

Electronic components & applications

Index to Volume 4

Contents

NUMBER 1

Fast turn-off asymmetric silicon controlled rectifiers	2
<i>F. J. Burgum and A. Woodworth</i>	
Integrated circuits for hi-fi radios and tuners	11
<i>W. Kanow and I. Siewert</i>	
Integrated circuits for data-graphic displays	28
<i>A. Goldberger and J. L. Goodhart</i>	
Scan-velocity modulation increases tv picture sharpness	38
<i>G. Haenen and H. Simons</i>	
Cathode-ray tube requirements for data-graphic displays	42
Introduction to the series-resonant power supply	50
<i>E. B. G. Nijhof and H. W. Evers</i>	
Quality line	58
Research news	60

NUMBER 3

Compact Disc digital audio	130
ICs for Compact Disc decoders	131
<i>J. Matull</i>	
Pyroelectric infrared detectors	142
<i>M. A. Rose</i>	
Single-chip synthesiser for radio tuning	150
<i>J. Matull and J. van Straaten</i>	
Small electrolytic capacitors compared	158
<i>E. H. L. J. Dekker and P. S. Friedrich</i>	
Full-page display using television components	163
Light-switching array for high-resolution pattern generation	169
<i>B. Hill and K. P. Schmidt</i>	
Silicon ousts germanium for ratio detector diodes	175
<i>A. Garskamp</i>	
Interface IC for linear variable differential transformers	180
<i>L. J. Hadley and E. E. Herceg</i>	
Oscilloscope tube with magnetic correction and scan magnification	185
<i>K. Zeppenfeld</i>	

NUMBER 2

Improved method of power-choke design	66
<i>L. P. M. Bracke and J. Jongasma</i>	
Integrated voice synthesiser	72
<i>H. E. van Brück and D. J. A. Teuling</i>	
Insulation displacement connections	80
<i>J. A. M. Roelofs and A. Sved</i>	
Bipolar ICs for DTMF telephone dialling	89
<i>J. J. A. Geboers</i>	
PWM uninterruptable power supplies	100
<i>L. Hampson</i>	
New developments in integrated fuse logic	111
<i>K. A. H. Noach</i>	
Research news	125

NUMBER 4

Expandable microprocessor bus for distributed processing	194
<i>Cecil Kaplinski</i>	
Schottky-barrier diodes combine the best of germanium and silicon	201
<i>Th. Hafemeister</i>	
Microprocessor-based phase controller – the “look-back” system	206
<i>J. E. Gilliam</i>	
PPM management – a tool for IC quality improvement	215
<i>J. Th. Verschoor</i>	
Single variable-capacitance diode for a.m. car radios	223
Dielectric-resonator oscillators – a new microwave signal source	227
<i>B. F. van der Heijden</i>	
Controller IC for FIFO buffers	233
<i>Jeff Seltzer</i>	
Higher quality synthesised speech through fast and easy editing	241
Detectors for thermal imaging	242
<i>J. A. Chiari and F. D. Morten</i>	

Subject Index

Capacitors			
Small electrolytic capacitors compared	158		
See also Quality			
Connectors			
Insulation displacement connections	80		
Data processing			
Controller IC for FIFO buffers	233		
Desk-size digital file stores million and a half pages	60		
Expandable microprocessor bus for distributed processing	194		
New developments in integrated fuse logic	111		
Display			
Cathode-ray tube requirements for data-graphic display	42		
Full-page display using television components	163		
Integrated circuits for data-graphic displays	28		
Oscilloscope tube with magnetic correction and scan magnification	185		
Scan-velocity modulation increases tv picture sharpness	38		
Instrumentation and control			
Interface IC for linear variable differential transformers	180		
Optoelectronics			
Detectors for thermal imaging	242		
Light-switching array for high-resolution pattern generation	169		
Low-noise multi-purpose AlGaAs laser	125		
Pyroelectric infrared detectors	142		
Quality			
Improved measurement method guarantees cerdip moisture level	59		
PPM management – a tool for IC quality improvement	215		
Quality in design: 123-series solid aluminium capacitors	58		
Quality proven: 122-series solid aluminium capacitors	58		
Radio, audio			
Compact Disc digital audio	130		
ICs for Compact Disc decoders	131		
Integrated circuits for hi-fi radios and tuners	11		
Schottky-barrier diodes combine the best of germanium and silicon	201		
Silicon ousts germanium for ratio detector diodes	175		
Single-chip synthesiser for radio tuning	150		
Single variable-capacitance diode for a.m. car radios	223		
Speech synthesis			
Higher quality synthesised speech through fast and easy editing	241		
Integrated voice synthesiser	72		
Telecommunications			
Bipolar ICs for DTMF telephone dialling	89		
Dielectric-resonator oscillators – a new microwave signal source	227		

Contributor Index

Bracke, L. P. M.	66	Jongsma, J.	66
Brück. H. E. van	72	Kanow, W.	11
Burgum, F. J.	2	Kaplinski, Cecil	194
Chiari, J. A.	242	Matull, J.	131, 150
Dekker, E. H. L. J.	158	Morten, F. D.	242
Evers, H. W.	50	Nijhof, E. B. G.	50
Friedrich, P. S.	158	Noach, K. A. H.	111
Garskamp, A.	175	Roelofs, J. A. M.	80
Geboers, J. J. A.	89	Rose, M. A.	142
Gilliam, J. E.	206	Schmidt, K. P.	169
Goldberger, A.	28	Seltzer, Jeff	233
Goodhart, J. L.	28	Siewert, I. S.	11
Hadley, L. J.	180	Simons, H.	38
Haenen, G.	38	Straaten, J. van	150
Hafemcister, Th.	201	Sved, A.	80
Hampson, L.	100	Teuling, D. J. A.	72
Herceg, E. E.	180	Verschoor, J. Th.	215
Heijden, B. F. van der	227	Woodworth, A.	2
Hill, B.	169	Zeppenfeld, K.	185

Electronic Components & Applications is published four times a year by Philips Electronic Components and Materials Division (Elcoma), The Netherlands, in cooperation with associated companies such as Mullard Ltd. in England and Valvo in Germany.

It is intended for those who have a professional need to keep up to date on electronic component and circuit developments.

Its contents are gathered from research, application and quality control laboratories and the factories of the Elcoma organisation around the globe.

Technical enquiries and requests for rights to reprint or translate articles should be addressed to the Editor, EC&A, Philips Electronic Components and Materials Division, Marketing Communications, Eindhoven, The Netherlands.

Abstracts or references should mention title, author, and the source: Electronic Components & Applications, published by Philips Electronic Components and Materials Division, The Netherlands.

Subscription

The subscription rate for Volume 5 is \$15.00/£8.00/Hfl.40.00, postage paid; supplementary charge for airmail to countries outside Europe, \$6.00.

Subscription enquiries should be addressed to D. A. Roubos, Building BA, Philips Electronic Components and Materials Division, Eindhoven, The Netherlands; Telex 35000 phtc nl; Tel. +31 40 72 34 12.
