## FOREWORD

RADIO'S MASTER is compiled with the approval of and in cooperation with the ASSOCIATION of ELECTRONIC PARTS \& EQUIPMENT MANUFACTURERS and the SALES MANAGERS CLUB, EASTERN DIVISION. It is the official buying guide and reference book of radio parts and electronic equipment for the industry. The distribution of this buying guide is not a representation by the person or firm distributing the same that all of the lines and all of the products contained herein are necessarily carried by such person or firm.

Every precaution is taken to insure accuracy in the preparation of display pages and indexes, but the publishers cannot guarantee against the possibility of error or omission, nor can they be held responsible for price changes or withdrawal of items during or after publication.

Enrolled manufacturers reserve the right to make mechanical changes in specifications necessitated by emergencies over which they have no control, and to change prices or withdraw items without notice.

List prices are furnished only for information-they are not offered as quotations.

## IMPORTANT

When ordering from this book please mention RADIO'S MASTER, 14th EDITION, also page number on which the item appears and specific catalog or code number, if any. This will help to expedite the filling of your order and lessen the chance of error.

## SYLVANIA PANEL LAMPS— Radio Tube Division, Emporium, Pa.

Especially designed for radio dials, tuning meters, flash-tuning arrangements, flashlights, auto panels, pin ball machines.
*Types $S 47$ and $S 49$ are interchangeable with
Types S40A and S49A in any other brand.

RAYTHEON REFLEX KLYSTRONS

# RATTHEON SUBMINLATURE <br> ELECTRONIGANDERADIOUTUBES TUBES 

Here they are-and here's why more Raytheon Subminiature Tubes are on the job than all other makes combined-five million of them for commercial applications.

## 1. REDUCED PRODUCT SIZE . . .

 INCREASED PRODUCT SALABILITY.Raythoon filamentary Subminiatures are flat. Batteries can be little irsteaci of big because of extremely low filament drain.

## 2. PLUG INTO STANDARD SOCKETS.

All Raytheon Subminiatures can either be soldered in ar plugged into sockets available from a number of manufacturers.

## 3. AS RELIABLE AS A FINE WATCH

The result af Raytheon's Unique precision assembly methods backed by eight years' cantinuaus productian of long-life Subminiature Tubes.
4. READILY AVAILABLE FROM STOCK.

Over half a millian af the Tubos described below are on tap at all times. They are standard thraughout the world.

## 5. AT YOUR LOCAL DISTRIBUTOR.

Over three hundred Raytheon Special Purpose Tube Distributors stand ready to serve you quickly and intelligently.

The Oldest Name in Electronic Tubes
EFFECTIVE JUNE 1, 1949

Cathode-Ray, Industrial, Special Purpose, Transnission, Plıoto-Electric, X-Ray, Lowwattage Rectifier, Welding, Grid-controlled Rectifier Tube prices and discounts on request. all prices are subject to change or fithdrallal ffithout notice.

## RECEIVING TUBES

PRICE LIST Effective March 1, 1949*

NATIONAL UNION RADIO CORPORATION

Tubes here listed represent the faster moving types and are maintained for prompt delivery. This list is continually being supplemented and inquiries are therefore invited on any types not shown.

Iax. C.C.S. ratings in Class C oscillator service

* Two filament strands in series with large post at neutral junction; operate in series at 22 volts or two phase with 11 volts per strand.
* $\star$ This rating applies only with forced air cooling.
- Per unit, heater can be arranged to operate from either a 6.3 or 12.6 volt supply
$\ddagger$ Six filament strands connected from each post to floating neutral. See individual data sheets for connections.
$\dagger$ Three filament terminals $Y$-connected in 3 phase
- Three filament terminals Y-connectell in 3 phase with neutral center terminal.
\#or R Inticates forced inr-cooled raliator.

# RAULAND PICTURE TUBES 

## PROVEN DEPENDABILITY - SUPERIOR PERFORMANCE

Rauland, a pioneer name in television, identifies a top source of supply for better television picture tubes. The incomparable aluminized "brighter picture" (another Rauland "first") and metal-glass direct view tubes embody the latest advanced engineering practices . . . achieving "Perfection through Research."

## 10FP4

Direct view picture tube incorporating new "bright light" aluminized reflectar screen. Pravides up to $80 \%$ brighter picture when used as replacement for 10BP4. No ian magnet required or circuit changes necessary.

## 1 2KP4

Similar to 10FP4 except $12 \frac{1}{2 \prime \prime}$ diameter. Incorporates aluminized reflectar screen. Direct replacement for 12LP4. No ion magnet used or circuit changes necessary.

## 1 2UP4

$12^{\prime \prime}$ metal-glass type used as standard equipment in many receivers. Available with conventional screen ar new "Luxide Screen" for improved contrast ratio and definition.

## 16 AP4 \& 16EP4

$16^{\prime \prime}$ metal-glass tubes used in many direct view receivers. 16AP4 has deflection angle of, $53^{\circ}$, overall length $221 / 4^{\prime \prime}-16 E P 4$ overall length $195 / 8^{\prime \prime}$, deflection angle $60^{\circ}$. Both types available with new "Luxide Screen" for improved contrast ratio and definition.

## COMPLETE DESIGN SPECIFICATIONS AVAILABLE

Rauland engineers are ready at all times to consult with you on technical problems regarding application of picture tubes for replacements or for new receivers. Word from you will bring immediate and helpful response. Design data on all television picture tubes manufactured by Rauland is available upon request.

The Luxide Screen is another first by Rauland. Luxide provides greatly increased contrast ratio and improved definition over conventional screen direct view tubes. With the Luxide Screen, the ambient light traveling to the screen is reduced by the absorption percentage of the Luxide Screen and the reduced ambient light reflected back to the viewer from the screen is reduced by the same percentage as it passes through the screen a second time. Contrast ratio is improved over $50 \%$ by reason of the cancellation effect. The Luxide Screen also contributes to absence of halation and improved definition.

Luxide Screens Available on 12LP4-12UP4-16AP4-16EP4.

# CETRON ELECTRONIC TUBES © 

## Engineered and Manufactured by Continental Electric Co. CETRON PHOTOTUBES

CETRON phototubes are either of the gas-tilled or of the viacuum type. With the gas-filled type, greater effective response is olatained, particularly in low impedance circuits, while the vacuum type is recommended where maximum stability is desired

CETRON phototubes are selected as to their semsitivity and priced accordingly. Phototubes of the Super Class A/B are generally used for experimental purpose where very high sensitivities are required; Class $C$ nostly for motion picture equipment; Class $D$ for relay work, etc.

## CETRON BLUE SENSITIVE TUBES

CETRON blue sensitive tubes comprise the most complete line of phototules designed for sound reproduction work from dye recorded filn
Continental Electric also manufactures a complete linte of special purpose phototubes such as: CEF-5, CE-7, OE-8, CE-10. CE-15, CE-18, Cl-20, Cle-26, etc. We will he happy to work with you on design and development problems. Full data, prices, etc., will be fortheoming иию request.

## GAS-FILLED PHOTOTUBES

The rated sensitivity for Super Class $A / B$ is 200 microanperes per lumen and up (average 300 ); Class C, $125-200$ microamperes per bumen (average 160 ); Ciass $D, 75-125$ micromperes jer lumen (average 100 ). These sensitivities are measured at recommended operation and test voltage as specified in our technieal chart

## VACUUM PHOTOTUBES

The rated sensitivity for Super Class $A / B$ is 30 microamperes per lumen and more (average 35); Class C, $22-30$ microamperes per lumen (average 25); and Class $0,12.22$ microamperes per lumen (average 16) ; all are measured at 250 Volts.

Engineering bulletins giving detailed specifications on all tubes listed here are available and may be had upon request. The extensive engineering and manufacturing facilities which we have, make possible the development and production of many types of special tubes. If you have a problem involving the use of any CETRON tubes you are invited to consult with us. We are also prepared to make special tubes to your specifications.

## WARRANTY

We guarantee all products manufactured by us to be free from all material and manufacturing defects and to give satisfactory service when operated in accordance witl instructions indicated for their use.

Continental Electric Co.

A-287 F or $W$ AMPLIFIER

Altec Lansing A-127 and A-256-A amplifiers have been designed for the most exacting applications.
These amplifiers will deliver Power within 1 db of rating from 40 to 10,000 cycles with not more than $8 \%$ intermodulation distortion when operated 3 db helow ratins their frequency response is uniform from 20 to 20,000 cycles. Thus they are particularly suited to broadcast or recording applications, where preemphasis or other equalization is used.

Input transformers have 90 db of magnetic shielding to allow operation in high magnetic fields. All components are conservatively used for long dependable service.

These amplifiers, finished in blue-gray baked enamel, are assembled

A-256A AMPLIFIER

on relay rack panels of recess pan construction, making them adapt able for either rack or calinet mounting. The front panel and mat are readily removalbe, exposing all parts for quick servicing. A panel meter permits checking tube currents while in operation.

The 287 series amplifiers are available for use where very high audio power is required such as skating rinks, stadiums, large plants, etc.

They are of the single stage push-pull type, with self-contained power supply and in general are constructed on the same lines as other Altec rack mounted amplifiers. As they are strictly power amplifiers, they must le operated from a driver amplifier such as the
A-12
iseries or the A-256-A.

## A-425B PRE-AMPLIFIER AND MIXER

The A-425B Pre-Amplifier and Mixer is designed for high quality speech input equipment and P.A. application. It is a microphone preamplifier, and one pre-amplifier is required for each microphone. The output of the second stage is coupled to a $20,000-0 h m$ mixer control which is mounted on the chassis but may be removed and mounted up o 12 inches away from the amplifier if required. The chassis may be mounted on a standard relay rack through the use of the 10629 Assemby or it may he mounted in a mixer console designed for that purpose. The A-425C Pre-Amplifier with required equalization is avanable for phonograph input using a variable reluctance pickup. A crystal phonograph pickup may be connected directly into the input of the A-426 Amplifier.

## A-420 PRE-AMPLIFIER

The Altec Lansing A-420 is a fixed gain low level pre-amplifier designed to operate into the Altec Lansing A-127-A or $-B$ or A-256A amplifier, from which it obtains its power supply. It is intended as amplifier, from whemplifier for microphone, phonomraph pick-up or other low level signal. The input transformer has 90 db of marnetic shielding for hum-free operation. This amplifier, finished in blue-pray baked for hum-free operation. This amplifier, finshed in bue-fray baked that it may be mounted on a rack or in a cabinet.

## A-426B LINE AMPLIFIER

The A-426B Line Amplifier is used to amplify the signal output of one to four A-425B Pre-Amplifiers. A separate input terminal is provided for each A-425B Pre-Amplifier. When less than four A-425B PreAmplitiers are used, the unused terminals should be strapped to ground which prevents the gain of the amplifier from changing. Interaction between controls is less than 2 db . The chassis is designed to mount with the A-425B l're-Amplifiers either in the rack mounting assembly or in the console. An input transformer may be installed in this amplifier for low impedance input when desired.

## P-505B POWER SUPPLY

The P-505B Power Supply is AC operated and supplies all power requirements for four A-425B or A-425C Pre-Amplifiers and one A- +26 B Line Amplifier. It is mounted on the same type chassis as the pre-amplifiers and is designed to mount in the rack mounting assembly or in the console. The external marnetic field in this unit is sufficiently low that it can be mounted directly beside the A-426 B Line Anplifier.

## THE A-10625 MOUNTING BASE

is provided for mounting any combination of A-425B or C , A-426R amplifier and/or P505B Power Supplies. Up to six units may be accommodated. The base has been so designed that it may he installed within as an integral part of a mixer console or in a standard relay rack or calinet. $10 \frac{1}{2 \prime \prime}$ of standard rack space is requirel.

A-323B AMPLJFIER
The $A-823 B$ is a portable conventional chassis-type general-purpose amplifitr designed for high quality reproduction of sosund, music, and suetch from records, radio and microphome. It is engineered and manufartured to meet the high quality standatis requirel of an amplifier when used in conjunction with Altec lansing speakers.

The ondstanding features are: (1) Full rited Power ontput within $I$ dh from 35 to $\mathrm{I} 2,000$ cycles. (2) I Ium l)alancing fotentioneter to eliminate necessity of careful selection of tubes for quiet operation. (3) Two inputs with selector switch for high and low gain. (4) Continuous variablo low frequency tone control. (5) IIigh frequency eutalization through use of a stepued controlled low pass filter which gives sharp cutoff of noise frequencies yet allows finll reproduction of usible hirh frequencies. Operation of this low pass filter is quite diflereni from eustomary trelle tone control and is only available generally on the most expensive amplifiers. (6) Equalization for phonograph pickup in the first amplification stage designed primarily for the new General Electric variable reluctance or I'ickering pickup but which also monets the requirements of olleer types of reproblucers for the reproduction of commercial recordings. This phonorraph equalization which is not in the low gain inunt circuit for radio, can be removed by unsublering a strab when a microphone is used on high gain phonorraph input for P.A. work. This leaves a flat frequency response that can be varied by means of the luas and treble tone controls.

The Altec Lansing A-324A Amplifier is a portable 15 -watt Public Address amplitier clesigned for use in high quality public address and music systems.

The outstanding features of this amplifier are: (1) Flat fequency response $\pm 1$ db from 20 cycles to 20,000 cycles (when tone controls are set for tlat response). (2) Delivers full rated Power within 1 db from 35 cycles to 12,000 cycles. (3) Two hish-gain low-impedance microphone inputs with individual volume controls on each input for mixing purposes. (4) Two low-gain ligh-impedance iuputs for AM or FM tuner, crystal phonograph pickup or high impedance microphone. These two inputs have a dual "fader" type volume control which allows fading sinoothly from one input to the other. (5) Bass control gives flat bass resuonse or contimously variahle bass boost of 12 db at 50 cyles. When set at "PL" position, the buss response of the low impedance inicrophone inpuis is aitenuated to eliminate "boominess" due to improper microphone technitue. (i) Continuously variable treble attenuator from flat response. (i) Microphone input transformers have electrostatic shield betwen primary and secondary, and 90 db of magnetic shielding - eliminating hum pickap from stray magnetic fields. (8) Extra AC power socket on chassis for comecting radio tuner or record changer. (9) rilot lamp jewel indicates when amplifier is in operation.

The Altec Model A-324A Amplifier is a professional amplifier, constructed of heary duty parts and is designed for continuous service. Finish is grey crackle with chrone operating control panel.

## HAMILTON ELECTRONICS

## DS SERIES OF PORTABLE AMPLIFIER SYSTEMS

HAMILTON amplifier systems operate on 110-125 volt, 60 cycles, alternating current. Each system comes complete in all respects, including tubes, microphone, speakers and instrucfions.

Hamilton amplifier systems are housed in a single threepiece carrying case. Each piece fastens securely and easily. The upper halves each hold a heavy duty Jensen Alnico $V$ speaker, plus a 25 -foot cable with plug attached, The lower section of the case contains the perfect tone amplifier. The crystal microphone with shielded plug-in and 25 feet of cable rests in a special holder.

All the controls for the DS series amplifier are on the front panel, along with the toggle power switch, pilat light and protective fuse. Nothing is hidden or hard-to-get-at. The independent volume controls for both channels allow perfect mixing of sound. Bass-treble tone control permits tonal range from deep bass to high treble and allows for acoustical compensation wherever the equipment is used. Each Hamilton amplifier system has its awn set of matched tubes, the larger units having the tubes clamped down.

## H SERIES OF AMPLIFIERS

H-707-A SPECIFICATIONS - 7-watt output. Tubes: 2-65.J7, 1-6L6, I-5Y3GT. Inputs: I Microphone, I Phono; both high impedance. Output impedances to voice coil. Operates on 117 -volt, 60 cycles, draws 65 watts. Baked grey hammerloid finish. Size: $11^{\prime \prime} \times 7^{\prime \prime} \times 5^{\prime \prime}$. Net wt.: 9 lbs.; shipping wt.: 12 lbs. Audience coverage, up to 700 persons; area coverage, up to 4000 square feet. This is the ideal amplifier for all those smaller installations. H-707-A - List Price $\$ 48.00$

H-715-B SPECIFICATIONS - 15-watt output. Tubes: 2-6SJ7, I-6SL7, 2-6L6, I-5Y3GT. Inputs: 2 Microphones, I Phono; all high impedance. Output impedances: 4, 8, 15 and 500 ohms. Operates on 117 -volt, 60 cycles, draws 100 watts. Baked grey hammerloid finish. Size: $14^{\prime \prime} \times 71^{\prime} 2^{\prime \prime} \times 6^{1 / 2^{\prime \prime}}$. Net wt.: $141^{1 / 2}$ |bs.; shipping $w t$.: 21 lbs. The tried and tested amplifier for general PA work. Many are in operation in garages, churches, factories, school auditoriums and restaurants. Will cover audiences up to 1500 people or an area of 8000 square feet.

H-715-B - List Price $\$ 75.00$
H-730-B SPECIFICATIONS - 30-watt output. Tubes: 3-6S.J7, I-6SN7, 2-807, I-5Z3. Inputs: 2 Microphones; I Phono; all high impedance. Output impedances: $4,8,15$ and 500 ohms. Operates on 117 -volt, 60 cycles, draws 145 watts. Baked grey hammerloid finish. Size: $10^{\prime \prime} \times 20^{\prime \prime} \times 81 / 2^{\prime \prime}$. Net wt.: 27 lbs .; shipping wt.: 45 lbs. An outstanding amplifier value, low in cost but high in quality. This amplifier will fill $75 \%$ of all sound job requirements.

H-730-B - List Price $\$ 125.00$

H-750-B SPECIFICATIONS - 50-watt otuput. Tubes: 3-6SJ7, 1-6SN7, 4-807, I-83. Inputs: 2 Microphones, I Phono; all high impedance. Output impedances: $4,8,15$ and 500 ohms. Operates on 117 -volt, 60 cycles, draws $245^{\prime}$ watts. Baked grey hammerloid finish. Size: $10^{\prime \prime} \times 20^{\prime \prime} \times 10^{\prime \prime}$. Net wt.: 31 l bs.; shipping wt.: 48 lbs . One of the finest ampliers obtainable; only the highest quality parts and the best workmanship are put into it. The ideal amplifier for the large job where volume or coverage is needed. This is really high-power sound.

H-750-B - List Price $\$ 175.00$

- Three Input Circuits.
- Illuminated Control Panel.
- Beam Power Output Tubes.
- Simplified Operation.
- Exceptional Tone Quality.

This amplifier is as fine in performance as it's functional and modern design suggests. The beautiful gray and silver case, with it's illuminated, full-view control panel, is high lighted by distinctive red plastic control knobs. The amplifier has an undistorted output of 15 watts with a peak of 18 watts. It utilizes push-pull beam power output tubes, inverse feedback that reduces harmonic distortion, and has three input channels with separate volume controls that permit mixing of two microphones and a phonograph simultaneously.

## SPECIFICATIONS <br> Model 3715

Power Output: 15 Watts at less than $5 \%$. Peak Iower 18 Watts.
Freq. Response: Plus or Minus 1 db 30 to 13,000 Cycles.
Overall Gain: Mierophone Channels 120 db . ; Phono Channel 87 db .
Hum Level: - 63 db. Below Rated Output.
Inputs: 2 Microphone; 1 Phonograph
Input Imped: Microphone Channels 10 Megs; Phono Channel $1 / 2 \mathrm{Meg}$.

Dimensions: $111 / 2^{\prime \prime}$ Deep; $8^{\prime \prime}$ High; $161 / 2^{\prime \prime}$ Wide.
Shipping Weight: 32 lbs.

An ideal Amplifier of medium wattage. This seven tube model has proven to be one of the most popular units that Bell has ever manufactured. For a good all around amplifier of medium price it cannot be beaten. Experienced engineering and time proven circuits has made it one that thousands of users rely on day in and day out for continuous satisfactory service. The Model 3725 is truly the "Work Horse" of Bell's entire amplifier line.

## SPECIFICATIONS

Model 3725

Power Output: 25 Watts at Less than 5\%. Peak Power 33 Watts.
Freq. Response: Plus or Minus 2 db . 50 to 18,000 Cycles.
Overall Gain: Microphone Channels 122 db . ; Phono Channel 89 db .

Dimensions: 111/2" Deep; 8" High; $161 / 2^{\prime \prime}$ Wide.

- Treble and Bass Boost.
- Ultra-Modern Design.
- Three Input Circuils.
- Illuminated Control Panel.
- Built to Last-Easy to Service.

## 50 WATT BELL AMPLIFIER

## Model 3750

- Rugged Construction.
- Four Inputs.
- Bass and Treble Boost.
- Available for Remote Standby Operation.
- Excellent Frequency Response.

This unit offers "powerhouse" performance with sufficient wattage to cover $90 \%$ of all commercial sound requirements. It has power to spare and has been designed for the ultimate in flexibility and operation. Three microphones and a phonograph can be simultaneously mixed by the operator. New tone control circuits, operating in an inverse feedback network, provide extremely wide tone adjustments with greatly reduced distortion. For example, the Bass Control is adjustable from flat response to plus 10 db or to minus 20 db and the treble control from plus 8 db to minus $22 \mathrm{db}, 30 \mathrm{db}$ overall.

## SPECIFICATIONS <br> Model 3750

## Mfg. by THE BELL SOUND SYSTEMS, Inc.

## IBELLSOUND EDUIPMENT

- Phono \& Micro Inputs.
- Chassis Removable for Servicing.
- Fits under most dashboards.
- Battery Stand-by Switch.

Here is a brand new addition to the time-proven Bell line of amplifiers. A compact, rugged and amazingly efficient low wattage mobile amplifier. It was especially designed for use by Municipal Police and Fire Departments, Safety Patrols, Traffic Control and outdoor audible advertising. The tubes and vibrator can be inspected or changed without disturbing the installation because the chassis and front panel are so constructed that they easily slide out of the case. In an emergency a whole new spare unit can be inserted in the case. It will operate on 6 volts DC or 117 volts 60 cycles and is provided with a standby switch to conserve battery drain. It comes complete with two cables. Any high impedance microphone can be used with this amplifier.

## SPECIFICATIONS <br> Model 3706-M

Power Output: 6 Watts at Less than $5 \%$. Peak Power 8 Watts,

## 25 WATT BELL MOBILE AMPLIFIER

This unit is another new member of the Bell line of Amplifiers. It is a medium wattage mobile Amplifier of the most modern design. It has a microphone input and a built-in phono unit. The volume of both the microphone and phono are individually controlled and in addition, a tone control is provided to permit individual selection or adjustment of the bass or treble response. There is also a stand-by switch provided to turn off the " $B$ " supply while the filaments remain heated. This permits economical operation and extends the life of the battery power supply.

## 30 WATT BELL MOBILE AMPLIFIER

- Astatic AB-8M Mobile Pickup.
- Circuit Breaker Protection on 6 volts.
- Bass Boost and Treble Compensators.
- Power Economizer Switch.
- Three Input Channels.
- Heavy Duty Dual Vibrator.

One of the most completely satisfying mobile Amplifiers ever offered for general use. The "Moto-Master" combines a 30 -watt amplifier of tone and quality, with a phono pickup of new design, that plays all $12^{\prime \prime}$ and smaller records. Market research proves it's capacity is more than ample for the majority of needs.

This high gain unit operates on either a 6 volt DC storage battery or 117 volt 60 cycle AC line current. Conversion from one type of current to another is achieved by simply removing one plug and inserting the other. Current consumption on battery is reduced by a power economizer switch. High fidelity; improved wide range tone controls; beam power output tubes; and two microphones inputs and one phono input, each with separate volume controls are features of the "Moto-Master".

Turntable speed of 78 r.p.m. New type crystal pickup stays "in the groove."

## HELL SOUND EQUIPMENT

25 WATT BELL PHONO-PA SYSTEM
Model 2078

## The Sehool-Master

The Bell "Schoolmaster" has been received with great public acclaim. This unit has proven extremely popular with institutions and schools throughout the country. One city school system has over one hundred of these units in operation.

Practically every need for high quality public address and music coverage is met with this system. With it's governor-controlled, two speed motor and professional type tone arm, it will give excellent reproduction of lateral cut records from $6^{\prime \prime}$ to $16^{\prime \prime}$.
For auxiliary equipment, the Model 98 speaker has been designed. This unit is identical with the speaker portion or top half of the model 2078 and comes complete with a P-12-Q speaker or equal, line matching transformer, fifty foot speaker cable and plug. Bell models 93 and 95 complete with speakers are also recommended for use with this equipment.

## SI'ECIFICATIONS Model No. 2078

Amplifier: 3725 (See page B-5).
Speakers: 1-12" P-12-Q or equal Heavy Duty P.M.
Cables: 25' Type SV with plug.
Phono Equip: Built-in 2-Speed (78-331/s RPM) Motor; Type HP-16 Tone Arm. Microphone: JT-30 with desk type Stand Microphone Cable: $15^{\prime}$ Shielded Rubber covered with Connector.

Microphone Stand: Furnished with Micro. Case: Model 2078.
Dimensions: 19" Deep; 13 $1 / 4^{\prime \prime}$ High ; $193 / 4^{\prime \prime}$ Wide.
Shipping Weight: 73 lbs .
Model 2078-CH
Same as Model 2078 except with Webster 56 Changer in place of transcription unit.

# BELfone 

INTERCOMMUNICATION SYSTEMS

$\mathbf{W}_{\text {of }}^{\text {E offer the finest and most complete line }}$ in the world today.

Four entirely different series of BELfones are available. The 350 Series, the 374 -SS Series, the 440 Series and the 460 Series. There is a BELfone System that will meet every need; and for clarity of tone, appearance, low operating cost and maintenance, the Bell line has no peer.
The Bell Sound Systems, Inc., was the first company to design and produce reasonably priced electronic inter-office communication equipment commercially.

The complete line of BELfone equipment and accessories are shown in our special cata$\log$ for inter-office communicating equipment. Write for it today.

Bell also builds Industrial Sound and Paging Equipment; School Sound Distribution Systems; Recording Units; and other Sound Equipment and Accessories. For further details write to

## BELLSOUND SYSTEMS, Inc.

## THORDARSON AMPLIFIERS

## THORDARSON 8 WATT AMPLIFIER - T-3IW08

This amplifier combines maximum performance with minimum size. It is ideal for ballyhoo installations, carnivals, or inter-phone applications. The quality is such that it may be used for reproduction of the finest records. Individual controls for phono and microphone provide electronic mixing. The treble attenuation tone control has sufficiently smooth operation for satisfactory elimination of needle scratch or objectionable highs; or with the control in a normal position the highest treble tone can be clearly reproduced.

## List Price $\$ 64.00$

POWER OUTPUT-8 Watts ( +31.25 Db ) at less than $9 \%$ distortion. TWO INPUT CIRCUITS
One high impedance microphone channel-115 Db gain (based on 100,(0)00 ohnis input impedance).
One high impedance phono channel-72 Db gain (based on 100,000 ohms input impedance).

All input circuits may be mixed.
Low impedance microphone input optional at slight additional cost ( 50,250 , or 500 ohms)
IMPROVED TONE CONTROL- (high frequency attenuator type). Maximum position attenuated 1,000 C.P.S. $4 \mathrm{Db}, 5,000$ C.I.S. 17 Db 10,000 C.P.S. 22 Db.

FREQUENCY RESPONSE-Flat within 1 Db from 50 to 10,000 C.P.S. CHASSIS TYPE CONSTRUCTION-Attractive three-tone control panel.
INVERSE FEED-BACK CIRCUIT.
OUTPUT IMPEDANCES-4, 8, 15, 250, 500 ohns-all available at an 8-prong receptacle.
HUM LEVEL 60 Db below rated output.
TUBES-1-6J7; 1.6SJ7; 1-6L6; 1-5Y3.
DIMENSIONS $-10^{\prime \prime} \times 6^{\prime \prime} \times 71 / 2^{\prime \prime}$ high.
POWER CONSUMPTION - 70 watts, $110-120$ volts, $50-60$ cycles other primary voltages on special order) (WEIGHT NET- $14 \%$ pounds; shipping 16 pounds.

## THORDARSON 25 WATT AMPLIFIER — T-3IW25AX

Sufficient undistorted power is available from this unit for large auditorium or night club installations. Two low level inputs and one high level input will allow the use of two microphones with low impedances or high impedances to be satisfactorily mixed with a phono input for musical background. The attractive front panel is supplied with three gain controls and two tone controls. The tone controls provide individual bass or treble attenuation to eliminate undesirable highs in recordings or undesirable lows for crisp speech output. When the tone controls are in the normal position-Tru-Fidelity output is available.

## List Price $\$ 135.00$

POWER OUTPUT- 25 watts $(+36.2 \mathrm{Db})$ at less than $3 \%$ distortion. TWO INPUT CIRCUITS
One high-impedance microphone channels- 116 Db gain (based on 100,000 ohms input impedance).
One high impedance phono channel-72 Db gain (based on 100,000 ohms input impedance)
Low impedance microphone input optional at slight additional cost ( 50 , 250 , 50 o ohms).

All input circuits may be mixed
INPOVED TONE CONTROLS (Treble and bass attenuators).
Maximum attenuation positions
Bass- 50 C.P.S.- 20 Db. 1 (0 C.P.S.- 12 Db

FULLY ENCLOSED CONSTRUCTION-All-steel strearnlined cab-inet-Attractive three-tone control panel.
MULTIPLE INVERSE FEED-BACK CIRCUIT.
OUTPUT IMPEDANCES 4, 8, 15, 250,500 ohms-all available at 8-prong receptacles, selected by nieans of a switch.
HUM LEVEL-65 Db below rated output.
TUBES 2-6J7; 1-6SJ7; 1-6N7; 2-6L6; 1-5NiG.
DIMENSIONS $151 / 2^{\prime \prime} \times 10^{\prime \prime} \times 9^{\prime \prime}$ high.
POWER CONSUMPTION-137 watts- $110-120$ volts, $50-60$ cycles (other primary voltages on snecial order).
WEIGHT NET- 28 pounds; shipping 32 pounds.

POWER OUTPUT-50 Watts $(+39.6 \mathrm{Db})$ at less than $5 \%$ distortion. FIVE INPUT CIRCUITS
Three input microphone channels-115 Db gain (based on 100,000 ohms input impedance).
Two phono lader inputs- -75 Db gain (based on 100,000 ohms input impedance)
Low impedance microphone input optional at slight additional cost (50, 250,500 ohms)
TWO TONE CONTROLS
One bass control providing a bass boost of $91 / 2 \mathrm{Db}$ at 80 C.P.S. to a bass attenuation of 25 Db at 80 C. P.S.
One treble control providing a boost of $111 / 2 \mathrm{Db}$ at 8,000 C.P.S. to an attenuation of 25 Db at $8,000 \mathrm{C} . \mathrm{P} . \mathrm{S}$.
Nine extreme individual response curves available with the two tone controls multiple speaker applications.

## THORDARSON 50 WATT AMPLIFIER - T-3IW50AX

This amplifier employs 4-Beam Power tubes; is conservatively rated at 50 watts and will supply over 65 walts of peak power. The unit is ideal for large stadium or roller-rink applications. The three low-level microphone and two high-level phono inputs will satisfactorily handle the most elaborate mixing applications. Dual tone controls will attenuate individually either the bass or treble or individually boost the bass or treble. Wither low or high impedance inputs may be accommodated. The range of output impedances provided will accommodate

WEIGHT NET-44 pounds; shipping 50 pounds.

## THORDARSON AMPLIFIERS

## T-32W10 AUDIO AMPLIFIER

America's greatest value in quality. VERSATILE-available with or without pre-amplifier. Americals greatest value in quat what you need, add pre-anmplifier if needed later.
FEATURES-Frequency responses from 20 to 20,000 cycles - 70 DB hum level below rated output Adequate gain to obtain full output from the ordinary high impedance pickup or tuner A treble boost and treble attenuation tone control feature A bass boost or flat response control Both tone controls continuously variable Output for 3 to 4 ohms, or 15 to 16 ohms which covers all popular high fidelity speakers . The unit will be supplied with felt mounting feet and a separate bracket for permanent installations Gray hammertone finish A pre-wired socket will allow the use of a T-32W00 plug-in-pre-amp which will accomniodate any of the popular magnetic reluctance phono pickups or a high impedance micronodate any of the popular magnetic pre-arnplifier, T- 32 W00 can be supplied with 15 DB of phone A frequency compensated prempensation for use with magnetic phone pickups. The bass compensation can be removed for flat response when microphone operation is desired Output impedances are terminated to a four-serew terminal board Tubest One 6SL7-GT, two 6V6-GT, one 5Y3-GT terminated to a four-screw terminal poard supply, 115 volts A.C., and tubes Output-10 clean watts at less than $2 \%$ distortion.
New THORDARSON T-32W10 AUDIO AMPLIFIER. Less T-32W00 Ire-Amplifierbut complete for use with high impedance pickup or tuner. Less L-32 List Price $\$ 55.00$ New THORDARSON T-32W00 Plug-in Pre-Amplifier. Necessary when Audio Amplifier is to be used with any of the popular reluctance phono pickups or high impedance microphones.

## T-3IWIOAX TRU-FIDELITY PHONO-AMPLIFIER

Unique in design the Thordarson 10 Watt Phono Amplifier combines versatility of application with Tru-Fidelity performance. 13oth microphone and phono input channels allow the 31W10AX to be used in conjunction with the High-Fidelity Meissner AM-FM Tuner and other tuners of comparable performance; as a speech amplifier in amateur transmitters; or as the amplifier section in a recording set-up. Little is left to be desired in naturalness and brilliance of tone.

Separate bass and treble controls with both boost and attenuation action assure complete adaptation of the output to all acoustical conditions, plus the pleasure of listening to music the way it is deaired to be heard. Production cost is lowered by the mounting of this unit on a simple chassis inasmuch as the amplifier js usually installerl in cabinet, no cover is required. LIST PRICE $\$ 127.50$

## T-31W10AX Specifications

POWER OUTPUT-1 10 Watts at less than $5 \%$ distortion ( 50 to 10,000 cycles).

## TWO INPUT CIRCUITS-

One high impedance microphone channel-107 Db gain (based on 100,000 ohms input impedance)

One high impedance phono channel-71 Db gain (based on 100,000 ohms input impedance).

TWO TONE CONTROLS-
One bass control providing a bass boost of 12 Db at 80 C.P.S. to a bass attenuation of 13 Dl at 80 C.P.S.

One treble control providing a treble boost of 12 Dh at $8000 \mathrm{C} . \mathrm{P}^{2}$.S. to an attenuation of 18 Db at 8000 C.P.S.

FREQUENCY RESPONSE-Flat within 1 Db from 40 to 15,000 C.l'S.

CHASSIS TYPE CONSTRUCTION-Attractive three-tone control panel.
NVERSE FEED-BACK CIRCUIT
OUTPUT IMPEDANCES-4, 8, 15, 125, 250, 500 ohms-all available at an eight-prong receptacle.
HUM LEVEL- 60 Db below maximum rated output.
TUBES-1-6J7; 1-6SJ7; 1-6J5; 1-6SN7; 2-6B4; 1-5U4G.
DIMENSIONS-14" x $8^{\prime \prime} \times 71 / 2^{\prime \prime}$ ligh.
POWER CONSUMPTION-117 Watts full signals- $110-120$ volts, $50-60$ cycles (other primary voltages available on special order). WEIGHT NET--19 pounds; shipping 22 pounds.

## T-3IW2OAX 20 WATT MOBILE AMPLIFIER

Conservatively-rated, this universal mobile amplifier furnishes sufficient undistorted nower for sound truck, pienic, carnival and similar installations that require the versatility of 6 volts D.C. volts and 115 volts A.C. operation.
The electric turntable and pick-up mounted on top of the amplifier operates practically in any position, whether tilted vertically or operates practicaly in any position, whether tilted vertically or
it is truly versatile. With all connections on the back of the chassis, simplification of hook-up is provided, leaving trimness of style for the front panel.
Treble attenuation tone compensation makes allowance for correcting to acoustical conditions and reducing record scratch. Mixing procedure is completely controlled with the coupled phono and microphone dure is completely controled with the coupled phono and microphone
input channels.
LIST PRICE $\$ 200.00$

## T-31 W20AX Specifications

POWER OUTPUT-20 Watts at less than 6\% distortion (50 to 10,000 cycles).
TWO INPUT CIRCUITS-
One high impedance microphone channel- $110 \mathrm{D} b$ gain (based on 100,000 olims input impedance).

One high impedance phono channel-72 Db gain (based on 100,000 ohms input impedance).

Both input circuits may be mixed.
FREQUENCY RESPONSE-Flat within 1 Db from 40 to 15,000 C.P.S.

IMPROVED TONE CONTROL- (high frequency attenuator type)
Maximum position attenuated 1,000 C.l'S. 1 Db; 5,000 C.l'S. $10 \mathrm{Db} ; 10,000$ C.PS. 16 Db .

## T-31KO9 COVER

A trim grey wrinkle finish cover, perforated for complete ventilation; for use on the T-31W08 amplifier.

FULLY ENCLOSED CONSTRUCTION-Trim light grey wrinkle cabinet with three-tone control panel.
CRYSTAL PICK-UP-Specially-designed pick-up arm. Spring-action holds arm in place.
INVERSE FEED-BACK CIRCUIT.
OUTPUT IMPEDANCES—4, 8, 15, 125, 250, 500 ohms-all available at two 8 -prong receptacles, selected with switch.

HUM LEVEL- 66 Db below maximum rated output.
TUBES-1-6J7; 1-6SJ7; 1-6N7; 2-6L6; 2-6X5.
DIMENSIONS-15 $1 / 2^{\prime \prime} \times 10^{\prime \prime} \times 11^{\prime \prime}$ high.
POWER CONSUMPTION-1 10 Watts full signal- $\mathbf{1 1 0 - 1 2 0}$ volts, $50-60$ cycles; 6 volts D.C. 23 Amp. ( 6 volts standby current- 5.15 Amps.).
WEIGHT NET- $341 / 2$ pounds; shipping 39 pounds.

## FOR BEST RESULTS SELECT

MASCO manufactures a complete line of amplifiers and sound systems ranging in power output from 8 to 75 watts, including phono-top, mobile, high fidelity and musical instrument amplifiers and recorders, transcription players, school systems, plant broadcasting and intercommunication systems. All MASCO amplifiers, many of which are shown as portable systems are recommended for use in FIXED SYSTEMS.

## MA-8N 8-WATT AMPLIFIER and MAS-8N 8-WATT PORTABLE SYSTEM

AMPLIFIER FEATURES: Microphone and phono input separately controlled . Bass-treble tone control - Hammertone-finish chassis - Light, compact and sturdy $\cdot \mathrm{U} / \mathrm{L}$ Approved.

APPLICATIONS FOR AMPLIFIER AND SYSTEM: Both units are ideal for paging systems for bus and railroad stations and they are recommended for side shows, auction rooms. sales meetings, small taverns and clubs.

## MA-75N 75-WATT AMPLIFIER

AMPLIFIER FEATURES: Five input channels - Separate controls for each input - Impalance selector switch. Separate plate and screen supplies. Peak power: 125 watts . Electronic mixing of all channels . Fully fused - U $/ \mathrm{L}$ Approved.
APPLICATION: The Model MA-75N is widely used in rack and mounted installations, and also by itself for covering large outdoor areas such as football fields, baseball diamonds, motor speedways, and airports. It finds industrial use for paging and announcing in large steel mills, cotton mills, drydocks, shipways, and on heavy construction jobs of all kinds. At sea it is used for paging and announcing from the bridge, and with suitable horns, for ship to ship and ship to shore voice communications.

## MASCO'S OUTSTANDING MOBILE SOUND EQUIPMENT

## 6-VOLT DC AND 117 -VOLT AC MOBILE AMPLIFIERS

THE ONLY COMPLETE LINE OF U/L APPROVED MOBILE EQUIPMENT
7 DIFFERENT MODELS

AMPLIFIER FEATURES contained in all models are: Four input channels - Standby switch * Heavy-duty switches. Low battery drain Double-fused circuit - Hum-and-ripple-free operation - Heavy-duty dual vibrator. Crystal pick-up input. APPLICATION: The widely varied types of these amplifiers adequalely possible needs or applications such as outdoor gatherings, bahing bach, tavelin ing road shows, open-air theatres, election campaigns and charity drives, traveling evangelists, police and fire-department rescue work, and other locations where AC power is unavailable.
Operates as efficiently from 6 -volt batteries as from 117 -volt AC source. Rugged and powerful, expressly designed for sound truck and other outdoor applications. The battery-saver switch, which shuts off the vibrator during intermission, reduces battery drain to a minimum. The extra-heavy-duty dual vibrator maintains steady voltage and frequency. These amplifiers are provided with separate cable, fitted with rugged heavy-duty plugs and receptacles for each voltage supply.

## CON-FER-PHONE Line of INTER-MIX, INTERCOMMUNICATION Equipment

Build a system around any one Master to meet your requirements.
Available in Six and Twelve-Station Masters. Remote available WITH or WITHOUT Call Switch or with 6-Position Master Station Selector.

JMP-6 MASTER STATION

JS. 6 REMOTE

FEATURES:

- For Master-to-Master-to-Remote Intermix Installation.
- For Master-to-Master Installation.
- For Master-to-Remote Installation.
- Remote Station for two-way conversation with Masters.
- Remote Station can originate call to Masters.
- Masters may have personal remotes
- Push-Button station selection
- Press-to-talk switch with dictate position on Master.
- Individual or group conversation.
- Volume control with on-off switch.
- On-Off indicating light.
- AC-DC operation
- Finished in attractive wainut hammertone.
- Finish available in baked white enamel.
- U/L Approved.

The above is an inter-mixed system using both Masters and Remotes
Masters may call selectively or to all masters and remotes in the circuit. Master stations can originate calls to any remote at will.
Remotes can answer any master from a distance but cannot originate calls nor talk to other remotes. Remotes can originate calls to any master in the circuit, but cannot talk with other remotes. Model JS Remote may originate a call to only one master. Model IS-6 Remote may originate a call to as many as six masters
Remotes with switch can be installed for private or non-private use.

Illustration of a
Master-to-Master-to-Remote Inter-Mix Installation:

Each master can have his own private hook. up of remotes. The remotes may or may not originate calls to the individual master Masters can call each other regardless of whether master being called has its power on or off.
Illustration shows less than the maximum number of units possible in installation.
A JMP-6 Master may be connected to a total of six other units and a JMP-12 Master to a total of twelve other units. These units may be other masters or the JL, IS, and JS-6 Remotes, or the MB-8N Booster Amplifier. All of these units may be mixed.

## MAP-18 18-WATT DE LUXE MUSICAL INSTRUMENT AMPLIFIER SYSTEM

AMPLIFIER FEATURES: Three inputs - Separate input controls . Individual bass and treble tone controls - Finest stringed-instrument reproduction "Built-in heavy-duty $12^{\prime \prime}$ PM speaker 18 watts of undistorted output - Convenient topmounted control panel - U/L-CSA Approved.
APPLICATION: Three instruments or microphones, or any combination may be used separately or simultaneously by means of the three separate volume controls. Voice and instrument may be combined, with individual volume control of each. The bass and treble tone controls vary the overtones from crisp, clear melody, to rich, mellow bass. An 18 watt amplifier is housed in an attractive, portable case. It provides I8 watts of undistorted output by means of an exclusive circuit design. A 12" heavy-duty speaker is incorporated in an acoustically designed case which eliminates all distortion and false harmonics. The control panel is mounted on top to provide quick access to the professional and discriminating musician.

## H. H. SCOTT Model 210-A Amplifier

Brilliant, realistic reproduction of broadcast and recarded music is assured with the H. H. Scott model 210-A amplifier. Built to laboratory standards of electrical, mechanical, and musical excellence, this 20 -watt amplifer is essential to satisfactory custom performance in both FM and AM radio reproduction as well as in record playing. Also available: all-triode model, 211-A.

## SPECIFICATIONS

*Dynamic naise suppressor for both scratch and rumble. - Equalization for standard and long-playing records. Extended listening range. - Squeleh circuit. - Twenty-watt output -- negligible distortion. " "Distortion and whistle" filter for $A M$ especially. - Matches all speakers fram 2 to 500 ohms. - Minimum controls - maximum flexibility. - Compact design with aversize components. - Calibrated adjustments for all types of pickups. Variable bass and treble boosts.

## H. H. SCOTT Model 110-A *Dynamic Noise Suppressor

Now *Dynamic noise suppression is possible with your present radio-phonograph or amplifier on both standard and long-playing records with the H. H. Scott "Little Wonder" *Dynamic Noise Suppressor. Scratch and rumble are reduced without fixed loss of "highs" or "lows." Add realism to your music reproduction by these 2 simple steps.

1. Plug in the "Little Wonder" between your pick-up and amplifier.
2. Plug in the socket adapter to the power-tube socket.

The "little Wonder" realizes the full capabilities of your present equipment; remote control mounts anywhere; high-and-low-frequency noise suppression; two-inductor-type high-frequency gate circuit; two separate control rectifiers; compact $-7 \times 33 / 4 \times 43 / 4$ inches.

## H. H. SCOTT Model 410-A Sound Level Meter

The H. H. Scolt Model 410-A saund level meter, is a self-contained unit meeting all requirements of the ASA and weighing anly a little over two pounds. It is the only truly modern sound-level meter now available, and is unsurpassed far speed, accuracy, and convenience. Held and operated in one hand, it is merely pointed at the noise source and an accurate reading taken from the meter. Provision is made for using the microphone on an extension cable or for using other microphanes, vibration integrator 410-X5, and vibration pickup 410-X6.

## SPECIFICATIONS

Range: 34 to 140 db above ASA reference level. All standard ASA curves for weighting are provided: flat, 70 db , and 40 db . Humidity-sealed crystal diaphragm type microphone. Two-speed type meter provides either standard ASA ballistics or heavy damping. "Simple adjustment resets amplifier gain to original factory-calibrated value. *Only $11 \frac{5}{\mathrm{~g}}{ }^{\prime \prime}$ long, $2 \frac{1}{2} 2^{\prime \prime}$ diameter.

## H. H. SCOTT Model 910-C <br> *Dynamic Noise Suppressor

The type $910-\mathrm{CH}$. H. Scott ${ }^{*}$ dynamic noise suppressor, is widely used by leading independent and net-work stations to provide wide-range, low-noise-level program material from records and transcriptions of music. This is the first and only device of its type available commercially for broadcast station use. Indispensable for FM and high-fidelity AM statians. Also available: smaller model, 912-A, for separate turntables.

## SPECIFICATIONS

- Reduces scratch and rumble noises. - Remote control. - Distortion less than $0.3 \%$. Hum level 80 db below standard test level. - Operating level - 30 to ples 10 VU . - Illuminated meter for monitoring.
*Licensed under U.S. and foreign patents pending and issued.

## S <br> DYNAMIC NOISE SUPPRESSOR

## SPECIFICATIONS

115 Volts 50-60-Cycle 25 Watts
40-15000 CPS Chassis: $7^{\prime \prime} \times 9^{\prime \prime} \times 12^{\prime \prime}$
$\begin{aligned} \text { Tubes: } & 2-6 S L 7 G T \\ & 1-6 S J 7 G T \\ & 1-6 S K 3 G T\end{aligned}$
Input: Magnetic or Crystal Pickup or FM or AM Detector Oułpuł
Gain: . 02 Volts Input produces $\mathbf{8}$ Volts Output to Volume Control of .25 to 1 Meghom

## PREAMPLIFIER

- Accomplishes a high degree of noise reduction - maintains natural brilliance and realism - essential overtones are reproduced at all volume levels.
- Introduces no unnatural tonal qualities in the reproduction.
- Installation and operation require no technical skill.
- Also supplied in combination with a highquality power amplifier for custom and commercial installations.

$$
\text { Net Price } \$ 59.50
$$

The Somerset Noise Suppressor is essential if you have other high fidelity equipment. A 15,000 -cycle uide range reproducing system is of little value if it must be limited to 4,000 or 5,000 cycles by treble control to avoid surface scratch or hiss.

Somerset Laboratories Incorporated has developed a new dynamic Noise Suppressor Pre-amplifier with an optimum frequency response characteristic, so controlled, that wide range quality and naturalness are preserved at all volume levels. Limitation of high frequency noise, during intervals when the varying intensity of the program is insufficient to mask the noise, is accomplished, not by a sharp frequency cutoff, but by a gradual "roll off" attenuation of all of the higher frequencies.
This method substantially retains the relative magnitudes of overtones. Likewise, the pleasing effect of complex tones, which is so dependent upon the many overtones is preserved. The hollow tonal character which may result in sharp cutoff suppressor operation is avoided.
The Somerset Supressor, with its dynamic "roll
off," maintains aural balance to such extent that control of the low frequencies is neither desirable nor necessary.
The Somerset Noise Suppressor Preamplifier is equipped with power supply and includes a twostage high -mu triode preanıplifier with fcedback, compensated for selective use - by a four-position switch - with a number of the better quality phonograph pickups as well as with FM or AM radio tuners.
A unique and highly desirable feature of the circuit arrangement is that the variahle gain element, which controls the high frequency amplification, is not directly in the signal path. Distortion at high levels, commonly introduced by non-linearity in variable gain stages through which the signal passes, is not encountered in this circuit.

BOGEN CUSTOM DIVISION: The Custom Division of the David IBogen Co. is maintained for the express purpose of offering enginecring consultation on custom built requirements. This technical service covers initial design and layout of electrical specifications of any sound installation, large or small.
Although the David Bogen Co. manufactures the largest and most complete line of standard and De Luxe sound equipment, very often a customer's problem requires the design and construction of special equipment to meet particular requirements.
We invite you to submit your sound problems, technical inquiries, or request for quotations on special equipment to our Custom Division. If no specifications are available for your particular problem, merely send a description and pencilled sketch of the intended installation to our Custom Division. Its Engineering Staff is equipped with the finest facilities in the country and they will be glad to aid you in the solution of your particular problem, without obligation.

## NEW BOGEN DELUXE COMMUNO-PHONE SYSTEMS THREE VERSATILE MODELS TO SOLVE EVERY INTERCOMMUNICATION PROBLEM

## MODEL "X"—Universal Deluxe Series for 115 V 60 cycle AC

1. HOGEN MODEL. " X " " IS COMPLETELY UNIVERSAL. The one model will serve installations requiring a single master and several remote stations - installations requiving several master stations - or installations requiring several master stations and several remote stations. Remote stations are available to permit selectuve initiation of calls to master stations.
2. HAND-RUBLED FURNITURE-FINISHFD CABINETS to complement the furnishings of the nation's best oflices.
3. TYPEWRITER KEYBOARD ACTION for push button selection of stations.
4. TYPEWRITER BAR PRESS-TO-TALK SWITCH.
5. AUTOMATIC BUSY SIGNAL.
6. 3 WATTS AUDIO OUTPUT - reserve power to take noisy installations in stride.
7. PROVISION FOR PLUG-IN CONNECTION OF HANDSE'S - permitiong complete privacy of eunversation, without need to operate the press-to-taik har.
8. PROVISION FOR QUICK DISCONNECT OF MASTER STATIONS for ease of installation or transfer.
9. BALANCED LINES : 50 ohms.
10. UNDERWRITERS' LABORATORIES APPROVED.

## MODEL "U"—Universal Standard Series for 115 V AC-DC

The new - completely universal Model "U" Communo-Phone is the AC-DC version of the Model "X." It incorporates most of the functional and style features of the deluxe unit. Hand-rubbed cabinets itypewriter keyboard action for push button station selection - typewriter bat press-to-talk switeh provision for plug-in handset provision for quick disconnect of the master station - 50 ohm halanced lines - Output Power is $11 / 2$ watts - no busy simnal - Underwiters' Laboratories approval.

## MODEL ' $D$ '"—Moderately Priced Dual-Function Units for $115 V$ AC-DC

The new Model "D" Communo-Phone is designed to serve installations requiring either a single master and several remote stations or several master stations only. It will not serve systens requiring a combination of several master and several remote stations, and it operates on voice coil lines. In all other respesta the Model " D " is the equivalent of the Model "U." Underwriters' Lahoratories approved.

KXLP-30 A phonograph amplifier unsurpassed by any other in the field, regardless of price. Ample power permits use of KX Series dual tone control circuit. Provides tonal range and balance unattainable in less costly circuits, and controlled emphasis of desirable but power-consuming fundamental bass tones, avoiding emphasis of harmonic bass--the Boomy or one-tone $\mathrm{U} / \mathrm{L}$ approved. Features "Magic Red Knob" Record Condition Compensator and built in Record Condition Compensatior
magnetic pick-up pre-amplifier. SPECIFICATIONS: POWER watis less than $5 \%$ distortion with flat power output versus frequency curve. FREQUENCY RESPONSE: 20 to 20,000 cycles $\pm 1 \mathrm{db}$. Response of magnetic and variable reluctance inputs corrected for requirements of these pickups. INPUTS: For radio and choice of crystal or variable reluctance pickup inputs. GAIN: Crystal input, 90 db . at $1 / 2$ meg. input impedance. Magnetic or
HLP-14 Brings to music lovers new listening pleasure in a unit less expensive than the KXLP-30. It, 100, features the "Magic Red Knob" record condition compensator. Builtin pre-amplification and equalization, required for new low level pickups, make the HLP. 14 ideal for the lower cost home installation. Exceptional tonal balance at whisper volumes is an outstanding feature. SPECIFICATIONS: POWER OUTPUT: 14 watts at less than $5 \%$ distortion with wide watts at ess than flat power output versus frequency curve. flat power output versus frequency curve.
PEAK POWER OUTPUT: 19 watts. FREPEAK POWER $\pm 1 \mathrm{db}$ for crystal pickup and radio inputs. Magnetic and variable reluctance inputs have response adjusted to requirements of
MODEL P10 This remarkable new amplifier has a frequency response with $\pm 1 \mathrm{db}$ from 30 to 15,000 cycles and delivers a full clean 10 watts. Includes distortion free, individual bass and treble tone controls for bass boost and treble boost or attenuation; PLUS three individual inputs for any three of the following: Standard Crystal Pick-up Long Playing Crystal Pick-up, Magnetic Pick-up Pre-Amplifier Output, A.M. Radio, F.M. Radio, or Television, without need of special switching; PLUS' a power socket for connection of a G.E. or similar Pre-Amplifier if desired. All connections are clearly marked. Circuit includes multi-stage inverse feedback. The low hum level achieved is of utmost importance
variable reluctance input, 112 db . at $1 / 2$ meg., input impedance of 95 db . at 10,000 ohms. Signal required at radio input for full output is 6.6 volts. BASS TONE CONTROL: 0 to +22 db . with special curve shape for maximum emphasis of fundamental bass tones and minimum emphasis of harmonic bass. TREBLE TONE CONTROL: -25 db to +25 db . RECORD CONDITION COMPENSATOR: Five positions: \#1, radio $\# 2$, records, condition "A" (Perfect); \#3, records, condition " $\mathrm{B}^{\prime \prime}$; \#4, records, condition " $\mathrm{C}^{\prime}$ "; \#5, records, condition "D" (badly worn, very records, cond BALANCER CONTROL: To correct variation in tubes. OUTPUT IMPEDANCES: 3, 4, $6,8,16$ and 500 ohms to octal socket. POWER CONSUPTO watts, 129 volts, 60 cycles A.C. for use on 105-129 volts. POWER CONSUMPTION: 75 watts, 129 volts, 60 cycles A.C. for use on 105-129 volts. TÚBES (6): 1-6SC7, 1-6SJ7, 1-6J5, 2-6V6GT and 1-5Y3LT. DIMENSIÓNS: Chassis, $131 / 8^{\prime \prime} x$ 8次" $\times 3^{\prime \prime}$. Height overall, 63/4". SHIPPING EIGHT: 141/2 lbs. LIST: (with tubes) \$139.50. Plug Kit: \$.68.
when used with modern efficient speakers in bass reflex cabinets operated in quiet rooms. The low price makes it the truly outstanding buy in the field. U/L Approved. SPECIFICATIONS: INPUTS: $(31 / 2$ meg.; Gain, 75 db . Bass tone control range 0 to +16 db. Treble tone control range: - 25 db . to +15 db . Output Impedances: 4,8 and 16 ohms. Etched metal panel, grey baked enamel hammertone finish. Tubes (5): 1-6SC7, 1-6SF5, 2-6V6GT and 1-6X5GT. Dimensions: $111 / 8^{\prime \prime} \times 61 / 4^{\prime \prime} \times 53 / 4^{\prime \prime}$ high. Power consumption: 60 watts at 117 volts; 60 cycles A.C. Shipping Weight: $101 / 2 \mathrm{lbs}$. LIST: (with tubes) $\$ 59.50$. Plug Kit: $\$ .90$.

## PROFESSIONAL MUSICAL INSTRUMENT AMPLIFIER

G-12 Gives full, clear true tones at any desired volume. Lightness and beautiful appearance. Plus exceptional ruggedness and dependability characterize the Model G-12. There are three inputs with ample gain for Musical Instruments, plus an additional higher gain input for a microphone. Entire unit weighs only $201 / 2 \mathrm{lbs}$. for easy carrying. The amplifier frequency re sponse is 30 to 15,000 cycles. Special circuit designed for musical instruments, provides a full 12 watts power at less than $5 \%$ distortion (over $90 \%$ of full output at less than $2 \%$ distortion). Exceptionally efficient big full 12" Alnico V permanent magnet speaker in an acoustically designed enclosure. A kickproof grill gives real
protection for speaker. Case construction gives
needed rigidity for best tone and freedom from needed rigidity for best tone and freedom from rattles and strength necessary to stand the abuse of constant traveling. Amplifier mounting screws enter into metal inserts. The case is covered in durable, washable, airplane type fabric. Truly a professional instrument. Built for years of trouble free service under the most rugged conditions. U/L Approved.
SPECIFICATIONS: Power Consumption: 65 watts at 117 volts, 60 cycles A.C. Tubes (5): 1-6SC7, 1-6SF5, 2-6V6GT, and 1-5Y3GT. Size: $91 / 4^{\prime \prime}$ deep $\times 147 / 8^{\prime \prime} \times 183 / 8^{\prime \prime}$ high. SHIPPING WEIGHT: 25 lbs . LIST: (with tubes) $\$ 99.50$.

## RESTAURANT AMPLIFIER

PM-10 PM-10 differs from usual phono or P.A. Amplifiers in that a switch on the panel cuts music and selects area to be paged. When paging, tonal adjustments set for music are automatically cut and flat response is substituted for proper voice quality. Paging Switch returns to music and music response when released. Operator has choice of paging "All" or a selected area. Bass boost tone control and separate high frequency tone control for boost or attenuation give desired response for music. Ideal for use with Long Playing Microgroove Changers for good music at lowest cost with added feature of paging. U/L Approved.

SPECIFICATIONS: POWER OUTPUT: 10 watts at less than $5 \%$ distortion. Frequency Response: $\pm 1 \mathrm{db}, 40$ to 15,000 cycles. Mike Input ( 2 meg.) gain 105 db . Phono Input ( $1 / 2 \mathrm{meg}$.) gain 77 db . Bass tone control range: 0 to +14 db . Treble Tone Control Range: +15 db . to -22 db . Output Impedances: . $7,1.4,4,8$, and 16 ohms. Etched metal illuminated panel. Two-toned, grey, baked enamel hammertone finish. Tubes (5): 1-6SC7, 1-6SN7, 2-6V6GT, 1-6X5GT. Dimensions: $111 / 8^{\prime \prime} \times 61 / 4^{\prime \prime} \times 65 / 8^{\prime \prime}$ high. Shipping Weight: 12 lbs . LIST: (with tubes and cover) $\$ 79.50$. Plug Kit: $\$ 1.63$.

COMBINATION TRANSCRIPTION PLAYERS-P. A. SYSTEMS

Never Before has so Much Distortion-Free Volume, Quality of Tone, Ruggedness and Versatility Been Built into Such Convenlent Units

The NEWCOMB TR-16 Series sets new standards in the field of portable record-playing. They are truly economical, yet characteristically Newcomb in quality of workmanship, performance and fresh originality of design. Also they serve as splendid P.A. systems when microphones are attached to inputs provided for the purpose. . . Every attempt has been made to make these units foolproof in operation, with emphasis on rugged dependability, tone quality, light weight and serviceability.
These features, applying to all models of the TR-16 Series, indicate the unsurpassed value of Newcomb built Transcription Players.
All models play standard 78 RPM records as well as $331 / 3$ RPM transcriptions. "A" models also play LP Microgroove records.
POWER: 10 full watts, from push-pull 6V6's, inverse feedback, low distortion amplifier. Response within $=2 \mathrm{db}$. from 50 to 10,000 cycles. More actual distortion-free volume of
sound than ever before available in a unit this size.

VARIABLE SPEED: (Except TR-16B and BM MODELS which use a constant speed motor). Handy vernier speed adjustment lever varies basic speed to meet pitch or tempo requirements. Heavy General Industries governor controlled, two-speed motor. EXTRA LARGE SPEAKER: Fine quality $12^{\prime \prime}$ Alnico V permanent magnet dynamic speaker with 25 foot cable for convenient placing and best coverage. FLEXIBILITY: Separate mike and phono volume controls permit mixing of speech with records. Individual record bass boost tone control and separate high frequency tone control give effective control of all tonal requirements. Special circuit avoids bass emphasis of voice when bass is emphasized on records. Retains excellent bass even at low volumes. RUGGEDNESS: Kick-proof punched metal grill protects speaker. Sturdy plywood case, finished in airplane type fabricoid, features metal corners and glue blocks for extra strength. Heavy gauge welded steel chassis panel and motor board. All models $\mathrm{U} / \mathrm{L}$ approved. POWER CONSUMPTION: 60 watts, 117 volts, 60 cycles A.C. SIZE: $161 / 4^{\prime \prime} \times 161 / 4^{\prime \prime} \times 12^{\prime \prime}$. SHIPPING WEIGHT: 44 los.

TH-16AM This deluxe, dual-speed portable transcription player and P.A. systern plstys $33 \frac{1}{3}$ RPM LP-Microgroove Records as well as 78 RPM Standard Records and $33 / 3$ RPM Electrical Transcriptions up to $171 / 4^{\prime \prime}$ in diameter. Utilizes to the utmost the splendid reproducing qualities of the new variable reluctance type magnetic pickups. Incorporates an effective scratch suppressor. Unlike other attempts to play both LP Microgroove Records and the large Transcriptions, the TR-16AM plays

TR-16A This is a Crystal Pickup version of the TR-16AM for those desiring a unit of somewhat lower cost without a scratch suppressor. Identical in all other essential respects to the TR-16AM, this Model TR16A utilizes the latest Featherweight Crys-

TR-16BM A deluxe 3 -speed portable player which combines for the first time in one device the ability to play all types of records. Plays 45 RPM, $33^{1 / 3}$ LP Microgroove ticns up to $171 / 4^{\prime \prime}$ in diameter, plus regula 78 RPM Siondard Recordings, plus reguiar $\alpha$ constant speed rim drive motor for wow free performance with simple speed

LP Records on a standard size arm, thus achieving a definite saving in space and weight and with less tendency to groove skipping. The IP Arm may simply be depressed out of the way when not in use Placing LP Arm in operation automatically corrects response as necessary for best reproduction of LP Records. Input for microphone permits mixing of speech and records. Weighs only $381 / 2 \mathrm{lbs}$. TUBES (6) 2-6SC7, 1-6SJ7, 2-6V6GT, 1-6X5GT $\$ 199.50$.
tal Pickups with Semi-Permanent, easily replaceable needles of new design eliminate direct needle talk, avoid nuisance of constant needle replacement, and 1-6SJ7, 2-6V6GT, 1-6X5GT. LIST: $\$ 174.50$.
change lever. Exclusive depressable arm change lever. Exclusive depressable arm models give best results with each type of record and reduces space requirements. Includes variable reluctance pickup scratch filter, microphone input, bass and treble tone controls, A.C. power receptacle and radio input jack. Weight only 34 lbs .

TR-16B This is a crystal pickup version of the TR-16BM for those desiring a similar unit at somewhat lower cost without special scratch suppressor. Identical in all other respects to TR-I6BM, this model
utilizes Featherweight crystal pickups with semi-permanent easily replaceable needles similar to TR-16A. An outstanding value. Weight only 34 lbs . LIST: $\$ 159.50$.

TR-16M When LP records are no consideration, the TR-16M is unequalled for performance and long term dependability. It plays standard records and electrical transcriptions up to $171 / 4^{\prime \prime}$ in diameter, and includes the variable reluctance magnetic pickup, and desirable scratch sup pressor, which can be cut in or out at whone input os the same added microphone input as the other models, the

#### Abstract

TR-16M can be used with the greatest efficiency by lecturers, tecchers, dancing instructors, for community square dancing groups and in a host of other applications requiring best tone quality and performance. Rubber pad protects pickup if accidentally dropped. Weighs 38 lbs . TUBES: (Same as Model TR-16AM). LIST: $\$ 179.50$.

TR-16 This is one of the most popular players ever offered the trade. Identical in all essential respects to the TR-16M but utilizes a fine quality Featherweight Crystal Pickup for those desiring a lower cost unit than the TR-16M without scratch sup pressor. New Semi-Permanent, easily replaceable needle of new design prevents

direct needle talk and assures long record life and low distortion. A popular favorite with educators throughout the nation for utility applications where economy in initial cost and maintenance is important. Weighs only 38 lbs. TUBES: (Same as TR-16A). LIST: $\$ 159.50$.

TR-91: A distinct contribution to high quality P.A. systems. Features sextuple alloy and copper shielding for quiet operation right in amp. proper; alloy core and specially designed windings for extended frequency response from 20 to 20,000 cycles; plug base for easy instalation without tools in any $H$ or $K$ series Newcomb amp. For use between $30-50$ or $200-250$ ohm mikes and grid. Shipping weight, $11 / 4 \mathrm{lbs}$. LIST: $\$ 23.50$.

TR-92: Input impedance 5,000 ohms to grid for bridging a 500600 ohm line. Alloy shielded for minimum hum. When plugged into the socket provided on K50B, H50B, H25B, it converts these amps for use as bridging amps. Shipping weight, $11 / 4$ lbs. LIST: $\$ 19.50$.

TR-100: Identical to TR-91 but designed for use between 125-150 or $500-600 \mathrm{ohm}$ microphone and grid. LIST: $\$ 23.50$.

RC-6

## LP-1 SCRATCH FILTER

Another contribution by Newcomb to improved record response for the most critical and demanding listener. Simple to install in commercial or professional systems or home phonographs. Can be connected easily by any serviceman. Wired between a arystal pickup and an amplifier, it areatly improves the aspons of scratch. Unlike other methods the LP-1 retains excellent brilliance of response. Four steps of adjustment provide adequate control for all records, regardless of quality. LIST: \$25.00.

## MA-1 MAGNETIC PICKUP ADAPTER

MA-1 provides an inexpensive means of connecting variable reluctance pickups such as the new G.E., to any mike input. Added feature is incorporation of an effective scratch filter which may be cut in or out with a convenient switch. Initial wiring is for G.E. Pickup. Simple jumper charge quickly adapts the MA-1 for others such as Pickering, Lear, Astatic, etc. Size: $3^{\prime \prime} \times 31 / 4^{\prime \prime} \times 11 / 4^{\prime \prime}$. Shipping weight: 1 lb . LIST: $\$ 5.00$.

## "Take It Easy-Tell It to 'Elsie'"

- "Elsie" carries messages with the speed of sound.
- An eager little helper that gives and gets information quicker than you can say "scat."
- Always ready to serve you instantly.
- Works willingly for a fraction of a cent a day.
- Simple to install - As easy as hanging a picture.
- "Elsie's". house is a handsome Bakelite cabinet of walnut hue, streamlined with that stunning "new look."
- Guranteed by the makers of the world's most complete and highly perfected line of inter-communication.

Perfect for the home, office, farm, store, etc.-wherever two-way communication is needed between two points. Consists of one Master unit and one Sub-Station. System can be used either "Privately" or "Non-Privately." If "Non-Privately," the TalkListen control is not required to be used by persons at Sub-Station, and they are permitted to answer from distances even up to forty feet. Ideal for the nursery-you can keep tuned to baby's slighest move-no more getting up to see if baby is all right. Smartly styled matching cabinets of molded walnut Bakelite. Operates universally on $110-115$ volts, AC or DC. The Sub-Station does not consume current and can be installed most anywhere. Cabinets measure $81 / 4^{\prime \prime} \times 61 / 4^{\prime \prime} \times 71 / 2^{\prime \prime}$. Weight packed, 12 lbs .
 be connected 'privately" or "non-privately' one time. Sub-Stations can "Silent Feature" " Has the TALK-A-PHONE non-privalure". Sub-Stations, whether connected 'privately' or Stations caty, can originate calls to the Master Station. The Subans considerable distances from the Master unit. Once a conversation has been initiated, with a "non-private" system, persons at Sub-Station locations need operate no contrels and can, reply from a distance. The Sub-Stations do not consume electric current and can be installed most anywhere. Cabinets measure $81 / 4^{\prime \prime} \times 61 / 4^{\prime \prime} \times$ $71 / 2^{\prime \prime}$. Weight packed - Master, 8 lbs., Sub-Stations, 5 lbs. Master Station operates universally on $\mid 10-1 / 5$ volts, AC-DC.'

ILLINOIS

Work faster, more efficiently, more economically - use the "Chief Forty-Niner." Eliminate "getting up and down," "going through"' a busy switchboard, "waiting" to see your man. Touch of button gives you instant and direct two-way communication with sales, engineering, stockroom, shipping - without anyone leaving work. Direct that non-productive effort into productive results - add $20 \%$ to your day.

## ONE MODEL DOES EVERYTHING

TALK-A.PHONE's patented exclusive 'DYNASONIC' features gives you one model that "Does Everything." The same unit can be used for every type of application, whether it be as all Master Stations, or a Master and Staff Stations, or a number of Masters inter-mixed as all Master Stations, or a Master and Staff Stations, or a number of Masters inter-mixed as with all Staff Stations. Six, twelve, twenty and thirty capacity Master Stations can be used as with all Staff Stations. Six, twelve, twenty and thirty capacity Master Stations can be used one, two or six Master Stations, depending on its capacity. Staff Stations converse with Master Stations only. Staff Stations are not connected to electrical outlet.
Through its "'DIFFERENTIAL STAFF'" feature, TALK-A-PHONE permits any Staff Station to be used as either "Private" or "Non-Private", and also permits some Staff Stations to be "Private" and others "Non-Private" in the same system. "Private"' Staff Stations have complete privacy, and no other station can "listen-in". Persons at "Non-Private" Staff Stations can answer from a distance up to 50 feet from the unit without leaving work. All Master and Staff Stations are assured of privacy, except where by choice, Staff Stations are designated as "Non-Private", in which case the Master Station can "listen-in" on the "Non-Private" Statf Stations.
BEAUTIFULLY STYLED: The Bakelite walnut cabinet of the "CHIEF FORTY. NINER" is unsurpassed in simplicity of design and appearance.
TRANSLUCENT LIGHTING further enhances its beauty as well as indicating whether the unit is "on" or "off
MULTI-MATIC SELECTOR: A patented exclusive TALK-A.PHONE feature. Twelve, twenty thirty, station capacity in SAME BEAUTIFUL CABINET with only TWELVE PUSH BUTTONS. Six-station Master has six push buttons.
HOLD-A-MATIC CONFERENCE CONTROL: TALK.A-PHONE "HOLD.AMATIC' feature ALLOWS CONFERENCE between THREE or a GROUP OF STATIONS by merely selecting desired buttons.
UNI-TRANS: Gives you "DICTATION CONTROL."
VOICE RANGE POWER: The powerful, rugged amplifier gives you amazing, brilliant "voice range" power. Stations may be up to 3000 feet apart.
DEPENDABILITY: PROVED IN BILLIONS OF HOURS OF ACTUAL USE.
PRIVACY EARPHONE: Optional equipment on Master Stations. Provides listening privacy; and conversation with other Masters without continuous operation of touch bar.
POWER PAGING: Optional Booster for high power paging. May be added at any time. UNIVERSAL UNFAILING OPERATION: Designed to withstand continuous day and night use. Operates anywhere on $110-120$ volts, alternating current, 60, 50, 40 and 25 cycles; and 110-120 volts, direct current, at a cost of but a fraction of a cent a day.

## UNDERWRITERS' LABORATORIES APPROVED!

COMPLETE PACKAGE UNIT: The "CHIEF FORTY-NINER" is complete with iunction box - ready to plug in. Easy-to-follow instructions permit "anybody" to install TALK.A.PHONE.

[^7]Manufactured under exclusive TALK-A-PHONE Patents. Licensed under U. S. Patents of A. T. \& T. Co. and Western Electric Co. Inc. Prices and Specifications Subject to Change Without Notice

## CRYSTAL PICKUPS

## MAGIC TONE CELL

Replaces crystals in RCA Victor radio-phonographs and recordplayers (1938 and later). Permanent-type jewel point stylus. At 400 cycles, it has approximate impedance of 200,000 ohms and an output of approximately $11 / 2$ volts. When used as
replacement for needle-type pickups, slight adjustment of phono input circuit may be required for best tone and volume. Installation data inclucled. Stock No. 211 X1. Sugg'd List Price: $\$ 7.00$.

## SILENT SAPPHIRE

Interchangeable with 70 different phonograph crystals. Similar to Magic Tone Cell in design and characteristics, but smalter in size. Comes complete with crystal, mounting plate, screws, and complete electrical and mechanical installation data. (For additional information see RCA Crystal Pickup Data shect, Form 2F479.) RCA Silent Sapphire, Stock No. 212X1. Sugg'd List Price: $\$ 7.00$.

## alNIC0 5 PM LOUDSPEAKERS

All component parts of the new Alnico 5 Loudspeakers are made to the rigid specifications of G-E quality control. This feature, in addition to highly efficient manufacturing skill, combined with the "know-how" of G-E engineers, has made these new superb speakers possible - unsurpassed in fidelity, dependability and durability.

4"
GENERAL ELECTRIC'S new 4 -inch speakers are the result of years of intensive engineering research to produce units of reduced size with maxinnum etticiency for use in small portahle and table mudel riceivers. In ald ation to having the "stiy-bright" finish and the aluminum foil base voice coil, the new 4 -inch speakers are considerably lighter in weight and more compact. This reduction in weight and sprack has hworn accomplished through the use of Alnico 5 magnet material, all-weld construction, and smaller yoke aвsentuly.
$5^{1 / 4}{ }^{\prime \prime}$
GENERAL ELECTRIC'S $51 / 4-1 N$. PM speakers have all been designed and developed to provide full, true. low notes and excellent high freguency definition for voice or music reproduction. Skilliul designing bas heen applied to all details to assure the best possille results.
$6^{1 / 2 "}$

GENERAL ELECTRIC $61 / 2$-inch loudspeakers are the result of vears of persisient development to improve performance. Never were ideas introduced and combined with hetter quality materials. Greater sensitivity and power capacity in more compact space was achieved by these methods.

## 8'

The NEW ALNICO 5 PERMANENT MAGNET material was chiefly responsibie for maintaining the excellent performance of the G-E 8 -inch speakers and still keeping the overall size smaller. The speakers are capable of handling full audio power witli very little distortion. These speakers are recommended for cquality in design and faithful reproducing characteristics.

## G-E LOUDSPEAKER FEATURES

ALNICO 5 MAGNET MA. TERIAL is one of the great wartime engineering developments. Its energy per unit volume - approximately three times as great as other magnets-has enabled G-E engineers to design a new line of smaller speakers with better performance characteristics.

ALL WELD CONSTRUCTION of the newly designed G-E Alnico 5 Loudspeakers not only reduces the weight and size but also increases the rigility necessary for perfect alignment of all parts. It also eliminates the possibility of dust and moisture accumulation and simplifies the replacement of damaged cones.

## 10"

GENERAL ELECTRIC'S new 10 -inch P.M. speakers are the result of application of latest developments in scientific laboratory tone reproduction. Especially designed for hrilliant reproduction of voice and music. They represent a perfect balance in relative factors of performance ability, cost, and appearance.

## 12"

GENERAL ELECTRIC'S powerful 12 inch permanent magnet loudspeakers are designed to provide faithful tone reproduction at high levels. They equal or surpass the performance of electro-dynamic speakers of the same size. All weld construction has minimized distortion at maximum operation levels by eliminating vibration.

ALUMINUM FOIL BASE VOICE COILS only are used in all G.E. permanent magnet speakers. Exact concentric location with the collar of the spider assembly insures excellent alignment. Humidity or excessive temperature variations do not affect the aluminum foil voice coils, making this type of speaker ideal for receivers designed for use in export markets.

$\$ 166.67$
The N-1000-B network associated with the 604 B Duplex must bo ordered as a separate item. List Price $\$ 24.00$.

The Altec Lansing Model 604B Duplex and associated N-1000B Network represents the finest loudspeaker on the market. Manufactured by the same company which makes the famous "Voice of the Theatre" loudspeaker systems used by leading motion picture theatres, this compact unit has all of the fine design principles and construction that have heretofore been available only in the most costly loudspeakers offered for professional use and laboratory standards. I'rice las not been spared to make the Duplex the peer of all loudspeakers.

The unusual feutures are (a) Two-way operation utilizing separate diaphragms and voice coils for high and low frequencies. (b) Multicellular horn to provide uniform sound distribution over a wide area. (c) Alnico No. 5 permanent magnets designed for total absence of external stray fields. (d) Both the high and low frequency voice coils made of edge-wise wound ribbon to provide $22 \%$ greater efficiency. (e) Large $3^{\prime \prime}$ low frequency voice coil for high power capacity. (f) Frequency response of 30 to 16,000 cycles more than spans FM range. (g) Low crossover of 1,000 cycles to assure that the cone will operate as a stiff piston. (h) Overall acoustic efficiency 3 to 5 db greater than the ordinary loudspeaker.
The Model 604 B Duplex Loudspealier and associated N-1000B Network are available separately, or can be supplied together in a number of specially constructed baffe cabinets as illustrated. The cabinet combinations are known as Duplex Loudspeaker Systems.

The Duplex Loudspeaker particularly mects the critical requirements of broadeast and recording studio monitoring, high quality public address and music distribution systems, and when used with 16 mm . sound equipment will increase the audience coverage many foll. Music lovers and discerning people require the Duplex for home use with fine phonograph records and FM reception.
After raking acoustic measurements on hundreds of speakers and speaker systems, Altec Lansing makes this unqualified statement: to the best of our knowledge, the frequency response curve of the 604 B Duplex cannot be equalled by any speaker unit or speaker system outside the large theatre-type systems!

MODEL 603B
DIA-CONE SPEAKE
In the new 603 B the magnets of Alnico V massive marnetic circuit with larger than leaore and in their increase in efficiency ( 2.5 db over the old 603). An improved cone increase in efficiency ( 2.5 db over the old 603). An improved cone technique greatly increases the high frequency reproduction and
smooths the overall response. mooths the overall response.
All of the features that contributed to the excellence of the old 603 have been retained. The $3^{\prime \prime}$ voice coil is wound with edre-wound aluminum ribhon, the Dia-Cone principle provides extended frequency response from the aluminum diaphragm over the voice coil, the multicell horn loads the high frequency diaphragm and gives smooth distribution of high irequencies over a wide angle, the large 15 insures full bass reproduction and large power-handling capacity.

DIA-CONE SPEAKER

## MODEL 603B

## MULTICELL DIA-CONE SPEAKER

The Altec Lansing 603B Multicell Dia-Cone represents a fundamental improvement over the old 603 . These new features make the 603 B the unanimous choice of those who require an economical, high-quality speaker. For the sound man it offers high efficiency and wide angle sound distribution; music lovers will delight in its frequency response and freedom from distortion.

MODEL 400B

The Altec Lansing Model 400B Dia-Cone $8^{\prime \prime}$ speaker has been designed especially for uses where the benefits of a been designed especially for uses where the benefits of a larger speaker can not be tal
space and weight limitations.

The Model 400 B Dia-Cone is a low-priced, high-quality unit of very high efficiency-a much greater efficiency than is found in the ordinary $8^{\prime \prime}$ speakers. Its light weight and small size make it ideally adaptable for portable uses such as 16 MM sound, magnetic recorders, and in installations such as airplanes, buses, etc.

The Altec Lansing Model 600B Dia-Cone Speaker is similar in design to the Model 603 B Dia-Cone, using the exclusive Dia-Cone princi-Dia-Cone, using the exclusive Dia-cone do not he. It meets the needs or those who not wish to invest in more expensive speakers, yet hose training, musical educa ion, soun con faithful reproduction of sound.
The Model G00B Dia-Cone speaker has an Alnico $V$ permanent magnet and is mounted in a $12^{\prime \prime}$ frame. It uses a $3^{\prime \prime}$ edgewise wound aluminum voice coil to which is mounted a domed aluminum alloy metal diaphragm and a seamless molded paper cone. The cone
 ibrates with the roice coil as a piston up to diaphragm, with its high mass stiffness, continues to operate as a piston with the voice coil, resulting in true reproduction of the higher frequencies.

Because of its efficiency, small space requirements, light weight and superior quality of reproduction, the Model 600 B Dia-Cone Speaker is an ideal unit in the lower priced speaker field.
A completely new cone technique has extended and smoothed out the frequency response of the new 600 B Muiticell Dia. Cone to the point where this model represents a vast improvement over the earlier 600 model.

## MULTICELLULAR HORNS

Altec Lansing multi-eellular horns are constructed from exponential horn cells grouped in different configurations to meet various sound distribution requirements. Each cell is a true exponential horn. The large nulti-celhular horn provides the best way of covering long distances and large areas with high levels of quality acoustic power in the frequency range ahove $200-300$ cycles. By choosing the proper configuration of cells, the sound output can be directed for even distrilution over any horizontal and vertical area desired; and conversely, to a large degree the sound can be kept from unwanted areas such as walls and ceiling which might produce echoes, slaps, reverherations, efc. These horms find particular application in large buildings with high noise levels, reverberant cathedrals, ball parks, skating rinks, stadia, race tracks, airports, church carillons, sports arenas, etc.

The chart shows multicellular horns available. Note that a throat is not supplied as part of the multi-cellular forn and must he ordered separately according to the type required.

The use of tangential compliances in the diaphragm and edgewise wound ribbon wire in the voice coil provife maximum edgewise wound rabon wire in the voice coil provite maximum power handling capacity and acoustic output. Berylium copper leads, spot-welded to the roice coil, provide heavy duty connec-
tions which will not fatigue under use. The entire diaphragm tions which will not fatigue under use. The entire diaphragm
and roice coil ansembly which is mounted in a cast bakelite ring, and voice coil assem
is field replaceable.

When using the 290 speaker init for all range reproduction. it is necessary to attenuate the frequencies below 300 cycles which would otherwise damage the diaphragm and voice coil assembly. This attenuation may be accomplished by the proper sized capacitor cither in the input or output circuit of the final power amplifier.

DIVISION OF AIREON MFG. CORP.
SALES OFFICE and FACTORY 1401 FAIRFAX TRAFFICWAY KANSAS CITY, KANSAS

## FIELD COIL MODELS

Dustproof, all-welded construction with hum bucking coils or slugs.

## PUBLIC ADDRESS SPEAKERS

These units are primarily engineered for heavy duty public address service. They are conservatively rated, and are designed to give years of trouble-free service. The efficiency and the tone quality of these units are such that they are recommended for all purposes requiring heavy duty units.

## EXTENDED RANGE SPEAKERS

Designed expressly for F.M., television, and all installations requiring good performance to 10,000 e.p.s. and beyond CINAXIAL models illustrated at left extend to 15,000 c.p.s. Not recommended for general public address use because of limited power handing capacity. Model P8JHFl and P12JHFI are single cone speakers; CiN-12A consists of $12^{\prime \prime}$ low frequency speaker and $3^{\prime \prime}$ high frequency speaker. CIN-15B and CIN-15C have $15^{\prime \prime}$ low frequency speaker and $5^{\prime \prime}$ high frequency units. Bridging networks are built-in, require no controls.

## ALNICO 5-PERMANENT MAGNET SPEAKERS

## REPLACEMENT SPEAKERS

For all receivers, from the smallest to the larger models. Dustproof, all-welded construction, all magnets soldered.

TRANSFORMERS
FIXED IMPEDANCE

[^8]

Standard Series speakers, although moderately priced, are exceptionally good in performance and are highly recommended for use in radio and television receivers, recorders, public address equipment, intercom munication systems and similar applications. Models listed on this page bave been completely redesigned in every detail. Magnetic structures have been designed to achieve maximum gap enerry, concs selected fo uniformity of response, and all speakers are completely dust-proof. Models listed are standard fidelity response only. Standard Series speakers are finished in aluminum.

## ALNICO 5 PM MODELS

These PM speakers cmbody the highly efficient Alnico 5 magnets which insure long life and highest efficiency. Because Alnico 5 maynets are many times more powerful, ounce for ounce, than their predecessors, speakers so equipped offer obvious advantages; lighter weight, for savings in shipping costs; and smaller size, for savings in space in cabinet installations.

*Size recommended. Sce Transformer listing. tMillions of crgs
$\ddagger$ Tapped at 300 ohms. 1500 ohm section can be used at full power excitation. Field resistance for full excitation will rise approximately $20 \%$. §No transformer mounting facilities

## VOLUME AND RANGE CONTROLS

These "L Pad" type volume controls are highly satisfactory for use in voice coil circuits. Complete with pointer knob and escutcheons

```
T-276-Level Control, 6-8 ohms, 5 watts
T-411-Level Control, 6-8 ohms, 15 watt
T-606-Range Control, 16 ohms, 15 watts
T. 760 -Level Control, \(3-4\) ohms, 5 watts
ST-761-Level Controi, 500-600 ohms, 15 watt

\section*{Concert SPEAKERS}

JENSEN Concert Series speakers have long been known and acclaimed by the trade and by users for their plus performance. From the earliest days. Concert speakers have been recognized by such familiar designations as A12-PM, PM8-C and others and have been known as the finest speakers anywhere available for heary-duty applications. Now, in greatly improved design, they are highly
recommended for any purpose where exceptional power handling ability and hich-quality verformance are essential. Standard fidelity models are listed on this page.

Concert speakers are attractively finished in blue-gray lacquer and completely dustproofed. Fiell coil models are equipped with hum neutralizing coils.

\section*{AUDITORIUM SPEAKERS \(\ddagger\)}

The first highly-efficient large-size speaker was designed and produced hy JESSEN in 1928. It was namet the "Audiotium" and never were critics more consistent in its endorsempht as the utmost in hearr-duty speakers. For more than 20 years JENSEN Auditnrium speakers have set the highest standards for efticiency, response characteristics and faithful performance. Today, the Auditorium line las been completely redesisned and comprises meniahy the hest known and most highly respected speakers available, second only to dinsed coaxians. where are recommended for theatres, public address srstems, fine electronic musical instruments, where the utmost in quality reproduction and power handling ability are required.

Q8P HIGH-FREQUENCY SPEAKER

Designed to reproduce the high frequencies from 4,000 to 15,000 cps., when used with dividing network (such as A40-1) and suitable low frequency speaker. Impedance, 16 ohms. Overall diameter, \(51 / 2^{\prime \prime}\). Depth, \(35 / 8^{\prime \prime}\). P'M. design.

\section*{A40-1 NETWORK}

This uniquely designed two-
 date any suitable 8 olnm \(12^{\prime \prime}\) or \(15^{\prime \prime}\) speaker. High channel takes one to four Q8P High Frequency Speakers (16, 8 and 4 ohm taps). Input, 500 ohins. High Frequency Range Control Switch feature included. Specify

ST-604-List Price
\(\$ 39.40\)

\section*{JENSEN HYPEX PROJECTORS}

Because of the Hypex formula (Patent \(2,888,262\) ) giving wider sound distri. bution and greatly improved acoustical performance, JENSEN Hypex projectors are superior to the usual "exponential" type horns. The Alnico 5 unit is entirely enclosed within the one-piece rigid horn yet easily removed and replaced. Stainless steel and other corrosion-resistant materials and specially treated steel parts insure against weather exposure. Models VH-24, VH-20 and VH-15 have mounting brackets with clutch-tyse heavy "U" trunnions which afford complete flexibility of adjustmeni with positive locking into desired position. Weatherproof terminal boxes provide easy, solderless connections with no exposed terminals. Model VH-91 has a universal mounting bracket which permits pointing in any direction and secure locking by a single wing nut.

VR-11

\section*{HYPEX "Three-sixły" PROJECTORS}

Designed for the reproduction of speech and music signals at high efficiency where high noise levels exist. The Hypex formula made famous by JENSEN Hypex projectors, is incorporated in their design giving greatly improved acoustical performance. With the sound distributed over a circle, they are especially suitable for installations where coverage of relatively large areas and suspension from the ceiling are desired. Model VR-11 is recommended for speech reproduction while Model VR-241, of larger size, is intended for speech and music reinforcement. Driver unit. has phenolic diaphragm; VR-241 uses same diaphragm as VII-24 and VII-20; VR-11 uses same diaphragm as VH-15 and VHI-91. VR-241 is equipped with weatherproof terminal hox with con. necting cable passing through rubber grommet and leads attached to screw terminals provided. VR-11 has two-conductor rubber covered cable for connections. Both equipped with heavy eyebolt at top for suspension.

\section*{MODEL V-21 DRIVER UNIT}

This ariver unit incorporates the driver element used in the new Hypex projectors and is electrically and mechanically interchangeable with the former U-20 ST-630 and U-201 ST-732 Driver units. It is designed for replacement service on former Models H-20 ST-726, M-201 ST-733 and II-Y4 ST-727 Hypex horns. Unit is PM type and equipped with internal screw terminals. Flanse is deisgned for \(1 / 4\) " bolt attachment, with three \({ }^{13^{\prime \prime}}\) holes spaced 120 degrees apart on a radius of \(23 / 4^{\prime \prime}\). Voice coil input 16 ohms and power rating 25 watts.
Model V-21 Driver Unit, ST-787
List Price \(\$ 32.50\)

SPH-81
Model SPH-81 Projector, ST-633
EA-5 Adjustable Stand, ST-730...

\section*{TYPE 'S" PROJECTOR}

These projectors are complete assemblies of specially desirned driver unit and acoustic system, utilizing the reri-Dynamic principle and correcty engineered projector horn. Response is unusually good in the 100 -cycle region and good efficiency is maintained to 5500 cycles, thus qualifying the projector for music and speech reproduction. Projector is suitahle for use indoors or out because it is completely weatherproofed. Complete with pluge but without stand.

List Price
- Adjulable Stand, ST-730..................................................... 5.00

\section*{SPEECH MASTER PROJECTORS}
sturdy construction, overall mechanical protection, double dustproofing, streamline design and exceptional foustical performance proofing, streamine design and exceptional foustical performance PM design. Good talk-back performance in PA systems. Hammered gray finsh; chrome trim. RC \(36^{\prime \prime}\) cord, Space within case for \(1 / 2^{\prime \prime} \times 1 / 2^{\prime \prime}\) transformer.

H-510

\section*{GENUINE JENSEN WIDE-RANGE SERIES}

No longer is truly good listening ruled out by cost or size restrictions. Now music can come to life for everyone, for Genuine JENSEN Wide Range loudspeakers include small sizes as well as large .. . low-cost units as well as more expensive models.
The four new JENSEN Coaxial speakers which replace all previous models embody the latest developments in loudspeaker design: the Wide-Range ACOUSTIC LENS for h-f dispersion (in Model H-510), annular Diaplane

K-210

 radiators, and new Hypex contour h-f horns. As a result these speakers achieve thrillingly realistic instrumental

Typical of JENSEN leadership is the ACOUSTIC LENS used on Model H-510 Coaxial. This lens acts in conjunction with the \(h\)-f horn to distribute \(h\)-f radiation uniformly over a wide angle, insuring constant balance and high quality reproduction throughout the whole room.
and vocal tone quality and subtly satisfying "presence" low in cost in comparison with previous highestquality systems. The term "high-fidelity" applied to these Coaxial systems connotes wider frequency range, greater response uniformity and better polar characteristics.

\section*{CONTROL NETWORK}

Adjustable level and himh-frequency range controls for Models \(\mathbf{H}-510\), \(\mathrm{K}-410\) and \(\mathrm{K}-310\) Coaxial speakers. Mounts directly on speaker lousing. Plug-in commections. Input impedance 16 ohms. Mav be used with Impedance-Adjusting Transformers. Chassis complete with network, speaker comnection cord and plug, Level Control and H-F IRange Control on individual \(30^{\prime \prime}\) cables for remote mounting on cabinet, satin brass flush-type escutcheons, bar knobs and mountins serews.
A-110 Control Network, ST-832.
List Price \(\$ 26.50\)

\section*{H-F CONTROL}
"I""type variable control for "shelving" high-frequency response of Model K-210 Coaxial. Impedance 16 ohms. Complete with flushtype satin brass escutcheon and bar knoh.
ST- 836 Control
List Price \(\$ 4.85\)

\section*{IMPEDANCE-ADJUSTING TRANSFORMERS}

Designed to provile alternative input impedances for Models II-510, K-410 and K-310 Coaxial speakers. IIigh-fidelity. Switch on chassis gives choice of two impedance values. No wiring necessary, connecting plug inserted in sochet on speaker terminal panel. May le used with Model A-110 Control Network.
Model T-101 Transformer Assembly, ST-833. Impedance 4 and 8 ohms. List Price \(\$ 12.00\) Net Each \(\$ 7.20\)

Model T-102 Transformer Assembly, ST-834. Imperlances \(500-600\) and 250 ohms. List l'rice \(\$ 12.00\).

Model T-103 Transformer Assembly, ST-835. Impedances 10,000 anul 5,000 ohms, center tapped. For plate or high-imperdance line coupling. List Price \(\$ 12.00\).

Type D

Type H

\section*{BASS REFLEX CABINETS}

TYPE "M" CUSTOMODE cabinets bring new beauty and utility to the loudspeaker enclosures. Embodying the famous JENSEN Bass Reflex prineiple, they are designed to house \(15^{\prime \prime}\) speakers. Although a basic CUSTOMODE unit, Tyik " \(M\) " cabinet may be used alone as a separate speaker cabinet. Four concealed cut-outs provided, any two of which may be removed for insertion of flush-type H-F and Level Controls. Foot Assembly furnished, loose, so cabinet may be placed on end or side as desired. Ample space atop cabinet for large receiver.

TYPE "D" Bass Reflex cabinets are handsomely styled, and are well constructed of heautifully striped satin finish veneer walnut, with interlaced bronze strip grille over matching fabric.

TYPE " \(B\) " cabinets, inexpensive but durably built enclosures, are well constructed of impregnated composition board and finished in hammered brown lacquer.

TYPE "H" cabinets are sturdily built and incorporate the famons Bass Reflex principle. With front curved to a \(141 / 8\) inch radius, they are admirably shaped to fit into corners but may be placed in any number of positions as suggested. Type "II" cabinets are finished in brown opaqu* lacquer but may be refinished by the purchaser to mateh the locale of the inslallation. Brackets are furnished for mounting on wall or post. Only one size is offered-for 8 -inch speakers-and JENSEN Model P-8-SH speaker is recommended for optimum performance although any 8 -inch speaker may be used.

TYPE "J" cabinets incorporate the Peri-dynamic principle and are designed for wall or post mounting. These cabinets are finished in simulated brown leather with grained effect, with chrome-trimmed grille. JENSEN Model I'GTH speaker is recommended with this cabinet although any 6 -inch speaker mav he used. Furnished with brackets for mounting.

IMPEDANCE MATCHING TRANSFORMERS

Loudspeakers are relatively low－impedance devices with voice coil impedance values amping from 3 to 50 olms．Vacuum tule power output stages on the other hand，are high－impedance devices with impedance load rated anywhere from 1,000 to 14,000 ohms．To reconcile these widely differing impedarces，output or impedance matching transformers must be inserted between the signal output and the loudspeaker voice coil．To letermine which transformer is to be used in any riven case，first of all find out the impedance of the loudspeatier in question and then locate for that speaker the
transformer which will match nearest the impedance of the signal source．Differences of the order of \(10 \%\) are usnally of no importance but if a close match cannot be ohtained，it is best to select an im － pedance value which will prestnt a higher rather than lower－than－rated impedance to the output tubes．Thus where a 5,000 －to－ 16 ohm trans－ former＇is nesiled，it would be better to select a 6.000 －to－16 ohm unit than a 4,000 －to． 16 ohm unit．For full and complete treatise on impedance matching，consult Jensen Technical Monograph No． 2. （Price 25c）．

\section*{ADJUSTABLE IMPEDANCE}

Type＂ZX＂For matching conventional＂plate＂impedance palues．Adjustments are easily made with fexible lead and pla－thy jack．Impedance salues：roice coil，4，500．7．000． 10,000 and 14.000 olms．All except voice coil are center－taped for push－pull tubes

\title{
SPEAKERS
}

These speakers are engineered and manufactured solely for the replacement field for use in home receivers, auto sets, television sets and intercommunicafion systems. RMA standard dimensions. Fully dustproofed. Baked aluminum enamel finish. RMA service guarantee. QUAM UNIVERSAL MOUNTING BRACKET comes with all \(31 / 2^{\prime \prime}\) to \(6 \frac{1}{2 \prime \prime}\) speakers and may be attached to any two of the four mounting holes in the \(U\) shaped pot.

\(\dagger 450\) ohm fields (equipped with hum bucking coils).
\(31 / 2^{\prime \prime}\) speakers - without Adjust-a-Cone suspension.
Voice coil impedance of above speakers is \(3.2 \mathrm{ohms} \pm 10 \%\).

\footnotetext{
QUAM DESCRIPTIVE PART NUMBERS: Of great convenience in order ing because they convey the specifications of the speaker. First digit indicates size; second letter signifies type, i.e., E: Electro; A: Alnico V
}

Permanent Magnet; last numbers indicate either field resistance or magnet size in ounces. For example: \#5E45 is a \(5^{\prime \prime}\) Electro 450 ohm field; \(\# 4 \vec{A} 1\) is a \(4^{\prime \prime}\) Alnico \(V\) P.M. with 1 oz. magnet.

\section*{SPEAKERS}

Figure C

Figure D

QUAM speakers have been produced under the same management since 1923 and are used by leading set and sound manufacturers throughout the world. They are nationally advertised, fully protected by patents and their use insures customer satisfaction. Special field and voice coils are supplied in QUAM speakers to fit both television and intercom replacements upon request.

Voice coil impedance of above speakers is \(\mathbf{6 - 8}\) ohms.

\section*{QUAM ADJUST-A.CONE SUSPENSION}

While in other speakers, the spider is cemented in place with no means of accurate final adjustment, the QUAM method permits precision centering of the voice coil in a final production operation.

QUAM U SHAPED COIL POT
A patented feature used throughout the QUAM replacement line, provides an unbroken flux path of sufficient cross section to carry the full energy of the magnetic field.

Never before such quality Hi-Fidelity Wide Range performance for so little money. Surpasses previous single, dual unit or coaxial speakers without the aftendant irritation often experienced due to phase and amplitude distortion inherent in the latter type. High level, uniform reproduction.

\section*{Coronet SUPREME HI-FIDELITY SERIES \\ Pat. Applied For}

Advance engineering features include: (1) Stability af low resonance values heretofore unattainable, (2) Resonance and alignment not affected by humidity variations, (3) Strength of cone anulus increased capacity 5 to 10 times. Comparative tests prove that CORONET Series have all desired qualities demanded in wide range Hi-Fidelity speakers . . . and at low cost.

\title{
Permofhex
}

\section*{PERMANENT MAGNET DYNAMIC SPEAKERS}
. . . . with Powerful ALNICO 5 Magnets
Like all Permoflux electronic and acoustical products, Permoflux PM Speakers, with their powerful, light weight Alnico 5 Magnets, are engineered to the highest performance standards. Their over-all sensitivity, wide frequency response and rugged mechanical design make them favorites wherever fidelity of
tone is an important consideration. Because of modern and efficient manufacturing methods and quality control systems which assure remarkable uniformity in production, Permoflux Speakers attain the performance originally engineered into them. The years of development experience behind the perfection achieved in Permoflux Speakers assures the finest sound reproduction in every application.

NOTE . . © The efficiency or sensitivity of a speaker is proportional to the flux density provided by the magnet. When the voice coil diameter is increased to provide greater watts power handling capacity, a larger magnet is required to give same flux density.
* Equipped with Universal Mounting Brackets.

\(4^{\prime \prime} \times 6^{\prime \prime}\) MODELS

\(5^{\prime \prime} \times 7^{\prime \prime}\) MODELS

\section*{RACON}

\section*{RE-ENTRANT TRUMPETS}

A compact trumpet of the double re-entrant type, nade to occupy a small space, yet having a long air column and delivering highly concentrated sound with the greatest efficiency over long distances. RACON RE-ENTRANT TRUMPETS have base and inside tone arm made of aluminum castings, outside bell of heavy gauge aluminum spinning; RE35, RE-50, RE-60 have center of RACON ACOUSTIC inaterial to prevent resonant effects prevalent in all large reflect ing surfaces. Sturdy construction makes them practi-
cally abuse-proof. Supplied with U-bracket mounting (ratchet swivel type on request). RE-60 and RE-50 have wide band frequency characteristics suitable for best musical reproduction. RE-35 and RE-25 most suitable for band music. All have high degree of intelligibility and are excellent for indoor or outdoor use. Chime systems, recreation centres, sound trucks, railroad and bus terminals, arenas, camps, and noisy factories where there is a high noise level to be overridden.

\end{tabular}

\section*{Waterproof Permanent Magnet Driver Units}

Latest improvements are incorporated in these driver units. Higher watt-handling capacity, greater effi-

ciency and practically lifetime operation. Finest grade of Alnico V steel magnets and Armco magnetic iron throughout. All steel parts plated to prevent corrosion. Units are magnetized, using an electromagnetic cutout switch which gives the maximum flux density obtainable in the gap. All magnets are measured for flux density and each unit is tested with special ap. paratus for power handling capacity as well as 300 -volt ground-test, making for uniformity and ability to withstand all types of service.
Long life plastic diaphragm and formers. Aluminum wire for voice coil to increase efficiency. Life-time leads. Completely waterproof, yet diaphragm easily removed if necessary.

\section*{DOUBLE RE-ENTRANT MARINE SPEAKERS}

A highly efficient double re-entrant type of horn. The Regular, Midget and Miniature Marine speakers are approved by the U. S. Coast Guard for all Emergency Loudspeaker Systems on slips, under the 53rd Supplement of the Bureau, after tests made by the Bureau of Standards, Washington, D. C. These Marine Speakers are used both as Loudspeakers and as Microphones. The driver Unit and connections are all enclosed, making a completely waterproof speaker not affected by temperature or weather, including use at sea. Made from a heavy aluminum spinning, having a base of heavy aluminum casting. Has special noncorrosive Aluminum casting; baked chromatic Undercoat Finish plus outside lacquer finish. Uses latest type of driver units. Supplied for three-legged flush type rear or U-bracket mounting. All Speakers have waterproof boxes for interior mounting of transformers. Can be used where space is limited, on board

MR-30M

ship, on deck, interior or pilot house, rail and bus terminals, in locomotives, railroad yards, police and fire cars, paging systems or anywhere high noise levels are to be overridden. (U-bracket supplied on request at small additional cost.)

\section*{RE-ENTRANT PAGING SPEAKERS}

RE-15
RE. 12

MN-16B

DW-9R

A compact type of double re-entrant speaker to fit all types of paging applications. Some ratchet wall type mountings. others flush wall type or U-bracket. Extremely efficient. Will override high noise levels. Mechanically constructed to be non-resonant so as to transmit all sound through the mouth. In all models but DW-9R drirer unit is completely cased. Can be used indoors or outdoors. Excellent sound energy
coverage as well as wide angle pick-up when used as a "talkback" from distances unobtainable with microphones. Designed for use where space is limited, but high noise levels are present. Rail and bus stations, on trains, in locomotives, on docks, on police and fire cars, for inter-com systems in schools, hospitals, offices and factories.

SR-12R & \(15^{\prime \prime}\) & \(9^{\prime \prime}\)
\end{tabular}

SR-15R
SR-12R

A weatherproof double re-entrant type horn and speaker designed to project sound over a complete circumference of \(360^{\circ}\). These are constructed to be nonresonant and in models SR-35R and SR-G0R the centre reflecting surface is of Racon Patented Acoustic Material. The deflectors are aluminum covered with this same material.
The two larger models can be used for the reproduc tion of music and speech and all models can be used for announcing and paging. The SR-60R is ideal for reproduction of church chimes.
Models SR-35R and SR-60R employ a standard thread and may be used with any Racon driver unit. Models SR-15R and SR-12R are supplied complete with builtin driver unit.

\title{
\(\rightarrow\) - \(\rightarrow\) Speakers \\ RACON Horn Units Horns \\ \\ STRAIGHT TRUMPETS
} \\ \\ STRAIGHT TRUMPETS
}

The most efficient horns obtainable. Output from any straight trumpet is approximately 2 DB higher than corre sponding re-entrant type with the same input. This is because straight trumpets lack the attenuation from resistance and reflection which is inherent in all re-entrant horns. Will override extremely high noise level, indoors or outdoors.
"DeLuxe" and "Stormproof" Trumpets are made of Racon Acoustic Cloth processed by a patented method which gives a non-vibratory wall, thereby increasing the output of the horn without loss due to wall vibration. Supplied for indoor use (DeLuxe type) and for outdoor use (Stormproof type)-guaranteed for life in all kinds of weather and temperature.
"All Aluminum" Trumpets are made of heavy gauge aluminum spinning with rolled beaded edge and cast aluminum throat sections.
"Unbreakable" Trumpets are made of heavy gauge aluminum spinning reinforced and damped with Patented Racon Acoustic Material to prevent wall vibration.
Larger sizes are useful for chime systems, airports, stadiums, parks, playgrounds, music festivals, for both excellent speech and music. Smaller sizes for railroad and bus terminals, waiting rooms, factories.

RAMUG
TB-150

This series of tweeters provides an economical and effective method of extending the range of conventional cone speakers. When used in conjunction with any welldesigned \(12^{\prime \prime}-15^{\prime \prime}\) cone speaker, a uniform response range is provided, from the lowest frequency of the cone to the limits of present day program material. Response is essentially flat to 12,000 cycles, with usable output to 15,000 cycles. Cellular horn design permits wide angle distribution. All models must be used with a crossover network for optimum performance. The networks listed below are recommended and when employed, any of the tweeter models may be used with amplifiers having an output rating to \(25-30\) watts.

\section*{NEW! RACON MICROPHONE STANDS}

All floor models have heavy cast iron base finished in black crinkle. All tubing of brass with heavy wall thickness and burnished chromium plated finish. Uses \(5 / 8^{\prime \prime}\) inner tubing and \(7 / 8^{\prime \prime}\) outer tubing. Table and hanquet models use loaded heavy spun steel bases with special turned-in beading -will not scratch the finest polished table top.

\section*{RACON LATEST IMPROVED CLUTCH ACTION}

A TOUCH to move the extension tubing up or down. Set in any position. No slipping, no wearing of fibre bushings, no turning and tightening of clutches, no turning of thumb screws to hold position of mike.

Special Improved Clutch supplied as part of mike stand or supplied as extra part to be added to old or new microphone stand to convert to latest type; merely remove old clutch arrangement and screw latest device to outer tubing for permanent adjustment.

\title{
"Heard Everywhere" FLUSH MOUNTING CEILING BAFFLES WITH "FLOATING CONICAL ACTION"
}

Model Nos.
BL6-A
BL8-A
BLI2-A
BL6-C
8L8-C 8L6-PC BL8-PC

PATENTED IN THE L.S.A. AND CANADA

\section*{DESCRIPTION OF BAFFLE}

The flush mounting ceiling baffle is designed to mount flush to the ceiling quickly by inserting 4 toggle bolts, completely sealing back of housing to the ceiling. This baffle is recommended for normal ceilings. Uniform sound reproduction at \(360^{\circ}\) giving CONTROLLED SOUND evenly in all directions. Baffle is made of spun metal, of either 18 or 20 gauge aluminum or copper. Heavy \(3 / 4\) " jute lines interior with louvres on sides for proper pressure relief.

\section*{ARCHITECTS' SPECIFICATIONS}

This speaker baffle housing contains a half inch flange at top with 4 holes evenly placed for proper mounting to the ceiling. The lower metal cone is mounted to the housing by 4 one-quarter inch formed metal rods having 4 hard rubber grommets preventing metallic resonance. The upper part of the rods are threaded and mount through a tempered masonite speaker ring. All hardware furnished complete with each baffle.

\section*{Recessed Wall Type Directional Speaker Baffles}

\section*{DESCRIPTION}

This speaker trim ring is made of spun metal, 18 or 20 gauge aluminum or copper. Flocked metal color grille cloth protects speaker conemasonite ring with 4 round head screws mounts through housing for mounting speaker. Housing has a depth of \(1 / 2^{\prime \prime}\) and a half inch flange for mounting housing to wall.

\section*{FEATURES}

Concealment of speakers. Easily installed,
Finished to match surroundings.

For Low

Model Nos: AL12-C ALI2-PC AL6-PC AL8-PC AL6-A AL8-A AL12-A AL6-C AL8-C

DIMENSIONS OF VARIOUS MODEL BAFFLES
The overall diameter at top of housing flange:
\(6^{\prime \prime}\) model - \(9{ }^{\prime \prime} /^{\prime \prime}\) in diameter. depth \(1 / /^{\prime \prime}\)
\(8^{\prime \prime}\) model \(113_{4}^{\prime \prime}\) in diameter, depth \(1 / 2^{\prime \prime}\)
12" model - \(16^{\prime \prime} 1^{\prime \prime}\) in in diameter, depth \(1 / 2^{\prime \prime}\)

\section*{Ceilings}

\section*{DESCRIPTION}

The false ceiling speaker housing is made of either 18 or 20 gauge aluminum or copper. Housing is spun metal, having a depth of \(1 / 2^{\prime \prime}\) and a half inch flange for mounting housing to ceiling. The lower metal cone is mounted to the housing by 4 one-quarter inch formed metal rods having 4 hard rubber grommets preventing metallic resonance. The upper part of the rods are threaded and mount through a tempered masonite speaker wing. All hardware furnished complete with each baffle. The sound coverage of this baffle is approximately \(360^{\circ}\).

\section*{MODEL P-52A Coaxial Speaker}

Combines in a single assembly a Low-Frequency unit of the cone type, a HighFrequency unit of the multicellular type and the complementary 2 -channel crossover. ideal for AM and FM reception, broadcasł station monitoring and sound-motion picture reproduction. Electrical Characteristics: (1) Power input: 20 Watts; (2) Crossover Frequency: 12,000 C.P.S.; (3) High-Frequency distribution: \(80^{\circ} \times 40^{\circ}\); (4) Field Excitation: \(6 \frac{1 / 2 \mathrm{lb}}{} \mathrm{l}\). Alnico 5; (5) Input impedance: 16 Ohms ; (6) Frequency response: \(\pm 5 \mathrm{db}\) from 40 to 14,000 C.P.S.; (7) Cone resonance: 41 cycles.
Physical Characteristics: (1) Overall Diameter: 151/8"; (2) Baffle Opening: 131/2"; (3) Depth behind mounting panel \(10^{\prime \prime}\); (4) Net Weight: 30 Pounds. Licensed under Western Electric Patents. . . . . . . . . . . . . . . . .Price \$205 List.

\section*{MODEL P-52FR and P-22FR Co-Spiral Speakers}

Subdues deficiencies both in the set itself and in source material. Built with the same precision limits and same engineering skill found in all Tru-Sonic units. Especially designed as a replacement speaker . . Full 15 watts of power handling capacity. Seamless molded curvilinear cone of new design. Two acoustic sections, one for reproducing lowest bass, and one for extended high tones. Reproducing range 40 to 14,000 cycles. Powerful Alnico 5 magnet. Greatest electro-acoustic transfer efficiency and widest range of any speaker utilizing one voice coil. \(90^{\circ}\) High-Frequency dispersion. Silver Spiral differential diffuser. Specifications: (1) Power Input: 15 Watts; (2) \(21 / 2 \mathrm{lb}\). Alnico 5; (3) Input Impedance: 8 or 16 Ohms; (4) Overall Diameter: \(151 / 2\) "; (5) Net Weight: \(23 \mathrm{lbs} .\). . . Licensed under Western Electric Patents.

Price, Model P-52FR, \(15^{\prime \prime}\) dia. \(\$ 80\); Model P-22FR, \(12^{\prime \prime}\) dia. \(\$ 70\) List. MODEL P-52HF Separate 2-Way System

In order to provide a de luxe presentation for the most discriminating audience, Stephens engineers have designed the Tru-Sonic Separate 2-Way Speaker System. Space requirements are greater than for the Tru-Sonic Coaxial unit, for in order to extend the tone range and permit the ultimate in realism, larger physical proportions are necessary. The P-52HF is standard in the Tru-Sonic Model 52U Utility Cabinet. Components consist of a Tru-Sonic Type P-15 High-Frequency Driver, a Model P-52LX Low-Frequency Driver, a Series 800 High-Frequency Cellular Horn and a Model 800 X Crossover. Electrical Characteristics: (1) Power input: 20 Watts; (2) Crossover frequency: 800 cycles; (3) Number of high-frequency cells: 8,10 or 12 (See below); (4) \(61 / 2 \mathrm{lb}\). Alnico 5 ; (5) Input impedance: 16 Ohms; (6) Cone resonance: 41 cycles; (7) Frequency response: \(\pm 5 \mathrm{db}\) from 40 to 14,000 cycles. Weight: 130 lbs. Licensec under Western Electric Patents . . . . . Price, with \(2 \times 4\) horn \(\$ 320\), with \(2 \times 5\) horn \(\$ 332.50\), with \(2 \times 6\) horn \(\$ 345\), with \(2 \times 4\) horn in 52SD Cabinet \(\$ 440\) List. MODEL P-52LX and P-22L Low-Frequency Drivers
Low-Frequency driver components for Tru-Sonic Separate 2-Way Systems. (Model P-52LX illustrated and described. P-22L- same as P-52LX except 12 " cone diameter
 and \(21 / 2-\mathrm{lb}\). magnet.) Powerful \(15^{\prime \prime}\) speaker with curvilinear-designed, highly efficient seamless moulded and moisture-resistant cone. Suspension compliance has been carefully calculated to promote ideal piston-like action of the diaphragm. Effective driving area is approximately 125 sq. inches. Voice coil is \(2^{\prime \prime}\) in diameter, treated with a refined temperature-resistant varnish, and wound with highly conductive copper wire. Electrical Characteristics: (1)Power Input: 20 Watts ; (2) 4 lb . Alnico 5; (3) Input Impedance: 8 or 16 Ohms; (4) Cone Resonance: 41 cycles. Physical Characteristics: (1)Overall Diameter: \(15 \frac{1}{8}\) "; (2) Baffle Opening: \(131 / 2\) "; (3)Depth behind Mounting Panel: \(81 / 8^{\prime \prime}\); (4) Net Weight: 25 Pounds; (5) Mounting Dimensions: RMA Standard. Licensed under Western Electric Patents . . Price, Model P-52LX \$80; P-22L \(\$ 70\) List.

\section*{STEPHENS MANUFACTURING CORPORATION}

\section*{Speaker Systems for Components for 2-Way Speaker Systems}

Several systems of different crossover frequency and size may be assembled from the components shown here. However the same series of horns must be used with crossover networks of the same series number. For example, P-30 and P-40 Drivers should be used only with Series 400 and 600 Horns and Crossovers. The P-15 Driver is used with the Series 800 Horns and Crossovers only. It is desirable to use the lowest crossover and complementary components that the individual's space limitations and economy will permit. On the Series 400-600 Crossovers 2L-F, 8 ohm drivers, preferablyModeIP-52LX, are recommended.

\section*{HIGH-FREQUENCY HORNS}

In order for the listener who is off the axis to receive his balanced proportion of high to low tones, the highfrequency beam must be properly deflected. This is accomplished in Tru-Sonic standard High-Frequency Horns by utilizing multiple cells nested together so as to provide coverage through a large horizontal angle and a smaller vertical angle. The normal listening area is entirely served in this manner with high frequencies. The High-Frequency Horn serves an additional important purpose: its design provides proper acoustic loading on the high-frequency unit without which it cannot operate efficiently.

\section*{SERIES 400}

Model 425 H Horn. Takes P-30 or P-40 Driver. 400 cycle, \(2 \times 5\) configuration, \(40^{\circ} \times 100^{\circ}\) dispersion. \(43^{\prime \prime} \mathrm{W} \times 17 \frac{1}{2}{ }^{\prime \prime} \mathrm{D} \times 31 \frac{1}{2} 2^{\prime \prime} \mathrm{H}\) overall. Weight: 65 libs..

Price, \(\$ 200\) List.
Model 436 H Horn and \(Y\) Throat. For larger theaters. Takes \(2 \mathrm{P}-30\) or P-40 Drivers. 400 cycle, \(3 \times 6\) configuration, \(60^{\circ} \times 120^{\circ}\) dispersion. \(56^{\prime \prime} \mathrm{W} \times 281 / 2^{\prime \prime} \mathrm{D} \times 33^{\prime \prime} \mathrm{H}\) overall. Weight: 135 lbs. Price, \(\$ 340\) List.

Both Model 425 H and 436 H Horns take Model 400X Crossover. Size of each 400 cycle cell: \(8^{\prime \prime} \times 8^{\prime \prime} \times 29^{\prime \prime}\). Intercepts \(20^{\circ}\) solid angle.

\section*{SERIES 600}

Model 625H Horn. Takes P-30 or P-40 Driver and Model 600X Crossover. 600 cycle, \(2 \times 5\) configuration, \(40^{\circ} \times 100^{\circ}\) dispersion. \(231 / 2^{\prime \prime} W \times\) \(16^{1 / 2 "} \mathrm{D} \times 11^{1 / 2^{\prime \prime}} \mathrm{H}\) overall. Size of each 600 cycle cell: \(5^{\prime \prime} \times 5^{\prime \prime} \times 15^{\prime \prime}\). Intercepts \(20^{\circ}\) solid angle. Weight: \(35 \mathrm{lbs} .\). . . . . . . . Price, \$ \(\$ 10\) List.

\section*{SERIES 800}

Model 824 H Horn. 800 cycle, \(2 \times 4\) configuration, \(40^{\circ} \times 80^{\circ}\) dispersion.
 \(16^{\prime \prime} \mathrm{W} \times 10^{\prime \prime} \mathrm{D} \times 11 \frac{1}{2 \prime \prime} \mathrm{H}\) overall. Weight: 15 lbs . Price, \(\$ 50\) List. Model 825 H Horn. 800 cycle, \(2 \times 5\) configuration, \(40^{\circ} \times 100^{\circ}\) dispersion. \(18^{\prime \prime} \mathrm{W} \times 10^{\prime \prime} \mathrm{D} \times 11 \frac{1}{2}{ }^{\prime \prime} \mathrm{H}\) overall. Weight: 18 lbs . Price, \(\mathbf{\$ 6 7 . 5 0}\) List. Model 826 H Horn. 800 cycle, \(2 \times 6\) configuration, \(40^{\circ} \times 120^{\circ}\) dispersion. \(20^{\prime \prime} \mathrm{W} \times 10^{\prime \prime} \mathrm{D} \times 111 \frac{11}{\prime \prime} \mathrm{H}\) overall. Weight: 20 lbs . Price, \(\$ 75\) List.
All Series 800 Horns take a P-15 Driver and Model 800X Crossover. Size of each 800 cycle cell: \(4^{\prime \prime} \times 4^{\prime \prime} \times 11^{\prime \prime}\). Intercepts \(20^{\circ}\) solid angle.

STEPHENS MANUFACTURING CORPORATION

\section*{HIGH-FREQUENCY DRIVERS}

As generators of acoustic power in the upper end of the audible spectrum, the Tru-Sonic HighFrequency units present a perfect blend of sound-engineered design and listener preference. Acoustic response, in combination with Low-Frequency units, has been adjusted to levels picked as being most pleasing to a large majority of selected listeners. Actual listening tests on scores of representative groups of people have dictated the design of the acoustic proportions in the critical compression chamber.

TYPE P-40
40-Watt PM. Range: 350-16000 cycles. 16 Ohms. Dia. 7". Depth overall \(51 / 2^{\prime \prime}\). Weight: 35 lbs .

Price, \(\$ 200\) List

TYPE P-30
30-Watt PM. Range: \(350-16000\) cycles. 16 Ohms. Dia. 6", Depth overall 4". Weight: 25 lbs.

Price, \$1 20 List

TYPE P-15
20-Watt PM. Range: \(500-16000\) cycles. 16 Ohms. Dimensions: \(4^{\prime \prime} \times 6^{\prime \prime} \times 33 / 4^{\prime \prime}\) overall. Weight: 12 lbs.

Price, \(\$ 70\) List

\section*{LOW-LOSS CROSSOVERS}

By means of the Tru-Sonic Dividing Network, or electrical crossover, the Low-Frequency reproducer receives the lower portion of the audible spectrum. The High-Frequency reproducer receives the energy carrying the treble tones and distributes them throughout the entire listening area without loss of level. Enclosed in non-metallic containers to eliminate distortion with varying frequency, the design of these crossovers allows 12 db attenuation per octave, the standard in universal practice. Attenuation is 3 db at crossover frequency; phase rotation is \(270^{\circ}\). Low insertion loss through perfected construction is \(1 / 2 \mathrm{db}\). Input impedance 16 ohms, low output impedance 16 ohms, high output impedance 16 ohms on all models.

MODEL 400X
400 cycle, up to 80 watts. \(6^{\prime \prime} \mathrm{W} \times 4^{\prime \prime} \mathrm{D}\) \(\times 4^{\prime \prime} \mathrm{H}\) overall. Weight: 10 lbs.

Price, \(\$ 95\) List

MODEL 600X
600 cycles, up to 80 watts. \(5^{\prime \prime} \mathrm{W} \times 33 / 4^{\prime \prime} \mathrm{D}\) \(\times 3 \frac{3}{4} /^{\prime \prime} \mathrm{H}\) overall. Weight: 8 lbs .

Price, \(\$ 67.50\) Lis \(\$\)

MODEL 800X
800 cycle, up to 40 watts. \(5^{\prime \prime} \mathrm{W} \times 33 / 4^{\prime \prime} \mathrm{D}\) \(\times 33 / 4^{\prime \prime} \mathrm{H}\) overall. Weight 6 lbs .

STEPHENS MANUFACTURING CORPORATION

\section*{Speaker Systems for}

\section*{De Luxe 2-Way Systems and Cabinets}

MODEL P-63HF: Specially designed for reproduction of the very highest quality source material; ideal for theaters and auditoriums up to 1750 seats. Over-size components make possible low level operation with negligible distortion for the de luxe FM station monitor room.

Conservatively rated at 30 watts to permit full dynamic impact at high levels of operation, it employs a 600 cycle crossover to relieve the two Model P-52LX, 15", 20-watt low frequency drivers of high frequencies and consequent inter-modulation and cone breakup. Radical design permits horn loading down to 60 cycles. Special chamber behind drivers reinforces bass to 30 cycles. \(2 \times 5,10\) cell, \(100^{\circ} \times 40^{\circ} \mathrm{H}\)-F dispersing horn. Model P-30, 30-watt H-F driver extends range

\section*{MODEL P-63HF-SD}

2-Way System in Period Cabinet, mahogany or bleached blonde (please specify). 30 cycle, \(36^{\prime \prime} \mathrm{W} \times 25\) "D \(\times 451 / 2^{\prime \prime} \mathrm{H}\). \(W_{t}\). 245 lbs. Price, \(\$ 807.50\) List.

MODEL 52D
De luxe Cabinet in either mahogany or bleached blonde (please specify). 6 cu . ft., 42 cycle, \(15^{\prime \prime}\) baffle. \(231 / 2^{\prime \prime} \mathrm{W} x\) io \(\mathrm{o}^{1} / 2^{\prime \prime} \mathrm{D} \times 341 / 2^{\prime \prime} \mathrm{H}\). Weiaht: 75 lbs .

Price, \(\$ 130\) List beyond 15,000 cycles with efficiency over \(50 \%\). Total Alnico 5 magnet over 11 pounds. Equipped with H-F attenuator to perfectly balance room acoustics. Size, 25" deep by \(36^{\prime \prime}\) wide by \(45^{\prime \prime}\) high, allows this unit to be employed under practically any space limitation. Input: 16 ohms.
Wt.: 245 lbs. Price, \(\$ 675\) List.

\section*{MODEL 52SD}

Period De Luxe Cabinet, mahogany or bleached blonde (please specify). 8 cu . ft., 37 cycle, \(15^{\prime \prime}\) baflle. \(28^{3 / 4} 4^{\prime \prime} \mathrm{W} \times 19^{\prime \prime} \mathrm{D}\) \(\times 361 / 2^{\prime \prime} \mathrm{H}\). Weight: 80 lbs .

Price, \$180 List.
With P-52A Coaxial Speaker,
\$385 List.
With P-52HF 2-Way System,
\$440 List.

MODEL 52U
Gray Utility Cabinet, wine flocked grill, \(3 / 4^{\prime \prime}\) Pine Plywood, 6 cu. ft., 42 cycle (specify \(12^{\prime \prime}\) or \(15^{\prime \prime}\) baffe). \(231 / 2^{\prime \prime} W \times\) \(17^{\prime \prime} \mathrm{D} \times 32^{\prime \prime} \mathrm{H}\). Weight: 70 lbs.

Price, \(\$ 60\) List

MODEL P-63HF

MODEL 52P
Portable cabinet in black leatherette with chrome hardware (specify \(12^{\prime \prime}\) or \(15^{\prime \prime}\) baffle). \(18^{\prime \prime} \mathrm{W} \times 12^{\prime \prime} \mathrm{D} \times 233 / 4^{\prime \prime} \mathrm{H}\). Weight: 28 lbs.

Price, \(\$ 75\) List

\section*{"DR" RE-ENTRANT \\ \(\qquad\) \\ REFLEX \\ PROJECTORS} Non-resonant-Stormproof-Uniform response-Rugged construction
The utmost in performance can bs obtained from these new, non-resonant reflex projectors. All resorance is eliminated by fibre gasket seals and special rubber rim which dampens rim vibration. The bracket mounting assembly is securely fastened to a main body steel casting which guarantees long life under extreme conditions of mechanical strain. All spinnings are of weather-resistant, heavy gauge aluminum, finished in a high lustre gray enamel.

\section*{NEW ATLAS "ALMTITY-以 \&}

\section*{Complete with unbreakable super-efficient "V-PLUS" Driver Unit}

These speakers include the newly developed, unbreakable, hermetically-sealed driver units using the Alnico "V-PLUS" magnetic circuit. They offer a maximum of efficiency as a reproducer, and the utmost in performance as a microphone, in talk-back circuits. The new, improved ball swivel mounting bracket permits quick and simple directional adjust-

\section*{}

\section*{Two-way Projector complete with Driver Unit}

Tnis two-way speaker projects sound of equal intensity in a dual manner. Also excellent for talk-back application. Reduces cost of installation and offers installation advantages when used in critical locations of long corridors, industrial plants, and similar locations. All aluminum construction finished in gray lustre enamel. Universal mounting bracket. Power: 12 watts. Impedance: 8 ohms.

PIPE STANCHION FITTING

"DR" re-entrant or "RC" radial "U" brackets adapled to \(3 / 4^{\prime \prime}\) pipe fittings. This steel adaptor has holes properly located to match holes in " U ' bracket. All mounting bolts supplied. Female \(3 / 4^{4 \prime}\) pipe thread. MODEL PS-1 LIST PRICE \(\$ 2.00\)

\section*{TWO UNIT TO ONE PROJECTOR ADAPTOR}

When it is found necessary to obtain the greatest possible power output from a single projector the \(\mathrm{H}-2 \mathrm{U}\) is recommended This device permits the use of two driver units with any type of projector. Construction: Cast aluminum. All threads \(13 / 8^{\prime \prime}-18\). MODEL H-2U

LIST PRICE \(\$ 10.00\)

\section*{SPEAKER POWER} VOLUME CONTROL

For adjusting volume of individual speak ers. Power handling: 10 watts constant. Complete as illustrated.

MODEL RC-1
LIST PRICE \(\$ 5.00\)

\section*{RADIAL DRIVER UNIT PROJECTOR}

- Non-resonant.
- Dual Rubber Rims.
- 100\% Storm-Proof.
- Uniform 3600 Coverage.

The advantage of \(360^{\circ}\) coverage often permits the use of one speaker where normally a multiple of directional projectors may be required. The radial projectors are of all-aluminum construction finished in a weather-proof gray enamel. Thread size \(13 / 8^{\prime \prime}-18\). The use of the H-2U two-unit adaptor will double the power output for single projector high power application.

Air'Column . . . . . 3 ft .4 ft . Overall Height . . . 18 in . 21 in . LIST PRICE (horn only) . . \(\$ 40.00 \$ 50.00\)

\title{
atLas sound corporation PROFESSIONALBOOM STAND
}

\author{
Finger-Tip Control by "Floating Action" \\ Precision Built - Attractively Styled For Every Application \\ \section*{Professional Studio Microphone Support}
}

Precision Built . . ."Floating Action" Stand . . All moving parts and locking adjustments are "velvet smooth" in operation. By simple and quick removal of the boom arm, the stand is similar to the MS-24. The BS-35 is adjustable vertically and horizontally. The counterweight and boom extension can be adjusted for all microphone weights and various extensions. Specifications . . . Dimensions: Maximum vertical extension \(72^{\prime \prime}\), minimum \(48^{\prime \prime}\). Length of horizontal boom arm \(63^{\prime \prime}\). Base Diameter, at floor contact points, \(17^{\prime \prime}\). Total weight 35 lbs . Tube diameters \(11 / 8^{\prime \prime}\) and \(7 / 8^{1 "}\) brass, triple "super-chrome" plated. . . Base finished in chromium and gur-metal shrivel, rubber shock-absorbing bumpers. Snap-on hangers for holding cable to boom section supplied.
Model BS-35 List Price \$55.00

\section*{ADJUSTABLE BANQUET STAND}

This stand incorporates the "Fuil Grip Velvet Action" principle of adjust ment. The tube and base are completely finished in "super chrome" of fering a fine appearing stand suitable for use on a banquet table. Adjustable from \(18^{\prime \prime}\) to \(32^{\prime \prime}\). Base diameter \(8^{\prime \prime}\) Weight 5 lbs.
Model TS-6
List Price \(\$ 7.50\)

\section*{SPEAKER'S or ORCHESTRA DESK ATTACHMENT}

This desk attachment can be applied to any type of microphone stand. This is an item which has long been required in many permanent as well as rental installations. It offers the speaker facilities for holding notes or other reference material. A microphone can be directly aftached to the desk by using the BC-I Bracket Clamp. The DA-1 is complete Wracket Clamp. The DA-1 is complete adjustment. Sturdy construction finished adjustment. Sturdy Model DA-1 (less floorstand)

List Price \(\$ 10.00\)

MODEL DA-1
shown with MS-20 floor stand)

\section*{'VELVET ACTION" DESK STANDS}

ATLAS Desk Stands employ the same fine finish and workmanship as embodied in the floor models. The adjustable Model DS-7 uses heavy duty \(5 / 8^{\prime \prime}\) and \(7 / 8^{\prime \prime}\) tubing. Felt base pads included. Base diameter \(6^{\prime \prime}\), finish gray shrivel; tube chromium plated.
Model Keight Adj. List Price \(\begin{array}{lll}\text { DS-5 } & \text { Fixed } 6^{\prime \prime} & \$ 2.75 \\ \text { DS.7 } & 8^{\prime \prime} \text { to } 13^{\prime \prime} & 4.50\end{array}\)

FLEXIBLE GOOSE NECK
Can be attached to any microphone stand so that some amount of overhang can be accomplished. overhang can be accomplished. threads. Finished in bright chrome. threads. Fin
Model GN-13 List Price \(\$ 2.50\)

\section*{BRACKET CLAMP}

A multitude of useful applications. Can be used with Boom tions. Can be used wh Chrome Arm, Goose Neck, etc. Chrome tube \(6^{\prime \prime}\) long. Castings finished in gray shrivel. Can be clamped or permanentiy 5 screwed or bolted in position. Thread size Model BC-1

List Price \(\$ 3.00\)

\section*{"BABY BOOM" ATTACHMENT}

Easily attached to any type of microphone stand. Can be locked in any position. Length of tube \(32^{\prime \prime}\), chrome plated; castings in gray shrivel. \(5 / 8^{\prime \prime}-27\) thread' size.

Model BB- 1
List Price \(\$ 7.00\)

\section*{"SNAP-ON" MICROPHONE ATTACHMENT}

A quick, simple, and safe means of attaching any microphone to any floor stand. Eliminates the need of threading the microphone on and off the stand. A twosection "Snap-On" ball bearing spring sleeve attachment permits the microphone to be attached or removed instantaneously. One section is attached to the microphone and one section permanently fastened to the stand.

\section*{REFLEX LOUDSPEAKERS}

The reflex horns pioneered by University represent the most efficient method of converting electrical power into acoustic energy. When used with University driver units, they are capable of conversion efficiencies up to \(50 \%\) and in addition, provide compactness and weather protection without any sacrifice in performance.
Ileavy gauge metal and corrosion resistant finishes on horn and hardware are assurance of trouble-free performance regardless of changes in temperature and lumility. Each speaker is equ:pped with a rubber damping rim which prevents vibration a, ad mechanical resonance. Adjustable LNIVERSITY "U"' bracket mounting simplifies installation and holds the speaker firmly locked in any position.
Four models cover every public address requirement. Model GII has the longest air column and is ideal for the reproduction of symphonic music. The model LII with a higher cutoff is designed as a general purpose speaker and is recommended for music transmission where economy without sacrifice of quality is essential. In installations where a smaller horn is required, the Model PII will render excellent service for both speech and music. The Model SMII will find its widest application in the reproduction of speech where clarity and a high degree of intelligibility are necessary. Accessorles include Model PMA adapter and 2YC connector.

\section*{BREAKDOWN PROOF DRIVER UNITS}

Unjuersity driver units are breakdown proof and guaranteed for one year. Rutings are conservative and operation over long periods is assured. They are of the PM dynamic type, incorporate highest quality Alnico magnets and one-piece molded phenolic diaphragms. Unique "rim centering" construction eliminates aligning pins and permanently centers the voice coil and head assembly in a much closer magnetic gap. This results in a higher conversion efficiency and miealignment due to shock or vilisation is virtually eliminated. Hermetically sealed housing provide complete protection from out-
door exposure and corrosive fumes.
The PA-30 las a 30 -watt built-in line matching transformer Transformer terminuls provide 16, 165, 250, 500, 1000, 2000 -ohm taps for constant impedance systems and \(21 / 2,5,10,20\) and 30 -wat taps for 70 -volt constant voltare systems. Use the PA- 30 or SA-HF for high power installations or where occasional overload is a problem. Model MA-25 represents the best "watts per dollar" value of any driver unit made. It combines efficiency, waterproof construction and economy.

\section*{INDUSTRIAL PAGING SPEAKERS}

These speakers are reflex ail column homs with built-in hermetically sealed driver units. Models \(\mathrm{Cl}, 1138\), and MIL are directional and model IBR lius a radial deflector for unitorm \(360^{\circ}\) dispersion. They are capable of continuous use for intercommunication and paging they shiphoard, docks, loading platforms, terminals and industrial plants.

Models CR can handle 18 watts of infut power continuously, so Models Cla that it is usern for high IB8 and IBle have a continnous power haming capacity of industrial
areas. The models MLL and MIS with a 3 watt continuous power capacity are efficient intercommunication speakers. The model MIS is designed for flush lanel mounting

While capable of producing adequate volume with low power, these speakers can handle more power than any other speaker of comparable size and weight. Modernization of old sound systems s easily accomplished by replacement of obsolete speakers with these models. Standard voice coil impedances permit installation withont changes in the existing line or amplitier.

\section*{WIDE RANGE WEATHERPROOF COAXIAL SPEAKERS}

The Model WLC is a high fidelity co-axial speaker with a response range essentially flat from 50-10,000 cycles. It includes a \(12^{\prime \prime}\) Cone speaker, a unit-driven tweeter and a built-in crossover network. Corrosion-resistant, all metal construction permits constant exposure regardless of temperature and humidity. Ideally suited for concert band-shells, drive-in theatres and all indoor or outdoor installations where higl quality reproduction of music and roice are essential. A sturdy mounting bracket facilitates installation and permits tilting and locking the speaker in any desired rertical plane.

PRICE \(\$ 200.00\)

MODEL WLC

\section*{RADIAL REFLEX PROJECTORS}

Air column horns with radial deflectors for uniform \(360^{\circ}\) sound distribution cover large areas and override high noise-levels, without blasting. Both rims rubber loaded to minimize mechanical resonance. The long air col umn of the RLII and its low frequency cutof make it well suited for music and general applications. The smaller model RPH, with a somewhat higher cutoff. will serve for both music and speech. The RSII finds wide application for high clarity reproduction of speech. Shipped complete with hardware but less driver unit.

RPH
RSH

\section*{PROJECTORS}

These compact projectors consist of an acoustic chamber for housing a cone speaker and a radial deflector for uniform 360 dispersion. Of all metal, rubber cushioned construction, the model RBP-12, designed for a \(12^{\prime \prime}\) cone speaker, provides uniform response down to 50 eycles and model \(\mathrm{RBl}^{\prime}-8\), designed for an \(8^{\prime \prime}\) speaker, has a low frequency limit of 80 cycles. Any standard make of \(8^{\prime \prime}\) or \(12^{\prime \prime}\) cone speaker can be installed in these laffles. Both models are watershedding and mav be used indoors or out. They are shipped complete with hardware but less cone speaker.

UNIVERSITY super power speakers are the answer to every public address installation where tremendous amounts of concentrated power must le transmitted over long distances.

The Model 4 A4 incorporates 4 IPM driver units mounted on the back of a heavy cast mounting plate. Each driver opens into a reflexed air column on the front of the mounting plate. The four air columns feed into at common bell. Compactness makes them ideally suited for aeroplane broadcasting and use in Church towers.

In the Models \(\mathrm{B} \cdot 6\) and \(13-12\), the \(\mathrm{P} M\) driver units are mounted circumferentially on a rugged "tone chamber" casting which provides individual acoustic paths from each driver unit to a mixing chamber at the center of the casting. The patented design of the mixing chamber and the acoustic paths minimizes high frequency cancellation.

All speakers are completely waterproof and characterized by their ruggedness. Power ratings are conservative and projection ranges are often exceded in actual oneration. Speakers of this type were recently heard 15 miles in a carillon installation at the Empire State Building in New York City. "U" brackets permit a vertical swing of approximately \(120^{\circ}\) and locking in any position. Longer horns are available with B 6 or B 12 for music. For B6, diameter 30 inches, length 48 inches. For B12, diameter 30 inches, length 32 inches. Response 85-6000 cps. Prices on request. NOTE: Model 4A4 is sold and shipped less driver units. Standard driver units Morlel SA-MF may be used.

\section*{HIGH FREQUENCY TWEETER SPEAKERS*}

The UNTVERSITY PM tweeter provides the only efficient and economical method of extending the upper register to 15,000 cycles to obtain high fidelity speaker response. It can be connected to the voice coil terminals of an existing l'M or field excited cone speaker through a simple, economical high-pass filter without creating any electrical unbalance. Model 4407 is an adapter which quickly chanyes a \(12^{\prime \prime}\) speaker to a co-axial reproducer with resionse to 15,000 cycles. Models 4401
and 4402 offer compactness, high power handling capacity and wide dispersion for the construction of wide range duplex systems. The modieI 4404 is a complete high frequency speaker and consists of the model 4402 dual tweeter and the 4405 high-pass filter in a walnut finished cabinet. The 4405 high-pass filter or its electrical equivalent must he used with the 4401,4402 or 4407 for satisfuctory leerformance.

\section*{600-CYCLE TWEETERS*}

The models 4408 and 4409 tweeters nermit easy assembly of 2 and 3 -way speaker systems at crossovers as low as 600 cycles. Construction is of sturdy cast almminum thronghout. New horn design allows wider distribution fattern. Available in 6 anll 25 -watt capacities.

*NOTE: Instructions packed with all tweeter models include specifications for the simple assembly of necessary filters and crossover networks.

\section*{WEATHERPROOF AND INDOOR LINE MATCHING TRANSFORMERS}

MODEI_S 5401, 5409, 5410

MODEL 5402

The new UNIVERSITY line of matching transformers is designed for use with UNIVERSITY loudspeakers in indoor and outdoor installations. Excellent performance is assured throughout the useful audio frequency range at rated output. 'The models 5401, 5402, 5409 and 5410 are housed in watertight enclosures and incorporate die cast mounting brackets. They may be fastened to any surface with two screws or bolts or may be fastened to the brackets of the models MIL, IB8 or CR. When used in the latter manner, the mounting bracket of the transformer acts as a combined mounting support for botls the transformer and speaker. The model 5402 may be mounted on the \(U\) bracket of any loudspeaker by means of a simple clamp which is supplied or on any surface with two scress or bolts. The uncased transformers for indoor use may also be fastened to any surface with two screws or bolts.
Model

DESCRIPTION
12 Watt, waterproof case 25 Watt, waterproof case 12 Watt, waterproof case 20 Watt, waterproof case 12 Watt, uncused, for indoor use 20 Watt, uneased. for indoor use

Note: Connecting a speaker of twice the impedance across a given secondary will double all primary values. Conversely, a speaker whose impedance is half the sccondary value, will lialve all nrimary ralues. As an example, the following impedances are available with the model 5402 ;

\section*{VR2 DYNAMIC MICROPHONE}

\section*{A Microphone with a NEW IDEA and a NEW USEFULNESS}

For the first time, the many desirable characteristics found only in several different types of microphones have been combined in a single unit. The VR2 has an easily accessible exiernal adjustment of the most important acoustical reactors in the dynamic microphone. A smooth change from a communication-type response, with a cutoff below 500 c. p. s., through a flat response to an augmented bass, attained by a simple, positive adjustment.

The response adjustment on the VR2 has a very broad effect and does not introduce narrow peaks. It is different from anything previously introduced.

Complete with \(121 / 2^{\prime}\) cable and plug at microphone providing balanced line. Dull chrome finish. Net wt. less cable, 15 ozs. Hgt. 4". Greatest diameter 3".

VR2T Dynamic ( 38,000 ohms), Code: VARIT. List \(\$ 42.15\)
Available on order in 200 or 500 ohms........ List \(\$ 42.15\)

VRT Dynamic ( \(30-50\) ohms), Code: VARIA...... List \(\$ 39.15\) (Complete with \(12 \frac{1}{2} \mathbf{2}^{\prime}\) cable)

\section*{D8T DYNAMIC}

\section*{MICROPHONE}

THE D8T DYNAMIC MICROPHONE has been carefully designed to have a consistent, well-balanced response. It is exceptionally rugged and assures the user of trouble-free service over a long period of time.

The D8T is particularly useful for all types of public address installations, orchestra pick-up, es well as solo work and straight announcing

The D8T is \(31 / 4^{\prime \prime}\) long, \(2^{\prime \prime}\) in diameter, weighs only 13 ozs. A swivel mounting permits either nondirectional or semidirectional pick-up. Comes complete with \(121 / 2\) cable and plug at microphone and \(5 / 8^{" \prime} \times 27\) thread for suspension or stand mounting. Platinum Chrome Finish.

Code: CROSS

\section*{C7 CRYSTAL MICROPHONES}

The development of the new American Crystal Microphones, Model C7H and Model C7L, represents many features which have been available only in several previous types. The response characteristics have been chosen so that the C7 can be used equally well for recording with a minimum amount of amplifier equalization and also for public address. A new system of coupling the crystal element to the diaphragm is employed which produces a smoother response and \(100 \%\) greater efficiency equivalent to double the output of usual direct drive type of coupling.
High or low impedance may be had in the Model C7. An efficient transformer is used to reduce the inherent high impedance of the crystal generator to standard line impedances. Long lines with negligible losses may be used.

Complete with \(121 / 2 \mathrm{ft}\). cable
C7H High Imjedance. Code: CSEVN
LIST \$24.50
C7L Available in 50 ohm or \(200-250\) ohm or 500 ohm.
Code: CSEVL
LIST \$29.00

\section*{DHT DYNAMIC HAND-HELD MICROPHONE Shock-proof Diaphragm - Press-to-talk Locking Type Switch Retractable Hanger}

This compact, sturdy microphone was designed for all applications requiring a dependable hand microphone for voice communication. Small and lightweight, it can readily be concealed in the palm of the hand. An Alnico V magnet, efficient magnetic circuit and newly developed diaphragm and voice coil assembly combine to generate the high output of 56 db below 1 volt per bar for the high impedance model.
Other desirable features are: convenient hanger which retracts into the case of the microphone when not in use; molded plastic diaphragm not affected by heat, moisture or mechanical shock; supplied with five feet of low loss cable; press-to-talk locking type switch for operation of the microphone unit. Additional switch contacts on request.

Available on order in 200 or 500 ohms
DH Dynamic ( \(30-50\) ohms), Code: CALYX.
LIST \(\$ 22.50\)

\section*{CRIA CRYSTAL CARTRIDGE}

LIST PRICE
assembly into the arm-no soldering iron is required. The needle chuck design incorporates a "locked-in" feature whereby the chuck is prevented from moving when tension or pressure is applied to the needle screw. This feature also insures that the needle socket will remain centrally located in its opening in the cortridge. High needle point compliance and minimum record chatter are thereby guaranteed. The cartridge will operate satisfactorily with any conventional needles; however, its highfrequency response will vary somewhat with the type needle used. Best operation will be obtained with off-set needles using sapphire or precious metal stylii.

The curved arm with off-set head was designed to provide optimum tracking for both ten and twelve inch records with minimum wear of record and stylus. Base of the arm is designed for single hole mounting. Assembly includes CR-1A Crystal Cartridge, twenty-four inch single conductor shielded wire, arm rest, mounting hardware and complete mounting instructions.

American FLOOR STAND

\section*{CRYSTAL MODEL D. 104}
- For elose talking applications, such as radio amateur communications and similar uses. With high out 1 ut level, approximately -45 db , it possesses definitely reduced R.F. feed-back tendencies. Yokedriven, bridge-mounted Graphoil crystal element, shock-proof mounting and quency response from 30 to 7,500 , rising 500 to 4,000 c.p.s. Chrome finish. Standard equipment includes interchangeable pling and connector, spring cable protector, \(\gamma\), shielded Calle. ListPrice GD-104-Code ASVAX, with G.Stand....... \(\$ 24.60\) D-104-S-Code ASUP'R, with S-Switch. 27.35

\section*{CERAMIC MODEL D.104-C}
- Duplicate of Crystal Model except for employment of ceramic element, which is immune to ex tremes of temperature and humidity. Performance comparable excent for slightly lower output of approximately - 58 db .
 D-104-C Code ASUPC ........................ \(\$ 24.60\) D-104-C-S-Corle ASUQ7, with S-Switeh.... 27.35

\section*{The WR-SERIES}
- The WR-Series, Multi-Unit Microphones, are highly recommended for studio, public address and high quality recording purposes. Suhstantially flat frequency response up to 10,000 cycles. Due to their special interior assembly design, the WR-Series Microphones are practically transparent to sound waves and cannot be acoustically overloaded. Model WR-20 may be used on cable up to 100 ft . with negligible loss of output and Morlel WR-40 is more than able to handle cable twice this length. Output level -56 db. Finish, hright chrome with satin chrome grille. Cable length, 25 ft .
WR-20—Code ASVGZ ....... \(\$ 32.30\) WR-40-Code ASVAL ........ 43.25 (Available with S-Switch or G-Stand)
Astatic Crystal Devices manufactured

\section*{The JT-SERIES CRYSTAL \& CERAMIC}

- Because of their wide range of usefulness, excellent performance and low price, Astatic JT-Series Micromhones are used extensively for amateur, public adress and home recording. JT-Series Microphones are available in both wide and voice rance models and, in addition to ranke models and, in addition furmed stamplete with concentric cable concomplete with concentric liandle, innector, convenient wood Crystal modterlocking, metal base. Crystal model has 15' cable; ceramic, ''. Wood handle may be removed and microphone used on floor stand. Crystal models' output level, -52 db, provides ample reserve for use with high gain amplifiers. Ceramic mod els' output approximately -62 db . Opalescent gray with bright clurome grille.

\section*{LAPEL TYPE MODEL L-1}
- This very small dual-(liaphragm crystal microphone was developed to meet especially difficult pickup conditions. Equipment includes lapel-type suring clip and over-shoulder cord to permit wide latitude of movement. Output level - 62 db . Frequency response uniform from 30 to 10,000 c.p.s. Finish, statuary bronze. Furnished with \(25-\mathrm{ft}\). cable.

List Price
Model L-1-Code ASUSN . \(\$ 27.35\)

\section*{MODEL K-2}
- Because of its smooth, undistorted reproduction and the fact that it cannot be acoustically overloaded, Astatic Model K-2 Crystal Microphone is favored and extensively used. In this model, Astatic provides a small size, dualdiaphragm type crystal microphone for studio use, recording, dance bands, public address installations and general applications where quality performance is required. With dual crystal unit design, Model K-2 has twice the capacitance of the usual crystal microphone and correspondingly longer cable lengths may be used. Standard equipment includes plug and socket connector and \(25-\mathrm{ft}\). cable. Output level-62 db. Bright chrome finish.

K-2 -Code ASURX
K-2-S-Code ASURW,
GK-2 - Code ASUZA with G-Stand
35.55

\section*{The DYNAMIC}
- Model "1)N" is a semi-directional, all-purpose dynamic microphone incorporating a new unitary moving coil sysiem, and carefully proportioned acoustic circuit to highly damp the natural resonance of the moving system and provide a response characteristic substantially flat from 50 to T,000 cycles. The "LDN" design emsploys all features necessary for wide applicability, including Astatic's tilt-ing-head, swivel mount, permitting semi- or non-directional positions. Opalescent gray and bright chrome finish. Iligh impedance model only is available with Type S On-Off Switch (as illustrated) at \(\$ 2.75\) extra.

\section*{MODEL 6D CRYSTAL}

TURNOVER PICKUP

Switches from \(331 / 3\) or 45 RPM record to standard 78 with turn of knob at front Plays both types of records at only eirint. gram needle pressure, thus has no extra mechanism to change pressure when knob is turned, eliminating a potential source of rouble and varyince reproduction quality Employs LOD. 1 Double-Needle Cartridge Iounts seven inches from turn table cent die-cast curved arm finished in dark brown Hammerlin.

- Tumover type transcription pickup adapt ed from famous Astatic Studio Master " 400 " conventional transc iption arm. Plays \(331 / 3\), 45 or staudard 78 RPM recordings at eight Eram needle pressure. Employs LQD-1 Dou ble-Needle Crystal Cartridge. Notable excellence of frequency response, particularly at low frequencies. Gracefully curved, die-cast arm in light brown Hammerlin finigh.

\section*{MODEL FL-33 PICKUP}

- Does the work of three pickups. Its U-J Orystal Cartridge for either \(331 / 3\) or 45 RPM records is easily, instantly replaceable with the U-78-J Cartridge for playing standard records. No adjusting of needle pressure, nothing else to be done. Cartridges slip in and out like barrel and cap of non-threaded fountain pens. Special Type "U" TaperLock replaceable needle has tongue and groove arrangement to hold in position, removes merely by gripping small tab at rear of needle aid sliding towards rear of cartridge. Novel design at base of FL- \(3: 3\) eliminates tone alm resonances, assures periect tracking. Die-cast arm, finished in high gloss black and polished aluminum.

\section*{MODEL FLC-33 PICKUP}

- The same important advaneements in pickup engineering as the FL-33, in handsomely curved styling. Offers the same operating advantages, such as the three-in-one feature: one pickup plays \(331 / 3,45\) and 78 RiM Records without chanying needle pressure or making other adjustments, with the simple switehing of slip-in cartridges. I'erfect tracking, at only five-gram needle pressure, is ansured by the revolutionary new base mounting assembly.

\section*{FLT-33 TRANSCRIPTION} PICKUP
- Never before, a pickup of snch professional instrument quality and prection. Like the FL-33, this sleek transcription model employs the U.J Crystal Cartridge with one mil tip. radius needle, instantly replaceable with the U-78-J for playing 78 RPM Records. In addition, the U-TR Cartridge with 2.5 mil tipradius may be inserted to play standard lateral broadcast transeriptions. Special ball-bearing, anti-resonance base is adjustalle to desired height, as is unique arm-rest. Feather-touch needle pressure of five grams is accomplished by a revolutionary hinged division of the arm, which also contributes to perfect tracking and elimination of surface noise. Die-cast arm and base look their fine instrumert part, with finislı in telephone black. All three " U " Series Cartridges are available with diamond stylus tips instead of the regular sapphire.

\section*{MODELS 510.QT-33 AND} 510-MI-2.33 PICKUPS

- Add Astatie's new anti-resonance swivel base, and the famous "(QT" Crystal Cartridge with special one mil tip-radius, precious metal or jeweled stylus, to the popular Astatic Mole] 510 Pichup - and vou have this new long-playing molel, the finest performer in its price class. I'ermanently andusted to six-sram needle pressure, its short mounting centers make it ideal for a host of lone-plaving applicatious, Outstund ing characteristies are hish uniform output and low newille point impelunce arm, finished in Hammerlin apalese Die-east Speeify Model \(510-\mathrm{MI}-2-33\) for the same pickup, except for employment of Astatic's revolutionary Magneto-Iniluction Cartridge.

\section*{MODEL 507-L-92-33}

\section*{PICKUP}

- Bedroek mice, with full professional performance standards retainel. The new L. 92 33 C'rystal Cartridye employed is notable for 33 Crystal Cartridue employed is notable for
high output, which affords excellent results high outpht, which affords excellent results in use with standard phonograpl amplitiers,
where other lower output cartrijges are not where other lower output cartridges are nut
satisfactory. Has universal, screw-type needle Eatisfactory. Has universal, screw-type needle
chuck to receive standarl microgroove chuck to receive standard microgroove needles. I'ickup is furnished without needle.
Die-cast arm finished in opalescent grey Die-cast arın finished in opalescent grey
Hammerlin. New, anti-friction swivel base.
MODELS 400-QT-33 AND
400-MI-2-33

\section*{TRANSCRIPTION PICKUPS}
- The famous Astatic Studio Master " 400 " conventional transeription arm, adapted for long-playing transeriptions. Incorporates the improved base mounting assembly that eliminates arm resonances and assures perect tracking, and the "QT" Crystal Cartidge with precious metal or sapphire stvlus of one mil tip-radius. i peak standard of long-playing transcription performance. Diecast arm, permanently adjusted at six-gram cast arm, pernanently adjusted at six-gram needle pressure. Grey Hammerin finish. Specycept for 0 -nployment of Astatic's Marneto xcept for employment of Astatic's MagnetoInduction Cartridge.

\section*{THE GC CERAMIC CARTRIDGE}
- First major stride in cartridges employing ceramic elements since Astatic pioneered in this lype unit. The first with repaceable needle. Takes "Type G" needle-with either one or three-mil tip-radius, precious metal or saphire-which slips from its rubher chuck with a quarter turn sideways. Resistance to birh temperatures and humidity is nol the min additional advantare. Outplit hus heen only additional advantage. Outpht has heen increased over that of any ceramic cartridge available. Light wright and sis-gram needle pressure make it jeal for a great variety of modern at \(y^{\prime}\) lications. Model GC-J fits standard \(1 / 2^{\prime \prime}\) mounting and RCA 45 RPM record changers. Model GC-IJ tits RMA No. 2 Specifications for top mounting \(+53^{\prime \prime \prime}\) mounting centers.

GC-1J-Code AswZ

\section*{THE CQ CRYSTAL CARTRIDGE}
- A men Astatic design, featuring miniature size and we-gram weight. Monel \(\mathrm{CQ} \cdot \mathrm{J}\) fits standand \(1 / 2^{\prime \prime}\) mounting and RCA 45 RPM record chancers. Model CQ-1J fils RMA No. 2 Sperificalions for top mounting. 453 mounting centers. Needle pressure five grams. Output 0.7 volls at 1,000 c.p.s. Employs one mil tipradius, Q-33 needle. Cast aluminumi housing.
CO-J -Code ASXAZ CQ-1J-Code ASXAI

\section*{THE LQD DOUBLE-NEEDLE CRYSTAL CARTRIDGE}
- The LQD Cartridge - for \(45,331 / 3\) and is RlPM Recorls - quickly became the first choice of many of the nation's largest users, on the hasis of comparative listening tests, and is, today, the PROVED TOP PERFORMER for turnover type pickups. Outstandinir for excellence of frequency reponce, knife removes UNE "Q"" needle for replacement . . . without disturbing the oflier needle, without renoving cartridge from tone arm. Gentle pressure shats new needfo into place. Stamped aluminum housing, Model LQD-1.J, illustrated, has neelle guards and front bracket for turnover knob. LQIf-I furnished without guards or bracket.

\section*{SHURE MULTI-IMPEDANCE SUPER-CARDIOIDS}

"556" SUPER-CARDIOID (For Broadcast)

The new Shure Super-Cardioid Dynamic Microphones are Multi-Impedance Microphones-giving you three microphones in one. Gives you a choice of low, medium, or high impedance in one unit. Model "556" is specially designed for Broadcasting. Held within extremely close tolerances in frequency response. Features internally isolated cartridge and external vibration absorbing unit. Model " 55 " is a "General Purpose," high-quality dynamic. It is identical to the " 556 " in appearance with the exception of the external vibration absorbing unit.
Following is technical data covering both models: Reduces reflections and reverberation-decreases random noise pickup by \(73 \%\). Smooth response from 40 to 15,000 cycles over wide angle at front -dead at rear. Single unit construction accomplished through Shure "Uniphase" principle (Patented). Floating moving coil system. Swivel head. Standard \(5 / 8\) "-27 thread. " 556 " has convenient terminals for attaching longer length cables. " 55 " has built-in connector. Case \(41 / 4^{\prime \prime}\) high, \(31 / 4^{\prime \prime}\) " wide, \(31 / 2\) " deep. Ship. wts.: " 556 ", \(31 / 2 \mathrm{lbs}\).; " 55 ", 4 lbs.

\section*{CONTROLLED RELUCTANCE MICROPHONES SHURI}

\section*{THE "HERCULES"}

610 SERIES

The "Hercules" is a hand-held magnetic unit. Provides the ruggedness, clear reproduction and high output long needed for Public Address, Communications, and Recording-AT AN AMAZINGLY LOW PRICE! Recommended for Announcing and Mobile Public Address Systems; Communications; Home Recording; high quality Inter-Communication. Ideal for generalpurpose use in tropical countries and all coastal areas where humidity is a problem.
The output voltage is induced in a coil of wire by causing a sound wave to modulate the reluctance of the magnetic circuit. By the control of this reluctance the utmost in quality and stability is achieved. High impedance is obtained without the use of a transformer. The "Hercules" can be used either Indoors or Outdoors. Fits snugly in the hand, sits firmly on a desk. Frequency response is 100 to 7,000 c.p.s. Furnished with 7 shielded cable. Green metallic finish. Die-cast case. Complete with stand adapter. \(22 / 3^{\prime \prime}\) wide, \(31 / 4^{\prime \prime}\) high, \(11 / 2^{\prime \prime}\) thick.

The Model R5 Controlled Reluctance Microphone Cartridge is available for service installation and is also ideal for the replacement of crystal micro phone cartridges in Shure cases of the Model 7.77A and Model 100 Series designs. it will also replace cartridges in cases of other manufacturers models of similar design, where space permits Complete installation instructions in English and Spanish are included. It is an acoustically controlled balanced-armature transducer ideal for both microphone and soft-speaker applications. Practically unaffected by heat and humidity. Supplied with rubber mounting ring. Overall diameter of mounting ring \(21 / 4^{\prime \prime}\); thickness of rubber ring \({ }^{\text {s }}\) " ": Overall depth of cartridge \(7 / 8^{\prime \prime}\). Shipping weight 4 ounces.

Code: RUTUC. List Price: \(\$ 9.00\)

\section*{SHIIR SWITCHES AND ACCESSORIES}

\section*{MODERN DESK STAND}

Model S36A. Streamlined Desk Mount with stable support. Fits Shure connector-type Microphones, concealing plug in base. Ideal for use with A88A Grip-to-Talk Switch. Adapter provided for other type microphones. Removable button for installation of \(3 / 8^{\prime \prime}\) standard bushing switch or volume control. Pearl Gray finish. Base: \(21 / 2^{\prime \prime}\) high, \(5^{\prime \prime}\) wide, \(7^{\prime \prime}\) long. Shipping weight \(11 / 2\) pounds.

Model: S36A Code: RUSEF
List Price: \(\$ 5.00\)

TAKE-APART STAND
Model S34B. Handy low-cost stand for desk or hand use. One twist of handle locks it securely in base for use as a table stand, or releases handle for use in hand. Metal base, wood handle. Metal top threaded \(5 / \mathbf{g}^{\prime \prime}-27\). Height over all \(6 \not t^{\prime \prime}\). Base diam. 4/2". Length of handle \(57 / \mathrm{g}^{\mathrm{i}}\). Shpg. wt. 1 lb . Code: RUKAB List Price: \(\$ 2.50\)
Model A4IB. Microphone handie only. Threaded \(5 /{ }^{\prime \prime}\) "-27.
Code: RUJAD Lisł Price: \(\$ 1.00\)

\section*{CABLE TYPE TRANSFORMER}

Model AB6A is a highquality cable-type transformer which offers additional versatility when used in conjunction with Shure in conjunction with Shure Models 55, 556, and 5! Dy namic Microphones, which employ the impedance matching switch. It solves the frequent problem of installations requiring long lengths of microphone cables without the loss of high-frequency response. Model A86A matches 35 to 50 and 150 to 250 ohm microphones to high impedance amplifier input. Compact. sturdy. Case diameter \(15 / 8^{\prime \prime}\), length \(27 / 8^{\prime \prime}, 7\)-foot cable. Shipping weight, \(11 / 4\) pounds.
Model: A86A Code: RUDEB List Price: \(\$ 15.25\)

\section*{TAPE RECORDING HEAD}

The Shure Tape Recording Head is a high quality, pre-cision-engineered unit incorporating recording, reproducing, and erasing in one head. Suitable for all types of tape recording: professional, semi-professional, experimental, technical, and amateur use. Records on half width of tape-for doubletrack recording.

TAPE MODEL 815
Model: 815 Code: RUWAT List Price: \(\$ 15.00\)

\section*{WIRE RECORDING HEAD}

WIRE MODEL 812

The Shure magnetic Wire Recording Head is a high quality recording unit with quality recording unit with recording, playback, and signal erasure in one small unit. Has standard 4-prong adapter base. The Model "812" is a direct replacement unit for the improved Sea
Roebuck Wire Recorder.
Model: \(812 \quad\) Code: RUWIR List Price: \(\$ 15.00\)
"GRIP-TO-TALK SLIDE-TO-LOCK" SWITCH
This rugged Heavy-Duty Switch employs a long life, leaf-type switch element that withstands the most severe field requirements of paging and dispatching systems. Has spring-temper, phospor-bronze switch blades with pure silver contacts. Ideal for Police, Taxi-Cab, Railroad, Airport, Bus, Truck, and a! emergency communications work. Large grip-bar assures positive contact. Firm downward pressure on grip-bar locks switch. Can be used with Shure con-nector-type crystal dynamic and carbon microphones of any impedance. Fits handily mic shure 536A Desk stand as shown in illus on shure SJbA Deldering necessary simply tration. No soldering necessary, simply plug in. Switch element can be read ily removed for rewiring to accommodate other switching combinations. Rich sati
chrome finish. Shipping weight 1 pound.

MODEL A88A Model: A88A

Code; RUNEL
List Price \(\$ 10.75\)

\section*{ON-OFF PRESS-TO-TALK SWITCHES}

A83B

A84B

A85C

Plug into the microphone quickly and conveniently. Durable, dependable. No soldering necessary.

Model A83B. Rotary-type "On-Of"' switch. Quickly attached to any cable-connector type Shure microphone. Internal plug esiablishes connections. Bakelite arrow knob.

Code: RUNIM
List Price: \(\$ 6.00\)
Model A84B. Momentary "On-Of" switch. Press-to-talk Bakelite disc.
Code: RUNID
List Price: \(\$ 7.00\)
Model A85C. Momentary Relay-Type switch. Press-to-talk Bakelite disc. Normally-open switch closes circuit comprising one conductor and shield of outgoing cable for operation of relay or other device; remaining conductor and shield of cable carry microphone output. Must be used with two-conductor shielded cable. Standard Shure cable-connector receptacle. Satin chrome finish. \(13 / 4^{\prime \prime}\) high \(\times 11 / 8^{\prime \prime}\) wide \(\times 2^{\prime \prime}\) deep. Shipping weight \(1 / 4\) pounds.

Code: RUNAT
List Price: \(\$ 10.00\)

\section*{FLOOR STANDS}

The new Shure Floor Stands have been designed to look smart and work perfectly. They will fit into any type of installation because of their design and rich hammered finish. Locking device has been life-tested 5,000 times. Stabilized base cushioning reduces floor noise pickup by 10 to 18 db . Color: Pearl Gray.

\section*{SHURE CRYSTAL PHONOGRAPH PICKUPS}

\section*{"VERTICAL DRIVE" CRYSTAL PICKUPS}

Recommended for superlative reproduction of fine-groove vinylite and high quality stan-dard-groove recordings. Arm is lightweight die-cast aluminum and tracks faithfully at 7 grams. These pickups have adequate output for the average audio stage, with extended
 frequency response. Turnover model (90ID) has a knob for quick, easy turning to either finegroove or standard-groove playback position.

\section*{"MUTED STYLUS" CRYSTAL PICKUPS}

These pickups feature the famous amazingly quiet "Muted Stylus" Crystal Cartridges.

Model 900 Series
"Muted Stylus" Pickup Have low needle force with high output and smooth frequency response. Have unique needle guards and record and needle protection. Arm is lightweight die-cast aluminum with handy pickup handle. Model 900 HS "Humi-Seal" has moisture-proofed, metal-seal crystal element and is highly recommended for use in humid areas.

\section*{"GLIDER" CRYSTAL PICKUPS}

These modern lightweight aluminum crystal pickups employ a needle force of \(11 / 8\) ounces. They are recommended for good quality installations where low cost is essential. These pickups use high output, lever-type crystal cartridges. Arms are scientifically designed for low mass and maximum tracking. Supplied with easy-to-use arm rest. Reduce record and needle wear. Minimum surface noise, needle scratch and hiss.

\title{
Cardioid Unidirectional Microphones
}

\section*{IMPROVED CARDYNE BROADCAST DYNAMIC}

\author{
True Cardioid with New Impedance Selector, New DualType External Shock Mount, Smooth Wide Range Response, High Output.
}

Better than ever for high quality sound pick-up and reproduction. Response is improved . . output increased. New impedance selector on rear of case instantly gives you high impedance ( 25,000 olims) or match to all low impedances. New dual-type external shock mount prevents reproduction of external shocks and stand vibration, reduces side sway of microphone. Exclusive Acoustalloy diaphragm withstands severest service.
E-V Mechanophase* principle gives wide angle front pick-up, dead at rear . . . cuts reverheration and random noise pick-ups . . . stops feedback nearly doubles conventional pick-up range . . . provides clear, natural close-up resjonse . . . permits increased loudspeaker volume . . . gives users more freedom of movement. Used in studio and remote broadiasting, disc and film recording, public address and communications.
Output level: 50 db below 1 volt \(/\) dyne \(/ \mathrm{cm}^{2}\). Frequency response, substantially flat, \(30-12,000\) c.p.s. Highest quality die cast case heautifully finished in satin chromium. Tiltable head. \(5 /{ }^{\prime \prime \prime}-27\) thread. Cannon XL-3 connector. Internal shock absorber. "On-off" switch. 20 ft . shielded cable. Size \(2^{1 / 2} 2^{\prime \prime} \times 3^{1 / 2} 2^{\prime \prime} \times 9^{\prime \prime}\) including stud. Net wt. \(2^{1 / 2}\) lhs.

\section*{CARDYNE II Model 731. List Price}
\(\$ 80.00\)
(Also available without "On-Off" switch or with 50-250 ohm impedance selector.)

\section*{POPULAR CARDYNE DYNAMIC}

CARDYNE J. Model 726. Performance characteristics similar to Model 731 above. Has Impedance Selector, but does not include external shock mount. Frequency response, sulstantially flat, 40-10,000 c.p.s. Output level -53 db . Has Amphenol MC-3 connector.

CARDYNE I. Model 726. List Price
(Model 345 External Shock Mount also available separately. List Price \(\mathbf{\$ 1 1 . 5 0 \text { ) }}\)

\section*{MODERN CARDAX CRYSTAL}

\section*{The First and Only High Level Cardioid Crystal Microphone with Dual Frequency Response.}

Favorite of thotsands! Easily solves everyday sound problems. E-V Mechanophase* principle provides true cardioid unidirectivity. Wide angle front pick-up-dead at rear. E-V Durd Frequency Response Selector gives wide range flat response for high fidelity pick-up of voice and music, or rising characteristic for extra crispness of speech.
The CARDAX overcomes background noise, reverberation, feedback. Simplifies microphone and speaker placement. Permits greater loudspeaker volume levels. Highly recommended for public address, recording, remote broadcast, paging, dispatching, and communications.

Output level: -57 dh for high fidelity; -48 db , for rising response. Smart, compact, easily portable. Rich satin chromium finish. High capacity Metal Seal crystal-fully enclosed for greater moisture protection. Tiltable head. \(3 / 8\) " -27 thread. Built-in cable connector. "On-Of" switch. Size \(21 / 2\) " \(\times 27 / 8\) " x \(6 \frac{1 / 4 "}{}\) including stud. Net wt. i \(3 / 4 \mathrm{lbs}\).

\section*{High Fidelity Broadcast Dynamics}

\section*{Ultra-Wide Range, Flat Response! High Output! Impedance Selector! Dual Shock Mount! Laboratory Calibrated. Proved in Studio and Remote Use!}

Developed in oooperation with station and network engineers, E-V Broadcast Dynamic Mich most exacting requirements of modern, high fielity \(F M\) and AM Microphons broadcast serve. erte highs are particularly clean and peak-free. High output level gives excellent signal to noise ratio.
Consistently accurate, ultra-wide-range, flat response is achieved through specially designed non-metallic Acoustalloy diaphragm and highly efficient magnetic structure. Close tolerances and individual laboratory control guarantee uniformity. Ideal for studio find remote broadcasting, audience participation, applause pick-up, recording, and hith quality public address. Construction is extremely rugged and shock-resistant hifh quality public \(99 \%\) ) pressure cast case, finished in durable Satin Chromium
Polar pattern is omnidirectional at low frequencies becoming directive at high frePolatios Recessed switch gives instant selection of 50 to 250 ohms impedance. Built-in Cannont XL-3 connector. Tiltable head, \(5 / 8 "-27\) stand coupler. 20 ft . cable.

Módel 650 Broadcast Dynamic. Frequency response, plus or minus \(2.5 \mathrm{db}, 40-15,000 \mathrm{cps}\) Moder 650 broadcoss stud. Shock mount is \(11 / 2 " \times 37 / \mathrm{m}^{\prime \prime}\). Net wt., including shock mount, \(23 / 4 \mathrm{lbs}\) List Price
Model 645 Broadcost Dynamic. Frequency response, plus or minus 2.5 db . \(40-15,000 \mathrm{cps}\) Model 645 Broadcost Dynamic. Frequal shock mount. Size \(21 / 4{ }^{\prime \prime} \times 4 \frac{5}{\prime \prime} \times 5 \frac{1 / 4}{\prime \prime}\) including stud. Shock mount is \(1 \frac{1}{2} 2^{\prime \prime} \times 37 / /^{\prime \prime}\). Net wt., including shock mount, \(21 / 4 \mathrm{lbs}\). List Price
\(\$ 100.00\)
Hodel 635 Broadcast Dynamic. Frequency response, plus or minus \(2.5 \mathrm{db}, 60-13,000 \mathrm{cps}\). Output - 53 db . Does not include external shock mount. Can be used in the hand or on a stand. Size \(2^{\prime \prime} \times 4^{\prime 3} /^{\prime \prime} \times 41 / 2^{\prime \prime}\) including stud. Net wt., \(11 / 2 \mathrm{lbs}\). List Price........ \(\$ 60.00\)

Model 630-High Fidelity, High Output Dynamic
Finer performance, than evel
in a moderately priced movingcoil dynamic! E-V Aconstalloy diaphragm provides exceptionally smooth response from \(40-11000\) c.p.s. Assures high quality reproduction of speech and music, indoors and outdoors. Compact, rugged . . . withstands heat, humidity and other severe operating conditions. Tilting head for directional or non-directional use. Built-in cable connéctor. \(5 /\) " -27 thread. "On-Off" switch. Widely used in all types of applications. Highest purity pressure-cast case, finished in lustrous satin chromium. Output level 53 db below 1 volt/dyne \(/ \mathrm{cm}^{2}\). Equipped with 20 ft . shielded cable. Net weight, \(11 / 2 \mathrm{lbs}\). Available in \(\mathrm{Hi}-\mathrm{Z}\) (direct-to-grid, 25,000 ohms), 50, 200 250 , or 500 ohms impedance. Low impedances balanced to ground.

Model 630. List Price
\(\$ 36.50\)

\section*{Model 606-DIFFERENTIAL* DYNAMIC}

Effectively used in airport control towers, police dispatching, special events broadcasting, close-talking public address, and high noise industrial applications. Through exclusive E-V DIFFERENTIAL principle, surrounding or distant sounds are cancelled out. Transmitted speech gets through clearly and completely. Frequency re sponse, substantially flat 100-6000 c.p.s. Output level: 57 db below 1 volt/dyne/cm². E-V Acoustalloy diaphragm. Withstands severe service. Built-in cable connector. Pressure cast metal case, finished in satin chromium. Head at \(22^{\circ}\) fixed tilt. \(5 / 8 "-27\) thread. Net wh., 12 ounces, Available in \(\mathrm{Hi}-\mathrm{Z}\) (direct-to-grid 25,000 ohms), 50, 200 , or 250 ohis. Low impedances not balanced to ground.

\section*{A GREAT NEW VALUE IN DYNAMIC and CRYSTAL}

\section*{The MERCURY}

Models 611-911
E-V quality features make the MERCURY today's foremost value in low-cost general-purpose microphones. Adds smartness to economical public address and paging systems, recording equipment, ham rigs. Smooth response \(50-8000 \mathrm{cps}\) assures fine reproduction of voice and music. High output level. Non - directional,
 becoming directional at higher frequencles. Compact, rugged. "OnOff'" switch. Tiltable head. Built-in cable connector. Highest purity ( \(99.99 \%\) ) pressure cast case. Satin Chromium finish. Size \(23 / 8^{\prime \prime} \times 31 / 8^{\prime \prime} \times 61 / 4\) " including stud.
Moving-coil Dynamic Models are available in \(\mathrm{Hi}-\mathrm{Z}\) (direct-to-grid, 25,000 ohms) 50 , 150,250 , or 500 ohms impedance. Low impedances balanced to ground. Crystal Models are Hi-Z
MERCURY Model 611-8. Dynamic. Output -53 db . Has E-V Acoustalloy diaphragm. 8 ft cable. List Price .............................. \(\$ 29.50\) MERCURY Model 611-20. Dynamic. With 20 ft, cable. List Price ................................. \$31.00
MERCURY Model 911-8. Crystal. Output - 50 db. Fully enclosed Metal Seal crystal. 8 ft . cable. List Price
\$22.50
MERCURY Model 911-20. Crystal. With 20 ft . cable. List Price
. \(\$ 24.00\)

\section*{Model 605 Durable Dynamic}

Attractive, dependable general-utility mike Frequency response 50 7500 c.p.s., substantial ly flat. Output level 57 db below 1 volt/dyne \(\mathrm{cm}^{2}\). Exclusive E-V Acoustalloy diaphragm. Aressure cast case, with \(22^{\circ}\) fixed tilt. \(5 / 8\) " -27 thread. Built-in cable connector. Satin Chromium finish. Net wt. 12 ounces. Available in Hi-Z (direct-to-grid, 25,000 ohms), 50,200 r 250 ohms impedance. Low impedances not balanced to ground.
Model 605-8. With 8 ft . cable
List Price
\(\$ 24.50\)
Model 605-20. With 20 ft . cable
List Price
\(\$ 26.00\)

\section*{Model 805 Contact Microphone}

For guitar, banjo, mandolin, violin or any vibrating musical
 instrument. Increases
enriches tonal efnatural sound volume, enriches tonal effects. Easily installed. Frequency response 40-8, 000 c.p.s. High impedance. Inertia type crystal, sealed against moisture and acoustic feedback. 15 ft , shielded cable. Size \(21 / 4 " \times 1^{\prime \prime} \times 7 / 16^{\prime \prime}\). Net wt. 2 ounces.

Model 805. List Price

\section*{Mobil Mikes}

\section*{Model 600-D}

\section*{Dynamic Mobil-Mike}

Specially designed for clear, crisp speech ransmission in communications, public address, call systems and recording. Frequency response, substantially flat, \(100-6000\) c.ps gives higher articulation, provides more usable power level, and is less fatiguing to the listener. Output level: 55 db below 1 volt/dyne/cm². High impact black below 1 case. E-V Acoustalloy diaphragm. Extremely rugged, for indoor and outdoor use Press-to talk switch controls relay. Panel mounting bracket. Equipped with 6 ft shel mounting Size \(21 / /^{\prime \prime} \times 2^{\prime \prime} \times 4^{\prime \prime}\). Net weight 8 cable. Available in \(\mathrm{Hi}-\mathrm{Z}\) (direct-to- Net weight, 8 ounces. hms), \(50,200,250\), or 500 -grid, 25,000 balanced to ground.
Model 600-D. List Price
Model 600-DL. With switch lock. List Price

\section*{Model 210-Carbon Mobil-Mike}

Gives high intelligibllity speech transmission. Used in police, fire, taxi, aircraft, marine and amateur communications, mobile public addiess, paging, dispatching and speech recordlic. Extra rugged, high impact black phenoin case. Withstands severest service indoors and outdoors. Frequency response substanOutput 100-4000 c.p.s. for high articulation. Ontput level: 10 db . below 1 volt/ 100 dynes/ \(\mathrm{cm}^{2}\). Single button. Press-to-talk switch. 5 ft . cable. Standard dash mounting clip. Size \(23 / 4^{\prime \prime}\) \(x 2^{\prime \prime} \times 4^{\prime \prime}\). Net wt. 7 ounces.
Model 210. List Price \(\qquad\) \(\$ 25.00\)
Model 210-L. List Price
\(\$ 26.50\)
(Also atuilable for exact replacement in Motorola, RCA, G.E. and similar equipment.)

\section*{Model 205-Hand-Held DIFFERENTIAL* CARBON}

Close-talking, noise-cancelling microphone designed for maximum intelligibility under intense noise. Used in police, alrcraft, ma rine, industrial and other communications applicatlons; also in high power sound projection. Fits in the hand. Operates in all positions. High impact phenolic case, with panel mounting bracket on back. Blast proof, waterproof, shock resistant. Wlast stands temperatures from \(-40^{\circ}\) to \(+185^{\circ} \mathrm{F}\) Frequency response, substantially flat from \(100-4000\) c.p.s. Output level: 10 db below 1 volt \(/ 100\) dynes \(/ \mathrm{cm}^{2}\). \(10-50 \mathrm{~m}\). a. button current. Press-to-talk switch actuates button and relay. Equipped with 5 ft. cable. Size \(21 / 4^{\prime \prime} \times 21 / 4^{\prime \prime} \times 4^{\prime \prime}\). Net weight 7 ounces.
Model 205. List Price
Model 205-L. With switch lock. List Price
\(\$ 30.00\)

\section*{Model 602-Hand-Held}

\section*{DIFFERENTIAL* DYNAMIC}

Close-talking, noise-cancelling speech microphone for use where ambient noise is 100 db or more. Assures high articulation. Especially suitable for marine, industrial and emergency communications, high power sound projection, and for speech in any windy, wet or extremely hot or cold location. Frequency response, substantially flat, 100-6000 c.p.s. Output level: 55 db . below 1 volt/dyne/cm². E-V Acoustalloy diaphragm. High impact phenolic case. Press-
 to-talk switch controls relay. Panel mounting bracket. size \(23 / 4^{\prime \prime}\) cable. A vailable weight, 8 ounces. Equipped with 6 ft . shielded cable. A vailabie in Hi-Z (direct-to-grid, 25,000 ohms), 50,200 ,
250 , or 500 ohms impedance.
Madel 602. List Price \(\qquad\)
Model 602-L. With switch lock. List Price \(\$ 41.50\)

\section*{Velocity}

\section*{High Fidelity, Bi-Directional, High Output}

E-V design provides superb pick-up and reproduction of voice and music, for indoor public address, broadcasting and recording. Favorite of well-known orchestras and sound engineers. Response is substantially flat over a wide frequency range. Equal front and back pick-up with longer pick-up range; zero pick-up at sides, top and bottom. Proper tilting and placement of microphone reduces feed-back and random noise-permit increased volume levels. Open-type, refection-free housing. Internal shock absorber mounting. One-piece frame and internal mounting structure give extra ruggedness.

\section*{Model V-3 All Impedance Velocity}

Combines all popular impedances in one microphone. Impedance selector provides high impedance or match all low impedances. Low impedances balanced to ground. Substantially flat response \(40-10,000\) c.p.s. Output -53 db . Locking cradle for tilting microphone. Built-in cable connector. \(5 / 8^{\prime \prime}-27\) thread. Bronze gun metal finish. Size \(3^{1 / 2} 2^{\prime \prime} \times 2 \frac{3 / 4 " x}{}\) \(8^{\prime \prime}\) including stud. 20 ft . shielded cable. Net wt., \(21 / 2 \mathrm{lbs}\). Model V-3. List Price \(\$ 60.00\)

\section*{Model V-2A Velocity Microphone}

Similar to the V-3, but without Vari-Z selector. Choice of single standard impedance: \(50,250,500\) ohms, or \(\mathrm{Hi}-\mathrm{Z}\) ( 35,000 ohms). Frequency response, substantially flat, \(40-10,000\) c.p.s. Output -53 db . Locking cradle mounting. Built-in cable connector \(5 / 8^{\prime \prime}-27\) thread. Bronze gun metal finish. Size \(3^{1 / 2^{\prime \prime}} \times 2^{3 / 4^{\prime \prime}} \times 8^{\prime \prime}\) including stud. 20 ft . shielded cable. Net weight, \(21 / 2 \mathrm{lbs}\). Model V-2A. List Price \(\$ 50.00\)

Model V-1A Smaller-Size Velocity
Unsurpassed at such moderate cost. Gives you high fidelity, bi-directional advantages in a compact, smaller size microphone. For public address, recording and remote broadcasting. Substantially flat response \(40-9000\) c.p.s. Output -59 db . Locking cradle mounting. Builtin cable connector. \(5 / 0^{\prime \prime}-27\) thread. Satin chromium finish. Size \(2^{3 / 44^{\prime \prime}} \times 21 / 8^{\prime \prime} \times 6^{\prime \prime} 2^{\prime \prime}\) including stud. 20 ft . shielded cable. Net wt., 2 lbs. Available in Hi-Z ( 35,000 ohms), 50, 250 or 500 ohms impedance. Low impedances not balanced to ground.
Model V-1A. List Price
\(\$ 40.00\)

\section*{Model 1000 Speech Clipper}

Clips the tops and bottoms from speech frequencies which rise above a pre-set amplitude - increases the ratio of consonant to vowel intensity. Adds greatly to articulation and intelligibility in speech transmission, especially in the presence of high QRM or QRN. Attenuztes sidebands above 3000 c.p.s. Holds modulation at \(100 \%\). Clipping: \(3-20 \mathrm{db}\). Response : \(200-3000 \mathrm{c} . \mathrm{p} . \mathrm{s}\). Operates direct ly from any high impedance microphone into microphone input of conventional speech amplifier. Uses type 6SC7 and 6 H 6 tubes. Requires 150 volts at 5 ma and 6.3 volts at 6 amp. Input terminal: sturdy, aluminum case Size \(104^{\prime \prime} 2^{\prime \prime}\) shie!ded cable. Compact tubes. Easy to install. List Price .......................................... \(\$ 2450\)

\title{
Multi-Purpose CENTURY Microphone
}

Electurf ice

CRYSTAL - DYNAMIC - CARBON
Brilliantly engineered and superbly styled low-cost microphones. Complete adaptability permits widest use in public address, paging, recording, communications. Choice of crystal, dynamic or carbon types. Can be used in any position-stands by itself on table or desk - rests on its back - can be comfortably handheld, mounted on a stand or susperded overhead. Highest purity pended overnead. Highest cast case is finished in lustrous gray-brown. Rugged, light weight. Size \(3^{\prime \prime} \times 2-3 / 16^{\prime \prime} \times 1^{\prime \prime}\) 。

Model 915-Century Crystal Combines excellent frequency range, high level and mounting flexibility. Case provides ample shielding and stability. Moistureshieled crystal. High impedance. sealed crystal. High impequen reOutput -50 db . Frequency re-
sponse \(60-7500 \mathrm{c} . \mathrm{p} . \mathrm{s}^{2} 71 / 2 \mathrm{ft}\). black sponse \(60-7500\) c.p.s. \(7 / 2\)
glazed cloth covered, shielded glazed cloth covered, shielded cable and \(5 / 8^{\prime \prime}-27\) thread stand adapter. Net wt. only 6 ounces. Model 915. List Price \(\$ 10.00\) Model \(915-5\). With slide-to-talk switch. List Price .............. \(\$ 11.50\)

Model 615-Century Dynamic Has exclusive non-crushable Acoustalioy diaphragm. Withstands severe service. Output - 57 db. Frequency response \(55-7500\) c.p.s. High impedance. \(71 / 2 \mathrm{ft}\). black glazed cloth covered, shielded cable and \(5 / 3^{\prime \prime}-27\) thread stand ed cable and \(8-27\) thread stand Mapt 615 List Price \(\$ 1650\) Model 615. Wish slide-totalk Model 615-S. With Slide-to-talk horting Model 415. Reclining Desk Stand. Mounts Century at \(15^{\circ}\) tilt. GrayBrown finish. Size \(25 / s^{\prime \prime} \times 2 / 4^{\prime \prime} \times 11^{\prime \prime}\). Net wt. 4 oz. List Price...... \(\$ 1.50\)

\section*{ELECTRO-VOICE FLOOR AND DESK STANDS}

Model 425-Deluxe Floor Stand

In this unique floor stand, all dead weight is eliminated, but full stability retained. Simply press red button to raise or lower shaft with same one hand. Locks automatically by releasing button. Shaft can be rotated without any adjustment device. Ac justable legs permit placing nush against wake or speake Folds into small, compact, porttake apart. Folds into smalr, compact, port base. Satin chromium finish. Height adjustment \(37^{\prime \prime}\) to \(66^{\prime \prime}\). 3 -leg sprear 17". Net wt. \(71 / 2 \mathrm{lbs}\). Shipping. wt., 9 lbs.
Model 425. List Price
Model 430-Utility Floor Stand

\((\sqrt{10})^{c}\)Gives solid support, yet light in weight. Single button gives instant control of shaft height. Shaft may easily be rotated. Modern, sturdy, high-pressure-cast base. One bolt locks 3 legs in position. Comes apart to make locksll, compact package. Attractive Gray small, compact package. Attractive cring mium. Height adjustment \(36^{\prime \prime}\) to \(65^{\prime \prime}\), \(3-\mathrm{leg}\) spread 17". Net wt. \(7^{1 / 2}\) lbs. Shipping wt., 9 lbs.
Model 430. List Price
\(\$ 15.00\)

\section*{Model 432 Comb.} Banquet \& Floor Stand 3-sestion take-apart gives hancy 4 -way use: (1) Banquet hancy 4 -way use. (rom \(19^{\prime \prime}\) to \(34^{\prime \prime}\); (2) chair-height floor stand, extends from \(26^{\prime \prime}\) to \(41^{\prime \prime}\) : ( \((3)\) short floor stand, extends from \(36^{\prime \prime}\) to \(51^{\prime \prime}\); (4) conventional floor stand, extends from \(44^{\prime \prime}\) to \(59^{\prime \prime}\). Easy to sasembie or takt a packMakes compact, portable package. Red button gives instant finger-th control lockint height. Three-legged, lockingtype, adjustable folding base; cant be place pulpit, stage or speaker's rostrum. A:tractive gray-brown finish. Extenslomiuna wet in sat 8 lbs.
Model 432. List Price .... \(\$ 20.00\)

\section*{Model 424-Desk Stand}
small, light weight. Designed for use with \(\mathrm{E}-\mathrm{V}\) Models \(210,205,600-\mathrm{D}\) and 602 . Made of aluminum. Easily lifted with microphone in hand. Very stable on desk or table. Rubber base buttons. Satin finish. Size \(43 / 4\) " x \(41 / 2{ }^{\prime \prime} \times 33 / 4\) ". Net wt., 4 oz.
Model 424. Desk Stand. List Price \(\qquad\)

\section*{Model 423-Desk Stand}

Modern, sturdy, round die cast base. Rests firmly. Satin chromium finish. Rubber base buttons. \(5 / 8^{\prime \prime}-27\) thread. Base diameter \(51 / \mathrm{s}^{\prime \prime}\) Net wt. 1 lb . Choice of \(3^{\prime \prime}\) or \(6^{\prime \prime}\) stem riser. Model 423. List Price ............................ \(\$ 4.00\)

\section*{Model 427-Desk Stand}

Attractive pressure-cast round base rests stably on desk or table. \(8^{\prime \prime}\) stem riser. Lustrous gray-brown finish. 5/8"-27 thread. Base diameter \(45 / 8^{\prime \prime}\). Net wt. \(5 / 8 \mathrm{lb}\).
Model 427. List Price

\section*{Low Impedance Microphone-to- \\ Grid Matching Transformers}

The windings of these transformers have low distributed capacity and are amply shlelded against inductive hum by a high permeability shield, inside a pressure cast case. Designed or mounting on amplifier chassis or in series with the microphone line.
Model 502-Designed for 50 and 250 ohm ( 500 ohms optional) microphones. Broadcast fidelity. Frequency response \(40-20.000\) c.p.s. \(\pm 1 \mathrm{db}\). for either speech or music. MC-4 input connector. List Price

\section*{"Break-in" Touch-to-Talk Stand}

Fits any microphone with standard \(5 / 8\) " -27 thread. Specially designed, lever-type switch for relay operation or microphone 'On-Off" - closes or opens instantly, or locks in "talk" position, with light finger-tip action. Single pole, double throw. Finished in Satin Chromium, with gray plastic switch lever. Model 428. Stand with switch. Ht. 7". Net wt. \(1^{1 / 4}\) lbs. Base
 Model 328. Touch-to-Talk switch only. Height 634 ". Net wt. 8 oz . List Price
59.50

Model 628. Complete with E-V 605-8 Hi-Z Dynamic Microphone. 8 ft. cable. List Price Model 629. Complete with E-V 606-8 Hi-Z Differential Dynamic Microphone. 8 ft . cable. List Price

> E-V Series 12 TORQUE DRIVE CRYSTAL CARTRIDGES for 78 rpm Records

\section*{Basic 3 Replace Oveŕ́ 150 Standard Models}

The Series 12, with only 3 basic models, provides virtually universal replacement for 78 rpm cartridges. Enables immediate replacement of any one of over 150 types in general use. Simplifies and speeds servicing. TORQUE DRIVE quiets surface noise, muffles needle talk, cancels distortion - assures finer reproduction - preserves records and needles - gives new life to old, worn records. Silicone moisture-proofed. Aluminum case. Color coded for voltage. Size \(1-3 / 32^{\prime \prime} \times 11 / 16^{\prime \prime} \times 5 / 16^{\prime \prime}\). Weighs only \(1 / 5 \mathrm{oz}\). Complete with mounting hardware and replaceable \(3-\mathrm{mil}\) Osmium-tip or Sapphire-tip needle.

}
- Revolutionary TORQUE-DRIVE* givestyou toy's most efficient crystal cartridge for both \(1-\mathrm{mil}\) (.001) and \(3-\mathrm{mil}(.003)\) records. Its playing quality ... its accurate, noiseless, distortion-free performance . . . are unexcelled. proved by comparison, it is being used more and more in 78,45 and \(331 / 3 \mathrm{rpm}\) single-speed and multi-speed record players. FEATURES: Highest compliance (softness of needle-touch to record) per volt output. Small size, low mass, light weight. Greatly multiplied needle-force to crystal for ample voltage output. Ideal frequency response. Excellent tracking. Zero output for vertical movement. No bearings or bushings to cause friction or to age and wear. Easy mounting. Replaceable long-life whisker-type needle. Silicone moisture-proofing for longer crystal life.

\title{
E-V Series 14 TORQUE DRIVE CRYSTAL CARTRIDGES for \(331 / 3\) and 45 rpm
}

\section*{Now in Thousands of Record Changers}

Selected and specified as original equipment by critical engineers ... the Series \(1+\) is performing brilliantly today in many thousands of record changers. Tracks perfectly at 5 grams pressure, with very high needle compliance (softness of needle-touch to record). Frequency response closely follows NAB standard curve. Output is .9 volt on RCA 12-5-31V record at 1000 cps . Accurately reproduces the new fine groove high fidelity recordings. Silicone moistureproofing gives crystal far longer life. Aluminum case, color coded. Size \(1-3 / 32^{\prime \prime} \times 11 / 16^{\prime \prime} \times 5 / 16^{\prime \prime}\). Weighs only 1/5 oz. Replaceable 1-mil (.001) needle.
Model 14. Complete with 1 -mil Osmium-tip needle, and mounting hardware. List Price
\(\$ 7.50\)
Model 14-A. Same, tess mounting hardware. List Price
Model 14-S. Complete with 1 -mil Sapphire-tip needle, and mounting hardware. List Price

(Also available in wariable reluctance Magnetic type. See listing in table on other side.)

\section*{E-V Series 34 orthogonal TORQUE DRIVE for 45 and \(331 / 3 \mathrm{rpm}\)}

New Orthogonal (vertical type) crystal cartridge - with \(5 / 8^{\prime \prime}\) and \(1 / 2^{\prime \prime}\) hole spacing - designed as replacement in 45 and \(331 / 3\) rpin changers. Brings to the record player valuable benefits of E-V TORQUE DRIVE. Tracks at 5 grams pressure. Extra high compliance (softness of needle-touch to record), well above unity. Frequency response is smooth, peak-free out beyond \(10,000 \mathrm{cps}\). for wide range high fidelity reproduction. Output is 1.1 volt on RCA \(12-5-31 \mathrm{~V}\) record at 1000 cps . Silicone moistureproofed. Simple to install. Replaceable 1-mil' (.001) needle.
Model 34. With 1 -mil Osmium-tip needle. List Price ........... \(\$ 6.50\)

Licensed Under Brush Patents

\section*{E-V Series 16 TWILT TORQUE DRIVE for All Three Speeds}

Superbly plays \(45,331 / 3\) and 78 rpm records, with a single twin-tip replaceable needle, without weight change, with tracking pressure of only 6 grams ... and does it with all the fidelity, the smoothness, the efficiency inherent only in E-V TORQUE DRIVE. With easy, positive-tilting, snap action, you merely tilt the TWILT to select the \(1-\mathrm{mil}\) or 3 -mil needle tip, for fast or slow speed records. Set down is accurate. Frequency response closely follows NAB standard curve. Output is .9 volt on either tip. Mounts easily in most any standard pickup arm, with nothing more required than reducing needle pressure. "Fast-Slow" decal indicator.
Model 16-TT. Complete with twin-tip 1-mil Sapphire and
3-mil Osmium needle. List Price
Model 16. Same, but without tilting mechanism.
List Price
. \(\$ 9.00\)
Model SO-13. Replacement needle. Twin-tip 1-mil
Sapphire and 3 -mil Osmium. List Price
Model OO-13. Replacement needle. Twin-tip 1 -mil and 3-mil Osmium. List Price
Model SS-13. Replacement needle. Twin-tip 1 -mil and 3-mil Sapphire. List Price
(See listing below for variable reluctance Magnetic type.)

\section*{E-V \\ TORQUE DRIVE KITS}

\section*{SPEED SALES AND SERVICE}

E-V Series 12 Cartridges are availabie individually or in handy Sales and Service Kits. These Kits serve as eyecatching self-selling displays, speed replacement service, save ordering-time and servicing-time. Each Kit listed below contains the basic 3 that enable you to replace any one of over 150 standard models . . . immediately. Also has replacement needles in handy holders for quick sales. Color coding for voltage on every cartridge. Mounting hardware in each cartridge container.
KIT "A" (All Osmium-tip). Contains: 6 cartridges, with needles; 4 extra needles; replacement chart. Total List Price .......... \$51.00 KIT "B" (All Sapphire-tip). Contains: 6 cartridges, with needles; 4 extra needles; replacement chart. Total List Price .......... \(\$ 61.00\)

VARIABLE RELUCTANCE MAGNETIC CARTRIDGES
E-V Phono Pick-up Cartridges are also available in variable reluctance Magnetic type. Easily used with E-V Model 503 Trans-former-Filter, which provides the necessary matching network. Iormer-Fiter, which provides not require a pre-amplifier. If the Magnetic cartridges are Does not require a pre-ampliner. the magamp. should be 500 used with a pre-amp., the input to
ohms. (See listing in table below).

\section*{GENERAL PURPOSE MICROPHONES}

\begin{abstract}
The Famous Turner 22X - 22D Crystal or Dynamic - Tops in value - tops in performance. Accurate pickup and faithful reproduction have made these units the most popular general purpose microphones on the market. \(5 / 8^{\prime \prime}-27\) standard coupler.

22X CRYSTAL gives clear reproduction. Smartly engineered design cuts feedback to minimum. 90 degree tilting head. Built-in wind-gag permits outdoor operation. Crystal impregnated against moisture in mechanical shock proof mounting. Automatic barometric compensator. Level 52 db below 1 volt/dyne/sq cm Response: \(\pm 5 \mathrm{db}\) from \(50-9000\) c.p.s. Complete with 7 ft . removable cable set. Satin chrome finish. List \(\$ 20.00\)

22D DYNAMIC. Same appearance as \(22 X\) but has high level dynamic cartridge Dependable indoors and out. Reproduces smoothly at all frequencies. Level : 54 db Dependable indoors and out. Reproduces smoothy at all frequencies. Level : 54 db
below 1 volt \(/ \mathrm{dyne} / \mathrm{sq}\). cm. at high impedance. Response: \(\pm 5 \mathrm{db}\) from \(50-9000\) c.p.s. Complete with tilting head, 7 ft . removable cable set.
\end{abstract}

\section*{High performance at moderate cost}

33X - 33D CRYSTAL OR DYNAMIC - Recommended for quality P.A., recording, and communications work, the Turner 33X Crystal has a high quality 2-element crystal. Built for indoor or outdoor use with crystal impregnated against moisture, automatic barometric compensation, and mechanical-shock automatic barometric compensation, and mechanical-shock proofing. Will not blast from close speaking. Level 52 db be
low 1 volt/dyne/sq. cm . Response: \(\pm 5 \mathrm{db}\) from \(50-9000 \mathrm{c} . \mathrm{s} . \mathrm{s}\). low 1 volt/dyne/sq. cm . Response: \(\pm 5 \mathrm{db}\) from 50 - 9000 c .p.s.
Handsome streamline case finished in satin chrome. Complete Handsome streamline case finished in satin chrom
with tilting head, and 20 ft , removable cable set.

List

\section*{Atłractive, high fidelity semi-directional crystal microphone}
\(34 X\) CRYSTAL - A microphone whose beauty is exceeded only by its performance. The 34 X is the ideal all around semidirectional crystal microphone for use where feedback and acoustic conditions are unusually difficult. Advanced engineering design with full 90 degree tilting head permits tilting to most advantageous position to reduce audience noise and background disturbances. The \(34 X\) utilizes a moisture proof crystal, automatic barometric compensator, and is blast- and mechanical-

\section*{Broadcast Quality Dynamic}

MODEL 211 - Precision engineered for outstanding performance the Turner 211 Dynamic utilizes a new type magnet structure and acoustic network. The high frequency range is extended and the extreme lows raised 2 to 4 decibels. Unique diaphragm structure results in extremely low harmonic and phase distortion ture results in extremely low harmonic and phase distortion Without sacrifice of high output level. A sensitive unit ye ruggedly built for dependable use indoors or out under the most difficult acoustic and climate conditions. Withstands rough handling. For quality recording, P.A., sound system, and broad cast work including \(F M\). Level : 54 db below 1 volt/dyne/sq. cm.

\section*{TILTING HEADS}

Models 5X. 5D, \(22 \mathrm{X}, 22 \mathrm{D}, 33 \mathrm{X}\), \(33 \mathrm{D}, 34 \mathrm{X}\), and 211 are all equipped with \(90^{\circ}\) tilting heads.

Licensed under U. S. patents of the American Telephone and Telerraph Company, and Western Electric Company Incorporated. Crystals licensed under patents of the Brush Development Company

shock proofed. Level: 52 db be low 1 volt/dyne/sq. cm. Response: \(\pm 5 \mathrm{db}\) from \(50-10,000\) c.p.s. Satin chrome finish. Complete with 20 ft . removable cable set.

List \(\$ 29.00\)
at high impedance. Response \(\pm 5 \mathrm{db}\) from \(30-10,000\) c.p.s Equipped with tilting head balanced line output connection balanced line output connection and 20 ft . 2-conductor, heavy uty removable cable set. Satin hrome finish.
\(00 \mathrm{ohms}, 500\) ohms, or high
impedance. List............... \(\$ 47.50\) 50 ohms. List 45.00

33D DYNAMIC. Same appearance as 33 X but with smooth high level dynamic circuit. Level : 54 db below 1 volt/dyne/sq. cm. at high impedance. Response: \(\pm 5 \mathrm{db}\) from \(30-9000\) c.p.s. Complete with 20 ft cable set.

200 ohms 500 ohms, or high
impendance. List................ \(\$ 27.00\) 50 ohms. List........................................ \(\mathbf{2 5 . 0 0}\)

\section*{MODEL "S" \\ SWITCH EQUIPMENT}

Turner Microphones in Models \(22 \mathrm{X}, 22 \mathrm{D}, 33 \mathrm{X}, 33 \mathrm{D}, 34 \mathrm{X}, 5 \mathrm{X}\), and 5 D are available with built-in slide switch illustrated. Shorts the line quietly. Permits fingertip contro of microphone regardless of dis tance from amplifier. Furnished only on order with Turner Micro phones. (Whenordering designate "S" plus microphone Model No. Example: "S22X".)
For Switch Models add \(\$ 2.00\) to list price.

Model 77

\section*{MODEL 77 CARDIOID (Left)}

New Super-Cardioid microphone of advanced design
Impressively styled, the new Turner Model 77 is brilliantly engineered with a combination 2-element interior structure. Improved circuit design utilizes both pressure and velocity operated units in series. Sound is effectively controlled to produce the true Super-Cardioid pickup pattern which reduces feedback to the minimum. The Model 77 features a wide range pickup at the front and a sharply attenuated output at the rear
with approximately 15 db discrimination between front and rear at all frequencies. Response: \(\pm 5 \mathrm{db}\) from \(70-10,000\) c.p.s. Level : 62 db below 1 volt/dyne/sq. cm. at high impedance. Built-in switch giving \(50,200,500\) ohms, or high impedance output permits use with any standard equipment. Smooth tilting action and quick-disconnect plug. Standard \(5 / \mathrm{g}^{\prime \prime}-27\) mounting. Finished in gun-metal gray and/or chrome. Complete with 20 ft . balanced line removable cable set.
Model 77 Cardioid. List
\(\$ 77.00\)

\section*{MODEL 87 VELOCITY (Right) High fidelity response and bi-directional pickup}

Developed to bring world famous Turner dependability to the velocity microphone field. Exceptional quality and trouble-free operation. Engineered with single element ribbon and Alnio \(V\) magnet for maximum sensitivity. Well shielded output transformers exclude hum pickup. Bi-directional figure 8 pickup pattern with smooth response within \(\pm 5 \mathrm{db}\) from \(80-10,000\) c.p.s. for most exacting studio work. Level: 62 db below 1 volt/dyne/sq. sm. at high impedance. 4 -position output switch permits use with any 50 200 , 500 ohm, or high impedance input. Equipped with universal swivel mounting, \(5 / 8^{\prime \prime}-27\) thread. Richly finished in gun-metal gray with satin chrome screen. Complete with 20 ft . attached balanced line cable.
Model 87 Velocity. List
\(\$ 47.50\)

\section*{FAMOUS TURNER MODEL 99 DYNAMIC}

MODEL 99 DYNAMIC is the most rugged microphone in the entire Turner line Withstands toughest climate and temperature changes. Adjustable saddle. Fits any standard mike stand. Semi- or non-directional operation. Broadcast studios, large city police departments, and internationally famous manufacturers specify 'Iurner 99 for crisp, ciear results. Baked gunmetal finish. Level: 52 db below 1 volt/dyne/sq cm . at high impedance. Response : \(\pm 5 \mathrm{db}\) from \(40-9000\) c.p.s. Complete with 20 ft . removable cable set.

200 ohms, 500 ohms, or high impedance. List
\(\$ 34.00\)
50 ohms.
31.50

\section*{999 BALANCED LINE DYNAMIC}

Same professional appearance as Model 99. Voice coil and transformer leads are insulated from ground and microphone case. Line is balanced to the ground. Assures studio results under critical conditions. Gunmetal finish. Level: 52 db below 1 volt/dyne/sq. cm. at high impedance. Response: \(\pm 5 \mathrm{db}\) from \(40-9000 \mathrm{c} . \mathrm{p} . \mathrm{s}\). With 3 -pin polarized locking connector and 20 ft . balanced line low-capacity cable.

200 ohms, 500 ohms or high impedance. List
\(\$ 37.50\)
50 ohms. List

\section*{U9S DYNAMIC}

\section*{Four impedances at your fingertips}

Whatever impedance you need - 50 ohms, 200 ohms, 500 ohms or high impedance you can get it quickly with the turn of the switch on the Turner Model U9S Dynamic. Same precision engineering and rugged construction as the Model 999 with built-in tapped multi-impedance transformer. Fill practically all needs with one microphone. A smooth, dependable performer at all impedances and frequencies, Level : 52 db A smooth, dependable periormer at adance. Responses \(\pm 5 \mathrm{db}\) from \(40-9000 \mathrm{c} . \mathrm{p} . \mathrm{s}\). Complete with 20 ft . balanced line removable cable set. List

\section*{MODEL 35X FiREBALL}

\section*{A new crystal desk microphone with instantly detachable base}

\begin{abstract}
Handsome, convenient and low priced. Model 35 X is as easy to use as a fountainpen desk set. It can be used as a desk microphone or a hand-held unit. A quarter turn releases handle from base instantly or locks it securely. The Model 35X is engineered with a high quality crystal circuit to give smooth performance to both voice and music pickups. Response: \(70-7000\) c.p.s. Level 52 db below 1 volt/dyne/stl. cm . Unit includes microphone with handle, base, and i ft. attached cable.

Model 35X. List
\(\$ 13.25\)
\end{abstract}

\section*{THE TURNER 'Hand-D'9X or 9D Crystal or Dynamic A rugged, all around multi-purpose microphone}

One of the handiest and most useful microphones made. Hang it, hold it, or mount on any standard desk or floor stand. Especially engineered for maximum response to voice. "Han-D" also delivers smooth, natural response to music pickups. Ideal for stage, paging, public address, anateur, police car, and traveling mike applications. Positive contact slide switch permits on-off operation.* Complete with \(\overline{7} \mathrm{ft}\). removable cable set.

\section*{9D DYNAMIC}

Recommended for more severe service conditions and extremes of climate and temperature. Level: 52 db below 1 volt/dyne/sq. cm. at high impedance. Response : \(\pm 8\) db from \(60-7000\) c.p.s. 200 ohms, 500 ohms or high impedance. List...................... \(\$ 27.00\) 50 ohms. List
25.00

\section*{9X CRYSTAL}

Equipped with high quality, shock mounted, humidity protected crystal for indoor or outdoor use. Level: 52 db below 1 volt/dyne/sq. cm. Response: \(\pm 5 \mathrm{db}\) from 60 7000 c.p.s.

List
\(\$ 23.50\)

\section*{New, lightweight, low cost hand microphone with unusually fine response characteristics}

TURNFIR 20X CRYSTAL - Designed to appeal to users of home recorders, economical public address, paging and call systems, and amateurs. Response to voice and music is smooth and even over a desirable range of frequencies. Level : 54 db below 1 volt/dyne/sq. cm . Response : \(\pm 5 \mathrm{db}\) from \(50-7000\) c.p.s. High quality crystal impregnated against moisture, mechanical-shock proofed. Lightweight, natural to hold and use. Equipped with hook ring for hanging. Finished in baked brown enamel. Complete with 7 ft . attached cable. List

Also available with Slidelock Switch at \(\$ 2.00\) extra list.

\section*{New, modern, convenient hand held general purpose microphones}

15X CRYSTAL - 15D DYNAMIC - For puhlic address, call systems, police communications, speech recording, amateurs, and broadcasting where hand-held microphones are required. Balanced to fit the hand naturally. When not in use it may be hungr from a hook. Engineered for smooth response over a wide range of useful frequencies. Finished in attractive gunmetal and equipped with 20 ft . attached shielded cable.
15X CRYSTAL. Level: 52 db below 1 volt/dyne/sq. cm. Response : \(\pm 5 \mathrm{db}\) from \(40-8000\) c.p.s. Humidity sealed crystal.

List
"Push-to-talk" thumb switeh optional at \(\$ 2.50\) extra list.

> 15 D DYNAMIC. For more severe operating conditions: Level: 54 db below 1 volt/dyne/sq. cm. at high impedance. Response \(: \pm 5 \mathrm{db}\) from \(40 \quad 7000\) c.p.s. 200 ohms, 500 ohms, or high impedance. List 50 ohms. List "Push-to-talk" thumb switch optional at \(\$ 2.50\) extra list.

Model 9
* Also available with precision heavy duty push-to-talk switeh at \(\$ 2.50\) list additional. Specify "With H.D. Push-Talk Sw."

Model 15
15D-NC NOISE CANCELING DYNAMIC For intelligible communications under adverse For intelligible communications under adverse
background noise conditions. Same case and background noise conditions. Same case and
finish as 15 D . Circuit designed for use in facfinish as 15 D . Circuit designed for use in fac-
tories, machine shops, railroad yards, aircraft tories, machine shops, railroad yards, aircraft,
and other places where extreme background and other places where extreme background
noise interferes with communications. The 15 D NC transmits only when spoken to at close range. Unwanted sound canceled out. Level: 52 db below 1 volt/dyne/sq. cm. at high impedance. Response: \(50-5000\) c.p.s.

200 ohms, 500 ohms, or high impedance.
List .....................................................................
50 ohms. List ....................................................
"Push-to-talk" thumb switch optional at \(\$ 2.50\) extra list

\section*{TURNER CHALLENGERS}

Turner Challengers offer performance, quality, and appearance usually found in microphones selling at twice their low cost. Engineered with a substantially flat response they give clear cut reproduction of both voice and music. Crystal models are complete with shock proof mounting, barometric compensation, moisture sealed crystal, and wind-gag to prevent blasting. Dynamic units are built to give dependable service indoors or out. You can rely on Turner Challengers - they are fully guaranteed.

BD DYNAMIC - Same appearance as BX. Equipped with dynamic cartridge. Works equally well indoors or out. Level : 52 db below 1 volt/dyne/sq. cm. at high impedance. Response: \(\pm 8 \mathrm{db}\) from \(50-6000\) c.p.s. Complete with 7 ft . attached cable. 50 ohms 200 ohms, 500 ohms, or high impedance. List

CD DYNAMIC - Same style and finish as CX. High quality magnets. 7 ft . removable cable set. Level: 52 db below 1 volt/dyne/sq. cm. at high impedance. Response: \(\pm 8\) db from \(50-7000\) c.p.s. 50 ohms 200 ohms, 500 ohms, or high impedance
List.

BX CRYSTAL - Ideal for recording, P.A., and amateur work. Brown enamel finish. Level: 52 db below 1 volt/dyne/sq. cm. Response: \(\pm 5 \mathrm{db}\) from \(50-6000 \mathrm{c} . \mathrm{p} . \mathrm{s}\). Complete with 7 ft . attached cable.
List.
.. \(\$ 10.85\)

CX CRYSTAI, - Satin chrome finish with 7 ft . removable cable set. \(5 / 8^{\prime \prime}-27\) standard coupler mounting. Level : 52 db below 1 volt/dyne/sq. cm . Response: \(\pm 5 \mathrm{db}\) from \(50-7000\) c.p.s. List.............................. \(\$ 16.25\)

A world-wide favorite with amateurs for crisp, clear reports, the Turner VT-73 is also recommended for quality speech recording and public address work. Highest quality humidity sealed crystal. Rising curvature of response between 500 4000 epstare increases intelligibility at effective voice fre4 un c.p.s. quences \(F\) rout overmodurin. resonance problems. Head reduces R.F. pickup and \(60^{\circ}\) to 1 most any position. Level: 52 db is adjustable through 60 to almost any pose \(\pm 5\) db from 50 d below 1 volt/dyne/sq, cm . Response: -b , stand, and 7 ft . attached cable. Finished in black crinkle and chrome.

List
\(\$ 21.50\)

\section*{L40 LAPEL MICROPHONE}

Small, lightweight and inconspicuous the L40 can be worn in the lapel. used with the 3 H , or concealed. Highest quality moisture sealed crystal produces high signal level. Engineered for crisp. clear speech reproduction. Chest sounds damped out. Comfortable to wear. Alligator clip secures unit to clothing. Level: 52 db below 1 volt/dyne/sq. cm. Response \(\pm 8 \mathrm{db}\) from \(50-8000\) c.p.s. Complete with 20 ft . at tached cable. List

TURNER "THIRD-HAND" MODEL 3H
Slips over your head in a jiffy and holds microphone close to your mouth, where you get exphone close to your mouth, where you get excellent volume without feedback. As natural to wear as a necktie, and lets you use both hands elsewhere. Stays out of your line of vision. Talk close without craning your neck; cuts down
background noises. background noises.
Can be used with long line, as traveling microphone. Ideal for window demonstrations. Has \(5 / 3^{\prime \prime}-27\) thread. Recommended for use with Turner microphones, as they will not blast from close speaking. Can be furnished with microphone switch when ordered with Turner microphone.

-FLAT RESPONSE. fref from annorING PEAKS, GIVING STUDIO QUALITY REPRODUCTION

The P.G. diaphragm follows air particle velocity where amplitude is a GRADIENT of the PRESSURE. In ordinary dynamics amplitude is restricted from following air particle velocity. The P.G. DYNAMIC is a radical improvement in this type of microphone. You can actually hear the difference. Case is designed according to modern acoustic principles. Rugged, not affected by temperature, altitude or humidity. Has unusually high output.

\section*{AMPERITE MICROPHONE STANDS}

Scientifically designed, Amperite stands feature:
1. Positive, non-sliding clutch. Will never wear out, never require adjustment. Will not "creep".
2. Shock-absorbing rubber bottom.

The microphone can be rotated without loosening clutch. The action up and down is smooth, pneumatic-like.

GROUP HEARING AID COMPONENTS \\ \\ SINGLE EARPHONES - "FEATHERWEIGHT" SERIES \\ \\ SINGLE EARPHONES - "FEATHERWEIGHT" SERIES LORGNETTE HANDLE AND HEADBAND TYPES
} LORGNETTE HANDLE AND HEADBAND TYPES
}

The most widely used earphones, for group hearing aid systems in churches, theatres, mortuaries, etc., are of the "Featherweight" series. The acoustic response of these has been found, over a period of years, to be especially suitable for this class of service. The unit is molded of high strength black plastic material, measures \(21 / /^{\prime \prime}\) in diameter, has a maximum thickness of \(3 / 4^{\prime \prime}\) and weighs approximately \(1 \frac{1}{4}\) ounces. A variety of ohmages are available, but most users will find the following table useful.

No. 120

300 ohms
4500 ohms
9000 ohms

Low Impedance Lines (up to 50 ohms) High Impedance Lines (200-500 ohms) Large Installations on High Impedance Lines ( 500 ohms )

No. 12 -Single Earphone, non-adjustable headband type No. 685 (Specify ohmage)
No. 112-Single Earphone, adjustable headband type No. 688 (Specify ohmage)
No 685 , with No. 450 volume contro in cord.

Phone plugs, although not included as part of the earphones, in the listing above, are required
in most applications. These can be supplied attached to the units if so ordered. (See No. 512.)

\section*{VOLUME CONTROLS AND OUTLET BOXES}

No. 460

No. 450

No. 480

Outlet Boxes 460 and 461 are recommended for the majority of installations, combines in a single unit volume control, phone jack, and terminal strip for incoming circuit. No. 460 has brown wrinkle finish to harmonize with woodwork. No. 461 has a glossy ivory finish to improve visibility in theatres. Standard ohmages, 1000 ohms for low impedance lines and 10,000 ohms for high impedance lines (up to 500 ohms). On special orders 25,000 and 50,000 ohms can be supplied at slight additional cost.

No. 460 - Outlet Box (Brown-Specify ohmage)..... \(\$ 4.00\)
No. 461 -Outlet Box (Ivory--Specify ohmage)........ 4.00
No. 450 -Volume control inserted in cord type. Includes cord (No. 838-2 \(1 / 2^{\prime}\) ) from control to plug, black plastic housing, all round ed edges. Measures 2" long. Standard ohmages 1000 and 10,000 ohms.

No. 477 -Outlet box, dual jack, brown finish, same general details as No. 460 ............... 3.50

No. 478 Outlet box, dual jack, ivory finish............. 3.50
No. 480 -Outlet box, dual jack, brown finish, similar to No. 477 except artificial load inserted by withdrawal of phone plug... 4.00

No. 481 -Outlet box, same as No. 480 except ivory finish4.00

No. 484- Outleł box, single jack, brown finish........ 3.00
No. 485 Outlet box, single jack, ivory finish........... 3.00
"A variety of special types of junction and outlet boxes can be supplied to customers' specifications.

See additional bulletins and catalog pages published by TRIMM, Inc., on group hearing aid installations.

\section*{PHONE PLUGS}

Most compact plug. Bakelite with nickel plated stem. Cord tips held ightly by screws. Easily at tached to cord
No. 512-Flat plug. \(\qquad\) . \(\$ 0.65\)

No. 511 -Plug, standard type, bakelite shell and nickel plated stem. Easily atand nickel plated stem. Easily at- \(\$ 0.70\)

\section*{EAR CUSHIONS}

Sponge rubber ear cushions provide maximum ease in wearing headsets. Fits TRIMM Featherweight, Commercial, Acme, Rex, and " \(E\) " types.

\section*{MODEL 6D CRYSTAL} TURNOVER PICKUP
- Switches from \(331 / 3\) or 45 RPM records to standard 78 with turn of knob at front. Plays both types of records at only eieht. gram needle pressure, thus has no extra mechanism to change pressure when knob is turned, eliminating a potential source of trouble and varying reproduction quality. Employs L(QD-1 Double-Needle Cartridge. Mounts seven inches from turn-table center, die-cast curved arm finished in dark brown die-cast cur
Hammerlin.

\section*{400-D TURNOVER} PICKUP

\section*{MODEL FLC-33 PICKUP}
- The same important advancements in pickup engineering as the FL-33, in handsomely curved styling. Offers the same operating ardvantages, such as the three-in-one feature: one pickup plays \(331 / 3,45\) and 78 RPM Records without changing needle pressure or making other adjustments, with the simple switching of slip-in cartridges. Perfect tracking, at onlyfivegram needle pressure, is assured by the revolutionary new base mounting assembly.

FLT- 33 TRANSCRIPTION PICKUP
- Never before, a pickup of such professional instrument quality and precision. Like the FL-33, this sleek transcription model employs the U-J Crystal Cartridge with one mil tipradius needle, instantly replaceable with the U-78-J for playing 78 RI'M Records. In addition, the U-TR Cartridge with 2.5 mil tipradius may be inserted to play standard lateral broadeast transcriptions. Special ball-learing, anti-resonance hase is adjustable to desired height, as is unique arm-rest. Feather-touch needle pressure of five grams is accomplished by a revolutionary hinged division of the arm, which also contributes to perfect tracking and elimination of surface noise. Die-cast arm and base look their fine instrument part, with finish in telephone black. All three "U" Series Cartridges are available with diamond stylus tips instead of the regular saphire.

MODELS 510-QT-33 AND 510-MI-2-33 PICKUPS

- Add Astatie's new anti-resonance swivel hase, and the fanions "CyT" Crystal Cartridgn with special one mil tip-radius, precions metal or jeweled stvhus, to the popular Astutic Model 510 l'ickup - and you have this new long-playing model, the finest performer in its price class. Permanently adjusted to six-iram needle pressure, its short justen to six-hram needie pressure, its short mountmg centers make it ideal for a
host of lony-playing applications. Outstandhost of long-playing applications. Outstand
ing characteristics are high uniform output ing charucteristics are high muiform output
and low needle noint impedance. Die-cast and low needle point impedance. Die-cast
arm, finished in Hammerlin opalescent grey. arm, finished in lammerlin opalescent grey.
Specify Model \(510-\mathrm{Mil-2-3}\) for the same pickup, except for employment of Astatic's revolutionary Magneto-Induction Cartridge.

\section*{MODEL 507-L.92-33} PICKUP

- Bedrock price, with full professional periormance standards retained. The new La-9233 Crystal Cartridge employed is notable for high output, which affords excellent results in use with standard phonograph amplifiers, where other lower output cartridges are not satisfactory. Ilas universul, screw-type neede chuck to receive standard microgroove needles. Pickup is fumishell without needle. Die-cast arm finished in opalescent grey IIammerlin. New, anti-friction swivel base.
MODELS 400.QT-33 AND 400-MI-2-33 TRANSCRIPTION PICKUPS
- The famous Astatic Studio Master "400" conventional transcription arm, adapted for long-playing transeriptions. Incorporates the improved base mounting assembly that eliminates arm resonances and assures perfect tracking, and the "QT" Crystal Car. tridge with precious metal or sapphire stylus of one mil tip-radius. A peak standard of of one mil tip-radius. A peak standard of cast arm, permanently adjusted at six. Diecast arm, permanently adjusted at six-gram ify Model \(400-\mathrm{Mr}-\dot{2}-33\) for the finish. Specexcept for employment of Astatic's Magnetoexcept for employme
Induction Cartridge.

Astatic Crystal Devices manufactured under Brush Development Co. patents.

\section*{the gC Ceramic Cartridge}
- First major stride in cartridges employing ceramic elements since Astatic pioneered in this type unit. The first with replaceable needle. Takes "Type G" needle-with either one or three-mil tip-radius, precious metal or sapphire-which slips from its rubber chuck With a quarter turn sideways. Resistance to high temperatures and humidity is not the only additional advantage. Output has been increased over that of any ceramic cartridge available. Light weight and six-gram needle pressure make it ideal for a great variety of modern applications. Model GC-J fits standard \(1 / 2^{\prime \prime}\) mounting and RCA 45 RPM record chanters. Model GC-1J fits RMA No. 2 Specifications for top mounting \(.453^{\prime \prime}\) mounting centers.
GC-J -Code ASWZK
GC-1J-Code ASWZII
List Price \(\$ 7.40\)

\section*{THE CQ CRYSTAL CARTRIDGE}
- A new Astatic design, featuring miniature size and five-gram weight. Model CQ-J fits standard \(1 / 2\) " mounting and RCA 45 RPM rec ord chanrers. Model CQ-1J fits RMA No. 2 Specifications for top mounting . \(453^{\prime \prime}\) mounting centers. Needle pressure five grams. Output 0.7 volts at 1,000 c.p.s. Employs one mil tipradius, \(\mathrm{Q}-33\) needle. Cast aluminum housing
CQ-J -Code ASXAZ CQ-1J-Code ASXAI

\section*{THE QT-M-33 AND QT-J. 33 CRYSTAL CARTRIDGES}

\section*{- A famous Astatic Cartridge with a} famous needle design-now adapted to the requiremente of L1 Recordings. The QT-M-33 employs a precious metal stylus and the QT-J-33, a sapphire type, both needles being the same unique, replace-
 ridges, except for one mil tip-radius T-M-33-Code ASXBQ QT-J-33-Code ASXBR

\section*{THE MI-2J-33 MAGNETO.}

\section*{INDUCTION CARTRIDGE}
- Peak fidelity of reproduction that LASTS, even under the most consistent service or adverse climatic conditions. Unchanging characteristics are result of radical reversal of engineering precedent and drastic simplification, which eliminate need for delicate handling and other common sources of trouble with magnetic type units. Troublesone, costly armature balancing problems also eliminated. Mumetal housing provides increased shielding effect for maximum reduction of hum. Fixed, sapphire stylus with one mil tip-rudius Code ASALW

List Price \(\$ 7.50\)

\section*{ASTATIC ONE MIL TIP-RADIUS NEEDLES}
- The unique design of the Q-33-M
(precious metal) and Q.33-J (sapphire) Needles reduces surface noise and
needle talk, through increased vertical compliance. See LQD Cartridge for other features. The D-33 is for use with LT-D Cartridge. See FL-33 Pickup for fcatures of "U" Type Taper-Lock Needle; see GC Cartridge for "G" TYPE

\section*{PRESTO K-10 RECORDER FOR MICROGROOVE AND REGULAR RECORDING}

The PRESTO K-10 Recorder, formerly known as the k.8, the foremost machine of its kind to he used in Bchoots for speech, voice. mandioes. dramatis, music., elle, is now offered for MICRO. (droote (long-plasing) recording as well as the standard method. Note these features:
- Cutiny pitches of 112 lines per inch Outside-in, 112 lines Inside-out, 224 lines per inch Outside-in and \(2 \because 2+\) lines per inch Insitle-out.
- Standard unit is equiphed for two speeds, \(331 / 3\) and 78 1 mm . Available for three speeds, \(331 / 2,45\) and 78 rpm at adlitional cost.
- The cutting head is erpipped with an advance ball which rewulates the depth of the groove more accurately than a comber spring.
- Two interchangeable pick-up arms, one containing the MrCRogroore heal and the other containing the regular head. Each head is complete with a permanent sapphire stylus.
- A single control permits instant choice of recording, playtack, or public address. Amplifier also contains radio and monitor jacks

The IPRESTO K-10 will, when set for MICROGROOVE, record 633 minutes on every inch of dise used. This means that a 15 . minute recording with grod fidelity can le put on one side of a 12" dise! And a halt-hour can be put on one side of a \(131 / 4\) " disc. seven minates can be recorled on one silte of a \(61 / 2 \mathrm{llisc}\).

Price of K-10, less mictophone and stand, \(\$ 348.00^{*}\)
No increase over K-8.
* \(\$ 5.00\) additional for 45 rmm pulley and record adapter.

\section*{PRESTO 'Y''RECORDER for microgroove and regular recording}

The presto \(\mathrm{Y}-3\) is identicul to the damons \(\mathrm{Y}-2\) but MiClROGROOVE has heen added. The following feed pitches are included with the Y. 3 : 112 lines per inch Outside-in, 112 lines per inch Inside-ont, 224 lines per inch (hutside-in, and 224 lines per inch lasitle-out.
- features are.
- Two interchangeable l'ickering sapphire cartridges - for MCROGROOVE and remutar reording.
- ddvance ball on cutting head to accurately control depth of yroove.
- \(16^{\prime \prime}\) turntable - will take \(171 / /^{\prime \prime}\) masters.
- Standarl unit is equipped for two speeds, \(331 / 3\) and 78 rpm . Availahle for three speeds, \(331 / 3,45\) and \(i 8 \mathrm{r} p \mathrm{~m}\) at additional cost.
- Amplitier has connectiona for two microphones and two turntables. Output is 10 watts. Both high and low frequency tables. Output is 10 Watts. Bo
manal equalizers are included.
- Tun-inch PM speaker and lafte are built into cover of amplitier.
- Presto highl-fidelity 1-D cutting head.

When set for MCROCiRoove the Y-3 will record for \(63 / 4\) minutes on each inch of disc used. A fifteen-minute program can be put on one side of a 12 " record. A halt-hour ou one side of a 16 " record. Forty minutes can the recorded on one side of a \(1\left({ }^{\prime \prime}\right.\) record by cuting to minimum diameter.

The price of the new \(Y .3\) is \(\$ 741.00^{*}\) (no increase over the former Y-2). The Y-3 is designed for high impedance microphones. If low imperdance microphone impats are desired, order \(Y-5\), price \(\$ 771.00^{*}\). Microphone and stanls arrat incluterl as regular equipment. * \(\$ 10.00\) additional for 45 rpm pulley and record adapter.

TYPE 325-M RE-RECORDER

The Presto \(325-\mathrm{M}\) re-recorder is a device to be used with the Presto \(\mathrm{K}-10\) and \(\mathrm{Y}-3\) (and 5) recorders to copy (dub) recordings without the need of a separate turntable. The \(325-\mathrm{M}\) consists of a turntable and pedestal which is placed on top of the recorder turntable. The recorded disc is placed on this auxiliary turntable and a new blank dise on the recorder turntable. During re-recording, both discs rotate together. An extension is provided to elevate the pickup to the level of the auxiliary turntable

Price of \(325-\mathrm{M}\) for \(\mathrm{K}-10\) or \(\mathrm{Y}-3\) (and 5) recorders \(\$ 38.10\) List.

\section*{3-SPEED MICROGROOVE AND STANDARD PLAYBACK TURNTABLE}

\section*{Type 15-GCP}

The Presto Type 15-GCP turntable is an unusually high quality unit for the reproduction of recordings at \(331 / 3,45\) and 78 rpm . The design provides an instantaneous speed selection with a very convenient control arrangement.

FEATURES:
- Heavy cast aluminum \(12^{\prime \prime}\) turntable accurately machined and balanced.
- Precision idler wheels and motor pulley.
- Good speed regulation-minimum "wow."
- Performance comparable to transcription equipment.
- Two pickups included-one standard and one microgroove. Sapphire stylii.
- May be connected to any radio or audio amplifier.

List Price complete
Chassis only ............................................................................................

\section*{Model "L" Transcription Playback}

This equipment is designed for radio stations, advertising agencies and program producers, who demonstrate recorded programs at the offices of prospective clients.

The Model L Playback was developed to meet the insistent demand among the larger broadcasting stations and agencies for "something better" in portable reproducing equipment. Those who use the Model L Playback ín connection with important sales of station time and programs will consider its exceptional performance well worth its cost. L-3-Portable Transcription Playback for regular and microgroove records

List, \$290.00

WORLD'S LARGEST MANUFAGTURER OF INSTANTANEOUS SOUND RECORUING EQUIPMENT AND DISCS

A reproducer of any make may be installed on the 64-A Transcription Turnłable

\section*{PRESTO 64-A TRANSCRIPTION TURNTABLE}

The Presto 64-A transcription turntable offers the following features which are of major importance to the owner and operator: Unusual mechanical simplicity low mechanical disturbance . . . perfect speed accuracy . . . extreme ruqgedness for long continuous operation . . . instantaneous selection of desired speed and no requirements for mechanical adjustments.
This transcription turntable is directly gear driven and employs two separate motors, one for \(33-1 / 3\), and the other for 78.26 rpm . There is no friction device of any kind in the meehanism and no mechanical shift is required to change speeds. To select \(33-1 / 3\) rpm, 78 rpm or "off," the operator merely throws a three position switch. These changes may be made as rapidly as desired while the turntable is in motion with no damage to the mechanism. Only one motor at a time is in operation. The transmission "over runs" the notor which is not tuming and thus does not carry it along in rotation although the stationary motor is never disenwaged from the mechanism.

\section*{SPECIFICATIONS}

Standard Equipment: The 64-A transerip. tion turntalle includes the electro-mechanical gear drive, turntable and cabinet. A reproducer and network is not included,
Speed Accuracy: No deviation from 33.1/3 and 78.26 rpm .
Noise Level: Mcchanical noise originating in the equipment over 50 db below program level.

Power Requirements: Approximately 75 watts fiom a 116 volt, 60 cycle line. Motors are of the 1800 rpm synchronous type and are available for other voltages and frequencíes at additional cost.
Mounting: Turntable and gear drive mounted in heavy wood cahinct \(24 \times 24 \times 33\) inches ( \(61 \times 61 \times 8+\mathrm{cm}\).). Fintishel in two tones of grey lactuer. List Price, \(\$ 495.00\)

\section*{PRESTO 6-N RECORDER AND 90-B AMPLIFIER}

The PRESTO 6-N Recorder and 90-13 Amplifier is the ideal recording eguipment for portable or stationery operation.
The \(6-N\) Recorder is outstanding in its suitalility for brodeast stations becanse it offers all the qualifications for good recordincs, inchuling master records, at the most economical price. It is ideal for the station requiring delayed broadcast of network programs, and for reference recordings.
The \(6-\mathrm{N}\) standard equipment includes the Presto \(1-\mathrm{D}\) cutting head, siraling feed screw, vertical damper, time scale and pick-up. It is available for microgroove recording at addition cost
The Presto \(90-\mathrm{B}\) recorling anplifier contains all the facilities necessary for operation on remote assignments, but with all overall lerformance fouml only in high-fidelity studio equipnent.

It consists of thee preamplifiers with individual gain controls, a mixer circuit, a master gain control and recording amplifer. Provision is made for comecting the Presto 161 -A automutic equalizer (radius compensator).

A five-position selector switch provides the following characteristics: 1-flat response, 30 to \(15,000 \pm 1 \mathrm{db} ; 2-\mathbb{A B} 331 / 3 \mathrm{rpm}\) recording; 3-present day \(78-\mathrm{rpm}\) recordinx; 4-NAB playback, and

5--automatic equalization. The flat response can be modifierl by rariable bass and treble controls, giving emphasis up to a maximum of 20 db at 100 and 7,500 cycles per second or 20 db de-emphasis at 7,200 cycles per second.

Noise is 55 db below recording level and distortion at maximum output is less than \(1.5 \%\)

The use of input and output selector switches makes the \(90-\mathrm{B}\) mplifier unusually flexible. It permits combining the signals of three microphones or of two microphones and either one of two pickuns. By using the "Line" position, recordings can be made from an ncoming yrogram line. The output selector has three positions; playback (public address), continuous recording anul simultaneous recording. While recording, the line jack provides a monitoring outlet or permits feeding a program line at the correct level

The correct level is monitored by means of a Weston Type 30 VU indicator with illuminated scale and its closely controlled electrical and dunamic characteristics make it an ideal volume indicator for recording.

List Price of \(6-\mathrm{N}\)
\(\$ 735.00\)
List Price of \(90-\mathrm{B}\) \(\qquad\) 595.00

\section*{GENERAL (7\%) ELECTRIG}

\section*{GENERAL ELECTRIC VARIABLE RELUCTANCE CARTRIDGE with replaceable stylus \\ standard records (3 mil tip radius) \\ Catalogue No. RPX-040 \\ MCRO GROOVE RECORDS (1 mil tip radius) \\ Catalogue No. RPX-041 \\ }

Performance engineered at Electronics Park, these cartridges provide record reproduction unsurpassed in quality. Low needle talk and needle scratch. Minimun distortion. Retracting stylus. Low record wear due to flexible suspension and low stylus pressure. Virtually unaffected by normal temperature or humidity variations.
Shipping Weight - \(11 / 2\) ounces .......... List Price \(\$ 9.95\) Also aratable in a Professional model (IPPX-046) with low impedance to match broadcas fobalizers. Furnished less stylus. Shipping Weight - \(11 / 2\) ounces.............................. List Price \(\$ 11.45\)

\section*{GENERAL ELECTRIC TRIPLE PLAY CARTRIDGE}

\section*{Catalogue No. RPX-050}

The RPX-050 plays \(331 / 3,45\) and 78 RPM records without clanging its position in the tone arm. Uniform stylus pressure of 6 to 8 grams for all 3 types of records. This, plus the low mass is valuable in minimizing record wear. Retaining the unexcelled frequency response characteristics of previous G-E Variable Reluctance Cartridges, the RPX-050 is also notable for low needle talk and needle scratcl. Output impedance is the same as RPX-040 and RPX-041. Shipping Weight - 2 ounces
Replacement Styli RPJ-010
( 1 nil \& 3 mil Sapphire)
List Price \(\$ 13.95\)
List Price 5.95

Catalog No. UPX-003

The UPX-003 Phono Preamplifier, which operates directly from a \(105-125\) volt, \(50-60\) cycle AC power line, is designed for use with the General Electric Variable Reluctance Cartridges. It provides sufticient amplification and the necessary low frequency equalization to enable Variable Reluctance Cartridges to be used with standard receivers and amplifiers.
Shipping Weight - \(11 / 2 \mathrm{lbs}\).
List Price \(\$ 15.95\)
Aso available without rectifier as SPX-001, designed to take its nower requirements ( 6.3 volts \(\mathrm{AC}, 100 \mathrm{DO}\) ) from the receiver or amplitier with which it is userl. Leads and jacks provided for attach. ment to chassis and Variable Reluctance Cartridge. Shipping Weight - 1 lb .

The General Electric Transcription Arm, designed to mount the G-E Variable Reluctance Cartridges, is for use by those desiring the utmost in quality reproduction of lateral transcriptions and records.
The G-E Transcription Arm is designed for optimum performance of lateral transcription and recordings only. It contains no design compromise such as are necessary if provision for vertical reproduction is also incorporated.
The mass of the transcription arm has been reduced to the ultimate point by careful mechanical design and the use of magnesium alloy for the moving parts. Very low bearing friction in both the lateral and vertical planes is assured by precision, hand-adjusted conetype bearings.
Shipping Weight - \(21 / 2 \mathrm{lbs}\).
Suggested professional user's price \(\$ 41.00\) An arm counterweight, Catalog No. RWP-001, is available to adapt the FA-21-A for long-playing records.

Suggested professional user's price \(\$ 3.85\)

GENERAL ELECTRIC PICKUP FOR LONG PLAYING RECORDS with the New Variable Reluctance Cartridge
This G-E pickup has been designed specifically for use with long-playing records. The cartridge has a special high-compliance, low-mass stylus arm assembly, and a precision-ground highly-polished sapphire stylus. To keep the tone arm mass low, the arm has been made as small as possible, and the construction material is a special lightweight alloy.
Smooth lateral movement with a minimum of drag is assured by ball-bearings and a long bearing surface, protected by a dust cover.
Shipping Weight - \(1 / 2 \mathrm{lb}\).
List Price \(\$ 15.95\)

Especially designed for and equipped with the G-E Variable Reluctance Cartridge, this new pickup is an extremely fine unit for the improvement of record players.
Matched with the Variable Reluctance Cartridge, this product provides excellent performance - with installation simplified and proper balance assured. It provides the best compromise between minimum tracking error and overall dimensions.
The unit is balanced at the factory to provide 1 oz. stylus pressure and may be adjusted if desired.
Shipping Weight - 1 lb .
List Price \(\$ 15.95\)

MODEL T-12 TWO-SPEED 12" TRANSCRIPTION TURNTABLE
The Rek-O-Kut model T-12 dual speed \(12^{\prime \prime}\) transcription turntable brinirs professional performance to the home with the "new micro-groove records." Ilere is a turntable whose performance is equal to that of the larger 16 " professional tables. In construction and design it is sinilar to the model " G ."

\section*{SPECIFICATIONS}
1. NOISE LEVEL: (A) T•12: 40 (d) below maximum recording level. (B) T-12II: 50 db below maximum recordins level.
2. CONSTRUCTION: Identical with the Th-12. See tlescription
3. MOTORS: (A) T-12: 4 -pole induclion, built to Rek-O-lut specifications. (B) '1'-12II: Hysteresis synchronous.
The motors, shock mounted, are fitted with Lamitex pulleys, which are pressed on and pround ground ce smooth rumble-free operation.
4. CHASSIS: Aluminum, cross riblued. Aush monnt. Requires a recianmilar cutoust for mounting. Kasily installed.
. FINISH: lilue stey wrinkle.
6. DIMENSIONS: L.: \(12^{\prime \prime}\); W. : \(15^{\prime \prime} ; 1\). : \(13 / 8^{\prime \prime}\) alrove motor board; \(5^{\prime \prime}\) below motot hoard. Weight: 13 lbs.

\section*{MODEL LP-743 THREE-SPEED 12" TURNTABLE WITH INSTANTANEOUS SPEED SELECTOR}

Now you can play \(78-45-331 / 3\) records whenever you wisl, without taking your turntable ajart. The model 748 , by the use of a simple, ingenions equed selector enables you to preselect your speed by merely pressing a button, like this:
1. 78 rpm : slide shifl-lever to the left
2. 45 rpm ; slide slift-lever to the richt.
3. \(331 / 3 \mathrm{rpm}:\) press selector button down, slide shift-lever to right.

\section*{SPECIFICATIONS:}
1. NOISE LEVEL: 30 di below maximum recording level.
2. TURNTABLE: Iatheturned and balanced. Made of lilhoratory tested aluminum casting.
3. MOTOR: Consiant speed. designed for smooth, quiet, vibration-free operation, fitted with a Lanitex motor pulley.
. SHAFT: Turntable shaft hardened, ground and polished.
5. SPEEDS: Adjustable stops permit regula tion of all three speeds.
6. FINISH: Brown hammertone to match mahogany or walnut.
7. DIMENSIONS: L.: \(12^{\prime \prime}\); W.: \(15^{\prime \prime}: \mathrm{H}^{\prime}: 13 / 8^{\prime \prime}\) above mtor ranel; \(5^{4 \prime}\) helow motor panel. Weinht: 10 llis.
\begin{tabular}{llr}

\section*{RADIO'S MASTER}

ELECTRIC

\section*{Tone Arms}

In keeping with the Webster Electric tradition for fine design, precise construction and dependable performance, these pickup arms are now being produced for modernization or repair of standard record-playing equipment. Each is a series of precisely-matched components built into an integral unit. All are designed to minimize track-
ing error, and are coupled to resonate at a very low frequency. Resonance distortion and microphonic feed back tendency have been reduced to the minimum. Tbey will accommodate \(10^{\prime \prime}\) or \(12^{\prime \prime}\) records. Single-hole mounting. All models are supplied with arm rests and mounting base brackets.

A new die-cast zinc alloy tone arm designed for use with \(F\) series cartridge, tracking at very low pressure. Modern design complements the appearance of any record-player. Supplied with cartridge model F2P (see reverse side for response characteristics).
Model SF2-3 List Price \(\$ 8.50\)

A lightweight, low-inertia tone arm constructed of stamped aluminum, attractively fluted and internally braced. Designed for use with \(\mathbf{N}\) series cartridges; currently supplied with N8P and N10P cartridges (see reverse side).
Model TN8.1 List Price \(\$ 7.50\)
Model TN10-1 List Price \(\$ 7.50\)

Combines beautiful styling with exceptional rigidity, incorporating a high lateral ridge as an integral feature of the design. Supplied with N7P and F7P high fidelity cartridges, and with Model Ml Magnetic Cartridge (see reverse side) complete with needle.
Model VN7-1 List Price \(\$ 11.50\)
Model VF7 List Price \(\$ 11.50\)
Model VMI List Price \(\$ 11.50\)

\section*{THE NEW Featheride}

\section*{RETRACTABLE}

Tone arms shown at the left are now available with the new retractable cartridge, Webster Electric Company's latest development. If the arm is accidentally dropped or scraped across the record, there is no damage to record, crystal or needle Finest response in normal playing, exceptionally quiet, low tracking pressure. Supplied with Q1 and Q2 car. tridges (see reverse side for detailed specifications) complete with osmium-tipped offset needle and guard.

Model VQ1 List Price \(\$ \mathbf{1 2 . 5 0}\)
Model VQ2 List Price \(\$ 11.50\)
Model TQ2 List Price \(\$ \mathbf{9 . 7 5}\)

\section*{P SERIES FOR LP RECORDS}

Designcd specifically for LP microgroove use, this arm and cartridge assembly is exceptionally well suited for conversion use, as well as on new LP record players. Tracks at only 7 grams, providing .8 volts output at 1000 cps . Supplied with needle.

Model PF13 List Price \(\$ 9.50\)

\section*{Recorder \\ Heads}

\section*{MODEL R-84}

A magnetic cutting head for professional and semi-professional use. 8 ohms impedance at 400 cps . Frequency range 30 6000 cps . Less than \(11 / 2 \%\) distortion at 400 cps . Input power 1 watt nominal for maximum recording level. Standard \(11 / 8\) inch spacing between mounting holes. LIST PRICE... \(\$ 27.50\)

\section*{MODEL R-84G}

Similar to above but with 500 ohms impedance at 400 cps . LIST PRICE. . . . . . . . \(\$ 27.50\)

\section*{Crystal Cartridges}

Webster Electric Crystal Cartridges are supplied in four general styles having universal replacement application. They are manufactured under exceptionally high standards of precision, and each cartridge is individually tested before release, assuring flawless performance and maxi-
num customer satisfaction. The range of characteristics described below permits exact replacement of original cartridges found in the majority of record-players, record-changers and radiophonograph combinations.

\section*{the new retractable Cartridge}

Protects record, needle and crystal from aceidental injury due \(t o\) rough handling of the tone arm. Supplied in 1 volt or 2 volt models to replace most standard car tridges. Exceptionally quiet playing. Simple 10 install. Supplied complete with os-mium-tipped needle (replaceable) and guard.

MAGNETIC CARTRIDGE

MODEL M1
A new magnetic cartridge incorporating latesi refinements for superior playing performance. Provides .1 volt output at 1000 cps. Complete with osmium-tipped, replaceable needle.

\section*{PRE-AMPLIFIER}

Pre-amplifier for use with above, giving 1 volt output. Supplied without tube. (Uses GSF5 tube.) List price on application.

MODEL FI3M
A new cartridge especially de. signed to give ideal results with LP records. Comes com. plete with replaceable osmiumtipped needle, and guard.

MODEL F 14M
A double-needle cartridge for playing both standard and LP records in tone arms adapted for its use, in conjunction with tho-speed turntable. Complete with needles and guard assembly.

\section*{THE PIGKERING PIGKUP}

\section*{THE OUALITY UNIT THAT EXCELS THEM ALL!}

Model 161 with Diamond Stylus. A professional majnetic teje reproducor for laterialcut phonocraph rocords and transcriptions. It has virtually no intermodulation nor harmonic distortion at any amplitude capable of being recorded. There is ro frequency discrimination over the range from 30 to 15,000 cycles per socond and is completely free from any vertical response. Tracking pressure is 18 grams. Diamo:d stylus has .0025 inch radius for use with c.ll 88 to 136 lines-per-inch recordings. Withstands practically any shock through unique g:ard into which stylus recedes. Arm is supported on frictionless hardened steel alloy cone pivots for perfect tracking, even on badly warped discs. Diamond stylus life is approximately 5,000 hours, at least ten times the life of sapphire. Overall length of arm, \(14^{3 / 4^{\prime \prime}}\); height, \(23 / 4^{\prime \prime}\). Supplied with arm rest. Shipping weight, 2 lbs .

MODEL \(161 \mathrm{~L}-500 / 600\) ohms output, - 40 db .
List price \(\$ 165.00\) MODEL 161M-10,000 ohms output, . 05 volt. . . . : . List price \(\$ 165.00\)

Model 165 L Equalizer-Amplifier Designed for use with Model 161M Pickup. Five-position equalizer switch compensates for American, European, N.A.B., Orthacoustic, etc., record characteristics. Supplied with output impedances of 30,250 and \(500 / 600\) ohms at " 0 " db. Uses 6SJ7, 6SN7 and 615 tubes. Size \(5 \times 6 \times 10\) inches. Requires 250 volts D.C. at 15 ma . and 6.3 volts A.C. or D.C. at 1.2 Amperes. Supplied with tubes and input cable. Shipping weight, 9 lbs.

List price \(\$ \mathbf{2 0 0 . 0 0}\)

Model 163A Equalizer A losstype equalizing net;ork for use with the Model 161M Pickup. It is designed to compensate for most of the commonly encountered record characteristics. Position 1 - flat high frequency response to over \(15,000 \mathrm{cps}\). Low frequency rise to give full compensation from 500 to 40 cycles. Position 2 - flat high frequency response. Low frequency response approximately 5 db. below position 1. Position 3 - for NAB or Orthacoustic transcriptions. Position 4 - Low frequencies same as position 2. High frequencies sharply attenu-
 ated to reduce surface noise. Attenuation starts at 4000 cycles. Position 5 - low frequencies same as position 1. High frequencies same as position 4. \(250 / 600\) ohms output. - 60 db . Size \(31 / 2 \times 3^{3 / 4} \times 5\) inches. Shipping weight 2 lbs .

List price \(\$ 70.00\)

\section*{EACH PICKERING PICKUP AND CARTRIdGE IS UNCONDItIonally guaranteed}

Pickering reproducing equipment, with the exception of the stylus point, is fully covered by an unconditional guarantee provided that the units have not been tampered with, nor subjected to cxtraordinary abuse. Replacement styli can be installed in car-t-idge reproducers for the following net charges: . \(0027^{\prime \prime}\) sapphire - \(\$ 2.50\); sapphire stylus of special radius \(\$ 5.00\); diamond etylus \(\$ 15.00\). Replacement diamond styli for the Model 161 \(t\) anscription pickup can be installed for \(\$ 22.50\) net. Unless otherwise specified diamond styli will be supplied with a radius of \(0025^{\prime \prime}\). Other diamond stylus radii can be supplied at no additional charge.
All returns should be sent direct to factory at Oceanside, I.I.I.N. Y.

Equipment returned to the laboratory for service will be reshipped within 24 hours after receipt. All frequency ranges indicated above denote region of response flat within 2 db .
Voltage and db levels ( \(6 \mathrm{mw} / 500 \mathrm{ohms}\) ) based on \(10 \mathrm{~cm} / \mathrm{sec}\). stylus velocity.

Pickering Reproducing Equipment is Sold by All Principal Distributors

\title{
Pickering \(\mathcal{E}\) Company Inc. Audio Laboratories, Oceanside, Long Island, New York
}
there is a pickering cartridge reproducer for every record playing and TRANSCRIPTION USE ; : PROFESSIONAL, laboratory and home phonograph

Models D-120M, S.120M, D-140S and S-140S, with diamond or sapphire stylus, are without peer; they produce the finest quality reproduction of lateral recordings and may be used in professional as well as non-protessional record players. Model R-150, available with either sapphire or diamond stylus, is specifically designed and manufactured to embody all of the features necessary to produce optimum quality record response with standard home record playing phonographs. The R-1.50 features a replaceable stylus. The R-150 is not for professional, laboratory or transcription use - but for home use only.

\section*{PICKERING CARTRIDGES ARE UNCONDITIONALLY GUARANTEED.}

With the exception of the stylus point, all Pickering Cartridges are covered by an unconditional guarantee. provided the cartridge has notwbeen opened nor sub-
 jectedto extraordinary abuse. Every Pickering Cartridge, before leaving the factory, is carefully tested for FREQUENCY RESPONSE, WAVEFORM DISTORTION, OUTPUT LEVEL, TRACKING PRESSURE; in addition optical inspection of the stylus polish and shape; mechanical inspection of moving parts and electrical inspection of the pickup coil are made on each unit. Reports from users reveal absolute stability, amazing ruggedness and complete insensitivity to the effects of temperature and humidity.

\section*{for \\ MICROGROOVE Discs}

\section*{STANDARD DISCS}

LM-61 . . . For Microgroove discs up to 12".
Response linear 50 cyc. to over 8 k.c. Point Pressure about 6 grams. Genuine Sapphire Stylus, EASILY REPLACED BY USER. Output about - 25 db . High or low impedance. Plug-in connectors. Arm is TangentTracking, ball-thrust and pivot-point bearings. Bronze finish. Turntable center to rear end of arm \(10^{\prime \prime}\).

Listed at \(\$ 49.75\)
R-61 . . For standard discs. Specifications and price same as for LM-61.

LM-62 . . For Microgroove dises up to \(18^{\prime \prime}\).
Performance identical with LM-61. French Grey and Chrome finish. Turntable center to rear end of arm \(13 \frac{9}{16}{ }^{\prime \prime}\).

R-62 . . For standard discs. Specifications and price same as for LM-62.

LM-73 . . . For Microgroove dises up to 12".
Response linear 50 cyc. to 10 k.c. Point Pressure about 6 grams. Genuine Sapphire Stylus, EASILY REPLACED BY USER. Output about - 30 db . High or low impedance. Vibratory momentum very low. Quick plug-in connectors. Arm is Tangent-Tracking, ball-thrust and pivot-point bearings. Bronze and Chrome finish. Turntable center to rear end of arm \(10^{\prime \prime}\).

Listed at \(\$ 66.50\)
73-A . . . For standard dises. Specifications and price same as for LM-73.

LM-74 . . For Microgroove dises up to \(18^{\prime \prime}\).
Performance identical with LM-73 above. French Grey and Chrome finish. Turntable center to rear end of arm 13 \(\frac{9}{16}\) ".

Listed at \(\$ 83.00\)
74-A . . . For standard discs. Specifications and price same as for LM-74.

LM-79-STUDIO ARM, identical with Model 81 (at right). Linear 40 cyc to 10 k.c. Point-pressure about 6 grams. Genuine Sapphire replaceable stylus. Output about - 30 db . High or low impedance. Listed at \$115.00

SA-79—For standard discs. Specifications and price same as for LM-79.

\section*{STUDIO-81}

For LATERAL recordings up to \(18^{\prime \prime}\). For use in Radio Stations, Studios and wherever superb-quality performance is paramount. Response Linear 20 cyc. to about 15 k.c. Point Pressure about 14 grams. Diamond Stylus. Output about - 35 db . Impedance 200 ohms. Moving Mass Near Zero. Quick plug-in connectors. Arm is Special Studio Design, aluminum, Tangent-Tracking, ball-thrust and pivot-point bearings in gimbal mounting - eliminating side-thrust and drag. French Grey and Chrome finish. Turntable-center to rear end of arm 185/2".

Listed at \(\$ 165.00\) (less equalizer) LM-81 . . . For Microgroove dises. Specifications and price same as for STUDIO-81.

\section*{STUDIO-99}

For VERTICAL recordings up to \(18^{\prime \prime}\).
For use in Radio Stations, Studios and wherever superb-quality performance is paramount. Response Linear 20 cyc. to about 15 k.c. Point Pressure about 25 grams. Diamond Stylus. Output about - 40 db . Impedance 200 ohms . Moving Mass Near Zero. Quick plug-in connectors. Arm is Special Studio Design, aluminum, Tangent-Tracking, ball-thrust and pivot-point bearings in gimbal mounting - eliminating side-thrust and drag. French Grey and Chrome finish. Turntable-center to rear end of arm \(181 / 2^{\prime \prime}\).

Listed at \(\$ 195.00\) (less equalizer)

AUDAX EQUALIZER - 200 ohms input affording NAB. Orthocoustic Vertical, 78 RPM - and Filter positions.

Listed at \(\$ 83.00\)
AUDAX REPLACEMENT STYLUS - Genuine Sapphire Jewel - Designed expressly for Fine Groove and Standard Discs.

Listed at \(\$ 3.00\)
Any of the above models may be had with Diamond Points when desired.

\section*{SWEEP FREQUENCY GENERATOR}

\section*{Model 125}

The Clarkstan Sweep Frequency Generator is an electronic device used to determine quickly the behavior of audio and other alternating electrical apparatus with respect to frequency and associated phenomena.

The complex signal is produced by scanning photo-electrically a synchronously rotating disc. The modulation on the disc is the photographic reduction of a precision pattern.

The accuracy of the original disc assures a positive signal which limits anomalous distortion, frequency and other discriminations which could be introduced by non-stable reactive components of more complex circuits.
The Model 125 Sweep Frequency Generator is recommended for use in production testing, development laboratories, schools and colleges, motion picture sound equipment, magnetic recorder development, radio stations and maintenance and service technicians.

\section*{SPECIFICATIONS - Model 125A S.F. Generator}

OUTPUT - 7 volts, open circuit; 50 milliwatts or 5 volts into 500 ohms . IMPEDANCE - Internal impedance 200 ohms. POWER CONSUMPTION - 25 watts, 115 v., 50 \& 60 cycles. CABINET MOUNTED
 FINISH - Dark Maroon Burlene baked enamel. All tubes supplied, \(2-7 \mathrm{C} 7\); 1-7C5; 1-5AZ4;1-927. Will operate with any standard oscilloscope.

FREQUENCY RANGE - 40 cds . to 10 KC with 60 cycle AC. MARKER PULSES - at \(1,3,5,7\), and 10 KC . SWEEP FREQUENCY governed by 20 synchronizing pulses per second. (With 50 cycle AC current, the range is 33 cps , to 8333 cps . with frequency markers at \(833,2500,4170,5840\), and 8333 cps.)

\section*{WIDE RANGE RV PICKUP}

The Clarkstan RV Wide Range Pickup is a variable reluctance reproducer featuring a removable stylus, and offering Flat Response, Low Distortion, in addition to featherweight needle force.
SPECIFICATIONS: TYPE-Magnetic, variable reluctance with removable stylus. ARMATURE -Stylus is the armature; weight 31 mg . ( .031 g.) RESPONSE - Exactly velocity responsive to \(15,000 \mathrm{cps}\). STYLUS - Sapphire with standard \(.003^{\prime \prime}\) radius ball point, \(50^{\circ}\) cone angle. Other sizes available. NEEDLE FORCE - 20 grams optimum for commercial pressings. OUTPUT 60 millivolts at 1000 cps with lateral displacement of .001". IMPEDANCE - Standard cartridge, high impedance. May also be had in impedances of \(5,50,250\) and 500 ohms. RECOMMENDED TERMINATION - High impedance.

ELECTRICAL CHARACTERISTICS - Inductance 350 millihenries at 1000 cps .; " \(Q\) " 1.05 ; DC Resistance 1450 ohms. MOUNTING - Standard mounting holes, \(1 / 2\) " between centers \(3-48\) screws. WEIGHT - 30 grams.
No. 211 RV Wide Range Pickup \& Transcription Tone Arm complete with

Net Price \(\$ 2.40\) each

\section*{Designed for DOUBLE DUTY...}

- Records mogneticolly on a stainless steel wiresource the ossocioted omplifier equipment.
- Ploys back mogneticolly with ofidelity, dynomic range, and obsence of background noise that accounts for the present heavy demond for Crescent Wire Recorder mechanisms.
- Ploys or records on the wire from phonogroph records much better than most single purpose record ployers... becouse the heavy duty recording motor and the heovy, accurately machined, die cost take-up drum 'are used as a phonoturntoble. The new Crescent tone arm, originolly designed fortCrescent Automatic Recard Changers, oodds its share to listening and recarding pleosure.
- Rewinds at fast speed. . . 5 times as fost os recording speed . . so that it takes anly a short time to reach any part of the wire to Record, Ploy, Erase, or Re-record.
- One single knob controls the mechonism because a special control assembly combines the electrical and mechanical control functions. Wire secorder outomatically shuts itself off, of end of wire, in oll pasitions of aperation ... recording, playing, or rewind.

\section*{A New Cambination Recard Player and Magnetic Recorder-Reproducer}

Combined with proper associated equipment, the new Crescent Wire Recorder Mechanism becomes one of the most interesting devices now available to amareurs, experimenters, sound men, service men, or anyone else interested in the field of electronic equipment. There are at least a dozen practical uses for a good wire recorder in every home and office in America.
The current public demand for wire recorders is directly traceable to the last war. War production helped materially to expand the plant, personnel, machinery and engineering facilities of Crescent Industries to, a position of leadership in the design and manufacture of wire recording equipment. The Crescent Recording Head is a specific example of Crescent engineering and manufacturing skill.
This is not the whole story behind Crescent's dominant position in the field, however. It remained for the men who originally made famous the name Crescent Tool and Die Co., to turn Crescent enginecring developments and specifications into reality. Their experience, skill and precision workmanship achieved a steady, day-by-day production of wire tecorder mechanisms that perform so fine they enhance the value and prestige of any other equipment with which they are combined to make up a complete system.

\section*{CRESCENT INDUSTRIES, INC.}

4140 WEST BELMONT AVENUE, CHICAGO 4I, ILLINOIS, U.S.A.
MANUFACTURERS OF
FECORD CHANGERS - WIRE REGORDERS • IOUD SPEAKERS • TOYS • META STAMPINGS • TOOIS \& DIES

CONTROLS-
Single Knob. .. controls ON-OFF and AUTOMATIC or MANUAL operation. Knob moves in four directions and is clearly marked.
Reject Button... is conveniently lacated an top of the tone arm support. Operated by pushing down on the tone arm when the tone arm rests on the support, or by pushing the button itself when record is being played.

CHILO-PROOF - JAM-PROOF
Tone arm may be moved to any pasition at any time without jamming machine and without any danger of changing adjustments.

\section*{AUTOMATIC RECORD CHANGERS}

You'll like this practical, precision built, high quality record changer. It's Trouble-Free! Ideal both as original or replacement equipment. Simplicity of design and durability of construction assure a minimum of trouble after installation. . . cut profit losses due to extra servicing. Changer is of the single post type to avoid chipping or cracking of records. Center post is scientifically shaped to guide the records down, on an air cushion, to the thick, velvet-like coating on the turntable which runs on a shock absorbing cork washer.
Tone arm design is such that it trips and functions perfectly with no more needle pressure than that required by any of the modern, high grade crystal carrridges. This means reduced needle scratch, reduced "needle talk", and longer record life.
Plays, automatically, 12 ten inch or 10 twelve inch records. (Not intermixed). Plays, manually, home recordings and single records. Less than 5 second change cycle for greater continuity of music.
Powerful even speed motor, special turntable bearing design, smooth rim drive and many other Crescent-engineered features combine to reduce noise, wobble and wow in this changer, and to lengthen its life.
Beautiful mahogany Hammerloid finish with deep maroon turntable, tone arm, record shelf support casting, and plastic trim, gives just the right color contrast for plenty of eye appeal.

\section*{GARRARD GARRARD}

\section*{IMPORTANT NOTICE}

AVAILABLE EARLY IN 1949-THE NEWEST IN A LONG LINE OF TOP QUALITY GARRARD INSTRUMENTS! A completely automatic record changer, designed to play every type of record on one turntable! It will accommodate \(7^{\prime \prime \prime}, 10^{\prime \prime}\) and \(12^{\prime \prime}\) records at \(331 / 3 \mathrm{rpm}, 45 \mathrm{rpm}\) and 78 rpm , regardless of size of center hole and regardless of grooves.

Tonearm will be availahle with every type of quality pickup incluting Magnetic, Crystal and Variable Reluctance. The new GARRARD, a masterpiece of modern industrial design will be moderately priced

\section*{GARRARD RC65 Record Changer}

Radically improved in design and in mechanical operating features. Incorporates all the scientific and technical knowledge acquired tlirough many years of critical testing, experimentation and manutacture.

Through the years, discriminating music lovers liave learned to depend on this superior mechanism as the World's Finest in record playing equipment. They know that they can rely on a GARRARD to give them consistently quiet, efficient performance. The GARRARD RC65 is built to rigid standards and is fastidiously machined and assembled to assure trouble-free performance.

GARRARD's speed regulated, governor-controlled motor, using a steel governor disc, is fashioned to give powerful and regulated running at all times. The motor runs silently at maximum record loads without vibration, rumble or speed variations. The speed regulator feature permits adjustment of motor speed to 78 rpm or to retard or accelerate the tempo of any any record to suit individual tastes or to adjust for varying line voltages. The motor has a positive automatic stop which shuts the motor off after the last record is played. The on-off switch is located on the mounting plate in such a position as to prevent interference with the free movement of the tonearm.

The RC65 is a "mixer" Changer. It accommodates both \(10^{\prime \prime}\) and \(12^{\prime \prime}\) records intermixed in any assortment and in any combination. There are no buttons or switches to throw. It is entirely automatic.

GARRARD's exclusive true-tangent tone arm is jewel-mounted and equipped with ball-bearings. It is constructed to give perfect parallel litt, to set down on records gently, to track silently and to give genuine "floating" response.

\section*{GARRARD Type V Phono Assembly}

The newest unit of a long line of high quality phono assemblies for playing single records.

Here again, GARRARD has spared no effort or expense to produce the finest possible player for those who demand the best in record reproduction.

The entire assembly is typically GARRARD in that it features the finest type of phono motor-speedregulated and governor-controlled. This exclusive feature makes it possible to adjust to perfect speed ( 78 rpm ) or to accelerate or retard the tempo to suit the listener.

The Type \(V\) Assembly features an entirely new, unique mounting arrangement which represents the first genuine forward step in mounting design. This "bow" mounting is so efficient that even a blow struck on the motor board will not cause the tone arm to skip or repeat a groove. This is another exclusive feature and another GARRARD "first."

Available with your choice of quality pickups: (a) high fidelity Crystal pickup with permanent stylus, (b) Crystal pickup for use with replaceable needles, (c) GARRARD Magnetic Pickup, (d) G.E. Variable Reluctance Pickup.

GARIRARD offers the unique advantage of having a replaceable pickup head which can accommodate any of the popular cartridges available. It is also initially offered to you with your choice of either a low-pressure Crystal with permanent needle OR Crystal for use with replaceable needles OR with the GARRARD Standard Magnetic Pickup OR with the GE Variable Reluctance Pickup. There is no cliange in price in any case. Simply specity which is preferred when ordering.

Minimum cabinet dimensions are \(15^{\prime \prime}\) wide \(\mathrm{x} 13^{\prime \prime}\) deep \(\times 51 / 2^{\prime \prime}\) clearance above the unit plate and \(41 / 2^{\prime \prime}\) clearance below the unit plate.

\section*{GARRARD G俞 GARRARD}

\section*{GARRARD Two-Speed Mołor}

The new GARRARD 201-V two-speed motor is the new and improved model of our internationally famous 201T. It is now offered in its latest trouble-free form exactly as produced for the U. S. Navy and British Admiralty during the War.

The governor-controlled motor operates at either \(33-1 / 3\) or 78 rpm with absolute constancy and without waver or rumble. It is ideally suited for use where truly superior reproduction is desired.

Because of its extra-heavy rotor, which is slow-running, the resulting torque makes this motor amazingly smooth and silent. In sheer performance, it is the finest we have to offer. It is a self-starting induction type unit and is fitted with the patented GARRARD governor to insure perfect regularity.

The 201-V is equipped with Speed Regulator by means of which a wide range of speeds is possible-as well as perfect adjustment at \(33-1 / 3\) or 78 rpm . This regulator is on an extension arm so that \(16^{\prime \prime}\) records can be speed-controlled.

MODEL 201-V—Two speeds, \(331 / 4\) and 78 rpm ; dual voltage, AC-110/130 and \(200 / 250\) volts, \(40 / 60\) cycles. Net Price \(\$ 65.00\)

GARRARD Carrying Cases and GARRARD Table Model Cabinets are made especially for us, to our standards.

The Carrying Case is of solid wood throughout and is covered with finest procurable parchment type material. Sewn leather edges run completely around the case. The Hardware used is the very finest and it has two locking snaps, with keys.

The Table Model Cabinet is a hand-finished case finished in striking mahogany. Its appearance is that of a high quality piece of furniture, and it makes possible the easy creation of "Combinations."

\section*{New 45 r.p.m. Phonomotor for Record Players}

The new 45 r.p.m. record player Phonomotor, Model JP45, features a new motor which is designed specifically for this type of application. Exceptional features are quietness, freedom from mechanical vibration, no external fan, decreased height, and excellent speed regulation. On this unit the center disc is permanently fastened to the turntable and is designed for ease of record placement and removal. The unit is furnished with a \(61 / 2^{\prime \prime}\) O.D. turntable for RCA records with the \(11 / 2^{\prime \prime}\) diameter center hole.

\section*{PHONOMOTOR MODEL JP45}

New 45 r.p.m. recard player PHONOMOTOR is designed for ease of recard placement and remaval.

NOMINAL RATING-45 r.p.m. for 5 gram stylus force with 117 volts, 60 cycles, 0.2 amps., and 10 watts input.

\section*{New 331/3 r.p.m. Phonomotor for Record Players}

Here are three excellent record player phonomotors, Models MPS8, MPS9, and MPS10, for the \(331 / 3 \mathrm{r} . \mathrm{p} . \mathrm{m}\). long-play Micro-groove records. The idler tires are precision ground to extremely close limits, thus minimizing "wow." In each case the motor drive' shaft is ground in its own bearings in order to minimize run-out. As is also the case with the Alliance 45 r.p.m. and 3 -speed phonomotors for record players, each turntable bearing is rotary burnished to assure smoothness of operation. These units are furnished with \(8^{\prime \prime}, 9^{\prime \prime}\), or \(10^{\prime \prime}\) O.D. turntables for records with conventional center holes.

\footnotetext{
NOMINAL RATING- \(331 / 3\) r.p.m. for 5 gram sfylus force with 117 volts, 60 cycles, 0.3 amps., and \(141 / 2\) watts input.
}

PHONOMOTOR MODELS MPS8, MPS9, AND MPS 10 (with \(8^{\prime \prime}, 9^{\prime \prime}\), and \(10^{\prime \prime}\) O.D. turntables, respectively).

\title{
New 3-Speed Phonomotors for Record Players
}

Drive \(33^{1 / 3}, 45\), and 78.26 r.p.m. Records

The new Alliance 3 -speed record player Phonomotors, Models JPT8 and JPT9, are so advanced in design that mechanical operation is unexcelled! There are no rubber bands or belts to slip, snap, distort, or stretch . . . no needle shafts to indent tires under stall. A totally new motor assures minimum rumble, hum, and unequalled speed regulation! Motor has minimum height - no external fan - electronically dynamic balanced rotor - new vibration reduction mounting! Driving mechanism assures unimpaired performance at all speeds - has fewer moving parts! These units are furnished with \(8^{\prime \prime}\) or \(9^{\prime \prime}\) O.D. turntables designed for records with either the conventional or the RCA \(11 / 2^{\prime \prime}\) diameter center holes. A removable center disc is provided to fit the \(11 / 2^{\prime \prime}\) diameter center holes. This disc is reversible and will go on either way. Its height is designed for ease of record handling.

PHONOMOTOR MODELS JPT 8 AND JPT9
(with \(8^{\prime \prime}\) and \(9^{\prime \prime}\) O.D. turntables, respectively).

NOMINAL RATING- \(331 / 3\) or \(45 \mathrm{r} . \mathrm{p} . \mathrm{m}\). for 5 gram stylus force and 78.26 r.p.m. for 10 gram stylus force with 117 volts, 60 cycles, 0.3 amps., and \(141 / 2\) watts input.

\section*{Powr-Pakt Model MS Motor}

The Alliance Powr-Pakt Model MS motor is suitable for driving toys or other light loads. It is an adaptation of the quiet, smooth running motor which is used to power the Models MPS8, MPS9, and MPS10 Phonomotors. It measures \(31 / 8^{\prime \prime} \times 2^{\prime \prime} \times 13 / 4^{\prime \prime}\) not including the \(7 / 16^{\prime \prime}\) long shaft extension which has an "1/64" diameter. Rotation is clockwise facing the shaft extension. Its self aligning bearings are of the porous bronze oilless type.

\footnotetext{
NOMINAL RATING - 2800 r.p.m. at full load with 117 volts, 60 cycles, 0.3 amps., and 16 watts input. More detailed specifications are available upon request.
}

Gear drive, 4-pole motor. Fully enclosed, with silent, helical-cut gears running in oil bath within the sealed housing. Patented combination rubber turntable drive sleeve and record centering tip insure mechanical and electrical insulation between turntable and motor. Furnished complete with mounting plate, ready for installation; available with 9 " turntable.

\section*{EXTRA FOR \(10^{\prime \prime}\) TURNTABLE, 30 CENTS EACH}
 Packed in imlividual cartons. Shipping weight- 6 lbs.

115 volts a. c., 60 cycles
Heavy duty, rim drive, 4-pole motor. Rubber insulated from both mounting plate and turntahle for exceptionally quiet operation. Turntable shaft revolves with turntable and is grooved for holding clip. Retractable pin in turntable permits playing standard records without adjustment. Efficient performance is assured by positive alignment of driving pulleys, idler and turntable in one plane. Furnished with \(10^{\prime \prime}\) weighted turntable and complete with mounting plate ready for installation.

\section*{HOME RECORDING AND PHONOGRAPH ASSEMBLIES}

MODEL GI-R85L - LP, 78 and 33-1/3 R. P. M. with conversion spring for changing the \(33-1 / 3\) R. P. M. speed to 45 R. P. M.

\section*{MODEL GI-R9OL — 78 \& 33-1/3 R. P. M. Standard}

Model GI-R90L is the standard model which has been in the GI line for several years. It cuts 120 lines per inch, and plays back records with the standard needle pressure.
The Model GI-R85L incorporates a dual purpose pickup cartridge and an excellent and simple adjustment for playing the LP records and standard records. It cuts 160 lines per inch. In a separate envelope is furnished a conversion spring for changing the \(331 / 3\) R.P.M. speed to 45 R.P.M. with mounting instructions printed thereon.
Both models cut records up to \(10^{\prime \prime}\) diameter . . . play records up to \(12^{\prime \prime}\) diameter. To shift motor from one speed to the other, merely turn the speed change dial. Beautiful walnut wood grain on steel base plate. Streamline plastic trim on pickup and cutter arm attractively engraved with legends "Reproducer" and "Recorder". Turntable recessed into well in base plate. Merely lower cutting arm over record disc to start recording. Convenient, depth-of-cut adjustment. Dynam-ically-balanced, rim drive, 4 -pole motor. Compensating switch operate! by speed change dial.

MODEL GI-R85L - LP .
MODEL GI-R90L — STANDARD
List Price, \(\$ \mathbf{5 3 . 5 0}\) List Price, 47.50
Assembly includes dual speed motor; 10 " weighted turntable; crystal cutter; crystal pickup; compensation switch; pickup and cutter arm rests; drawn steel baseplate with formed down edges. Above prices include crystal cutter.
For (M41-10) magnetic cutter add \(\$ 2.00\) each.
Dimensions: Base plate- \(15^{\prime \prime}\) wide; \(111 / 2^{\prime \prime}\) front to back; height alove lower edge of base plate- 23 " 3 "; depth helow lower edge \(\begin{aligned} & \text { of base plate } \\ & \text { weight- } 171 \mathrm{lls} \text {. }\end{aligned} 3 / \mathrm{s}^{\prime \prime}\). Packed in individual cartons. Shipping

\section*{COMBINATION RECORD-CHANGER RECORDER}

\section*{MODEL GI-RC130L - 78 R. P. M.}

115 volts a. c., 60 cycles List Price, \(\$ 69.75\) Cuts records up to \(10^{\prime \prime}\) diameter. Plays twelve \(10^{\prime \prime}\) or ten \(12^{\prime \prime}\) records automatically. Only necessary to lower cutting arm over record disc to start recording operation. Convenient depth-of-cut adjustment on top of cutting arm. Turntable has retractable record driving pin. Heavy duty, dynamicallybalanced, recording motor.

One lever to move when changing from \(10^{\prime \prime}\) to \(12^{\prime \prime}\) records, removing records or to set for manual operation and recording. With lever in extreme position, all sizes of records can be removed from the turntable without interference. In manual position, tripping mechanism is inoperative. Non-jamming record handling fingers which do not extend past record leadin space. Pressing reject button drops the first record onto the turntable and automatically positions the pickup on the record. Records may be ejected instantly. Handles records with either run-in or oscillating trip grooves. Means provided for guiding pickup needle into the playing grooves on records without lead-in grooves. Pickup arm supported at all times when not resting on record. Changing mechanism is positive and quiet in operation. Shock mounting provided which permits isolation of the entire assembly from the cab. inet. Brown iridescent finish, streamline plastic trim on pickup and cutter arms attractively engraved with legends "Reproducer" and "Recorder"

Furnished with crystal cutter, crystal pickup, \(10^{\prime \prime}\) weighted turntable, on and off switch with spring mounting hardware. Add for (M41-10) magnetic cutter, \$2.00.
Dimensions: Base plate- \(14^{\prime \prime} \times 14^{\prime \prime} \times 3 / 8 "\); height above lower edge of base plate- 5\(\}^{7 \prime \prime}\); depth below edge of hase plate- \(23 / 4\) Packed in individual cartons. Shipping weight-241/2 \({ }^{2}\) lls.

\section*{MASTER JR. SPRING MOTOR}

Plays two \(10^{\prime \prime}\) selections from one winding. Exceptionally quiet and uniform in speed. Turntable is held in place by turntable-holding clip. Furnished with \(9^{\prime \prime}\) turntable, winding crank and escutcheon; turntable brake; dial and pointer, speed regulator; mounting screws and washers. Dimensions: Length- \(53 \mathrm{~s}^{\prime \prime}\) "; Width- \(43 / 4\) "; Depth-
\(2 \mathrm{~S}_{8}^{\prime \prime}\) from top surface of casting to bottom.
MODEL: MASTER JR. - 78 R. P. M.
List, \$10.25
Single Sprinu Type. Price includes \(\Omega^{\prime \prime}\) turntable ant parts.

\section*{AUTOMATIC STOP SWITCH}

Furnished oytionally for use with electric motors. Cannot the used with skring motors, recording units or record changers.

MODEL 12670
List, \$1.45
Automatic Stop Switch for use with \(9^{\prime \prime}\) or \(10^{\prime \prime}\) turntables.

\section*{VMatamito RECORD CHANGERS}

MODEL 4060 on "plug-in" base. Also available as replacement unit (Model 406).

MODEL 4070 on "plug-in" base. Also available as replacement unit (Model 407).

Model 100

\section*{TRI-O-MATIC}

The new V-M Model 4060 Tri-O-Matic AUTOMATICALLY plays all records, all sizes, all speeds. While "Automatic Operation for all records" is the outstanding sales feature, from a practical standpoint the many record protecting features are equally important. Records are LOWERED-NOT DROPPEDon the Spindle Shelf. There is no wobbling down the spindle-no slap or scrape _no possibility of the tiny microscopic grooves of the new type records being damaged in any way.
Controls are simple and located at the front, easily accessible in any installation. All moving parts in Tri-O-Matic Changers are factory-adjusted-riveted or pinned in adjustment-insuring years of trouble-free performance. Actually, only two adjustments are ever needed-needle height and setdown-and both are accessible from above the base plate.

Lis? Price
\(\$ 59.50\)
The V-M Model 4070 is a custom-styled version of the 4060 , with smooth-flowing lines that readily adapt themselves to either modern or period cabinets. It is especially recommended for "custom built" installations.

List Price
\(\$ 63.50\)
OTHER FEATURES: Plays any ten \(12^{\prime \prime}\) or \(10^{\prime \prime}\) records of the same speed INTER-MIXED-AUTOMATICALLY SHUTS OFF after last record-velvet action Velocity Trip-Dual Needle, Reversible Cartridge-Quick, Quiet Change Cycle -Minimum Mounting Space ( \(1313^{\prime \prime}\) wide, \(121 / 4{ }^{\prime \prime}\) long, \(71 / 4^{\prime \prime}\) overall height). Models \(4070,407,4060\) and 406 also available with G.E. Variable Reluctance Cartridges.

\section*{TRI-O-SPEED}

Available in two styles-as a Portable unit, and on an Amplified Base-the V-MI Tri-O-Speed Series has many outstanding sales features. The Portable Model 8025 plays all records now heing manufactured, yet it is priced competitively with many single speed Portables. It has an exceptional amplifying system and a "jam-proof" and "child-proof" changer of simple design. The Tri-O-Speed Portable plays \(10^{\prime \prime}\) and \(12^{\prime \prime} 331 / 3\) and 78 rpm . records AUTOMATICALLY, and \(7^{\prime \prime} 45\) and \(331 / 3 \mathrm{rpm}\). records manually. An attractive, durable Leatherette carrying case adds eye appeal and its light weight (only 23 lbs ) makes it practical for traveling.

List Price
\(\$ 69.50\)
Model 8022 Tri-O-Speed Record Player is the same basic unit, on an amplified base. It is an ideal player for commercial sound installations-skating rinks, dancing schools, clubs, etc.-as well as for home use.

Both units carry full Underwriter's Laboratory Approval, and both operate on 110 -volt, 60 -cycle, A/C Current.

\section*{MODEL 100}

Cost-conscious music lovers form a large market for the V-M Model 100. It is especially appealing to "beginners," since it captures true reproduction and exquisite tonal quality from all types of recordings-yet is priced to fit within modest budgets. The Model 100 is a completely self-contained unit with its own amplifier, loudspeaker and tone and volume controls. As simple to operate as a single speed player, the Model 100 plays all records, all sizes, all speeds, manually. It carries full Underwriter's Laboratory Approval.

List Price
\(\$ 34.95\)

\section*{WORLD-FAMOUS HOME RECORDING BLANKS}

\section*{ORANOF LABEL}

Popular composition base disc a party favorite! Heavy and firm, it will take punishment, yet it is coated carefully with our standard RECORDISC surface compound. The acme of amateur transcription anks.

\section*{"OM" LABEL}

Available in the three larger sizes only, these discs are made on heavy 021 aluminum base, coated with critically selected compound. Precision-made, and minutely inspected, they are guaranteed for perfect performance and long use.

\section*{PURPLE LABFL}

Lightweight aluminum base disc with heavyweight selling powerl The lowest-priced high-quality disc with an inexpensive .012 aluminum base, designed for amateurs desiring semi-professional reproduction.

\section*{sPEGIAL ORDER}

At no increase in cost, made up to order, with the same quality and in the same sizes as the Orange and Red label blanks, RECORDISC offer their YELLOW and BROWN labels, using ethyl cellulose coating with the U.L. approved film, instead of regular cellulose nitrate.

\section*{}

High-fidelity, volume selling disc with 021 aluminum base. Coated with flowless RECORDISC compound. Professional quality in smaller sizes for those who want the finest. Professional nitrate coating.

\section*{EGONOMY LABEL}

To meat the huge demand for extra-low-cost blanks, RECORDISC offers these slightly imperfect Red Label blanks which have failed to meet our rigid inspection. They do not our rigid inspection. They do not They will give at least the equivalent of one full side of perfect alent of one full side of perfect

\section*{TECHNICAL SPECIFICATIONS OF SOUNDCRAFT DISCS}

PHYSICAL PROPERTIES OF BLANK DISCS
Aluminum Bases: Alcoa \#2 Reflector Sheet Stretcherleveled for flatness \(3 / 4\) hard.
Base Thicknesses: \(171 / 4^{\prime \prime} \& 131 / 4 "-.050\)
16" - .040; 12" - . 032 \(10^{\prime \prime}, 8^{\prime \prime}, 61 / 2^{\prime \prime}-.025\)
Center Hole: .2845" + or -. \(001^{\prime \prime}\)
Thread Behavior: Thread throws inward \(1 / 2^{\prime \prime}\) to \(1 / 4^{\prime \prime}\). Can be picked up with minimum suction.

\section*{CHEMICAL PROPERTIES OF COATINGS}

Free from foreign matter down to size of 1 micron (thoroughly filtered).
Free from hard or soft spots (thoroughly mixed). No deterioration with age (inert plasticizers).
Free from solvents (thoroughly dried).

Drive Pin Holes: \(.284^{\prime \prime}+\) or - .010
Coating: Recording lacquer applied by flow method.
Coating Thickness: . 007 to .008
Coating thickness increases slightly toward outer edge so that weight of pile of dises is carried on outer edges in recording margin.

\title{
audiodises
}

\section*{ALUMINUM BASE RECORDING DISCS}

First produced in 1939. Audiodises quickly won the acceptance of both profes sional and amateur recordists. Because of their many superior qualities, these instantaneous recording dises have gained a place of eminent leadership in the recording world.

\section*{AN AUDIODISC FOR EVERY RECORDING NEED}

RED LABEL AUDIODISCS are standard throughout the recording profession exceeding the professional demands of hroadeasting stations, sound and movie studios and other exacting applications when top quality and dependability are essential requirements. Their many exclusive features have given new meaning to high fidelity recording and lise-like reproduction. They are the finest dises obtainable.
SINGLIE FACE RED LABEL AUDIODISCS have exactly the same fine qualities as standard lled Label and bring real economy to applications requiring but one side Both sides are coated with the recordable side identified with embossed label
YELLOW LABEL AUDIODISCS are the popular choice for all general purpose recording. Of high uniform quality, they are designed primarily for commercial recording studios, educational institutions, liome recordists and other applications where the super quality Red Label Audiodises are not required.

REFERENCE LABEL AUDIODISCS are especially adapted for making test cuts, filing and reference recordings, auditions and equipment adjustments. Their unusually low price gives maximum econony.

BLUE LABEL AUDIODISCS offer the very best in recording quality for schools, homes, amateur and demonstration work. Nade of exactly the same materials used in the manufacture of professional type Audiodises-except on a thimner aluminum base of conse disces have brilliant tone, long-playing life, no audible needle seratch and are of consistent quality.

MASTER AUDIODISCS are the outstanding choice where copies of recordings (pressings) are to be made by the electroplating process. The excellence and consistent quality of these discs are well known to all record processors.

PROPERTIES THAT MAKE FOR AUDIODISC LEADERSHIP

\section*{UNIFORM COATING}

Audiodiscs' exclusive machine process produces a smooth flat coating seven thousandtlis of an inch thick, free from swirls, waves and "orange peel" effect. The depth of the coating is consistent within one-half thousandth of an inch.

\section*{LONGER STYLUS LIFE}

The homogeneous coating is free from microscopic abrasive materials and surface imperfection which, in inferior discs, damage cutting points and cause extraneous noises in playback.

\section*{SILENT BACKGROUND}

Audiodiscs, cut under good recording conditions, we entirely free from audible "background scratch."

\section*{LONG PLAYBACK LIFE}

With correct playing equipment an Audiodisc can be played for more than a hundred times with no noticeable increase in surface noise.

\section*{BRILLIANT FREQUENCY RESPONSE}

These discs are noted for their brilliant high frequency response. Audiodiscs "speak for themselves" with quality performance that pleases the most critical recordist.

\section*{NO DETERIORATION WITH AGE}

A special curing process removes from Audiodiscs the last trace of volatile constituents. Liscs made over six years ago still cut easily and play back perfectly.

\section*{CONSISTENT QUALITY}

Audiodiscs are manufactured by a unique automatic precision-machine process which assures consistent quality. This uniformity is a feature that helps engineer and amateur attain the highest degree of recording excellence.

\section*{GENERAL NOTE:}

All Andiodiscs are manufactured on aluminum base. Red Label discs are embossed, Yellow and Reference discs have paper labels-Master Audiodises have no labels. All Audiodiscs have center-pin holes and three drive-pin holes except Master discs, which have one drive-pin hole. Lint-free envelopes are supplied in the packages of Red Label and Master discs. Other discs are packaged in their envelopes.

\section*{MICROSCOPICALLY MATCHED RECOROING AND PLAYBACK STYLI}

THE NEWLY EXPANDED LINE of Audiopoints now covers the full range of recording and playback needs. There are Audiopoints that fully meet the requirements of the most exacting professional recordists. There are also Audiopoints which these engineers unhesitatingly recommend to the non-professional and the general public. Made by skilled craftsmen and conveniently packaged in cards, boxes or envelopes, Audiopoints are available in four types of recording styli and four types of playback points, Recording and playback Audiopoints for microgroove are also available.

\section*{RECORDING AUDIOPOINTS}

SAPPHIRE No. 14. Long recognized by recording engineers as the best reeording stylus obtainable. Manufactured to rigid specifications
 the jerding machine just before packaging. Also supplied with \(70^{\circ}\) included angle. List price \(\$ 7.25\) (Resharpening cost \(\ddagger 3.25\) )
SAPPHIRE No. 202. A fine qualify brass shank stylus, ideally suited for those recordists not requiring the super quality of Sapphire Audiopoint No. 14. List price \(\$ 5.25\) (Resharpening cost \(\$ 2.60\) )
STEHLITE No. 34. A favorite recording stylus with many professional and non-professional recordists. Though moderately priced, it is the very best stellite stylus produced. List price \(\$ 1.75\) (Resharpening cost \(\$ .85\) )
DIAMOND-LAPPED STEEL No. 50. Most practical stylus for home recordists when "first cost" is important. Being diamond-lapped, it cuts a quiet, shiny groove and gives from 15 to 30 minutes actual recording time. List price 3 for \(\$ 1.00\)

\section*{PLAYBACK AUDIOPOINTS}

STEEL TRANSCRIPTION INEEDLE No. I5I. The ideal all-purpose transcription needle for original recordings, vinyl pressings and phonograph records. Quality performance is assured since each point undergoes a shadowgraph test. List price 100 for \(\$ 1.25-20\) for \(\$ .25\)

\section*{RESHARPENING SERVICE}

Established years ago, our Resharpening Service gives real economy in the use of Audiopoints No, 14, No. 202, No. 34 , No. 113 , No. 103 and No. 303. (When returning points, care should be taken to package them individually. For this purpose the original protective package cards are strongly recommended.)

\section*{AUDIOPOINT PACKAGING}

All Audiopoints except the No. 151 Steel Transcription needles are packaged in attractive cards. No. 151 are packaged 20 to the envelone or 100 to the box. Cards containing points No. 34, No. 50 , No. 103 and No. 303 are mounted on colorful display cards-one dozen package cards to each display card. The package cards are cellophane wrapped and mounted in slots in the display cards. A strip of Scotch Tape in the back holds these ca:ds in place and pe mits easy, neat removal that does not tear the cellophane wrapper. Envelopes containing No. 151 points are similarly mounted on display cards--50 envelopes per card or 1,000 needles. Package cards containing points No. 14. No. 202 and No. 113 are shipped in small bozes. NOTE: Yoints No. 14, No. 202 and No. 34 are supplied in standard short shank and long shank.

\section*{\(\star\) BROADCASTING \(\quad\) BUSINESS \(\quad\) CHURCH \(\star\) MOTION PICTURES \(\star\) RECORDING STUDIOS}

Alagnecord gives wide frequency response with low distortion; light weight with dependability; flexible arrangenent and use; and economical first cost and operation. Magnecord is the oldest and largest manufacturer of professional magnetic recorders.

\section*{BASIC RECORDING MECHANISM}

PT6-A (with case)
PT6-AX (withour case)
\(\$ 278.00\)
\(\$ 262.00\)

\section*{SPECIF}

Recording Speeds: 15 inclies/sec., or \(71 / 2\) inches/sec. interchangeanle. Quitek change capstans.
- Rewind Speed: Full \(71 / 2\)-inch reel rewound in approx 40 seconds. Frequency Response: At 15 inchace/sec. from below 40 eps to 15 \(k \mathrm{c} \pm 2 \mathrm{db}\). At \(71 / 2\) inches/sec. 40 cps to bevond 7 kc when used with mozer equalizer.
- Motars: Syicronous 117 v. 60 evele AC motor provides constant speed drive for recorting and playback. Shated pole motor pro-
- Record-Reproduce Head: Masnerorl RT- 61 plug-in type
- Erase Head: Mamecord kr'-18 plug-in type
- Mechanical Drive 1

- Outputs: +6 dlm, 600 ohms halancerd.
(Recording output is apalized simnal developiug approx. 1 ma in
Frequency Response recording head used in PT(CA.)
speed of 15 juches \(/ \mathrm{sec}\)., and \(\pm 2 \mathrm{db}\) from 50 to -000 at a tape speed of 15 inches/sec., and \(\pm 2 \mathrm{db}\) from 50 to 7,000 cps at \(71 / 2\) inches/sec. Whent puy-in recorder equalizer for the specific speed is used. Amplifier alone \(\pm 2\) db 50 to \(15,000 \mathrm{cps}\).
- Harmonic Distortion: Total kenerated in record-playback cycle, including tape and recording head, \(2.0 \%\).
Signal/Noise: Wide luand messurement including tape - better than 47 db with tolal harmonic content less than \(2 \%\).
Switching: Tliree-position switch selects "Record," "Listen" or "Remote" operation.

CATIONS
- Power Requirements: 117 volts 30 -cycle single phase \(\mathrm{AC}, 70\) watts. - PT6-A Case: \(18^{\prime \prime} \mathrm{H} x 8^{\prime \prime}\) W x \(151 / 2^{\prime \prime}\) D. Finish: Black Grain Leatheretie.
- Panel: Magnecord grey hammered finish. \(7^{\prime \prime}\) H \(\times 17^{\prime \prime} \mathrm{W}\).
- Bias Oscillator: Built in. Ists single 12AUT tuhe. 6.3 at .3 amps and 300 v at 40 ma must be supplied from uxternal sonrce.
- Connections: All power connections for monors and 12AUT are mavle to Jones plug. Audio connections to Camon socket

\(\$ 462.00\)

\section*{SPECIFICATIONS}

Inputs: Three indepemdently mixed low-lerel microphone chamels 30/50 ohms: also, high imperlance bridging input.
- Mixer: Invividual low impelance controls ( 2 db per step) on each miorophone input. Naster gain control ( 2 db per step)
- Indicator Lights: Colored target lights indicate selector switch position.
- Monitor System: Small binilt-in loudspeaker with sevarate power ube and volume control.
- Headphone Jack: Jack for headphone monitoring
- Volume Level Meter: Std. \(3^{\prime \prime}\) square V.U. meter, Scale A.
- Tubes: 1PT6-P: 1-12AN7, 2-12AU7. 1T6-1'S: 1-6\6, 1-6Xf Power Requirements: \(117 \mathrm{v}, 60\)-eycle Single Phake \(\mathrm{AC}, 60\) walts As remote amplifier, may be oprated on hatiery with minor chanre
- Case: \(18^{\prime \prime} I_{s} \times 8^{\prime \prime}\) W \(\times 1612^{\prime \prime}\) D. Firish: Black Grain Leatherette
- Panel: Marnecorl gres hammered finish
- Weight: 31 ms

\section*{RACK AMPLIFIER PT6-R}

Rack monating recording and repoducing amplifier for use with PTG-A PT6-R . . . . . \$383.00

\section*{SPECIFICATIONS}
- Inputs: 600-ohm lalanced; high impedance bridging.
- Output: + 6 dimm, 600 olims balanced.
(Rucording output is equalized signal developing approx. 1 ma in Magne corter RT-61 recorring head used in PT6-A.)
- Gain Control: Single, 2 di per slep.
- Frequency Response: \(\pm 2 \mathrm{db}\) from 50 to \(15,000 \mathrm{cps}\) at a tape speed of 15 inches sec., and \(\pm 2 \mathrm{db}\) from 50 to \(7,000 \mathrm{cps}\) at \(71 / 2\) inches/sec. When phys-in reorder equalizer for the specific speed is used. Amplitier alone \(\pm 2 \mathrm{dh} 50\) to \(15,000 \mathrm{cps}\).
- Distortion: Tolal generated in record-playtack cycle, including tape and recording head, \(2.0 \%\).
- Switching: Three-position switch selects "Record," "Listen" or "Amplifier."
- Indicator Lights: Colored target lights indicate selector switch position.
* Monitor: Jack on front panel provides for hearlphone monitoring
- Volume Level Meter: Standard \(3^{\prime \prime}\) square V.U. meter, Scale A.
- Tubes: 1-12 1×7, 2-12AU7, 1-6X4.
- Power Requirements: \(117 \mathrm{v}, 60\)-cycle Single Phase AO, 60 watts.
- Dimensions: Std, \(19^{\prime \prime}\) relay rack panel \(14^{\prime \prime \prime}\) II. x \(121 / 2^{\prime \prime}\) deep. Itas cut-out for mounting ITG-A recording mectanism in face of panel
- Panel: Magnecord grey hammered finish

\section*{AUXILIARY SPOOLING MECHANISM PT6-M}

Increases playing time of PT6-R/PT6-AX combination by factor of \(2 . \$ 128.00\)
* Rack Panel \& Throwover Switch (PT6.HT), Throwover Switch, Adapter Plug, and Cables (PT6-T), Portable 12 v, DC Power Supply (PT6-S), and Monitor Head Strip (PT6-Q) also availalle.

MAGNECORDACCESSORIES

\section*{PROFESSIONAL MAGNETIC TAPE RECORDER}

Engineered by the Oldest and Largest Manufacturers of Professional Magnetic Recorders

\section*{SPECIFICATIONS}

\section*{BASIC RECORDER MECHANISM}

Produces high-quality recordings of all program naterial.
- Recording Speeds: 15 inches/sec. or \(71 / 2\) inches \(/ \mathrm{sec}\). interchange. able. (No tools required.)
- Rewind Speed: Full \(71 / 2^{\prime \prime}\) reel ( \(1,200 \mathrm{ft}\). of tape) rewound in approx. 40 seconds.
- Frequency Response: At 15 inches/aec.: from helow 50 cps to 15 \(\mathrm{ke} \pm 2 \mathrm{dh}\), or 50 to \(7,500 \mathrm{cps} \pm 2 \mathrm{db}\) at \(71 / 2\) inches \(/ \mathrm{sec}\)., when the proper equalizer for the specific speed is used in the ampliffer.
- Motors: Synchronous \(117 \mathrm{v}, 60\)-cycle AC drive motor. Shaded pole motor for rewind.
- Flutter: Max. 0.3\%
- Power Requirements: 117 volts, 60-cycle Single Phase AC, 70 watts.
- Case: Dimensions: \(18^{\prime \prime} \mathrm{L} \times 8^{\prime \prime} \mathrm{W} \times 151 / 2^{\prime \prime}\) D. Finish: Biack Grain Leatherette.
- Panel: Magnecord grey hammered finish. \(7^{\prime \prime} \mathrm{H} \times 17^{\prime \prime} \mathrm{W}\).
- Bias Osclllator: Built in. Uses single 12AU7 tube. 6.3 at . 3 amps and 300 v at 40 ma supplied from amplifier.
* Hi-iorward cueing speed available for an additiona! \$16.00.

RECORD, PLAYBACK \& 10-WATTAUDIO AMPLIFIER
Provides exceptionally clean, top-quality audio. Single low impedance microphone input with gain control, high-level terminal for tuner or amplifier input.
- Inputs: One low level, low impedance microphone. Ilirh level input: 100,000 ohms, unbalanced.
- Output: Line ontput, +6 dbm at 600 ohms balanced from terminal striy. Power output, 10 watts, at 4 or 16 ohms.
- Frequency Response: \(\pm 2\) db from 50 to \(15,000 \mathrm{cps}\) at a tape speed of 15 inches/sec., and \(\pm 2 \mathrm{db}\) from 50 to \(7,000 \mathrm{cps}\) at \(7 \%\) inches/sec. When plug-in recording equalizer for the specific speed is used. Amplifier alone \(\pm 2 \mathrm{db} 50\) to \(15,000 \mathrm{cps}\).
- Harmonic Distortion: Total generated in record/playimet cycle (including tape and recording head) \(2.0 \%\) at normal recording level.
- Signal/Noise: Wide band noise including tape, 47 dt or better.
- Switching: Three-position switch selects "Record," "Listen" or "Amplifier" operation. Inserts proper characteristics for record or playback and removes all equalization for use as a 10 -watt audio or P.A. amplifier.
- Monitor System: Built-in 5" I'.M. loudspeaker with on-ofl switch.
- Volume Control Meter: \(\mathbf{3}^{\prime \prime}\) square standard V.U. meter, Scale A.
- Dimensions: \(18^{\prime \prime} \mathrm{L} \times 8^{\prime} \mathrm{W} \times 123 / 4^{\prime \prime} \mathrm{D}\)
- Panel: Magnecord grey hammered finish. \(17^{\prime \prime}\) W \(\times 7^{\prime \prime}\) II
- Power Requirements: 117 volts, 60-cycle Single Phase AC, 60 watts.

\section*{DUOTAPE \\ MAGNETIC TAPE RECORDER PARTS KIT}

All engineering completed. Kit makes high-fidelity, bi-filar type magnetic tape recorder for faithful playback of music and voice. Kit includes erase/record/reproduce head, special oscillator coil, drive motor ( \(115 \mathrm{v}, 60\)-cycle), motor switch, capstan flywheel and bearings, pressure roller and arm, tape reel takeup mechanism, motor mounting plate, main support panel, and hardware. Over-all size: \(101 / 4^{\prime \prime}\) x \(141 / 4\) ". Sound recorded on one-half of tape width in one direction; on other half in opposite direction. Tape speed: \(71 / 2^{\prime \prime}\) per sec.; low distortion; insignificant wow and fiutter. Includes directions for assembly, circuit diagram, parts lists, and hints on building a high-fidelity record-playback amplifier from parts sold by local dealer.

\section*{Eosy to Assemble:}

Screwdriver, Pliers, Soldering Iron Only Tools Needed.

\section*{THLEVISION CALIBRATOR (WR-39A)}

Varialnle-Frequency Osciliato
Frealency Ranges (contimous coverage) : 19. 110 Mc ; \(170-240 \mathrm{Mc}\)
Output Yoltage: Better than 0.28 peak-to-peak volts at atry frequency ( 0.1 KMS volis)
Output Impedance.
100 ohms
Attenuator Kange..................................... . . . \(100 / 1\) Impedance at "Mod In" Jack.......... 5000 ohms
Crystal Oscillators:
Primary Siandard Frequency: 2.5 Mc ; Accuracy \(\pm 0.01 \%\)
Modulating Standard Frequency: 0.25 Mc ; Adjustable for exact zero-beat with 2.5 Mc crysial; Accuracy: \(\pm 0.037 \%\) (Modulating crystal can be zero-beat against primary crystal)
Ileterodyne Detector Sensitivity:
External Signal Beating Against VFO: 1 milli-
External Signal Beating Against Crystals: 10 millivolts
Audio Amplifier: Gain (approx.)
1000 times Output.
.....................
0.3 max. watts

Loudspeaker..... 3 -inch cone, alnico magnet type Dimensions

The WR-39A is a marker sigual generator, a dual crystal standard, and a heterodyne frequency meter with builtin audio amplifier and speaker. The marker VFO operates on fundamentals, and produces strong marker pips on scope traces anywhere within its specified fregeuncy ranges. For regular sig-nal-generator and calibrator applications, the VFO also can be used on sec-ond-harmonic frequencies, thus giving continuous coverage from 19 mc to 480 me. For stagger-tuned alignment work, the VFO can be amplitude-modulated by an audio oscillator. This crystal combination will calibrate any signal source over the range of 250 kc to 480 mc . Unit is complete with signal injection cable. Shipping weight, 15 lhs. Sugg'd User Price: \(\$ 250.00\)

\section*{TV SWEEP GENERATOR (WR-59A)}

IF \& Video Ranges. ....... .................. . . . \(4000 / 1\)
Maximum Amplitude Variation While Sweeping All ranges, \(\pm 1 \mathrm{db}\)
Horizontal Sweep
Phase Range: \(0.160^{\circ}\); Frequency: 60 cms ; Ampliturle: 5.6 peak-to-peak volts

WR-59A is a frequency-modulated sweep-alignment generator. It generates signals of fundamental frequency on all ranges, except video, Pix 5-15, and P'ix \(20-30\) which are beat frequency (on these bands, band-pass filters are used) which are preset for speed and accuracy. The ranges include all 13 TV rf channels, picture and sound IF, video, prewar pix IF, the standard FM intermediate, and a spare \(25-40 \mathrm{Mc}\) channel. Sweep width is continuously variable and output level is flat within 1 db in all positions. The output will match balanced or unlalanced lines, and is variable over wide limits by means of an elaborate piston attenuator. The unit develops a sweep frequency signal for a scope, and phasing control is provided. An additional feature is return-trace blanking which produces a zero-reference line on the cathode-ray tube. The unit is complete with rf and if/rf output cables. Shipping weight, 20 lbs. Sugg'd User Price: \(\$ 325.00\)

\section*{MASTER YOLTOHMYST ELECTRONIC METER (WV-95A)}

DC Voltmeter Ranges : 0 to 5-10-50-100-500-1000 dc volts; Input Resistance: 11 megolms on all ranges AC Voltmeter Ranges: 0 to 1-5-10-50-100-500-1000 RMS volts; Frequency Response: 30 cps to 20 kc ; Input Impedance: 0.5 megolims shunted by \(125 \mu \mu \mathrm{f}\)
DC Ammeter Ranges: \(0-10,0-100 \mu \mathrm{a}, 0\) to \(1-10-100\) ma, 0-1, 0-10 amps.
Ohmmeter Ranges: 0.1 ohm to 1000 megohms in six ranges; Center-Scale Indications: 10,100, 1000,10000 ohms; \(0.1,10\) megohms
Canacitance Meter Ranges: \(4 \mu \mu \mathrm{f}\) to \(1000 \mu \mathrm{f}\) in six ratiges; Center-Scale Indications: 100, \(1000 \mu \mu \mathrm{f}\); \(0.01,0.1,1,10 \mu \mathrm{f}\)
(NOTE: The following data apply to the WV-95A when used with RCA Diode Probe WG-275 which is supplied on seluarate order.)
RF Voltmeter Ranges: 0 to 5-10-50-100 RMS volts from 30 crs to 17.5 Mc ; 0 to \(5-10-30\) RMS valts from 17.5 to 75 Mc ; \(0-5,0-10\) RMS volts from 75 to 250 Mc
Inpust Impedance: 625000 olins sliunted by \(15.6 \mu \mu \mathrm{f}\) at \(1 \mathrm{Mc} ; 32000\) ohms shunted by \(14.5 \mu \mu \mathrm{f}\) at 10 Mc ; 100 ohns shunted by 13 \(\mu \mu \mathrm{f}\) at 250 Mc
Meter Indications: RMS value of sine-wave volt age. 0.354 peak-to-peak value of recurrent com-plex-wave voltage
Dimensions voltage
Dimensions.......................... \(10^{\prime \prime} \times 131 / 2^{\prime \prime} \times 71 / 2 "\)

The WV-95A is truly the "master" electronic multimeter. It combines in one case an ac volmeter, dc voltmeter, ohmmeter, de microammeter, de millianmeter, capacitance meter, and a dc ammeter. The instrument is ac line operated. The carefully balanced meter is virtually burn-out proof; it has a full scale accuracy of \(\pm 2 \%\), and it may be zero-centered for discriminator alignment work The capacitance circuit includes a polarizing voltage for measurement of clectrolytic capacitors. The entire electrical system is insulated from the metal case which may be grounded separately. Ascessories available on separate order include a \(100-\mathrm{Mc}\) crysial probe WG-263, and a \(250-\mathrm{Mc}\) peak-to-peak diode probe, WG-275. Unit is complete with three test leads and two test cables with plugs and clips. Shipping weight, 15 lbs . Sugg'd User Price: \(\$ 152.50\)

SEC
rCA TEST AND MEASURING EQUIPMENT

\section*{for SERVICE•LABORATORIES•INDUSTRY•SCHOOLS}

\section*{TEST OSCILLATOR (WR-67A)}

The WR-67A combines speed, accuracy, convenience and over-all dependability in signal injection and alignment work. A range switch allows for the quick selection of three fixed frequencies of 1500,600 , and 455 kc . or smoothly variable fundamental frequencies from 100 kc to 30 Mc , plus useful harmonics out to 90 Mc . Add to this - a temperature compensated oscillator special signal-injection probe . . . both step and vernier attenuators . . . double shielding . . . six-band drum dial with easy-to-read, four-foot scale spread
scale accuracy of \(\pm\) \(2 \%\) adjustable modulation level for internal and external modulation power-line filter to minimize rf leakage and 400 -cycle signal source - More features than can be found in most signal generators. Shipping weight. 20 lbs . Sugg d User Price: \(\$ 89.50\)

Frequency Range: Continuous from 100 kc to 31 Mc . Band A: \(100-260 \mathrm{kc}\); Band B: \(: 260 \cdot 650\) kc ; Band C: \(635-1600 \mathrm{kc}\); Band D: \(1.6-4.7 \mathrm{Mc}\); Band E: 4.4-12.8 Mc; Band F: 10.5.31 Mc. Calibration Accuracy.................. \(\pm 2 \%\)

Fixed Frequencies..............455, 600, 1500 kc
Output Voltage: Continuonsly variable, \(5 \mu \mathrm{v}\) to 1 volt KM.S

Internal Modulation: 410 cps ; adjustable from \(0 \%\) to \(50 \%\)

External Modulation: 2 RMS volts req., for \(30 \%\) mod. to 17000 cps

Audio Output.............. 25 max. RMS volts
RF Output Impedance. \(\qquad\) 10-1000 ohns (Varies with attenuator setting)

Dimensions.
\(10^{\prime \prime} \times 133 / 2^{\prime \prime} \times 7 / 2^{\prime \prime}\)

\section*{3" OSCILLOSCOPE (WO-55A)}

The WO-55A oscilloscope is a visual electronic voltmeter. It is equipped with a calibrating facility and a regular multi-meter range switch. Voltages can be read directly on the clip-on graph screen at the same time waveforms are being studied. Push-pull vertical and horizontal amplifiers provide good fidelity and considerably more output than needed for the 3 " CR tube. This allows the trace to be greatly expanded for observation of pattern detail. The scope has a retractable light shield and all usual oscilloscope features. It is a quality instrument, rugged, stable, linear, and well-suited for TV-FM alignment and other oscilloscope applications in the laboratory, factory, field installation, and service shop. Sllipping weight, 15 lbs . Sugg'd User Price: \(\$ 129.50\)

Deflection
Vertical Amplifier: Better than 1.33 peak-topeak volts inch 0.46 KMS volt/inch
Vertical Detlecting Electrodes: Beetter than 120 peak-to-peak volts/inch 42 kMS volts/inch
Horizontal Amplifier: Better than 1.5 peak-to-peak volts/inch 0.53 RMS volts/inch
Horizontal Deflecting Electrodes: Better than 135 peak-to-peak volts/inch 48 RMS volts/inch
Amplifier Gain (hoth amplifers)....... 90 times
Input Impedance
Vertical Amplifier: 0.5 megohm, shunted by \(55 \mu \mu \mathrm{f}\)
Horizontal Amplifier: 0.5 megohm, shunted by \({ }_{37} \mu \mathrm{\mu} \mathrm{f}\)
Horizontal Deflecting Electrodes: 5.6 megohms, shunted by \(12 \mu \mu\)
Sine-Wave Fiequency Response (both amplifiers):

Flat within \(\pm 10 \%\) from \(7-40000 \mathrm{cps}\)
Flat within \(\pm 20 \%\) to 70 kc
Down less than \(50 \%\) at 200 kc
Horizontal Sweep Ringe...........15-50000 cps Auxiliary Sire-Wave Sweep Frequency: 60 cps Calibrator Voitage...... 10 peak-to-peak volts Calibrator Voitage
Deflecting
Capability
The beam can be expanded off-screen for observation of pattern detail
Dimensions.

\section*{AUDIO OSCILLATOR (WA-54A)}

The WA-54A Audio Oscillator is a portable, completely self-contained ac operated instrument for generating sinusoidal voltages within the frequency range of 20 to 17,000 cycles per second... easily adaptable for measuring the fidelity of radio receivers, frequency response of audio amplifiers, and modulation claracterestics of small transmitters, also used for determining frequencies and mechanical speeds. Tapped output transformer makes it possible to match the oscillator output to load impedances most frequently encountered ... electronic "eye" serves as calibration indicator, output level indicator, and pilot lamp. Frequency settings are read from a large, easy-toread drum dial. Shipping weight, 19 lbs. Sugg'd User Price: \$152.50

Ftequency Range (continuous).. 20 cps to 17 kc
Output Impendance:
High-Level Balanced......250, 500,5000 ohms High-Level Unbalanced...62.5, 125, 1250 voits Low-Level Unbalanced....... 10000 min . ohms

Output Voltage (approx.):
No Load (high level). \(\qquad\) 40 RMS volts With 5000 Ohm Load \(\qquad\) 25 R With 500 -Ohm Load.............7.9 RMS volts With 250 -Ohm Load.
No Load (low level).
\(\qquad\) 5.5 RMS volts

Output Variation (loadei) ...... less than \(\pm 2 \mathrm{db}\)
Distortion.....................ess than 5\% RNIS
Dimensions.................... \(10^{\prime \prime} \times 13 \frac{3}{2}\) " \(\times 7 \frac{1}{2 \prime \prime}\)

\section*{RCA TEST AND MEASURING EQUIPMENT}

\section*{AUDIO VOLTMETAR (WV.73A)}

Voltage (AC).
Frequency Range Input Impedance... Power Supply..... Dimensions. \(\qquad\) megolm and \(25 \mu \mu \mathrm{f}\) Dimension 3125 volts; \(50 / 60\) cycles

Weight \(\qquad\)
Finish (Case)...
(Pancl)

Ideal for measuring voltages in highimpedance circuits. Logarithmic scale and overlapping attenuator assure accurancy even when pointer is at either end of scale. Excellent frequency response. Sugg'd User Price: \(\$ 149.50\)

\section*{ADVANCED VOLTOHMYST (WV.75A)}

DC (6 ranges)

\section*{AC ( 6 ranges)}

Using probe directly \(\qquad\) to
a to 100 volte Frequency Response:
Using probe directly....... 30 cycles to 250 Mc
Using probe and multiptiers............. 30 cycles to 15 kc
Input Impedance (using probe directly): At 1 Mc ......................... 625 Kilohms; \(15.6 \mu \mu\)
Resistance (6 ranges). \(\qquad\) 0 ohms to 1000 megohms
Power Supply (AC) ...105/125 volts, \(50 / 60\) cycles
Dimensions................... \(6 \mathrm{r}^{5} \mathrm{~m}^{\prime \prime}\) w ; \(95 / 8^{\prime \prime} \mathrm{h} ; 61 / \mathrm{h}^{\prime \prime}\) deep

For High-Frequency, FM, TV, UHF and pulse work. Newly-developed diode probe permits peak-to-peak AC voltage readings to 250 Mc . WV-75.A is really 6 instruments: VHF Voltmeter, Audio Voltmeter, AC Voltmeter, DC Voltmeter, Ohmmeter, FM Indicator. Meter is burn-out proof. The WV-75A employs a pushpull DC Vacuum Tube Voltmeter circuit characterized by excellent linearity and stability. Sugg'd User Price: \(\$ 125.00\).

\section*{ULTRA-SENSITIVE DC MICROAMMETER (WV-84A)}

Reads from 0.001 to 1000 microamperes in six separate ranges. Useful for measuring high values of resistance; may be used as high reesistance volmeter. Approaches galvanometer sensitivity. Electronic protected non-burn-out meter. Accuracy, 0.01 range. \(\pm 5 \%\) of full scale reading; other ranges \(\pm 4 \%\). Ideal for weak-current measurements in phototubes, multiplier phototubes, etc. Sugg'd User Price (less batteries): \(\$ 100.00\).

\section*{INDUSTRIAL OSCILLOSCOPE (WO-60C)}

Portable scope with wide variety of uses. Excellent phase-shift characteristics, l-f response. Holds high sensitivity even with violent shock. Designed for fast changeover from one type persistence \(\mathrm{C}-\mathrm{R}\) tube to another. Useful range 0.5 to 300,000 cycles. Sugg'd User Price: \(\$ 345.00\).

\section*{PORTABLE OSCILLOSCOPE (WO-79A)}

Frequency Range: ertical Amplifier \(\qquad\) 10 cycles to 5 Mc Horizontal Amplifier Deflection Sensitivity: Vert. Amplifier. 0.18 RMS volt/in Sawtooth Time Base..... 20 cycles to \(250 \mathrm{kc} / \mathrm{sec}\) Triggered Time Base...Repetition to \(50 \mathrm{kc} / \mathrm{sec}\) Blanking.....................Return trace blanked on triggered definition Power Supply Dimensions..........- \(814^{\prime \prime}\) w; \(1412^{\prime \prime}\) h; \(1614^{\prime \prime}\) deep

For detailed observation and accurate measurement of voltages produced by TV synch. and dellection circuits, ignition systems, pulse generators, etc. Wide horiz. deflection-up to twice screen diam. Calibrated meter for voltage measurements. Built-in delay line. Triggered sweep. Sugg'd User Price: \(\$ 550.00\).

LABORATORY OSCILLOSCOPE (715-B)
Vertical amplifier flat to 11 Mc . Triggered and linear sweep. One microsecond markers. Sugg'd User I'rice: \$2400. Write for catalog.

DC OSCILLOSCOPE (WO-27A)
Both vertical and horizontal amplifiers flat from from 0 to 100,000 cycles. 5'" C-R tube, quickly interchangeable. Sugg'd User Price: \$1150.

\title{
RCA TEST AND MEASURING EQUIPMENT
}

\section*{VOLTOHMYST (195-A)}

The ideal instrument for radio servicing. In one instrument, at one price, you get 6 testing devices: DC Voltmeter; Ohmmeter; AC Voltmeter; A-F Voltmeter; Outputmeter; FM Indicator. New features include diode for AC measurements, linear AC scale for all ranges; RCA Crystal probe WG-263 (available on request). Sugg'd User Price: \(\$ 79.50\).

Electronic DC Voltmeter Range 0-3; 10; 50; 100; 500; 1000 volts Imput Impedance........... 10 megohms constant Electronic Ohmmeter Range...... \(0-1,000 ; 10,000\); 100,000 ohms; \(0-1 ; 10 ; 1000\) megohms
Internal Source
3 volts
Electronic AC Voltmeter Range..... \(0.5 ; 10 ; 50\);

Finish.........Grey wrinkle, brush chrome panel

\section*{BATTERY VOLTOHMYST (WV-65A)}

Portable electronic voltmeter-ohmmeter and ammeter combination for mobile, industrial or rural use. Works anywhere without AC power source thereby extending famous VoltOhmyst features to places remote from power lines. Neon panel lamp lights when battery is used. Unusually long battery life with normal use. Sugg'd User Price: \(\$ 59.50\) (Less batteries).

DC Ranges \(\quad 0-3 ; 10 ; 30 ; 100 ; 300 ; 1000 \mathrm{v}\) Input Resistance \(\quad 11\) megohms constant AC Ranges............ \(0-10 ; 30 ; 100 ; 300 ; 1000 \mathrm{v}\) Sensitivity \(\quad 1000\) ohms per volt Ohmmeter Ranges............ \(0.1000 ; 10.000 ; 100,000\) ohms; \(0-1 ; 10,1000\) megohms DC Ammeter Ranges........... 0 ; \(10 ; 30 ; 100\); 300 milliamp; \(0-10 \mathrm{amp}\) Batteries ...............Four \(11 / 2 \mathrm{v}\) " \(A\) "; two 45v " \(B\) " Dimensions . \(61 / 4^{\prime \prime}\) w; \(91 / 2^{\prime \prime} h ; 51 / 2^{\prime \prime}\) deep Weight (incl. batteries)................................. 9 lbs .

\section*{ISOTAP ISOLATION TRANSFORMER (WP-24A)}

Eliminates shock hazard between ac-dc chassis and ground, speeds detection of recciver faults with highlow line tests, and facilitates testing of receivers at the design-center value of 117 volts. A six-position switch and three secondary receptacles afford maximum flexibility and operating convenience. Sugg'd Uscr Price: \(\$ 8.95\)

Primary:
Line Voltage Range. 105.130 volts Switch Positions. 105, 110, 115,120 . 125 , 130 volts 125,130 volts \(.50-60\) cycles
Frequency
\(105117-130\)
Secondary:

Designed especially for rapid and accurate alignment of FM reccivers. Produces an i-f sweep frequency of 0 to 200 kc adjustable band width, which can be centered on any i-f from 8.3 to 10.7 Mc. Also has CIV or AM signal in 85 to 110 Mc range for oscillator and mixer alignment. Sugg'd User Price: \(\$ 89.50\)

\section*{OSCILLOSCOPE (WO-58A)}

Vertical Amplifier:
Deflection- 0.18 RMS volt/in
Sine. Wave Frequency Response:
Flat within \(\pm 20 \%\) from 5 cycles to 2 Mc
Frequency resfonse curve has no positive slope above 1 kc
Square-Wave Response:
Tilt and overshoot less than \(2 \%\) from 30 to 50.000 cycles

Rise time less than \(0.15 \mu \mathrm{sec}\) from \(10 \%\) to \(90 \%\) of total rise
Horizontal Amplifier:
Sine. Wave Frequency Response:
Flat within \(\pm 10 \%\) from 6 to 100,000 cycles

5" oscilloscope affording accurate presentation of synchronizing pulses, deflection waveforms, and composite video signals. Peak-to-peak voltages of waveforms can be read during operation. Defective waveforms can be traced step-by-step. The crystal probe can be plugged into the kinescope socket of the receiver under test to observe video-amplificr response. Sugg'd User Price: \(\$ 345.00\).

Curput Voltage.....
Input Power Requirement.......105-125 volts,
Dimensions. Jobeycles, 175 max, wats, depth, \(71 / 2^{\prime \prime}\)

A general purpose d-c power source with excellent voltage regulation output provides an adjustable voltage which remains constant over wide ranges of load impedance and line voltage variations - eliminates the need for constant measurement and readjustment of supply voltages each time a circuit change is made. Primarily intended as an extremely stable "B" supply, the WP-23A is also useful as a low-impedance "C" bias supply. Shipping weight 25 lbs . Sugg'd User Price: \(\$ 130.00\).

Can be used to quickly check presence, absence or character of signal at any point in any AM receiver. Enables serviceman to determine wattage, voltage and signal level thruout the set. All tests can be made simultaneously for monitoring intermittant receivers. Sugg'd User Price: \(\$ 162.50\).

\title{
SYLVANIA electronic equipment
}

\section*{TUBE TESTERS}

Here's the last word in tube testers made for discriminating distributors, radio servicemen and industrial users. This convenient on-the-spot tester can check more than 500 tube types under actual operating conditions. Size: \(5 \frac{1}{4} 4^{\prime \prime} \times 14 \frac{3}{16}{ }^{\prime \prime} \times 15^{\prime \prime}\). Weight: 18 lbs.

Features: Shorts Test at voltage low enough to prevent tube damage, high enough for full brilliancy on indicator. All tube elements tested under dynamic conditions. Fingertip Controls. Tests all styles of receiving tubes. Large \(41 / 2\)-inch
meter; 8-foot cord. Price: \(\$ 59.50\).
Type 140

\section*{FM-AM SIGNAL GENERATOR}

Type 216
Supplies all signale necessary for complete alignment of FM and AM receivers. Frequency range 80 kc to 120 mc . Sweeps of \(\pm 350 \mathrm{kc}\), \(\pm 75 \mathrm{kc}\), and \(\pm 15 \mathrm{kc} .1\)-volt output. Price \(\$ 189.50\).

\section*{POLYMETER \\ Type 221}

The perfect multi-purpose meter for AM-FM-TV servicing. Tests receivers, transmitters, industrial electronic equipment. Highly accurate. New circuit provides superior stability. New rf probe feature provides increased flexibility in use. All essential accessories no extra charge. Price: \(\$ 99.50\).

POLYMETER
DC VOLTAGE MULTIPLIER

With this new DC Voltage Multiplier, the 1,000 vdc range setting on your Sylvania Polymeter will read 10,000 vdc full scale! Add this accessory to your Polymeter and you have a Kilovoltmeter for testing TV circuits. Type 222 ( 10 KV ) for the Polymeter Types 134 and 134Z. Type 223 ( 10 KV ) for Polymeter Type 221. Only \(\$ 9.95\) !

Type 224 ( 30 KV ) for Polymeter Types 134 and 134Z; Type 225 ( 30 KV ) for Polymeter Type 221. \(\$ 12.50\).
Type 226 Conversion Cartridge (for \(20,000 \mathrm{Ohm} /\) Voltmeter). \(\$ 2.00\).
OSCILLOSCOPES (Types 131 and 132)

\section*{OSCILLOSCOPE Type 132}

Giant 7" tube and special push-pull amplifiers
 place this sensational instrument in a class by itself. Check wide response, high input impedances, low amplifier distortions. Priced as low as many smaller oscilloscopes. Has jack for intensity modulation. Widely used by service dealers and idustrials for AM-FMTV testing. Price: \$144.50.

\section*{OSCILLOSCOPE}

Type 131
Flexible in its many applications, this complete 'scope is priced within reach of every pocketbook. High input impedances, excellent sensitivity and amplifier response. Price: \(\$ 69.50\).

Wide range - 20-20,000 cycles, flexible, accurate. Negative feedback minimizes output distortion. Ideal for receiver, transmitter, PA servicing. High output permits testing speakers direct. Stabilized R-C circuit. Price: \(\$ 129.50\).

MODULATION METER X-7018
Monitors modulation percentage and speech quality. Compact and economical. Helps keep transmission efficient and comply with FCC overmodulation regulations. Indicates carrier shift. Price: \(\$ 29.50\).

Type 145
AUDIO OSCILLATOR

\title{
Saboratory MEASUREMENTS 9 Standard
cORPORATION
}

\section*{TELEVISION} STANDARD SIGNAL GENERATOR MODEL 90

This signal generator was designed ta meet the mast exacting standards required far high defnitian televisian use.

\section*{CARRIER FREQUENCY:}

RANGE: Continuously variable from 20 to 250 megacycles, in eight ranges. ACCURACY: Crystal frequency standard permits setting ta \(.01 \%\). Dial scale may be set ta \(0.1 \%\).
STABILITY: Warm-up drift less than \(.05 \%\).
LEAKAGE: Less than 10 microvolts.

\section*{MODULATION:}

Continuously variable from zero to \(100 \%\)
ENVELOPE: Sinusaidal, or composite television. Bandwidth to 3 db is 4 Mc . Rise time from \(10 \%\) to \(90 \%\) modulation 0.15 microsecond. Overshoot less than \(5 \%\). Slope less than \(5 \%\) on 60 cycle square wave. INPUT IMPEDANCE: 75 ohms \(\pm 10 \%\) (RMA Standard)
INPUT LEVEL: 1.5 volis peak ta peak minimum level for \(100 \%\) modulation. Black negative palarity.
MODULATION PERCENTAGE: Zero ta \(110 \%\); plate modulatian.

\section*{OUTPUT:}

LEVEL: Cantinuously variable from 0.3 microvalt to 0.1 volt balanced to graund (measured at 100\% modulation level).
IMPEDANCE: (a) 107 ohms line to line (balanced).
(b) 53.5 ahms line to ground (unbalanced).
(c) Suitable pads may be employed to alter these impedances.

\section*{DIMENSIONS:}

OVERALL: Height—58 \(3 / 4^{\prime \prime}\); Width—281/4"; Depth—251/2". WEIGHT: Model 90-302 paunds

External Voltage Regulator: 92 pounds.
POWER SUPPLY: 117 volts, 60 cycles. 700 watts.

LEAKAGE AND STRAY FIELD: Less than 1 microvolt from 80 kilocycles to 50 megacycles.
POWER SUPPLY: 117 volts, \(50-60\) cycles. 75 watts. DIMENSIONS: \(15^{\prime \prime}\) high \(\times 19^{\prime \prime}\) wide \(\times 113 / 4{ }^{\prime \prime}\) deep overall. WEIGHT: 50 pounds.

\section*{STANDARD SIGNAL GENERATOR MODEL 82}

FREQUENCY RANGE: 20 cycles to 200 kilocycles in four ranges. 80 kilocycles to 50 megacycles in seven ranges, plus one blank range.

FREQUENCY CALIBRATION: Each range is individually calibrated. 20 cycles to 200 kilocycles, accurate to \(\pm 5 \%\). 80 kilocycles to 50 megacycles, accurate to \(\pm 1 \%\).
OUTPUT VOLTAGE AND IMPEDANCE: \(0-50\) volts across 7500 ohms from 20 cycles to 200 kilocycles. (The output voltage and impedance in this range can be reduced by an external attenuator). 0.1 microvalt to 1 volt across 50 ohms over most of the range from 80 kilocycles to 50 megacycles.
MODULATION: Continuously variable \(0-50 \%\) from 20 cycles to 20 kilocycles from internal variable oscillatar.
HARMONIC OUTPUT: Less than \(1 \%\) from 20 cycles to 20 kilocycles; \(3 \%\) or less from 20 kilocycles to 50 megacycles.

\section*{Saboratory \(\uparrow\) Standanda CORPORATION}

\section*{STANDARD SIGNAL GENERATOR MODEL 65-B}

FREQUENCY RANGE: 75 kilocycles to 30 megacycles in 6 push button ranges.
FREQUENCY CALIBRATION: The frequency dial is direct reading and individually hand calibrated for each range. It is accurate to \(\pm 0.5 \%\).
OUTPUT VOLTAGE: Continuously variable from 0.1 micro. volt to 2.2 volts.
OUTPUT IMPEDANCE: 5 ohms to 0.2 volt, rising to 15 ohms at 2.2 volts.
MODULATION: Continuously variable from O to \(100 \%\). Modulation depth is indicated directly by a meter on the panel. Modulation moy be obtained either from an internal source of 400 or 1000 cycles or from an external source.
ENVELOPE DISTORTION: Less than \(4 \%\) at \(100 \%\) modulation at 1 megacycle.
LEAKAGE: Less than 0.1 microvalt leakage with attenuator

POWER SUPPLY: 117 valts, \(50-60\) cyeles. 115 watts. DIMENSIONS: \(11^{\prime \prime}\) high \(\times 20^{\prime \prime}\) lang \(\times 10 \frac{1}{4^{\prime \prime}}\) deep, overall. WEIGHT: Approximately 55 pounds.
set for 0 output.

\section*{STANDARD SIGNAL GENERATOR MODEL 80}

FREQUENCY RANGE: 2 to 400 megacycles in 6 bands, individually calibrated direct reading dial.
FREQUENCY ACCURACY: \(\pm 0.5 \%\).
OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.
OUTPUT IMPEDANCE: 50 ohms.
MODULATION: Amplitude modulation is continuously variable from 0 to \(30 \%\). Modulation depth is indicated by a meter on the panel. An internal 400 or 1000 cycle audio oscillator is provided. Modulation may also be applied from an external source. Pulse modulation may be applied to the oscillator from an external source through a special connestor.
LEAKAGE AND STRAY FIELD: Attenuator leakage less than 0.1 microvolt. Power line leakage less than 0.5 microvolt. Stray fields less than two microvolts.
POWER SUPPLY: 117 volts, 50 to 60 cycles. 70 watts.

MODEL M-275 I.F. CONVERTER
CARRIER FREQUENCIES: 4.5, \(10.7,21.7 \mathrm{Mc}\).
OUTPUT VOLTAGE: 10 microvalts to 1.0 v . when used with Model 78-FN.
BAND WIDTHS: \(5 \%\) down, \(\pm 250 \mathrm{Kc}\). from center frequency.

DIMENSIONS: \(103 /^{\prime \prime}\) high \(\times 19^{\prime \prime}\) wide \(\times 9 \frac{1}{2}{ }^{\prime \prime}\) deep, overall. WEIGHT: Approximately 45 pounds.
ACCESSORIES: (Order with instrument) Recommended - 80-ZH4 Cable; 80-ZH3 Pad. Available-80-ZH1 Pad; 84-22-1 Cable; 84-2.2-2 Cable; 84-22-3 Cable; UG-201/U Adapter.

\section*{FM STANDARD SIGNAL GENERATOR MODEL 78-FM}

FREQUENCY RANGE: 86 to 108 megacycles, individually calibrated dials. Accurate to \(\pm 0.5 \%\).
OUTPUT VOLTAGE: 1 to 100,000 mierovolts.
LEAKAGE: Less than 1 microvolt.
MODULATION: Deviation continuously variable from 0 to 300 kc . l.ndicated on directly calibrated dial. 400 cycle internal audio oscillator. Can be modulated from an external source providing 6 volts across 5000 ohms. FIDELITY: Flat within two db from DC to 15,000 cycles. Distortion is less than \(1 \%\) at 75 kilocycles deviation. Transient response is excellent. POWER SUPPLY: 117 volts, 50 to 60 cycles. 36 watts.
DIMENSIONS: \(10^{\prime \prime}\) high \(\times 13^{\prime \prime}\) wide \(\times 7^{\prime \prime}\) deep, overall.
WEIGHT: Approximately 20 pounds.
This instrument is designed to be used with the Model 78 -FM Standard Signal Generator to provide output frequencies in the I.F. range.

AMPLITUDE MODULATION: Provision for external AM up to approximately \(80 \%\), combined with, or exclusive of, FM. There is negligible spurious \(F M\) due to \(A M\). The envelope distortion is less than \(10 \%\) at \(80 \%\) modulation.

\title{
Waboratouy \(\mp\) Starnalarale MEASUREMENTS CORPORATION
}

\section*{STANDARD SIGNAL GENERATOR}

\section*{MODEL 84}

FREQUENCY RANGE: 300 to 1000 mega cycles, individually calibrated direct read. ing dial.

FREQUENCY ACCURACY: \(\pm 0.5 \%\).
OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.

OUTPUT IMPEDANCE: 50 ohms.
AMPLITUDE MODULATION: Continuously variable from 0 to \(30 \%\) indicated directly on panel meter. Internal sine-wave oscillator; choice of 400,1000 , or 2500 cycles is provided. External modulation up to 30 kilocycles may be applied.

POWER SUPPLY: 117 volts, 60 cycles. 230 watts (with regulator) DIMENSIONS: \(12^{\prime \prime}\) high \(\times 26^{\prime \prime}\) wide \(\times 10^{\prime \prime}\) deep, overall. WEIGHT: Approximately 135 pounds, including external line voltage regulator.
ACCESSORIES: Included with each instrument are four connecting cables, external voltage regulator.

R. F. MODULATOR: 5 volts maximum carrier input. Translation gain is approximately unity-Output impedance is 600 ohms.
POWER SUPPLY: 117 volts, \(50-60\) cycles. 100 watts.
DIMENSIONS: \(7^{\prime \prime}\) high \(\times 15^{\prime \prime}\) wide \(\times 71 / 2^{\prime \prime}\) deep, overall.
WEIGHT: Approximately 20 pounds.

\section*{SQUARE WAVE GENERATOR}

\section*{MODEL 71}

Recommended for television testing and many different applications in developing AM, FM and TV equipment where square-wave analysis is of great importance.

FREQUENCY RANGE: 6 to 100,000 cycles
WAVE SHAPE: Rise time less than 0.2 microseconds with negligible overshoot.

OUTPUT VOLTAGE: Step aftenuator giving 75, 50, 25, \(15,10,5\) peak volts fixed and 0 to 2.5 volts continuously variable.

SYNCHRONIZING OUTPUT: 25 volts peak.

\section*{PULSE GENERATOR MODEL 79-B}

This instrument is specially adapted for plate pulsing of the Model 80 Standard Signal Generator.

FREQUENCY RANGE: 60 to 100,000 cycles.
PULSE WIDTH: Continuously variable from 0.5 to 40 microseconds.
OUTPUT VOLTAGE: Approximately 150 volts positive with respect to ground. "SYNC" OUTPUT: 75 volts positive with respect to ground. Displaced by \(1 / 2\) period from pulse output.
"SYNC" INPUT: May be synchronized with as little as 2 volts peak from an external source.
POWER SUPPLY: 117 volts, \(50-60\) sycles. 115 watts.
DIMENSIONS: \(10^{\prime \prime}\) high \(\times 135 / 8^{\prime \prime}\) wide \(\times 101 / 2^{\prime \prime}\) deep, overall.
WEIGHT: Approximately 31 pounds.

\section*{Saboratory \(\uparrow\) Stindarda MEASUREMENTS CORPORATION}

\author{
U.H.F. RADIO NOISE and FIELD STRENGTH METER MODEL 58
}

This versatile, portable instrument is useful in measuring signal-lo-noise ratios, noise levels and for field strength surveys on television and FM transmitters.

FREQUENCY RANGE: 15 to 150 megacycles in five bands -dial directly calibrated in megacycles.
INPUT VOLTAGE RANGE: 1 to 100,000 microvolts across 72 ohm balanced line. 1 to 100 microvolts on semi-logarithmic output meter, balanced resistance attenuator with ratios of 10,100 and 1000 ahead of all tubes.

GAIN STANDARDIZATION: Internal "shot noise" diode provides calibration standard. Special dial eliminates need for charts.
CIRCUIT: Superheterodyne circuit with tuned RF amplifier eliminates image response.
BAND WIDTH: 150 kilocycles @ 2 X down.

POWER SUPPLY: Built-in regulated dual power supply for operation from either 117 volts \(A C\) or 6 volts \(D C .70\) watts (on \(A C\) ).
STANDARD EQUIPMENT: Power cables, 15 foot antemna cable, 9 inch loop antenna, carrying strap, and complete instruction book.
DIMENSIONS: \(16^{\prime \prime}\) wide \(\times 9^{\prime \prime}\) high \(\times 11^{\prime \prime}\) deep, overall.
NET WEIGHT: 35 pounds.

\section*{A VERSATILE "GRID-DIP" METER MEGACYCLE METER - MODEL 59}

Widely used by engineers, servicemen and amateurs in television, FM, taxi radio, aircraft radio and other electronic work. An ideal low sensitivity receiver for signal tracing.

FREQUENCY: 2.2 Mc. to 400 Mc ; seven plug-in coils.
Hand calibrated dial, accurate to \(\pm 2 \%\).
MODULATION: CW or 120 cycles; or external.
DIMENSIONS: Power Unit, \(51 / 8^{\prime \prime}\) wide; \(61 / 8^{\prime \prime}\) high; \(71 / 2^{\prime \prime}\)
deep. Oscillator unit, \(33 / 4^{\prime \prime}\) diameter; \(2^{\prime \prime}\) deep.
POWER SUPPLY: 117 volts, \(50-60\) cycles; 20 watts.

\section*{VACUUM TUBE VOLTMETER - MODEL 62}

A general-purpose zero current voltmeter for the rapid, accurate measurement of \(A C\) or \(D C\) voltages. No zero adjust necessary when changing ranges.

RANGE: Push button selection of 5 ranges- \(1,3,10,30\) and 100 volts full scale AC or DC.
ACCURACY: \(\pm 2 \%\) of full scale on each range, both \(D C\) and sine-wove AC.
INDICATION: Linear for DC and calibrated to indicate RMS values of a sine-wave or \(71 \%\) of the peak value of a complex wave on AC. FREQUENCY ERROR: Less than \(10 \%\) from 30 cycles to over 150 megacycles. Resonant frequency of the probe with input terminals shorted is 350 megacycles.
INPUT IMPEDANCE: The input capacitance is approximately 7 mm . The input resistance is a function of frequency.

PEAK VOLTMETER MODEL 67

True peak values of complex wave forms encountered in radio and allied electronic work may be measured accurately with the Model 67. It indicates the true peak-to-peak value of symmetrical and asymmetrical waveforms varying from low frequency

POWER SUPPLY: 117 volts AC, 50 to 60 cycles.
DIMENSIONS: \(43 / 4^{\prime \prime}\) wide \(x\) \(6^{\prime \prime}\) high \(\times 81 / 2^{\prime \prime}\) deep overall.
WEIGHT: Approximately 8 pounds.

\title{
PREHISIUOM TEST YQUIPMENT standird of hecuricy
}

\section*{All prices are subject to change withaut nofice}

\section*{Series E-400 \\ Wide Range Sweep Signal Generator Narrow and Wide Band Sweep Direat Reading from 2 to 480 Megacycles}

Incorporating selected and true ultra-high frequency components and circuits. Series E-400 has been Application Engineered specifically for modern F.M. and TV. oscillographic alignment methods.
Stressing utmost simplicity of operation, flexibility, stability and aecuracy, Series E-400 affords an unparalleled standard of performance and value.
Through careful, intensive development, "Precision" engineers have "designed out" costly, extraneous elements that migh lead to undue early obsolescence. As a result, Series E-400 is a fundamental requirement for the efficient TV.-F.M. Service Laboratory.

\section*{FEATURES}
* Direct Frequency Reading - 2 to 480 MC in 7 bands without skip. Harmonically calibrated from 240 to 480 MC .
* 6 Position Hotary Band Switch covers complete spectrum. Last position provides pure crystal oscillator only. No coil switching. Multiple oscillator B supply switch assures maximum frequency accuracy and stability.
* 61/2" Etched Aluminum Tuning Dial - Engine turned finish.
* 1500 Point Vernier Scale permits close calibration and simple resetting of odd frequencies.
* Engraved Transparent Lucite Frequency Indicator affords readings free from parallax.
* Voltage Regulated Oscillators free of power supply variations.
* The Basic Circuit and Tube Complement - Uses 2 separate 6 C 4 high frequency beat oscillators plus a 656 reactancemodulated high frequency oscillator. This positively minimizes generation of unwanted extraneous signals. Also employs a 6] 6 mixer-buffer, a 6 C 4 multiple crystal oscillator and a 616 final marker-mixer amplifier. 6X5 full wave rectifier. VR-105 voltage regulator.
* Selected, True High Frequency Circuit Components render high operating efficiency, stability and accuracy. Uses ceramic and air dielectric trimmer, coupling, by-pass and loading capacitors; rugged ceramic-lucite suspended National SLF tuning condenser; modern miniature HF tubes; mica-filled low-loss sockets; shock mounted reactance modulator \({ }_{i}\) multi-section copper-plate shielding; etc.
* Nerrow and Wide Band Sweep - 0 to 1 MC and 0 to 10 MC continuously adjustable. Permits easy band width setting for both F.M. and TV. requirements.
* Dual Continuous R.F. Attenuators triple shielded. Smooth, steplessi, effective control from extra high output for single stage alignment to minimum levels for multi-stage adjustments.
* Wide Range Phasing Control for Hor. sweep of oscilloscope.
* Multiple Crystal Marker-Calibrator built-in. Simultaneously accommodates 4 crystals individually rotary selected. \(.01 \%\) accuracy 10.7 MC and 2 MC crystals furnished as standard equipment. Crystal signal separately attenuated for internal
or external use.
* Crystal Calibrated and Control - Each instrument calibrated against crystal standards. The 2 MC crystal, as furnished, provides for crystal monitoring in addition to use as calibrator for external signal generators.
* Terminated RG/U Coaxial Output Cable for efficient signal transmission with minimum standing wave effects. LOW-HIGH taps plus open line switch for extra high as well as normal outpul signal level requirements.
* 8 Eloment Double Section Balanced Line Filter plus Thorough Multi-Section Copper Plate Shielding of instrument assures minimum leakage and radiation.
* Simultaneuos A.M. and F.M. test facilities for anti-A.M. check of F.M. second detector circuits. A.M. input jacks also permit use as an H.F. A.M. Generator.

\section*{Series ES-500 \\ High Sensilivity, Wite Range, \(5^{\prime \prime}\) Ostillostope Verical Amplifer Range to 7 Megacycle Sensifivity 20 millivolis per linch}

Series ES-500 affords the ultimate in performance, visibility and oper ational flexibility at moderate cost "Precision" engineers have incorporated every necessary basic feature which they have found to be required to meet the needs of the rapidly advancing art of electronics, A.M., F.M., and TV.

The combination of Series ES-500 and Series E-400 Sweep Signal Generator truly represents an Application Engineered BASIC TELEVISION and F.M. SERVICE LABORATORY.

\section*{FEATURES}

High Sensitivity, Extended Range, Voltage Regulated, Vertical Amplifier - \(20 \mathrm{MV}(.02 \mathrm{~V})\) per inch deflection sensitivity. 10 cycies to 1 MC response. 2 megohms input resistance. Approx. 22 mmfd. input capacity
Frequency Compensated Vertical Input Step Attenuator X1, X10, X100 plus continous variable gain control in cathode follower input stage.
20 Millivolt Vertical Sensitivity - particularly desirable for diversified TV., F.M. and A.M. circuit analyses, especially when aligning low gain single stages and performing tests involving low output analytical devices.
* Extended Range Horizontal Amplifier - 500 MV (. 5 V ) per inch deflection sensitivity adequate for most all " H " drive purposes. 10 cycles to 1 MC response at full gain. \(1 / 2\) megohm inpu resistance. Approx. 20 mmfd. input capacity.
Linear Multi-Vibrator Sweep Circuit - 10 cycles to 30 KC plus
- Amplitude Controlled.

Amplitude Controlled, 3-Way Synch. Selection -
Internal-External-Line.
* "Z"' Axis Modulation input facility for blanking, timing, etc. Sweep Phasing Control for sinusoidal line sweep usage. Wide
Direct \(H\) and \(V\) Plat
* Direct \(\mathbf{H}\) and V Plate Connections and Audio Monitoring phone
pin jacks behind rear cover plate. No screws to remove.
* High Intensity CR Patterns through use of adequate high voltage power supply with 2 X 2 rectifier.
* The Circuit and Tube Complement - 6J5 Vertical input cathode follower. 6AK5 first "V" amplifier. 7AD7 second "V" amplifier and CR driver. 7W7 Horizontal amplifier-CR driver. 6SN7 Multi vibrator internal linear sweep oscillator. 5 Y3 low voltage rectifier. 2 X 2 high potential rectifier. VR-150 vertical amplifier voltage regulator. 5CPI/A CR Tube.
8 Four-Way Lab. Type Input Terminals - Take banana plugs, phone tips, bare wire or spade lugs.
* Light Shield and Mask removable and rotatable.
* Extra Heavy-Duty Construction and components to assure "Precision" performance.
* Heavy Gauge, Etched-Anodized, No-Glare, Aluminum Panel.
* Fully Licensed under patents of W. E. and A. T. \& T. Co's
* Series ES-500 (illustrated) - In louvred, black ripple, heavy gauge steel case. Size \(81 / 4^{\prime \prime} \times 141 / 2^{\prime \prime} \times 18^{\prime \prime}\). Complete with light shield, calibrating mask and instruction manual.
Code: Quick
NET PRICE \(\$ 149.50\)

\footnotetext{
* External Deviation input facility for sweep frequencies other than internal source.
* Fuse Protected at panel extractor iuse post
* Heavy Gauge, Etched-Anodized Aluminum Panel.
* Fully Licensed under W. E., A. T. \& T. and Remco patents.
* Series E.400 (illustrated)-In Louvred, portable, copper plated case. Size \(101 / 2^{\prime \prime} \times 12^{\prime \prime} \times 6^{\prime \prime}\). Complete with test cables, 2 crystals and elaborate Technical Manual. Code: Nancy. NET PRICE \$124.70
* E-400-PM - Consists of E-400 on \(121 / 4^{\prime \prime} \times 19^{\prime \prime}\) steel panel for standard rack mount. Complete as above. Code: Niece.

NET PRICE \(\$ 127.55\)
}

\section*{Precision Series EV-10 vTVM - Megohmmeter with 7". Full-View Meter \\ Plus standard 1000 Ohms per Volf Functions. Ranges to 6000 Volis • 2000 Megs. • 12 Amps. • +70 DB.}

A WIDE-RANGE ZERO-CENTER ELECTRONIC INSTRUMENT, stressing the utmos in performance, accuracy, and ease of manipulation. Series EV-10 permits rapid check of voltage, current, and resistance conditions encountered in modern A.M. F.M., and TV. Networks, without materially disturbing circuit under analysis.

\section*{IMPORTANT FEATURES}
* VOLTAGE REGULATED - BRIDGE TYPE CIRCUIT: direct reading TVM, with practical freedom from tube and line voltage variations
* ZERO-CENTER VTVM - Indicates both magnitude and polarity without reversal of test prods..
* MASTER RANGE SELECTOR
* SHIELDED COAXIAL TEST PROBES.
* DUO - BALANCED ELECTRONIC BRIDGE OHMMETER - Provides unusually high accuracy.
* TELEPHONE CABLED, plastic insulated, nook-up wire
* 7"' RECTANGULAR METER

400 microcimpere, \(\pm 2 \%\).
* \(1 \%\) wire and metallized resistors.

\section*{RANGE SPECIFICATIONS}
* Eight Zero-Center VTVM Ranges \(\pm 3, \pm 6, \pm 12, \pm 60, \pm 300, \pm 600\), \(\pm 3, \pm 6, \pm 12, \pm 60, ~ \pm 300\)

Input Resistance-
Constant \(131 / 3\) megs. to 600 volts. \(262 / 3\) megohms at 1200 volts. \(1331 / 3\) megohms at 6000 volts.
* Six Circuit Probing, Zero-Center V.T.V.M. Ranges \(\pm 3,6,12,60,300,600\) volts D.C

Six Ohmmeter-Megohmmeter Ranges: (selt-contained)

0-2-20-200-2000 megohms
* Eight A.C.-D.C. and Output Volt age Ranges at 1000 ohms per volt 0-3-6-12-60-300-600-1200-6000 v.
* Seven D.C. Current Ranges
\(0-600\) microamperes.
0-3-12-60-300-1200 MA. 0-12 amps
* VTVM Ranges to 60,000 volts, for Television and similar high voltage, low current applications, are available via use of the Series TV Test Probe described on pageF-15.

\section*{Precision Series E-200-C signal Generator}

A Modern Mulfi-Band Signal Generator for A.M., F.M., and Television Alignment.

Featuring "Servicing by Signal Substitution." The Dynamic Speed Approach to Receiver Alignment and Adjustment Problems.

\section*{SPECIFICATIONS}

FREQUENCY COVERAGE: 88 KC . to 120 MC . 30 MC . on fundamental. - \(61 /{ }^{\prime \prime}\) Dial direct reading in 8 bands to 120 MC . No charts required.
* ACCURACY - CONSTANCY OF CALIBRATION: \(1 \%\) accuracy on all bands. Uses "PRECISION" developed "UNIT-OSCILLATOR" construction,
* 0-1000 POINT VERNIER SCALE, direct reading to one part in 1000.
* THE CIRCUIT-single-ended 6SI7 in stable E.C.O. circuit-modulated by a 6 C 5 sine-wave audio oscillator. 5 Y 3 Full wave rectifier.
* 400 CYCLE SINE-WAVE AUDIO OSCILLATOR - over 50 volts output.
* DUAL R.F. ATTENUATORS - smooth stepless control of R.F. signal.
* SHIELDING - Compartment shielding of vital components - Power trans former electrostatically shielded-A.C. line is R.F. filtered.
* SHIELDED COAXIAL OUTPUT CABLE and (LO-HI) cable connectors.
* FOUR TYPES OF SIGNALS - "Unmod. R.F.", " 400 cycle Mod. R.F." 'EXTERNALLY Mod. R.F.", "400 cycle Audio Output."
* DIRECT READING VARIABLE MODULATION - \(0-100 \%\) - triples signal utility as against obsolete fixed modulation of only 30 or \(40 \%\)
* DIRECT READING A.V.C. SUBSTITUTION SYSTEM - Overcomes alignmen troubles arising from receiver A.V.C. Supplies ITS OWN A.V.C. VOLTAGE
* HAND CALIBRATED - Each instrument is INDIVIDUALLY calibrated.
* FULLY LICENSED under patents of A. T. \& T. and W. E. Co's.
* Not only an efficient Signal Generator for purposes of alignment but also SPECIFICALLY DESIGNED for "Servicing by Signal Substitution."
* IDEAL MARKER GENERATOR - Exceptional stability and high accuracy renders Series E-200-C an excellent variable frequency Marker Generator for renders with the Series E-400 or similar high quality Sweep Signal Generator.

* Series E-200-C - (illustrated) In black ripple finished portable steel case. Size \(101 / 2 \times 12 \times 6^{\prime \prime}\) Complete with tubes, output cable and FREE copy of "Servicing by Signal Substitution." Code: Trade.

NET PRICE \(\$ 67.25\)
* E-200-C-PM-Consists of Series E-200-C on steel panel size 121/4×19', for standard rack mount.
Code: Trace. NET PRICE S69.70

\footnotetext{
"SERVICING BY SIGNAL SUBSTITUTION" 11 th Edition . . . The modern ECONOMCAL solution to your daily serrice problems. Nothing complex to learn, no extraneous equipment to purchase . A systematic method of DYNAMIC SIGNAL ANALYSIS based entirely on fundamentals. Fully described in a bound illustrated text "Servieins by Signal Substitution." This highly valuable bot is supplied with Series E-2
}

\section*{CIRCUIT TESTING FEATURES}

A complete, wide-range, high speed, pushbutton operated, super-sensitive test set without any additional panel controls.

\section*{Self-contained.}
* S:x D.C. Voltage Ranges: 20,000 ohms per volt. * Sx A.C. Voltage Ranges: 1000 ohms per volt
* Six Output Ranges at 1000 ohms per volt. 0-6-12-60-300-1200-6000 volts.
* Ranges to 60,000 Volts D.C. via use of Series TV Super high voltage test probe. Not inclucied with 10-54. See Page F-15.
* Seven D.C. Current Ranges:

0-60-120 microamperes.
0-1.2-12-120-1200 MA. and 0-12 amperes.
* Four Self-Contained Resistance Ranges:
* Six Decibel Ranges from - 20 to +70 DB.
* Automatic Push-Button range selection.
* \(1 \%\) Wirewound and Metallized Resistors.

\section*{Series 10-54 Electromamic Test Master \\ Combination Tube Performance Tester, Battery Tester, and 35 Rainge, Push-Buthon Operated, Supersensitive, A.C.-D.C. Set Tester. Ranges to 6000 Voits, 60 Microamps, 12 amps, \(+70 \mathrm{DB}, 60\) Meg. 20,000 Ohms per Voit D.C. \(\mathbf{- 1 0 0 0}\) Ohms per Volt A.C.}

Electronamic (Reg. U. S. Patent Office)
More than fust Mutual Conductance: (Technical details in main catalog) Series \(10-54\) affords to the discriminating instrument purchaser, THE COMPLETE PORTABLE SERVICE LABORATORY; engineered to meet the expanding needs of modern radio electronics. Provides every necessary facility for high speed, reliable tube and circuit testing associated with Industrial Electronics, Communications, Radio (A.M.F.M.), Television, Laboratory, etc. . . .

\section*{TUBE AND BATTERY TESTING FEATURES}
* A TUBE "PERFORMANCE" TESTER: "Precision" ELECTRONAMIC circuit, effectively tests all tubes over a complete "Path of Operation" not just at ple arbitrary operating point or for just one inconclusive characteristic.
- TESTS ALL MODERN TUBE TYPES: Noval 9 pin, 7 pin Acorn, dual capped H.F. tubes, Single-Ended TV, and F.M. amplifiers, low power transmitting tubes, sub-miniature types, etc. including direct facilities up to twelve element prongs!
* ABSOLUTE FREE-POINT LEVER ELEMENT SELECTION: Highest possible, practical order of obsolescence insurance. Locates every tube element regardless of base position.
* ABSOLUTE FREE-POINT, INTERELEMENT SHORT-CHECK and Visible Filament Continuity System.
* DUAL SHORT-CHECK SENSITIVITY: Permits special application tube selection.
* INDIVIDUAL TUBE SECTION TESTS of multi-section tubes.
* A.M. and F.M. CATHODE RAY TUNING INDICATORS directly tested.
* FILAMENT VOLTAGES \(3 / 4\) to 117 V.
* BALLAST UNIT TESTS.
* NOISE and CONDENSER TESTS.
* MICRO-LINE ADIUSTMENT via continuously variable line voliage control.
* PILOT AND SIGNAL LIGHT TESTS.
* ACCURACY of test circuits closely maintained by use of individual, in ternal calibrating controls
* ROLLER TUBE CHART: BUILT-IN
* EXTRACTOR FUSE POST.
* Test circuits completely transformerisolated from power line.
* TELEPHONE-TYPE, CABLED, plasticinsulated, moisture-resistant wire.
* \(45 / 8^{\prime \prime}\) FULL VISION METER: 50 microampere, \(2 \%\) accuracy.
* TESTS RADIO A, B and C DRY BAT TERIES via a "PRECISION" engineered circuit which performance neered circuit which periormance load conditions. Battery quality read directly on a 3 -color scale.

10-54-P (illustrated above) Hardwood, tapered, portable case, \(133 / 4^{\prime \prime} \times 171 / 4^{\prime \prime} \times 6^{3} / 4^{\prime \prime}\). With ohmmeter batteries and high voltage test leads.
Code: Habit
NET PRICE \(\$ 134.40\)

\section*{Series 10-12 Electronamic Tabe Master \\ Truly Free-Point Tube and Battery Performance Tester.}
electronamic (Reg. U. S. Patent Offlce)
More than just Mutual Conductance: (Technical details in main catalog)
The 10-00 Series of TUBE and TEST MASTERS represent the culmination of many years development of tube testing equipment to meet the exacting needs of the rapidly advancing field of electronics.

Incorporating the "PRECISION" ELECTRONAMIC Tube Performance Testing Circuit, plus an advanced, "PRECISION" developed, multiple element, master lever selector system, it truly can be said that the MASTER 10-00 Series offers, to the discriminating equipment purchaser, the highest possible practical order of test results and anti-obsolescence insurance.

\section*{TUBE AND BATTERY TESTING FEATURES}

The Series 10-12 Electronamic Tube Master incorporates the same time-proven circuit and exacting performance details described for the Series 10-54, above, under the heading: "Tuke and Battery Testing Features."
* 16-12-P (see 10-54-P illustration and description above) In hardwood, tapered, pertable case with tool compartment. Code: Facil.
Complete: NET PRICE \(\$ 96.10\)
* 10-12-C (illustrated at right) In modern, chrome-trimmed, round edged counter cabinet. Fine dull black ripple finish on heavy gauge steel. Size \(17^{\prime \prime} \times 177 / 8^{\prime \prime} \times 7{ }^{1 / 2 "}\) sloping to \(3^{\prime \prime}\) at front. Code: Faith. Complete: NET PRICE \(\$ 99.40\)
* 10-12-PM (illustrated at right) Consists of \(10-12 \mathrm{chas}-\) sis, mounted onto standard size steel panel, \(1712^{\prime \prime} \times 19^{\prime \prime}\) with dust cover. Fine, dull black ripple finish. Code: Favor.
Complete: NET PRICE \(\$ 99.40\)

10-12-C

10-12-PM

All prices are subject to change without notice

* 10-20-P (illustrated above) In hardwood, portable case with tool compartment. Size \(133 / 4 \times 17)_{4} \times 633 / 4\). Complete with ohmmeter batteries and test leads. Code: Daily.

Complete: NET PRICE \(\$ 119.80\)
* 10-20-C (see 10-12-C illustration and description, page F-13) In standard panel mount limished, steel counter cabinet. Code: Dance.
* 10-20-PM (see 10-12-PM illustration and description, page F-13) In standard pan
mount with dust cover. Code: Dandy.

Complete: NET PRICE \$123.10

\section*{Series 10-20 Electronamic Test Master Combination Master Electronamic Tube Performance Tester, Battery Tester and 34 Range A.C.D.C. PusheBution Operated Circuit Tester. 1000 Ohms per Volt A.C. and D.C.}

ELECTRONAMIC (Reg. U. S. F'atent Office)
More than just Mutual Conductance: (Technical details in main catalog)
A. complete, rugged service laboratory incorporating the time-proven "PRECISION" ELECTRONAMIC Tube Performance Tester, combined with full standard 1000 ohms per volt A.C. and D.C. Multi-Range features: PLUS a complete radio A, B and C Battery Tester.

Ideally suited and particularly engineered for thorough general purpose radio-electronic maintenance, service and installation.

\section*{TUBE AND BATTERY TESTING FEATURES}

The Series 10-20 TEST-MASTER provides the identical tube and battery performance testing features as outlined for the Series \(10-54\) on page 5 .

\section*{CIRCUIT TESTING FEATURES}

Wide-range, high speed, push-button operated set testing functions provide ranges to: 3000 volts, 600 microamperes, 12 amperes, 10 megohms, +70 DB . ALL SELF-CONTAINED.
- SIX A.C. - D.C. - OUTPUT VOLTAGE RANGES at 1000 ohms per volt. 0-6-12-60-300-1200-3000 volts.
* SIX D.C. CURRENT RANGES: 0-600 microamperes.
0-6-60-300-1200 MA. and 0-12 amps.
* FOUR SELF-CONTAINED RESISTANCE RANGES:

0-1000-100,000 ohms: 0-1-10 megs.
* SIX DB RANGES from -20 to +64 DB .
* \(45 / 8^{\prime \prime}\) WIDE VISION METER * \(1 \%\) WIREWOUND

AND METALLIZED RESISTORS.
* ONLY 2 TIP IACKS
serve all standard ranges
* AUTOMATIC INTERLOCKING

PUSH-BUTTON RANGE SELECTION.
* ALL CIRCUITS ISOLATED

FROM POWER LINE

Series 10-15 Electronamic Tube Master Ultra-Modern, De luxe Tube and Battery Merchandiser with large 9" meter.

\section*{Series 10-22 Electroinamic Test: Master De Luxe Tube-Battery Merchandiser and Circuir Tester with large \(9{ }^{\circ \prime}\) Meter. 1000 ohms per volt A.C. and D.C.}

\section*{ELECTRONAMIO (Reg. U. S. P'atent Office)}

10.15
* 10-15 Tube and Battery Merchandiser. (Illustrated) Heavy gauge steel cabinet in fine, dull black ripple, with chrome trim and reflector. Size \(24^{\prime \prime}\) high, \(171 / 2^{\prime \prime}\) wide, base depth \(10^{\prime \prime}\) tapering to \(4^{\prime \prime}\) at top. Code: Gable. Complete: NET PRICE \(\$ 132.65\)

\section*{Moxe than just Mutual Conductance:}
(Technical details in main catalog)
* Incorporates the Electronamic tube performance and battery testing circuit, described for Series 10-54 on page F-13.
* Designed particularly for equipment-conscious, progressive radio service-sales organizations, and tube-selling sections of department stores.
* PROMOTE CUSTOMER CONFIDENCE and tube sales via this impressive "Precision" Tube Merchandiser.
* DIRECT READING non-confusing tube performance indications in large, easy reading terms of Replace-Weak-Good
ILLUMINATED by built-in large chromium reflector.
10-15-PM (see 10-22-PM illustration at right) On heavy gauge steel panel with dust cover. Ponel \(223 / 4\) "x \(\times 19^{\prime \prime}\) for standard rack mount. Fine dull black ripple finish.
Code: Gavot.
Complete: NET PRICE \(\$ 127.50\)

The Series 10-22 De Luxe Electronamic Service Laboratory is electrically identical to the Series 10-20 above.
* Incorporates every sales promotional advantage of the Semotionalad antage of the ries complete 34 range A.C.D.C. complete 34 range A. Multon operated, Multi-push-button ope
* Tube and Service Facilities are emphasized with this modern, impressive "Precision" engineered instrument.
* Ideal for behind-the-counter installation, also ideal for insertion into the center of tube stock-display shelving.

10-22 Combination Tube and Battery Merchandiser plus A.C.-D.C. Multi-Range Set A.C.-D.C. Multi-Range Set Tester. In same cabinet illustrated for the model \(10-15\) (at left). Complete with test leads and ohmmeter batteries. Code: Gauge
Complete: NET PRICE \(\$ 155.15\)

\(10-22-\mathrm{PM}\)
* 10-22.PM (illustrated) On heavy gauge steel panel with dust cover. Panel 223/4"x19" for standard rack mount. Fine, dull black ripple finish. Code: Gamut. Complete: NET PRICE \(\$ 150.00\)

All prices are subject to cnange without notice

> Series 858 High Sensifivity MIIIth-Master Dual-Range Sensitivity
> high Speed, A.C.-D.C. Multi-RongeTest Set. 54 Runges to 6,000 Volts; 60 Microamperes, 12 Amps, 600 Megs. +700 BB.
> 20,000 and 1,000 Ohms per Volt D.C. 1,000 Ohms per Voli A.C.

Series 858 MULTI-MASTER features a "Precision" designed, positive action Push-Button Range and Function selection system, afford ing the ultimate in operational efficiency.
Designed for reliable measurements in modern T.V., F.M. A.M. and other critical electronic circuits where only minute current drain of the measuring instrument can be tolerated
The dual-range sensitivity feature provides the equivalent of another instrument at standard 1000 ohms per volt sensitivity, in conformance with many point to point voltage readings listed by receiver service manuals.
When employed in conjunction with the Series TV super-high voltage test probe (described below), direct reading facilities to 60,000 volts are provided.

\section*{SPECIFICATIONS}
* EIGHT DC. VOLTAGE RANGES
both 20,000 and 1000 ohms per volt.
* EIGHT A.C. and OUTPUT VOLTAGE RANGES at 1000 ohms per volt. 0-3-6-12-60-300-600-1200-6000 volts.
* EIGHT D.C. CURRENT RANGES: \(0-60-120\) microamperes.
\(0-1.2-12-120-600 \mathrm{MA}\). \(0-1.2-12 \mathrm{cmps}\).
* SIX RESISTANCE RANGES:
self-contained to 60 megohms. 0-6000-60,000-600,000 ohms. 0-6-60-600 megohms.
* EIGHT DB RANGES: -26 to +70 DB .
* Two Pin Jacks for all standard ranges.
* \(45 / 8^{\prime \prime} 50\) microamp. meter. \(\pm 2 \%\).
* \(1 \%\) Wire and Metallized Resistors.
* Safety Jacks for 6000 volt ranges.
* HIGHEST GRADE MATERIALS and plastic insulated wiring employed.
* ETCHED AND ANODIZED, heavy gauge aluminum panels: resistant to gauge aluminum pare and wear.
- 858-L In modern bakelite case (as illustrated for Series 847-L below) Complete with ohmmeter batteries and high voltage test leads. Code: Jetty. NET PRICE \(\$ 47.94\)

\section*{Series TV Super High Voltage SAFETY TEST PROBES* Valtage Ranges to 60,000 Volts D.C. With standard V.T.V.M. or high sensifivity V-0-M}
*Patent Applied For.
"Precision" engineering solves the high voltage TV. test problem with utmost safety to the operator. Series TV. has been custom designed for YOUR safety FIRST. Cartridge style high voltage tubular multiplier permits use of a single "TV." probe with most popular high sensitivity test sets and V.T.V.M.'s. (See reverse side of "Precision" price sheet for defails.)
The brief features below reveal that Series TV. has been specifically engineered as a true High Voltage Testing Device.
* Custom Molded Polystyrene Head, heavy duty bakelite handle and barrier, specially machined internal lucite components, all spell out "HIGH VOLTAGE ENGINEERED."
* High Dielectric Anti-Leakage Paths and wide, multi-channelled guard-barrier reiterate "HIGH VOLTAGE ENGINEERED."
* Internal and External Protective Grounding - Full handle length grounded internal flash-over-shield. Erternal, grounded arc-back barrier. HIGH VOLTAGE ENGINEERED!
* Heavy Duty Shielded Connecting Cable for connection to test instrument.
* Ceramic, Helical Film-Type, Cartridge Multiplier manufactured specifically for VERY HIGH VOLTAGE APPLICATION. Removed and changed without tools!
* Positive Grounds and HV Connections via high compression contact springs.
* Series TVP-Test Probe less multiplier cartridge, with instructions. Code: Ebony. NET PRICE S12.35
* Series TV-1 (illustrated) with cartridge for "Precision" Series EV-10 VTVM. Code: Elegy.

NET PRICE \(\$ 15.45\)
* Series TV-2 with cartridge for "Precision" (or any) 20000 ohms/V. test set with 6000 V. range. Code: Every.

NET PRICE \(\$ 15.45\)
* TVM - Cartridge Multipliers only for Series TV. See reverse side of "Precision" price sheet.

\section*{Series 866 de luxe Milti-Master} Panel-Mounted, A.C.-D.C. Tést Set, \(\mathbf{9 " \prime}^{\prime \prime}\) Meter and Remote-Conitrol Selector Unit: 5000 and 1000 Ohms per Volt D.C. 1000 Ohms per Volt A.C.

A laboratory type, high sensitivity test set indispensable to the well equipped, modern test laboratory and electronics classroom.
The extra-large 9 " meter and remote-control selector unit afford unparalloled operational efficiency with meximum physical meter protection via panel mounting above the work level.
RANGE SPECIFICATIONS OF SERIES 865 are similar to those described for Series 858 above. 5000 and 1000 ohms/V.D.C. 54 ranges to 6000 volts, 300 microamperes. 12 amperes, 200 megohms, +70 DB.
* 866 (illustrated) In standard panel mount size \(19^{\prime \prime} \times 121 / 4^{\prime \prime}\) with dust cover. Complete with high voltare test leads and ohmmeter batteries. Code: Novel. NET PRICE \(\$ 71.65\)

\section*{Seriess 847 Dual Sensinivity Milli-Master 5000 and 1000 Ohms per Valf}

Physically similar to Series 858 at top of page, the Series 847 is a moderate sensitivity, wide range test set specifically prescribed for applications wherever ruggedness is of greater import than extremely high sensitivity. Range specifications are identical to the Series 866 above.

* MICRO-LINE ADJUSTMENT.

\section*{Series 612 Cathode Conductance Tube Tester}

A Modern, Free Point, Lever Operated Tube and Batfery Tester.

The new " 600 " Series brings to the field of modern electronic tube checking the highest practical order of obsolescence insurance with utmost simplicity of operation, AT MODERATE COST. This has been achieved with full conformity to the well-known "Precision" standards of quality, workmanship, and performance.
The " 600 " tube testing parameters are based upon the well-established, time-proven emission testing principles as have been recommended by both tube manufacturers and R.M.A. The " 600 " line affords advanced design features and performance which render it incomparable amongst instruments in its category and price range.

\section*{TUBE AND BATTERY TESTING FEATURES} \\ GOMBNATION TUBE, BATTERY AND SET TEGTERS
}
* NOISE and CONDENSER TEST pin jacks. * Pilot Light Test Socket.
* DYNAMIC "UNDER-LOAD" TEST for all popular radio \(A, B\), and \(C\) dry batteries.
* Built-in, brass geared roll chart.
* Anodized, deep-etched, heavy gauge aluminum panel, resistant to wear.
* Panel-mounted Fuse Extractor Post.
* Telephone type cabled, piastic-insulated, moisture resistant hook-up wire.
* Each instrument individually calibrated and sealed.

STANDARD SENSITIVITY - Ranges to 3,000 V.,
12 Amperes, 10 Megohmsr +64 DB.

654-P

\section*{CIRCUIT TESTING FEATURES}
* 5 D.C. Voltage Ranges: 20,000 ohms per volt. - 5 A.C. and Output Voltage Ranges:

1000 ohms per volt
0-12-60-300-1200-6000 volts.
Ranges to 60,000 Volts D.C. via use of Series TV. Super high voltage test probe.
Not included with 654. See page F-15.
* 6 D.C. Current Ranges: 0-120 microamperes. 0-1.2-12-120 MA. 0-1.2-12 Amperes.
- 3 Wide Resistance Ranges
\(0-6000-600,000\) ohms. \(0-60\) Megs.
O-6000-600,000 ohms. 0-6
Self-contained batteries.
* Fully Rotary Selective Ranges and Functions.
* Only 2 Pin Iacks for all standard ranges.
* Recessed 6,000 V. safety pin jacks.
* 50 microampere, \(45 / 8^{\prime \prime}\) Wide-Angle meter. * \(1 \%\) Wirewound and film-type resistors. * All circuits isolated from power line.
- SERIES 654 is an economical, compact High Sensitivity Service Laboratory designed to meet the specific needs of modern electronics service and maintenance, A.M., F.M., and TV.

Series 654 incorporates the identical tube and battery testing features of the Series 612 above, PLUS a complete wide range, high sensitivity A.C.-D.C. circuit tester.

614
* SERIES 620 is identical to the Series 654, at left, except for the lower D.C. multi-range meter sensitivity and related range differences as indicated above.

Provides every essential feature for general purpose test and check of modern radio and electronic equipment.
Series 620 is the logical choice as a highly rugged, reliable "Precision" quality instrument at moderate cost.
The Series 654 and 620 are available in the same four model types as described for the Series 612 above.

\section*{BROWNING FM-AM TUNER — MODEL RJ-20}

Designed for high-fidelity receiving application in the AM broadcast and FM bands.

\section*{ELECTRICAL FEATURES}
- For FM- 88 to 108 MC , and AM-530 to 1650 KC . Armstrong FM circuit.
- 20 db quieting with \(61 / 2\) microvolts on \(F M ; 5\) microvolts sensitivity on AM.
- Separate RF and IF on both bands; no coil switching.
- Variable bandwidth AM IF gives full 9 KC band on broad and 4 KC on narrow position.
- FM audio response flat from 15 to 15,000 cycles \(\pm 3 \mathrm{db}\).
- 20,000-ohm output impedance; 300 or 72 ohms input for FM provided.
- Tubes: five 6AU6; one 7F8; two 6AL5; one 12AU7; one 6SK7; one 6SA7: one 6SG7; one 6AL7 tuning eye; one 5Y3 rectifier.

\section*{BROWNING FM-AM TUNER — MODEL RJ-12A}

Engineered for high-fidelity reception in the FM band. The AM section provides high sensitivity and selectivity as well as quality reception in the broadcas! band.

\section*{ELECTRICAL fEATURES}
- For the FM band- 88 to 108 MC and broadcast band- 530 to 1650 KC
- Less than 10 microvolts needed to produce 20 db noise reduction in the FM band; sensitivity of 5 microvolts in the AM broadcast band.
- Separate RF and IF systems on both bands; no coil switching.
- Drift compensated.
- FM audio response flat from 20 cycles to 15000 cycles within \(\pm 11 / 2 \mathrm{db}\).
- AM audio response flat from 20 to 6600 cycles \(\pm 3 \mathrm{db}\); IF's triple tuned.
- Miniature tubes used as FM RF and IF amplifiers assure maximum gain.
- FM uses 2 -stage cascade limiting circuit to insure maximum noise rejection.
- High-impedance output for connection any high-quality audio amplifier.
- Phono position on channel selector switch to provide volume control directly on the tuner; phono input connection in back of tuner.
- FM-AM on one antenna with 300 ohms input with twin lead cables.
- Power supply, optional, requires 250 volts d-c at 65 MA and 6.3 volts a-c at 4 amperes.
- Major Ârmstrong's circuit on EM.
- 6AL7 tuning eye for accurate tuning on both FM and AM
- Operates on 115 volts, 60 cycles. 80 volt-amperes input when used with Browning model PF-12 power supply.
- Tubes: three 6AU6; one 7F8; one 6SK7; one 6SG7; two 6SJ7; one 6H6; one 6SA7; one 6AL7 tuning eye; one 1N34 crystal detector.

\section*{BROWNING FM TUNER — MODEL RV-IO}

Designed for high-fidelity reception in the new high-frequency FM band.

\section*{ELECTRICAL FEATURES}
- Receives signals in the FM band extending from 88 to 108 megacycles.
- Less than 10 microvolts needed to produce complete limiting
- Newly developed miniature tubes used for RF section and IF amplifier.
- Two-stage cascade limiter used to ensure freedom from noise.
- Tuned RF stage used to increase gain and reduce image interference.
- High impedance output to feed any highfidelity amplifier.
- PHONO-FM switch permits instant transfer of input signals.
- Power supply self contained.
- Employs Armstrong FM circuit.
- Tuning eye indicates correct tuning
- 115 volt, 60 cycle \(A C\) operation. 65 voltamperes input.
- Tube complement: three Type 6AU6, one 7F8, two 6SJ7, one 6H6
- Tuning eye indicator (6AL7). Type 5Y3 rectifier tube.

\section*{MECHANICAL FEATURES}
- Physically small. Can be easily mounted in cabinets, shelves, bookcases, drawers, in cabinets, sh
and the like.
- Dial escutcheon, knobs, shielded interconnecting wire and connectors supplied connecting wire and connectors supplied
- Attractive edgeli
- Attractive edgelighted dial calibrated in
- megacycles and channel numbers.
- Rugged construction, all components of the highest quality.
- Also available with standard rack panel

WINCHESTER, MASS., U.S.A

\section*{BROWNING OSCILLOSYNCHROSCOPE — MODEL OL-I5B}

\section*{MECHANICAL FEATURES}
- Steel cabinet finished in black wrinkle with \(1 / 8^{\prime \prime}\) aluminum
- panel.
- Panel finished in black leatherette with all labels engraved directly on panel.
- Copper-plated steel chassis with lacquer finish.
- Controls grouped according to function for convenience of operation.
- Components arranged for electrical efficiency and ease of servicing.
- Dimension: Height \(153 / 4^{\prime \prime}\), Width \(123 / 4^{\prime \prime}\), Depth \(193 / 4^{\prime \prime}\).
- Weight: 95 lbs . Shipping weight: 150 lbs .

A laboratory instrument designed for the observation of wave forms and transient phenomena requiring a variety of time bases, triggers, phasing and delay circuits, and extended range amplifiers. It may be used for work on laboratory applications where extremely short pulses or phenomena of irregular occurence rate must be studied. It is also designed for television, communication, radar, and facsimile work. The special features are combined with the functions of a standard oscilloscope with greater ease and convenience of operation as a result of improved design.

\section*{ELECTRICAL FEATURES}
- Five-inch 5 JPl cathode-ray tube with 4000 V acceleratim potential for improved intensity and definition of images
- Sawtooth sweep with range of 5 cycles per second to 500 kilocycles per second permitting observation of radio frequon arr wave forms.
- Single sweep triggered time base for observation of transient phenomena or phenomena of varying repetition rates
- Internal trigger generator and built-in phasing circuit for use with single sweep time base
- Extended range amplifiers. The vertical amplifier is flat within 3 db from 10 cycles per second to 6 megacycles per second. 3 db. from 10 cycles per second within 1 db . from 5 cycles The horizontal amphiner 1 megacyele per second. Maximum vertical deflection sensitivity is .05 R.M.S. volts per inch.
- The response curve of the vertical amplifier which is linear and without positive slope from 10 cycles to 4 megacycles has transient response such that a 100 kilocycle square wave with rates of rise and fall in the order of 500 volts per microsecond is faithfully reproduced.
- Low-capacitance, high-impendance probe for use with vertical amplifier. Voltage attenuation of probe is \(10: 1\).
- Provisions for direct connection to all deflection plates.
- Internal or external blanking of beam for timing purposes and for elimination of retrace.
- Voltage regulation of all low-level stages for stability of operation under varying line voltage conditions.
- Built-in voltmeter and calibrating circuit for determining deflection sensitivity at any setting of the gain controls.
- Tube complement: three 6C4, one 6AC7, one 6AG5, five 6AG7, two, 807 , five 6SN7 two 6SI7, three 6SH7, three 6V6GT, one 884, two 2X2A, one 5R4GY, one 6X5GT, one VR-105.

Net Price \(\$ 1275.00\) F.O.B. Winchester, Mass.

\section*{BROWMING SWEEP CALIBRATOR — MODEL GL-22}

Designed for use with oscilloscopes and synchroscopes as a source of timing markers for the measurement of sweep intervals.

\section*{ELECTRICAL FEATURES}
- Provides markers of \(0.1,0.5,1.0,10,100\) microseconds either positive or negative with variable amplitude to 50 volts.
- Generates variable width, variable amplitude gate for blanking or timing purposes.
- Contains own trigger generator with positive and negative trigger outputs.
- Markers may be initiated from external trigger or from internal generator. May be synchronized with triggers up to 100 KC . repetition rate
- Voltage regulaton to timing circuits.
- 115 volt, 50 cycle operation. 110 volt-amperes input
- Tube complement: one Type 6BE6, one 2D21, one 6J6, oine 6 V6GT, two 6SN7, one 5Y3GT, one VR-105, one 6AL5, one 6AQ5, one 6X5GT.

Net Price \(\$ 290.00\) F.O.B. Winchester, Mass.

\section*{MECHANICAL FEATURES}
- Provided with steel cabinet finished in black wrinkle.
- Panel finished in black leatherette with labels enoraved into surface.
- All output connections on front panel
- Insulated universal binding posts used for output connections.
- Dimensions: Height \(7^{\prime \prime}\), Width \(14^{\prime \prime}\), Depth \(8^{\prime \prime}\)
- Weight: 20 lbs . Shipping weight: 28 lbs .

\section*{BROWNING LABDRATORIES, INC.}

WINCHESTER, MASS., U.S.A.

- Rack panel in black wrinkle steel cabinet, \(9^{\prime \prime} \times 20^{\prime \prime}\)
- Panel black leatherette finish with engraved characters.
- Input tube shock mounted for low microphonics
- Weight \(301 / 2 \mathrm{lbs}\). Shipping weight 45 lbs.

\section*{BROWNING MODEL TAA-16 AMPLIFIER}

High gain audio amplifier feeding AC voltmeter for measurement of standing wave ratios with slotted lines. Many other similar uses.

\section*{electrical features}
- 500- to 5000 -cycle range with broadband or selective controls on front panel.
- 15 -microvolt sensitivity in broadband position and 10 microvolts in selective position.
- Meter scales 0-10 and standing-wave voltage ratio.
- Panel switch for bolometer voltage application.
- Master gain control switch provides attenuation factors of 1,10 and 100.
- Power supply electronically regulated for stability.
- 60 volt-amperes input at 115 volts 60 cycles.
- Tubes: three 6SI7GT; one VR-105; two 6V6GT; one 6H6GT; one 5Y3GT rectifier.

NET PRICE COMPLETE WITH TUBES (FOB Winchester, Mass.) \(\$ 390.00\)

BROWNING MODEL TVN-T POWER SUPPLY AND SQUARE-WAVE MODULATOR

The basic unit of a signal generator in the super-high-frequency range. Square-wave modulator for low-powered velocity-modulated tubes such as the \(417 \AA, 2 \mathrm{~K} 28\) and 2 K 25 .

\section*{ELECTRICAL FEATURES}
- Range of cathode voltage is 28 to 480 volts, continuously variable. Provision is made for 180 to 300 volt range
- Range of reflector voltage is 15 to 150 volts controllable from panel
- Provision is made for grid pulse modulation or reflector pulse modulation Amplitude of grid pulse is 60 volts while the reflector pulse voltage is 100 volts of grid p
- Square-wave modulation frequency is variable from 600 to 2500 cycles
- Mrovisions are made for external modulation
- ll0-115-volts, 60 -cycle operation with 170 volt-amperes input.

Tubes: one type 5Y3; two OD3/VR150; one 6SN7; one 6V6; one 6A3; one 5R4GY; one 6SJ7.

MECHANICAL FEATURES
- Designed for rack mounting; cabinet furnished at extra cost.
- Black wrinkle, engraved-steel panel
- \(83 / 4^{\prime \prime}\) x \(19^{\prime \prime} \times 11^{\prime \prime}\); Weight 33 lbs. Shipping weight
\(50^{\text {lbs. }}\)

\section*{BROWNING MODEL P-4-E CATHODE RAY SYHCHROSCOPE}

Designed for viewing recurrent phenomenon where the duration of the phenomenon is short with respect to the intervals of occurrence.

\section*{electrical features}
- Five-inch cathode-ray tube.
- Triggers generated from internal oscillator at repetition rates of \(500,1000,2000\), and 4000 p.p.s. or from external oscillator.
- Sweeps available at approximately \(1 / 2,5,10\) and 25 microseconds per inch internally synchronized: can be externaliy triggered.
- Internal source of calibration voltage of \(1 / 2\) microsecond period for sweeps.
- Return trace blanked out internally.
- Low-gain, broad-band video amplifier preceded by 954 detector.
- Tubes: two \(2 \mathrm{X} 2 / 879\); one 523 ; one 954; one 6AC7; one 6AG7; six 6SN7GT; two 6SL7GT; one 6SK7GT; one 7V7; one 5LPI

MECHANICAL FEATURES
- \(83 / 4^{\prime \prime}\) x \(141 / 4^{\prime \prime} \times 20^{\prime \prime}\) steel cabinet, black wrinkled.
- Labels engraved in panel surface.
- Ruled screen for cathode-ray tube face.
- Weight: 45 lbs . Shipping weight 55 lbs .

NET PRICE \(\$ 440.00\) F.O.B. Winchester, Mass.

\section*{BROWNING CAPACITANCE RELAY MODEL DD. 20}

Detects and translates small capacitance changes into action.

\section*{ELECTRICAL FEATURES}
- Operates relay circuit on changes in capacitance of 0.25 mmfd .
- Indicates capacitance changes as small as .005 mmfl .
- Indicates mechanical movements as small as . 00001 inches.
- Relay operation provides closed circuit, open circuit, or 115 volts \(\alpha / \mathrm{c}\) at 10 amperes.
- Electronically regulated power supply for maximum stability
- Operation frequencies variable from 50 to 150 kilocycles.
- 105-I25 volt, 60 cycle operation. 80 volt-amperes input.
- Tubes: three 6V6GT; one 6SA7; three 6SJ7; one 6H6; one 6N7; one
VR-90; one 80.

NET PRICE \(\$ 225.00\) F.O.B. Winchester, Mass.
-83/4" rack panel, mounted in black wrinkle steel cabinet
Aluminum panel finished in black leatherette.
- All labels engraved into panel surface.
- Antennae or capacitance leads enter rear of chassis.

\title{
BROWNING LABORATORIES, INC.
}

WINCHESTER, MASS., J.S.A.

\section*{BROWNING WWV STANDARD FREQUENGY CALIBRATOR — MODEL RH-10}

Specifically designed for receiving transmissions from radio station WWV on either 5 or 10 megacycles and employing these as primary frequency standards. Provisions are made so that secondary standards which are in subharmonic relation with WWV transmissions may be accurately compared. Filters are employed so that the 440 or 4000 cycle modulation may also be used as primary standards.

\section*{ELECTRICAL fEATURES}
- Pre-tuned for 5 and 10 megacycles per second reception of radio station WWV. Either frequency may be selected by switch. On special order, pre-tuned frequencies of 2.5 and 5 , or 10 and 15 megacycles per second may be substituted.
- Sensitivity better than \(1 / 2\) microvolt on any band. Antenna input impedance is high to permit use of single wire antenna. Tuned doublet may be used if desired.
- Selectivity 10 db down at 5. KC off resonance.
- Excellent image rejection minimizes interference. Rejection ratio is more than 50 db .
- Front panel provisions are made for coupling secondary standard or other RF sources and comparing their fundamentals or harmonics with WWV transmission.
- Cathode ray audio indicator permits comparison between RF source and WWV transmission within \(1 / 10\) cycle per second using zero beat method.
- A dual filter system allows the selection at will of either the 440 or 4000 cycle modulation of WWV. Either may be employed as a primary frequency standard. Output voltage adjustable from 0 to 5 . volts.
- Voltage supplied to stable local oscillator is regulated to reduce to a minimum frequency drift.
- Panel speaker has a separate control which allows the output to be varied at will.
- 100-125 volts AC operation. 85 volt-amperes input
- Tube complement: one Type 6S17, three 6SK7, one 6SA7, one 6SN7, one 6I5, one 6SQ7, one OD3/VR-150, one 5Y3, one 6U5. Net Price \(\$ 250.00\) F.O.B. Winchester, Mass.

\section*{MECHANICAL FEATURES}
- Either rack panel with dust cover or steel cabinet Aluminum panel is finished in black leatherette with engraved abels.
- Large fluted knobs are provided.
- Panel connectors are standard universal binding posts which will also accommodate banana-type plugs.
- Dimensions: Cabinet Mounting-Height \(9^{\prime \prime}\), Width \(19^{\prime \prime}\), Depth Dimensions: Mabinet Mouning-H3/4', Width' \(19^{\prime \prime}\), Depth' \(101 / 2^{\prime \prime}\).
- Weight: Cabinet Mounting 30 lbs.., Shipping Weight 45 lbs . Rack Mounting 25 lbs., Shipping Weight 40 lbs.

\section*{BROWNING frequency meters}

Browning frequency meters are precision-built instruments designed to check frequencies in various ranges from 100 kilocycles to 500 megacycles. Custom-built and hand-calibrated, each of the meters listed below is equipped with a 100 KC CRYSTAL USED AS SECONDARY STANDARD WHICH IS EASILY COMPARED WITH WWV RADIATIONS ALLOWING EVERY FREQUENCY METER TO BE CHECKED IN THE FIELD. Some of the outstanding electrical features are:

MODEL S-7

\section*{MODEL S-4}
- From 1 to 5 specified frequencies on \(1.5-70 \mathrm{mc}\). sange.
- Accuracy \(\pm .0025 \%\) of the specified frequency.
- Stable electron-coupled oscillator used in special circuit.
- Visual detection of zero beal with cathode-ray indicator.
- 110-115-volt ac/dc operation with 40 volt-amperes input
- Telescoping antenna on side of case
- Tubes: one 6SC7; one 6SA7; one 6I5; one 6SK7; one 6U5; one \(25 Z 6\) and one VR90 voltage regulator.

\section*{MODEL S-6}
- Range: 100 kilocycles to 100 megacycles, in 5 bands.
- Range: 100 kilocycies \(0.025 \%\) of the frequency measured.
- Harmonic amplifiers permit use of harmonics up to 50 mc .
- Visual and audio detection of zero beat.
- Visual and audio detection of zero beat.
- Telescoping antenna on side of case
- Telescoping antenna on side case. one VR90.

MODEL S-7
- Calibrated for One or Two frequencies in 72-76 and/or 152-162 me. bands.
- Accuracy \(.005 \%\) of the specified frequency
- Deviation chart supplied for instant determination of deviation from assigned frequency.
- Cathode-ray indicator for accurate setting of ECO calibration.
- 105-115-volt ac/dc operation with 40 voit-amperes input.
- Telescoping antennae on side of case.
- Tubes: one 6SL7; one 6SA7; one 6J5; one 6SK7; one 25Z6; one VR-90; and one 6U5 tuning indicator.

\section*{MECHANICAL FEATURES OF ALL MODELS}
- Rugged steel cabinet with \(1 / 8^{\prime \prime}\) aluminum panel.
- Machined main dial graduated in 100 divisions over 180 de. grees. Vernier allows reading of \(1 / 10\) of dial division.
- Panel finished in black leatherette.
- All labels engraved in panel surface
- Dimensions: \(131 / 2^{\prime \prime}\) high, \(75 / 8^{\prime \prime}\) wide, \(67 / 8^{\prime \prime}\) deep.
- Weight: 15 lbs . Shipping weight \(181 / 2 \mathrm{lbs}\).

\section*{BROWNING FREQUENCY METER - MODEL S-5}

Designed for checking the frequencies of police, fire department, railroad, marine and other special-service transmitters operating between 30 and 500 megacycles.

Prices Net (Complete with tubes) F.O.B. Winchester, Mass. 1 Band. \(\$ 340.00 \quad 2\) Bands . \(\$ 380.00 \quad 3\) Bands . \(\$ 420.00\)

\section*{ELECTRICAL FEATURES}
- Custom-built and hand-calibrated for one, two, of three frequencies between 30 and 500 megacycles. - Accuracy: \(0025 \%\) of the specified frequency - Deviation chart supplied for determination of deviation from assigned frequency. - 100 KC crysial in temperature regulated oven is used as secondary standard with long time frequency stability. Temperature compensated electron-coupled oscillator uses precision splitstator variable condsaner with no moving contacts. - Voltage regulated suppiy for cycle AC crystal and eltrmperes input. Telescoping antenna for cysy coupling to transmitter. - Tube complement: one Type 6C4, two easy coupling to transmitter. - Tube complemen
9001 , two 6SJ7, thiee 6J5, one 5 Y 3 GT , one VR-90.

\section*{MECHANICAL FEATURES}
- Rugged steel cabinet and \(1 / 8^{\prime \prime}\) steel panel. - Electron-coupled oscillator built on \(3 / 16^{\prime \prime}\) aluminum sub-chassis. "Worm drive to tuning condenser with dual indicators provides 5000 dial divisions for tuning range. • Panel finished in black leatherette. - Labels engraved into panel surface. - Standard rack panel used. Unit may be incorporated in a rack with other equipment if desired. "Dimensions: Height \(83 / 4^{\prime \prime}\). Width \(19^{\prime \prime}\) Depth \(\mathrm{g}^{\prime \prime}\). - Weight: 35 lbs . Shipping weight: 50 lbs .

Model 630

\section*{MODEL 630 VOLT-OHM-MIL-AMMETER}

A Beautiful, streamlined Tester that is simple to operate. Only one switch-selects both circuit and range. A really new selector switch, completely enclosed and protected. Eliminates loss between contacts. Retains contact alignment permanently. Molded construction keeps dirt out. Unit construction-resistors, shunts, rectifiers, batteries-all housed in a molded base integral with the switch. All resistors are Precision Film or Wirc-wound types-sealed for permanent accuracy, each in separate molded compartment. Large \(51 / 2^{\prime \prime}\) meter (RED • DOT Lifetime Guaranteed), black and red scale markings. Batteries easily replaced-double-spring tension grip assures permanent contact. Precalibrated rectifier. Molded black case, 3 叒" \(X\) \(51 / 2^{\prime \prime} \times 71 / 2^{\prime \prime}\), with removable leather strap handle. Black molded panel with white markings.

\section*{MIRROR SCALE VOLT-OHM-MIL-AMMETER}

Widest range tester of its type with additional brand new features: Long \(5^{\prime \prime}\) mirror scale for better reading accuracy; Resistance ranges to 40 Megohm ; Low Ohm Range 0-2000 ( 12 ohme center scale); D. C. Volt ranges with dual sensitivity ( \(10,000 / 20,000 \mathrm{Ohm} / \mathrm{Volt}\) ) provide double the number of full scale readings of average testers. A. C. Volt ranges at 10,000 Ohm/Volt permit checking many audio and high impedance A. C. circuits where a vacuum tube voltmeter usually is required. Low voltage ranges permit direct measurement of many bias and output voltages. Special lilm type resistors provide greater stability on all ranges.
\(6^{\prime \prime}\) RED - DOT Lifetime guaranteed meter. Long mirror scale guarantees greater reading accuracy. Insulated, black molded case with removable strap handle, \(21 / 2^{\prime \prime} \times 51 / 2^{\prime \prime} \times 6^{\prime \prime}\). Molded black panel with white markings. Leads and instructions furnished.

Weight: Approx. 3 lbs .

\section*{POCKET-SIZE VOLT-OHM-MILLIAMMETER}

Model \(\mathbf{6 6 6 - H H}\)

A precision-manufactured marvel of compactness that provides a complete miniature laboratory for D. C. and A. C. voltage, Direct Current and Resistance analyses. Its many ranges, attractive appearance and other unique features provide an answer to the Volt-Ohm-Milliammeter requirements of radio service-men and amateurs, industrial engineers, laboratory technicians, etc. Refinements in design feature:

Greater scalc readability on the \(3^{\prime \prime}\) RED - DOT Lifetime guaranteed instrument with black and red scale markings.

Simplified switching provides greater case in changing ranges.

Lower jack contact resistance and troublefree plug-in connections by use of banana-type jacks. Banana jacks at top of panel reduce possibility of connecting leads over panel controls or meter scales.

Greater stability on voltage ranges by use of special resistors throughout and on current ranges by use of 250 M . V. instrument.

ALL PRICES ARE SUbjECT TO CHANGE - ALL MODELS SUBJECT TO REVISION

\section*{Radio RIPLET Testers}

\section*{TUBE TESTER}

CONCLUSIVE tube tests for value, inter-element shorts and leakage. FULLY-BALANCED, MULTI-PURPOSE CIRCUIT; with accurately calibrated values for all makes of tubes-more than an emission test in the special switching flexibility

AN APPLIANCE CHECK lead permits "short" and "continuity" test of motors, leads, resistance elements, etc. NEON SHORT TEST shows slightest inter-element short or leakage while cathodes are hot. NEW 3-POSITION LEVER SWITCHES give individual control for each tube element. (See center panel.)

TUBES TESTED-All receiving types, gaseous rectifiers, resistor and ballast tube continuity, and pilot lamps. SOCKETS: 4 , 5 and 6 prong; 7 prong large and small with combination for pilot lights and flashlight bulbs; 8 prong octal; 8 prong loctal; 5 prong bantam; 7 prong miniature ; 7 prong subminiature; and 9 prong. Only one socket used for each tube base type eliminating possibility Only one socket used for each tube

LINE VOLTAGE INDICATOR permits observation and adjustment for line fluctuations. FILAMENT VOLTAGES (Full justment for line fluctuations. FILAMENT VOLTAGES (Ful Lifetime guarantee, has 3-color GOOD-?-BAD scale. Brightly illuminated SPEED ROLL TUBE CHART located with markings below switches for convenience in testing. New tubes can be calibrated without manufacturers' data.

\section*{HIGH VOLTAGE PROBES}

For measuring the high voltage employed in television receivers and in other applications, external probes are available for ranges from 10,000 to 30,000 D. C. Volts for Models \(625-\mathrm{NA}, 630,666-\mathrm{HH}\) 2405-A and 2451. Specify Tester Model when requesting quotations or ordering.

The completely insulated Polystyrene test probe contains the voltage dropping resistors, high stability composition type, protected from moisture with a sealed-in covering of Silicone high voltage insulating compound. An additional safe-guard is the guard-type handle. Each lead consists of a 48 -inch high voltage wire with probe at one end and banana plug on the tester end. Probe is \(113 / 4{ }^{\prime \prime}\) long.

\section*{PORTABLE V-O-MA SHUNTS}

Portable, external shunts as high as 120 Amps. are available to extend the current ranges of testers including Models 625-NA, \(630,666-\mathrm{HH}, 2405-\mathrm{A}\) and 3480 . Shunt must be ordered for the specific tester with which it is to be used because of spacing and millivolt drop. Plug-in type connections are made by plugging shunt into the tester MA terminals. Connections for Portable shunts are made by using \(12^{\prime \prime}\) leads. Quotations upon request.

TO EXTEND OHMMETER RANGE MODEL 666-HH
A plug-in ohmmeter multiplier for Model \(666-\mathrm{HH}\). Compact tubular insulator with resistor, battery and plug. Will extend Model \(666-\mathrm{HH}\) Ohmmeter range to 4 megohms.

\section*{APPLIANCE TESTERS}

Radio appter Testers
}

\section*{TEST OSCILLATOR}

A wide-range oscillator with uniformly illuminated dial. Seven long scales with widely separated divisions easily read, have five fundamental ranges- 165 KC to 40 MC, and two harmonic ranges directly calibrated 36 to 120 MC .

Unique new feature is the brightly illuminated dial providing distinct illumination of scale markings without the least possibility of glare. Lighting also provides an "ON-OFF"' indicator.

The dial is big ( \(330^{\circ}\) ) with seven scales quickly readable at a glance. It has 10 to 1 ratio vernier tuning for ease of adjustment.

RANGE SELECTOR - 5 position follow-up coil switching with complete shielding.
R. F. SELECTOR - Provides High and Low R. F. Output.

OUTPUT ATTENUATOR - Provides fine control of R. F. Output to Coaxial output cable connector

CIRCUIT SELECTOR - Provides for internally modulated signal (Variable 0 to \(100 \%\) at 400 cycles). Variable amplitude of external modulation 40 to 15,000 cycles, unmodulated signal or variable audio 0-10 Volts at 400 cycle.

DOUBLE SHIELDING-All R. F. and audio circuits are double shielded with copper plated steel shields.

Metal case, \(1512_{2}^{\prime \prime} \times 11^{3}{ }^{\frac{1}{3}} \times 61_{4}^{\prime \prime}\), with tan enamel finish. Has leather strap handle for ease in carrying. Power : 115 volt, \(50-60\) cycle A. C. (electrostatic shielded transformer).

Weight: \(141 / 2\) lbs.
MODEL 3432............ S. A. DEALER NET \(\$ 69.50\)
'A.M.-F.M. SIGNAL GENERATOR

FM-AM Signal Generator with frequency coverage from 100 KC to 120 MC in 10 bands: plus additional 50 MC from fixed oscillator giving fundamental coverage continuously variable to 170 MC .

OUTPUT - 1 volt on low ranges from 100 KC to 20 MC and approximately 250,000 Microvolts on the high ranges.
SWEEP WIDTH VARIABLE IN THREE RANGES \(60 \mathrm{KC}(+30 \mathrm{KC}) \quad 300 \mathrm{KC}(+150 \mathrm{KC}) \quad 600 \mathrm{KC}(+300 \mathrm{KC})\)

Other outstanding engineering features include: (1)-Deviation control of a fixed frequency reactance modulated oscillator. (2)-Output Meter for measuring relative R. F. output of generator. (3)-Double copper plated steel shielding throughout greatly minimizes R. F. leakage. (4)-Co-axial cable output lead with shielded impedance coupler for direct capacitance or balanced doublet connection. (5)- 110 Volt A. C. line filter prevents leakage through power supply. (6)Ladder attenuator with coarse and fine R. F. output adjustment. (7)-High R. F. Voltage output jack. (8)High A. F. output available. (9)-Built-in provision for crystal oscillator calibration reference. Crystal not supplicd. (10)-Air trimmer capacitor and permeability adjusted oscillator coils. (11)-Voltage regulated power supply for oscillator stability. (12)-Heterodyne Detector for frequency measurement. (13)-External A. M. modulation may be used. (14)-Attractive and easily read dial. (15)-Horizontal synchronized sweep voltage available. (16) -Best available components used throughout.

Metal case, \(15 \frac{13^{\prime \prime}}{} \times 11_{3^{1} 3^{\prime \prime}} \times 81 / 4^{\prime \prime}\), finished in lustrous black suede enamel with red and white panel markings. Power: 115 Volt, \(50-60\) cycle A. C. Weight: 25 lbs .

\section*{RADIO AMATEUR EQUIPMENT MODULATION MONITOR \\ FREQUENCY METER}

With this new MODULATION MONITOR for radio amateur police and Marine radiophone use, you've solved the problem of getting moximum efficiency from your transmitter. Four separate circuits for measuring amplitude modulation: (1) Percent ModulaShift (average). (2) Peak Flash Percent Modulation. (3) Carrier Shift. (4) Audio Output for Headphone. Unique advantages of this new model include the following: Peak Indicator may be preset for any percent of modulation from 20-120, and provides instantaneous flash when predetermined modulation level is reached. Percent modulation meter provides rapid up and slow down swing. Plug into your A. C. line-make simple coupling to the trangmitter output and the monitor is ready for operation. R. F. and A. F. stages are isolated and separated by ample shielding. Tuned input circuit is coupled to \(R\). \(F\). source by a vario-coupler. \(R\). \(F\). power requirements are small
TUNING RANGES : \(1550-2950 \mathrm{KC}\) (PoliceBand) \(14,000-14,400 \mathrm{KC}\) 3500-4000 KC 7000-7300 KC
\(14,000-14,400 \mathrm{KC}\)
\(28,000-30,000 \mathrm{KC}\) Aurlio Frequency 60-10,000 CPS

CASE: Metal, with dark gray "hammered" enamel finish; overall dimensions: \(151 / 2^{\prime \prime} \times 9^{\prime \prime} \times 8^{\prime \prime}\). Weight: 20 bs, Power : 115 Volt, 50-60 cycle A. C

\section*{VU Meter}

\section*{DB METER}

Volume Unit and Decibel Meters are used to measure sound or noise levels in amplifiers for Public Address, Theatres, Broad casting Studios, Broadcasting Static Equipment, etc.
VU meters are used for volume level measurements - including broadcast monitoring. Internal impedance 3900 Ohms. Steady state reference 1 Milliwatt. For 600 Ohm line. \(0-100 \%\) scale also "A" to +3 VU. Specify Type "A" or "B" scale.
MODEL 426 VU. . . . . . . . \(\$ 23.10\)
MODEL 426 (Illuminated) . 25.10
DB Meter permits the oper ator to make instant adjust ments to prevent sound blastng or distortion. Up 6, down 10 DB. Zero DB at 1.73 volt, 500 ohms, 6 milliwatts. Stand ard damping furnished unless highly damped is specified. 426 DB (Dealer Net) \(\$ 15.20\) 321-T, 327-T
13.60

\section*{HIGH RANGE D.C. VOLTMETERS FOR AMATEURS}

Designed particularly for radio amateurs. High range \(3^{\prime \prime}\) D. C Voltmeters- 1000 ohms per volt. Provided with special external metalized multipliers mounted on bakelite strip. Specify this type when ordering, or standard voltmeters will be furnished. Available \(3^{\prime \prime}\) case, Models 321-T, 327-T :
\begin{tabular}{|c|c|c|c|}
\hline Range & Price & Rance & e \\
\hline 0-1000. & \$11.90 & 0-4000. & \$11.90 \\
\hline \(0-2000\). & 11.90 & 0-5000. & 12.80 \\
\hline 0-3000 & 11.90 & & \\
\hline
\end{tabular}

A new band-ewitching, tuned Absorption type Frequency Meter covering five amateur bands. Incorporates the new geramateur bands. Incorporates the new germanian crystal and a D. C. Milliammeter intion on panel-ater sensitivity. Direct calibration on panel-no coils to change: switching permits instantaneous band change. Audio jack is provided for monitoring of phone signals-another new feature. Fully shielded. Calibration is in megacycles in the following bands: 3.5-4 MC: 7-7.3 MC: \(14-14.4 \mathrm{MC}\). 2-21.5 MC; 28-30 MC. Coil is removable and other coils may be substituted for special bands, if desired.

USEFUL FOR CHECKING: (1) Fundamental frequency of oscillating circuits. (2) 'resence, order and amplitude of harmonics (3) For parasitic oscillations. (4) Neutralize tion of R. \(\mathbf{F}\). amplifiers. (5) Standing wave atio on transmission lines. (6) Presence of undesirable or small quantitios of \(R\) (7) Monitoring of phone signals.

A fully shielded unit of compact pocket Attractive gray "hammered" enamel finish with black trim MODEL 3256
U. S. A. DEALER NET \(\$ 16.25\)

\section*{WATTMETERS - ELECTRODYNAMOMETER}

These instruments can be used on single phase A. C. or D. C. as Wattmeters. On special order they can be made up as volt meters or ammeters. Instruments are selfcontained to 300 Volts- 10 Amperes. Over that external connection can be made. For use on frequencies up to 133 cycles per second. Available in three-inch model 361. Case dimensions same as 321-T, except for depth, \(2^{\prime \prime}\) back of the flange ( 2 \}" " over studs). Wattmeters can be combined in the
 Triplett Twin case with a voltmeter or Ammeter. Accuracy within \(\pm 2 \%\). Standard ranges as follows:
\begin{tabular}{|c|c|c|c|c|c|}
\hline & MODE & SINGL & & & \\
\hline Range & Normal & Norma & Sc. & & Net \\
\hline Watts & Voltage & Amps & Div. & & Price \\

\end{tabular}

\section*{SENSITIVE RELAYS}

Highly sensitive Triplett relays are of the D'Arsonval Moving Coil type, carefully designed to give dependable, satisfactory performance. Since relays cover such a wide field and most of them are made to special order, no standard models are listed. Each application should be accompanied with information specifying maximum and minimum currents and voltages which will pass through relay coil and contact points, etc.

\section*{R.F. AMMETERS}

Triplett R. F. Ammeters are the same case size and appearance as corresponding D. C. Models. Internal couples normally furnished at prices shown. If external couples are required, please specify on order, adding \(\$ 370\) net to price of instruments listed below. External couples only (less meter), with 2 ft . leads are \(\$ 4.70 \mathrm{net}\) each.

\title{
Radio Triptery \\ Testers
}

Model 3434
A FEW REASONS YOU'LL WANT MODEL 3434
\(\star\) Continuously variable sweep width from 100 KC to 12 MC .
\(\star\) Main frequency dial marked with channels and frequencies.
* Variable Marker provides continuous tuning over all present TV Video and Sound IFs. Mirrored dial.
\(\star\) Absorption type Marker in addition to pip type.
* Straight-line frequency calibrated dials.

\section*{NEW 5" TV-FM OSCILLOSCOPE TAILORED FOR TELEVISION}

VERTICAL AMPLIFIER
Frequency Range-Flat within \(\pm 20 \%\).
20 Cycles to 1 MC with deflection sensitivity of 1 RMS Volts/Inch 20 Cycles to 100 KC with deflection sensitivity of .02 RMS Volts/Inch HORIZONTAL AMPLIFIER

Frequency Range-Flat within \(\pm 20 \%\) from 20 Cycles to 250 kC .
Deflection sensitivity--. 5 RMS Volts/Inch
INPUT IMPEDANCE-Vertical Amplifier- 2 Megohms in parallel with 25 MMF . Horizontal Amplifier-2 Megohms in parallel with 25 MMF MAXIMUM INPUT POTENTIAL

Vertical Amplifier- 400 Volts max. DC or Peak.
LINEAR TIME BASE- 10 c.p.s. to 60 KC .
INTENSITY MODULATION-Return trace eliminator.
SYNCHRONIZING SIGNAL-. 03 IRMS Volt required.
CALIBRATING METER-Calibrated in Peak-to-Peak Volts: 0-3, 0-10.
PHASE HORIZONTAL SWEEP--Phase controlled Sweep voltage of line frequency, VERTICAL PATTERN-Provides selection of polarity to be observed.
ATTENUATION-Coarse and fine control over Vertical Input. Fine control over Horizontal Input.
SIGNAL TRACING feature provided by Headphone Output. Enables detection of hum modulation, spurious interference, etc.
ESCUTCHEON-Telescoping to provide shaded Cathode Ray Tube. Large 5" Cathode Ray Tube.
SHIELDING-Copper plated steel construction throughout. Cathode Ray tube adequately shielded from stray fields.
CASE-Metal, with black suede enamel finish, \(15 \frac{112}{}{ }^{\prime \prime} \times 11\) 多" \(\times 16^{\prime \prime}\). Leather handle. Copper plated feet for improved grounding.
PANEL-Black, red and white characters etched on aluminum.
ACCESSORIES-Co-Axial lead for Vertical Input. Rubber covered leads for
Sync, Horiz. Input and Ground. Heavy braid grounding strap.
POWER-105-115 Volts, 50-60 Cycles, 80 Watts.
WEIGHT-20 lbs.

\section*{A NEW TV-FM SWEEP SIGNAL GENERATOR WITH BUILT-IN MARKERS}

FREQUENCY COVERAGE
Sweep Center Frequency: Range 1- 0-60 MC Range 2-60-120 MC Range 3-120-240 MC Sweep Width: .1-12 MC
(Continuously Variable) Marker Frequency : \(19.5-40 \mathrm{MC}\) (Fundamental) \(39-240 \mathrm{MC}\) (Harmonic) Crystal Frequency: To 20 MC (Fundamental) Can be used to produce Harmonic to 216 MC . (Crystals not furnished.) Modulation: 400 Cycles on both Crystal and Marker frequencies

\section*{Audio: 400 Cycles.}

Model 3434 provides a complete service laboratory for TV-FM servicing and other electronic requirements. No gaps in frequency Continuous tuning over all TV-FM hands Provisions for simultaneous presentation of two Markers. Audio output for quick check on video and sound amplifiers. Ladder type attenuator for coarse and fine output adjust ment. Shielded, Copper plated steel construction throughout. Modulation of Markers to facilitate alignment of traps, etc. Line filter. Phase controlled sweep voltage for scope horizontal input. Stability increased by ceramic trimmers, zero temperature coefficient capacitors, silver plated coils, regulated power supply and rugged construction.

Attractive steel case, black enamel suede finish. \(\left.15 \frac{3}{3}\right\}^{\prime \prime} \times 11 \mathrm{~J}^{\prime \prime}{ }^{\prime \prime} \times 814^{\prime \prime}\). Copper plated feet for improved grounding. Black, white and red etched markings on aluminum panel.
Accessories - Co-Axial cables for low-loss RF output. Heavy braid stray. Rubber covered leads for audio and sync output and additional ground.

Power: 105-115 Volt, 50-60 Cycle, 55 Watts.
Weight: 23 lbs.

Model 3435
FREQUENCY COVERAGE
Sweep Center Frequency :
Range 1- 0-60 MC (Fundamental)
Range 2-60-120 MC
Range 3-120-240 MC (Harmonic)
Sweep Width: 0-12 MC (Continuously Variable)

Model 1235

\section*{ABSORPTION TV-IF MARKER}

Frequency Coverage: 10 to 50 MC in two bands
Triplett first to provide Control over amplitude of Marker dip.
Standby feature. Removed from circuit by merely turning switch.
Other special features :
May be used with any type Sweep Generator.
Two tuning ranges providing complete coverage of all present TV-IF frequencies and ample provision for the future.
Designed as companion unit for 3435 Sweep Generator.

Although designed as a companion unit for Triplett Model 3435 Sweep Signal Generator, it can be used with any Sweey Generator as an external Marker. There are no complications in use, for connection is made quickly and easily through a panel conmector. A standby switch is provided for temporary silencing of Generator during other work on equipment under test. Attenuation-con-
tanousiy variable from 0 to maximum of Marker dip.

Copper plated steel construction throughout. Large \(4^{\prime \prime}\) dial has two easy-to-read scales etched on the dial.
Metal case, with black suede enamel finish, \(7 \% /^{\prime \prime} \times 65 / 8^{\prime \prime \prime} \times 41 / 2^{\prime \prime}\). Met \(n 1\) handle. Copper nlnted feet for improved grounding when working over metal work bench top. Panel is black and red etched on aluminum.
Accessories-Co-Axial cable for low-loss connection to Sweep Generator. Coaxial cable for connection to test setup.

Power: None required. Weight: 4 lbs.

\section*{QUALITY-ENGINEERED, LOW COST TV-FM SWEEP SIGNAL GENERATOR}

MODEL 3435 answers your needs for a quality engineered TV-FM Sweep Signal Generator at an unusually low price. Designed particularly for the service engineer who has his own provision for an external Marker (any good AM Generator).
Buying this sensational new Model will nable you to materially reduce your investment in a Sweep Signal Generator, if you have a good AM Signal Generator to use as the Marker. Connection of external Marker is made simply and quickly through a panel connector. If you do want an external Marker see Triplett Models 1235 Variable Marker or 1236 Crystal Marker.
Model 3435 provides continuous range coverage to 240 MC for all TV Carrier and IF frequencies. No gaps in frequency. Continuous tuning is provided over all TV-FM bands. Continuously variable sweep width control. Sweep at any width between .1 to 12 MC . Phase controlled sweep voltage for scope horizontal input. Main frequency dial marked with channels as well as frequencies. Large and easy to read. Standby switch for temporary silencing of Generator during other work on equipment under test. Shielding and wiring designed for good control over output. Copper plated steel construction throughout. Static shielted power transformer. Miniature tubes used for high frequency circuits. Stability increased by use of ceramic triminers, zero temperature coefteient capacitors, silver plated perature coe M,
Metal case with black suede enamel finish \(155^{2} \times 113 z_{2} \times 614\). Leather handle. Coppel plated feet mor has black, white and red characters etched has black, wh
on aluminum. - Co-Axial cables for low-loss RF output. Heavy braid ground strap. Rubher covered leads for Sync output and additional ground

Pover - 105-115 Volts. 50-60 Cycles, 25 Watts. Wt.: 15 lbs.
MODEL \(3435-\) U.S.A. DEALER NET \(\$ 99.50\)

\section*{NEW CRYSTAL MARKER}

Frequency Coverage: Up through 19 MC on crystal (fundamentals) Up through 216 MC on crystal (harmonics) (Crystals not included.) Model 1236 provides Marker freruencies of crystal controlled accuracy for TV \& FM. IF or \(\mathrm{RF}^{2}\) re quirements. By purchasing ONLY those crystals needed for a particular TV service area and the most-used IF frequencies, this new unit provides utmost Marker accuracy and offers a speedy selection of the desired crystal-controlled signal.
This Marker saves plenty of time in checking bandpass characteristics of

Model 1236 curves - simply throw the switch to the desired crys. tal-eliminating delays resulting from constant tuning and retuning required in the use of variable markers. Signals for the most accurate and fastest means of aligning local oscillators in TV receivers and many other applications. When using a 1 MC crystal, Model 1236 becomes a standard for checking other signal generators or receivers.
Designed as a companion unit to Triplett 3435, it receives its power by plugging into a panel jack in the Sweep Generator.
Attenuation-Low impedance single control T-pad attenuator, continuously variable. Shielding-Copper plated steel construction throughout. Stability-Increased by use of latest high-frequency techniques.
Metal case, black suede enamel finish, \(77 / 8^{\prime \prime} \times 65 / 8^{\prime \prime} \times 41 / 2^{\prime \prime}\).
Metal handle. Copper plated feet. Black, red and aluminum tched panel

Double hrirfge circuit affords maximum of scale linearity and rectifier protrofion. Circuit temperature compensated to correct rectifier readinf over wide range of temperatures. DC Current7 ranges of \(0-500\) microamperes \(2.5 / 10 / 50 / 250\) milliamperes and \(1 / 10\) amperes. Lowest readiner 10 microamperes. All shunts wire wound. Output Volts- 5 rancres of \(0 / 5 / 10 / 50 /-\) \(250 / 1000\) volis. Ideal for receivar alignment. No external condenser necessary. Ohmmeter5 rances of \(0 / 200 / 2000 / 20,000\) ohms and \(2 / 20\) merohms. Center scale of low rance 3.5 ohms. Lowest reading 0.1 ohms. Jdeal for checking low resistance coils such as voice coils and oscilator coils. Condenser Tester-Covers fachrolyic and paper or Electmatatic combamers. Provides tests for Elmotrolytir Cabacitors, including high voltade filters and low voltare-hirh capacity liypass condensers to lie checked under their normal working voltamp. The following Vollares are supplind to he applied arross the Flectrolytic Condensers: \(4.50 / 300 / 250 / 200 /-\) \(100 / 50 / 25\) volts. English rearling "Goot"lad" scale. Battery Tests-rmovides bropry loads for most commonly used A and B portable batteries. Condition of hattery under load is read on Fnelish reading scale. Power Supply-100-133 volts-50/60 cycles. Special roltages and frequencios on request. Note: Test Leads fumished with this instrument.
SIZE—14 \(1 / 8^{\prime \prime} \times 121 / 8^{\prime \prime} \times 47 / 8^{\prime \prime}\). SHIPPING WEIGHT-20 pounds.

\section*{SPECIFICATIONS}

Meter-Large three-inch round meter used to set the desired amount of amplitude modulation. Variable from 0 to \(80 \%\). SimplicityAll freguencies on the R.F. Oscillator read on two scales, lloth A.F. and R.F. push-hutton operated. Attenuator-R.F. Oscillator has ladder type four position resistor push-button attenuator. Also, vernier control from maximum to minimum on either of the four steps of the multiplier. A.F. output is controlled from minimum to maximum with continuously variable control. Laboratory Ap-pearance-This fine instrument is housed in beautiful rolden tone, lock cornered, natural finish oak case. Black rilbed steel panel with silver and red highlights. Tube Line Up-6X5 Rectifier. 6SK7 A.F. Beat Oscillator. 6SK7A.F. Beat Oscillator. 6SK7 R.F. Oscillator. 6C5 A.F. Oscillator Mixer. (CC5 A.F. Amplifier. GF8 Audio Vacuum Tube voltmeter-frequency modulation control tube

\section*{DESCRIPTION R.F. OSCILLATOR}

Ranges- 5 band \(65 / 205 \mathrm{KC}, 205 / 650 \mathrm{KC}, 650 / 2050 \mathrm{KC}, 2050 /-\) \(6500 \mathrm{KC}, 6.5 / 20.5 \mathrm{MC}\). Harmonics ahove 60 MC . Tuning Mecha-nism-Dual ratio from tuning knob to dial. One direct for speed, a second about 5 to 1 for vernier settings. Accuracy-Low end of band tuned with iron core inductors. High end of hand tuned with air dielectric trimmors providing for greatest accuracy possible with printed scales. Meter nsed to set carrier level at a predelermined value, aligned for an accurate and variable per cent of modulation by the A.F. Oscillator. Frequency Modulator-F.M. signal available over range of R.F. Oscillator. Frequency modulated approximately plus or minus is kC. Rate of frequency modulation 120 cycles per second. 60 cycle time base provides for automatic positive synchronization.

\section*{A.F. OSCILLATOR}

Range-15 to 15.000 cyeles. Output Impedances-Center tap transformer of \(50 / 500 / 5,000\) ohms. High impedance resistor of 50,000 ohms. Distortion-Approximately \(5 \%\). Voltage outputOpen circuit 35 volts. Frequency Characteristics-I'lus or minus 1 db between 30 and 10,000 cveles. 15 cycles and 15,000 cycles down approximately 2 di. Attenuator-Controls voltage output from 0 to maximum. Power Output-Approximately 150 milli watts. Power Supply- \(110-125\) volts- \(50 / 60\) cycles. Special volt. ages and frequencies on request.
SIZE— \(151 / 2^{\prime \prime} \times 111 / 2^{\prime \prime} \times 83 / 4^{\prime \prime}\). SHIPPING WEIGHT- 33 pounds.

DESCRIPTION
Dust Just histen for the signal. Speed of Operation-No confusion caused by the exchange of test leads. Only one probe necessary to trace signal through either R.F. or Audio circuits. Probe remorable from panel for convenience. Attenuator-Input siknal control larder type multiplier of 4 steps and continuonsly variable control, Volume Control-In audio circuit to adjust speaker volume to desired level. Professional Appearance-Housed in Hammerloid finish steel case. Pancl satin finished Aluminum, blue and maroon trim. SPECIFICATIONS-Electronic Volt Meter- \(T\) ranges of \(0 / 1 / 3 / 10 / 30 / 100 / 300 / 1000\) volts DC. Center scale reading at 0 with plus and minus voltages either sile. 15 megohms input impedance. Resistor in probe isolates meter from circuit disturbance. Ohmmeter-5 ranges of \(0 / 200 / 2000 / 200,000\) ohms \(0 / 2 / 20\) megohms. R. F. Range- 5 bands covering R.F. signals from 95 KC to \(\mathbf{1 4 . 5} \mathrm{MC}\). Used for tracing signals through sets of this range. Also used to checks frelpuency of receiver's oscillator, IF. or R.F. Gain Measurements -liy moving Autolyzer loss is determined. A.V.C. Measurements-Use proper range of electronic volimeter and check A.V.C. voltage developel under actual onerating conditions. Also lise the electronic voltmeter for adjustine A.V.C. circuits. Distortion Check- Since the signal is monitored by a speaker, distortion can easily noted by ear at all times. By checking simmal throuph various staces the inproper onerating stace of a receiver can easily be located and faulty component found. Condenser Tester-Leaky, shorted, or old condensers can be quifely found. A. F. Input-Adlitional leads supplied for monitoring audio circuit at same time regular probe is used for monitoring R.F. circuit. Also used for checking high impedance pickups, microphone, and other audio devices. A. F. Output-Output of the aulolyzer lirought out to the alditional prolse for use in checking any circuit or part requiring a high audio voltage. Power Supply- \(100-125\) volts- \(50 / 60\) cycles. Special voltagea and freinuencies upon request. Note: Test Leads furnished with this instrument.
SIZE-15 \(1 / 2^{\prime \prime} \times 111 / 2^{\prime \prime} \times 83 / 4^{\prime \prime}\). SHIPPING WEIGHT- 32 pounds.

\section*{MODEL 630 AUDIO GENERATOR}

The Morlel 680 continuously wariable aurlio oscillator is SUPREsES answer to a multitude of requests from the radio servicemen and memhers of the various sound and acoustical industries for a practical Andio Oscillator. This Beat Frequency Oscillator meets the most exact requirements for the average radio service shop, manufacturers of radios, puhlic address, motion picture sound industry, and other audio apparatus and acoustical material, educational and research laboratories, maintenance and design engineers.
DESCRIPTION AND SPECIFICATIONS: FREQUENGY RANGE - 15 cycles to 15,000 cycles. Dial calibration spread over a 12 -inch arc covering 280 tlegrees. Large 6 -inch metal dial with laboratory type tuning knob. OUTPUT IMPEDANCES-250/500/5,000 ohms. Each impedance center-tapped for push-pull and other balanced input systems. ATTEN-UATOR-Output continuously variable from minimum to maximum. Linear marks around attenuator for reference settings. OUTPUT VOLTAGE-Open circuit approximately 65 vis volts at 5,000 ohms section. Properly loaderl, this section produces 50 volts total or 25 vols either side of center tal. 250 -ohm section and 500 -ohm section voltages are approximately 9 to 14 respectively. WAVE FORM-sinusoilal type wave form with harmonic distortion at least 30 db helow fundamental at 5,000 cycles and at least 25 db helow fundamental at 50 cycles. Total distortion approximately \(5 \%\). Mum from power supply negligible with output control set at maximum. FREQUENCY RESPONSE-Output virtually hat over frequency range. Plus or minus 1 db froni 30 cycles to 10,000 cycles. 2 dh down at 30 and 15,000 cycles SIMPLE OPERATION-All controls logically arranged for speeel and simplicity of operation Neon lamp for zero adjustment. STABILITY-Special shielding and hishly impregnated inductors provided for minimum drift during warm-up period and normal operation. PROFESSIONAL APPEARANCE-Iloused un farmer loid finish steel case. Leather carrying handle. POWER SUPPLY-110-125 volts \(50 / \mathrm{f}^{\prime \prime}\) cyclos. Special frequen

\section*{MODEL 260}

\author{
Set Tester
}

\author{
World's Most Popular High Sensitivity Set Tester \\ For Radio and TELEVISION
}

There are more Simpson 260 high sensitivity volt-ohm-milliammeters in use today than all others combined. No other instrument of its kind has approached the world-wide popularity of the Simpson 260 . In no other tester of its kind will you find the combination of useful ranges, accuracy, ruggedness, heauty and sensitivity developed to such a high degree of perfection.

Removal of the Model 260 from its heavy, handsome case of molded bakelite, will disclose how it differs from most set testers. You will see a sub-panel with a score of small recesses each holding a separate resistor or other component. You will notice complete absence of cable wiring. All connections are short and direct, thus offering a strength and firmness of assembly and the finest of insulation to reduce chances of shorts. All components are readily accessible. The front panel is a thing of beauty and long life. Pin jacks are recessed so no metal parts are exposed. All figures and symbols are molded into a heavy Bakelite panel and filled with durable white for long wear and legibility.
At 20,000 ohms per volt the 260 is highly dependable, rugged ard accurate. Its practically negligible current consumption assures remarkably accurate voltage readings. It provides DC current readings as low as 2 microamperes and up to 10 amperes. Dependable resistance readings can be made up to 20 megohms and as low as \(1 / 5\) ohm. With the 260 you can measure automatic frequency control diode balancing circuits, grid currents of oscillator tubes and power tubes, bias of power detectors, automatic volume control diode currents, high-mu triode plate voltage, as well as a wide range of other measurements which cannot be checked with ordinary servicing instruments.

25,000 VOLT DC PROBE FOR TELEVISION TESTING Complete, nothing to add, for use with Model 260 . Weight: 6 oz. Shipping weight : 8 oz .

\section*{MODEL 330 Mutual Conductance Tube Tester}

\author{
With Simpson Patented "No Backlash" Roll Chart
}

The Simpson Model 330 tests tubes in terms of PERCENTAGE of rated DYNAMIC MUTUAL CONDUCTANCE, a direct indication of tube performance with reference to the manufacturer's STANDARD MICRO. MHO rating. The colored zones on the dial coincide with the percentage scale to indicate good, fair, weak or definitely bad tubes. Tubes are tested at audio frequency ( 2500 cycles) with voltages applied automatically over the entire operating range, reproducing more completely than ever before the actual conditions, under which a tube normally functions. A compact assembly of ten push button switches and nine rotary switches of six positions each provide infinite combinations for tube circuit selection.

When you have finished a tube test, the Simpson one button automatic reset returns all switches to the normal position.

For \(100-130\) volts, \(50-60\) cycles. Size: \(16^{3} / 4^{\prime \prime} \times 121 / 2^{\prime \prime} \times \sigma^{\prime \prime}\). Weight: 14 lbs . Shipping Weight: 19 lbs
DEALER'S NET PRICE, complete with Operator's Manual ............................ \(\$ 79.50\)

\section*{MODEL 555 Tube Tester}

Here is a tube tester Simpson engineered to test all tubes for today's radio receivers and any that may be developed within the foreseeable fưture. It is outstanding in its simplicity of operation and its attractive appearance.
Check These Many Features
- Basic RMA recommended circuit. Tests any tube regardless of base connections or internal connections of elements.
- Simpson designed 3 -position lever operated toggle switches with molded rotor carrying silver plated contacts, self-cleaning through wiping action.
- Sockets for all receiving tubes on the market.
- Provision for future tube developments.
- Properly fused, provides for line adjustment from 100 to 130 volts; smooth vernier control.
- Beautiful modern panel of shining, silver and black anodized enduring aluminum.
- Large illuminated meter for easy readings.
- Unique jewel-like molded lucite housing enclóses Neon bulb indicating shorts and inter-element leakages.
- Line adjustment control below dial opening. Easy to operate.
- Case of sturdy plywood with heavy fabricoid covering, slip hinges.
- Simpson Patented "Ne Backlash"' Roll Chart.

\section*{MODEL 335 Plate Conductance Tube Tester}

\section*{With Simpson Patented "No Backlash" Roll Chart}

Model 335 tests tubes under conditions simulating actual use in a radio set. The dial indicates percentage of rated plate conductance. With a minimum of settings a reading is quickly obtained which is a percentage of the tube's rated value.
Regardless of tube load, filament voltages are automatically maintained with minimum variation.
Each tube element is individually connected to the proper potential. Reliable short test is provided and Diodes are tested on low voltage. When you have finished a tube test, the Simpson one button automatic reset returns all switches to the normal position.
Tests all receiving tubes, including 9 pin miniatures, and sub-miniatures as used in hearing-aids, etc. Space is provided for new sockets.
 Shipping Weight : 27 lbs.
DEAL.ER'S NET PRICE, complete with
Operator's Manual ….......................... \(\$ 108.50\) Avarlable as per your request in these color combinations: Black panel with black leath erette case. Gray panel with maroon leather ette case. Tan and brown panel with brown leatherette case. Color optional at above price.

\section*{SIMPSON MODEL 1005 ELECTRICAL LABORATORY}

All the functions of over 60 separate instruments combined in one unit. Here is a complete test unit for use by radio, electronic, and electrical technicians in laboratories, shops, and service departments.

The Electrical Laboratory is adaptable for testing all electrical appliances, small motors, circuits, radio scts, etc. All of the instruments are indirectly illuminated, and all lights are controlled by one switch located at the right side of the panel. The panel is of lustrous, long-wearing anodized aluminum. Cabinet is natural finish birch, sturdily constructed. Two compartments for accessories and instructions, with hinged doors, are located at the base of the cabinet. All connections are made to binding posts located on the panel. Test leads and Break-in plug are furnished.

\section*{SIMPSON MODEL 445}

\section*{Tube and Set Tester with the famous Simpson "No Backlash" Roll Chart} Model 445 combines a 20,000 ohms per volt Set Tester and a Plate Conductance Tube Tester. The tube tester dial indicates percentage of rated plate conductance which can also be considered as a percentage of mutual conductance since, in most cases, the amplification factor remains constant. Tests the new 9 -pin miniature tubes and sub-miniature tubes.

The volt-ohm-milliammeter set tester provides the ranges that have made the Simpson Model 260 the most famous set tester in the world.
HIGH VOLTAGE PROBE FOR TELEVISION SERVICING AVAILABLE 25,000 volts \(\mathrm{DC}-20,000\) ohms per volt. Weight: 6 oz . Shipping Weight: 8 oz . DEALER'S NET PRICE, complete with Instructions.

Black panel with black leatherette case.
Gray panel with matoon leatherette case.
Tan and brown panel with brown leatherette case.

\section*{THE SIMPSON PATENTED "NO BACKLASH" ROLL CHART}

The exclusive "No-Backlash" feature automatically takes up the slack in the paper chart and, by keeping the chart in constant tension, makes it impossible to turn the selector wheel without moving the chart. This results in precision selection at all times. The "No-Backlash" feature also prevents the paper chart from tearing, insures proper alignment, and presents at all times a neat, flat surface.
The selector wheel gear ratio makes it possible for tube selections to be obtained with a minimum of effort.

The entire Roll Chart mechanism is securely fastened to the instrument panel. Quick access to the roll chart can be obtained by removing four panel screws, so that the addition of tube data or the mounting of a new chart is a matter of a few minutes.
In addition to the neat, flat reading surface made possible by the "No-Backlash" feature, the lucite window was designed so that only two settings appear, which is especially convenient for the settings of multi-purpose tubes.

INSTRUMENTSTHAT
MODEL 415A WITH BUILTIN SWEEP CIRCUIT
The AM bands cover the complete frequency range from 75 KC to 130 MC and the FM lands, from 2 MC to 115 MC . A wide sweep of 1 MC is provided, which is more than adequate for FM alignment. A synchronization potential for locking in the scope trace is available. When used with an oscilloscope, the Model 415 A is the correct answer to FM servicing.

\section*{Note These Many Features}
1. Direct reading dial with continuous coverage from 75 Kilocycles to 130 Megacycles in the following ranges: 75-200; 200\(600 ; 550-1800\) Kilocycles and 1.7-4.2; 5-16.51; 16-32; 31-65; 62130 Megacycles. Fundamental to 65 MC .
2. Practically independent of line voltage fluctuation. Calibration is stable regardless of wide variations in line voltage.
3. RF output is controlled through its entire range, eliminating the necessity of a separate connection for high uncontrolled output as found in other signal generators.
4. Modulation from 0 to \(100 \%\), using either the 400 cycle internal sine wave or an external source. A range from 0 to over 9 volts of 400 cycle sine wave is available for external use.
5. Modulation up to \(100 \%\) from below 60 cycles per second to over 10 Kilocycles per second.
6. Each Signal Generator is individually calibrated against a crystal controlled frequency standard.
PANEL - Lustrous black anodized aluminum. Dial is encased in a molded bakelite escutcheon with glass covering for protection against damage and dirt. Functional switches and controls are mounted on engraved molded bakelite panels.
CASE - Steel, copper plated for shielding effect and finished in gray durable wrinkled enamel. Leather carrying handle.
SHIELDING - In addition to the overall shielding offered by the case and panel, the coils and tuning condenser are individually shielded, and an additional shield is placed over these two assemblies. This series of shields together with other factors reduce leakage to an absolute minimum.
COILS - Low loss RF coils are individually calibrated by means of variable inductance and variable minimum capacitance. These

INSTRUMENTSTHATSTAYACCURATE

\section*{MODEL 266 VACUUM TUBE VOLTMETER \\ Ideal for TV - AM - FM}

Extremely accuraic and packed full of important features. This fine Simpson instrument offers a 1 volt range for the full scale deflection necessary in measuring low RF voltages; a zero center switch embracing all DC voltage ranges for discriminator circuit alignment; a special probe with low input capacitance of approximately 4 micro-microfarads for checking RF voltages.

DC volt input resistance ranges from 50 to 200 megohms; AC volt input impedance at 60 cycles is approximately 10 megohms. The primary of the power transformer is well-regulated-holding close control over filament as well as plate voltage, and the DC input circuit is filtered so that the pressure of superimposed alternating currents does not affect DC measurements.

Housed in a sturdy case of attractive hardwood. The shining silver and black anodized aluminum panel includes a convenient well for holding the AC probe. In addition, there is a large, clearly marked \(41 / 2^{\prime \prime}\) meter for quick, easy readings, and a compartment in the rear of the case for leads.

\section*{25,000 Volt DC Probe for Television Testing \\ Complete, nothing to add, for use with Model 266 Weight: 6 oz. Shipping Weight: 8 oz . \\ DEALER'S NET PRICE, complete with Instructions.}

ual

\section*{MODEL 379 BATTERY TESTER}

Desigmed in accordance with the engineering specifications of leading battery manufacturers, this compact instrument is so ruggedly built that it will stand a lifetime of hard usage. The loading resistors have an accuracy of \(1 \%\) and properly load all radio and hearing aid \(A\) and \(B\) batteries.
A single rotary switch selects the voltage of the battery under test and brings into line the correct loading resistor. The full \(3^{\prime \prime \prime}\) dial has three separate arcs, one for all radio A batteries, one for hearing aid A batteries, and one for all B batteries.

A percentage scale shows the exact condition of the battery in percentage of full voltage. The voltage reading can be quickly obtained by multiplying the percentage reading by the selector-switch voltage setting.

Size: \(3^{\prime \prime} \times 57 / 8^{\prime \prime} \times 21 / 2^{\prime \prime}\). Weight \(11 / 4 \mathrm{lbs}\). Shipping Wt. 3 lbs.

\section*{MODEL 380 WAVEMETER MODULATION INDICATOR}

\section*{The ideal instrument for the Ham.}
1. An accurate band-spread wavemeter, and a sensitive \(0-100\) microammeter as a resonance indicator.
2. Separate plug-in coils for \(10,20,40\) and 80 meter bands supplied - coils for other bands available at slight extra cost.
3. Additional between-band coverage available at the flip of a switch.
4. Extremely sensitive field strength indicator.
5. Push button switch for dual meter sensitivity.
6. Provision for headphones for use in station monitoring and quality control.
7. A direct-reading Percentage Modulation Indicator with the instrument calibrated at \(0-110 \%\) Modulation.
8. Designed to function on the 144,235 , and 420 megacycle bands without coils, but with a quarter wave antenna section.
9. Extremely rugged construction.
10. Used as a field strength indicator to determine radiation pattern。
Size : \(3^{\prime \prime} \times 57 / 8^{\prime \prime} \times 21 / 2^{\prime \prime}\). Weight: 2 lbs . Shipping Weight: 4 lbs .
DEALER'S NET PRICE, complete with 4 coils, 2 ft . antenna, and Operator's Manual....... Leatherette covered carrying case, with separate compartments for the instrument and 4 coils.

\section*{INSTRUMENTSTHATSTAYACCURATE}

\section*{MODELS 240 and 230 VOLT-OHM-MILLIAMMETERS}

These two "Micro-Tester" portables are famous throughout the world for their ruggedness and built-in accuracy. They exemplify the construction features and utility that distinguish the entire Simpson line shown in this section.

Both are shock-proof and incorporate the celebrated Simpson movement with its FULL BRIDGE-TYPE CONSTRUCTION AND SOFT IRON POLE PIECES. Resistors are in matched pairs to provide the greatest possible accuracy for all ranges.

Model 240 - the "Hammeter" - was designed for the additional voltage and sensitivity demanded in radio testing. With its maximum voltage range of 3000 AC or DC , it was the first self-contained pocket portable instrument built expressly to check high voltage and all the component parts of transmitters and receivers.

Model 230, with a maximum voltage of 1000 volts AC or DC, is ideal for most industrial testing. Its ranges are adequate for most line voltages, for telephone, teletype, and general purpose testing.

Both models are housed in heavily molded bakelite cases, with all numbers and symbols recessed in the panel and filled with white enamel for greatest legibility and ease of reading. Both have full size \(3^{\prime \prime}\) meters.

\section*{MODEL 240 AC and DC VOLT-OHM-MILLIAMMETER RANGES}

\section*{SIMPSON MODEL 390 VOLT-AMP-WATTMETER}

Ruggedly constructed for full load, continuous operation, the Simpson Model 390 is the first tester of its size ever made to give you volt, ampere and wattage readings in one compact instrument. It embraces two ranges each of voltage and current, providing four wattage ranges which cover practically all types and makes of appliances. The panel has volt-ampere combinations clearly indexed to the proper wattage range on the scale, which makes the instrument easy to use. All readings are shown on one meter. In normal position, the meter indicates volts. Ampere and watt readings are obtained by depressing button on the panel. The widely separated binding posts make it possible for the Model 390 to be used as an individual voltmeter or as an ammeter. The Model 390 has a molded bakelite case with all figures recessed in the panel, which are filled with white enamel for better legibility.

\section*{MODEL 385 TEMPERATURE INDICATOR}

This is the newest alddition to the Simpson Appliance Tester line. You will find this a compact instrument which is ideal for measuring temperatures from \(+70^{\circ} \mathrm{F}\) to as low as \(-50^{\circ} \mathrm{F}\), where fast accurate temperature readings are important. The scale is designed so that the center portion is expanded, making the most widely used temperatures easy to read. The Model 385 is ideal for use in the refrigeration service field and wherever temperature readings are important, such as deep freeze units, home refrigerators, walk-in coolers and air conditioning units. The temperature readings can be taken at the end of the \(15^{\prime}\) lead which is supplied with the unit. The lead cord is small in diameter, making it possible to close the door of the equipment, thus obtaining temperature indications under actual conditions.
The probe can also be immersed in liquids where critical temperatures must be maintained.

Range: \(-50^{\circ}\) to \(+70^{\circ} \mathrm{F}\).
Battery, self-contained
Size : \(3^{\prime \prime} \times 5 / 8^{\prime \prime} \times 21 / 2^{\prime \prime}\). Weight : \(11 / 2 \mathrm{lbs}\). Shipping Weight: 4 lbs.
DEALER'S NET PRICE, complete with Test Lead and Operating Instructions .................................... \(\$ 30.00\) Leatherette Carrying Case.......... 5.00 Case colors available as per your request. Now Model 385 can be supplied in either black or two tone tan and brown. Color opticsal at above price.

\section*{INSTRUMENTSTHATYSTAYACCURATE}

Twenty-five separate meters at the turn of a switch. That is what you get in the new Simpson Model 221 Roto Ranger. The necessity of reading numerous scales, so common in ordinary volt-ohm-milliammeters, is forever eliminated when you own a Roto Ranger. The chances for errors in making readings are reduced to a minimum. The Model 221 provides a separate direct reading scale for each range and does it automatically. Calibrations are not cramped. Each scale is full size, the same as it would be for a separate instrument. As the selector switch on the panel is moved to the range desired, an ingenious mechanism rotates the proper range into position behind the meter window.

The Model 221 has a direct current sensitivity of 20,000 ohms per volt and is ideal for research and experimental work where correct readings, quickly obtained, are essential. It is also ideal for critical industrial applications, where reading errors may result in costly material spoilage or serious production errors. In addition the Roto Ranger is the modern and final answer for the radio, radar, television and X-ray technician who must trouble shoot speedily and accurately. It is Simpson patented.

With this super-sensitive instrument you can measure automatic frequency control diode balancing circuits, grid currents of oscillator tubes and power tubes, bias of power detectors, automatic volume control diode currents, rectified radio frequency current, high-mustriode plate voltage and a wide range of unusual conditions which cannot be checked by ordinary servicing instruments.
The panel is of brilliantly gleaming black anodized aluminum; ranges and other markings are in the shining silver finish of the natural aluminum base. The case is of sturdy wood construction, leatherette covered, with heavy black bakelite handle, and includes a handy compartment for leads. Slip hinges on the cover permit quick removal.

SIMPSON MODEL 221 ROTO RANGER
(High Sensitivity AC-DC Volt-Ohm-Milliammeter)

\section*{INSIDE THE ROTO RANGER}

Your first glance behind the panel of the Roto Ranger will show you an instrument that is radically different. The maze of wires common to most test instruments is gone-replaced by two clean housings. One is a bakelite box containing the drum that holds the range scales and the meter movement; the other the bakelite sub-panel of the meter circuit. Bakelite is used for the drum housing because it provides high insulation qualities for the meter and protection to the fine drum mechanism.

Model 221 has been carefully designed throughout to provide strength and simplicity of assembly, and the consequent accessibility of components. Molded of sturdiest bakelite, it possesses the requisite number of tiny recesses to provide separate pockets for resistors. This separation of resistors means orderly assembly, highest possible accessibility, and added insulation for preventing shorts; all connections are short and direct, eliminating the need for cable wiring. Each battery has a compartment of its own and is easily reached for replacement. These are refinements typical of Simpson manufacture, refinements that have made Simpson instruments finer than any similar instruments on the market.

INSTRUMENTSTHATSTAYACCURATE

\section*{MODEL 480 FM-TV GENESCOPE}

The Simpson Model 480 Genescope is the result of many months of painstaking research and it is offered as our interpretation of a modern FM and TV instrument providing all the necessary signal sources for the proper alignment and servicing of \(F M\) and TV receivers.

In addition to a signal source, the Genescope includes a high sensitivity oscilloscope of unique advanced design, complete in every detail and equipled with a high frequency crystal probe for signal tracing.

The variable oscillator sections are mounted one on each side of the oscilloscope section and are provided with large precision vernier dials having a \(20: 1\) ratio and 1000 division logging scales. They are easy to read and can be quickly set for to an exact frequency.

Modern FM and TV development and servicing requires the use of test equipment made to exacting standards. With this in mind we offer you the Genescope with the assurance that everything possible has been done to make it the most accurate, flexible and convenient instrument available.

There are many vital component parts in the Genescope, almost all of which have been made to our exacting standards within our own modern plants. Most of these vital components have been developed and designed by us and substantial sums have been spent on modern tooling. The care we have taken to properly design and produce these parts is worthwhile assurance that the Genescope will render many years of uninterrupted service and always produce accurate results.

The center section of the Genescope contains the oscilloscope and all associated controls. The cathode ray tube of the oscilloscope is mounted vertically in the case in order to conserve bench space. The pattern on the tube is brought into view by use of a highly polished adjustable mirror at the top of the cabinet. The mirror may be quickly adjusted for any position of the operator. The tube face is placed well below the top surface of the cabinet in order to shield it from incident light thus producing a clear, sharp image unhampered by narrow angle light shields. The mirror when closed provides adequate protection for the cathode ray tube when not in use.

Direct connection to vertical and horizontal deflection plates and other internal functions are available through removable cover on the front panel.

\section*{RANGES \\ FREQUENCY MODULATED OSCILLATOR}

Band A-2-120 megacycles
Band B-140-260 megacycles
Sweep width variable from zero to 15 megacycles
Sweep rate 60 cycles per second
Specially designed frequency sweep motor
Continuously variable attenuator

\section*{AMPLITUDE MODULATED OSCILLATOR}

Band A-3.2-16 megacycles
Band B- 15.75 megacycles
Band C-75-250 megacycles
\(30 \%\) modulation at 400 cycles or unmodulated
Continuously variable attenuator
Visual method of beat frequency indication
Crystal calibrator - 5 megacycles \(\pm .05 \%\)
Audio Oscillator 400 cycles
AM and FM oscillator sections provided with large, easy to read dials with \(20-1\) vernier control and
1000 division logging scale.
Output impedance 75 ohms
Step attenuator for control of output

\section*{OSCILLOSCOPE}

Vertical and Horizontal amplifiers are balanced DC type.
Frequency response essentially flat to 200 KC . Will respond to over 3 megacycles at lower output. Vertical input sensitivity 30 MV per inch peak to peak. Horizontal input sensitivity 50 MV per inch peak to peak. Input resistance .5 meg for low input, 10 meg for high input. 60 cycle sine sweep or linear sweep from 3 cycles to 60 KC .
Adjustable synchronization - internal, external or line frequency.
Provisions for internal blanking or Z axis modulation.
Direct deflection plate sensitivity:
Vertical-10 volts per inch peak to peak
Horizontal- 15 volts per inch peak to peak
Size: \(22^{\prime \prime} \times 14^{\prime \prime} \times 71 / 2^{\prime \prime}\). Weight 39 lbs.
Shipping Weight 48 lbs .

INSTRUMENTSTHATSTAYACCURATE

\section*{MODEL 351 TV ANTENNA COMPASS}

This valuable instrument is another example of Simpson television pioneering. One man can do a better installation job in less time than it used to take two men.

Model 351 takes the physical form of a ruggedly built pocket-size meter which connects by a simple insulation-piercing alligator clip to the video input of the cathode ray tube in the television receiver.

By an extension cord, it is carried to the antenna site. With a test pattern tuned in on the area's weakest station, the antenna is simply located and rotated for maximum deflection of the TV Antenna Compass. It is as simple as that. Identifies ghosts, too. And much more accurate than trusting to the old fashioned "human eye-and-headphones" method of shouting instructions back and forth from the living room to the roof-which has always resulted in only an approximate best orientation of the antenna. Can also he used to peak the RF mixer and oscillator sections. In that way you actually peak the set right on the station itself.

Size \(43 / 4^{\prime \prime} \times 41 / 4^{\prime \prime} \times 1_{T}^{9}{ }^{\prime \prime}\). Weight 1 lb . Shipping Weight 4 lbs .
DEALER'S NET PRICE-Complete with
Termination Box and Printed Instructions
\(\$ 16.35\)

\section*{MODEL 184 MICRO TUNER}

Tuning indicator for use on FM and Television receivers.
Enables operator to tune to the exact mid point of the band for perfect audio reception.

Of particular value to owners of television receivers which are equipped with a fine tuning control.
Supplied with 4 ft . flexible celanese covered lead which includes isolating resistor and special clip for attaching to tube prong.

Easily installed.
An excellent extra profit item for the dealer making television installations. Results in less call-backs.

Size: \(21 / 4^{\prime \prime} \times 21 / 2^{\prime \prime} \times 13 / 4^{\prime \prime}\). Weight 8 ozs . Shipping weight 2 lbs .
DEALER'S NET PRICE with Printed Instructions
\(\$ 7.50\)

\section*{HIGH VOLTAGE TV PROBE}

Here are Simpson's three High Voltage Test Probes for Television servicing, each designed for use with the models listed here. They are molded of high temperature polystyrene to provide high dielectric strength and maximum insulation. Their small diameter permits reaching in small spaces and narrow openings.
Size Diameter \(\frac{9}{186^{\prime \prime}}\), Length \(11 \frac{1}{2^{\prime \prime}}\). Weight 6 oz. Shipping Weight 2 lbs.

\section*{DEALER'S NET PRICES}

\section*{DYNAMIC MUTUAL CONDUCTANCE (TRANSCONDUCTANCE)* TUBE TESTERS}

Model 533-P

\section*{MODELS 533-P AND 533-C}

The most complete full coverage, all purpose tube tester available today.
The HICKOK Model 533P (Portable) and 533C (Counter type) Tube Testers accurately test and sell more tubes in less time. Both have the world famous HICKOK Dynamic Mutual Conductance (Transconductance) circuit which was first choice of both Army and Navy throughout World War II. Duplicates the method actually used by tube manufacturers in the tube factory. Easy to read scales have MICROMHO ranges of 0-3,000, 0-6,000, 0-15,000 and English legends reading "Replace", "Doubtful" and "Good". Gas test provision quickly eliminates gassy tubes (which ruin AVC and IF stages). Highly sensitive noise test detects radio frequency disturbances. Locates shorts-hot or cold. Tests diodes separately with low voltage to prevent paralysis of the elements. Indicates accurately line voltage on a large test meter-from 100 to 130 volts. Tests all pres-ent-day tubes including Octal, Loktal, Miniature, Ballast and Magic Eye Tubes.
Provisions for new tube designs are made-this tester will remain up to date for a long time to come. Uses rectified current to energize both plates and grids using two rectifiers. Has filament voltage in steps to 117 volts. Panel is modern, legible, has satin chrome finish. In our selector switches complete flexibility has been provided to take care of unusual base pin connections; but in routine testing seldom more than one or two manipulations are necessary. Roll chart in the panel makes tube data easily and quickly available. Tests grid controlled rectifier tubes. Continuity checks can be made by a special new feature of design. Wide range of voltage checks can be made.
"Mutual conductance and transconductance mean the same thing.
Specify "P" for Portable, "C" for Counter Type When Ordering.

\section*{Net Price, either Model, \$133.20}

\section*{SPECIFICATIONS}

Size- \(17^{\prime \prime} \times 18^{\prime \prime} \times 81 / 2^{\prime \prime}\). Weight 27 lbs. Shipping Weight- 34 lhs .
Power Supply-110-130 Volts 50.60 Cycles. Tube Complement-1 No. 83-1 No. 5Y3 GT. Other voltage or cycles available.

\section*{NEW DESIGN ALL-PURPOSE TUBE AND SET TESTER - Model 534B}

In addition to the many tube tester features of the 533, the Model 534B tube and set tester measures volts, ohms, milliamperes, capacitance, inductance, leakage and decibels. Specific features are as follows: Voltage Ranges: \(0-20-200-500-1,000-5,000 \mathrm{~V}\) A.C. and D.C. Re-sistance- 0.1 ohm to 100 meghoms in three overlapping ranges. No batteries needed. Capacitance- 0.0001 to 100 microfarads in overlapping ranges. Checks leakage of electrolytic or paper condensers. Inductance up to 100 henries (or higher by simple calculation) with or without D.C. component. Decibel ranges -10 to +50 D.B. (or higher by simple calculation). Checks hum in any stage of the receiver. Meter scale \(41 / 2^{\prime \prime}\) long clearly marked for easy reading. Portable carrying case, black initation leather covered hardwood with detachable cover.

\section*{TEST EQUIPMENT}

\section*{NEW MICROVOLT SIINAL GENERATOR for AM, FM, TV and Mobile Bands}

Model 292-X—l 25 kc to \(\mathbf{2 2 0} \mathbf{~ m e}\) on fundamentals. the only signal generator with all these

\section*{FEATURES}
- Covers all AM, FM, TV and Mobile Frequencies
- Measures Input of Units under test
- Modulated and Unmodulated Output from 1 to 100,000 microvolts
- Cast Aluminum Attenuafor for Minimum Signal Leakage
- May be externally modulated from 15 to 10,000 cycles per second
- Decibel Meter for faster servicing
- Self-contained Crystal Oscillator Circuit - Crystals from 250 kc to 20 mc are available
- Over 100 inches of scale
- Most accurate Microvolt Generator available for practical radio servicing

OPTIONAL
Crystal Oscillator for Accuracy to
\(.005 \%\) in 152-162 mc Mobile Range.

This new HICKOK Model \(292-\mathrm{X}\) is the only popularly priced Microvolt Generator available that covers both Upper Channel TV and Mobile frequencies - on fundamentals.

\section*{Model 292-X}

\section*{Net Price \(\$ 195.00\)}

TECHNICAL CHARACTERISTICS - Fundamental Frequency Coverage: Bands A through G - 125 kc to 110 me ; Band H - 150 to 220 me . Output Calibrated: 1 to 100,000 microvolts. Output Impedance: XI, XI0, and \(\times 100\) microvolts - 5 ohms; X1K - 30 ohms. X10K 0 to 100 ohms. Modulation Fixed: 400 cycles. AF Output: \(0-2\) volis. The Model \(292-\mathrm{X}\) is wired for a plug-in type crystal ( \(152-162 \mathrm{mc}\) ), with accuracy to \(.005 \%\). Self.Contained crystal oscillator circuit has erystal jack on front pancl permitting crystal outputs at any frequpney from 250 kc to 20 mc on fundanentals; and to over 250 me on barmonics. Type CCO-56 Crystal Oscillator unit available with frequency accuracy to . \(005 \%\) for Mobile Bund coverase. Self-Contained Decibel Meter: -10 to \(\pm 38 \mathrm{DB}\) in 3 ranges. Tube Complement: \(16 \mathrm{SN} 7,26 \mathrm{~J} 6,16 \mathrm{SG} 7 \mathrm{I}, 1\). 6 N 5 GT .

\section*{LINEARTTY-PATTERN GENERATOR Model 620-Crystal Controlled (L.P.)}

Model 620 PROVIDES A STABLE VIDEO PATTERN At Any Time for Alignment and Trouble Shooting
now independent of station operation the model 620 gives you these outstanding

\section*{FEATURES}
- Provides Stable Linear TV Pattern at any time
- Checks Relative Receiver Sensitivity
- Detects Hum in Horizontal Deflection Circuits
- Provides Means for Checking and Aligning of:

Horizontal and Vertical Linearity and Drive Controls Horizontal and Vertical Width, Height and Hold Controls
Horizontal A.F.C. Circuits
- Fast and Easy to use: Merely connect to receiver antenna - Extremely useful in ringe areas where reception during installation is lacking or questionable

Today's Video serviceman needs an independent and more accurate pattern to rapidly trouble shoot in television servicing. The HICKOK Model 620 Cross-Hatch Generator has a high enough output to obtain a clear picture on the screen of any 'TV receiver. With a HICKOK 620 you can rapidly service in borderline areas where broadcast reception is unpredictable. You can align more hours per day - for more profit.
TECHNICAL CHARACTERISTICS - Output Frequencies: 4 channel - 3 through 5 inclusive. However, for servicing, only one channel is necessary. Output Voltage: 50 to 5,000 Microvolts. All modulating frequencies are crystal controlled. Horizontal lines: 8 or 9 . Vertical lines: 12. Selection of Thorizontal or Vertical lines can be nade selarately or simultaneously as a Cross-Hatch pattern. Power: 105-125V., 60 cycles AC. Net weight: \(11 / 2 \mathrm{lbs} .-S h i p\). weight: 18 lbs. Beantiful blue hammertex steel rase with sation chrome panel. Sumplied complete with test leads.

\title{
UNIVERSAL CRYSTAL CONTROLLED SIGNAL GENERATOR Models 277, 277X and 288X
}

The Universal Crystal Controlled Signal Generators, Models 277, 277X and 288X, are specifically designed to meet the many and varied needs of the radio engineer and service man working with frequency and amplitude modulated receivers and with television equipment. The wide range in radiofrequencies and audio-frequencies available, with the many choices of type of modulation, makes these Models most versatile and practical instruments.

All three models are the same except for the following features: \(0.01 \%\) accurate crystal controlled outputs, both amplitude modulated at 400 cycles and unmodulated, offered in Models 258X and 277X only. Self-contained decibel meter with \(42^{\prime \prime}\) cable, Model 288X only.

\section*{SPECIAL FEATURES}

Complete frequency modulation coverage with three variable bandwidths of sweep: \(0-30 \mathrm{kc}, 0-150 \mathrm{kc}, 0-450 \mathrm{kc}\). Frequency modulation at two self-contained modulating frequencies: 60 cycles and 400 cycles. Provisions for external amplitude and frequency modulation to 15,000 cycles. Self-contained amplitude modulation at 400 cycles. Continuously variable audio frequency from \(0-15,000\) cycles. Audio frequency and radio frequency outputs are continuously variable from zero to maximum. 60 cycle synchronized sweep voltage is available for use with an oscillograph.

Net Price, \(\$ 169.20\)

Dimensions- \(14^{\prime \prime} \times 161 / 2^{\prime \prime} \times 7^{\prime \prime}\) Net Weight- 25 lbs.-Ship. 36 lbs. Meter-Model 51X, Model 288X only

Scale-over 100"
Satin-chrome finish panel
Blue baked Hammertex finished casc.

POWER SUPPLY: \(105-125 \mathrm{~V}, 50-70\) cycles, A-C. Power Consumption: 20 watts at 115 volts. Amplitude Modulated, Pure R-F Frequency Range: \(100 \mathrm{kc}-110 \mathrm{mc}\). Frequency Modulated R-F Frequency Ranges: Narrow Band ( \(0-30 \mathrm{kc}\) Sweep) : 100 kc to 110 mc in 7 ranges: Wide Band ( \(0-150-450 \mathrm{kc}\) Sweep) 1 mc to 160 mc in 7 ranges. Modulation: Amplitude Modulation- 400 cycles; Frequency Modulation- \(0-450\) kc variable sweep, 50 mc . modulating frequency 60 cycles; \(0-150 \mathrm{kc}\) variable sweep, 50 mc , modulating frequency 400 cycles; \(0-30 \mathrm{kc}\) variable sweep, 1000 kc , modulating frequency 60 cycles; External Modu-lation-Amplitude or frequency modulation, variable \(0-15,000\) cycles. A-F Range: Fixed at 400 cycles, variable from \(0-15,00 \mathrm{C}\) cycles. Crystal Controlled Output (Models 277 X and 288 X only) - 100 kc , Unmodulated: \(100 \mathrm{kc}-15 \mathrm{mc}\), utilizing harmonics; \(100 \mathrm{kc}, 400\) cycle amplitude modulated: \(100 \mathrm{kc}-15 \mathrm{mc}\), utilizing harmonics; 1000 kc , Unmodulated: \(1000 \mathrm{kc}-125 \mathrm{mc}\), utilizing harmonics; \(1000 \mathrm{kc}, 400\) cycle amplitude modulated: 1000 kc 125 mc , utilizing harmonics. Output: \(\mathrm{R}-\mathrm{F}\), continuously variable from 0 to maximum (with multipliers X1, X10 and X100); A-F, continuously variable from 0 to maximum, linear control, for both 400 cycle and variable frequency outputs. Synchronized Sweep Voltage: for horizontal deflection of oscillograph ( 60 cycles.) DB Meter Range (Model 258X only) : -10 to \(+6,+6\) to \(+22,+22\) to +38 . Tube Complement-1 6C4, 26 SN's, \(^{\prime}\), 1 6SJ7, 1 6X5G.

Power Supply: \(105.125 \mathrm{~V}, 50-70\) cycles, A-C. Deflection Sensifivity: Vertical-0.03 volis (rms)/inch. Horizontal0.3 volts (rms)/inch. Horizontal, Direct-45 volts (rms)/. inch. Input Impedance: Vertical-1 megohm, 25 mmf . Horizontal, Direct-3 megohm. Tube Complement: 1 5UP-1cathode ray tube, 1 6SN7-r-f oscillator and mixer, \(16 J 5\), 1 6Ari7-vertical amplifier, 1 fiJh-horizontal amplifier, 5 Y 3 -low volfage rectifier, 1884 -sweep circuit oscillator,

\author{
NEW AM, FM, TV OSCILLOSCOPE Model 505-A
}

Specifically designed for use with frequency modulated, amplitude modulated and television equipment. Permits a complete visual analysis of the electrical and electronic circuits of the i-f and \(r\) - f hands as well as the audio frequency stages. The effectiveness of a tube or circuit as an amplifier, rectifier, or source of special wave shapes may be readily determined.
Interprets modulation, phase relations, voltage amplitudes, distortion, etc. Responds accurately to voltages in wide ranges of both frequencies and amplitudes.

\section*{SPECIAL FEATURES}

Wide band. high gain vertical amplifier, 30 cycles to 1 megacycle. Self-contained wide-band frequency modulated oscillator with variable sweep width, \(0-450 \mathrm{kc}\). Self-contained narrow-band frequency modulated oscillator with variable sweep width, \(0-30 \mathrm{kc}\). Signal tracer jack is incorporated so that, when used in conjunction with a speaker or ear phones, the signal may be simnltaneously seen and heard. Provisions for modulation by an external audio frequency source to provide the equiva. lent of a frequency modulated transmitter for receiver checks. Self-contained mixer circuit provided so that when used in conjunction with any good external oscillator, wide band or narrow band frequency modulated outputs may be produced within the frequency limits of the external oscillator. High sensitivity amplifiers. Calibrated screen. Has self-contained frequency modulated oscillator. Can be used with any signal generator for servicing FM or AM sets.

\section*{SPECIFICATIONS}

Net Price, \(\$ 37.50\)

\section*{VOLT OHM MILLIAMMETER Model 435-A}

The Model 435 is built to the highest Hickok standards of engineering design, workmanship and material. The meters used in these Volt-Ohm-Milliammeters are especially built by Hickok for this service. The movement is large and rugged and the very high torque weight ratio gives lively, instantaneous pointer action. The movement is curve-corrected by an exclusive Hickok process which gives a higher accuracy at all points on the scale.

\section*{SPECIAL FEATURES}

20,000 ohms per volt sensitivity on D.C.

\section*{SPECIFICATIONS}

Dimensions-6" x \(81 / 4^{\prime \prime} \times 4^{\prime \prime}\)

Satin-chrome finished panel
Blue backed crackle lacquer finished case

Ranges-AC Volts and DC Volts: \(0-2.5,10,50,250,1000,5000 ;\) Ohms \(0-10\) megolims (4 ranges) ; Microamperes: \(0-50\); Milliamperes: \(0-2.5,10,50,250,1000\); Amperes: \(0-10\); Decibels: \(-20 \cdot+3,-8 \cdot+15,+6-+29\); Output Volts: \(0-2.5,10,50,250,1000,5000\). Sensitivity: A.C. Volts: 5000 ohms/volt; D.C. Volts: 20,000 olhms/volt; Meter: 40 microamperes. Battery Complement: 1 Dry Battery, Radio C, 4.5 volts.

\section*{VOLT-AMPERE WATtMETER}

\section*{Model 900-B}

Electrical Appliance Tester and Circuit Analyzer. True to the Finest Hickok Tradition

For Measuring Actual Values of Volts, Amperes and Watts. Ranges: A.C. Watts: 0-20-100-500-1000-2000. A.C. Amperes: 0-1.3 6.-5-13-26. A.C. Volts: 0-130-260. A.C. Milliamperes: 0.260 .

Scale is \(33 / 4\) " long, clear and legible. The Model 900 -B Volt-AmpWattmeter has been designed for all A.C. appliance-testing, from bell transformers and clocks to electric ranges operating on the 220 -volt three-wire Edison system. The extremely low range of \(0-20\) watts will measure the power consumed by the smallest of appliances and is protected from acciclental overload by a fuse. For measuring electric ranges the Number 9A and 9B special leads are available with standard three-wire range connnctors. It tests appliances while in actual operation, indicating wattage consumption, amperes, and line voltage.

Mounted in a durable welded steel case with strap handle and rubber bumpers. Detachable learls, for small appliances, are furnished. Test leads with prods also included.

Service men will find a wattmeter especially handy for checking all A.C. sets.

Part No. C-105-This external current transformer is designed to give ranges of 5,000 and 10,000 watts and 65 and 130 amperes when used with Model \(900-\mathrm{B}\). Part No. C-105 transtormer may be installed in lead compartment of carrying case. When transformer and carrying case are ordered together, transformer will be installed before shipping.

\footnotetext{
Model 900-B-Size: \(91 / 2^{\prime \prime}\) high, \(61 / 4^{\prime \prime}\) wide, \(3^{\prime \prime}\) deep.

Shurite panel meters are attractive, rugged, dependable instruments with accuracy well withim \(5 \%\) All models are metal, telephone-black hnish, all require \(2 \frac{5}{3} 2^{\prime \prime}\) hole. DC meters are polarized-vane solenoid type, AC meters ate double vane repulsion type.

Advantages of this complete line
All-metal dials, age and moisture resistant, lithographed in black on white for high visibility.
Improved design. with new coil frames and at tached insulators for greater rigidity, yet inter changeable in other respects with similar type of nstrument formerly available.

Improved appearance, with concealed coils, full jew scales. and attractive styling and finish.

Guarantee: All Shurite meters are guaranteed to users against defective workmanship and mate ial, antl will be repaired or replaced if sent to the factory postpaid with 256 handling charge within one year after date of purchase.

Model 550-DC, Hush case, narrow ring, round, has long U-bracket.

Model \(550 \cdot \mathrm{AC}\), flush case, narrow ring, round, has ring clamp.

Models 650-DC and 650.AC, flush case, wide round flange, have screw holes for mounting, hardware
included.

Models 950.DC and 950.AC, flush case, square flange, have screw holes for mounting. hardware ncluded.

\section*{IMPORTANT—How To Order:}

For all standard models, give: (1) Model Number, (2) Range, (3) Stock Number. If Model number and stock number are not stated, Model 550 will be supplied.

ZERO ADJUSTERS(Z)
Zero Adjusters are available only on Models \(550-\mathrm{DC}\) and \(650-\mathrm{DC}\). No zero adjuster on Model 950 . When ordering, add \(Z\) to stock number. Example: Stock number for Hode 550 -DC voltmeter, \(0-1\) volt range-withou zero aduster is 5101. With zero adjuster, it

PANEL CALIBRATION (S)
Meters are calibrated for non-magnetic panels. If for magnetic (steel) panel mounting, specify thickness and overall size of panel, as \(5101-\mathrm{S}\) If thickness of panel is ordering. fied meter will be supplied for 040 panel
(Prices shown ars net for Individually boxed meters)

\section*{Instruments}

\section*{INSTRUMENT AND TESTER SWITCHES (LAMINATED)}

Rotary Selector - Single and Multi-Gang - Non-Shorting and Shorting*

SS-14-2 The switch that's IN LAST PLACE on the troubleshooter's check list . . . AND PROUD OF IT!
J-B-T Instrument Type Rotary Selector Switches were designed and developed to meet the need for trouble-free, dependable performance in hard service. These superior switches are used extensively in high quality test equipment, portable instruments, inspection setups and experimental circuits. Available in two basic types- 14 and 20 position-the design gives extra contacts in minimum space. One to six decks.
FEATURES:
Reliability-Rigid, 3-post deck suspension, instead of the usual \(2_{\text {i }}\) all parts heavily coin silver plated to meet 200 hour salt spray test; ball bearing action, beryllium-copper spring, and special design detent wheel assure positive indexing. Laminated plastic decks and rotors selected for maximum mechanical and dielectric strength.
Exceptional Compactness-14-position switch takes 13 circuits and "oft" in 2 ", circle, 20 -position switch handles 19 circuits and "off" in \(2-23 / 32\) "' circle. Additional decks require only \(5 / 16^{\prime \prime}\) spacing per section.

SS-20-2

Low Contact Loss-Doublengrip collector arms, and large-area contacts, silver to silver, result in on average contact resistance of .007 ohms or less during the useful life of the switch.

Ample Dielectric-Normal make-and-break with resistance load, 25 Ma . al 300 volts AC or DC; normal carrying capacity (not

BASIC 14-POSITION: Knob supplied only on individually packed units-not on bulk orders unless specified. Collector arm placed directly opposite to flat of shaft, unless otherwise specified. Contact lugs and common lugs positioned as shown, 13 contacts per deck. One to six decks; for each additional deck (or gang) add \(5 / 16^{\prime \prime}\) to depth. Continuous rotation type supplied unless otherwise specified. Adjustable Stop supplied when requested Panel Locator available on special order. Special stabilizing end ring used on switches with three or more decks. Panel locator positioned as shown unless otherwise specified on bulk orders.

BASIC 20-POSITION: Knob supplied only on individually packed units-not on bulk orders unless specitied. Collector arm placed directly opposite to flat on shaft, unless otherwise specified. Contact lugs and common iug positioned as shown, 19 contacts additional deck, add \(5 / 16^{\prime \prime}\) to depth. Continuous rotation type supadditional deck, add \(5 / 16^{\prime \prime}\) to depth. Continuous rotation type supshown unless otherwise specified on bulk orders.

\section*{BRAND NEW! MOLDED ROTARY SELECTOR SWITCHES}

\section*{Fully Enclosed - Single and Multi-Gang - Shorting and Non-Shorting*}

- All moving contacts enclosed - eliminates dirt and corrosion.
- Contact lugs permanently integrated into switch assembly.
- Sturdy construction with 3-post deck suspension, double grip collector arms, and rectangular drive shaft through decks for precision indexing.
- Interchangeable, electrically and mechanically, with J-B-T. 14 - and 20 -position laminated switches, widely used by industry and Armed Services.

\section*{FEATURES:}

For description of rigid 3-post construction; heavy coin

MS-20-1 tional compactness: 007 ohm averater plating to meet 200 -hour salt-spray test; excep page on SS-14 and SS-20 laminated from the laminated construction in the molded switches differ quickly identifies the superior quality of J.B-T of the detent mechanism, but both types provide the positive indexing which

BASIC 14-POSITION MOLDED (MS.14): 13 circuits and "off" per deck in \(2^{\prime \prime}\) circle for compactness. Molded end cover regularly supplied on MSi-14 series. Knob included with individually boxed units - not on bulk orders unless specified. Collector arm placed directiy opposite to flat of shaft, so that knob pointer points to live contact. Common or "off" contact lug is bent down for ready identification. Internal construction: double-grip collector arms hold contact lug on upper and lower surfaces; collector ring is self-wiping. One to six decks add wh per deck (or gang) to depth. for special orders beyond six decks indexing mechanisms at top and bottom of switch are recommended, adding l" extra to overall depth. Continuous rotation type supplied unless adjustable stop (type MAS) is ordered or, on quantity orders, preset fixed stops are speciified. Panel locator is available on quantity orders stops are speciried. Panel locator is available on quantity orders
when specified. on MS-14-4 and MS-14-6, extra hex nut and longer screw are supplied for inverting supporting screw nearest common, thus converting into panel locator
BASIC 20-POSITION MOLDED (MS-20): 19 circuits and "off" per deck in \({ }^{2}\). supplied. Knob included with individually boxed units - not on bulk orders unless specified. Collector arm placed directly oppoSite to flat of shaft, so that knob pointer points to live contact. Common or "off" contact lug is bent down for ready identification Internal construction: double-grip collector arms and self-wiping Collector ring are standard construction. One to six decks; add \({ }^{\text {b/" }}\) "per deck (cr gang) to depth. Continuous rotation type supplied; on quantity orders, pre-set fixed stops are available. Panel locator available on quantity orders when specified; on MS-20-4 and MS-20-6, extra hex nut and longer screw are supplied for in verting supporting screw nearest common, thus converting into panel locator

\section*{APPLIANCE TEMPERATURE TESTERS}

A NEW IDEA IN TESTERS - The need for scientific but sturdy portable test equipment in the appliance service field is met by this exclusive line. Here the user profits from J-B-T's wide experience in building field test sets for many well-known manufacturers of ranges, irons, refrigerators, deep freeze units, and similar equipment. All J-B-T testers include the principle of remote reading of temperature.-and temperature measures the real usefulness of the appliance.

MODEL 32-JP-4. Checks oven temperature of gas and electric ranges and other appliances Ideal for testing and setting thermostats. Has bincing posts for quick attachment of thermocouples listed below to check irons, toasters, waffle-bakers, roasters, clothes dryers, etc. Exceptionally fast, continuous response; automatically compensates for ambient temperature. For full details see Bulletin JP-104. Range \(0-650^{\circ} \mathrm{F}\); black leatherette case \(6^{\prime \prime} \times 37 / 8^{\prime \prime} \mathrm{x}\) \(33 / 4^{\prime \prime}\). Complete with SA-116 \(51 / 2^{\prime}\) calibrated thermocouple, clip for attaching to grill, and convection shield for steady readings..... \(\mathbf{\$ 2 3 . 7 5}\)

MODEL 32-JP-3. A very popular oven tester with all the features of Model 32-JP-4 except that no carrying strap is included, and the thermocouple supplied is attached permanently instead of to binding posts. This model is extensively used for service work, sales demonstrations and inspection. Range \(0-650^{\circ}\) Fahrenheit; \(10^{\circ}\) divisions readable to \(2 \frac{1}{2}{ }^{\circ}\); automatically compensated for ambient temperature. For more details, see Bulletin TP-103. Complete with attached SA-1 \(1651 / 2^{\prime}\) calibrated thermocouple, clip and shield............. \(\mathbf{\$ 2 2 . 7 5}\)

MODEL 61-JRT. This 9 -in-1 tester is the very latest for accurate temperature adjustment and precise electrical circuit analysis. For ranges, refrigerators and many other appliances. Rapidly reads four cold zones, \(-100^{\circ}\) to \(+80^{\circ} \mathrm{F}\) up to 14 distant; two heat zones, \(0-600^{\circ} \mathrm{F}\), up to \(51 / 2^{2}\) distant; one voltage range, 0-300 A.C.; and, with transformer, two current ranges, \(0-30\)
 and \(0-60\) amps., A.C. Sturdy, polished walnut case \(151 / 2^{\prime \prime} \times 10^{3 / 6^{\prime \prime}} \times 43 / 4^{\prime \prime}\) ished walnut ase \(151 / 2^{\prime \prime} \times 11_{16}^{3} \times 43 / 4^{\prime \prime}\). Separate switches protect bulb and ammeter circuits. Requires one standard flash-light cell, replaceable in the field. Temperature one standard flash-1ight cell, replaceable in the field. emperarure
scale accuracy \(\pm 2 \%\) of full scale. A.C. readings \(\pm 5 \%\) ( \(\pm 3 \%\) for scale accuracy \(=2 \%\) of full scale. A.C. readings \(\pm 5 \%\) ( \(\pm 3 \%\) for rectifier). Space for four SA-162 Resistance Bulbs with 14 poly-
ethylene lead, two SA-116 thermocouples with clip and shield, one ethylene lead, two SA-116 thermocouples with clip and shield, one pair of \(4^{\prime}\) electrical leads with prods and plugs, 6 jumper leads,
and enclosed transformer. Other accessories, listed below, may be added for testing irons, grills, roasters, toasters, etc. As deseribed, except including two SA-162 resistance bulbs, two SA-116 thermocouples, necessary electrical leads, and ASTR-2 built-in transformer ..............................................................
MODEL 61-JRT (LESS TRANSFORMER). Same unit, same scales, except does not read in amperes; AS-TR-2 transformer assembly

\section*{IRON TESTER}

MODEL 32-JIT. Self-contained bench type tester; checks till makes of type tester; checks tall makes of irons; measures thermostat temperatures; and shows open or short circuits. Automatically compensated for room temperature. Also indicates operating temperature of the sole plate (working surface) on non-electric or cordless irons. Black metal case; overall size \(10^{\prime \prime} \times 12^{\prime \prime} \times 51 / 2^{\prime \prime}\) scale \(0-650^{\circ} \mathrm{F}\), 15 amp . fuse, 6 cord, 110 -volt, 50 - 60 cycles......... \(\$ 28.75\)

\section*{ATTACHMENTS AND SPARE PARTS}

\section*{THERMOCOUPLES}

SA-116 with SHIELD and CLIP. Flexible No. 22 gauge iron constantan, asbestos insulated, \(51 / 2^{\prime}\), with attachment clip and convection shield; for use with Models 32-JP-1, 32-JP-2, 32-JP-3 and 32-JP-4 oven testers; also 60-JRT and 61-JRT all-purpose testers.
\(\$ 1.65\)
SA-175 (PLAIN TIP). For roasters, waffle irons, etc., \(51 / 2^{\prime}\) iron constantan flexible No. 22 gauge, asbestos insulated, with small ball tip; used where clip and shield of SA-116 not suitable; for Models 32-JP-2, 32-JP-4, 60-JRT, and 61-JRT.
\$1.30

SA-176 (for TOASTERS, etc.) \(51 / 2\) iron constantan No. 22 gauge, asbestos insulated, with special disc to collect heat; easily attached to \(32-J P-2\) and \(32-J P-4\) oven testers, also \(60-J R T\) and 61 -JRT.

SA-300 (FOR SURFACE READINGS). Spring-type iron constantan in Tran-
 site tip with handle and 5' No. 22 gauge lead for extremely rapid heat readings; for attachment to 32 -JP-3, 32-JP-4, 60-JRT and 61-JRT appliance testers
\(\$ 5.00\)

SA-301 (REPLACEMENT TIP FOR
SA-300). Transite tip and thermat element only
\(\$ 2.50\)

IRON TESTER THERMOCOUPLE, MODEL IT-1. This attachment is identical with the 32-JIT, except there is no meter. It is easily connected to Models 32-JP-2, 32-JP-4, 60-JRT and 6l-JRT. Shows open circuits and shorts, checks sole plate temperatures and thermostats on all types of irons.

SA-170 (REPLACEMENT THERMOCOUPLE for IRON TESTERS 32-JIT and IT-1). Thermocouple and lead, including aluminum plate and special tip, quickly installed in the field

\section*{RESISTANCE BULBS (FOR COLD TESTING)}

SA.142. For use only with Model 60-JRT; calibration is not interchangeable with SA-162; has no embossed number........................... \(\$ 50\)

SA-162. For use only with Models \(50-50\) and \(61-\mathrm{JRT}\); identified by embossed part number.

CL-90 CLAMP. Metal clamp for holding SA-142 and SA-162 resistance bulbs in contact with surfaces up to \(1 / 4^{\prime \prime} \ldots . . . . . . . . . . . . . . . . . . . .25\)

\section*{TRANSFORMERS}

AS-TR-2. Attachment for compartment of 61-JRT all-purpose tester, Amplety housed, with jumper lead and panel; reads 30 and 60 AC amp. scales on tester
(u) 15.00 AS-TR-3. Attachment for increasing usefulness of 60-JRT all-purpose tester. Includes side rails for attaching inside compartment; fully housed. Reads 30 and 60 AC amp. by dividing volt scale by 10 or 5 ...-

Instruments JBI Testers
}

\section*{TEMPERATURE INDICATORS}

\begin{abstract}
WHERE TO USE: To check heat rise of motors, trans formers and coils; for laboratory furnaces, inspection set-ups, for remote indication of infra-red and other oven temperatures: and to maintain controlled industrial processes such as heat treating and annealing. When used with selector switch, permits centralized reading of one to ten thermocouples, as in Diesel exhaust manifold applications.
\end{abstract}

MODEL 32-J
MODEL 32-J PYROMETER IN SN-3 STAND. Mounted in sloping front black metal stand, \(41 / 4^{\prime \prime}\) high \(\times 43 / 8^{\prime \prime}\) deep x \(41 / 8^{\prime \prime}\) ' wide. Compensated for ambient temperature. Medium resistance system, damped for quick reading on \(2^{3 / 2}\) scale, assures ruggedness and pointer stability. To retain the accuracy of the installation: use only the type and resistance of thermocouple and lead which are provided; do not cu in length changes calibration n length changes calibration. A protection tube is not generally required. Many users find it convenient to keep an extra couple and lead on hand.

\section*{MODEL 32-J IN SN-3 STAND}
\(0^{\circ}-650^{\circ} \mathrm{F}-350^{\circ} \mathrm{C}\), includes SA- 91 thermocouple, SA-84
lead, and CB-1 connector block...

\(0^{\circ}-1200^{\circ} \mathrm{F}-650^{\circ} \mathrm{C}\), includes SA-87, SA-82, and CB-1 \(\$ 27.50\) \(0^{\circ}-2000^{\circ} \mathrm{F}-1100^{\circ} \mathrm{C}\), includes SA-87, SA-82, and CB-1 \(\qquad\) 27.50

MODEL 32-J IN SN-5 STAND (not illustrated). With 3 binding posts to accommodate flexible extra lead and thermocouple for hard-to-reach locations.
\(0^{\circ}-650^{\circ} \mathrm{F}\) with SA-91 thermocouple, SA-84 lead, CB-1 connector block, and SA-86 flexible lead and thermocouple
\(\$ 31.00\)

\section*{TEMPERATURE}

LEAD WIRES. To bring the reference junction within the pyrometer, compensating or extension lead wires should always be used. See the instrument dial for (1) the kind of lead and (2) combined resistance of lead and thermocouple. Standard leads include:
SA-82 \(6^{\prime}\) compensating lead for chromel-alume! couples; duFlex, stranded; asbestos-insulated, cotton-braid impregnated with moisture-proof and flame-proof compound, terminals at instrument end; other end tinned for connector block ....... \(\$ 1.40\) SA-83 \(26^{\prime}\) compensating lead for chromel-alumel as above SA-84 \(6^{\prime}\) extension lead for iron-constantan, 1938 calibration; duplex; moisture-proof and flame-proof; prepared as above
SA-85 \(26^{\prime}\) extension lead for iron-constantan, 1938 calibration similar to above ... .......................................................................... \(\$ 4.40\) SA-86 \(7^{\prime \prime}\) iron-constantan thermocouple and lead combined; twisted pair No. 20 Ga., asbestos-insulated-for intermittent use on \(600^{\circ} \mathrm{F}\) scales; terminals at instrument end other end welded; (resistance is not interchangeable with SA-84 nor with SA-85) .. \(\$ 1.70\)

\section*{\(\overline{\square \square \square \square \square \square \square}\)}

THERMOCOUPLES. For pyrometers and leads above, J-B-T thermocouples are carelully selected, standardized, and tested. SA-87 12" No. 14 Ga. chromel-alumel, 2-hole ceramic beads, fits \(5 / 16^{\prime \prime}\) hole; welded tip
SA-88 same except \(24^{\prime \prime}\) No. 14 Ga. ............................................ \(\$ 3.50\)
SA-89 12.' No. 8 Ga. chromel-alumel, 2-hole ceramic beads,
fits 716 hole; welded tip ................................................................ \(\$ 2.80\)
SA-90 same except \(24^{\prime \prime}\) No. 8 Ga . ............................................ \(\$ 3.50\)
SA-91 12" No. 14 Ga. iron-constantan, 1938 calibration; 2-hole ceramic beads, fits 5/16.", hole; welded tip ..................... \(\$ 2.35\)

\section*{MODEL 60-JPS}

MODEL 60-JPS. This portable makes it easy to know temperatures at one to ton locations. Excellent for study of heat in various parts of the same equipment, or in a battery of units. Knife-edge pointer, \(5.6^{\prime \prime}\) scale. Heavyduty thermocouple switch has average contact resistance of .00075 ohms or less. Automatically compensated for ambient temperature, indoors or outdoors. To retain accurcicy of \(1 \%\) full scale, use leads and thermocouples equal to resistance and e.m. E.vs-temperature characteristics for which instrument is calibrated. Medium resistance system assures part
 ability Housed in natural-finish wood
case \(13^{\prime \prime} \times 8 / 8^{\prime \prime} \times 45 / 8^{\prime \prime}\) over rubber feet. A "must" for inspection, maintenance, and engineering \(60-\mathrm{JPS}-0^{\circ}-600^{\circ} \mathrm{F}\) with SA-86, \(7^{\prime}\) thermocouple and lead
for small apertures
\(60-\) JPS \(-0^{\circ}-1200^{\circ} \mathrm{F}\) with SA-88, SA-82, and CB-1..................... 95.00
\(60-\mathrm{JPS}-0^{\circ}-2000^{\circ} \mathrm{F}\) with SA-88, SA-82, and CB-1............. 95.00
\(60-\mathrm{JP}\)--For one thermocouple only; furnished with thermocouple
and lead same as 60-JPS, but without selector switch.
\(00^{\circ}-600^{\circ} \mathrm{F}\), with SA-86
\(60-\mathrm{JP}-0^{\circ}-1200^{\circ} \mathrm{F}\), with SA-88, SA-82, and CB-1................................... 70.00
\(60 . \mathrm{JP}-0^{\circ}-2000^{\circ} \mathrm{F}\), with SA-88, SA-82, and CB-1............................ 70.00
Note: When ordering additional thermocouples, specify couples and leads as above. Centigrade equivalent scales available

\section*{Model 70-J}

MODEL 70-J PYROMETER, for accurate reading at a distance, has full \(6^{\prime \prime}\) scale and spade pointer, with accuracy of \(1 \%\) of total scale deflection. Automatically compensated tor ambient temperature. Molded case mounted in metal protecting shell \(73 / 8^{\prime \prime}{ }^{\prime \prime} \times 81 / 8^{\prime \prime}\) metal protecting shell \(11 / 2^{\prime \prime}\). Connections through bottom of case for wall or through bottom of case for wall or tront-ot-board mounting. When orstd. I-C: \(0^{\circ}-1200^{\circ} \mathrm{F}\) for C-A;

PRICE including 24, thermocouples
RICE, including 24' thermocouple and \(26^{\circ}\) lead........................ \(\$ 60.00\) Note: Centigrade equivalent scales available on order.

\section*{ACCESSORIES}

CONNECTOR BLOCK Model CB-I. Lava connector block, withstands high temperatures, accommodates all thermocouples up to No. 6 Ga. Heavy brass connectors keep contact resistance low. Can be used independent of connector used independent of connector

\(\square\)

CONNECTOR HEAD Model CH-6. Connector head encloses connector block and rigidly supports protection tube around thermocouple. Opens for thermocouple inspection without disthermocouple. connecting circuit. Normally supplied with reducing bushing permanent \(1 / 2^{\prime \prime}\) conduit installation. Including block............ \(\$ 2.50\) PROTECTION TUBES protect and support "base-metal" thermocouples such as above. Used in permanent installations at higher temperatures, or in damaging atmospheres. One end is closed, other end normally threaded for \(1 / 2^{\prime \prime}\) i.p.s. Proper quality of tubing is very important.
No. 1 Wrought Iron-For temperatures to \(1200^{\circ} \mathrm{F}\) in oil baths, \(\begin{array}{ll}\text { brazing } \\ \text { TU-11 No. } & \text { nd general intermittent } 12 \text { duty. } \\ \text { inches } \$ 1.50 & \text { TU-12 No. 1-24 inches } \$ 2.00\end{array}\) No. 7 Alloy- \(27 \%\) chromium, iron; seamless drawn tube; for cyanide pots, salt baths with cyanide, open fire with sulphurous content; to \(2300^{\circ} \mathrm{F}\).

Note: For temperatures above \(2300^{\circ}{ }^{\circ}\); platinum, platinum-rhodium thermocouples are available.

\section*{VIBRATING REED FREQUENCY METERS (patented)}

J-B-T Vibrating Feed Frequency Meters are used extensively in radio, telephone, and television service, on engine generator sets, in laboratories, in many types of electronic equipment, on panel and control boards in central stations and industricl plants-wherever constant or known frequency is important to elficient operation of equipment.

\section*{PRINCIPLE OF OPERATION:}

Simple in design, the J-B-T Meter consists of a case, base, dial and central mounting frame, with a series of spring steel reeds screwed to a reed mounting bar, individual driving coil surrounding each bank of reeds, permanent magnet, series resistor and terminal studs.
Each reed is adjusted to respond by resonance to but one frequency. As the alternating current (or interrupted direst current) excites the driving coil, the one reed "in tune" with the frequency in the coils will respond by vibrating rapid.y because of permanent magnet polarization and induced magnetism from the coil. The instrument is adapted to specitied operating voltage by a series resistor. Frequency of the current is read on the graduated face of the instrument.

\section*{ADVANTAGES:}

Some standard models are available in either half cycle or full cycle steps, as shown below on two meters indicating a frequency of 60 cycles.

Above: Models 30-F, 31-F, 33-F, 34-F; Metal Case
Below: Models 30-FX, 31-FX, 33-FX, and 34-FX; Molded Case Meets Mounting Dimensions of JAN-1-6 and AWS

Both response patterns are extremely easy to read. In the halfcycle instrument the response is broad; in the full-cycle instrument the response is sharp.
Guaranteed accuracy of \(\pm 0.3 \%\) or better of the frequency being measured, depending on the model. High fatigue safety factor for continuous operation, and outstanding temperature stability. Temperature compensators are not required.
All meters are permanently calibrated at the factory and do not require subsequent adjustment. Accuracy is not affected by wave form or external magnetic fields. Built with no pivoted parts and with lock washers at every critical point, these rugged meters can take rougher treatment than many instruments.

\section*{CAUTION:}

If a meter plugged in on a 60 cycle AC power line does not indicate a frequency of exactly 60 cycles, trust the meterl Power supply may momentarily be off-frequency due to changing load conditions beyond the control of Utility. All J-B-T Vibrating Reed Frequency Meters are accurately calibrated at the factory, entirely independent of frequency of power supply.

\section*{MODEL 31-F}

Used in standby power equipment. Handy for accurately measuring frequency of power source. Five reeds, 58-62 cycles. Other characteristics same as Model 30-F. For details, Bulletin VF-43).
31-F, 58-62 cy., 31/4" Metal Case ……...................... \(\$ 21.50\) 31-FX, 58-62 cy., 31/2" Molded Case, AWS mtg.
\(\$ 21.50\)

MODEL 34-FX

\section*{MODEL 30-F}

Range: 48-52 and 58-62 cycles. Double window for ease of reading frequency in either range. Often specified for export. \(100-130\) volts; 130 ohms per volt; 1 watt power consumption. Accuracy \(\pm 0.3 \%\). Flush panel mounting. For details, Bulletin VF-43.
30-F, 48-52 and 58-62 cy., \(31 / /^{\prime \prime}\) Metal Case .................. \(\$ 25.00\) 30-FX, \(48-52\) and \(58-62\) cy.. 31/2" Molded Case, AWS mtg. .............................. \(\$ 25.00\)

MODEL 31-F
MODEL 34-FX
Used where a broader frequency band is desirable. Nine reeds, \(56-64\) cycles, or in half-cycle steps (accuracy \(\pm 0.2 \%\) ) 58 - 62 cycles. \(100-130\) volts; 130 ohms per volt; 1 watt power consumption. Flush panel mounting. For details, Bulletin VF-43.

\title{
Instruments JBI \\ Testers
}

\section*{MODEL 33-F}

400 -cycle. Used for measuring frequency of high-cycle power sources, including new heavy aircraft. Accuracy \(\pm 0.3 \%\). Nine reeds, 380 to 420 -cycle range. 100-130 volts; 70 ohms per volt; 1.75 watts power consumption. Flush panel mounting. For details, see Bulletin VF-43-1A. 33-F, 380-420 cy., 31/4" Metal 33-FX, \(380-420\) cy., \(31 / 2^{2 \prime \prime}\) Molded Case, AWS mig. ..................... \(\$ 31.00\)

\section*{MODEL 21-FX}

\section*{Smallest frequency meter manu-} factured. Meets ASA (AWS)
 well as in mounting dimensions and mounting hardware. Matches other \(2 \frac{1}{2}{ }^{\prime \prime}\) panel instruments. Weighs only \({ }^{41 / 2}\) oz.
\(100-130\) volts; 5 reeds; \(58-62\) \(\begin{array}{ll}\text { 100-130 volts; } 5 & \text { reeds; } \\ \text { cycles; } & 58-62 \\ \text { ohms per volt } & 0.6\end{array}\) cycles; 190 ohms per volt;
watt power consumption. Also 116 to 124 cy.i 160 ohms per volt; 0.7 watt power consump-
tion. 390 to 410 cy.; 85 ohms per volt; 1.3 watts power consumption. Flush panel mounting. For \(21-\mathrm{FX}, \quad 58-62 \mathrm{cy} \quad 2-.11 / 16^{\circ}\) Molded Case 21.FX, \(116-124 \quad\) CY., \(\quad 2-11 / 16^{\prime \prime}\) Molded Case, AWS mitg. \(\$ 23.00\) \(\begin{array}{lrrr}\text { 21-FX, } & 390-410 & \text { cy., } & 2-11 / 16^{\prime \prime} \\ \text { Molded Case } & \ldots\end{array}\)

PORTABLE FREQUENCY TESTERS

MODEL 33-FP-9L. Handy, compact, portable instrument of exceptioncl accuracy even under poor wave-form conditions, fluctuating voltage or erternal magnetic disturbances. Meets exacting test requirements of aviation, signal and communication equipment. Housed in sturdy molded case \(57 / 8^{\prime \prime} \times 3,1^{\prime \prime} \times 25 / 8^{\prime \prime}\) with leather
 plete with sharp \(5^{" ~ i n s u l a t e d ~ t e s t ~ p i c k s ~ a n d ~ b a n a n a ~ p l u g s . ~ E l e c-~}\) trical characteristics identical with 400 cycle 33-F. Model 34-FP-9L electrical characteristics identical with 60 -cycle \(34-\mathrm{FX}\).
33-FP-9L, \(380-420 \mathrm{cy}\). (Supersedes Model 33-FP-9). \(\qquad\) \(\$ 43.25\)
37.00

\section*{ELAPSED TIME-FREQUENCY METER}

MODEL 31-FE. A unique panel ingtrument which combines the elapsed time meter or running time meter with frequency reeds. It is especially useful on motor generator sets and on elec"rical equipment where maintenance where maintenance routine calls for periodic servicing. cles at l10-130 volts. Selfcles at
starting.
31-FE
\(\$ 30.00\)

\section*{VACUUM TUBE FREQUENCY METERS \\ (PATENTS PENDING)}

PRINCIPLES OF OPERATION: J-B-T Models \(33-V T F\) and \(39-\) VTF Vacuum Tube Frequency Meters provide the maximum degree of accuracy in measuring frequencies located within definite bands. A multi-vibrator circuit in the electronic unit divides the incoming frequency by two, three or higher integers, then measures resultant frequency on a reed instrument.
WHERE USED: These models are especially useful for checking audio-oscillators, frequency converters, radar equipment, and for standardizing less accurate frequency measuring units.
ADVANTAGES: Extreme Accuracy: Within \(\pm 0.25 \%\) for any indicated frequency. Permanent Accuracy: Calibrated at factory no subsequent calibration or standardization required. Temperature Drift Eliminated: No initial stabilization period required. Burn-Out Prooi: No protection needed aqainst accidental frequencies above the range being measured. Few Controls: No complicated operation. Stability of Circuit: Accuracy of reading is independent of line voltage variation. No voltage regulator, external or internal, is required.

Model 33-VTF with cover removed. Vacuum tube unit attaches to rear of panel، meter is flush.

\section*{MODEL 33-VTF, FIELD TYPE}

Frequency ranges: \(380-420\) cycles; \(\quad 760-840\) cycles;
cycles; 1140-1260 cycles; availa able singly or in combination. (See Model 33-F for single range 380 420 cycle meters). Voltage range: \(100-130\) vonge: Power to operate the units is obtained from an Inverter or other source of frequency being measured. Power consumption: approximately 20 watts. This model requires no power supply other than the source whose frequency is being checked. Input impedance: approximately 650 ohms. Tubes used: 1-6N7-GT/G multi-vibrator; 1-6V6-GT/G amplifier; I-6X5-GT/G rectifier. Size \(45 / 8^{\prime \prime} \times 51 / 2^{\prime \prime} \times 6^{\prime \prime}\); weight: approximately 6 lb. Black wrinkle finish. Frequency meter is \(31 / 2^{\prime \prime}\) standard flush panel mounting. Connecting leads included. MODEL 33-VTF

Single range 760-840 cy. ................................................................................................

\section*{MODEL 39-VTF, LABORATORY TYPE}

Frequency ranges: Basic range, \(380-420\) cycles. Multiplier switch permits use in ranges of \(2,3,4\) ase in 9 times the 3, 4,6 and range. ( \(400,800,1200,1600\), 2400 and 3600 cycle bands). Voltage range: \(100-350\) volts. Power consumption: Approximately 25 watts at 115 volts. 60 cycles. Input sensitivity: 500,000 ohms. Size: housed in metal cabinet \(8^{\prime \prime} \times 10^{\prime \prime} \times 8^{\prime \prime}\) with sloping panel.
Model 39-VTF, Series A\(\$ 257.00\)

Model 39-VTF, Series A, showing portability

\section*{ELAPSED TIME METER} MODEL 31-EX. To record operat ing time of 60 cycles, 115 volts A.C. electrical and electronic equipment, this instrument registers in \(1 / 10\) hour steps to 9,999.9 hours, then automatically re-sets. Molded \(31 / 2^{\prime \prime}\) case matches: " X " frequency meters, fully encloses all paris. Popular for tubelife, maintenance schedules tube Iife, maintenance schedules, machine time, etc.
31.EX

Emico Precision INstruments
FOR
PANELS AND TEST SETS
Electro Mechanical Instrument Co. 813 Chestnut Street, Perkasie, Pa.

CALIBRATION-Since the instruments are calibrated in steel cases, their accuracy is not affected by panels made of magnetic materials of nominal thickness.

GUARANTEED-All EMIOO instiments are guaranteed against de fective material and workmanship for a period of one year atter date of purchase, and will be repaired or replaced if sent to the factory postpaid with a 50 c handling charge.

EMICO instruments are avalable in quantities to jobbers or numu facturels in the following sizes: NF-2", RF-2", RF-2 \(1 / 2^{\prime \prime}\), and RF-41/2" at \(3 \sigma_{r}\) acculacy. We invite your inquiries on instrumentc for special application

EMICO panel and test meters are rugged and reliable instrument Cases are of steel and finished in durable black. DC meters have the new HH-TORK magnetic movements and are accurate to well within \(5 \%\). AC meters are of the moving iron trpe and are also accurate to within \(5 \%\)

MOUNTING-All model NF-2C and \(\mathrm{RF} \cdot 2 \mathrm{C}\) meters will fit into \(21^{1}{ }^{\prime \prime}\) diameter hole and are mounted by means of a U. clamp.

DESIGN-EMICO meters are designed to give satisfactory service under the most severe conditions. They are styled to add to the seatige and appearance of electrical equipment.

PRICES-Prices listed are net and include all hardware and individual boxing.

\section*{DU MONT TYPE 164-E 3" CATHODE-RAY OSCILLOGRAPH}
\(\star\) A compact, portable instrument especially suitable for laboratory, shop, or field work. The \(3^{\prime \prime}\) cathode-ray tube operates at an accelerating potential of 1,100 volts, thus providing brilliant, welldefined traces. Both amplifiers have uniform frequency response over their operating range: the single-stage vertical
amplifier has a voltage gain of approximately 43 ; the horizontal amplifier, which serves to amplify either sweep or externally applied signals, has a voltage gain of approximately 55. For added convenience, deflection signals may be applied directly to the cathode-ray tube without removing the cabinet.

DU MONT TYPE 208-B 5" CATHODE-RAY OSCILLOGRAPH

\(\star\) A moderately priced \(5^{\prime \prime}\) instrument embodying many recent improvements that facilitate its application to the great majority of laboratory and production requirements. The Type \(208-\mathrm{B}\) is furnished with a \(5^{\prime \prime}\) intensifier-type, high vacuum tube which operates at an accelerating potential of 1,400 volts, thus insuring trace brilliance. Freedom from
origin distortion, sharp focus at all deflecting frequencies, and a high deflection sensitivity that permits the viewing of moderately low-potential signals without the use of amplifiers, are additional fcatures. The wide-band amplifiers provide symmetric deflection, and are directcoupled to eliminate "electrical backlash" in the position-control circuits.

\section*{DU MONT TYPE 224-A \(3^{\prime \prime}\) CATHODE-RAY OSCILLOGRAPH}
* The wide-range response of this instrument provides faithful reproduction of all wave-forms with steep fronts and resultant large-harmonic content, thereby pernitting the study of signals such as pulses and square waves involving

frequency components as high as 5 megacycles. Numerous combinations of signalinput connections at the front panel provide added flexibility and convenience of operation. A special feature is the provision for intensity modulation of the grid of the cathode-ray tube. Included is a test probe with cable shielded to eliminate stray pickup for high-frequency work.

\section*{DU MONT TYPE 274-A 5' CATHODE-RAY OSCILLOGRAPH}
\(\star\) The Du Mont Type 274-A Cathode-ray Oscillograph was developed as an inexpensive, general-purpose instrument for laboratory, radio service, and educational applications. The Type 274-A serves as an excellent null-indicator on inductance-
capacitance bridges, as a means of viewing voltage waveforms, as an output meter, as a means for measuring time and amplitude of pulses, as an indicator in studies of sound, light, electricity, and electronics, and many for other general applications.

\section*{THE DU MONT TYPE 241 - CATHODE RAY OSCILLOGRAPH}

The Du Mont Type 241, like the Type 224-A is designed as a high frequency oscillograph. Employing a 5 -inch cathode ray tube, the Type 241, however, supplies the operator with greater visibility. The frequency response of the vertical amplifier is uniform within \(30 \%\) to 2 megacycles, and uniform within \(50 \%\) to 4 megacycles. This wide frequency response allows faithful reproduction of signals which are rich in harmonic content. The sensi-
tivity of the instrument, using the Y -axis amplifier, is 0.07 rms volts per inch. The bean-modulation circuit of the Type 241 is equipped with a Z-axis amplifier. Timing markers may be impressed on the trace by applying an intensity modulation signal, of either polarity, to this amplifier. A shielded, high-impedance input probe insures efficient coupling of the signal to the Y -axis amplifier of this instrument.

For Oscillograph Prices and Specifications See Other Side

\section*{DU MONT TYPE 185-A ELECTRONIC SWITCH}

\(\star\) The Du Mont Type 185-A Electronic Switch may be used in conjunction with any oscillograph to observe two related or unrelated signals simultaneously on the screen of the cathode-ray tube. The zero axes of the two signals may be displaced for individual study of either pattern. The two patterns may also be superimposed for comparative studies. A typical application is the use of one channel for the signal to be studied while using the second channel for a timing signal.

SPECIFICATIONS
Switching rate: 10 to 2000 limes/sec.
Frequency response: d-c to 5 kc .
\[
\text { Voltage gain: } 10 .
\]

Input resistance: 0.1 meg. Output resistance: 50,000 ohms. Maximum input voltage: 150 v .

Maximum signal output: 75 v. peak-to-peak.

Dimensions: \(11 \frac{1}{2} 2^{\prime \prime}\) h., \(738^{\prime \prime}\) W., \(13^{\prime \prime}\) d.

\title{
MARION TRULY HERMETICALLY SEALED 21/2" AND 3½" ELECTRICAL INDICATING INSTRUMENTS... \(100 \%\) GUARANTEED!
}

\begin{abstract}
Sealed like a vacuum tube

Marion Glass-To-Metal Truly Hermetically Sealed Electrical Indicating Instruments are guaranteed for six months. You get top performance . . . critical accuracy . . . at a price no higher than that of most competitive unsealed instruments.

Additional economy is offered in Marion's special replacement offer. After the initial six-month guarantee expires, any \(21 / 2^{\prime \prime}\) and \(31 / 2^{\prime \prime}\) type, ranging from 200 microamperes upward, will be replaced, regardless of whether the instrument has been overloaded, burned out, or mistreated . . . provided the seal has not been broken, for a flat fee of \(\$ 1.50\). Instruments with sensitivity greater than 200 microamperes will be replaced for \(\$ 2.50\).
\end{abstract}

\section*{SPECIFICATIONS}

\section*{Model HM2 - \(21 / 2^{\prime \prime} \quad\) Model HM3-3 \(1 / 2^{\prime \prime}\)}
- There are no rubber gaskets, and no cement seals.
- Can withstand all extremes of temperature and humidity, required by any service, or test specification, without deterioration to the seals, or harm to the efficiency of the moving system.
- Windows are of double thickness tempered glass processed for solder seal ing, and are highly resistant to shock.
- Instruments ore completely dehydrated and are filled with dry air at sea level pressure.
- A newly designed crowned crystal permits greater scale length, reduces shadows, and makes for better visibility.
- Magnetic shielding permits interchangeability on any type of panel without affecting calibration; can be supplied silver plated for extra R.F. shielding.
- Silver clad beryllium copper hair springs reduce zero shift at all temperatures.
- Standard Kovar glass bead type terminals with solder lugs.
- Instruments manufactured in accordance with AWS Spec. C-39.2 1944 and JAN I-6 plus hermetic sealing.
- They are positively interchangeable-Type HM2 with AWS Types MR24 and 25; Type HM3 with AWS Types MR 34 and 35.

THE NAME MARION MEANS THE MOST IN METERS

Model 52N
Models 52 N and 52 S are standard \(21 / 2^{\prime \prime}\) class instruments, the 52 N meeting J AN \(1-6\) physical \(5 i m e n s i o n s\) for MR 25 , round series and \(21 / 2^{\prime \prime}\) rectangular types. These instruments have gained popularity in portable radio equipment, packet test equipment and general electrical service where space is at a premium.

Model 52S

Model 53RN

Model 575
Model 57 S is an \(8 \frac{1 / 2^{\prime \prime}}{} \times 7^{\prime \prime}\) instrument with a large open face and an extra long scale. and with a higher torgue movement than other Marion types in order to give maximum performance in an instrument of its size. This instrument is supplied with a very high damping factor and is not just an overcan be supplied with mirror scales.
The 57 S finds wide application in large vacuum tube voltmeters, in multitesters, and as an easily read production instrument in many of the measuring and testing operations that are performed in any electrical or monly used, too, as a production ohm-meter, limit bridge indicator, and In such varied applications as vibration amplitude measurements and automative tire balancing.

\section*{MARION ILLUMINATED DIALS QUICKLY READ!}

Marion's new design of instrument-dial illumination insures brilliance without glare. The technique employs a transparent lucite cavity and an especially developed alnico magnet with a reflector shaped front face that concentrates the rays on the warp-free, permanent translucent dial.

This dial illumination feature is available on all, except Marion Glass-To-Metal Truly Hermetically Sealed Meters.

\section*{MARION STANDARD INSTRUMENTS}

The most important ingredient of Marion design, engineering and construction is simplicity. Our instruments, in special and unusual types as well as conventional models, employ a minimum of parts, each selected for quality and durability. Combined with simplicity of design and engineering, this makes for beffer performance, under severe conditions, over longer periods of time. Whether your requirements demand custom-built or standard instruments, you can depend upon the functional simplicity of Marion designs to provide the most in service and value.

MARION MULTI-RANGE METERTESTER

With self-contained power supply and control equipment for operation on 110 volts, \(A C, 60\) cycles . . . for production testing, and calibration of DC instruments. The MARION METERTESTER is designed with many operational features which will definitely improve the production rates of any meter inspection department. Moreover, its accuracy is such that it may be used for checking purposes in any department and all laboratories employing instruments. It may also be used as a precise source of DC current and voltage. Overall accuracy is better than \(1 / 2\) of \(1 \%\). Basic sensifivity of the Mirror Scale Standard Instrument is 10 milliamperes. The complete unit is housed in a hand-rubbed, solid walnut carrying case.

For use in any department and all laboratories where instruments are employed and their performance must be carefully checked.
With self-contained power supply and control equipment for operation on 110 volts, AC, 60 cycles . . . for producfion testing and calibration of DC instruments. No additional accessories are required. Merely connect the two clips to the instrument under test, and proceed to analyze its accuracy and general performance.

Model 55 Model 55 is a popular test equipment item, having a large case
\(458^{\prime \prime} \times 4 \% a^{\prime \prime}-\) and long \(100^{\circ}\) scale. It is well suited for use in vacuum tube voltmeters, bridges and
volt volt. \({ }^{\text {ohm }}\) - Milliam-
meters. The internal construction is identical with that of the \(53 R N\). Can be supplied with mirror seales for special ap-
plications.

\section*{A SPECIAL SERVICE FOR YOUR INDUSTRIAL CUSTOMERS}

Marion has opened a Short Run Shop for the production of "special" instruments to meet your specifications . . . precision-built units that you can buy in sample lots.

You'll appreciate the savings in time, money and materials that this modern, completely equipped Short Run Shop can achieve for you. The high degree of functional simplicity and critical accuracy which Marion 'Specials" offer, improve product performance . . . make it unnecessary for users to develop their own makeshift instruments with Special characteristics.

Your Marion specials will give the utmost in satisfaction, service and value ... the same high standard of performance that has identified the regular line of Marion instruments for years.

Send us your specifications, we will send you a quotation.

Model 56-6 \(1 / 2^{\prime \prime}\)
Model 56 is a \(61 / 2^{\prime \prime} \times 5 \mathrm{~V} / \mathrm{a}^{\prime \prime}\) bakelite cased instrument of entirely new desion with heavy cross sections to
stand the most rugged use. It filis the need for an stand the most rugged use. It fills the need for an
instrument between Models 55 and 57 s which are 5 Instrument between Models 55 and 57 S which are
and \(B\) inch moters. It has a \(100^{\circ}, 51 / 2\) inch arc and and \({ }^{8}\) inch meters. It has a \(100^{\circ}{ }^{5} / 2\) inch arc and a Supplied with large Alnico if magnets in miliammeter ranges and Alnico \(V\) in the more sensitive microammeter
ranges. Employs a Marion Bulldozer bracket which as ranges. Employs a Marion Bulldozer bracket which as
sures rugged construction and long, dependable service sures rugged construction and long, dependable service,
ideal for equipment which needs a large dial easily read from a distance or with pienty of space for a multirange scale.

NULL INDICATORS
Marion Null Indicators are extremely sensitive shaded pole piece D'Arsonval type galvanometers. They are used primarily as bridge and potentiometer balance indicators and in any applica. sion where an instrument with very high point is desired. We particularly rec. ommend Types HM2 and HM3 because they are hermetically sealed instruments which completely shield the galvanometers from the effects of moisture and in diseriminator alignment of \(F M\) Use. ceivers and as general laboratory bal. ance indicators.

Models 53 RN and 53SN are standard \(31 / 2^{\prime \prime}\) class instruments, the \(53 R N\) meering JAN \(1-6\). Dhysical di,
mensions for MR 35 round series and the 53 SN meeting commarcial standards for the \(31 / 2^{\prime \prime}\) rectar. gular types. Application irrelude radio and electrical switchboards and equileral rar, telegraph and telephone switchboards and general laboratory usage.

Model MC1—4"
Model MCI features the rugged Alnico construction of the Types \(53 \mathrm{RN}, 54 \mathrm{~S}, 55 \mathrm{~S}\), etc., plus the magnetic longer scale than the standard \(31 / 2^{\prime \prime}\) type. Normal aocuracy is \(1 \%\), may be ordered to an accuracy of \(1 / 2 \%\), with hand-marked mirror scales. Every type MCI includes a shatterproof glass window. Applicatlons include finer type of test equipment, switch. extreme rugoedness are required. Available at prices that are unusually economical for an instrument of this quality.

Model 53R fatures the sintered soft iron pole Shoes, heavy Alnico magnet, and excellent overall accuracy. An enlarged face opening permits inclusion special applications. Applications include radio and electrical test equipment, radio, radar, telegraph and teiephone switchboards, and general laboratory assignments.

Model 52 RM is a narrow flange, brass cased instru. ment. (The brass case offers \(R\). \(F\). shielding for Alnico movement and the contains the same rugged common to the 5 and

\section*{BUILD YOUR}
- ACCURATE!
- DURABLE!
- DEPENDABLE!
- A GREAT VARIETY OF SIZES!
When it comes to TEST EQUIPMENT build your own with Marion Multi-Ranger Meters. They will solve your problem of finding reasonably priced instruments with the critical accuracy you demand for test equipment or other auxiliary equipment with multiple functions.

These Multi-Ranger Meters permit you to assemble a highly accurate instrument for use as a voltmeter, milliammeter, high and low resistance ohmmeter, AC voltmeter and decibel meter. Build As Many Ranges As You Desire.

All instruments use Alnico Magnets, have full \(100^{\circ}\) three-color scales, feature the new, tough Marion "Bulldozer" moving system that insures long life under severe operating conditions plus the highest degree of accuracy.

\section*{Contains: 18 Resistors Ranging from .4 Ohms to} 750,000 Ohms. A Schematic Diagram for Constructing Your Own Test Equipment.

\section*{STERLING PANEL FOR USE ON DIRECT AND ALTERNATING CURRENT A COMPLETE MODERN LINE}

These improved STERLING Panel Meters while retaining the accuracy, beauty and ruggedness which have always characterized STERLING instruments, show a modern trend in the gracefully unique arrangement of the broader and more clearly defined scales. The meters for alternating current and direct current are perfectly matched and therefore suitable for mounting on the same panel. Both the A.C. and D.C. meters are of the permanent magnet, iron vane, solenoid type. This affords positiveness of action and breadth of movement suggestive of those of the D'Arsonval type. The large needle-tipped pointers and wide clearly marked scale divisions of these panel meters make them easily read.

STERLING Panel Meters may be had in any of the types illustrated.

> SPECIAL COMBINATION A.C.-D.C. METERS WITH HAIRSPRING REPULSION TYPE MOVEMENT FITTING SAME C.ASES, ARE ALSO AVAILABLE.

Standard package, 100 meters, Shipping weight 30 lbs.
ALL STERLING Panel Meters are guaranteed accurate within \(5 \%\).

List Price, \(\$ 3.25\)
No. 39A Voltmeter for 90 v . and 135 v . "B" batteries and 1.5 v . "A" batteries. Scale \(0-150\) v., 5 v . div. Scale \(0-2 \mathrm{v} ., 1 / 10 \mathrm{v}\). div. Tests 90 v . and 135 v . "B" batteries and \(11 / 2\) v. "A" batteries List Price, \(\$ 3.25\)
No. 40A Voltmeter for 90 v . and 135 v ." " B " batteries and \(4.5 \mathrm{v}, 6 \mathrm{v}\). and 7.5 v . "A" batteries. Scale \(0-150 \mathrm{v} ., 5 \mathrm{v}\). div. Scale \(0-10 \mathrm{v} ., 1 / 5 \mathrm{v}\). div. Tests 90 v . and 135 v . "B" batteries and \(41 / 2 \mathrm{v}, 6 \mathrm{v}\). and \(71 / 2 \mathrm{v}\). "A" batteries ...........................................................ist Price, \(\$ 3.50\) No. 42A Graphic General Tester. Red and Green color chart for all standard batteries including 45 v . and 90 v . " \(B\) " batteries and 1.5 v ., 4.5 v ., and 7.5 v . "A" batteries. \(0-100 \mathrm{v}\). scale for special sizes of "B" batteries, 5 v . div. Tests all Portable Radio batteries.

List Price, \(\$ 6.00\)

\section*{Testers for Hearing Aid Batteries}

No. 31A Donble voltmeter for special 30 or 45 v . "B" batteries and \(11 / 2 \mathrm{~V}\). "A" batteries, scale \(0-50 \mathrm{v} ., 1 \mathrm{v}\). div., scale \(0-2 \mathrm{v} ., 1 / 10 \mathrm{v}\). divisions. Carefully engineered to impose the correct loads on the small delicate batteries used to operate vacuum tube hearing aids. Equipped with new STERLING flexible plugs List Price, \(\$ 3.50\) No. 531 Plug-in-Safety type donble voltmeter for testing learing aid batteries. This new tester has the same capacity and scales as the No. 31A. No cord is necessary because the rigid plug-in type terminals are designed to fit hearing aid batteries having accessible keyed sockets. This arrangement makes it impossible to overload the No. 531 instrument or reverse the polarity while it is being used for testing hearing aid batteries

List Price, \(\$ 3.50\)
No. 32A Double Voltmeter for special \(221 / 2\) or 30 v . "B" batteries and \(11 / 2 \mathrm{v}\). "A" batteries, scale \(0-35 \mathrm{~V}\)., 1 v . div., scale \(0-2 \mathrm{v} .1 / 10 \mathrm{v}\). divisions. Equipped with new STERLING flexible plugs.

List Price, \(\$ 3.50\)
Meters \(21 / 4^{\prime \prime}\) in diameter and \(5 / 8^{\prime \prime}\) thick. Nickel finish. Standard package, ten instruments, ship. wt. 4 lbs.

\section*{WESTON INSTRUWENTS}

MODEL 769 HIGH FREQUENCY ELECTRONIC ANALYZER
A versatile three-in-one instrument built to Weston standards of quality. Provides a conventional Volt-Ohm-Milliammeter, a high impedance Electronic Volt-Ohmmeter, and a stable, probe type Vacuum Tube Voltmeter for use to 300 megacycles. RF and special D-C probe supplied.
Complete stability is attained on all ranges from 3 to 1200 Volts and 200 Ohms to 2000 Megohms full scale.

\section*{RANGES}

\section*{VOLT-OHM-MILLIAMMETER}

D-C VOLTS (at 10,000 ohms per volt) \(3 / 12 / 30 / 120 / 300 / 1200 . \dagger\)
A-C VOLTS (at 1,000 ohms per volt): \(3 / 12 / 30 / 120 / 300 / 1200\).
DECIBELS: -6 to +62 in six ranges: 1 milliwatt, 0 level, 600 ohm line.
D-C CURRENT: 300 microamperes 1/1.2/6/30/120/600 ma.
RESISTANCE: \(2,000 / 20,000 / 200,000\) ohms full scale. \(20 / 200 / 2,000\) ohms center scale.
ACCURACY: D-C \(\pm 3 \% \quad\) A.C \(\pm 5 \%\)

\section*{For higher ranges}
to 6000 volts d-c
to 6000 volts 0 -c
Type 4 Televerter
Type 4 Televert
at \(\$ 21.00\) net.

PROBE TYPE VACUUM TUBE VOLT METER
A-C VOLTS: \(3 / 12 / 30 / 120\).
DECIBELS: -6 to +42 in four ranges. 1 milliwatt, 0 level, 600 ahm line.
ACCURACY: \(\pm 5 \%\) (direct reading) at 50 cycles to 150 megacycles. \(\pm 12 \%\) (direct reading) at 150 to 300 megacycles.
\(\pm 8 \%\) (with correction curve) at 150 to 300 megacycles.

ELECTRONIC VOLT-OHMMETER
D-C VOLTS: \(\pm 3 / 12 / 30 / 120 / 300 / 1200\). RESISTANCE: \(2,000 / 20,000 / 200,000\) ohms
full scale. 2/20/2,000 megohms full scale.
\(20 / 200 / 2,000 / 20,000 / 200,000\) ohms center scale, 20 megohms center scale
VOLTMETER RESISTANCE: 15 megohms on
all ranges.
ACCURACY: \(\pm 4 \%\) of full scale on all
ranges.

RF PROBE
FREQUENCY RANGE: 50 cycles to 300 megacycles.
INPUT RESISTANCE: 5 megohms
INPUT CAPACITY: Approximately 5 micromicrofarads.
DIMENSIONS: \(31 / 2^{\prime \prime} \times 3 / 4^{\prime \prime}\).

Size: \(10^{\prime \prime} \times 13^{\prime \prime} \times 61 / 8^{\prime \prime}\)
App. Wgt. \(131 / 2 \mathrm{lbs}\).
PRICE

\section*{MODEL 785 INDUSTRIAL CIRCUIT TESTER}

Established in industry as the most complete single unit for general maintenance and ultra-sensitive test purposes, particularly on electronic equipment. Provides 28 ranges for measuring D.C voltage and
current; A-C valtage and current; and resistance Current and voltage ranges can be extended for insulatian testiag. Provisions for instantaneous current and voltage readings.

RANGES

A-C Current: (Full Scale) .5/1/5/10 Amperes. Accuracy: 3\% on 60 cycles. Higher ranges with external current transformers.

Resistance: (Full scale) 3,000/30,000/. 300,000 Ohms; \(3 / 30\) Megohms. (Center scale) \(25 / 250 / 2,500 / 25,000 /-\) 250,000 Ohms.
Sizes: \(13^{\prime \prime} \times 12 \frac{1}{2^{\prime \prime}} \times 512^{\prime \prime}\)
Weight (complete) \(13^{1 / 2}\) Lbs.
Model 785 (Oak carrying case) \(\$ 157.50 \mathrm{Net}\)
Model 785 (Steel case) \(\quad 127 . \quad . \quad\) Net

\section*{MODEL 798 TUBE CHECKER}

The Model 798 Tube Checker uses a new method of proportional mutual conductance testing . . . the differential frequency system which provides readings simitar to actual operating conditions. This tube checker supplies mutual conductance and "Good-Bad" readings on all receiving tube types...tests all Voltage Regulator and low power type Thyratran tubes... has adjustable plate, screen, signal and grid bias voltages. Only six settings required for most tubes...switching flexibility provides for testing future tubes as they are announced.

\section*{SPECIFICATIONS}

Tube Checker ranges: 3000/6000/12000 micromhos.
Tube sockets: 4, 5, 6, and 7 prong, octal, loctal, miniature, acorn and 9 pin types. (Spare miniature socket provided.)

Power Requirements: 105/125 Volts, \(50 /\) 60 Cycles A.C.
Size: \(173 / 4^{\prime \prime} \times 113 / 8^{\prime \prime} \times 61 / 8^{\prime \prime}\)-Weight: 23 Lbs. Price

MODEL 798

\section*{Weston rado instruments}

Round Style

\section*{PANEL INSTRUMENTS}

These panel instruments reflect over half a century of instrument skill, and the Weston tradition of building instruments to the highest standards of dependability and service.
Models 301,425 and 476 are available in round flush bakelite cases \(31 / 2^{\prime \prime}\) or \(33 / \mathbf{B}^{\prime \prime}\), and \(31 / 4^{\prime \prime}\) metal cases with black finish; also in round surface metal and rectangular flush bakelite cases. Models 301 and 425 supplied in round surface bakelite cases. Madels 506, 507, 517 regularly supplied in round flush \(21 / 2^{\prime \prime \prime}\) bakelite and black finished metal plied in round flush flange metal and rectangular flush bakecases; flush narrow cases with a clamp for panel mounting: Model 506 lite cases with a clamp ar case. All are calibrated normally available in surface metal case. All For magnetic panel use, for use on non-magneic par foel panel thickness of \(.09^{\prime \prime}\). instruments will be ad circuits above Order instruments in bakel possible to connect in grounded 300 volts when it is not possible to connect in grounded side of line. For other instrument prices, write to West

Rectangular Style

OHMS megohm.
7. Special high range Ohmmeter to 2 megs. and 20 megs. without external battery.
8. Sensitive A.C. Microammeter to 1100 microamps.

\section*{"RANGE MASTER" MODEL IOP}

A Portable Model "Range Master" covering the same 25 ranges as the Model 10. Has polished oak case with handy tool compartment.

Model IOP (Illustrated)
\(\$ 26.95\) net
Model IOF (Same as Model IOP but has complete fuse protection on all ranges) 28.15 net

\section*{"MULTI-TESTER" MODEL 30}

\section*{Covers the following ranges:}
A.C. VOLTS - \(0-12.5 / 25 / 125 / 250 / 1250\) volts.
D.C. VOLTS \(-0-5 / 10 / 50 / 100 / 500 / 1000\) volts.
D.C. CURRENT - \(0.1 / 100 \mathrm{ma}\) RESISTANCE- \(0.10 .000 / 100,000 / 1\) meg. ohms. DECIBELS - From minus 10 to plus 57 Db.

Model 30 (Illustrated) \(\$ 15.95\) net
Model 30P (Portable model. Has polished oak case). 19.45 net

Model 30K (Complete KIT and Instructions). 13.95 net

\section*{SIGNAL GENERATOR MODEL 300}

The Signal Generator Model 300 features finger-tip selection of four accurately aligned frequencies. Special crystal position accommodates any standard crystal to adapt the Model 300 to a crystal frequency staridard or TELEVISION MARKER OSCILLATOR. Four hundred cycle audio modulation, in or out. Supplies \(456 \mathrm{Kc}, 465 \mathrm{Kc}, 600 \mathrm{Kc}\), and 1500 Kc , to cover \(90 \%\) of all receivers manufactured. Works equally well with A.C.-D.C. sets. Complete with tubes and output probe.
Model 300 (Illustrated)
\(\$ 16.95\) net

\section*{KILOVOLTER MODEL 4000}

The Kilovolter Model 4000 is designed to measure Telovision and X-Ray voltages up to 50,000 volts D.C. Sensitivity 50,000 ohms/volt, on 25 KV range. Has a 20 micro-ampere meter with an input impedance of 1250 Megohms. Has adequate safety precautions. RANGES: 0-25/50 KV D.C. Complete with polystyrene probe.
Model 4000 (Illustrated)
\(\$ 67.50\) net
For further information on Bradshaw Test Equipment, write to Bradshaw Instruments Co.

GUARANTEE: Every BRADSHAW instrument is FULLY GUARANTEED against defective parts or workmanship for THREE MONTHS after purchase.

\section*{WHEATSTONE BRIDGE}
- A carefully engineered bridge made for all around use in lab., plant, or field. Both models contain own \(41 / 2\)-volt battery power supply and galvanometer. Provision for external batteries and galvanometer if desired. Ratio dial settings of \(.001, .01, .1,1,10,100\), and 1000 in both models. Also built-in resistance standards of \(1,10,100\), and 1000 -ohm decades. Ratios are guaranteed to \(.05 \%\) tolerance. Resistance dial resistors to \(.1 \%\). Self-cleaning, four-leaf phosphor bronze wiper switches with detent mechanism mounted below panel. Galvanometer of well-known moving-coil type. Separate binding posts for use of external galvanometer if desired, and for use of bridge as resistance decade. Hardwood case with removable cover. \(914^{\prime \prime} \times 712^{\prime \prime} \times 6^{1 / 4^{\prime \prime}} \mathrm{h}\). Wt. \(91 / 4 \mathrm{lbs}\). net; \(121 / 4 \mathrm{lbs}\). shipping.
MODEL RN-1. Standard Portable Wheatstone Bridge, complete with batteries

Net Price \(\$ 110.00\)
MODEL RN-2. Standard Portable Wheatstone Bridge with Murray \&
Varley Loops
Net Price \(\$ 125.00\)

\section*{MEGOHM METER}

For high-speed testing of condenser leakage resistance, insulation resistance and insulation measurements in production and inspection of components. Terminals for charging capacitors prior to test. Self contained power source \(u p\) to 200 volts. Arranged for use of external battery voltage supply up to 1000 volts. Internal checking standard to check and adjust calibration. Broad scale meter. Accuracy within \(3 \%\) of full scale. Range of 1 megohm to 100,000 megohms on four multiplier ranges of \(1,10,100\), and 1000 . Highest range can be extended to 500,000 megohms using external 1000 v . supply. Hardwood case Sloping bakelite panel designed for production use. \(15^{\prime \prime} \times 8^{\prime \prime} \times 10^{\prime \prime} \mathrm{h}\) Wt. 19 lbs. net; 23 lbs, shipping.

MODEL L-2A. Megohm Meter with tubes
Net Price \(\$ 145.00\)
MODEL L-2AU. Universal Model for use on \(110-220 \mathrm{v}\). AC power line, available on special order.

Net Price \(\$ 160.00\)

\section*{MEGOHM BRIDGE}
- A fast, accurate instrument for routine inspection work. May be used by laboratory workers, or production workers. Very simple to operate. "Magic Eye" replaces costly and delicate galvanometer. Operates from AC power line. Self-contained DC source. Accuracy within \(5 \%\) from 1 to 15 on scale; as close as readable on remainder of scale. Hardwood case with slip-hinge removable cover. \(8^{\prime \prime} \times 53 / 4{ }^{\prime \prime} \mathrm{x}\) \(7^{\prime \prime} \mathrm{h}\). Wt. \(6 \frac{1}{4} \mathrm{lbs}\). net; \(81 / 4 \mathrm{lbs}\). shipping.

MODEL MB-4. 100 to 100,000 megohms. 500 r. DC Bridge source,
Net Price \(\$ 60.00\)
MODEL MB-6. 100,000 ohms to 100 megohms; 10 megohms to 10,000 megohms

Net Price \(\$ 60.00\)
MODEL MB-8. 1 megohm to 1000 megohms; 100 megohms to 100,000 megohms

Net Price \(\$ 75.00\)
MODEL MB-11. 1 megohm to 1000 megohms; 10 megohms to 10.000 megohms; 100 megohms to 100,000 megohms..... Net Price \(\$ 120.00\)

\section*{VOLTAGE BREAKDOWN TESTER}
- A simple, positive, safe and quick means of testing voltage breakdown of materials and components. Step-up transformer accurately controlled by Variac. Continuously variable over entire range, 0 to \(4,000 \mathrm{v}\). DC. For safety, load is limited to 5 milliamperes over full range. Also safety switch if unit is removed from case. Operates on AC line. Warning light indicates instrument is operative. Voltage breakdown indicated by red light.
MODEL P-1. Voltage Breakdown Tester with tubes. \(15^{\prime \prime}\) x \(8^{\prime \prime} \times 10^{\prime \prime}\). Wt. 29 lbs. net; 32 lbs. shipping. (Not illustrated) Net Price \(\$ 150.00\)
MODEL P-2. Voltage Breakdown Tester with tubes and additional 0 to \(3,000 \mathrm{v}\). AC outlet. \(15^{\prime \prime} \times 8^{\prime \prime} \times 10^{\prime \prime}\). Wt. 29 lbs . net; 32 lbs. shipping. (Not illustrated)

Net Price \(\$ 200.00\)
MODEL P-3. Voltage Breakdown Tester with tubes. Upright, crackle enamel finish cabinet of metal. Range 0 to \(10,000 \mathrm{v}\). DC, 0 to 8,000 v. AC

Net Price \(\$ 350.00\)

RESISTANCE DECADES
- Available in standard models with resistance ranges of .9 to 999,999 ohms total. \(\pm 1 \%\) of nominal accuracy. Self-cleaning, fourleaf phosphor bronze wiper switches with detent mechanism mounted below the panel. Hardwood case. Models DR-1 to DR-4, \(53 / 4^{\prime \prime} \times 8^{\prime \prime} \times 4^{\prime \prime}\) h.; wt. 4 lbs. net; 6 lbs. shipping. Models DR-10 to DR-14, \(41 / 8^{\prime \prime} \times 6^{\prime \prime} \times 4^{\prime \prime} \mathrm{h}\).; wt. 3 lbs. net; 5 lbs. shipping. Models DR-50 to DR-52, \(61 / 8^{\prime \prime} \times 9^{\prime \prime} \times 4 \frac{1}{4} 4^{\prime \prime}\) h.; wt. 5 lbs. net; 7 lbs. shipping.

\section*{SPECIFICATIONS:}
- Range: 0 to \(260 \mathrm{~m} . \mathrm{c}\). (Fundamentals).
- Power: \(110-120\) voles, \(50-60\) cycles.
- Tubes : 6X4, 2-12AT7, 6C4, 3-6J6"s.
R.F.AM (Mod. or C.W.) Sweep \(50 \mathrm{k} . \mathrm{c}\).
to 20 mc . to \(20 \mathrm{~m} . \mathrm{c}\).
- Crystal oscillator.
- Dial : \(9^{\prime \prime}\) Glass covered, calibrated directly on 8 bands.
- Case: Blue-gray Hammertone finished aluminum, with leather handle.
- Size: \(101 / 4^{\prime \prime}\) high, \(101 / 4^{\prime \prime}\) wide, \(51 / 2^{\prime \prime}\) deep.

Weight : \(141 / 2\) lbs. packed.

\section*{F. M.-TELEVISION SWEEP GENERATOR}

\section*{20 M.C. Sweep Width - FERRET Model 720}

Range - 0 to 260 M.C. on Fundamentals - 50 K.C. to 20 M.C. Sweep Width Push•Button Control - All Miniature Tubes - Builtin Marker 19 to 40 M.C. Pipper or Absorption Type
A revolutionary instrument for aligning any FM or Television receiver. Combination of pushbattons permits simultaneous use of crystal oscillator, internal audio oscillator, R.F. generator (modulated or C.W.) marker oscillator or sweep FM Television generator. This combination is not possible with any other generator today. The unit is entirely independent of markers or external frequency standards since any marker frequency is possible from \(19 \mathrm{~m} . \mathrm{c}\). to \(40 \mathrm{~m} . \mathrm{c}\). on variable marker. Moreover, a crystal marker may be used and fully attenuated:

\section*{FEATURES:}
- Range: 0 to \(260 \mathrm{~m} . c\).-all fundamentals.
- Sweep Width: 50 k.c. to 20 m.c.
- Crystal Oscillator.
- Variable Marker Oscillator: 19 to 40 m.c. Acuracy: \(1 \%\) or better.
- Push-Button Control : Any of 4 oscillatora or all 4 simultaneuasly.
- Crystal standard.
- Large 9" calibrated dial.
- Electronic Sweep.
- 5 to 1 Vernier drive.
- Accuracy: \(1 / 2 \%\) on all bands.
- Temperature compensating circuits.
- Fully shielded - Low impedance output.
- Stand-by Switch for continuous operation.
- Provision for external modulation.
- Phasing Control.

\section*{SIGNAL TRACER ELECTRONIC VOLT OHM METER with SUB-MINIATURE 6K4 DIODE PROBE - Model 730}

\section*{SPECIFICATIONS:}
- Power: \(110-120\) volts, \(50-60\) cycles.
- Range : AC-DC 0-1, 3, 30, 100, 300, 1000, 3000.
- Ohms: Mid-scale \(10 \times 1 \times 10 \times 100 \times 1000 \times 100,000 \times\) 1 megohm.
- Frequency: Audio to 300 megacycles.
- Tubes: 6X4, 2-12AU7, 6AQ5, 6AQ6, 6AL5, 6K4.
- Input limpedance: DC 10 megohms, AC 10 megohms.
- Probe: 6K4 Diade connected.

Cuse: Aluminum, blue-gray Hammertone finish with leather handle.
- Size: \(1014^{\prime \prime}\) high, \(101 / 4^{\prime \prime}\) wide, \(51 / 2^{\prime \prime}\) deep. Weight : \(131 / 2 \mathrm{lbs}\). packed.

The FERRET Model 730 is the ultimate in a combined Signal Tracer and Vacuum Tube Volt Ohm Meter that incorporates features not found in competitor's
lines at any price. lines at any price.

Proximity Fuze Type Lightweight Probe.

Audio \& R. F. Measurements to 300 M.C. Proximity Type Fused used in Lightweight Probe. High Gain Signal Tracer - No Hum with \(5^{\prime \prime}\) Speaker Enclosed. Illuminated \(8^{\prime \prime}\) Meter - 1 Volt R.F. Scale.

Aceurate direct R. F. measurements up to 300 Megacycles for F. M. and television receivers are easily obtained. The same probe is used for the Signal Tracer and operates a hum-free rectifier.

In addition to the advanced type prolie, the Model 730 offers improved features that make this combination instrument the most important single unit on the service bench,

\section*{GERMANIUM CRYSTAL PROBE - Model A-100}

\(\$ 7.95\) DEALEK
PRICE

A universal replacement lightweight probe, that will not deteriorate or wear out with normal use. An ideal unit for all types of meters, for the "ham," experimenter or beginner in building and converting various test instruments. No change in electrical characteristics with use. Shield seven inches long, onehalf inch diameter.

\section*{SPECIFICATIONS:}
- 1N34 Crystal.
- \(1 / 2{ }^{\prime \prime \prime}\) diameter aluminum shield.
- RG/59U Coaxial cables, 36" Iong.

Frequency Response : from 20 kilocycles to 110 megacycles.
- Individually boxed in attractive counter display carton with complete ingtructions and diagrams for its many uses.
- Packed: 6 Boxes to shipping container, weipht : \(21 / 2 \mathrm{lbs}\).; 12 Boxes to shipping container, 5 lbs.

\section*{FERRET Test Equipment coastwise electronics company, inc.}

AUDIO OSCILLATOR - Sine Wave - Square Wave - Model 710

\(\mathbf{\$ 8 9 . 9 5}\) DEALFR PRICE Slighty Higher
Eastern States

An audio oscillator with recently developed features, that is outstanding in its field. Incorporates two units in one: a Sine Wave R.C. type oscillator with low distortion on all bands, and a Square \(W\) ave generator with the same frequency range. Provides a laboratory standard for all audio application and frequency response measurements in both designing and practical applications.

\section*{SPECIFICATIONS:}
- Power: \(110-120\) volts, \(50-60\) cycles.
- Range : 20 to 24,000 cycles. 3 bands.
- Tuhes: 6X4, 6AQs, 6AU6, 12AU゙7.
- Outןut: High impedance, 15 volts sine wave or square wave.
- Dial: 3 to 1 Vernier, red and black scale on white background, Iatirhine prointer.
- Panel : 3-color iridescent blue-gray finish.
- Test Leads: Coaxial cable. RG/59U.
- Test Leads: Coaxial cable. R
- Size: \(101 / 4\) x \(10 / 4\) x 5

\section*{FEATURES:}
- R. C. type oscillator - does not use beat frevuency circuit.
- Range : 20 to 21,000 cycles - 3 hands.
- All new-type miniature tuhes.
- Accurary: within \(2 \%\) on all bands.
- True sine wave througliout range, with special feedhach circuit for each band.
- Sine or square wave obtainel by merely rotating panel switeh.
Transformers electrostatically shielded.
- Laboritory precision construction throughout.
- Vernier Drive - 3 to 1 ratio.

\section*{SIGNAL GENERATOR Wide Range FM-AM-Television, Model 701 All Miniatúre Tubes}

\$74.95
dealer price
Slightly Higher
Eastern States

A crystal-calibrated unit for AM, FM and Television receivers, operating on fundamental frequencies to 110 Megacycles. Output voltage of 1 volt, relatively constant from 170 K.C. to 110 M.C. Universal in scope, it serves the needs of modern radio servicing in both low and high frequency receivers. \(9^{\prime \prime}\) calibrated dial.

\section*{SPECIFICATIONS:}
- Range: \(170 \mathrm{k} . \mathrm{c}\). to \(220 \mathrm{~m} . \mathrm{c}\).
- Power : \(110-120\) volts, \(50-60\) cycles.
- Tubes: 6C1, 6AU6, 6X4.
- Dial: Jarge \(9^{\prime \prime}\) three-colored scale, glass covered with molded escutcheon.
- Output: 1. volt R.F. low impedance.
Coaxial cable, 50 volts Audio
high impedance.

\section*{FEATURES:}
- Range: 170 k.c. to 220 m.c. - Fundamentals to \(110 \mathrm{~m} . c\).
- Completely shielded for minimum ratiation.
- Crystal calibrated, low loss, permeability tuned R.F. coils.
- Internal 225-rycle sine wave modulation-0 to \(100 \%\). Calibrated directly on dial.
- 20 to 10,000 cycle external modulation for frequency response measurement.
- Turet coil construction with shortest possible leads for minimum leahage and maximum R.F. Stability. lollow-up shorting type switch - no dead spots.
- Electron cotupled combination Hartley and Colpitts oscillator for hiqh L.C. ratio, low drift and maximum stability to line voltage fluctuations.
- Low loss. low impedance, coaxial cable output.
- Ladder attenuator.
- Vermier drive: 3 to 1 ratio.
- Aecmracy: \(1 \%\) on all bands.

\section*{DE LUXE TEST SPEAKER and Universal Substitutor - Model 721}

\$29.95
DEALER PRICE
Slightly Higher
Eastern States

Designed primarily to eliminate necessity of removing set-speaker from midget radios, consoles or auto radios for servicing. Compart, portable, lightweight unit, housing a specially constructed \(6^{\prime \prime}\) PM speaker with exceptional tone quality and sufficient current rating to test any radio.

\section*{SPECIFICATIONS:}
- Field Impedance: 500, 1000, 1500 and 2500 Ohms.
- Current: 155 Millamperes Maximum.
- Input: Universal for single ended or tubes in push-poll.
- Speaker: 6" PMI. Dustproof, of special ronstraction; low resonant point.
- Size: \(101 / 4^{\prime \prime}\) high, \(101 / 4^{\prime \prime}\) wide, \(51 / 2^{\prime \prime}\) deep.
- Weight: \(81 / 2\) Hrs. packed.

\section*{FEATURES:}
- Provides a substitution for choke, electrolytic condensers, courling, by-pass condensers and a wide range of resistors.
- Speerls servicing - eliminates soldering until all defective parts are located and substituterl.
- Voice coil connection liermits substitution of any output trans. former.
- Rotating input and field switches on front panel permita matching to any single or push-pull output tuhes.

INSTRUMENTS
ELECTRONIC INDUSTRY

\title{
Q-Meter
}

\section*{TYPE 160-A}

Radio frequency circuit design often requires the accurate measurement of \(Q\), inductance, and capacitance values. For this application, the 160-A Q-Meter has become the universal choice of radio and electronic engineers throughout the country.
Each component part and assembly used in the manufacture of this instrument is "designed with the utmost care and exactness. Circuit tolerances are held to values attainable only in custom built instruments.

The 160-A Q-Meter is designed specifically for the accurate and rapid measurement of \(Q\), inductance, and capacitance. The basic method of measurement consists of measuring the voltage developed across a variable air capacitor connected as an element in a series resonant circuit. Essentially the \(Q\)-Meter is comprised of an 8 range RF oscillator, a \(Q\) measuring circuit with a main and vernier section tuning condenser, a vacuum tube voltmeter of special design which reads the voltage across the tuning condenser, and a voltage injection circuit which applies an accurately known voltage to the terminals of the series resonant circuit. In operation the \(Q\) circuit is resonated by means of the variable \(Q\) tuning capacitor and the voltage developed across this capacitor is indicated by means of the vacuum tube voltmeter which is calibrated directly in terms of \(Q\). This method of measuring \(Q\) is simple, accurate, and requires only a single operation-resonating the circuit-to measure \(Q\). Variations of this basic method of measurement are employed to determine effective inductance and capacitance as well as the dielectric properties of insulating materials

\section*{SPECIFICATIONS}

Oscillator Frequency Range: Continuously variable from 50 kc . to 75 mc . in eight self-contained ranges. (In conjunction with an external oscillator the frequency range of the Type \(160-\mathrm{A}\) Q-Meter may be extended from 50 kc . to 1 kc . for coil measurements).

Oscillator Frequency Accuracy: Generally better than \(\pm 1 \%\), except the 50.75 mc . range which is approximately \(\pm \mathbf{3} \%\). Range of \(Q\) Measurements: The \(Q\) voltmeter is calibrated directly
in \(0,20-250\). The "Multiply-Q-By" meter, which measures the oscillator voltage injected in the \(Q\) measuring circuit, is calibrated from \(x t\) to \(\times 2\) and also at \(\times 2.5\). The reading of the \(Q\) voltmeter scale is multiplied by the setting of the "Multiply-Q-By" meter. Hence, the total range of circuit \(Q\) measurements is from 20 to 625 . Condensers, dielectrics, etc., which are measured by placing these in parallel with the measuring circuit, may have Q's as high as 5000 .
Accuracy of \(Q\) Measurements: The accuracy of the direct reading measurement of circuit \(Q\) (for \(Q\) voltmeter readings between \(Q=50\) and \(Q=250\) ) is approximately \(5 \%\) for all frequencies up to the region of 30 mc . and decreases with increasing frequency. Correction may be made for the error above 30 mc . as it is principally a frequency effect. The accuracy of the measurement of condensers, dielectrics, etc. is generally better than \(10 \%\) for Q's below 5,000 and up to 30 mc .
Capacitance Calibration Range: Main Tuning condenser 30-450 mmf. calibrated in 1 mmf . divisions from 30 to 100 mmf . and in 5 mmf . divisions from 100 to 450 mmf . Vernier condenser, plus 3 mmf., zero, minus 3 mmf., calibrated in 0.1 mmf. divisions.
Accuracy of Capacitance Calibration: Main tuning condenser, generally better than \(1 \%\) or 1 mmf ., whichever is the greater. Vernier tuning condenser, \(\pm 0.1 \mathbf{m m f}\). The internal inductance of the tuning condenser at the binding posts is approximately 015 microhenry.
Voltmeter: The \(Q\) voltmeter is also calibrated in volts. A specially calibrated tube, Type BRC 105-A tube, is used. Replacements may be made without recalibration.
Fower Supply: \(105-120\) volts, 50-60 cycles. Also 210-240 volts, 50-60 cycles. Power consumption 50 watts.
Dimensions: Height 12.5", length 20", depth 8.5".
Weight: 25 lbs.
Price: \(\$ 625.00\) f.O.B. Boonton. N. J., U.S.A.

\section*{Q-METER}

TYPE 170-A

The Type 170-A Q-Meter utilizes the same general operating principles and characteristics as the Type 160-A Q-Meter, but incorporates such structural modifications and design refinements as are required for accurate performance at the higher frequensies. This instrument is intended to supplement the low frequency Q-Meter by extending the range of measurement up to 200 mc .

SPECIFICATIONS
Oscillator Frequency Range: Continuously variable from 30 mc . to \(\mathbf{2 0 0} \mathbf{~ m c}\). in three ranges-Calibration accuracy \(\pm \mathbf{1} \%\).
Range of \(Q\) Measurements: The \(Q\) voltmeter is calibrated directly in circuit \(Q\), from 80 to 300 . The "Multiply-Q-by" meter is calibrated from \(\times 1\) to \(\times 4\), hence the range of circuit \(Q\) measurements is from 80 to 1200.
Accuracy of \(Q\) Measurements: The accuracy of the direct reading measurement of circuit \(Q\) is \(\pm 10 \%\) up to 100 megacycles and decreases with increasing frequency.

Capacitance Calibration of Q Capacitor: Range \(11-60 \mathrm{mmfd}\). calibrated in unit mmfd. divisions. Accuracy: \(1 \%\) or 0.5 mmfd., whichever is greater. Micrometer dial divided into 100 divisions.

Power Supply: 110-120 volts, 50-60 cycles. Also 220-240 volts, \(50-60\) cycles. Power consumption 50 watts. Dimensions: \(17^{\prime \prime} \times 10 \frac{1}{2} \prime \times 83 / 4\) ".

Weight: 21 lbs.
Price: \(\$ 550.00\), F.O.B. Boonton, N. J., U.S.A.

\section*{QX CHECKER TYPE 110-A}

The QX-Checker is a production type test instrument specifically designed to compare reactance and relative \(Q\) of \(R F\) components with approved standards, The two factors, reactance and relative \(Q\), are separately indicated, one on a meter and the other on a condenser dial, so that the deviation of either from established tolerances is immediately shown. Built to laboratory standards, the QX-Checker is a sturdy, fool-proof instrument for use in production work by factory personnel.

\section*{SPECIFICATIONS}

Oscillator Frequency Range: 100 kc . to \(\mathbf{2 5} \mathrm{mc}\). in 6 ranges using accessory plug-in coils two coils furnished with each instrumentl.
Accuracy of Coil Checks: Coils may be checked against a standard to within about \(0.2 \%\) with inductance values of 10 microhenries to 10 millihenries and \(Q\) of 100 or greater.

Capacitance Range: Capacitance valves ranging between approximately 2-1000 mmf. may be checked against a standard to an accuracy of a few tenths of one mmf. if the \(Q\) of the capacitor is high.
Power Supply: 110-125 volts, 50-60 cycles, also 200-250 volts, 50 cycles.
Dimensions: Width \(121 / 4^{\prime \prime}\), Depth \(18^{\prime \prime}\). Height \(8^{\prime \prime}\).
Weight: 26 lbs.
Price: \(\$ 340.00\), F.O.B. Boonton, N. J., U.S.A.

\section*{FM SIGNAL GENERATOR}

TYPE 202-B

The type 202-B FM Signal Generator has been developed to meet the needs of engineers engaged in the design of FM and television receivers for operation within the frequency range of from 54 megacycles to 216 megacycles.
This instrument has been proportioned for maximum conservation of laboratory bench space, with frequency dial, modulation and output meters positioned at eyelevel for maximum readability. The unit is finished in grey wrinkle enamel with engraved panel and is supplied complete with tubes and standard output cable.

\section*{SPECIFICATIONS}

RF Range: frequencies from 54 mc . to 216 mc , are covered in two ranges, 54-108 mc. and 108-216 mc.
Main Frequency Dial: The two RF ranges are calibrated directly in megacycles to an accuracy of within \(\pm 0.5 \%\). The dial is also divided in 24 equal divisions for use with the vernier frequency dial.

Vernier Frequency Dial: The vernier frequency dial is divided in 100 divisions and is geared to the main dial through a gear train having a \(24: 1\) ratio. The approximate frequency change per vernier division is 26 kc . on the low range and 52 kc . on the high range.
Frequency Modulation (Deviation): The FM deviation is continuously variable from zero to 240 kc . The modulation meter is calibrated in three \(F M\) ranges (1)zero to 24 kc ., (2) zero to 80 kc . and (3) zero to 240 kc . deviation.
Amplifude Modulation: The modulation meter is calibrated at \(30 \%\) and \(50 \%\) amplitude modulation. AM is continuously variable from zero to \(50 \%\).
Modulation Controls: Separate potentiometers are provided for continuous control of FM and AM levels.

Modulating Oscillator: The internal AF oscillator may be switched to provide either frequency or amplitude modulation; it may also be switched off. External binding posts permit the use of an external AF oscillator for either FM or AM. Both internal and external AF oscillators may be used simultaneously, thus providing either FM or \(A M\) at two modulation frequencies simultaneously or simultaneous FM and AM. The internal AF oscillator provides eight fixed frequencies which may be selected by a rotary type switch-50, 100, 400 cycles and 1, 5, 7.5, 10 and 15 kilocycles, accurate to within \(5 \%\). The output voltage of the internal AF oscillator is available at the external binding posts for synchronizing or other purposes.

RF Output Voltage: The RF output voltage is continuously variable over a range from 0.1 microvolt to 0.2 volts at the terminals of the output cable. The impedance at the RF output jack, looking into the instrument, is 53 ohms resistive. The output cable has a 53 ohm resistance termination at the terminal end hence the output impedance of the unit with cable attached is 26.5 ohms.

Distortion: FM distortion at 75 kc . deviation is less than \(2 \%\) when modulated with the internal AF oscillator or an external AF oscillator having \(0.5 \%\) distortion or less. At \(50 \%\) amplitude modulation the distortion is about \(5 \%\) using the internal \(A F\) oscillator and decreases as the modulation percentage is reduced. An external AF oscillator may be employed for amplitude modulation if desired.
Spurious RF Output: All spurious RF output voltages are at least 30 db . below the desired fundamental. The RF leakage is very low.
Fidelity Characteristics: The deviation sensitivity of the FM modulation system as a function of frequency is constant from dc. to over 10 kc . At 15 kc . the deviation as indicated on the modulation meter is 0.5 db . higher than the true value. The amplitude modulation system is also flat to 10 kc ., and departs from nominal by 1.0 db . at 15 kilocyeles.
Power Supply: The power supply is self-contained in the instrument for use on 60 cycles, 110 volts.
Accessories: 203-A Frequency Converter (Frequency range 0.4 mc, to 25 mc .).
Dimensions: Height: \(17^{\prime \prime}\); Width: \(131 / 2^{\prime \prime}\); Depth: \(11 \frac{112 " .}{}\)
Weight: 35 lbs.
Price: \(\$ 975.00\), F.O.B. Boonton, N. J., U.S.A.

\section*{UNMEERER TYPE 203-B}

The Type 203-B Univerter, a frequency converter accessory having unity gain, is designed for use with the Type 202-B FM Signal Generator to provide additional frequency coverage of from 0.4 mc . to 25 mc . Since the 202-B FM Signal Generator covers a frequency range from 54 to 216 megacycles, the 203-B Univerter offers a simple means whereby the additional coverage of commonly used intermediate and radio frequencies may be obtained. This instrument also enables the frequency and amplitude modulation features of the 202-B instrument, as well as the attenuator calibration, to be utilized at these lower frequencies without causing any appreciable distortion.
The 203-B Univerter matches the 202-B FM Signal Generator in styling and finish, and is supplied complete with tubes and instruction book.

\section*{SPECIFICATIONS}

RF Range: The Univerter, in combination with the 202-B FM Signal Generator, covers from 0.4 mc . to 25 mc . 10.1 mc . to 25 mc . with no carrier deviation). The RF voltage at the \(X_{i}\) OUTPUT jack is uniform within \(\pm 1 \mathrm{db}\). over the frequency range of the instrument.
Frequency Increment Dial: This dial is calibrated in increments of 10 kc . from plus 250 kc , through zero to minus 250 kc .
RF Output: The RF output voltage at the XI panel jack is continuously variable from 0.1 microvolt to 0.1 volt by means of the \(202-\mathrm{B}\) Signal Generator attenuator. For 0.2 volt input to the Univerter, the output is approximately 0.18 volt. The impedance ai the RF output jack, looking into the instrument is approximately 60 ohms resistive. The RF output voltage at the 2 VOLT MAX. pin jack is uncalibrated but may be controlled from the attenuator of the 202-B FM Signal Generator. At this pin jack the internal impedance is approximately 470 ohms.

Power Supply: The 203-B Univerter is designed for use oin \(50-60\) cydes. 115 volts.
Dimensions: H: \(1^{1 / 2 "}{ }^{\prime \prime} W: 73 / 8^{\prime \prime} \mathrm{D}: 10 \frac{1}{2}{ }^{\prime \prime}\).
Weight: 11 ibs
Price: \(\$ 30000\), F.O.B Boomton, N. D., U.S.A.

\section*{BEAT FREQUENCY GENERATOR Trpe 140 -A}

This instrument has found universal acceptance because of its wide frequency coverage from 20 cycles to 5 megacycles. A five step decade attenuator provides a means by which extremely small output voltages can be accurately set and a six position switch enables any one of a variety of output impedances to be quickly selected. SPECIFICATIONS
Frequency Range: 20 cycles to 5 megacycles in two ranges. Low Range: 20 to 30,000 cycles.
High Range: 30 kc . to 5 mc .
Frequency Calibration: Accuracy \(\pm \mathbf{2}\) cycles up to 100 rycles, \(\pm \mathbf{2 \%}\) above 100 cycles.
Stability: About 5 cycies drift below 1000 cycles. On low range, drift becomes negligible percentage with increasing frequency. On high range, drift is \(3 \%\) or less.
Adjustment: High and low ranges have individual zero beat adiustments. Low range may be checked against power line frequency with front panel 1 inch cathode ray tube.
Output Power and Impedances: Rated power output: One watt, available over the low frequency range from output impedances of \(20,50,200,500,1000\) ohms, and over both high and low frequency ranges from an output impedance of 1000 ohms.

Distortion: \(5 \%\) or less a\& 1 watt owtpui, \(2 \%\) or less for \(1 / 2\) voltage output.
Voltmeter Accuracy: \(\pm 3 \%\) of full scale reading.
Power Supply: \(110-120\) volts. 50-60 cycles, also 220-240 volts, \(50-60\) cycles.
Power Consumption: About 120 woits.
Dimensions: Width: \(21 \mathrm{l} / \mathrm{z}^{\prime \prime}\), Depth: \(15^{\prime \prime}\), Height: \(191 / 2^{\prime \prime}\). Weight: 86 lbs .
Price: \(\$ 1,050.00\), F.C.B. Boonton, N. J., U.S.A.

\section*{E.M.C.}

\section*{Gives More \\ Measurement} Value per Dollar

\section*{THE E. M. C. MODEL 300 VACUUM TUBE VOLT-OHM-CAPACITY METER}

The new Model 300
Vacuum Tube Volt-Olim-Capacity Meter is an unusually stable, extremely compact instrument, with all of the inlerent quality of design and manufacture that is always built into all E.M.C. test instruments.

Its price - amazingly low - was made possible through the development of a new efficient circuit by E.M.C. engineers, which enabled great economies. Its large, accurate meter, mounted on a clearly defined, modern panel, makes operation a pleasure rather than a clore

Sturdily cased in oak, this instrument will withstand rough usage, and will give complete satisfaction under all conditions. The Model 300 is supplied as an open-face bench model, or as a portable model complete witl cover.

\section*{SPECIFICATIONS}

Uses 41/2" meter.
DC Volts -6 ranges: 0-3-10-30-100-300-1000 volts.
lnput resistance 1 meg per volt on \(0-3\) and \(0-10\) ranges, 30 inegolims input resistance on \(0-30-100-300\) and 1000 volts ranges.

1 megohm isolating resistor in probe.
AC Volts -5 ranges: \(0-10-30-100-300-1000\) volts.
Approximately 1000 ohnis per volt. Full wave tube rectification used.

Resistance -6 ranges from 2 olints to 1000 megolins.
Capacity - 4 ranges, from 25 micromicrofarads to 20 niciotarads (. 000025 mfd to 20 mfd )

Has zero center position available for lining up the discriminator of an FM radio.

Open Face Model, complete with leads, Dealer Price
\(\$ 39.50\)
Model 300P, above noodel, in portable case with cover. Dealer Price
44.50

Model HFP, High Frequency Probe, for above models

\section*{E. M. C. MUTUAL CONDUCTANCE TUBE TESTER - MODEL 200}

\section*{Check These \(T_{\text {eatures }}\)}
\(\checkmark\) Checks mutual conductance on a calibrated micromho scale, as well as an a "Reject-Good" scale.
\(\checkmark\) Checks 5 element tubes as pentodes.
\(\checkmark\) Cliecks tubes for gas content.
\(\checkmark\) Sufficient plate current to check both emission and mutual conductance.
\(\checkmark\) Detects both shorted and open elements.
\(\checkmark\) Complete switching flexibility allows all present and future tubes to be tested regardless of location of elements on tube base,
\(\checkmark\) Tests tubes for radio frequency and other noise
\(\checkmark\) Tests all tubes from .75 volts to 117 filament volts.
\(\checkmark\) Tests all loctal, octal, and miniature tubes.
\(\checkmark\) Tests cold cathode, magic-eye, voltage regulator tubes, ballast resistors.
\(\checkmark\) Instrument is fused, and fuse is easily replaceable from front of panel.
\(\checkmark\) Individual sockets for each tube base type eliminates possible errors
\(\checkmark\) Checks individual sections of multi-purpose tubes.
\(\checkmark\) Attractive four-color panel with plenty of eye-appeal. Hard wrinkle finish for durability.

E. M. C. Announces A Complete Line Of VOLOMETERS*
}

\section*{MODEL 120}

20,000 ohms per volt
Model 120 is the ONLY 20,000 ohms per volt instrument that gives you:
1. WIDEST resistance range (. 2 olim to 300 megs.)
2. HIGHEST AC voltage sensitivity ( 10,000 ohms per volt)
3. LOWEST PRICE \(\$ 29.95\), open face model; \$34.95 for Model 120-P (portable)

\section*{Other Features Include:}
1. AC voltage frequency mage 30 ejcles to 1 megacycle.
2. Rectifer and battery replaceable without soldering iron.
3. No external source of power needed for \(A C\) voltage measurements.
4. Special precision vollage multipliers accurate to \(1 \%\).

\section*{Specifications:}
- DC volts at 20,000 ohans per volt \(0-3 v, 0-15 \mathrm{v}, 0-60 \mathrm{v}, 0.300 \mathrm{v}\), \(0-1500 \mathrm{v}, 0-6000 \mathrm{v}\).
- AC volis at 10.000 olims per volt: \(0-6 \mathrm{v}, 0-30 \mathrm{v}, 0-120 \mathrm{v}, 0-6000 \mathrm{v}\), AC volis at 10.000
0.3000 v . \(0-6000\) \%
DC curcent: \(0-60\) microamps, \(0-\) fima, \(0.60 \mathrm{ma}, 0-600 \mathrm{ma}, 0-6\) amps.

- Resisiance: \(0-3000,0-300,10\) to \(+25+22\) to \(+37,+36\) to +51 , Decibels: \(-410+11,+10\)
+50 to \(+65,+62\) to +76

MODEL 105
5000 ohms per volt

The Model 105 will accurately measure AC voltages from 25 cycles to 100 KC with no temperature errors, and without the necessity of plugging into any external source of power. For this reason it is invaluable for Audio or I.F. In addition, the Model 105 can be used to measure resistances from \(1 / 2\) ohn to 30 nuegolims.

SPECIFICATIONS:
6 DC voltage ranges (approx. 5000 ohms per volt) 0 to \(3-15-60-300-1500-6000\) volts.
6 AC voltage ranges (aplrox. 2500 ohms per volt) 0 to \(6-30-120-600-3000-6000\) volts.
4 DC current ranges, 0 to \(.6-6-60-600\) milliamperes.
3 resistance ranges, 0 to \(3000-300.000\) ohms; 0 to 30 megolims.
6 DB ranges, -10 to +77 .
Price \(\$ 22.95\)
\(\$ 26.95\)

\section*{MODELS 101A \& 101B}

\section*{1000 ohms per volt}

Here is an unusually attractive, EXCEPTIONALLY LOW-PRICED volt-ohm-millianeter. It is a rugged, flexible instrument. combining features which are not available in competitive models selling for more than double this price.

You will be convinced when yon read the "Specifications" and "Special Features" that MODEL 101 VOLOMETER is just the instrument to have around the shop or lab whenever the type of measurement does not justify the use of expensive, complicated, highly sensitive equipment.

The fact that resistances between \(1 / 20\) OFIM and 20 MEGS and AC voltages between 25 CYCLES and 1 MEGACYCLE in frequency can be measured with this unit, makes it a handy and very valuable instrument. In short, when it comes to value and versatility, MODEL 101 really sets the pace.

\section*{SPECIFICATIONS}

5 DC VOLTAGE RANGES (approx. 1000 ohms per v.) : 0 to 6-60. \(300-600-3000\) rolts.
4 AC VOLTAGE RANGES: 0 to 12 -120-600-1200 volts.
3 DC CURRENT RANGES: 0 to \(6-60 \div 600\) milliamperes.
4 RESISTANCE RANGES: 0 to \(200-2000-200,00020\) megohms.

MODEL 101A Open face as shown.
Price \(\$ 17.50\) Size: \(41 / 2^{\prime \prime \prime} \times 71 / 2^{\prime \prime} \times \quad \$ 1 /{ }^{\$ 17}\)
In portable case.

 enables this instrimmit to pick up broarlcast sirnals when connected
to a short lear. to a short lead.
Chects noise pickup at antenna-checks operation of AVC-AFC-link and filter circuits. Detailed instructions srive full information for checkinur all types of receivers and their components.
With this revolutionary signal tracer really hear the sigmal and any variation directly from antenna through each stage of r.f.-if.-a.t. step by step without opemat ing any switch or changing in different chamels in the instrument. Sous ent readings or sigmal strength and directly monare gain per stare. Gain measurements made by accurate meter hot possible with marric eye indicators.

Negligible Disturbance to circuit under test as input capacity is only 3 minfds.
Attenuation of 10,000 to 1 by a ladler type of step attenuator with vernier control
Sensitivity extremely high- 10,000 microvolts full scale.
Traveling Detector-Convenient, insulated probe housing detector and amplifier at end of \(50^{\prime \prime}\) leall.
Frequency coverage up through 150 meracycles
Model 777-Beautiful hammerionc prey finish - \(4^{\prime \prime}\) Alnico V. speaker, sensitivity control, microphone-phonograph iuput jack traveling detector prohe sensitise miliammeter with associated switching control - jabler type stop attentator, vernier control antomatic control switch for speaker or mener or both or standhy.
 105-135 volts. Weight \(91 / 2^{\prime \prime}\) lbs. Size \(65 / 8^{\prime \prime} \times 81 / 8^{\prime \prime} \times 11^{\prime \prime}\)

TEEVEE 90 OSCILLOSCOPE

\section*{the latest in television testing}

truments the testing: ALIGNMENT - SERVICE
- COMPLETE OSCILLOSCOPE
(Can be used as such by itself)
- COMPLETE SWEEP

GENERATOR
(Can be used independently)
Oscilloscope has its own variable linear sweep cireuit from 10 to \(45,000 \mathrm{Cl}\) 'S and hats a sensitivity of 285 millivolts RMS per inch vertical and 320 millivolts RMS per inch for horizontal deflection. input rasistance is one megohm shunted by 20 mimfd. Sine wave response uniform from 5 cyeles to 200 K .C. within \(\pm 2 \mathrm{db}\).
Sinusoidal sweep with phasing control of 150 degree range is provided for use in conjunction with the internal KF sweep generator when esting band pass characteristics.
Absolute locking of yattern is obstained with linear time base control (left to right) from 10 cycles to 45,000 cycles in six randes with vernier control. Synchronization provision for either internal positive or line fretueney or external.
External jack provided for trace blanking. Requires \(1 / 2\) volt of negative pulse to blank a normal intensity level trace.
Independent sweep generator has a center frequency range of 1.5 to 45 meracycles giviny a choice of any IF frequency desired. The band widih can be varied continuously from 0.5 KC to 7 MC .
Attenuation of RF is continuously variable from 0 to 500 millivolts and the output is applied through low loss couxial cable.
Traveling detector probe is included for observing signal at any point of the R.F. circuit under test.
Supplied complete with tubes, probe, coaxial output cable and operating instructions ready to operate.
For operation on \(105-130\) volts \(50-60\) cycles-power consumption 40 watts. Weight 25 I hs. Size \(14 \times 18 \times 121 / 2\) inches. Finished in atiractive hammertone grey.
IIere are two instruments combined at actually the price of only one Light enough and compact enough to easily take right out on the job with you-almost impossjble with 2 sejarate units.
TUBE COMPLEMENT-1-3BP1, \(2.7 \mathrm{G7}, 2.6 \times 5,1.884,1-6 S A 7 G T / G\), 1-7A4-Supplied complete with tubes, probe, coaxial output cable and operating instructions ready to operate
\$127.50

\section*{MULTITESTER MODEL 462}

\section*{GIANT SIZE METER}

20,000 Ohms per Volt D.C.
5,000 hhms per Volt A.C
NO FREQUENCY ERRORS
Unusual hecause of the many desirable features that are combined in one instrument. The size of the meter, \(61 / 2 "\), provides a very long scale with excellent legribility so important for bench work
Uses germanium crystal rectifier which has no frequency error for output measurements or even hish radio frequencies. I'ses individual unit cells for olmmeter. Fasy and economical to purchase and replace -snap into terminal clamps-no soldering

\section*{RANGES}
D.C. Voltmeter 0/2.5/10/50/ 250 \% \(1000 / 5000\) volts.
A.C. Voltmeter \(0 / 2.5 / 10 / 50 /-\) 250 \% \(1000 / 5000\) volts.
D.C. Milliammeter 0/10/100/. 500 milliamperes
D.C. Microammeter \(0 / 100\) micro-
amperes. Ohmmeter \(0 / 200 / 200\), \(0000 / 20\) megohms.
Decibel Meter- 10 10/55 dh Meter of 50 microumnere sensi tivity permits current readings of less than 1 microampere.
Shunts and multipliers are cali brated to \(1 \%\) accuracy

Model 462 Multitester is a beautiful large instrument with \(61 / 2\) " meter, bakelite panel and oak case. Size \(4^{1 / 4} 4^{\prime \prime} 81 / 2^{\prime \prime} \times 101 / 8\) Weight 5 lbs .
Dealer Net Price
\(\$ 41.50\)
Model 462P comes in a portable hinged cover oak carrying case having tool compartment and inchudes deluxe pencil prod test leads.

\section*{SERVICESHOP MODEL 8573} EQUIVALENT TO A COMPLETE SERVICE SHOP
- Tube Tester
- Battery Tester
- Condenser Tester
- AM Signal Generotor
- FM Signal Generator
- Audio Oscillator
- Complete Multitester

Never before in his tory has there been available an up-to-date tube tester providing for testing acorn tubes, miniature tubes - noval base tubes and sub - miniature
 tubes with the famous Rollindex Roll Chart-combined with a battery tester and a complete multitester measuring AC and DC volts-DC milliamperes and amperes-ohms and megohms, decibels and output volts and also having a condenser tester, an AM signal generator, an FM signal generator and an audio oscillator.
The amazing fine performance of this equipment is the result of the latest engineering design and im provement in the 805 B combination tube and set tester combined with the all purpose Model 730 signal generator.
850 tube listings on roll chart. Jack provided for headphone test for noisy tubes that do not otherwise read "bad."
Latest type germanium crystal rectifier assures AC measurements free from temperature and frequency errors common to other rectifiers. Readable scale divisions on the ohmmeter start at 0.05 ohm to 25 megohms
Battery Tester-All standard range batteries tested under rated loads

NEW YORK 1, N. Y. TEST EQUIPMENT

\section*{"Free-Point Return" Obsolescence Proof \\ TUBE TESTER MODEL 316}

How many tube testers has obsolescence junked in your radio service career? If outmoded in struments deplete your income, you need this practically olsolescenceprooi, free-point return tube tester. It cmables you to test any tube 1 ype available torlay, or any that may be thoiser in the future. A noise jack permits easy letection of faulty microphonies in acorn, miniature, and standard tubes. A "must" for the service shop where every instrment dollar sjent has to produce maximum vithe and test efticiency.

\section*{CHECK THESE FEATURES}
- The frec-point-return tester enables all measurements to be made with set in operation.
- The special cirenit design allows testing of any tuhe type requrdless of jts filament voltage or hase wiring
- Umusual flexibility is attained by using lever-type switching for indivintual control of each tule element.
- A complete rollehart lists all current tube types in larqe, lerible true.
- Tube tester has \(4 \frac{1}{2 \prime \prime}\) rectangular meter with easy-to-reat "Poor-Good" scale.
- Operates on 100-130 volt, 50/60 cycle AC fower supply.
- In beatiful portable cuse of matmal oak, with calrviner handie and self-latehing, renovable cover
- Size : \(161 / 2^{\prime \prime}\) H. x \(123 / 4^{\prime \prime}\) W. \(x 51 / 4^{\prime \prime}\) D. Weisht: 18 has

Model 316-Dealer Net Price
\$53.50

\section*{MODEL 316DL}

Similar to Model 3I6M with exception of meter. Meler is \(71 /{ }^{\prime \prime}\) double meter, giving the identical reading so that both the man in front of the counter as well as the person in hack of the counter clearly read the condition of the tube. Size: \(16^{\prime \prime} \times 20^{\prime \prime} \times 16^{\prime \prime}\). Weight: 21 lbs.
\[

\]

\(\$ 82.50\)

MODEL 316M
Tube merchandiser complete in handsomely firiished all-steel case with \(41 / 2^{\prime \prime}\) meter, complete, ready to operate. Size: \(16^{\prime \prime} \times 20^{\prime \prime} \times 81 / 4^{\prime \prime}\). Weight: 19 lbs.

\section*{ULTRA-SENSITIVE MULTITESTER MODEL 488-A}

\section*{Check these features:}
- The AC Ammeter is of the current transiomer type with a voltaue diron of only 0.4 volts at full scale 10 -ampere ramere. Ineally suited for appliance and small motor tests.
- A sensitivity of 20.000 ohms per volt on DC and 1000 ohms per folt on AC measurements. Iteal for television receiver service.

- 6,000-volt \(A C\) and \(D C\) ranges can he used with safety. 15,000 -volt test leads are supplied.
- The center of the low ohm scale rads 37 ohms, permitiong extremely accurate readings.
- A wide-scale \(4 \frac{1}{2}\) meter with movement of 50 microanperes is accurate to \(2 \%\) of full seale
- All multipliers and shunta are matched and aceurate to \(1 \%\).
- Sensitive reatings are olitaimable as low as 1 microampere, 0.25 ohm and 1 volt.
- Hatteries are readily accessible.
- The unit has an overall accuracy of \(3 \%\) on DC and \(5 \%\) on AC voltares and currents.

\section*{RANGES}

DC Voltmeter: 0-3-12-60-300-600-1.200-6,000 Volts. AC Voltmeter: 0-3-12-60-300-600-1.200-6,000 Volts. DC Milliammeter: 0-3-20-120.600 Milliamperes DC Microammeter: 0-60-300 Microamperes. DC Ammeter: 0-12 Amperes. AC Ammeter: 0-3-6-12 Amperes.
Ohmmeter: \(0-3,000 \cdot 300,000-30,000,000\) Oms. Output Voltmeter: 0-3-12-60-300-600-1,200-6,000 Volts.
Model 488A - In wolden oak carying casc, compartment. self-latching and detachable cover. Supplied, with self-contained battery and test

Dealer Net Price
\(\$ 59.50\)

\section*{MODERNIZATION UNITS FOR TUBE TESTERS}

For the many new tubes that have appeared on the market since 1946 practically every tube tester in use, as well as every new tule tester shipped from the factories up to April, 1947, is now obsolete to some degree.
Models 120 and 125 Modernizalion Units have a flexible cable with a plug that is simply inserted into the loctal socket of the old tube tester There are spare bilank sockets and spaces for additional sockets should new typus of tube lases appear in the future. Tule Testing charts and data are supplied.
New miniature and subminiature sockets are provided. These units fit snugly into the compartments of the case proper or in the cover of portable types, such as Models 322P, \(802 \mathrm{~N}, 802 \mathrm{NS}\). Use the chart below for specifying the correct model.
Modernization Kit No. 129 is supplied in kit form wilh prewired subparel that is mounted in place of one of the repular sockets. Instrucpanel that is monnted in mace of one of the requar sockets. Instrucmatle by the purchaser.
Modernization Kit No. 123 is similar to kit No. 129

\section*{TUBE CHECKER

\section*{TUBE CHECKER at Minimum Cost} at Minimum Cost}

Separate switching is provided for each pin of each socket so that any of the heater voltages or the plate voltage can be applied. With this versatile arrangement all stondard receiving tubes can be checked no matter what the internal connections.

FEATURES
- Tests all receiving type tubes includ. ing the new series of seven and nine pin tubes now being released for FM and Television.
- Individual pin switching provides the maximum of flexibility in testing.
- 3'' square wide vision meter.
- Tests individually all sections of multisection tubes.
- Features a
check for line voltage variations.
- Tests for shorts between all tube elements.
- Compact size \(-9^{\prime \prime} \times 7^{\prime \prime} \times 31 / 2^{\prime \prime}\).
- Weight - six pounds.
- For use on 50 to 60 cycle, 115 V., AC lines.
- All instruments shipped complete with up to date tube charts.

\section*{STAR TESTER MODEL M-11}

The Model \(\mathrm{M}-11\) hos been designed as a basic all around multitester for use by the radio serviceman and allied industries. All essential ronges are covered very adequately with excellent overlapping.

FEATURES
- A large, wide vision, 41/2", 400 -microampere meter for ease of reading on all ranges.
- 27 separate ranges for measurement.
- 1,000 ohm per volt sensitivity AC and DC.
- Precision resistors throughout.

5 AC Voltage Ranges: 0 to 10/50/250/500/1000 Volts.
5 DC Voltage Ranges: 0 to 10/50/250/500/1000 Volts.
5 Output Meter Ranges: 0 to \(10 / 50 / 250 / 500 / 1000\) Volts.

Light weight - 4 pounds
- Compact size - \(9^{\prime \prime} \times 7^{\prime \prime} \times 31 / 2^{\prime \prime}\).
- All instruments shipped complete with batteries, test leads and instructions for use.

DESIGN DATA
4 DC Current Ranges:
0 to \(1 / 10 / 100 / 1000 \mathrm{Ma}\)
Resistance Ranges: 0 to \(5,000 / 500,000\) Ohms.
0 to 5 Megohms.
5 Decibel Ranges
Overall Range from - 10 to +54 Db .

MODEL M-204

\section*{10,000-VOLT STAR TESTER MODEL M-204}

FEATURES
- A large, wide vision, 4/1/2", 50-microampere meter for ease of reading on all ranges.
- 31 separate ranges for measurement.
- 5 resistance ranges with continuous cover age from zero to 50 megohms. Midscale on first range is 50 ohms.
- 20,000 ohms per volt sensitivity DC.

DESIGN
6 AC Voltage Ranges:
0 to 2. \(5 / 10 / 50 / 200 / 1000 / 2500\) Volts.

\title{
TEST CRAFT INSTRUMENT CO. 106 FIFTH AVENUE • NEW YORK II, N. Y.
}

\section*{The New Model TC-75 Universal COMBINATION TEST SPEAKER AND SIGNAL TRACER}

- plus an experimental one-stage audio amplifier
- plus universal output transformer

\section*{A MUST FOR EVERY RADIO SERVICEMAN AND ENGINEER}

Specifications: RESISTOR CONDENSER TESTER: \(\| 0\)-Volt DC power source for basic indication of either shorts or opens in both resistors and condensers. Leakage indication for condensers only. - CAPACITY SUBSTITUTION: 7 capacity values available, . \(001, .01, .05, .10, .25\) at 600 volts and 30 mfd . and 50 mfd . at 150 volts. Provides substitution of by-pass coupling and electroiytic condensers. RESISTOR SUBSTITU. TION: 10 resistance values available, \(400,50 \mathrm{~K}, 100 \mathrm{~K}, 500 \mathrm{~K}, 2\) meg. and 5 meg. at \(1 / 2\)-watt and \(500, \mathrm{IK}, 1.5 \mathrm{~K}\) and 2.5 K at 15 watts. Provides substitution of grid bias and other types of resistors. - OUTPUT INDICATOR: Neon type output indicator for receiver alignment. UNIVERSAL AND SUBSTITUTION SPEAKER: Field: -500, IK, 1.5 K and 2.5 K ohms at 175 ma . Speaker: Permanent magnet type. Voice coil: 2.8 ohms. Input: single or push-pull. Output: Specially designed universal output type transformer. - AUXILIARY DC POWER SUPPLY: An auxiliary 100 DC volt power source, one half on \(117 \mathrm{L7}\), available for experimental and substitution purpose. - AUXILIARY AUDIO AMPLIFIER: An auxiliary one stage of audio amplification, one half on 117 L7, available for experimental and substitution purpose. SIGNAL TRACER: Provides a signal tracer of the probe type, using a IN34 crystal diode detector, the output of which is coupled into a one-stage audio amplifier.

This unit comes housed in a rugged battleship-gray,
crackle-finished steel cabinet, complete with full operating instructions, ready to work on 110-125 Volts, AC 50-60 cycles. Size: \(7^{\prime \prime} \times 11^{\prime \prime} \times 5^{\prime \prime}\).

Dealer's Net Price
\(\$ 29.50\)

The New Model TC-10 AC-DC QUALITY MULTITESTER

A New Pocket-Size Volt-Ohm-Milliammeter
with features never before available in an instrument of this size and price. Quality engineered both electrically and mechanically, this instrument will satisfy the exacting requirements of the electronics engineer, laboratory worker or service man.

FEATURES
- Compact small in size:
- Uses D'Arsonval type of meter, \(2 \%\) accuracy - Housed in black metal case Specifications: 5 AC VOLTAGE RANGES: 0-5/15/150/1500/3000 Volts. - 5 DC VOLTAGE RANGES: \(0-5 / 15 / 150 / 1500 / 3000\) Volts. - 3 DC CURRENT RANGES: \(0-5 / 50 \mathrm{Ma}\). 0-1.5 Amps. 2 RESISTANCE RANGES: \(0-100 \mathrm{Ohms}, 0-100 \mathrm{~K}\).

Complete, with self-contained batteries and all
instructions.
Dealer's Net Price
\$1 2.85

\section*{The Model 999 - A Combination SIGNAL GENRATOR AND SIGNAL TRACER}

\section*{The Ultimate in Signal}

Tracing Procedure is Achieved by the Model 999
Enables you to use either the broadcast signal itself or the signal injected by the Signal Generator. This is especially useful when servicing "dead" or ''intermittent" receivers. You will find the Model 999 is the greatest time-saver ever provided for, by combining a full range Signal Generator and Signal Tracer into one unit. The set up time for interconnecting. etc., is entirely
eliminated.

\section*{GNAL GENERATOR}

\section*{Specifications:}
- Frequency Range: 150 Kilocycles to 50 Megacycles
- The R.F. Signal Frequency is kept completely constant at all output levels. This is accomplished by use of a special grid-loaded circuit which provides a constant load on the oscillatory circuit. A grounded plate oscillator is used for additional frequency stability.
- Modulation is accomplished by Grid-blocking action which has proven to be equally effective for alignment of amplitude and frequency modulation as well as for television receivers
- Positive action attenuator provides effective output control at all times.
- R.F. is obtainable separately or modulated by the Audio Frequency SIGNAL TRACER Specifications:
- Uses the new Sylvania iN34 Germanium Crystal Diode which, com bined with a resistance-capacity network, provides a frequency range of 300 cycles at 50 Megacycles.
- Simple to Operate-Clips directly on to receiver chassis, no tuning controls.
- Provision is made for insertion of phones of any impedance, a standard Volt-Ohm-Miltiammeter or Oscilloscope The Model 999 comes complete with all test leads \(\begin{aligned} & \text { Only } \\ & \text { and operating instructions. }\end{aligned} \mathbf{\$ 2 8 . 8 5}\)

\section*{The New Model TC-50 TUBE AND SET TESTER}

A Complete Laboratory, All-Purpose Test-Instrument This versatile tester will accurately test all up-to-date tubes TUBE TESTER Specifications: - Tests all up-to-date tubes including 4, 5, 6, 7 7 L . octals, loctals, tele vision. magic eye, thyrators, single-ended, floating filament. mercury vapor, new miniatures, etc. Tests pilot lights, all voltages. - Tests by the popular emission method read directly on the scale of meter. Tests leakage and short tests of any ele. ment aqainst all elements in all tubes. - Tests both plates in rectifiers. Tests both diodes in multipur pose tubes. Tests indi. vidual sections such as diodes, triodes, pentodes, etc.. in multipurpose tubes. - Individual pin switch selection. Special compensation type of ine voltage adjuster. © Tests provided for approximately 600 tubes.
MULTIMETER

Specifications:
DC VOLTAGE RANGES \(0-10 / 100 / 1000 / 5000\) Volts. AC VOLTAGE RANGES \(0-10 / 100 / 1000 / 5000\) Volts. DC CURRENT RANGES \(0-10 / 100 / 1\) Amp. LOW RESISTANCE RANGE: O 10,000 Ohms. - MEDIUM RESISTANCE RANGE: 0 100,000 Ohms. - HIGH RESISTANCE RANGE: 0 Megohm. OUTPUT VOLTS: \(0-10 / 100 / 1000 /\) 5000 volts. DECIBELS: 8 to +55 D.B. based on zero D.B., equals .006 Watts intoa 500 -Ohm line

The New Model TC-50 combines seven instruments, DC V. AC V., DC M.A. Ohms, Output Meter. Decibel Meter and Tube Tester. Full scale accuracy to \(2 \%\) English Reading GOOD and BAD scale for testing tubes Obsolescence reduced to absolute minimum. Simple and quick reading charts for tube testing. Multimeter section affords most popular every days measurements. Operates on \(90-120\) Volts 60 cyeles AC. Housed in a sturdy beautiful portable, hand-rubbed cabinet Complete, with test leads, tube charts and all detailed, operating in-
structions. \(8^{\prime \prime} \times 101 / 2^{\prime \prime} \times 5^{\prime \prime} . \$ 39.50\)

712 SOUTH EAST HAWTHORNE BOULEVARD \\ PORTLAND 14, OREGON \\ TELEPHONE: EAST 6197 \\ CABLES: TEKTRONIX
}

NEED WIDE BAND
AND FAST SWEEPS?

TEKTRONIX TYPE 511-AD OSCILLOSCOPE
\(\$ 845\) f.o.b. Portland
VIDEO - 5 CPS - 10 MC .
SWEEPS - . 01 SECONDS TO . 1 MICROSEC./CM.
The Type 511-AD, with its 10 mc . amplifier, 0.25 microsecond video delay line and sweeps as fast as .I microsec./cm. is excellent for the observation of pulses and high speed transient phenomena. Sweeps as slow as \(.01 \mathrm{sec} . / \mathrm{cm}\). enable the 511 -AD to perform superlatively as a conventional oscilloscope. The identical instrument without . Po video
delay line is known as the Type \(511-A\), price \(\$ 795.00\) f.o,b. Portland, delay line is known as the Type \(511-\mathrm{A}\), price \(\$ 795.00\) f.o.b. Portland, Oregon.

The Types 511-A and 511-AD have broadened and further secured the position of leadership that was established by their predecessor, the Tektronix Type 511 . Eminently satisfied users include leading universities, industrial organizations and independent research groups as well as the armed services and other governmental agencies.

\section*{NEED DC COUPLED AMPLIFIERS AND SLOW SWEEPS?}

TEKTRONIX TYPE 512 OSCILLOSCOPE
\(\$ 950\) f.o.b. Portland
VIDEO - DC - \(2 M C\).
SWEEPS - 3 SECONDS TO 3 MICROSEC./CM.
The Type 512 with a sensitivity of \(5 \mathrm{mv} . / \mathrm{cm}\). DC and 5 weeps as slow as .3 sec. \(/ \mathrm{cm}\). solves many problems confronting workers in the fields where comparatively slow phenomena must be observed. Veitical amplifier bandwidth of 2 mc . and sweeps as tast as \(3 \mathrm{microsec} . / \mathrm{cm}\). make it an excellent general purpose oscilloscope as well. The continuously variable sensitivity range of 10,000 to 1 ; the differential (push-pull) input circuit with high rejection of unwanted signal components; the revolutionary carrier type blanking circuit as well as many other exclusive features have resulted in an immediate accptance of the Type 512 by prominent research personnel throughout the country.

\section*{BOTH INSTRUMENTS FEATURE:}
- Direct reading sweep dials.
- Single, triggered or recurrent sweeps.
- Accurate calibration, both time and amplitude
- All DC voltages electronically regulated.
- Sweep expansion of 5 times for any \(20 \%\) of normal sweep.
- individually adiusted for optimum transient response.
- RC probes for high impedance, low capacity input.
- Excellent image contrast in high ambient light.
- Design and fabrication integrity of highest degree.
- Choice of 5CPIA, 5CP7A or 5CPIIA CRT, no added expense.
- Electrically welded all aluminum construction.
- Low weight ( 53 pounds - self-contained).

The Type 104 is a low cost generator of precision square waves in the frequency ranges most commonly used for general purpose wide band oscilloscope and amplifier testing. The instrument is supplied with four fixed frequencies; two in the range of 25 cycles to 10 kc ., and two in the range of 25 kc . to mc . By proper choice of the four available frequencies, the Type 104, when used in conjunction with a suitable wide band oscilloscope such as the Tektronix Type 511-A, Type 511-AD or Type 512, makes possible convenient adiustment of video amplifiers and observation of their transient response.

The Type 104 Is normally supplied with the following frequencies: 50 cycles, 1 kc ., 100 kc . and 1 mc . The 50 cycle square wave provides a quick test for the low frequency characteristics of amplifiers. The i kc .

TYPE 104 SQUARE WAVE GENERATOR
square wave is a convenient signal for quickly and accurately adjusting capacity compensated attenuators. The 100 kc . and I mc. square waves permit convenient adjustment of video amplifiers.

\section*{FEATURES:}
- RISE TIME: Less than . 015 microsec., high frequencies. Less than 2 microhigh frequencies. Less
- IMPEDANCE: 0 to 93 ohms HF., 0 to 20,000 ohms, LF. depending on attenuator settings.
- AMPLITUDE: 0 to 5 volts, HF., 0 to 50 volts LF. both continuously variable.
- DIMENSIONS: \(9^{\prime \prime \prime}\) high; \(131 / 2^{\prime \prime}\) wide; \(101 / 2^{\prime \prime}\) deep.
- WEIGHT: is pounds, self-contained.

The New Model TV-10 TUBE TESTER
}
sPECIF:CATIONS: \(\star\) Tests all tubes including 4, 5, 6, 7. Octal, Lock-in, Peanut, Bantam, Hearing-aid, Thyratron, Miniatures, Sub-Miniatures, Novals, etc. Will also test Pilot Lights. \(\star\) Tests by the well-established emission method for tube quality, directly read on the scale of the meter. \(\star\) Tests for "shorts" and "leakages" up to 5 Megohms. \(\star\) Uses the new selfcleaning Lever Action Switches for individual element testing. Because all elements are numbered according to pin-number in the RMA base numbering system, the user can instantly identify which element is under test. Tubes having tapped filaments and tubes with filaments terminating in more than one pin are truly tested with the Model TV-10 as any of the pins may be placed in the neutral position when necessary. \(\star\) The Model TV-10 does not use any combination type socket. Instead individual sockets are used for each type of tube. Thus it is impossible to damage a tube by inserting it in the wrong socket. \(\star\) Free-moving built-in roll chart provides complete data for all tubes. \(\star\) Newly designed Line Voltage Control compensates for variation of any line voltage between 105 Volts and 130 Volts.
The Model TV-10 operates on \(105-130\) Volts, 60 Cycles A.C. Comes housed in a beautiful hand-rubbed oak cabinet complete with

The New Model TV-20
A COMBINATION 20,000 OHMSPER
MULTI-METER and TELEVISION KILOVOLTMETER The Model TV-20 was designed to provide all the multi-meter measurement requirements of A.M, F.M. and Television. Unlike other recent models, which are actually standard V.O.M.'s converted to test the new Television Voltages, the Model TV-20 is a completely new unit. It provides the sensitivity, ranges and accessories which are needed to service F.M. and Television in addition to A.M. Radio.

\section*{SPECIFICATIONS}

- 9 d.C. VOlTAGE RANGES: (At 20.000 ohms per Volt) - 0-2.5/-10/50/100/250/500/1,000/5,000/50.000 Volts.
- 8 A.C. VOLTAGE RANGES: (At 1,000 ohms per Volt) - \(0.2 .5 / 10 /-\) 50/100/250/500/1,000/5,000 Volts.
- 5 D.C. CURRENT RANGES:
0.50 Microamperes; \(0.5 / 50 / 500\) Milliamperes; 0-5 Amperes.
- 4 RESISTANCE RANGES \(0-2,000 / 20,000\) ohms; \(0-2 / 20 \mathrm{Meg}\).
- 7 D.B. RANGES: (All D.B. ranges based on ODb \(=1 \mathrm{Mv}\). into a 600 -ohm line)
\(=4\) to \(+10 \mathrm{db}+36\) to +50 db
+8 to \(+22 \mathrm{db}+42\) to +56 db
+8 to \(+22 \mathrm{db}+42\) to +56 db
+22 to \(+36 \mathrm{db}+48\) to +62 db
- 7 OUTPUT 28 to 42 db
- 7 OUTPUT VOLTAGE RANGES: O to \(2.5 / 10 / 50 / 100 / 250 / 500 / 1,000\) volts.

> ADDED FEATURE: The Model TV-20 includes an Ultra High Frequency Voltmeter Probe. When plugged into the Model TV-20, the Y. H. Probe converts the unit into a Negative Peak-Reading H. F. Voltmeter which will measure gain and loss in all circuits including F.M. and T.V.

The Model TV- 20 operates on self-contained batteries. Comes housed in beautiful hand-rubbed oak cabinetcomplete with portable cover. Built-in High Voltage Probe, H. F. Probe, Test Leads and all operating instructions. \(3 \ggg\)

OR

The New Model TV-30 TELEVISION SIGNAL GENERATOR Enables Alignment of Television 1, F. and Front Ends Without the Use of an Oscilloscope!
FEATURES: \(\star\) Built-in modulator may be used to modulate the R.F. Frequency also to localize the cause of trouble in the audio circuits of T.V. Receivers. \(\star\) Double shielding of oscillatory circuit assures stability and reduces radiation to absolute minimum. * Provision made for external modulation by A.F. or R.F. source to provide frequency modulation. All I.F. frequencies and 2 to 13 chansoure frequencies are calibrated direct in Megacycles on the Vernier dial. Markers for the Video and Audio carrlers within their respective channels are also calibrated on the dial. \(\star\) Linear calibrations throughout are achieved by the use of a Straight Line Frequency Variable Condenser together with a permeability trimmed coil. \(\star\) Stability assured by cathode follower buffer tube and double shielding of component parts.
SPECIFICATIONS: FREQUENCY RANGE; 4 Bands-No switching. \(18-32 \mathrm{Mc}\).: 35-65 Mc.; \(54-98 \mathrm{Mc}\).: \(150-250 \mathrm{Mc}\). AUDIO MODULATING FREQUENCY: 400 cycles (Sine Wave). ATTENUATOR: 4-position, ladder type with constant impedance control for fine adiustment. TUBES USED: 6C4 as Cathode follower and modulated buffer; 6C4 as R.F. Oscillator: 6SN7 as Audio Oscillator and power rectifier.
Model TV-30 comes complete with shielded co-axial \(\mathbf{S}^{\prime}\)
lead and all operating instructions. Measures \(6^{\prime \prime} \times\)
\(7^{\prime \prime} \times 9^{\prime \prime}\). Shipping Weight: 10 lbs. . . . . .

\section*{MODEL 320-K — SIGNAL GENERATOR KIT}

\begin{abstract}
An excellent instrument for service, lab, and school use. Can be used for FM-AM alignment and to provide TV marker frequencies. Highly Stable Hartley oscillator has range of 150 kc to 102 mc with fundamentals to 34 mc . Colpitts audio oscillator supplies pure 400 cycle sine wave voltage for modulation. Audio oscillator voltage can be used for testing distortion in audio equipment, bridge measurements, etc. Complete RF section featuring turnet-type coil assembly and ceramic insulated variable Condensers, can be aligned by use of any standard broadcast receiver. Size: \(10^{\prime \prime}\) \(\times 8^{\prime \prime} \times 43 / 4^{\prime \prime}\). Handsome etched panel with easy-to-read calibrations. Easily assembled and aligned. Complete with tubes
\end{abstract}

\section*{MODEL 145-K MULTI-SIGNAL TRACER KIT}

Versatile, high gain-high frequency instrument. Self-contained test speaker permits tracing of RF, IF, FM, audio, and video circuits. Has provision for visual tracing with VTVM, enabling actual stage-by-stage gain comparison. May also be used as a small public address or intercom system. Response is well over 200 mc . 3 color hammertone panel. 110-125 V. AC. Size \(10^{\prime \prime}\) \(\times 8^{\prime \prime} \times 43 / 4^{\prime \prime}\). Comes complete with tubes and diode probe in kit form.

COMPLETE KIT

SENSATIONAL! . . . NEW! . . . EICO MODEL 360-K TV-FM SWEEP SIGNAL GENERATOR KIT ALL THESE LABORATORY-QUALITY FEATURES: - Crystal marker oscillator with variable amplitude. - Covers all TV and FM alignment frequencies between 500 kc and 228 mc . Sweep width variable from 0.30 mc . with mechanical inductive sweep. - Extremely wide sweepwidth allows gain comparison of adjacent RF TV channels. - Provides for injection of external signal generator marker. - Phasing control included. - Vernier driven, calibrated tuning dial for master oscillator. - Large, easy-to-read dial is directly calibrated in frequencies. All center frequencies of TV channels clearly marked on panel. - Extremely stable oscillator gives clear, steady pattern. - Can be used with EICO Model \(400-\mathrm{K}\) or any other standard oscilloscope. - All components furnished, including handsome, lifelong 3 -color etched panel, and durable steel cabinet. Comes complete with all tubes (including new, high-frequency miniature types): \(6 \times 5 \mathrm{GT}, 12 \mathrm{AU7}\), two 6C4's. Crystal not included. Size: \(10^{\prime \prime} \times 8^{\prime \prime} \times 63 / 4^{\prime \prime}\).

\section*{MODEL HVP-1 - HIGH VOLTAGE PROBE}

At remarkable low cost, here is a probe for every use involving high voltages. Not a kit, but a complete, top-quality High Voltage Test Probe. Measures up to 10,000 or 30,000 Volts making it useful even for projection television. Special Helical-Wound Ceramic HV Multiplier Resistor, which is removable, makes it adaptable to most VTVM's and all 20,000 ohms per volt meters with 1000 or 5000 volt scales. Lucite head has high dielectric and low leakage path. Handle is made of multi-layer, plywood bakelite for greater insulation and high safety factor. Large flashguards for additional safety. Specify your instrument to your jobber.

11/32" Jewel... Vertical Mounting \\ No. 5 TYPE
}

The No. 5 type is unique in its field because it can be adapted to the focal lengths of any miniature screw or bayonet lamp. The opening in the shank of this jewel is so small, it is necessary to have the filament of the Iamp directly behind the jewel. The slotted jewel mounting on the No. 5 makes this feature possible. This is an inexpensive unit, and it presents a neat appearance on small instrument panels.

STANDARD TYPES
\begin{tabular}{c|c}
\hline Type Numbor & \multicolumn{1}{c}{ Style Socket } \\
\hline 5 & \begin{tabular}{l} 
Miniature Screw \\
MB
\end{tabular} \\
\hline
\end{tabular}

\section*{SPECIFICATIONS}

MOUNTING: Mounts in \(9 / 32^{\prime \prime}\) diameter hole on panels up to 1/4" thick.
RATING: Tested on 110 volts. Can be supplied to withstand 1000 volts AC for a period of one minute.
LAMPS: Designed to house any filament type miniature screw or miniature bayonet lamp.
COLORS: Amber, blue, colorless, green, ruby, white or yellow.
FINISHES OF GLASS: Standard unit is equipped with faceted glass. Smooth glass may be obtained upon request.
PLATING: Panel hardware is bright nickel, other parts cadmium.
SPECIAL PLATING: Panel hardware can be supplied with statuary bronze or chrome plating for small extra charge. PACKING: Packed in bulk unassembled.

\(1 / 22^{\prime \prime}\) Jewel . . . Vertical Mounting No. 10C TYPE UNDERWRITERS' APPROVED

The No. 10 C is an inexpensive candelabra screw base jownl light assembly that is Underwriters' Approved for 75 watt-125 volt service. It is particularly suited to applications where there is a minimum of depth behind the panel, and lamp replacement from the front of the panel is not necessary. The mounting bracket has a slotted hole to facilitate adjustment for placing the lamp filament directly behind the jewel giving maximum illumination of the jewel.

\section*{SPECIFICATIONS}

MOUNTING: Mounts in \(7 / 16^{\prime \prime}\) hole on panele up to \(1 / 4^{\prime \prime}\) thick. For panels between \(1 / 4^{4}\) and \(3 / 8^{\prime \prime}\) specify No. 16L jewel. RATING: 75 watts, 125 volts.
LAMPS: Will house any candelabra screw base lamp. COLORS: Amber, blue, colorless, green, ruby, white and yellow.
FINISHES OF GLASS

SYMBOL
Faceted (Diamond Cut)
Smooth Plain (Smooth face no frosting) Smooth, Frosted All Over Smooth, Frosted on Back Only
PLATING: Jewel assembly is burnished nickel. All other parts are cadmium. Statuary bronze, chrome, and black nickel plating can be applied to jewels for a small extra charge.
PACKED: Packed in bulk unassembled.

\section*{ASSEMBLIES}

\section*{Plastic Dome . . . Horizontal Mounting Lamp Replaceable from Front of Panel} No. 51 TYPE

NET WEIGHT 0.045 lbs .
PATENT NO. 2220516
The No. 51 is a patented Drake assembly featuring a plastic dome indicator which fosters wide angle observation. The whole dome is illuminated, therefore it can be easily seen from the side. It is a good eye-catcher because of its brilliant glow, and for this reason, it makes \(\alpha\) wonderful warning light. The unit is supplied with three \(1 / 16^{\prime \prime}\) thick fibre spacing washers, so that when the unit is mounted on a thick panel, these washers can be removed making the lamps as accessible for replacement as when mounted on a thin panel.

\section*{1" Jewel . . . Horizontal Mounting No. 75 TYPE}

A

PATENT NO. 2192345
Net Wt. 0.107 lb .
The patented No. 75 type has \(\alpha\) 'slip-fit" bezel. It is exceedingly neat in appearance. Very substantial and easy to install. All nearts are burnished cadmium plated except the bezel which has a highly polished chrome finish.
\begin{tabular}{|c|c|c|}
\hline Type Number & Style Socket & Length A to B \\
\hline 75 & Candelabra & \(21 /{ }^{1 / \prime}\) \\
\hline 175 & Min. Screw & 13/4", \\
\hline 275 & Min. Bayonet & 17/8', \\
\hline 375 & S.C. Cand. Bayonet & 2-1/32' \\
\hline
\end{tabular}

NOTE: Dimension \(A\) to \(B\) is over-all length. Overall diameter of mounting nut \(13 / a^{\prime \prime}\).

\section*{SPECIFICATIONS}

MOUNTING: Mounts in \(1^{\prime \prime}\) diameter hole on panels up to \(1 / 2^{\prime \prime}\) thick. RATING: Nos. 175 and 275 are tested on 110 volts.
Nos. 75 and 375 will withstand a voltage breakdown of 1,000 volts LAMPS: The No. 75 is designed to house Mazda 115 volt 6 watt, S6 or \(C 7\) candelabra screw base lamps. Will house any other candelabra screw base lamp up to \(1^{7 / 8^{\prime \prime}}\) long and \(7 / 8^{\prime \prime}\) diameter. The Nos. 175 and 275 are designed to house any miniature lamp up to \(1-3 / 16^{\prime \prime}\) long and \(7 / \mathbf{a}^{\prime \prime}\) diameter.
The No. 375 is designed to house any single contact candelabra bayonet base lamp up to \(11 / 2^{\prime \prime}\) long and \(7 / 6^{\prime \prime}\) diameter.
COLORS: Amber, Blue, Colorless, Green, Red, White, or Yellow. COLORED DISCS: The No. 75 types are regularly supplied with colorless, smooth glass frosted on back behind which is placed a colored disc. The advantage of this method is that the glass appears white until the lamp is lighted.
OTHER FINISHES OF GLASS

Faceted (Diamond Cut)
SYMBOL

\section*{PILOT LIGHT ASSEMBLIES}

\section*{1" JEWEL LIGHT ASSEMBLIES LAMPS REPLACEABLE FROM FRONT OF PANEL}

\section*{No. 75AP TYPE UNDERWRITERS' APPROVED}

Net Weight 0.110 lbs .
The No. 75Ap is a heavy duty candelabra screw base assembly designed to be used on rugged equipment. The panel hardware (jewel holder) is attractively finished with a highly polished chrome plate. All other parts are cadmium plated. The No. 75AP is Underwriters' approved for 125 volt, 75 watt service. The socket assembly and mounting tube are one piece and so constructed that they need never be replaced. Electrical connections are made to solder terminals. No danger of vibration loosening the connections as with screw terminals.

\section*{SPECIFICATIONS}

MOUNTING: Mounts in \(1^{\prime \prime}\) diameter holes on panels up to \(1 / 2^{\prime \prime}\),
thick.
RATING: 125 volts, 75 watts. Can be operated on 220 wolt circuits if connected in series with a \(2000 \mathrm{ohm}, 10\) watt wire wound resistor. In this case a 115 volt, 6 watt lamp must be used.
LAMPS: Designed to house the Mazda 115 volt, 6 watt, S6, candelabra screw base lamp.
Will house any other candelabra screw base lamp which has an overall length of less than \(17 / 8^{\prime \prime}\) and a diameter of less than \(7 / 8^{\prime \prime}\). NOTE: Will not house a C7 bulb.
COLORS: Amber, blue, colorless, green, ruby, white or yellow.
\begin{tabular}{l|c}
\hline \hline \multicolumn{1}{c|}{ FINISHES OF GLASS } & \\
\hline Faceted (Diamond Cut) & FABOL \\
\hline \begin{tabular}{l} 
Smooth Plain (Smooth face and no frosting) \\
Smooth, frosted on back (Smooth face frosted on \\
back only)
\end{tabular} & SP \\
\hline
\end{tabular}

For Mazda lamps we recommend faceted or smooth glass frosted on back. For neon glow lamps, we recommend smooth plain glass.
NOTE: If no other finish is specified, faceted glass will be furnished.

PACKING: The units are packed in individual boxes for the jobbing trade; in bulk, and fully assembled for the manufacturing trade.

PARTS
\begin{tabular}{c|l}

\hline 475M & Socket Assembly \\
75A & Jewel \& Jewel Holder \\
75 C & Nut \\
75L & Lock Washer \\
\hline
\end{tabular}

The No. 975 is a heavy duty double contact, candelabra, bayonet base assembly designed to be used in rugged equipment. The panel hardware (jewel holder) is attractively finished with \(\alpha\) panel hardware (jewel holder) is attractively finished with \(\alpha\)
highly polished chrome plate. All other parts are cadmium plated. The No. 975 is Underwriters approved for 125 volt, 75 watt service. The mounting tube and socket are detachable; therefore the wire leads of the socket assembly can be connected to the terminal block before the socket assembly is clipped into the mounting tube which is already installed in the panel. This feature facilitates quicker assembly of panels. The built in lead wires can be attached directly to screw or solder terminal blocks; thereby eliminating two soldering operations. Units are carried in stock with both 10 inch and 20 inch leads. On orders of 500 or more units the wires can be cut to your specifications. See wire table.

\section*{PILOT LIGHT ASSEMBLIES}

\author{
totally enclosed, miniature bayonet
}

\section*{PILOT LIGHT ASSEMBLIES}

\section*{BUILT-IN RESISTORS FOR NEON GLOW-LAMPS OPTIONAL}

These totally enclosed pilot lights meet Underwriters' Specifications. They are very rugged and particularly adapted to use in equipment subjected to extreme vibration and atmospheric conditions. The 100 N and 101 N assemblies are designed specifically for use with the NE51 neon glow lamp. With proper current limiting resistors (built into the socket of either the 100 N or 101 N ), the neon glow lamps can be operated on any voltage over 65 volts AC and 90 volts DC. You merely specify the operation voltage and we furnish the correct unit. Stock units have 100,000 ohm resistors for 115 volt operation. The primary advantages of the glow lamp are its long life ( 3000 hrs .), resistance to vibration (unaffected), low initial cost, low operating cost ( \(1 / 25\) watt), and small size.

\section*{WITH 1/2" JEWEL 110. 11}

PATENT NO. 2220515
No. 100N

HAS BUILT-IN RESISTOR FOR NEON LAMP
The jewel or bull's-eye indicators are recommended for use with incandescent lamps of over one watt; in temperature ambients of over \(200^{\circ} \mathrm{F}\); or, in the case of neon, where a concentration of light is required directly in front of the observer.

\section*{SPECIFICATIONS}

MOUNTING: Mounts in \(11 / 16^{\prime \prime}\) dia. hole on panels up to \(3 / 8^{\prime \prime}\) thick.
thick. Breakdown voltage 2000 volts AC
LAMPS: No. 100 is designed to house any miniature bayonet T31/4 lamp.
COLORS: Amber, Blue, Colorless, Green, Ruby, White, and Yellow NOTE: Blue, Green, and White not recommended for use with neon lamp.

\section*{FINISHES OF GLASS}

Faceted (Diamond Cut)
Smooth Plain (Smooth face, no frosting)
Smooth, Frosted All Over
Smooth, Erosied on Back Only \(\qquad\)
NOTE: SFA and SFB finishes not recommended for neon lamps.
PLATING: Regularly supplied with burnished nickel plated panel hardware.
SPECIAL PLATING: Extra charge for chromium, statuary bronze, etc.
PACKING: To jobbers: individually packed in boxes, 25 boxes to a unit package. To manufacturers: packed in bulk, fully as. sembled. Net wt. 0.057 lbs .

\section*{Dial and Jewel. PILOT LIGHT ASSEMBLIES}

\section*{DOUBLE CONTACT CANDELABRA BAYONET \\ Underwriters' Approved for General Purpose}

\section*{No. A900 SERIES}

UL File No. E17786

Fig. 1

This socket assembly is a 110 volt unit designed specifically for use in Underwriters' approved equipment. It has built in lead wires and is sturdily constructed befitting 110 volt application. In spite of its ruggedness it requires less space with lamp installed than does the candelabra screw type. In addition the bayonet type lamps will not loosen from vibration.

This socket can be supplied mounted to any one of the brackets shown on this page and the next. If they do not meet your requirements, we have the facilities to build them to your specifications.

The A900 type assembly is equipped with No. 18 (16 strands No. 30) tinned copper wire insulated with \(1 / 32^{\prime \prime}\) of plastic insulation. See wire table. Units can be wired in series.
The Underwriter's Laboratories have approved the use of this socket with No. 22 gauge wire leads for application in radio only. With the lighter gauge wire the assembly is designated as the No. 900 Series. It can be wired in series or parallel.
See wire table. See wire table.

NOTE: On orders for less than 500 assemblies, no choice of leads is given. Assemblies will be supplied with \(10^{\prime \prime}\) of black wire stripped \(1 / 2^{\prime \prime}\).
L.AMPS: 110 volt, 10 watt can be purchased from Drake Manufacturing Co.

\section*{FORMULATION OF PART NUMBERS}

The part number is composed of three parts, the series number, the bracket number, and the bracket position. The series number is expressed in hundreds plus the letter prefix if there is one. For example: The part number of an A900 Series Socket (fig. 1) with a No. 50 H bracket (fig. 4) in the " \(A\) " position (fig. 2) would be No. A950H-A. Similarly a unit with No. \({ }^{22}\) wire ( 900 series) and a No. 50J bracket (fig. 5) in the "C" position (fig. 3) would be 950J-C. Part numbers of sockets without brackets are designated as 917. A917, and 1017 respectively.
NOTE: Please do not fail to specify length of lead wire and stripping when ordering more than 500 units.

\section*{MINIATURE BAYONET LICHT SOCKET ASSEMBLIES No. 500 SERIES}

\section*{For Underwriters' Approved AC-DC Radio Receivers}

\section*{For Underwriters' Approved AC Radio Receivers}

In this socket assembly the bayonet shell is protected from outside contact by a sturdy fishpaper insulating shield. The lead wires are an integral part of the unit and both are secured within the socket so that they will withsocket so that they will with-
stand \(a\) tension over 25 stand
pounds.
Rounded edges on the opening at the base prevent cut and frayed lead wire insulation.

The a minimbly will withstand age of 1000 breakdown voltage of 1000 volts between contacts and to ground.
All parts are fitted so that there can be no rotation of one part with respect to an. one part with respect to an-
other. This means that there other. This means that there is absolute ridgidity from the onet shell which supports the lamp. The center contact cannot protrude from the socket when the lamp is removed.
The standard assembly is equipped with No, 22 gauge wire, however No. 20 wire can be used.

In this socket assembly the bayonet shell is electrically connected to the mounting bracket. It is secured in such a way that it cannot rotate. The lead wire is an integral part of the unit and is secured tightly enough to withstand a tension of over 25 pounds. The center contact cannot pro. trude when the lamp is removed.

The assembly will with. stand a minimum breakdown voltage of 1.000 volts between the center contact and ground.

The assembly is customarily built with No. 22 gauge wire; however any other gauge up to and including No. 16 wire can be used.

\section*{No. 800 Series}

In this socket assembly the bayonet shell is insulated from the bracket. The shell is bridged to provide a good solder connection for one lead wire. The center lead wire is builtin, and the center contact cannot protrude when the lamp is removed. Upon request the assembly can be furnished with two lead wires or no lead wires.

\section*{COMMENTS ON ALL ASSEMBLIES ILLUSTRATED HERE}

The 500 and 700 types can be wired in series or parallel, but the 800 type can only be wired in series. See wire table for various lengths, color and insulation of lead wires.

NOTE: On orders for less than 500 assemblies, no choice of leads is given. All assemblies will be supplied with 10 " of No. 22 plastic insulated wire stripped \(1 / 2^{\prime \prime}\) long.

The assemblies can be attached to any of the mounting brackets shown in the listing of dial light assemblies. We also have approximately 900 other mounting brackets that are not listed. If you will submit your lighting problem to us, we are certain that we can offer you a satisfactory solution.

\section*{SOCKET ASSEMBLIES AND JEWELS}

\section*{No. 300 SERIES}

\section*{Candelabra Screw Base} Underwriters' Approved for GeneralUse

The No. 300 socket assembly is a candelabra screw socket, Underwriters'approved for 75 watt, 125 volt service. It can be attached to any of the brackets shown in the listing of dial light assemblies. We also have approximately 900 other mounting brackets that are not listed. If you will submit your lighting problem to us, we are certain that we can offer you a satisfactory solution.

\section*{No. 1000 Series}

Single Contact Candelabra Bayonet Automotive Type

This unit is an inexpensive assembly suitably adapted for use in 6 to 115 volt circuits. It has a built in center lead wire and the socket and bracket form the ground connection. The unit is sturdily constructed and designed so that the center contact cannot protrude when the lamp is removed.

This socket can be supplied mounted to any one of the brackets illustrated with the 900 and A900 socket assemblies. If they do not meet your requirements, we have the facilities to build them to your specifications.
The standard Number 1000 type Assembly is equipped with 10 inches of No. 18 ( 16 strands No. 30) tinned copper wire insulated with \(1 / 32^{\prime \prime}\) of plastic insulation. See wire table. Assemblies can be wired in parallel.

On orders of more than 500 units No. 22 to No. 16 gauge wire is available.

NOTE: Can be sold knocked down into extruded shell, spring, and pigtail with center contact and washer attached.

\section*{PANEL LIGHT}

For front panel illumination. Has polished nickel hood, easily re.
 placement; can be ro
tated to any position. Fits \(1 / 2^{\prime \prime}\) mounting hole. Made for miniature bayonet or screw base, T \(31 / 4\) or G \(31 / 2\), bulbs.
Cat. No. 147-330-Miniature Screw Base........... \(\$ 0.80\) 147-329-Miniature Bayonet Base............ . . 90

\section*{VARIABLE LIGHT INTENSITY}

Pilot lights similar to \(147-400,-800,-1110\), -1200 can be furnished with either polarized or shutter type variable light intensity jewel holders. Information on request.

DO NOT FAIL TO SPECIFY COLOR OF JEWELS. PRICES DO NOT INCLUDE BULBS.

\title{
GENERAL (86) ELECTRIC \\ RADIO DIAL LAMPS
}

\section*{Designed and engineered for the iob}

BECAUSE of the vibration conditions under which G-E radio dial lights must operate, General Electric devotes special care to their design and manufacture. Filaments are designed to vibrate without damage and are secured by a shake-proof joint.

General Electric research is constantly at work to assure the quality and serviceability of G-E radio dial lamps. Shock tests, vibration tests and base torsion tests are used in the laboratory to make certain your customers will get good service from the G-E bulbs you install.

Features like these make it worthwbile for you to sell and install G-E miniature lamps:
1. Dependable, trouble-free performance.
2. High level of maintained light output.
3. Low current consumption.
4. Long life.
5. Profitable to bandle.
6. Preferred by both dealers and customers.

FUSETRON FUSES, \(1 / 4 \times 11 / 4\) inch
Glass tube - Dual-Element type

\section*{A FUSE WITH A LONG TIME-LAG}

These fuses avoid needless blows from starting currents or surges. They have a fuse link which operates only on very high overloads or short-circuits - they have a thermal cutout which functions on low overloads - the thermal cutout cannot operate quickly at any load, hence long time-lag is obtained. Yet protection is afforded against short-circuits or continued overloads.
Test specification-carry \(110 \%\), open at \(135 \%\) in 1 hour.
Approximate blowing time: at \(200 \%\) load 25 seconds \(\begin{array}{lll}\text { at } 300 \% & \text { i. } & 8 \\ \text { at } 500 \% & \text { ". } & 3\end{array}\)
125 and 250 volt sizes listed as approved by Underwriters' Laboratories.
Shipping weight 0.9 lbs. per 100.

\section*{for Protection of Radios, Instruments and Electronic Equipment}

\section*{BUSS FUSE CLIPS for \(1 / 4\) inch Fuses}
(SFE 4, 6, 9, 14, 20, AGX, AGC, ABC, MDL, MJB, MTH fuses)

Spring bronze clips are made of Herculoy a bronze of distinctly superior quality for spring clips. This metal gives clips great gripping strength and ability to retain spring under adverse conditions.
Beryllium copper clips combine low electrical resistance with great gripping strength. This means maximum electrical conductivity and results in cooler operation of clips and fuse.

Size of mounting hole; .130 to .135 inch.
Center of hole to back-stop; . 125 to .135 inch.
Min. length of contact surface; \(8 / 32\) inch
Maximum height; \({ }^{14 / 3} 2\) inch
Maximum width; \({ }^{11 / 32}\) inch
Shipping weight; 3 lbs. per 100
List Price
4548 Spring bronze clip, Nickel plated.
\(\$ 0.02\) 4592 Beryllium copper clip, Silver plated.
. 05

\section*{BUSS CLIP ASSEMBLIES for \(1 / 4\) inch Fuses}
(SFE 4, 6, 9, 14, 20, AGX, AGC, ABC, MDL, MJB, MTH fuses)

Clips as described above. Brass terminal. \(3 / 16\) inch 6.32 washer head terminal screw. \(1 / 4\) inch 4-40 flat head iron mounting screw. Shipping weight; 1 lb . per 100
4431 includes No. 4548 spring bronze clip, terminal screw, terminal and mounting screw.

List Price \(\$ 0.40\)
4432 includes No. 4592 berylliuin copper clip, terminal screw, terminal and mounting screw. List Price \(\$ 0.40\)

\section*{BUSS FUSE BLOCKS}

Bakelite hase blocks \(3 / 16\) inch thick. Countersunk mounting holes for No. 6 flat head screws. Brass No. 6 terminal screws. No. 4548 spring bronze clips.

Full base, Screw terminal Blacks

\section*{Other standard fuse blocks and special fuse blocks}

If blocks shown do not fit your requirements ask for information ors other standard types and sizes.

If special fuse olock is required, send description or sketch, showing type of fuse to be used, number of circuits, type of terminals, etc. We welcome such inquiries.

\section*{BUSS FUSE HOLDERS}

Make it convenient to mount fuse on any equipment.
Changing or inspection of fuse is easy and quick.
Holder has removable knob. Fuse projects beyond body of holder and is not held tight on other end when knob is removed.

Fuse and contacts are protected from dirt and fumes.
Good contact on fuse is made certain by strong coil spring pressure. Poor contact heating that often causes fuse to blow needlessly is eliminated.

Holder bodies are made of black bakelite. All current carrying parts are of brass or copper. Terminals and all contact parts are bright alloy plated.

\section*{Panel Mounted Holders \\ for \(1 / 4\) inch Fuses}

Holders are inserted through hole in panel and are locked in place by nut on holder. They can be used on panels up up to \(5 / 16\) inch thick.
Bayonet type knob requires only quarter turn to remove fuse. No screw
 driver is needed.
Side terminal is held mechanically as well as by solder. Heat of soldering wire to it will not cause it to loosen or come off.
Vibration will not cause failure of terminals as they are designed to stand severe service.
Neoprene washer and steel locking nut (zinc plated, chromate dipped) furnished with each holder.
Wire hole in terminals; .115 inch.
Normal current carrying capacity; 15 amperes.
Listed as Approved by Underwriters' Laboratories.
Shipping weight; 4 lbs. per 100 HJM for \(1 / \pm \times 1\) inch fuses (AGX, MJB, SFE 14) \(\$ 0.40\) HKP for \(1 / 4 \times 11 / 4\) inch fuses (ABC, AGC, SFE20, MDL, MTH)
.40

\section*{IN-THE-LINE HOLDERS for \(1 / 4\) inch fuses}

These holders are for mounting fuse in wire. Holders consist of body and bayonet type knob - two terminal contacts ready to be crimped on ends of wire - a pressure spring that is used under contact in base of holder.

Holders can also be mounted in panel up to \(5 / 16\) inch thick by means of a No. C-1437-018-27 Tinnerman nut (Nut not furnished). Flat spot on holder permits it to be locked against rotation.
Normal current carrying capacity: 15 amperes. Shipring weight, holders: 4 lbs . per 100 . Takes No. 18 or smaller wires.
HDJ-A for \(1 / 4 \times 11 / 4\) inch fuses (ABC, AGC, MDL, 20
MTH, SFE 20)
Takes No. 18 or smaller wires.
HDJ-B for \(1 / 4 \times 11 / 4\) inch fuses (as above)
Takes No. 14 or 16 wires.

\section*{LITTELFUSE}

\section*{8AG INSTRUMENT high speed LITTELFUSES}

Locked Cap Assembly and other exclusive Littelfuse feature for protection of delicate test equipment, galvanometers, micr:ammeters, milliamineters, voltmeters, etc. Glass-enclosed: \(1 \times 3 / 4\) dia., accurately rated, high speed action, short time lag. Voltage ratings up to 250 V ., AC or DC. For higher voltagce use fuses
 Tr in in series.

\section*{UNDERWRITERS" APPROVED 3 AG "LITTELFUSES"250 Volts}

"SLO-BLO"--thry \(1 /\) Amp

Littelfuse is the first manufacturer to receive Underwriters' approval of 3 AG fuses ( \(11 / 4^{\prime \prime}\) x \(1 / /^{\prime \prime}\) dia) in current ratings over 3 amips. at \({ }_{250} \mathbf{x}\) volts. Following list gives standard approved ratings carried in stock. However, the Uroved ratings carried in stock. Littlefuse is a blanket approval from \(1 / 8\) to 6 amps. Intermediate ratings can be furnished withmediate ratings can be furnished what sittelfuse name the amperage and

3 AB '"LITTELFUSES"- 250 Volts

Smallest, highest rated Underwriters' Labora tory approved fuses made. Bakelite-enclosed, arc-quenching, powder-filled fuses. Medium time lag.
voltage rating must appear on the fuse caps of approved-fuses. Many new fields are opened up by the extension of approval from 3 to 6 amps., where formerly bulky cartridges or plug fuses and their mountings were used. This applies specially to electrical appliances, heavy duty power supplies, amplifiers, radios, communication equipment, electronic devices, motors, etc.

Ratings thru \(1 / 4\) Ampere- \(\mathbf{2 5 0}\) Volts
"Slo-Blo" fuses with high tine lag-for circuits with equipment having high inductive or capacitative surges, heavy starting currents and intermittent-duty circuits. Anti-fatigue con-struction-compound element with spring and resistor.

\section*{Ratings \(1 / 2\) thru 3 Amp.- \(\mathbf{2 5 0}\) Volts}

Quick-acting Standard Littelfuses with low time lag. Protective-coated elernents prevent oxidation, promote clean fusion break. Diagonal element for accurate alignment, calibration.

Ratings 4 thru 6 Amp. \(\mathbf{- 2 5 0}\) Volts
Standard, quick-acting Littelfuses with diagona! elements. Low time lag-quick-acting. Std. Pkg. 100—wt., \(1 \frac{1}{2}\) lbs. *Not Und. Approved.

4 AG Aircraft Fuse showing reinforced twisted element

Bakelite-enclosed 4 AB Fuse

\section*{AIRCRAFT LITTELFUSES—ANTI-VIBRATION TYPE}

Especially designed for Aircraft Service. Characteristics: High Mechanical Strength— Resistance to Fatigue-Long Vibration Life

CONSTRUCTION: Glass-enclosed. Littelfuse Jooked Cap Assembly (no cements) prevents loosening of caps. High visibility transparent label for amperage. Elements mechanically depolarized hy twisting at \(90^{\circ}\) (see illustrations) are braced against extreme vibration. "Gooseneck" non-crystallizing fuse element takes up expansion and coniraction. Katings 5 amps. or less use Spring and Link. Service life six times simple wire. The 4 AG and 5 AG sizes are supplied for Aircraft Services for their strength and greater carrying capacity than 3 AG fuses.

BAKELITE-ENCLOSED: 4 AB and 5 AB fuses recommended where severe overloads might shatter glass.

CURRENT RATING: Rated to NEC specifications to carry \(10 \%\) overload indefinitely, to hlow on \(35 \%\) overload within 1 hr., und \(100 \%\) overload within 2 min.

VOLTAGE RATING: Voltage at which fuses will break without arcing over, or bursting under short circuit conditions.

VIBRATION FACTOR: Minimum hours these fuses endure our Magnetic Vibrator operating 120 cycles a second, while carrying the rated current. Acceleration is 10 times the worst field conditions.

\section*{BRADLEY}

LINE

\section*{SELENIUM RECTIFIERS}

B

Above (A) Model RS-100. Designed for radio and low power applications. Rated at 115 volts A.C., 100 milliamperes D.C., but also made for higher voltages and current.

Above (B) SE-11 Series. Power rectifier stacks rated from 0.100 amperes up. Plate size from \(1^{\prime \prime} \times 1^{\prime \prime}\) up to \(5^{\prime \prime} \times 6^{\prime \prime}\).

Bradley selenium rectifiers for medium voltage applications are processed to allow good efficiency and stability at D. C. rating up to 24 volts per plate. For power applications, square plates allow a maximum of rating to space factor.

For high voltage applications, Bradley selenium rectifiers are rated up to 70 volts peak inverse per plate.

Bradley manufactures selenium rectifiers for operation from a few microamperes to many thousands of amperes and from fractions of a volt to thousands of volts. On any rectification problem, consult Bradley. With their long application experience, Bradley engineers can quickly specify the right rectifier for your requirements.

\section*{COPPER OXIDE RECTIFIERS}

In above Universal Instrument Rectifier, you have a single answer to a wide range of measurement rectifier requirements -- one rectifier for all circuits with A.C. voltages and D.C. currents within the unit's rating. Rated up to 12 volts A.C., 5 ma. D.C.
BRADLEY "COPROX" INSTRUMENT RECTIFIERS have vacuum processed pellets with goid contacts.

Exhaustive laboratory and field tests have proved our process produces rectifiers with maximum efficiency and minimum temperature errors. Even under severe condiditions of use, aging is practically eliminated.

Electrical instruments with better accuracy are being built with "Coprox" rectifiers.

BRADLEY "COPROX" POWER RECTIFIERS, designed for low voltage applications, are rugged, compact and conservatively rated. Long service life is combined with low operating cost.
Bradley manufactures copper oxide rectifiers for operation from a few microamperes up to one ampere, and from microvolts up to hundreds of volts. All "Coprox" rectifiers are matched and balanced over a wide temperature range.

\title{
PHOTO ELECTRIC CELLS
}

The pigtail contact model 3-1A shown above is only one of a series of standard mountings. Others include housed models with plug-in contacts, for tube socket and nut-and-bolt types. Shapes of Bradley Luxtron* photocells vary from circles to squares, with every in-between shape desired. In size they range from the diminutive to the largest sizes required. Dimensions of the standard model illustreted are \(2-3 / 16^{\prime \prime} \times 2.5 / 16^{\prime \prime} \times 27 / 64^{\prime \prime}\).

LUXTRON PHOTOCELLS EFFICIENTLY CONVERT LIGHT INTO ELLCTRIC ENERGY WITHOUT ANY EXTERNAL POWER SOURCE. The energy developed is sufficient to operate meters and sensitive relays.

Light-weight, rugged and true to rating, these photocells give long life under the most strenuous operating conditions. As far as we have been able to determine, they are the finest on the market, although among the lowest in price.

For precision control of light with electric energy, specify Luxtron photocells. Write Bradley for samples and engineering assistance on any photocell problem you have in mind.

- ELECTROX Low-Capacity RECTIFIER UNITS
}

Used by most leading test set manufacturers as original components in their equipment.

Full and half wave, low-capacity copper oxide rectifiers for instruments, test sets and similar applications. Electrox Rectifiers are made by a pioneer manufacturer of highquality, dry disc rectifiers. Each type is specially adapted to meet the individual requirements of the user; each unit is individually inspected, tested, and guaranteed right. For dependability, get genuine Electrox Rectifiers!

\section*{RECTIFIER DIVISION}

THESCHAUER MACHINE CO. Cincinnati, Ohio Makers, since 1930, of high-quality, dry disc rectifiers.

\section*{IStetronl-}

\section*{SELENIUM RECTIFIERS}

\author{
Built on Aluminum
}

THE high standards of performance established by Seletron Selenium Rectifiers have won for them nationwide acceptance by electrical manufacturers, purchasing agents and electrical engineers in the power and radio fields.

In every type of \(A C\) to \(D C\) conversion, from the large power stacks to the small units applicable to the radio and television fields, Seletron Rectifiers assure dependable, trouble.free service and long life under severest operating conditions.

These precision-built rectifiers are engineered for compactness and maximum heat dissipation. Although light in weight they are strongly constructed.

Furnished in eight standard plate sizes in assemblies that provide cutputs ranging from a few milliamperes to thousands of amperes. Stacks to meet specific voltage and current requirements are available in an infinite number of combinations.

It is more than coincidence that practically every successful servicing shop has a complete set of Rider Manuals. If is the direct result of their profit-making value. Here you will find data on alignment, l-F peaks, operating valtages, parts lists and parts values, voltage ratings of condensers, wattage ratings of resistors, coil resistance data, gain data, and all other necessary information.

Vol. XIX. (Available May, 1949). Up-to-the-minute coverage on \(A M, F M\), auto and communications receivers. The productions of over 100 manufacturers. Special Record Changer section. "How it Works" book and cumulative index Volumes XVI through XIX. Over 2,100 pages, Net Price \(\$ 19.80\)
Vol. XVIII. Covers AM, FM receivers, auto radio, and record players manufactured between November, 1947, and November, 1948. 115 manufacturers. Combined "How it Works" book and cumulative index Volumes XVI, XVII, and XVIII.

2,036 pages, Net Price \(\$ 19.80\)
VoI. XVII. More than 100 manufacturers of radio receivers and allied products. \(F M\) and \(A M\) receivers produced during 1947, as well as record changers and wire recorders are covered. Separate "How it Works" book and cumulative index Volumes XVI and XVII. \(\quad 1,648\) pages, Net Price \(\$ 16.50\)
Vol. XVI. Diagrams of receivers of 94 manufacturers. Riderexclusive "clarified schematics," breakdowns of multi-band receivers. Covers sets manufactured in late 1946 and early 1947. Separate "How if Works" book and index.

768 pages, Net Price \(\$ 8.40\)
Vol. XV. More than 1200 models and 700 chassis of 121 manufacturers of receivers built during 1946, and earlier. In addition, Rider "clarified schematies" af mulfi-band receivers. A 181-page "How it Works' book and index.

2,000 pages, Net Price \(\$ 19.80\)
Vol. XIV. More than 1300 models and 750 chassis manufactured during the latter part of 1942 when war halted production.
\(\mathbf{1 , 3 7 6}\) pages, Net Price \(\$ \mathbf{1 6 . 5 0}\)
Vol. XIII. In addition to covering the radio receivers manufactured during the latter part of 1941 and the early part of 1942, a separate cumulative index for Volumes XI, XII, and XIII is included. More than 1500 models and 950 chassis.
\(\mathbf{1 , 6 7 2}\) pages, Net Price \(\$ \mathbf{1 6 . 5 0}\)

Vol. XII. Time-sersing "clarified schematic" breakdowns of more limen 200 complicated models feature another
 1800 medels and more than 1000 chassis.

1,648 pages, Net Price \(\$ 16.50\)
Vol. XI. In addition to servicing data on 2,416 models and 1130 clecesis manufactured in the period from August 1839 to June 1940; a vest-pocket manual on pest-button data is included. Double-spread pagee are provided for complicated diagrams. Index end "How it Works" book, including television, facsimMe, and FM (developments up to that timel. \(\quad \mathbf{1 , 6 5 2}\) pages, Net Price \(\$ 16.50\)
Vol. X. Coverireg 2416 models and 1140 chassis, it takes in rereivers built from October 1938 to August 1938. A "How it Works" section is featured, as well as 188 -page index for Volumes I through X .

1,664 pages, Net Price \(\$ 16.50\)
Vol. IX. The produce of radio set manufacturers during the year Octuber 1937 to October 1938. More than 1880 moctels and 1000 chassis. Special "How it Works" section.

1,672 pages, Net Price \(\$ 16.50\)
Vol. VIII. In ardition to diagrammatic presentations of 1800 models, and more than 1000 chassis of sets manu. factured from October 1936 to October 1937, featured are data on installation and servicing instructicis of many types af intersommunication systerm. A "How it Works" book is included.

1,650 pages, Net Price \(\$ \mathbf{1 6 . 5 0}\)
Vol. VII. More liceri 1700 models and 1000 chassis of the manufectoring period from November 1935 to Octoter 1936.
Vol Vi 1,600 pages, Net Price \(\$ 16.50\)
Vol. VI. Encompessing the period of manufacture from late 1934 to November 1935, this volume features more than 1590 models, and 800 chassis.
\(\mathbf{1 , 2 4 0}\) pages, Net Price \(\$ \mathbf{1 2 . 5 0}\)
Vols. I-V. The finget widely-distributed receivers manufac. fured during the \(1930-1935\) period make up this volumia, an abridgement of the original first five Rider Miemuals. Bound as a book.

2,000 pages, Net Price \(\$ \mathbf{1 9 . 8 0}\)

\section*{MASTER}

A GOLD MINE OF PRACTICAL FACTS
Here is practical theory. The first chapter deals with the transmission and reception of television signals in general, giving you a clear over-all picture. The second chapter deals with frequency standards the next with antennas. Television "How It Works", then goes into descriptions of the various portions of descniptision receiver: the \(r\) - \(f\) oscillator - relevision receiv in the front end the conver chal: the ideo system and sounder: the video amplifier and d.c defector; the video amplifier and \(d-c\) restorer the sync and sweep circuls, picture The conclusion covers alignment and with the book carries the practical right along with the theoretical, ending up with the when and why of certain operations in television receiver maintenance.

\title{
FM TRANSMISSION AND RECEPTION
}

\author{
by John F. Rider and Seymour D. Uslan
}

This new Rider book covers its subject "going and coming," embracing in detail a thorough explanation of all manufacturers' products - both transmitting and receiving, regular broadcast-
 ing, railroad, police and "ham" equipment, wide medium and narrow band.
For radio servicemen, who can look to FM as a big part of their future profits-for the "ham" who is considering narrow band FM_for the student who is grooming himself for activity in the electronic field-this new book explains both the theory and servicing of FM receivers. It will serve as a valuable hand-book for engineers. Order Today!

\section*{CHAPTER HEADS}
- Fundamental Considerations
- Frequency Modulation
- Essentials of F-M Transmitters
- Transmitters of Today
(Wide Band and Narrow Band)
- The Transmission of F-M Signals
- F-M Receiving Antennas
- The F-M Receiver
- Alignment of F-M Receivers
- Servicing F-M Receivers

416 FACT-PACKED PAGES
profusely Illustrated
Cloth Cover
Net Price \(\$ 3.60\)

\section*{UNDERSTANDING VECTORS AND PHASE}

\author{
by John F. Rider and Seymour D. Usian
}

Considering the importance of vector presentations as a shorthand method of conveying technical information in the radio field, also the gradually increasing complexities of the developments being offered for public consumption, it behooves every man who plays a part in the technical branch of the radio industry to possess a general appreciation of the significance of vectors. This book develops the subject step by step, finally illustrating its application to everyday radio problems.

160 Pages, Paper Cover 99c, Hard Back Cloth Cover \$1.89

\section*{INSTALLATION AND SERVICING OF LOW POWER P-A SYSTEMS}

Here is a book that provides the answers to characteristic problems met in low power public address installations. . . . In short it tells what to do and what not to do with microphones, amplifiers, loud speakers, connecting cables-also how to service such PA systems. This book is all embracing in scope, will prove a boon to all who have occasion to work with such equipment.

208 Pages Hard Back Cloth Cover \$1.89

\section*{SERVICING BY SIGNAL TRACING}

Signal Tracing is rapidly becoming the most universally applied method of locating defects in communication systems, no matter what the nature of the system if it is a home broadcast receiver, auto-radio receiv. er, police receiver, commercial, marine, navy or army receiver. Every public address system, every centralized radio system comes within the capabilities of signal tracing. . . . Television receivers, facsimile receivers and other systems intended for special application can be serviced with equal ease. ... Signal Tracing, founded upon the signal itself, is the most basic, most fundamental method of trouble shooting ever devised. . . It is free of every limitation which in the past has hindered speedy service operations.
You can't afford to be without this book... We mean every word of this statement. ... It is vital to your immediate welfare-to your future... Get your copy today-NOW!
Chapter I-Introduction to Signal Tracing. Chapter II-Amplifier Operation and the Signal. Chapter III-Diode Detector Tube Systems. Chapter IV-Multi-Element Detector Systems. Chapter V-Oscillator Tube Systems. Chapter VI-Mixer Tube Systems. Chapter VII-Control Circuits and Voltages. Chapter VIll-Coupling Devices. Chapter IX The T-R-F Receiver. Chapter \(X\) - The Superheterodyne Receiver. Chapter XI-Television and Facsimile Receivers. Chapter XII-Public Address Systems. Chapter XIll-Localizing Defects by Signal Tracing. Chapter XIV-Signal Tracing in Receiver Design.

\section*{BROADCAST OPERATORS HANDBOOK}

\section*{by Harold H. Ennes, Engineer WIRE}

Here are co-ordinated facts that result in a general set of rules that can serve as standards of good operating practice -a new approach to modern operating technique and a discussion and clarification of existing facts that should lead to a better understanding between studio and transmitter personnel.

Mr. Ennes, an operator, writes in the operators' language. Intended not alone for the newcomer but the "oldtimer" as well. Mr. Ennes book will take the engineer or station operator into the control room and studio, discussing every phase of how, when, where and why of a broadcast operator's problems.

\section*{CONTENTS}

PART I: Operating in the Control Room and Studio. Chapter I, What You're Up Against; Chapter 2, Are Mechanical Operations Apparent?: Chapter 3, Keeping Sound "Out of the Mud'; Chapter 4 , You're Often a Producer Too!; Chapter 5, Put That Mike There! PART'II: Operating the Master Control: Chapter 6, Where Split Seconds Count. PART IIt: Operating Outside the Studio: Chapter 7, Remote Control Problems Chapter 8, Remote Versus Studio Pickups; 'Chapter 9, Remote Musical Pickups: Chapter 10, Eye-Witness Pickups and Mobile Transmitters: Chapter II, The Live Symphony Pickup. PART IV: Operating the Transmitter:' Chapter 12, Operator's Duties; Chapter 13, Programs ARE Entertainment; Chapter 14, Measuring Noise and Distortion. PART V: We're Off the Air: Chapter 15, Emergency Shutdowns; Chapter 16, Why Preventive Maintenance; Chapter 17 Preventive Maintenance Instructions. PART VI: Technically Speaking: Chapter I8, Control Room and Studio Equipment; Chapter 19. The Broadcast Studio: Chapter 20. Transmitter and Transmission. Bibliography. Appendix.
288 Pages
Well-Illustrated
\(\$ 3.30\)

The prices listed on these John F. Rider, Publisher, pages are subject to revision.

\section*{LEARN RIGHT WITH "RIDER"}

\section*{INSIDE THE VACUUM TUBE}

No other book explains so simply and clearly the theory of the vacuum tube and its operation. In plain language -with fascinating pictures and diagrams that really tell a story-you get a solid grounding in theory and a good working knowledge of basic tube types.

The slight use of mathematics is "painless," says QST. Easily understood are the development and meaning of characteristic curves, and their associated load lines, power amplifiers, use of pentodes as triodes, etc. The final chapter describes the "acorn" type tube, cathoderay tubes, photo-electric cells, gas-filled tubes, etc.

\section*{CONTENTS}

Introducing the Electron . . Electron Emission . . Movement of Charges . . . Space Charge and Plate Current ...Fundamentals of Tube Characteristics . . . The Diode .. The Triode Static Characteristics of Triodes . . . Triode Dynamic Characteristics and Load Lines Dynamic Transfer Characteristics . . . Voltage Amplification .. Tetrode and Pentode Vacuum Tubes . . . The Cathode Circuit . . . Power Amplifiers . . . Miscellaneous Vacuum Tubes (Indexed).
424 Pages . . Profusely Illustrated . . \(\$ 4.50\)

\section*{VACUUM TUBE VOLTMETERS}

The vacuum-tube voltmeter has been rapidly forging to the front as a favorite tool of engineers, research workers and servicemen. By its proper use, dynamic measurements can be made under any and all conditions with a minimum of effort and time. Here is a book that is a perfect mine of information for everybody who wants to know all about these important instruments. Not only is the theory explained upon which the functioning of the different types of \(v\) - \(t\) voltmeters is based, but the practical applications of these instruments are completely described. Like nearly all types of voltmeters, multipliers and shunts are employed with vacuum-tube voltmeters to extend their ranges. These and their uses are explained, as is the calibration of the different types.
For those men who are interested in the construction of \(v\)-t voltmeters, adequate information will be found for v-t volfmeters were built in the author's laboratory, and constants are given for the components of many types, as well as a wealth of other useful data.

\section*{CONTENTS}

Chapter I. Fundamentals of Vacuum-Tube Voltmeter. Chapter II. Diode Vacuum Tube Voltmeters. Chapter III. Triode VacuumTube Voltmeters. Chapter IV. Slide-Back Vacuum-Tube Voltmeters. Chapter V. Rec-tifier-Amplifier Vacuum-Tube Voltmeters. Chapter VI. Tuned Vacuum-Tube Voltmeters. Chapter VII. Audio-Frequency and Logarithmic Vacuum-Tube Voltmeters. Chapter VIII. Vacuum-Tube Voltmeters for D-C Voltage, Current, and Resistance Measurements. Chapter IX. Design and Construction of Vacuum-Tube Voltmeters. Chapter X. Calibration and Testing of V-T Voltmeters. Chapter XI. Applications of V-T Voltmeters. Bibliography.

\section*{SERVICING SUPERHETERODYNES}

No other circuit in the radio field has undergone all the changes that have been incorporated in the superheterodyne. In order to service these receivers with profit able speed, you must be able to analyze the different portions of the circuit quickly and this is just what Rider tells you how to do in this book. Not only is the theory of all types of Superhets thoroughly covered but actual servicing details are most complete.

\section*{CONTENTS}

I-The Principles Underlying the Operation of the Superheterodyne Receiver. Il-The Generation of and the Relation Between Harmonics. III-Explanation of the different Types of Superheterodyne Circuits. IV-Function and Characteristics of Individual Parts of the Superheterodyne Receiver. \(V\)-Special Circuits and Tube Applications. VI-Troubles and Symptoms Encountered in Superheterodynes. VilApplication of Test Oscillators. Vill-Vibrator Units. AppendixIntermediate Peak Frequencies of Commercial Receivers with Model Numbers.
288 Pages . . . . Profusely Illustrated . . . . Net Price \(\$ 2.00\)

\section*{SERVICING RECEIVERS BY MEANS OF RESISTANCE MEASUREMENT}

Take the guesswork out of servicing bysing an ohmmeter in your trouble shooting. This book tells you how to make and correctly interpret point to simplify your servicing problems and enable you to use the resistance data furnished in RIDER MANUALS to the est advantage. Now that more and more manufacturers are supplying re. speed up your servicing with greater accuracy. Let Rider show you how to use a modern servicing procedure on the omplicated receivers-you will find in his book the usual Rider clarlty of practice.

\section*{203 Pages . . Net Price \$2.00}

ALIGNING PHILCO RECEIVERS
Two Volumes
Everything you need for aligning adjustment frequencies-trimmer and padder locations-complete and detailed information for aligning every Philco model from 1929 to 1941 . cooperation of the prepared with the of the Philco Radio \& Television Corp., are the authentic source of alignment information and the data are presented in a brand new way that You will find all the necessary dati arranged so that every step in the alignment procedure is carried out in a definite systematic time-saving back and forth is eliminated completely in this radically new style of oresenting alignment data.

Vol. I - 1929 to 1936 - 176 Pages - \(\$ 2.00\) Vol. II - 1937 to 1941 - 200 Pages - \(\$ 2.00\)

\section*{AUTOMATIC FREQUENCY CONTROL SYSTEMS}

From the simplest type of A.F.C. eir cuit to the most complicated push pul control circuit . . . you will find them all learly explained in Rider's book. The first part of the book is devoted to review of the combination of D.C. voltages he pirase telations in mofuctive, capaci five, and transformer circuits, with par ticular reference to the manner in which hese principles appear in A.F.C. circuits. The remaining chapters cover the opera tion of all types of discriminator circuits, the operation of the various types of con frol tube circuits, including the push-pull type, the reflected reactance type. and the mutual inductance type. Let Rider tell you all about A.F.C. in this up-to-the minute book that combines theory and practice.

144 Pages . . Net Price \(\$ 1.75\)

\section*{AN-HOUR-A-DAY WITH RIDER SERIES}

\section*{96 Pages Each . . Hard Covers . . \$1.25 Each} ALTERNATING CURRENTS IN RADIO RECEIVERS
Are you fambliar with the different forms of alternating currents which are present in a radio receiver? When once you understand the basic facts relating waves-phase relations-you will have no trouble in understanding the servicing problems which involve these factors.

\section*{D.C. VOLTAGE DISTRIBUTION}

Only a casual glance at the schematics of any of the multi-tube sets will convince you that the distribution of the D.C. voltage to the tube elements is complicated. The many different forms these systems take should be reconand wattage rating of each resistor is calculated and why.

\section*{RESONANCE AND ALIGNMENT}

Oo you know what happens when you tune a circuit to resonance? In order align a receiver, oscillator, or transformer properly, so that maximum operation. Are you familiar with I.F., oscillator. R.F. and detector alignment for all types of circuits-single, double and trlple tuned systems?

\section*{AUTOMATIC VOLUME CONTROL}

Automatic volume controm has now become a standard feature of every well made receiver. Are you familiar with every type in use and can you recognize types of tubes are used In each circuit? Noise suppression systems time delay circuits-audio-frequency volume expander systems and other such networks have greatly increased servicing problems.

\section*{RADAR: What it is}

Easy-to-Grasp Explanation for Only \(\$ 1.00\)
by John F. Rider and G. C. Baxter Rowe
No tangling with technicalities! It's easy to understand what radar is and how it works, when Rider and Rowe unravel this knotty subject.
Cartoon sketches, diagrams and photos - sometimes three illustrations to a page-help make the story clear. Rider and Rowe describe different types of gear used by ground, sea, and air forces, and the different uses made of each.

CHAPTER HEADINGS
Underlying Principles of Radar

The Basic Radar Set and Indicators... How Ground Troops Used Radar...A Antennas Is Used at Sea .. How the Air Forces Used Radar ... Raw Radar IFF (Identification of Friend or Foe) and Countermeasures'. . . Future of Radar.
72 Pages . . \(81 / 2 \times 11\) Inches . . Flexible Cover . . \(\$ 1.00\)

\section*{RADIO AMATEUR'S BEAM POINTER GUIDE}

By John F. Rider (W2RID)
Eliminate map work. Merely consult the lists in this book and you can accurately point your antenna to any country in the world, 50 the maximum of energy is going in the direction you want it.
32 Pages
\(81 / 2 \times 11\) inches

\section*{GHIRARDI'S}

MECHANICS OF MODERN RADIO and TELEVISION SERVICING

\section*{250 pages - profusely illustrated} Probable price \(\$ 4\) (Cat. No. UC49-5)

Here, by the well-known author of RADIO PHYSICS COURSE, MODERN IRADIO SERVICING and dozens of other books and articles, is a new book that explains fully and plainly how to perform the wide variety of purely mechanical work involved in modern radio and television receiver repair. Also describes the selected group of regular and time-saving tools and accessories required; tells how to select, care for and use service tools; and how to lay out the shop for most efficient work. A long-neglected subject now clearly explained by radio's outstanding author.

\title{
SHOWS EXACTLY HOW TO REPAIR OVER 4800 RADIO RECEIVER MODELS
}

\section*{Ghirardi's "Radio Troubleshooter's Handbook"}

Over 400 pages in Ghirardi's hig manual-size RADIO TROUBLE. SHOOT'ER'S IANNDBOOK contain specific common Trouble Symptoms, their causes and remedies for practically every radio receiver in use today. This feature alone means that it enables modern service shops to eliminate useless testing, save time all along the line, and doulle their output of work! Not a "study" book. You simply refer to it when you need specific help on a specific problem. Goes right to work for you the minute you get in!
In addition, there are lundreds of other pages of essential service data including i-f alignment peaks for over 20,000 superhets; a big data section on i-f transformer troubles; the most up-to-the-minute tube chart you've ever seen; dozens of tips on tube substitutions; auto radio data; plug-in and ballast resistor replacement charts; conclonser charts; coil, transformer, and wire data- and a wealth of other material to save sou time and help you make more money.

\section*{SERVICING THE MODERN CAR RADIO}

\author{
By A. L. hurlbut
}

2nd Edition, 702 pages, \(81 / 2 \times 11\) 222 illustrations, over 500 circuit diagrams, \(\$ 7.50\)
(Cat. No. UC49.9)
Here, by a well-known anto radio expert, is everything needed to help the serviceman gain profitable auto radio servicing skill. Describes installation, testing and repair methods fully. Also contains needed special facts on car radio circuits; differences between car and home radio servicing problems; shop set-up and business getting ideas, and over 500 diagrams that give circuit details of the most commonly used auto radio models of dozens of makes.

PRACTICAL FACTS AND METHODS ON: Getting into the car radio business: differences between mobile and home radios; antenna installations; loudspeaker problems; antennas and input circuits; power supplies; auto radio circuit features; auto electrical systems; setting up shop; car set installations; remedying interference; servicing procedure; vibrator maintenance; auto radio alignment; push-button tuning - and many other subjects.

\section*{A COMPLETE RADIO-ELECTRONIC SERVICING EDUCATION}

\section*{Ghirardi's "Modern Radio Servicing"}

Once in a bue moon a technical boon is witten that is so important so complete, and so easy to undersiand that it is used almost universally by members of a profession-and Ghirardi's MODERN RADIO SEIRYICING is that kind of a book!
It is the only single, inexpensive book giving a complete course in modern Radio rewaif work in all its branches. Written so simply you can understand it without an instructor. Read from the beginninm it takes yon step by step through all phases of the work. Usert as a reference book hy busy servicomen, it serves as a beautifully cross-indexed volume for "brushing up" on any type of work that may puzale you

Included is a thorough explanation of Test Tnstruments, how they should be used and why-and even how to build your own; Receiver Troubleshooting Procodure and Circuit Analysis; Testing \& Kepair of Components; Jnstallations: Adjustments, etc., etc.-also Ilow to Start a Successful Radio-Elect ronic Service Business. 1300 pages; 706 helpful illustrations, only \(\$ 5\) ( \(\$ 5.50\) foreign).

\section*{FREQUENCY MODULATION}

Fundamentals - Apparatus - Servicing
By NATHAN MARCHAND
448 pages, \(6 \times 9\), over 300 illustrations, \(\$ 5\)

> (Cat. No. UC49-10)

This new book by a well known radio consultant helps you understand FM clearly. Equally important it inds how to handle FM service work Basic theors, circuits, fransmitters, receivers and mobile equipment are fully explained-with emphas on modern methods installine adjustine phasis on mor From FM circuit and repairing Fin receices antennas, FM test harities, tuning indicators, antennas, FM test unis, receiver a ignment to ceneral service pro cedure and dozens of other subjects, this hook is a practical, intensely helpful guide.

\section*{Ideal Training for Beginnings or for Actual Shop Use Teaches Every Step of the Work . . . only \(\$ 5\) complete}

Based on what can lie learned quickly at lome from this big 553 -page book, ELECTBIC MOTOR REPAIR, you can train for prompt, protitable installation, servicing, repairing and even complete rewinding of practically any motor.

Every suliject is clearly and simply explained in text and ALSO by more than 900 clear-cut illustrations. You read what to do. You actually SEE how it is done. Quick reference guides tell how to handle specific jobs on specific motor types.

ELECTIRIC MOTOR REPAIR book is fully complete, intensely practical. It covers the entire motor field-from A-C to D-C motors and generators to mechanical, electrical and electronic control systems. Unique Duo-Spiral Binding divides book into two sections so that both text and related illustrations can be seen together. An instructor standing by your side could hardly do better! Right down the line, this big book explains every detail of the work in a way vou can easily understand. Thousands already in use in motor repair shops and for home study!

\section*{A 'Natural' for Radio Men... Opportunities Everywhere}

There are more motors in use than any other type of electric equipment! Statistics show that the average small hone has 11 motor-driven appliances - in washers, ironers, fans, oil burners, radio-phonographs, clocks, refrigerators, mixers and dozens of other appliances.

Large homes have many mort-and there are millions of moturs used daily thronghout industry. The expert who can install and repair them is a valuable man in this Electrical Age! ELECTRIC MOTOR REPAIR tells what to do, how to do it . . . every step of the way.

553 pages Over 900 illustrations and diagrams Price \(\$ 5\)
(Cat. No. UC49-11)

\section*{PRACTICAL TELEVISION SERVICING}

NEW, DIFFERENT, DOWN-TO-EARTH!

The ideal book for servicemen who wont to cosh in on Televisionl

By J. R. JOHNSON and J. H. NEWITT 375 pages, \(6 \times 9\), over 230 illustrations, \(\$ 4\) (Cat. No. UC49-12)
At last you can get a book that really fives you the low-down on television sorvicing - one that tells exactly what to do and also guides you on precautions to take and mistakes to avoid. PRACTICAL TELEVISION SERVICING is a complete, down-to-earth working manual for those who want to understand television servicing, get straightened out on the vast amount of MISinformation that exists about television, and really be able to handle television servicing work.

\section*{MAKES TELEVISION REPAIR EASY TO UNDERSTAND}

This isn't a book of theory, mathematics and general discussions. The authors - one a radio editor, the other a well-known service engineer - actually owned and operated a television service shop to get the specific, how-to-fo-it information they now pass along to you in easily understood form. Besides explaining how television components, construction and operation differ from radio, they show how to perform all specific operations in television receiver troubleshooting, diagnosing and repair. You don't lother with needless theory. You are actually shown how to do the work!

\section*{FACTUAL SERVICING DATA ON:}

How to test for an Intermittent peaking coll or transformer
How to get a signal over a mountain

What to do when picture linearity is poor
How to guy a mast properly
Checking video response with a square wave

When to use mica capacitors in place of other types . . . and scores of other practical problems

\title{
THE MURRAY HILL MANUALS IN APPLIED ELECTRICITY
}

Practical guides to industrial electrical equipment - installation -operation - repair maintenance

\author{
By E. S. LINCOLN
}

Formerly published by Essential Books, these famous manuals have now been added to the Murray Hill
technical book list. As long as the present small supply containing the previous publisher's imprint lasts, we offer the books at the following reduced prices.
1. INDUSTRIAL ELECTRIC WIRING Construction, operation and maintenance data on a-c and d-c wiring systems. 336 pp., over 100 illus. (Cat. No. UC49-13)
2. CONDUCTORS and WIRING LAYOUTS - A handhonk of wires, conduits, insulations, etc., with instructions for wiring motors, conduits, insulations, etc., with instructions for wiring motors, suitchboards, lighting svslems and ot itr influstrial equipment. \(\$ 42 \mathrm{pp}\).
over 175 illus., ete. (Cat. No. UC49-14) Was \(\$ 3\), Now only \(\$ 2.75\) 3. INDUSTRIAL ELECTRIC CONTROL - Ill atront control equipment for all industrial electrieal apparatus. 374 pp., over 200 illus.
(Cat. No. UC49-15) Was \(\$ 3\), Now only \(\$ 2.75\)
4. SWITCHBOARDS and PANELBOARDS - Construction, operation and maintenance "know how" fo all types in common industrial use. \(150 \mathrm{pp} .\), profusely illustrated. (Cat. No. UC49-16)

Was \$3, Now only \$2.25
5. INDUSTRIAL ELECTRICAL HEATING and ELECTRICAL FURNACES - Resistance, infra-red and induction heating yrinciples with complete data on selection. installation and operition 192
profusely illustraled. (Cal. No. UC49-17)
6. ELECTRICAL PROTECTIVE EQUIPMENT and POWER FACTOR CORRECTION - h handbook of electrical protective an! power fartor correction circuits with landy tables and conles. 242 pp... fartor correction eircuits with landy tables and corles.
over 200 illus. (Cat. No. UC49-18) Was \(\$ 3\), Now only \(\mathbf{\$ 2 . 5 0}\) over 200 illus. (Cat. No. UC49-18) Was \(\$ 3\), Now only \(\mathbf{S 2 . 5 0}\)
7. PRIMARY and STORAGE BATTERIES - Selcetion, use, maintenance of all types; also details of charging generators, rectitiers and control equipment. 168 pp. protusely illustrated.
(Cat. No. UC49-19) Was \(\$ 3\), Now only \(\$ 2.25\) 8. ELECTRICAL MEASURING INSTRUMENTS - (Measurements rince suides to insirument selection and use. 284 pr, over 200 illus. (Cat. No. UC49-20) Was \(\$ 3\), Now only \(\$ 2.50\) 9. INDUSTRIAL ELECTRIC LAMPS and LIGHTING - An on-thejob handbook covering all types, including fluorescent, black light and hactericidal. 342 pp ., over 200 illus. (Cat. No. UC49-21)
10. ELECTRIC MOTORS and GENERATORS and RELATED DRIVES Completely covers looth d-c and a-c motors of evet type. 88.22 pp., over 200 illus. (Cat. No. UC49-22) Was \(\$ 3\), Now only \(\$ 2.75\)

\section*{ELECTRICIANS' POCKET COMPANION}

\section*{By BENJAMIN GOLDBERG} (Formerly Electrical Inspector, N. Y.City) 440 pages, \(41 / 2 \times 7\), Hundreds of charts, diagrams and tables. Price \(\$ 2.50\)
(Cat. No. UC49-23)

Here, in handy pocket size, are hundreds of needed eleetrical working facts anil data. It answers your questions; gives Coclé and Underwriters' requirements; helps you plan and work more efficiently. Tables, charts, diagrams and lata cover modern electrical work and equipment. I'ractical short cuts ate deserihed. Covers confluit, cable, open wiring, meters, motors, controllers. transformers, liyhting and signal circuits, domestic heating systems and dozens of other subjects. A book no one who works with electricity can afford to miss!

Tbis big book shows what the oscilloseope is, what it does. and how to use this versatile electrical instrument in the field of electronics, in industry, in radio and television receiver servicing, in ralio transmitting, in teaching, etc. The ideal book to hely, you learn all about the engineering essentials of oscilloscopes, their tubse circuits, operation and application. Contains complete details of methods of applying the oscilloscope to radio and televispon problems in a way you can easily understand.

Coming in 1949!
MODERN OSCILLOSCOPES AND THEIR USES

BY JACOB RUITER
of Allen B. DuMont Laboratories
400 pages, illustrated. Price \(\$ 6\)
(Cat. No. UC49-24)

\section*{FLUORESCENT AND OTHER GASEOUS DISCHARGE LAMPS}

By W. E. FORSYTHE AND E. Q. ADAMS
304 pages, 152 illustrations, \(\$ 5\)
(Cat. No. UC49-25)

Anyone who installs, manufactures or services modern fluorescent liyhting will find this book invaluable. Included are complete discussions of hasic theory, lamp chazacteristics. component parts, practical discussions of the advantares and disadvantages of lamps of different types, delayed phosphorescence, fluorescence and television, short duration disclarge and many other subjects.

\section*{THE ELECTROLYTIC}

CAPACITOR By ALEXANDER M. GEORGIEV Over 200 pages, 80 illus., price \(\$ 3\) (Cat. No. UC49-26)

\section*{All the Facts on a Little-Known Subject}

Don't buy, specify, use or replace capacitors blindfolded! Save time. save moner and increasc your selvice efficiency by knowing all alout this vital radio-television subject. This book explains the entire problem-where, when and how to use different at low and high voltages and frequoncies and many related subjects.

\section*{Coming in 1949! MAGNETIC RECORDING}

\section*{By S. J. BEGUN}

320 pages, illustrated. Price \(\$ 5\)
(Cat. No. UC49-27)
A thorough engineering trealment of the entire subject of magnetic recording - its theory, yarious types and makes of recorders, their applications, their performance measurements and adsantupes. The book is detailed and authoritative in its discussion of the fundamentals and componenis of efficient magnetic recording devices, and includes a chapter on the important research prollems still facing this new industry.

\section*{The Radia Amatewi's Handbook}

Over a period of more than twenty years The Radio Amateur's Handbook has grown from a small manual of amateur operating to the world's most valuable and widely-used radio book. Just as amateur techniques and developments have often been forerunners of professional engineering, and the amateur body itself become a training ground in providing executives, engineers and technicians for the radio industry, so has this standard manual of amateur communication become the all purpose volume of radio.

The 1949 edition retains the material on theory, principles and design which made the Handbook so valuable, but it has been revised and integrated with constructional data. This is not only of value to the practicing radioman but to the student as well, for it gives him practical applications and examples of the theory he is learning. As a text, the Handbook is probably more used in radio schools and colleges than any other single volume.

In constructional material, no publication equals the Handbook in practical utility, its treatment of radio communications problems in terms of how-to-do-it rather than by abstract discussions and abstruse formulas. There are few radio manufacturers, schools, engineering firms, experimental laboratories and military communications units which do not possess at least one copy of this valued and modern reference work.

Text, data book, constructional manual, operating reference book - it is all these and more. Its annual rewriting assures a modern up-to-date text, so necessary in a science so fast moving and progressive as radio. Yet in this virtually continuous modification there has always been the objective of presenting the soundest and proved aspects of current engineering practice rather than the merely new and novel.

\section*{A Course In Radia Fundamentals}

The prime function of the book is to help the individual home student. The radio amateur is essentially a practical man. He has to be, because usually he builds his own equipment and he must make it work. His guide in that work is usually The Radio Amateur's Handbook, published by the League. Splendid as that famous book has proved, there has been a widespread need for a guide which would assist in studying it and which would facilitate a real absorption of radio principles. Such a course of study is contained in this book. It is a highlydeveloped application of the time-tested principle of "learning by doing." Written around the ARRL Handbook, the course has been so thoroughly proved and has helped so many people that the individual student undertaking it may be assured that, if he follows its precepts literally and exactly, performs the experiments, and examines himself honestly by the test questions, he cannot fail to learn the principles of radio.

Price 50c

\section*{Hints \& Kinks}

Amateurs are noted for their ingenuity in overcoming by clever means the minor and major obstacles they meet in their pursuit of the chosen hobby. An amateur must be resourceful and a good tinkerer. He must be able to make a small amount of money do a great deal for him. He must frequently be able to utilize the contents of the junk box rather than buy new equipment. Hints 86 Kinks is a compilation of hundreds of good ideas which amateurs have found helpful.

Possessions, and Canada

The A.R.R. L. Anterna Boak
The present edition of the ARRL Antenna Book represents an accumulation of ten more years of the amateur's experience in both war and peace in making the all-important ever fascinating "sky wire" carry signals to the ends of the earth. The data contained in this book are the result of practical experience both of the authors and hundreds of amateurs who have contributed to the practical know-how that this book expresses.

The book has two principal divisions. Chapters 1 through 5 deal with the principles of antennas and transmission lines, wave propagation and its relationship to antenna design, and the performance characteristics of directive antenna systems. These five chapters might be called a textbook on antennas; they enable the reader to design a system of his own to fit his particular needs. Beginning with Chapter 6, there is a series of chapters in which complete data are given on specific designs for the various amateur bands. The amateur who has not studied the first section, or who wishes to avoid the necessity for making his own calculations, will find in these chapters the information necessary for putting up the system that appeals to him. The remaining chapters deal with the highly important mechanical features of construction and related subjects such as determining geographical directions.

This required twice as big a book as the previous edition but we are sure you will find it well worth more than the nominal cost.
\$1.00 U.S.A., Its Possessions and Canada \$1.25 Elsewhere

How To Become A Radia Amatewr
Universally recognized as the standard elementary guide for the prospective amateur. Features equipment which is simple in construction. The apparatus is of a thoroughly practical type capable of giving long and satisfactory service - while at the same time it can be built at a minimum of expense. The design is such that a high degree of flexibility is secured, making the various units fit into the more elaborate station layouts which inevitably result as the amateur progresses. Complete operating instructions and references to sources of detailed information on licensing procedure are given.

Price 25c
The Radia Amatewr's License Manual
To obtain an amateur operator's license you must pass a government examination. The License Manual tells how to do that - tells what you must do and how to do it. It makes a simple and comparatively easy task of what otherwise might seem difficult. In addition to a large amount of general information, it contains questions and answers such as are asked in the government examinations. If you know the answers to the questions in this book, you can pass the examination without trouble.

Price 25c
Learning the Radiotelegraph Code
This booklet is designed to train students to handle code skillfully and with precision. Employing a novel system of code-learning based on the accepted method of sound conception, it is particularly excellent for the student who does not have the continuous help of an experienced operator or access to a code machine. It is similarly helpful home-study material for members of code classes. Adequate practice materrai is included for classwork as well as for home-study. There are also helpful data on high speed operation, typewriter copy, general operating information - and an entire chapter on tone sources for code practice, including the description of a complete code instruction table with practice oscillator.

PHOTOFACT FOLDER SETS
}

Keep your service data \(u p\)-to-date the easy, economical way! Subscribe now to Рнотоfact Folder Sets, issued monthly-the service that keeps you ahead of the game, that tells you everything you need to know about modern radio and television servicing. Thousands of progressive servicemen all over the country are increasing their earnings and making their work easier and more efficient by using Рнотоfact. It pays for itself over and over again. There's nothing else like it-subscribe at your Jobber's now-so you can get your Рhotofact Folder Sets regularly. 160 pages each issue. \(\$ 1.50\) Per Set.

Subscribe to Photofact for Continuous Coverage of Television, \(A M\), and FM Receivers-Plus Amplifiers, Tuners, Auto Radios, etc.

\section*{FREE \\ PHOTOFACT CUMULATIVE INDEX}

Here-yours for the asking-is the latest complete index to all Photofact Folder Sets. Arranged alphabetically and by model numbers, it tells you instantly the Рhotofact Set Num. ber containing the data you want. Makes it easy for you to get the information you need for jobs in your shop. Get this valuable Free Index to all postwar models from your Jobber today.

\section*{Рнотоғаст WORLD'S MOST PRACTICAL RADIO SERVICE DATA!}

\section*{the INVALUABLE POST-WAR RECEIVER data that SAVES YOU TIME AND HELPS YOU EARN MORE}

You can't afford to be without this complete Service Data Library covering postwar models up to the present! There's nothing like these DeLuxe Volumes for easy reference and completeness. Each Volume is in rugged, easy-to-use DeLuxe Binder, perfect for shop reference. Have all the data you need for quicker, easier servicing of postwar models. These Photofact Volumes give you the finest service data library in existence; they increase your earning power; they're the smartest investment you can make. Place your order for Рнотоfact Volumes today!

\section*{EXCLUSIVE PHOTOFACTfeATURES!}
- Accurate, Complete, Uniform, Original-based on study of the actual equipment.
- Exclusive Standard Notation Schematics.
- Exclusive Oscilloscope Wave Forms.
- Complete Alignment, Stage Gain, Circuit Voltage and Resistance Analysis for each model.
- Complete Parts Listings and Proper Replacements for each model.
- Dial Cord Stringing; Disassembly Instructions.
- Record Changer Analysis and Service Data.
- Exclusive "Keyed" Data for instant reference.
- Thousands of Exclusive Photos.

Volume 1-Covers postwar models up to January 1, 1947 Volume 2-Covers models from January 1, 1947 to July 1, 1947 Volume 3-Covers models from July 1, 1947 to January 1, 1948 Volume 4-Covers models from January 1, 1948 to July 1, 1948 Volume 5-Covers models from July 1, 1948 to December 1, 1948 Volume 6-Covers models from December 1, 1948 to May 1, 1949 Volume 7-Covers models from May 1, 1949 to October 1, 1949

\section*{Indispensable to the Radio Service Technician!}

\section*{PHOTOFACT TELEVISION COURSE}

Gives you a complete, clear understanding of modern TV principles, operation and practice. Covers Cathode Ray Beam For mation and Control; Beam Deflection Sys cems; Beam Modulation and Synchronization. Includes analysis of Cathode Ray tube construction, camera tubes, voltage supplies, sawtooth generators, sync cir cuits, control functions, receiviag antenna circuits, RF input tuning systems, IF sysrems, AGC, DC restoration, video amplifi cation, contrast, etc. Includes glossary of terms, bibliography, 216 pages; profusely illustrated; sturdily bound, \(81 / 2 \quad \$ 300\) xll inches. Only

\section*{TELEVISION ANTENNAS}

Design, Construction, Installation, Trouble-Shooting
Own the first practical guide to everything you need to know about Television antennas. Written by Donald A. Nelson; based on actual experience in the field. Shows you what type of antenna to select, how to install it, how to solve troubles. Gives you short-cuts that save time and help increase your installation profits. Chapters cover: receiving antenna principles; antenna construction; analysis of all types of commercial antennas; complete antenna installation data; installation problems and trouble-shooting. Over 192 pages; 124 clear illustrations. \$125 Handy pocket size. Order todav.

\section*{Automatic Record Charger Manuals}

Volume 2, 1948. Covers 45 models made in 1948, including new LP and dualspeed changers, plus leading Wire and Tape recorders. It's easy to service record changers when you have the Рнотоfact Kecord Changer Manual handy, Complete, accurate data - based on analysis of actual equipment. Gives full change cycle data, information on adjustments, needle landing data, hints and kinks. complete parts lists, exclusive "exploded" diagrams. Includes data never before available. Have this timesaving, money-making book in your shop. 432 pages; deluxe bound, \(\$ 6^{75}\) \(81 / 2 \times 11\) inches. Only

Volume 1, 1947. Automatic Record Changer Manual. Covers more than 40 different post-war changer models manufactured up to Tape and Paper Disc Recorders. 400 pages; fully illus- \(\$ 4^{95}\) Tape and Paper Disc Recorders. 400 page
trated; \(81 / 2 \times 11\) inches, hard cover. Only

This is the book that's wanted by custom-builders, audio men and sound engineers. Covers a wide variety of well-known audio amplifiers and FM and AM tuners, plus data on important wire and tape recorders. Presents a complete analysis of each unir. A "must" for cus tom-instaliers and for sound service specialists. 352 pages: fully illustrated; in sturdy binding, \(81 / 2 \times 11 \quad \$ 3^{95} 0\)
inches. Only

New! Invaluabie to Amateurs and Short Wave Listeners. Complete technical analysis of more than 50 of the most popular communications sets on the market. An tuving guide for purchasers of communications receivers. All data based on actual examina tion and study of each unit. 264 pages; profusely \(81 / 2 \times 11\) inches. Only \(\$ 300\)

\section*{POST-WAR AUTO RADIO MARUAL}

You can tackle any car receiver when you have a copy of this specialized Photofact volume in your shop. Covers everything you need to know-pives you complete service data based on analysis of the actual receivers. Covers 100 different post-war medels (prac tically every anto radio made since 1946) tically every anto radio made since 1946); facturers More than 300 pages; profusely illustraced; each model treated unifusely completely, accurately. \section*{PROOOS L}
 antenna manual
- The most comprehensive antenna book yet published, with all the old tried-and-true standards, and many a new one.
Among the new, "hot" antennas
described in this book are:
- The BOBTAIL CURTAIN and the VERTICAL TRIAD, o couple of dx-dandies for 75 and 40 .
\(\sim\) The OCTAPUSH, a single array for 40,20 , and 10 !
- The X-CURTAIN, an improved "Lazy.H."'
\(\checkmark\) The ELECTROTATOR, an electrically rotated broadside curtain.
The ANTENNA MANUAL has the same happy combination of practical how-to-build-it data and simple underlying explanations that make the "Radio Handbook" one of the largest-selling radio texts in existence.
"Sugar-coated radiation, propagation, antenna, and transmission line theory help you understand what's going on.
Comprehensive practical data (including dimensions of course) on all the more popular antennas-and on some brand-new ones which have never before appeared in print, but about which you are going to hear a lot on the air in the near future.

WRITTEN BY W. W. SMITH, W6BCX, Editor of the pre-war "Racio" and "Radio Handbook."

A necessity for everyone interested in transmission or reception.

RCA TECHNICAL LITERATURE
}

\author{
AUTHORITATIVE REFERENCES OF THE RADIO INDUSTRY
}

\section*{"RECEIVING TUBE MANUAL." (RC-15)}

Replaces RC-14. Completely new and brought up-to-date. Features tube theory written for the layman, expanded section on tube and circuit theory, formulas and examples for calculation of power output, load resistance, and distortion for A1, AB1, \(A B 2\), and \(B\) classes of service; augmented section on resistancecoupled amplifiers; latest data on RCA receiving tubes including miniatures and kinescopes. 256 pages. Price: 35 cents each.

\section*{."QUICK SELECTION GUIDE, 287 RCA TRANSMITTING \& INDUSTRIAL TUBES" (NRT-120)}

Compact, four-page folder listing essential technical data for 287 RCA Power Tubes, Phototubes, Cathode-Ray Tubes, Special Tubes, Ignitrons, Rectifiers, and Thyratrons. Includes latest RCA Tube price list and complete interchangeability tables. Free.
"RECEIVING TUBES FOR AM, FM,
AND TELEVISION BROADCAST." (1275-D)
Gives characteristics and socket connection diagrams for all RCA receiving tubes-Rectifiers, Detectors, Oscillators, Converters, Mixers, Voltage and Power Amplifiers, and Kinescopes. Also includes identification of miniature and metal types; discontinued types are keyed for the benefit of radio servicemen. 24 pages. Price: 10 cents each.
"POWER AND GAS TUBES FOR RADIO AND INDUSTRY." (PG-101)

Sixteen colorful pages of tabulated technical data, base diagrams, photographs, and "thumb-nail" sketches of the current RCA line of power and gas tubes for communication and industrial use. Includes more than 150 RCA Vacuum Power Tubes, Voltage Regulators, Rectifiers, Thyratrons, and Ignitrons in easy-to-read tabular form. Price: 10 cents each.

\section*{"PHOTOTUBES, CATHODE-RAY TUBES, AND SPECIAL TUBES." (CRPS-102)}

Sixteen pages packed with authentic, detailed technical information and descriptions of more than 100 RCA Gas, Vacuum, and Multiplier Phototubes; Cathode-Ray Tubes; Camera Tubes; Monoscopes; Low-Microphonic types and other small tubes for special applications. Spectral response curves are given for all phototubes. Price: 10 cents each.

\section*{"QUICK REFERENCE CHART,}

MINIATURE TUBES." (MNT-30B)
Four-page folder containing descriptions, dimensions, ratings, socket connection diagrams, uses, and other detailed technical information on 64 RCA miniature tubes. Listed are Rectifiers, Diode Detectors, Triode Amplifiers, Diode-Triode Amplifiers, Pentode Voltage Amplifiers, Pentode Power Amplifiers, Beam Power Amplifiers, Pentagrid Converters, Thyratrons, and Voltage Regulators. Free.
"RCA TUBE HANDBOOK." (HB-3)
The "bible" of the industry. Over 2000 pages of data on uses, ratings, characteristics, operating conditions, dimensions, terminal connections and curves for RCA Receiving and Transmitting Tubes, Cathode-Ray Tubes and Phototubes, Thyratrons, Ignitrons and Special types. Supplied in three, deluxe, loose-leaf binders. Available on subscription basis. For details see Bulletin HBF-1-47. Handbook price: \(\$ 10.00\) each.

\section*{"RADIOTRON DESIGNER'S HANDBOOK".}

Edited by F. Langsford Smith of Amalgamated Wireless Valve Company Pty Ltd. in Australia. Of value to anyone interested in fundamental principles of practical circuit design. Discusses audio- and radio-frequency applications, rectification, filtering and hum, components, tests and measurements, tube characteristics, general theory and miscellaneous data. Copiously illustrated. 356 pages. Price: \(\$ 1.25\) each.

\section*{Here are the it EASONS behind the SX-42's greatness}
1. Continuous frequency range- 540 kilocycles to 110 megacycles in six hands.

Band 1-540 to 1620 kilocycles.
Band 2-1.62 to 5 megarycles.
Band 3-5 to 15 incgacycles.
Band 4-15 to 30 megaryeles.
Band 5-27 to 55 megacycles.
Band 6-55 to 110 megarycles.
Adequate overlap is provided at the emds of all bands.
2. Wide vision main tuning dial accurately calibrated.
3. Separate electrical handspread dial calibrated for amateur \(3.5,7,14,28\), and 50 megacyele hands.
4. Beat frequency oscillator functions thronghout entire range of receiver. CW pitch adjustahle from panel.
5. Four-position switch selects mode of operation, PIIONO, IM, AN, or CW.
6. RECEIVE/STANDBY switch.
7. Series type automatic noise limiter.
8. l'ush-pull final audio stage delivers over 8 watts with less than \(8 \%\) harmonic distortion.
9. Audio amplifier response curve is essentially flat from 60 to 15,000 cycles.
10. Red markings for broadcast reception and green markings for FMI reception simplify operation for general use.
11. Connections for coordinated operation with lfallicrafters transmitters.
12. Separate SENSITIVITY (RF) and VOLUME (AF) controls.
13. Four-position tone coutrol provides LOW, MED, Hl-Fl, and BASS.
14. Special socket for use of external power supply.
15. High-frequency oscillator temperature compensated to reduce drift.
16. "Micro-set"permeability-adjusted coils in RF section.
17. AVC switch.
18. "Airodized" steel top provides full ventilation and swings open on full length piano hinge for greatest accessibilty.
19. Wide hand FM, AM, or CW available from 27 to 110 megacycles.
20. Six-position selectivity switch with crystal filter operates on frequencies between 540 kilocycles and 30 megacycles.

> 18-42 STPAKEIR

THIS is the first ppeaker of its size to offer the gulendid advantages of the bass reflex principle. Heretofore the famous Jensen-originated bass reflex reproduction has been at ailable only in large cabinet speakers. Now in this sleek, highly functional denign, matehing the new line of Hallicrafters receivers. the bass refles feature is available in a compact speaker that offers a now high quality of reproduction. Tho R-4. 2 was designed as a companion piece to the \(\mathrm{SX}-12\) receiver but it may be used with any other receivers such as the SX-28 and the SX-4.3. The rpeaker size is 8 inches. Tro-position switel on front panel for communicatione or high fidelity reception. Terminala on rear for \(500-0 h m\) line. R-4:2 size: \(121 / 2^{\prime \prime}\) deep, \(113 / 4{ }^{\prime \prime}\) high, \(17^{\prime \prime}\) wide.
21. Combination carrier level meter and FM tuning indicator. BFO tube performs dual function as FM tuning indicator amplifier.
22. New FM hand marked with channel numbers in addition to megacycle calibration.
23. Dnal intermediate frequency transformers. 455 kilocycle IF for standard operation, 10.7 megacycle IF for VHF and FM operation.
24. "Split-stator" tuning makes possible superior performance in Vlle range.
2.). Chassis and panel can he removed as a unit for rack mounting.
26. Crystal phasing control.
27. Antenna input impedance matches 300 ohm line.
28. New Hallicrafters Type HA-6 crystal used in crystal filter circuit. Holder of Mycalex, non-hygroscopic and unaffected by temperature.
29. Two limiter stages for maximum quieting on FM.
30. Two tuned RF stages using miniature tubes for superior VHF performance.
31. Phonograph input connections on rear of chassis.
32. Type VR-150 voltage regulator tuhe provides maxinum stability in high frequency oscillator, converter, BFO , and FM tuning meter circuits.
33. MAIN and BANDSPREAD tuning controls and dial lock are mounted coaxially as a single precision-built unit.
34. Main tuning knob provided with precision vernier scale, separately iliuminated through smalĭ window in one-pioce Lncite dial housing.
35. Listed by Underwriters.

TUBES: l-6AG5 1st RF amplifier; l-6AG5 2nd RF amplifier; 1-7F8 converter; 1-6SK7, 1st amplifier; 1-6SG7, 2nd IF amplifier; l-6H6 AM rectifier and noise limiter; 1-7H7 1st FM limiter amplifier; 1-7H7 2nd FM limiter; 1-6H6 discriminator; 1-6SL7 audio inverter; 2-6V6 audio output tubes; 1-7A4 beat frequency oscillator and FM tuning meter amplificr; l-VR-150 voltage regulator; \(1-5 U 4 G\) rectifier.

OPERATING DATA: The standard Model SX-42 is designed for operation on 105-125 volts \(50 / 60\) cycle alternating current. The universal Model SX-42U may be operated on \(110,130,150\), 220 or 250 volts, 25 to 60 cycle, alternating current. The standard model draws 110 watts at 117 volts. When operated from batteries through the auxiliary power supply socket it requires 5 amperes at 6 volts DC for heater current and 150 milliamperes at 270 volts DC for plate currert.

DIMENSIONS: ModeI SX-42. Cabinet only, 20 inches wide ly \(93 / 4\) inches high ly 16 inches deep. Overall, 20 inches wide by \(10^{1 / 4}\) inches high by 18 inches deep.

WEIGHT: Model SX-42. Receiver only, approximately 52 pounds. Packed for shipment, approximately 65 pounds. Model B-42, adjustable hase, packed for shipment, approximately 5 pounds.

CHE Model SX-43 is designed for the discriminat[ ing amateur who demands excellent performance id wide frequency range at a medium price. This w member of the Hallicrafters line offers continuis coverage from 540 kilocycles to 55 megacycles d has an additional band from 88 to 108 megacles. AM reception is provided on all bands except nd \(6, C W\) on the 4 lower bands and FM on frequenas above 44 Mc . In the band of 44 to 55 Mc ., wide nd FM or narrow band AM just right for narrow nd FM reception is provided. The RECEPTION itch on the nancl selects anv of these and also con-

One stage of high gain tuned RF and a type 7F8 dual triode converter assure an exceptionally good signal-to-noise ratio. Image ratio on the AM channel on band 5 ( 44 to 55 Mc .) is excellent as the receiver is used as a double superheterodyne on this band. The new Hallicrafters dual IF transformers provide a 455 kilocycle IF channel for operating frequencies below 44 megacycles and a 10.7 megacycle IF channcl for the VHF bands. Two IF stages are used on the 4 lower bands and a third stage is added above 44 megacycles. Switching of IF frequencies is automatic. The separate electrical handsnread dial is calihrated for the

\title{
New SX-71 Communications Receiver
}

From the Hams at Hallicrafters to Hams everywhere comes this top-performing receiver in the medium price class. A new type of receiver-the first of its kind on the market-ralue-packed with features specifically asked for by the Hams. Extra sensitivity, selectivity, and stability, definitely superior image rejection with double superheterodyne circuit, plus built-in Narrow Band FM reception. Extra wide dials for main and bandspread tuning. Surpasses in Ham performance many receivers priced much ligher.
PERFORMANCE: Continuous AM reception from 538 kc to 35 Mc , and 46 to 56 Mc . Built-in limiter and balanced detector stages for hiss-free NBFM reception. Double conversion ( 2075 and 455 kc i-f channels) gives image rejection of better than 300 to 1 at

28 Mc . One r-f, two conversion, and 3 i-f stages yield lighl gain for sensitivity in the order of 1 microvolt. Sharp selectivity as indicated by the 14 kc band width ( 1000 times down from resonance) even before cutting the crystal filter into the circuit. Audio peaked for communications frequencies, with 3 watt output. CONTROLS: Band Selector \(538-1650 \mathrm{kc}, 1600-4800\) kc, \(4.6-13.5 \mathrm{Mc}, 12.5-35 \mathrm{Mc}, 46-56 \mathrm{Mc}\). Separate Main and Bandspread tuning controls; bandspread dial calibrated for \(80,40,20,10\), and 6 Meter Mands. BFO Pitch, 3 -position Selectivity, Crystal Phasing, Tone, AF Gain, and RF Gain controls. ANL, BFO, and Receive/Send switches. " \(S\) " meter adjustment on rear. PHYSICAL DATA: Gray steel cabinet with satin chrome trim. Piano hinge top. Size \(181 / 2 \mathrm{in}\). wide by \(87 / 8 \mathrm{in}\). high by 12 in . deep.
EXTERNAL CONNECTIONS: Use doublet or single wire antenna. 300 ohm output for separate speaker. Phone jack. Socket for external power supply. Connections for remote control. Power cord. For 105-125 volts \(50 / 60\) cycle AC.
11 TUBES PLUS VOLTAGE REGULATOR AND RECTIFIER: 6BA6 r-f Amp., 6C4 Osc., 6AUG 6 Mixer. 6BE6 2nd Conv., three 6SK7 i-f Amps., 6 H 6 ANL, and delayed AVC, 6SC7 BFO and a-f Amp., 6AL5 Det., 6K6GT Output, VR-150 Reg., and 5Y3GT Rect.

\section*{New S-72 Portable Communications Receiver \\ 1.8 microvolts at 30 Mc , ranging to 6 microvolts at 1.7}

You'll always be in touch with the outside world wherever you go with this Hallicrafters extra-sensitive all-wave portable receiver. Super-powered for superb performance with latest circuits and devices for maximum efliciency on AC, DC or battery operation. Designed both for the person who wants better than average reception even in weak signal areas and for the Radio Amateur.
PERFORMANCE: Covers standard broadcast band and three short-wave bands- 540 kc to 30.5 Mc . One stage of tuned r-f amplification. Operates from builtin antennas-loop for broadcast and 27 in . whip for short-wave. Automatic Noise limiter. Image ratio 140 to 1 at \(11 \mathrm{Mc}, 18\) to 1 at 30 Mc . Overall sensitivity
Mc. Broadcast Band sensitivity with loop antenna 16 microvolts per meter.
CONTROLS: Band selector switch gives four tuning ranges: \(540-1600 \mathrm{kc}, 1500-4400 \mathrm{kc}, 4.3-13 \mathrm{Mc}\), and \(12-31\) Mc. Sensitivity control. Turns on AVC when advanced to full "On" position, at the same time turning off BFO. Volume control combined with main OM/Off switch. Main tuning knob; separate bandspread control. Tone control combined with fine tuning control.
PHYSICAL DATA: Sturdy plywood cabinet, finished in handsome brown leatherette. Space for headphones. Size 14 in. wide, \(121 / 4 \mathrm{in}\). high, by \(71 / 4 \mathrm{in}\). deep. Carrying weight approx. 15 lbs ., incl. batteries.
EXTERNAL CONNECTIONS: Phone jack on panel. Provision for attaching supplementary antenna if desired. Power cord for \(105-125\) volts \(D C\) or 60 cycle AC fits inside set when not in use. Automatic changeover from battery to electric power protects batteries. Power consumption on battery operation 100 ma . at 7.5 V. and 30 ma . at 90 V . Average battery pack lasts 50 to 100 hours depending upon length of continued use. Takes RCA VS018, Burgess G6M60, General 60B6F65 and similar battery packs.
8 TUBES PLUS RECTIFIER: 1T4 r-f Amp., 1R5 Osc., 1 U 4 Mixer, two 1 U 4 i-f Amps,, 1 U 5 Det. and a-f Amp., 1U5 BFO and Automatic Noise Limiter, 3V4 Output, plus long-life Selenium Rectifier.
S-72. Less Battery. Ship. wt. 16 lbs..............Net \(\$ 79.95\)
LONG-WAVE MODEL - S-72L. Covers airways radio ranges, airport control towers, and marine beacons. Same as S-72 only range \(175-400 \mathrm{kc}\) and \(535-12,300\) kc.

}

\section*{SX-62 FM/AM All-Wave Radio}

SWL VERSION OF FAMOUS SX-42 . . COVERAGE 540 KC - 109 MC INCLUDING FM . . . BUILT-IN CRYSTAL CALIBRATOR.

Having basically the same chassis as Hallicrafters best communications receiver, the \(S X-62\) provides communications-receiver performance in simplified form. A single tuning control covers the wide-vision dial. Only one band lights up at a time - you always know just where you are tuning.

In addition a crystal calibration oscillator is built in. A flip of the switch at any time will put test signals at 500 KC intervals across the dial. You just tune in

\section*{S-51 Marine Receiver}

Rugged and specially constructed for dependable sea or air use. Range 132 KC to 13 MC covers all important channels. Fixed frequency operation possible on three pre-tuned channels; facilitates switching frequency and/or standing guard. Built-in PM speaker. CONTROLS: Band Selector - 132-405 KC, 485-1530 \(\mathrm{KC}, 1450-4550 \mathrm{KC}, 4.2-13.0 \mathrm{MC}\), plus 3 fixed freq. positions in \(200-300 \mathrm{KC}\) and \(2-3 \mathrm{MC}\) range; RF gain, Volume, CW/AM, Range Filter, ANL, Tuning, 3 position Tone, CW Pitch, Rec./Standby. Gray steel cabinet: \(18 \frac{1}{2}\) by 9 by \(9 \frac{1}{2}\) in. cleep; piano hinge top. Donblet or single wire antenna. Phone jack. Socket for 6,12 , or 32 v . vibrapack. \(105-125\) v. \(50-60\) cycle AC or DC. 9 TUBES PLUS RECTIFIER: 6SS7 RF Amp., 7AS Conv., two 6SS7's IF Amps., 7C6 Det., 35L6 or 6V6 Output, 7A6 Noise Limiter, 6SS7 BFO, 35Z5 Rectifier. S-51. Ship. wt. 31 lbs.........................Amateur Net \(\$ 149.50\) Vibrapack for 6,12 , or 32 v . operation
\(\$ 22.50\)
the nearest one of these signals and then use the calibration-reset control to adjust the dial pointer to the exact frequency.

Continuous AM reception from 540 KC to 109 MC ; FM reception 27-109 MC. Temperature-compensated oscillator with voltage regulator. Two RF and three 1 F stages; dual IF channels ( 455 KC and 10.7 MC ). Audio flat \(60-15,000\) cycles; 8 -watt push-pull output. CONTROLS: Band Selector - \#1 540-1620 KC, \#2 1.62-4.9 MC, \#3 4.9-15 MC; \#4 15-32 MC, \#5 27 56 MC , \#6 54-109 MC; Receive/Standby, Crystal calibration On/Off, Noise Limiter, Tuning, AF Gain, Phono/FM/AM/CW, six-position Selectivity, fourposition Tone, RF Gain, and Calibration Reset.
PHYSICAL DATA: Gray steel cabinet with satin chrome trim. Top opens on piano hinge. Size 20 in . wide by \(101 / 4\) in. high by 16 in . deep.
EXTERNAL CONNECTIONS: Doublet or single wire antenna. 500 and 5000 ohm outputs. Phone jacks. Phonograph jack. Socket for external power. Remote standby connections. \(105-125\) volt \(50-60\) cycle AC line. 14 TUBES PLUS VOLTAGE REGULATOR AND RECTIFIER: two 6AG5's RF amps., 7F8 Conv., 6SK7 IF Amp., 6SG7 IF Amp., 7H7 IF Amp., 7H7 Limiter and AM Det., 6 H 6 Discriminator, 7 A 4 BFO, 6 H 6 ANL, 6SL7 AF Amp., two 6V6's Push-pull Output, 6C4 Calibration Osc., VR-150 Regulator, 5U4G Rectifier.

\section*{HT-18 Variable Freq. Oscillator}

Complete exciter with calibrated band-switching and built-in power supply. Xtal or VFO, NBFM or CW on 5 Bands. Output 2.5-4.5 watts. Temperature compensated, voltage regulated. Built-in speech amp.

Variable frequency oscillator (used as ECO or Pierce xtal), frequency modulator with speech amplifier, plus \({ }_{6} \mathrm{~L} 6\) output. Operation switch, Band Selector (80, 40, 20, 10, 6 meters). Check, Plate, Power, and Deviation switches. Single tuning control. Mike, keying, remote control connections. 72 -ohm output. \(36 \mathrm{BA} 6,6 \mathrm{~L} 6\), VR-150, VR-105, 5 Y 3 GT. Size \(123 / 4 \times 7 \times 73 / 4\) in. deep. HT-18. Slip. wt. 25 lbs.

Amateur Net \$110.00

\title{
since 1933 S m me
}

RME 84 at right, VP-2-6 volt power pack with cable attached, optional for RME 84 in center, CM-1-Carrier Level "S" Meter with cord and plug, optional for RME 84 at left.

The Coverage Is Complete .540 to 44 Megacycles
An important feature is the continuous coverage ranging from 540 kc to 44 megacycles. This coverage, in addition to providing for the regular broadcast band, takes in the \(80,40,20,15\) and 10 meter amateur bands. The calibration is made on a 7 inch diameter scale. In addition, a smooth-running vernier dial gives band spread on any setting of the main scale. The vernier scale makes five complete revolutions for the 180 degree rotation of the tuning condenser

\section*{Seven Tubes Have Been Chosen For The RME 84}
1. A 7B7 loctal radio frequency amplifier is ahead of the first detector 2. A \(7 \mathrm{7L7}\) loctal is used as a first detector and radio frequency oscillator 3. A 7117 serves as the first \(1 F\) olierating at 455 kc .
4. A 7117. second IF further amplities the signal.
5. A 7 KF loctal acts as second detector and first audio amplifier. 6. Anothier 7 K 7 provides the heat frequency and acts as noise \(l i m i t e r\). 7. The 6 GGG provides the final audio frequency output. 8. A 5 Y 3 GT is the power rectifier tube.

\section*{Portability Built Into The RME 84}

Conscious of the fact that many thousands of amateurs want a receiver for portable operation, the new RME 84 is equipped with a special socket connection making possible connections to either a \(B\) battery and an A battery supply or a similar source of power such as an external vibropack. 135 volts of B and 6 volts of A battery will operate the RME 84 at full power. The drain on the \(B\) battery is only 32 milliamperes at 135 volts and the 6 volt A battery provides 1.5 amps , including the two dial lights.

The new noise limiter, of the series type, performs exceptionally well. Also made available for future use with the RME 84 is a signal strength meter to be connected through the special socket located on the rear of the chassis apron.

SENSITIVITY: The average sensitivity of the RME 84 is of the order of 2 microvolts over the entire range of the instrument.

RME 84, CODE HANDY, complete for 115 volt, 60 cycle operation and for use with external battery supply. May also be had for 230 volt, 25 cycle operation at additional cost. f.o.b. Peoria, Illinois, Net Selling Price

\title{
VHF-152A \\ 3 BAND CONVERTER
}

Reception on the new high frequencies, 50 to 54 mc . and 144 to 148 mc . bands, and better reception on the 27 to 29.7 mc . band, using the double detection systen, image free, at a cost which any amateur can afford-that is what the new VHF-152 is designed to give. . . . Every owner of a communications receiver can, with the acquisition of this new converter, do a much better job of working high frequency signals than is possible with most any higher priced, specially designed receiver.
This converter provides an order of stability at 50 mc . much higher than most communications receivers have when operating at 5 mc . New engineering design and construction make this possible.

Miniature tubes are used, a 6AK5 rf amplifier and a 6J6 detector and a 6 J 6 oscillator complete the converter proper. The built-in power supply uses a 5Y3GT rectifier tube and a VR150 voltage regulator. The three bands are calibrated to cover the full sweep of a seven-inch diameter scale, indirectly illuminated. ...The tuning mechanism is of the same sturdy, positive construction characteristic of all RME units. Smooth, velvety operation of the large knob makes operation a pleasure.
The sensitivity of the VHF-152 is of the order of 2 microvolts. Its output frequency is 7000 kc .
Separate connections are provided for the 10, 6 and 2 meter antennas and for the antenna used with the receiver. Each band has its own especially designed antenna input circuit of approximately 300 ohms impedance. The input of the receiver is changed from the VHF- 152 output to the receiver antenna by a front panel switch. Another front panel switch selects the 10,6 or 2 meter band for VHF- 152 operation.
Interconnecting plug and cord are also furnished, which permanently connect the VHF-152 direct to the input terminals of the receiver.
The cabinet is designed to match the RME-45 communications receiver, both in streamlined appearance and in two tone gray and black crinkle finish.
Dimensions are as follows: \(11^{\prime \prime}\) high, \(12^{\prime \prime}\) wide, \(11^{\prime \prime}\) deep, with hinged lid. Standard operation is for 115 volt, \(50-60\) cycle power source.
Complete with tubes, interconnecting plug and cord. CODE: HAMPY, f.o.b. Peoria, Illinois, Net Selling Price ................................................ \$86.60.

\section*{THE HF 10-20 CONVERTER}

For 10-11-15 and 20 Meters
Because of the double conversion system, the HF 10-20 provides outstanding and imageless reception on 10-11-15 and 20 meters. And it's an especially vital adjunct to those receivers that tune only up to 18 mc . or possess inadequate bandspread. The HF 10-20 provides an average of 7.8 linear inches of calibrated bandspread on each of the three bands. Intages are non-existent. The output (I. F. frequency) of the HF \(10-20\) is 7 mc . It can be used with any all-wave or amateur receiver. Features include provision for separate antennae, self-contained power supply, antenna selector switch, band selector and high gain. The increase in gain, depending on the receiver and receiving conditions, is approximately 30 DB over the entire range of frequencies covered.
Tubes used are a 6BA6 RF amplifier and a 6 J 6 twin triode mixer. Built-in power supply uses a 5 Y3GT rectifier and a VR150 voltage regulator.
Model HF 10-20 Converter, Standard Model, CODE HORN, in cabinet to match RME 45 Receiver in appearance. Dimensions: \(11^{\prime \prime}\) high, \(12^{\prime \prime}\) wide, \(11^{\prime \prime}\) deep. Amateur Net Price
\(\$ 77.00\)
Model HF 10-20 Type "S" Converter, CODE HILL, in cabinet to match RME 84 in appearance. Dimensions: \(91 / 8^{\prime \prime}\) high, \(101 / 4^{\prime \prime}\) wide, \(101 / 4^{\prime \prime}\) deep.
Amateur Net Price
\(\$ 77.00\)

\section*{THE NEW RATIO DETECTOR (NBF4) For Optimum Narrow Band FM Performance} With this plug-in unit and an RME 45 receiver, the noise reducing advantages of NFM are fully realized.
 NFM Signals that can't be heard with good AM communications receivers come in loud and clear against a noiseless background.
Equal sensitivity can be enjoyed on AM or NFM. It employs a highly efficient ratio-type detector and a limiter for noiseless reception of NFM signals. Only RME 45 receivers can employ the unit.

\section*{THE DB22A PRESELECTOR}

\section*{Coverage . 54 to 44 Mc. - Average Gain 30 DB}

Here's the new DB22A completely redesigned for greater efficiency and higher signal to noise ratio. It uses new 6 BA 6 miniatures. Image ratio is better than 50 DB with a communications receiver having a single stage of RF. It's calibrated, has smootl planetary tuning, self contained power supply, antenna by-pass switch, gain control and many other features. Model DB22A Preselector, Standard Model, CODE BONLST, in cabinet to match RME 45 Receiver in appearance. Dimensions: \(11^{\prime \prime}\) higlt, \(12^{\prime \prime}\) wide, \(11^{\prime \prime}\) deep. Amateur Net Price
\(\$ 71.00\)
Model DB22A—Type "S" Preselector, CODE CLEAR. in cabinet to match RME 84 Receiver in appearance. Dimensions: \(91 / 8^{\prime \prime}\) high, \(101 / 4^{\prime \prime}\) wide, \(101 / 4^{\prime \prime}\) deep.
Amateur Net Price.
\(\$ 71.00\)

\section*{THE BOOMERANG (MB-3)}

\section*{A Break-In \& Monitoring Device for CW \& Fone}

The "Boomerang" is the solution to rapid and efficient break-in, and the avoiclance of needless QRM. Dots and dashes are heard in the headphones or the speaker while sending-a great help in perfecting the fist and avoiding errors.
When the key is down, any signal normally going through the receiver is automatically suppressed. Raise the key and instantaneously the receiver functions.

The "Boomerang" can be used as a handy monitor for phone operation, as a code practice oscillator and a tone modulator. Tubes include a 7 K 7 , a 6SL7 and a \(6 \times 4\) rectifier. Cabinet is two-tone grey finish.

Amateur Net Price.

\section*{" \(100 \%\) 'r"}
- accurate
- INDEPENDENT OF WAVE FORM
- WORKS ON ANY AM RIG
- NO METER OR SCOPE TO WATCH

The GONSET " \(100 \%\) ' \(r\) " is a modulation indicator of the "peak flash" type which flashes a warning light whenever the peak modulation percentage exceeds a predetermined value.

A selector switch giving the option of \(85 \%\) or \(100 \%\) permits you not only to tell when overmodulation occurs, but also tells if the average speech level is up high enough.

The GONSET " \(100 \%\) ' \(r\) " is a must for adjusting a rig using a bow level speech clipper. With it you can set the clipper threshold accurately in a matter of seconds.

Price Complete \(\$ 19.9 \mathbf{5}^{*}\)

\section*{"3-30" MOBILE CONVERTER}
- Continuous coverage, 3 to 30 Mc .
- Bandspread dial with plenty of bandspread on amateur bands.
- High sensitivity on a short whip.
- High stabilify. No "warm up" drift.
- Four working (r.f.) tubes give lots of reserve gain.
- Extremely compact. Same size as famous GONSET "10-11" mobile converter, only \(5 \frac{1}{4}\) " by \(31 / 2^{\prime \prime}\) by \(51 / 4^{\prime \prime}\) deep.
- Low plate current drain (approximately 10 ma.\()\).

Price Complete \$39.95*

A simple, inexpensive noise silencer designed specifically to aid in reduction of such interference as ignition noise, power leaks, electric razors, etc. The unit is small in size, \(2^{\prime \prime} \times 4^{\prime \prime} \times 1 / 2^{\prime \prime}\), and weighs less than one pound. This silencer makes an ideal attachment for communication and mobile receivers. Complete with installation instructions and connecting cables.

\section*{CLIPPER}

Price Complete \({ }^{\$ 8.25 *}\)

\section*{ALL CHANNEL TELEVISION BEAM ANTENNA}
- Operates on new principle.
- Rapid assembly. No screws or nuts to install.
- Highly efficient on all channels, 2 through 13
- 9-foot aluminum mast.
- Weatherproof iwin lead connections.
- Designed by antenna engineers.

The GONSET "Double-W" all-channel television beam antenna provides results heretofore obtainable only in the highest priced antennas and in addition offers several new features.
The gain of the "Double-W" increases with frequency, a desirable characteristic when it is considered that receiver sensitivity decreases and line losses increase as the frequency is raised.
The directivity of the "Double-W" also increases with frequency, a valuable feature when it is considered that "ghost" problems in crease with frequency.
Due to new electrical operating principles' no "holes" in reception will be found in any of the channels.
Throughout the high band the directivity pattern is sharper than that of a dipole and reflector combination, or a dipole, director and reflector combination. This provides better discrimination against spurious reflections from buildings and other tall obiects slightly to one side of the main signal path. Such reflections often produce a particularly tough "ghost" problem on the high band which eannot be resolved satisfactorily with a dipole-and-reflector combination.

## the finest amateur receiver National has ever made!

1. Automatic odjustable-threshold noise limiter.
2. Lever handles. for coil set changing.
3. Side rule calibration on all coil sets.
4. 500 -degree micrometer dial (effective scale length 12 feet). 400 degrees of bandspread on 80, 40, 20, 11-10 meters!
5. Accessory socket and switch for NFM adaptor or phonograph.
6. Two tuned RF stages.
7. Two If stages.
8. Precision gear drive eliminates backlash.
9. Voltage-regulated high frequency oscillator for exceptionla stability.

Subjected to the severest tests of government, commercial and amateur use for 14 years, the basic HRO design has set a new high in receiver performance. Now, here it is in its newest, finest form. As always, the major components are National designed and made.
RANGE: 1.7 to 30 mcs (Additional coils available for 50 to 430 kcs. 480 to 2050 kcs , 30 to 35 mcs.)
SENSITIVITY: 1 microvolt or better.
IMAGE REJECTION: Better than 30 db at 30 mcs.
SIGNAL-TO-NOISE RATIO: Exceeds 16 db with 5 microvolts input.
AVC CHARACTERISTIC: to $\pm 10 \mathrm{db}$ between 1.0 and 100,000 microvolts input.

HRT (gray or black) Net $\$ .75$ The HRT knob is $21 / 8^{\prime \prime}$ in dia. and fits $1 / 4^{\prime \prime}$ shafts. This knob has a chrome appearance circle and combined with the HRS series shown below gives the new look to panel layouts.

HRS (gray or black) Net $\$ .50$ The HRS series knobs are a popwiar easy to grip knob. They are molded of high quality plastic and have $13 / 8^{\prime \prime}$ dia. chrome plated bevel skirts fit $1 / 4^{\prime \prime}$ shafts available in the following scales:

HRS-I ON.OFF through $30^{\circ}$
HRS-2 5-0.5 through $180^{\circ}$
HRS-3 0.10 through $300^{\circ}$
HRS-4 Single etched line

HR (gray or black) Net $\$ .30$
An HRS type knob without the chrome plated skirt but with a white dot for spotting relative control settings.

## HRB

Net $\$ .45$
Ideal for bandswitching or other applications where a switch is turned to several index positions the new HRB lever knob has just the right feel - a bright zinc alloy die casting.

SB
Net \$.18
A nickel plated brass bushing $1 / 2$ dia. (Fits $1 / 4^{\prime \prime}$ shaft).

## ODL

Net \$. 33
A locking device which clamps the rim of $O, K, L$ and $M$ Dials. Brass, nickel plated

ODD
Net $\$ .42$
Vernier pinch drive for $O, L$, or other plain dials.

AN Vernier Mechanism Net $\$ 1.80$ A vernier mechanism ratio $5-1$ has an insulated output shaft coupling for $1 / 4^{1 \prime}$ shafts. Drive Shaft fits 3/16" knob.

AVD Vernier Mechanism Net \$1.65
Similar to AN.Output shaft coupling is non insulated.
For commercial uses many variations available. Write for further particulars.

## R

Net $\$ .60$
This small dial has a $15 / 8^{\prime \prime}$ dia scale calibrated $0-10$ in $180^{\circ}$ for increased reading with clockwise rotation. Black bakelite knob. Fits $1 / 4^{\prime \prime}$ shaft.

## HRP-P

Net \$ . 24
Black bakelite knob $11 / 4^{\prime \prime}$ long and $1 / 2^{\prime \prime}$ wide. Equipped with pointer. Especially suitable for use on wafer and other rotary switches on laboratory equipment and the like. (Fits $1 / 4^{\prime \prime}$ shaft)

## HRP

Net \$ . 18
The type HRP knob has no pointer but is otherwise the same as the knob above. Recommended for uncalibrated or hard-tuning controls. (Fits $1 / 4^{\prime \prime}$ shaft).

HRK
Net \$ . 57 Black bakelite knob $23 / 8^{\prime \prime}$ dial extremely rugged. This is the knob used on National type $\bigcirc$ and type L dials.

## HRT-M

Net \$ . 50
This is a smaller version of the HRT and was designed originally for use on the NC. 57 Receiver - now available in choice of gray or black — is $1-7 / 16^{\prime \prime}$ in diameter.

components
NATIONAI CO.
MALDEN, MASS.

## N Dial

AD Dial

## Net $\$ 4.50$

Net $\$ 3.00$
The four-inch $N$ and $A D$ Dials have engine divided and die stamped scales respectively. The $N$ Dial has a decimal vernier: the $A D$ Dial employs a pointer. The planetary drive tas a ratio of 5 to 1 , and is contained within the body of the dial. 2,3 , 4 or 5 scale. Fits $1 / 4^{\prime \prime}$ shaft. Specify scale.

## B Dial

Net $\$ 2.70$
"Velvet Vernier" Dial, Type B, has a compact veriable ratio 6 to 1 min . 20 to I max. drive that is smooth and trouble free. The case is black bakelite. 1 or 5 scale. $4^{\prime \prime}$ dia. Fits $1 / 4^{\prime \prime}$ shaft. Specify scale.

## BM Dial

Net $\$ 2.10$
The BM Dial is a smaller version of the $B$ for use where space is limited. The drive ratio is fixed. Although small in size, the BM Dial has the same smooth action as the larger units. I or 5 scale. $3^{\prime \prime}$ dia. Fits $1 / 4^{\prime \prime}$ shaft. Specify scale.

## AM Dial

Net \$2.25
The original "Velvet Vernier" mechanism in a mèal skirted dial $3^{\prime \prime}$ in dia. ratio 5 to 1 . It is available with $2,3,4,5$ or 6 scale and fits $1 / 4^{\prime \prime}$ shaft.

## P Dial

Net $\$ 1.00$
The new $P$ dial is the same as the AM except direc ${ }^{-}$drive.
Type $0,31 / 2^{\prime \prime}$ dia,, scale 2 , with HRK knob, fits $1 / 4^{\prime \prime}$ shafts. Net $\$ 1.00$ Type L, same as $O$ except $5^{\prime \prime}$ dia., scale 2 only.

Net \$1.95
Type K, same as $O$ except less knob, complete with CDD vernier drive. scale 2 only.

Net \$1.50
Type $M$, same as $K$ except $5^{\prime \prime}$ dia. scale 2 only.

Net \$2.25

The dials at the right are for individual calibration: all four employ the noted 5:1 drive ratio Velvet Vernier mechanism and are of excellent quality.

## MCN Dial

Net $\$ 2.70$
The MCN dial has been scaled down to lend itself ideally to mobile installations and small converters and tuners. It may also be mounted on the standard $31 / 2^{\prime \prime}$ rack panel where such mounting may be desirable. The dial provides three calibrating scales and a 0.100 logging scale. On the rear side of the dial, the mechanism extends $1 / 4^{\prime \prime}$ below the dial frame. $23 / 4^{\prime \prime} \mathrm{H} . \times 37 / 8^{\prime \prime} \mathrm{W}$.

## SCN Dial

Net $\$ 3.00$ The SCN dial provides the same dial scales as the ACN dial but in a reduced size. It is used where economy of panel-mounting space is desirable and where a smaller dial would be out of proportion with the size of the panel. 4-7/16" H. x $61 / 4^{\prime \prime} \mathrm{W}$.

## ICN Dial

Net $\$ 6.00$
The ICN dial meets those hundreds of requests from amateurs the world over for an illuminated $A C N$ dial. Two dial lights mounted on the top corners of the dial provide efficient and even illumination on all bands. The dial window has been blanked out in semi-circular shape to pre. vent shadow casting. Dial scales are the same as those used on the ACN dial. $51 / 8^{\prime \prime} \mathrm{H} \times 71 / 4^{\prime \prime} \mathrm{W}$.

## ACN Dial

Net $\$ 3.30$
The ACN is the original of this type dial, a National design for the benefit of experimenters who "build their own" and desire direct calibration $5^{\prime \prime} H . \times 71 / 4^{\prime \prime} \mathrm{W}$.

## $\underbrace{\text { Concen }}_{\text {MCN }}$

SCN

ICN

ACN

##  <br> (c)

## XLA

Net $\$ .99$
A low-loss socket for the 6F4 and 950 series acorn tubes for frequencies as high as 600 Mc. Conventional by-pass condensers may be compactly mounted between the contact terminals and the chassis. Low contact resistance, short and direct leads and low and constant inductance are features.

## XLA-S

Net $\$ 36$
An internal shield fitting the XLA socket and suitable for tubes such as the 956 .

## XLA-C

Net $\$ .36$
This miniature by-pass condenser may be mounted inside the socket, directly below the contact. Capacities of 50 or 100 mmf . available.

## XCA

Net $\$ .99$
A low-loss steatite socket for acorn friodes. Pin grips are designed to accept tube prongs with minimum strain but exert maximum pressure when seated.
XMA Net \$1.32 For pentode acorn tubes, this socket has built-in bypass condensers. The base is a copper plate.
XOA-7 (mica-filled bakelite)
Net $\$ .50$
XOA-C-7 (ceramic) Net $\$ .50$ XOR-7 (mica-filled bakelite) Net $\$ .50$
XOR-C. 7 (ceramic) Net $\$ .50$ These high quality sockets for the 7 pin miniature tubes have silver plated beryllium copper contacts that correctly grip the tube pins close to the base of the tube to provide the short leads and low inductance so necessary in ultrahigh frequency design. A novel feature of these new sockets is the interchangeability of the contacts, which are easily removed for replacement. This permits the use of a mixture of axial (XOA) and radial (XOR) type contacts in the same socket to obtain the shortest possible leads, or minimum size in tight places. The above sockets all mount with two 4-40 screws on $875^{\prime \prime}$ centers. Chassis cutout should be $3 / 4^{\prime \prime}$ dia. Shields for use with these sockets are on page 21.
XOA-C-9 (ceramic) Net $\$ .57$ XOR-C-9 (ceramic) Net $\$ .57$ These sockets are for the new 9 -pin miniature tubes. The XOR-C-9 (not illustrated) has radial contacts. Both have all of the features described above for the 7 -pin types

## components

NATIONAL CO. MALDEN, MASS

and they also mount with 4-40 screws. Mounting center dimension is $11 / 8^{\prime \prime}$, the chassis cutout should be $13 / 16^{\prime \prime}$ dia.

## CIR SERIES SOCKETS

Any Type
Net $\$ .30$ Always a popular National component, type CIR Sockets feature low-loss steatite insulation, a contact that grips the tube prong for its entire length, and a metal ring for six position mounting.
XC-4, 5, 6, 7S, 7L and CIR-4, $5,6,7 \mathrm{~S}$ and 7 L all have 1-27/32" mounting centers. CIR-8E has slotted holes in plate but will mount on 1-27/32" center. CIR-8 and XC- 8 have $1 / 1 / 2^{\prime \prime}$ mounting centers.
XC SERIES SOCKETS
XC-4 Net $\$ 36$ XC-5 ...........................Net $\$ .39$
 XC-75 XC-71 XC-8 XC-8
Nation ................. $\mathrm{Net} \$ .45$ ….............Net $\$ .39$ anal wafer sockets have exceptionally good contacts with high current capacity together with low loss steatite insulation. All types have a locating groove to make tube insertion easy. The XC-6 is ideal for use with AR-17 coils shown on page 24.

## HX-29

Net $\$ \mathbf{8 1}$ A low-loss wafer socket with steatite insulation for the popular 829 and 832 tubes. JX-51 Net $\$ 81$ A low loss steatite wafer socket for the 813 and other tubes having the Giant 7-pin base. (not illustrated)
XM- 10
Net $\$ .90$
A heavy duty metal shell socket for tubes having the XU 4 -pin base.
XM-50
Net $\$ 1.20$ (see XM-10 for style) A heavy duty metal shell socket for tubes having the Jumbo 4-pin base ("fifty watters"). HX-100S

Net \$1.65
With Standoff Insulators A low loss wafer socket suitable for the type $4-125-A$, 4-250-A and other tubes using the Giant 5 -pin base. Shield grounding clips are supplied which mount on the chassis with the socket mounting screws to ground the tube shield at three points. Air holes are provided in the socket to permit forced air cooling. HX- 100

Net $\$ .99$
Same as above less standoff insulators.

## SHAFT COUPLINGS

TX-19

Net \$1.25
A steatite insulated flexible coupling for $1 / 4^{\prime \prime}$ shafts. Conservatively rated at 5000 volts peak. Diameter $13 / 8^{\prime \prime}$, length $I^{\prime \prime}$. Length and flashover voltage can be increased by turning collars outboard.

## TX-1I

Net $\$ .42$
The flexible shaft of this coupling connects shafts at angles up to 90 degrees, and eliminates misalignment problems. Fits $1 / 4^{\prime \prime}$ shafis. Length $41 / 4^{\prime \prime}$

TX-12, Length $45 / 8^{\prime \prime}$ Net $\$ .90$ TX-13, Length 71/8" Net $\$ 1.05$
These couplings use flexible shafting like the TX-II above, but are also provided with steatite insulators at each end.

TX-I, Leakage path I"
Net $\$ .65$
TX-2, Leakage path $21 / 2$
Net $\$ .75$
Flexible couplings with glazed steatite insulation which fit $1 / 4^{\prime \prime}$ shafts.

## TX-20

Net \$1.25
A small bakelite insulated flexible coupling of the "Hooke's joint" type. Accommodates up to five degrees angular misalignment as well as $1 / 64^{\prime \prime}$ offset of centers. For $1 / 4^{\prime \prime}$ shafts.

## TX-8

Net $\$ .60$
A non-flexible rigid coupling with steatite insulation. I" diam. Fits $1 / 4$ " shaft.

TX- 10
Net $\$ .40$
A very compact insulated coupling free from backlash. Insulation is canvas bakelite. $1-1 / 16^{\prime \prime}$ diam. Fits $1 / 4^{\prime \prime}$ shaft.

TX-10F (Not illustrated)
Net \$.45
A new version of the TX-10 which employs thin canvas bakelite strips for flexibility.

TX-22 (not illustroted)
Net $\$ .40$
A non-insulated coupling identical to TX-10 except of all metal construction. Makes good electrical connection be. tween coupled shafts.

# components 

NATIONAL CO. MALDEN, MASS.

TX-9 Net $\$ .75$ This small insulated flexible coupling provides high electrical efficiency when used to isolate circuits. Insulation is steatite. $15 / 8^{\prime \prime}$ diam. Fits $1 / 4^{\prime \prime}$ shaft.
TX-2I (not illustrated)
Net $\$ .40$
Similar to TX. 10 except $13 / 16^{\prime \prime}$ long and couples $1 / 4^{\prime}$ shaft to $5 / 32^{\prime \prime}$ shaft.

## SAFETY GRID AND PLATE CAPS

## SPP-9

Net \$.21
Ceramic insulation. Fits 9/16" diameter.

## SPP-3

Net $\$ .21$
Ceramic insulation. Fits $3 / 8^{\prime \prime}$ diameter.
National Safety Grid and Plate Caps have a ceramic body which offers protection aqainst accidental contact with high voltage caps on tubes.

## GRID AND PLATE GRIPS

Type 12, for 9/16" Caps Net $\$ .06$ Type 24, for $3 / 8{ }^{\prime \prime}$ Caps

Net $\$ .03$
Type 8, for $1 / 4^{\prime \prime}$ Caps Net $\$ .03$
National Grid and Plate Grips provide a secure and positive contact with the tube cap and yet are released easily by a slight pressure on the ear.

## RIGHT ANGLE DRIVES

These sturdy drives were developed for use with the new National AMT condensers (see page 26). They are as compact as the torque requirements will allow and have nicke! plated cast frames and bronze gears which operate smoothly without chatter or binding. The ACD-1 has 32 pitch gears and a $1 / 4^{\prime \prime}$ dia. dial shaft and drives $1 / 4^{\prime \prime}$ shafts. ACD-2 has 24 pitch gears (for heavier service) and $1 / 4^{\prime \prime}$ dia. shaft driving $1 / 4^{\prime \prime}$ shafts. ACD-3 is the same as ACD-2 except that it drives $3 / 8^{\prime \prime}$ diameter shafts.

| R-300ST | Net \$ . 40 |

These RF chokes are similar in size to R-100 series but have higher current capacity. The R-300U is provided with a removable stand-off insulator at one end. The R-300S has a non-removable stand-off insulator and cot-ter-pin lug terminals. The R-300ST has a $6-32$ threaded stud at each end. Inductance values of $0.5,1.0,2.5$ and 5.0 millihenries are available with a current rating of 300 milliamperes. R-300, R-300U, R-300S and R-300ST are identical electrically.

## R-152

Net $\$ 1.75$
For use in the range between 2 and 4 Mc . Ideal for high power transmitter stages operated in the 80 meter amateur band. Inductance $4 \mathrm{~m} . \mathrm{h}$., DC resistance 10 ohms, DC current 600 ma. Coils honeycomb wound on steatite core.

## R-154 <br> R-154U

Net $\$ 1.75$ Net $\$ 1.40$
For the 20, 40 and 80 meter bands, inductance I m.h., DC resistance 6 ohms, DC current 600 ma . Coils honeycomb wound on steatite core. The R-I54U does not have the third mounting foot and the small insulator, but is otherwise the same as R-154. See illustration.

## R-175

Net $\$ 2.25$
The R-175 Choke is suitable for parallel-feed as well as series-feed in transmitters with plate supply up to 3000 volts modulated or 4000 volts unmodulated. Unlike conventional chokes, the reactance of the R-175 is high throughout the 10 and 20 meter bands as well as the 40 and 80 meter bands. Inductance $225 \mu \mathrm{~h}$, distributed capacity 0.6 mmF ., DC resistance 6 ohms, DC current 800 ma ., voltage breakdown to base 12,500 volts.
Manufacturers: We have facilities for quantity production of RF chokes of practically any type. Send us your specifications,

## TRANSMITTER COIL FORMS

The Transmitter Coil Forms and Mounting are designed as a group, and mount conveniently on the bars of a TMA condenser. The larger coil form, Type XR-14A. (not illustrated) has a winding diameter of $5^{\prime \prime}$, a winding length of $33 / 4^{\prime \prime}$ ( 30 turns total) and is intended for the 80 meter band. The smaller form, Type XR-IOA, has a winding length of $33 / 4^{\prime \prime}$ and a winding diameter of $2 \frac{1}{2} 2^{\prime \prime}$ ( 26 turns total). It is intended for the 20 and 40 meter bands.

Either coil form fits the PB-15 plug. For higher frequencies, the plug may be used with a self-supporting coil of copper tubing. The XB- 15 Socket may be mounted on breadboards or chassis, as well as on the TMA Condenser.

## EXCITER COILS

There is a National exciter coil for every application. AR-I5 coils are mounted on 5 pin bases which fit any standard 5 contact tube socket. AR-16 coils are mounted on the well known National PB-16 plug which fits the National XB-16 socket. The AR- 17 coils have 6 pin bases which fit standard 6 contact tube sockets and the link windings of this series have center taps which may be grounded for harmonic reduction. All center link models are center tapped for use in balanced circuits. Insulation polystyrene and steatite. For use where plate power input does not exceed 50 watts. Available with fixed or swinging end or center links for all amateur bands, 6 through 80 meters.
The XR-16 Coil Form (not illustrated) fits the PB-16 Plug-in Base; it has a winding length of $13 / 4^{\prime \prime}$, diameter $11 / 4^{\prime \prime}$

## TYPE LMT

A heavy duty transmitting condenser that completely eliminates troublesome closed loops, vastly simplifying the problem of unwanted harmonics. The rotor shaft is completely insulated from the end plates. Long leakage path (higher safety factor). Plates and parts are extra heavy with highly polished rounded edges to prevent flash-over. Adjustable stator plate mounting and end bearings. Available in single-stator, double-stator, or double-stator right angle center drive models. Same capacities and prices as National TML Condenser. Condensers with right angle drive add $\$ 3.90$ to price shown.

## TYPE TML

is a heavy duty job throughout. The frame structure (rugged aluminum castings with dural tie bars) and precision bearings assure permanent rotor alignment. All plates are extra thick with rounded and polished edges. This, plus specially treated steatite insulators and a husky self-cleaning rotor contact, provides high flashover, current and voltage ratings.

components

NATIONAL CO.

MALDEN, MASS.

## MINIATURE <br> CONDENSERS:

Type PS variable condensers are compact silver plated units of soldered construction for use as semi-fixed bandsets or padders. Base is steatite - bearing is "snug" but smooth. PSR models are screwdriver adjust type; PSE have $1 / 4^{\prime \prime}$ diameter shafts both ends: PSL are similar to PSR but include rotor shaft lock.
Type M-30 Net $\$ 22$
The M-30 is a tiny (13/16' $\left.\times 9 / 16^{\prime \prime} \times 1 / 2^{\prime \prime}\right)$ mica trimmer - 30 mmf. max. steatite base.
Type W-75, 75 mmf .
Net $\$ 1.60$
Type W-100, 100 mmf .
Net $\$ 1.76$ Small air-dielectric padding condensers having a very low temperature coefficient. They are mounted in $11 / 4^{\prime \prime}$ diameter aluminum shields and have $1 / 4$ " hex heads for socket-wrench adiustment.

The UM condensers are lowloss, aluminum plate staked construction miniature variablés designed for UHF converters, VFOs and the like - minimum capacity is exceptionally low. The UMs can be mounted in PB-10 or RO shield cans and have $1 / 4^{\prime \prime}$ dia. shafts front and rear for ganging (see pages 21, 23 and 24 for shield cans and couplings). Plates: straight-line-cap., $180^{\circ}$ rotation. Dimensions: Base $I^{\prime \prime}$ $\times 21 / 4^{\prime \prime}, \mathrm{mtg}$. holes on $5 / 8^{\prime \prime}$ x $1-23 / 32^{\prime \prime}$ centers, $2-5 / 16^{\prime \prime}$ max. length.
The UMB-25 and UMB-50 are differential (balanced stator) models. UM-IOD and UMA-25 are double-spaced and the latter is bolted construction for experimental capacity reduction. Hardware for panel or chassis mounting is supplied with all UM condensers.

## NEUTRALIZING <br> CONDENSERS:

## NC-600U

Net \$.38
With standoff insulator
NC-600
Net $\$ .32$
Without insulator
For neutralizing low power beam tubes requiring from .5 to 4 mmf . and 1500 max. total volts such as the 6L6. The NC.600U is supplied with a GS-10 standoff insulator screwed on one end ${ }_{i}$ which may be removed for pigtail mounting.
STN Net $\$ 2.07$ The Type STN has a maximum capacity of 18 mmf . ( 3000 V), making it suitable for such tubes as the 809. It is supplied with two standoff insulators.

## NC-800A Net $\$ 3.00$

 The NC-800A disk-type neutralizing condenser is suitable for the T40, 35TG, 808 and similar tubes. It is equipped with a clamp for locking. The chart below gives capacity and air gap for different settings.NC-75 $\quad$ Net $\$ 3.60$ For 812, 75 TH and similar tubes.
NC-I 50
Net $\$ 5.25$
For RK36, 100TH, HK354, 250TH, etc.

## NC-500

Net $\$ 8.75$ For WE-25I, 304TH, 833A and the like. These large disk-type neutralizing condensers are for the higher powered tubes. Disks are aluminum, insulation steatite.

## PRECISION CONDENSERS

Originally developed for the famous HRO and NC- 100 receivers, National PW and NPW condensers and drive units are well known to professional and amateur radio men throughout the world. Sturdily constructed of the finest materials and carefully adjusted by skilled hands, they have become "standard specifications" for applications requiring smooth, precise control and high re-set accuracy.
The Micrometer Dial reads direct to one part in 500. Division lines are approximately $1 / 4^{\prime \prime}$ apart. The drive, at the mid-point of the rotor, is through an enclosed preloaded worm gear with 20 to I ratio. Each rotor is individually insulated from the frame, and each has its own individual rotor contact. Stator insulation is steatite. Plate shape is straight-line frequency when the frequency range is $2: 1$.
PW Condensers are available in 1, 2, 3 or 4 sections, in either 160 or 225 mmf per section. Larger capacities cannot be supplied.
PW-IR Single section right Net $\$ 13.50$
PW-IL Single section left Net $\$ 13.50$ PW-2R Double section right Net $\$ 18.00$ PW-2L Double section left Net $\$ 18.00$ PW-2S Single section each side Net $\$ 18.00$
PW-3R Double section right; single left
Net $\$ 24.00$
PW-3L Double section left; single right
Net $\$ 24.00$
PW-4 Double section each side
Net $\$ 27.00$
NPW-3 Three sections, each 225 mmf .
Net $\$ 24.00$
Similar to PW models, except that rotor shaft is perpendicular to panel.
NPW-O
Net $\$ 9.00$
Uses parts similar to the NPW condenser. Drive shaft perpendicular to panel. One TX-9 coupling supplied.
PW-O
Net $\$ 9.90$
Uses parts similar to the PW condenser. Drive shaft parallel to panel. Two TX- 9 couplings supplied.

## PW-D

The Micrometer Dial used on the condensers and drives above is available

separately. It revolves ten times in nished, the driven shaft will revolve covering the complete range and as there is no gear reduction unit fur-
ten times, also. The PW-D dial fits a shaft $5 / 16^{\prime \prime}$ in diameter.

## MULTI-BAND TANK ASSEMBLY

The unique MB-150 Multi-Band Tank tunes all amateur bands from 80 through 10 meters with $180^{\circ}$ rotation of the shaft; the coils are never changed. The unit is built around a circuit which tunes to two harmonically unrelated frequencies at the same time. Thus, it becomes possible to cover a wide frequency range and yet maintain a reasonably constant L/C ratio. $3^{\prime \prime}$ wide $\times 81 / 4^{\prime \prime}$ high (including the GS-10 standoffs) $\times 9^{\prime \prime}$ long overall including the $1 / 4^{\prime \prime}$ dia. shaft and output terminals.
Features of the MB-I50:
(1) For use as the all-band plate tank in push-pull or single-ended stages running up to 150 -watts input ( 1500 volts peak). It is ideal for a pair of 807 s or 809 s or a single 829 B .
(2) Separate link coupling coil has special clips which adjust to match impedances up to 600 ohms directly. Output couples into a higher powered amplifier, an antenna or an antenna tuning network.
(3) Fast band changing is accomplished without hardling coils, thus removing one of the danger points in the amateur station. MB-I50 Multi-Band Tank Assembly

## TYPE EMC

STRAIGHT-LINE WAVELENGTH

TYPE EMC - A general purpose condenser awailable in large izes and having Straight-Line wavelength $p$ ates. They are similar in construction to the TMC Transmitting condenser, and have high efficiency and rugged frambes. Insulation is Steatite, and Peak Voltage Rating is 1000 volts. Same sizes available with straight line capacity plates, type DXC condenser.

ALL WAVE INTERFERENCE FILTER
 These filters are designed to eliminote radio interference coused by small household appliances such as sewing mochines, vocuum cleaners, food mixers and other simifar devices requiring less than 150 watts. Inductive-capacitive circuit assures maximum attenuation of interference.
Dimensions: $21 / 2^{\prime \prime}$ square $\times 4^{\prime \prime}$ long.

| Cot. No. | Volts | Wotts | List Price |
| :---: | :---: | :---: | :---: |
| 7818 | 115 | 150 | $\$ 7.00$ |

APPLIANCE FILTER

Similar to the Cat. No. 7818, except wound with larger wire to be used with all types of plug-in devices with power requirements up to 550 watts.
Dimensions: $21 / 4^{\prime \prime \prime}$ square $\times 4^{\prime \prime}$ long

| Cat. No. | Volts | Wotts | List Price |
| :--- | :--- | :---: | :---: |
| 7815 | 115 | 550 | $\$ 7.00$ |

GENERAL PURPOSE FILTER

This filter is recommended for use with marine and D.C. appliances and rodios. It is also for use with extremely noisy A.C. appliances. A good, permanent connection to ground should be used with this filter. Dimensions: $\mathbf{2 1 / 2 " *}$ square $\times 5^{\prime \prime}$ long.

| Cat. No. | Volts | Watts | List Price |
| :---: | :---: | :---: | :---: |
| 7813 | 115 | 200 | $\$ 7.50$ |

Miller industrial filters are designed for use with all types of radio interference producing devices. Duo-lateral wound chokes and non-inductive condensers result in a high degree of noise attenuation. Completely sealed in metal cases having provision for standard junction boxes at each end of the case.
Dimensions: $9-3 / 42^{\prime \prime} \times 6-1 / 2^{\prime \prime} \times 5^{\prime \prime}$ high. Weight: 16 lbs. Approx.

| Cot. No. | Volts | Amps. | List Price |

| 7844 | 220 | 30 | 37.50 |
| 7845 | 220 | 40 | 40.00 |

## LINE FILTER CHOKES

All Miller line filter chokes are duo-lateral wound on ceramic forms (except \#7825 G cept \# 7825 are on D- 7825 ore on
bakelitel. They bakelitel. They are for installa-
tion in noise protion in noise pro-
ducing equipment such as flasher signs, farm lighting plants, motor generotors, etc. Also used with radio transmitters to prevent r.f. energy feed-back into the power eircuits. Typical circuit diagrams are supplied with each choke. Always select chokes having a current roting ot least as high as the maximum current at loast os high as the maximu
lood of the circuit to be filtered.

## SINGLE LINE FILTER CHOKES

For use in filtering individual and branch circuits.
Dimensions: \#7825 $1-7 / 8^{\prime \prime} \times 1-3 / 4^{\prime \prime}$
Others: $2.1 / 2^{\prime \prime} \times 4^{\prime \prime}$

## LOOP ANTENNA WAVE TRAPS

These traps are designed especially for use with receivers
 having built-in loop antenna. Similar in construction to our Series \#811, except with a separate low inductance winding which is to be connected in series with the loop antenna of the receiver. Slight readjustment of the loop tuning circuit after the trap has been installed is desirable. Trap circuit is parallel connected. Dimensions: $1-3 / 8^{\prime \prime}$ square $\times 1-3 / 4^{\prime \prime}$ high.

## SHIELDED WAVE TRAPS

Parallel resonant wave traps assembled in aluminum shields are well suited for use in older types of radio receivers and in locations where the signal strength of the inferfering station is high in relation to the signal to be received. Screwdriver frequency adjustment from top of shield. Two mounting brackets are attached to the shieid.

## BAND SELECTOR SWITCHES

Miller band switches will make positive noise - free contact through an indefinite period of operation. These switches are positive selfcleaning type with silver plated contacts. Switches have an adjustable stop to be set for your requirements. Single hole mounting through a $3 / 8$ " diameter hole. Supplied with nut and lockwasher. Switches are $1-7 / 8^{\prime \prime}$ diameter.

SLIDE RULE DIALS

Miller Series No. 152 Slide Rule diais are designed for top-of-chassis mounting. The dimension from top of chassis to center of dial shaft bushing is $1-13 / 16^{\prime \prime}$. Dials are supplied with hubs for $3 / 8^{\prime \prime}$ diameter shafts. Two screw type dial light sockets are packed with each dial. The attractive escutcheon plate is finished in antique bronze with a protective lacquer coating. The dial scales are calibrated for use with condensers having counter-clockwise rotation. The escutcheon requires a panel cutout measuring $1-7 / 8^{\prime \prime}$ high by $5-1 / 4^{\prime \prime}$ wide. Dimensions:
6-5/8" wide by $4-1 / 8^{\prime \prime}$ high (plus $1 / 2^{\prime \prime}$ for dial lights), $1 / 4^{\prime \prime}$ diometer shoft extends 1-1/4" beyond front of dial. The dial tuning ratio is approximately $5-1 / 2$ to 1 and the cffective scale length is $4-3 / 8$ ".

MIDGET I.F. TRANSFORMERS
These mica compression tunes intermediate frequency transformers are well suited for use in small receivers of all types. They measure only $1-1 / 8^{\prime \prime}$ square and $2^{\prime \prime}$ high. In spite of their small size, only the highest qual ity of parts and workmanship has been used in the construction of the Miller Midget transtormers.
Dimensions: 1-1/8" square $\times 2^{\prime \prime}$ high.

## PERMEABILITY TUNED TRANSFORMERS

Miller permeability tuned intermediate frequency transformers are recommended for all applications where a high degree of frequency stability and operation under humid conditions are used. The two iron core adjusting screws are accessible from the side of the aluminum shield. These transformers have excellent gain and selectivity characteristics. An internal spring clip prevents
vibration from affecting the adjustment.
Dimensions: l-3/8" square $\times 3-1 / 4^{\prime \prime}$ high.

## SKIP BAND COIL KIT

This new 2-Band coil kit covers the standard Broadcast band and the popular international short wave band. Shielded coils are used throughout. High frequency trimmers are incorporated in the coils. Requires a 2-gang 365 mmfd. tuning condenser

Frequency range: 540-1500/5500-18,000 KC The kit contains the following:
Cot. No. Quantity Item List Price 3997-A 1 Antenna Coil $\$ 3.50$ 3999-C 1 Oscillator Coil 3.50 612-C2 $1 \quad 455$ KC Input I.F. 2.75 612-C4 $1 \quad 455$ KC Output I.F. 2.75 4021 Band Selector Switch 2.50 $161 \quad 1 \quad 400 \mathrm{mmfd}$. TWO BAND COILS

High quality 2-band shielded coils provided with built-in high frequency trimmers, accessible from the top of the shield. Solenoid and universal windings on XXX grade bakelite tubing, thoroughy impregnated against moisture make these coils suitable for marine and tropical use as well as for general home receiver use for use with standard 365 mmfd . tuning condenser.
Dimensions: $\mathbf{1 - 3 / 8 "}$ square $\times \mathbf{3}^{\prime \prime}$ high.

F. M. TUNER KIT

This Kit contains the R.F. components to construct the finest FM tuner for home and professional use Uses 8 miniature tubes in a circuit using cas cade limiters ahead of the discriminator. Requires separate power supply and audio amplifier. The copper plated chassis measures only $7-1 / 2^{\prime \prime}$ deep $\times 8^{\prime \prime}$ wide $\times 2^{\prime \prime}$ high All Miller Ports in the Kit may be purchased separately, if desired.

Frequency Range: 88-108 MC. The Kit contains the following:

## DOWELL TYPECOILS

Single section Litz wound secondary coils wound on $1 / 22^{\prime \prime}$ Dia. lo-loss ceramic dowels, these coils are provided with solder lugs on a bakelite terminal plate and with a $\pm 6-32$ threaded stud for single hole chassis mounting. For use with standard 365 mmfd .

## Progressive

 Products

## The DM-430 Diverse Adaptor

The DM - 430 brings the known benefits of diversity reception to the ham rig A'T LOW COST. The Diverse Adaptor is connected to two antennas of different characteristics, and automatically and instantly selects the best antenna for best reception. The DM-430 minimizes the deep fading which often occurs in HF communications by using two antennas spaced a wavelength or more apart, or of different directional properties or polarization. The DM-430 is ideal for any communications receiver, and is used without tuning.
Range of 3 to 30 Megacycles
Neon bulb indication of antenna being used For AM and FM phone signals and frequencyshift keying
For either or both balanced or unbalanced antennas

Net price assembled $\$ \mathbf{2 9 . 5 0}$ Kit 14.95
For further information write for Bulletin RM-12

## The DM-103W "Slipstick" Wavemeter

The Slipstick gives quick, accurate frequency readings on oscillators, receivers, or transmitters in the UHF field. It is a sturdy, every-day tool for the engineer and experimenter. Use of the 103 W is easy-the Slipstick is coupled to the oscillator, receiver or transmitter by inserting its tip into the rf field, or the antenna circuit.
Enormous range-
90 to 3000 MC
Rapid, direct-reading scale
$2 \%$ accuracy or better; sturdy construction
Polystyrene insulation for permanence and low loss

$$
\text { Net price }{ }^{5} 16.50
$$

A New Tool for Research-

## A New Band for Amateurs

The DM-240A Oscillator leads the way to practical receivers and transmitters on 13 CM . It is made to feed RG-8/U cable directly and uses a 2C40 tube. Precise adjustments control tuning, feedback, and output coupling. Supplied complete with all hardware, instructions, and suggested circuits.
Brass construction with heavy silver plating to assure low if losses
High precision manufacture for concentric contacts Tuning range of 2000 to 2500 MC
One watt output
Net price $\$ \mathbf{1 9 . 5 0}$
(less tube)
For further information write for Bulletin RM-15

## Decals for Electronics . . . the modern way of labeling equipment

The roorld's largest assortment of Decals for Electronies contains over 200 different title plates, dial plates, alphabets and numerals, high-voltage signs in red, call letters in black and gold, and television terms. The De-
 cals are printed in neat, opaque letters on a clear, tough backing. Top surface has a tough protective coating which provides high resistance to wear. Superior adhesive qualities of Decimeter Decals, and the toughness of the backing material, bonds the Decal in place so tightly that danger of peeling or chipping is eliminated.
Water-type "slip-off" decals
Adhere to any clean surface
Very economical to use
Improves appearance and safety of equipment Self-service display assortment for jobbers
For further information write for Bulletin RM-14

TELEVISION - I.F. - ANT. - R.F. - F.M. - OSCILLATOR COILS

## TELEVISION COILS

These components when used in a properly designed circuit can provide a gain of approximately $10,000 \times$ in the picture I.F. amplifier with overall response as illustrated. The sound I.F. system can supply a gain of approximately $7,000 \times$ from the converter grid to the grid of the last I.F. tube and a discriminator slope sensitivity of approximately 0.08 volts/ke. with 1.0 volt signal level at the last I.F. amplifier tube grid. The overall sound I.F. and discriminator response is linear over 150 mc .

## HIGH VOLTAGE COILS

S-928 4.5 Kv. POWER TRANSFORMER-A 4.5 Kv. R. $\mathrm{F}^{2}$. power transformer of high efficiency for use in electrostatic deflection circuits employing a 7" tube. List Price, $\$ 7.50$ S.930 10 Kv. R.F. POWER TRANSFORMERA 10 Kv . R.F. power transformer thoroughly vacuum impregnated for efficient operation. Mechanically designed for "corona-less" performance at full rated designed for corona-less performance at
output.
List Price, $\$ 10.50$

S-948 HIGH VOLTAGE FLYI3ACK-This horizontal output transformer is similar to the R.C.A. No. 211. T1. Used in electromagnetic deflection circuit, it provides approximately 9 Kv . for excellent picture brilliancy in a $10^{\prime \prime}$ or $12^{\prime \prime}$ tube. List Price, $\$ 9.00$ S-968 HORIZONTAL OUTPUT I'RANSFORMER similar to R.C.A. No. 211-T3 (Wired same ns S-948), List Price, $\$ 9.00$

## F.M.

S-605 RATIO DETFCTOR 10.7 me.-To meet the critical demands for a sensitive and unusually stable F.M. detector, the S-605 was developed. Embodying every characteristic of a high quality product, this detector will outperform similar products. A peak to peak band width of 350 kc . with linearity exceeding plus or minus 125 kc. results in unusual quality of audio reproduction. High "Q" iron cores, stable ceramic capacitors plus ceramic construction throughout result in the ultimate for fine $F$.M. reproduction.

List Price, $\$ 3.85$
S-613 MIDGET F.M. RATIO DETECTOR-A 10.7 megacycle midget ratio detector for miniature F.M. set design. Although small in size, its performance is comparable to the larger type. small in size, its performance is comparable to the larger type.
Permeability tuned from top and bottom.

## COILS

S-601 F.M. DISCRIMINATOR-Identical to I.F. electrically and mechanically. The electrically centered secondary results in perfect symmetry between positive and negative peaks. High output and excellent discrimination are obtained. A high quality transformer for production or replacement. List Price, \$3.65 S-609 F.M. CHOKE-An excelent parasitic in the oscillator plate circuit.

List Price, $\$ 0.10$ S-614 MIDGET F.M. I.F.-High performance in gain and band width is obtained with this high quality F.M. miniature I.F. Symmetrical wave shape is a result of correct $L / C$ Ratio. High "Q" threaded iron cores and high "Q" silver mica capacitors make this a much desired I.F. for modern F.M. set design.

List Price, $\$ 2.10$

# d <br> B. F. TOPHEON Compant wsen <br> VARIABLE CONDENSERS 

4nistorn

JOHNSON C and D condensers are sturdily constructed to give trouble-free operation under the most severe service. Only the finest materials are employed yet these units are lower in price than any other quality condensers.
All dual models have center rotor connections, to insure balanced operation at ultra-high frequencies. Heavy laminated phosphor bronze contact springs insure low resistance circuits

Important features include: Heaviest aluminum plates of any similar condenser, .051'" thick-Steatite insulation-Large laminated rotor brushes-Center rotor contacts on all dual con-densers-Heavy 5/16" diameter aluminum tie rods for frame strength and rigidity-1/4" cadmium-plated steel shatts.

Supplied with single hole mounting brackets which fit either top or bottom of end plate so that stators may be mounted to top or bottom as preferred.

Panel space, Type C. $51 / 2^{\prime \prime}$ wide $x 53 / 8^{\prime \prime}$ high panel space, Type $D, 41 / 4^{\prime \prime}$ wide $\times 4^{\prime \prime}$ high.

Mounting (M) dimension, on both C and D Types, $7 / 8^{\prime \prime}$ more than $L$ dimension.

TYPES E AND F

Designed as rugged, compact units for medium and low power transmitters, type $E$ and $F$ condensers are in a class by themselves. They have more capacity per cubic inch and occupy less panel space for their rating than any other condenser on the market. Their rapid adoption by manufacturers of high grade equipment and discriminating amateurs is ample proof of their excellence.
Points of superiority: Heavy aluminum plates, $032^{\prime \prime}$ thick, with rounded edges for maximum voltage rating-Heavy aluminum tie rods $1 / 4^{\prime \prime}$ diameter for frame strength and rigidity-Steatite insulation-Stator mounted above to reduce capacity to ground-heavy phosphor bronze contact springs, cadmium plated -Center contact on dual models-Chassis or panel mountingStainless steel shatts
In addition to mounting foot shown, removable single hole brackets are furnished so that condenser may be inverted from position shown, or other components mounted above.

Panel space, Type E, $25 / 8^{\prime \prime}$ wide $\times 23^{\circ " 4}$ high panel space, Type $F, 2{ }^{1}{ }^{\prime \prime}$ wide $\times 2^{\prime \prime}$ high. Mounting ( $M$ ) dimension, on both $E$ and $F$ Types, $\mathrm{T}^{7}$ " more than 1 dimension.

DEPARTURES FROM STANDARD
Special plate spacings, capacities, shaft extensions, insulation, mounting brackets, terminals, etc., can be furnished to specifica tions for commercial applications.

CONDENSERS FOR HIGHER VOLTAGES
The IOHNSON line includes heavy duty pressurized or air dielectric fixed and variable condensers for high voltage commercial applications. Data sheets furnished on request.

# TYPE H CONDENSER <br>  

Two End Plates Single End Plate
The Type $H$ condenser was designed for aircraft transmitters and combines a minimum of weight and size with simple but rugged construction．Capacities and spacings are provided for low and medium power stages．Use of steatite for end plates avoids any possibility of＂short circuit loops＂and permits panel mounting with both rotor and stator insulated from ground．Has aluminum plates $020^{\prime \prime}$ thick．End plate $11 / 2^{\prime \prime}$ square．Capacity measure－ ments are taken with condenser in position shown above．
Mounting（M）dimension is＂more than the L dimension．

NEW JOHNSON TYPE L VARIABLES

## （167 Serios）

Ceramic Soldered for Stability，Strength With the intro－ duction of this new line of dir variables， brings many important de． sign advan tages never
before avail．
 able．
Outstanding of these is the use of per－ fected ceramic soldering which assures absolute－and permanent－rigidity and strength，absolute－and perma－ nent－maintenance of capacities！
There are no eyelets，nuts or screws to work loose，causing stator wobbe and fluctuations in capacity．JOHNSON ceramic soldering leaves a bond which is stronger than the rugged steatite end plates themselves．There＇s nothing to come loose，because the stator termi－ nals，mounting posts and rotor bearings are ceramic soldered！

Silent operation on the highest fre－ quencies is assured with a split sleeve tension bearing that also prevents fluc－ uations in capacity
These new variables are ideal for peak efficiency even under the severest conditions，such as portable－mobile operation．

Two sets of stator contacts are provided for connecting com－ ponents to either side of condenser without appreciably increas－ ing inductance of the circuit．New bright alloy plating is used． It has high corrosion resistance and possesses lower electrical resistance than other common platings．
Mounting（ $M$ ）dimension is $1 / 4^{\prime \prime}$ more than the L dimension －Other capacities and spacings avallable on special order

TYPE I CONDENSER

The Type $J$ condenser is a midget with big condenser charac－ teristics．It has wider spacing than most small types，yet occupies little more space and is ideal for oscillator and low power stages．The spacing is ． $025^{\prime \prime}$ and universal type mounting brackets make possible a variety of mountings including chassis panel，or insida tuba socket type inductors．Steatite end plate is $11 / 8^{\prime \prime}$ wide．

## EXPLANATION OF TYPE NUMBERS

The first part of the type number indicates the capacity per sec－ tion in mmfd．The following letter indicates the frame size or type．A second letter $D$ indicates a two section type．The final number multiplied by 100 is the approximate peak breakdown voltage．Capacity measurements of the $E$ and $F$ types are made with the condensers in the position shown in the above illustra－ tion．The $C$ and $D$ types are measured in inverted position．

TYPE G CONDENSER

The Type $G$ condenser is extremely popular as a neutralizing condenser for medium and low power stages．It is also widely used for grid and plate tuning at high and ultra－high frequen－ cies．A wide range of capacities and spacing make it adaptable to many applications．It has a single end plate of steatite and low minimum capacity．．032＂rounded aluminum plates，univer－ sal mounting bracket locking nut，and front and rear shaft exten－ sal mounting bracket locking nut，and
sion are among outstanding features．

## 104－259

All JOHNSON insulated shaft couplings are characterized by best steatite insulation properly proportioned for electrical and mechanical strength，by accurate metal parts heavily plated，by advanced design，and by skillful manufacture
The phosphor bronze springs of the -250 and -251 series coup－ ings provide flexibility without backlash and adjust to minor haft misalignments．Rigid types $-252,-262$ and -261 meet the re quirements of accurate shaft alignment and high torque．
The -259 and -2593 are bar type couplings recommended for high voltages or very high Irequencies
The -264 is a small bakelite insulated flexible coupling for DC or low voltage $R F$ applications．

## NEW JOHNSON AIR-WOUND HAM INDUCTORS

## A Coil to Match Your Tube -

 A Link to Match Your LineThere are two models for most bands for use with either high voltage low current, or low voltage high current tubes.

With these new JOHNSON Ham Inductors and "plug-in" Swinging Link Assemblies the amateur can instantly match coil to tube - link to line. These outstanding inductors are also available in semifixed models.

Heavier Windings on All Models
Efficiency is further increased because coil windings are a wire-size larger than on most available in-
ductors - resulting in less heating, lower loss and consequently higher efficiency.
The new JOHNSON Inductors and "plug-in" Link Assemblies fit all conventional inductor assemblies.

HCS - Inductors match high voltage, low current tubes - swinging link type.
LCS-Inductors match low voltage, high current tubes -- swinging hink type.
HCF-Inductors match high voltage, low current tubes - semi-fixed link.
L.CF-Inductors match low voltage, high current tubes - semi-fixed link.

## TUBE CAP CONNECTORS

Collet types, numbers 119-838 through 119-841 are recommended for heavy current industrial uses. The outside diameter is $7 / 8^{\prime \prime}$ and connector may be tightened with spanner wrench listed below. The 119-843 is a part of the $124-212$ socket for $833 \AA$ tubes and is recommended for other tubes having . $567^{\prime \prime}$ diameter caps and requiring radiator type connectors for high R.F. currents. The flexible strap is $51 / 8^{\prime \prime}$ long and $5 / 3^{\prime \prime}$ wide.

## EDGEWISE WOUND "HI-Q" INDUCTORS

Design improvements and mycalex insulation are new features in this inductor of plated edge-wound copper strip. They are widely used in commercial equipment, and will safely handle more than 1000 watts in continuous service. Other sizes and types of inductors are manufactured for commercial broadcast and industrial electronic applications. More information available on request.

INSULATORS AND BUSHINGS

JOHNSON insulators were introduced in the early twenties，and soon established the sort of dominance that occurs occasionally when one line offers more in choice of style and size；in advanced but practical design；and in mass production economy than others－ This position has been maintained through the years by careful attention to the product，the line，and the needs of the user．
JOHNSON insulators are specifically designed for high fre－ quencies．Insulating materials were selected after exhcustive labo－ ratory tests．Superior grade，low absorption，well glazed electrical porcelain，and Grade L 4 or better steatite are used．

STAND－OFF AND CONE

## INSULATORS

The stand－off insulators feature heavy， breakage－resistant bases and adequate glaze grooves around mounting screw holes．Numbers 135－65，135－66，135－67 and 135－68 have unbreakable，drawn and etched aluminum bases．

The No． 500 cone insulator series are

135－866，－867 135－865

teatite for better high frequency in－ sulation．Threads are tapped directly sulation．Threads are tapped directly nto the ceramic．Furnished complete with machine screws，brass and cushion washers．

| $\mathbf{1 3 5 - 8 6 7}$ | .20 | $135-67$ |

## FEED．THRU BOWI

Glass bowl $7^{\prime \prime}$ diam．by $43 / 8^{\prime \prime}$ deep． Flange $73 / 4^{\prime \prime}$ O．D．
Furnished with cork gaskets．135－15－1 is single with $101 / 4^{\prime \prime}$ ．stud． $135-15-3$ is double with $16^{\prime \prime}$ stud．135－15－7 is double with $24^{\prime \prime}$ stud．

| Cat．No． | List Price |  |
| :---: | :---: | :---: |
| $135-15-1$ | $\$ 17.00$ | Single bowl |
| $135-15-3$ | 30.00 | Double bowl |
| $135-15.7$ | 3100 | Double bowl |

Of the insulators appearing under the headings＂Steatife＂all but the 500 series and the $135-55$ are offered in this finer material for the first time．Their dielectric losses are but a fraction of those for the same parts in porcelain，and they are particularly recommended for high frequency work．

In addition to fine quality insulating materials the JOHNSON line distinguishes itself with perfection of ceramic design logeial proportions；clean－cut，accurate molding；and high grade nickel－ plated brass hardware，with milled（not stamped）nuts．

THRU－PANEL INSULATORS AND BUSHINGS

In the thru－panel and bushing series special attention has been given to obtaining high mechanical strength through heavier construction and at the same time increasing the breakdown voltage．Flat mounting surfaces with cushion washers eliminate breakage． Bottom pieces have long internal and external portions for higher breakdown volage rating，and grooved surfaces to increase leakage path．Jack types have terminals permitting connection above as well as below the panel．

JOHNSON lead－in bushings are de－ signed to have even greater mechanical strength and long leakage path in pro－ portion to size．Numbers 135－53 and 135－54 are supplied as single porcelain parts including cushion washers．
Nos．135－50 and 135－55 are steatite and have a special interlocking feature which permits mounting on thin panels without extra spacing washers．
Nos．20，20J，22，22J and 24 are now also steatite with heavily plated brass hardware．

# RADIO CABINETS 

## A Host of Features <br> Aluminum for Lightness

Steel for Strength
These new JOHNSON cabinets represent the first real advance in cabinet design since the introduction of the first Amatour relay panel cabinet years ago. JOHNSON'S extensive "know-how" and panel cabinet years ago. Joloped during more than ten years of production factities developed arabinets for Broadcast Phasing Equipment and Transmitters, is now being applied to the design and manufacture of these superb Amateur cabinets

## FLOOR MODELS - <br> REAR DOOR ONLY

They feature unique adjustable rails for standard relay panels. These rails may be moved forward or backward to suit the user making vertical chassis construction practical by allowing addi tional room at the front for mounting some components so they project forward. Later a DeLuxe door will be available to allow full use of this feature. Present cabinets are arranged so that the door may be added at any time. Both vertical panel construction and front doors are widely used commercially, and now for the first time these features are offered to the Amateur at Amateur prices.
Other exclusive features include recessed toe spaces at front and sides; inside ventilation with inlets in the botinside ventilation and outlets in the tom of lowing cabinets to be placed top, anly wing cabiner obe pithout directiy agams orculation and rerestriching the cir (may be installed to versible rear door (may be installed to
hinge either way) with positive handle hing
Side panels and rear doors are constructed of heavy ( $.051^{\prime \prime}$ ) aluminum for lightness, and sturdy steel frames, tops and botioms for strength. Rails for panels tapped for 10-32 screws and will accommodate either Amateur or Western Electric notching. Shipped knockeddown for your convenience and to save you freight charges; easily assembled in a few minutes with screws and nuts, no self-tapping screws. Available in elther fine black wrinkle outside and flat satin black inside or a beautiful silver gray (no purple) outside with a matching flat gray inside.

197-103-3

TABLE MODELS - TOP DOOR ONLY
More than mere cabinets, these JOHNSON units aro superbly engineered as fine pieces of equipment. Built for a life-time of hard usage and handsomely styled to be in keeping with the most expensive apparatus. All lightness, heavy 064" metal hghtness, heavy 064 metal or strengt. Rans for attach ing parel are double thick. ness, tapped for $10-32$ screws and on universal centers for either Amateur or Western Electric notched panels. Graceully rounded top and front corners add to appearance and rugged mechanical strength. Opening at the bottom rear for attachment of plugs and cables to the chassis, also pro vides ventilation which is com pleted through inside baffles

197-111-3 in the sides near the top
Shipped knocked-down for your convenience and to save you reiaht charges, easily assembled in a few minutes with screws and nuts, not self-tapping screws. Available in either fine black rinkle outside and flat satin black inside or a beautiful silver gray ((not purple) outside with a matching flat gray inside.

## ANTENNA INDUCTORS

## TYPES TA AND HDA

Wound with tinned copper wire zor ease in tapping feeders to coils. Equipped with fixed center links for coupling to either fixed or sariable linked final tank circuits through a low impedance line. Two tinned clips come with cach coil. TYPE TA COILS for power input up to 500 watts, TYPE IIDA COILS for power inputs of one kilowatt.

## TYPE TVH INDUCTORS

For Powers up to 500 Watts Input
A special group of units with eight contact plug bars which gives greater flexibility than otherwise possiblc.

SPECIFICATIONS

*Actual condenser capacity will he smaller by the sum of the tube
output and wiring capacities, generally between 5 and 20 mmfd.

## JUNIOR INDUCTORS

For Powers UP to 75 Watts Input Fitted with standard five-prong steatite base. Small size for compact construction. May be used in the oscillator, buffer or final amplifier stage with input powers up to 75 watts and plate voltages up to 850. Three different assemblies provided, any of which may be used in capacitycoupled circuits by omitting connection to the links. AMATEUR NET
$\$ 1.38$ ea.

SPECIFICATIONS

Actual condenser capacity will be smaller by the sum of the tube
output and wiring capacities, generally between 5 and 20 mmfd.

## B \& W TURRET ASSEMBLIES

Makes possible fast, positive band switching. Unique switching assembly allows unused coils to be shorted, thus eliminating alsorption effects. All units cover 80, 40, 20, 15 and 10 meter bands. B \& W 75 WATT 2A "BAND HOPPERS' Uses same coil design as B \& W Juniors. Unusually compact panel controlled unit. It may be used for interstage coupling between two beam power tubes or between beam power tubes and triodes.
Stock No. 3121
B \& W 75-WATT TURRETS--provide meanateur Net $\$ 4.81$ single ended or push-pull low power stages. Complete coupling mounted on a positive action switch arranged for panel mounting mourgh a singe $3 /$ " Turrets may be used with tube operating at voltages up to 850 . Stock No. 3810-Type JTCL-Center Iinked, center tapped coils. Amateur Net $\$ 9.38$ Stock No. 3811-'Yype JTEL-End linked, untapped coils.

Amateur Net $\$ 9.38$ B \& W 150-WATT TURRETS-Supplied in hoth center and end link models for both single- and double-ended circuits. Operation is ly a positive action switch arranged for panel mounting through a single $3 / 8$ " hole. Turrets may be used with tubes operating at voltages up to 1000 volts.
Stock No. 3812-Type 13CL-Center linked, center tapped coils. Amateur Net $\$ 11.69$ Stock No. 3813-Type BEL-End linked, untapped coils.

Amatour Net \$11.69

## 3400 SERIES INDUCTORS

FOR POWERS UP TO 500 WATTS Give the utmost in sturdy construction and fectrical flexibility. Same as those supplied y B \& $W$ to the armed forces during the war. Each coil has an individual internal center couplinur, adjustable over 360-permitting pre-
 cise impedance matching up to 600 ohms, thus providing flexibility ar in excess of any installation requirements.

$$

Swinging Link Assemblies

For Type HDV

Above are standard. Other turns available on request.

## B \& W FREQUENCY MULTIPLIER

Price: $\$ 85.00$ Amateur Net. Complete with tubes. Dimensions: $61 / 2^{\prime \prime} \times 7^{\prime \prime} \times 93 / 4^{\prime \prime}$.

This B \& W all-band frequency multiplier solves the difficult problem of leveloping frequency step-up stages. Tackaged unit covers 80-40-20-15-11 and 10 meter bands. Just flip a switch on the attractive reverse
etched aluminum panel plate, to get etched aluminum panel plate, to get VFO or Crystal input and not less than 25 watt output.

## B\&W SINE WAVECLIPPER

 Model 250Equipped with a pair of input terminals, a pair of output terminals, ar output volume control and a selector switch.

Net Price: $\$ 10.00$.
Dimensions: $2^{\prime \prime} \times 4^{\prime \prime} \times 51 / 2^{\prime \prime}$.
Sl'eeds accurate analysis of audio circuits. SIMPLIFIES SELECTIONS OF COMPONENTS. SAVES VALUABLE TIME. Here's an instrument that will do most of the jobs usually assigned to a square wave generator costing alout 10 times as much! The B\&W Sine Wave Clipper provides a test signal particularly useful in examining the transient and frequency response of audio circuits. Designed to be driven hy an audio oscillator, the clipper provides a clipped sine wave - hence the name "Sine Wave Clipper." Used in engineering work, repairs, or with equipment under development, it will quickly pay for itself many times over.

## B\&W FREQUENCY METER

Model $\mathbf{3 0 0}$ Net Price: $\$ 105.00$. Dimenslons: $\quad 133 / 4^{\prime \prime}$
$\times 71 / 4^{\prime \prime}$
$\times \quad 912^{\prime \prime}$.
An accurate and convenient means of making direct measurements of anknown audio frequencies up to
gupply. Extremely useful for routine checking of audio oscilatora or supply. Extremey useful for routine checking of audio oscishators or tone generators. Housed in an attractive black

## FEATURES

Frequency Range: 20 to 30,000 cycles in 6 ranges.
Sensitivity: minimum .5 volts input.
Wave Form: will operate on any wave form with peak ratios of

Calibration: when referenced against 60 cycle line frequency, all other frequencies will fall within $2 \%$.

B \& W NEW, SMALL BUTTERFLY VARIABLE OCAPACITORS

Now - the popular B \& W split
stator, butterfly type of variable condenser construction has been adapted to small, compact units for general ham and other uses! Ilaving just $25 \%$ of the frontal area of CX types, these new B \& W JCX Variable Capaciturs are ideal for medium powered triode or tetrode stage plate circuit applications.

Feuturing stainless steel shafts, heavy rounded aluminum plates and high quality insulating materials, the $13 \& W$ Midget Butterfly will be a welcome addition for the amateur who is looking for peak efficiency in low and medium power transmitter stages.

## B\&W AUDIO OSCILLATOR

Model 200
Net Price: $\$ 115.00$.
Dimensions: $133 / 4^{\prime \prime} \times 71 / 4^{\prime \prime} \times 91 / 2^{\prime \prime}$
Ideal for use in distortion measurements, frequency measurements or in any upplication where a stable, ac-

curately calibrated source of frequencies hetween 30 and 30,000 cycles is required. No zero reset or line callibation is required. Self-contained power supply. Housed in an altractive hlack crackle finished steel cabinet with carrying handle and rubber feet. Panel is of $1^{\frac{1}{2}}{ }^{\prime \prime}$ reverse etched aluminum.

FEATURES
Voltage Output:
12.5 volts open circuit.
proximately $.5 \%$ on all fre11 rolts output on 500 ohm load.
Wave Form: RMS harmonics at 5 volts output on 500 ohm load, less than $1 \%$. On open
circuit ( $10,000 \mathrm{ohms}$ up) apquencies between 50 and Frequency Response: better than $\pm 1$ D. Is. from 30 to 30,000 cycles.
Stability: better than $1 \%$.

## B\&W DISTORTION METER

Model 400
Net Price: $\$ 140.00$.
Dimensions: $\quad 133 / 4^{\text {it }}$
$\times 71 / 4^{\prime \prime} \times 91 / 2^{\prime \prime}$.
A sensitive instrument having a wide range of applications in the andio frequency meas-

uring low level audio voltage and determining noise and harmonic content of sume. Variable frequency selective filter provides a single frequency suppression circuit for the frequency range of 50 to 15.000 cycles. Small size. light weight and outstanding performance make this instrument an ideal unit for either laboratory or field work.

1. Frequency Range: $F E A T \cup R E S$
(a) Diatortion meter. For fundamentals from 50 to 15,000 cycles, measuring harmonics up to 45,000
cycles. meter from 30 to 30,000 cycles.
2. Sensitivity:
(a) Noise and distottion
measurements, minimum in-
put . 3 volts.
(b) Voltmeter, full scale readings of $.3, .1, .03, .01$, .003 volts.
3. Calibration:

For distortion measurenients: $\pm 10 \%$.
For noise measurements: $\pm 1$
For voltage measurements:

#  M A L DEN <br> M A S S A CH USETTS 

## SECONDARY FREQUENCY

## STANDARD

A precision frequency standard for both laberatory and production uses, adiustable output, pravised at intervals of $10,25,100$ and 1000 kc , with magnitude use'ul to 50 mc . Harmonic amplifier with tuned plate circuit and panel range switch. 800 cycle modulator with panel control switch. In addition to oscillators, multivibrators, modulators and omplifiers, a built-in detector with phone iack and gain control is incorporated. Self-contained power supply.
Model 90505, with tubes
$\$ 155.00$

## ABSORPTION WAVEMETERS

The 90600 series of obsorption wavemeters are available in several styles and many di-ferent ranges. Mest popular is kit of four units, covering range of 3.0 to 140 mc .
Model 90600
$\$ 18.00$

## FREQUENCY CALIBRATORS

The covity type frequency calibrotor covers o ronge of 200 to 700 mc ., with a moximum error of not over $0.25 \%$. This ronge is covered by two plug-in covity type tuning units, which may be easily interchonged. The colibrator consists of on accurotely colibroted covity-type funing unit, o crystal detector, o two-stoge video amplifier ond a peak reading VT voltmeter.
Model 90630, with tubes.
$\$ 375.00$

## LABORATORY SYNCHROSCOPES

The $5^{\prime \prime}$ losoratory synchroscopes ore availoble with ond without detector-video strips.
Model P-4-2, with tuber . . . . . . . . . . . . $\$ 350.00$ Model P.4E-2. with tubes

## MINIATURE SYNCHROSCOPE

The compoct design of the No. 90952, measuring only $71^{\prime \prime} \times 558^{\prime \prime} \times 13^{\prime \prime}$, and weighing only 17 Ibs., makes availoble for the first time a truly DESIGNED FOR APPLICATION "field service Synchroscope.
No. 90952, with tubes.
$\$ 375.00$

## CATHODE RAY OSCILLOSCOPES

The No. 90902 , No. 90903 and No. 90905 Rock Panel Oscillascopes, for two, three ond five inch tubes, respectively, are inexpensive basic units comprising power supply, brilliancy ond center ing controls, sofety features, mognetic shielding, tional equipment tronsmitter more required The tional equipment or occessories are required. The well-known rapezidol mong pied secured by feeding modulated corrier voltoge from o pickup loop directly verticol plates of the cothode ray ube and audio modulim oge to horizontal plates. By the addition of such units os sweeps, pulse generotors, omplifiers, servo sweeps, etc., oll of which can be conveniently and neatly constructed on companion rack panels, the originol bosic 'scope unit may be expanded to serve any conceivoble industrial or loboratory application.
No. 90902, less tuber. . . . . . . . . . . . . . . . \$ 42.50 No. 90903 , less tubes. . . . . . . . . . . . . . . 49.50 No. 90905 , less tubes................. 110.00
'SCOPE AMPLIFIER - SWEEP UNIT
Vertical one horizontol omplitiers olong with hard tube, saw tooth sweep generotor. Complete with power supply mounted on a stondord $51 / 4^{\prime \prime}$ rock ponel.
No. 90921 , with qubes. . . . . . . . . . . . . . $\$ 75.00$

## REGULATED POWER SUPPLIES

A compact, uncosed, regulated power supply, either for table use in the laboratory or for in corporotion as an integrol part of larger equipments. 50 watts, with regulated voltoge from 0 to 200 volts.
Model 90201 , less tubes. . . . . . . . . . . . $\$ 100.00$

#  MALDEN OMASSSACHUSETTS 

$9 \times 101$

SCOM

## R9'er MATCHING PREAMPLIFIER

The Millen 92101 is an electronic impedance matching device and a broad-band preamplifier combined into a single unis, designed primarily for operation on 6 and 10 meters. Coils for 20 meter band also available.
No. 92101 , less tubes.
$\$ 24.75$

## SINGLE SIDEBAND SELECTOR

The No. 92105 is designed to permit Single Sideband Selection with existing receivers. Full technical details in April 1948 QST. Produced in cooperation and under exclusive U. S. patent license $(2,364,863$ and others) with the J. L. A. Mclaughlin Research Laboratories.
No. 92105 , with tubes and crystals. . . . $\$ 75.00$

## FREQUENCY SHIFTER

A favorite frequency shifter, plugs in, in place of crystal, for instant finger-tip control of carrier frequency. Low drift, chirpless keying, vibration immune, big band spread, accurate calibration. Model 90700, with tubes. . . . . . . . . . . . $\$ 42.50$

## VARIABLE FREQUENCY OSCILLATOR

The No. 90711 is o complete transmitter control unit with 6SK7 temperature-compensated, electron coupled oscillator of exceptional stability and low drift, a 6SK7 broad-band buffer or frequency doubler, a 6A67 tuned amplifier which tracks with the oscillator tuning, and a regulated power supply. Output sufficient to drive an 807 is cuailable on 160,80 and 40 meters and reduced output is available on 20 meters. Close frequency setting is obtained by means of the vernier control arm at the right of the dial. Since the output is isolated from the oscillator by two stages, zero frequency shift occurs when the output load is varied from open circuit to short circuit. The entire unit is unusually solidly built so that no frequency shift occurs due to vibration. The keying is clean and free from all annoying chirp, quick drift, jump, and similar difficulties often encountered in keying variable frequency oseillators.
No. 90711 , with tubes. . . . . . . . . . . . . $\$ 89.75$

## 50 WATT TRANSMITTER

Based on an original Handbook design, this flexible unit is ideal for either low power amateur band transmitter use or as an exciter for high power PA stages.
Model 90800, less tubes. . . . . . . . . . . . $\$ 42.50$

OCTAL BASE AND SHIELD
Low loss phenolic base with octal socket plug and aluminum shield can $17 / 16 \times 17 / 1 \times 3^{15 / 16}$. No. 74400. $\$ .75$

## TRANSMISSION LINE PLUG

An inexpensive, compact, and efficient polyethylene unit for use with the 300 ohm ribbon type polyethylene transmission lines. Fits into standard Millen No. 33102 (crystal) socket. Pin spacing $1 / 2^{\prime \prime}$, diameter . $095^{\prime \prime}$
No. 37412
$\$ .21$

## PERMEABILITY TUNED CERAMIC

## FORMS

In addition to the popular shielded plug-in permeability tuned forms, 74000 series, the 69040 series of ceramic permeability tuned unshielded forms are available as standard stock items. Winding diameters and lengths of winding space Winding diameters and lengths of winding space are $\times 1 / 37 \times 7 / 32$ for $6945-2 ; 1 / 4 \times 3 / 2$ for 69043.
$1 / 2 \times 1 / 16$ for $69045-6 ; 16 \times 3 / 16$ for 69044 .

## INSTRUMENT DIALS

The No. 10030 is on extremely sturdy instrument type indicotor. Control shoft hos 1 to 1 rotio. Veeder type counter is direct reoding in 99 revolutions and vernier scale permits reodings to 1 port in 100 of a single revalution. Has built-in diol lock and $1 / 4^{1 \prime}$ drive shaft coupling. May be used with multi-revolution tronsmitter controls, etc., or through geor reduction mechonism for control of fractiona revalution copacitors, etc., in receivers or loboratory instruments.
The No. 10035 illuminated ponel dial hos 12 to 1 ratio; size, $81 / 2^{\prime \prime} \times 61 / 2^{\prime \prime}$. Small No. 10039 hos 8 to 1 ratio; size, $4^{\prime \prime} \times 31 / 4^{\prime \prime}$. Both are of compoct mechanical design, easy to mount and have totolly self-contained mechanism, thus eliminating buck of panel interference. Provision for mounting and marking auxiliary controls, such os switches, po-
fentiometers, efc., provided on the No. 10035 . tentiometers, etc., provided on the No. 10035 Standard finish, either size, flat black art metol. No. 10039 No. 10035
$\$ 2.70$
6.00 No. 10030
25.00

## DIALS AND KNOBS

Just a few of the many stock types of small diols and knobs ore illustrated herewith. 10007 is $15 / /^{\prime \prime}$ diameter, 10009 is $21 / 2^{\prime \prime}$ ond 10008 is $31 / 2^{\prime \prime}$; 60 No. 10007
$\$ .00$ No. 10008
. 85
No. 10009
No. 10065

## PANEL MARKING TRANSFERS

The pancl morking transfers hove $1 / s^{\prime \prime}$ block letters. Special solution furnished. Must not be used with water. Equally satisfactory on smooth or wrinkle finished zonels or chassis. Ample supply of every popular word or morking required for amoteur or commerciol equipment.
No. 59001 , white letters.
$\$ 1.25$ No. 59002, block letters.

## HIGH FREQUENCY TRANSMITTER

The No. 90810 crystal control transmitter provides 75 watt output (higher output may be obtoined by the use of forced cooling) on the 20, 10-11, 6 and 2 meter amateur bands. Provisions are mode for quick bond shift by meons of the new 48000 series high frequency plug-in coils.
No. 90810 , less tubes and crystols
$\$ 69.75$

## HIGH FREQUENCY RF AMPLIFIER

A physiccily smoll unit copoble of o power output of 70 to 85 watts on 'phone or 87 to 110 wotts on C-W on $20,15,11,10,6$ or 2 meter omoteur bands. Provision is made for quick band shift by means of the new Na. 48000 series VHF plug-in coils. The No. 90811 unit uses either on 829-B or 3 E29.
No. 90811 with 10 meter bond coils, less
tube. . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 33.00$

## HIGH VOLTAGE POWER SUPPLY

The No. 90281 high voltage power supply has a d.c. output of 700 volts, with maximum current of 250 ma . In addition, a.c. filoment power of 6.3 volts at 4 amperes is also avoiloble so thot this power supply is on ideal unit for use with transmitters, such as the Millen No. 90800 , as well as general laborotory purposes. The power supply uses two No. 816 rectifiers and has a two section pi filter with mfd, bank of 1000 volt General Electric Pyranol capacitors. The ponel is standard $83 / /^{\prime \prime} \times 19^{\prime \prime}$ rack mounting.
No. 90281 , less fubes.
$\$ 84.50$

## RF POWER AMPLIFIER

This 500 watt amplifier moy be used os the bosis of a high power amateur tronsmitter or os a meons for increosing the power output of an existing tronsmitter. As shipped from the factory, the No. 90881 RF power amplifier is wired for use with the popular RCA ar C.E. "812" type tubes, but adequate instructions are furnished for reodjusting for aperation with such other popular amateur style tronsmitting tubes as Taylor T240, Eimac 35T, etc. The omplifier is of unusually sturdy mechonicol construction, on a $101 / 2^{\prime \prime}$ relay rack panel. Plug-in inductors ore furnished for operation on 10, 20, 40 or 80 meter amateur bands. The standard Millen No. 90800 exciter unit is an ideal driver for the new No. 90881 RF pawer amplifier.
No. 90881 , with one set of coils, but less
tubes

## SHAFT LOCKS

In addition to the original No. 10060 and No 10061 "DESIGNED FOR APPLICATION" shaft locks we can also furnish such variations as the No. 10062 and No. 10063 for easy thumb operation as illustroted above. The Na. 10061 instantly converts any plain " "1/4 shaft" volume control, condenser, etc. in place of requ "shaft locked" type. Each ta mount in place of regular mounting nut.
Na. 10060
$\$ .36$
No. 10061
No. 10063

## TRANSMITTING TANK COILS

A full line-all popular wattages for all bands. Send for special catalog.

## DIAL LOCK

Compact, easy to mount, positive in action, does not alter dial setting in operation! Rotation of knob " $A$ " depresses finger " $B$ " and " $C$ " without imparting any rotary motion to Dial. Single hole mounted. No. 10050 ............................... $\$ .45$

## RIGHT ANGLE DRIVE

Extremely compact, with provisions for many methods of mounting. Ideal for operating potentiometers, switches, efc., that must be located, for short leads, in remote parts of chassis.
No. 10012 . . . . . . . . . . . . . . . . . . . . . . . . . \$3.75

## THRU-BUSHING

Efficient, compact, easy to use and neat appearing. Fits $1 / 4$ " hole in chassis. Held in place with a drop o solder or a "nick" from a crimping tool.
No. 32150.
$\$ .05$

## FLEXIBLE COUPLINGS

The No. 39000 series of Millen "Designed for Application" flexible coupling units include, in addition to improved versions of the conventional types, also such exclusive original designs as the No. 39001 action" universa loint and the N. 39006 slideaction coupling (in both steatite and bakelite

The No. 39006 "slide-action" coupling permits longitudinal shaft motion, eccentric shaft motion and out-of-line operation, as well as ongular drive without backlash.
The No. 39005 is similar to the Na. 39001, but is not insulated and is designed for applications where relotively high torque is required. The steatite insulated No. 39001 has a special anti-backlash pivot and socket grip feature, All of the above illustrated units are for $1 / 4^{\prime \prime}$ shoft and are standard production type units.

## TUBE SOCKETS

## DESIGNED FOR APPLICATION

MODERN SOCKETS for MODERN TUBES! Long Flashover path to chassis permits use with transmitting tubes, 866 rectifiers, etc. Long leakage path between contacts. Contacts are type proven by hundreds of millions already in government, commercial and broadcast service, to be extremely dependable. Sockets may be mounted either with or without metal flange. Mounts in standard size chassis hole. All types hove barrier between contacts and chassis. All but actal and crystal sockets also have barriers between individual contacts in addition.
The No. 33888 shield is for use with the 33008 octal socket. By its use, the electrostatic isolation of the grid and plate circuits of single-ended metal tubes can be increased to secure greater stability and gain.
The 33087 tube clamp is easy to use, easy to install, effective in function. Available in special sizes for all types of tubes. Single hole mounting. Spring steel, cadmium plated.
Cavity Socket Contact Discs, 33446 are for use with the "Lighthouse" ultra high frequency tube. This set consists of three different size unhardened beryllium copper multifinger contact discs. Heat treating instructions forwarded with ecch kit for hardening ofter spinning or forming to frequency requirements.
Voltage regulator dual contact bayonet socket, 33991 black Bakelite insulation and 33992 with low loss high leokage mica filled Bakelite insulation.

## 04000 and 11000 SERIES TRANSMITTING CONDENSERS

A new member of the "Designed for Application" series of transmitting variable air capacitors is the 04000 series with peak voltage ratings of 3000,6000 , and 9000 volts. Right angle drive, 1-1 ratio. Adjustable drive shaft angle for either vertical or sloping panels. Sturdy construction, thick, roundedged, polished aluminum plates with $13 / 4^{\prime \prime}$ radius. Constant impedance, heavy current, multiple finger rotor contactor of new design. Available in all normal capacities.
The 11000 series has $16 / 1$ ratio center drive and fixed angle drive shaft.

| Code | Volts | Capacity | Price |
| ---: | :---: | :---: | ---: |
| 11035 | 3000 | 35 | $\$ 6.90$ |
| 11050 | 3000 | 50 | 7.14 |
| 11070 | 3000 | 70 | 7.80 |
| 04050 | 6000 | 50 | 16.00 |
| 04060 | 9000 | 60 | 18.00 |
| 04100 | 6000 | 90 | 18.00 |
| 04200 | 3000 | 205 | 20.00 |

## 12000 and 16000 SERIES TRANSMITTING CONDENSERS

Rigid heavy channeled aluminum end plates Isolantite insulation, polished or plain edges. One piece rotor contact spring and connection lug. Compact, easy to mount with connector lugs in convenient locations. Same plate sizes as 11000 series above.
The 16000 series has same plate sizes as 04000 series. Also has constant impedance, heavy current, multiple finger rotor contactor of new design. Both 12000 and 16000 series available in single and double sections and many capacities and plate spacing.

## THE 28000-29000 SERIES VARIABLE AIR CAPACITORS

"Designed for Application," double bearings, steatite end plates, cadmium or silver plated brass plates. Single or double section $.022^{\prime \prime}$ or $.066^{\prime \prime}$ air gap. End plate size: $19 / 16^{\prime \prime} \times 11 / 16^{\prime \prime}$. Rotor plate radius: $3 / 4^{\prime \prime}$. Shaft lock, rear shaft extension, special mounting brackets, etc., to meet your requirements. The 28000 series has semi-circular rotor plate shape. The 29000 series has approximately straight frequency line rotor plate shape. Prices quoted on request. Many stock sizes.

## NEUTRALIZING CAPACITOR

Designed originally for use in our own No. 90881 Fower Amplifier, the No. 15011 disc neutralizing capacitor has such unique features as rigid channel frame, horizontal or vertical mounting, fine thread over-size lead screw with stop to prevent shorting and rotor lock. Heavy rounded-edged polished aluminum plates are $2^{\prime \prime}$ diameter. Glazed Steatite insulation.
No. 15011.
$\$ 3.15$

## I.F. TRANSFORMERS

The Millen "Designed for Application" line of I.F. transformers includes air condenser tuned, and permeability tuned types for all applications. Standard stock units are for 456,1600 and 5000 kc .B.F.O. also available.

## A NEW LINE OF CARDWELL MIDGET CONDENSERS FOR V．H．F．

Cardwell offers a new line of 90 degree candensers with butterfly rator plates，fulfiling a demand created by engineers and amateurs since the publication of an article＂Stabilizing The 144 Megacycle Trans－ mitter＂in April， 1946 ＂QST．＂Also see poges 351 to 353 inclusive in the 1946 ARRL Radio Amateurs Handbook．PL－6113 and PL－6076 are specified in these articles．Features af these 90 degree midget candensers are as follaws：

Electrical Symmefry
Low Distributed Inductance．
No Moving Contacts．
Plates easily removable to change capacity range．
Isolontite Insulotion．
Single Hole Mounting．
Small Size；$i \quad 7 / 16^{\prime \prime} \times 113 / 32^{\prime \prime}$ per general autline dimensians
for differential＂Trim－Airs＂as shown on Poge 6 of Cotalog No． 46. These condensers are made to fit all standard Cardwell＂Trim－Air＂ hordware．
Note maximum and minimum copacity values shown are meosured from stator－to－stator and are effective values as used when a coll is connected stator－to－stator，with rotor floating．

## "N" TYPE TRANSMITTING CAPACITORS

Designed for medium power high frequency transmitters and short wave therapy apparatus; the Cardwell " $N$ " series maintains the cus. tomary high standard of Cardwell construction, yet eliminates closed circuit loops completely.

GENERAL SPECIFICATIONS:
CAPACITY CHARACTERISTIC:
$\qquad$

NP. $35-\mathrm{DD}$
PL. 7107
FRAME: Improved aluminum end araic insulating bars which plates support heavy lateral ceramic insulating bars which carry the stators.
SHAFT: $1 / 4^{\prime \prime}$ diameter cadmium plated steel.
PLATES: Aluminum, $040^{\prime \prime}$ thick, with rounded edges. PL-7106 and 7116 have buffed and polished edges. PL. 7105 has .025' thick plates, buffed and polished edges.
BEARINGS: Cardwell shoulder type front bearing, with ball thrust rear bearing.
MOUNTING: Can be single hole mounted, or by three mounting posts and screws, to front panel. Chassis mounting on feet which form part of end plates, or use Cardwell ' M ' brackets, Cardwe! part No. 301, for inverted mounting, for lowest stator-to-ground capacity.

## "NA" NEUTRALIZING CAPACITORS

The ' $N A$ '" group offers $180^{\circ}$ neutralzzing capacitors of restricted range, for dial or screw driver adjustment. Adjustable airgap on NA.4-NS only Adjustable adiusting threaded bushing in by adjusting threaded bushing in aluminum with beryllium sension wash bearing with beryllium tension washer and special bushing for rigidity. Plates are 04 uffed alum, rounded and buffed edges. Three point panel mounting or foot mounting.

## STANDARDS OF COMPARISON

## V.H.F. OSCILLATOR KIT

This kit includes 3 sets of coils covering 144-148 $\mathrm{mc}_{\mathrm{n}} \quad 220-225$ $\mathrm{mc}, 420-450 \mathrm{mc}$ bands. (The $6 \mathrm{F4}$ tube is not included.)
Ideally suited for local oscillator, for super-heterodyne receiv.
er, as plate modulated oscillator for low power transmitter or transceiver, driver unit for amplifier tube in higher powered transmitter, V.H.F. signal generator etc. etc.

## CARDWELL PRECISION CAPACITOR Type PL-24,050

Designed for frequency meters reauiring maximum mechanical and electrical precision. Type No. 4.080 gear and worm driven capacitor incorporates special design features representing years of research and usage of this component in special measurement equipment which has successfully withstood most rigorous usage our armed forces could give it.

Frequency Meter Condenser
PL-24,050

CAP. RANGE: Max. Cap. 220 mmfd., Min. Cap. 21 mmfd.
PLATE SHAPE: S.L.F.
DI-ELECTRIC SUPPORTS: Steatite.
BACKLASH: Negligible.
RESETTABILITY: To 10 parts in one million.
GEAR DRIVE: Precision split worm gear, equipped with precision ball bearings. Ratio- 100 : 1 over 360 degrees.
DIALS: $3^{\prime \prime}$ DRUM: 50 divisions over $180^{\circ}$ condenser rotation. $3^{\prime \prime}$ FAST RUNNING DIAL: Graduatad 100 divisions, makes 1 revolution for each drum division. VERNIER RING: Divides each division for each drum division. VERNIER
DIMENSIONS: $55 / /^{\prime \prime} \mid g$, (over drum dial) $\times 31 / 8^{\prime \prime}$ deop $\times 31 / \mathrm{g}^{\prime \prime} \mathrm{high}$. WEIGHT: I3/4 lbs. (with cast aluminum frame)
ROTOR CONTACT: Silver plated phosphor bronze spring, with 2 siliver contacts bearing on silver plated dise.
MOUNTING: 3 point to bottom of main casting.
PRICE: Capacitor, PL-24,050, Type 4.080, only... $\qquad$ ....List $\$ 95.00$ Drum Dial List \$ 5.95
 Vernier Ring List $\$ 2.50$

## TYPE 'P'" LIGHT HEAVY WEIGHT TRANSMITTING

 CAPACITORSDesigned to accommodate capacitance values up to 150 mmfd. per section in a dual mmfd. per section in a dua section type having an airgap of .500 ', the "p" type construction permits higher capacity for a given cirgap, and therefore a shorter frame than the "'T" type construction. Typical Cardwell sturdiness is builtin, and the "'p" type is probably the lightest transmitting
 completely satisfactory for heavyweight use. No single section types are catalogued; parallel or series connect for double or half single section capacity listed in table.

## GENERAL SPECIFICATIONS:

FRAME: End plates are $1 / \beta^{\prime \prime}$ thick formed aluminum, satin finish, SHAFT: $3 / 8^{\prime \prime}$ diameter, non-magnetic stainless steel, extended both front and rear end.
PLATES: .064" thick, rounded and buffed edges. Rotor plates are $6^{3 / 4} 4^{1+}$ in diameter
BEARINGS: Heavy nickel plated brass front and rear shoulder bearings.
ROTOR CONNECTION: Heavy, two finger N.P. phosphor bronze wiper bears on $1 / 8$ "' thick N.P. brass contact ring, at each end. STATOR CONSTRUCTION: Plates permanently staked into slotted, rounded edge aluminum stator blocks.
INSULATION: Mycalex (glass bonded mica).
MOUNTING: 3 clearance holes for No. 10 screws in each side of each end plate permitting mounting on any side, as well as provision for mounting associated components such as inductance coil mountings, etc.

## STANDARDS OF COMPARISON

## INSULATED COUPLINGS

For isolating R.F. controls. Ceramic insulation (Alsimag No. 196). All flexible types have N.P. phosphor bronze springs, and heavy N.P. brass hubs, permanently swedged or spin riveted into the springs. Two fillister head, cup point, case hardened steel set screws in each hub insure positive lock to shaft.

All rigid types have improved three-point-spider construction, carefully machined solid brass castings, and are absolutely rigid.
Flexible types $C, D, E$ and $F$ fit both $1 / 4^{\prime \prime}$ diameter shaft or a $3 / 8$ " shaft by removing bushing supplied.

## ACCESSORIES

## "MIDWAY" MOUNTING FEET

Heavy aluminum, with 2 screws; for Midway condensers. Parts List No. 5052 ..................................................

## INDUCTANCE CLIPS

For tapping air-wound inductors. Cadmium plated phosphor bronze spring clips for No. 12 or 14 wire. Thin blades prevent shorting turns. Type 804-A. Parts List No. 5104........ List Price $\$ 0.20$

## ROTOR LOCK

For locking " $X$ " standard or ' $M$ " Midway rotor shafts in position for fixed tune. Can be set behind panel or attached to any $1 / 4^{\prime \prime}$ shaft, mounted directly on front of panel. Nickel plated brass; diameter $11 / 2^{\prime \prime}$.

Parts List No. 5100 (Type ARL)
List Price $\$ 0.75$

## SHAFT LOCK PANEL BUSHING

Long panel bushing for $1 / 4$ " shafts, has tapered nut for locking shaft in position. Fits $3 / 8^{\prime \prime}$ hole in panel. Complete with panel nuts. Nickeled brass.
Parts List No. 5055 (Type ALB)
List Price $\$ 0.40$

## TYPE 'M' BRACKET

Use with type "N" U.H.F. duals or "M" Midway condensers. Turns condenser upside down for shortest plate leads in balanced R.F. amplifier. Regular mounting feet can be used to support a tank coil or jack base. Made of strong, satin finished, $1 / 16^{\prime \prime}$ aluminum, and supplied with proper screws and lock washers.
Parts List No. 5051
List Price, each $\$ 0.25$
"STANDARD" TYPE "X" MOUNTING FEET
Heary nickel plated brass; for "X" transmitting types, with four screws.
Parts List No. 5053
List Price, poir $\mathbf{\$ 0 . 2 5}$

## TRIM-AIR ACCESSORIES

As catalogued, Trim-Air singles are equipped for single hole mounting. Additional mounting accessories listed below are sold separately.
MOUNTING POSTS- ( $1 / 4^{\prime \prime}$ hex. $\times 3 / 4^{\prime \prime}$ long, tapped 6-32 N.P. brass). Pair, with screws and lockwashers.
Parts List No. 5054..................................................................... Price $\mathbf{\$ 0 . 2 5}$

(4) N. 27 DRILL (.144)

## "TRIM-AIR" MOUNTING BRACKET

For dual and single Trim-air condensers. Insulated from rotor and stator; N.P. brass, with two screws and nuts.

List Price, each $\$ 0.20$

THE ALLEN D. CARDWELL MANUFACTURING CORPORATION

## "HQ-129-X" AMATEUR RECEIVER

The Hammarlund "HQ-129-X" amateur communications receiver is designed to meet the demands of the most critical amateurs. Its design includes every feature essential to finest performance.

The "HQ-129-X" has a continuous range from . 54 to 31 megacycles in six separately calibrated bands with continuous bandspread throughout the entire range. In addition, the bandspread dial is calibrated for each of the four most important amateur bands- $3.5-4 \mathrm{mc}$, $7-7.3 \mathrm{mc}, 14 \cdot 14.4 \mathrm{mc}$ and $28-30 \mathrm{mc}$.
The "HQ-129-X" has the Hammarlund patented variable wide-band crystal filter which works exceptionally well on phone or short wave broadcast signals.

There are many other features: Variable antenna compensator, beat oscillator, voltage regulator, series noise limiter, send-receive switch, automatic volume control, calibrated " S " meter, audio gain control, sensitivity control-plus all that goes into a receiver built by engineers who have spent a lifetime designing commercial communication equipment.
The "HQ-129-X" is available complete in a twotone gray finish including tubes and a 10 inch P . M. dynamic speaker.
"HQ-129-X" Less Speaker Amateur Net Price $\$ 177.30$ SC-10-Speaker in cabinet finished to match

Amateur Net Price \$ 11.85

## SERIES 600 "SUPER-PRO"

## DESCRIPTION

Cheers from the experts - The new Series 600 SUPER-PRO is the finest communications receiver that money can buy. No "warmed over" model, the Series 600 is entirely new in electrical concept and mechanical design-truly "years ahead" of present day receivers. When you check this entirely new SUPER-PRO for such things as image rejection, stability, calibration accuracy, etc. ... you will find performance that you would not have thought possible. You'll find that "years aliead" in design mean "years ahead" in performance.

Band changing in the new SUPER-PRO is accomplished by means of an ingeniously designed rotary turret which places the coil assemblies of the two R.R., Mixer and Oscillator stages directly adjacent to their respective sections of the four gang tuning condenser where they are electrically most efficient.
By means of the mechanical system used in the SUPER-PRO 600-X both the main and band spread dials are tuned simultaneously with one control and the need for first setting the main dial is eliminated. The dial drive mechanism is entirely gear coupled to the main tuning condenser, producing the kind of calibration accuracy usually associated only with costly laboratory standards.

## 'RMC' CAPACITOR

The new "RMC", Rugged Midget Capacitor, is particularly designed for use in applications where strength and solid construction is as imporTwo as sound electrical design.
Two low lons silicone treated ceramic insulated hars are used to support the stator. Bearings are hand-fitted sleeve in the front and single ball thrust in the rear-torque is smooth and uniform. Contact to the rotor is made through a silver-plated bervllinm forked spring beaving on a wide disk on the rotor shaft.

"SX"-Straight Line Cap. Ilates.

## "VU" UHF CAPACITOR

The capacitors listed below are available for use by manufacturers, engineers and amateuss for all types of communications equipment having tuned circuits operating as high as 500 mc . The many advantages of these new capacitors are of course due to the silent esectrical operation made possible throumh the use of pyrex glass ball bearings. Elimination of the rotor contact further precludes the possibility of noise. Two sets of contacts are provided, so that the vacuum tube can be monited on one side and the inductor on the other side of the capacitor. Voltage rating- 700 V .

## "PLASTIC" I. F. TRANSFORMERS

Particularly suitahle for use in small receivers, where space is at a premium and yet superior periormance is required, these remarkable transformers are only $\mathrm{l}^{1 / 4} \mathbf{" ~}^{\prime \prime}$ square and $21 / 2^{\prime \prime}$ high! Made in a complete series of frequency ranges and positions, they will provide results second to none in any type of receiver.
The one-piece molded plastic coil-form and trimmer-base eliminates many separate parts that were required with other types of construction. The assembly is, therefore, simpler and more rigid. The iron core series are highly roonmended for use in compact receivers and auto sets where only one I-F stage is permitted. It is not recommended that they be used in a two-stage system because of their high-gain which would cause instability and oscillation.

## CARTWHEEL I. F. TRANSFORMER

A brand new, ultra-compact, unshielded I-F Transformer, complete with dual trimmers; finds useful application in many types of compact AC-DC or Midget type receivers. Only $1 \% /{ }^{\prime \prime}$ by $1 \frac{1}{122}$ " by $11 / 4^{\prime \prime}$ high; one-piece molded plastic trimmer base; for $456-\mathrm{kc}$ only.
No. 16-6661 List Price
$\$ 1.40$

## STANDARD I. F. TRANSFORMERS

The Meissmer series of Air-Core I. 1. Transformers hils been accepted as "standard" for general replacement purposes. quin charscteristics have been designed to correspond closely with average values found in the majority of commercial receivers. All transformers are double-tuned with ceramicbase. mica-dielectric trimmers. Windings are fully inmprernated. Well-insulated RMA color-coded lead wires. Bright aluminum finish slield is $13 / 8$ " square by $3^{\prime \prime}$ high.

FERROCART I. F. TRANSFORMERS
Designed primarily as original parts in high-gain receivers of superior quality, these transformers find consistent application in stepping up the performance of old receivers. The special powiered-iron core used in the coils permits higher " $Q$ ", with resultant increase in selectivity and gain. All units are double-tuned with ceramic-base, mica-dielectric trimmers. Windings are of high-grade Litz wire, thoroughly impremated. Shield is bright aluminum finish, $1 \frac{18}{\prime \prime}$ "square by $3^{\prime \prime}$ high.

The result of years of engineering The resuce in designing higll grade expensformers for the finest commer cial receivery! The exacting re guirements of modern higli-flidelity and communications type receivers demand units that can be denended upon under any and all conditions. Ther must he absolutely stalle under temperature and humidits rari ${ }^{\text {ation and }}$ These renuirements are all met by

TRANSFORMERS
the "Align-Aire" I-F'Transformer Provides 3600 degrees of micro meter smooth trimuer adjusiment instead of the usual 180 degree rotation! Aecurate trimming can thus be readily accomplishetl, Availuhle With sperial fron-co design or maximum gain and sefecting. Domple-tuned ami ofected of frequencies for complete range of trequencies are black crackle finish, $2^{\prime \prime} \times 2^{\prime \prime} \times 43 / 4$ ".
