filtered. Component models mount with 3/8"-32 bushing on aluminum panel for heat sink. Portable models are self-contained. Sizes: component models $1\frac{3}{4}$"sq. x 1" behind panel; portable models: $4\frac{1}{4}$L x $3\frac{1}{4}$W x $1\frac{13}{16}$D. On-Off switch at end of control knob rotation.

COMPONENT MODELS

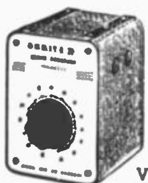
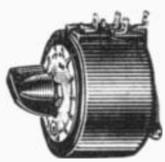
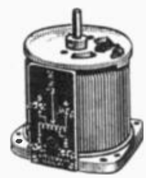
"V.T." VARIABLE TRANSFORMERS



VT02E in Case



VT1, VT02, VT3



VT8

VT4

VT20

Six sizes for a wide range of electrical ratings. Deliver full rated current at any brush setting. Have overvoltage feature, except those marked "No Overvoltage", and high-current low-voltage to meet transistorized power supplies and high current applications.
All units single phase except Two-in-Tandem. All may be used to over 400 hz. Screw terminals and solder lugs on all models except types VT1, VT02, and VT3 which have solder lugs and accept push on connectors and have 3/8-32 threaded bushings for single mount. Shafts may be extended from the brush or base side. VT20 has a collet shaft lock for repositioning without scoring shaft. Dials on overvoltage models calibrated for overvoltage and normal line connection. Knob, dial mounting hardware supplied.

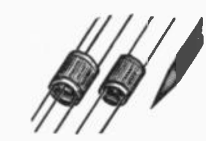
SPRAGUE

TRIGATE PULSE TRANSFORMERS
FOR LOW-COST SCR CIRCUIT APPLICATORS



For SCR triggering applications where excellent low cost performance is required. Balanced pulse characteristics and energy transfer from primary to secondary and tertiary windings. Min. saturation effect. Fast secondary and tertiary windings. Min. saturation effect. Fast pulse rise time and increased current capability to prevent SCR di/dt failure. Transformer leads polyuretiane insulated magnet wire. May be soldered directly to terminals or other circuit componenis without need for removal of wire insulation. For operation over temp. range of —10°C to +70°C.

LOW CURRENT CONTROL TRANSFORMERS

Versatile series of low current control transformers suited for pilot lamps, miniature relays, low current-low voltage power supply application. Pimaries 117 volt, 50-60 hz. Three isolated 12-volt secondaries (one with a center tap). Can be series or parallel connected.

POWER TRANSFORMERS

Shielded against magnetic and electrostatic fields by one piece drawn steel cases. Vac. impreg. coils, compound filled under heat and pressure to resist moisture. Cores are high grade, non-aging silicon steel. All transformers are guaranteed to operate at rated values with EIA heat rise standards. For operation from 110-120 volts, 50-60 cps. AC. Type PCC-250 has 2nd fil. 5 Volts/2 amp.

STEPUP-STEPDOWN AUTOTRANSFORMERS

Type PSU. Designed specifically for use with air conditioners in converting a 208 volt unit to a 230 volt line. 60 cycle operation, 208 v/230 v, 230 v/208 v. Converting from 230 volt unit to a 208 volt line is done by a simple connection inside outlet box. Unit is for air conditioners using 1 to 2 hp motors.

SUB-SUBOUNCER UNITS

Size: 43/64x3/4x7/16". Weight .02 lb. Impedance ratios are constant; these units can be used for other impedances if in same ratios. Units may be used reversed.

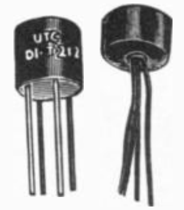
DI-T TRANSISTOR TRANSFORMERS

Meet MIL-T-27B-TF4RX



DI-T. Smaller than the DO-T Deci-Ouncers. Power ratings and other characteristics identical to DO-T's, except frequency response is approximately ±2 db, 260-20khz. Hermetically sealed; rated for Class R (105°C max. operating) temp. conditions. Size 5/16D x 1/4"H, wt. 1/15 oz.

DI-T200. As above, with uninsulated leads spaced on .1" radius for printed circuit boards. Size 5/16D x 3/8"H., wt. 1/15 oz.

"OUNCER" AUDIOS

Famous one ounce audio transformers represent the acme in compact quality transformers. High fidelity from 30-20,000 cps. Maximum output level +8 db at 6.3 mw. Application. Input and Mixing, Interstage and Output Transformers. Fully impregnated and sealed in a drawn aluminum housing. Size: 7/8" dia. x 13/16". Wt. 1 oz.

Transformers

DO-T TRANSISTOR TRANSFORMERS

Provides unprecedented power handling capacity, reliability, plus ultra small size. Hermetically sealed, metal cased to MIL-T-27B-TF4RX. Greater power rating, ±2 db, 200 cps —20KC. Low distortion. Anchored leads stand 10 lb. pull test; tinned and insulated copper conductors. For transistor use only. Size: $1\frac{3}{32}$" long; $\frac{4}{16}$" diameter. Weight $\frac{1}{10}$ oz.

PIL ULTRAMINIATURE AUDIO TRANSFORMERS & INDUCTORS

These transformers and inductors incorporate the same construction as the DO-T units. PIL units are hermetically sealed to MIL-T-27B, are metal encased. Grade 4. All units terminated in insulated, tinned solid copper leads. Split winding inductors; inductance values shown are for 0 ma dc. $\frac{23}{64}$ D. x $\frac{1}{4}$" H. Actual wt. 1/20 oz.

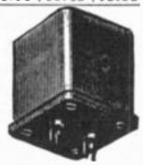
VARIABLE INDUCTORS



Variable units for use in tuned audio circuits. Adjustment of set screw on side of case permits change in inductance of +85% to —45% of mean value shown. In die-cast case. Size: 1 11/32x1 1/4x1 7/16". Current rating shown is max. MADC. Weight, 5 1/2 oz.

TVC HERMETIC VARIDUCTORS

TVC Inductors are identical to the HVC units below but provide taps at 30% and 50% of total turns. Manufactured and guaranteed to MIL-T-27B by full environmental testing. Ideal for oscillator circuits impedance matching, and phase inversion where high Q and adjustable inductance are required. Dimensions: 1 1/8 x 25/32 x 1 9/32". Approximate weight: 2 ounces.

HVC HERMETIC VARIDUCTORS

Variable inductors with higher "Q" and wider inductance ranges . . . plus hermetic sealing to MIL-T27B specs. Screw adjustment on top permits inductance changes from —70% to +200% of mean value. DC current shown is maximum recommended. All 1 1/8x25/32"x1 9/32". Weight, 2 ounces.

UTC HIGH Q TOROID INDUCTORS

The MQ series are ideal for audio, carrier and supersonic fields. Laboratory adjusted to 1% tolerance, inductance is virtually independent of frequency, temperature and vibration. Low hum pickup. Shielded case affords high permeability. Hermetically sealed to meet MIL-T-27B. Case similar to HVC above.

‡Indicates inductances expressed in mhy.

OSCILLOSCOPE TRANSFORMER

Type H-198. Highly shielded scope transformer in hermetically sealed Mil-T-27BTF4RX specs. 800. 1600 & 2400 V. plate windings (no CT) supply approx. 1000, 2000 or 3000 V. DC at 5 ma. allowing great flexibility in application. Has 1.25 V. .2A rect. fil. winding connected to one end of HV winding. Separate 6.3 V. .6A fil. winding insulated to withstand anode voltages. Pri. 115V 50/60 cycle. Case similar to SM. Size 3 1/16x2 5/8x4 1/4".

TRANSISTOR INVERTER TRANSFORMERS

Highly efficient, small size transistor inverter transformers. Hermetically sealed to MIL-T-27BTF4SX specs. Optimum results at approximately 1000 Hz. DC output shown is for 12/14 or 24/28 V battery. With 6/7 V battery, current ratings are same but output voltages are halved. Shpg. wts. H-97, 3/8 lbs.; H-98, 2/3 lbs.; H-99, 1 3/4 lbs.; H-100 2 1/2 lbs.

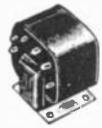
400-CYCLE FILAMENT TRANSFORMERS



Combine smallness of size and lightness of weight with the maximum possible reliability. These versatile midgets are suitable for either ground or airborne use applications. Molded specifically to meet MIL-T-27B-TF5SX specifications. Primary, 105/115 volts, 380-1000 cycles per second. Secondary, 6.3 volts, center tap.

INVERTERS DC TO AC

Converters of low voltage DC to high voltage AC or DC power. Ideally suited for powering all types of battery operated equipment. Complete instructions supplied with each transformer.

MINIATURE TRANSFORMERS

Top efficiency miniature transformers. Designed for a wide range of civilian and government applications. Used by many manufacturers of hearing aids and a variety of miniature electronic devices where maximum efficiency is necessary. Ideal for original equipment and for replacement.

TRANSISTOR BLOCKING OSCILLATOR-CONVERTERS

Designed specifically for use in single transistor blocking oscillator circuits. The DC output voltage of TR-464 is rated for a quadruple rectifier circuit and may vary some due to bias.

MILITARY STANDARD TRANSFORMERS

These transformers bear government classification and part numbers as shown below. Dimensions, mounting centers, terminal arrangements, and markings are all in accordance with government specifications. All units will meet the requirements of Grade 4 MIL-T-27B specifications for Class R operation. Input, Output, and Interstage Transformers are 300 to 10000 CPS; Maximum Altitude 50000 ft. Case style AJ.

CONVERTER-EPOXY MOLDED TOROID-DC to DC

Ideally suited for powering all kinds of battery operated equipment, these transistor power supply transformers give a wide range of voltage and power from which to choose. Complete instructions included. All case Type TM1.

TYPE HS-HSM HERMETICALLY SEALED TRANSFORMERS

HS-HSM series transformers are designed to meet MIL-T-27B requirements. Equip. using these transformers need not be re-designed to submit for MIL. approval. These transformers are permanently marked with electrical and environmental data as specified in MIL-T-27B. All are "Climatite" treated. Avg. wt. 10 oz.

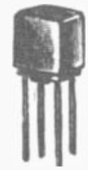
TYPE SP "RED SPEC" TRANSISTOR TRANSFORMERS

Type SP. Designed especially for use in transistorized and printed circuit applications, these units come in tough epoxy-molded cases, weigh 1/10 oz.! Incorporate .020" dia. strong nickel-alloy leads spaced on standard 1/10" grid ctrs. to fit printed circuit boards. Base dimensions: .310x.410". Lead length: ¾". Meet MIL-T-27B specs. *SP-66 is an output-isolation transformer. Shpg. wt., 1 oz.



SP-310 Magnetic Shielding Case

Type SP. All models have tough epoxy-molded case, weigh only 1/10 oz.! .02" dia. nickel-alloy leads are ¾" long, no stripping or tinning. Base size, .310 x .410"; height, .465". Operating voltage, 150 VDC. Meet MIL-T-27B spec. *Model SP-66 is an output-isolation transformer. Shpg. wt., 1 oz.

TYPE TY EPOXY MOLDED TOROIDAL TYPES

Type TY. Compact, hermetically sealed, very high efficiency. Single-hole mounting and peripheral terminals permit ready stacking for easy series—parallel connection if increased output is desired. Meet MIL-T-27B, Grade 5, Class R specs. DC Source Volts: *12.6, #28. Av. Shpg. wt., 1¼ lb.

EC AND EK SERIES TOROIDS

EC Series

EC SERIES. Powdered nickel alloy cores. Units closely approach perfect induction with high "Q", high stability with induction level and temp. High res. to shock and vibration. Coils held to 2% inductance tol. Supplied in molded epoxy to meet MIL-T-27B. Size: $1\frac{5}{16}$ dia. x $\frac{23}{32}$" ht. Shpg. wt., 1½ lbs. EK series comes with plastic coated leads. Size: $1\frac{11}{16}$D. x ⅞H.

LOW FREQUENCY TRANSFORMERS — 30 TO 500 Hertz

One half of primary balanced to other half in both inductance and "Q". Cores specially treated to eliminate noise in microvolt range of input signals.

TYPE "A" LOW LEVEL OUTPUT TRANSFORMERS

These audio components are designed to fill demands in public address, amateur, and replacement equipment, and offer absolute maximum of performance possible in the size allowed. Mtg. Centers: Type A-31X, 2"; Type A-51X, 1¾". Type A-53X, 2⅜". Type A-65J has split Secondary Winding.

PM SERIES "PICO MINIATURE" TRANSFORMERS

For use in impedance matching applications. Frequency response ±2 db 300 hz to 100 khz. PM-F types are open-frame construction with leads, resin impregnated, MIL type TF6RX; size .406 x .250 x .375", wt., .05 oz. PM-M types are epoxy molded, with gold-plated leads on .1" centers for printed circuit applications, Mil type TF5RX, size .410 x .4655 x .310", wt., .1 oz.

Collins Toroidal Coils

MOLDED PLASTIC TYPE MPF

Molded in high temperature resin. All have tinned brass terminals. Excellent Q characteristics. Normally used in the range of 1 Khz to 5 Mhz. Useful for filters. oscillators, and turned transformers. Mounts with 3-48 screw. Tapped hole. Ambient temperature range: —55°C to +105°C. Size: 0.738"H. x 0.688"L. x 0.375"W.

TYPE MPF-050 TOROIDS—FOR FREQUENCIES UP TO 30 KHZ (SUBMINIATURE)

VALUES OF INDUCTANCE IN 20% INCREMENTS ARE AVAILABLE FROM 5mh TO 3H.

MOLDED PLASTIC MP-206 TOROIDS—FOR FREQUENCIES UP TO 20 KHZ

Commonly called the Wedding Ring. Excellent Q characteristics compatible with size and weight requirements of portable and airborne equipments. Molded in hi-temp resin. Terminals are tinned brass. Mounts with 6-32 screw. Tapped hole. Ambient temp. range. —55°C. to 105°C. Normally used in the range of 1 Khz to 20 Khz. Dia.: 1$\frac{1}{16}$" ±$\frac{1}{64}$. Thickness: ½" ±$\frac{1}{64}$".

VALUES OF INDUCTANCE IN 20% INCREMENTS ARE AVAILABLE FROM 5mh TO 3h.

TYPE MIC TOROIDS

Meets MIL-T-27B Grade 4, Class R. For almost any application requiring a high Q microminiature inductor. Essentially no external magnetic field and no capacitive coupling to nearby circuitry. Automatic machine insertion. Insulation resistance is 10,000 megohms minimum at 100 v DC. 100 v RMS dielectric strength. Ambient temperature range is —55°C to +85°C. Inductance change with temperature is ±2% overrange of —20°C to ±85°C. AC and DC saturation—Ultra linear to high excitation levels.

TYPE MIH MICRO INDUCTORS

These inductors may be used in most applications requiring a high Q and miniature size. Hermetically sealed tall TO-5 type transistor case. Standard inductance values are available in 20% increments from 1μH to 1 MH for frequencies to 10 MHz.

Collins Toroidal Coils and Filters

MOLDED PLASTIC TYPE MP-254 TOROIDS—FOR FREQUENCIES UP TO 8KC

Molded Plastic Type MP-254. Features exceptional Q below 5KC. Useful for critical filters, oscillators and tuned transformers in the above range. Provides filters of sharp characteristics and highest power capabilities. Molded in hi-temp resin. Tinned brass terminals. Mounts with 8-32 screw. Tapped hole. 2" dia., 1" thk. Values of inductance in 20% increments are available from 20Mh to 36th.

MOLDED PLASTIC TYPE MP-930 TOROID—FOR FREQUENCIES UP TO 10 KHZ

Provides higher Q, power level and stability, with only slight increase in weight and volume. For use in frequency range of 500 hertz to 10kh3. Molded in hi-temp resin. Tinned brass terminals. Ambient temp. range: —55°C. to +105°C. Mounts with 6-32 screw. Tapped hole. 1$\frac{5}{16}$"D.x$\frac{7}{32}$" Thk. Values of inductance in 20% increments are available from 5mh to 17.5h.

HERMETICALLY SEALED CRYSTAL FILTERS

Fig. A

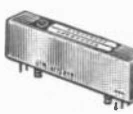

Fig. B

Fig. C

Crystal filters (Fig. A and Fig. B) are designed for use in communications and other narrow band applications. Dimensions: (Fig. A) 2$\frac{13}{16}$" long x $\frac{15}{16}$" wide x 1" high; (Fig. B) 2$\frac{23}{32}$" long x ½" wide x .758" high.

Monolithic crystal filters (Fig. C) are small, light weight and cold-welded in flat packs 1.59" long x .73" high x .36" high. They exhibit excellant aging and temperature characteristics.

HYBRID THIN FILM CIRCUITS

Microelectronic system of tantalum thin film elements and active semiconductor chip devices. Tantalum film gives stability for uses in high speed computer logic, digital frequency synthesizers, I.F. and R.F. stages and special digital and analog circuitry. Encased in 1" x 1" x .155" hermetically sealed ceramic case. Instructions furnished.

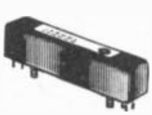
MECHANICAL FILTERS



Provide high adjacent channel separation because of steep skirted selectivity with a flat topped frequency response. Temperature range of operation —40°C to +85°C with only 2 to 10 PPM/°C frequency variation. Dimensions: FA, FC and Z types 2.5" long x .528" wide x .6" high in molded phenolic case, epoxy sealed; J types .775" diameter x 2¾" high in hermetically sealed metal case.

AEROVOX Capacitors

TYPE AFH TWIST PRONG ELECTROLYTICS

Designed for filter audio bypass applications in radio-TV and amplifier equipment. Also used in many industrial applications. Manufactured to exceed requirements of EIA Spec. RS-154. 85°C operation; high purity aluminum foil throughout; moisture-resistant seal. For use over a wide temperature range with minimum change capacitance. Positive lugs on bakelite base. Can serve as common negative terminal with twist lugs for upright mounting on metal chassis. Bakelite metal mounting washers furnished. Shpg. wt., 4 oz.

TYPE CRE ULTRA MINIATURE ELECTROLYTICS

Ultra miniature tubular aluminum cased electrolytics with tinned copper leads. Ideal for use in by-pass, filters and coupling applications. Temp range: —30°C to +85°C. All welded construction and high purity ingredients insure low leakage, long shelf life. Furnished with heat shrinkable mylar tubing. SIZE: Diameter x length.

TYPE K323Z METALLIZED POLYCARBONATE CAPACITORS

Hermetically sealed Polycarbonate film provides high capacitance stability. Self-heals in the rare case of dielectric breakdown. Operating temperature: —65°C to +125°% of full rating. Standard tolerance is 20%. Other tolerances available on special order.

For Plastic Sleeve add suffix "P" and add .82 to unit price.

AEROVOX Capacitors

TYPE QE—COMPUTER GRADE ELECTROLYTICS

High reliability, long life, 65°C operating aluminum electrolyte capacitor for energy storage use. For computers, power supplies, industrial use in control and test equipment. Manufactured under controlled conditions with highest purity ingredients.
Hermetically sealed with pressure type safety vent. Low screw inserts and heat shrinkage mylar tubing keep overall size near to can size shown. Shipping weight 5-14 oz. depending on can size.

METALLIZED MYLAR "WRAP & FILL" CAPACITORS

Type V146Z. Light weight, high insulation resistance, long stable life. For use in printed assemblies and light weight portable and airborne equipment of all types. Can be mounted in banks using a minimum amount of space. Self-healing and are of instrument quality. All leads are solder-coated copper-weld wire. Tolerance: ±10%.

TYPE V146XR AEROFILM "WRAP & FILL" MYLAR CAPACITORS

Aerovox V146XR capacitors offer high resistance to humidity and excellent stability with temperature where a metal case is not needed. Extremely small size makes these ideal for use in miniaturized circuits. Mylar wrapped, epoxy end filled.

Standard tolerance is ±10%. Power factor will not exceed 1% at 25°C. Operating temperature range of —65°C to 85°C at full voltage rating and to 125°C with derating. Extended foil construction. Leads are solder-coated Copper-Weld wire.

AEROVOX Capacitors

V161 AEROFILM TUBULAR CAPS

High quality units in Polycap (Polyester Film) casing material which have high insulation resistance, low dielectric absorption and power factor. Relatively small capacitance change over 0° to 85°C. Epoxy end fill will not flow, soften, or melt at any operating temperature. Tolerance ±20%. Operating temp. —30° to +100°C. Aver. shpg. wt., 2 oz.

TYPE P123ZN METALLIZED PAPER CAPACITORS

Hermetically sealed metal cased metallized paper capacitors. 50 VDCW units specifically designed for transistor applications and low voltage operations. Oper. temp.: —55°C to +100°C with no derating, up to 125°C derated to 75%. Standard tolerance of 50 VDCW±10%; 200, 400 & 600 VDCW, .01 and lower ±25%; .015 and up ± 20%. Other tol. and insulated sleeve available on special order.

CERAFIL CERAMIC CAPACITORS

MOLDED AXIAL LEADS

Ultraminiature ceramic capacitors. Meets MIL-C-11015C. Oper. temp. —55°C to +85°C or derate 50% to +125°C. Temp. Coeff. 100 volts applied +10 —35%. Power factor 2.5% max. Leads 1½ inch min. tinned copper. Below .01 mfd, 26 gauge .01 and above 22 gauge. Tolerance: ±20%. 100 VDCW. 300 VDCT. Aver. Shpg. wt., 4 oz.

TYPE P9SZN MICRO-MINIATURE METALLIZED PAPER CAPACITORS

Type P9SZN. Metallized paper miniature units offer small size, rugged construction and high reliability. Special construction offers strong lead connections and dipped resinous conformal coating provides good moisture barrier. Standard tolerance ±20%. Operating temperature —55°C to +125°C.

CHIP CAPACITOR ENGINEERING KIT

Model AKC800. Facilitates development of hybrid circuits. Contains 125 chip capacitors in capitance values from 1pf to 100,000 pf. Three basic temperature characteristics. The featured Ceralam cap. can be soldered or welded directly into the circuitry. Includes four types with capacitance pf @ 25 VDC listed below.

Type ULA 102. 5 Each of 1.0±.5Mmf. & 10±20%. 10 Each, ±20% at values 50, 100, 500, 1000, 2200, 5000, 10,000 **Type ULA 302.** 5 Each, ±% at values 500, 2200, 22,000. **Type ULA 502.** 5 Each, ±20% at values 1000, 2200, 10,000, 100,000. **Type ULA 702.** 5 Each, ±20% at values 5000, 50,000.
16F959. NET Each per kit **59.95**

AEROVOX Capacitors

P8292ZN METALLIZED-PAPER CAPACITORS

Impregnated metallized paper. Modified plastic tubular type Duramite end-sealed capacitors in paper cases. Operating temp. —30° C to +100° C.

TYPE P 30M BATHTUBS

High-quality bypass capacitors recommended for applications where high reliability and superior performance is required. Units are Hyvol M impregnated for operation at temperatures from —55°C to +25°C. Standard tolerances +20% - —10%. Weight, 8 oz.

Available on special order with terminals on top or bottom.

MILITARY CERAMIC DISCS PER MIL-C-11015-C

These general purpose military ceramic discs are made in accordance with MIL-C-11015-C. Rated at 530 VDCW. Units identified by letter A as fifth digit are made to operate from —55° to +85°C. Those with letter B as fifth digit operate from —55°C to +125°C. Tolerances as noted in the table below. Av. shpg. wt., 2 oz.

TYPE P09—AEROVOX HYVOLS

Immersion-proof units in sturdy rectangular metal can. High voltage screw type pillar terminals fitted with soldering lugs. Intended for heavy-duty continuous service in transmitters, amplifiers, etc. Type MB bracket is supplied unless otherwise specified except on units with base sizes 3¾x 3 3/16" and 3¾x4 9/16" where type MS bracket is supplied. MSB bracket is available for all sizes on request. Standard tolerance +20 —10%. Average weight 5 pounds.

SPRAGUE
THE MARK OF RELIABILITY

Ceramic Capacitors

HIGH-K TYPES

Designed for By-Pass and Coupling applications where additional capacitance will not affect circuit operation. Combine small electrical value with high voltage rating in smallest physical size 5HK-S15 thru 5HK-P10, 5HK-2S20 500 WVDC. All other 5HK are 1000 WVDC. Capac. Tol.: GMV. Size: ½x½x⅜₁₆".

MINIATURIZED DISC TYPES FOR TRANSISTORIZED CIRCUITRY

Tiny ceramic capacitors for by-pass and coupling application. Low self inductance and flat plate construction permits higher self-resonant frequency and high by-pass efficiency in all TV and transistorized circuitry. Good performance under severe conditions of humidity and vibration. TH dia. .335 to .905, TG dia. .275 to .655.

HYPERCON CERAMIC DISCS

Ultra-miniature ceramic discs ideal for use in transistorized circuitry. Designed for bypass and coupling applications but particularly well-suited for any low voltage use where high capacitance and low power factor are important considerations. Superior to electrolytic capacitors of similar capacitance value because of the very low power factor of Hypercon Capacitors, Capacitance Tolerance: GMV.

CERAMIC CAPACITORS

Series 5 GA. Low self-inductance of silvered flat-plate design means very high by-pass efficiency in all TV circuits. Designed for 85° C (185°F) continuous operation. Higher self-resonant frequency than tubular ceramic or molded mica capacitors. Moisture proof coating. Tol. ±20%. 1000 WVDC.

J-135 "CERAMICENTER" CERAMIC ASSORTMENT KIT

• **Handy metal drawers — Save Time and Effort**

710 capacitors of 57 different values in handy reusable "Kleer-Pak" plastic boxes. Kit includes: 290 Type 5 GA, 1000 WVDC ceramic disc capacitors in 31 different values from 5 mmf to 20,000 mmf; 145 Type 5HK "High K" bypass and coupling capacitors in 7 different values from .001 mfd. to .01 mfd. @ 1000 WVDC and .02 mfd. to .1 mfd. @ 500 WVDC; 100 Type 10 TS, 1000 WVDC temperature stable capacitors in 12 different values from 100 mmf to 20,000 mmf; and 175 Type TG, 50 WVDC disc capacitors in 7 different values from .005 to .1 mfd. Cabinet, 30¾ x5½x11¾". Ship. wt., 29 lbs.

18F2764. NET **172.50**

HIGH-VOLTAGE DOORKNOB CERAMICS

Has female threads for interchangeable screw-in terminals. Molded plastic. Guard rings lengthen surface creepage path.
Type 20DK-T5. Complete with 7 terminals. 1" dia. x 31/32".
Type 30DK-T5. Complete with 2 terminals. 1 5/16" dia. x 1¼".

Ceramic and Electrolytic Capacitors

SPRAGUE
THE MARK OF RELIABILITY

POWERLYTIC ALUMINUM ELECTROLYTICS

Type 39D. End seals are made of molded phenolic, which is an important feature in establishing long life. Designed for operation at temperatures up to 85°C. Have very low effective series resistance and leakage current.

FORMULATION C-23 MONOLYTHIC CERAMIC CAPACITORS

Monolythic ceramic capacitors for transistorized circuitry. C-23 formulation insures high K—these units provide high capacitance in small physical size. Solid homogeneous blocks are protected against moisture and mechanical damage by a resin dip. Well suited for use in all frequency ranges through 1000 mc.

HYPASS SUPPRESSION CAPACITORS

Exclusive 3-terminal Network-Feed-thru capacitors assure very effective VHF current by-passing. Bypass VHF oscillation up to 150 MC. Suppress TVI from Short-Wave Transmitters, Diathermy Machines, Electronic Heating Apparatus, etc. Eliminate interference caused by Line-conducted radiation between neighboring TV sets. Temperature operation: —40°C to +85°C. Currents up to 20 amps. (*) Have female screw terms. Bulkhead mounting. Shipping wt. 2 oz.

SUBMINIATURE—TYPE 96P—VITAMIN Q

Inserted tab construction. Glass-to-metal hermetically sealed. Operates from —55°C to +125°C. Terminals are insulated from metal case. Impregnated with vitamin Q. Tolerance of ±10%. Meets "latest" MIL-C-25 specs. Section insulated from can.

CASE SIZES FOR TYPE 96P

Miniature Capacitors

SPRAGUE THE MARK OF RELIABILITY

SPRAGUE TYPE TE LITTL-LYTICS (30D)

Ultra-small electrolytic capacitors made for transistor circuitry and other sub-min. applications. Temp. Range: —20°C to +85°C. Ultra-low leakage current. Clear Plastic Sleeves.

SPRAGUE
THE MARK OF RELIABILITY

TVA Atom Electrolytics

The only small size electrolytic especially designed for 85°C (185°F) operation on voltages to 450 working volts D.C. Unit is engineered to withstand extra high temperature, high ripple currents, plus high surge voltages. Metal case construction with outer insulating tube. Wt., 3 oz.

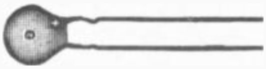
196D SOLID TANTALUM EPOXY DIPPED



Low - cost solid-electrolyte tantalum capacitors suitable for mounting printed wiring boards in transistorized commercial, and industrial electronic equipment. Furnished in sizes which permit coverage of a broad range of capitance ratings, from 0.1μF through 330μF. The standard capitance tolerance of these capacitors is ±20%. Operating temperature range —55° to +85°C low leakage current. The maximum dissipation factor is 10%. Standard capacitors are furnished with long straight leads. Leads are electro-tinned nickel for ease in soldering. Solid-electrolyte tantalum pellet construction allows plug-in mounting on printed wiring boards Highly resistant, and insulated epoxy resin coating.

36D "POWERLYTIC" ALUMINUM ELECTROLYTICS

For applications requiring maximum capacitance in a given case size. Low ESR and leakage current; extremely long shelf life. Withstands military environmental conditions including —55°C storage tests. Tol. 3-50v, +75% to —10%; 75-450v, +50% to —10%. Av. shpg. wt., 4 oz. With plastic outer tube.

SPRAGUE
THE MARK OF RELIABILITY

Type 150D and CS13 Solid Tantalums

STANDARD SERIES 150D & MILITARY TYPE CS13

Type CS13. Hermetically sealed solid tantalum capacitors to Mil-C-26655 Revision 2D. Plastic insulating sleeves. Extremely low leakage current and stability with both temperature and time. Temperature range: −80°C to +85°C; +125°C with ⅓ voltage derating. Combines true miniaturization with characteristics previously unobtainable in electrolytic capacitors. Type 150D same as above except commercial series.

TYPE 600D HIGH GRADE ALUMINUM ELECTROLYTICS — PLASTIC INSULATING SLEEVE

Offer combination of extended temperature range and high voltage rating. Withstands 2000-hour life test at either temperature, and corresponding working voltage. Features excellent capacitance stability, dissipation factor and DC leakage current after high temperature shelf testing. Closely approximate electrical requirements of MIL-C-3965 tantalum foil capac-

itors, at about half the cost. Tolerance is —10%, +75% up to 75 WVDC; —10%. +50% for 100 WVDC up. Sizes shown in chart are for bare can only: add 1/64: to dia. and 1/16" to length for insulating sleeve. Avg. shpg. wt., 3 oz.

TYPE 118P DIFILM METALIZED CAPACITORS

Unique dual dielectric rated for operation at 125°C without voltage derating. High insulation resistance and capacitance is 10 megohm-microfarads for 200 V units or 40 megohm-microfarads for 400 and 600 V units. Hermetically sealed, with glass to metal solder seal terminals. Tolerance: ±10%.

192P "PACER"—MINIATURE "FILMITE E" CAPACITORS

Nearly three times smaller than conventional paper-film tubulars. Sizes are the same as composition resistors. Entire unit insulated by heat shrinkable mylar sleeve. High insulation resistance. Operating temp. range —55°C to +85°C. Derate 50% @ 105°C. Tolerance ±10%. Average shipping wt. 2 oz.

121P METALIZED PAPER CAPACITORS

Designed to operate at 125°C without voltage derating. High insulation resistance—at 85°C minimum product of insulation resistance and capacitance is 20 megohm microfarads. Tol. ±10%. 150WVDC.

DC PAPER-OIL CAPACITORS TYPE T-SIMILIAR TO MIL CP70 STYLE

For power supply filter specifications. Solder seam styles, rectangular cased. Operating temp.; —55°C to +85°C. CDE reserves the right to supply type T with a 1/8" variation in case height from that shown in the listing. Former styles TJU, TJH, and TJL were type T with bracket attached. Equivalent obtained by ordering T with universal bracket for type TJU, spade bracket for type TJH, and footed bracket for type TJL. Order brackets separately from table below, right colum. *2 needed per unit. †CP70D1-.

TYPE DYR OIL FILLED BATHTUBS

Widely used in military, communications, and industrial electronic equipment. All types are drawn case "bathtub" configurations provided with integral drilled mounting flange. Available in F (—55°C to +85°C). All styles supplied with terminal style B, non-removable soldered lug. Single, dual and triple capacitance units available.

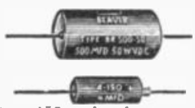
Cornell-Dubilier Capacitors

CDE

TYPE BBR AND BR "BLUE BEAVER" ELECTROLYTIC CAPACITORS



Compact aluminum cased, cardboard insulated electrolytics. Type BR section tabs and leads are rivited. Type BBR negative lead is rivited and positive lead is crimped. Voltage ratings up to and including 150 volts feature etched cathcdes.

NON-POLARIZED ELECTROLYTICS

Suitable for use when no DC polarized voltage is present. Units are physically similar to the type BR-axial lead, hermetically sealed in aluminum cases with cardboard insulating sleeves. For use in crossover networks and in boot-strap filtering applications.

Cornell-Dubilier Capacitors

COMPUTER GRADE HIGH CAPACITANCE TYPE FAH

Designed for use in computer power supplies and other applications where banks of high capacitance filters are required. Low leakage current, minimum ESR, high 120cps ripple currents, molded terminal block with safety vent seal, provided with screw terminals, plastic insulating sleeve. Dual rated as shown, minimum operating temperature —40°C.

"KR" ALUMINUM CAN CAPACITOR

Single hole inverted mounting aluminum can electrolytics. Ideal for replacement of 1" diameter wet type electrolytics in older equipment. Shipping wt., 6 oz.

NLW ELECTROLYTIC CAPACITORS

Type NLW. Rugged physical construction. Hermetically sealed aluminum foil electrolytic capacitors. Low leakage currents; freedom from shorts. Long shelf and operating life. Suitable for printed circuits. Tinned copper leads with plastic sleeves. Temperature range, —40°C to +85°. Tol. —10% to +75%.

Electrolytic Capacitors

CDE

WIDE APPLICATION RANGE TWIST-PRONG ELECTROLYTIC CAPACITORS

Wide application range Twist-Prongs provide proper replacement for any electrolytic marked with a capacitance within range on wide application label. Proper replacement instantly available. Highest purity materials.

Tolerance from nominal rated capacitance:

Rated DC Voltage	Capacitance Tolerance
3-50 volts, inclusive	—10% to +150%
51-350 volts, inclusive	—10% to +100%
351-500 volts, inclusive	—10% to +50%

TYPE WCR—POLYCARBONATE/FILM WRAP

Characteristics similar to polystyrene, but often preferred. With a high operating temperature range from —55°C to +85°C without derating, and to +125°C with 50% voltage derating, overcomes polystyrene limitation. Excellent capacitance stability. Tt 1000 Hz average capacitance change is within +1%; —3% of the +25°C value.

Cornell-Dubilier Capacitors

MYLAR DIELECTRIC FILM ENCASED

Type WMF. Encased in a Mylar film wrapping and end sealed with a high density thermosetting plastic. A desirable unit where a metal case unit is not indicated miniscule in size, has high resistance to humidity and excellent capacitance stability with temp. and life. Full rated voltage @ 85°C, 50% rated voltage @125°C. Temp. range: —55°C to +125°C. Tolerance: 10%.

DPMS DIELECTRIC SIDE-LEAD TUBULARS CAPACITORS

Type DPMS has two dielectrics—Mylar Polyester Film and a film of high grade paper. Features a "dipped" rock-hard casing which holds wire leads rigidly at fixed spacings. High humidity resistance. Crimped side leads for uniform mounting. —55°C. to +125°C. Derate working voltage 25% for +125°C operation. Full rated @ 125°C.

200 VDCW ± 10% Tol.

TYPE MFP SPACE-SAVER FLAT-OVAL POLYESTER FILM CAPACITORS

Type MFP is similar to WMF. It is designed however, with an oval figure useful in many applications requiring its space saving characteristics. In ratings of 0.01 mfd. and above, the MFP is often used as an alternative to type WMF or the mil. type CTM. The unit is highly moisture and humidity resistant. Max. operating temp. range: —55° to 125°C—85°C at full rated voltage with deratings of 10% and 50% at 100°C and 125°C respectively. Standard tolerance is ±10%, 1½" min. copperweld leads. Thickness and width tolerances are: up to and incl. .484", ±.032"; .500" to and incl. 1.000", ±.062"; larger than 1.000", ±.093".

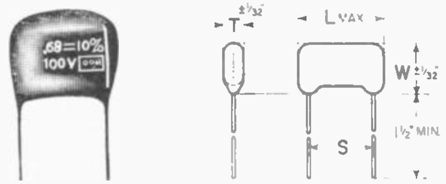
MINIATURE RADIAL-LEAD POLYESTER FILM CAPACITORS



Fix-fil-impregnated capacitor section—no impregnation leakage even at maximum operating temperatures. Uniform dip coating control assures protection of capacitor section—no possibility of shorts caused by contact of an uncoated case to chassis. Max. operating temperature is 125°C-85°C at full rated voltage. 10% derated at 100°C and 50% derated at 125°C. Leads are #22 AWG including 0.068/100V; 0.047/200V; 022/400V, and 0.068 at 600V. Above these ratings, leads are #20 AWG. Tol. ±10%. Wire lead spacing: 9/16" for 3/4" dim. L and 5/16" for 1 1/8" dim. L.

Cornell Dubilier Capacitors

CD SERIES DIPPED MICA CAPACITORS

Feature multi-coat dipped process to meet rigid humidity requirements. Conform to EIA specs. Meets requirements of MIL-C-5. Operating temperature: —55°C to +125°C. Tolerance: ±5% except (*) ±10%. Operating potential 500 WVDC. For MIL equivalent part number, substitute "CM" designation for "CD" as follows: CD10—CM04; CD15—CM05; CD19—CM06; CD30—CM07; CD24—CM08.

CORNELL-DUBILIER

MINIATURE DIPPED MICA-DIELECTRIC CAPACITORS

CD6 CD7

Types CD6 and CD7 are microminiature, radial lead, dipped silvered mica capacitors. Operate within temperature range —55°C to +125°C. Excellent for applications not critical with regard to extreme conditions of humidity. Have phenolic coating with epoxy impregnation; affords protection for one cycle of the moisture resistance test of EIA Specification RS153. Other wise meets MIL-C-5B. Capacitance tolerance: ±10% (K), ±5% (J), ±2% (G), ±1pf (C).

DIMENSIONS

CD6 — .265" x .135" x .095" CD7 — .330" x .310" x .175"

PLASTIC CAPACITORS, INC.

TYPE AM METAL CLAD MINIATURE CAPACITORS

Type AM metal clad miniature capacitors utilize metalized mylar film as the solid dielectric and are hermetically sealed. High performance exceeding the most rigid tests for humidity and temperature. Windings are extended foil (non-inductive) construction. The capacitors are self healing and non-sparking. Tolerance is 20%. Sizes shown are for diameter and length. Power factor is less than 1% at 25°C.

TYPE "OF" HIGH V. GLASS CAPACITORS

Plastic film dielectric. Useful for high voltage power filter. Mount in any position. Temperature range —55°C. to +85°C. Tolerance ±10%. 3/8x8-32 screw terminals except * marked have tinned copper pigtails. Heavy wall, hard glass case.

Capacitors

SUBMINIATURE MONOBLOC CERAMIC CAPACITORS

Type 8003

Monobloc construction allows volumetric efficiency up to 20mf/cu. in. Tolerance within ±10% for capacitance from 10 pf to 100 pf when measured at 1mc with .5 to 1 VRMS across the capacitor including COG dielectric. For values greater than 100pf tolerance is within ±10% —when measured at 1kc with .5 to 1 VRMS across the capacitor. Maximum capacitance change ±15% of the 25°C value over temp. range —55°C to 125°C. Size: .260 max. lead length 1.5 min. Leads 22AWG sodder coated copper.

12-VOLT TRANSCAPS

Use in transistorized, filtering and by-pass applications. .156" thick. All char. Y5F. PF max. is 8%. IR(min)ohms, is 1,000,000 for 5655 and 5615. Life, at 85°C. and rated voltage, is 500 hours. All are rated at ±20% tol. Shpg. wt., 1 oz.

Lead spacing .250 except type 5615, 5645 and 5685 which are .325

MIL C-20-D TUBULARS

Ideally suited for applications where temperature coefficient is not important. Ceramicons meet performance specifications of EIA Standard RS109 for class 1; temp. comp. class 2 HI-K.

TYPE 390-000 SUB-MINIATURE MOLDED CAPACITORS

Meets military specifications MIL-C-11015 with a cap. range up to 330 pf ±10%, 20%; 390-680 pf ±20%+100-0% (GMV); 820 and above +100-0% (GMV). Working voltage of 100 volts DC at 85°C, or 50 volts at 125°C. Constructed of high quality molded plastic to assure resistance against moisture and humidity. Dia., —.100; L—.260 Lead L—1.50 min. #22 AWG (.025) tinned copper leads.

BUTTON MICA CAPACITORS

Designed for use where compact size, minimum series inductance, and high leakage resistance are essential. Temp range: —55°C to 125°C. Tol: 10% except (*) 5%.

CERAMIC TRIMMER TYPE 503

Provides maximum stability and ease of adjustment. Capacity change constant per degree of rotation. Silver electrodes are fired onto ceramic rotor and base, 500 wkg. volts DC. 503-000: .843"-656". 503-001: .859x281. (*Indicates bent leads.)

Ceramic Trimmers

SUBMINIATURE CERAMIC TRIMMERS

The sub-miniature 518 occupies less than .007 cu. inches of space. Unique base design permits rigid mounting in both printed circuit and point to point wiring applications. Capacity range, 5-25pF. Operating temp. range, —55°C to 125°C. WVDC, 100 to 85°C and 50 to 125°C. Torque, .5-3 oz. in.

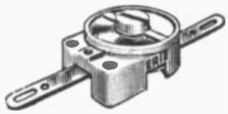
MINIATURE CERAMIC TRIMMER



TYPE 539. Miniaturized for maximum density. Designed for point-to-point wiring and printed circuit. Secure mount assured by 0.068" diameter mounting holes that accept #0 screws. A conservative rating from —55°C to +125°C insures inherent reliability. Intimately bonded silver electrode.

Type 557

Type 3192

PHENOLIC BASE — TYPE 557

Features .500" dia. ceramic rotor, lapped and silvered on the underside, and a silvered ceramic dielectric stator disc wits lapped bearing surface.

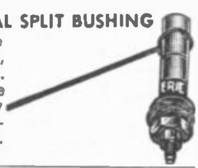
GLASS TRIMMER CAPACITOR — EXTERNAL SPLIT BUSHING



For applications allowing extension of the adjustment screw. Suited for high volume, economic usage in electronic equipment. Linear, non-reversing capacitance change with rotation. Maintains proper screw torque under varying conditions of vibration and shock. Insl. Res: 10^{12} ohms mm. at 25°C. Op. Temp.: —55°C to 125°C.

AIR DIELECTRIC PRECISION TRIMMERS

Series 540. Rotor and stator plates are solid brass. Insulation resistance 50K Megohms. Working Voltage, 375 DC. Op. temp.,—55C to 125C. Initial Q, 1500 Min. Min. torque, 4-10 oz. Trimmers utilize steatite base.

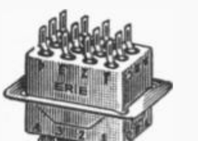
MINIATURE R.F.I. FILTERS—MINIATURE 6 & 12 CHANNEL R.F.I. FILTERS



Minimum attenuation: 45 db from 100-200 Mc, 50 db from 200 Mc to 2000 Mc, over the temp. range of —55°C to +125°C measured in accordance with Mil-Std.-220A. Capacitance: 2500 pf min. at 1 Kc, 0.5 to 5 Vrms, 25°C. Working voltage: 350 VDC. Insulation resistance: 20K megohms min. at 100 VDC, 25°C (50 ma max. charging current). D.C. resistance: .01 ohms per section. D.C. and Low Frequency current: 5 amps max. per section.

Type 1212 is 12 channel—**Type 1206** is 6 channel. **Size:** 502 and 501—1.125 x .594". 552 and 554—.75 x .437".

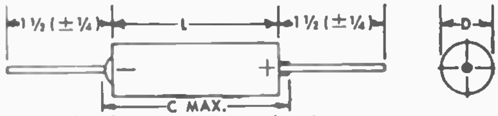
Texas Instruments Solid Tantalum Capacitors



No. 22 (0.025 +0.005 / −0.0011) No. 24 (0.020 +0.005 / −0.001)
AWG SOLDERABLE LEADS

Type SCM. A capacitor of completely dry construction (no liquid or paste is used), offering the chemical stability of tantalum and its oxides. All available from Newark stock with Mylar insulating sleeves.

JFD Trimmers

JFD precision bore solid dielectric Piston Trimmer. Capacitors with special anti-corrosion metalizing. Meets or exceeds MIL-C-14409B. Glass operate from —55°C to 125°C; quartz from —55°C to 150°C. Features: 6 patented precision anti-backlash drive mechanisms; Hi-Life standard panel mount; MCD; Miniature Telescoping sliding piston and direct transverse. Five dielectric materials and matched metalized for homogenous bond of metalizing to dielectric. Low T.C., low loss of inductance. All have highest level shock and vibration resistance. Green Glass "N" prefix units with higher 0 increase delta C's 30% over other comparably sized units, and have Hi-Life "Y" mechanism. Low cost "Y" suffix units combine Hi-Life adjustment mechanism with standard glass dielectric are physically interchangeable with corresponding standard units. JFD trimmers have been exclusively selected for the Apollo, Gemini, and Minuteman programs.

MINIATURE SERIES

JFD Miniature Trimmer Series features exclusive telescoping tuning assembly for miniaturization. Up to 50% savings in length for a given capacitance range. Mechanical stops at both ends of adjustment. NVC and VC glass dielectric 1/4 dia. NMQ quartz dielectic 1/4" dia. "Y" series directly interchangeable with standard VC units, and NMQ units with standard MQ units with added feature of longer life and lower cost. Uses 7104-5 tool.

STANDARD PANEL MOUNT SERIES

JFD Precision capacitor for all panel mtg. purposes. Available in glass, quartz, and new green glass "N" prefix with long life adjustment. VC99 is designed for hi voltage and power applications. Has closed end to prevent arcing. Rated at 5000 WV, DC. Test 5 KVDC. All units 1/4"—Quartz 5/16" dia. * glass. ** green glass. † quartz.

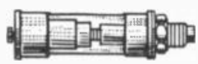
MAX-C SEALED CAP CAPACITORS



Max-C embedded electrode technique gives 3 times more capacity than standard metalizing in standard glass. Sealed cap. construction. "Y" series reduces Max-C, has added advantage of Hi-Life mechanism and is directly interchangeable with std. MC units. "N" series has 30% greater delta C and Hi-life mechanism.

TYPE SC SEALCAPS

Ideal for space applications SC-SCY (glass) QS-NQS (quartz) NSC (Green Glass) miniature or new Hi-Life design. Available in panel mounted or printed circuit mounting. Hi-Life adjustment mechanism has exclusive anti-backlash features and a 500 cycle adjustment life, exceeding Mil-C-14409B by 600%.
"Y" series SC dielectric interchangeable with standard with the added feature (Hi-Life mechanism).
NSC has approximately 30% greater delta C than standard, superior Q and long life adjustment mechanism.

LOW COST DIRECT TRAVERSE TRIMMERS

Direct Traverse Trimmers by JFD are designed for use in high quality commercial or instrument applications and communications equipment. Uses direct traverse mechanism with expanding self-aligning spring-clip piston. Also features standard panel mount drive mechanism. With glass or ceramic dielectric.

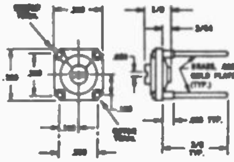
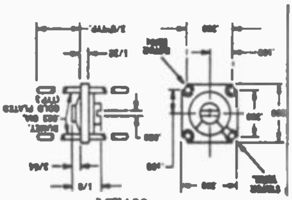
● NEW MODUTRIM CERAMIC VARIABLE CAPACITORS

500 Series



MT300



MT400

Microminiature. Offer a choice of wide ΔCs in exeremely small and stable units. Unique rotor design utilizes proprietary ceramic material in a monolithic structure. MT400 (with 4 feed-through leads, 2 dummy leads) for cordwood and channel-mount applications. MT300, with 4 "legged" configuration, 2 dummy terminals, is for printed, microminiature, module circuits MT500 designed to fit .100 grid spaced PC boards at lower cost than comparable units. Operating range: —55°C to +85°C. Weight: .026 oz.

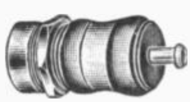
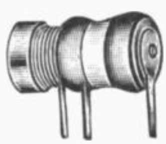
VAM AIR VARIABLE MINIATURE CAPACITORS



VAM010

VAM010M



VAM010W

For high frequency applications demanding stability, small size and high Q (more than 2000 at 10 pf, 100 MHz). VAM010 is a panel mount w/turret term. VAM010M, a panel mount w/lug term. VAM010W, printed circuit. Plates are silver and gold plated. Terminals, leads are brass w/gold plating. Has ceramic insulator and positive stop 250WVDC.

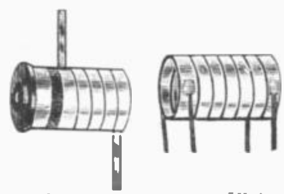
FIXED METALLIZED INDUCTORS



Precision metallized miniature inductors feature large space economy, fast assembly and reduced weight. The inductor employs a silver film bonded to the glass dielectric. This construction results in a low temperature coefficient of inductance and low distributed capacitance. All leads are made of plated copper. High Q over a broad frequency range. All inductors are available in panel or printed circuit types. Temperature: —55°C to +125°C (*)—Q measured at 75.0 MC. (**)—Q measured at 25 MC.

CORNING Capacitors

MIL-C-11272B CYFM GLASS CAPACITORS

Completely frozen in glass with a true glass to metal seal at the 106A) conditions for over 1200 hrs. immersed in boiling salt water for 450 hrs. and saturated in steam at 15 lbs. gage press., for 150 hrs. without altering their performance. Highly resistant to nuclear radiation. Exposures to radiation levels of 10¹⁸ NVT result no significant changes in properties. VDCW is 300v & 500v from —55° to +125°C. Std. Tol. is ±5% or +0.25uuf whichever is greater.

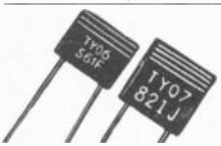
TYO CAPACITORS



For printed circuit or point to point wiring. Permits upright or flush mounting on circuit boards. Has 1¼" gold-plated Dumet leads. Proven glass dielectric and foil are fused together to form single monolithic capacitive element to achieve unexcelled electrical and dimensional stability. These capacitors meet the environmental and electrical requirement of MIL-C-11272B. Range: at 25°C IR is greater than 100,000 megohms. Voltage rating is 300 WVDC from —55°C to +125°C.

DP TUBULARS

Mylar paper dielectric non-inductively wound and vacuum dipped to obtain solid impregnation and rugged moisture-resistant coat. Leads are radial and crimped to facilitate use in printed circuits. Full rated voltage: 125°C. Leads are tinned copper #20 gauge and are 1⅝" min. below the crimp. Tol. is ±10%.

DUR-MICA CAPACITORS

The Dur-Mica is a silvered mica capacitor with a plastic coating. It combines excellence in stability, dielectric strength, "Q", dielectric constant, chemical inertness, moisture resistance and puncture resistance. Operating temperature range —55°C to 150°C. Standard tolerance ±5% except (*) Min. tolerance ±1.0 Pf. DM5 capacitors are stamped with capacitance values in pf. followed by a letter signifying capacitance tolerance. (J) means ±5%, while (A) signifies ±1% pf. All ELMENCO dipped mica capacitors meet or exceed requirements set forth in MIL-C-5C specifications. Portions of the ELMENCO DM series are the specific values and case sizes tabulated in the MIL-C-5/18 detail specifications.

TYPE CM-15 MINIATURE SILVER MICAS

Smallest molded silver micas made. In low-loss phenolic cases, 9/32 by ½ by 3/16 in. Standard tolerance ±5%; tolerances of ±2% and ±1% available on special order. All are 500 volts DC working. *Closest tolerance ±.5 mmf. Wt., 1 oz.

ARCO DUR-MICA KITS

Individual clear plastic boxes, labeled for easy handling.
Type CM-15. Kit # 1. Contains one each of 46 capacitors. Values: 1 mmf.—510 mmf. Shpg. wt. 1¼ lbs.
14F830. NET **48.00**

Type DM-15. Kit # 10. Five each of 51 capacitors. Values: 1 mmf.—820 mmf. Tol. ±5%. Shpg. wt., 1½ lbs.
14F840. NET **61.20**

MALLORY Tantalum Capacitors

TYPE CSR SOLID ELECTROLYTE TANTALUM CAPACITORS

New solid electrolyte tantalum capacitors meet or exceed established reliability requirements of MIL-C-39003A for 2% (L) and 1% (M) failure rate levels. Rigid MIL specifications. Have hermetically sealed metal cases with insulating sleeves. WVDC is at +85°C. ±10% Tolerance. Av. shpg. wt. 2 oz.

Case Code	Dia. x Len.
A	.135 x .286"
B	.185 x .474"
C	.289 x .686"
D	.351 x .786"

Tantalum Capacitors

MALLORY

TAC TYPE

Mallory TAC solid electrolytic tantlum capacitors are miniature types designed for high density applications. Precision molded in cases .105" x .290" long with #24 (.020") wire leads 1½" ±¼" long.

WET-SLUG TANTALUM CAPACITORS

Type TAP. Tantalum Capacitors possess extremely long operational life. Operating temp. —55° to +85°C. DC leakage is less than 1 microamp after 10 min. of rated voltage. Employs intered anode wet-slug construction and are furnished in metal cases with precision formed epoxy end seals. Tol., —15% to +75% Axial leads 1½" tinned for easy soldering.

HC CAPACITORS

Plastic case electrolytics for high-capacity, low-voltage applications such as dry disc rectifier filters, movie equipment, etc. All are polarized. Two screw terminals. 10 oz.

MALLORY Electrolytic Capacitors

FP AND WP CAPACITORS

Vertical mounting dry electrolytics for all filter and audio by-pass circuits, and TV applications. All types include deep etched anodes and etched cathodes. All hermetically sealed in aluminum cases. Can is negative; separate positive terminals provided for each section. With mounting washers. Shipping weight, 6 oz.

METAL TUBULAR DRY ELECTROLYTIC CAPACITORS

TC Electrolytic with Mylar Sleeve. Single section capacitor with clear mylar insulating sleeve. Sizes shown are for base can, without sleeve. More capacitance and voltage in a smaller sized can. Tol. —10%+100%. Temp. rating; up to 85 C. (*) Includes mounting strap. 4 oz.

Temp. Range

1. —40 C to +85 C
2. —30 C to +85 C
3. —20 C to +65 C
4. —55 C to +85 C

MOLDED ALUMINUM ELECTROLYTICS

Molded polypropelene cases provides exce
tion as well as positive electrotyte seal.
MTV has two #20 AWG leads 1/2" long
Both types rated for operation from —30°
—10%+100%. DCL: less than .03 ua/ mf–

MALLORY Capacitors

COMPUTER GRADE ELECTROLYTIC CAPACITORS

- Pressure sensitive safety vent construction.
- May be operated —20° to +85°C.

Computer grade capacitors; may be operated —40°C to +85°C. Max. DC leakage current is .0- square root of CV, where C=measured capacity, V=rated DC voltage. Dissipation factor =ESR/Xc. Tolerance: —10, +75% for 0-150 volt units; —10, +50% for 151-450 volt units. Supplied with Mylar insulating sleeve and 7/32" long post terminals with #10-32 screws. Sizes do not include terminals or sleeve; Lug terminals, special capacitances, working voltages, and sizes available on special order.

PVC MYLAR CAPACITORS

Constructed of aluminum foil and 100% DuPont Mylar. Has radial leads for adaptability to printed circuit applications. Leads can be bent in any manner to accommodate mounting without danger of cracking. Unaffected by soldering iron heat. Can be operated at 105°C and at two times rated voltage with no performance derating. Exceptionally low capacitance drift characteristics. Temp. range: —40°C to +105°C. Tolerance ±10%. Shpg. wt., 2 oz.

CENTRALAB

CERAMIC CAPACITOR KIT

MODEL DDK-200 KIT. Contains a carefully balanced inventory of 200 disc capacitors required most in replacement applications. All are 1000 WVDC except (*) 600 WVDC. Value desired can easily be located and removed from labeled, reusable clear plastic packages. Housed in one drawer, heavy gauge steel 6x4x11" cabinet finished with durable blue enamel.

3000-6000 V HI-VO DISC CAPACITORS

Highly efficient for by-pass-coupling in high frequency circuits under conditions of extreme humidity or temperature. Maintain performance at temperatures up to 85° C. Tested at twice rated working voltage before shipment. Leads #22 tinned copper wire 1½" min. length. Insul.: Double coating phenolic resin "DUREZ" and high temp. vacuum wax impregnation. Tol. ±20%. Volt. DD30 series, 3000 VDCW, 6000 VDC test; DD60 series, 6000 VDCW, 12,000 test. Sizes: (A) .290" dia.; (B) .385" dia.; (C) .590" dia.; (E) .840" dia.; (F) .969" dia.; (G) 1.0" dia.

CENTRALAB TYPE DD DISC CERAMIC CAPACITORS

Primarily intended for by-pass coupling or filter service where high capacity is necessary and controlled stability is secondary. Disc ceramic capacitors have a higher dielectric constant, greater voltages, and higher capacities in less space than paper or mica types. Construction enables these units to operate for long periods of time under extreme moisture, temperature, and vibration. 1000 volts DC working except #, which are 600 volts DC working. Tol. ±10% except * ±20%, † ±.5 mmf, ‡ GMV; ** +80—20% (A) ¼x5⁄32"; (B) ⅜x4⁄32"; (C) 9⁄16x5⁄32"; (D) 11⁄16x5⁄32"; (F) ⅞x5⁄32"; (G) 23⁄32x15⁄64";

CENTRALAB

POLYSTYRENE CAPACITORS

Sealed polystyrene foil-capacitors, ideal for applications in TV and radio where they can be used as direct replacements for micas and mylars. Voltage rating 500 VDCW; 1500 VDC test. Tolerance ±5%. 20-470pF: .434" L., .165" to .217" Diam.; 510-3000pF: .631" L., .250" to .346" Diam.; 3300-10000pF: .827" L., .335" to .504" Diam.

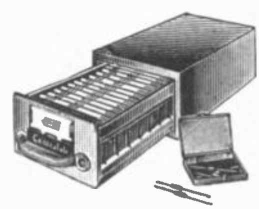
POLYSTYRENE CAPACITOR KIT

Model CPK-150 Kit. Contains 150 sealed polystyrene foil capacitors, rated at 500VDCW and with a ±5% tolerance. Included are 17 selected values in a range from 22 pF to 10,000 pF. There are 5 to 20 pieces per value, based on estimated frequency of use. The polystyrene film dielectric of these units permits use in place of mica, Mylar, paper, and ceramic capacitors. They not only substitute for the above types of capacitors but generally outperform them. Capacitance drift: .05% max. @ +25°C. Insulation resistance is 100,000 megohms. "Q" factor is over 2,000 at 1 mc, +25°C, operating temp. range is from —40° to +85°C.

The assortment in this kit is packaged in a 1-drawer Equipto cabinet finished in blue baked enamel. Contents are fully labeled.

19F2404. NET **25.55**



TYPE CK—50 VDCW

Type CK capacitors are designed for high capacity low voltage demands of transistor circuitry. Proven for use in transistor radios. Working voltage: 50 VDC. Leakage resistance initial: over 7500 megohms. Leakage resistance after humidity: over 1000 megohms. Leads: #22 tinned copper, 1½" minimum length. Max. thickness .235". Power factor: 2% max. at 1 KC. Insulation: Phenolic vacuum wax impregnated. Tolerance: all +80 —20%. Max. pregnated. Tolerance: all +80 —20%. Operating range: —55° to +85°C.

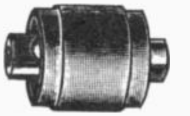
Centralab Capacitors

CENTRALAB

TRANSMITTING CAPACITORS TYPE 857



7.5 KV and 15KV axial screw terminals that are fully threaded to 1/4" with 10-32 thread. All 15,000 volts DC, except *, which work at 7,500 volts DC. Negative 750 temperature coefficients, except †, which are NPO zero temperature coefficients. The tolerance is ±10%. Size: 19/32" diameter by 1 7/64" long.

HY-CAP

The HY-CAP is a high capacity ceramic capacitor. For design application in coupling, by-pass, and filter circuits where temperature stability and high capacitance are mandatory. Capacitance range is .01 mfd. to 2.5 mfd. Less than ±15% capacitance change from —55°C to +125°C. Working voltage is 100 Volts D.C. with no derating to 125°C. Life test is 1000 hours at 125° under twice rated voltage. Tol: ±20%. This ceramic capacitor meets the requirements of MIL-C-11015.

HIGH STABILITY CERAMIC MOLDED & CHIP CAPACITORS

NYT-CAP. This ceramic capacitor has ultra-high stability. Capacitance range is 4.7pf. to 4700pf. Working voltage is 200 Volts D.C. Miniature molded epoxy case suitable for high component density applications. For use in oscillators, filters, and other critical circuitry. Tolerance ±10%.

NYT-CHIP. Provides in slug form all of the high stability and low loss features of the epoxy molded NYT-CAP. Compatible with integrated circuitry, thick and thin film circuitry, and printed circuitry. Capacitance range: 4.7pf. to 4700pf. Tolerance: ±10% standard. 200 VDC rating. With wrap-around terminals.

OHMITE Adjustable Dividohms

"Dividohm" Vitreous Enameled Resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Handy for obtaining odd resistance values, for adjusting circuits and for use on equipment which must be set to meet various line voltages. Tolerance: 10%. Avg. Shipping wt. 12-50 Watts, 4.0 oz.; 100-225 Watts, 1 lb.

TYPE 200 "BROWN DEVIL" RESISTORS

High quality, compact wire-wound resistors for voltage-dropping, bias units, bleeders, etc. Extra-sturdy all-ceramic vitreous enameled. Protected against shock, vibration, heat and humidity. Have standard resistance tolerance of ±5%. 8-watt units have 1x5/16" cores: 12-watt units, 1¾x5/16" cores; 20-watt units, 2x7/16" cores. All have 1½" leads. Average shipping weight, 3 ounces.

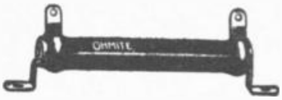
OHMITE Fixed Resistors



Lug type, wire-wound with vitreous enamel. Wire of the finest alloy and largest possible size is used for each resistance. The original uniform close spacing of the turns is maintained by the anchoring effect of the vitreous enamel. The wire is securely welded to the terminal lugs. Tolerance: 5%. Shpg. wt.: 10-50 watts, 4.0 oz.; 100-225 watts, 1 lb.
