TOMORROW'S THINKING IN TODAY'S PRODUCTS

**AUTOMATIC**

**AMPERITE**

**REGULATOR**

**BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE**

STANDARD

MINIATURE

**AUTOMATIC REGULATION  
WHAT IT IS**

The AMPERITE Ballast-Regulating Tube is an automatic "rheostat" designed to keep the current in a circuit at a definite value, for example, 0.5 amp.

Should the supply voltage increase, the Amperite will automatically increase in resistance enough to take up the increase in supply voltage — keeping the voltage on the load constant. It consists of an iron wire hermetically sealed in a bulb containing hydrogen or helium — the two gases with the highest heat conductivity. Its regulating action is based on the high temperature co-efficient of resistance of the iron wire and the rapid cooling of hydrogen or helium gas.

Being a constant current device, the AMPERITE Ballast-Regulating Tube can be used only to regulate a constant load—fixed wattage. Thermostatic relays can sometimes be included in these regulators to reduce initial surge.

**We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.**

Characteristic curve of a typical Amperite. Approximate curve of any other Amperite can be obtained by multiplying or dividing the current or voltage scale by any number.

**Standard Types of Amperite Ballast Tubes Net \$1.80**  
**Amperite NE70V Neon Lamp Net \$1.80**

\*T denotes T5½ bulb-7 pin miniature, e.g., 3T4.  
\*\*TF denotes T6½ bulb-9 pin miniature, e.g., 3TF4.  
Base Wiring: Octal, 7 and 9 pin miniature—prongs 2-7.

**AMPERITE NEON LAMP  
TYPE NE70V Net \$1.80**

**GENERAL ADVANTAGES:**

- Light, compact • No moving parts • Rugged; will withstand vibration of 10G. minimum
- Hermetically sealed; not affected by altitude or humidity changes • Can be changed as easily as a radio tube • Operates equally well on A.C. or D.C. • Inexpensive

**CAPACITIES AVAILABLE**

Current values of 60 ma. to 5 amps; threshold voltage 0.4 to 40 V. Maximum dissipation 50w per tube (ST19 bulb). Any number of AMPERITES with the same voltage range can be operated in parallel. AMPERITES should not be used in series.

**AGEING**

AMPERITE Ballast Tubes may change approximately up to 3% in current if aged for 4 to 8 hours, at maximum voltage. They will change very little thereafter.

**LIFE EXPECTANCY**

Average life if operated as recommended .....	<b>2000 Hours</b>
If operated continuously at maximum voltage .....	<b>1000 Hours</b>
If operated continuously at 80% maximum voltage .....	<b>5000 Hours</b>
If filament is operated below glow point .....	<b>5000 Hours up</b>

In operation, the Amperite filament starts to glow at one point; as the voltage is increased, the glow spreads over the entire filament. Like incandescent lamps, turning Amperite on and off reduces its life, especially if operating near its maximum voltage.

**TIME LAG CHARACTERISTICS**

Time lag encountered in an Amperite Ballast Tube depends upon the wattage consumed by the ballast and the size of the bulb. Where the wattage is small for the size of the bulb, the action can be made practically instantaneous — less than 1 second. In such cases the bulb will remain at practically ambient temperature. When the wattage is high enough to heat the bulb to a temperature uncomfortable to the hand (160°F) the lag might be as much as several minutes for final readings—but normally reaches within 90% of final readings within a few seconds.

**AMPERITE NUMBERING SYSTEM**

In general, the AMPERITE number approximately denotes the current—voltage threshold value. For example:

Amperite Number	3-4	3H4	10-7	12-11	12H11
Threshold Current	0.3	0.35	1.0	1.2	1.25
Threshold Voltage	4.0	4.0	7.0	11.0	11.0

**We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.**

**AUTOMATIC**

# AMPERITE

**REGULATOR**

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

### AMBIENT EFFECTS

Ambient temperature variation of  $-50^{\circ}$  to  $+70^{\circ}$  C will change the current value of an Amperite approximately 2% on regulating portion of curve as shown directly below. Being hermetically sealed the Amperite is not affected by altitude or humidity changes.

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

Amperite Ballast-Type 6-4 current voltage characteristic under ambient conditions of  $-55^{\circ}$ ,  $24^{\circ}$ , and  $85^{\circ}$  C. The percentage change with ambient is approximately the same with all type Amperite ballasts.

This diagram illustrates for superior regulating characteristics of the Amperite Ballast-Regulating Tube. **STANDARD SIZES** available for various wattage consumption . . . For good regulation, a bulb should not be required to dissipate more than 50% of maximum wattage.

SIZE	SUB. MIN. L	T5½S	T5½L	T6½L
MAX. WATTS	2 W.	3	5	5
WT. PER TUBE	2 GMS.	7 GMS.	8 GMS.	8 GMS.

### BATTERY CHARGING AND DISCHARGING

Amperite Ballast Tubes are very successfully used for keeping the current constant in charging and discharging batteries. Any number of Amperites of the same voltage range can be placed in parallel to obtain proper current. The current can be kept to  $\pm 1\%$ . Advise voltage variation and currents desired.

A light, compact, and inexpensive method of obtaining close regulation is to use an Amperite Ballast Tube with an Amperite Neon Lamp — type NE70V. Base octal-base wiring-prongs 2-5. One NE70V is used for all loads up to 100W.

### POWER SUPPLIES

We strongly recommend, for any particular application, to fill in and return one of our special problem sheets (ASP 343) and permit us to recommend the most suitable AMPERITE.

POWER SUPPLY	Dry Cells	6 Volts	12 Volts	26 Volts	115 Volts
Supply Variation	2.2-3.0V	5.5-7.5V	11.4-13.8V	22.0-30.0V	105-125V
Desired on Load	1.8-2.0V	3.9-4.1V	6.1- 6.4V	12.4-12.8V	90- 95V
Required on AMPERITE	0.4-1.0V	1.6-3.4V	5.3- 7.4V	9.6-19.2V	15- 30V
Current Variation	.29-.32a	.29-.32a	.29-.32a	.29-.32a	.29-.32a

The above chart shows the maximum load voltage for the given supply to obtain  $\pm 2\%$  current regulation on load. Better regulation is obtainable by increasing the voltage across the AMPERITE. Up to a point, the higher the percentage of the supply voltage taken up by the AMPERITE, the better the regulation. Radio tube filament loads — have low cold resistance which causes a high initial surge. For such loads we recommend a bleeder of 20 to 50% prox. of load and the corresponding AMPERITE. e.g.

FILAMENT LOAD	USE AMPERITE	TOTAL CURRENT
0.3a	4HTF4	0.45a
0.6a	8-4	0.8a
0.7a	9H4	0.95a

On Radio tube filament loads the bleeder will also improve the regulation.

# Industrial Receiving and Communication Tubes

5654

### FIVE STAR TUBES

In industrial and communication equipment — critical sockets where there can be no compromise with electronic tube performance — you can depend on the proven reliability of GE Five-Star tubes. Their high reliability is a result of special design features, special manufacturing processes, special tests, and stabilizing periods.

5670

6140A

### INDUSTRIAL RECEIVING TUBES

For industrial and military applications involving electronic instrumentation and control, there is a G-E industrial receiving tube specifically designed to meet your particular requirement.

6661

6688A

### ENTERTAINMENT TUBES

G. E. offers a full line of entertainment tubes encompassing the fields of radio, TV, and hi-fi. Featured as a portion of this line are types specifically designed for high-fidelity monaural and stereo applications.

5963

5965A

### COMPUTER TUBES

Two complete tube lines, Computer and Five-STAR Computer, are designed to meet the specialized needs of the computer industry. Outstanding features include: high permeance, low heater power requirements, controlled cutoff characteristics, and long life.

6005

## 18 VALUE-ANALYZED benefits of G-E 5-Star Tubes...

- Controlled inside diameter on bulbs reduces vibrational output and microphonics.
- Highly efficient getter performs throughout tube life and guides flash to avoid inter-element leakage.
- A getter flash shield improves initial leakage characteristics.
- Two double mica spacers, with additional anti-leakage slots, brace internal parts, provide superior inter-element insulation and improve vibration characteristics. 12 or 16 contact points give firmer fit between bulb and mount.
- Short, sturdy cages increase rigidity of tube structure.
- Plate ears are embossed for added strength and improved mica fit.
- U-bolt construction through top and bottom micas firmly secures the cage assembly.
- Smooth grid legs prevent a "sawing" action on the mica, reducing grid vibration and microphonic noise.
- Critical grids are plated with gold or silver to minimize grid emission.
- Passive cathode alloys assure reliability and long life in low-duty cycle circuits where interface tends to develop.
- Outside diameter and density of cathode coating are statistically controlled.
- Low thermo-conductivity cathode tab reduces heat loss.
- Cataphoretic coating of all heater bends after forming insures complete heater-cathode insulation.
- Folded heater design proved most reliable under shock, vibration and heater cycling conditions. Heater is temperature-controlled to further improve reliability and lengthen life.
- Rhenium-tungsten heater material increases tensile strength, reduces brittleness, and allows larger-diameter heater wire.
- Lead-glass stems help ward off glass electrolysis.
- Pins are annealed to prevent glass strain at socket insertion.
- Stem design minimizes welds—fewer points of possible failure—less change of short-causing particles from weld splash.

7293A 7293A/R	Glass (Ruggedized)	Yes	50:1	60%	—	f:16 @ 100 ft-c	Monochrome studio	Color studio
8093A 8093A/R	Glass (Ruggedized)	Yes	60:1	60%	—	f:16 @ 120 ft-c	Studio color, VTR	Monochrome

## SPECIAL PURPOSE IMAGE ORTHICONS

Type	Target	Field Mesh	Photo Cathode	Resolution Sensitivity*	Applications
					Z5395 Z7805
7538 7409	MgO Ruggedized 7538	No	S-10	500 @ $1.5 \times 10^{-5}$ 100 @ $4 \times 10^{-7}$	Low light level surveillance, electro optical telescope systems, airborne and tank fire control
7967 Z7806	MgO Ruggedized 7967	No	S-20	500 @ $5 \times 10^{-4}$ 100 @ $1.5 \times 10^{-7}$	Extremely low light level surveillance, underwater TV systems, astronomical systems
7969 Z7807	MgO Ruggedized 7969	No	UV	500 @ $1.5 \times 10^{-5}$ 100 @ $4 \times 10^{-7}$	Near UV sensitive medical biological studies, missile detection
Z7809	MgO	No	S-10		Similar to 7538 except fiber optic faceplate. Fibre optic systems. Can be coupled to image intensifier
Z7810 Z7822	MgO Ruggedized Z7810	No	S-20		Similar to 7967 except fiber optic faceplate. Fiber optic systems, radiation scintillator studies. Can be coupled to image intensifier
Z7814	MgO	Yes	S-20	500 @ $5 \times 10^{-6}$ 100 @ $2.7 \times 10^{-7}$	Improved Corner resolution, electro-optical telescope systems
7198A	Glass	No	S-10		General Purpose surveillance, fire control

\* Resolution sensitivity is defined as television lines per target inch @ specified photocathode illumination in foot-candles.

See Ceramic Section pgs. 0 - 0 for GL-6299 - GL-6897.  
Outline diagrams for GL-7644 and GL-7784 are on page 12.

Outline diagrams for GL16897 and GL-7289 are on page 4.  
Basing diagram for GL-7085/356 is on page 9.  
Footnotes are on page 14.

### FOOTNOTES FOR TRANSMITTING TUBE LISTINGS

- A Cathode to grid volts.
- A<sub>1</sub>(1) Single tube class A audio power amplifier.
- AB<sub>1</sub>(2) Push-pull class AB<sub>1</sub> audio power amplifier.
- AB<sub>2</sub>(2) Push-pull class AB<sub>2</sub> audio power amplifier.
- B Referred to grid terminal.
- B(2) push-pull class B audio power amplifier.
- B-P Single tube class B RF telephone service.
- C Driver power output.
- C-P Single tube class C plate-modulated telephony service.
- C-T Single tube class C telephony or FM service.
- C-T (Pulsed) Single tube class C RF pulsed oscillator.
- CF Coated filament (directly heated).
- CV Thoriated tungsten cathode (indirectly heated)
- CU Coated indirectly heated cathode (unipotential).
- D Useful power output.
- C-G-T Single tube class C grid-modulated video service.
- PT Pure tungsten filament (directly heated).
- TF Thoriated-tungsten filament (directly heated).
- # Broadcast tube type.
- Intermittent Commercial and Amateur Service rating.
- <sup>a</sup> Cathode to grid volts.
- <sup>b</sup> Referred to grid terminal.
- <sup>c</sup> Driver power output.
- <sup>d</sup> Useful power output.

Miniature types are in bold face.

\* Temperature rating expressed in ambient temperature range over which the tube will operate.

## Ignitrons

GENERAL  ELECTRIC

Ignitrons are gas-discharge tubes employing a mercury pool as the cathode. The mercury pool cathode provides extremely high emission capability. Initiation of conduction in the ignitron is accomplished by means of a starting electrode called the ignitor. The ignitor is a small rod of highly refractory material which dips into the mercury pool. The passage of ignition current through the ignitor causes a cathode spot to form at the junction of the ignitor and mercury pool. Ionization from the cathode spot spreads throughout the volume of the ignitron and when the anode is positive electrons flow to it. By control of the point in the A-C cycle at which the ignitor is fired the duration of current flow through the ignitron is controlled. The ignitron,

therefore, is ideally suited for high current rectification and control service. The following charts present summarized rating information for General Electric ignitrons. All ratings are based on 25-60 CPS operation. For convenience to the user the ignitron types are grouped by typical application service. Many types are rated for more than one service and therefore appear in two or more rating charts. More detailed ratings are available upon request for all of the G.E. ignitrons listed. The ignitron has long been recognized as a long life, highly reliable device. As the industry's leading ignitron manufacturer General Electric is pleased to present the information contained in this booklet and invites your inquiry for additional application assistance if required.

Warranty for all types listed above is H-12 except for those marked (2), see footnote below.

PC Indicates plastic coated version.

\* All ratings based on use of liquid cooling.

(1) Maximum demand current below 500 volts should not exceed 9600 amperes RMS.

(2) Have H-24 warranty.

For above types, warranty is normally K-1000, however warranty information for specific applications will be supplied upon request.

## IGNITRON ACCESSORIES

## THERMOSTAT KITS

Kit includes thermostat and spring-loaded fastener in a captive assembly for connection to mounting pad located on ignitron water jacket.

Single-pole contacts perform control functions as shown in chart below.

Kit No.	Function	Contacts	Temperature		Termination
			Open (°F)	Close (°F)	
N15272AA	Water control	NO	86	96	36-inch leads with spade terminals
N15273AA	Over-temperature protection	NC	125	105	36-inch leads with spade terminals
N15286AA	Water control	NO	86	96	Terminal block
N15287AA	Over-temperature protection	NC	125	105	Terminal block

## COOLING CLAMP

## IGNITOR TERMINAL CONNECTING LEADS

Suitable for use with GL-5550, GL-7171 and GL-7703 to accomplish cathode connection and liquid cooling: Cat. No. L 6922259-G5	Insulated leads for connection to 0.250-inch diameter ignitor terminals	Cat. No. N 22006LC	7 $\frac{3}{4}$ inches long
		Cat. No. N 22007LC	13 $\frac{1}{2}$ inches long

## QUICK-CHANGE WATER CONNECTORS

Ignitron installation time is reduced through the use of slotted anode and cathode terminals . . . provided as a regular feature on all standard G-E welding ignitrons . . . and the use of the quick-change brass water hose connectors shown in table.

Fitting No.	Description	Use with G-E Ignitron Type
B1HK	Socket	GL-5551-A, GL-5552-A, GL-5822-A, GL-7669, GL-7670, GL-7671, GL-7672, GL-7681, GL-7998, GL-8360, GL-37250, GL-37251, GL-37252, GL-37253
B2HK	Socket	GL-5553-B, GL-5554, GL-5555, GL-6512, GL-6513, GL-7673, GL-37254, GL-37255
B2K16	Plug	

## CONDENSED WARRANTY INFORMATION

## G-12—

(Rectifier service only.) Warranted for full replacement within one year of service. Expires 18 months from date of sale to ultimate user or two years from date of shipment by G.E.

## H-12—

Warranted for one year with prorated adjustment after 15 days of service. Expires 18 months from date of sale to ultimate user, 12 months from date of initial installation, or 2 years from date of shipment by G.E.

## H-24—

Warranted for two years with prorated adjustment after 15 days of service. Expires 36 months from date of sale to ultimate user, 24 months from date of initial installation, or 3 $\frac{1}{2}$  years from date of shipment by G.E.

## K-1000—

Warranted for 1000 operations or six months of service with prorated adjustment for the difference between elapsed number of operations and 1000. Expires nine months from date of sale to ultimate user, six months from date of initial installation, or twelve months from date of shipment by G.E.

**NOTES**

- (1) Peak inverse voltage.
- (2) This is the bogey value at which average characteristics are determined. For some classes of operation a lower value may be recommended.
- (3) These are the highest values listed for any class of CW operation; lower values may be indicated for some classes of CW operation. Refer to complete data sheets.
- (4) Adjusted for Ib=75 milliamperes.
- (5) for this information.
- (6) Peak voltage rating for pulse service.
- (7) Pulse service.
- (8) Adjusted for Ib=70 milliamperes.
- (9) The frequency listed is one at which significant application data are available or expected, and does not necessarily represent an absolute frequency limit.
- (10) Adjusted for Ib=10 milliamperes.
- (11) Adjusted for Ib=10 milliamperes; range must be variable from 75 to 200 volts.
- (12) Bypassed resistor (18k) in plate-supply lead.
- (13) With Rk=910 and Eg=+6.0 volts.
- (14) With Rk=270 and Eg=+6.0 volts.
- (15) Bypassed resistor (17.5k) in plate-supply lead.
- (16) Plate dissipation of 100 watts is maintained with forced-air cooling.

# Special Devices — Photo Conductive Cells

GENERAL  ELECTRIC

Reliable, hermetically sealed, or plastic encapsulated, cadmium sulfide and cadmium selenide photoconductive cells are available in a wide assortment of package sizes and electrical characteristics.

Photocell-lamp combinations consist of a photoconductive cell and an illumination source enclosed in a light tight, metal package available in an assortment of electrical characteristics.

**NOTES**

- (1) The time required for current through the cell to reach 90% of its steady value upon switching from darkness to a light level of 5 footcandles.
- (2) The time required for current through the cell to decrease to 10% of its steady value upon switching from a light level of 5 footcandles to darkness.
- (3) This dissipation is allowable at ambient temperatures from -40 to +40C. From +40 to +65C, the allowable dissipation decreases linearly, reaching zero at +65C.
- (4) Measures approximately 30 seconds after removal of illumination of two footcandles produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin and at rated cell voltage.
- (5) This dissipation is allowable at ambient temperatures from -40 to +40C. From +40 to +80C, the allowable dissipation decreases linearly, reaching 37 milliwatts at +80C, and going to zero above +80C.
- (6) Measured approximately 20 seconds after removal of illumination of two footcandles produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin; d-c polarizing voltage 12 volts.
- (7) Allowable dissipation may reach 500 milliwatts with external heat-conducting bracket.
- (8) For a maximum of 20 minutes at 12-hour intervals.
- (9) Measured approximately 30 seconds after removal of illumination of one footcandle produced by a tungsten-filament source operated at a color temperature of 2854 Kelvin; d-c polarizing voltage 50 volts.
- (10) This dissipation is allowable at ambient temperatures from -40 to +30C. From +30 to +65C, the allowable dissipation decreases linearly, reaching zero at +65C.

**NOTES**

- (1) Current of a bogey lamp at rated voltage.
- (2) This dissipation is allowable at ambient temperatures from -40 to +30C. From +30 to +65C, the allowable dissipation decreases linearly, reaching zero at +65 C.
- (3) Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 60 volts.
- (4) Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 250 volts.
- (5) Measured approximately 5 minutes after removal of illumination; d-c polarizing voltage 200 volts.
- \* Publication of these data does not obligate the General Electric Company to manufacture a device with these characteristics.

**OUTLINE DRAWINGS**

# Special Devices — Reed Switches

In a relatively short period of years, the dry reed switch has begun to play an important role in performing the switching function for a wide variety of electronic/electro-mechanical equipment. Major application, now in general use, range from telephone switchgear, appliances, and data processing units to logic circuitry for industrial controls.

The General Electric reed switch capsule consists of a pair of low reluctance, magnetically actuated, flat metal reeds, hermetically sealed in an atmosphere of dry inert gas. The reeds are of equal length and are supported as cantilevers, overlapping at the center of the glass cylinder where they are separated by a small air gap, thus forming a normally open Single Pole, Single Throw (SPST) switch.

**NOTES**

- (1) All switches use single-pole, single-throw, normally open, Form A contact arrangements. With the exception of type DRV120, which is a vacuum switch, all switches are filled with inert gas at an internal pressure 1/2 atmosphere
- (2) Some degradation or improvement in performance may be expected at operating conditions other than those specified.
- (3) Sensitivity measured using a 6300 turn coil of #41 wire wound on a 0.8" long bobbin approximately 0.17" in diameter.
- (4) Full load, 25 volts d-c, 60 operations per second at H.V.A.
- (5) Diffused gold contacts with gold-plated leads.
- (6) Rhodium-plated contacts with gold-plated leads.
- (7) Sensitivity measured using a 10,000 turn coil of #39 wire wound on a 2.0" long bobbin approximately 0.25" in diameter.
- (8) Full load, 50 volts d-c, 60 operations per second.
- (9) Diffused gold contacts with both leads tinned.
- (12) Sensitivity measured using a 10,000 turn coil of #36 wire wound on a 1.750" long bobbin approximately 0.330" in diameter.
- (13) Nominal center-to-center of bent leads.
- (14) Diffused gold contacts with both leads tinned and bent on 90° angle.
- (15) Full load, 125 volts d-c, 60 operations per second.
- (16) The voltage rating is a "hold-off" value, and the current rating is a measure of the current the contacts will carry but not switch. Maximum permissible switching currents are to be determined.
- (17) Sensitivity measured using a 5,700 turn coil of #36 wire wound on a 2.0" long bobbin having an oval cross-section of approximately 0.5" x 0.28".
- (18) Rhodium-plated contacts with both leads tinned.

## Special Devices—Tungar Bulbs

GENERAL  ELECTRIC

The Tungar bulb developed by General Electric in 1916—and used for rectification of a-c to d-c is well known wherever battery charging or similar applications require d-c power.

## NOTES

\* Except for Cat. Nos. 16X897 and 45X674 which have coated filaments.

† Cat. No. 206501 is identical to Cat. No. 12X825 except that it is fitted with an adapter to take a clip anode lead and fits a standard Edison socket.

<sup>1</sup> Under normal ambient temperature conditions, this tube will deliver 90 percent of full output within three seconds after the simultaneous application of anode and filament voltages. Longer tube life can be obtained by applying anode voltage 1 to 3 seconds later than the filament voltage.

<sup>2</sup> Under normal ambient temperature conditions, this tube will deliver 80 percent of full output within three seconds after the simultaneous application of anode

and filament voltages. Longer tube life can be obtained by applying anode voltage 1 to 3 seconds later than the filament voltage.

<sup>3</sup> The preheating time listed must be respected and filament excitation must be continuous if guarantees are to apply. When first installed in a new location, this tube should be operated for 10 minutes with filament voltage only.

<sup>4</sup> Full output can be obtained as soon as power is applied to the anode after preheating time. The recommended tube preheating time must be respected and filament excitation must be continuous if guarantees are to apply.

\* Low-Microphonic    † Balanced Sections    ‡ Lower Heater Current    § Higher Heater Current    # Lower Ratings    ## Higher Ratings  
 ^ Shorter Envelope    †† Longer Envelope    ‡‡ Cathode Type    ††† Different Basing    5★ General Electric Five-Star Type

φ Replaces other type listed. Will require change in cathode heater voltage.  
 # Electrical and Mechanical replacement for other type listed. May require change in water control or over temperature protection switches.

This Interchangeability listing has been prepared to help you find a GE replacement for your tube requirements. It is believed to be accurate as of the date issued. However no responsibility is assumed by the General Electric Company for its use; nor for any infringements of patents or other rights of third parties which may result from its use.

# ELECTRON TUBES and COMPONENTS FOR ENTERTAINMENT and INDUSTRY

PREFERRED ENTERTAINMENT

## RECEIVING TUBES

For: • High-Fidelity • AM-FM • Television • Industry  
• Foreign Replacement

Mullard electron tubes, universally recognized for their advanced designs and reliability, offer a comprehensive range of tubes for High-Fidelity, AM-FM, Television, and Industrial Applications. The vast manufacturing resources of the Mullard organization, including the world's most modern research laboratories, is your assurance of guaranteed tube design advantages for maximum performance in electronic equipment.

## 10M Series Tubes

- TUBE-TO-TUBE UNIFORMITY
- SECTION-TO-SECTION UNIFORMITY
- LONG LIFE
- GUARANTEED PERFORMANCE
- FOR THE BALANCE ORIGINALLY DESIGNED INTO THE CIRCUIT

A selected series of individually laboratory-tested tubes, ideal for today's technically-advanced and exacting electronic equipment meets more stringent requirements... individual foam cushion packaging for protection during handling and shipping. Each Master 10M tube guaranteed for 10,000 hours of effective performance within two years from date of purchase. Recommended for the full range of electronic equipment.

### TYPICAL TEST SPECIFICATIONS 12AT7 DOUBLE TRIODE

#### TEST CONDITIONS:

Vf 12.6V  
Va 250V  
Vr -2V

#### LIMIT EACH TRIODE

Ia Min. 8.8 Ma  
Max. 42 Ma

Ig<sup>1</sup> Less than 7mA

Ia Triode No. 1 vs.

Triode No. 2

Less than 15% deviation.

Cutoff less than 20

µA with 8V on grid.

Insulation heater to cathode less than 7mA.

Insulation heater positive, cathode negative

with 125V on plate. Less than 20µA.

#### HUM AND MICROPHONICS

Check to close parameters special test specifications and circuits to be given upon request.

Typical Ia curves with voltage ratings from 100 to 250V.

## INDUSTRIAL AND SPECIAL PURPOSE TUBES

An extensive range of over 700 dependable Special Purpose Tubes for virtually every industrial application, including Cathode Ray Tubes, Image Converter Tubes, Photosensitive Devices, Counting Tubes, Indicator Tubes, Electrometer Tubes, Trigger Tubes, Voltage Reference Tubes, High Voltage Rectifiers, Thyratrons, Power Triodes and Tetrodes, Microwave Tubes, etc. Each tube reflects traditional MULLARD quality construction, for example:

## TRANSISTORS and DIODES

A wide range of silicon planar transistors encapsulated in epoxy. Available for immediate delivery.

### SERVICE RANGE

Over 275 of the most popular receiving tubes for the U.S. service dealer renewal market.

### MATCHED PAIRS

Laboratory-Balanced

Tube Type	Cross Ref.	Tube Type	Cross Ref.
ECL82MP	6BM8MP	EL95MP	6DL5MP
ECL86MP	6GW8MP	KT66MP	
EL34MP	6CA7MP	KT77MP	
EL37MP		KT88MP	
EL84MP	6BQ5MP	UCL82MP	50BM8MP
EL86MP	6CW5MP	UL84MP	45B5MP
EL90MP	6AQ5MP	7189MP	

The most complete range for optimum performance of hi-fi and stereophonic equipment.

INTERNATIONAL ELECTRONICS CORPORATION

# RCA PICTURE TUBES COLOR and BLACK and WHITE

## RCA SILVERAMA® BLACK AND WHITE PICTURE TUBES

NOTICE: RCA Silverama Picture Tubes contain all new parts and materials except for the envelopes which, prior to re-use, are carefully inspected to meet the standards of original new envelopes.

**ierc****Heat Dissipating Electron Tube Shields**

Standard Configurations Available from Factory Stock

**VERTICAL MOUNTING SHIELDS FOR MINIATURE TUBES**

MILITARY AND INDUSTRIAL TYPES FOR NEW AND EXISTING EQUIPMENT. IERC vertical mounting shields used on tubes in room ambient, will reduce bulb temperatures as much as 60% lower than a JAN shielded tube, 40% below bare bulb temperature. Tests demonstrate tube life increases of two to twelve times.

**FOR OCTAL AND POWER TUBES**

IERC Octal tube shields are designed to meet applicable requirements of MIL-S-9372C such as heat dissipation, vibration, etc. Mounting hole dimensions of bases match standard military bottom mounted sockets. Many additional shield types are available for all T9 and T12 compactron type tubes, and for large T16 to T28 size power tubes.

## RUSSELL INDUSTRIES/LEWIS AND KAUFMAN, Ltd.

# SHIELDMU® TAPE AND FOIL FOR ELECTROMAGNETIC SHIELDING

## ECONOMICAL SHIELDING with SHIELDMU TAPE and FOIL

Magnetic Metal's SHIELDMU tapes and foils are fully processed and ready to use; heat-treatment is not required after forming. Formed-in-place shields save time and expense when compared to fabrication of special shields. This is most important where experimental results are urgently required, or where small quantity needs make tooling costs uneconomical. Many manufacturers form shields in place around inductive components to save space and achieve magnetic component isolation. Use of tapes and foils also reduces stocking problems associated with drawn or fabricated component shields.

## SELECTING SHIELDMU

Shieldmu is provided in four levels of permeability performance. Each is designed to meet the specific requirements of various shielding applications. Multi-layer shields using different materials often give the most economical result by putting high flux capability materials in the region of the strongest field. The high permeability layers are then most effective at the lower field strengths. Shieldmu with adhesive backing eliminates the necessity of taping or spot welding Shieldmu in place.

The thickness of the adhesive itself (not counting the peel-away paper layer) is nominally .001". Clear in color and chemically stabilized for long term life, the adhesive has a bond strength ranging up to 60 oz. per inch at a 90° pulling angle. It is a rubber-based thermoplastic which may be operated in temperatures up to 300°F.

## ADHESIVES AND NDN-ADHESIVE BACKED

Typical Class of Material	Trade Designations
80% Nickel-Iron Alloys	Shieldmu 30, Hymu 80, Mumetal, Hipernom
50% Nickel-Iron Alloys	Shieldmu 10, 49 Alloy, 4750, Hipernik, Nicaloi
Silicon-Iron Alloys	Shieldmu 3
Low Carbon Steel	Shieldmu 1

## ORDERING INFORMATION:

Shieldmu is carried in stock by your local distributor in various width and lengths wound on spools. When ordering, please use the part number indicated in the following price lists; each letter and digit is coded to indicate a specific requirement as shown in the examples below:

SHIELDMU wound on spools:

## SHIELDMU 30 — (M 30)

Maximum flux 7,000—8,000 gauss. Typical permeabilities—initial 20,000,—maximum 150,000. For maximum attenuation, even at low inductions. M — Prefix — Regular Back ABM — Prefix — Adhesive Back

# SHIELDFLEX FLEXIBLE TUBING FOR ELECTROMAGNETIC SHIELDING

Shieldflex tubing is specially designed and constructed to provide both electromagnetic and electrostatic shielding of current carrying conductors. The flexibility of the tubing permits close routing of conductors around components or other conductors, thus effecting space economy so important in miniaturization of components. Production economies are possible also because of the simple operation required — simply run the cable through a length of Shieldflex. Time consuming work of wrapping cables with Shieldmu tape can be reduced by using Shieldflex.

SHIELDFLEX flexible tubing for magnetic shielding is formed from high permeability electromagnetic alloys in a spirally wound construction.

**ORDERING INFORMATION:**

Random lengths of Shieldflex in 14 diameters can be purchased from your local electronic distributor. When ordering, please use the part numbers as presented in the price list above.

**EXAMPLE:**

## FULL-SPECTRUM SHIELDMU® 30CU ELECTROMAGNETIC SHIELDING

... FOR EFFECTIVE SHIELDING FROM 1 HERTZ TO 10 GIGAHERTZ!

Shieldmu® 30CU magnetic shielding provides full-spectrum electromagnetic shielding of sensitive components from 1 Hz to 10 GHz. A combination high permeability, high conductivity shielding, Shieldmu 30CU consists of a 0.0014-inch layer of high frequency shielding cemented firmly to a 0.004-inch layer of low frequency shielding. The combination of the two materials provides effective shielding over a large portion of the electromagnetic spectrum.

The interlayer of thermosetting adhesive provides an adhesive strength of 40 oz./inch at a 90° pulling angle and is rated for continuous use at temperatures up to 130°C. The adhesive is non-conductive with an insulation resistance of 500,000 megohms (ASTM D-1000). The adhesive, because of its good insulation value, improves the shielding effectiveness.

Available from your local electronic distributor in either sheet or spool-wound tape form, full-spectrum Shieldmu 30CU is easy to use. It can be cut easily with ordinary scissors. After it is cut, it is simply placed over the component and formed in place. Since Shieldmu 30CU is so easy to use, it offers a fast, economical method for determining the proper shielding required for sensitive components. It is suitable for either prototype or production use.

## SHIELDKU ADHESIVE BACKED, PRESSURE SENSITIVE COPPER TAPES AND FOILS FOR RADIO FREQUENCY SHIELDING

SHIELDKU provides extremely lightweight and highly effective shielding when used to attenuate interference signals caused by electronic processing systems and associated circuitry from interference and induced

voltages poses a major problem to electronic, design and standards engineers. SHIELDKU is designed to eliminate the RFI problem around and between sensitive equipments and components.

F30-10-FT	Shieldflex, 3/32" I.D. x 4 feet
F30-14-0H	Shieldflex, 1/2" I.D. x 2 feet
F30-14-1	Shieldflex, 1" I.D. x 1 foot
MT-1	Search coil with instruction for practical method of determining shielding needs
MT-1	Electromagnetic material identification test kit (see right)

**ELECTROMAGNETIC MATERIAL IDENTIFICATION**

**TEST KIT**

Use to identify parts or materials that have illegible or missing markings. For quality control incoming inspection of parts such as transformer laminations, magnetic shields, motor laminations, tape wound cores, pole pieces, and recording head laminations. Use also to segregate mixed stock of materials or parts. Fast 1-minute test; non-destructive. No knowledge of chemistry needed.

Model MT-1 Test Kit — Net Each ..... \$395

Types listed in Bold Face are Sylvania Gold Brand Tubes.

- Tubes are "Communication Quality" types.
- Indicates Military Type Approval.

‡ These tubes may be of foreign manufacture and in many cases, manufactured by the foreign affiliate of Sylvania Electric Products Inc.

x Price quoted upon request.

Prices are subject to change without notice.

**SYLVANIA**  
SUBSIDIARY OF  
GENERAL TELEPHONE & ELECTRONICS **GTE**

NEW CAPABILITIES IN: ELECTRONIC TUBES • SEMICONDUCTORS • MICROWAVE DEVICES • SPECIAL COMPONENTS • DISPLAY DEVICES

# PRICES

All prices listed in The MASTER are subject to change without notice — they should not be considered final.

Get quick-on-the-spot quotations from your distributor who subscribes to the up-to-the-minute

## **UNITED** *Pricing Reports*

### **The Perpetual Pricing System for Electronic Parts and Equipment**

- Over 750 manufacturers
- Over 400,000 catalog numbers tabulated with current prices
- Revised pages mailed semi-weekly: insert new pages—discard old pages
- Compression type loose-leaf binder for rapid replacement of revised pages
- Weekly summary sheet—Ups, Downs, Additions, Deletions

For complete details and subscription rates write to:

# DELIVERY

Delivery is often dependent on availability of raw materials. Check with your distributor for delivery information at the time you place your order.

# DIRECT INTERCHANGEABILITY LIST

This Interchangeability Index has been prepared to assist you in finding exact replacement for electronic tubes in the Industrial, Transmitting and Special Purpose fields.

This listing is believed to be accurate to the date of issue. However, no responsibility is assumed by Westinghouse for its completeness or for its use, nor for any infringement of patents or other rights of third parties which may result from its use.

## KEY TO ABBREVIATIONS

CR — Cathode Ray	N — Neutron Detector
CS — Camera or Storage	Photo — Phototube
Glow — Glow Tube (Cold Cath.)	Rect — Rectifier
GA — Vacuum Gauge	Thyr — Thyatron
Ig — Ignitron	Trans. — Transmitting
IR — Industrial Receiving	VR — Voltage Regulator or Reference
	HCDD — Hollow Cathode Discharge Device

## Notes

- Ratings and Performance are based on CCS Class C Telegraphy service unless otherwise shown.
- Excluding flying leads and protruding side terminals, pipes or handles.
- Highest frequency for full input.
- For triodes, amplification factor ( $\mu$ ) is shown; for tetrodes, beam tubes and pentodes, transconductance (gm) in micromhos is listed.
- Watts output at 500 megahertz.
- Milliwatts output at 3000 megahertz.
- Twin unit tube, Ratings are each unit, Performance for both units.
- Parallel heater connection requires half heater voltage and twice heater current.
- For d-c and single phase a-c. For 2 phase a-c voltage per phase will be half listed value and current per phase will be listed current value.
- Listed values of filament voltage and current are per phase for 3 phase operation.
- Designed for audio and ultra-sonic service, Ratings are single tube Class AB and Performance is for 2 tubes Class AB.
- Ratings and Performance are for Class AB r-f amplifier service.

# IGNITRONS

Ignitrons are gas-discharge, pool-type cathode tubes in which current conduction is initiated for each conducting cycle by means of an electrode called an ignitor. The ignitor is a small conical refractory element projecting into the mercury. When a relatively small current is conducted through the ignitor to the mercury, ionization of some mercury molecules in this area takes place. Ignitrons are of the half-wave type and current is conducted only when the anode is positive with respect to the cathode and the ignitor is fired. Control of the average conducted current is accomplished by phase control of the point in the input cycle at which the ignitor is fired. During the non-conducting cycle, ionization in these single-anode tubes is very low; the resulting reduction of shielding necessary to

prevent arc-backs lowers the arc voltage and permits operation at lower supply voltages. Ignitrons therefore have some of the control characteristics of thyratrons and, having a mercury-pool cathode, are capable of conducting very large currents. Water cooling of metal envelopes is used on most types to further increase current carrying capacity in a compact tube. Provision is made on some of the tube shells to connect thermostats for tube protection and water saving. Ignitrons are used in resistance welders, frequency-changer resistance welders, power rectifiers, high current switches in controlled fusion equipment, heat control devices for air-frame testing, and any circuit requiring precise control of large amounts of alternating or direct current.

## NOTES

- Excluding flying leads, water pipes, and on coaxial tubes the mounting flange.
- Suffix PC indicates plastic-coated tube.
- At 2400 volts.
- These tubes use heavy duty ignitors designed for continuous duty.
- Consult Industrial and Transmitting Tube Development Department for pulse modulator applications. The parameters listed represent a specific application only and substantial increases can be made in some areas.

# VACUUM MEASURING TUBES

Vacuum measuring tubes are designed to become part of an evacuated system. With suitable circuitry, the pressure in that system may be accurately determined. The Bayard-Alpert ionization gauge is used for measurement of very low pressures. The Schulz-Phelps ionization gauge measures pressures up to one atmosphere. The Pirani and thermocouple gauges

are less accurate and measure only the higher pressures, but, their associated circuitry is much simpler.

These tubes are used in electron tube and semiconductor device processing control, vacuum deposition, research and rocket altimeter applications.

ALPHA WIRE

MIL-W-76B-PLASTIC WIRE

TYPE MW-UNCOVERED PLASTIC

DESCRIPTION: Solid or extra flexible stranded tinned copper, color coded medium wall polyvinylchloride insulation. The stranded conductor has an extra tight lay to prevent springing open when stripped.

CHARACTERISTICS: Temperature rating -40°C to +80°C, Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture and fungus.

# Mil-W-16878D

## TYPE B — UNCOVERED PLASTIC

Pre-Bonded Tinned Copper Conductor

**DESCRIPTION:**

Each strand of the conductor is double tinned and then heated, which bonds the individual strands together for easy stripping. Color coded .010" polyvinylchloride insulation. The insulation meets requirements of MIL-W-16878D.

**CHARACTERISTICS:**

Temperature rating -55 C to +105 C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

**APPLICATION:**

A pre-bonded conductor is the ideal construction when leads are to be cut and stripped for point to point wiring. The pre-bonded conductor maintains much of the flexibility of an ordinary stranded wire but reduces processing and handling costs on soldering, retwisting of strands after stripping and hand tinning operations. Since the individual strands are bonded, expensive induction heating equipment is unnecessary.

# Mil-W-16878D Shielded Teflon<sup>+</sup> Cables

### NO OUTER COVERING OVER SHIELD

**DESCRIPTION:** Each conductor stranded silver plated copper, Type E extruded TFE .010" insulation, braided silver plated copper shield over conductor(s), 90% coverage.

**CHARACTERISTICS:** Temperature rating 65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

## ALPHA WIRE

## CONTROL AND INSTRUMENTATION CABLE

### MULTI-CONDUCTOR SHIELDED PLASTIC JACKET

#### PER MIL-W-16878D

**DESCRIPTION:** Each conductor stranded tinned copper. Color coded, polyvinylchloride insulation, cabled, mylar wrap. Braided tinned copper shield 90% coverage, chrome gray polyvinylchloride jacket overall.

**CHARACTERISTICS:** Temperature rating - 55°C to +105°C. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

**APPLICATIONS:** Interconnecting cables for electronic equipment, instrumentation and control cable, telemetry data, remote control of sensitive recording instruments.

## UNSHIELDED STATION CONTROL CABLE

### HEAVY-DUTY MULTI-CONDUCTOR

#### PLASTIC JACKET—600 VOLTS

**DESCRIPTION:** Each conductor, stranded bare copper, .020" polyethylene insulation, .010" polyvinylchloride jacket over each conductor, color coded, cabled with fillers where necessary, moisture resistant tape, black polyvinylchloride jacket overall. 600 volt operating voltage.

**APPLICATIONS:** Remote control of automatic electrical equipment, recording and relaying devices, telemetering, switchgear operations and indicators, substation operation, temperature voltage, pressure and motor control, dimensional tolerance on automatic quality control.

### UNSHIELDED CONTROL CABLE

#### HEAVY-DUTY MULTI-CONDUCTOR RUGGED NEOPRENE JACKET—600 VOLTS

DESCRIPTION: Each conductor stranded bare copper, color coded rubber insulation, cabled with fillers where necessary, wrap over conductors, heavy duty black neoprene jacket overall. 600 volt operating voltage.

APPLICATIONS: Remote control of automatic electrical equipment and sub-stations, tele-metering, voltage pressure and motor control, signal transmission. Flexible heavy duty neoprene jacketed cable, recommended for outside installation, cable resists oil, ozone, sunlight, moisture, abrasion and impact.

# Telemetering & Supervisory Shielded Control Cable

**DESCRIPTION:** Each conductor bare solid copper, high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008" aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.  
Double jacketed types, (3903-4060 below) same except for additional inner black polyethylene jacket over binder, and .005" copper shield.

**APPLICATIONS:** Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage pressure, etc. control of multi-circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations.  
Double jacketed types have higher dielectric strength and suited for direct burial installations.

# Shielded Control Cable

### GENERAL PURPOSE MULTI-CONDUCTOR RUBBER INSULATED AND RUBBER JACKET

**DESCRIPTION:** Each conductor, stranded tinned copper, color coded rubber insulation, cabled with fillers where necessary, cotton wrap, braided tinned copper shield, cotton wrap, tough black rubber jacket overall.

**CHARACTERISTICS:** Suggested Operating Temperature: -20°C to +60°C.

**APPLICATIONS:** Cables are extremely flexible for control circuits, video and audio interconnecting cable, broadcast and heavy duty studio use.

# Flat Ribbon Cable

MULTI-CONDUCTOR — PLASTIC INSULATION  
CONDUCTORS PER MIL-W-16878D, Type C

**DESCRIPTION:** Each conductor stranded tinned copper, color coded .016" polyvinylchloride insulation, conductors bonded together to form flat ribbon cable.

**CHARACTERISTICS:** Temperature rating -55°C to +105°C. Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

**APPLICATIONS:** Saves time, weight, and space on circuit connections, interconnecting assemblies and systems, wiring harnesses for racks, sliding drawer and drop panels. Conductors fully color coded and easily separated for neat terminations.

## Shielded Microphone Cable

### PLASTIC JACKET

**DESCRIPTIDN:** 1702-1706: Single conductor, stranded tinned copper, white polyethylene insulation, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

1709-1712: Each conductor stranded tinned copper, color coded polyethylene insulation, cabled with fillers, textile wrap, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

**APPLICATIONS:** 1702-1706: All high impedance microphones, lapel, ribbon, velocity, crystal contact, hi-fi interconnecting cables.

1709-1712: All low impedance microphones—carbon, condenser, dynamic.

**CHARACTERISTICS:** Suggested operating temperature: 20 C to -60°C.

**STANDARD SPDDL PUT-UP:** 100 FT., 250 FT., 500 FT., 1000 FT.

\* Between one conductor and remaining conductors connected to shield.  
† Three strands of tinned copper and four strands of tinned copperweld.

**COLOR CODE OF CONDUCTORS**  
1—White 2—Black

### RUBBER AND NEOPRENE JACKETS

**DESCRIPTIDN:** Each conductor stranded tinned copper, color coded rubber insulation, cotton wrap, braided tinned copper shield, cotton wrap, tough black rubber or neoprene jacket overall.

**APPLICATIONS:** 1248-1449: All high impedance microphone, broadcast and heavy duty studio use, communication and audio systems.

1250-1450 16: All low impedance microphone, broadcast and heavy duty studio use. Can also be used for control circuits, video and audio interconnection cable, and as electronic power cables.

**CHARACTERISTICS:** Suggested operating temperature: 20 C to -60 C.

Rubber jacketed cable suited for standard duty indoor use.

Neoprene jacketed cable suited for heavy duty outdoor use and direct burial. Will resist oil, acid, sunlight, ageing and abrasion.

## Low Capacitance Shielded Microphone Cable

### CELLULAR FOAM POLYETHYLENE INSULATION — PLASTIC JACKET

**DESCRIPTION:** Single conductor, stranded tinned copper, white foam polyethylene insulation, braided tinned copper shield, chrome gray polyvinylchloride jacket.

Two conductors, stranded tinned copper, color coded foam polyethylene insulation, 1 white and 1 black, cabled with fillers, textile wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket.

**CHARACTERISTICS:** Suggested operating temperature: 20°C to -60°C. Low loss foam polyethylene provides lower capacitance and attenuation than standard solid polyethylene microphone cables, thereby increasing the effective length of usable cable without loss of signal.

## E-Z-Strip Lamp Cord

### U.L. APPROVED

**DESCRIPTIDN:** Conductors parallel, stranded extra flexible bare copper, rubber or polyvinylchloride jacket overall. Split in jacket to permit "E-Z" separation.

**APPLICATIONS:** For line cord on radios, lamps, electric clocks, food mixers and other small instruments and appliances.

**CHARACTERISTICS:** Suggested operating temperature: -20°C to +60°C. Suggested operating voltage: 300 volts.

# Shielded Plastic Jacketed Cable

## SPIRAL WRAPPED COPPER SHIELD

**DESCRIPTION:** Each conductor stranded or solid tinned copper, color coded polyvinylchloride insulation, conductors twisted, spiral wrapped copper shield, gray polyvinylchloride jacket overall. Nominal jacket thickness .020".

**CHARACTERISTICS:** Use of spiral shield makes pigtail off extremely simple and fast. Excellent for production line work. Provides close to 100% shielded coverage for audio and RF frequencies. Suggested operating temperature: 20°C to +60°C.

## BRAIDED COPPER SHIELD

**DESCRIPTION:** Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, braided copper shield, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

**CHARACTERISTICS:** A conventional type of braided shield providing approximately 75% coverage is particularly desirable where flexibility is required. The copper shield allows ease of pigtail soldering. Shield construction provides additional cable strength. Operating temperature: -20°C to +60°C. Nominal jacket thickness .020".

**APPLICATIONS:** For public address and sound systems, ideal for recording studios, amateur radio transmitters, shielded power or electronic circuits, wherever an economical shielded cable is required.

# Plastic Intercom Cable

**DESCRIPTION:** Each conductor stranded tinned copper, color coded polyvinylchloride insulation, braided tinned copper shield (See Chart) over one, two, or three conductors, remaining conductors unshielded and paired, chrome polyvinylchloride jacket overall.

**APPLICATIONS:** General wiring from station to station where shielded conductor(s) is essential to eliminate cross talk.  
 1243 Recommended for unbalanced system with remote "break-in."  
 1243/4: Recommended for balanced systems.  
 1243/5: Recommended for coin operated phonographs.  
 1243/P: Recommended for circuits requiring complete isolation.

**CHARACTERISTICS:** Suggested operating temperature: -20°C to +60°C. Suggested operating voltage: 350 volts.

# Shielded Audio & Data Cable

INDIVIDUALLY SHIELDED MULTIPLE PAIRS — PLASTIC JACKET

**DESCRIPTION:** Each conductor, tinned copper, color coded, high density polyethylene, conductors twisted into pairs. 22 gauge tinned copper drain wire. Mylar-supported aluminum foil shield, aluminum facing inward. Chrome Grey PVC jacket overall.

**NEW**

**CHARACTERISTICS:** Mutual conductance between conductors of a pair, 25 pf/ft. Capacitance of a single conductor to shield, 45 pf/ft.

**APPLICATIONS:** For audio, R.F. and pulse applications requiring superior circuit isolation.

# Shielded Plastic Jacketed Cable

MYLAR SUPPORTED ALUMINUM FOIL SHIELD

**DESCRIPTION:** Each conductor stranded tinned copper, color coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire laid parallel, aluminum foil facing outward to provide maximum ground, gray pvc jacket overall.

**CHARACTERISTICS:** Operating temperature: -20°C to +60°C. Operating voltage: 400 volts. Light weight, reduces cable diameter, and provides 100% shield coverage.

# Hi-Fi and Stereo Interconnecting Cable Phono Wire

STRAINED CONDUCTOR

WHITE PLASTIC INSULATION

BRAIDED TINNED COPPER SHIELD

**DESCRIPTION**

1332 and 1200: Single conductor stranded tinned copper, white polyvinylchloride insulation, fine braided tinned copper shield overall.

1201: Same as No. 1200 plus brown cotton braid over shield.

1115 and 1116: Each conductor stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted.

1100-1110: Each conductor stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted with an extra tight lay for flexibility. When shielded the overall shield has been specially designed for extreme limpness so as not to impede the movement of the phono arm when tracking.

**CHARACTERISTICS:** Suggested Operating Temperature: -55 C to +105 C.

**SINGLE CONDUCTOR SHIELDED**

\*Each conductor individually shielded and then twisted.

## Plastic Speaker Cable Colored and Clear Insulation

**DESCRIPTION:** Conductors parallel, stranded bare copper, color coded polyvinylchloride insulation, conductors separate easily when slit apart.

**APPLICATION:** Hi-Fi speaker cable, miniature juke box speaker connection and rear auto speaker extension cable. Clear insulation will blend with interior room decor.

**CHARACTERISTICS:** Suggested Operating Temperature: -20°C to +60°C. Operating Voltage: 300 Volts.

**SERVICE & POWER CORDS**  
U.L. APPROVED

**DESCRIPTION: RUBBER PORTABLE CORDS, TYPE SV, SJ, & S**

Each conductor stranded bare copper, separator, color coded rubber insulation, cabled with fillers, separator, tough black rubber jacket overall.

**NEOPRENE PORTABLE CORDS, TYPE SVO, SJO, & SO**

Each conductor, stranded bare copper, oil resistant polyvinylchloride insulation, cabled with fillers, separator, black neoprene jacket overall. Oil, grease, ozone, acid, moisture resistant.

**YELLOW PORTABLE CORDS, TYPE SVTO, SJTO, & STO**

Each conductor, stranded bare copper, oil resistant polyvinylchloride insulation, cabled with fillers, separator, plastic jacket overall. Resistant to oil, acid, moisture, abrasion resistant, easy to clean.

**CHARACTERISTICS**

& APPLICATIONS: Suggested Operating Temperatures: 20°C to +60°C.

U.L. TYPE	TYPE OF USAGE	VOLTAGE RATING
SV, SVO, SVTO	Light appliances such as fans, mixers, and office equipment.	300V
SJ, SJO, SJTO	Medium appliances, small motors, tools, amplifiers, speakers.	600V
S, SO, STO	Heavy duty equipment, generators, heaters, tools, air-conditioners.	600V

**RETRACTILE COIL CORDS**

**POWER CORDS—NEOPRENE JACKET U.L. APPROVED**

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Long-lasting service is assured with this quality multi-conductor power cord. Each conductor is stranded copper, with rubber insulation, and a rugged weather and oil-resistant neoprene jacket overall.

APPLICATION: Used on electric tools, portable drills, soldering wires, electrical appliances, household appliances, etc. to eliminate loose hanging wires and to prevent wires from tangling and twisting.

CHARACTERISTICS: Suggested operating temperature 20 C to 60 C

\*If all four conductors normally carry current, amp rating is as shown. If one lead is used as a ground, amp rating is the same as 2 and 3 conductor cords.

†A 12' retracted length with a 12' straight lead on each end for easy stripping and termination. Cord extends to approximately 6 feet.

**RETRACTILE TEST LEAD WIRE**

RETRACTED LENGTH 12"—EXTENDED LENGTH 6 FEET

DESCRIPTION: A high grade quality rubber insulation for maximum flex life extruded over a single conductor of extra flexible tinned copper which gives long life to this retractile test lead wire. Available in a 12' retracted length with a 6' straight lead on each end, the cord extends to approximately 6 feet.

**RETRACTILE POWER CORD SETS U.L. APPROVED**

RETRACTED LENGTH 18"—EXTENDED LENGTH 7 1/2 FEET

DESCRIPTION: Coiled power cord with a sturdy molded male plug on one end. On the other end we have removed a portion of the neoprene jacket, exposed the conductors and stripped them for easy termination. Operating voltage, 300 volts.

APPLICATION: Same as power cords, but with a plug on one end

**RETRACTILE COIL CORDS**

**RETRACTILE COMMUNICATION COIL CORDS**

RETRACTED LENGTHS 2 & 4 FEET EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Multi-conductor communication cord manufactured with extra flexible #23 AWG 21/36 tinned soft cadmium copper for maximum flex life. Insulated with rubber for communication circuits of maximum 120 working volts. The overall jacket is a specially compounded cured neoprene jacket giving long life to the retractile cord.

APPLICATION: Used in communication equipment, such as telephone car carriers, mobile radio equipment, ham operations, head sets, citizen band units and radio transmitter to receiver head sets, communication cords eliminate hazards and inconveniences caused by tangled straight cords.

**RETRACTILE COMMUNICATION CORDS (SHIELDED)**

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Same as above, except that shielded conductors are individually shielded with a cadmium copper shield to eliminate external electrical interference. Shield can be pigtailed for direct soldering connections.

APPLICATION: When shielded communication cords are needed.

**MINIATURE RETRACTILE COMMUNICATIONS CORDS**

RETRACTED LENGTH 2 FEET—EXTENDED LENGTH 10 FEET

DESCRIPTION: A small diameter plastic cord with stranded tinned copper conductors for maximum flexibility, insulated and jacketed with polyvinylchloride. Each cord is available in a 2 ft. retracted length with a 6' straight lead on each end and extends to approximately 10 feet.

APPLICATION: For low voltage power and communication equipment where miniaturization is required due to space and weight limitations.

ALPHA NO.	NO. OF CONDS.	SIZE	CONDUCTOR STRAND	AMP. RATING	VOLT. RATING	NOM. COIL O.D.	NOM. CORD O.D.	COLOR CODE OF CONDUCTORS

# Oval Commercial Braid

**DESCRIPTION:** A woven tinned copper braid which is left in the tubular configuration as it leaves the braiding equipment. It is manufactured to a specific inside diameter but because of its extreme flexibility cannot maintain its completely round shape and becomes oval.

# Tinned Copper Tubular Braid To MIL Spec QQ-B-575

**DESCRIPTION:** A woven tinned copper braid which is manufactured completely round as outlined in Mil Spec QQ-B-575. Each strand of the braid is soft drawn tinned copper wire. The braid is self-supporting and maintains its round configuration. The percentage of shielding coverage is 95% or more when placed over a mandrel of an equivalent diameter to the inside braid diameter.

## High Voltage Wire

**DESCRIPTION:** Single conductor, stranded tinned copper, white flame retardant polyethylene insulation. When shielded, braided tinned copper shield overall.

**APPLICATIONS:** Designed for use as high-voltage leads in electronic equipment, especially for cathode ray tubes in television receivers and oscilloscopes. Shielded type used to minimize RF radiation in transmitters, X-ray, and diathermy equipment.

## Test Lead Wire

**DESCRIPTION:** Single conductor, extra flexible stranded tinned soft annealed copper, epoxy resin, color coded rubber insulation, smooth satin finish.

**APPLICATIONS:** As test leads in analyzers, oscillators, multi-meters, and all other types of testing apparatus or wherever an extra flexible insulated wire is required. Heavy Duty type designed for television, therapeutic equipment, analyzers, oscillators, etc.

Suggested Operating Temperature: 20°C to -60°C.

## Antenna-Aerial Wire

**APPLICATIONS** Recommended especially for ship, short-wave and transmitter antennas where 1159-1164: high tensile strength and corrosion resistance is required.

**APPLICATIONS** For short wave and transmitter antennas. Suitable for commercial and 136 and 112: amateur use. Easy to install, no "backlash."

# CATV Foam 75 OHM Triaxial Feeder Cable

**DOUBLE SHIELD — DOUBLE JACKET — FOAM RG 11/U TYPE**

This cable has been specially designed for use as a secondary distribution lead-in cable for community antenna television systems.

The double shield construction provides maximum attenuation of radiated signals and allows for a minimum of cross-cable interference and pickup.

Cable construction consists of a solid bare copper conductor, foamed polyethylene dielectric, braided copper shield, covered by an inner polyethylene jacket, and a second braided copper shield with a polyethylene jacket overall.

The outer jacket offers high resistance to sunlight, weathering, and resists attack by acid, alkalis, oil, and grease.

CABLE IS 100% SWEEP TESTED

STANDARD PUT-UP: 100 FT., 500 FT., 1000 FT.—INQUIRE RE LARGER PUT-UPS

# CATV Foam 75 OHM Coaxial Feeder Cable

**SINGLE SHIELD — SINGLE JACKET — FOAM RG 11/U TYPE**

A high quality foam core feeder cable with non-peaking attenuation characteristics. This foam core cable is widely used as secondary distribution lead-in cable. Cable has a solid bare copper conductor, foam polyethylene dielectric, braided copper shield with a weather proof polyethylene jacket overall. A tough, long lasting cable that is relatively light weight, flexible and easy to install.

CABLE IS 100% SWEEP TESTED

STANDARD PUT-UP: 100 FT., 500 FT., 1000 FT.—INQUIRE RE LARGER PUT-UPS

# CATV Foam 75 OHM Drop Cable

**FOAM RG 59/U TYPE — WITH AND WITHOUT MESSENGER**

A low-loss, light weight cable with wide use as subscriber tap-off lead-in cable. Cable contains a bare copper conductor, foam polyethylene dielectric, braided copper shield with a black polyethylene jacket overall. Jacket withstands effect of weathering and sunlight and is resistant to attack by acid, alkali, oil, and grease.

Alpha No. 9606M has, in addition, a built-in #14 gauge steel wire messenger in a "figure eight" construction.

CABLE IS 100% SWEEP TESTED

# 75 OHM Foam TV and FM Coaxial Cable

## FOAM RG 59/U TYPE LOW LOSS—MAXIMUM SIGNAL STRENGTH

Foam core coaxial cable delivers maximum low-loss performance for any TV or FM antenna system. This cable, while providing superior signal for black and white TV, is especially recommended for color TV installations.

Coaxial cable maintains a constant impedance match, eliminates ghosts and color smears, will not pick up interference and gives optimum signal in all types of weather.

The cable contains a solid bare copper conductor, foam polyethylene insulation, braided copper shield and a heavy duty black polyethylene jacket.

# 75 OHM Solid Core TV and FM Coaxial Cable

## RG 59/U TYPE MAXIMUM SIGNAL STRENGTH — EXTENDED OPERATING LIFE

Coaxial cable is recommended by many leading antenna manufacturers for optimum black and white and color reception. Ghosts, color smears, and noise are eliminated by use of coaxial cable and effective operating life is many times that of ordinary flat line wire. Many TV sets and antennas are now manufactured for use with 75 ohm cable and inexpensive matching transformers may be used in older sets designed for 300 ohm line.

Construction consists of a copper coated steel conductor, polyethylene dielectric, braided copper shield and a grey or black PVC jacket overall.

<b>Alpha No.</b>	<b>9659</b>	<b>Shield O. D.</b>	.171"

# 50 OHM Amateur Radio and CB Coaxial Cables

## FOAM RG 8/U TYPE — SOLID RG 58/U TYPE

Signal loss between transmitter and antenna is minimized by the use of these specially designed coaxial cable types. In addition, the ability of these cables to shield out stray radiation fields makes them the preferred broadcast transmission cables.

Foam core cable consists of a stranded bare copper conductor, foam polyethylene dielectric, braided copper shield, and a black PVC jacket.

The solid core cable contains a solid bare copper conductor, solid polyethylene dielectric braided copper shield with a black PVC jacket overall.

Jackets resist effects of weathering and sunlight and heavy abrasion.

# ALPHLEX® ZIPPER TUBING

**DESCRIPTION** Alphlex Zipper Tubing is the all purpose modern way to harness, cover and protect cables. Just zip to close — and zip to reopen. If you wish, it may be permanently sealed with PB 200 Special Compound Liquid Sealer. Alphlex Zipper Tubing is strong, flexible, durable, and offers new freedom in design, production and repair.

**APPLICATIONS** To shield, to harness wire, to custom-cable to any length, to enclose, to encase, to identify (such as cable markers), to protect, to replace worn jackets.

TYPES OF ZIPPER TUBING

# Alphlex® Polyvinylchloride Plastic Tubing (PVC-105)

CONFORMS TO MIL-I-631D †

**DESCRIPTION:** The superior mechanical, thermal, and electrical properties of Alphlex PVC-105, coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of Alphlex PVC-105 is its high degree of flexibility, which is maintained even under severe environmental conditions.

Rated for temperatures as high as 105°C, PVC-105 has a high dielectric strength that remains unaffected by increasing temperature throughout its range. PVC-105 maintains a high resistance to the agents of heat, oil, chemical corrosion and fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

Alphlex PVC-105 is compounded with first quality, non-migratory resinous type plasticizers. Carefully selected stabilizers and modifiers added in the manufacturing process, counteract chemical and environmental degradation. Under adverse conditions Alphlex PVC-105 retains its flexibility which permits it to cling to and protect irregular shapes. An unusually simple to handle insulating material, PVC-105 "snakes" well under all environmental conditions.

**APPLICATIONS:** Designed and manufactured for general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary.

# Alphlex® Teflon Extruded Tubing

CONFORMS TO MIL-I-22129B

**DESCRIPTION:** Alphlex Teflon Tubing is unmatched by any other type of tubing for use in electrical applications at high frequencies and temperatures. Teflon is rated for continuous operation at 250°C, and retains an exceptional toughness and its flexibility throughout its temperature range.

Alphlex Teflon Tubing has the further advantage of a high degree of resistance to flexural fatigue and repetitive stresses; coefficient of friction lower than that of any other known solid; and a dielectric constant and power factor lower than that of any other known solid. This tubing will not crack or become brittle during aging.

Because of its resistance to soldering iron temperature, Alphlex Teflon Tubing will not shrink back during the soldering process. Alphlex Teflon Tubing will not melt and flow as do conventional thermoplastic materials. At high frequencies, its dielectric strength is many times that of other insulating materials.

Alphlex Teflon Tubing is chemically inert, has zero moisture absorption and its insulation resistance properties are unaffected by heat aging or temperature use up to 250°C.

**APPLICATIONS:** A thin flexible insulation, Alphlex Teflon Tubing permits a miniaturization and compactness of design never before possible. Invaluable in any application where a high heat resistant, flexible, non-flammable, chemical solvent and corrosion-resistant material is required.

# Irradiated Polyolefin Tubing

## NEW ALL-PURPOSE SHRINKABLE TUBING — FIT-221

- SHRINKS 50% (2:1 RATIO) WITH ONLY 5% LONGITUDINAL SHRINKAGE
- FEWER SIZES COVERING MORE APPLICATIONS
- AVAILABLE TO MEET U.L. SPECIFICATIONS
- MEETS MIL-1-23053A (WEP)
- AMS SPECIFICATIONS 3636A (COLOR), 3637 (CLEAR)

**DESCRIPTION:** Alphlex FIT-221 Shrinkable Tubing, when heated, forms a tight-mechanical bond, even over irregularly shaped materials. FIT-221 is available in a range of colors and in clear.

FIT-221 is an all-purpose polyolefin extruded tubing that is simple to use and provides a tight mechanical bond. FIT-221 is an irradiated, thermally stable, modified polyolefin base product. FIT-221 Clear may be used so that jacketed, printed components or cable data is clearly visible and inspection of insulated components, cables or terminations is simplified.

The tubing is supplied in an expanded form and easily slips over the object to be covered. When a temperature of approximately 275°F (135°C) is applied, it immediately returns to its predetermined size (approximately one-half smaller) and forms a permanent tight-fitting mechanical bond. FIT-221 Tubing will not cold-flow or melt but retains form stability

throughout its temperature range. No radioactivity exists in or on the material and it will not emit radiation. Longitudinal shrinkage is 5% maximum when completely recovered.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 225°F to 255°F. Shrinkage will begin at 235°F, but at a somewhat slower rate. When using an oven, temperature may range from 235°F to 300°F. Prolonged exposure to these temperatures will not affect the physical or electrical properties of FIT-221 Shrinkable Tubing. FIT-221 Clear Tubing remains transparent over its entire operating range of -55°C to 135°C.

**FLAMMABILITY:** Although FIT-221 Clear is a high temperature material, it is flammable and will burn. However, when the tubing is shrunk over non-flammable or flame-resistant components, such as connectors, terminals and wire, the entire assembly will not support combustion.

# Irradiated Polyvinylchloride Tubing FIT-105

All Types of FIT Tubing are available from stock and may be cut and/or marked to your specifications.

**HIGHLY FLEXIBLE — IDEAL FOR CABLE JACKETING**

**Conforms to MIL-1-631D, Type F, Form U, Grade C, Class 1, Cat. 1**

**SHRINKAGE RATIO 2:1 (50% Shrinkage)**

**DESCRIPTION:** Alphlex FIT-105 is an easy-to-use modified polyvinylchloride that provides a snug, extremely flexible insulation.

Because of its flexibility, strength and its ability to shrink 50% on application of heat, FIT-105 is ideally suited for insulating components and cables with a wide variation in shape and diameter.

Because of the 50% expanded diameter of FIT-105 Tubing, it is an extremely useful cable jacketing material. Cable cores may be pulled through FIT-105 Tubing with comparative ease and shrunk down to form a jacket with all the qualities of the finest extruded plastic jackets.

The tubing is supplied in expanded form and in continuous lengths. When a temperature of approximately 347°F (175°C) is applied, Alphlex FIT-105 Tubing immediately returns to its predetermined size (approximately 50% smaller), and forms a permanent, tight-fitting mechanical bond. FIT-105 Tubing will not cold-flow or melt but retains form stability within its temperature range. No radioactivity exists in or on the material and it will not emit radiation. Longitudinal shrinkage is less than 10%.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 325°F, or above. When using an oven, temperature may range from 325°F to 350°F.

# Irradiated Kynar\* Tubing

## FIT-350

### HIGH TEMPERATURE TUBING

A tough, thin wall tubing with outstanding cut-through and abrasion resistance. Semi-rigid polyvinylidene fluoride.

10 sizes cover complete range of .032 — 1 inch

Clear and non-flammable

**SHRINKAGE RATIO 2:1 (50% Shrinkage)**

**DESCRIPTION:** Alphalex FIT-350 is a new shrinkable tubing with outstanding temperature and physical characteristics and high dielectric strength. Longitudinal shrinkage is only 5%.

FIT-350 is an extremely tough extruded tubing that can be repeatedly flexed, bent, or twisted without loss of its mechanical or electrical strength. Supplied as a clear tubing, FIT-350 may be used where inspection or identification of the item covered is necessary.

When a temperature of approximately 347°F. (175°C.) is applied, the tubing immediately returns to its predetermined size (approximately one-half smaller) and forms a permanent, tough mechanical bond.

FIT-350 will never cold flow or melt and will not split when shrunk over sharp or irregularly shaped objects.

FIT-350 is non-flammable and will operate continuously at temperatures from -55°C to +175°C. It will withstand intermittent heat shock at temperatures up to 350°C.

Compared with other fluorocarbon tubing types, FIT-350 has markedly superior abrasion, cut-through, and cold flow properties.

**SHRINKING METHODS:** The use of a hot air gun (Alpha HG-1) is recommended as being generally the easiest heating method. However, excellent results may be achieved by the use of an oven, radiant heat, dipping in hot liquids, or heating with a soldering iron, burner, or even the flame of a match.

NEW

All FIT-350 Tubing available from stock and may be cut and/or marked to your specifications.

\* New Item † New Put-Up ‡ Specify Color

ALL SPOOLS ARE ONE PIECE EXACT LENGTH. (EXCEPT SPOOLS WITH (\*) FOOTNOTE)

• Spools may contain more than one piece, minimum length of any one piece is 25 ft.

When priced per M ft. length may vary  $\pm 10\%$  from length shown; all other lengths are exact.

§ Cut to Customer's Specified Length subject to available stock lengths—minimum length 25'; 25' to 199', plus 25', minus 0; 200' or over, plus 50', minus 0.

▲ (Teflon Hook-up Wire) Prices apply to any striped color combination in quantities of 1000' or more. Minimum order 1000' per stripe color combination on 500' and 1000' spools only. Stripping adders do not apply to braided tracers—Write for prices on non-stock tracer colors.

¶ (Vinyl Hook-up Wire) Prices apply to standard stock colors as listed in our current catalog and to non-stock striped colors over stock solid colors in quantities of 10,000' or more. Non-stock striped colors over stock solid colors in quantities of 1000' to 9999'; add pro-rata set-up charge of \$4.50 per color combination. Minimum order 1000' per special stripe combination. Special stripe colors in any quantity will be subject to 2 piece put-up and plus or minus 10% per spool.

# The Beldfoil ISO-Shield Story

Much of today's miniaturized, high-gain electronic equipment calls for small diameter cables that are lightweight, flexible and has total electrostatic shielding.

Wire braid and serve type shields have a practical range up to 97 percent maximum coverage. While they provide sufficient electrostatic shielding for many applications, they do not furnish the full-coverage shielding required by many high-gain electronic systems.

Beldfoil ISO-Shield provides 100 percent coverage and adds greater effectiveness to all major shielding functions: excluding external signals, confining the transmitted signal and minimizing crosstalk.

Beldfoil ISO-Shield uses a thin layer of aluminum bonded to a polyester film. The aluminum provides the necessary electrostatic shielding while the polyester film adds a bonus insulation and increased mechanical strength. The 100% shielding is accomplished by an exclusive

method of folding back both edges of the tape in such a way as to provide metal-to-metal contact between adjacent wraps, thus providing the same shielding effect as a continuous aluminum tube. As a direct result of using this thin layer of aluminum-polyester shielding, Beldfoil ISO-Shield is lightweight, flexible and small in diameter. Depending on the cable type the polyester film may be used to increase the dielectric strength between the conductors and the shield, or to provide insulation between adjacent shields.

Applications for Beldfoil ISO-Shield range from a single conductor audio and sound cable to complex multi-conductor multi-shield cables. They include cables for data processing systems, telemetering equipment, strain gauge applications, hi-fi systems, instrumentation, TV cameras and receivers, microphones and communications equipment plus many special constructions for both military and commercial use.

## FOREWORD

The purpose of this catalog is to make the selection, purchase and overall usage of Belden Electronic Wire and Cable products easier for you, the customer.

Many of the products listed in this catalog have enjoyed wide acceptance over the years. Some of the newer items are on the way to earning their own reputations for excellence and reliability in the field. They are the recent products of Belden's product development engineering group which starts with the electrical, physical and thermal needs of the applications. Working from the ground up they design and develop a wire, cable or cord that will meet or exceed these requirements.

## INNOVATIONS

Over the years, Belden has pioneered the development of a number of significant design breakthroughs and new engineering techniques which have provided remarkable new products to meet the challenging and ever-changing technology.

Whatever your specialized problems . . . whatever your needs for wire and cable, you can count on Belden's experienced design and engineering talents and resources to help you develop the best solutions to your wire and cable application problems.

Belden is constantly reviewing new materials, insulations, compounds and shielding applications to develop products to satisfy customer's needs.

## TESTING

Belden's products must meet the highest standards of quality control in the industry. High-performance test equipment can simulate practically every known environmental or electrical condition to assure positive, reliable ratings for the most trouble-free operation under known and predictable conditions. Belden's rigid test program assures consistent product reliability from design through packaging.

## MANUFACTURING

Belden designs and builds much of its own specialized manufacturing equipment. To the customer, this means only one thing: scrupulous and uncompromising supervision of the entire manufacturing process that starts with the equipment used to make the product and assures complete, beginning to end, manufacturing integrity.

## SALES ENGINEERING

The total experience and capability of Belden's engineering department is available to you at any time to assist in specifying or developing wiring products that can provide the best and most practical solutions to your specific application requirements.

## NEW ITEMS

### NEW: 8477 UNSHIELDED CABLE

A flexible 12 AWG 2 conductor unshielded cable designed to meet heavy duty application requirements in the areas of instrumentation, sound installation and communications. Cable is suitable for direct burial and may be used as a primary wire or speaker lead for low impedance sound systems.

*Available in 500 and 1000 ft. put-ups.*

**See Page 14 for Further Technical Information.**

### NEW: 8619 CONTROL AND AUDIO CABLE

A new addition to our complete coverage of multi-conductor control and audio cables.

Specially designed for sound system installations, control wiring and remote control equipment. Construction is 18 AWG, 19 conductors with a tough outer jacket suitable for direct burial. Because it has a comparatively small diameter, it may also be pulled in conduit. Meets IPCEA color code requirements.

*Available in 500 and 1000 ft. put-ups.*

**See Page 15 for Further Technical Information.**

# Belden

new items

### NEW: 8479 PORTABLE CORDAGE

A 14 AWG 3 conductor portable cordage, designed for extra flexible service in many higher amperage applications.

Available in 100 and 250 ft. put-ups.

See Page 22 for Further Technical Information.

### NEW: 8489 COMMUNICATIONS CABLE

Designed to be used for longer runs, up to 180 feet, of rotor control cable. May also be used as control and audio cable. Features 4 conductors for heavy duty use. 18 AWG construction permits control over greater distances.

Available in 100, 250, 500 and 1000 ft. put-ups.

See Page 15 and Page 21 for Further Technical Information.

### NEW: 8866 HIGH VOLTAGE CABLE

An economical, small diameter 40 KVDC cable designed for use in the manufacture and repair of cathode ray tube leads used in color TV sets and oscilloscopes. Features a complete bond between the conductor and polyethylene insulation for longer service life. Has a breakdown voltage greater than 80 KVDC.

Available in 25, 100 and 500 ft. put-ups.

See Page 27 for Further Technical Information.

### NEW: 8221 TV DISTRIBUTION CABLE

An excellent all-around cable engineered to meet the multiple requirements of master antenna and closed circuit TV systems; indoor/outdoor applications and as a CATV drop wire. Cable features a flexible all-weather vinyl jacket available in black, white or gray. Easily installed with standard RG 59/U connectors.

Available in 100, 500 and 1000 ft. put-ups.

See Page 26 for Further Technical Information.

### NEW: 8643 INSTRUMENTATION CABLE

A miniature 30 AWG 3 conductor shielded cable. Strong and flexible for use with low level signals in medical and other instruments. Also recommended for use as a small microphone cable. Ultra-small O.D. measures only .086". Specially designed with added member for increased tensile strength. Features 105°C vinyl jacket. Suitable for steam autoclaving.

Available in 25, 50, 100 and 250 ft. put-ups.

See Page 8 for Further Technical Information.

**NEW: 8728 STRAIN GAUGE CABLE**

Introduced to meet application requirements for a shielded cable with two pairs of conductors. The shielding provides maximum electrostatic isolation from each other. Designed for use in instrumentation, strain gauge and in audio and data transmission equipment electronics. Features 100% Beldfoil ISO-Shield coverage and a very hard insulation with a low dielectric constant and a good capacitance rating. Conductors 22 AWG.

Available in 500 and 1000 ft. put-ups.

See Page 9 for Further Technical Information.

**NEW: 8730 COMMUNICATIONS CABLE**

Specially designed to reduce feedback problems in high level, low impedance intercom systems such as paging circuit equipment. Recommended for use in audio and sound applications that require shielded cable. Separate axis construction provides excellent freedom from magnetic coupling (feedback) between pairs. Conductors 22 AWG.

Available in 500 and 1000 ft. put-ups.

See Page 9 for Further Technical Information.

**NEW: 8393 INSTRUMENTATION CABLE**

This high-temperature 20 AWG instrumentation cable features a FEP teflon insulation and silicone rubber jacket which qualifies it for operating application requirements up to 150°C. It is recommended for instrumentation use and for applications requiring excellent electrical and physical properties or high or low temperatures and resistance to chemicals. Yellow color provides high visibility and easy identification.

Available in 25, 100 and 500 ft. put-ups.

See Page 8 and 41 for Further Technical Information.

**NEW: 8618 INSTRUMENTATION CABLE**

A highly effective 16 AWG 3 conductor shielded cable suitable for a variety of instrumentation, and communications cable applications. Especially engineered and shielded for high current installations at both audio and radio frequencies.

Available in 500 and 1000 ft. put-ups.

See Page 8 for Further Technical Information.

**NEW: 8718 COMMUNICATIONS CABLE**

This cable has been designed to fill the need for a high-current, low-loss Beldfoil shielded pair. It is recommended for use in the fields of instrumentation and in audio applications. Its total shielding, large current-carrying ability and low loss characteristics make it especially suitable for use in high power sound systems where shielded speaker lines are required and in applications requiring very long runs of cable. Conductors 12 AWG.

Available in 500 and 1000 ft. put-ups.

See Page 7 for Further Technical Information.

•Belden U.S. Patent 3,032,604.

# Belden new items

**NEW: 8871 HIGH VOLTAGE CABLE**

A higher voltage cable designed for use by R & D organizations and by power companies in special applications. Recommended for steady state DC voltages and for pulse discharge systems. Excellent bonding between conductive material and insulation assures good strength for long wear and service life. Features a 200 KVDC rating for an ambient 25 °C temperature.

*Available in 25 and 100 ft. put-ups.*

**See Page 27 for Further Technical Information.**

**NEW: 8402 MICROPHONE CABLE**

This flexible brown Hypalon\* jacket microphone cable has been especially designed and constructed for use in studio applications. In addition to having excellent general physical and electrical characteristics, this cable is highly resistant to heat, impact and abrasion. Its resistance to sunlight, ozone, water, oil and chemicals makes it suitable for outdoor use. Brown color blends readily into a variety of backgrounds.

*Available in 100, 250 and 500 ft. put-ups.*

**See Page 16 for Further Technical Information.**

**NEW: 8408 MICROPHONE CABLE**

Belden adds this larger, heavy-duty 16 AWG 2 conductor microphone cable to its line to meet the demand for a larger, 2 conductor, brown Hypalon jacket, shielded cable. Recommended for use in the instrumentation field, as a microphone cable and shielded power supply cord. It features excellent limpness qualities and small diameter for microphone and shielded power supply applications.

*Available in 100, 250 and 500 ft. put-ups.*

**See Page 16 for Further Technical Information.**

**NEW: 8816 HOOK-UP WIRE KIT**

Versatile 18 AWG wire comes in a portable rack dispenser. Designed for ease and portability in handling small hook-up jobs by servicemen, engineers and hobbyists in home, field or R & D. Kit contains an assortment of 18 gauge stranded, vinyl wire in a portable metal rack dispenser that can be mounted on workbench or wall. Wire meets MIL-W-76 standard.

*Available in kits containing 8-25 ft. spools of wire.*

**See Page 18 for Further Technical Information.**

**NEW: 8605**

This tough, durable coiled cord is highly recommended for electronic guitar and for selected instrumentation applications. Heavy-duty polypropylene gray vinyl insulated cord extends to 12-ft. length and features superior electrical characteristics as well as excellent abrasion and heat resistance.

*Available in merchandiser package.*

**See Page 17 for Further Technical Information.**

shielded sound and broadcast audio cables

**Belden**

**COMMUNICATIONS CABLE**

Belden offers a complete line of Communications Cables to provide customers with the best all-around cable for every application requirement. Cables are available in a wide range of sizes, dimensions, shielding constructions and types of insulation. All Communications Cables are designed to protect the desired signal by eliminating or minimizing the interference of hum, noise and crosstalk.

**SHIELDING:** Because it affords such excellent protection, Beldfoil ISO-Shield is now being specified for many critical applications such as instrumentation systems, tracking station equipment, computer and data processing systems, audio, sound, strain gauge and control cables.

No other type of shield on the market surpasses Beldfoil Shield for full coverage and protection against radiation and penetration at audio and radio frequencies. Beldfoil's unique polyester-aluminum shielding provides 100% coverage.

Braided Copper Shields have high tensile strength and are very effective at audio and radio frequencies in flexing applications. Served Copper Shields usually provide more coverage than Braided Copper Shields; they're also easier to terminate. Both Braided and Served Copper Shields are recommended at audio frequencies.

**INSULATIONS:** Belden's Communications Cables are available in a variety of insulation materials, each having its own advantages depending upon the size requirements, environmental and electrical conditions dictated by the application.

Vinyl insulation resists flame, most solvents, oil, ozone and sunlight. It has a higher dielectric constant and capacitance than polyethylene. Therefore it is recommended for audio frequency applications. It is easy to strip.

Polyethylene insulation is lightweight and resists ozone. It has a low dielectric constant for low capacitance and provides low electrical loss and is recommended for audio and radio frequency applications. Like vinyl, polyethylene is easy to strip.

Polypropylene insulation provides excellent heat and abrasion resistance. It has a low dielectric constant with equally low capacitance. It is less flexible than polyethylene. Because it has excellent dielectric strength and mechanical ruggedness, polypropylene insulations are widely used for miniaturization applications. Even with low overall diameters, they permit very low loss. Recommended for audio and radio frequencies.

**INSTRUMENTATION CABLES**

Instrumentation cable provides the vital communications link between sensing devices and read-out equipment. Because of the many and diverse conditions of environment and stress under which instrumentation cables must transmit information — in usable form, without distortion or change — cable characteristics should always be carefully matched with the specific requirements of the particular application.

The scientific, medical and industrial uses of instrumentation cable are vast and ever growing. Some of the

common uses for instrumentation cable are such things as measuring pressure, speed, resistance and temperature.

Belden manufactures a wide variety of precision instrumentation wire using several types of insulating materials for conductors and shields to meet a wide variety of electrical, physical and thermal requirements.

Many Belden Instrumentation Cables are unique in the field and have been engineered for specific application problems.

audio cable selection guide

SPECIAL AUDIO AND COMMUNICATION CABLES

Description	Trade Number	No. of Cond.	AWG & (Stranding)	Cond. Color Coding	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O.D. (Inch)	Percent Shield Coverage	Suggested Working Voltage	Nom. <sup>a</sup> Cap. (mmf ft)	Nom. <sup>b</sup> Cap. (mmf ft)	Standard Spool Lengths in ft
	<b>8784</b>	10 un-shielded	2-16 (26x30) 1-20 (10x30) 7-22 (7x30)	Blk, Wht Gray Red, Grn, Org, Yel, Blu, Purple Brown	.016 .018 .013	.040	.295	—	300	—	—	500
<i>Tinned copper, vinyl insulated, conductors cabled, chrome vinyl jacket.</i>												
	<b>8640</b>	2	26 (Solid) 1 Pair	Red, Clear	.002	.020	.089	100	100	80	140	250, 500
	<b>8642</b>	6	26 (Solid) 3 Pair	Red, Clear	.002	.025	.140	100	100	80	140	250, 500

Solid copper, BELDSOL<sup>®</sup> (solderable—no stripping required), BELDFOIL aluminum-polyester shield on each pair, red, brown, orange textile marker and isolating polyester tape for each pair on 8642, Copperweld ground drain wire, WHITE vinyl jacket.

Ideal for instrumentation and audio console work where subminiaturization is required.  
105° C maximum operating temperature.

<sup>a</sup>Capacitance between conductors.  
<sup>b</sup>Capacitance between 1 conductor and other conductor connected to shield.

AUDIO CABLE SELECTION GUIDE

The length of cable run for a given wire size can be doubled if twice the power loss can be tolerated in the cable.

The next smaller size can be used when twice the power loss can be tolerated in the cable and the length of cable run remains the same.

To use this chart for constant voltage systems, determine the load impedance using Step 1 below. If this impedance does not appear on the chart, use Step 2 to determine the maximum length of cable run for each wire size.

The choice of appropriate audio cables for runs of varying distances depends on many factors such as amplifier voltage output and power level as well as load impedances and the percent of power loss which can be tolerated. For this reason it is not practical to provide a general chart showing the recommended wire size for all conditions. The chart shows the maximum recommended cable runs for various wire sizes selected for commonly encountered load impedances.

Wire Size (AWG)	Maximum Length of Cable Run (Ft.)					
	Low Impedance— 10% Power Loss			High Impedance— 5% Power Loss		
	4 OHM	8 OHM	16 OHM	100 OHM	250 OHM	500 OHM
14	88	176	352	1045	2610	5220
16	55	110	220	630	1574	3150
18	35	70	140	410	1020	2050
20	22	44	88	262	655	1310
22	13	26	52	164	410	820
24	8	16	32	105	262	525

<b>STEP ONE</b>	$Z \text{ (Load Impedance)} = \frac{E^2 \text{ (Voltage} \times \text{Voltage)}}{P \text{ (Watts)}}$
<b>STEP TWO</b>	$\text{Ft. (Max.)} = \frac{\text{Ft. (chart)} \times Z \text{ (Load Impedance)}}{Z \text{ (chart)}}$
<b>FOR EXAMPLE</b>	<p>Find maximum length of run for #20 AWG pair in a 70 volt, 25 watt system.</p> <p>1. <math>Z = \frac{70 \times 70}{25} = 196 \text{ Ohms}</math>      2. <math>\text{Ft. (max.)} = \frac{262 \times 196}{100} = 513 \text{ feet}</math></p>

BELDFOIL®

\*22 tinned copper, vinyl insulated, cabled in pairs, each pair and its ground wire under BELDFOIL® aluminum-polyester shield, over-all chrome vinyl jacket. 300 Volts suggested working voltage.

Insulation resistance between shields ..... 100 megohms/M'  
 Capacitance between adjacent shields ..... 115 mmf/ft  
 Voltage breakdown between adjacent shields ..... 1500 volts  
 Working voltage between adjacent shields ..... 50 volts

Vinyl insulation is used for ease of stripping and soldering. Recommended for audio frequency applications requiring excellent circuit isolation. Maximum operating temperature 80°C.

## MULTIPLE PAIR INDIVIDUALLY SHIELDED AUDIO AND DATA CABLES

Description	Trade Number	No. of Pairs	Stranding	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O.D. (Inch)	Nom. *Cap. (mmf ft)	Nom. **Cap. (mmf ft)	Standard Spool Lengths in ft
 <p>22 GAUGE POLYPROPYLENE INSULATION</p>	8777*	3	(7x30)	.010	.030	.270	30	55	100, 250, 500, 1000

	8776*	15	(7x30)	.010	.045	.540	30	55	100, 250, 500, 1000
	8769*	19	(7x30)	.010	.055	.620	30	55	100, 250, 500, 1000
	8773*	27	(7x30)	.010	.070	.760	30	55	§Cut to customer's specified length. Maximum length 1000

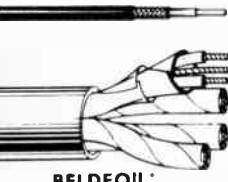

BELDFOIL®

\*22 gauge tinned copper, polypropylene insulated, cabled in pairs, each pair and its ground wire under BELDFOIL® aluminum-polyester shield, over-all chrome vinyl jacket. 300 volts suggested working voltage.

Insulation resistance between shields ..... 100 megohms/M'  
 Capacitance between adjacent shields ..... 115 mmf/ft  
 Voltage breakdown between adjacent shields ..... 1500 volts  
 Working voltage between adjacent shields ..... 50 volts

Recommended for audio, pulse, and radio frequency applications requiring superior circuit isolation. Polypropylene insulation is used for excellent high frequency properties and mechanical toughness. Maximum operating temperature 105°C.

## SPECIAL INSTRUMENTATION CABLES

Description	Trade Number	AWG & (Stranding)	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O.D. (Inch)	Cond. Color Coding	Percent Shield Coverage	Nom. *Cap. (mmf ft)	Nom. **Cap. (mmf ft)	Suggested Working Voltage	Standard Spool Lengths in ft

Tinned copper conductors, polypropylene insulated, four groups of two conductors with #22 AWG drain wire. Each group individually BELDFOIL® shielded with polyester tape wrap, chrome vinyl jacket. 105°C Maximum operating temperature.

\*Capacitance between conductors.  
 \*\*Capacitance between 1 conductor and other conductor connected to shield.

§Minimum length 25'  
 †25' to 199', plus 25', minus 0.  
 ‡200' or over, plus 50', minus 0.

†Cabled around common axis request information before planning high and low level circuits in same cable.

‡Color code is Western Regional Strain Gauge Committee.

\*Belden U.S. Patent 3,032,604.

BELDEN PAGE 12

## unshielded paired sound cables

### MULTIPLE PAIR UNSHIELDED SOUND CABLES

TYPICAL APPLICATIONS: Balanced line sound systems.

Made with 80°C vinyl plastic compounds for high dielectric strength and the best physical properties, such as free stripping, small

diameter, and tear resistance. It also resists the effects of water, sun, oil, grease, and ozone. The conductors are paired with a short-lay twist for conductor balance, providing a quiet circuit, free from cross talk.

1 to 27 Pairs	Trade Number	No. of Pairs	AWG & Stranding	Insulation Thickness (Inch)	Jacket Thickness (Inch)	Nom. O D (Inch)	Suggested Working Voltage	Standard Spool Lengths in ft

# Belden microphone and shielded power supply cables

## MICROPHONE CABLES

Belden Microphone Cables are designed for flexible service at audio frequencies. They are used not only for microphones, but also for home entertainment equipment, instruments, tape recorders and shielded power supplies.

Shielded single conductor cables are used in high impedance systems, while multiple conductor cables are used in

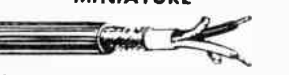

low impedance applications.

All cables are precision-engineered and manufactured to transmit clear signals and to cancel out hum pick-up and crosstalk interference. They are designed to withstand the flexing and normal abuse of studio, laboratory and home usage.

## RUBBER, HYPALON AND NEOPRENE MICROPHONE AND SHIELDED POWER SUPPLY CABLES

Tinned copper, polyethylene insulated, cabled, rayon braid, tinned copper braid shield, chrome vinyl jacket.												

### RUBBER—HYPALON—NEOPRENE—PLASTIC

See page 17 for conductor color coding

▲See 8421 Page 22 for spiral wrapped shield version of 8401—Recommended for Hi-Fi use.

\*Capacitance between conductors.

\*\*Capacitance between 1 conductor and remaining conductors (if any) connected to shield.

PLASTIC CABLES RECOMMENDED FOR: Lower capacitance, lower loss, greater ozone and oil resistance, lighter weight, smaller diameter.

RUBBER CABLES RECOMMENDED FOR: Greater abrasion and impact resistance, and extra limpness so cable will lie flat on stage or studio floor.

NEOPRENE AND HYPALON CABLES RECOMMENDED FOR: Outside use, cold weather applications. Resistant to effects of sun, oil, and ozone.

## retractile (coiled) cables and cords

### COILED CORDS

Retractile cords keep telephone and microphone cables from tangling and cluttering desk tops, communications consoles and the front seats of motor vehicles. Belden manufactures a full line of high quality retractile coiled cord products for a wide variety of applications.

Belden retractile cables and cords are used for telephone equipment; ham and citizen band radios; hand and

desktop microphones; language lab equipment; musical instruments; mobile controls and mobile communications equipment and for a variety of assorted industrial applications.

The specially designed conductors and shields of Belden retractile cords are constructed to withstand rugged use and to minimize replacement frequency.

### RETRACTILE (COILED) MICROPHONE CABLES

### SINGLE BELDSOL® Solderable

BELDSOL Magnet Wire is a dual film insulated Magnet Wire that combines the excellent dielectric characteristics of Polyurethane and the known toughness and solvent resistance offered by an overcoat of nylon. This wire is rated by IEEE tests for 130°C usage and will solder without insulation removal at 750°F. Complies with Mil-W-583 specification.

Presenting Belden's

# COLOR TWINS

Now, there's a Belden quality TV antenna wire just right for color and UHF TV reception in both congested and uncongested areas.

With today's strong emphasis on quality UHF and color TV programming and equipment, the importance of the transmission line connecting the outdoor antenna and TV receiver is critical. Until recently, there's been a big quality gap — a missing link — between the best engi-

neered color TV sets and the finest TV antennas.

Belden's Color Twins were specially engineered to provide color and black/white, UHF and VHF TV reception in congested close-in areas and uncongested fringe areas.

**8290 SHIELDED PERMOHM®**

POLYETHYLENE JACKET WON'T CRACK IN SUN OR SUB ZERO WEATHER

LOW LOSS DIELECTRIC POLYETHYLENE INSULATION

ORANGE WEB PROVIDES UNIFORM IMPEDANCE

BELDFOIL® SHIELD

GROUND WIRE

COPPERWELD CONDUCTOR FOR MAXIMUM STRENGTH

Designed to provide superior VHF, UHF, B. W and color TV reception in congested areas where reception is critical. Beldfoil shielding assures a clean, strong signal by eliminating transmission line pick-up of ghost signals and electrical noise (including automotive ignition noise). Belden's 8290 can be installed underground, in gutters, and conduit. 8290 can simply be taped to mast.

AWG & Stranding	Color	Nominal O.D. (Inch)	Nominal Velocity of Propagation	Nominal Capacitance (mmf ft)	Nominal Attenuation per 100'		Std. Pkg. Length in ft.

Copperweld, 2 conductors, orange polyethylene insulation and web between conductors, cellular polyethylene oval insulation, Beldfoil® shield, stranded tinned drain wire, polyethylene jacket.

• Patent No. 2,782,251 and Patent Pending

**8285 PERMOHM®**

ALL WEATHER POLYETHYLENE JACKET

COPPERWELD CONDUCTOR FOR MAXIMUM STRENGTH

ORANGE WEB PROVIDES UNIFORM IMPEDANCE

Provides superior VHF, UHF, B. W and color TV reception in uncongested or fringe areas. Especially designed to deliver more signal to the receiver than any other unshielded twin lead. The special polyethylene jacket protects the major portion of the energy field. Provides highest efficiency of any available unshielded transmission line, even when exposed to smog, moisture, weathering and industrial atmospheres. Does not require expensive matching transformers and connectors.

AWG & (Stranding)	Color	Nom. O.D. (Inch)	Nom. Velocity of Propagation	Nom. Capacitance (mmf ft)	Nom. Attenuation per 100'		Standard Package Lengths in ft.

						1000 spool	

Copperweld, 2 conductors parallel, orange polyethylene insulation and web between conductors, cellular polyethylene oval jacket.

• Patent No. 2,782,251

## TERMINALS FOR 8290 SHIELDED PERMOHM AND 8285 PERMOHM

These terminals now offer an easy termination method for 8290 Shielded PermoHM and 8285 PermoHM for the antenna and TV set termination with

any simple crimping tool. They are the same terminals used on the 50, 75 and 100 ft. coils of 8290 and 8285.

## TWIN LEAD WIRES (Cont'd)

Description & Trade Number	AWG & (Stranding)	Color	Nom. O.D. (Inch)	Nom. Velocity of Propagation	Nom. Capacitance (mmf/ft.)	Nom. Attenuation per 100'		Standard Package Lengths in ft.
						mc	db	
<b>Celluline® 8275•</b>  Bare copperweld, 2 conductors parallel, polyethylene jacket with inert gas filled unicellular polyethylene core.	20 (7x28)	Brown	.300 x .400	80%	4.6	100	1.05	50, 75, 100 coils in counter dispenser 250, 500 1000 spools
						200	1.64	
						300	2.12	
						400	2.5	
						500	2.98	
700	3.62							
900	4.3							
CELLULINE maintains uniform electrical characteristics by eliminating all possible moisture between conductors. Installation is easier because no end-sealing is necessary. Losses are lower because of its lower dielectric constant (1.5). The thick outer wall of brown polyethylene protects the cable from abrasion and sun damage; the round shape offers less wind resistance. The result is a longer lasting, more efficient line. Recommended for black and white VHF and local UHF reception.								
<b>8235</b>  Bare copper, 2 conductors parallel, polyethylene insulated.	18 (7x26)	Brown	.185 x .520	77%	5.0	100	.85	100 coil 500 spool
						200	1.35	
						300	1.80	
						400	2.20	
						500	2.60	
700	3.25							
900	3.85							
Amateur transmitting and receiving twin lead 1KW(RF) rated.								
<b>Weldohm® 8230</b>  Bare copperweld, 2 conductors parallel, polyethylene insulated.	20 (7x28)	Brown	.072 x .400	80%	4.4	100	1.1	25, 50, 75, 100 pancake coils in a sleeve 250, 500 1000 spools T-1000 (tote-m pak)
						200	1.7	
						300	2.2	
						400	2.7	
						500	3.1	
700	3.7							
900	4.5							
WELDOHM is 1½ times STRONGER and has 2½ times more FLEX LIFE than equivalent twin lead with all copper conductors, without changing the RF electrical characteristics. Tests prove its superior resistance to the pulling, whipping, and twisting that is so important to a long lasting installation.								
<b>8225</b>  Bare copper, 2 conductors parallel, polyethylene insulated.	20 (7x28)	Brown	.058 x .400	80%	4.4	100	1.1	25, 50, 75, 100 pancake coils in a sleeve 250, 500 1000 spools T-1000 (tote-m pak)
						200	1.7	
						300	2.2	
						400	2.7	
						500	3.1	
700	3.7							
900	4.5							
Brown polyethylene for the best weathering.								
<b>8226</b>  Bare copper, 2 conductors parallel, polyethylene insulated.	20 (7x28)	Ivory, Clear	.058 x .400	80%	4.4	Same as 8225		25, 50, 75, 100 pancake coils in a sleeve
For indoor use only

## BELDEN MERCHANDISERS

### NEW! TOTE-M PAK\*

A great new on the job convenience item for TV servicemen and installation crews! Disposable tote-m pak shipping carton has a built-in carrying handle for easy, on-the-job handling. Contains 1,000 ft. spool which feeds wire out through special opening (spool never has to be removed or handled). tote-m pak features convenient reminder footage chart.

**8230 (Weldohm) and 8225** available in 1,000' spools only.

•Belden U.S. Patent 3,032,604.

All breakdown voltages and suggested working voltages are AC RMS values.

**TV CAMERA CABLES**

Belden TV Broadcast and Closed Circuit TV Camera Cables assure reliable circuit isolation thereby reducing a-c hum and minimizing crosstalk between circuits. They are made to withstand rugged service and to maintain high conductor insulation resistance regardless of ambient temperature changes.

Major uses for these cables are for controlling, powering and transmitting sound and picture information for

monochrome and color TV cameras as well as for remote control, monitor and cue line systems.

Belden TV Camera Cables are engineered to be lightweight, flexible and easy to terminate. They are manufactured and tested in accordance with Belden's own rigid and time-proven quality control standards in order to assure outstanding reliability, performance and service life.

Designed to meet the critical electrical and physical requirements necessary for color television broadcast applications.

Trade Number **8283**

**82 Conductor TV Color Camera Cable**

4-14 AWG (19x27) tinned copper, vinyl plastic insulated, color coded.

3-16 AWG (26x30) tinned copper, vinyl plastic insulated, color coded.

BELDFOIL® aluminum-polyester wrapped shield around the above 7 conductors cabled with stranded tinned copper drain wire.

8 coaxial cables. Nom. impedance 53.5 ohms, color coded.

67-22 AWG (7x30) tinned copper, vinyl plastic insulated, color coded, 7 under conductive textile shield with stranded ground wire.

Tinned copper braid shield.

Chrome vinyl plastic jacket. 1.22" Nom. O.D.

§Cut to customer's specified length.

Maximum length 1000'.

A smaller, lighter weight cable designed to make long runs easier. For black and white (Monochrome) systems.

Trade Number **8280**

**28 Conductor TV Camera Cable**

4-18 AWG (16x30) tinned copper, vinyl insulated, color coded.

21-22 AWG (7x30) tinned copper, vinyl insulated, cabled in 3 groups of 7, color coded.

3 coaxial cables. Nom. impedance 51 ohms, color coded.

Tinned copper braid shield.

Chrome vinyl jacket. .750" Nom. O.D.

§Cut to customer's specified length.

Maximum length 1500'.

A 75 ohm cable designed to remain flexible in cold weather. Recommended for transistorized TV cameras.

Trade Number **8286**

**28 Conductor Hypalon & TV Camera Cable**

4-18 AWG (16x30) tinned copper, vinyl insulated, color coded.

BELDFOIL aluminum-polyester wrapped shield around 4 conductors with stranded drain wire, polyester tape over this shielded group.

21-22 AWG (7x30) tinned copper, vinyl insulated, cabled in 3 groups of 7, color coded, one group of 7 has a BELDFOIL aluminum-polyester wrapped shield overall with a stranded drain wire, polyester tape over this shielded group.

3 coaxial cables. Nom. impedance 75 ohms.

Tinned copper braid shield.

Block Hypalon jacket. .730" O.D.

§Cut to customer's specified length.

Maximum length 1000'.

§Minimum length 25'. 25' to 199', plus 25' minus 0. 200' or over, plus 50', minus 0.  
 ®DuPont trademark.

**Belden**

tv camera cable and 75 ohm video cables

**TV CAMERA CABLES**Trade Number **8284**

Designed specifically for color TV transmission. This cable incorporates circuit isolation assuring the reduction in AC hum level and cross talk essential for color TV broadcasting.

**24 Conductor TV Camera Cable**

17-22 AWG (7x30) tinned copper, vinyl insulated, color coded.  
3 under BELDFOIL shield with stranded drain wire.  
4-16 AWG (26x30) tinned copper, vinyl insulated, color coded.  
3 coaxial cables. Nom. impedance 53.5 ohms, color coded.

Tinned copper braid shield. Heavy cotton braid.  
Chrome vinyl plastic jacket. .800" Nom. O.D.  
§Cut to customer's specified length. Maximum length 1000'.

Trade Number **8282**

Especially engineered for TV Eye Cameras. Recommended for remote control, monitor and cue line applications.

**13 Conductor TV Eye Cable**

8-22 AWG (7x30) tinned copper vinyl insulated, color coded.  
1-22 AWG (7x30) polyethylene insulated conductor.  
2-18 AWG (16x30) tinned copper conductor vinyl insulated.  
Black and Red.

1-RG-58A/U cable 50-ohm coax.  
1-72-ohm coax, stranded conductor, polyester tape wrapped.  
Chrome vinyl jacket. .470" Nom. O.D.  
§Cut to customer's specified length. Maximum length 2000'.

§Minimum length 25'. 25' to 199', plus 25' minus 0. 200' or over, plus 50', minus 0.

**75 OHM PRECISION VIDEO CABLE**

**TYPICAL APPLICATIONS:** Video signal transmission in Color and Monochrome TV studios. Provides high quality carrier of video signal with superior picture definition and eliminates problems of periodicity. Cable is manufactured with rigid

control of concentricity and all dimensional tolerances. The black polyethylene jacket is inherently a non-contaminating, non-migratory compound. 100% SWEEP TESTED.

HIGH VOLTAGE CABLES

Belden High Voltage Cables are designed for use by public utilities and laboratories in testing high voltage equipment and apparatus. Through their use, potentially dangerous conditions can be detected both before installation and at intervals during service.

Belden High Voltage Test Cables are engineered to achieve the best possible performance at continual rated voltages. Their special design incorporates the use of

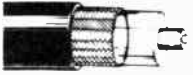

conductive polyethylene over the center conductor, bonded to the polyethylene dielectric material. This provides uniform voltage stress distribution around the center conductor and results in an increased elimination of degradation due to internal corona.

For special cables up to 600 KVDC ratings, please ask for individual quotation.

\* New Item

Conductive polyethylene over inner conductor combined with a copper wire braid over the dielectric provides uniform distribution of voltage stress. Very high-voltage DC cable applied from 200 KVDC to 600 KVDC is available from Belden on special order. Consult Belden Engineering Department for AC or pulse applications.

**MILITARY SPECIFICATIONS PERTAINING TO BELDEN HOOK-UP WIRE**

Belden's outstanding line of Hook-Up Wire represents a broad selection of quality products that meets the Military Specifications indicated on this and on the following pages.

Basically, from the customer's point of view, Military Specifications can be a helpful guide in determining specific information about cable construction, electrical limits and test data as an aid in comparing and selecting wiring products to meet the needs of specific applications.

The following Military Specifications cover the Belden Hook-Up Wire Products to be found in this catalog:

**MIL-W-16878—Wire, Electrical, Insulated, High Temperature.** Covers insulated wire for the internal wiring of meters, panels, and electrical and electronic equipment at temperatures ranging from 105°C to 200°C. The many types available in different voltages and thermal ratings are listed on the following pages to meet your individual requirements.

**MIL-W-76—Wire and Cable, Hook-Up, Electrical, Insulated.** Covers single conductor, plastic-insulated Hook-Up wire for the internal wiring of electrical and electronic equipment. The many types available in different voltages and outer covering are listed on the following pages to meet your individual requirements.

**TYPE B—MIL-W-16878—VINYL—600V-105°C**

Tinned copper, vinyl insulated.

Color striping available on 1000' minimum per item each color on 500' and 1000' spools.

**MIL-W-76**

Covers single conductor, plastic-insulated Hook-Up wire for the internal wiring of electrical and electronic equipment. The many types available in different voltages and

outer covering are listed on the following pages to meet your individual requirements.

**TYPE MW—MIL-W-76—VINYL—1000V-80°C**

Tinned copper, vinyl insulated, medium wall. The extruded vinyl insulation is flame and ozone-resistant and is inert to most chemicals, oils, and solvents.

heat shrinkable tubing

**Belden**

Belden provides a complete line of heat shrinkable tubing in order to meet the many, diverse application requirements of the electronics industry. Belden Heat Shrinkable Tubing is available from stock in a full range of colors, sizes and lengths in three basic types—all conveniently packaged for easy handling and use. All Belden HST products are manufactured to exact specifications in order to assure dependable production-line uniformity of diameters, shrink-down and electrical properties.

**HST 1: BELDEN IRRADIATED POLYOLEFIN HEAT SHRINKABLE TUBING**

Belden HST-1 meets all industry standards and size specifications. It is thermally stabilized and homogeneous in nature. HST-1 is essentially free from flaws, defects, pin holes, bubbles, seams, cracks or inclusions. When heated to 275°F, it shrinks to 50% of its original diameter, and

when fully shrunk, its longitudinal change is less than 3% of its original length. It is solvent and fungus resistant and has a maximum water absorption of only 0.1%. Belden HST-1 meets or exceeds MIL-I-23053 (WEPS) Revision A.

**HST 2: BELDEN IRRADIATED POLYOLEFIN HEAT SHRINKABLE TUBING**

Belden HST-2 combines flexibility with abrasion resistance. It is flame retardant and offers excellent dielectric and mechanical strength. It is essentially free from flaws, defects, pin holes, bubbles, seams, cracks or inclusions. When heated, it shrinks to 50% of its original diameter

and, when fully shrunk, its longitudinal change is less than 10% of its original length. It is impervious to solvents and resists water absorption. It is recommended for most commercial uses that do not require the more costly inspection of military specifications.

## HST 3: BELDEN VINYL HEAT SHRINKABLE TUBING

Belden HST-3 Polyvinylchloride Heat Shrinkable Tubing has an extra thin wall for excellent conformability. It is flame retardant and offers outstanding physical and electrical properties. When heated, it shrinks to 50% of its original diameter and when fully shrunk, its longitudinal

change is less than 15% of its original length. All colors (except black) are translucent which permits the enclosed object to remain visible. HST-3 is especially recommended for use in areas where space is critical or where flexibility is a requirement.

merchandisers and crimping tool

**Belden****BELDEN MERCHANDISERS**

Belden offers a full line of mobile communications terminals in a wide range of sizes and configurations to suit every wiring need and to meet the requirements of many specialized applications. Belden terminals are manufactured in accordance with the highest quality control standards and packaged for extra handling convenience.

Primary wire terminals are made from electrolytic copper, electro-tinned for corrosion resistance. Insulated terminals have tough vinyl sleeves which can be crimped

without cutting or breaking.

The Belden 98 Packet self-service, counter-top Merchandiser displays a complete selection of the most popular terminals and assures fast turnover with minimal handling and restocking costs. Belden's fine selection of complementary terminal accessories, kits and application tools complete the line to assure full product coverage and customer satisfaction.

**8198  
IRS WIRING KIT (Ignition Radiation Suppression)**

Contains parts for making up ignition leads or sets for cars, trucks, boats or stationary engines. Includes 100' 8688 IRS cable, 400 terminals and one 8197 crimper tool. IRS application information on page 38.

Contents:			
50-8168	25-8174	50-8171	100' 8688
25-8173	50-8170	200-8172	1-8197

**8196  
STRIP-IT TOOL**

Fast, efficient way to strip wire and cable. Easy to use in tight spots. Rugged tool steel blades cut as well as strip. Adjusts for all wire sizes. Blister packaged for easy display and quick sales.

**8199  
THE 98 PACKET®**

No. 8199 Assortment holds 75 individual plastic packets containing 25 different types of the most popular primary and ignition terminals to cover your mobile communications requirements. Rack stands on counter or hangs on wall. Weighs just 7 lbs. complete. Dimensions: 18" high, 12" wide, 8" deep.

**BELDEN TERMINALS**

Packaged in sturdy plastic tubes for fast turnover, easy handling, stacking and reordering. To cover your mobile communications requirements.

**8197  
ALL PURPOSE TERMINAL CRIMPING AND  
CABLE STRIPPING TOOL**

Precision machined to permanently swage all types of Primary, Spark Plug, and Snap Terminals shown.

Rugged construction made from heat-treated alloy steel with blue plastic handle grips.

# teflon wire | Belden

Teflon is a fluorinated thermoplastic with outstanding thermal physical and electrical properties. However, because the basic resin and processing costs are relatively high, Teflon is generally restricted to applications requiring its special characteristics.

Belden Teflon wire products are highly recommended for miniature cable applications, because of their superior thermal and electrical properties. Teflon is especially suit-

able for internal wiring soldering applications where insulation melt back is a specific problem. Belden Teflon wiring products are outstanding in their resistance to oil, oxidation, heat, sunlight, flame and their ability to remain flexible at low temperatures. They all have excellent resistance to ozone, water, alcohol, gasoline, acids, alkalis, aromatic carbon and solvents.

## HPD HEATER CORDS WITHOUT APPLIANCE PLUG

### Information and Application

HPD Cardage (Asbestos cotton braid) is recommended for irons and other appliances where flexibility of the cord is extremely important.

Glazed cotton HPD should be used for maximum resistance to abrasion.

All Belden Iron Cords use a fiber glass tie on the stripped conductors for ruggedness and to insure the smallest diameter for easy installation.

17729 has a special terminal finish. The braid is stripped 2 1/4" with a fiber glass tie, and the eyelets are for a #6 screw.

All cords have UL Green Flag Label.

These cords are offered in a wide variety of:

1. Lengths
2. Gauges
3. Colors
4. Cotton Types
5. End Finishes—  
Stripped  
Terminals  
Eyelets

**COFFEEMAKER AND FRY PAN CORD SETS**

**Information and Application**

Fits all standard coffeemakers. The miniature appliance plug is slotted so that it also fits many fry pans. The 2 ft. length cord is particularly convenient for the kitchen counter space. Both cards made to original equipment specifications with 3-leaf bronze contacts and 17 AWG conductor. UL Blue Flag Label.

17856 is recommended where just a coffeemaker card is required. Miniature appliance plug is not slotted. UL Blue Flag Label.

**CONVENIENCE AND SAFETY.** Dangling cords can be messy, troublesome and unsafe. Retractable cords stay neat, allow free movement of the appliance and prevent accidents. Neoprene jackets meet UL requirements and retain full memory through thousands of stretching cycles.

**UL-TYPE HPN**

# Belden cords

## TWO CONDUCTOR EXTENSION CORDS

### Information and Application

This new idea in convenience adds an 8' extension cord and you still have an outlet to plug in another cord. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17177	6	18 (41 x 34)	.144 x .277	SPT-2	Brown

### CUBE TAP EXTENSION CORD SETS

Manufactured in Brown, Black and Ivory in all popular lengths. The molded three way connector is particularly sturdy and will last long in steady service. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17156	6	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17159	9	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17162	12	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory
17165	15	18 (41 x 34)	.110 x .207	SPT-1 Vinyl	Brown, Ivory

### UL-TYPE SV AND SJ RUBBER

The molded plugs and connectors give long service life. The CORD-HOLDER plug provides easier storage. It can also be used as cord shortener. For longer extension cords of this type, see Lawnmower and Vacuum Cleaner cords. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17259	9	18 (41 x 34)	.245	SV Rubber	Gray
17361	10	16 (26 x 30)	.323	SJ Rubber	Black

### UL-TYPE SJ AND S RUBBER

For use where a round connector is required. Also used as a power supply cord for some appliances. For longer extensions where a heavier duty type cord is needed for added insulation and abrasion protection use 17555 or 17556. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17370	10	16 (26 x 30)	.323	SJ Rubber	Black
17555	25	16 (65 x 34)	.401	S Rubber	Black
17556	50	16 (65 x 34)	.401	S Rubber	Black

## EXTENSION CORDS WITH DUPLEX CONNECTORS

### UL-TYPE SJO AND SO NEOPRENE

These extension cords with the duplex connector are designed to withstand the punishment of shop, garage and factory use.

These cords are ideal for sound and broadcast studios. The entire cord is oil, grease and ozone resistant. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17375	25	16 (26 x 30)	.323	SJO Neoprene	Black
17565	25	14 (41 x 30)	.528	SO Neoprene	Black
17566	50	14 (41 x 30)	.528	SO Neoprene	Black

**THREE CONDUCTOR POWER SUPPLY CORDS**

**UL-TYPE SJ RUBBER, SJT VINYL AND SJO NEOPRENE**

**Information and Application**

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 2" CONDUCTORS STRIPPED AND TWISTED 3/4"

For all tools such as sanders, saws, grinders and polishers requiring grounding. Three conductor Cord now listed by UL as mandatory for drills 1/2" and larger. UL Green Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. U.O. (Inches)	UL Type of Cordage	Colors
17406	6	18 (16 x 30)	.328	SJ Rubber	Black
17405	6	18 (16 x 30)	.328	SJT Vinyl	Gray
17408	8	18 (16 x 30)	.328	SJ Rubber	Black
17407	8	18 (16 x 30)	.328	SJT Vinyl	Gray
17409	8	18 (16 x 30)	.328	SJO Neoprene	Black
17412	12	18 (41 x 34)	.328	SJ Rubber	Black
17419	9	16 (65 x 34)	.353	SJ Rubber	Black
17422	12	16 (65 x 34)	.353	SJ Rubber	Black
17425	15	16 (65 x 34)	.353	SJ Rubber	Black

**UL-TYPE SV RUBBER AND SVT VINYL**

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 1 1/2" CONDUCTORS STRIPPED AND TWISTED 3/4"

Three conductor SV and SVT cords now recognized as a UL Standard for same small tools, business machines and instruments which previously required a three conductor SJ Cord. UL Green Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Colors
17236	6	18 (41 x 34)	.265	SV Rubber	Black
17238	8	18 (41 x 34)	.265	SV Rubber	Black
17237	6	18 (41 x 34)	.253	SVT Vinyl	Gray
17239	8	18 (41 x 34)	.253	SVT Vinyl	Gray

**UL TYPE S RUBBER**

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 2" CONDUCTORS STRIPPED AND TWISTED 3/4"

For heavy duty power tools and equipment. UL Green Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17629	9	14 (41 x 30)	.558	S Rubber	Black
17635	15	14 (41 x 30)	.558	S Rubber	Black

**UL-TYPE SJO NEOPRENE (RETRACTILE)**

**Retractile (coiled)**

MOLDED VINYL GROUNDING PLUG

OUTER JACKET STRIPPED 1 1/2" CONDUCTORS STRIPPED 1/2" AND TINNED

CONVENIENCE AND SAFETY. Dangling cords can be messy, troublesome and unsafe. Retractable cords stay neat, allow free movement of the appliance or tool, and prevent accidents. Rubber insulation and neoprene jackets meet UL requirements and retain full retracting memory through thousands of stretching cycles. UL Green Flag Label.

Trade Number	Retracted Length (in.)	Practical Extended Length (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17447	12	6	18 (41 x 34)	.360	SJO Neoprene	Black
17448	12	6	16 (65 x 34)	.370	SJO Neoprene	Black
17449	24	12	16 (65 x 34)	.370	SJO Neoprene	Black

**THREE CONDUCTOR PROJECTOR AND BUSINESS MACHINE CORD**

**UL-TYPE SVT VINYL**

MOLDED VINYL GROUNDING PLUG

MOLDED VINYL 3-CONTACT CONNECTOR

Can be used for Revere and Eastman Kodak projectors, Friden, Victor, Hewlett-Packard, Marchant business machines, and DuKane audio equipment. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (Inches)	UL Type of Cordage	Color
17258	8	18 (41 x 34)	.253	SVT Vinyl	Gray

# Belden cords

## THREE CONDUCTOR EXTENSION CORDS

### Information and Application

This new idea in convenience adds an 8' extension cord and you still have an outlet to plug in another cord. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17462</b>	8	18 (16 x 30)	.328	SJT Vinyl	Black

### UL-TYPE SJT AND ST VINYL

YELLOW CORDAGE stands out against green or brown backgrounds and thus reduces hazard of accidental cutting.

These extension cord sets are for lawnmowers and hedge clippers using three conductor power supply cordage. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17491</b>	25	18 (16 x 30)	.328	SJT Vinyl	Yellow
<b>17492</b>	50	18 (16 x 30)	.328	SJT Vinyl	Yellow
<b>17493</b>	100	18 (16 x 30)	.328	SJT Vinyl	Yellow
<b>17494</b>	25	16 (26 x 30)	.353	SJT Vinyl	Yellow
<b>17495</b>	50	16 (26 x 30)	.353	SJT Vinyl	Yellow
<b>17497</b>	100	16 (26 x 30)	.353	SJT Vinyl	Yellow
<b>17694</b>	25	14 (41 x 30)	.558	ST Vinyl	Yellow
<b>17695</b>	50	14 (41 x 30)	.558	ST Vinyl	Yellow
<b>17697</b>	100	14 (41 x 30)	.558	ST Vinyl	Yellow

### UL-TYPE SPT-2 VINYL

FLAT YELLOW 3 conductor extension cords for most light duty purposes. Particularly popular with the marine trade. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17194</b>	25	16 (65 x 34)	.152 x .460	SPT-2	Yellow
<b>17195</b>	50	16 (65 x 34)	.152 x .460	SPT-2	Yellow

### UL-TYPE SJ RUBBER

Power Supply Cord for business, mailing machines and electrical equipment that have a built in receptacle with blades and grounding pin for cord attachment. These can also be used as extension cords for equipment requiring grounding. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17460</b>	10	18 (16 x 30)	.328	SJ Rubber	Black
<b>17461</b>	10	16 (26 x 30)	.353	SJ Rubber	Black

### UL-TYPE SJO AND SO NEOPRENE

These three conductor extension cords are for use with power tools and other appliances requiring grounding. These extension cords with the rugged Belden duplex connectors will give years of safe, reliable service. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17475</b>	25	16 (26 x 30)	.353	SJO Neoprene	Black
<b>17476</b>	50	16 (26 x 30)	.353	SJO Neoprene	Black
<b>17477</b>	100	16 (26 x 30)	.353	SJO Neoprene	Black
<b>17675</b>	25	14 (41 x 30)	.558	SO Neoprene	Black
<b>17676</b>	50	14 (41 x 30)	.558	SO Neoprene	Black

**VACUUM CLEANER AND FLOOR POLISHER CORDS**

**Information and Application**

For all Standard Home Vacuum Cleaners and Floor Polishers not requiring a Plug-in type connector. UL Green Flag Label.  
The CORD-HOLDER plug is a proven convenience for storing cleaner and cord.

**Color Shades Match Exactly Original Equipment Manufacturer's Specifications.**

**WITHOUT CONNECTOR**

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17220</b>	20	18 (41 x 34)	.245	SV Rubber	Black, Brown, Gray
<b>17222</b>	20	18 (41 x 34)	.243	SVT Vinyl	Black, Brown, Gray, Red, Green

**WITH CONNECTORS**

Fits Kirby Cleaners requiring connector as illustrated. Note: Strain relief for hooking cord to the hook of Kirby Sweeper handle. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL TYPE of Cordage	Color
<b>17270</b>	20	18 (41 x 34)	.245	SV Rubber	Gray
<b>17272</b>	20	18 (41 x 34)	.243	SVT Vinyl	Gray
<b>17274</b>	32	18 (41 x 34)	.243	SVT Vinyl	Gray

Fits Kirby Cleaners requiring connector as illustrated but may be used on other cleaners. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17271</b>	20	18 (41 x 34)	.245	SV Rubber	Gray
<b>17273</b>	20	18 (41 x 34)	.243	SVT Vinyl	Gray

For Vacuum Cleaners with round pin connectors such as Apex and Electrolux models without the reeling device. UL Blue Flag Label.

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. O.D. (inches)	UL Type of Cordage	Color
<b>17288</b>	18	18 (41 x 34)	.245	SV Rubber	Gray

1724	4	35A-250V	2-#8 & 1-#10
1725	5	35A-250V	2-#8 & 1-#10
1785	6	35A-250V	2-#8 & 1-#10

### UL-TYPE S AIR CONDITIONER EXTENSION CORD SETS

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. OD (inches)	UL Type of Cordage	Rating at 125V (amps.)	Color
17656	6	14 (41 x 30)	.558	S Rubber	15	Gray
17659	9	14 (41 x 30)	.558	S Rubber	15	Gray
17662	12	14 (41 x 30)	.558	S Rubber	15	Gray

Three popular lengths of extension cords for all makes of air conditioners. UL rated 15A - 125V. Note that UL recognizes round jacketed cordage ONLY for this application. UL Blue Flag Label.

### FLAT UL-TYPE SRDT VINYL DRYER CORDS

Trade Number	Length of Cord (ft.)	Rating	AWG
1780	3	30A-250V	10
1734	4	30A-250V	10
1735	5	30A-250V	10
1782	6	30A-250V	10

Trade Number	Length of Cord (ft.)	AWG (Stranding)	Nom. OD (inches)	UL Type of Cordage	Rating	Color
17140	6	14 (41 x 30)	.229 x .637 Vinyl	SPT-3 Vinyl	15A-125V	Gray
17141	6	14 (41 x 30)	.229 x .637 Vinyl	SPT-3 Vinyl	15A-250V	Gray

17140 is rated 15A—125V. 17141 is rated 15A—250V. For room air conditioners and domestic automatic washers. UL Green Flag Label.

## CORDLITES®

### TWO CONDUCTOR UL-TYPE SJT VINYL CORDLITES

Trade Number	Length of Cord (ft.)	AWG & No. of Conductors	Nom. OD (inches)	UL Type of Cordage	Color
17925	25	18-2	.298	SJT Vinyl	Black
17950	50	18-2	.298	SJT Vinyl	Black

These Cordlites are oil and ozone resistant. The handle has a feed through switch and two tool taps. 17923 lamp guard included

### TWO AND THREE CONDUCTOR UL-TYPE SJO NEOPRENE CORDLITES

Trade Number	Length of Cord (ft.)	AWG & No. of Conductors	Nom. OD (inches)	UL Type of Cordage	Color
17995	25	18-2	.298	SJO Neoprene	Black
17996	50	18-2	.298	SJO Neoprene	Black
17998	25	18-3	.328	SJO Neoprene	Black
17999	50	18-3	.328	SJO Neoprene	Black

These Cordlites are oil and ozone resistant. The tool taps on the 3 conductor cords are of the 3-contact 15A - 125V grounding type. 17923 lamp guard included.

HOW TO USE THE CABLE FINDER CHART

Match the desired "Number of Conductors" column with the required "Conductor Size" to find the applicable Belden Trade Number and its catalog page.

For cables with more than 8 conductors, see Multiple pair and unpaired unshielded cables on page 13 & 15, Multiple pair individually shielded on pages 9, 10 & 12. For cables combining shielded and unshielded conductors, see Special Audio and Communication cables on pages 10 & 11.

**It's so easy to order  
from this catalog...**

When ordering products shown in this book  
or writing for additional information, please  
be sure to specify:

- 1. Manufacturer's Catalog Numbers  
and Page Numbers.**
- 2. The Year and Edition of This  
MASTER.**

This will avoid confusion and expedite delivery.

## Biraco-105 — EXTRUDED PLASTIC TUBING

**APPROVED FOR 105°C OPERATION — MEETS MIL-1-631D SPECS** — A quality plastic Vinyl tubing designed for electronic and electrical insulation work. Has high dielectric strength, extreme flexibility, non-flammability, abrasion resistance, impervious to oil, water, alkalies, alcohol, solvents, etc., high heat stability and resistance to aging. Meets all A.S.T.M. specifications, Mil. Spec. (Type F, Form U, Grades A and C, Class 2, Category 1).

#24 thru #15 1,000' - 500' - 100' - 50' - 25' spools  
 #14 thru #8 500' - 100' - 50' - 25' spools  
 #4 thru 1/2" 250' - 100' - 50' - 25' coils  
 5/16" thru 7/8" 100' - 50' - 25' coils  
 1" & larger 50 coils

SIZES #24 THRU #15 AVAILABLE IN 36" LENGTHS

### TABLE OF PHYSICAL & ELECTRICAL PROPERTIES—BIRACO TUBING

Tensile Strength—2500 Psi. (Minimum Average)  
 Flammability—Non-Flammable  
 Ultimate Elongation—340%  
 Recommended for Temperatures to—105° C  
 Cold Bend—40° C  
 Dielectric Strength .020" Wall—800 V/Mil  
 Varnish Baking—Good  
 Water Absorption  
 Weight Increase (1 Week)—0.1%—Fungi Resistance—Yes  
 Dil Resistance—Indefinitely flexible when immersed in oil.  
 Insulation Resistance—over 1,000,000 megohms.

### IN STOCK

The Birnbach Line of insulated sleeving and tubing is the basic quality line designed for the rigid performance requirements of the Aircraft, Electrical and Electronic Industries.  
 Meets or exceeds the required MIL Specifications and ASTM and NEMA standards. We invite your inquiries on special problems and requirements.

## Biraco-65 — EXTRUDED PLASTIC TUBING LOW TEMPERATURE — Per MIL-I-7444B to —94° F.

No. B-65 meets Air Force spec. Mil-I-7444 specifically designed for operation at sub-zero temperatures. It is fungus resistant and has excellent dielectric strength.

# Birflon — TEFLON\* SPAGHETTI TUBING

## TFE EXTRUDED TUBING

Birflon T-500 Tubing is extruded from DuPont Tetrafluoroethylene Resin. Used in electronic and electrical equipment for connection of components. Its flexibility, ease of handling has established it as the best and most popular insulation sheathing. This high temperature Class C insulation does not melt and flow as the conventional thermoplastic materials. Birflon T-500 Teflon has unique electrical, chemical and mechanical properties unmatched by any other type tubing for use in applications requiring high frequencies and high temperatures.

Because of Teflon's continuous service temperature of 250° C., which is more than 100° C. above other materials, the soldering technique is simplified since "Teflon" is not harmed by the hot barrel of the soldering iron — therefore, the assembly of aircraft, missile and electronic communication equipment is greatly speeded up. Thin Wall flexible Teflon Tubing can be processed easily into flexible and rigid printed circuits. As a thin, flexible insulation, it permits miniaturization and compactness of design never before possible.

TABLE OF PROPERTIES

Test	ASTM Method	Result
Tensile Strength, 73 F.	D638-52T	1500-3000 Lb./Sq. In.
Elongation, 73°F.	D638-52T	100-200%

**SMALL PIECE CUTTING AVAILABLE TO ORDER**

**STOCK COLORS:** Natural, Red, Black, Blue, Brown, Green, Orange, Yellow, Gray, Violet, White.

Nos. T-500-3/8 thru T-500-1/4 available in Natural. Additional Colors: Sizes Made to Order.

Teflon Tubing can be ordered cut to your specifications.

Tracer Colors Available — We Invite Your Inquiries For Your Special Requirements

**ADDITIONAL ADVANTAGES OF BIRFLON T-500 TEFLON\***

- **ELECTRICAL:** Low power factor, low dielectric constant, high volume and surface resistivity, good dielectric strength (500 to 1000 volts/MIL) constant over wide ranges of temperatures and frequencies. Dielectric constant of 2.0 and dissipation factor of 0.0002 are lowest of any solid dielectric.
- **THERMAL:** No change of electrical properties with temperature (25°C. to 250°C.) or frequency (60 CPS to 100 MC). Class C insulation — capable of continuous service at temperatures to 250°C. Has color stability.
- **TOUGHNESS AND FLEXIBILITY:** Has high impact strength. Is tough and flexible over the broad temperature range of -90°C. to 250°C. Service range — 320°F. to 500°F.
- **CHEMICAL INERTNESS:** Completely inert to all chemicals and solvents except molten alkali metals and fluorine at elevated temperatures and pressures. Non-corrosive to all metals.
- **MOISTURE ABSORPTION:** Zero moisture absorption. Completely sun and weather resistant.
- **NON-FLAMMABLE** ● **LOWEST COEFFICIENT OF FRICTION**
- **FUNGI RESISTANCE:** Inert to all fungi growths.
- **SIZES:** Birflon T-500 Teflon Tubing available in sizes to fit B & S gauge wires. Thin wall available from stock, in sizes No. 32 thru 1 1/4" I.D. Additional sizes and wall thicknesses made to order. Birflon T-500 is made from high molecular weight virgin "Teflon" and meets AMS 3651B, 3653B, 3654, 3655, MIL-C-178 and MIL-I-22129C.

**NOTE:** When cutting Teflon Tubing, use single edge razor blade for clean unpinched cut.  
\*Teflon™ DuPont Trade Name for Tetrafluoroethylene Resin

Standard Put-up—36" Straight Lengths;

HAG-12 500/750°F Hot Air Gun For PVC Series  
HAG-13 750/1000°F Hot Air Gun For TE Series

The quickest and most versatile method for applying heat is the hot air gun noted herein. Also, use of an oven, radiant heat, dipping in hot liquids, or using a soldering iron or the flame of a match.

### BIRFLON SHRINK SERIES TE TUBING

HEAT SHRINKABLE TEFLON® TUBING

Is a Class C material modified from polytetrafluoroethylene. The tubing will shrink when heated to 621 F. (It should be heated until it turns semi-transparent, then the heating process immediately stopped. Overheating can cause splitting, therefore trial and error testing is recommended to establish the proper time and temperature for each application.) Correct procedure will result in a snug-fitting insulating wrap possessing hi-heat resistance, superior chemical resistance, and excellent electrical characteristics. The tubing is available in a full range of colors. Stock colors: black, white, natural.

\* Dupont Polytetrafluoroethylene

#### SK621 TEFLON TUBING

##### PROPERTIES CHART

	TE SERIES Shrinkable "Teflon"
DIELECTRIC STRENGTH (20 Mil Wall)	850 Volts/Mil
DIELECTRIC CONSTANT	2.2
POWER FACTOR	.00
VOLUME RESISTIVITY	10 <sup>17</sup> Ohms/CM
FUNGUS RESISTANCE	Inert
FLAMMABILITY	Will Not Support Combustion
FUEL and OIL RESISTANCE	Superior
HYDRAULIC FLUID RESISTANCE	Superior
SOLVENT RESISTANCE	Superior
ACID and ALKALI RESISTANCE	Superior
CORROSION RESISTANCE	Excellent
TENSILE STRENGTH	5000-7500 PSI
ULTIMATE ELONGATION	300-500%
WATER ABSORPTION	Nil
LOW TEMPERATURE BRITTLE POINT	-66°F
HARDNESS	98 Shore A
SPECIFIC GRAVITY	2.2

## HEAVY FORMVAR (HF) TYPE T2

Single conductor round bare copper, baked film insulation from a varnish based on a vinyl acetal resin. 105°C.

Has new tough abrasion resisting film. Replaces enamel and fabric insulations for certain applications requiring exceptional abrasion resistance. Stable under heat. High dielectric strength. Infinite resistance to water and moisture. Does not fail after two hours at 105°C. Takes up less winding space.

# Shielding Braid, Insulated Copper Wire, Braiding UNINSULATED COPPER WIRE

## TINNED COPPER SHIELDING

Used for shielding and bonding on aircraft, marine and auto radio wires and cables. Shields speaker leads, lead-ins, amplifier wires. Extremely flexible, slides over wires and cables.

### DESCRIPTION:

No. 853 thru 856/7—Composed of extremely flexible fine soft annealed copper tinned wires closely woven, braided and Rolled Flat.

No. 860—Composed of extremely flexible fine soft annealed copper wires closely woven, braided and Rolled Flat.

## TUBULAR BRAID PER MIL SPEC. QQ-B-575

Manufactured completely round as noted in MIL Spec. QQ-B-575, this tinned copper shielded braid has self-supporting characteristics which enables it to maintain its round shape. The shielding coverage percentage is 95% or more. This tubular braid is used in military applications where maximum shielding against electrostatic interference is indicated. In addition, it is used as a protective covering against mechanical abrasion and stresses for the wires, cables and other components.

### STANDARD SPOOL PUT-UPS: 50' — 100' — 250'

\*Values based on copper in free air at 65°F. Additional constructions and variations made to order. Also available in silver plated copper, bare copper and stainless steel.

## MEASURING MACHINE

Sturdy and compact construction. Has a precision quality built counter with large numbers for easy reading and will register wire up to .9,999 feet for direct accurate reading. Can be easily reset to zero position.

Wire passes through two rollers, the upper roller being self-adjusting and the tension of the upper roller can be set by a thumb screw to provide the proper grip for very fine as well as for heavy wire.

Two hardened lead bushings with an opening of 3/4" diameter will guide the wire properly through the rollers. Bushings are removable to allow cables up to 1" dia. to pass through. Will measure accurately all electric wires, cables, coaxial cables, rope, tape, etc.

## WIRE WINDER

Has adjustable arms to be set to the desired coil size and the arms will open to a flat position for easy removal of the coil. Simply open thumb screw which holds the front collar tight on the shaft, push the collar in any direction to the desired position and tighten the thumb screw again.

## HOLDING REEL

Compact, adjustable to size of coil and folding. Will hold spools or coils of wire.

MIL-W-16878D — TEFLON† WIRE

Type E—Extruded (600 Volts) — High Temperature Rating — 90° To + 250°C

Chemically inert, non-flammable, excellent flexibility, easy stripping, high dielectric strength, unaffected by fungus. Exceeds Class H insulation requirements. Unaffected by high or low temperature. Outstanding for its dependability and long life under all operating conditions indoors or outdoors. Teflon permits miniaturization and compactness in electronic designs of sub-miniature components, computers, UHF equip., slip ring assemblies, leads to hermetically sealed and potted components, telemetering equip. and guided missiles. Nom. wall .010". TFE extruded.

DESCRIPTION: Single conductor silver plated copper wire concentrically stranded and insulated with extruded or Teflon insulation.

SUBMINIATURE TEFLON\* HOOK-UP WIRE

Per MIL-W-16878D Type ET 250 Volts, 200°C

This new exceptionally thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in microminiature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D type ET 250 volts, 200°C.

# HOOK-UP AND TEST LEAD WIRES

## KINKLESS TEST LEAD WIRE

Used with portable test equipment; as tested, leads in analyzers, oscillators, instruments; wherever extreme flexibility and limpness is required. Has excellent dielectric properties.

**DESCRIPTION:**

No. 61—#20—41/36 extra flexible annealed tinned copper, stranded.

No. 66—#18—65/36 extra flexible annealed tinned copper stranded; paper serve; 3/4" special low capacity rubber, wax finish.

Colors: Red, Black.

Types WS-16/U Black, WS-17/U Red; No. 70 per MIL-W-13169 Specification available same construction as Birnbach #66 except compound per specification.

Cat. No.	Size AWG	Strand	Ins.	Puncture Voltage	Nom. O.D.
61	20	41/36	3/64"	20,000 V	.137"
66	18	65/36	3/64"	22,000 V	.145"
70*	18	65/36	3/64"	22,000 V	.145"

\* MILITARY TYPE SPECIFICATION MIL-W-13169B  
 WS-16/U Black WS-17/U Red  
 STANDARD PUT-UPS: 100' - 250' - 500' - 1000'

## NEW PLASTIC KINKLESS TEST LEAD WIRE

New formulation vinyl compound insulation allows maximum flexibility; rough treatment; extreme variation in climatic conditions; excellent abrasion resistance; greater temperature stability from -80°C to +115°C; fungus resistant; self extinguishing-flame proof; smooth surface. Resists exposure to gasoline and oil.

**DESCRIPTION:** One conductor tinned copper stranded, special formulation vinyl insulation.

Colors: Black, Red, Yellow, Green, White, Blue.

Cat. No.	Size AWG	Strand	Ins.	Nom. O.D.
1922	22	26/36	.032"	.100"

1918	18	65/36	.032"	.112"
1916	16	65/34	.032"	.129"

For portable test equipment; as test leads for instrumentation exceeds the requirements for MIL-I-3930A type JP (PVC). It is superior to synthetic rubber spec MIL-R-6855 Class II Grade 60.

STANDARD PUT-UPS: 100' - 250' - 500' - 1000'

## HEAVY DUTY HI-VOLTAGE TYPE

**DESCRIPTION:**

No. 68—#18—65/36 extra flexible annealed tinned copper; stranded; paper serve; 3/4" special low capacity rubber, wax finish.

Colors: Red, Black.

Used for oscillators, analyzers, TV, therapeutic instruments, etc.; wherever an extremely flexible high voltage lead is indicated.

Cat. No.	Size AWG	Strand	Ins.	Puncture Voltage	Nom. O.D.
68	18	65/36	5/64"	29,000 V	.210"

STANDARD PUT-UPS: 100' - 250' - 500' - 1000'

## SHIELDED GRID LEAD WIRE

Used to reduce loss in grid lead use, also to reduce interference caused by motors, high tension wires, X-ray machines, etc.

**DESCRIPTION:** #820—Single Conductor #20—10/30, #818—16/30 Stranded Tinned Copper, low loss rubber insulation, cotton braid lacquered, closely woven tinned copper shield overall.

Cat. No.	Size AWG	Strand	Ins. Under Shield	Cap./Ft. Mmf.	Nom. O.D.

## 7MM HIGH TENSION CABLE

Used as hi-voltage leads in electronic equipment and instruments, photo electric cell leads, automotive, etc.

**DESCRIPTION:** #1600—Unshielded One Conductor—#16-19/29 stranded tinned copper wire, rubber insulation, cotton braid highly lacquered.

**DESCRIPTION:** #781—Shielded Same construction as #1600 plus a closely woven tinned copper shield overall.

Cat. No.	Size AWG	Strand	Ins.	Nom. O.D.
1600	16	19/29	3/32"	.275"
781	16	19/29	3/32"	.295"

Used for auto and aircraft ignition systems where grounding is required for elimination of interference.

STANDARD PUT-UPS: 100' - 500' - 1000'

## DIATHERMY CABLE

Cat. No.	Spool	Size AWG	Strand	Ins.	Nom. O.D.
757	1000'	14	104/34	3/4"	.300"

## SHIELDED PLASTIC JACKETED CABLE with ALUMINUM MYLAR\* FOIL SHIELD

This cable is extremely light in weight and provides 100% shield coverage at audio and radio frequencies.  
**DESCRIPTION:** Each conductor tinned copper, color coded polyethylene insulation, twisted with #22 7/30 stranded tinned copper drain wire, aluminum Mylar\* foil shield, gray polyvinylchloride jacket overall.

Cat. No.	Cond.	Size AWG	Strand	Nom. Insul.	Nom. Jacket	Nom. O.D.

**STANDARD PUT-UP:** 100' - 500' - 1000'

## 2 CONDUCTOR SHIELDED

Used for transmission line, P.A. and sound systems, school, hospital sound installations, industrial paging systems, broadcast and audio cable, paging and rack panel wiring.  
**DESCRIPTION:** Each conductor copper tinned, plastic insulation, color coded twisted, tinned copper shield overall.

## SHIELDED BROADCAST AUDIO CABLE

Designed to provide maximum performance on all equipment. Conductors twisted correctly assures quiet, clear operation which eliminates interference and cross talk. Used by Broadcast studios, for P.A. and sound systems, rack wiring, etc.

**DESCRIPTION: #938—#22 Solid Tinned Copper Conductor,** enameled, heavy cellulose acetate yarn wrap, cotton braid waxed; cabled with #22 AWG solid tinned copper wire laid parallel to twisted pair under tinned copper braid shield; tubed-on Vinyl plastic jacket overall.

**#939—#22-7/30 Stranded Tinned Copper,** plastic insulation, color coded, twisted, copper braid shield, tubed-on Vinyl plastic jacket overall.

**#940—2 Conductors #22 solid plastic insulation,** color coded, twisted with #22 AWG solid tinned copper ground wire under tinned copper shield with vinyl plastic jacket overall.

**#940/1** same construction as #940 however with tinned copper spiral wrapped shield.

**#822 and #824** have solid enameled copper wire, cotton wrap, cotton braid waxed twisted pair, bare copper braid overall.

Cat. No.	Cond.	Size AWG	Strand	Nom. O.D.
938	2	22	Solid	.210"
939	2	22	7/30	.170"

**STANDARD PUT-UP:** 100' - 250' - 500' - 1000'  
**CONDUCTOR COLOR CODE:** Black and Red

## PLASTIC-INTER-COM CABLE

**4 CONDUCTORS (2 Shielded — 2 Unshielded)**  
 Widely used for wiring from station to station where a shielded twisted pair is indicated in order to eliminate cross talk.

**DESCRIPTION: No. 925—4 conductors #22 7/30 stranded** tinned copper, vinyl plastic insulation color coded, tinned copper shield over one pair (2 cond.) One pair (2 cond.) unshielded. Tubed gray vinyl jacket overall.

**CONDUCTOR COLOR CODE:**  
 Black/white shielded, Black/red unshielded

Cat. No.	Cond.	Size AWG	Strand	Nom. Insul.	Nom. Jacket	Nom. O.D.
925	4	22	7/30	.016"	.020"	.310"

**3 CONDUCTORS (1 Shielded — 2 Unshielded)**  
 Widely used for wiring from station to station where a single shielded conductor is indicated in order to eliminate cross talk.

**DESCRIPTION: No. 924—3 conductors #22 7/30 stranded** tinned copper, vinyl plastic insulation color coded, tinned copper shield over one conductor, tubed gray vinyl jacket overall.

Cat. No.	Cond.	Size AWG	Strand	Nom. Insul.	Nom. Jacket	Nom. O.D.
924	3	22	7/30	.016"	.020"	.205"

**CONDUCTOR COLOR CODE:**  
 Black/red unshielded, White shielded  
**STANDARD PUT-UP:** 100' - 500' - 1000'

## TWISTED PAIR TRANSMISSION CABLE WEATHERPROOF BRAID

**DESCRIPTION: No. 952—Two Conductors, #22-7/30 Tinned** Copper Stranded, special low loss rubber insulation, color coded, twisted conductors, cotton braid overall with rugged weatherproof finish.

**No. 919 —Two Conductors, #18-16/30 Tinned Copper** Stranded, same construction as above. Used for low transmission coupling between antenna and receiver as doublet twisted lead-in wire for inter-com. setup.

Cat. No.	Size AWG	Strand	Insul.	Nom. O.D.

919	18	16/30	1/32"	.195"

**STANDARD PUT-UPS:** 100' — 250' — 500' — 1000'

# MICROPHONE, MULTI-CONDUCTOR AND SERVICE CORD CABLE

## RUBBER JACKETED MULTI-CONDUCTOR CABLE (Not Shielded) GENERAL PURPOSE CONTROL CABLE

Used for permanent or portable P.A. systems, sound recording, indoor or outdoor speakers, interconnecting cable for all electronic uses. Each conductor, extra flexible stranded tinned copper, insulated with a .022" wall, special low capacity rubber, color coded, conductors twisted, filler, cotton wrap with tough weatherproof black rubber jacket overall.

**STANDARD PUTUPS:** 100' — 250' — 500' — 1000'

## RUBBER MICROPHONE CABLE

Designed for long service life and low loss. Use with crystal, ribbon, dynamic and velocity microphones and photoelectric cells. Birnbach #870 is used widely for lapel microphones and phono pick ups.

**DESCRIPTION:** Single Conductor, 26 Strands—#34 extra flexible tinned copper, special low loss rubber compound, tinned copper braid shield, cotton wrap, tough black rubber jacket overall.

## RUBBER OR NEOPRENE MICROPHONE General Purpose Multi-Conductor Shielded Control Cable

**DESCRIPTION:** Each Conductor, extra flexible stranded tinned copper, insulated with a .002" wall special low capacity rubber, color coded, conductors twisted, filler cotton wrap, tinned copper braided shield, cotton wrap with tough weatherproof black rubber or neoprene jacket overall.

Used for indoor and outdoor crystal, carbon and condenser microphones, public address systems, and control circuits, video and audio inter-connecting cable, broadcast and heavy-duty studio use.

## NEOPRENE JACKET — HEAVY DUTY

**DESCRIPTION:** Each conductor stranded tinned copper, color coded rubber insulation, cotton wrap, braided tinned copper shield, cotton wrap, tough black neoprene jacket overall.

**APPLICATIONS:** Shielded microphone and electronic power cable. Control circuits: Video and Audio inter-connecting cable. Broadcast and heavy studio use, and for ground support equipment related to guided missile systems.

**CHARACTERISTICS:** Oil and acid resistant. Suitable for outdoor use and direct burial. Will resist aging and rough usage. Neoprene jacket.

COMPANY INC. FOR MORE INFORMATION ON COMPLETE LINES, WRITE FOR NEW CATALOG.

# RETRACTILE CORDS

This series of Birnbach Coiled Kinkless Retractable Cords are permanently coiled into a spring-like shape without the use of metal springs or elastic bands. They have inherent "Recovery" properties. These Retractable cords extend approximately six times its retracted length, returning to its original shape and length when released. Always as long as you need them and no longer, they will not kink, tangle, trail, knot or dangle on the floor or bench and cause accidents. Useful wherever cords or cables must change length or position.

## RETRACTILE TEST LEAD WIRE

Stretch coiled kinkless test lead wire description. 12" coil—stretches to approx. 6 feet. One conductor #20 stranded copper rubber insulation .165 O.D. Coil O.D. 3/4". 6" straight lead on each end.

Colors: Red, Black

Cat. No.	Retracted Length	Approx. Extended Length	Pkgs. Std.
64	12"	Retracted - Approx. 6'	Extended 6
65	24"	Retracted - Approx. 12'	Extended 6

## BIRNBACH MINIATURE RETRACTILE CORD

This small size is suitable where compact equipment is required. 2 ft. retracted, approximately 10 ft. extended with 6" straight ends. Black plastic jacket overall.

Nom. Cond. resistance: .07 OHMS per linear foot (approx. .6 OHMS per retracted ft.)  
Maximum working voltage: 100; current capacity 1/2 amp.

Cat. No.	Cond.	Size AWG	Strand	Coil O.D.	Cond. O.D.	Std. Pkg.

877/28	4	28	19/40TC	1/2"	.150	10

CONDUCTOR COLOR CODE: 1-Black, 2-White, 3-Red, 4-Green. For 3 conductors, use 4 cond. and cut one dead.

## RETRACTILE COILED COMMUNICATION CORD

Multi-conductors stranded communication cord No. 23 AWG. Tinned copper wire neoprene or Geon plastic jacketed. Long lengths can be cut to exact requirement. Adds product reliability. Useful wherever cords must change length or position. Nom. cond. resistance .022 ohms per linear foot. .185 ohms per retracted foot. Maximum working voltage 120 volts. Current carrying capacity 1 ampere.

## RETRACTILE (KINKLESS) COILED SHIELDED COMMUNICATION CORDS

DESCRIPTION: Single and multi-conductor shielded microphone cable neoprene or geon plastic jacketed. This cable remains neat and compact with no danger of tripping or of the wire becoming entangled in equipment. Also suitable for stereo and additional speaker extensions. Shield can be pigtailed for soldering. No. 24 AWG Str. is 41 40 tinned soft cad. copper. No. 23 has 21/36 tinned soft cad. copper. Spiral wrapped tinned soft copper shielding.

## RETRACTILE (KINKLESS) POWER CORD SETS

Excellent for portable use. All mobile equipment and office equipment wherever the device application is synonymous with repetitive movement. The "Answer" to most tough hazard problems. 2 and 3 conductors SVO and SJO Retractable Kinkless Neoprene Service Cord Sets with Molded Male Plug one end, other end stripped for application. Adds reliability, compactness and portability.

## CORD SETS

**SERVICE LINE CORDS**  
**UL Approved**

An all purpose approved power supply cord for radios, record players, lamps, & small appliances.

**DESCRIPTION:** Two Conductors Rubber Parallel SP-1 (POSJ) with Molded-on Male Plug, double brass blades, conductor end striped and tinned, hanked. Available in Black and Brown.

Cat. No.	Length Ft.	Cond.	Size AWG	Strand	Nom. O.D.

**HEAVY DUTY SERVICE CORD**
**CSA APPROVED — (HEAVY DUTY) — UL APPROVED**

Used for heavy duty replacement on refrigerators, washing machines, machinery, tools and electronic devices.

**DESCRIPTION:** Two and Three Conductors, Stranded Bare Copper, cotton serve, rubber insulation, jute filler, cotton wrap, tough rubber jacket overall, molded plug one end, free end stripped and tinned for easy attachment — Hankd.

**HEAVY DUTY EXTENSION CORD SETS**  
**(UL & CSA APPROVED)**

**DESCRIPTION:** Extension cord sets manufactured for lasting service with a flexible 2 or 3 conductor quality black rubber cord. This rugged cord has a black molded plastic male and female plug on either end to fit conventional sockets and plugs.

**APPLICATION:** Small business machines, vacuum cleaners, lamps, movie projectors, or any other home appliance. 3 conductor cord used when 1 conductor requires grounding.

### DURAFOAM UHF/VHF TELEVISION TRANSMISSION LINE\*

Over 25,000,000 Feet Already in Use

Durafoam quality is so high that we can offer an unconditional 15 year guarantee. Its high reliability construction features two tubes of cellular polyethylene, to assure low signal loss, and a heavy black polyethylene Permaline insulation, to offer the maximum protection against deterioration caused by moisture, chemicals, salts and sunlight.

Durafoam is also extremely easy to install, cutting down the amount of time required to reach job.

Cat. No.	
5790L	50 ft.
5790S	65 ft.
5790C	100 ft.
5790D	500 ft.
5790M	1000 ft.

\* U. S. Pat. #3,219,752

### COLUMBIA SHIELDED PERMAFOAM TELEVISION TRANSMISSION LINE

- Less Termination Time Due to Low Loss Individual Cellular Polyethylene Tubes.
- High Molecular Weight PERMALINE Jacket for Superior Weathering.
- No Standoff Insulators or Matching Transformers Necessary.
- Aluminum Mylar Shield for 100% Effective Coverage. Tinned Copper Ground Wire Attaches to Set.
- High Strength Copper Plated Steel Conductors for Maximum Conductivity.
- All Coils have Factory Attached Terminals for Fast Positive Antenna Connection **Plus 2 Extra Terminals for Set Attachment.**

A New All Channel Transmission Line Designed to prevent line pickup interference. Our time proven PERMALINE outer jacket permits taping cable to antenna mast or running through gutters without affecting efficiency of line. For the best in Shielded Transmission Lines insist on Columbia Shielded Permafoam.

CABLE SIZE .275 x .455

Nominal velocity of propagation 76.5%

Nominal capacitance 6.8 MMF Ft.

Attenuation DB per 100'

50 MC	.....	2.00 DB
100 MC	.....	2.80 DB
200 MC	.....	4.10 DB
400 MC	.....	5.90 DB
675 MC	.....	7.50 DB

Available in 50 ft. and 100 ft. coils with factory attached terminals for antenna attachment plus 2 terminals for set attachment. Also available in continuous 500 ft. spools and 1,000 ft. reels.

### PERMAFOAM LOW LOSS COAXIAL CABLES

PERMAFOAM is a new type of coaxial cable for television systems, communication work, and all other co-ax applications. A foam polyethylene dielectric replaces the conventional solid polyethylene thus providing far lower capacity and attenuation. In fact, attenuation is approximately 25% lower than standard coaxial cables of same type. Overall jacket is our PERMALINE high molecular weight polyethylene. This non-contaminating jacket is unaffected by salt air, chemical fumes, damp rot, fungus, acids, alkalis, etc., and is remarkably resistant to all extreme weather conditions. Moisture resistance is so high that this insulation is now used on submarine cables. Will withstand severe temperature extremes and is immune to the deteriorating effects of sunlight and other ultra violet. Note: In addition to the PERMAFOAM cables listed below, any other RG U cable is available with a foam polyethylene dielectric on special order.

### FLEXFOAM ULTRA LOW CAPACITANCE MICROPHONE CABLES — EXCLUSIVE WITH COLUMBIA

Another Columbia first is a complete line of microphone cables with capacity as much as 35% lower than the best regular microphone cables available today. This drastic lowering of capacity has been made possible by the use of foamed polyethylene as the inner dielectric instead of solid polyethylene as normally used. This low capacitance means that lengths of microphone cable can be increased as much as 50%. These cables are also ideal for Hi-Fi and high quality sound work because of the extremely low attenuation, particularly at the higher audio-frequencies. The use of a special flexible vinyl as an outer jacket provides flexibility practically as good as rubber yet has much greater abrasion resistance. Color—Grey.

Also available in high glass gleaming white jackets.

### FLEXFOAM MIKE CABLE WITH BRAIDED SHIELD

Nominal Capacitance 75 MMF. Per Ft.

Also available with bright red jackets for easy identification.

### COLUMBIA SUPER-FLEX ULTRA FLEXIBLE FOAM COAXIAL CABLES

We believe Super-Flex Coaxial Cables are the finest available today — not only because of their appearance and flexibility, but because they actually out-perform any similar type of coaxial cable in use today. Cables feature High Gloss Non Contaminating Jackets and have a primary insulation of foam Polyethylene to reduce attenuation as much as 25% over regular types of coaxial cables. In addition to the above features Super-Flex Coaxial Cables will not become rigid in severe cold. Can be used with standard connectors. Ideal for citizens band and amateur use. Perfect for master television systems due to the wide range of colors available. Standard stock colors are: Black-White-Silver or Beige. Other colors to special order with a minimum of 5000 ft. of a color.

1135M	1000 Ft.	RG 59/U	Super-Flex	.242 O.D.

Cap. 16.6 MMFD Ft.

Attenuation 2.95 DB Per 100 Ft. at 100 MC

Super-Flex RG 59/U is also available with a 7/31 stranded conductor to provide still more flexibility. Center conductor can be used only with Pin Type Fittings such as used to plug into wall plates for Master Television Systems.

### HEAVY DUTY INTERCOM CABLES

For applications requiring larger copper conductors we have added to our already complete line of sound and intercom cables the following cables with 18 ga. stranded conductors to provide good flexibility. Insulation over conductors is 300 volt color coded vinyl for easy identification of pairs. Durable abrasion resistant gray vinyl jacket overall. Standard intercom color coding of pairs.

TELEPHONE AND COMMUNICATION CABLE DIRECT BURIAL TYPE

FULLY COLOR CODED

SPECIFICATIONS

Solid bare annealed copper 22 Awg. gauge conductors; thin wall, color coded, polyethylene insulation; conductors twisted to form pairs with symmetrically varying lays to minimize cross-talk; cabled (for 6 thru 50 pairs) by stranding pairs in concentric layers, or (for 75 thru 400 pairs) by stranding pairs into concentrically formed units, which are in turn cabled to form the complete assembly; non-hygroscopic binder tape furnishing high dielectric strength between shield and individual conductors; continuous copper shielding tape; high-molecular weight, polyethylene jacket.

**GENERAL APPLICATION AND ADVANTAGE**  
 APPLICATION: Communication and Telephone Cable for use in direct burial installations provides a high quality product similar to that used for aerial and duct systems, but with the addition of protective armoring. This minimizes the possibility of damage to the cable from rodents and insects and, correctly installed, reduces the dangers to the cable from sharp stones and other hazards of underground burial installations.  
 ADVANTAGE: The lightweight, but rugged construction of direct burial Communication and Telephone Cable permits fast and economical underground installation of communication systems with the assurance of dependable and enduring service. This is made possible through utilization of the same high quality polyethylene compounds that are used in its counterpart for aerial and duct type installations, with the added protection of copper armoring tapes and a durable, high-molecular weight, polyethylene jacket.

# MAGNET WIRE

Popular, profitable specialty wire packaged for easy selling in radio-electrical, department, specialty and hardware stores. Wide variety of sizes and insulations. Keeps stock in perfect order, always saleable. Supplied on Spool as shown and in Heavier Weights for whatever weight desired. Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.

## BARE NICKEL CHROMIUM WIRE

### No. 2000

Recommended for electrical heating appliances and other devices where the highest quality in performance is required, whose operating temperatures do not exceed 1850° F. Particularly suited for heavy duty rheostats and controls which require compact resistance.

## ELECTRICAL CORDAGES UNDERWRITERS APPROVED

SUPPLIED ON ATTRACTIVE TRI-COLOR  
LITHOGRAPHED METAL SPOOLS

### RUBBER HANDYCORD CENTERSTRIP

### PLASTIC HANDYCORD CENTERSTRIP

### RUBBER SHEATHED SERVICE CORD UNDERWRITERS APPROVED

#### SPECIFICATIONS AND APPLICATION

Extra flexible bare copper cotton served. 1/32" rubber insulation color coded conductors cabled with fillers, cotton wrap and black, tough rubber jacket.

For all electronic equipment, household appliances, garden and power tools.

### NEOPRENE SHEATHED SERVICE CORD UNDERWRITERS APPROVED

#### SPECIFICATIONS AND APPLICATION

Same specifications as 4200 Series except black Neoprene jacket.

For all types of equipment exposed to oils, acid and excessive moisture.

### HEATER CORD

**DABURN ELECTRONICS & CABLE CORP.**  
WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

**DAFLEX 105 PLASTIC TUBING**  
105°C POLYVINYLCHLORIDE (PVC) MEETS MIL-I-631D SPECS

Specifically compounded vinyl resins for superior all around performance. UL approved for 105°C, conforms to Spec MIL-I-631D Type F, Form U, Grades A and C. Class 1 and 2, Category 1. Resistant to heat, oil, water, chemical corrosion, fungi and aging. Very hi abrasion resistance. Will retain its flexibility. Suitable for covering and protecting wires and cables. Designed for electrical, electronic and aircraft applications. Non-flammable. Meets ASTM—D876, ASTM—D922.

**DIMENSIONAL TOLERANCES OF DAFLEX 105**

- IN STOCK**
- PROPERTIES OF DAFLEX-105 TUBING**
- Recommended for Temperatures to 105°C (220°F)
  - Low Temperature Flexibility to -30°C
  - Dielectric Strength — .020" Wall 800 V/MIL
  - Dielectric Constant 6.0
  - Tensile Strength — Min. (PSI) 2700
  - Ultimate Elongation 300%
  - Oil Resistance Excellent
  - Fungus Resistance Excellent
  - Flammability Self-Extinguishing
  - Corrosion and Abrasion Resistance Excellent

**COLORS AVAILABLE FROM STOCK**

Sizes 24 thru 2: Clear, Black, White, Yellow, Red, Green, Brown, Blue, Orange.

Sizes 3/8" thru 3/4": Clear, Black, Yellow, Red, Green, White

Sizes 1/2" thru 2 1/2": Clear, Black, White.

Additional Colors to Order.

**FIBERGLASS SLEEVING**

**DAFLEX 1200—FOR HIGH TEMPERATURE APPLICATIONS TO 1200°F FLEXIBLE FIBERGLASS SLEEVING**

Extremely flexible class H, it is non-flammable and treated for removal of all organic matter. Glass braid is fray resistant. Will provide maximum mechanical strength. Tightly braided. Applicable specs—Nema VSI. Dielectric strength determined by space factor.

**DAFLON TEFLON® SPAGHETTI TUBING**

Daflon 500 and 550 tubing is extruded from Dupont Tetrafluoroethylene resin and is unmatched by any other tubing for use in applications for hi frequencies and hi temperatures. Rated for continuous operation of 250°C it retains its toughness and flexibility thruout. Has high resistance to fatigue and stresses. Will not shrink back during soldering operation. Non-flammable, flexible, it permits miniaturization of design and compactness. Lowest coefficient of friction. Inert to all fungus growth. Conforms to MIL-I-22129C Spec. AMS 3651B, 3653B, 3654, 3655.

Made from Hi Molecular Weight Virgin "TEFLON."

**DAFLEX VINYL COATED FIBERGLASS TUBING 130°C**  
MEETS MIL-I-3190B SPECS (ASTM, NEMA GRADE B-B-1)

DAFLEX 130 is recommended for continuous temperatures up to 130°C. Constructed to provide a tough, flexible, heat resistant tubing. Made from an inorganic fiberglass base sleeving with heat resistant plastic coating, extremely flexible tough plastic insulation. Will not support combustion. Meets MIL-I-3190B, NEMA VSI ASTM D372, MIL-I-21557

**Hot Air Gun FOR DAFLEX SHRINKABLE TUBING**

DAFLON No. #E1 — For SH265, SH275 & SH290 Series #E2 — For SH400 & SH621 Series

A flameless heat source; light in weight; portable and/or permanent mounting.

An oven, hot liquids, radiant heat, open flame or soldering iron may also be used for all types of shrinkable tubing with excellent results.

**DABURN ELECTRONICS & CABLE CORP.**  
WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

**HEAT SHRINKABLE TUBING**

**SHRINKABLE IRRADIATED POLYOLEFIN TUBING**

This series is designed for maximum mechanical strength at stress or points of connection. It is strong and abrasion resistant and is supplied in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables and irregular shaped objects. When exposed to heat (235°F) the tubing shrinks 50% in diameter, 5% longitudinal contraction. Controlled shrinkage to exact requirement takes place. Meets or exceeds MIL-I-23053A Class 1 and 2. Available with UL approval. AMS 3636, 3637.

STOCK COLORS: Black, White, Red Clear. Although processed by hi-energy radiation the Daflex SH-275 and SH-290 shrinkable tubings do not at any time become radioactive or possess and residual radioactivity. † Wall thickness will be less if recovery is restricted.

**SPECIFICATIONS**

All Tests Made on Tubing in Recovered Dimension

Continuous Operating Temperature	135°C
Longitudinal Change	5% Max.
Tensile Strength	1500 PSI Min.
Ultimate Elongation	200% Min.
Special Gravity	1.29 Max.
Low Temperature Flexibility (-54°C)	No Cracking
Shrinkage Ratio	2:1 (50%)
Dielectric Strength	500 V/MIL Min.
Dielectric Constant	2.87 Max.
Corrosive Resistance	Non-Corrosive
Resistance to Soldering Iron	Excellent
Fuel, Oil, Solvent, Acid, Alkali, Hydraulic Fluid Resistance	Excellent

**DABURN SHRINKABLE POLYVINYLCHLORIDE ALL PURPOSE**  
Shrinkage Ratio: 2:1 (50%)

Flexible, shrinks 50% on heat application, less than 10% longitudinal contraction. Suitable for insulating components and cables in varying shapes and diameters. Has a higher resistance to oils than low density polyethylene. Conforms to MIL-I-631D, Type F, Form V, Grade A and C, Class 1 and 2, Cat. 1. Controlled shrinkage on application of heat to predetermined size takes place in seven seconds at above 266°F. Meets or exceeds MIL-I-23053A, Grade 5. OPERATING TEMPERATURE: -20° to +105°C.

**HEAT SHRINKABLE TEFLON<sup>†</sup> TUBING**

**DAFLON SH-400 (FEP)**

Made with Modified TEFLON<sup>†</sup> FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON<sup>†</sup>, which has a continuous service temperature of 400°F., will shrink at 300°F. Supplied in natural color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON<sup>†</sup>. Will not burn or support flame, long lengths available. Extruded.

**TUBULAR BRAID PER MIL SPEC QQ-B-575**

Tinned copper shielded braid mfd completely round per Mil Spec QQ-B-575. Maintains its round configuration. Shielding coverage is 95% or more. Used in military applications where maximum shielding is required against electrostatic interference. Useful against mechanical abrasion and stresses for cables — as grounding cable.

**TINNED COPPER SHIELDING—FLAT BRAID**

Soft annealed tinned copper woven braid, rolled flat at time of manufacture. It is extremely flexible. Used as battery grounding, bonding strap for aircraft, vehicles, marine equipment. Eliminates ignition interference and moving parts Slides over wire and cables.

**BUS BAR WIRE (Hard Drawn)**

QQ—W—343 Type S

For hooking up all types of transmitters, especially ultra short wave equipment. All bus wire is made of hard drawn copper, tinned, straightened, and cut in 2 ft. lengths.

MIL—W—3861 Types S, ASTM—B—33, ASTM—B—246—51 Specifications

DABURN No.	Nom. Circ. Mil Area	Size	Nom. O.D.

2364/10 and 2364/6 meets MIL-W-13074, 2364/12 meets MIL-W-13276 Specs.

**COPPERWELD ANTENNA WIRE**

Used where high tensile strength is required as for short wave and transmitting aeriels. Has low R.F. resistance and is ideal for transmitting doublet and directional antennas. Will maintain frequency characteristics because of its stretchless qualities. 40% conductivity.

**SUBMINIATURE TEFLON\* HOOK-UP WIRE**  
**PER MIL-W-16878D — TYPE ET — 250 VOLTS, 200°C**

Thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in microminiature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and high temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D type ET 250 volts, 200°C. Silver plated copper conductor.

**DABURN**

**DABURN ELECTRONICS & CABLE CORP.**  
WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

**HIGH VOLTAGE TEFLON\* CABLE**  
**H FILM\* KAPTON\* WIRE — FEP TEFLON CABLE**  
**NEW HI-VOLT CORONA RESISTANT TEFLON\* CABLE**

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet, approximately 1/3 lower • Minimum life expectancy: 10,000 hours.

**SMALL SIZE:**

You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms and surpasses MIL-SPEC-W-16878D.

**AVOID CORONA PROBLEMS:**

Corona resistant Teflon construction is specifically designed to retard and prevent corona penetration. Temperature variations from -60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

**DALITE™**

**HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE**  
**200°C CONTINUOUS TEMPERATURE RATING (a)**

INSULATED WITH DUPONT KAPTON® POLYIMIDE FILM WITH TEFLON™ — FEP HEAT SEALED COATING CONFORMS TO MIL-W-81381.

**CHARACTERISTICS:** Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with smaller wall thicknesses, weight and dimensions.

(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 290°C per MIL-W-16878.

**DESCRIPTION:** Single conductor, silver plated annealed copper conductors, Type H\* Polyimide film with Teflon™ FEP coating tape wrapped overall.

DESCRIPTION: Each conductor stranded tinned copper .010" polyvinylchloride insulation bonded to form flat ribbon cable.

Rated: -55°C to +105°C. Voltage Rating: 600 volts. Resists acid, alkalis, flame, moisture, oil, solvents, fungus. Conductors are color coded and separate easily for clean terminations. Saves space, time on circuit and interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies.

**SILICONE RUBBER LEAD WIRE  
600 VOLT — 200°C**

FLEXIBILITY FROM -104°C TO +400°F

Suitable for high-heat and hi-frequency applications. Resistant to acids, alkali, oil. Retains physical properties under extremes. Low power factor, low dielectric constant. Tinned copper, stranded, silicone rubber insulation, glass braid, lacquered. Color: White.

**PLASTIC SPEAKER CABLE CLEAR AND COLORED INSULATION**

**DESCRIPTION:** Conductors are parallel, stranded bare copper, color coded and clear polyvinylchloride insulation. Conductors separate quickly when split apart. Suitable for hi-fi speaker cable, miniature juke-box speaker connection, rear auto speaker extension cable. Clear insulation blends with any interior.

TEMPERATURE RATING: -20°C to +60°C. OPER. VOLTAGE: 300V

**PORTABLE CORD, CONTROL CABLES — MIL-C-3432B SERVICE CORD**

**RUBBER, NEOPRENE & PLASTIC PORTABLE CORD  
UL APPROVED — 300 AND 600 VOLT**

For power line requirement where rough usage is indicated as for amplifiers, sound systems, speakers, vacuum cleaners, washing machines, trouble lights, refrigerators, etc. Color coded. Underwriters approved. Neoprene and plastic construction recommended for equipment exposed to oil, acids, outdoor use, direct burial, etc.

SUGGESTED OPERATING TEMPERATURE: -20°C to +60°C.

Each conductor, copper conductor, paper separator, color coded, rubber insulation, filler, (where necessary) separator, tough rubber or neoprene jacket, black.

## TELEPHONE CABLE

(Meets REA-PE-22)

### EXCHANGE AREA — COMMUNICATION CABLE AERIAL, DUCT AND CONDUIT INSTALLATION

DESCRIPTION: Color coded polyethylene insulation over each bare copper conductor. Conductors are paired. Pairs are cabled with non-hygroscopic tape wrap, corrugated aluminum shield, .008" thick and black polyethylene jacket overall.

Minimal cross talk .083 microfarads/mile — average mutual capacitance, 1 KC. This is a tough, long lasting cable — withstands weathering, ultra-violet and weathering.

## TELEPHONE CABLE

### DIRECT BURIAL INSTALLATION

(Meets REA-PE-23)

DESCRIPTION: Color coded polyethylene insulation over each bare copper conductor. Conductors are paired. Pairs are cabled with non-hygroscopic tape-wrap, inner jacket of polyethylene, corrugated .005" copper shield, overall black polyethylene jacket.

Minimal cross talk .083 microfarads/mile — average mutual capacitance 1 KC. Suitable for direct burial. Tough, impervious to moisture and abrasion resistant.

**PLASTIC JACKETED BRAIDED COPPER SHIELD**

**SHIELDED PLASTIC MICROPHONE CABLE**

Will withstand abuse and is resistant to oil, moisture, aging. Have low capacitance. Hi insulation resistance and low attenuation. Will not strain or mark.

2772 — For hi impedance microphone  
2773 — For crystal, ribbon, etc. Mikes all are suitable for hi-fi interconnecting  
2774 — For hi impedance lapel mikes.  
OPERATING TEMPERATURE: -20°C to +60°C.

**SHIELDED MICROPHONE CABLE ONE CONDUCTOR**

Uses tinned copper spiral shield — for ease in soldering — extremely flexible-plastic.

**NYLON TENSION CLIPS**

Holds cable-wire-tubing-pipe-panels-many and varied uses. Made of nylon, they are insulating, non-corrosive and weather resistant. Easily fastened, easily removed. Strong and elastic.

DABURN Cat. No. 641 STD. PKG. 100, 1000 Natural Color

**DABURN ELECTRONICS & CABLE CORP.**

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

**SPIRAL WRAP FOR HARNESSSES • PUSH BUTTON TIES  
WIRE TIES • TEST LEADS • COMPONENT CLIPS**

**SPIRAL WRAP — PLASTIC TUBING  
FOR HARNESSSES**

Available in two formulations: Polyethylene and Rulan (flame retardant) Polyethylene. Easily applied. Twists on easily. Can be flexed repeatedly without cracking or breaking. Reusable, bends around sharp corners. Expandable.

**POLYETHYLENE (Clear)** TEMP. RANGE: -105°F to +200°F

**PLASTIC WIRE TIES**

Useful for temporary or permanent installation. Can be adapted for immediate bundling or harnessing. Vinyl insulated. Has .016" steel gauge, 5/32" wide, 30 lb. test.

TEMPERATURE: -20°F to +90°C.

DABURN Cat. No.	Standard Package
603 Plastic Wire Ties	100', 500', 1000'

COLORS: White, Blue, Red, Green, Yellow.

**DABURN PUSH BUTTON WIRE TIES**

Push button wire ties for harnessing wire. 4 1/2" in length, each tie is adjustable to 30 different diameters. Made of strong polyethylene, it is inert chemically and heat resistant. Breaking strength 45 to 95 lbs. After the tie is placed in hole for anchoring, wires can be replaced or added by loosening tie and pulling tight again. Designed to fit .250" to .265" hole in a .031" to .140" thick panel. Material conforms to Spec. LP590.

DABURN Cat. No.	(Specify Color)	Standard Package
601-4	Red, Blue, Yellow	100', 1000'

**DABURN NYLON  
PUSH BUTTON WIRE TIES**

Same description as No. 601-4.

5 1/2" long. Made of tough Nylon. Higher temperature range than Polyethylene.

DABURN Cat. No.	Color	Standard Package
601-5	Clear	100', 1000'

**DABURN COMPONENT CLIPS**

Hold and insulate, electrical and electronic components, accessories — spare parts. Holds firmly and still permits fast and easy insertion. Convenient for fastening clips and retainers for transistors, batteries, fuses, capacitors, resistors, lamps, etc. These Daburn clips are made of black vinyl (polyvinylchloride). Has high dielectric strength. Can be mounted with screws, rivets or other fastening means.

MATERIAL: Rigid Vinyl.

TEMPERATURE RANGE: -20° to +165°F.

STANDARD PACKAGE: 100, 1000.

## EL Cable Ties

The Electrovert EI Cable Tie is an improved tying system designed to double the harness tensile strength, provide optional application either by hand or tool, and, when used with a tool, be universally applicable with all such tools currently on the market.

### ADVANTAGES

- Self-locking, non-twisting, for permanent, neat tying.
- Hand or tool assembly... will fit all tools.
- Molded of tough, smooth, flexible nylon.
- Infinitely adjustable within their range.
- Four (4) sizes meet all bundle diameters from 1/16" to 4 3/16".
- Lightweight, chemical and abrasion resistant, high tensile strength, excellent dielectric properties, rust and rot resistant.

### SPECIFICATIONS:

**Material:** Strap—nylon per MIL-M-20693, Type I.  
Strap Lock—metal per QQS-766.

**Color:** Natural.

**Design:** To meet requirements of military standard MS-17821, MS-18034 and specification MIL-S-23190.

Patent Pending

Type No.	Military Dash No.	Bundle Dia. (inch)	Tensile Strength lbs.	C max. (in.)	D max. (in.)	E max. (in.)	H max. (in.)	J max. (in.)	L max. (in.)	Appl. Tool
EL-A	-4	1/16	1	.165	.160	.195	.045	.085	4	MS-17823-2 or equivalent
EL-B	-1	1/16	1 1/16	.225	.220	.320	.054	.165	7 5/8	MS-17823-2 or equivalent
EL-C	-2	1/16	4 3/16	.225	.220	.320	.054	.165	14 3/8	MS-17823-2 or equivalent
EL-D	-3	1/16	4	.320	.300	.520	.082	.285	14 3/8	MS-17824-2 or equivalent

All values above min. specified by military; actual tensile strength far exceeds values shown as can be substantiated by Test report of independent testing laboratory.

Packaging: Packaged in heavy gauge, heat sealed poly bags and carton, 150 per carton of each size.

## Adjustable P-Clips Nine (9) Sizes Fit Any Loop Diameter From 1/8" Through 2".

**THE SAME SIZE P-CLIP ADJUSTED TO FIT DIFFERENT BUNDLE DIAMETERS.**

**Reduces Inventory** — only nine sizes accommodate all bundle and cable diameters from 1/8" through 2" ...simplifies OEM and spare parts inventories.

**Controls Tension** — you control the tension to fit the loop to the bundle diameter.

**Simplifies Changes in Bundle Make-up** — add or remove wires, the same clip can be adjusted to the new bundle diameter.

- Molded of finest natural, virgin nylon.
- Lightweight, chemical and abrasion resistant, high tensile strength, excellent dielectric properties, rust and rot resistant.
- Typical applications include: cables, bundles of wires, components, pipes and tubing wherever a clamp, strain relief or strap is required.

Standard pack: 500. Packed in polyethylene bags in cardboard cartons.

## Spiroband

Reduces inventory costs • Three standard materials — natural polyethylene, ultraviolet resistant, fire resistant • Three diameters, each for application to a wide range of bundle sizes.

Size No.	Outside Diameter	Wall Thickness	Length of Std. Coil
1/2	.500	.062	25 ft.
1/4	.250	.045	100 ft.
1/8	.125	.032	100 ft.

1. Clear Polyethylene (Natural): General applications where there are no special or unusual environmental conditions.

Natural Spiroband meets the following specifications and standards: ASTM D 1248-65T, Type I, Class A, Grade 3; Federal Spec. L-P-390, Type I, Class L, Grades 1, 2 and 3; Federal L-P-390, Type II, Class L, Grade 4; MIL-E-16400 "Temperature Conditions" Classes 1, 2, 3 and 4; MIL-I-631C and MIL-E-5400F.

2. Ultraviolet and Weather-Resistant Polyethylene (Black): Contains special additives to resist UV and weathering in general. Additives color the material black.

Meets following specifications and standards; ASTM D 1248-65T, Type III, Class C, Grade 3; Federal Specs. L-P-390, Type III, Class L, Grade 6b; MIL-E-5400F.

3. Fire-Resistant, Self-Extinguishing Polyethylene (Bone White): Special fire-resistant additive, colors material bone white.

Meets following specifications and standards: ASTM D 635; UL-70; MIL-E-5400F.

## Strapping

Material: PVC (Polyvinylchloride); extremely strong; temperature range -26°F to +180°F.

Packing: strap, 100 ft. coil boxed; or 500 or 1000 ft. coils on reels. Studs, 1000 per box.

Installation: Stud is inserted in end of strap extending from dispenser carton; strap is then passed under and around wire bringing it back, under tension, over stud again. Strap is then cut at next hole. This operation should be repeated approximately every 6 inches or as required.

For panel mounting a Strap Saddle is available for use in combination with the AV 5 strapping. Lay wire bundle into Strap Saddle fastened to panel. Thread Strapping through wings of saddle and fasten. Material is molded nylon. Temperature range: -76°F to 250°F.

## "C" markers

Clip-on type. Quick, easy to fit after connection is made of terminal tag fitted. May be removed for re-coding. Same marker used for right or left hand entry.

Materials: Durable rigid PVC.

Colors: White with black markings (standard). Also available in black, blue, red, green and yellow.

Markings: Single; numerals 0-9, letters A to Z and symbols.

Packing: 50 markers of same size, color and marking.

Size No.	Recommended for Wires/Cable of O.D.	Size No.	Recommended for Wires/Cable of O.D.

6	.290"-.360"	.224"	.060"
4-1	.355"-.460"	.224"	.060"

Colors: White with black markings (Standard color). Black with white markings, Blue, Green, Yellow, Red with black markings.

Material: PVC MIL-1-631C, Type F, Form U, Grade a & b, Class I, Category 1, finish: glossy. Specific gravity: 1.21. Hardness (shore A): 73 av. Tensile Strength: 2600 psi. av. Ultimate Elongation: 350% av. Dielectric Strength (20 mil specimen): 750 volts/mil. Cold Brittle Temp. (50% non-failure): -65° F.

Markings: Single: numerals 0-9, letters A to Z, symbols +, -, ~, ±. Multiple: any 2, 3, 4 or 5 unit combinations of above.

Packing: Coil of 50 single markers, one size, color and character per polyethylene covered cards. Coil of 500, as above, on self-servicing reels.

Min. Quantity: per size and character: 50 single white, 500 multiple, 500 colored. Min. Order: 500 markers.

## "S" markers for cables with O.D. of more than .500"

Strap-on-marker: Size: 3/8" x 3/16" x .040", material P.V.C., colors and material same as ELECTROVERT "Z". Markings: 0-9, A-Z, +, -, ~, ±.

Applications Strip: P.V.C. — covered aluminum, 4 mm wide 0.6 mm thick.

Min. Quantity: Per size, color and character: 50 markers.

Min. Order: 500 Markers, 165' coil of strip.

Packing: Markers, 50 per indicator card pouch; strips in 165' coils.

## Grommet Strip with the "Snip-n-Fit" feature

U-shaped, strip-type grommeting material can be cut to size, provides smooth surface around edge of any hole and features quick, simple application. No adhesive or special tools required.

...offers the advantage of one strip only for applications to: round holes; square holes; rectangular holes; oval holes.

SIZE	A	B	C	APPLICATION	PACKAGING
2	.120	.100	.035	20 Ga. and smaller	100' coils
3	.150	.185	.035	18 to 12 gauge	100' coils
4	.150	.260	.045	11 to 8 gauge	100' coils
5	.190	.290	.045	8 Ga. to 3/8" thick	100' coils
6	.250	.380	.065	3/8" to 1/2" thick	50' coils

### Specifications

Standard material is natural low density polyethylene. Also available, on request, both in ultraviolet- and weather-resistant, and flame-resistant polyethylene formulations.

The standard, clear Grommet Strip meets the following specifications and standards: ASTM D 1248-65T, Type I, Class A, Grade 3; Federal Spec L-P-390, Type I, Class L, Grades 1, 2 and 3; Federal Spec L-P-390, Type II, Class L, Grade 4; MIL-P-3803; MIL-I-631C; and MIL-E-16400, Classes 1, 2, 3 and 4.

## P.V.C. Wiring Duct

Provides a better wiring system for: Control Panels/Switchgear/Computers/Electronic Equipment

1. Material: Rigid, high impact PVC.
2. Fixing: 1/8" dia. holes provided for securing screw every 6".
3. Wiring: Open slot to provide fast cable take off.
4. Cover: Snaps on or off.

Fitting: Easily cut with a saw to form tees or right angles. Life: The rigid, high impact PVC will not corrode, rot, stain or warp. Colour: Black (standard). Temperature Range: -20°F to +140°F. Length: 5 ft. (standard).

PHYSICAL PROPERTIES — Maximum stress @ yield: 12,500 p.s.i. Compressive stress @ yield: 10,040 p.s.i. Deformation under load: 2000 p.s.i., 24 hrs. 122°F: 1.25%. Electrical volume of resistivity: 122°F ohm/cm 1.4 x 10<sup>14</sup>. Electrical strength: short time; 73°F volts/mil 321V; steewise: 73°F volts/mil 313V.

# WIRE and CABLE TIES

Cable ties, an efficient, cost cutting and time proven asset to any operation, large or small, as a single replacement or on an assembly line. Easily utilized by skilled or unskilled manpower and eliminating many of the problems of difficult lacing. GC cable ties are widely used today by manufacturers of electronic equipment, by the US Government, computer manufacturers, even on automobile production lines. Consider cable ties for your operation. Learn how they cut operation costs and keep customers happy.

## ELECTRORAFT PLASTIC CABLE CLAMPS

Electrocraft Cable Clamps are used for fastening cables, harnesses, tubing, etc. Lightweight, durable, with excellent electrical and mechanical properties. Two materials: (1) Ethyl Cellulose, for normal industrial and commercial uses—where temperatures range from -40 degree F. to 185 degree F. (2) Nylon (Zytel), for extreme durability and high resistance to temperature (-60 degree F. to 300 degree F.) and most chemicals.

# ELECTRONIC COMPONENTS

## INSULATING TEFLON\* TUBING

Exceptionally tough and flexible. Withstands temperatures from 450 degree below zero F. to 500 degree above zero F. Will not melt solder joints. Outstanding dielectric properties - zero moisture absorption. Chemically inert. Completely weatherproof. Wires can be inserted much more easily than in any other tubing.

\*Registered trademark DuPont Co.

### GC NO. 75 STANDARD THIN NYLON CORD .028" DIAMETER

Nylon cord with a fiberglass core. All especially treated to prevent stretching and slipping. GC cords No. 75, 75-A and 74 will handle 90% of replacements. 25 ft., 50 ft., 100 ft., spools are supplied in permanent, clear plastic containers.

Used on 95% of the latest sets manufactured. Made of finest braided Nylon over a Fibreglas Core. It is pre-stretched and chemically treated.

Cat. No. 75A-100	100 ft. spool	Net 2.37
Cat. No. 75A-1000	1000 ft. spool	Net 14.25

### GC NO. 74 MEDIUM NYLON CORD .040" DIAMETER

Used on models of RCA, Philco, Majestic, Wells Gardner, etc. Made of finest braided Nylon over a Spun Fibreglas Core.

Cat. No. 74-25	25 ft. spool	Net .75
Cat. No. 74-50	50 ft. spool	Net 1.43
Cat. No. 74-100	100 ft. spool	Net 2.37
Cat. No. 74-1000	1000 ft. spool	Net 19.77

### GC NO. 70 BRAIDED BRONZE CABLE .035" DIAMETER

Braided phosphor bronze cable made over a Fibreglas core for greater strength and flexibility. Will not unravel.

Cat. No. 70-25	25 ft. spool	Net .97
Cat. No. 70-50	50 ft. spool	Net 1.63
Cat. No. 70-100	100 ft. spool	Net 2.70
Cat. No. 70-1000	1000 ft. spool	Net 22.20

### GC NO. 71 42-STRAND BRONZE CABLE .040" DIAMETER

42-strand twisted phosphor bronze cable used on Majestic, Bosch, Philco, etc. 42 fine strands braided over a cotton core.

Cat. No. 71-25	25 ft. spool	Net 1.23
Cat. No. 71-50	50 ft. spool	Net 1.88
Cat. No. 71-100	100 ft. spool	Net 3.52
Cat. No. 71-1000	1000 ft. spool	Net 25.80

### GC NO. 73 HEAVY NYLON CORD .062" DIAMETER

This is a heavier cord such as used on models of Philco, Silver Marshall, Majestic, Brunswick, etc.

Cat. No. 73-25	25 ft. spool	Net 1.02
Cat. No. 73-50	50 ft. spool	Net 1.73
Cat. No. 73-100	100 ft. spool	Net 2.97
Cat. No. 73-1000	1000 ft. spool	Net 24.90

### GC NO. 76 SPECIAL THIN BRONZE CABLE .023" DIAMETER

Extra thin braided bronze cable such as is used on GE and RCA sets. Also used for speaker cones, preamps, etc.

Cat. No. 76-25	25 ft. spool	Net .97
Cat. No. 76-50	50 ft. spool	Net 1.63
Cat. No. 76-100	100 ft. spool	Net 2.70
Cat. No. 76-1000	1000 ft. spool	Net 22.20

## GC COLOR TV NO-STRETCH DIAL CORD

EXTRA FINE .025" diameter - supplied on metal spools.	STANDARD .028" diameter - supplied on metal spools.	MEDIUM .040" diameter - supplied on metal spools.
Cat. No. 87-25 25 ft. spool Net 90	Cat. No. 88-25 25 ft. spool Net 90	Cat. No. 89-25 25 ft. spool Net 90
Cat. No. 87-100 100 ft. spool Net 2.70	Cat. No. 88-100 100 ft. spool Net 2.70	Cat. No. 89-100 100 ft. spool Net 2.70

### GC DIAL CABLE TOOL

A handy tool to aid in replacing worn out cables or cables slipped off of drums, to replace dial cord springs also.

Cat. No. 5096 Net .60

### GC DIAL CORD NON-SLIP DRESSING STICK

Simply rub the stick on cord and job is done. Prevents and stops slipping.

Cat. No. 1212 Net .25

### GC LAMINATED PHENOLIC PLASTIC PANELS

Black laminated panels. 1/16" thick black. Color: black.

Cat. No. 590 6" x 6"	Net .42
Cat. No. 591 6" x 12"	Net .82
Cat. No. 592 12" x 12"	Net 1.58

### GC RADIO SPAGHETTI

High grade spaghetti for radio-television work. Average dielectric strength 4000 volts. Very flexible. Smoothly coated with best grades of varnish. Material is approved by A.S.T.M. Colors: Black, Brown, Red, Green and Yellow (Specify color). 30" lengths.

Cat. No. 500 No. 20, fit 20 wire	Net .15
Cat. No. 503 No. 17, fit 18 wire	Net .17
Cat. No. 506 No. 14, fit 14 wire	Net .17
Cat. No. 508 No. 12, fit 12 wire	Net .17
Cat. No. 512 I.D. 1/8"	Net .23
Cat. No. 515 I.D. 3/16"	Net .25
Cat. No. 518 I.D. 1/4"	Net .40
Cat. No. 521 I.D. 3/8" (resist. size)	Net .63
Cat. No. 522 I.D. 7/16" (red and black)	Net .73
Cat. No. 523 I.D. 1/2" (red and black)	Net 1.03

### GC FIBEROID FISH PAPER

Fish paper has many uses around the shops for repair jobs where electrical insulation is required. Roll 240 sq. in.

Cat. No. 560 .010" Net .50

### GC AC-DC INDOOR ANTENNA WIRE

Antenna lead wire for indoor type AC-DC sets. Flexible copper wire covered with brown plastic insulation.

Cat. No. 840 25 ft. coil Net .37

### GC GENFLEX PLASTIC TUBING

High grade extremely flexible plastic tubing for radio and electronic insulation work. Highly resistant to cold or heat. High dielectric strength, average 8000 volts.

Colors: Black, Red, Green and Clear (Specify color).

Cat. No. 603 1/8 B-S Gauge, .042 I.D., 20' pkg.	Net .82
Cat. No. 605 1/8 B-S Gauge, .053 I.D., 20' pkg.	Net .82
Cat. No. 607 1/8 B-S Gauge, .066 I.D., 20' pkg.	Net .82
Cat. No. 609 1/2 B-S Gauge, .085 I.D., 20' pkg.	Net .82
Cat. No. 611 10 B-S Gauge, .106 I.D., 15' pkg.	Net .82
Cat. No. 613 8 B-S Gauge, .133 I.D., 15' pkg.	Net .82
Cat. No. 616 6 B-S Gauge, .166 I.D., 10' pkg.	Net .82
Cat. No. 617 4 B-S Gauge, .208 I.D., 10' pkg.	Net .82
Cat. No. 620 2 B-S Gauge, .263 I.D., 10' pkg.	Net .82

### GC ASSORTED SPAGHETTI KIT

An assortment of 7 1/2" lengths of spaghetti sleeving. 26 lengths to the kit. Sizes include from No. 17 wire to 3/8" I.D.

Cat. No. 550 Net .40

### SPAGHETTI AND SLEEVING ASSORTMENT

A variety of sizes and colors are included of high grade varnish tubing. Put up in attractive box.

Cat. No. 551 Net .90

### GC INSULATING CAMBRIC

Dry yellow varnished cambric for field coils, transformers, chokes, resistors, motors, etc. Roll 210 sq. in.

Cat. No. 549 .010" Net .78

**NET PER PKG. \$ .99**

Complete sets of professional appearing titles for all engineering and experimental electronic applications. Decal-type application. Especially suited for designers, Hi-Fi enthusiasts, do-it-yourself group.

**ICORE**  
ELECTRO-PLASTICS, INC.

a subsidiary of ICORE INDUSTRIES

During the manufacturing process, HEATRAX tubing is expanded beyond its original extruded diameter. It will shrink back, or recover to, this original state when heat is applied briefly. Special formulations and irradiation improve its ability to return to original dimensions, assure more uniform recovery, and develop superior stress and crack resistance. When irradiated, HEATRAX materials will not melt at elevated temperatures.

HEATRAX offers these advantages in application:

1. Elastic memory—tubing shrinks quickly on application of heat to form a tight cover, even over irregularly shaped objects
2. Thermal stability
3. Outstanding electrical characteristics
4. Excellent mechanical properties
5. Excellent chemical and solvent resistance

The table of Typical Properties below supplies comparative characteristics for the various HEATRAX materials. The following brief description will also be helpful in selecting the proper type for specific applications:

**Catalog #HIX—IRRADIATED POLYOLEFIN**

Shrink ratio 2 to 1 (expanded to recovered diameter) Temperature range: from 135°C/275°F to -55°C/-65°F

This flexible, general purpose material will not cold flow, never melts and will not split on applications within temperature range. It is less expensive than Teflon HEATRAX. Compared with Vinyl HEATRAX, it is superior in mechanical and dielectric strength, and has less longitudinal shrinkage, higher corrosion resistance and a wider temperature range.

HIX is supplied in two classes:  
I-Flame Retarded II-Clear (not flame retarded)  
Available with U/L approval.

**Catalog #HRX—IRRADIATED SEMI-RIGID POLYOLEFIN**

Shrink ratio 2 to 1 (expanded to recovered diameter) Temperature range: from 135°C/275°F to -55°C/-65°F

This material is designed for strain relief applications and protection of delicate components. It will not cold flow, never melts, and will not split on applications within temperature range. It has better gripping power and tensile strength than HIX Irradiated Polyolefin, HIX Irradiated Vinyl and HVX Vinyl.

HRX is supplied in two classes:  
I-Flame Retarded II-Clear (not flame retarded)

**Catalog #HCX—IRRADIATED FLEXIBLE VINYL**  
Shrink ratio 2 to 1 (expanded to recovered diameter) Temperature range: from 105°C/20°F to -20°C/-5°F

This general purpose material is more flexible and less expensive than HIX Irradiated Polyolefin. Compared with HVX Flexible Vinyl, it is superior in flexibility and crack resistance and has slightly better mechanical strength.

**Catalog #HVX—FLEXIBLE VINYL**

Shrink ratio 2 to 1 (expanded to recovered diameter) Temperature range: from 95°C/200°F to -10°C/15°F

This material has the lowest shrink temperature and the lowest cost of all HEATRAX tubing. HVX is offered in 4 colors.

**TEFLON HEATRAX:**

Flexible Teflon is primarily for use in high thermal and difficult chemical environmental applications, or where a low coefficient of friction is desirable. It provides excellent electrical insulation, has excellent chemical and solvent resistance. It has the widest temperature range, best dielectric and corrosion resistant properties of all HEATRAX tubings. Temperature range of all Teflon HEATRAX is from 260°C/500°F to -65°C/-85°F.

The following types of Teflon HEATRAX are available:

- Cat. #HTX-Thin Wall Teflon (AWG sizes)-Shrink ratio 1½ to 1 (expanded to recovered diameter)  
Cat. #HSX-Stand. Wall Teflon (AWG sizes)-Shrink ratio 1½ to 1 (expanded to recovered diameter)  
Cat. #HFX-4x Teflon (fractional sizes)-Shrink ratio is 4 to 1 (expanded to recovered diameter)

**HEATRAX SPECIFICATION CHART: TYPICAL PROPERTIES**

**SHRINKING METHODS  
HEAT GUN & ACCESSORIES**

Excellent results may be obtained by dipping HEATRAX in hot liquids, by oven heat, infrared heat, or open flame. However, the HEATRAX Heat Gun offers the easiest method of applying heat to all types of shrinkable tubing.

**HEATRAX Heat Gun:**

The HEATRAX Heat Gun is a flameless hot air torch — lightweight and mobile — or adaptable for permanent mounting. Three models, with different temperature ranges, are available. All models have adjustable air volume control and a three-way switch (hot-cool-off). All Heat Guns operate on 115V, 50/60 cycles and deliver an air volume of 35 CFM with a velocity of 3000 FPM.

**HEATRAX HEAT GUN & ACCESSORIES**

Cat. #	Current (Amp.)	Temperature Range		Price Each
		°C	°F	
HG-103	12	150/260	300/500	\$40.25
HG-105	14	260/400	500/750	45.35
HG-107	18	400/525	750/1000	56.25

In addition, adaptors for the Heatgun (shown below) have been developed to concentrate heat in specific application areas.

a subsidiary of ICORE INDUSTRIES

This expandable spiral-cut plastic wrap harnesses, insulates and protects wire assemblies up to 8" diameter.

#### HARNESSING:

Spiral Wrap applies a strong grip developed both from its torsional cut and the memory of plastic materials used. It retains its strength under repeated flexing and bending, follows wire paths easily, and makes neat, free-running cables. It is extremely useful on long continuous runs where many leads are required; wires can enter or break out at any point. Spiral Wrap can be removed easily for trouble shooting and then re-applied.

#### PROTECTION:

Spiral Wrap is available in materials which accommodate a heat range from -265°C/-450°F to 260°C/500°F for insulation purposes. It is also available in materials with high abrasion resistance and in materials for use outdoors where resistance to ultra-violet rays is required.

# SPIRAL WRAP®

#### MATERIAL DESCRIPTION

Polyethylene	Versatile, low cost material
Polyethylene, black	In addition to above, this material is designed for outdoor use. It resists ultra-violet rays. Oper. Temp. -75°C/-105°F to 100°C/215°F.
Rulan (carbon impregnated polyethylene)	Used primarily in applications where a low cost self-extinguishing material is required. Oper. Temp. -25°C/-10°F to 95°C/200°F.
Nylon, natural	This material offers best mechanical protection; also has a higher temperature rating than polyethylene. Oper. Temp. -100°C/-150°F to 150°C/300°C.
Nylon, black	In addition to the above, this material is designed for outdoor use; it resists ultra-violet rays. Oper. Temp. -100°C/-150°F to 110°C/230°F.
Teflon	Primarily used in high temperature applications; also has an extremely low operating temperature, excellent dielectric properties and is not affected by organic solvents or acids. Oper. Temp. -265°C/-450°F to 260°C/500°F.

# TUBING

## VINYL, FIBERGLASS & TEFLON

ICORE offers a complete line of Vinyl, Fiberglass, and Teflon tubing for electrical insulation applications.

	Cat. #	Class	
<b>Vinyl</b>	SLV-105	A	Low cost, high temperature vinyl for applications up to 105°C/220°F.
	SLV-40	—	Low temperature vinyl for applications down to -65°C/-85°F.
<b>Fiberglass</b>	SLV-130	B	Grade B Abrasion resistant fiberglass tubing for applications up to 130°C/225°F.
	SLV-1200	C	Tightly braided 100% fiberglass tubing for applications up to 650°C/1200°F.
<b>Teflon</b>	STT	C	Excellent electrical insulating properties, good flexibility, chemical inertness for applications up to 260°C/500°F.
	STS		Teflon thin wall
	STL		Teflon standard wall
	TTF		Teflon lightweight (extra thin wall) Teflon tubing in fractional sizes (heavy wall).

**FIBERGLASS TUBING**

**CAT. #SLV-1200 HIGH TEMPERATURE, CLASS C**

This sleeving of tightly braided 100% fiberglass is for use in temperatures up to 650°C/1200°F. Closely woven construction provides maximum abrasion resistance with high flexibility. Material is treated to remove all organic matter and to render the glass braid fray resistant. Material available in double wall on request.

**CAT. #SLV-130 CLASS B, GRADE B**

This combination of fiberglass and plastic insulation material has good abrasion resistance, excellent cut through characteristics, and ends will not fray. Widely used in applications up to 130°C/265°F where tubing is subject to knotting, bending and high torque.

Conforms to: MIL-I-3190B

Teflon is rated for continuous operation at 260°C/500°F. A hot soldering iron will not shrink back Teflon as frequently happens with conventional thermoplastic materials. In addition, Teflon has an excellent low temperature rating (-65°C/-85°F).

# TEFLON TFE TUBING

ICORE Teflon tubing offers the exceptional combination of properties inherent in Teflon: heat resistance, excellent electrical insulating characteristics, flexibility, and good abrasion resistance. Special extrusion techniques produce pinhole-free tubing of uniform concentricity which assures maximum mechanical and electrical protection.

ICORE Teflon tubing has high resistance to flexural fatigue and stress, will not absorb moisture and has lowest coefficient of friction of all materials. Ideal for applications where heat resistance, flexibility, excellent dielectric values, and chemically inert properties are required.

# LACING TAPE and CORD

Catalog #LTN—Flat Braided Nylon Tape LCN—Round Twisted Nylon Cord  
 LTD—Flat Braided Dacron Tape LCL—Round Twisted Linen Cord  
 LTT—Flat Braided Teflon Tape LCV—Round Vinyl Cord

a subsidiary of ICORE INDUSTRIES

**General Description**

**Flat Braided Tape**—Designed to create a wider contact area with insulation so tape does not slip away from contact point. It is more flexible than cord and easier on the user's hand. Flat tapes do not appreciably increase the diameter of the cable. Recommended for all types of harness work.

**Round Twisted Cord**—Suited particularly for wires having a secondary insulation or those utilizing a textile as an insulation material. It may also be used for plastic and rubber insulated wire.

**Materials**

**Nylon**—synthetic fiber resistant to fungus and most acids, with excellent tensile strength and abrasion resistance.

**Dacron**—has all of nylon characteristics, as well as better acid resistance, less elongation and less susceptibility to discoloration.

**Linen**—Available in cord only, has less stretch than nylon and dacron and is excellent for serving heavy cable and ropes. Also used for lacing wire bundles where a stiffer tie is required, as in switchboards, motors, etc.

**Teflon**—a specially developed fiberglass flatbraid of Teflon coated yarns designed for high temperature applications up to 260°C/500°F. Teflon is bonded to fiberglass to keep tape from fraying. Vinyl—inexpensive material used in bundling and harnessing wires.

**Finishes**—the function of the finish is to permit easier handling of the material (reduce fray), and improve knot retention.

**ICORE Standard MW Finish**—A micro-crystalline wax with melting point above 55°C/130°F and non-flaking characteristics. It is compounded to develop excellent knot retention, yet not give a waxy feel to user.

**Special PVA Finish**—Polyvinyl acetate resin with a melting point above 175°C/350°F for use where a wax-free type or higher operating temperature is specified.

**Special HPVA Finish**—(Similar to GE) Polyvinyl acetate with a heavier finish which permits easier handling and better knot retention.

**Special SR Finish**—A special coating of fungistatic synthetic rubber containing no corrosive compounding ingredients. It has best knot characteristics of all materials, along with good non-dusting or flaking properties. Being soft and pliable, it will not injure user's hands.

# ZIPPER TUBING

Zipper Tubing is an ideal jacketing material to enclose, insulate, waterproof, shield, mark and identify wire and cable assemblies. The wrap-around, quick zip characteristics allow wire harnesses to be covered at any point, even after connections have been made. The closure device is a zipper running along the zipper track which permits easy re-entry for inspection or modification. Zipper track may

be permanently closed and waterproofed with the application of Zipper Tubing Sealer over the track. The ease of application of Zipper Tubing allows significant labor savings.

# CABLE CLAMPS

## ETHYL CELLULOSE CLAMPS

Low cost clamp having excellent shock resistance in temperature range -40°C/-40°F to 85°C/185°F.

Conforms to: 7-21-44 Army-Navy Aeronautical AN 742

## NYLON CLAMPS

Durable clamp that is tougher, resists acids better and has a higher operating temperature 135°C/275°F than ethyl cellulose.

Conforms to: MIL-P-17091A & Amend 2, MIL-P-17091B, P-20693, Type 1, MS-39014\*, MIL-C-21565\*

\* Conforms to dimensional requirements and material specifications.

## CONTINUOUS STRIP GROMMETS

Gromstrip is a continuous length of extruded U-channel for use as a protective covering on sharp edges. It can be cut to desired length and easily inserted into any hole, regardless of shape or configuration. (On angles less than 90°, miter the two outside edges for better fit).

Gromstrip requires minimum space, grips surfaces snugly, and won't jar loose. Wherever wires pass through a metal piece, Gromstrip used on the sharp edges will eliminate cutting and fraying of the wires.

The use of continuous strips sharply reduces inventory of stock grommets. The addition of sizes #6 and #7 now allows the use of Gromstrip up to 1/2" thickness.

GSP & GSN Color — Natural

New tough polyethylene see-thru dispenser pak allows users to pull out enough material for requirements: a quick glance tells when to re-order.

Polyethylene — used for general application

Nylon — used where a particularly tough and abrasive resistant material is desired; it has a higher operating temperature, and better dielectric constant than polyethylene.

Teflon — used for high temperature applications. Available on quotation only.

PANDUIT CORP.

# In Stock MIL-SPEC

## Multiple Conductor Control Cables

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cables. Conductors are of tinned copper strand with  $\frac{1}{4}$ " vinyl primary insulation for use up to 105°C per MIL-W-16878D Type C†. Insulated for 1000 volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per MIL-STD. 122.

All conductors are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black polyvinyl-chloride thermoplastic, meeting specification MIL-I-631 Class F, or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene jackets at added cost.)\*

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

\* (Standard put-up for Neoprene jacketed cable is 250 ft.)

† Insulated Conductors are also UL approved under UL type 1007 AWM, and are CSA approved as type TR 64.

### TECHNICAL DATA (all cables)

<b>Insulation Breakdown Voltage:</b>	Greater than 8000 volts AC RMS, 60 cps.
<b>Capacitance:</b>	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.
<b>Insulation Leakage Res.:</b>	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
<b>Sheath Leakage Res.:</b>	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
<b>Usable Temp. Range:</b>	Suitable for continuous use from +105°C to -55°C.
<b>Cold Bending Capability:</b>	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to -20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at -40°C, or for continuous flexing service to -55°C, specify our neoprene sheath, in lieu of plastic sheath.

### MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

# NATIONAL WIRE & CABLE CORP.

# SPECIAL SHIELDED DATA & INSTRUMENTATION CABLES

Designed for Low Level or Low Capacitance Needs • All feature extremely low dielectric leakage both in insulation and outer sheath • Suitable for very long runs in tray or conduit. (1000 ft and up).

## SINGLE CONDUCTOR SHIELDED

## INSULATION

## EXTRUDED VINYL AND TEFLON TUBING

SIZES: #24 through 2½" Diam.

PUT-UP: #24 to ¾" on spools, completely sealed in plastic wrapping. Size ¾" to 2½" in tied coils.

SPEC. Vinyl +105°C to -32°C Type: MIL-I-631C, ASTM-D922 Grade C

GRADES: Vinyl + 80°C to -55°C Type: MIL-I-7444B, MIL-I-22076

Teflon +250°C to -55°C Type: MIL-I-22129B (#20 to #2)

## NATIONAL OPENLINE

DESIGNED FOR COMMERCIAL TV DISTRIBUTION SYSTEMS AND RF POWER TRANSMISSION

Specifications: two inch spacing between conductors . . . 12 gauge copperweld . . . 470 ohm impedance . . . attenuation: 150 mc 0.25 DB PER 100 FEET, AT 30 mc 0.1 DB PER 100 FEET. Velocity factor 0.975 . . . copperweld steel for maximum strength and electrical stability, and to insure permanent uniform performance . . . Spreaders are brown polystyrene, spaced at average five foot intervals, staggered slightly to avoid spurious resonances.

Also 1" & ½" copper line for TV leadin Formvar coated.

**COMPLETE WIRE  
AND CABLE  
INVENTORY  
ALWAYS  
AVAILABLE FOR  
IMMEDIATE  
SHIPMENT!**

National Wire and Cable Corporation maintains one of the largest and most complete stocks of electronic and aircraft wire and cable in the nation. Total footage of floor stocks exceeds 50 million feet!

Your immediate source for "MIL and Jan-Spec" wires, coaxial cables and vinyl sleeving.

Special color coded, shielded and jacketed combinations of hook-up wire and multi-conductor cables can be made to your specifications and delivered promptly without delay.

**SHORT WAVE LISTENING ANTENNA**  
COMPLETELY ASSEMBLED . . .  
READY FOR INSTALLATION AND USE  
**#4301**

Can be mounted almost anywhere . . . pole-to-pole, pole-to-tree, garage-to-house, under the eaves, in the attic, etc. Scientifically tuned for 1.8 to 30 mc coverage. Antenna package includes 50 feet of copper wire, attached at both ends to low-loss insulators. Attached to each insulator is 15 feet of waterproof non-stretch rope for mounting the antenna. At one end of the antenna is 50 feet of insulated copper lead-in wire. Comes with detailed instructions,

\* Available in special tangle-free self-dispensing packages.  
\*\* 18 Gauge Copperweld, Solid, Non Stretch. Stranded Available, on request.  
† 22 ga.

**TANGLE-FREE SELF-DISPENSING WIRE PACKAGES**

These easy to handle wire dispenser packages let you take the exact length you need. The rest stays neatly in place . . . never tangled, always clean. Ask your Saxton representative about the special dispenser "LIFELINE" series of wire packages.

**◆LIFELINE TWIN LEAD**

**No. 1665**  
Full size, heavy duty deluxe twin lead constructed of the finest materials. Chemically protected against deterioration. In Magic Dispenser. Saxton LTL (100-ft.), Brown or Clear.

**LIFELINE 100◆ ROTOR CABLE**

◆ Available 1000' spools.

**No. 1666**  
Extra heavy duty 4-conductor rotor cable. Superior quality. One leg polarized for easy reference. Sold in exclusive Magic dispenser carton.

Saxton L4FC (100-ft.), Brown

# COLORWIRE TRANSMISSION LINES

Provides Maximum Transfer of Signal Energy from Antenna to Set  
GOOD FOR VHF: EXCELLENT FOR UHF: SUPERB FOR COLOR TV

A full range of quality, low-loss transmission lines and accessories that answer all-channel and color reception problems. See details of each type below

**Saxton #1041 FOIL SHIELDED TWIN-FOAM**  
300 ohm COLOR UHF-VHF  
ALUMINIZED MYLAR SHIELOE CABLE  
(Requires No Transformers)

**FOIL SHIELDED TWIN TRANSMISSION LINE WITH GROUND RUNNER #1041†\***

Low loss "Magic Membrane" construction, plus noise repelling 100% mylar foil shield and abrasion resistant overall jacket (See photo). Superb smear-free color reception on UHF or VHF.

**Saxton SUPER TWIN FOAM #1037**  
300 ohm COLOR UHF-VHF  
(Requires No Transformers)

**SUPER TWIN FOAM #1037†**

Super Twin Foam with "Magic Membrane" construction, porous, low loss, air filled, premium foam dielectric separates two prestretched, heavy duty, copperweld conductors. Ultra-violet resistant — carbon black outer polyethylene jacket, highly flexible, efficient, abrasion resistant transmission line in wet or dry weather. Guaranteed for 20 years. Excellent for all normal color requirements. Needs no transformers. VHF, UHF or FM. 20 gauge.

**TWIN "BLUE" FOAM #1045†**

Similar in construction to Super Twin Foam #1037 — economy version. Foam dielectric "Magic Membrane" construction. #22 gauge stranded copper conductors.

\* Patent Applied for  
 † Magic Membrane — The special foam construction with the longest leakage path — approaches the efficiency of air dielectric.

## COLORIFIC FACTORY SWEEP COAXIAL CABLE SYSTEMS

**Uses #1594 (VHF Type) RG/59-U Foam**

Designed particularly for noise problem areas. Basic impedance 72 ohms. Low loss dielectric construction to cut down attenuation and signal leakage. Unaffected by stray fields and proximity to metals. Good for VHF and color, adequate for UHF. Complete with factory installed terminations and weather boot, with or without indoor and outdoor 72/300 ohm matching transformers. Attractively packaged.

**Uses #1598 (VHF or UHF)  
Special RG/59-U Foam**

Specially designed, new 72 ohm all-channel coax for full 82-channel coverage. Slightly higher cost, much higher efficiency.

SAXTON NO.	DESCRIPTION	FEET
S-900	Low loss, foam-filled RG59/U complete with pre-attached F59 fittings each end, weather boot and complete instructions. Uses #1594.	100
S-901	Same as above.	75
S-902	Same as above.	50
S-903	Same as above, including two 72/300 ohm matching transformers — one for outdoor use, one indoor, complete with mounting hardware.	100
S-904	Same as above.	75
S-905	Same as above.	50

SAXTON NO.	DESCRIPTION	FEET
S-907	All-channel (82 channel) coax complete with terminal fittings on each end, weather boot, and complete instructions. Uses #1598.	100
S-908	Same as S-907	75
S-909	Same as S-907	50
S-910	Same as S-907, except includes two special matching transformers — one for indoor; one outdoor. Also includes matching fitting and hardware.	100
S-911	Same as S-910	75
S-912	Same as S-910	50
S-330*	Indoor matching transformer — matches 75 ohm coaxial cable to 300 ohm terminals on TV receivers — includes fittings and mounting hardware. For UHF, VHF, color.	
S-331*	Outdoor matching transformer — matches from 300 ohms to 72 ohms — connects from antenna to transmission line — includes fittings and mounting hardware. For UHF, VHF, color.	

\* Use with all S-900 Series except S-906.

# WINDOW-PAKS

Saxton's "S" and "TS" Series of Window-Paks keep the products clean and tangle free . . . and increase sales turnovers. These quality products cover a wide selection of wire and cable products as well as a wide variety of in-demand cable and hardware assemblies. Properly displayed and serviced, these items generate maximum sales with minimum sales time.

THESE WINDOW-PAKS ARE USEFUL FOR:  
SERVICEMEN, TECHNICIANS, ENGINEERS,  
STUDENTS, HOBBYISTS AND HAMS.

Saxton No.	Description	Feet	Std. Case
<b>WINDOW-PAK "S" SERIES</b>			
S-92R	Hook-up wire — tinned copper — stranded — 12 ga. power supply and filament leads—general purpose	15	15
S-93B	Hook-up wire — tinned copper — stranded — 14 ga. power supply and filament leads — general purpose — heavy duty	17	15
S-94B	Hook-up wire — tinned copper — stranded — general purpose — heavy duty	23	15
S-95	Ignition wire for auto, boat or model airplane	20	8
S-96	Audio cable — shielded — 2 cond. — 22 ga. w/jacket — general purpose	16	15
S-98	Mike cable — 2 cond. low impedance — high quality audio cable	18	10
S-102	Intercom wire — 2 cond. — no jacket (excellent thermostat wire)	60	10
S-103	Intercom wire — 2 cond. — no jacket (excellent thermostat wire)	35	10
S-104	Intercom wire — 3 cond. — no jacket (excellent thermostat wire)	40	10
S-105	Intercom wire — 3 cond. — w/ jacket (excellent thermostat wire)	28	10
S-106	Microphone cable — single cond. — low capacitance — high impedance — heavy duty	20	10
S-107	Zip cord — Vinyl — 2 cond. — 18 ga. lamp cord — available in gray, brown and white	30	10
S-109	Zip cord — rubber — extra flexible — lamp cord — oil resistant — available in brown and white	25	10
S-110	Guy wire — galvanized steel — 4 strand — rust resistant — for garden, house or boat use	100	10
S-111	Speaker cable — clear plastic — polarized — heavy duty — also may be used for lamp wiring	25	10
S-125	Antenna wire — copper — 7/24 — prestretched	50	15
S-126	Antenna wire — copper — 7/26 — prestretched	50	15
S-127	Guy wire — aluminum — rust proof — will not stain wood or masonry — for guying and general utility	40	10
S-128	Guy wire — steel — 6 strand — 20 ga. — bright galvanized — rust resistant	70	10
S-130	Ground wire — aluminum — dead soft #8 A/VG solid — general utility	40	10
S-135	Copperweld wire — hard drawn — hi-conductivity antenna wire—18 ga. — non-stretch — general utility — home — farm — garden — electric fences — seeded lawn protection — do it yourself projects	100	15
S-147*	Telephone extension kit — color coded — 4 conductor wire — with plug and jack	25	10
S-148	Microphone cable — 3 conductor — one lead shielded — 2 leads unshielded — ideal for push to talk microphone application	16	10
S-149*	Telephone extension cord — 4 conductor — std. 4-pin molded plug and jack — adds mobility to phone or intercom	25	7
S-150	Shielded ignition wire	15	10
S-160	Television wire — twin lead — 300 ohm — crystal clear — highly efficient for indoor use	21	10
S-161	Four conductor wires; with jacket. Intercom, electric trains, kits, etc.	20	10
S-203*	Lazy bones — on/off appliance control for T.V., radio, fan, lamp, heater, percolator	15	10
S-204*	Aerial kit — for improved broadcast and shortwave reception	—	9
S-206†	Safe-pull — improved type of plug-in device for master T.V. antenna system. Replaces popular Motorola type plug	20	10
S-208*	Retractable coiled cord — microphone cable — 1 shielded — 2 unshielded	6	15
S-209*	Retractable coiled cord — microphone cable — 1 shielded — 3 unshielded	6	15
S-211*	Aerial kit — de luxe — for improved broadcast and shortwave reception — heavy duty antenna wire & heavy duty lead-in wire	—	7
S-213 ‡	Same as S-206 but RCA plugs one end, lugs other end.	20	10
S-214*	Replacement cord — UL approved, with molded male plug one end, tinned wires other end. Suitable for vacuum cleaners, electric brooms, power tools, etc.	18	7
S-215*	Retractable telephone handset extension cord — available in assorted colors	25	10
S-216*	Extension cord — heavy duty de luxe type, with cube tap one end, and molded male plug other end	18	7
S-222*	Stereo extension cord — To be used as extension cord for stereo headphones	15	10
S-223*	Stereo extension cord — To be used as extension cord for stereo headphones	25	10

Saxton No.	Description	Feet	Std. Case
S-230	Antenna wire — copper — 7/22 — prestretched	50	15
S-231	Retractable electric guitar extension cord complete with regular and offset plugs	15	10
S-232*	Telephone handset extension — retractile — available in black, white or beige	15	10
S-233	Four conductor, flat extra flexible polarized cable for use with stereo tape players— can also be used for train sets, intercom and other purposes where 4 wires are required.	—	—
S-234	Coaxial cable — RG58U — 52 ohm — for CB — HAM — fixed or mobile use	22	10
S-235	Coaxial cable — RG59U — 72 ohm — antenna leads	32	10
S-301*	Test leads — 3 color coded — 30" leads with alligator clips attached at both ends — for all automotive and household use	—	20
S-302	Test leads — (2) 72" leads with alligator clips	—	20
S-306*	FM antenna — folded dipole — ideal for FM	—	14
S-309	Heavy duty lightning arrester de luxe type — ceramic shell — externally fused, suitable for UHF & VHF applications, can accommodate coaxial cable, tubular, oval and flat twin lead as well as open wire line, with virtually no effect on the overall performance of the sets	—	12
S-310	Balun type shielded 2 set coupler	—	18
S-311	3 Set coupler — completely enclosed in aluminum body, small and compact lightweight — maximum shielding, all other specifications same as 2 set coupler	—	18
S-317	Braided bonding strap — used for grounding	10	20
S-318*	Shielded audio cables — retractile — color coded for quick and easy identification. RCA type plugs each end	66"	20
S-319	Telephone plug and jack — make your own telephone extensions, move your phones from room to room	—	36
S-320	Telephone plug only — (Male)	—	36
S-325*	Shielded audio cable — retractile — color coded — RCA type plug one end, tinned leads other end	66"	20
S-326*	Shielded audio cable — retractile — color coded — RCA type plugs one end, alligator clips other end	66"	20
S-327*	UHF folded antenna-dipole	—	18
S-330	Indoor matching transformer — matches 75 ohm coax to 300 ohm terminals on TV sets — with F59 connector	—	22
S-331	Outdoor matching transformer — 300 ohm to 75 ohm — with mounting strip, F59 cable connector and weather boot	—	18
S-332	UHF-VHF-FM antenna splitter — triple tuned — band pass filter — requires 2 antennas, one down lead	—	18
S-333*	Guitar extension cord — heavy duty — not retractile	20	20
S-334*	Audio accessory cord — with plug and alligator clips — for portable and transistor radio speaker extensions and general utility applications	6	20
S-335*	Audio accessory cord — with built-in matching network — complete with plug and alligator clips — record directly from output without overloading	8	20
S-336*	Audio accessory cord — interconnects most audio components — RCA plugs each end	6	20
S-337*	Audio accessory cord — interconnects most audio components — RCA plugs each end	10	20
S-400	Matching transformer kit — 300 ohm to 75 ohm — includes one S-330 transformer, one S-331 outdoor transformer, one mounting strap, one F59 connector and one weather boot	—	8
S-501	Telephone jack and wall plate — for internal installation of phone extensions	—	12
S-810*	Citizens Band extension—RG58/U with PL-259 and UG-175/U reducer one end and two universal terminating lugs other end	20	10
S-811*	Citizens Band extension—RG58/U with PL-259 and UG-175/U at both ends	20	10
S-812	CB cable assembly 24" with PL259 plug and reducer at each end perfect for interconnecting ham or CB equipment—used in measuring signal strength, standing wave ratios — excellent for use with coaxial relays or antenna selection switches.	—	10
TS-25	Twin lead — 300 ohm — for improved FM or T.V. reception — brown, clear, gold & silver	25	10
TS-50	Twin lead — 300 ohm — for improved FM or T.V. reception — brown, clear, gold & silver	50	20
TS-75	Twin lead — 300 ohm — same as above	75	20
TS-100	Twin lead — 300 ohm — same as above	100	20

†S-205 Similar to S-206 except 10'. ‡S-212 Similar to S-213 except 10'.

# WIRE DISPENSER PACKAGES

**UNI-SPOOL  
WIRE BANKS**

**TRI-SPOOL  
WIRE BANKS**

A wide variety of wire and cable products are available in Saxton's two types of self-dispensing wire banks . . . the Uni-Spool and Tri-Spool. These packages provide easy access to desired lengths of wire and cable.

Saxton No.	Description	Feet	Std. Case	Saxton No.	Description	Feet	Std. Case
<b>UNI-SPOOL "WS" SERIES</b>				<b>TRI-SPOOL "WBS" SERIES</b>			
WS-100	Cable — miniature parallel — 24 ga. — available in black, brown, gray, white and clear	61	12	WBS-100	Speaker extension cable — miniature parallel — 24 ga. 3 colors — low voltage applications	54	12
WS-101	Microphone cable — lapel	20	12	WBS-115	Hook up wire — 3 colors — 18 ga. solid — high quality	51	12
WS-108	Audio cable — wrap shield — easily pigtailed — available in other colors	20	12	WBS-115B	Hook up wire — 3 colors — 18 ga. stranded — high quality	48	12
WS-112	Phono or grid wire — shielded — single conductor	30	12	WBS-116	Hook up wire — 3 colors — 20 ga. solid — high quality	66	12

WS-165	Magnet wire for hobbyists — 16 ga.	21	12	WBS-180	High temperature wire — Teflon coated — assorted colors — 3 packages	69	12
WS-166	Magnet wire for hobbyists — 18 ga.	36	12				
WS-167	Magnet wire for hobbyists — 20 ga.	60	12				
WS-174	Magnet wire for hobbyists — 28 ga.	378	12				
WS-175	Magnet wire for hobbyists — 30 ga.	600	12				
WS-170	Rainbow wire — two color, two conductor	38	12				
WS-171	Rainbow wire — three color, three conductor	29	12				
WS-172	Rainbow wire — four color, four conductor	25	12				
WS-173	Magnet wire for hobbyists — 27 gauge	300	12				

## SPEAKER WIRES

#1438, #1439A, #1437 are available in Clear, Brown, White, Gray and Black. Please refer to Page 1767.

## COLOR TV WIRES

#1016, #1036, #1037, #1041, #1045 are listed on Pages 1769 and 1770.

## ROTOR CABLES

#1039, #1040, #1483, #1485 are available on Page 1768.

**COAXIAL CABLE**

**COMMERCIAL TYPES**

Quotations on cable to MIL-C-17B specifications on request. Quotations on RG 8/U and RG-11/U with 15 AWG solid copperweld conductor on request.

# SPECIAL PRODUCT SECTION

## "MITY-AMP" 2-WATT AUDIO AMPLIFIER

**COMPLETELY EPOXY ENCAPSULATED MODULE • Shockproof & Moisture-proof • Dirt & Dustproof**

**FEATURES**

- SPACE-**SAVING**—2" x 3½" x ¾"
- **HI-FI AMPLIFIER**—20 cy. to 15KC ± db at 1-watt level
- **LIGHTWEIGHT**—Weighs total of 6 ounces
- **RUGGED**—Unconditionally guaranteed. Shock, moisture and dust-proof
- **EASY TO INSTALL & USE**—Hooked up in minutes. Simple instructions make unit functional immediately.
- **ECONOMICAL**—Low in price, big in performance, Long, trouble-free life. Total power requirements 6 or 12 volts.
- **PORTABLE**—Operates on auto or boat battery
- **VERSATILE**—Uses limited only by your ingenuity. Ideal for p. a. system, phono amplifier, stereo, intercom, signal tracer, modulation, tape monitor, etc.

**SPECIFICATIONS**

1. **INPUT VOLTAGE REQUIRED TO DRIVE FULL POWER**—5 Volts
2. **POWER REQUIREMENTS**—6 to 12 volts at 300 to 700 ma. Current determined by speaker voice coil impedance.
3. **FREQUENCY RESPONSE**—20 cy. to 15 KC ± 2 db at 1 watt level.
4. **INPUT IMPEDANCE**—45 ohms to 50K ohms.
5. **OUTPUT IMPEDANCE**—3.2 to 45 ohms.
6. **WEIGHT**—Six ounces.
7. **OVERALL SIZE**—2" x 3½" x 7/8".
8. **HIGHLY SHOCKPROOF**—Unaffected by dust, dirt or moisture. Operable under water.
9. **GUARANTEED AGAINST DEFECTS.**

## ANTENNA ACCESSORIES SPECIAL HARDWARE

### GROUND MAST CLAMPS

Saxton No. 1100

### U-BOLTS AND SADDLES

Saxton No. 1103  
Also available without saddle

### TV ANTENNA MATCHING BALUN COILS

Efficiently matches 72 to 150 ohms; 72 to 450 ohms; 150 to 300 ohms; 150 to 450 ohms; 300 to 450 ohms and 75 to 300 ohms. Eliminates standing waves. Use as set coupler, impedance transformer or for line matching, etc. Instructions included. Available in bulk or pairs. Saxton No. 1121

### FLOATING GUY RINGS

Cast aluminum, two-piece floating guy ring. Fits most masts up to 1½" dia. Individually packed, complete with hardware, in plastic bags. Saxton No. 1099

### GROUND RODS

Saxton No. 1064  
Four-foot overall length with clamp.

Airplane type "egg" insulator. Low air resistance, high tensile strength, white porcelain glaze. 2" long. Saxton No. 1156

### ANTENNA WINDOW STRAPS

Saxton No. 1126

### BROWN, PORCELAIN GLAZED INSULATOR

Saxton No. 1154

Doublet type antenna insulator, white glazed. Excellent electrical characteristics, high tensile strength. Dim.: 4½" x 2¾" Saxton No. 1155

Transposition block with porcelain glaze finish. Use with many types of doublet antennae. Saxton No. 1157

## OPEN LINE ACCESSORIES STAND-OFFS & STRESS INSULATORS

No. 6001  
No. 6003  
No. 6005

### BLOCKS ONLY WITHOUT DRIVE-IN HARDWARE

Complete with 2 plated screws for use as spacer blocks in making your own open line installations.  
Saxton No. 6000

Especially designed for use with open line transmission wire installations. Tighten screws after pulling wire taut. For use as spacer, partially tighten set-screws. This permits movement of wire in the slots and avoids potential wire breaks. Use outside slots for 600-ohm wire. The "Tappee" Stand-off Insulator is good for community installations where random spacing of open line is desirable to avoid tuned circuits. Ideal also for use as anchor point or spacer for "fence wire" installations. "Tappee" permits inexpensive, time and labor-saving, trouble-free installations, and is made for use with No. 12 thru No. 18-gauge wire. Hardware constructed of double-dip galvanized steel; block is high impact polystyrene.

6000	Block only
6001	5 1/2" nail type
6003	5" wood screw type
6005	5" pole clamp type
*6007	INS-500 type

SEE PAGE 4 FOR INSULATED OPEN WIRE TYPE INS-500.

## OPEN LINE ACCESSORIES STRESS INSULATORS AND BLOCKS

### HEAVY DUTY OPEN LINE STRESS INSULATORS

Plastic blocks, slotted on either one or two-inch centers, for taking up slack or as anchor points in open line installations. Complete with plated lag bolt, 12 or 14 gauge.  
Saxton No. 6010

### 12 AWG INSULATOR

Same as Saxton No. 6010. Has 2-inch spacing for #12 AWG wires. Insulators for other gauges available on special order only.  
Saxton No. 6011

## FIBRE GLASS GUY LINE

Non-radiating, non-absorbing, high-strength "wireless" guy wire in vinyl jacket. 500-lb test strength.  
Saxton No. 7000

### SUPER-STRONG FIBRE GLASS GUY WIRE

Same as above but in grey vinyl jacket. 1000-lb. tensile strength. 100-ft. coil.  
Saxton No. 7002

## PATIO SPEAKER BAFFLE

Saxton No. 1205

Made of unbreakable, high impact styrene. Mahogany color. Complete with hardware and mounting instructions. Use for paging, monitoring, patio and stereo extensions, or as extension speaker anywhere. Complete with mounting escutcheon for 5 x 7, 6 x 9, 4, 5 or 6" round speakers.

## DELAYED ACTION • COMMERCIAL SAFETY SWITCH HOME AND AUTO

Switch "off" and the lamp goes out SIXTY SECONDS LATER! Allows sufficient time to reach destination SAFELY. Replaces present wall switch in seconds. Ideal for Home, Farm or Auto. Fully guaranteed and UL Approved.  
Saxton No. 560 (Ivory) Home  
Saxton No. 561 (Brown) Home  
Saxton No. 563 (Black) Auto

# SPECIAL PRODUCT SECTION

## MAGNET WIRE ON SPOOLS \*

Soft drawn insulated copper magnet wire, used for all types of coil windings, transformers, RF and choke applications. Sizes from 18 to 40 AWG. Magnet Wire materials available are as follows:

1. Single Formvar (S.F.) 105° C
2. Heavy Formvar (H.F.) 105° C
3. Plain Enamel (P.E.) 105° C
4. Single Solvar (S.S.) Single coated SOLDERABLE 130° C Polyurethane.

\* Extra high temperature magnet wire also available. Other sizes upon request.  
 ‡ ¼, ½, and 1 lb. spools.

### BAG-PACKED

Staxton Number	Length	Type	Description
800	10'	RG8U	Has PL259 on one end, two terminating spade lugs on the other
801	10'	RG8U	Same as #800 except PL259 to PL259
802	15'	RG8U	Has PL259 on one end, two terminating spade lugs on the other
803	15'	RG8U	Same as #802 except PL259 on both ends
804	20'	RG8U	Has PL259 on one end and two terminating spade lugs on the other
805	20'	RG8U	Same as #804 except PL259 to PL259
806	10'	RG58U	Has PL259 and UG175U reducer on one end, two univ. terminating lugs on other end
807	10'	RG58U	Same as #806 except PL259 and UG175U reducer at both ends
808	15'	RG58U	Has PL259 and UG175U reducer on one end, two univ. type terminating lugs on other end
809	15'	RG58U	Same as #808 except PL259 and UG175U reducers are at both ends
913	50'	RG8U	Foam — PL259 connectors each end.
914	100'	RG8U	Foam — PL259 connectors each end.
915	50'	RG58U	Foam — PL259 connectors with adaptors each end.
916	100'	RG58U	Foam — PL259 connectors with adaptors each end.

### BUBBLE-PACKED

810	20'	RG58U	Has PL259 and UG175U reducer on one end, two univ. type terminating lugs on other end
811	20'	RG58U	Same as #810 except PL259 and UG175U reducers at both ends
812	2'	RG58U.CB test lead.	Same construction as #811.

## TRANSISTORIZED MODULES

Each module is an assembled package of electronic components—transistors, resistors, capacitors, etc. All can be powered by standard 6 volt battery pack. Each module comes with an instruction book including schematic drawings and parts list.

Saxton Model	No.	Use	Description
HFA	570	Fire alarm	When hooked up to 2 or 3 speakers, makes any room or area safe against unexpected fires. Creates tone varying from 50 to 3000 cycles during 30-second period, using 8 ohm speaker.
HS	571	Siren	Produces sharp, crisp signal for transmitting code, using any PM speaker.
HCA-1	572	Code OSC & Key	Amplifies and produces quality audio signal with power output of about 1 watt, using 8 ohm speaker, carbon button microphone.
HDF	574	Dual Flasher	Permits 2 signal devices to flash alternately or give warning 70-80 times per minute, using pilot light bulbs.
HP	575	Phono amplifier	Amplifies signals produced by phono pickup arm so that loud speaker reproduction is possible.
HI	576	Intercom	An economical way to carry on conversations efficiently between 2 points, using 2 8-ohm speakers and talk-listen switches.
HB	577	Baby nurse	Monitors an infants' desire for recognition, using 2 8-ohm speakers.
HCA-2	578	High gain public address	Provides clear audio, using 8-ohm speaker or trumpet.
HG	579	Guitar amp	Amplifies music from guitar or accordion, using contact microphone and 8 or 16 ohm speaker.
HTA	580	Telephone amp	Amplifies telephone conversations, useful for conference calls.
HM	581	Metronome	Produces sounds for maintaining proper musical beat; generates 20-200 audio pulses per minute.

Saxton Model	No.	Use	Description
HFH	582	Fog Horn	Creates loud attention-getting signal which can be heard and identified over long distances on land or sea, using 8 or 45 ohm speakers.
HWM	583	Wireless Mike	Transmits signals from point-to-point with no physical connection between transmitter and receiver, using an AM radio.
HWP	584	Wireless Phono oscillator	Allows phono pickup and arm to be played through any radio with no physical connections, using any radio receiver.
HWB	585	Wireless baby nurse	Amplifies infants' restless movements or requests for attention with no physical links between module and a radio receiver.
HMP	586	Mike preamp	Serves as booster for low level signal producing devices such as microphones, magnetic phonograph cartridges, etc.
HBA	587	Burglar Alarm	Warns against intruders with switches installed at various entrances, using 3, 8 or 16 ohm speakers.
HT	588	Electronic timer	Permits holding back or controlling time from one second to three minutes for dozens of situations — such as turning off T.V. sets during commercials.
HST	589	Stroboscope	Permits viewing of rapidly moving objects such as motors as if they were standing still for measurement, calibration, etc.
HPS	590	Power Supply	Delivers 6-12 volts continuously at 1 amp, hum-free, plug-in, reliable source for powering all modules.
