VIGOR® SWISS PRECISION TWEEZERS For MINIATURE and MICROMINIATURE ASSEMBLY
Precise Sharp and Shaped Points

VIGOR Swiss Precision Tweezers are made in carbon (C), non-magnetic steel (NM), stainless steel (SS), carbon steel with nickel plating (CNP), and brass (B), as indicated below. Non-magnetic VIGOR Tweezers will not rust and are acid resistant. All points are ground flat on the inside. Beveled and rounded points refer to the outside diameter.

Style No.	Vigor Stock No.	Type Steel Used	Total Length	Points	List Price

VIGOR® SEMI-CONDUCTOR TWEEZERS

Mirror-smooth finish will hold discs such as germanium and silicone wafers without scratching surface. Large surface provides positive grip. Thin edge permits simple pick-up. Available in nickel finish; stainless steel or non-magnetic, anti-acid steel as indicated below.

Vigor Stock No.	Pattern	Description	List Price
TW-602A	2A	Thin extra narrow jaws. Approximate width at tip .050". Rustless — Length 4 3/4"	\$3.45
TW-702A	2A	Same as above but stainless	2.85
TW-902A	2A	Same as above but Carpenter 20 steel	5.00
TW-325	25	Thin narrow round jaws. Approximate width at tip 3/4". Serrated handle grip. Carbon Steel, Nickel Plated — Length 4 3/4"	1.75
TW-326	26	Thin round jaws. Approximate width at tip 1 1/4". Serrated handle grip. Carbon Steel, Nickel Plated — Length 4 3/4"	1.75
TW-327	27	Oblong and offset jaws. Approximate width at tips 3/8". Serrated handle grip. Carbon Steel, Nickel Plated — Length 4"	1.75

Vigor Stock No.	Pattern	Description	List Price
TW-328	28	Oblong and offset jaws. Approximate width at tips 3/8". Serrated handle grip. Carbon Steel, Nickel Plated — Length 4"	1.95
TW-335	35	Medium flange jaws. Approximate width at tip 1 1/4". Serrated handle grip. Carbon Steel, Nickel Plated — Length 4 3/4"	1.95
TW-335A	35A	Same as above but Rustless, Non-magnetic and Anti-acid	3.50
TW-336	36	Oblong and Offset jaw. Approximate width at tip 1 1/4". Serrated handle grip. Carbon Steel, Nickel Plated — Length 4 3/4"	1.95
TW-336A	36A	Same as above, but Rustless, Non-magnetic and Anti-acid	3.50

Weller® DUAL HEAT Soldering Guns

Dual heat. All Weller guns offer Dual Heat—an original Weller feature that provides two tip temperatures from the same gun. Two trigger positions permit instant switching to high or low heat, whichever is best suited for the job. The use of low heat prevents damage when soldering near heat-sensitive components and prolongs tip life. High heat is instantly available when needed.

Instant heat. Solders in seconds. No waiting for the tip to heat. No wasted current.

High-efficiency tip. Made of copper for superior heat transfer and optimum soldering results. Slips easily into difficult places.

Exclusive tip grip. Wiping action of tip fastening nuts eliminates contact resistance and oxidation. This assures full, constant heat.

Spotlight. Illuminates the work and eliminates shadows.

Fingertip control. Heat is instantly "on" when trigger is pulled, instantly "off" when trigger is released. No need to unplug the gun. No danger of damage from an idling hot tool.

Operating comfort. Compact design and perfect balance make precision soldering easy and eliminate fatigue.

Guaranteed one year. All Weller guns are UL and CSA approved and guaranteed for a full year against defects in material and workmanship.

Accessory and Replacement Tips for Weller Dual Heat Guns

SOLDERING

For gun models 8200 and D-440—Tip 7135N
For gun model D-550—Tip 7250N

SMOOTHING

For gun models D-440 and 8200—Tip 6120
For gun model D-550—Tip 6140

CUTTING

For gun models D-440 and 8200—Tip 6110
For gun model D-550—Tip 6130

3 Dual Heat Models

MODEL 8200—100/140 watts
MODEL D-440—145/210 watts
MODEL D-550—240/325 watts

KITS WITH ACCESSORIES

MODEL 8200PK—Dual heat 100/140 watt gun, 3 soldering tips, tip-changing wrench, flux brush, soldering aid, solder, plastic case.

MODEL D-550PK—Heavy-duty 240/325 watt dual heat gun; soldering, cutting and smoothing tips; tip-changing wrench; solder; plastic case.

Weller® TEMPERATURE-CONTROLLED Soldering Irons

... with Energy Reserve

Three temperature-controlled line voltage tools cover the 15 through 300-watt spectrum with Weller's exclusive Energy Reserve design. Interchangeable Weller tips triple the working capacity over conventional irons which often weigh twice as much. All sizes are available with standard 2-wire or 3-wire cords.

- Tip temperature constant to within $\pm 3\%$ when idling
- Energy Reserve provides ample working temperature, quick recovery

STANDARD WELLER IRONS

MODEL NO.	WATTAGE/120V	WEIGHT	TIP SUPPLIED*
W-60	60, covers 15 to 100-watt loads	2½ oz.	800°F ¼" screwdriver
W-100	100, covers 50 to 150-watt loads	3½ oz.	800°F ¼" screwdriver
W-200	200, covers 150 to 300-watt loads	10 oz.	800°F 7/16" chisel

*Weller "Temperature Sensing" tips are available in standard industrial configurations at 500°, 600°, 700° and 800°F for these tools.

- One tool does the work of several higher wattage irons
- Light weight and cool handles increase operator comfort

Weller® UTILITY Soldering Irons

THE "MARKSMAN" LINE

Five ruggedly designed general-purpose tools featuring stainless steel construction, long-reach barrels, and replaceable tips.

Model SP-23*

Model SP-40

Model SP-80

Model SP-120

Model SP-175

"INDUSTRIAL RATED" SOLDERING PENCIL

Ideal for soldering transistor sockets and other miniaturized circuit components, this low-cost 115-volt iron provides a tip temperature of 860°F with a 25-watt input. Other features include:

- High efficiency and rapid recovery
- Does the work of higher wattage irons
- Lightweight design reduces operator fatigue
- Rugged heating element for long-life service
- Readily replaceable parts

Interchangeable $\frac{1}{16}$ ", $\frac{3}{32}$ ", $\frac{1}{8}$ " and $\frac{3}{16}$ " screwdriver tips available—premium plated for long life. Model WPS.

MODEL NO.	WATTAGE/120V	WEIGHT
SP-23*	25	1¼ oz.
SP-40	40	2 oz.
SP-80	80	4 oz.
SP-120	120	10 oz.
SP-175	175	16 oz.

*Also available as kit model SP-23K, including iron; screwdriver, cone and chisel tips; soldering aid and solder.

NEW! . . . with Energy Reserve
Weller 12 Volt Soldering Iron
 For field servicing requirements

A modern service tool for 12-volt battery or AC/DC power supply operation. Model TCP-12 requires only 30-41 watts, weighs only 1¼ oz., yet provides all the advantages of Weller's "Temperature Sensing" system. Supplied complete with 700°F $\frac{3}{16}$ " screwdriver tip, 12-ft. power cord and clips, and impact resistant handle. Also available for 24-28 volt operation (Model TCP-24).

Weller® TEMPERATURE-CONTROLLED Soldering Stations

... with Energy Reserve

Model W-TCP

Model W-TCP is a low voltage soldering unit featuring a 2½ oz. pencil that does the work of several irons. Efficient 24-volt operation with interchangeable Weller "Temperature Sensing" tips, burn-proof cord, self-contained 120 or 230-volt transformer, pencil holder and cleaning sponge. Wide selection of tip configurations provide a choice of controlled temperatures from 500° to 800°F. Also available with thermistor and SCR switching circuit for continuously variable 200°-450°F tip temperature—20-watt Model W-TCP-2.

**WALL
BRAND**

SOLDERING PENCILS, IRONS, GUNS AND HOLDERS

WallBrand pencils and irons are Thermogram Rated for better efficiency, with cooler handles, feather weight, perfect balance. Production Line models are engineered for continuous precision soldering applications. Wall's own plating facilities produce tips to meet the demanding applications of micro-circuitry, high density packaging, precision work on solid state devices, printed circuits, or production line work requiring continuous heat. The Wall line includes soldering pencils with a plug-in type system. All heating elements for the 614-618 are interchangeable with one handle and cord assembly. HD Type for continuous, heavy duty soldering requirements have triple-life resistance wire wound on pure mica; constant tip temperature with extra fast recovery; excellent balance. 120 volts AC or DC (other voltages on request).

Model	Watt Input	Tip Size	Length W/O Tip	Therma/Gram Value
18HD	25	1/8"	6 5/8"	300
14HD	40	1/4"	7 1/2"	900
618HD*	25	1/8"	6 5/8"	300
614HD	40	1/4"	7 1/2"	900
38HD	80	3/8"	10 1/4"	1500
12HD	125	1/2"	10 1/4"	2000
58HD	200	5/8"	12 1/4"	3500
78HD	250	7/8"	12 3/8"	5400

*Also available in 11, 15 or 20 watts

Model	Tip Size	Watts	Volts
316 (Light duty)	3/16	30	120

TRIG-R-HEAT SOLDERING GUN SPECIFICATIONS

Model	Tip Size	Max. Watts	Min. Watts	Voltage AC or DC	Weight W/O Cord
214LT	1/4"	400	150	120	14 oz.
212LT	1/2"	500	300	120	24 oz.

TIP AND ELEMENT ASSEMBLY

Model	Tip Size	Max. Watts	Min. Watts	Voltage
214TE	1/4"	400	150	120
212TE	1/2"	550	300	120

214LT
TRIG-R-Heat Soldering Gun—Feather light, 14 oz., no heavy transformer. Reaches hard-to-get-at spots; tip will not deform. Heats and recovers instantly. Rugged, precision-built. Easily changed tip and element assemblies.

2AG, AG Heat Guns—Plug-in type hot air guns from 200 to 600 watts, adaptable to usage requiring up to 1000°F. **2AG Pistol Grip** available with trigger (additional cost). Opens air and heat at the same time. **AG Handle Grip**. One heating element fits both guns. All five tip styles interchangeable. Special tips on request. Three-wire cord assembly. Hundreds of uses—shape, form, weld and seal thermoplastics. Gun includes neoprene air hose, hose fittings, pressure regulator and gauge.

14DS Desoldering Tool—Keeps solder in a molten state in reservoir, operated with one hand, fits existing Wall 14HD Iron. Replaceable tip, .080 opening. Other sizes by special request.

14DS

Hatchet Irons—New high reserve models that enable user to make more solder connections faster. Reduces operator fatigue, with better quality control and higher production. 1/4" and 3/8" tips available. Unless otherwise specified, irons are equipped with 2-wire HPN cords and WallBrand Tip Style "C"

Model	Tip Size	Watts	Volts
714-60	1/4 in.	60	120
714-75	1/4 in.	75	120
738-80	3/8 in.	80	120
738-100	3/8 in.	100	120

SPH

SPH Soldering Pencil Holder for units up to 3/8" diameter shaft—**SIH Soldering Iron Holder** for units up to 1" diameter shaft. Can be mounted on top, in front or below bench. Adjusts to any angle. Bench models include tip cleaning sponge.

Soldering Tips for Pencils and Irons—Three grades: Anniversary: Industrial, highest quality. Copper core, special iron coating. Anti-seize life for rigorous production line demand. WallKlad—Industrial, copper core, iron coating chrome plated. Production line and critical laboratory use. WallBrand—Commercial, copper, nickel plated. All commercial applications. Tip sizes from 1/8" through 7/8". Special tips to specifications designed on request.

Send for illustrated catalog I-1265 about Wall's tips, irons, pencils, and holders.

DISPENSER
PAC

Soldering Tip Dispenser Pac—Iron-plated or copper tips, 1/8" through 3/8", are available in handy tip dispenser pac. Keeps tips individually sealed in color-coded, continuous belting, plastic envelope. Ideally suited for production line station or stock distribution.

WALL BRAND MANUFACTURING CO.

Industrial Soldering Pencils are built to exceed federal specification W-S-570a as amended. WallBrand soldering products are UL and CSA listed.

QUALITY PROFESSIONAL TOOLS

SERIES "99" SERVICE KITS, BLADES, AND HANDLES

No. 99MP MULTI-PURPOSE TOOL KIT List \$47.25

39-piece kit contains 99-1 (Regular) and 99-4 (Tee) handles, ten regular nutdrivers (99-5 thru 99-16), nine Allen Hex type screwdrivers (99-20, thru 99-26), nine Bristol Multiple Spline screwdrivers (99-61 thru 99-69), three slotted screwdrivers (99-811, 99-250, 99-312), two Phillips screwdrivers (99-821, 99-822), two reamers (99-38, 99-39), awl/scriber (99-70), extension blade (99-X5).

99MPK, Canvas case only..... List \$5.45

No. 99SM SERVICE MASTER List \$43.00

23-piece kit contains 99-1 (Regular) and 99-3 (Stubby) handles, nine regular and three stubby nutdrivers (99-6 thru 99-16), two slotted screwdrivers (99-811, 99-812), one Phillips screwdriver (99-821), two reamers (99-38, 99-39), extension blade (99-X10), 6" long nose cushion grip plier (52CG), 5" diagonal cushion grip plier (55CG), 6" adjustable wrench (46C).

99SMK, Canvas case only..... List \$3.75

ROLL KITS

No. 99PR ROLL KIT List \$15.70

Contains nine regular nutdrivers (99-6 thru 99-16), 99-811 and 99-250 (slotted) and 99-821 and (Phillips) screwdriver blades, 99-1 handle (Regular).

99PK, Kit only List \$1.75

No. 99JR ROLL KIT List \$13.80

Contains seven regular nutdrivers (99-6 thru 99-12) four screwdriver blades 99-811 and 99-812 (Slotted), and 99-821 and 99-822 (Phillips), 99-2 handle (Junior).

99JKR, Kit only List \$1.75

No. 99LN ROLL KIT List \$7.45

Contains six Allen type screwdriver blades (99-21, 22, 23, 24, 25, 26) and 99-1 handle (Regular).

No. 99-30 CLEAR PLASTIC POUCH List \$5.40

Heat sealed plastic snap case with size numbers on pockets for convenient selecting and storing. Contains six Allen type screwdriver blades (99-21, 22, 23, 24, 25 and 26).

PLASTIC VIEW KITS

No. 99SL List \$6.25

Contains five Scrulox® screwdriver blades for square recess screws (SL 00, 0, 1, 2, 3), 99-1 handle (Regular).

No. 99PV4 List \$4.45

Contains three slotted screwdriver blades (99-811, 99-250, 99-312), 99-1 handle (Regular).

No. 99PV6 List \$6.25

Contains three slotted screwdriver blades (99-811, 99-250, 99-312), two Phillips screwdriver blades (99-821, 99-822), 99-1 handle (Regular).

Handles: 99-1 Regular (1 1/8" x 4 1/8") — for all blades, single-end and reversible 1.15
 99-2 Junior (1" x 3 1/8") — for single-end blades only 1.05
 99-3 Stubby (1 1/8" x 2") — for single-end blades only 1.00
 99-4 Tee (1" x 3 3/8") — for single-end blades only 1.50

Nutdriver Blades: 99-5 (5/32"), 99-6 (3/16"), 99-7 (7/32"), 99-8 (1/4"), 99-9 (1/2"), 99-10 (3/8"), 99-11 (1 1/32"), 99-12 (3/8") 1.05
 99-14 (7/16"), 99-16 (1/2") 1.30
 Stubby Nutdriver Blades: 99-S8, 99-S10, 99-S1285

Allen Hex Type Screwdriver Blades: 99-20 (.050"), 99-21 (1/16"), 99-22 (3/64"), 9-23 (3/32"), 99-764 (7/64"), 99-24 (1/8"), 99-964 (3/64"), 99-25 (5/32"), 99-26 (3/16")95

Bristol Multiple-Spline Type Screwdriver Blades: 99-61 (.048" flute), 99-62 (.060", 6-flute), 99-63 (.069", 4-flute), 99-64 (.072", 6-flute), 99-65 (.076", 4-flute), 99-66 (.096", 6-flute), 99-67 (.111", 6-flute), 99-68 (.145", 6-flute), 99-69 (.183", 6-flute)95

Frearson and Clutch Head Reversible Screwdriver Blades:

99-83 Frearson (3/16" and 5/32") 1.75
 99-84 Clutch Head (3/16" G and 5/32" G) 1.75

Slotted Screwdriver Blades: 99-811 (3/16"), 99-250 (1/4"), 99-812 (5/32"), 99-312 (3/16") 1.05

Phillips Screwdriver Blades: 99-821 (#1), 99-822 (#2) 1.05

Scrulox Screwdriver Blades: 99SL-00 (#00), 99SL-0 (#0), 99SL-1 (#1), 99SL-2 (#2), 99SL-3 (#3) 1.05

Awl/Scriber: 99-70 (4 1/2" overall length) 1.00

Reamers: 99-38 (1/8" - 3/8") 2.25
 99-39 (1/4" - 1/2") 2.85

Extension Blades:
 99-X5 (adds 4" reach to single-end blades) 1.55
 99-X10 (adds 7" reach to single-end blades) 1.60

XCELITE®

QUALITY PROFESSIONAL TOOLS

COMPACT SETS

No. HSC-1 INTERCHANGEABLE HOLLOW SHAFT NUTDRIVER SET

Contains special thru-drilled handle and eight interchangeable hollow nutdriver shafts in $\frac{3}{16}$ ", $\frac{1}{4}$ ", $\frac{5}{16}$ ", $\frac{1}{2}$ ", $\frac{3}{8}$ ", $\frac{7}{16}$ ", $\frac{1}{2}$ ", $\frac{5}{8}$ " hex sizes. Screwdriver blade may be run down through center of handle and hollow nutdriver shaft to make combination locknut/slotted screw adjustments. List \$14.75

Series "99" Sets

Each set contains a Series "99" regular handle and various Series "99" interchangeable blades and extension. See-thru plastic case is pocket size, has flat base that permits its use as a bench stand.

No. 99PS-40 ALLEN HEX TYPE SCREWDRIVER SET

Includes nine Allen Hex type screwdriver blades (99-20 thru 99-26), 99-X5 extension blade, 99-1 handle, and see-thru case. List \$11.25

No. 99-PS50 NUTDRIVER/SCREWDRIVER SET

Includes seven regular nutdriver blades (99-6 thru 99-12), two slot tip screwdriver blades (99-811 and 99-812), two Phillips screwdriver blades (99-821 and 99-822), 99-X5 extension blade, 99-1 handle, and see-thru case. List \$14.25

No. 99PS-60 BRISTOL MULTIPLE-SPLINE TYPE SCREWDRIVER SET

Includes nine Bristol Multiple-Spline type screwdriver blades (99-61 thru 99-69), 99-X5 extension blade, 99-1 handle, and see-thru case. List \$11.25

No. K22 ELECTRICIAN'S KNIFE

Two blades. One is combination insulation-scraper and screwdriver. Has positive lock when openList \$3.40

Convertible Nutdriver and Screwdriver Sets

Black plastic torque amplifier handle (1" x $\frac{3}{8}$ ") slips over handles of pocket size ($\frac{3}{16}$ ") nutdrivers and screwdrivers . . . provides larger grip, extends reach and increases driving power to that of standard size tools. See-thru plastic case fits pocket, stands upright on bench.

No. PS7 NUTDRIVER/SCREWDRIVER SET

Contains two nutdrivers ($\frac{1}{4}$ " and $\frac{3}{16}$ "), two slot tip screwdrivers ($\frac{3}{16}$ " and $\frac{3}{32}$ "), two Phillips screwdrivers (#0 and #1), hollow handle, and case. List \$6.50

No. PS44 SCRULOX SCREWDRIVER SET

Includes five Scrulox screwdrivers (#1 thru #14), one nutdriver ($\frac{1}{4}$ "), hollow handle, and case. List \$5.75

No. PS88 SCREWDRIVER SET

Contains five slot tip screwdrivers ($\frac{3}{32}$ ", $\frac{1}{8}$ ", $\frac{3}{32}$ ", $\frac{3}{16}$ ", $\frac{1}{4}$ "), three Phillips screwdrivers (#0, #1, #2), hollow handle, and case. List \$7.00

No. PS120 NUTDRIVER SET

Contains ten color coded nutdrivers ($\frac{3}{32}$ " thru $\frac{3}{8}$ "), hollow handle, and case. List \$9.75

No. PS89 ALLEN HEX TYPE SCREWDRIVER SET

Contains eight Allen hex type screwdrivers (hex sizes .028", .035", .050", $\frac{1}{16}$ ", $\frac{5}{64}$ ", $\frac{3}{32}$ ", $\frac{7}{64}$ ", $\frac{1}{8}$ "), hollow handle, and case. List \$7.25

No. 150 TOOL HOLSTER

Has tape holder, knife clip, and 5 tool pockets. Durably made of pliable saddle leather with natural cowhide finish. Features comfortable hip-contoured back, hot-waxed stitching, and brass rivets ..List \$6.40

QUALITY PROFESSIONAL TOOLS

Need custom constant voltage transformers? Acme Electric can design and build to your specs.

Acme Electric's engineering and experience have developed thousands of custom-designed constant voltage transformers for a variety of industrial markets. These areas of production and development include such industries as: data processing, communications, automation, instrumentation,

office copying equipment, medicine, photography, to name but a few. And, each unit has been designed to meet the customer's exact requirements.

Does your equipment or system require a regulated AC voltage for maximum performance? If so, draw on the engineering know-how of Acme Elec-

tric Corporation to solve your problem. Our business is to satisfy the functions of power control, conversion and/or regulation, whatever the industry or application.

*These units supplied with taps for applying screen feedback U-16 IMPEDANCES IN OHMS: 2, 4, 8, 12, 16. U-500 IMPEDANCES IN OHMS: 50, 125, 200, C.T., 250, 330, 500 C.T. 125 and 500 ohms can be used for 150 and 600 ohms.

FREED TRANSFORMER CO., INC.

MINIATURE TRANSISTOR AUDIO TRANSFORMERS

These high quality miniature transformers are high efficiency audio components featuring hermetic sealing for maximum protection against electrolysis and subsequent corrosion of fine wires caused by moisture penetration. The units are constructed in accordance with MIL-T-27A Specifications. Transistor transformers can also be supplied in an open or encapsulated type of construction.

PROFESSIONAL GRADE COMPONENTS

This group of components has been designed for use in high fidelity and professional equipment and for public address service. Freed has developed this series of units employing the latest design techniques and the best commercially available materials. Except for units carrying unbalanced direct current the frequency response is ± 1 DB from 30 to 15,000 cps. All units feature excellent performance characteristics with minimum size and weight.

All units are vacuum varnished and then potted in compound to insure long life and trouble free performance.

Professional Grade components are supplied cased. Upon request these units can be supplied open or in shell type construction.

All cased Professional Grade Components supplied with terminals meet "EIA" standards.

Transformers PGA 1 through PGA 10 are supplied in hermetically sealed cases.

INPUT TRANSFORMERS

Frequency Response 30-15,000 C.P.S. ± 1.0 DB

Catalog No.	Application	Impedance Level Ohms		Maximum Power Level DBM	Ratio	Equivalent Shielding D.B.	Max. Pri. D.C. Per Side Ma.	D.C. Unbalance Ma.	Case Number

*Available with taps to apply screen feedback.

U-16 IMPEDANCES IN OHMS:

2, 4, 8, 12, 16

U-500 IMPEDANCES IN OHMS:

50, 125, 200 C.T., 250, 330, 500 C.T., 125 and 500 ohms can be used for 150 and 600 ohms.

*PGA 28, 29 & 30 supplied with terminals, all other units with leads.

A 70 volts level can be obtained for the following impedances:

- 500 ohms — 10 watts +40 DBM
- 330 ohms — 15 watts +42 DBM
- 250 ohms — 20 watts +43 DBM
- 200 ohms — 25 watts +44 DBM
- 125 ohms — 40 watts +46 DBM
- 50 ohms — 100 watts +50 DBM

FREED TRANSFORMER CO., INC.

HIGH "Q" REACTORS

QGC—are hermetically sealed, MIL-T-27A, Grade 4, Class R, High Q Reactors for low audio frequency application with an excellent inductance stability with variations of A.C. and D.C. currents, frequencies and temperatures.

SPECIAL REACTORS:

- (1) with a center tap
- (2) with a split winding
- (3) with inductances other than those listed can be supplied.

STANDARD MILITARY TRANSFORMERS

The group comprises audio and power units designed to meet MIL-T-27 A specifications.

The functional characteristics of these transformers were established by the Armed Service Standardization Program. These units are supplied in standard MIL cases.

Transformers meeting MIL-T-27A specifications Grade 1 through 6 with temperature characteristics of Class S, T, or U can be supplied on special order.

Encapsulated units using either Epoxy-Resins or Fosterite can be supplied for Grade 2 and 5. Class U components can be supplied molded in special high temperature Freed resin.

HERMETICALLY SEALED PULSE TRANSFORMERS

Hermetically sealed Pulse Transformers for use in blocking oscillator, low level interstage coupling, and modulator output circuits. These components meet MIL-T-27 A specifications. The pulse transformers are designed for maximum power, efficiency, and optimum pulse performance. Balanced coil structures permit series or parallel connection of windings for turn ratios other than unity. Pulse characteristics, voltages and impedance levels will depend upon the interconnections made.

TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin**. Both hermetically sealed and molded units meet the latest military specification MIL-T-27A(graded 1 or 4 and 2 or 5 respectively.) Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores

1. Temperature Stabilization:

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

- SF Non-stabilized cores, ±2½% inductance variations from -55°C to +85°C.
- SN Non-stabilized cores, +2% inductance variations from -55°C to +85°C.
- SE Temperature stabilized cores, +0.1% to -0.4% inductance variations from -1.5°C to +54°C.
- SB Temperature stabilized cores, ±0.1% inductance variations from +13°C to +35°C.
- SD Temperature stabilized cores, ±0.1% inductance variations from -1.5°C to +54°C.
- SW Temperature stabilized cores, ±0.25% inductance variations from -54°C to +85°C.
- SM Temperature stabilized cores, ±.25% -65°C to +125°C.
- SP Temperature stable carbonyl iron cores, ±0.3% inductance variations from -55°C to +85°C.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.

TI-12	45	100	160	1	TI-32	48.5	6	14.5	0.09
TI-13	55	140	175	1.1	TI-33	2,150	8	13	0.08
TI-14	580	150	—	—	TI-34	1,700	8	9.5	0.06
TI-15	900	100	—	—	TI-35	4,100	10	18	0.11
TI-16	600	16	21	0.13	TI-36	3,950	10	11	0.07
TI-17	1,200	20	29	0.18	TI-37	23.5	10	32	0.20
TI-18	2,600	30	40	0.25	TI-38	100	4	9.5	0.06

*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.

FREED TRANSFORMER COMPANY, INC.

FREED TRANSFORMER CO., INC.

MAGNETIC AMPLIFIERS AND SATURABLE TRANSFORMERS

The ever increasing demand for reliability, ruggedness, miniaturization and high performance has made the magnetic amplifier an indispensable component of many military and industrial automatic control and servo systems. Recent advances in materials and techniques permit an even greater utilization of the well-known inherent advantages of magnetic amplifiers such as direct operation from line voltage, no warm-up time, long-life components, ease of signal mixing and hermetic sealing.

Freed Transformer Co. manufactures an extensive line of magnetic amplifiers, ranging from saturable transformers to half-wave type, fast-response servo amplifiers. Choice of catalog amplifiers assures standardization, lowest possible cost and rapid delivery.

All standard units are designed for continuous operation and will operate in an ambient temperature range of -55°C to $+75^{\circ}\text{C}$.

In addition to standard items, Freed Transformer Co. has extensive facilities for the design and production of special amplifiers, saturable reactors and magnetic components.

ALL ITEMS LISTED ARE AVAILABLE FROM STOCK.

FAST RESPONSE MAGNETIC AMPLIFIERS

The MAF Type of fast response magnetic amplifier combines high power gain, ruggedness, and reliability with a maximum 2 cycle response. All MAF units are phase-reversible.

TRANSISTOR CONVERTERS

THE FREED LINE OF DC TO AC AND DC TO DC TRANSISTOR CONVERTERS PROVIDE A HIGH EFFICIENCY VOLTAGE CONVERSION FROM BATTERY SOURCES TO AN AC LINE VOLTAGE OR HIGH DC VOLTAGE WITHOUT THE USE OF MOVING PARTS.

Freed Transformer Co. maintains a stock line of reliable, highly efficient static DC to DC and DC to AC converters. DC to DC converters in hermetically sealed cans. RF filters included inside case.

The MAC Line of Static DC to AC Converters provide a highly efficient voltage conversion from battery sources to AC voltage without the use of moving parts.

The output voltage and/or frequency is directly proportional to source voltage variation.

Special regulators can be supplied to compensate for this variation.

- RUGGED, QUIET, MAINTENANCE FREE, LONG LIFE OPERATION.
- HIGH POWER TO WEIGHT RATIO, ARC-FREE OPERATION.

TELEMETERING COMPONENTS

A complete line of Band Pass Filters, Low Pass Filters and Discriminators is available for multi-channel telemetering applications. These components cover the frequency range from 400 cps to 70,000 cps. The filters feature exceptional phase linearity, excellent selectivity characteristics and plug-in construction. The Discriminators, either fixed or slug tuned, have exceptional linearity, high amplification, and utmost stability.

TELEMETERING BAND PASS FILTERS

Hermetically sealed to MIL-T-27A and MIL-F-18327

These filters cover the frequencies from 400 c.p.s. to 70KC. Narrow frequency B.P.F. have a band width of ±9 1/2% of center frequency and 45 DB (minimum) points at ±7 1/2% of center frequency of higher or lower adjacent channels. Wide frequency B.P.F. have a band width of ±19 1/2% of center frequency and 50 D.B. points at ±15% of center frequencies of higher or lower second adjacent channels.

FREED FILTERS

To MIL-T-27A and MIL-F-18327

Freed Standard Filters are Hermetically Sealed Miniature and Sub-Miniature high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

The standard filters are available in Low Pass, High Pass and Band Pass Filters.

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency, 35db or more at 1.5 cut-off frequency and 40db or more at 2 cut-off frequency.

ILP Interstage Low Pass Filter. Characteristic Impedance 10,000 ohms, in and out.

LLP Line Low Pass Filter. Characteristic Impedance 500 to 600 Ω, in and out.

High Pass Filters: The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency, 35db and 40db or more at 0.67 and 0.5 cut-off frequency.

IHP Interstage High Pass Filter. Characteristic Impedance 10,000 ohms, in and out.

LHP Line High Pass Filter. Characteristic Impedance 500 to 600 Ω, in and out.

Band Pass Filters: The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency 40db or more at 0.5 and 2 center frequency.

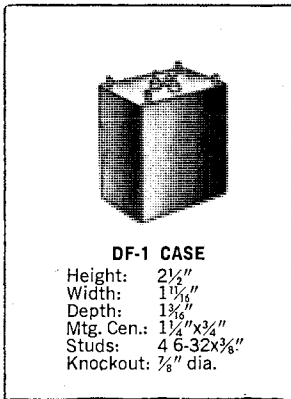

IBP Interstage Band Pass Filter. Nominal input impedance—10,000 ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 2:1. (Output voltage to source voltage.)

LBP Line Band Pass Filter. Nominal input impedance 500 to 600 ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 9:1. (Output voltage to source voltage.)

SERIES 1950 NULL "T" FILTERS

The Freed Series 1950 Null T networks consist of two resistance capacitance networks, whose outputs completely cancel each other at the balance frequency. They may be used as rejection networks particularly at low frequencies where LC filters become excessively large and unstable.

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of ±2%.

All Null T Filters are hermetically sealed.

Prices on request.

Catalog No.	Frequency
NTF- 30	30 cps
NTF- 60	60 cps
NTF-120	120 cps

FREED TRANSFORMER CO., INC.

TELEGRAPH TONE CHANNEL FILTERS

RECEIVING FILTERS

HERMETICALLY SEALED TO MIL-T-27A AND MIL-F-18327 SPECIFICATIONS

Freed Band Pass Filters are extensively used in multiplex frequency shift transmitting and receiving. Stop filters cover all narrow and wide band channels. All units are built with a standard octal socket.

FBT Transmitting Filters are built for a 600 ohm in and out characteristic impedance. Filter configuration allows paralleling of channel outputs. 10db adjacent channel crossover attenuation.

FBR Receiving Filters are designed for a characteristic impedance of 600 ohms in and out. Filter configuration permits paralleling of channel inputs. 20db adjacent channel crossover attenuation.

ULTRASONICS

New developments and applications of ultrasonics for industrial cleaning, soldering, welding, and mixing have created a demand for generators and components specifically designed for ultrasonic applications.

Using the latest developments in the field of special magnetic materials the FREED ultrasonic transformers are designed for greatest efficiency and maximum reliability. They feature small size excellent performance and long life under continuous duty operation.

Transformers with an extended frequency range (frequencies up to 2 MC) can be supplied upon request.

FREED TRANSFORMER CO., INC.

COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment.

The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum impregnation with a non-hygroscopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance.

230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series.

All units, with only a few exceptions, are uncased or of shell-type construction.

Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

TF 18	11 (C.T.) (tapped primary)	12 or 11	7500	DC-5C
TF 19	12.6 (C.T.)	2	1500	CH62

TF 3, 4, 10 & 18 supplied with terminals. All others with leads.

AUTO TRANSFORMERS

To be used as step-down transformer. Equipped with standard receptacle and line cord.

Catalog No.	Transformation	VA Rating	Weight (lbs.)	Case Size
SDT 1*	230/115 V, 50/60 c.p.s.	25	1	CH-60

VARIABLE TRANSFORMERS

Manual uncased unit—exposed terminals

Manual cased unit—exposed terminals

Manual cased unit—enclosed terminals

The Volt-Pac variable transformer is a control device which provides continuously adjustable output voltage from a fixed line input to vary the voltage applied to a particular electrical load. With Volt-Pac units, output voltage is changed by flux transformation... in the unsaturated range of the magnetic core. The results... low cost, versatility, reliability, simplicity, and no wave form distortion.

Volt-Pac units, for surface or back-of-panel mounting, are designed for operation in ambients of -20C to +40C at full rated load, and under all load conditions have low electrical losses.

* When Overvoltage Connection is used, rated current should not be exceeded. Output kva for Overvoltage Connection is maximum output voltage times rated current.

† When using extended tap connections, operation is for 60 cycles per second only.

‡ Output at Overvoltage Connection is 0-132 volts.

§ When operated on lower input-voltage tap, rated current must be reduced when output voltage exceeds 140 percent of input voltage.

¶ For Line-voltage Connection only—No Over-voltage Connection provided.

■ For 240-volt input, 0-240-volt output, application only.

• For 480-volt input, 0-480-volt output, application only.

φ 60 cycles only.

Δ Time to change output from 0 to 100%. Other times, from 2.5 to 60 sec, are available.

\circ When operated on 120-volt input taps, rated current must be reduced when output voltage exceeds 168 volts.

For other footnotes, see opposite page.

GOTHAM

BEYER TRANSFORMERS MINIATURE AUDIO

WOW & FLUTTER METERS ME 101/102

The BEYER line of miniature audio transformers distributed by GOTHAM represents over 30 years of experience in the field on the part of one of Europe's largest quality microphone manufacturers. It is for this reason that we make only one type of transformer in two sizes: A low level audio transformer suitable for microphones, tape playback heads, etc.

A special winding process permits these transformers to be made in this miniature size while maintaining studio quality frequency response, distortion, and level capability. The coil is wound on a continuous laminated core which means the elimination of the split core with its inherent losses. Result is a semi-toroidal construction with its superior resistance to hum induction.

BEYER transformers are used in professional audio equipment by such outstanding manufacturers as Ampex, Bauer, Collins, Precision Instrument, Rust, and many others. All transformers are made to special order to O.E.M. users' specifications. Samples can be supplied within 2 weeks, production usually within 4 weeks.

FOUR PHYSICAL MOUNTINGS ARE AVAILABLE:

Threaded Stud: The Model TR-45 Commercial Quality and TR-145 Studio Quality units are offered in mu-metal housing with threaded stud supplied with two nuts.

Solder Lug: The Model TR-45L and TR-145L are same as above but have radial lugs each end of housing to permit terminal board or Vector socket mounting. Also available in sub-miniature TR-710 Model (see fig.). Primary and secondary windings brought out opposite ends of mu-metal can.

Plug-in: The Model BV-36 is encapsulation of TR-45 and TR-145 Models shown above in molded plastic housing with 7-pin miniature plug base. Same mu-metal shielding.

Printed Circuit: The Model BV-37 is encapsulation of TR-45 and TR-145 Models shown above in molded plastic housing only 1.09" high with special 7-pin, 8-pin, or 9-pin printed circuit base.

ELECTRICAL CHARACTERISTICS:

Transformers are supplied with any turns ratio from 1:1 to 1:150, tapped and split windings, static shielding, high voltage test, vacuum impregnating or other requirements.

TYPICAL TRANSFORMER SPECIFICATIONS: Model TR-145/BV35570 (This Model stocked)

Turns ratio	1:15 ± 10%
Impedance ratio	200/45,000 Ohms nominal
Frequency response	± 0.2 dB 20 - 20,000 cps.
Maximum input level at 1% THD	370 mV at 30 cps.
Primary open circuit inductance (50 cps)	6.0 H
Primary open circuit impedance (50 cps)	1000 Ohms
Primary DC resistance	70 Ohms
Secondary DC resistance	10,000 Ohms
Hum shielding (EIA std.)	> 70 dB.
BASIC PRICE IN QUANTITY OF 1000 UNITS	\$5.37 each

The ME-101/102 instruments are intended for the measurement of the wow and flutter content of all types of recording and reproducing devices. They are fully transistorized, simple and convenient to use. The units are particularly suited for production testing and service work in addition to laboratory testing.

An internal signal generator provides the standard frequency of 3150 Hz. For the purpose of static and dynamic recalibration of the measuring unit, the generator can be detuned in a definite manner or can be frequency modulated from the power line.

Tone fluctuations from ±0.02 to ±2.5% for the ME-101 and ±0.01 to ±0.75% for the ME-102 can be read linearly or weighted as quasi-peak values (according to CCIR and DIN). Hence the properties of high quality tape and record playing equipment, as well as those of dictating machines and home equipment come within the ranges of the instruments. The fluctuation meter ballistics conform to the CCIR standard. A second instrument, the "drift" indicator, measures the frequency deviation of the recorded tone from 3150 Hz. Both indicating instruments can be switched to "rapid" or "slow" indication, as desired.

Besides the normal measuring connections on the front of the instruments, the back is provided with a connector for testing home tape recorders and record players. Other connectors are provided for the connection of external filters, oscilloscopes and graphic recorders.

SPECIFICATIONS

POWER:.....110-125/220-240V, 40-60 Hz.

OSCILLATOR UNIT:

Measuring frequency: 3150 Hz (constancy 1×10^3 after starting up period).

Output voltage: Approx. 0.4Vrms at test output connector.

Calibrating device: ±2% detuning for static and ±0.3% (60 Hz) for dynamic recalibration of measuring unit.

MEASURING UNIT:

Input voltage:.....30mV to 30V, 3150 Hz ±5%.

Input impedance:.....>10 kOhm.

Measuring ranges: ME-101 — ±0.02 to ±0.5% and ±0.1 to ±2.5%; ME-102 — ±0.15% and ±0.75%.

Frequency response of fluctuation indication: Linear position, 0.50 to 500 Hz (-3 dB points). Weighted position, according to CCIR standard with external filter as required.

Drift indication:.....Max. ±4.5%.

Auxiliary output:.....Approx. 20V peak to peak at 22 kOhm.

Dimensions:.....7" x 8" x 1 3/4".

Weight:.....Approx. 11 lbs.

ME-101 — net price F.O.B. N.Y.....\$375.

ME-102 — net price F.O.B. N.Y.....\$395.

GOTHAM AUDIO CORPORATION

DIRECTRON

Industrial Transformers, Selenium and Silicon Rectifiers, Chokes and Power Supplies

RECTIFIER TRANSFORMERS

Transformers are with 2 — 18 volt center-tapped windings. Connected in series delivers 36 volts as rated. Connected in parallel — delivers 18 volts at twice rated current. (Taps 9, 18, 27, 36 V.)

Primary taps at 100, 105, 110 and 115 volts available on 12 amp, 24 amp, 30 amp and 50 amp transformers. No extra charge.

12 amp. Transformer 18T12

MINIATURIZED MILITARY TRANSFORMERS

PICO MINIATURE TRANSFORMERS—PM SERIES

PM-M (Fig. A): Epoxy molded finish; gold plated leads, 0.020" x 3/4". Frequency response = ±2 db, 300 Hz to 100 kHz (PM3 and PM5, to 45 kHz). Power level given for 15% max. distortion, except PM35, 20% and PM37, 25%. Size, .410" x .465" x .310" max. Wt., 0.1 oz. MIL type TF5RX—ZZ. **PM-F (Fig. B):** Open frame, resin impregnated, 4" #30 plastic leads. Size, .250" x .375" x .406" max. Wt., .05 oz. MIL type TF6RX—ZZ.

SUBMINIATURE AUDIO AND TRANSISTOR TRANSFORMERS—SM AND SMT SERIES

SM-AF (Fig. N): MIL-T-27B-AF modified case; compression sealed ceramic terminals; gray enamel finish. MIL type TF4RX—YY. Size, $\frac{3}{4}$ " x $\frac{3}{4}$ " x $1\frac{1}{8}$ " max. with two 4-40NC-2 spade mtg. bolts. Wt., $1\frac{1}{4}$ oz. **SM-H (Fig. K):** Hermetically sealed; high compression glass terminals; gray enamel finish. MIL type TF4RX—YY. Size, $\frac{13}{16}$ " dia. x $\frac{11}{16}$ " h. Weight, 1 oz.

SM-FB (Fig. L): Open frame with channel. With plug-in tab mounted channel or without channel on special order. MIL type TF6RX—ZZ. Size, $\frac{13}{16}$ " x $\frac{19}{64}$ " x $\frac{3}{4}$ ", plus tabs. Wt., 0.750 oz. **SM-M (Fig. O):** Molded, for plug-in PC applications. MIL type TF5RX—ZZ. Size, $\frac{15}{16}$ " x $\frac{7}{8}$ " x $\frac{3}{4}$ " max. Wt., $1\frac{1}{2}$ oz. **SM-CM (Fig. M):** Contour molded on special order; prices on request.

*Bifilar wound to minimize switching transients. #MIL No. 13.

MODEL 400K TRANSISTOR

TRANSFORMER SELECTOR KIT

Set of nine transistor transformer covers impedance range of 150 through 200K ohms, matching most new transistor impedance ratings. Ideal for breadboard circuitry. Sizes range from a $\frac{3}{8}$ " cube to $\frac{3}{4}$ " x $\frac{3}{4}$ " x $1\frac{1}{2}$ ". All are vacuum resin impregnated and have 4" color-coded leads. Includes full design data; nomographs and circuitry for determining correct impedances for Class A and B transistor amplifiers; power versus dbm chart; terminal connection sheet; MIL-T-27B guide; cross reference index; outline drawings for later selection of stock items with same electrical ratings in many other mechanical constructions and reactance chart. Each transformer individually boxed in transparent plastic case.

Microtran Model 400K Transistor Transformer Selector Kit—Net Each. \$29.50

MINIATURE TRANSISTOR AND AUDIO TRANSFORMERS—M AND MT SERIES

M-M (Fig. O): Molded, for plug-in printed circuit use. Cast epoxy resin provides highest resistance to temperature extremes. MIL Type TF5RX—ZZ (Insert MIL No. from table). Max. Size, 1 1/2" x 1/2" x 1/8". Weight, 1 1/2 oz. **M-AG (Fig. Q):** Enclosed in modified MIL-T-27B AG case with compression sealed ceramic terminals. MIL Type TF4RX—YY. Max. Size, 1" x 1" x 1 3/8". Weight, 2 3/8 oz. **M-H (Fig. R):** Hermetically sealed with high compression glass terminals, gray enamel finish. Available on special order with .120" holes. MIL Type TF4RX—YY. Size, 1 1/4" dia. x 1 1/4" max. Weight, 1 1/2 oz. **M-A (Fig. S):** Aluminum case with 2-56 screws. MIL Type TF3RX—ZZ. Size, .875" dia. x 1 1/4". Weight, 1.25 oz. **M-FB (Fig. L):** Open frame with channel. Available with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 1 1/4" x 1 3/8" x 2 7/8" max., plus tabs. Weight, 1.13 oz. **M-P (Fig. T):** Octal plug-in type in sealed plastic housing. MIL Type TF6RX—ZZ. Size, 1 1/2" dia. x 1 1/2". Wt., 2 oz. **M90 Shield (Fig. E):** 25 db magnetic shield for Type M-A. Two clearance holes on 1/4" centers. **M-PC (Fig. U):** Open frame PC with terminals molded into bobbin to maintain accurate dimensions for PC board. MIL Type TF6RX—ZZ. Size, 1/2" x 1 1/2" x 1"; terminals 1/4" below bobbin. Wt., 1.2 oz. **M-CM (Fig. M):** Contour molded on special order only; for mtg. on top of chassis. Size, 1 1/2" x 1/8" x 1/8". Prices on request.

DC TO DC CONVERTER TRANSFORMERS—BLOCKING OSCILLATOR TYPE

Laminated series blocking oscillator type. Approximate repetition rate, 400 Hz. All are Fig. L except M8051, Fig. Q. DC output voltage for all but M8073 is given for transformer used in blocking oscillator circuit with single capacitor-input rectifier. DC input current, output current and output voltage of Model M8073 depend on load and bias; frequency varies from 100 to 2800 Hz. Fig. L types are open

frame units meeting MIL designation TF6RX09ZZ; Fig. Q type is enclosed unit meeting MIL designation TF4RX09YY.

MICROTRAN MINIATURIZED MILITARY TRANSFORMERS

DC TO DC CONVERTER TRANSFORMERS—SWITCHING TYPE LAMINATED SERIES

Provide improved reliability and efficiency over vibrator and rotary power converters. Approximate repetition rate, 800 Hz. Full wave and CT loads may be simultaneously drawn, but total VA output should not be exceeded for continuous-duty operation. All are Fig. P except M8072 and M8120. Fig. L. Transistors listed are for reference only; user must verify that max. ratings will not be exceeded.

400 Hz TOROIDAL POWER TRANSFORMERS (FIG. W)

Ideal for applications requiring minimum size and weight. Feature epoxy molded case and printed circuit pins which can be bent for chassis mounting. Toroidal cores provide greater efficiency and low phase shift. All have 115 V primary windings and center .170" clearance hole for #8 screw. MIL Type TF5SX01ZZ.

MICROTRAN MINIATURIZED MILITARY TOROIDAL INDUCTORS

ULTRA-MINIATURE TOROIDAL INDUCTORS—QE-M SERIES

Affords new application opportunities in high density packaging. Ultra miniaturized with low height design. Exceptionally high "Q" and wide frequency range. Available on special order with =1% inductance tolerance. Frequency range of QEL Series 1 to 300 kHz; QEM, 3 to 500 kHz. Accuracy, =2%. Molded in epoxy resin with .020" x 2" gold-plated nickel alloy leads. Size, .450" dia. x .285".

OHMITE variable transformers

Unique for the design innovations they incorporate, Ohmite "OHMITRAN" v.t.® variable transformers include exclusive field-proven features. They offer long, low maintenance operation with excellent regulation at any voltage setting within the rated load plus an output free of waveform distortion. Six frame sizes offer a wide range of electrical ratings to meet most industrial applications. These include three new, compact, low-power models (VT1, VT02, VT3,) which permit a fine choice of six ratings from 1 to 3 amperes.

The VT1, rated 1 ampere, is the smallest commercial variable transformer available.

UL LISTING: Most single and tandem VT4, VT8 and VT20 transformers used for 120 volt line operation are Underwriters' Laboratories listed. Consult factory for specific approvals.

POSITIVE CURRENT TRANSFER... achieved with specially designed brushes connected through high conductivity contact arms or pigtails to a large slip ring which contacts a wide area of the collector ring. The brush contact assembly on the VT1, VT02, and VT3 is instantly replaceable, when necessary, as a result of a slide-on, snap-in design. Brushes of the other models are easily replaced also.

ADJUSTABLE SHAFT: On all Ohmite transformers, except the VT2LN, the shaft may be extended out from either the brush or opposite side as desired. On the VT1, VT02 and VT3, both single and tandem assemblies, this is an exclusive Ohmite feature which affords greater versatility of mounting and application. For example, substitution of a longer shaft or extension of the standard shaft allows actuation of other devices, such as switches or potentiometers without special construction. The shaft is freed simply by loosening set screw in the hub assembly. A double flat on the shaft permits two knob positions.

On the VT4, VT8, and VT20 types, the adjustable shaft feature permits table or panel use. "Ganged" or tandem VT4, VT8 and VT20 units employ a thru-shaft offering the same flexibility. On VT4 and VT8 units, shafts are fixed in the desired position by means of socket head screws located in the hub of each "brush-radiator" plate. The VT20 employs a unique collet-type shaft lock.

INTERCHANGEABLE WITH OTHER POPULAR TYPES: Basic "v.t." units have mounting provisions which match those of virtually all popular transformers

of comparable current rating. Models VT4, VT8 and VT20 mount by means of bolts. Normally 3-hole mounting, single VT4 units can be "4-hole mounted" by means of adapter plate, see page 34. Individual Model VT1, VT02, VT2LN, or VT3 units mount by means of a standard 3/8-32 threaded bushing. All tandem assemblies mount by means of bolts or nuts. Knob, dial and mounting hardware are included with each transformer.

DIRECT READING, TWO SCALE DIAL... calibrated on one side for over-voltage connection; on the reverse side for line voltage connection. Dials normally included with transformer read clockwise for increasing voltage; counter-clockwise calibration available—see page 27.

WIRING AND CONNECTIONS: Wiring instructions to arrange various modes of operation are enclosed with all OHMITE variable transformers. Terminal panels or adjacent nameplate carry convenient wiring diagram, coded terminals and input and output data. Three way terminals on VT1, VT2LN, VT02, VT3 will accept 1/4" push-on connectors, screws and nuts, or conventional soldering.

ROTATION OPTION: On VT4, VT8 and VT20 transformers connected for over-voltage, either clockwise or counter-clockwise increase of voltage can be arranged easily by the user. Increasing voltage in either direction can be arranged on all units connected for no-overvoltage output. Dials for counter-clockwise operation are stocked. See "Accessories."

OVERVOLTAGE OPTION: On all transformers with overvoltage feature, no-overvoltage operation can be arranged on the terminal panel.

NO-OVERVOLTAGE TRANSFORMERS ("N" suffix): Provide considerably more current due to heavier gage winding.

240-VOLT INPUT ("H" suffix): On units which are wound for 240-volt input, a 120 volt input tap is also provided. With the use of this input, the maximum current rating applies up to 120 volts output but beyond this reduces proportionately to approximately 50% at maximum voltage output.

LOW VOLTAGE INPUT ("L" feature): Designed for a maximum input of approximately 40 volts, with high current output.

GROUNDING INPUT & OUTPUT ("C" feature): Units in type F or G cases can be provided with a three-conductor cord and outlet. One conductor is grounded to the case. This feature standard on all cased VT20 units and on all metered units.

VT1, VT02, VT2LN, VT3, SINGLE, UNCASED

ENCLOSED OR CASED UNITS: In grey wrinkle finish. "Basic protective enclosures" (Type B) expose the transformer's terminal panel and mounting base and are supplied presently on VT20 models only. (See tandems in "B" enclosures below.) "Fixed mounting enclosures" (Type E) are intended for permanent mounting on table, panel or in-conduit-line. Standard portable units (Type F) carry a line cord, outlet socket, and fuse except for VT20F which has a circuit breaker. Deluxe portable units (Type G) utilize a circuit breaker, can be switched to overvoltage or no-overvoltage as desired, have a handle which also serves as an easel.

METERED ENCLOSURES: VT8NFC, VT8GC, VT20NFC and VT20GC transformers are available with voltmeter (V), voltmeter and ammeter (A) or voltmeter and wattmeter (W). The metered transformer enclosures are larger than the non-metered types of comparable designation, (see dimensions below). All stock metered units have the three-conductor grounded cord and outlet and all, except the VT8NF group, are equipped with carrying handles.

SINGLE UNIT CASE DIMENSIONS

Series	Case	W	D	H
VT1 or VT02	E	3 $\frac{3}{8}$ "	2 $\frac{1}{2}$ "*	4 $\frac{1}{4}$ "
	F	3 $\frac{3}{8}$ "	2 $\frac{1}{2}$ "*	4 $\frac{1}{4}$ "

* Add 1" for knob thickness for VT8 types; $\frac{7}{8}$ " for VT1, 02 and VT4 types, $1\frac{1}{4}$ " for VT20 types.

† 5 $\frac{1}{16}$ " including handle fittings.

‡ Case height only.

§ 9" including handle fittings.

◆ V, A and W = voltmeter, ammeter and wattmeter respectively.

TANDEM OR GANGED UNITS: Two or 3-in-tandem assemblies are standard. Larger tandem assemblies available made to order. All tandem assemblies are normally furnished with inter-connections between the units. A few cased tandems are stocked. Tandems in "B" type enclosures have individual cases on each transformer.

TANDEM VT1, VT02, VT3 DIMENSIONS

Footnotes for Stock Table

- Frequency shown is a minimum — units may be used up to 1000 cps.
- VT8H and VT20H and 240V output for VT8HN and VT20HN. With use of 120V input VT8H, VT8HN, VT20H, VT20HN also have taps for 120V input with 280V output for the max. current rating applies up to 120V output but reduces to approx. 50% at max. output voltage. In the case of tandem units, use of the low voltage inputs would correspondingly derate the current at the higher output voltages.
- Connected at factory for overvoltage output — easily reconnected by user for no-overvoltage output. On VT8G and VT20G, switch selects overvoltage or no-overvoltage.
- User wires for desired output. Dial normally calibrated for overvoltage.

⁵ 2-in-tandem normally wired for series connection; 3-in-tandem for Y connection.

⁶ When transformers are series connected, load cannot be grounded.

⁷ Includes knob, dial and mounting hardware.

⁸ May be used at 50 cps if connected for no-overvoltage output.

⁹ Overvoltage connection must not be used.

¹⁰ 240/280 volt cw dial standard except on VT1, VT02 and VT3 tandems where 240/264 volt dial is standard or on VT8-2, VT8HN-2, VT8H-3, VT20H-2, VT20HN-2, VT20H-3 and VT20HN-3 where 480/560 volt dial is standard. Request other dials if desired — see "Dials" above.

MOTOR-DRIVEN ASSEMBLIES

Single or tandem assemblies can be supplied with motor drives, direct from the factory. Either AC or DC motors are available. Standard AC motor drives have traverse speeds of 3-4, 10-12, 40-50, 100-120 seconds. Typical traverse speeds for DC drives are 4, 8, 16, 30 and 45 seconds. Write to the factory for more information.

solid state electronic dimmers for incandescent lighting

600 WATTS

Replace Any
 2 or 3-Way
 Switch
 Made by OHMITE
 Famous Producer of
 Quality Components

CONTINUOUSLY VARIABLE DIMMING by means of silicon symmetrical switch — a modern semiconductor device.

PUSH-PUSH KNOB for ON/OFF at any light setting.

CONSERVES POWER — Draws only the power needed by the circuit at the light level desired.

SCREW TERMINALS for convenient wiring without splicing or wire fastening nuts — eliminates space consuming leads — permits use of dimmer even in shallow boxes.

NO RADIO OR TV INTERFERENCE due to special filter.

GUARANTEED for 1 year against defects in materials and workmanship provided units have been properly installed and operated.

INSTALLATION NOTES

Maximum Ambient — 120°F.
 Use only 1 dimmer for each lighting circuit.
 Install dimmer with power OFF.

Ganging — Several dimmers may be installed in a common box provided units are derated as follows: two units, 500 watts each; three or more units, 400 watts each.

CONNECTIONS—
DIMMER SINGLE POLE

CONNECTIONS—
3-WAY

ORDERING INFORMATION

Stock No.	UL Listed	Description	Net \$
LD600 N	—	Single-Pole Push-Push Switch	7.00
LD600	Yes	600 Watts, 120 Volts, 60 Cycle	9.30
LD600-3 N	—	3-Way Push-Push Switch	9.50
LD600-3	Yes	600 Watts, 120 Volts, 60 Cycle	11.30

ITEMS APPEARING IN BOLD PRINT ARE POPULAR MODELS AND ARE USUALLY STOCKED BY AUTHORIZED OHMITE DISTRIBUTORS

SPRAGUE**PULSE TRANSFORMERS****Type 11Z****TRIGATE[®] PULSE TRANSFORMERS**

**FLEXIBLE LEAD AND PRINTED WIRING BOARD DESIGNS
FOR LOW-COST SCR CIRCUIT APPLICATIONS**

- Specifically Designed For Commercial and Industrial SCR Triggering Applications Where Low Cost and Excellent Performance Are Required
- Single-ended Pulse Transformers Are Designed With Leads Especially Intended For Mounting On Printed Wiring Boards; These Units are Self Supporting
- Balanced Pulse Characteristics and Energy Transfer Between Windings
- Minimum Saturation Effect To Allow Operation Where Increased Pulse Widths Are Required
- Fast Pulse Rise Time and Increased Current Capability To Prevent SCR di/dt Failure
- Operating Temperature Range of -10 C to $+70\text{ C}$
- For Complete Technical Data, See Latest Issue of Sprague Engineering Bulletin 40003
- Call Your Sprague Industrial Distributor For Current Quantity Prices

HIGH & LOW CURRENT CHOKES 0.1 to 1000 AMPS

OPEN FRAME • EPOXY ENCAPSULATED (GRADE 5) • HERMETICALLY SEALED (GRADE 4)

Signal's line of High Current Chokes is the most extensive available. It is designed to complement the selection of High Current Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guar-

anteed at full DC current. All resistance ratings are maximum values.

Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

FOR MECHANICAL DIMENSIONS REFER TO TRANSFORMER OUTLINES ON PREVIOUS PAGE.

* For epoxy encapsulation add prefix "E" to Part No., e.g., E-CH-1 add ¾ to L, W, H Dim. Grade 5.

† For hermetically sealed units add prefix "H" to Part No., e.g., H-CH-1, Grade 4.

INDUCTANCE VARIATION WITH DC CURRENT

The curve shown applies to the whole line of chokes. It allows the user to determine the value of inductance which will be obtained at intermediate and overload values of DC current. The values on the curve are stated in generalized coordinates of % inductance versus % DC current.

For example, the CH-100 at 50 amperes (50% DC Current) will have an inductance of 0.75 MHY (150% of rating), the CH-25 at 31 amperes (125% DC current) will have an inductance of 3.5 MHY (70% of rating).

It is not recommended that chokes be used at over 100% of rated current since temperature rise will then be excessive. However, if load current is intermittent, and RMS current is less than maximum rated current, it is permissible.

Special "swinging chokes" can be supplied where the slope of this characteristic is emphasized. Specify minimum inductance required at two current values (usually maximum and minimum current) and we will furnish prompt quotations.

MULTI-VOLT
1 to 54 VOLTS
in 1 VOLT STEPS

"MV" LINE

MV (multi-voltage) secondaries may be series connected for any output from 1 to 54 volts, in 1 volt steps, at rated current. This is accomplished by using the small buck-boost secondary.

As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections.

WINDINGS OF HEAVY COPPER STRIP

STRIP-WOUND SECONDARIES

At the heavy current used in this line it becomes practical and desirable to use wide copper strip (as wide as the coil itself) for windings. Besides the obvious advantages of excellent winding space factor, the heat dissipation of the coil is improved. This improvement is due to the fact that the heat generated in the windings has a pure copper path to the coil ends, where it can be dissipated. In conventional windings of many turns per layer this heat flow is impeded by wire insulation and air spaces between turns. Therefore, the use of copper strip windings yields a dramatic reduction in size and weight.

GRAIN-ORIENTED STEEL CORE

These cores permit the use of higher peak flux densities for the same core loss. This results in a lower number of turns required and therefore, a smaller, more compact transformer.

CLASS F INSULATION USED THROUGHOUT

Class F insulation is rated for unlimited life at a total temperature of 155°C (ambient plus temperature rise).

Class A insulation has a maximum temperature rating of 105°C. The "nominal" current ratings given to this series are for a temperature rise of 45°C above 55°C ambient (Class A). Since Class F insulation is used it is permissible to increase these ratings by 40% (700 and 1400 amperes) without reducing the reliability of the transformer. The temperature rise will be 100°C over a 55°C ambient. The only limitation is not the transformer, but the temperature rating of surrounding components which may be affected by the additional heat radiated by the transformer.

SIGNAL TRANSFORMER CO., INC

INDUSTRIAL GRADE STEP-UP OR STEP-DOWN POWER ISOLATION OR AUTO-TRANSFORMERS

HIGH DEGREE OF VERSATILITY OFFERS MANY POSSIBLE VOLTAGE RATINGS

AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "UP" lines are designed for a maximum of 55°C rise above ambient, for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current, continuous operation.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers. Connections can be easily made with a nut driver. It is also simple to alter the inter-connections to change transformer ratings.

"DU SERIES" 110/220 Dual Primary To 110/220 Dual Sec.

As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as

208, 214, or 230 volts.

It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

"UP SERIES" 110/220 Dual Primary To 0/130/135/140 V. Sec.

The "UP" line utilizes the same dual primary as the "DU" line. It has, however, a single secondary rated at 0/130/135/140 volts. This type is quite useful to boost -low line

voltages or raise line voltages to compensate for drops in series elements. It also finds application in bridge rectifiers for DC voltage outputs of approximately 115 to 130 volts.

SIGNALS CUSTOM SERVICE

Many of our customers do not realize that the major portion of our shipments consists of "special" or "custom" items.

Usually, the final application of one of our stock transformers does not require the full number of taps or windings provided. These naturally are part of the cost of the item. If we are advised as to

the specific taps used or as to what intermediate voltage or current is required we can begin production quickly on this variation of our stock item. If we define production quantities as roughly over 50 pieces, the customer will do better price-wise on his custom made item than on the standard.

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher

conversion efficiency and lighter power line drain of 3 phase systems. Since the principal application of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

SIGNAL TRANSFORMER CO., INC

ENGINEERS • DESIGNERS • MANUFACTURERS

CONSTANT VOLTAGE TRANSFORMERS

FOR USE IN DC POWER SUPPLIES (TYPE CDC)

CDC CONSTANT VOLTAGE TRANSFORMERS

Signal's CDC Regulating Transformers are specifically manufactured for use in DC Power Supplies. They are designed and rated for use with a full wave center-tapped silicon rectifier. CDC transformers are operated in ferro-resonance and are used in conjunction with an AC tuning capacitor (Cr in schematic diagram), which is supplied with the transformer.

In order to construct a regulated power supply the only other parts necessary are two diodes (D₁ and D₂), an electrolytic computer grade capacitor (C_r) and a bleeder resistor (R_b). These are standard shelf items.

The specification chart lists specific outputs available and the recommended auxiliary components. Part numbers are coded in terms of DC outputs, e.g., CDC-15-2 will give an output of 15V DC at 2 amps DC.

Electrical performance is completely specified. The DC voltage is constant to $\pm 1\%$ over the line voltage range of 100 to 130V at 60 HZ. The nominal output is held to $\pm 2\%$. Closer tolerance on nominal output ($\pm 1\%$) can be obtained on special order at slightly higher cost.

Load regulation is specified as the rise in dc voltage output (increase in E_{dc}) from full load to the no load, 1/4 load, and 1/2 load points. The filter capacitor (C_r) specified should be used and will yield the values of ripple voltage shown.

A significant protection feature is the fact that the DC short circuit current is limited to a maximum of 2 times rated current (3 times in size "C-6" units). This protects the entire circuit against shorts.

250 ACV-26	26	10	B-250
250 ACV-118	118	2.2	B-250
500 ACV-118	118	4.5	B-500

Signal ACV transformers are manufactured for use with AC loads. They are simple and rugged designs and will regulate to within plus or minus 1% for input variations from 95-130V at 60 cps. If regulation of plus or minus ½% or better is desired, special units can be made to your order. ACV transformers will regulate with loads that are not unity power factor.

Full regulation is maintained at any load from about 20% to 100%. Overload current is limited to a maximum of 200% of rated current at short circuit. The 6.4 and 12.8V ratings are ideal for use with tube or lamp loads since the short circuit current rating limits the inrush current to cold filaments. Stabilization of the voltage results in longer filament life.

ACV transformers are "normal" harmonic type with approximately a square wave output.

MECHANICAL DIMENSIONS

STYLE & SIZE	L	W	H	ML	MW	MTG. SCREW
C-6	3¼	1⅞	1⅝	2⅜	—	#8
B-25	3	2⅝	3⅞	2⅝	1⅝	#8
B-50	3	3⅝	3⅞	2⅝	2⅞	#8
B-120	4	3⅞	4⅞	3½	2⅞	#10
B-250	4	5¾	4⅞	3½	3⅞	#10
B-500	5	5¾	5⅞	4⅞	3⅞	#10

ADVANTAGES OF CONSTANT VOLTAGE TRANSFORMERS

REGULATION — output regulated to plus or minus 1% for line voltage variations of 95 to 130V at 60 cps.

SELF-PROTECTION — against output short circuit. Current limited to a maximum of 2 times rated current.

MECHANICALLY RUGGED — as resistant to mechanical shock as conventional power transformers.

NO MOVING PARTS — no adjustment or maintenance necessary.

SQUARE WAVE OUTPUT — ideal for use in rectifier circuits — little filtering needed.

HIGH DEGREE OF ISOLATION — between input and output circuits — both physical and electrical isolation, electro-static shields not necessary.

RESONATING CAPACITOR — supplied with transformers.

EPOXY IMPREGNATION — minimizes acoustic noise.

SOLA®

constant voltage transformers

The SOLA® constant-voltage (CV) transformer is a static-magnetic voltage regulator which provides a stabilized output voltage even though the input voltage varies over a wide range.

Stabilized voltage is required for the efficient operation of many types of electrical and electronic equipment, and also prolongs the life of electronic components by eliminating over-and-under-voltages and protects against excessive inrush and fault currents.

Sola transformers are available in designs with harmonic neutralized (CVS) and normal harmonic (CVN) wave-shape outputs. The CVS is used where a distortion-free output is required to drive sensitive instruments and equipment. Electronic-power types are also available for filament (CVF) and plate-filament (CVE) service.

This catalog lists the wide range of stock ratings and types available off-the-shelf from your nearest Sola stocking distributor. For custom designs in OEM quantities, contact your nearest Sola sales offices or the factory.

SOLA® CVS-harmonic neutralized type

Sola CVS type transformers contain less than 3% total rms harmonic content in the output. Recommended for all AC applications where harmonics can affect operation, CVS types are the only constant voltage

transformers with built-in harmonic neutralizing circuits. CVS transformers use no filters and therefore do not need extra capacitors and noisy chokes. CVS transformers are smaller and more rugged than

transformers employing filters for wave-shape improvement. Regulation is ±1% for an input range of ±15% of nominal voltage.

60 Hertz single phase

(1) Adapter Kit code designates type of adapter required to convert standard internal wiring hookup to line cord and plug input and plug receptacle output.

SOLA® constant voltage transformers

SOLA® CVN-normal harmonic type

Sola CVN type transformers provide the same ±1% regulation as the sinusoidal series. CVN transformers contain an average of 20% rms harmonic content and are recommended for

electrical loads not affected by harmonics, such as solenoids, relays, filaments and where rectification is required.

SOLATRON® line voltage regulators

The Solatron® LVR is the first regulator to combine in one unit the qualities of fast response, "tight" voltage regulation, no moving parts, adjustable output, compactness, and high kva capacity.

The Solatron® regulator holds voltage constant within $\pm 1\%$ for any combination of line, load, and frequency, in the face of line variations up to $\pm 10/-20\%$, load variation from 0-100%, and frequency variation of $\pm 5\%$ or greater.

The Solatron is a solid-state device with no moving parts, requiring no adjustment, maintenance, or attention. It combines the ruggedness typical of transformers with the light weight of electronic control circuitry, resulting in a regulator of remarkable compactness. It has great versatility in location, floor or wall mounting, and installation.

60 cycle (57-63 Hz) single-phase

SOLA® Multi-tap™ CVR regulated power supply transformer

The SOLA Multi-tap™ CVR is a constant voltage transformer with taps to provide special voltages ready for rectification with stock silicon rectifiers to complete a regulated d.c. power supply. In effect, the Multi-tap CVR is a custom SOLA CV transformer with off-the-shelf availability, at low cost, for small quantity requirements. Six models provide over 100 regulated output voltages. The relatively square

wave-shape makes the Multi-tap CVR especially suited to rectifier applications.

All CVR transformers are designed to operate in Full wave center tap or bridge type circuits with readily available stock silicon rectifiers. The regulating ability and typical characteristics of the CVR are similar to the familiar Sola constant voltage (CVN) transformer.

Designed for 105-125 VAC, 60-cycle input.

applications for the Multi-tap™ CVR

- Design of a regulated d.c. power supply requiring custom output for short-run production.
- Building block systems requiring voltage adjustability for later additions of components.
- Systems requiring voltage adjustability to compensate for line drop to remote units.
- Immediate requirements when custom Sola CV is being designed and manufactured.
- Short-run production requiring low-cost, and "off-the-shelf" custom Sola CV.
- Prototypes requiring custom Sola CV transformers.
- Immediate requirements for experimentation.

schematics for CVR series

Connection for Full-wave center tap rectification for maximum output.

Connection for Full-wave Bridge rectification, for maximum output.

Each CVR model has the winding arrangement and terminal numbering shown in the schematics at left. The primary winding is connected to the two terminals marked "line" on the capacitor side of the transformer or terminals marked #11. Write for complete hook-up tables showing output possibilities.

*60 cycle operation only at overvoltage. †Factory connection for line voltage output. **60 cycle operation only.

120 VOLT SINGLE PHASE MODELS WITH CORD & RECEPTACLE

All models housed in rugged cases include pilot light, switch, fuse, line cord, plug and matching receptacle.

2PF models are equipped with 2-wire cords, plugs and receptacles.
3PN models are equipped with 3-wire grounded cords, plugs, and receptacles.
Model 2PFR1510BV is equipped with output voltmeter.

120 VOLT VARIABLE ISOLATION TRANSFORMERS

STACO Isolated Variable Autotransformers provide a means for smooth control of an electrically isolated AC voltage output. UnCased models offer isolated, non-isolated, voltage doubler, and series connections with proper external hook-up. Cased models feature circuit breaker (except fused type J201BV), switch, pilot light, output voltmeter, 3-wire grounded cord, plug, and matching receptacles. Cased models available in isolated connection only. Ratings shown are for isolated connections.

STACO®
Variable
Autotransformers

When you specify Staco Variable Autotransformers you get all these important advantages: Variable output voltages with high efficiency, reliability and minimum maintenance; epoxy coated coils (where possible) that increase commutator stability; optimum core and coil design results in higher current ratings and greater overload capabilities; delivery of output voltages of zero to line voltage or zero to 17% above line voltage; terminals permit connection for increasing voltage in either clockwise or counter-clockwise rotation of knob; regulation is independent of load . . . zero wave form distortion; moderate temperature rise; precious metal plating of commutator surface eliminates oxidation and deterioration; all units designed for 50/60 cycle operation except as noted.

STANCOR STANDARD TRANSFORMERS

**When you use STANCOR STANDARD
Transformers you are assured of . . .**

IMMEDIATE AVAILABILITY

Sold by Industrial Electronic Distributors in major marketing areas — AT
FACTORY PRICES IN ANY QUANTITY.

HIGHEST QUALITY

Millions of standard transformers, time-tested and field-proven for over
35 years.

COMPETITIVE PRICES

Mass production facilities — to supply its extensive distributor organization
— enable Stancor to manufacture at lowest costs.

STOCK IN DEPTH

Over 300,000 transformers stocked in our warehouses strategically located
throughout the country.

SERVICE REPLACEMENT

Available from over 1000 Industrial and Service Parts Electronic Distributors
located in over 500 cities.

SOLD NATIONALLY
THROUGH ELECTRONIC DISTRIBUTORS BY

STANCOR

OUTPUT TRANSFORMER CHART

A simplified selection of the proper transformer for use as a replacement in radio receivers or in the construction of audio amplifiers. To use this chart, check the first column for the tube being used, then read across for the applicable operating characteristics and correct Stancor transformer. In most cases, two Stancor part numbers are indicated in order to give a choice of Mounting styles.

a. Has Screen grid taps on primary. b. Has Tertiary Winding to provide 15% inverse feedback. c. Has cathode feedback Winding.
* Available until stock is depleted

STANCOR-WILLIAMSON ULTRA-LINEAR HIGH FIDELITY AMPLIFIER

Has had wide acceptance due to its fine performance characteristics and ease of assembly.
Power output — 25 watts with less than 1% total Harmonic distortion and negligible intermodulation distortion. Frequency response — flat from 20 cycles to 40KC. Write for Bulletin 479 for complete Parts List, schematic and performance curves.

Parts Available from Stancor:

- WM-8 Chassis set — Completely punched and finished
 - PC-8412 Power Transformer
 - C-1411 Choke
 - A-8072 Output Transformer
- For Transformer ratings, refer to index.

* Available until stock is depleted

The following table lists various amplifier power outputs with the corresponding impedance tap on the output transformer which will supply these three basic line voltages:

POWER OUTPUT WATTS	IMPEDANCE FOR 140 VOLT LINE	IMPEDANCE FOR 70.7 VOLT LINE	IMPEDANCE FOR 25 VOLT LINE
	OHMS	OHMS	OHMS
5	4,000	1,000	125
10	2,000	500	62.5
15	3,333	333	41.7
20	1,000	250	31.2
25	800	200	25
30	666	166	21
40	500	125	15.6
50	400	100	12.5
60	333	83	10.5
80	250	62.5	7.8
100	200	50	6.3

For power ratings not shown in this table, use the following formula:

$$Z = \frac{E^2}{W}$$

$$Z = \text{Ohms}$$

$$E = \text{Volts}$$

$$W = \text{Watts Output}$$

Impedance
Tap for:

$$140 \text{ volt line} = \frac{20,000}{W}$$

$$70.7 \text{ volt line} = \frac{5,000}{W}$$

$$25 \text{ volt line} = \frac{625}{W}$$

POLYCHROMATRANS With Multiples of 0.1" Grid Spacing for Printed Circuits.

COLOR CODING by application to assure immediate and positive transformer identification.
RECTANGULAR SHAPE allows the utmost utilization of space and stacking in limited area.

PROTECTIVE STAND-OFF prevents solder flow-back and maximum lead exit protection.
SPACED LEADS of fatigue resistant gold plated nickel-iron alloy are .020" in diameter, 9/16" long and have multiples of 0.1" grid spacing for printed circuit application.

ULTRA MINIATURE

Here are the smallest iron core audio transformers ever built. They weigh less than 1/10 ounce and are no larger than the transistors they power.

These transformers are designed primarily for transistor audio applications but they can be used wherever low power is involved. Useful range, below 1 mw level. They are constructed of extremely fine wire, wound on molded nylon bobbins, with special nickel alloy steel laminations.

STANCOR

COMMERCIAL

power transformers

Stancor's broad line of commercial grade power transformers offers a choice of standard mounting styles. Listings are in ascending order of plate-supply voltage for ease of selection.

All units are designed and built to meet the exacting requirements of EIA for electrical tolerances, dielectric strength, temperature rise and construction. All are insulated with class A materials; (105°C max. operating temperature).

Transformers designed for full-wave C.T. rectification with capacitor input filter may be used with choke input filter allowing an increase in D.C. current of 30%.

Transformers designed for full-wave C.T. rectification with choke input filter may be used with capacitor input filter requiring a decrease in D.C. current of 25%.

CONSULT FACTORY for detailed information concerning electrical rating and/or mechanical characteristics.

Note: Filtering shown permits maximum output ripple voltage of 3% or less.

*Quantity Shown is Total Number used in a given circuit. Rectifiers should be equivalent to Sarkes Tarzian numbers shown.

*Surge protection resistors are recommended when capacitor input filters are used. Allow 3.3 ohms per 70 volts R.M.S. applied voltage. Transformer secondary winding D.C. resistance may be used as part or all of the amount required.

SILICON OR SELENIUM RECTIFIER TRANSFORMERS:

Primary — 117 Volts 50/60 Cycles.
Solder Lug Termination

These transformers have been designed to operate in full-wave center tap or bridge rectifier circuits. The D.C. voltages shown are approximate since they depend on the internal drop of the rectifiers used.

Primary taps and an additional buck or boost tapped winding provides a wide range of output voltages. For detailed terminal connections, output voltages, etc. write for bulletin 518-R. For matching high current chokes see page 22.

*Available for either 3/16" or 1/8" Mounting hole. Use suffix "A" for 1/8" hole.

†Adapter supplied for either 3/16" or 1/8" Mounting hole.

‡Only for 1/8" Mounting hole.

§For 1 1/4" Mounting Centers equipped with slider.

¶Shipped without core, use original core.

‡ Available until stock is depleted

COLOR DEGAUSSING COIL:

Catalog No. — DGC-100

With 10-foot Line Cord and In-Line Switch

Full 12" Diameter for
Faster — Better Demagnetizing
of Color TV Sets.

C.R. TUBE BOOSTER:

Catalog No. — P-8192 (For parallel heaters only)

- No connections to solder.
- HI-LO switch provides two levels of brilliance.
- Does not require AC line connections.
- Measures only 3 1/2" high, 1 1/2" in diameter.
- Does not change CR tube space requirements.

transistor transformers

UNIVERSAL DC POWER MODULE TRANSFORMERS

High reliability transformers having a tapped primary and single or dual secondary windings which may be connected F.W. bridge or F.W. center tap so as to obtain a wide range of DC voltages and current ratings.

INPUT PRIMARY 115 volts 50-500 cps

NANOSPEC 900 SERIES

Designed for printed circuit transistor use in high component density applications.
Epoxy resin encapsulated.

STERLING TRANSFORMER CORP

STANDARD INTERSTAGE AND LINE TRANSISTOR AND TUBE APPLICATIONS

filters

Hermetically Sealed - Manufactured to MIL-F-18327B Available in Other Frequencies

LOW PASS

INTERSTAGE

LI units have a loss of approximately 3 db at cutoff frequency, and an attenuation of 35 db at 1.5 cutoff frequency. Input and output 10,000 ohms. LI units are MIL type FR4RX11YY.

Part No.	Frequency	Case Size	Net Price
LI-60	60 cps	A	34.65
LI-100	100 cps	A	34.65
LI-200	200 cps	B	34.65
LI-400	400 cps	B	34.65
LI-500	500 cps	B	34.65
LI-800	800 cps	B	34.65
LI-1,000	1,000 cps	B	34.65
LI-1,500	1,500 cps	B	34.65
LI-2,000	2,000 cps	B	34.65
LI-2,500	2,500 cps	B	34.65
LI-3,000	3,000 cps	B	34.65
LI-4,000	4,000 cps	B	34.65
LI-5,000	5,000 cps	B	34.65
LI-10,000	10,000 cps	B	34.65

LINE

LL units have a loss of approximately 3 db at cutoff frequency, and an attenuation of 35 db at 1.5 cutoff frequency. Input and output 500/600 ohms. LL units are MIL type FR4RX11YY.

Part No.	Frequency	Case Size	Net Price
LL-600	600 cps	A	34.65
LL-1,000	1,000 cps	A	34.65
LL-1,500	1,500 cps	A	34.65
LL-2,000	2,000 cps	A	34.65
LL-2,500	2,500 cps	A	34.65
LL-4,000	4,000 cps	A	34.65
LL-8,000	8,000 cps	A	34.65
LL-10,000	10,000 cps	A	34.65
LL-12,000	12,000 cps	A	34.65

CASE DETAIL

HIGH PASS

INTERSTAGE

HI units have a loss of less than 6 db at cutoff frequency, and an attenuation of 35 db at .67 cutoff frequency. Input and output 10,000 ohms. HI units are MIL type FR4RX33YY.

Part No.	Frequency	Case Size	Net Price
HI-100	100 cps	A	34.65
HI-200	200 cps	A	34.65
HI-300	300 cps	A	34.65
HI-400	400 cps	A	34.65
HI-500	500 cps	A	34.65
HI-800	800 cps	A	34.65
HI-1,000	1,000 cps	A	34.65
HI-2,000	2,000 cps	A	34.65
HI-3,000	3,000 cps	A	34.65

LINE

HL units have a loss of less than 6 db at cutoff frequency, and an attenuation of 35 db at .67 cutoff frequency. Input and output 500/600 ohms. HL units are MIL type FR4RX33YY.

Part No.	Frequency	Case Size	Net Price
HL-200	200 cps	A	42.90
HL-300	300 cps	A	42.90
HL-500	500 cps	A	42.90
HL-1,000	1,000 cps	A	42.90

FOR WIDE BAND PASS FILTERS THE LI & HI OR LL & HL MAY BE CONNECTED IN SERIES.

BAND PASS

INTERSTAGE

BI units have 2:1 voltage gain. They are sharply peaked, having approximately 2 db attenuation at plus or minus 3% from center frequency and attenuation greater than 40 db at 1/2 and twice center frequency. Input 10,000 ohms, output to grid. BI units are MIL type FR4RX22YY.

Part No.	Frequency	Case Size	Net Price
BI-50	50 cps	A	33.00
BI-60	60 cps	A	33.00
BI-100	100 cps	A	33.00
BI-120	120 cps	B	33.00
BI-200	200 cps	B	33.00
BI-240	240 cps	B	33.00
BI-400	400 cps	B	33.00
BI-500	500 cps	B	33.00
BI-750	750 cps	B	33.00
BI-800	800 cps	B	33.00
BI-1,000	1,000 cps	B	33.00
BI-1,500	1,500 cps	B	33.00
BI-2,000	2,000 cps	B	33.00
BI-3,000	3,000 cps	B	33.00
BI-4,000	4,000 cps	B	33.00
BI-5,000	5,000 cps	B	33.00
BI-10,000	10,000 cps	B	33.00

LINE

BL units have 9:1 voltage gain. They are sharply peaked, having approximately 2 db attenuation at plus or minus 3% from center frequency and attenuation greater than 40 db at 1/2 and twice center frequency. Input 500/600 ohms, output to grid. BL units are MIL type FR4RX22YY.

Part No.	Frequency	Case Size	Net Price
BL-400	400 cps	B	33.00
BL-1,000	1,000 cps	B	33.00

TRANSISTOR INTERSTAGE

are sharply peaked, having approximately 2 db attenuation at plus or minus 3% from center frequency and attenuation greater than 40 db at 1/2 and twice center frequency. Input 10,000 ohms, output 10,000 ohms. BIT units are MIL type FR4RX22YY.

Part No.	Frequency	Case Size	Net Price
BIT-60	60 cps	A	39.60
BIT-100	100 cps	A	39.60
BIT-120	120 cps	B	39.60

hi-Q toroidal inductors

MANUFACTURED TO MIL-T-27A. ALL HERMETICALLY SEALED UNITS (STYLE H) ARE MIL TYPE TF4RX20YY

■ ALL MOLDED UNITS STYLE M ARE MIL TYPE TF5RX20ZZ

■ ALSO TOROIDAL INDUCTORS IN OTHER SIZES AND VALUES AVAILABLE ON SPECIAL ORDER.

■ MOLYBDENUM PERMALLOY POWDER CORES USED IN ALL UNITS.

STYLE F
= ALL INDUCTORS SHOWN AVAILABLE IN OPEN STYLE F.

QA SERIES

FREQUENCY TO 20KC•ACCURACY ±2%

The QA series is designed to optimize small size and high "Q" for miniaturized applications. These units are available on special order with stabilized cores and inductance from 1MH to 4.0H.

AVAILABLE ON SPECIAL ORDER
HERMETICALLY SEALED

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1-9 pcs.	
				Style F	Style M
QA-1	5MH	2.5	30	4.80	6.30
QA-2	10	5	33	4.80	6.30

QA-8	150	80	44	5.65	7.30
QA-9	200	120	45	5.75	7.40
QA-10	300	150	46	5.85	7.65
QA-11	500	290	48	5.95	7.95
QA-12	1.00H	530	51	6.80	8.75
QA-13	1.50	825	53	6.95	9.60

MOLDED STYLE M

Encapsulated in Epoxy Resin. Pigtail leads for printed circuit applications.

QB SERIES

FREQUENCY TO 20KC•ACCURACY ±2%

The QB series is designed for airborne applications where stable high "Q" is needed with minimized size and weight. Available on special order with stabilized cores and inductance to 7.0H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1-9 pcs.		
				Style F	Style H	Style M
QB-1	5MH	1.1	38	4.30	7.45	5.80
QB-2	10	2.1	40	4.30	7.45	5.80
QB-3	15	3.3	42	4.30	7.45	5.95
QB-4	20	3.7	43	4.35	7.55	6.05
QB-5	30	5.8	45	4.40	7.70	6.15
QB-6	50	11	47	4.50	7.95	6.25
QB-7	100	22	49	4.65	8.45	6.30
QB-8	150	34	50	4.80	8.60	6.45
QB-9	200	47	52	5.05	9.00	6.70
QB-10	300	60	53	5.15	9.25	6.80
QB-11	500	95	55	5.30	9.45	6.95

QB-13	1.50	335	59	6.45	10.40	8.10

MOLDED STYLE M

Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H

Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

STERLING TRANSFORMER CORP.

hi-Q toroidal inductors

QC SERIES FREQUENCY TO 10KC ACCURACY ± 2%

The QC series is designed for high "Q", increased power level & stability. Available on special order with stabilized cores and inductance to 20H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1-9 pcs.		
				Style F	Style H	Style M

MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

QD SERIES

FREQUENCY TO 10KC-ACCURACY ± 2%

The QD series is designed for very high "Q" in the audio band allowing for application in sharp frequency filters with high power levels and low losses. They are excellent for tuned transformers and oscillators. Available on special order with stabilized cores and inductance to 50H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1-9 pcs.		
				Style F	Style H	Style M

MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

QE SERIES

FREQUENCY TO 15KC
ACCURACY ± 2%

The QE series is most widely used in low audio frequency applications where high "Q" is essential. They are used where inductance stability over a wide voltage range is required. Available on special order with inductance to 75H.

Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

POWERSTAT® Variable Transformers now

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight*, only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

ADJUSTABLE SPEED DRIVES

All motor-driven units in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 Series are available with adjustable speed drives which permit the output voltage of the transformer to be controlled over the full range of zero to maximum output voltage at speeds ranging from 5 seconds to 200 seconds. All control circuitry is solid-state and adaptable for present speed systems. The Adjustable Speed Control Potentiometer BHP65455-G1 can be remotely located from the variable transformer.

 §§Requires also one paralleling choke type 16053.

VOLTBOX® A-C POWER SUPPLY

Contains POWERSTAT Variable Transformer, voltmeter, three output receptacles, two 5-WAY Binding Posts, "on-off" switch, line-load meter switch, fuse and six-foot cord-plug. Type UC1MB ratings are 120 volt, single phase 50/60 hertz input and 0-140 volt 10 ampere, 1.4 kva output.

IN SECTIONS 2100, 3500 AND 4000

POWERSTAT® Variable Transformers

NOW WITH POWERKOTE* COILS

*PATENT PENDING

40-VOLT SERIES

Meet high current, low voltage requirements of low voltage power supplies and a wide range of transistor circuit applications. Manually-operated and motor-driven single, 2- and 3-gang single phase types available.

TYPE 10B-40

TYPE 21-40

TYPE LC2106D

TYPE 5MBC2115E

OIL-COOLED
TYPE Q-116B

EXPLOSION-PROOF
TYPE X-116

LINE CORRECTORS

Used to correct line voltage variations to maintain a constant output voltage or to supply a limited range of output voltage from a stable a-c source. Manually operated and motor-driven types available.

OIL-COOLED AND EXPLOSION-PROOF

Oil-cooled units substantially increase ratings above equivalent air-cooled types and provide a measure of safety. Explosion-proof models are Underwriters' Laboratories listed for Class 1, Group D service. Both are manually operated only.

LW136B SERIES

Have three windings. Connections can be made for operation as a source of adjustable low output voltage, a line voltage corrector or a limited range variable transformer. Manually operated and motor-driven, open and enclosed construction types available. Full connections and ratings on request.

TYPE LW136B-3

TYPE LW136BU

HIGH FREQUENCY POWERSTAT® VARIABLE TRANSFORMERS

TYPE 5-1011

TYPE 2HL15UK-3Y

Standard manually-operated types designed to meet applicable military specifications are available for 28, 120, 240 and 480 volt, 400/800 hertz single and three phase operation in ratings from 56 va to 7.3 kva; for 115 volt, 400/800 hertz single phase service with outputs of 0-28 volts, 2.5 or 8 amperes and 0-5 volts, 6 or 12 amperes; for 400/1600 hertz service as limited range variable transformers, low voltage output variable transformers or line correctors.

STATIONARY METERED KNOB POWERSTAT® Variable Transformers

- FOR BACK-OF-PANEL OR GENERAL UTILITY MOUNTING
- ACCURATE VOLTMETER REMAINS STATIONARY INSIDE KNOB RIM. . . DOES NOT TURN WITH THE KNOB
- AVAILABLE IN TYPES TO 4 KVA
- MAXIMUM APPLICATION FLEXIBILITY
- SAVES PANEL SPACE, WIRING AND INSTALLATION COSTS

TYPE VS116B

TYPE VS3PN126

TYPE VS146T

GENERAL UTILITY MOUNTING – Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with knobs incorporating direct-reading voltmeters. Voltmeters remain stationary as the knob rim is turned, have an accuracy of $\pm 3\%$ of full scale and are insensitive to stray magnetic fields. When ordering, add VS prefix to the type number given in the charts.

BACK-OF-PANEL MOUNTING – Standard cataloged POWERSTAT Variable Transformers in the 21-22 through the 146-246 series designed or adaptable for back-of-panel mounting can be combined with Metered Knob Assemblies. Models for 120 volt service require Metered Knob Assembly VS150 having a 0-150 volt scale and units for 240 volt use require Metered Knob Assembly VS300 having a 0-300 volt scale. Existing models can be retrofitted also.

ENCLOSED LABORATORY POWERSTAT® Variable Transformers

TYPE N10B

TYPE N21

TYPE N116B

TYPE N116BK

Portable, single phase units having grounded NEMA cord-plug assembly, on-off switch, output receptacle, pilot light and fuse. The handle is integrally designed and the panel controls are recessed. A slot is provided at the rear of each unit to accept wall hanger brackets supplied with the assembly. Types N21, N116B, N116BK, N116BL and N116BLK have POWERKOTE Coils.

METERED KNOB types N116BK and N116BLK have metered knobs to conveniently measure load voltage without the necessity of providing a separate voltmeter. The knob is designed so that the voltmeter remains stationary as the knob is turned to vary the voltage, assuring accurate readings and maximum meter visibility.

FLEXIFORMER® Packaged Transformer Primaries

TYPE TP150

When used as a source of a-c voltage, the center opening permits hand-threading the correct number of secondary winding turns to obtain the desired output voltage. When used as a current transformer, the unit winding is shuted by an ammeter which indicates the current flow in a conductor hand-threaded through the center opening. For 50/60 hertz duty.

RATINGS AS A SOURCE OF A-C VOLTAGE

TYPE	NORMAL PRIMARY VOLTS	Hertz	MAXIMUM VA	VOLTS PER SECONDARY TURN	REGULATION AT MAXIMUM OUTPUT

POWERSTAT DC Motor Speed Controllers

Continuously adjustable speed control of d-c shunt-wound motors from a-c power lines. Full rated torque available at any speed. Instantaneous start, stop and reverse, tubeless transient-protected circuitry. Rated for 120 volt, 60 hertz single phase input. Type MSC16 for motors to 1/8 hp, type MSC33 to 1/2 hp and type MSC75 to 3/4 hp. NEMA frame 1725 rpm, dc motors in 1/8, 1/2 and 3/4 hp also available.

TODD ELECTRIC high current transformers and chokes are most widely used for high power rectifier and high current A.C. applications. They are built to the highest standards of workmanship. All types are designed for a nominal temperature rise of 45°C at full load and will easily withstand unusual overloads. The regulation is extremely low, varying from 10% on the smallest unit to 1% on the largest.

Four constructional types are available for maximum flexibility for use in either the laboratory, test rigs, OEM equipment, or production.

All Prices and Data Subject to Change Without Notice.

† Includes height of terminals.

TODD ELECTRIC HIGH CURRENT CHOKES are the perfect companion to our High Current Transformers when utilizing inductive filtering in designing a power supply.

INDUCTANCE VARIATION

The inductance realized from any stock High Current Choke will vary from the normal rated values as shown by the graph when subjected to a non-rated current. Due to greater heating loss, steady state current should not be exceeded by more than 30% except for intermittent operation.

Case A

Case A

Triad J Series offers flexibility enabling your amplifiers to exceed broadcast standards. Although economy in construction has cut costs, these transformers approach and closely approximate performance characteristics found in more costly hermetically sealed parts. Single hole mounting provides for rotation for maximum reduction of hum... alloy shielding gives you 40-60 db hum reduction (60-80 db in Types A-11J & A-12J)... you can obtain wide frequency ranges... flexible leads facilitate ease in mounting... input units are electrostatically and magnetically shielded... light weight and encased in Triad's satin smooth baked gray enamel cases, 1 3/8" diameter, 1 3/4" above chassis... legible circuit diagrams are permanently affixed to every case.

Combined PLATE and FILAMENT Transformers "100" Series

Never have the outstanding features of Triad Combined Plate and Filament Power Transformers been available at such realistic costs. No quality or performance requirement has been overlooked... specify Triad and be certain. Shielding, impregnation, chatter freedom... to Triad's demanding quality control standards.

* Less than 100 m.m.f.d. capacity to ground and insulated for high voltage damper tube.

Height of transformers in BC cases is measured from chassis line to top of case. Copper shading ring on all BC cases to reduce external magnetic field.

Note: Last letter of Type No. denotes case style.

AUDIO

Triad Replacement Output Transformers furnish a wide range of size and mounting characteristics... specifically engineered for mounting in precise location in chassis. Climatite treated... manufactured to exacting quality standards of more costly types... progressively designed for advanced circuitry and audio tubes... total complete coverage over impedance and wattage ranges... Triad units provide finest response in minimum space... and outlive all others.

CHOPPER INPUT TRANSFORMERS

Triad Chopper Input Transformers provide exceedingly close balance between the two halves of the primary winding... minimum noise in microvolt ranges of input signals is assured with Triad's special core treatment techniques. For demanding transistor and tube applications, Triad's special design capabilities have an outstanding record. For special applications, consult Triad.

TOROIDS

A DIVISION OF LITTON INDUSTRIES

Triad toroids may be ordered with standard leads in strong plastic coating, or epoxy molded encapsulated per Specification MIL-T-27A; TF5RX20ZZ. To specify molded toroids with gold-plated fixed terminals, an "A" should be added to the full type number; for example, EM-001A.

Sub-miniature Encapsulated TOROIDAL INDUCTORS

Triad sub-miniature toroidal inductors, designed for quick, easy printed-circuit board mounting, are now stocked for immediate delivery in a range of standard ratings from 50 micro-henries to 500 milli-henries. Many uses, especially in airborne telemetering applications incorporating Triad's sub-miniature filters FL-384 through FL-388. Case size of units is 1/4 inch diameter by 1/4 inch high. Providing an optimum combination of high Q and extremely small-size, this series is ideal for printed board, transistor or vacuum tube application.

Triad sub-miniature inductors are toroidally wound on permalloy powdered cores. Encapsulated in high temperature epoxy resin. Weldable or solderable leads of gold plated nickel alloy. Highly resistant to severe acceleration, shock or vibration. Manufactured to MIL-T-27A, Grade 5 Class S (MIL type TF5SX20ZZ).

NOTE: Ma. DC maximum is for approximately 5% drop in inductance. Those figures marked * will give less than 5% inductance drop but should not be exceeded under operating conditions. Inductance tolerance of EX-P05A through EX-P50A is ±5%; EX-001A through EX-500A is ±2%.

NEW TRANSFORMERS & FILTERS

AUDIO TRANSFORMERS

DO-T200* SERIES, ULTRAMINIATURE PLUG-IN TRANSISTORS TRANSFORMERS

Manufactured and successfully tested to complete environmental requirements of MIL-T-27B. Most Ruggedized MIL Structure. Grade 4, Metal Encased. MIL type TF4RX13YY, TF4RX16YY. Immediate Delivery From Stock. Full Conformance to MIL Mounting Requirements. Solderable and Weldable Leads. Hermetically Sealed. Straight Pin Terminals. Excellent Response. High Efficiency. Low Distortion. Leads are 7/8" long, .016 Dumet wire, gold plated, and may be either welded or soldered. They are uninsulated and are spaced on a 1/4" radius circle. In pulse coupling impedance matching applications (when measured with a 30 microsecond input pulse voltage wave), typical values for these transformers are: 5% or less droop, zero overshoot, and less than 10% backswing. Also see below and pages 3 & 4 for other DO-T family constructions.

Type No.	Pri. Imp.	D.C. ma.± in Pri.	Sec. Imp.	Application	Suggested Net Price

±DCma shown is for single ended usage. For push pull, DCma can be any balanced value taken by .5W transistors. Where windings are listed as split, 1/4 of the listed impedance is available by paralleling the winding.

DO-T*, DI-T* TRANSFORMERS

Designed, manufactured and successfully tested to complete MIL-T-27B specifications. See page 4 for size and weight and complete DO-T, DI-T line. Also above and page 3 for other DO-T family constructions. These units can be used for pulse coupling impedance matching applications. All U.S. Pat. No. 2,949,591; others pending.

Type No.	Pri. Imp.	D.C. ma.± in Pri.	Sec. Imp.	Typical Application	Suggested Net Price

SUBMINIATURE TRANSFORMERS

Designed, manufactured and successfully tested to complete MIL-T-27B specifications. See page 7 for size and weight of FH units, also listings of other FH & H hermetic audio units. These units have straight pin terminals for welding or printed circuit use. Response ±2 db from 300 to 20KC. Level +17 dbm; 50 mw.

ELECTRIC WAVE FILTERS

NEW STANDARD FILTERS

Base 1 1/2" x 1 1/4"
LMI-150 1 5/8" h, wt. 6 oz.
LMI-50 2 1/2" h, wt. 9 oz.
LMI-500
HML-40 2 1/2" h, wt. 9 oz.

All UTC filters are designed, manufactured and successfully tested to MIL-F 18327C environmental requirements. The LMI-50 & LMI-150 are Low Pass Interstage Filters with source and load impedance of 10,000 ohms. Cutoff frequencies: LMI-50 at 50 Hz; LMI-150 at 150 Hz. The LMI-500 is a Low Pass Filter with a source and load impedance of 500/600 ohms, cutoff frequency is 500 Hz. HML-40 is a High Pass Filter with a source and load impedance of 500/600 ohms, cutoff frequency is 40 Hz. Suggested net prices are: LMI-50 — \$39.00; LMI-150 — \$31.50; LMI-500 — \$39.00; HML-40 — \$42.00. MIL designations: LMI-50 & LMI-150, FR6RX11YY1; LMI-500, FR6RX11YY1; HML-40, FR6RX33YY1.

BROAD BAND FILTER

The FBH-1 — Flat package Broad Band Pass Filter has a source and load of 10K ohms. Units are within 3 db from 1 kHz to 2 kHz, and have an attenuation of at least 36 db at frequencies below 500 cps and above 4 kHz. FP-C Case. MIL type FR6RX22YY1. Suggested net price: \$54.00.

FP-C CASE
Height 1/2", wt. 2.2 oz.

LOW FREQUENCY FILTER

(BAND PASS & BAND REJECT)

The LBP-10 Low Frequency Band Pass Filter has a 10 Hz center frequency. The filter has 4 terminals so that it can be used as a band pass filter with a 10K ohm load or with a high impedance load, and in addition as a band reject filter. As a Band Pass Filter, the unit is within 3 db at 9.6 and 10.4 Hz. Attenuation at 5 & 20 Hz is at least 30 db with the 10K ohm output load and 35 db with the 3.3 Megohm load. As a Band Reject Filter, the unit attenuates 10 Hz by a minimum of 30 db and varies less than 3 db from DC to 7 Hz, and from 14 Hz to 36 kHz. This filter is MIL type FR6RX22FB1. Suggested net price: \$60.00. For size and weight see FB Page 15.

NEW

TRANSFORMERS, FILTERS, MAGAMPS, HIGH Q COILS

NEW UTC "FLATS"™ ELECTRIC WAVE FILTERS

For other Filters see pages 2 & 9

Designed, Manufactured and Successfully Tested to Complete

MIL-F-18327C Specifications

These filters meet today's need for flat component configurations, have excellent attenuation characteristics and are ruggedized to Grade 4, MIL-F-18372C. Straight pin terminals and flat construction make these units ideally suited for printed circuit applications. These filters are hermetically sealed in flat metal cases shielded to reduce hum pickup. FP-A case: 2 x 2 x 1/2" h., 2.5 oz. FP-B case: 2 x 1 1/2 x 3/8" h., 2 oz. Suggested stock price: \$42.00 each net.

FHH-200: Flat package high pass filter, source and load 10K ohms. Units are within 1 db up to 300 Hz 3 db \pm 1 db at 200 Hz, and have an attenuation of at least 40 db at frequencies below 140 Hz. FP-A case. Mil Type: FR6RX33YY1.

FLH-600: Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 450 Hz, 3 db \pm 1 db at 600 Hz, and have an attenuation of at least 40 db at frequencies above 800 Hz. FP-A case. Mil Type: FR6RX11YY1.

FLH-5000: Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 4.2 kHz, 3 db \pm 1 db at 5 kHz, and have an attenuation of at least 43 db at frequencies above 6400 Hz. FP-B case. Mil Type: FR6RX11YY1.

FLL-3500: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 3 kHz, 3 db \pm 1 db at 3500 Hz, and have an attenuation of at least 40 db at frequencies above 4500 Hz. FP-A case. Mil Type: FR6RX33YY1.

FLL-18000: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 15 kHz, 3 db \pm 1 db at 18 kHz, and have an attenuation of at least 43 db at frequencies above 23 kHz. FP-A case. Mil Type: FR6RX11YY1.

FLL-50000: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 42 kHz, 3 db \pm 1 db at 50 kHz, and have an attenuation of at least 43 db above 64 kHz. FP-B case. Mil Type: FR6RX11YY1.

NEW LINE OF SOLID STATE "MAS"™ PUSH-PULL MAGNETIC AMPLIFIERS

For other Magamps see page 8.

The "MAS" magamps operate on an input of 115 V 400 Hz with an output of ± 7.5 V DC, 1000 ohm load and have 2 isolated control inputs. These magnetic amplifiers afford a power gain of approximately 30,000. The power input and output are also completely and individually isolated. The "MAS" magamps are manufactured to MIL-T-27B standards. Units are housed in a hermetically sealed steel case with plug-in octal compressed glass terminals. The "MAS" magamps are 3 inches high with a 1 1/2 inch diameter and weighs approximately 1/2 pound.

The "MAS" magamps have many advantages over other active circuit elements such as tubes, transistors: • Long life and years of maintenance free operation due to magnetic characteristics and solid state elements. • Reliability can withstand high shock, vibration, radiation, and moisture. • Reliability — can withstand 10 times overloads and operate into short without damage.

Possible applications include: • Control Amplifier • Photocell • SCR Controls • Strain Gauge Amplifier • Meter Preamps • Thermocouple • Differential Amplifier • Signal mixing, summing, integration • Hydraulic Servo Valve Driver • Servo Motor • Linear Amplifications of Transducer Signals.

Type Number	Winding Number	Input Resistance Ohms	Trans-resistance Ohms	Nominal DC amps 5V DC Output 1000 Ω Load	Suggested Price Net

NEW, LLP-10 & LLP-15, STANDARD LOW FREQUENCY LOW PASS FILTER

For other Filters see pages 2 & 9.

Designed, Manufactured and Successfully Tested to Complete MIL-F-18327C

The LLP-10 low frequency low pass filter has a loss of less than 3 db at 10 Hz and attenuation of more than 40 db at 20 Hz. The LLP-15 low frequency low pass filter has a loss of less than 3 db at 15 Hz and attenuation of more than 40 db at 30 Hz. Both filters have a source and load impedance of 100K ohms. Both are MIL Type FR6RX11FA1. Dim: 2 1/2 x 2 3/4 x 3 3/8" h., 1 1/2 lbs. Suggested Net Price: \$60.00 net.

NEW "PIL"™ AUDIO TRANSFORMERS

For other PIL'S see page 4.

Designed, Manufactured and Successfully Tested to Complete MIL-T-27B Specifications.

These units are the smallest audio transformers available. The DO-T type structure incorporated overcomes inherently poor electrical characteristics usually found in miniature audio transformers. These ultraminiature PIL transformers are engineered to provide top electrical performance. All units are subjected to a 500 volt dielectric strength test, instead of the usual 100 volts, for higher safety margins and reliability.

Units are designed to a field-proven, ruggedized construction with a completely rigid cylindrical bobbin eliminating wire movement and stress. The turns are circular, effecting uniform wire lay and eliminating corner stress. The leads are rigidly anchored to the coil wire terminal board fashion, eliminating the use of tape, and brought out through strain relief. The units are terminated in weldable and solderable, insulated Gold plated Dumet leads. Dim: 3/8" dia. x 3/8" h., 1/20 oz.

All units are metal encased to Grade 4. Units made to Class S are available on special order. U. S. Patent No. 2,949,591.

NEW "FE," FI,* FO"™ MINIATURE INDUCTORS

For other High Q Coils see pages 1 & 10.

Designed, Manufactured and Successfully Tested to Complete MIL-T-27B Specifications.

FE, FI, FO miniature inductors are ideal for transistor and printed circuit applications, having both pin terminals and a molded flat construction. These units are symmetrical toroids providing maximum Q in minimum size. The FE and FI inductors are adjusted at 1 V, 1 kHz. The FO units are adjusted at 1 V, 400 Hz. All units are adjusted to a tolerance of $\pm 1\%$. The ma DC Max shown is for approximately 5% drop in inductance. The temperature stability is unequalled from -55°C to $+100^{\circ}\text{C}$. For AC level limitations, a general rule of thumb would be to consider the maximum AC current approximately equal to the maximum DC current rating. However, for specific applications, contact UTC with exact level, frequency, and Q requirements to determine suitability of part in application. All FE, FI, FO inductors are equally well suited for vacuum tube application. All units Mil Type: TF5RX20ZZ.

DIMENSIONS:

FE: 1 1/2" sq. x 1/2" h., wt. 0.7 oz.
FI: 1 1/2" sq. x 3/8" h., wt. 1.5 oz.
FO: 1 1/2" sq. x 1/2" h., wt. 0.5 oz.

PRECISION SCOTT-T REFERENCE TRANSFORMER NEW SCR-10™

Designed, Manufactured and Successfully Tested to Complete MIL-T-27B Specifications

Used in the precise conversion of three wire synchro information to equivalent resolver information. Two outputs 90° apart are obtained, which can be utilized in analog and digital computer application or coordinate transformation applications. Mil type TF4SX09AJ.

Special custom built units with other electrical values are available to your requirements
Input 90V 60/400 Hz 3 Phase high impedance suitable for synchro output.
Output 1) 3V @ .25 MA 2 Phase Output.
2) 3V @ .25 MA 2 Phase Output.

NEW PIL* ULTRAMINIATURE AUDIO INDUCTORS

The new PIL series constitutes the smallest audio inductors available. These units are metal encased, ruggedized manufactured and guaranteed to MIL-T-27B. They are MIL Type TF4RX-20YY. Physical construction is that of the PIP (DO-T, DI-T) units shown on this page.

Type No.	Con-Ind. Hys.	Min IV, 1Kc	DC	DCR

PIL units shown: Suggested net each: \$6.00

For New PIL Transformers See Fig. 3.

PIP* SERIES TRANSISTOR PULSE TRANSFORMERS

UTC's PIP series of subminiature transistor type pulse transformers is designed to give a maximum of component density in equipments, their configuration being especially compatible with transistors. The design is based on the UTC DO-T and DI-T series to impart exceptional reliability. PIP-1 through PIP-9 have a ratio of 4:4:1, PIP-10 through PIP-12 have a ratio of 5:3:1. All units are checked and adjusted in a transistor test circuit to give the required pulse width.

Hermetically sealed, manufactured & guaranteed to MIL-T-20138B by full environmental testing... all units, completely METAL CASED, MIL type TP6RX4410CZ. See UTC page 8 for other miniature pulse transformers.

All Units Individually Adjusted to Parameters Shown in Table

TRANSISTOR TRANSFORMERS

Designed, Manufactured and Successfully Tested to Complete MIL-T-27B Specifications.

TRANSISTOR SUPPLY TRANSFORMERS

Primary 115V. 50/60 Hz (tapped on H-143 thru H-146 for dual secondary voltages). DC ratings are approximate, based on silicon bridge rectifier (except H-141, H-142 also shown F.W.C.T.). Choke input DCV is based on 10% voltage drop in choke. Condenser value, C, is in 1000 mfd. H-141, H-142, H-147 listing under "Secs in parallel" is single winding. All units MIL type TF4RX02.

HERMETIC COMPONENTS

Designed, Manufactured and Successfully Tested to Complete MIL-T-27B Specifications.

HERMETIC AUDIO UNITS

These extremely compact units are proved to specifications of MIL-T-27B. Response & level ratings: RC-25: Similar to Oncuers for case (1 1/4" x 1/4" x 1 1/4" h. 1.5 oz.). RC-50: Similar to ultra compact units for case (1 5/8" x 1 5/8" x 2 3/4" h. 8 oz.). SM: Similar to SSO units for case (1 1/4" x 1 1/2" x 2 1/2" h. 0.8 oz.). FH: 2 1/2" x 2 1/2" x 1/4" h. .8 oz.

ALSO SEE PAGE 2 FOR NEW HERMETIC AUDIO UNITS

Table with columns: UTC Type, Application, Pri. Imped., Sec. Imped., #, Sugg. Price. Lists various audio unit types and their specifications.

*Has 75 db shielding. †6000 ohms. †1500 ohms. \$5. watts. ††10 watts. #Case: a-RC-25. b-RC-50. c-RC-62. d-SM. e-FH. f-RC-37. (See above & pg.12)

HERMETIC SEALED FILTER INDUCTORS TUBE and TRANSISTOR TYPE

METAL CASED MF4 TYPE H-70 thru H-79, H-164 thru H-173

MOLDED MIL TYPE TF55X04ZZ H-105 thru H-109 & H-300

The multiple ratings for the "H" series of filter chokes suit these units for the complete gamut of military and industrial applications. Transistor supply units are swinging type to enhance regulation. H-79 terminals opposite mounting. †Relates to ripple voltage, in input filter circuits only.

Table with columns: Type No., Ind. Hys., ITA @ DC, Res. Ohms, Max. DCV Ch. Input, Test V. RMS, Mil. Case Pgs., Sugg. Price. Lists various filter inductor types and their specifications.

Table with columns: Type No., Inductance @ DC MA, D.C.R. Ohms, L, W, H, Wgt. Lbs., Sugg. Price. Lists various inductor types and their specifications.

HERMETIC SEALED POWER and PLATE TRANSFORMERS

H-114, H-115, H-117 have terminals opposite mounting.

Power transformers: primary 115V, 60 Hz suited to 50* 1000 Hz service. Plate transformers: primary 105/115/210/220 volts, 50/60 Hz. "L" ratings are choke input... "C" ratings are condenser input. H-80 thru H-197 MIL type TF4RX03, H-110 thru H-117 MIL type TF4RX02. The tapped high voltage winding provides either of two secondary voltages for greatest versatility. The power transformer listings indicate DC voltages and permissible currents for both choke and condenser input filters, as well as for military and industrial applications.

"W" suffix units designed for full wave center tap and full wave bridge application. Center tap of secondary may be disconnected from ground.

SECTION 5600

Designed, Manufactured and Successfully Tested to Complete MIL-T-27B Specifications.

MAT* MAGNETIC AMPLIFIERS FOR SERVO MOTOR APPLICATIONS

For NEW Magamps see page 3.

VACUUM TUBE TYPE

The MAT 1-4 Magnetic Amplifiers are exceptionally stable units designed for the control of 2 phase, 115V., 400 Hz servo motors. They are compact... hermetically sealed... magnetically shielded... and meet MIL-T-27B and MIL-E-5400 Specifications. The output is sinusoidal, amplitude variable, and phase reversible. Control is provided by a dual triode such as 12AU7 operating with a plate voltage of 115 volts, 400 Hz, or higher. The signal to the triode grids can be polarity reversible DC or phase reversible 400 Hz with or without suppressed carrier modulation. These units eliminate DC power requirements as well as temperature sensitive dry disc rectifiers. The high input impedance provides minimum loading on sensing elements and high power gain. Ringing at low load level has been reduced to a minimum through high internal damping factors. The power output figures are conservative... power gain of the Magnetic Structure is approximately 40... response time approximately 7.5 milliseconds. The maximum null voltage is 3 volts RMS. For single phase supply voltage the load capacitor should effect 90° phase shift with motor load... for 3 phase, 30° phase shift.

or phase reversible 400 Hz with or without suppressed carrier modulation. These units eliminate DC power requirements as well as temperature sensitive dry disc rectifiers. ULTRASHIELDED POWER-LINE ISOLATION TRANSFORMERS

Simulates battery operation for critical circuits requiring extreme isolation from power line.

Designed to give the ultimate in isolation, for line-powered equipment, which formerly could only be obtained from battery power. The effective capacity coupling between primary and secondary windings is less than 0.1 MMFD.

For this purpose shields are individually terminated to allow maximum flexibility. Input and output terminals are brought out on opposite sides of a special housing in order to maintain the excellent isolation between line and load.

PRECISION MINIATURE WIDE APPLICATION PULSE TRANSFORMERS

UTC miniature, wound core, pulse transformers are individually precision adjusted in standard test circuits to close tolerances. They are high reliability units, hermetically sealed by vacuum molding and suited for service from -70° C. to +130° C. Wound core structure provides excellent temperature stability (un-

like ferrite). Designs are high inductance type to provide minimum of droop and assure true pulse width. H-45 thru H-57 ratio 1:1:1. H-60 thru H-69 ratio 4:4:1. Others ratio 5:3:1.

See PIP pulse units on UTC page 4.

ELECTRIC WAVE FILTERS

Designed, Manufactured and Successfully Tested to Complete MIL-F-18327C Specifications.

BM & LM Series

HM Series

SPECIAL FREQUENCY FILTERS	
BMI, BML, BPH, BPM, BTI, HMI, HML, HPM, LMI, LML, LPM	\$48.00
MNF, MWF, TMN, TMW	\$60.00
TGR	\$90.00
TGT	\$54.00

BPM

MINIFILTERS*

HPM & LPM

INTERSTAGE AND LINE FILTERS

Available in stock frequencies listed below (numerical part of type number is cutoff frequency in Hz). Compact shielded cases hermetically sealed to MIL-F-18327C specs. BMI, BML, BAAL cases: 1 1/2" x 1 1/2" x 1 1/2" h.; wt., 6 oz. HMI, HML, LML cases: 1 1/2" x 1 1/2" x 2 1/2" h.; wt., 9 oz. The BMI filters are band pass interstage units designed to operate between a vacuum tube plate (or 10,000 ohms) and a grid. They provide a gain of 2 at center frequency. BTI units are same as BMI, but 10,000 ohms output. BML band pass filters, similarly, work into a grid, but have an input impedance of 500/600 ohms. They provide a gain of 9. HMI filters are high pass interstage units. LMI filters are low pass interstage units. HML filters are high pass with input and output impedance of 500/600 ohms. LML filters are low pass filters with input and output impedance of 500/600 ohms. LLP low frequency low pass filter, loss of less than 40 db at 20 Hz. Source & load 100K ohms.

For NEW Filters See Pages 2 & 3.

These units provide almost the same characteristics as the standard interstage units listed to the left, although extremely miniaturized. Hermetically sealed to MIL-F-18327C specs. B type case: 3/4" x 3/4" x 1 1/8" h.; wt., 1 oz. H and L cases: 1" x 1" x 1 3/8" h.; wt., 2 1/4 oz. Cutoff frequencies in Hz indicated by type number. BPM units (BAND PASS) have 2:1 gain. Attenuation is approximately 2 db ±3% from center frequency, and 35 db per octave as shown. Input 10,000 ohms, output to grid, tapped for 10,000 ohms to provide for transistor circuits. For tube circuits continuity is on grid side, for transistor use continuity is on input side. BPH units (BAND PASS) attenuation less than 3 db ±5% from center frequency, and 40 db per octave. Source and load 500 ohms. HPM units (HIGH PASS) are down less than 6 db at cutoff frequency, and more than 30 db at .67 cutoff frequency, 40 db at 6 cutoff frequency. Input and output 10,000 ohms. LPM units (LOW PASS) are down less than 6 db at cutoff frequency, and more than 30 db at 1.5 cutoff frequency, 40 db at 1.65 cutoff frequency. Input and output 10,000 ohms.

NEW 400-CYCLE 115 V. LINE FILTERS

Intended for use on 115 v., 400 cps line to eliminate harmonic distortion.

UTC No. PLF-25 — Gives 150 v. output into 500 ohm load with ±1 db, 375-425 Hz. Will attenuate 800 Hz by 30 db; 1200 Hz and higher by at least 50 db. MIL type, FR4RX11NB1. Meets MIL-F-18327C. Size 4 1/2" w x 5 1/2" d. x 5 1/2" h. Weight, 10 lbs. Suggester Net Each.....\$66.00

UTC No. PLP-13 — Eliminates harmonic distortion, rejects 60 and 120 Hz, and gives zero phase shift at 400 Hz. Operating into 1000 ohm load, provides 115 v. output at 400 Hz, within ±1 db, 375-425 Hz. Attenuates 800 Hz by 15 db; 1200 Hz by 45 db; above 1200 Hz by at least 35 db; 120 Hz by 20 db; and, 60 Hz by 30 db. MIL type FR4RX22-LB1; meets MIL-F-18327C specifications. Size, 3 1/4" w x 4 1/2" d. x 4 1/2" h. Weight, 6 1/2 lbs. Suggested Net Each.....\$66.00

TELEGRAPH TONE CHANNEL FILTERS

UTC band pass filters for multiplex transmitting and receiving provide maximum stability in miniature sizes. Stock filters cover all standard transmit and receive bands. All units employ 7 terminal header matching subminiature 7 pin socket.

TGR (receiving) & TGT (transmitting) filters are

IMMEDIATE DELIVERY ON ALL ITEMS

TELEMETERING BAND PASS FILTERS

TMN-4 thru
TMN-1.7
1 1/2 x 1 1/2 x 2"
Weight 3.5 oz.
TMN-2.3 thru
TMW-70
3/32 x 3/32 x 1 3/8"
Weight 1.2 oz.

MNF-5.4 thru
MNF-5.4
1 1/2" Sq. x
1/2" high
Weight 1 oz.
MNF-7.35 thru
MWF-70
3/32" Sq. x
1/2" high
Weight 1/30z.

Both TMN and TMW types are designed for 100 K input and output impedance and have an insertion loss of less than 3 db. Four pin hermetic header matches small Winchester socket.

TMN filters are down less than 3 db at ± 7.5% of center frequency. They are down more than 18 db at ± 25% of center frequency. Attenuation is greater than 40 db beyond 1.75 Fc and .58 Fc. TMW filters are down less than 3 db at ± 15% of center frequency. They are down more than 20 db at ± 50% of center frequency. Attenuation is greater than 40 db beyond 2.5 Fc and .4 Fc. MNF and MWF (Minifilter) provide same performance as filters described above but are extremely miniaturized. Slanted toward use with transistors. Pin terminals ideally suited for printed circuits.

HIGH Q PRECISION INDUCTANCE DECADE

Invaluable instruments for design and experimental work with tuned circuits, wave filters, and equalizers. The low hum pickup toroid coils employ a new permalloy dust core which, combined with special winding methods, provides very high Q, excellent voltage and temperature stability, and high self resonance frequency. The inductance values are laboratory adjusted to better than 1% precision, with calibration noted on base.

HIGH Q COILS & INDUCTORS

Designed, Manufactured and Successfully Tested to Complete MIL-T-27B Specifications.

MINIDUCTORS *

For NEW Inductors See pages 1 & 3.

All these ultracompact high Q units are grade 5, hermetically sealed to (MIL-T-27B). All give extra temperature stability rated at 1%, -55° C to +100° C.

MM-Ultraminiature epoxy molded toroidal inductors with pin terminals for printed circuit application. Maximum Q at 30 kHz. 3/16 dia. x 1/4" h.; wt. .07 oz.

MH-Ultraminiature epoxy molded toroidal inductors similar to MM except maximum Q at 100 kHz. Size & wt. as MM.

ML-Ultraminiature hermetically sealed inductors with epoxy board and pin terminals for printed circuit application. Maximum Q at 800 Hz to 2 kHz, depending on inductance. 3/16 x 3/16 x 3/16; wt. 2 oz.

MO-Miniature epoxy molded inductors with pin terminals for printed circuit application. Maximum Q at 600 Hz to 1500 Hz depending on inductance. 3/16 x 1/4 x 1/4; wt. 1 oz.

MW-Miniature epoxy molded toroidal inductors with pin terminals for printed circuit application. Maximum Q at 5 to 10 kHz: 3/16 dia. x 1/4; wt. .25 oz.

Table with columns: UTC Type, Induct. Hys., Sugg. Net Ea., UTC Type, Induct. Hys., Sugg. Net Ea., UTC Type, Induct. Hys., Sugg. Net Ea., UTC Type, Induct. Hys., Sugg. Net Ea.

HIGH Q TOROID INDUCTORS

Favorites for over fifteen years, UTC HQ Toroids are only excelled by the preferred new "M" series. As typical Q curves show, HQ coils are available for application from 100 Hz to 100 KHz. Adjusted to 1%, the inductance is virtually independent of frequency, temperature, and vibration. Voltage stability is excellent, and shielding case assures 80 db coupling attenuation. Hermetically to MIL-T-27B. All units MIL type TF4RX-20YY.

HQA and HQC CASE Diameter 1 1/16" Height 1 1/8" Mounting 1 1/8" Screws 6-32 Cutout 3/8 x 1 1/8" Weight 5 oz.

HQB CASE Length 2 5/8" Width 1 5/8" Height 2 5/8" Mounting 1 1/4 x 2 1/4" Screws 6-32 Cutout 3/8 x 1 1/8" Weight 14 oz.

HQC CASE Length 1 1/16" Width 1 1/8" Height 1 1/8" Mounting 3/4" Screws 4-40 Cutout 5/8 x 1 1/2" Weight 1.5 oz.

HERMETIC "M" TYPE TOROIDS

UTC permalloy dust toroids provide highest Q factor with miniaturized dimensions. Lab adjusted to 1% tolerance and sealed to MIL-T-27B specs. Magnetic case plus toroid provide 80 db shielding.

Table with columns: Type, Induct. Hys., Sugg. Net Ea., Type, Induct. Hys., Sugg. Net Ea., Type, Induct. Hys., Sugg. Net Ea., Type, Induct. Hys., Sugg. Net Ea.

TQA units are similar to MQA but enter tapped for oscillator application, etc. Net each: TQA-1 thru TQA-15, \$1.50 more than MQA's; TQA-16, 14.70; TQA-17, 15.90; TQA-18, 17.40; TQA-19, 21.00; TQA-20, 23.40.

Table with columns: UTC Type, Induct. Hys., Sugg. Net Ea., UTC Type, Induct. Hys., Sugg. Net Ea., UTC Type, Induct. Hys., Sugg. Net Ea., UTC Type, Induct. Hys., Sugg. Net Ea.

VARIDUCTORS

These variable inductors are ideal for use in tuned circuits, equalizers, oscillators, etc. TYPE HVC—Gives highest Q and stability; adjustable -70% to +200% of mean value. Hermetically sealed to MIL-T-27B.

HVV Types: For precise matching; vernier inductance variation ±10% of nominal value. Offer high Q over a wide frequency range and high temperature stability.

HVC & HVV (*VIC is not a MIL item)

Size: HVC, TVC and HVV types, 1 1/8" lg. x 3/8" w. x 1 1/4" h.; weight 2 oz. VIC type, 1 1/8" lg. x 1 1/4" w. x 1 1/4" h.; weight 5/2 oz. TVC type inductors are identical to HVC units, but provide taps at 30% and 50% of total turns—ideal for oscillator circuits, etc. HVC & TVC: U. S. Pat. No. 2,879,489. HVV: U. S. Pat. No. 3,267,400.

Table with columns: UTC Type, Mean Hys., DC ma, Sugg. Net Ea., UTC Type, Mean Hys., DC ma, Sugg. Net Ea., UTC Type, Mean Hys., DC ma, Sugg. Net Ea., UTC Type, Mean Hys., DC ma, Sugg. Net Ea.

LOW FREQUENCY HIGH Q COILS

MLQ TYPES

All these units of MIL type TF4RX20YY induct value to 2% tolerance at 1v., 60 Hz. Exceptional Q and stability; inductance swing less than 3.5% from -55°C to +85°C. The case, sealed hermetically to MIL-T-27B is 1 1/8" dia. 2 1/2" h. Transformer, parallel, series or center-tapped connections are permitted due to dual windings to 4 terminals. Mounting 1 1/4" sq. with a 6-32 screw. Cutout 1 1/2" dia wt. 1 lb.

Table with columns: Type No., Hys. (O DC) Parallel, Sugg. Net Ea., Type No., Hys. (O DC) Parallel, Sugg. Net Ea., Type No., Hys. (O DC) Parallel, Sugg. Net Ea., Type No., Hys. (O DC) Parallel, Sugg. Net Ea.

MQM TYPES

Designed for high Q at low frequencies. Structure provides exceptional stability, adjusted to 2% at 1v., 60 Hz. Inductance variation less than 2% from -55°C to +130°C. Made to MIL-T-27B, MIL type TF4SX20YY. Size 1 1/8" d x 1 1/8" h., cutout: 1" d., wt. 5 oz.

Table with columns: Type No., Series Hy (O DC), Parallel Hy (O DC), Series DCR ±20%, Sugg. Net Ea.

HI-FI & BROADCASTING COMPONENTS

ULTRACOMPACT* HI-FI AUDIOS

Small light weight, wide range units. Level +15 dbm except where otherwise noted. Top and bottom mounting. Die cast case, 1 1/2" x 1 1/2" x 2" h. Weight, 1/2 lb.

ALSO SEE PAGE 2 FOR NEW A-48 UNIT

Table with columns: UTC Type, Application, Primary Impedance, Sec. Imped., #, Sugg. Net Ea. Lists various audio components like A-10 to A-44.

LINEAR STANDARD* TRANSFORMERS

Guaranteed frequency response of ±1 db 20-20,000 Hz, ±1 db 7-50,000 Hz on high level units, make these ideal transformers for uniform frequency response and low distortion.

LOW LEVEL TRANSFORMERS

Type LS-1 case, 2 5/8" x 3 3/8" x 3 1/4" h. Suffix X indicates multiple alloy shield. Weight, 3 lbs.

Table with columns: UTC Type, Application, Pri. Imp., Sec. Imp., Level, Sugg. Net Ea. Lists low level transformer models like LS-10, LS-10X, etc.

HIGH LEVEL TRANSFORMERS

Table with columns: UTC Type, Application, Pri. Imp., #, Level Watts, Sugg. Net Ea. Lists high level transformer models like LS-33, LS-34, etc.

HIPERMALLOY* TRANSFORMERS

Hipermalloy audio and power transformers are specifically designed for portable and compact service. High fidelity though light in weight and dependable.

Table with columns: TYPE H-2 CASE, TYPE H-1 CASE. Lists dimensions and weights for different transformer types.

LOW IMPEDANCE TO GRID AND MIXING TRANSFORMERS Units Housed in Type H-1 Case

Table with columns: UTC Type, Application, Primary Imped., Sec. Imped., Level dbm, Sugg. Net Ea. Lists low impedance transformer models like HA-100, HA-100X, etc.

*High electrostatic shielding.

INTERSTAGE AUDIO TRANSFORMERS Units Housed in Type H-1 Case, except HA-107: in H-2 Case

Table with columns: UTC Type, Application, Primary Imped., Sec. Imped., Level Mw., Sugg. Net Ea. Lists interstage transformer models like HA-104, HA-105, etc.

Continued on next column

Continued from bottom of previous column PLATE TO LINE TRANSFORMERS Units Housed in Type H-1 Case

END CASTING UNITS

See note on "W" suffix units under plate transformers.

PLATE TRANSFORMERS

Primaries for 105, 115, 220, 230 volts; 50/60 Hz. For reduced power, secondary can be cut in half, using 220 v. primary on 110 volts; may be used on 25 to 43 Hz in this case. "W" suffix units designed for full wave center tap and full wave bridge application. Center tap may be disconnected from ground.

UNITED TRANSFORMER COMPANY DIVISION OF TRW INC.

MINIATURE, OUNCER, SUBOUNCER & SUB-SUBOUNCER UNITS

SUBOUNCER* & SUB-SUBOUNCER* AUDIO TRANSFORMERS
TRANSISTOR & TUBE TYPES HERMETICALLY SEALED

Designed, Manufactured and Successfully Tested to complete MIL - T - 27B Specifications.

UTC SSO-#P and SO-#P units are ideal miniaturized components having high efficiency and wide frequency response. Special nickel iron core materials and winding methods provide exceptional performance and reliability.

These units are vacuum molded to MIL Grade 5. They employ 50 mil deeply anchored pin terminals ideally suited for printed circuit and transistor application. Terminals are strong enough to support these light weight units.

The UTC SML-70 is an ultra miniature transformer providing high shielding, extremely low insertion loss with wide band response, 200 Hz to 20 kHz. These units are provided with pin terminals (.025 dia.) strong enough to support the unit and are ideal for printed circuits.

AMATEUR & PUBLIC ADDRESS TRANSFORMERS "S" SERIES

DIMENSIONS, SPECIAL SERIES TRANSFORMERS

UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. These units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided, permitting above chassis or bread-board wiring in addition to standard chassis type.

G-CASE SIZES

Case	Height, In.	Width, In.	Depth, In.	Wt., Lbs.

PHOTOFASH TRANSFORMERS STANDARD 982

Can be used for either standard (Anglo type) or trigger (Sylvania type) multiple flash tubes. Circuit details included with transformer.

PF-1 Primary for 115 volts, 50/60 Hz. Secondaries for power supply delivering 2200 volts DC to condenser up to 100 Mfd. Compound sealed in G-3 (Pg. 14) case 2 1/8 x 2 3/4 (3 3/4 including flanges) x 2 1/2 inches high. Weight 2 lbs. Suggested net each: \$8.40

PF-3 Trigger Transformer 15 KV peak. 7/8 O.D. x 3 long. Weight 2 oz. Suggested net each: \$6.00

TRANSISTOR TYPE

These are miniaturized light weight units for transistor type photoflash supply.

PF-5 Primary for 115 volts, 50/60 Hz or for 4 1/2 V. battery switched by PF-6 inverter transformer. Output delivers 400 V. DC when used in voltage doubler circuit to charge photoflash capacitor (typically 40 watt-sec.). G-1 case (Pg. 14) Suggested net each: \$8.40

PF-6 Inverter transformer transforms 4 1/2 V. DC from battery to input for PF-5 stepup transformer. Ouncer case (Pg. 14) Suggested net each: \$5.10

PF-7 Trigger transformer. Shorting .25 mfd. capacitor (charged to approx. 225 V. DC) across terminals 1-2 produces 6 KV pulse at terminal 3 for triggering flash tube. 7/8" Dia. x 1 1/8"; Wt. 1/2 oz. Suggested net each: \$3.60

STEP-DOWN AUTO-TRANSFORMERS (FIG. A SEE PG. 14)

With 6-ft. cord and female receptacle, except R-64; 220/240 to 110/120 v., 50/60 Hz.

ISOLATION TRANSFORMERS (FIG. F SEE PG. 14)

Ideal for isolating line noise. AC-DC sets, etc. Excellent electrostatic shielding 1500 volt breakdown test. Six foot cord and female receptacle, except R-77.

Primary 110-120 volts 50/60 Hz—Secondary 110-120 volts Except R-97 220 volt Primary—120 volt Sec.

LINE VOLTAGE ADJUSTERS WITH METER (FIG. G. SEE PG. 14)

The perfect answer to abnormal or fluctuating line voltage. Adjust switch so that meter reads at red line and you know that your equipment is working at correct voltage. These units combine a tapped auto-transformer with a switch and meter in a compact, rugged assembly. The nine-tap switch provides for line voltage of 60 to 140 volts on 115 volt output models and 160 to 240 volts on 230 volt output model. All units are designed for 50/60 Hz service and come complete with 6 foot input cord and plug and outlet receptacle.

EXPORT VOLTAGE ADAPTER (FIG. D SEE PG. 14)

Complete with cord and plug and special locking switch providing for line voltages of 105, 115, 125, 135, 150, 210, 230, 250 volts; 42 to 60 Hz. Output voltage 115.

TV VOLTAGE REGULATOR (FIG. D SEE PG. 14)

Complete with cord, plug, and special locking switch. Permits operation of 115 volt 50/60 Hz TV sets on line voltages of 85, 90, 95, 100, 105, 110, 120, 125 V.

Type No.	Rating Watts	L	W	H	Mtg. Dim.	Wgt. Lbs.	Sugg. Net Ea.

SIGNALING AND CONTROL TRANSFORMERS (FIG. H SEE PG. 14)

Primary 110-220 volts, 50/60 Hz — Secondary 4/8/12/16/20/24 volts

High power transformers suitable for operating relays, sirens horns, gongs, etc. from 115 V. 50/60 Hz line. These units have four secondary terminals providing 4, 8, 12, 16, 20 and 24 volt output. The volt ampere rating is based on the 24 volt secondary tap with corresponding reduction at the lower voltages. Underwriters' approved primary leads are employed, and screw-type binding posts.

AUTOMATIC

AMPERITE

REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AUTOMATIC REGULATION WHAT IT IS

The AMPERITE Ballast-Regulating Tube is an automatic "rheostat" designed to keep the current in a circuit at a definite value, for example, 0.5 amp.

Should the supply voltage increase, the Amperite will automatically increase in resistance enough to take up the increase in supply voltage — keeping the voltage on the load constant. It consists of an iron wire hermetically sealed in a bulb containing hydrogen or helium — the two gases with the highest heat conductivity. Its regulating action is based on the high temperature co-efficient of resistance of the iron wire and the rapid cooling of hydrogen or helium gas.

Being a constant current device, the AMPERITE Ballast-Regulating Tube can be used only to regulate a constant load—fixed wattage. Thermostatic relays can sometimes be included in these regulators to reduce initial surge.

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

STANDARD

MINIATURE

Characteristic curve of a typical Amperite. Approximate curve of any other Amperite can be obtained by multiplying or dividing the current or voltage scale by any number.

ON LAMP
\$1.80

GENERAL ADVANTAGES:

- Light, compact • No moving parts • Rugged; will withstand vibration of 10G. minimum
- Hermetically sealed; not affected by altitude or humidity changes • Can be changed as easily as a radio tube • Operates equally well on A.C. or D.C. • Inexpensive

CAPACITIES AVAILABLE

Current values of 60 ma. to 5 amps; threshold voltage 0.4 to 40 V. Maximum dissipation 50w per tube (ST19 bulb). Any number of AMPERITES with the same voltage range can be operated in parallel. AMPERITES should not be used in series.

AGEING

AMPERITE Ballast Tubes may change approximately up to 3% in current if aged for 4 to 8 hours, at maximum voltage. They will change very little thereafter.

LIFE EXPECTANCY

- Average life if operated as recommended **2000 Hours**
 If operated continuously at maximum voltage **1000 Hours**
 If operated continuously at 80% maximum voltage **5000 Hours**
 If filament is operated below glow point **5000 Hours up**

In operation, the Amperite filament starts to glow at one point; as the voltage is increased, the glow spreads over the entire filament. Like incandescent lamps, turning Amperite on and off reduces its life, especially if operating near its maximum voltage.

TIME LAG CHARACTERISTICS

Time lag encountered in an Amperite Ballast Tube depends upon the wattage consumed by the ballast and the size of the bulb. Where the wattage is small for the size of the bulb, the action can be made practically instantaneous — less than 1 second. In such cases the bulb will remain at practically ambient temperature. When the wattage is high enough to heat the bulb to a temperature uncomfortable to the hand (160°F) the lag might be as much as several minutes for final readings— but normally reaches within 90% of final readings within a few seconds.

AMPERITE NUMBERING SYSTEM

In general, the AMPERITE number approximately denotes the current—voltage threshold value. For example:

Amperite Number	3-4	3H4	10-7	12-11	12H11
Threshold Current	0.3	0.35	1.0	1.2	1.25
Threshold Voltage	4.0	4.0	7.0	11.0	11.0

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

AUTOMATIC

AMPERITE

REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AMBIENT EFFECTS

Ambient temperature variation of -50° to $+70^{\circ}$ C will change the current value of an Amperite approximately 2% on regulating portion of curve as shown directly below. Being hermetically sealed the Amperite is not affected by altitude or humidity changes.

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

Amperite Ballast-Type 6-4 current voltage characteristic under ambient conditions of -55° , 24° , and 85° C. The percentage change with ambient is approximately the same with all type Amperite ballasts.

This diagram illustrates far superior regulating characteristics of the Amperite Ballast-Regulating Tube. **STANDARD SIZES available for various wattage consumption . . . For good regulation, a bulb should not be required to dissipate more than 50% of maximum wattage.**

SIZE	SUB. MIN. L	T5 1/2 S	T5 1/2 L	T6 1/2 L	T9	T-12	ST-16	ST-19
MAX. WATTS	2 W.	3	5	5	12	25	30	50
WT. PER TUBE	2 GMS.	7 GMS.	8 GMS.	8 GMS.	1 OZ.	2 1/4 OZ.	2 1/2 OZ.	2 3/4 OZ.

BATTERY CHARGING AND DISCHARGING

Amperite Ballast Tubes are very successfully used for keeping the current constant in charging and discharging batteries. Any number of Amperites of the same voltage range can be placed in parallel to obtain proper current. The current can be kept to $\pm 1\%$. Advise voltage variation and currents desired.

LINE VOLTAGE

A light, compact, and inexpensive method of obtaining close regulation is to use an Amperite Ballast Tube with an Amperite Neon Lamp — type NE70V. Base octal-base wiring-prongs 2-5. One NE70V is used for all loads up to 100W.

POWER SUPPLIES

We strongly recommend, for any particular application, to fill in and return one of our special problem sheets (ASP 343) and permit us to recommend the most suitable AMPERITE.

POWER SUPPLY	Dry Cells	6 Volts	12 Volts	26 Volts	115 Volts
Supply Variation	2.2-3.0V	5.5-7.5V	11.4-13.8V	22.0-30.0V	105-125V
Desired on Load	1.8-2.0V	3.9-4.1V	6.1- 6.4V	12.4-12.8V	90- 95V
Required on AMPERITE	0.4-1.0V	1.6-3.4V	5.3- 7.4V	9.6-19.2V	15- 30V
Current Variation	.29-.32a	.29-.32a	.29-.32a	.29-.32a	.29-.32a

The above chart shows the maximum load voltage for the given supply to obtain $\pm 2\%$ current regulation on load. Better regulation is obtainable by increasing the voltage across the AMPERITE. Up to a point, the higher the percentage of the supply voltage taken up by the AMPERITE, the better the regulation.

Radio tube filament loads — have low cold resistance which causes a high initial surge. For such loads we recommend a bleeder of 20 to 50% prox. of load and the corresponding AMPERITE. e.g.

FILAMENT LOAD	USE AMPERITE	TOTAL CURRENT
0.3a	4HTF4	0.45a
0.6a	8-4	0.8a
0.7a	9H4	0.95a

On Radio tube filament loads the bleeder will also improve the regulation.

18 VALUE-ANALYZED benefits of G-E 5-Star Tubes . . .

- Controlled inside diameter on bulbs reduces vibrational output and microphonics.
- Highly efficient getter performs throughout tube life and guides flash to avoid inter-element leakage.
- A getter flash shield improves initial leakage characteristics.
- Two double mica spacers, with additional anti-leakage slots, brace internal parts, provide superior inter-element insulation and improve vibration characteristics. 12 or 16 contact points give firmer fit between bulb and mount.
- Short, sturdy cages increase rigidity of tube structure.
- Plate ears are embossed for added strength and improved mica fit.
- U-bolt construction through top and bottom micas firmly secures the cage assembly.
- Smooth grid legs prevent a "sawing" action on the mica, reducing grid vibration and microphonic noise.
- Critical grids are plated with gold or silver to minimize grid emission.
- Passive cathode alloys assure reliability and long life in low-duty cycle circuits where interface tends to develop.
- Outside diameter and density of cathode coating are statistically controlled.
- Low thermo-conductivity cathode tab reduces heat loss.
- Cataphoretic coating of all heater bends after forming insures complete heater-cathode insulation.
- Folded heater design proved most reliable under shock, vibration and heater cycling conditions. Heater is temperature-controlled to further improve reliability and lengthen life.
- Rhenium-tungsten heater material increases tensile strength, reduces brittleness, and allows larger-diameter heater wire.
- Lead-glass stems help ward off glass electrolysis.
- Pins are annealed to prevent glass strain at socket insertion.
- Stem design minimizes welds—fewer points of possible failure—less change of short-causing particles from weld splash.

FOOTNOTES FOR TRANSMITTING TUBE LISTINGS

A Cathode to grid volts.
A₁(1) Single tube class A audio power amplifier.
AB₂(2) Push-pull class AB₂ audio power amplifier.
AB₃(2) Push-pull class AB₃ audio power amplifier.
B Referred to grid terminal.
B(2) push-pull class B audio power amplifier.
B-P Single tube class B RF telephone service.
C Driver power output.
C-P Single tube class C plate-modulated telephony service.
C-T Single tube class C telegraphy or FM service.
C-T (Pulsed) Single tube class C RF pulsed oscillator.
CF Coated filament (directly heated).

CV Thoriated tungsten cathode (indirectly heated)
CU Coated indirectly heated cathode (unipotential).
D Useful power output.
C-G-T Single tube class C grid-modulated video service.
PT Pure tungsten filament (directly heated).
TF Thoriated-tungsten filament (directly heated).
/ Broadcast tube type.
■ Intermittent Commercial and Amateur Service rating.
^a Cathode to grid volts.
^b Referred to grid terminal.
^c Driver power output.
^d Useful power output.

Miniature types are in bold face.

* Temperature rating expressed in ambient temperature range over which the tube will operate.

Ignitrons

GENERAL  ELECTRIC

Ignitrons are gas-discharge tubes employing a mercury pool as the cathode. The mercury pool cathode provides extremely high emission capability. Initiation of conduction in the ignitron is accomplished by means of a starting electrode called the ignitor. The ignitor is a small rod of highly refractory material which dips into the mercury pool. The passage of ignition current through the ignitor causes a cathode spot to form at the junction of the ignitor and mercury pool. Ionization from the cathode spot spreads throughout the volume of the ignitron and when the anode is positive electrons flow to it. By control of the point in the A-C cycle at which the ignitor is fired the duration of current flow through the ignitron is controlled. The ignitron,

therefore, is ideally suited for high current rectification and control service. The following charts present summarized rating information for General Electric ignitrons. All ratings are based on 25-60 CPS operation. For convenience to the user the ignitron types are grouped by typical application service. Many types are rated for more than one service and therefore appear in two or more rating charts. More detailed ratings are available upon request for all of the G.E. ignitrons listed. The ignitron has long been recognized as a long life, highly reliable device. As the industry's leading ignitron manufacturer General Electric is pleased to present the information contained in this booklet and invites your inquiry for additional application assistance if required.

For above types, warranty is normally K-1000, however warranty information for specific applications will be supplied upon request.

IGNITRON ACCESSORIES

THERMOSTAT KITS

Kit includes thermostat and spring-loaded fastener in a captive assembly for connection to mounting pad located on ignitron water jacket.

Single-pole contacts perform control functions as shown in chart below.

Kit No.	Function	Contacts	Temperature		Termination
			Open (°F)	Close (°F)	
N15272AA	Water control	NO	86	96	36-inch leads with spade terminals
N15273AA	Over-temperature protection	NC	125	105	36-inch leads with spade terminals
N15286AA	Water control	NO	86	96	Terminal block
N15287AA	Over-temperature protection	NC	125	105	Terminal block

COOLING CLAMP

Suitable for use with GL-5550, GL-7171 and GL-7703 to accomplish cathode connection and liquid cooling: Cat. No. L 6922259-G5

IGNITOR TERMINAL CONNECTING LEADS

Insulated leads for connection to 0.250-inch diameter ignitor terminals
 Cat. No. N 22006LC 7 $\frac{3}{4}$ inches long
 Cat. No. N 22007LC 13 $\frac{1}{2}$ inches long

QUICK-CHANGE WATER CONNECTORS

Ignitron installation time is reduced through the use of slotted anode and cathode terminals... provided as a regular feature on all standard G-E welding ignitrons... and the use of the quick-change brass water hose connectors shown in table.

CONDENSED WARRANTY INFORMATION

G-12—
 (Rectifier service only.) Warranted for full replacement within one year of service. Expires 18 months from date of sale to ultimate user or two years from date of shipment by G.E.

H-12—
 Warranted for one year with prorated adjustment after 15 days of service. Expires 18 months from date of sale to ultimate user, 12 months from date of initial installation, or 2 years from date of shipment by G.E.

H-24—
 Warranted for two years with prorated adjustment after 15 days of service. Expires 36 months from date of sale to ultimate user, 24 months from date of initial installation, or 3 $\frac{1}{2}$ years from date of shipment by G.E.

K-1000—
 Warranted for 1000 operations or six months of service with prorated adjustment for the difference between elapsed number of operations and 1000. Expires nine months from date of sale to ultimate user, six months from date of initial installation, or twelve months from date of shipment by G.E.

NOTES

- (1) Peak inverse voltage.
- (2) This is the bogey value at which average characteristics are determined. For some classes of operation a lower value may be recommended.
- (3) These are the highest values listed for any class of CW operation; lower values may be indicated for some classes of CW operation. Refer to complete data sheets.
- (4) Adjusted for Ib=75 milliamperes.
- (5) for this information.
- (6) Peak voltage rating for pulse service.
- (7) Pulse service.
- (8) Adjusted for Ib=70 milliamperes.

- (9) The frequency listed is one at which significant application data are available or expected, and does not necessarily represent an absolute frequency limit.
- (10) Adjusted for Ib=10 milliamperes.
- (11) Adjusted for Ib=10 milliamperes; range must be variable from 75 to 200 volts.
- (12) Bypassed resistor (18k) in plate-supply lead.
- (13) With Rk=910 and Eg=+6.0 volts.
- (14) With Rk=270 and Eg=+6.0 volts.
- (15) Bypassed resistor (17.5k) in plate-supply lead.
- (16) Plate dissipation of 100 watts is permissible with forced-air cooling.

Special Devices — Photo Conductive Cells

GENERAL  ELECTRIC

Reliable, hermetically sealed, or plastic encapsulated, cadmium sulfide and cadmium selenide photoconductive cells are available in a wide assortment of package sizes and electrical characteristics.

Photo-cell-lamp combinations consist of a photoconductive cell and an illumination source enclosed in a light tight, metal package available in an assortment of electrical characteristics.

NOTES

- (1) The time required for current through the cell to reach 90% of its steady value upon switching from darkness to a light level of 5 footcandles.
- (2) The time required for current through the cell to decrease to 10% of its steady value upon switching from a light level of 5 footcandles to darkness.
- (3) This dissipation is allowable at ambient temperatures from -40 to +40C. From +40 to +65C, the allowable dissipation decreases linearly, reaching zero at +65C.
- (4) Measures approximately 30 seconds after removal of illumination of two footcandles produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin and at rated cell voltage.
- (5) This dissipation is allowable at ambient temperatures from -40 to +40C. From +40 to +80C, the allowable dissipation decreases linearly, reaching 37 milliwatts at +80C, and going to zero above +80C.

- (6) Measured approximately 20 seconds after removal of illumination of two footcandles produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin; d-c polarizing voltage 12 volts.
- (7) Allowable dissipation may reach 500 milliwatts with external heat-conducting bracket.
- (8) For a maximum of 20 minutes at 12-hour intervals.
- (9) Measured approximately 30 seconds after removal of illumination of one footcandle produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin; d-c polarizing voltage 50 volts.
- (10) This dissipation is allowable at ambient temperatures from -40 to +30C. From +30 to +65C, the allowable dissipation decreases linearly, reaching zero at +65C.

NOTES

- (1) Current of a bogey lamp at rated voltage.
- (2) This dissipation is allowable at ambient temperatures from -40 to +30C. From +30 to +65C, the allowable dissipation decreases linearly, reaching zero at +65 C.
- (3) Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 60 volts.

- (4) Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 250 volts.
 - (6) Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 200 volts.
- * Publication of these data does not obligate the General Electric Company to manufacture a device with these characteristics.

OUTLINE DRAWINGS

Special Devices — Reed Switches

In a relatively short period of years, the dry reed switch has begun to play an important role in performing the switching function for a wide variety of electronic/electro-mechanical equipment. Major application, now in general use, range from telephone switchgear, appliances, and data processing units to logic circuitry for industrial controls.

The General Electric reed switch capsule consists of a pair of low reluctance, magnetically actuated, flat metal reeds, hermetically sealed in an atmosphere of dry inert gas. The reeds are of equal length and are supported as cantilevers, overlapping at the center of the glass cylinder where they are separated by a small air gap, thus forming a normally open Single Pole, Single Throw (SPST) switch.

NOTES

- (1) All switches use single-pole, single-throw, normally open, Form A contact arrangements. With the exception of type DRV120, which is a vacuum switch, all switches are filled with inert gas at an internal pressure 1/2 atmosphere
- (2) Some degradation or improvement in performance may be expected at operating conditions other than those specified.
- (3) Sensitivity measured using a 6300 turn coil of #41 wire wound on a 0.8" long bobbin approximately 0.17" in diameter.
- (4) Full load, 25 volts d-c, 60 operations per second at H.V.A.
- (5) Diffused gold contacts with gold-plated leads.
- (6) Rhodium-plated contacts with gold-plated leads.
- (7) Sensitivity measured using a 10,000 turn coil of #39 wire wound on a 2.0" long bobbin approximately 0.25" in diameter.
- (8) Full load, 50 volts d-c, 60 operations per second.
- (9) Diffused gold contacts with both leads tinned.
- (12) Sensitivity measured using a 10,000 turn coil of #36 wire wound on a 1.750" long bobbin approximately 0.330" in diameter.
- (13) Nominal center-to-center of bent leads.
- (14) Diffused gold contacts with both leads tinned and bent at 90° angle.
- (15) Full load, 125 volts d-c, 60 operations per second.
- (16) The voltage rating is a "hold-off" value, and the current rating is a measure of the current the contacts will carry but not switch. Maximum permissible switching currents are to be determined.
- (17) Sensitivity measured using a 5,700 turn coil of #36 wire wound on a 2.0" long bobbin having an oval cross-section of approximately 0.5" x 0.28".
- (18) Rhodium-plated contacts with both leads tinned.

Special Devices—Tungar Bulbs

GENERAL  ELECTRIC

The Tungar bulb developed by General Electric in 1916—and used for rectification of a-c to d-c is well known wherever battery charging or similar applications require d-c power.

NOTES

- * Except for Cat. Nos. 16X897 and 45X674 which have coated filaments.
† Cat. No. 206501 is identical to Cat. No. 12X825 except that it is fitted with an adapter to take a clip anode lead and fits a standard Edison socket.
- ¹ Under normal ambient temperature conditions, this tube will deliver 90 percent of full output within three seconds after the simultaneous application of anode and filament voltages. Longer tube life can be obtained by applying anode voltage 1 to 3 seconds later than the filament voltage.
- ² Under normal ambient temperature conditions, this tube will deliver 80 percent of full output within three seconds after the simultaneous application of anode

and filament voltages. Longer tube life can be obtained by applying anode voltage 1 to 3 seconds later than the filament voltage.

³ The preheating time listed must be respected and filament excitation must be continuous if guarantees are to apply. When first installed in a new location, this tube should be operated for 10 minutes with filament voltage only.

⁴ Full output can be obtained as soon as power is applied to the anode after preheating time. The recommended tube preheating time must be respected and filament excitation must be continuous if guarantees are to apply.

NOTES

Where replacement type is indicated consult RCA Interchangeability Guide for Replacement information.

NOTE 1: For replacement purposes of these types electrical and/or mechanical modifications may be required. **NOTE 2:** 21AP4 — "RCA receivers with 21AP4 may be converted to 21ZP4 with conversion kit (RCA Part No. 12B202)."

NOTE 3: Pin No. 6 (Focusing Electrode) of the RCA replacement must be connected to Pin No. 11 at the socket. The original tube did not require an external voltage for focus.

RCA HI-LITE "RARE EARTH" COLOR TELEVISION PICTURE TUBES

NOTICE: RCA Hi-Lite "Rare Earth" Color Television Picture Tubes contain all new parts and materials.

United Electronics Company

DIRECT INTERCHANGEABILITY LIST

This Interchangeability Index has been prepared to assist you in finding exact replacement for electronic tubes in the Industrial, Transmitting and Special Purpose fields.

This listing is believed to be accurate to the date of issue. However, no responsibility is assumed by Westinghouse for its completeness or for its use, nor for any infringement of patents or other rights of third parties which may result from its use.

KEY TO ABBREVIATIONS

CR — Cathode Ray
 CS — Camera or Storage
 Glow — Glow Tube (Cold Cath.)
 GA — Vacuum Gauge
 Ig — Ignitron
 IR — Industrial Receiving

N — Neutron Detector
 Photo — Phototube
 Rect — Rectifier
 Thyr — Thyatron
 Trans. — Transmitting
 VR — Voltage Regulator or Reference
 HCDD — Hollow Cathode Discharge Device

Notes

1. Ratings and Performance are based on CCS Class C Telegraphy service unless otherwise shown.
2. Excluding flying leads and protruding side terminals, pipes or handles.
3. Highest frequency for full input.
4. For triodes, amplification factor (μ) is shown; for tetrodes, beam tubes and pentodes, transconductance (gm) in micromhos is listed.
5. Watts output at 500 megahertz.
6. Milliwatts output at 3000 megahertz.
7. Twin unit tube, Ratings are each unit, Performance for both units.
8. Parallel heater connection requires half heater voltage and twice heater current.
9. For d-c and single phase a-c. For 2 phase a-c voltage per phase will be half listed value and current per phase will be listed current value.
10. Listed values of filament voltage and current are per phase for 3 phase operation.
11. Designed for audio and ultra-sonic service, Ratings are single tube Class AB and Performance is for 2 tubes Class AB.
12. Ratings and Performance are for Class AB r-f amplifier service.

*Life Indicating Tube.

IGNITRONS

Ignitrons are gas-discharge, pool-type cathode tubes in which current conduction is initiated for each conducting cycle by means of an electrode called an ignitor. The ignitor is a small conical refractory element projecting into the mercury. When a relatively small current is conducted through the ignitor to the mercury, ionization of some mercury molecules in this area takes place. Ignitrons are of the half-wave type and current is conducted only when the anode is positive with respect to the cathode and the ignitor is fired. Control of the average conducted current is accomplished by phase control of the point in the input cycle at which the ignitor is fired. During the non-conducting cycle, ionization in these single-anode tubes is very low; the resulting reduction of shielding necessary to

prevent arc-backs lowers the arc voltage and permits operation at lower supply voltages. Ignitrons therefore have some of the control characteristics of thyratrons and, having a mercury-pool cathode, are capable of conducting very large currents. Water cooling of metal envelopes is used on most types to further increase current carrying capacity in a compact tube. Provision is made on some of the tube shells to connect thermostats for tube protection and water saving. Ignitrons are used in resistance welders, frequency-changer resistance welders, power rectifiers, high current switches in controlled fusion equipment, heat control devices for air-frame testing, and any circuit requiring precise control of large amounts of alternating or direct current.

NOTES

- Excluding flying leads, water pipes, and on coaxial tubes the mounting flange.
- Suffix PC indicates plastic-coated tube.
- At 2400 volts.
- These tubes use heavy duty ignitrons designed for continuous duty.
- Consult Industrial and Transmitting Tube Development Department for pulse modulator applications. The parameters listed represent a specific application only and substantial increases can be made in some areas.

VACUUM MEASURING TUBES

Vacuum measuring tubes are designed to become part of an evacuated system. With suitable circuitry, the pressure in that system may be accurately determined. The Bayard-Alpert ionization gauge is used for measurement of very low pressures. The Schulz-Phelps ionization gauge measures pressures up to one half torr. The Pirani and thermocouple gauges

are less accurate and measure only the higher pressures, but, their associated circuitry is much simpler.

These tubes are used in electron tube and semiconductor device processing control, vacuum deposition, research and rocket altimeter applications.

Notes

1. Excluding flexible leads. Length and diameter describe space to contain tube.
2. Grid outgassed by electron bombardment.
3. Grid outgassed by a-c current conduction.
4. Non-burn-out filament and grid outgassed by a-c current conduction.

- Aluminized screen, rectangular faceplate.

Zenith Tubes...

life-tested for greater dependability!

ZENITH TV PICTURE TUBES are rigorously tested at elevated line voltages for lengthy periods. Just one reason you can be sure of Zenith's great reliability and long life that better satisfies your customers. More than 200 Zenith quality tubes—for color TV, black-and-white TV, or special purposes—are in the complete line.

ZENITH "ROYAL CREST" CIRCUIT TUBES undergo over 1½ million hours of life-testing every month. Under actual operating conditions, they must meet the same quality standards as Zenith original parts—to perform with unrivaled dependability. Choose from a full line of more than 900 top-quality Zenith tubes.

Order all genuine Zenith replacement parts and accessories from your Zenith distributor

Exciting Surprises
for You—
and Your Family!
Fun for all!
Get the details
at your Zenith
Distributor's
Parts Department.

Zenith B&W replacement picture tubes are made only from new parts and materials except for the glass envelope in some tubes which, prior to reuse, is inspected and tested to the same high standard as a new envelope. Some color picture tubes contain used material which, prior to reuse, is carefully inspected to meet Zenith's high quality standards.

BEST YEAR YET TO SELL THE BEST

RG SUBMINIATURE CABLE

AMPHENOL line of subminiature coaxial cables were created for use in any miniaturized electronic application. Teflon dielectric subminiature

cable is able to withstand continuous operating temperatures up to 250°C. Teflon jacket is weatherproof, chemically inert, insoluble in liquids and gases.

The polyethylene dielectric miniature coaxial cable is intended for use where extremely high temperature is not a consideration.

CATV CABLE

AMPHENOL Polyfoam® Communications and TV Cables are designed to satisfy the need for a low attenuation, low capacitance RF cable for the communications field.

All cables illustrated are available in 1000 foot continuous lengths.

Note: * Add the following suffixes to the Amphenol Number for sweep testing:
 —101 (sweep tested from 50 MC to 90 MC and 170 MC to 220 MC).
 —202 (sweep tested from 10 MC to 250 MC).

TRIAxIAL CABLES

AMPHENOL Triaxial Cables satisfy the need for a high degree of shielding in a flexible transmission line. This is

achieved by adding a high coverage braid over the cable jacket and then applying a second or outer jacket. This cable can be used to carry two separate signals.

58A	21-204*	.285 I	TC	.195 TC	.116 P TC	19/.0071	65.9	29.5	1900	50	60	Triax
-----	---------	--------	----	---------	-----------	----------	------	------	------	----	----	-------

LOW NOISE CABLES

AMPHENOL Low Noise Cable fulfills the need for cable which will remain electrically neutral under conditions of shock

and vibration. The reduction of inherent noise is achieved on these cables by the application of a semi-conductive coating over the dielectric.

59	21-541	.242	I	C	.146CCP	7/32TC	65.9	21.5	2300	73	35	BNC, BN, C, UHF

HIGH VOLTAGE CABLE AND WIRE

AMPHENOL High Voltage Cable and Wire satisfies a multitude of high voltage applications — wherever flexibility and

temperature extremes may be a factor. High voltage wire operates up to 50,000 volts D.C. — coaxial cables up to 35,000 volts D.C.

TWIN-LEAD TRANSMISSION LINES

AMPHENOL Marine Core® Twin-Lead has the lowest signal loss of any twin-lead wet or dry. It has a tough, brown virgin polyethylene jacket protecting double self-sealing cores of Polyfoam.

Amphenol Number	Imp.	Conductors	Description
214-056	300	7/28C	Flat Type, standard for TV and FM antenna lead-in.
214-100	300	7/28C	Flat Type, heavy duty.
214-318	300	7/28C	Flat Type, clear polyethylene for indoor applications.

Amphenol Number	Imp.	Conductors	Description
214-271	300	7/28C	AIR CORE Tubular Twin-Lead, same above except this is capable of handling 500 watts of RF power.
214-103	300	7/28C	MARINE CORE Twin-Lead, outstanding for applications under adverse conditions such as moisture, salt spray and industrial contamination.
214-298	—	7/28C	4-Conductor-Rotor Cable, 28 volt rating, one conductor tinned for identification.

BC/U* 100 PER CENT SHIELDED CABLE

AMPHENOL BC/U bonded cable is a high reliability, low loss, 100% shielding, especially designed lightweight cable for applications wherever efficiency and performance is a factor, i.e., CCTV, MATV, CATV communications. Meets or exceeds all requirements of MIL-C-17.

ALPHA WIRE MFG.

MIL-W-76B-PLASTIC WIRE

TYPE MW-UNCOVERED PLASTIC

DESCRIPTION: Solid or extra flexible stranded tinned copper, color coded medium wall polyvinylchloride insulation. The stranded conductor has an extra tight lay to prevent springing open when stripped.

CHARACTERISTICS: Temperature rating -40°C to +80°C. Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture and fungus.

TEFLON TAPE WRAP JACKET OVER SHIELD

DESCRIPTION: Each conductor stranded silver plated copper, Type E extruded .010" TFE Teflon insulation, color coded, cabled, braided silver plated copper shield 90% coverage, sintered wrapped white Teflon tape jacketed overall.
CHARACTERISTICS: Temperature rating -65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

Mil-W-5086A

UNSHIELDED AIRCRAFT WIRE FOR ELECTRICAL SYSTEMS

DESCRIPTION

MIL-W-5086A—Type I — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon, (polyamide) jacket overall.

MIL-W-5086A—Type II — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, clear nylon (polyamide) jacket overall.

MIL-W-5086A—Type II — AN-10 thru AN-0000 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.

CHARACTERISTICS: Temperature rating: -55°C. to +105°C. Voltage rating: 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydral, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

Flat Ribbon Cable

MULTI-CONDUCTOR — PLASTIC INSULATION
CONDUCTORS PER MIL-W-16878D, Type C

DESCRIPTION: Each conductor stranded tinned copper, color coded .016" polyvinylchloride insulation, conductors banded together to form flat ribbon cable.

CHARACTERISTICS: Temperature rating -55°C to +105°C. Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

APPLICATIONS: Saves time, weight, and space on circuit connections, interconnecting assemblies and systems, wiring harnesses for racks, sliding drawer and drop panels. Conductors fully color coded and easily separated for neat terminations.

Shielded Control Cable

GENERAL PURPOSE MULTI-CONDUCTOR
PLASTIC JACKETED CABLE

DESCRIPTION: Each conductor, stranded tinned copper, color coded, polyethylene insulation, cabled with fillers where necessary, rayon wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket overall.

CHARACTERISTICS: Suggested Operating Temperature: -20°C to +60°C. Suggested Operating Voltage: 600 Volts.

Shielded Microphone Cable

PLASTIC JACKET

DESCRIPTION: 1702-1706: Single conductor, stranded tinned copper, white polyethylene insulation, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

1709-1712: Each conductor stranded tinned copper, color coded polyethylene insulation, cabled with fillers, textile wrap, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

APPLICATIONS: 1702-1706: All high impedance microphones, lapel, ribbon, velocity, crystal contact, hi-fi interconnecting cables.

1709-1712: All low impedance microphones—carbon, condenser, dynamic.

CHARACTERISTICS: Suggested operating temperature: -20°C to +60°C.

RUBBER AND NEOPRENE JACKETS

DESCRIPTION: Each conductor stranded tinned copper, color coded rubber insulation, cotton wrap, braided tinned copper shield, cotton wrap, tough black rubber or neoprene jacket overall.

APPLICATIONS: 1248-1449: All high impedance microphone, broadcast and heavy duty studio use, communication and audio systems.

1250-1450/16: All low impedance microphone, broadcast and heavy duty studio use. Can also be used for control circuits, video and audio interconnection cable, and as electronic power cables.

CHARACTERISTICS: Suggested operating temperature: -20°C to +60°C.

Rubber jacketed cable suited for standard duty indoor use.

Neoprene jacketed cable suited for heavy duty outdoor use and direct burial. Will resist oil, acid, sunlight, ageing and abrasion.

Low Capacitance Shielded Microphone Cable

CELLULAR FOAM POLYETHYLENE INSULATION — PLASTIC JACKET

DESCRIPTION: Single conductor, stranded tinned copper, white foam polyethylene insulation, braided tinned copper shield, chrome gray polyvinylchloride jacket.

Two conductors, stranded tinned copper, color coded foam polyethylene insulation, 1 white and 1 black, cabled with fillers, textile wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket.

CHARACTERISTICS: Suggested operating temperature: -20°C to +60°C. Low loss foam polyethylene provides lower capacitance and attenuation than standard solid polyethylene microphone cables, thereby increasing the effective length of usable cable without loss of signal.

E-Z-Strip Lamp Cord

U.L. APPROVED

DESCRIPTION: Conductors parallel, stranded extra flexible bare copper, rubber or polyvinylchloride jacket overall. Slit in jacket to permit "E-Z" separation.

APPLICATIONS: For line cord on radios, lamps, electric clocks, food mixers and other small instruments and appliances.

CHARACTERISTICS: Suggested operating temperature: -20°C to +60°C. Suggested operating voltage: 300 volts.

Shielded Plastic Jacketed Cable

SPIRAL WRAPPED COPPER SHIELD

DESCRIPTION: Each conductor stranded or solid tinned copper, color coded polyvinylchloride insulation, conductors twisted, spiral wrapped copper shield, gray polyvinylchloride jacket overall. Nominal jacket thickness .020".

CHARACTERISTICS: Use of spiral shield makes pigtailing off extremely simple and fast. Excellent for production line work. Provides close to 100% shielded coverage for audio and RF frequencies. Suggested operating temperature: 20°C to -60°C.

BRAIDED COPPER SHIELD

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, braided copper shield, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

CHARACTERISTICS: A conventional type of braided shield providing approximately 75% coverage is particularly desirable where flexibility is required. The copper shield allows ease of pigtail soldering. Shield construction provides additional cable strength. Operating temperature: -20°C to +60°C. Nominal jacket thickness .020".

APPLICATIONS: For public address and sound systems, ideal for recording studios, amateur radio transmitters, shielded power or electronic circuits, wherever an economical shielded cable is required.

ALPHA WIRE MFG.

Sold Nationally to Electronic Parts Distributors by; Loral Distributor Products, a Division of Loral Corporation

Unshielded Intercom Cable

PAIRED CONDUCTORS — PLASTIC JACKET

DESCRIPTION:

Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted into pairs, gray polyvinylchloride jacket overall. Suitable for outdoor installatior.s.

APPLICATIONS:

Balanced intercom systems. Annunciators. Telephones. Nurses call systems. Control circuit cable. Electronic computer cable. Multiple speaker cable. Signal systems. Alarm systems.

CHARACTERISTICS:

Suggested operating temperature: -20°C to +60°C. Suggested operating voltage: 200 volts.

Shielded Audio & Data Cable

INDIVIDUALLY SHIELDED MULTIPLE PAIRS — PLASTIC JACKET

DESCRIPTION: Each conductor, tinned copper, color coded, high density polyethylene, conductors twisted into pairs. 22 gauge tinned copper drain wire. Mylar-supported aluminum foil shield, aluminum facing inward. Chrome Grey PVC jacket overall.

NEW

CHARACTERISTICS: Mutual conductance between conductors of a pair, 25 pf/ft. Capacitance of a single conductor to shield, 45 pf/ft.

APPLICATIONS: For audio, R.F. and pulse applications requiring superior circuit isolation.

#22 — SOLID

#22 — STRANDED

Shielded Plastic Jacketed Cable

MYLAR SUPPORTED ALUMINUM FOIL SHIELD

DESCRIPTION: Each conductor stranded tinned copper, color coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire laid parallel, aluminum foil facing outward to provide maximum ground, gray pvc jacket overall.

CHARACTERISTICS: Operating temperature: -20°C to +60°C. Operating voltage: 400 volts. Light weight, reduces cable diameter, and provides 100% shield coverage.

RETRACTILE COIL CORDS

POWER CORDS—NEOPRENE JACKET U.L. APPROVED

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Long-lasting service is assured with this quality multi-conductor power cord. Each conductor is stranded copper, with rubber insulation, and a rugged weather and oil resistant neoprene jacket overall.

APPLICATION: Used on electric tools, portable drills, soldering wires, electrical appliances, household appliances, etc., to eliminate loose hanging wires and to prevent wires from tangling and twisting.

CHARACTERISTICS: Suggested operating temperature: 20 C to -60 C.

*If all four conductors normally carry current, amp rating is as shown. If one lead is used as a ground, amp rating is the same as 2 and 3 conductor cords.
†A 12" retracted length with a 12" straight lead on each end for easy stripping and termination. Cord extends to approximately 6 feet.

RETRACTILE TEST LEAD WIRE

RETRACTED LENGTH 12"—EXTENDED LENGTH 6 FEET

DESCRIPTION: A high grade quality rubber insulation for maximum flex life extruded over a single conductor of extra flexible tinned copper which gives long life to this retractile test lead wire. Available in a 12" retracted length with a 6" straight lead on each end, the cord extends to approximately 6 feet.

RETRACTILE COIL CORDS

RETRACTILE COMMUNICATION COIL CORDS

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Multi-conductor communication cord manufactured with extra flexible #23 AWG-21 36 tinned soft cadmium copper for maximum flex life. Insulated with rubber for communication circuits of maximum 120 working volts. The overall jacket is a specially compounded cured neoprene jacket giving long life to the retractile cord.

APPLICATION: Used in communication equipment, such as telephone car carriers, mobile radio equipment, ham operations, head sets, citizen band units and radio transmitter to receiver head sets, communication cords eliminate hazards and inconveniences caused by tangled straight cords.

RETRACTILE COMMUNICATION CORDS (SHIELDED)

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Same as above, except that shielded conductors are individually shielded with a cadmium copper shield to eliminate external electrical interference. Shield can be pigtailed for direct soldering connections.

APPLICATION: When shielded communication cords are needed.

MINIATURE RETRACTILE COMMUNICATIONS CORDS

RETRACTED LENGTH 2 FEET—EXTENDED LENGTH 10 FEET

DESCRIPTION: A small diameter plastic cord with stranded tinned copper conductors for maximum flexibility, insulated and jacketed with polyvinylchloride. Each cord is available in a 2 ft. retracted length with a 6" straight lead on each end and extends to approximately 10 feet.

APPLICATION: For low voltage power and communication equipment where miniaturization is required due to space and weight limitations.

Tinned Copper Tubular Braid To MIL Spec QQ-B-575

DESCRIPTION: A woven tinned copper braid which is manufactured completely round as outlined in Mil Spec QQ-B-575. Each strand of the braid is soft drawn tinned copper wire. The braid is self-supporting and maintains its round configuration. The percentage of shielding coverage is 95% or more when placed over a mandrel of an equivalent diameter to the inside braid diameter.

Sold Nationally to Electronic Parts Distributors by: Loral Distributor Products, a Division of Loral Corporation

U.L. Approved Hook-Up Wire

DESCRIPTION: Stranded tinned copper, color coded polyvinylchloride insulation.
CHARACTERISTICS: Temperature rating (-10°C to +80°C, 300 V) (-10°C to +105°C, 600 V). Resistant to acids, alkalis, oil, flame, moisture and fungus.

U.L. Silicone Rubber Appliance and Fixture Wire

NEW

300 VOLT 80°C — STYLE No. 1061

DESCRIPTION: Stranded tinned copper conductor, silicone rubber insulation, impregnated white fiberglass braid overall.

CHARACTERISTICS: Resistant to abrasion, oil, moisture, and fungus.

APPLICATIONS: For wiring all types of lighting fixtures and other high wattage devices.

MAXIMUM OPERATING TEMPERATURE +200°C (392°F)

ALPHLEX® ZIPPER TUBING

DESCRIPTION Alphlex Zipper Tubing is the all purpose modern way to harness, cover and protect cables. Just zip to close — and zip to reopen. If you wish, it may be permanently sealed with PB-200 Special Compound Liquid Sealer. Alphlex Zipper Tubing is strong, flexible, durable, and offers new freedom in design, production and repair.

APPLICATIONS To shield, to harness wire, to custom-cable to any length, to enclose, to encase, to identify (such as cable markers), to protect, to replace worn jackets.

HOW TO ORDER
Select the type of Zipper Tubing desired from the chart and the required Inside Diameter. When ordering, request as follows: For example, ZIP-31 Tubing in 1/4" Inside Diameter order — ZIP-31 — 1/4".

TYPES OF ZIPPER TUBING						
TYPE	MATERIAL	WALL THICKNESS (Inches)	OPER. TEMP.	APPLICATIONS	STOCK COLORS	STANDARD PUT-UPS
ZIP-31	Polyvinylchloride made from MIL-I-631 D, GRADE C Materials	.020	-20° C to 105° C	All Purpose Type	Clear Black Yellow	25' 50' 100' 25' 50' 100' 25' 50' 100'
ZIP-31M	Polyvinylchloride made from MIL-I-631 D, GRADE C Materials	.040	-20° C to 105° C	Heavy Duty Constructions	Clear Black	100' 100'
ZIP-44	Polyvinylchloride made from MIL-I-7444 B Materials	.020	-67° C to 70° C	Extreme Flexibility, Low Temperature & Aircraft industry	Clear Black	100' 100'
ZIP-50	Polyvinylchloride "sandwich" of aluminum foil laminated between two sheets of polyvinyl	.040	-20° C to 105° C	100% RF shielding	Silver-Grey	100'

ZIPPER SPECIFICATIONS FOR ALL TYPES OF ALPHLEX ZIPPER TUBING

Material	Polyvinylchloride	Cold Brittleness	-85° C
Track Thickness (when closed)	.095"	Fungus-proof	will not support fungus
Dielectric Strength, V/mil	759	Flammability	self-extinguishing
Tensile Strength-P.S.I.	3810	Lateral Pull Strength (unsealed)	42.7 pounds/inch
Ultimate Elongation	255%	Lateral Pull Strength (permanently sealed)	59.8 pounds/inch
Operating Temperature, Upper Limit	106° C	Standard Colors	Black, Clear, Yellow

Contrasting color combinations of zipper and body are available to order. The zipper portion can be supplied in any of the following colors: Black, Yellow, Clear, Blue, White, Brown, Purple, Red, Orange, Green, Slate.

STANDARD SIZES FOR ALL ZIPPER TUBING	
Zipper Tubing Inside Diameter	Approx. Flat Width (From track to track — excluding flap)
1/4"	1 1/4"
3/8"	1 3/8"
1/2"	2"
5/8"	2 1/2"
3/4"	2 3/4"
7/8"	3 1/8"
1"	3 1/2"
1 1/4"	4 1/4"
1 1/2"	4 3/4"
1 3/4"	5 1/4"
2"	6 1/4"

Because of small Inside Diameter, these sizes cannot be closed by using the slider. The tracks must be closed by manual pressure.

Alphlex® Polyvinylchloride Plastic Tubing (PVC-105)

CONFORMS TO MIL-I-631D †

DESCRIPTION: The superior mechanical, thermal, and electrical properties of Alphlex PVC-105, coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of Alphlex PVC-105 is its high degree of flexibility, which is maintained even under severe environmental conditions.

Rated for temperatures as high as 105°C, PVC-105 has a high dielectric strength that remains unaffected by increasing temperature throughout its range. PVC-105 maintains a high resistance to the agents of heat, oil, chemical corrosion and fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

Alphlex PVC-105 is compounded with first quality, non-migratory resinous type plasticizers. Carefully selected stabilizers and modifiers added in the manufacturing process, counteract chemical and environmental degradation. Under adverse conditions Alphlex PVC-105 retains its flexibility which permits it to cling to and protect irregular shapes. An unusually simple to handle insulating material, PVC-105 "snakes" well under all environmental conditions.

APPLICATIONS: Designed and manufactured for general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary.

Alphlex® Teflon Extruded Tubing

CONFORMS TO MIL-I-22129B

DESCRIPTION: Alphlex Teflon Tubing is unmatched by any other type of tubing for use in electrical applications at high frequencies and temperatures. Teflon is rated for continuous operation at 250°C, and retains an exceptional toughness and its flexibility throughout its temperature range.

Alphlex Teflon Tubing has the further advantage of a high degree of resistance to flexural fatigue and repetitive stresses; coefficient of friction lower than that of any other known solid; and a dielectric constant and power factor lower than that of any other known solid. This tubing will not crack or become brittle during aging.

Because of its resistance to soldering iron temperature, Alphlex Teflon Tubing will not shrink back during the soldering process. Alphlex Teflon Tubing will not melt and flow as do conventional thermoplastic materials. At high frequencies, its dielectric strength is many times that of other insulating materials.

Alphlex Teflon Tubing is chemically inert, has zero moisture absorption and its insulation resistance properties are unaffected by heat aging or temperature use up to 250°C.

APPLICATIONS: A thin flexible insulation, Alphlex Teflon Tubing permits a miniaturization and compactness of design never before possible. Invaluable in any application where a high heat resistant, flexible, non-flammable, chemical solvent and corrosion-resistant material is required.

Irradiated Polyolefin Tubing

NEW ALL-PURPOSE SHRINKABLE TUBING — FIT-221

- SHRINKS 50% (2:1 RATIO) WITH ONLY 5% LONGITUDINAL SHRINKAGE
- FEWER SIZES COVERING MORE APPLICATIONS
- AVAILABLE TO MEET U.L. SPECIFICATIONS
- MEETS MIL-1-23053A (WEP)
- AMS SPECIFICATIONS 3636A (COLOR), 3637 (CLEAR)

DESCRIPTION: Alphlex FIT-221 Shrinkable Tubing, when heated, forms a tight-mechanical bond, even over irregularly shaped materials. FIT-221 is available in a range of colors and in clear.

FIT-221 is an all-purpose polyolefin extruded tubing that is simple to use and provides a tight mechanical bond. FIT-221 is an irradiated, thermally stable, modified polyolefin base product. FIT-221 Clear may be used so that jacketed, printed components or cable data is clearly visible and inspection of insulated components, cables or terminations is simplified.

The tubing is supplied in an expanded form and easily slips over the object to be covered. When a temperature of approximately 275°F (135°C) is applied, it immediately returns to its predetermined size (approximately one-half smaller) and forms a permanent tight-fitting mechanical bond. FIT-221 Tubing will not cold-flow or melt but retains form stability

throughout its temperature range. No radioactivity exists in or on the material and it will not emit radiation. Longitudinal shrinkage is 5% maximum when completely recovered.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 225°F to 255°F. Shrinkage will begin at 235°F, but at a somewhat slower rate. When using an oven, temperature may range from 235°F to 300°F. Prolonged exposure to these temperatures will not affect the physical or electrical properties of FIT-221 Shrinkable Tubing. FIT-221 Clear Tubing remains transparent over its entire operating range of -55°C to 135°C.

FLAMMABILITY: Although FIT-221 Clear is a high temperature material, it is flammable and will burn. However, when the tubing is shrunk over non-flammable or flame-resistant components, such as connectors, terminals and wire, the entire assembly will not support combustion.

All Types of FIT Tubing are available from stock and may be cut and/or marked to your specifications.

Irradiated Polyvinylchloride Tubing FIT-105

All Types of FIT Tubing are available from stock and may be cut and/or marked to your specifications.

HIGHLY FLEXIBLE — IDEAL FOR CABLE JACKETING

Conforms to MIL-1-631D, Type F, Form U, Grade C, Class 1, Cat. 1

SHRINKAGE RATIO 2:1 (50% Shrinkage)

DESCRIPTION: Alphlex FIT-105 is an easy-to-use modified polyvinylchloride that provides a snug, extremely flexible insulation.

Because of its flexibility, strength and its ability to shrink 50% on application of heat, FIT-105 is ideally suited for insulating components and cables with a wide variation in shape and diameter.

Because of the 50% expanded diameter of FIT-105 Tubing, it is an extremely useful cable jacketing material. Cable cores may be pulled through FIT-105 Tubing with comparative ease and shrunk down to form a jacket with all the qualities of the finest extruded plastic jackets.

The tubing is supplied in expanded form and in continuous lengths. When a temperature of approximately 347°F (175°C) is applied, Alphlex FIT-105 Tubing immediately returns to its predetermined size (approximately 50% smaller), and forms a permanent, tight-fitting mechanical bond. FIT-105 Tubing will not cold-flow or melt but retains form stability within its temperature range. No radioactivity exists in or on the material and it will not emit radiation. Longitudinal shrinkage is less than 10%.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 325°F, or above. When using an oven, temperature may range from 325°F to 350°F.

* New Item † Specify Color

ALL SPOOLS ARE ONE PIECE EXACT LENGTH. (EXCEPT SPOOLS WITH (*) FOOTNOTE)

• Spools may contain more than one piece, minimum length of any one piece is 25 ft.

When priced per M ft. length may vary ±10% from length shown; all other lengths are exact.

§ Cut to Customer's Specified Length subject to available stock lengths—minimum length 25'; 25' to 199', plus 25', minus 0; 200' or over, plus 50', minus 0.

▲ (Teflon Hook-up Wire) Prices apply to any striped color combination in quantities of 1000' or more. Minimum order 1000' per stripe color combination on 500' and 1000' spools only. Striping adders do not apply to braided tracers—Write for prices on non-stock tracer colors.

¶ (Vinyl Hook-up Wire) Prices apply to standard stock colors as listed in our current catalog and to non-stock striped colors over stock solid colors in quantities of 10,000' or more. Non-stock striped colors over stock solid colors in quantities of 1000' to 9999', add pro-rata set-up charge of \$4.50 per color combination. Minimum order 1000' per special stripe combination. Special stripe colors in any quantity will be subject to 2 piece put-up and plus or minus 10% per spool.

Prices Subject to Change Without Notice

The Beldfoil ISO-Shield Story

Much of today's miniaturized, high-gain electronic equipment calls for small diameter cables that are lightweight, flexible and has total electrostatic shielding.

Wire braid and serve type shields have a practical range up to 97 percent maximum coverage. While they provide sufficient electrostatic shielding for many applications, they do not furnish the full-coverage shielding required by many high-gain electronic systems.

Beldfoil ISO-Shield provides 100 percent coverage and adds greater effectiveness to all major shielding functions: excluding external signals, confining the transmitted signal and minimizing crosstalk.

Beldfoil ISO-Shield uses a thin layer of aluminum bonded to a polyester film. The aluminum provides the necessary electrostatic shielding while the polyester film adds a bonus insulation and increased mechanical strength. The 100% shielding is accomplished by an exclusive

method of folding back both edges of the tape in such a way as to provide metal-to-metal contact between adjacent wraps, thus providing the same shielding effect as a continuous aluminum tube. As a direct result of using this thin layer of aluminum-polyester shielding, Beldfoil ISO-Shield is lightweight, flexible and small in diameter. Depending on the cable type the polyester film may be used to increase the dielectric strength between the conductors and the shield, or to provide insulation between adjacent shields.

Applications for Beldfoil ISO-Shield range from a single conductor audio and sound cable to complex multi-conductor multi-shield cables. They include cables for data processing systems, telemetering equipment, strain gauge applications, hi-fi systems, instrumentation, TV cameras and receivers, microphones and communications equipment plus many special constructions for both military and commercial use.

shielded sound and broadcast audio cables

Belden**COMMUNICATIONS CABLE**

Belden offers a complete line of Communications Cables to provide customers with the best all-around cable for every application requirement. Cables are available in a wide range of sizes, dimensions, shielding constructions and types of insulation. All Communications Cables are designed to protect the desired signal by eliminating or minimizing the interference of hum, noise and crosstalk.

SHIELDING: Because it affords such excellent protection, Beldfoil ISO-Shield is now being specified for many critical applications such as instrumentation systems, tracking station equipment, computer and data processing systems, audio, sound, strain gauge and control cables.

No other type of shield on the market surpasses Beldfoil Shield for full coverage and protection against radiation and penetration at audio and radio frequencies. Beldfoil's unique polyester-aluminum shielding provides 100% coverage.

Braided Copper Shields have high tensile strength and are very effective at audio and radio frequencies in flexing applications. Served Copper Shields usually provide more coverage than Braided Copper Shields; they're also easier to terminate. Both Braided and Served Copper Shields are recommended at audio frequencies.

INSULATIONS: Belden's Communications Cables are available in a variety of insulation materials, each having its own advantages depending upon the size requirements, environmental and electrical conditions dictated by the application.

Vinyl insulation resists flame, most solvents, oil, ozone and sunlight. It has a higher dielectric constant and capacitance than polyethylene. Therefore it is recommended for audio frequency applications. It is easy to strip.

Polyethylene insulation is lightweight and resists ozone. It has a low dielectric constant for low capacitance and provides low electrical loss and is recommended for audio and radio frequency applications. Like vinyl, polyethylene is easy to strip.

Polypropylene insulation provides excellent heat and abrasion resistance. It has a low dielectric constant with equally low capacitance. It is less flexible than polyethylene. Because it has excellent dielectric strength and mechanical ruggedness, polypropylene insulations are widely used for miniaturization applications. Even with low overall diameters, they permit very low loss. Recommended for audio and radio frequencies.

INSTRUMENTATION CABLES

Instrumentation cable provides the vital communications link between sensing devices and read-out equipment. Because of the many and diverse conditions of environment and stress under which instrumentation cables must transmit information — in usable form, without distortion or change — cable characteristics should always be carefully matched with the specific requirements of the particular application.

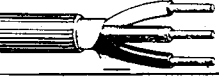

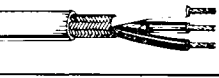

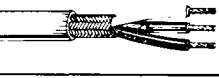

The scientific, medical and industrial uses of instrumentation cable are vast and ever growing. Some of the

common uses for instrumentation cable are such things as measuring pressure, speed, resistance and temperature.

Belden manufactures a wide variety of precision instrumentation wire using several types of insulating materials for conductors and shields to meet a wide variety of electrical, physical and thermal requirements.

Many Belden Instrumentation Cables are unique in the field and have been engineered for specific application problems.

special audio and communication cable
audio cable selection guide

SPECIAL AUDIO AND COMMUNICATION CABLES

Description	Trade Number	No. of Cond.	AWG & (Stranding)	Cond. Color Coding	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O.D. (Inch)	Percent Shield Coverage	Suggested Working Voltage	Nom. Cap. (mmf./ft)	Nom. **Cap. (mmf./ft)	Standard Spool Lengths in ft
	8784	10 un-shielded	2-16 (26x30) 1-20 (10x30) 7-22 (7x30)	Blk, Wht Gray Red, Grn, Org, Yel, Blu, Purple Brown	.016 .018 .013	.040	.295	—	300	—	—	500
<i>Tinned copper, vinyl insulated, conductors cabled, chromo vinyl jacket.</i>												
	8640	2	26 (Solid) 1 Pair	Red, Clear	.002	.020	.089	100	100	80	140	250, 500
	8642	6	26 (Solid) 3 Pair	Red, Clear	.002	.025	.140	100	100	80	140	250, 500

Solid copper, BELDSOL[®] (solderable—no stripping required), BELDFOIL aluminum-polyester shield on each pair, red, brown, orange textile marker and isolating polyester tape for each pair on 8642, Copperweld ground drain wire, WHITE vinyl jacket.

Ideal for instrumentation and audio console work where subminiaturization is required.
105° C maximum operating temperature.

*Capacitance between conductors.
**Capacitance between 1 conductor and other conductor connected to shield.

AUDIO CABLE SELECTION GUIDE

The length of cable run for a given wire size can be doubled if twice the power loss can be tolerated in the cable.

The next smaller size can be used when twice the power loss can be tolerated in the cable and the length of cable run remains the same.

To use this chart for constant voltage systems, determine the load impedance using Step 1 below. If this impedance does not appear on the chart, use Step 2 to determine the maximum length of cable run for each wire size.

The choice of appropriate audio cables for runs of varying distances depends on many factors such as amplifier voltage output and power level as well as load impedances and the percent of power loss which can be tolerated. For this reason it is not practical to provide a general chart showing the recommended wire size for all conditions. The chart shows the maximum recommended cable runs for various wire sizes selected for commonly encountered load impedances.

Wire Size (AWG)	Load Impedance (Ohms)					
	1 OHM	2 OHM	5 OHM	10 OHM	25 OHM	500 OHM
14	88	176	352	1045	2610	5220
16	55	110	220	630	1574	3150
18	35	70	140	410	1020	2050
20	22	44	88	262	655	1310
22	13	26	52	164	410	820
24	8	16	32	105	262	525

STEP ONE	$Z \text{ (Load Impedance)} = \frac{E^2 \text{ (Voltage} \times \text{Voltage)}}{P \text{ (Watts)}}$
STEP TWO	$\text{Ft. (Max.)} = \frac{\text{Ft. (chart)} \times Z \text{ (Load Impedance)}}{Z \text{ (chart)}}$
FOR EXAMPLE	<p>Find maximum length of run for #20 AWG pair in a 70 volt, 25 watt system.</p> <p>1. $Z = \frac{70 \times 70}{25} = 196 \text{ Ohms}$ 2. $\text{Ft. (max.)} = \frac{262 \times 196}{100} = 513 \text{ feet}$</p>

BELDFOIL

#22 tinned copper, vinyl insulated, cabled in pairs, each pair and its ground wire under BELDFOIL[®] aluminum-polyester shield, over-all chrome vinyl jacket. 300 Volts suggested working voltage.

Vinyl insulation is used for ease of stripping and soldering. Recommended for audio frequency applications requiring excellent circuit isolation. Maximum operating temperature 80°C.

Insulation resistance between shields.....100 megohms/M'
Capacitance between adjacent shields.....115 mmf/ft
Voltage breakdown between adjacent shields.....1500 volts
Working voltage between adjacent shields.....50 volts

BELDFOIL

#22 gauge tinned copper, polypropylene insulated, cabled in pairs, each pair and its ground wire under BELDFOIL[®] aluminum-polyester shield, over-all chrome vinyl jacket. 300 volts suggested working voltage.

Recommended for audio, pulse, and radio frequency applications requiring superior circuit isolation. Polypropylene insulation is used for excellent high frequency properties and mechanical toughness. Maximum operating temperature 105°C.

Insulation resistance between shields.....100 megohms/M'
Capacitance between adjacent shields.....115 mmf/ft
Voltage breakdown between adjacent shields.....1500 volts
Working voltage between adjacent shields.....50 volts

Tinned copper conductors, polypropylene insulated, four groups of two conductors with #22 AWG drain wire. Each group individually BELDFOIL[®] shielded with polyester tape wrap, chrome vinyl jacket. 105°C Maximum operating temperature.

*Capacitance between conductors.

**Capacitance between 1 conductor and other conductor connected to shield.

•Belden U.S. Patent 3,032,604.

§Minimum length 25' 25' to 199', plus 25', minus 0. 200' or over, plus 50', minus 0.

†Cabled around common axis—request information before planning high and low level circuits in same cable.

○Color code is Western Regional Strain Gauge Committee.

unshielded paired sound cables

Belden**MULTIPLE PAIR UNSHIELDED SOUND CABLES**

TYPICAL APPLICATIONS: Balanced line sound systems.

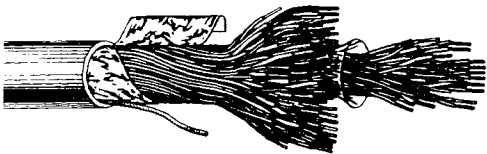

Made with 80°C vinyl plastic compounds for high dielectric strength and the best physical properties, such as free stripping, small

diameter, and tear resistance. It also resists the effects of water, sun, oil, grease, and ozone. The conductors are paired with a short-lay twist for conductor balance, providing a quiet circuit, free from cross talk.

Belden

microphone
and shielded power supply cables

MICROPHONE CABLES

Belden Microphone Cables are designed for flexible service at audio frequencies. They are used not only for microphones, but also for home entertainment equipment, instruments, tape recorders and shielded power supplies.

Shielded single conductor cables are used in high impedance systems, while multiple conductor cables are used in

low impedance applications.

All cables are precision-engineered and manufactured to transmit clear signals and to cancel out hum pick-up and crosstalk interference. They are designed to withstand the flexing and normal abuse of studio, laboratory and home usage.

RUBBER—HYPALON—NEOPRENE—PLASTIC

See page 17 for conductor color coding

▲See 8421 Page 22 for spiral wrapped shield version of 8401—Recommended for Hi-Fi use.

*Capacitance between conductors.

**Capacitance between 1 conductor and remaining conductors (if any) connected to shield.

PLASTIC CABLES RECOMMENDED FOR: Lower capacitance, lower loss, greater ozone and oil resistance, lighter weight, smaller diameter.
 RUBBER CABLES RECOMMENDED FOR: Greater abrasion and impact resistance, and extra limpness so cable will lie flat on stage or studio floor.
 NEOPRENE AND HYPALON CABLES RECOMMENDED FOR: Outside use, cold weather applications. Resistant to effects of sun, oil, and ozone.

retractile (coiled) cables and cords

Belden**COILED CORDS**

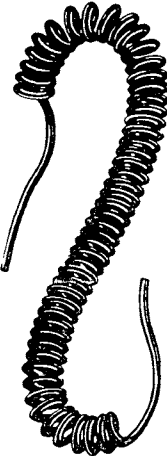

Retractile cords keep telephone and microphone cables from tangling and cluttering desk tops, communications consoles and the front seats of motor vehicles. Belden manufactures a full line of high quality retractile coiled cord products for a wide number of applications.

Belden retractile cables and cords are used for telephone equipment; ham and citizen band radios; hand and

desktop microphones; language lab equipment; musical instruments; mobile controls and mobile communications equipment and for a variety of assorted industrial applications.

The specially designed conductors and shields of Belden retractile cords are constructed to withstand rugged use and to minimize replacement frequency.

SINGLE BELDSOL® Solderable

BELDSOL Magnet Wire is a dual film insulated Magnet Wire that combines the excellent dielectric characteristics of Polyurethane and the known toughness and solvent resistance offered by an overcoat of nylon. This wire is rated by IEEE tests for 130°C usage and will solder without insulation removal at 750°F. Complies with Mil-W-583 specification.

transmission line cables

Belden

Presenting Belden's

COLOR TWINS

Now, there's a Belden quality TV antenna wire just right for color and UHF TV reception in both congested and uncongested areas.

With today's strong emphasis on quality UHF and color TV programming and equipment, the importance of the transmission line connecting the outdoor antenna and TV receiver is critical. Until recently, there's been a big quality gap — a missing link — between the best engi-

neered color TV sets and the finest TV antennas.

Belden's Color Twins were specially engineered to provide color and black/white, UHF and VHF TV reception in congested close-in areas and uncongested fringe areas.

Designed to provide superior VHF, UHF, B/W and color TV reception in congested areas where reception is critical. Beldfoil shielding assures a clean, strong signal by eliminating transmission line pick-up of ghost signals and electrical noise (including automotive ignition noise). Belden's 8290 can be installed underground, in gutters, and conduit. 8290 can simply be taped to mast.

AWG & Stranding	Color	Nominal O.D. (Inch)	Nominal Velocity of Propagation	Nominal Capacitance (mmf/ft)	Nominal Attenuation per 100'		Std. Pkg. Length in ft.

Copperweld, 2 conductors, orange polyethylene insulation and web between conductors, cellular polyethylene oval insulation, Beldfoil[®] shield, stranded tinned drain wire, polyethylene jacket.

• Patent No. 2,782,251 and Patent Pending

Provides superior VHF, UHF, B/W and color TV reception in uncongested or fringe areas. Especially designed to deliver more signal to the receiver than any other unshielded twin lead. The special polyethylene jacket protects the major portion of the energy field. Provides highest efficiency of any available unshielded transmission line, even when exposed to smog, moisture, weathering and industrial atmospheres. Does not require expensive matching transformers and connectors.

TERMINALS

FOR 8290 SHIELDED PERMOHM AND 8285 PERMOHM

These terminals now offer an easy termination method for 8290 Shielded PermoHM and 8285 PermoHM for the antenna and TV set termination with

any simple crimping tool. They are the same terminals used on the 50, 75 and 100 ft. coils of 8290 and 8285.

CELLULINE maintains uniform electrical characteristics by eliminating all possible moisture between conductors. Installation is easier because no end-sealing is necessary. Losses are lower because of its lower dielectric constant (1.5).

The thick outer wall of brown polyethylene protects the cable from abrasion and sun damage; the round shape offers less wind resistance. The result is a longer lasting, more efficient line. Recommended for black and white VHF and local UHF reception.

Amateur transmitting and receiving twin lead—1 KW(RF) rated.

WELDOHM is 1 1/2 times STRONGER and has 2 1/2 times more FLEX LIFE than equivalent twin lead with all copper conductors, without changing the RF electrical characteristics. Tests prove its superior resistance to the pulling, whipping, and twisting that is so important to a long lasting installation.

Brown polyethylene for the best weathering.

For indoor use only

*Belden U.S. Patent No. 2,814,666

BELDEN MERCHANDISERS

NEW! TOTE-M PAK*

A great new on the job convenience item for TV servicemen and installation crews! Disposable tote-m pak shipping carton has a built-in carrying handle for easy, on-the-job handling. Contains 1,000 ft. spool which feeds wire out through special opening (spool never has to be removed or handled).tote-m pak features convenient reminder footage chart.

8230 (Weldohm) and 8225 available in 1,000' spools only.

TV CAMERA CABLES

Belden TV Broadcast and Closed Circuit TV Camera Cables assure reliable circuit isolation thereby reducing a-c hum and minimizing crosstalk between circuits. They are made to withstand rugged service and to maintain high conductor insulation resistance regardless of ambient temperature changes.

Major uses for these cables are for controlling, powering and transmitting sound and picture information for

monochrome and color TV cameras as well as for remote control, monitor and cue line systems.

Belden TV Camera Cables are engineered to be lightweight, flexible and easy to terminate. They are manufactured and tested in accordance with Belden's own rigid and time-proven quality control standards in order to assure outstanding reliability, performance and service life.

Designed to meet the critical electrical and physical requirements necessary for color television broadcast applications.

Trade Number **8283**

82 Conductor TV Color Camera Cable

4-14 AWG (19x27) tinned copper, vinyl plastic insulated, color coded.
3-16 AWG (26x30) tinned copper, vinyl plastic insulated, color coded.

BELDFOIL[®] aluminum-polyester wrapped shield around the above 7 conductors cabled with stranded tinned copper drain wire.

8 coaxial cables. Nom. impedance 53.5 ohms, color coded.

67-22 AWG (7x30) tinned copper, vinyl plastic insulated, color coded, 7 under conductive textile shield with stranded ground wire.
Tinned copper braid shield.
Chrome vinyl plastic jacket. 1.22" Nom. O.D.
§Cut to customer's specified length.
Maximum length 1000'.

Trade Number **8280**

28 Conductor TV Camera Cable

4-18 AWG (16x30) tinned copper, vinyl insulated, color coded.
21-22 AWG (7x30) tinned copper, vinyl insulated, cabled in 3 groups of 7, color coded.
3 coaxial cables. Nom. impedance 51 ohms, color coded.

Tinned copper braid shield.
Chrome vinyl jacket. .750" Nom. O.D.
§Cut to customer's specified length.
Maximum length 1500'.

A smaller, lighter weight cable designed to make long runs easier. For black and white (Monochrome) systems.

Trade Number **8286**

28 Conductor Hypalon & TV Camera Cable

4-18 AWG (16x30) tinned copper, vinyl insulated, color coded.
BELDFOIL aluminum-polyester wrapped shield around 4 conductors with stranded drain wire, polyester tape over this shielded group.
21-22 AWG (7x30) tinned copper, vinyl insulated, cabled in 3 groups of 7, color coded, one group of 7 has a BELDFOIL aluminum-polyester wrapped shield overall with a stranded drain wire, polyester tape over this shielded group.

3 coaxial cables. Nom. impedance 75 ohms.
Tinned copper braid shield.
Black Hypalon jacket. .730" O.D.
§Cut to customer's specified length.
Maximum length 1000'.

A 75 ohm cable designed to remain flexible in cold weather. Recommended for transistorized TV cameras.

§Minimum length 25'. 25' to 199', plus 25' minus 0. 200' or over, plus 50', minus 0.
®DuPont trademark.

Belden

tv camera cable and 75 ohm video cables

TV CAMERA CABLES

Trade Number **8284**

24 Conductor TV Camera Cable

17-22 AWG (7x30) tinned copper, vinyl insulated, color coded.
 3 under BELDFOIL shield with stranded drain wire.
 4-16 AWG (26x30) tinned copper, vinyl insulated, color coded.
 3 coaxial cables. Nom. impedance 53.5 ohms, color coded.

Designed specifically for color TV transmission. This cable incorporates circuit isolation assuring the reduction in AC hum level and cross talk essential for color TV broadcasting.

Tinned copper braid shield. Heavy cotton braid.
 Chrome vinyl plastic jacket. .800" Nom. O.D.
 §Cut to customer's specified length. Maximum length 1000'.

Trade Number **8282**

13 Conductor TV Eye Cable

8-22 AWG (7x30) tinned copper vinyl insulated, color coded.
 1-22 AWG (7x30) polyethylene insulated conductor.
 2-18 AWG (16x30) tinned copper conductor vinyl insulated.
 Black and Red.

1-RG-58A/U cable 50-ohm coax.
 1-72-ohm coax, stranded conductor, polyester tape wrapped.
 Chrome vinyl jacket. .470" Nom. O.D.
 §Cut to customer's specified length. Maximum length 2000'.

Especially engineered for TV Eye Cameras. Recommended for remote control, monitor and cue line applications.

§Minimum length 25'. 25' to 199', plus 25' minus 0. 200' or over, plus 50', minus 0.

75 OHM PRECISION VIDEO CABLE

TYPICAL APPLICATIONS: Video signal transmission in Color and Monochrome TV studios. Provides high quality carrier of video signal with superior picture definition and eliminates problems of periodicity. Cable is manufactured with rigid

control of concentricity and all dimensional tolerances. The black polyethylene jacket is inherently a non-contaminating, non-migratory compound. 100% SWEEP TESTED.

Description	Trade Number	AWG & (Stranding) Material	Nom. O.D. (Inch)	Percent Shield Coverage	Nom. Impedance (Ohms)	Nom. Velocity of Propagation	Nom. Cap. (mmf/ft)	Nom. Attenuation per 100		Standard Spool Lengths in ft.
								kc or mc	db

***RG/U cables combine low capacitance and low attenuation. The virgin polyethylene insulation assures constant electrical characteristics regardless of changes in frequency or temperature. Note: Max. rating of polyethylene is 80°C (176°F).

HIGH VOLTAGE CABLES

Belden High Voltage Cables are designed for use by public utilities and laboratories in testing high voltage equipment and apparatus. Through their use, potentially dangerous conditions can be detected both before installation and at intervals during service.

Belden High Voltage Test Cables are engineered to achieve the best possible performance at continual rated voltages. Their special design incorporates the use of

conductive polyethylene over the center conductor, bonded to the polyethylene dielectric material. This provides uniform voltage stress distribution around the center conductor and results in an increased elimination of degradation due to internal corona.

For special cables up to 600 KVDC ratings, please ask for individual quotation.

* New Item

Conductive polyethylene over inner conductor combined with a copper wire braid over the dielectric provides uniform distribution of voltage stress. Very high-voltage DC cable applied from 200 KVDC to 600 KVDC is available from Belden on special order. Consult Belden Engineering Department for AC or pulse applications.

MILITARY SPECIFICATIONS PERTAINING TO BELDEN HOOK-UP WIRE

Belden's outstanding line of Hook-Up Wire represents a broad selection of quality products that meets the Military Specifications indicated on this and on the following pages.

Basically, from the customer's point of view, Military Specifications can be a helpful guide in determining specific information about cable construction, electrical limits and test data as an aid in comparing and selecting wiring products to meet the needs of specific applications.

The following Military Specifications cover the Belden Hook-Up Wire Products to be found in this catalog:

MIL-W-16878—Wire, Electrical, Insulated, High Temperature.

Covers insulated wire for the internal wiring of meters, panels, and electrical and electronic equipment at temperatures ranging from 105°C to 200°C. The many types available in different voltages and thermal ratings are listed on the following pages to meet your individual requirements.

MIL-W-76—Wire and Cable, Hook-Up, Electrical, Insulated.

Covers single conductor, plastic-insulated Hook-Up wire for the internal wiring of electrical and electronic equipment. The many types available in different voltages and outer covering are listed on the following pages to meet your individual requirements.

Color striping available on 1000' minimum per item each color on 500' and 1000' spools.

MIL-W-76

Covers single conductor, plastic-insulated Hook-Up wire for the internal wiring of electrical and electronic equipment. The many types available in different voltages and

outer covering are listed on the following pages to meet your individual requirements.

TYPE MW—MIL-W-76—VINYL—1000V-80°C

Tinned copper, vinyl insulated, medium wall. The extruded vinyl insulation is flame and ozone-resistant and is inert to most chemicals, oils, and solvents.

Trade Number	Type Designation	AWG & (Stranding)	Insulation Thickness (Inch)	Nom. O. D. (Inch)	Stock Colors on Standard Spools

heat shrinkable tubing

Belden

Belden provides a complete line of heat shrinkable tubing in order to meet the many, diverse application requirements of the electronics industry. Belden Heat Shrinkable Tubing is available from stock in a full range of colors, sizes and lengths in three basic types—all conveniently packaged for easy handling and use. All Belden HST products are manufactured to exact specifications in order to assure dependable production-line uniformity of diameters, shrink-down and electrical properties.

HST 1: BELDEN IRRADIATED POLYOLEFIN HEAT SHRINKABLE TUBING

Belden HST-1 meets all industry standards and size specifications. It is thermally stabilized and homogeneous in nature. HST-1 is essentially free from flaws, defects, pin holes, bubbles, seams, cracks or inclusions. When heated to 275°F, it shrinks to 50% of its original diameter, and

when fully shrunk, its longitudinal change is less than 3% of its original length. It is solvent and fungus resistant and has a maximum water absorption of only 0.1%. Belden HST-1 meets or exceeds MIL-I-23053 (WEPS) Revision A.

HST 2: BELDEN IRRADIATED POLYOLEFIN HEAT SHRINKABLE TUBING

Belden HST-2 combines flexibility with abrasion resistance. It is flame retardant and offers excellent dielectric and mechanical strength. It is essentially free from flaws, defects, pin holes, bubbles, seams, cracks or inclusions. When heated, it shrinks to 50% of its original diameter

and, when fully shrunk, its longitudinal change is less than 10% of its original length. It is impervious to solvents and resists water absorption. It is recommended for most commercial uses that do not require the more costly inspection of military specifications.

HST 3: BELDEN VINYL HEAT SHRINKABLE TUBING

Belden HST-3 Polyvinylchloride Heat Shrinkable Tubing has an extra thin wall for excellent conformability. It is flame retardant and offers outstanding physical and electrical properties. When heated, it shrinks to 50% of its original diameter and when fully shrunk, its longitudinal

change is less than 15% of its original length. All colors (except black) are translucent which permits the enclosed object to remain visible. HST-3 is especially recommended for use in areas where space is critical or where flexibility is a requirement.

merchandisers and crimping tool

Belden

BELDEN MERCHANDISERS

Belden offers a full line of mobile communications terminals in a wide range of sizes and configurations to suit every wiring need and to meet the requirements of many specialized applications. Belden terminals are manufactured in accordance with the highest quality control standards and packaged for extra handling convenience.

Primary wire terminals are made from electrolytic copper, electro-tinned for corrosion resistance. Insulated terminals have tough vinyl sleeves which can be crimped

without cutting or breaking.

The Belden 98 Packet self-service, counter-top Merchandiser displays a complete selection of the most popular terminals and assures fast turnover with minimal handling and restocking costs. Belden's fine selection of complementary terminal accessories, kits and application tools complete the line to assure full product coverage and customer satisfaction.

**8198
IRS WIRING KIT (Ignition Radiation Suppression)**

Contains parts for making up ignition leads or sets for cars, trucks, boats or stationary engines. Includes 100' 8688 IRS cable, 400 terminals and one 8197 crimper tool. IRS application information on page 38.

Contents:

50-8168	25-8174	50-8171	100' 8688
25-8173	50-8170	200-8172	1-8197

**8196
STRIP-IT TOOL**

Fast, efficient way to strip wire and cable. Easy to use in tight spots. Rugged tool steel blades cut as well as strip. Adjusts for all wire sizes. Blister packaged for easy display and quick sales.

**8199
THE 98 PACKET®**

No. 8199 Assortment holds 75 individual plastic packets containing 25 different types of the most popular primary and ignition terminals to cover your mobile communications requirements. Rack stands on counter or hangs on wall. Weighs just 7 lbs. complete. Dimensions: 18" high, 12" wide, 8" deep.

BELDEN TERMINALS

Packaged in sturdy plastic tubes for fast turnover, easy handling, stocking and reordering. To cover your mobile communications requirements.

**8197
ALL PURPOSE TERMINAL CRIMPING AND
CABLE STRIPPING TOOL**

Precision machined to permanently swage all types of Primary, Spark Plug, and Snap Terminals shown. Rugged construction made from heat-treated alloy steel with blue plastic handle grips.

teflon wire | Belden

Teflon is a fluorinated thermoplastic with outstanding thermal physical and electrical properties. However, because the basic resin and processing costs are relatively high, Teflon is generally restricted to applications requiring its special characteristics.

Belden Teflon wire products are highly recommended for miniature cable applications, because of their superior thermal and electrical properties. Teflon is especially suit-

able for internal wiring soldering applications where insulation melt back is a specific problem. Belden Teflon wiring products are outstanding in their resistance to oil, oxidation, heat, sunlight, flame and their ability to remain flexible at low temperatures. They all have excellent resistance to ozone, water, alcohol, gasoline, acids, alkalis, aromatic carbon and solvents.

Description	Trade Number	AWG & (Stranding)	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O.D. (Inch)	Cond. Color Coding	Percent Shield Coverage	Nom. Cap. (mmf ft)	Nom. Cap. (mmf ft)	Suggested Working Voltage	Standard Spool Lengths in ft

Belden cords

HPD HEATER CORDS WITHOUT APPLIANCE PLUG

Information and Application

HPD Cordage (Asbestos cotton braid) is recommended for irons and other appliances where flexibility of the cord is extremely important.

Glazed cotton HPD should be used for maximum resistance to abrasion.

All Belden Iron Cords use a fiber glass tie on the stripped conductors for ruggedness and to insure the smallest diameter for easy installation.

17729 has a special terminal finish. The braid is stripped 2 1/4" with a fiber glass tie, and the eyelets are for a #6 screw.

All cords have UL Green Flag Label.

These cords are offered in a wide variety of:

1. Lengths
2. Gauges
3. Colors
4. Cotton Types
5. End Finishes—
Stripped
Terminals
Eyelets

MOLDED VINYL CORD HOLDER PLUG BRAID STRIPPED 1 1/4" WITH FIBER GLASS TIE, RING TERMINALS FOR #8 SCREW

COFFEEMAKER AND FRY PAN CORD SETS

Information and Application

Fits all standard coffeemakers. The miniature appliance plug is slotted so that it also fits many fry pans. The 2 ft. length cord is particularly convenient for the kitchen counter space. Both cords made to original equipment specifications with 3-leaf bronze contacts and 17 AWG conductor. UL Blue Flag Label.

17856 is recommended where just a coffeemaker cord is required. Miniature appliance plug is not slotted. UL Blue Flag Label.

CONVENIENCE AND SAFETY. Dangling cords can be messy, troublesome and unsafe. Retractable cords stay neat, allow free movement of the appliance and prevent accidents. Neoprene jackets meet UL requirements and retain full memory through thousands of stretching cycles.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17852	2	17 (52 x 34)	.160 x .308	HPN	Black

17826	6	16 (65 x 34)	.152 x .300	HPN Neoprene	15A-125V	Black

For appliances such as toasters, waffle irons, battle warmers and kitchen stove timers where the cord is permanently attached to appliance.

UL Green Flag Label.

MOLDED VINYL PLUG CONDUCTORS SPLIT 1" STRIPPED AND TWISTED 1/2"

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Rating	Color
17806	6	18 (41 x 34)	.140 x .276	HPN Neoprene	10A-125V	Black

HPN HEATER EXTENSION CORD

Eight foot 16 AWG Neoprene Extension Cord. For all appliances such as irons, toasters, mixers, etc., where additional cordage is needed. UL Blue Flag Label.

MOLDED VINYL PLUG MOLDED VINYL CONNECTOR FOR BLADE PRONGS

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Rating	Color
17870	8	16 (65 x 34)	.152 x .300	HPN Neoprene	10A-125V	Black

MIXER CORDS - FAN CORD

UL-TYPE SPT-2 VINYL

Fits latest hand held food mixer models such as Dormeyer, G.E., Hamilton Beach, Sunbeam and Westinghouse. UL Blue Flag Label.

MOLDED VINYL PLUG MOLDED VINYL PLUG ROUND PIN CONNECTOR

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17186	6	18 (41 x 34)	.144 x .277	SPT-2 Vinyl	White

MOLDED VINYL PLUG CONDUCTORS SPLIT 1 1/2" STRIPPED AND TWISTED 1/2"

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17116	6	18 (41 x 34)	.144 x .277	SPT-2 Vinyl	White
17139	9	18 (41 x 34)	.144 x .277	SPT-2 Vinyl	Brown

Fit older models of many nationally advertised hand held food mixers. Also BVI, Cory, Dormeyer, G.E., Hamilton Beach, Oster and Westinghouse can openers. Also fit knife sharpeners, electric juicers, home hair dryers, desk or window or suitcase fans, portable humidifiers, toy transformers and small business machines. UL Green Flag Label.

TWO CONDUCTOR POWER SUPPLY CORDS

PARALLEL LAMP CORDS

Information and Application

For Lamps, Radios, Desk Fans and Small Appliances. Long life plastic resists cracking and aging. Popular lengths and colors. UL Green Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17106	6	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Gray or Ivory

17328	8	16 (26 x 30)	.323	SJ Rubber	Black
17330	10	16 (26 x 30)	.323	SJ Rubber	Black

Retractable (coiled)

CONVENIENCE AND SAFETY. Dangling cords can be messy, troublesome and unsafe. Retractable cords stay neat, allow free movement of the appliance or tool, and prevent accidents. Rubber insulation and neoprene jackets meet UL requirements and retain full retracting memory through thousands of stretching cycles. UL Green Flag Label.

UL-TYPE SVO NEOPRENE (RETRACTILE)

Trade Number	Retracted Length (in.)	Practical Extended Length (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17249	12	6	18 (41 x 34)	.270	SVO Neoprene	Black

BUSINESS MACHINE CORDS

UL-TYPE SJT AND SVT VINYL

17359 fits Burroughs, Monroe and Victor 10 key Adding machines as well as late Friden models and the Burroughs Sensimatic Bookkeeping Machine and Penton Tape Recorder (Triumph model). 17260 fits Revere Projectors and many business machines. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17359	10	18 (16 x 30)	.298	SJT Vinyl	Gray
17260	8	18 (41 x 34)	.243	SVT Vinyl	Gray

UL-TYPE SJ RUBBER

Fits R. C. Allen Adding Machine and Mimeograph models 100 and 92. Fits following 16MM Motion Picture Projectors: All RCA senior models, all Victor Kalart models, Bell and Howell models 185 through 399. Can also be used as an extension cord where a round connector is required. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17370	10	16 (26 x 30)	.323	SJ Rubber	Black

Belden

 cords

TWO CONDUCTOR EXTENSION CORDS

Information and Application

This new idea in convenience adds an 8' extension cord and you still have an outlet to plug in another cord. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17177	6	18 (41 x 34)	.144 x .277	SPT-2	Brown

CUBE TAP EXTENSION CORD SETS

Manufactured in Brown, Black and Ivory in all popular lengths. The molded three way connector is particularly sturdy and will last long in steady service. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17156	6	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17159	9	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17162	12	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17165	15	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory

UL-TYPE SV AND SJ RUBBER

The molded plugs and connectors give long service life. The CORD-HOLDER plug provides easier storage. It can also be used as cord shortener. For longer extension cords of this type, see Lawnmower and Vacuum Cleaner cords. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17259	9	18 (41 x 34)	.245	SV Rubber	Gray
17361	10	16 (26 x 30)	.323	SJ Rubber	Black

UL-TYPE SJ AND S RUBBER

For use where a round connector is required. Also used as a power supply cord for some appliances. For longer extensions where a heavier duty type cord is needed for added insulation and abrasion protection use 17555 or 17556. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17370	10	16 (26 x 30)	.323	SJ Rubber	Black
17555	25	16 (65 x 34)	.401	S Rubber	Black
17556	50	16 (65 x 34)	.401	S Rubber	Black

EXTENSION CORDS WITH DUPLEX CONNECTORS

UL-TYPE SJO AND SO NEOPRENE

These extension cords with the duplex connector are designed to withstand the punishment of shop, garage and factory use.

These cords are ideal for sound and broadcast studios. The entire cord is oil, grease and ozone resistant. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17375	25	16 (26 x 30)	.323	SJO Neoprene	Black
17565	25	14 (41 x 30)	.528	SO Neoprene	Black
17566	50	14 (41 x 30)	.528	SO Neoprene	Black

THREE CONDUCTOR POWER SUPPLY CORDS

UL-TYPE SJ RUBBER, SJT VINYL AND SJO NEOPRENE

Information and Application

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 2" CONDUCTORS STRIPPED AND TWISTED 3/4"

For all tools such as sanders, saws, grinders and polishers requiring grounding. Three conductor Cord now listed by UL as mandatory for drills 1/8" and larger. UL Green Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17406	6	18 (16 x 30)	.328	SJ Rubber	Black

UL-TYPE SJO NEOPRENE (RETRACTILE)

Retractile (coiled)

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 1 1/2". CONDUCTORS STRIPPED 1/2" AND TINNED

CONVENIENCE AND SAFETY. Dangling cords can be messy, troublesome and unsafe. Retractable cords stay neat, allow free movement of the appliance or tool, and prevent accidents. Rubber insulation and neoprene jackets meet UL requirements and retain full retracting memory through thousands of stretching cycles. UL Green Flag Label.

Trade Number	Retracted Length (in.)	Practical Extended Length (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color

THREE CONDUCTOR PROJECTOR AND BUSINESS MACHINE CORD

UL-TYPE SVT VINYL

MOLDED VINYL GROUNDING PLUG

MOLDED VINYL 3-CONTACT CONNECTOR

Can be used for Revere and Eastman Kodak projectors, Friden, Victor, Hewlett-Packard, Marchant business machines, and DuKane audio equipment. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17258	8	18 (41 x 34)	.253	SVT Vinyl	Gray

Belden cords

THREE CONDUCTOR EXTENSION CORDS

Information and Application

This new idea in convenience adds an 8' extension cord and you still have an outlet to plug in another cord. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
17462	8	18 (16 x 30)	.328	SJT Vinyl	Black

UL-TYPE SJT AND ST VINYL

YELLOW CORDAGE stands out against green or brown backgrounds and thus reduces hazard of accidental cutting.

These extension cord sets are for lawnmowers and hedge clippers using three conductor power supply cordage. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
17491	25	18 (16 x 30)	.328	SJT Vinyl	Yellow

*Rubber and plastic cords, but not including heater cords. Based on a line voltage of 115 and maximum voltage drop (loss) of 10 volts when cord carries rated current.

**To determine correct AWG, refer to cord length in table, and current nearest the current rating on the name plate of the appliance.

CURRENT CARRYING CAPACITY OF FLEXIBLE CORDAGE (amperes)*

*2 Conductors are 18 AWG †19 AWG ‡Not all pairs are shielded, or conductors are more than one size.

HOW TO USE THE CABLE FINDER CHART

Match the desired "Number of Conductors" column with the required "Conductor Size" to find the applicable Belden Trade Number and its catalog page.

For cables with more than 8 conductors, see Multiple pair and unpaired unshielded cables on page 13 & 15, Multiple pair individually shielded on pages 9, 10 & 12. For cables combining shielded and unshielded conductors, see Special Audio and Communication cables on pages 10 & 11.

teflon wire

Belden

Teflon[®] is a fluorinated thermoplastic with outstanding thermal physical and electrical properties. However, because the basic resin and processing costs are relatively high, Teflon is generally restricted to applications requiring its special characteristics.

Belden Teflon wire products are highly recommended for miniature cable applications, because of their superior

thermal and electrical properties. Teflon is especially suitable for internal wiring soldering applications where insulation melt back is a specific problem. Belden Teflon wiring products are outstanding in their resistance to oil, oxidation, heat, sunlight, flame and their ability to remain flexible at low temperatures. They all have excellent resistance to ozone, water, alcohol, gasoline, acids, alkalis, aromatic carbon and solvents.

B-105 EXTRUDED PLASTIC TUBING

APPROVED FOR 105°C-OPERATION — MEETS MIL-1-631D SPECS — A quality plastic Vinyl tubing designed for electronic and electrical insulation work. Has high dielectric strength, extreme flexibility, non-flammability, abrasion resistance, impervious to oil, water, alkalies, alcohol, solvents, etc., high heat stability and resistance to aging. Meets all A.S.T.M. specifications, Mil. Spec. (Type F, Form U, Grades A and C, Class 2, Category 1).

TABLE OF PHYSICAL & ELECTRICAL PROPERTIES—B-105 TUBING

Tensile Strength—2500 Psi. (Minimum Average)

Flammability—Non-Flammable

Ultimate Elongation—340%

Recommended for Temperatures to—105° C

Cold Bend—40° C

Dielectric Strength .020" Wall—800 V/Mil

Varnish Baking—Good

Water Absorption

Weight Increase (1 Week)—0.1%—Fungi Resistance—Yes

Oil Resistance—Indefinitely flexible when immersed in oil.

Insulation Resistance—over 1,000,000 megohms.

IN STOCK

The Birnbach Line of insulated sleeving and tubing is the basic quality line designed for the rigid performance requirements of the Aircraft, Electrical and Electronic Industries.

Meets or exceeds the required MIL Specifications and ASTM and NEMA standards. We invite your inquiries on special problems and requirements.

B-65 — EXTRUDED PLASTIC TUBING LOW TEMPERATURE — Per MIL-I-7444B to —94° F.

No. B-65 meets Air Force spec. Mil-I-7444 specifically designed for operation at sub-zero temperatures. It is fungus resistant and has excellent dielectric strength.

B-130 — VINYL COATED/FIBERGLASS SLEEVING

Per MIL-I-3190B and NEMA Standards to 130° C.

(ASTM, NEMA Grade B-B-1) MEETS MIL-I-3190 SPECS. — Quality Electronic and Electrical Tubing. It is Class B Insulation that combines the best features of the inorganic fiberglass base sleeving with heat resistant, flexible plastic insulation. The plastic compound provides the highest electrical properties, heat stability (130° C.), flexibility and toughness. Meets performance requirements of specs. MIL-I-3190 A, NEMA VSI, ASTM D 372.

B-1200 — FLEXIBLE FIBERGLASS SLEEVING for Hi-Temperature — applications for 1200° F.

HIGH TEMPERATURE FIBERGLASS SLEEVING — Sleeving of tightly braided 100% fiberglass intended for temperatures as high as 1200° F. It provides maximum mechanical strength consistent with the ultimate in flexibility. It is treated to remove all organic matter as well as keeping the glass braid fray resistant. We can provide special construction to 1/4" double wall construction. It can be colored for coding purposes.

Birflon — TEFLON* SPAGHETTI TUBING

TFE EXTRUDED TUBING

T-500 T-500 Tubing is extruded from DuPont Tetrafluoroethylene Resin. Used in electronic and electrical equipment for connection of components. Its flexibility, ease of handling has established it as the best and most popular insulation sheathing. This high temperature Class C insulation does not melt and flow as the conventional thermo-plastic materials. Birflon T-500 Teflon has unique electrical, chemical and mechanical properties unmatched by any other type tubing for use in applications requiring high frequencies and high temperatures.

Because of Teflon's continuous service temperature of 250° C., which is more than 100° C. above other materials, the soldering technique is simplified since "Teflon" is not harmed by the hot barrel of the soldering iron — therefore, the assembly of aircraft, missile and electronic communication equipment is greatly speeded up. Thin Wall flexible Teflon Tubing can be processed easily into flexible and rigid printed circuits. As a thin, flexible insulation, it permits miniaturization and compactness of design never before possible.

ADDITIONAL ADVANTAGES OF BIRFLON T-500 TEFLON*

- **ELECTRICAL:** Low power factor, low dielectric constant, high volume and surface resistivity, good dielectric strength (500 to 1000 volts/MIL) constant over wide ranges of temperatures and frequencies. Dielectric constant of 2.0 and dissipation factor of 0.0002 are lowest of any solid dielectric.
- **THERMAL:** No change of electrical properties with temperature (25°C. to 250°C.) or frequency (60 CPS to 100 MC). Class C insulation — capable of continuous service at temperatures to 250°C. Has color stability.
- **TOUGHNESS AND FLEXIBILITY:** Has high impact strength. Is tough and flexible over the broad temperature range of -90°C. to 250°C. Service range -320°F. to 500°F.
- **CHEMICAL INERTNESS:** Completely inert to all chemicals and solvents except molten alkali metals and fluorine at elevated temperatures and pressures. Non-corrosive to all metals.
- **MOISTURE ABSORPTION:** Zero moisture absorption. Completely sun and weather resistant.
- **NON-FLAMMABLE** ● **LOWEST COEFFICIENT OF FRICTION**
- **FUNGI RESISTANCE:** Inert to all fungi growths.
- **SIZES:** Birflon T-500 Teflon Tubing available in sizes to fit B & S gauge wires. Thin wall available from stock, in sizes No. 32 thru 1/4" I.D. Additional sizes and wall thicknesses made to order. Birflon T-500 is made from high molecular weight virgin "Teflon" and meets AMS 3651B, 3653B, 3654, 3655, MIL-C-17B and MIL-I-22129C.

NOTE: When cutting Teflon Tubing, use single edge razor blade for clean unpinched cut.

Standard Put-up—36" Straight Lengths;

BIRFLON SHRINK SERIES TE TUBING		
HEAT SHRINKABLE TEFLON® TUBING		
Is a Class C material modified from polytetrafluoroethylene. The tubing will shrink when heated to 621 F. (It should be heated until it turns semi-transparent, then the heating process immediately stopped. Overheating can cause splitting, therefore trial and error testing is recommended to establish the proper time and temperature for each application.) Correct procedure will result in a snug-fitting insulating wrap possessing hi-heat resistance, superior chemical resistance, and excellent electrical characteristics. The tubing is available in a full range of colors. Stock colors: black, white, natural.		
* Dupont Polytetrafluoroethelene		
SK621 TEFLON® TUBING		
PROPERTIES CHART	TE SERIES Shrinkable "Teflon"®	

DIELECTRIC STRENGTH (20 Mil Wall)	850 Volts/Mil
DIELECTRIC CONSTANT	2.2

HARDNESS	98 Shore A
SPECIFIC GRAVITY	2.2

HAG-12 500/750° F Hot Air Gun For PVC Series
HAG-13 750/1000° F Hot Air Gun For TE Series

The quickest and most versatile method for applying heat is the hot air gun noted herein. Also, use of an oven, radiant heat, dipping in hot liquids, or using a soldering iron or the flame of a match.

HEAVY FORMVAR (HF) TYPE T2

Single conductor, round bare copper, baked film insulation from a varnish based on a vinyl acetal resin. 105°C.

Has new tough abrasion resisting film. Replaces enamel and fabric insulations for certain applications requiring exceptional abrasion resistance. Stable under heat. High dielectric strength. Infinite resistance to water and moisture. Does not fail after two hours at 105°C. Takes up less winding space.

**MIL-W-16878D TEFLON* — HOOK-UP WIRE****MIL-W-16878D — TEFLON† WIRE**Type E—Extruded (600 Volts) —
High Temperature Rating — 90° To + 260°C

Chemically inert, non-flammable, excellent flexibility, easy stripping, high dielectric strength, unaffected by fungus. Exceeds Class H insulation requirements. Unaffected by high or low temperature. Outstanding for its dependability and long life under all operating conditions indoors or outdoors. Teflon permits miniaturization and compactness in electronic designs of sub-miniature components, computers, UHF equip., slip ring assemblies, leads to hermetically sealed and potted components, telemetering equip. and guided missiles. Nom. wall .010" TFE extruded.

DESCRIPTION: Single conductor silver plated copper wire concentrically stranded and insulated with extruded or Teflon insulation.

SHIELDED AND UNSHIELDED TEFLON* CABLES TO MIL-W-16878D

DESCRIPTION: One or more conductors, each conductor silver plated concentrically stranded copper wire, Type E Extruded TFE .010" insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010" TEFLON* fused, double reversed tape jacket overall. Temperature —65°C to +260°C. Voltage rating 600V. Fungus, solvent, moisture, flame, acid, alkali and oil resistant.

PLASTIC HOOK-UP WIRE — MIL-W-16878D

PLASTIC HOOK-UP WIRE — MIL-W-16878D — Type B — High Temperature Vinyl — 600 Volt

Suitable for general purpose wiring for miniature high temperature hook-ups in aircraft, electronic instruments, devices, etc., where excellent resistance to moisture and solvents may be required.

DESCRIPTION: One conductor stranded tinned copper with rated -55°C to +105°C high temperature thermoplastic light wall insulation. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus. Nominal wall: 0.010.

AIRCRAFT PLASTIC HOOK-UP WIRE — MIL-W-5086A and MIL-C-7078A (105°C Rating)

No. 7351

DESCRIPTION: MIL-W-5086A—Type I—AN-22 thru AN-12—Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon (polyamide) jacket overall. MIL-W-5086A—Type II—AN-22 thru AN-12—Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, clear nylon (polyamide) jacket overall. MIL-W-5086A—Type III—AN-10 thru AN-00—Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, flame retardant nylon lacquered nylon braid overall. MIL-C-7078A—Type I—Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon jacket, braided tinned copper shield overall, 85% coverage.

CHARACTERISTICS: Temperature rating: -55°C. to +105°C. Voltage Rating: 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydrol, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

SHIELDED BROADCAST AUDIO CABLE

Designed to provide maximum performance on all equipment. Conductors twisted correctly assures quiet, clear operation which eliminates interference and cross talk. Used by Broadcast studios, for P.A. and sound systems, rack wiring, etc.

DESCRIPTION: #938—#22 Solid Tinned Copper Conductor, enameled, heavy cellulose acetate yarn wrap, cotton braid waxed; cabled with #22 AWG solid tinned copper wire laid parallel to twisted pair under tinned copper braid shield; tubed-on Vinyl plastic jacket overall.

#939—#22-7/30 Stranded Tinned Copper, plastic insulation, color coded, twisted, copper braid shield, tubed-on Vinyl plastic jacket overall.

#940—2 Conductors #22 solid plastic insulation, color coded, twisted with #22 AWG solid tinned copper ground wire under tinned copper shield with vinyl plastic jacket overall.

#940/1 same construction as #940 however with tinned copper spiral wrapped shield.

#822 and #824 have solid enameled copper wire, cotton wrap, cotton braid waxed twisted pair, bare copper braid overall.

HOOK-UP AND TEST LEAD WIRES

SUBMINIATURE TEFLON* HOOK-UP WIRE

Per MIL-W-16878D Type ET 250 Volts, 250°C Thin Wall .006"

This new exceptionally thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in microminiature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D type ET 250 volts, 250 °C.

Cat. No.	Mil Type Designation	Size AWG	Strand	Nom. O.D.

KINKLESS TEST LEAD WIRE

Used with portable test equipment; as tested, leads in analyzers, oscillators, instruments; wherever extreme flexibility and limpness is required. Has excellent dielectric properties.

DESCRIPTION:

No. 61—#20—41/36 extra flexible annealed tinned copper, stranded.

No. 66—#18—65/36 extra flexible annealed tinned copper stranded; paper serve; 3/4" special low capacity rubber, wax finish.

Colors: Red, Black.

Types WS-16/U Black, WS-17/U Red; No. 70 per MIL-W-13169 Specification available same construction as Birnbach #66 except compound per specification.

200° C — Birsil Silicone Rubber Hook-Up Lead Wire — 600 Volt

This Birsil Silicone Rubber Hook up lead wire withstands extreme temperature range and flexibility from -104°C. to +400°F. with retention of physical properties and is highly resistant to flex cracking at temperature extremes; fungus resistant; corona resistant; engineered for high-heat and hi-frequency applications; low power factor; acid-alkali-oil resistant; low dielectric constant; insulation approaching mica. Approved by U.L. but consumer must apply for Underwriter's Laboratories approval for individual product.

DESCRIPTION—One conductor, tinned copper strands, silicone rubber insulation, glass braid, lacquered. Color: White.

Additional sizes and colors available to order.
Types F and FF per MIL-W-16878C available to order.
STANDARD PUT-UPS: 100' - 500' - 1000'

NEW PLASTIC KINKLESS TEST LEAD WIRE

New formulation vinyl compound insulation allows maximum flexibility; rough treatment; extreme variation in climatic conditions; excellent abrasion resistance; greater temperature stability from -80°C to +115°C; fungus resistant; self extinguishing-flame proof; smooth surface. Resists exposure to gasoline and oil. 5000 volts

DESCRIPTION: One conductor tinned copper stranded, special formulation vinyl insulation.

Colors: Black, Red, Yellow, Green, White, Blue.

Cat. No.	Size AWG	Strand	Ins.	Nom. O.D.
1922	22	26/36	.032"	.100"

1916	16	65/34	.032"	.129"

For portable test equipment; as test leads for instrumentation exceeds the requirements for MIL-I-3930A type JP (PVC). It is superior to synthetic rubber spec MIL-R-6855 Class II Grade 60.

STANDARD PUT-UPS: 100' - 250' - 500' - 1000'

Hi-Voltage and Cathode Ray Cable

Used for 10,000, 20,000, 40,000, 60,000 volt applications as for cathode ray tubes in TV receivers, oscilloscopes and other electronic devices. Has dielectric constant of 2.7 and power factor of .002. Shielded Hi-Voltage type used to shield RF radiation in X-Ray, diathermy, medical equipment, and in transmitters.

DESCRIPTION—One conductor stranded copper tinned rulan (flame retarding type) polyethylene insulation. Available white/red tracer. Temp. Rating: 105°C

Shielded—Same as above with tinned copper braided shield overall.

RETRACTILE HEAVY DUTY AND POWER CORD SETS

RETRACTILE Super Heavy Duty POWER CORDS

GUARANTEED TO RETRACT FOR 4 YEARS MILITARY INDUSTRIAL. AWG SIZES — 12, 14, 16, 3 and 4 COND.

Especially desirable in the maintenance of industrial automation equipment, refrigerated trucks and trailers, mass assembly and production equipment, plane maintenance, control cable for cherry pickers, magnetic cranes, standby power distribution, heavy duty machinery.

Useful whenever and wherever a tougher, more rugged heavy duty power cable is indicated as in foundries, aboard ships, reels on overhead cranes and hoists, tanks, plug-in power for refrigeration and immersion heaters, etc. Usable around salt water, chemicals and many other areas which makes the use of reels undesirable . . . 48" retracted — 25' extended.

THIS IS A NEW CORD and should not be confused with cords of lesser quality.

BIRNBACH

COMPANY INC. FOR MORE INFORMATION ON COMPLETE LINES, WRITE FOR NEW CATALOG.

RETRACTILE CORDS

This series of Birnbach Coiled Kinkless Retractable Cords are permanently coiled into a spring-like shape without the use of metal springs or elastic bands. They have inherent "Recovery" properties. These Retractable cords extend approximately six times its retracted length, returning to its original shape and length when released. Always as long as you need them and no longer, they will not kink, tangle, trail, knot or dangle on the floor or bench and cause accidents. Useful wherever cords or cables must change length or position.

RETRACTILE TEST LEAD WIRE

Stretch coiled kinkless test lead wire description. 12" coil—stretches to approx. 6 feet. One conductor #20 stranded copper rubber insulation .165 O.D. Coil O.D. 3/4". 6" straight lead on each end.

Cat. No.	Re-tr. Length	Approx. Extended	Cond.	Size AWG	Strand	Coil O.D.	Nom. O.D.	Pkg. Std.

877/28	4	28	19/40TC	1/2"	.150	10

CONDUCTOR COLOR CODE: 1-Black, 2-White, 3-Red, 4-Green. For 3 conductors, use 4 cond. and cut one dead.

RETRACTILE COILED COMMUNICATION CORD

Multi-conductors stranded communication cord No. 23 AWG. Tinned copper wire neoprene or Geon plastic jacketed. Long lengths can be cut to exact requirement. Adds product reliability. Useful wherever cords must change length or position. Nom. cond. resistance .022 ohms per linear foot, .185 ohms per retracted foot. Maximum working voltage 120 volts. Current carrying capacity 1 ampere.

RETRACTILE (KINKLESS) COILED SHIELDED COMMUNICATION CORDS

DESCRIPTION: Single and multi-conductor shielded microphone cable neoprene or geon plastic jacketed. This cable remains neat and compact with no danger of tripping or of the wire becoming entangled in equipment. Also suitable for stereo and additional speaker extensions. Shield can be pigtailed for soldering. No. 24 AWG Str. is 41/40 tinned soft cad. copper. No. 23 has 21/36 tinned soft cad. copper. Spiral wrapped tinned soft copper shielding.

Shielding Braid, Insulated Copper Wire, Braiding

UNINSULATED COPPER WIRE

TINNED COPPER SHIELDING

Used for shielding and bonding on aircraft, marine and auto radio wires and cables. Shields speaker leads, lead-ins, amplifier wires. Extremely flexible, slides over wires and cables.

DESCRIPTION:

No. 853 thru 856/7—Composed of extremely flexible fine soft annealed copper tinned wires closely woven, braided and Rolled Flat.

No. 860—Composed of extremely flexible fine soft annealed copper wires closely woven, braided and Rolled Flat.

TUBULAR BRAID PER MIL SPEC. QQ-B-575

Manufactured completely round as noted in MIL Spec. QQ-B-575, this tinned copper shielded braid has self-supporting characteristics which enables it to maintain its round shape. The shielding coverage percentage is 95% or more. This tubular braid is used in military applications where maximum shielding against electrostatic interference is indicated. In addition, it is used as a protective covering against mechanical abrasion and stresses for the wires, cables and other components.

HarnessRAP

This new spiral wrapping provides a readily flexible and strong protection for groups of conductors. Because of the facility with which it is applied it is particularly useful for temporary or experimental wiring as well as permanent installations. Leads can be brought out at any point to make a "tailor-made" harness, strong, secure, tight-fitting.

Harnessrap retains its elasticity and can be removed as easily as it is applied, then reused again and again.

Because of its flexibility it is especially useful for harnesses that carry wiring around sharp corners or that are subject to repeated flexing or bending.

COLUMBIA

DURAFOAM UHF/VHF TELEVISION TRANSMISSION LINE*

MOST WIDELY USED — LARGEST SELLING

Durafoam quality is so high that we can offer an unconditional 15 year guarantee. Its high reliability construction features two tubes of cellular polyethylene, to assure low signal loss, and a heavy black polyethylene Permaline insulation, to offer the maximum protection against deterioration caused by moisture, chemicals, salts and sunlight.

Durafoam is also extremely easy to install, cutting down the amount of time required for each job.

NEW LOW COST UHF-VHF COLOR TV

FOAM TRANSMISSION LINE
FM-MULTIPLEX 300 OHM

THRIFT-FOAM features a cellular foam polyethylene inner-dielectric which separates two stranded copper conductors. Due to this cellular construction, THRIFT-FOAM has a lower capacitance resulting in lower attenuation losses. An overall jacket of weather-resistant black polyethylene provides durable line protection.

COLUMBIA SHIELDED PERMAFOAM TELEVISION TRANSMISSION LINE

- Aluminum Mylar Shield for 100% Effective Coverage. Tinned Copper Ground Wire Attaches to Set.
- High Molecular Weight PERMALINE Jacket for Superior Weathering.
- No Standoff Insulators or Matching Transformers Necessary.
- High Strength Copperweld Conductors for Maximum Conductivity.

A New All Channel Transmission Line Designed to prevent line pickup interference.

CABLE SIZE .275 x .455
Nominal velocity of propagation 76.5%
Nominal capacitance 6.8 MMF Ft.
Attenuation DB per 100'

Available in 50 ft. and 100 ft. coils with factory attached terminals for antenna attachment plus 2 terminals for set attachment. Also available in continuous 500 ft. spools and 1,000 ft. reels.

CORD SETS

Complete selection from stock or custom made to your specifications:

PERMAFOAM LOW LOSS COAXIAL CABLES

A foam polyethylene dielectric replaces the conventional solid polyethylene thus providing far lower capacity and attenuation. Overall jacket is our PERMALINE high molecular weight polyethylene. This non-contaminating jacket is unaffected by salt air, chemical fumes, damp rot, fungus, acids, alkalis, etc., is immune to the deteriorating effects of sunlight and other ultra violet.

COLUMBIA

FLEXFOAM ULTRA LOW CAPACITANCE MICROPHONE CABLES — EXCLUSIVE WITH COLUMBIA

Another Columbia first is a complete line of microphone cables with capacity as much as 35% lower than the best regular microphone cables available today. This drastic lowering of capacity has been made possible by the use of foamed polyethylene as the inner dielectric instead of solid polyethylene as normally used. This low capacitance means that lengths of microphone cable can be increased as much as 50%. These cables are also ideal for Hi-Fi and high quality sound work because of the extremely low attenuation, particularly at the higher audio-frequencies. The use of a special flexible vinyl as an outer jacket provides flexibility practically as good as rubber yet has much greater abrasion resistance. Color—Grey.

Also available in high gloss gleaming white jackets.

Nominal Capacitance 75 MMF. Per Ft.

Also available with bright red jackets for easy identification.

COMPLETE LINE OF SHIELDED RUBBER AND NEOPRENE JACKETED MICROPHONE CABLE

COLUMBIA SUPER-FLEX ULTRA FLEXIBLE FOAM COAXIAL CABLES

We believe Super-Flex Coaxial Cables are the finest available today — not only because of their appearance and flexibility, but because they actually out-perform any similar type of coaxial cable in use today. Cables feature High Gloss Non Contaminating Jackets and have a primary insulation of foam Polyethylene to reduce attenuation as much as 25% over regular types of coaxial cables. In addition to the above features Super-Flex Coaxial Cables will not become rigid in severe cold. Can be used with standard connectors. Ideal for citizens band and amateur use. Perfect for master television systems due to the wide range of colors available. Standard stock colors are: Black-White-Silver or Beige. Other colors to special order with a minimum of 5000 ft. of a color.

SUPER-FLEX RG 8/U 52 OHM IMPEDANCE

19/.020 Conductor. Insulation Foam Poly Dielectric

Cat. No.				
1198C	100 Ft.	RG 8/U	Super-Flex	.405 O.D.
1198D	500 Ft.	RG 8/U	Super-Flex	.405 O.D.
1198M	1000 Ft.	RG 8/U	Super-Flex	.405 O.D.

Cap. 22.1 MMFD Per Ft.

Attenuation 1.50 DB Per 100 Ft. at 100 MC.

SUPER-FLEX RG 58 A/U 50 OHM IMPEDANCE

19/.0068 Conductor. Insulation Foam Poly Dielectric

1188C	100 Ft.	RG 58 A/U	Super-Flex	.195 O.D.
1188D	500 Ft.	RG 58 A/U	Super-Flex	.195 O.D.
1188M	1000 Ft.	RG 58 A/U	Super-Flex	.195 O.D.

Cap. 22.9 MMFD Per Ft.

Attenuation 4.25 DB Per 100 Ft. at 100 MC.

SUPER-FLEX RG 59/U 73 OHM IMPEDANCE

22 Solid Copperweld Conductor. Insulation Foam Poly Dielectric

1135C	100 Ft.	RG 59/U	Super-Flex	.242 O.D.
1135D	500 Ft.	RG 59/U	Super-Flex	.242 O.D.
1135M	1000 Ft.	RG 59/U	Super-Flex	.242 O.D.

Cap. 16.6 MMFD Ft.

Attenuation 2.95 DB Per 100 Ft. at 100 MC

Super-Flex RG 59/U is also available with a 7/31 stranded conductor to provide still more flexibility. Center conductor can be used only with Pin Type Fittings such as used to plug into wall plates for Master Television Systems.

MULTI PAIRED INTERCOM CABLES

For use in intercom systems as station to station wiring, the cables listed below will handle most installations. 22 ga. conductors, solid or stranded with an .010 wall of durable color coded plastic. Each pair is individually twisted. Overall jacket is .025 grey vinyl.

Other types of paired cables for indoor or outdoor use can be made to your specifications.

Standard Color Coding

TELEPHONE AND COMMUNICATION CABLE DIRECT BURIAL TYPE

FULLY COLOR CODED

SPECIFICATIONS

Solid bare annealed copper 22 Awg. gauge conductors; thin wall, color coded, polyethylene insulation; conductors twisted to form pairs with symmetrically varying lays to minimize cross-talk; cabled (for 6 thru 50 pairs) by stranding pairs in concentric layers, or (for 75 thru 400 pairs) by stranding pairs into concentrically formed units, which are in turn cabled to form the complete assembly; non-hygroscopic binder tape furnishing high dielectric strength between shield and individual conductors; continuous copper shielding tape; high-molecular weight, polyethylene jacket.

GENERAL APPLICATION AND ADVANTAGE

APPLICATION: Communication and Telephone Cable for use in direct burial installations provides a high quality product similar to that used for aerial and duct systems, but with the addition of protective armoring. This minimizes the possibility of damage to the cable from rodents and insects and, correctly installed, reduces the dangers to the cable from sharp stones and other hazards of underground burial installations.

ADVANTAGE: The lightweight, but rugged construction of direct burial Communication and Telephone Cable permits fast and economical underground installation of communication systems with the assurance of dependable and enduring service. This is made possible through utilization of the same high quality polyethylene compounds that are used in its counterpart for aerial and duct type installations, with the added protection of copper armoring tapes and a durable, high-molecular weight, polyethylene jacket.

MAGNET WIRE

Popular, profitable specialty wire packaged for easy selling in radio-electrical, department, specialty and hardware stores. Wide variety of sizes and insulations. Keeps stock in perfect order, always saleable. Supplied on Spool as shown and in Heavier Weights for whatever weight desired. Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.

SPECIAL MAGNET WIRES

In addition to the standard listing shown here, we maintain an extensive stock of all other sizes in round, rectangular and square magnet wire.

BARE NICKEL CHROMIUM WIRE

No. 2000

Recommended for electrical heating appliances and other devices where the highest quality in performance is required, whose operating temperatures do not exceed 1850° F. Particularly suited for heavy duty rheostats and controls which require compact resistance.

ELECTRICAL CORDAGES UNDERWRITERS APPROVED

SUPPLIED ON ATTRACTIVE TRI-COLOR
LITHOGRAPHED METAL SPOOLS

RUBBER HANDYCORD CENTERSTRIP

PLASTIC HANDYCORD CENTERSTRIP

RUBBER SHEATHED SERVICE CORD UNDERWRITERS APPROVED

SPECIFICATIONS AND APPLICATION

Extra flexible bare copper cotton served. 1/32" rubber insulation color coded conductors cabled with fillers, cotton wrap and black, tough rubber jacket.

For all electronic equipment, household appliances, garden and power tools.

NEOPRENE SHEATHED SERVICE CORD UNDERWRITERS APPROVED

SPECIFICATIONS AND APPLICATION

Same specifications as 4200 Series except black Neoprene jacket.

For all types of equipment exposed to oils, acid and excessive moisture.

HEATER CORD

DAFLEX 105 PLASTIC TUBING

105°C POLYVINYLCHLORIDE (PVC) MEETS MIL-I-631D SPECS

Specifically compounded vinyl resins for superior all around performance. UL approved for 105°C, conforms to Spec MIL-I-631D Type F, Form U, Grades A and C. Class 1 and 2, Category 1. Resistant to heat, oil, water, chemical corrosion, fungi and aging. Very hi abrasion resistance. Will retain its flexibility. Suitable for covering and protecting wires and cables. Designed for electrical, electronic and aircraft applications. Non-flammable. Meets ASTM—D876, ASTM—D922.

D105 compounded with non-migratory resin type plasticizers. Retains its flexibility, permitting it to cling and protect irregular shapes. D105 snakes well under practically all conditions.

IN STOCK

PROPERTIES OF DAFLEX-105 TUBING

Recommended for Temperatures to 105°C (220°F)

• Low Temperature Flexibility to -30°C

• Dielectric Strength — .020" Wall 800 V/MIL

• Dielectric Constant 6.0

• Tensile Strength — Min. (PSI) 2700

• Ultimate Elongation 300%

• Oil Resistance Excellent

• Fungus Resistance Excellent

• Flammability Self-Extinguishing

• Corrosion and Abrasion Resistance Excellent

COLORS AVAILABLE FROM STOCK

Sizes 24 thru 2: Clear, Black, White, Yellow, Red, Green, Brown, Blue, Orange.

Sizes 3/8" thru 3/4": Clear, Black, Yellow, Red, Green, White

Sizes 7/8" thru 2 1/2": Clear, Black, White.

Additional Colors to Order.

ALL THE ABOVE TUBING CAN BE ORDERED CUT AND MARKED TO YOUR SPECIFICATIONS

DAFLON TEFLON® SPAGHETTI TUBING

Daflon 500 and 550 tubing is extruded from Dupont Tetrafluoroethylene resin and is unmatched by any other tubing for use in applications for hi frequencies and hi temperatures. Rated for continuous operation of 250°C it retains its toughness and flexibility thruout. Has high resistance to fatigue and stresses. Will not shrink back during soldering operation. Non-flammable, flexible, it permits miniaturization of design and compactness. Lowest coefficient of friction. Inert to all fungus growth. Conforms to MIL-I-22129C Spec. AMS 3651B, 3653B, 3654, 3655.

DAFLEX VINYL COATED FIBERGLASS TUBING 130°C MEETS MIL-I-3190B SPECS (ASTM, NEMA GRADE B-B-1)

DAFLEX 130, Class B, Grade B-1 is recommended for continuous temperatures up to 130°C. Constructed to provide a tough, flexible, heat resistant tubing. Made from an inorganic fiberglass base sleeving with heat resistant coating, extremely flexible tough plastic insulation. Will not support combustion. Meets MIL-I-3190B, NEMA VSI ASTM D372. MIL-I-21557.

HEAT SHRINKABLE TUBING

SHRINKABLE IRRADIATED POLYOLEFIN TUBING

This series is designed for maximum mechanical strength at stress or points of connection. It is strong and abrasion resistant and is supplied in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables and irregular shaped objects. When exposed to heat (235°F) the tubing shrinks 50% in diameter, 5% longitudinal contraction. Controlled shrinkage to exact requirement takes place. Meets or exceeds MIL-I-23053A Class 1 and 2. Available with UL approval. AMS 3636, 3637.

Corrosive Resistance	Non-Corrosive
Resistance to Soldering Iron	Excellent
Fuel, Oil, Solvent, Acid, Alkali, Hydraulic Fluid Resistance	Excellent

DABURN SHRINKABLE POLYVINYLCHLORIDE ALL PURPOSE
Shrinkage Ratio: 2:1 (50%)

Flexible, shrinks 50% on heat application, less than 10% longitudinal contraction. Suitable for insulating components and cables in varying shapes and diameters. Has a higher resistance to oils than low density polyethylene. Conforms to MIL-I-631D, Type F, Form V, Grade A and C, Class 1 and 2, Cat. 1. Controlled shrinkage on application of heat to predetermined size takes place at temperatures below 200°F (one minute or less). Meets or exceeds MIL-I-23053A, Grade 5.

HEAT SHRINKABLE TEFLON[†] TUBING

DAFLON SH-400 (FEP)

Made with Modified TEFLON* FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON*, which has a continuous service temperature of 400°F., will shrink at 300°F. Supplied in natural color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON.* Will not burn or support flame, long lengths available. Extruded.

TUBULAR BRAID PER MIL SPEC QQ-B-575

Tinned copper shielded braid mfd completely round per Mil Spec QQ-B-575. Maintains its round configuration. Shielding coverage is 95% or more. Used in military applications where maximum shielding is required against electrostatic interference. Useful against mechanical abrasion and stresses for cables — as grounding cable.

MADE TO ORDER.**

HEAT SHRINKABLE NEOPRENE* TUBING

This unique tubing meets or exceeds MIL-T-23053B specs. Shrinks down to under 33% of its supplied inside diameter. Upon exposure to heat of 160°F — will remain elastomeric — with no cracks (longitudinal shrinkage 50%). Will protect components, solder joints, terminals, fittings, harnessing and jacketing of wires, medical equipment, etc. Resistant to abrasion, flame, chemicals. Suitable electrical and mechanical properties. Has continuous range of -67° to +212°F. Tubing is self extinguishing when flame is removed. Variety of intermediate recovered sizes. Available expanded sizes: 1/2", 1", 1 1/2", 2".

COLOR: Black. Tubing must be stored below 100°F.

PROPERTIES:

ELECTRICAL

Dielectric Strength: V/M, 400 Min.
Volume Resistivity: OHM/CM, 1 x 10¹⁴ Min.

CHEMICAL

Solvent Resistance: Excellent
Corrosion: Good.
Water Absorption: 1.0 Max.
Flammability: Self-Extinguishing in 15 Seconds

PHYSICAL

Elongation: 400% Min.
Temperature Range: -67° to +212°F
Tensile Strength: 1500 PSI Min.
Dielectric Strength: 360 V/M Min.
Heat Resistance: 212°F for 96 Hours — No cracking.
Specific Gravity: 1.40 Max.

HARDNESS

Shore A Durometer: 85 ±5.

HEAT SHOCK

302°F for 4 Hours — No cracking, flowing or dripping.

SILICON BRONZE AERIAL WIRE

Especially designed for ships, airports, short wave and transmitting antennas where high tensile strength and resistance to the elements are important.

DABURN No.	Size AWG	Strand	Breaking Strength	O.D.
2364/4	4	7/12	3670 lbs.	.240"

STANDARD PUT-UP: 100 Ft., 500 Ft., 1000 Ft.

2364/10 and 2364/6 meets MIL-W-13074, 2364/12 meets MIL-W-13276 Specs.

COPPERWELD ANTENNA WIRE

Used where high tensile strength is required as for short wave and transmitting aeriels. Has low R.F. resistance and is ideal for transmitting doublet and directional antennas. Will maintain frequency characteristics because of its stretchless qualities. 40% conductivity.

DABURN No.	Size AWG	Tensile Strength	O.D.

SUBMINIATURE TEFLON* HOOK-UP WIRE

PER MIL-W-16878D — TYPE ET — 250 VOLTS, 200°C

Thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in micro-miniature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D Type ET 250 volts, 200°C. Silver plated copper conductor.

INSTRUMENTATION CABLES

TEFLON* CABLES — Shielded and Unshielded TO MIL-W-16878D

DESCRIPTION: One or more conductors, each conductor silver plated concentrically stranded copper wire, Type E Extruded TFE .010" insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010" TEFLON* fused, double reversed tape jacket overall. Fungus, solvent, moisture, flame, acid, alkali and oil resistant Multiconductors are twisted. TEMPERATURE RATING: -65°C to +260°C. VOLTAGE RATING: 600 Volts

NEW CRT HI-VOLT CORONA RESISTANT TEFLON* CABLE®

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet,
approximately 1/3 lower

• Minimum life expectancy: 10,000 hours.

SMALL SIZE:

You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms and surpasses MIL-SPEC-W-16878D

AVOID CORONA PROBLEMS:

Corona resistant Teflon construction is specifically designed to retard and prevent corona penetration.

Temperature variations from -60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION:

Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING:

-90°C to +250°C.

VOLTAGE RATING:

Based on insulation thickness.

AVAILABLE COLORS:

White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250', 500', 1000'

* DUPONT

FEP TEFLON* CABLE
FEP EXTRUDED JACKET OVER SHIELD

DESCRIPTION: Each conductor silver plated stranded copper wire, Type E extruded TFE .010" insulation. Color coded, cabled, braided silver plated copper shield — 90% coverage, FEP white teflon jacket overall.

TEMPERATURE RATING: -65°C to +200°C. VOLTAGE RATING: 600 V.

H FILM KAPTON* WIRE

DALITE™

HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE
200°C CONTINUOUS TEMPERATURE RATING (a)

INSULATED WITH DUPONT KAPTON* POLYIMIDE FILM WITH TEFLON* — FEP HEAT SEALED COATING CONFORMS TO MIL-W-81381.

CHARACTERISTICS: Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with smaller wall thicknesses, weight and dimensions.

(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 290°C per MIL-W-16878.

DESCRIPTION: Single conductor, silver plated annealed copper conductors, Type H* Polyimide film with Teflon* FEP coating tape wrapped overall.

DABURN**DABURN ELECTRONICS & CABLE CORP.**
WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE**NEW DABURN HIGH TEMPERATURE LEAD WIRE**

Small Diameters and High Temperature performance make an outstanding combination for these unique constructions. Basic wire conforms to MIL-W-3861 spec. shielding per MIL-N-46026A. 600V RMS.

800°F TEMPERATURE RATING

High temperature aircraft and missile lead wire for operation between 500°F and 800°F. Nickel clad copper conductors with glass braided fiber insulation impregnated with silicone varnish. Multiconductor and shielded construction will be manufactured to customer's specifications.

DABURN Cat. No.	Size	Strand	CMA	Nom. O.D.

STD. PUT-UP: 500 Ft., 1000 Ft.

**1500°F TEMPERATURE RATING**

High temperature radiation resistant aircraft and missile lead wire for operation between 800°F and 1500°F. Nickel clad copper conductors with inorganic braided insulation. Useful up to 1500°F providing moisture resistance is not required. Multiconductor and shielded construction can be made to customer's specifications.

**2000°F TEMPERATURE RATING**

High temperature radiation resistant aircraft and missile lead wire for operation between 1500°F and 2000°F. Nickel clad copper conductors with vitreous silica braided insulation and a braided shielding. Useful up to 2000°F providing no initial moisture resistance or abrasion resistance is required. Multiconductor construction can be made to customer's specifications.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

**FLAT RIBBON CABLE, TYPES F & FF PER MIL-W-16878D
PLASTIC, SILICONE RUBBER HOOK-UP WIRE — HIGH VOLTAGE CABLE**

FLAT RIBBON CABLE

**MULTI-CONDUCTOR — POLYVINYLCHLORIDE
INSULATION CONDUCTORS**

Per MIL-W-16878D — TYPE B — 600 V

DESCRIPTION: Each conductor stranded tinned copper .010" polyvinylchloride insulation bonded to form flat ribbon cable.

Rated: -55°C to +105°C. Voltage Rating: 600 volts. Resists acid, alkalis, flame, moisture, oil, solvents, fungus. Conductors are color coded and separate easily for clean terminations. Saves space, time on circuit and interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies.

PORTABLE CORD, CONTROL CABLES — MIL-C-3432B SERVICE CORD

RUBBER, NEOPRENE & PLASTIC PORTABLE CORD
UL APPROVED — 300 AND 600 VOLT

For power line requirement where rough usage is indicated as for amplifiers, sound systems, speakers, vacuum cleaners, washing machines, trouble lights, refrigerators, etc. Color coded. Underwriters approved. Neoprene and plastic construction recommended for equipment exposed to oil, acids, outdoor use, direct burial, etc.

SUGGESTED OPERATING TEMPERATURE: -20°C to +60°C.

Each conductor, copper conductor, paper separator, color coded, rubber insulation, filler, (where necessary) separator, tough rubber or neoprene jacket, black.

CONTROL CABLE
HEAVY DUTY MULTI-CONDUCTOR
PORTABLE TYPE SO
NEOPRENE JACKETED — 600 VOLT

DESCRIPTION: Stranded bare copper each conductor, rubber insulation color coded, filler where necessary, wrap over conductors, flexible heavy duty black Neoprene jacket overall.

Recommended for outside installation, this heavy duty control cable resists oil, ozone, sunlight, moisture, impact and abrasion. Suitable for remote control automatic equipment, telemetering, signal transmission.

The Color Code for Neoprene Jacket Control Cables Conforms to IPCEA Standards.

MULTI-CONDUCTOR MICROPHONE AND CONTROL CABLE — PLASTIC

Each conductor tinned copper, polyethylene insulation — color coded. Multi-conductors cabled with fillers, textile wrapped, tinned copper braided shield, gray polyvinyl jacket overall.

OPERATING TEMPERATURE: -20°C to +60°C, 600 Volts.

CONDUCTOR COLOR CODE: 1—Black, 2—Red.

TELEPHONE CABLE

(Meets REA-PE-22)

**EXCHANGE AREA — COMMUNICATION CABLE
AERIAL, DUCT AND CONDUIT INSTALLATION**

DESCRIPTION: Color coded polyethylene insulation over each bare copper conductor. Conductors are paired. Pairs are cabled with non-hygroscopic tape wrap, corrugated aluminum shield, .008" thick and black polyethylene jacket overall.

Minimal cross talk .083 microfarads/mile — average mutual capacitance 1 KC. This is a tough, long lasting cable — withstands weathering, ultra-violet and weathering.

AUDIO, DATA SHIELDED, MICROPHONE & CONTROL CABLES

**AUDIO & DATA SHIELDED CABLE
INDIVIDUALLY ALUMINUM MYLAR FOIL SHIELDED PAIRS**

DESCRIPTION: Each conductor stranded, copper tinned, hi density polyethylene insulation, color coded, conductors — twisted pairs. #22 stranded tinned copper wire. Aluminum foil mylar shield over each pair and copper tinned drain wire. Overall chrome grey PVC jacket. Nom. cap. between conds. of a pair, 25 PF/FT. Capacitance of a single conductor to shield, 45 PF/FT. Sugg. Working Voltage: 300V.

SHIELDED CABLE

Suitable for P.A. and sound systems, installation in schools, hospitals and institutions, transmitters, electronic circuits, etc. Construction allows ease of pigtailting. Shield provides additional strength for cable. Each conductor tinned copper, PVC insulation, color coded, twisted, braided T-C shield, gray PVC jacket overall. Suitable for outdoor installations.

OPERATING TEMPERATURE: -20°C to +60°C.

STD. PUT-UP: 500 Ft., 1000 Ft.

CONSTRUCTION VARIATION TO ORDER

**PLASTIC JACKETED
BRAIDED COPPER SHIELD**

SHIELDED PLASTIC MICROPHONE CABLE

Will withstand abuse and is resistant to oil, moisture, aging. Have low capacitance, hi insulation resistance and low attenuation. Will not strain or mark.

2772 — For hi impedance microphone

2773 — For crystal, ribbon, etc. Mikes all are suitable for hi-fi interconnecting

2774 — For hi impedance lapel mikes.

OPERATING TEMPERATURE: -20°C to +60°C.

SHIELDED MICROPHONE CABLE ONE CONDUCTOR

Uses tinned copper spiral shield — for ease in soldering — extremely flexible-plastic.

DABURN Cat. No.	Cond.	Size	Strand	Shield	Nom. Cap./Ft. MMF	Sugg. Work Voltage	Nom. O.D.
2770	1	25	7/33	Spiral	23	3000	.159"

**SHIELDED ULTRA LOW CAPACITY
MICROPHONE CABLE**

Plastic Jacket — Cellular Foam Polyethylene Insulation
BRAIDED SHIELD

DESCRIPTION: Constructed with white foam polyethylene insulation, braided tinned copper shield, chrome gray vinyl jacket. The low loss foam polyethylene construction has lower capacitance and attenuation than standard polyethylene mike cables as much as 50%. This increases the effective length of cable as much as 50% without signal loss.

OPERATING TEMPERATURE -20°C to +60°C.

DABURN Cat. No.	Cond.	Size	Strand	Nom. Cap./Ft.	Nom. Jacket	Nom. O.D.

CONDUCTOR COLOR CODE: 1—White, 2—Black.

* 3 strands tinned copper, 4 strands tinned copperweld.

**PLASTIC JACKETED AUDIO AND
MULTICONDUCTOR CABLE
SPIRAL WRAPPED COPPER SHIELD**

Suitable for P.A. and sound systems, schools, hospitals, institutions, recording studios, paging and call systems.

Each conductor copper tinned, plastic insulation, color coded, twisted, spiral wrapped tinned, copper shield, gray plastic jacket. Temp. -20 to +60°C. Simplifies pigtailting. Provides almost 100% shielding coverage.

DABURN ELECTRONICS & CABLE CORP.
WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

TEST LEAD WIRE • MINIATURIZATION WIRE & CABLE
PHONO & STEREO WIRE & CABLE—HI TENSION CABLE
RUBBER KINKLESS TEST LEAD WIRE

Suitable as Test Lead Wire in analyzers, instruments, oscillators, meters, etc. Wherever extra flexibility and limpness is necessary. Single conductor, extra flexible stranded soft tinned copper, separator, wall color coded rubber, smooth wax finish.

OPERATING TEMPERATURE: -20°C to +60°C. Colors: Red, black

DABURN No.	Size	Strand	Nom. Insul. Wall	Sugg. Voltage	O.D. Nom.

2717	18	65/36	3/4"	10,000V	.210"

* Types WS-16/U Black, WS17/U Red Per MIL-W-13169.

STD. PUT-UP: 100 Ft., 500 Ft., 1000 Ft.

PLASTIC KINKLESS TEST LEAD WIRE

Soft formulation vinyl maximum flexibility. Temperature stability from -80°C to +115°C. Exceed requirements for MIL-I-3930A Type JP (PVC). Suitable for test leads, etc. Resistant to gasoline and oil. Excellent abrasion Resistance.

DESCRIPTION: One conductor tinned copper stranded, special formulation vinyl insulation—smooth surface.

OPERATING TEMPERATURE: -80°C to +115°C. 5000V. rating.

COLORS: Black, Red, Yellow, Green, White, Blue.

ELECTRONIC LACING CORDS AND TAPES, CABLE CLAMPS & CLIPS

LACING CORD-TAPE TO MEET MIL-T-713C TYPE P* AND MIL-T-43435 COMP. P-TYPE S NYLON FLAT BRAIDED LACING TAPE

Nylon fiber flat braided impregnated with MW microcrystalline fungicidal wax. Stays flat. Designed to create a wider contact to distribute the stress. Flexible. Won't slip when knotted. Resistant to fungus, flame, abrasion, acids.

DABURN No.	Color	Class	Nom. Width	Nom. Thickness	Tensile Strength	Standard Put-Up Tubes
2035	Natural White	—	.200"	.014"	150 lbs.	500 yd.

NYLON CABLE CLAMPS

MADE OF DU PONT "ZYTEL" 101 NYLON RESIN

Meets MIL-P-26093A and MIL-P-17091A Amend. 2. Light and tough these nylon cable clamps are used as a clamp, strain relief, clip hanger, fastener or strap. Smooth non-abrasive surfaces, rounded edges will not cause shorts or grounds in cable. Insoluble in solvents, gasoline, oils, hydraulic fluids, alcohol, acids, alkalis. Temperature range -60°F to +300°F. Does not support combustion. Inside matte finish. Prevents slippage and is self aligning. Snaps on cable. Meets MIL-P-20693A specs, fungus resistant.

PLASTIC WIRE TIES

Useful for temporary or permanent installation. Can be adapted for immediate bundling or harnessing. Vinyl insulated. Has 70/10 steel gauge, wire reinforcement, 3/32" wide, 30 lb. test.

TEMPERATURE: -20°F to +90°C.

DABURN Cat. No.	Description	Standard Package
603	Plastic Wire Ties	100', 500', 1000'

COLORS: White, Blue, Red, Green, Yellow.

DABURN PUSH BUTTON WIRE TIES

Push button wire ties for harnessing wire. 4 1/2" in length, each tie is adjustable to 30 different diameters. Made of strong polyethylene, it is inert chemically and heat resistant. Breaking strength 45 to 95 lbs. After the tie is placed in hole for anchoring, wires can be replaced or added by loosening tie and pulling tight again. Designed to fit .250" to .265" hole in a .031" to .140" thick panel. Material conforms to Spec. LP590. Temp. to +200°F

DABURN Cat. No.	(Specify Color)	Standard Package
601-4	Red, Blue, Yellow	100, 1000

DABURN NYLON

PUSH BUTTON WIRE TIES

Same description as No. 601-4. Temp. to 300°F.

5 1/2" long. Made of tough Nylon. Higher temperature range than Polyethylene.

DABURN Cat. No.	Color	Standard Package
601-5	Clear	100, 1000

DABURN COMPONENT CLIPS

Hold and insulate, electrical and electronic components, accessories — spare parts. Holds firmly and still permits fast and easy insertion. Convenient for fastening clips and retainers for transistors, batteries, fuses, capacitors, resistors, lamps, etc. These Daburn clips are made of black vinyl (polyvinylchloride). Has high dielectric strength. Can be mounted with screws, rivets or other fastening means.

MATERIAL: Rigid Vinyl.
TEMPERATURE RANGE: -20° to +165°F.
STANDARD PACKAGE: 100, 1000.

Manufactured by

DEARBORN TELEVISION CAMERA CABLES

Made better by military-level quality controls.

A prime-time show can no more afford a cable fault than an Agena launching—and Brand-Rex builds all its cables so that both can go off without a hitch. The same exacting techniques, quality assurance procedures, and production and test equipment developed for the aerospace and missile markets are used in manufacturing television broadcast industry products.

What Brand-Rex cables offer

Distortion-free signal transmission... for sharper, more detailed color and monochrome pictures.

- Stable operation — over wide temperature range.
- Outstanding flexibility — even at extremely low temperatures — for unimpeded camera movement.
- Abrasion resistant, sound absorbing jackets.
 - Long trouble-free service life.
- Individual wires specially positioned and completely color-coded for easy termination.
 - Weather and moisture resistant.
- Stable electrical characteristics, even when bent, compressed, and twisted.

EL Cable Ties

The Electrovert El Cable Tie is an improved tying system designed to increase the harness tensile strength, provide optional application either by hand or tool, and, when used with a tool, be universally applicable with all such tools currently on the market.

ADVANTAGES

- Self-locking, non-twisting, for permanent, neat tying.
- Hand or tool assembly... will fit all tools.
- Molded of tough, smooth, flexible nylon.
- Infinitely adjustable within their range.
- Four (4) sizes meet all bundle diameters from 1/16" to 4 3/16".
- Lightweight, chemical and abrasion resistant, high tensile strength, excellent dielectric properties, rust and rot resistant.

SPECIFICATIONS:

- Material:** Strap—nylon per MIL-M-20693, Type I.
Strap Lock—metal per QQS-766.
- Color:** Natural. Also available in all colors.
- Design:** To meet requirements of military standard MS-17821, MS-18034 and specification MIL-S-23190.

U.S. Patent No. 3397430. World-wide Patent Pending.

Type No.	Military Dash No.	Bundle Dia. (Inch) Min.	Bundle Dia. (Inch) Max.	Tensile Strength (lbs.) Min.	H max (in)	J max (in)	L min (in)	Installation Tool

Head design type Fig. 2: EL-A; Fig. 1: EL-B, C and D.

Packaging: Packaged in heavy gauge, heat sealed poly bags and carton, 100 per poly bag and cartons of 100 and 500. Bulk packaging available.

Adjustable P-Clips Nine (9) Sizes Fit Any Loop Diameter From 1/8" Through 2".

THE SAME SIZE P-CLIP ADJUSTED TO FIT DIFFERENT BUNDLE DIAMETERS.

- Molded of finest natural, virgin nylon.
- Lightweight, chemical and abrasion resistant, high tensile strength, excellent dielectric properties, rust and rot resistant.
- Typical applications include: cables, bundles of wires, components, pipes and tubing wherever a clamp, strain relief or strap is required.

Reduces Inventory — only nine sizes accommodate all bundle and cable diameters from 1/8" through 2" ...simplifies OEM and spare parts inventories.

Controls Tension — you control the tension to fit the loop to the bundle diameter.

Simplifies Changes in Bundle Make-up — add or remove wires, the same clip can be adjusted to the new bundle diameter.

Spiroband

Reduces inventory costs • Five standard materials — natural polyethylene, ultraviolet resistant polyethylene, fire resistant polyethylene (Rulan), Nylon, Teflon. Three diameters, each for application to a wide range of bundle sizes.

- Clear Polyethylene (Natural):** General applications where there are no special or unusual environmental conditions.
- Ultraviolet and Weather-Resistant Polyethylene (Black):** Contains special additives to resist UV and weathering in general. Additives color the material black.
- Fire-Resistant, Self-Extinguishing Polyethylene (Rulan):** Special fire-resistant additive, colors material bone white.
- Nylon:** For moderate temperature applications up to 250°F constant exposure.
- Teflon:** For very high temperature applications up to 500°F constant exposure.

† Dupont TFE fluorocarbon resin

Size	O.D. (in)	Bundle Range (in)	Polyethylene		Nylon		Teflon	
			Wall Thickness (in)	Length* Std. Coil (ft)	Wall Thickness (in)	Length* Std. Coil (in)	Wall Thickness (in)	Length Std. Coil (ft)

1/2	.500	3/8 - 4	.062	25	.030	25	.030	25

* Also available on spools of 250' for 1/2" and 500' for 1/4" and 1/8"

Strapping (Insuloid)

Material: Strapping is plasticized PVC (polyvinylchloride), with unusual strength and elastic properties; requires no tools; temperature range -26°F to +180°F.

Stud molded of nylon.

Colors: Standard black; also available in wide variety of colors.

Packing: Strap, 100 ft. boxed feed-out coil; 500 or 1,000 ft. coils on reels. Studs, 1,000 per box.

Installation: Stud is inserted in end of strap extending from dispenser carton; strap is then passed under and around wire bringing it back, under tension, over stud again. Strap is then cut at next hole. This operation should be repeated approximately every 6 inches or as required.

ELECTROVERT^{INC} COMPONENTS DIVISION

SEND FOR COMPLETE CATALOG AND PRICES

"C" markers

Clip-on type. Quick, easy to fit after connection is made of terminal tag fitted. May be removed for re-coding. Same marker used for right or left hand entry.

Materials: Durable rigid PVC.

Colors: White with black markings (standard). Also available in black, blue, red, green and yellow.

Markings: Single; numerals 0-9, letters A to Z and symbols.

Packing: 50 markers of same size and marking; 500 same size and marking for color.

Colors: White with black markings (Standard color). Black with white markings, Blue, Green, Yellow, Red with black markings.

Material: PVC MIL-1-631C, Type F, Form U, Grade a & b, Class I, Category 1, finish: glossy. Specific gravity: 1.21. Hardness (shore A): 73 av. Tensile Strength: 2600 psi. av. Ultimate Elongation: 350% av. Dielectric Strength (20 mil specimen): 750 volts/mil. Cold Brittle Temp. (50% non-failure): -65° F.

Markings: Single: numerals 0-9, letters A to Z, symbols +, -, ~. Multiple any 2, 3, 4 or 5 unit combinations of above.

Packing: Coil of 50 single markers, one size, color and character per package. Coil of 500, as above, on self-servicing reels.

Min. Quantity: per size and character: 50 single white, 500 multiple, 500 colored.

"S" markers

for wire bundles or cables with O.D. of more than .500"

Strap-on-marker: Size: $\frac{3}{8}$ " x $\frac{1}{8}$ " x .040", material P.V.C., colors and material same as ELECTROVERT "Z". Markings: 0-9, A-Z, +, -, ~.

Applications Strip: P.V.C. — covered aluminum, .157" wide x .024" thick.

Min. Quantity: Per size and character: 50 markers; color 500; 165' strip coil.

Min. Order: 500 Markers, 165' coil of strip.

Packing: Markers, 50 per indicator card pouch; strips in 165' coils.

Grommet Strip with the "Snip-n-Fit" feature

U-shaped, strip-type grommeting material can be cut to size, provides smooth surface around edge of any hole and features quick, simple application. No adhesive or special tools required.

...offers the advantage of one strip only for applications to: round holes; square holes; rectangular holes; oval holes.

Specifications

Standard material is natural low density polyethylene. Also available, on request, both in ultraviolet- and weather-resistant, and flame-resistant polyethylene formulations.

The standard, clear Grommet Strip meets the following specifications and standards: ASTM D 1248-63T, Type I, Class A, Grade 4; Federal Spec L-P-390, Type I, Class L, Grades 1, 2 and 3; Federal Spec L-P-390, Type II, Class L, Grade 4; MIL-P-3803; MIL-I-631C; and MIL-E-16400, Classes 1, 2, 3 and 4.

P.V.C. Wiring Duct

1. Material: Rigid, high impact PVC.
 2. Wiring: Open slot to provide fast cable take off.
 3. Cover Snaps on or off.
 4. Standard length: 6 ft.
- Colors: Gray and white.

a subsidiary of ICORE INDUSTRIES

This expandable spiral-cut plastic wrap harnesses, insulates and protects wire assemblies up to 8" diameter.

HARNESSING:

Spiral Wrap applies a strong grip developed both from its torsional cut and the memory of plastic materials used. It retains its strength under repeated flexing and bending, follows wire paths easily, and makes neat, free-running cables. It is extremely useful on long continuous runs where many leads are required; wires can enter or break out at any point. Spiral Wrap can be removed easily for trouble shooting and then re-applied.

PROTECTION:

Spiral Wrap is available in materials which accommodate a heat range from -265°C/-450°F to 260°C/500°F for insulation purposes. It is also available in materials with high abrasion resistance and in materials for use outdoors where resistance to ultra-violet rays is required.

SPIRAL WRAP®**MATERIAL DESCRIPTION**

Polyethylene Versatile, low cost material
Polyethylene, black In addition to above, this material is designed for outdoor use. It resists ultra-violet rays. Oper. Temp. -75°C/-105°F to 100°C/215°F.
Rulan (carbon impregnated polyethylene) Used primarily in applications where a low cost self-extinguishing material is required. Oper. Temp. -25°C/-10°F to 95°C/200°F.
Nylon, natural This material offers best mechanical protection; also has a higher temperature rating than polyethylene. Oper. Temp. -100°C/-150°F to 150°C/300°C.
Nylon, black In addition to the above, this material is designed for outdoor use; it resists ultra-violet rays. Oper. Temp. -100°C/-150°F to 110°C/230°F.
Teflon Primarily used in high temperature applications; also has an extremely low operating temperature, excellent dielectric properties and is not affected by organic solvents or acids. Oper. Temp. -265°C/-450°F to 260°C/500°F.

Multiple Conductor Control Cables

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cables. Conductors are of tinned copper strand with $\frac{1}{64}$ " vinyl primary insulation for use up to 105°C per MIL-W-16878D Type Cf. Insulated for 1000 volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per MIL-STD. 122.

All conductors are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black polyvinyl-chloride thermoplastic, meeting specification MIL-I-631 Class F, or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene jackets at added cost.)*

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

* (Standard put-up for Neoprene jacketed cable is 250 ft.)

† Insulated Conductors are also UL approved under UL type 1007 AWM, and are CSA approved as type TR 64.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.
Insulation Leakage Res.:	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to -55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to -20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at -40°C, or for continuous flexing service to -55°C, specify our neoprene sheath, in lieu of plastic sheath.

MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

NATIONAL WIRE & CABLE CORP.

SPECIAL SHIELDED DATA & INSTRUMENTATION CABLES

Designed for Low Level or Low Capacitance Needs • All feature extremely low dielectric leakage both in insulation and outer sheath • Suitable for very long runs in tray or conduit. (1000 ft and up).

INSULATION

EXTRUDED VINYL AND TEFLON TUBING

SIZES: #24 through 2½" Diam.

PUT-UP: #24 to ¾" on spools, completely sealed in plastic wrapping. Size ¾" to 2½" in tied coils.

SPEC. Vinyl +105°C to -32°C Type: MIL-I-631C, ASTM-D922 Grade C

GRADES: Vinyl + 80°C to -55°C Type: MIL-I-7444B, MIL-I-22076

Teflon +250°C to -55°C Type: MIL-I-22129B (#20 to #2)

NATIONAL OPENLINE

DESIGNED FOR COMMERCIAL TV DISTRIBUTION SYSTEMS AND RF POWER TRANSMISSION

Specifications: two inch spacing between conductors . . . 12 gauge copperweld . . . 470 ohm impedance . . . attenuation: 150 mc 0.25 DB PER 100 FEET, AT 30 mc 0.1 DB PER 100 FEET. Velocity factor 0.975 . . . copperweld steel for maximum strength and electrical stability, and to insure permanent uniform performance. . . Spreaders are brown polystyrene, spaced at average five foot intervals, staggered slightly to avoid spurious resonances.

Also 1" & ½" copper line for TV leadin Formvar coated.

COMPLETE WIRE AND CABLE INVENTORY ALWAYS AVAILABLE FOR IMMEDIATE SHIPMENT!

National Wire and Cable Corporation maintains one of the largest and most complete stocks of electronic and aircraft wire and cable in the nation. Total footage of floor stocks exceeds 50 million feet!

Your immediate source for "MIL and Jan-Spec" wires, coaxial cables and vinyl sleeving.

Special color coded, shielded and jacketed combinations of hook-up wire and multi-conductor cables can be made to your specifications and delivered promptly without delay.

†Heavy duty, foam insulated lo-loss mike cable with woven rayon braid—closely wrap shielded and flexible construction.

*Mylar-foil shield with ground runner. **Copperweld

#Wrap shield—easily pigtailed—for lapel and audio uses—low capacitance—extra flexible.

DISPENSER-PACKAGED TRANSMISSION LINE

TANGLE-FREE SELF-DISPENSING WIRE PACKAGES

These easy to handle wire dispenser packages let you take the exact length you need. The rest stays neatly in place . . . never tangled, always clean. Ask your Saxton representative about the special dispenser "LIFELINE" series of wire packages.

◆ LIFELINE TWIN LEAD

No. 1665
Full size, heavy duty deluxe twin lead constructed of the finest materials. Chemically protected against deterioration. In Magic Dispenser. Saxton LTL (100-ft.), Brown or Clear.

LIFELINE 100◆ ROTOR CABLE

◆ Available 1000' spools.

Extra heavy duty conductor rotor cable. Superior quality. One leg polarized for easy reference. Sold in exclusive Magic dispenser carton.
100' Brown.
1483 - 4 Conductor
1485 - 5 Conductor

TV ANTENNA WIRE

FOR MORE BRILLIANT COLOR RECEPTION IN TOWN AND COUNTRY

FOR TOWN

*"Magic Membrane" is Saxton's fully air-foam filled barrier that cuts signal loss to a minimum and sharpens picture clarity.

Sharpest, clearest, smear-free color reception for high noise, crowded, steel-and-concrete areas! Excellent VHF and UHF reception! These are among the many plus benefits available with the Saxton #1041 Foil Shielded Twin-Foam TV Antenna Wire. And they're all the result of our exclusive "Magic Membrane" process that encapsulates the sturdy copper conductor wire with layers of low-loss air foam polyethylene for maximum signal strength. In addition, a mylar-foil shield surrounds the foam to protect against electrical interference and reflected signals. The outer jacket of this highly flexible TV cable wire is made of carbon black filled polyethylene for extra protection against sun, heat, storm, snow . . . and ultra-violet rays! Want more? You can even run the #1041 down a drain-pipe for easy, out-of-sight installation.

UNCONDITIONALLY GUARANTEED FOR 20 YEARS

FOR COUNTRY

*"Magic Membrane" is Saxton's fully air-foam filled barrier that cuts signal loss to a minimum and sharpens picture clarity.

Open country and suburban fringe areas can now be assured of superb color reception with this remarkable TV antenna wire. Includes all the exclusive Saxton design features required to conduct and maintain signal strength from antenna to set. Electrically superior for all channels, the #1037 also provides unusually fine UHF and VHF results. Physically, this is a flat, twin lead transmission wire that features pre-stretched copper conductors with the exclusive "Magic Membrane" encapsulating the lead wire with polyethylene foam. All are surrounded by a high quality carbon black treated polyethylene jacket. This assures built-in resistance to severe weather conditions as well as ultra-violet rays, and provides finest possible reception.

UNCONDITIONALLY GUARANTEED FOR 20 YEARS

FOR ECONOMY

*"Magic Membrane" is Saxton's fully air-foam filled barrier that cuts signal loss to a minimum and sharpens picture clarity.

Made to Saxton standards of quality throughout, this sturdy polyethylene-and-foam encased transmission line answers the demand for clear VHF, UHF, and color reception at lowest cost. Delivers results that are sure to please the most cost-conscious customers, thanks to the engineering skill inherent in its design specifications. Highly resistant to dirt, oil, moisture and salt air, the #1043 outperforms any competitive make in its price class. Foot for foot, and signal for signal, it meets every requirement necessary for improving color reception under today's demanding conditions.

UNCONDITIONALLY GUARANTEED FOR 1 YEAR

See page 1786 for coaxial cable system

SPECIAL PRODUCT SECTION

"MITY-AMP" 2-WATT AUDIO AMPLIFIER

Saxton MA-100

**COMPLETELY EPOXY ENCAPSULATED
MODULE • Shockproof & Moisture-proof
• Dirt & Dustproof**

FEATURES

- **SPACE-SAVING**—2" x 3½" x ¾"
- **HI-FI AMPLIFIER**—20 cy. to 15KC ± db at 1-watt level
- **LIGHTWEIGHT**—Weighs total of 6 ounces
- **RUGGED**—Unconditionally guaranteed. Shock, moisture and dust-proof
- **EASY TO INSTALL & USE**—Hooked up in minutes. Simple instructions make unit functional immediately.
- **ECONOMICAL**—Low in price, big in performance. Long, trouble-free life. Total power requirements 6 or 12 volts.
- **PORTABLE**—Operates on auto or boat battery
- **VERSATILE**—Uses limited only by your ingenuity. Ideal for p. a. system, phono amplifier, stereo, intercom, signal tracer, modulation, tape monitor, etc.

Model A
Saxton No. A-1011
Model B
Saxton No. A-1012

TRANSISTORIZED AUDIO PRECOMPRESSOR-AMPLIFIER

Specifically designed for CB and Amateur transmitters—Latest design incorporates all the advantages of conventional separate compressors, pre-amps, and clippers—Instantaneously compensates for voice fluctuations with low distortion—No wiring necessary, simply plugs into mike input—Requires no modification of transceiver.

ANTENNA ACCESSORIES SPECIAL HARDWARE

GROUND MAST CLAMPS

Saxton No. 1100

U-BOLTS AND SADDLES

Saxton No. 1103
Also available without saddle

FLOATING GUY RINGS

Cast aluminum, two-piece floating guy ring. Fits most masts up to 1½" dia. Individually packed, complete with hardware, in plastic bags. Saxton No. 1099

GROUND RODS

Saxton No. 1064
Four-foot overall length with clamp.

SAXTON BATTERIES

- B 101 Equiv. to: Eveready S-76 - Used in A-1001 & A-1005. 1.5 volts.
- B 102 Equiv. to: Eveready S-41 - Used in A-1002. 1.5 volts
- B 103 1.5 V Battery - Used on A-1003
- B 104 9 V Battery - Used on A-733, Big Ear; A-988, Fun Gun

Airplane type "egg" insulator. Low air resistance, high tensile strength, white porcelain glaze. 1¾" long. Saxton No. 1156

ANTENNA WINDOW STRAPS

Saxton No. 1126

BROWN, PORCELAIN GLAZED INSULATOR

Saxton No. 1154

Doublet type antenna insulator, white glazed. Excellent electrical characteristics, high tensile strength. Dim.: 4½" x 2¾" Saxton No. 1155

Transposition block with porcelain glaze finish. Use with many types of doublet antennae. Saxton No. 1157

Film & Recording Tape STORAGE CHEST

Saxton No. 1230—Complete with 12 Swivel-locked, dust-proof storage cans. Insures moisture and dust-free storage of valuable tape and film. Attractive indexed storage chest. High-impact Styrene containers accommodate 5" and 7" tape or 8mm film

Saxton No. 1231—Individual plastic storage can

ALUMINAX No. 1599

Uses ultra low loss foam dielectric. Uses new super tough Mylar, coated on both sides with highly conductive aluminum foil. Uses four equally spaced telephone sized stranded tinned conductors. Uses virgin polyvinylchloride (PVC) jacket for flexibility, ease of installation and long life.

SPECIAL PRODUCT SECTION

THE "BIG EAR"

ELECTRONIC SOUND COLLECTOR

- "Homes in" on faint sounds up to 100 feet away... twice as far over water.
- Exclusive Cordless Broadcast Accessory to increase sensitivity tenfold also available.
- Use indoors or outdoors—from baby sitting to bird watching.
- Practical, instructional and entertaining for young and old.
- The latest in solid state circuitry.

"Big-Ear" opens up the fascinating world of sound around you. It enables you to hear normal, ordinary conversation at 100 feet away; bird calls at up to 200 feet. Basically the "Big-Ear" combines the principle of a parabolic microphone, a high gain amplification system, and stethoscope earphone, for intimate listening. Operates for hours on a standard 9 volt transistor battery. Comes complete with sturdy, adjustable tripod legs for convenient use.

No. A733

Complete with stethoscope earphones less batteries

"Big-Ear" Broadcast Accessory

Broadcasts "Big-Ear" through FM Radio!

Plug in our exclusive cordless Broadcast Accessory and convert "Big-Ear" into a professional listening device, without using the stethoscope. This enables you to broadcast "Big-Ear" sound to any FM receiver up to 30 feet away. With it you hear everything... laughing, breathing, crying — without connecting wires; with 30 times amplification. Includes battery.

No. A-1000

Patented Nos. D212006, D212003, D212005

"ASTRO-COM"™ TM WRIST BROADCASTER

- Broadcast your voice to any FM receiver within 50 feet in any direction.
- No wires! Powerful tiny silver oxide battery good for hours of broadcasting!
- Great for party fun; kids' games; keeps you in touch with playroom, bedroom, or sick room.
- Complete with replaceable silver oxide battery, nylon strap, rugged case, "whip" antenna, and tuning device.
- Electronic components designed by Saxton, first in miniature electronic equipment.

SPECIFICATIONS: Frequency Response: 300 to 6,000 hz. Power: 6 MW input. Range: Up to 50 feet, depending upon conditions. Frequency: FM broadcast band, (tunable ± 3 megacycles through 88 megacycles. Audio Sensitivity: Normal voice at approximately 10 feet. Case: High impact polystyrene—electronics encapsulated in epoxy. Weight: 4 ozs. Includes B-101 battery.

No. A-1005

eyeglass radio

CLIP INSTANTLY TO YOUR GLASSES ONLY 2 3/4 INCHES LONG. PICKS UP ANY STATION IN YOUR AREA!

Earphone plug guarantees complete privacy, while the magnetic swivel antenna permits instant adjustment for fine tuning and reception. On-off switch and tuning knob conveniently located... easy to use.

SPECIFICATIONS: Frequency: 550-1600 KHz. (AM Broadcast band). Earpiece: High fidelity magnetic. Electronics: 5 all Silicon Planar transistors. High gain regenerative circuit. Antenna: Super conductive magnetic ferrite. Case: High impact Polystyrene. Batteries: Includes (2) B-102 batteries.

Catalog #A-1002

Patented

HI-FI SENTINEL

No. MM33

Automatically shuts off Hi-Fi system after last record is played on changer. A must for every hi-fi owner — it's so easy to use, you'll wonder why no one ever developed this before. Hi-Fi Sentinel not only acts as an automatic shut-off control after the last record has been played, but it's also a convenience outlet for auxiliary hi-fi equipment. As a result, it eliminates the usual messy look created by additional power cords plugged into the wall receptacle.

To operate, merely plug into connectors under the record changer and that's it! Conveniently located slide switch permits automatic or manual control.

IMPORTANT: May be used on all Garrard, BSR, and other changers employing AMP "mate-n-lok" panel mount connectors.

the new ASTRO COM telephone amplifier

Transforms any ordinary telephone earpiece into a unique sound-control amplifier! It's a space-age electronic concept that assures the maximum in hearing range and comfort... attaches instantly and securely to any phone with a simple, snug-fitting band.

Carry it in your pocket... or in a purse, it's that portable! Especially suited for high-noise factory and office areas. And, it's a low-cost practical answer to public phone distractions. What's more, the hard-of-hearing, and elderly folks find it a definite aid, while guaranteeing privacy!

Precision-built for reliable performance, the ASTRO-COM amplifies any normal speaking voice up to five times. Complete with easily adjustable fingertip touch volume control.

SPECIFICATIONS:

- Amplification:** More than 30 db.
- Circuitry:** 4 Transistors.
- Case:** High Impact Polystyrene.
- Battery:** For best results, use SAXTON #B-103 battery or equivalent.
- Battery Life:** Approx. 25 hours use. Includes battery.

No. A-1003

ASTRO COM GUITAR BROADCASTER

now—electric guitar sound, the cordless way. Just 3 1/4" long, and no more than 5/8" in diameter at its widest... this unusual device is actually a solid-state electronic creation that transmits guitar sound — your sound, without cord, to any FM radio — as far as 50 feet away!

Easy to use! Simply plug into the output jack of your electric guitar. TUNE IN to your FM radio (88 to 94 mc). TURN ON big, quality sound! Thanks to the unique circuitry and quality components, you can be sure of full range frequency response hour after hour after hour. No distortion! No feedback!

SPECIFICATIONS: Frequency: 88 mc to 94 mc. Range: Up to 50 feet. Power: 6 MV Input. Frequency Response: 20 to 15,000 CPS. Battery: For best results, use SAXTON battery #B-101 or equivalent. Includes B-101 battery or equivalent.

OPEN LINE ACCESSORIES STAND-OFFS & STRESS INSULATORS

BLOCKS ONLY WITHOUT DRIVE-IN HARDWARE

Complete with 2 plated screws for use as spacer blocks in making your own open line installations.
Saxton No. 6000

Especially designed for use with open line transmission wire installations. Tighten screws after pulling wire taut. For use as spacer, partially tighten set-screws. This permits movement of wire in the slots and avoids potential wire breaks. Use outside slots for 600-ohm wire. The "Tappee" Stand-off Insulator is good for community installations where random spacing of open line is desirable to avoid tuned circuits. Ideal also for use as anchor point or spacer for "fence wire" installations. "Tappee" permits inexpensive, time and labor-saving, trouble-free installations, and is made for use with No. 12 thru No. 18-gauge wire. Hardware constructed of double-dip galvanized steel; block is high impact polystyrene.

6000	Block only
6001	5 1/2" nail type
6003	5" wood screw type
6005	5" pole clamp type
*6007	INS-500 type

SEE PAGE 4 FOR INSULATED OPEN WIRE TYPE INS-500.

OPEN LINE ACCESSORIES STRESS INSULATORS AND BLOCKS

HEAVY DUTY OPEN LINE STRESS INSULATORS

Plastic blocks, slotted on either one or two-inch centers, for taking up slack or as anchor points in open line installations. Complete with plated lag bolt. 12 or 14 gauge.
Saxton No. 6010

12 AWG INSULATOR

Same as Saxton No. 6010. Has 2-inch spacing for #12 AWG wires. Insulators for other gauges available on special order only.
Saxton No. 6011

FIBRE GLASS GUY LINE

Non-radiating, non-absorbing, high-strength "wireless" guy wire in vinyl jacket. 500-lb test strength. 100-ft. coil.
Saxton No. 7000

SUPER-STRONG FIBRE GLASS GUY WIRE

Same as above but in grey vinyl jacket. 1000-lb. tensile strength. 100-ft. coil.
Saxton No. 7002

PATIO OR STATION WAGON

Saxton No. 1205

Made of unbreakable, high impact styrene. Mahogany color. Complete with hardware and mounting instructions. Use for paging, monitoring, patio and stereo extensions, or as extension speaker anywhere. Complete with mounting escutcheon for 5 x 7, 6 x 9, 4, 5 or 6" round speakers.

DELAYED ACTION • COMMERCIAL SAFETY SWITCH HOME AND AUTO

Switch "off" and the lamp goes out SIXTY SECONDS LATER! Allows sufficient time to reach destination SAFELY. Replaces present wall switch in seconds. Ideal for Home, Farm or Auto. Fully guaranteed and UL Approved.
Saxton No. 560 (Ivory) Home
Saxton No. 561 (Brown) Home
Saxton No. 563 (Black) Auto

S-135	Copperweld wire—hard drawn—hi-conductivity antenna wire—18 ga. non-stretch	100
S-147*	Telephone extension kit—color coded—4 cond. wire w/plug and jack	25
S-148	Microphone cable—3 cond.—one lead shielded—2 leads unshielded ideal for push to talk microphone application	16
S-149*	Telephone extension cord—4 conductor—std. 4-pin molded plug and jack—adds mobility to phone or intercom	25
S-150	Shielded ignition wire	15
S-160	Television wire—twin lead—300 ohm—crystal clear—highly efficient for indoor use	21
S-161	Four conductor wires; with jacket—intercom, electric trains, kits, etc.	21
S-163	Lo-loss foam Twin Lead for indoor use	25
S-190	40 KV Hi-voltage wire 18 ga.—excellent for use as color picture tube anode wire replacement	10
S-191	3 Cond. Zip Cord—for use as extension for grounded power tools—remote control devices and appliance cords	20
S-192	Superphone—Makes your transistor radio sound like a console—personalized listening for radio, T.V., tape recorder, etc.	—
S-203*	Lazy bones-on-off appliance control for T.V., radio, fan, lamp, etc.	15
S-204*	Aerial kit for improved broadcast and shortwave reception	—
S-205*	Safe-pull—improved type of plug-in device for master T.V. antenna system. Replaces popular Motorola type plug	10
S-206	Same as above (Motorola type plug)	20
S-208*	Retractable coiled cord — microphone cable — 1 shielded — 2 unshielded	6
S-209*	Retractable coiled cord — microphone cable — 1 shielded — 3 unshielded	6
S-211*	Aerial kit — deluxe — for improved broadcast and shortwave reception—heavy duty antenna wire and heavy duty lead-in wire	—

*Special purpose cable.

SAXTON WINDOW-PAKS

BUBBLE-PAKS

DISPENSER PAKS

Saxton No.	Description	Footage
S-212	Same as S-213 (RCA type plug)	10
S-213	Same as S-206 but RCA plugs one end, lugs other end	20
S-214*	Replacement cord—UL approved—w/molded male plug one end, tinned wires other end—suitable for vacuum cleaners, electric brooms, power tools, etc.	15
S-215*	Retractable telephone handset extension cord—available in black, white, beige	25
S-216*	Extension cord—heavy duty deluxe type—w/cube tap one end and molded male plug other end	15
S-222*	Stereo extension cord—to be used as extension cord for stereo headphones	15
S-223*	Stereo extension cord—to be used as extension cord for stereo headphones	25
S-224*	Retractable stereo extension cord for use with stereo headphones—15' long extended	—
S-225*	Same as above—25' long extended	—
S-226	CB and 2-way radio linear amplifier battery lead	25'
S-230	Antenna wire—copper—7/22—prestretched	50
S-231*	Retractable electric guitar extension cord complete with regular and offset plugs	15
S-232*	Telephone handset extension—retractile—available in black, white or beige	15
S-233	Four conductor, flat extra flexible polarized cable for use with stereo tape players—can also be used for train sets, intercom and other purposes where 4 wires are required	30
S-234	Coaxial cable—RG-58/U—52 ohm—for CB—HAM—fixed or mobile use	22
S-235	Coaxial Cable—RG-59/U—72 ohm antenna leads	22
S-236	Single conductor—retractable mike cord	6
S-237	3 Conductor telephone wire—beige	25
S-301*	Test leads—3 color coded—leads w/alligator clips attached at both ends—for all automotive and household use	30"
S-302	Test Leads—(2) leads w/alligator clips	72"
S-306*	FM antenna—folded dipole	—
S-309	Heavy duty lightning arrestor deluxe type—ceramic shell, externally fused, suitable for UHF & VHF applications. Can accommodate coaxial cable, tubular, oval and flat twin lead as well as open wire line	—
S-310	2 set coupler — Deluxe	—
S-311	3 set coupler — Deluxe	—
S-317	Braided bonding strap—used for ground	10
S-318*	Shielded audio cables—retractile—color coded for quick and easy identification. RCA type plugs each end	8"-66"
S-319	Telephone plug and jack—make your own telephone extensions	—
S-320	Telephone plug only—(male)	—
S-321	Telephone jack only—(female)	—
S-325*	Shielded audio cable—retractile—color coded—RCA type plug one end, tinned leads other end	8"-66"
S-326*	Shielded audio cable—retractile—color coded—RCA type plug one end, alligator clips other end	8"-66"
S-327*	UHF folded dipole antenna	—
S-330	Indoor matching transformer—matches 75 ohm coax to 300 ohm terminals on T.V. sets—with F59 connector	—
S-331	Outdoor matching transformer—300 ohm to 75 ohm—with mounting strip, F59 cable connector and weather boot	—
S-332	UHF-VHF-FM antenna splitter—triple tuned—band pass filter	20

*Special purpose cable.

DELIVERY

Delivery is often dependent on availability of raw materials. Check with your distributor for delivery information at the time you place your order.

WIRE & CABLE FOR PRODUCTION.. RESEARCH... PROTOTYPE.....

Government Military Specifications . . . Commercial Specifications or Approved Manufacturers Specifications.

IMMEDIATE DELIVERY

- Most Military Specifications
- High Temperature Wire & Cable
- Telemetry Supervisory Control Cable
- Complex Instrument Cable
- Telephone & Inter-Communicating Cable
- Electrical & Electronic Instrument Wire
- Coaxial Cables
- Thermocouple Wire
- Multiple Pair Control Cable
- Microphone Cable
- Computer Cable
- Many more

Complete line of Wire, Cable & Cord in stock . . . or we will custom Cable to your design.
