The Second Printing of the Third Edition of the NRC DOMESTIC LOG is respectfully dedicated to the memory of Eric DiRicco (1956-1973). Eric was a fine DX'er who gave freely of his time and effort for the betterment of the DX hobby.

CREDITS AND ACKNOWLEDGEMENTS...

*Compilation and verification of data: Russell Edmunds, Wes Boyd, Gordon Nelson, Eric DiRicco, John Callarman, Steve Bohac, Alan Merriman, Bill Feidt, Robert Foxworth, David Lewis, Ron Musco

*Proofreading of final copy: Mark Katz, Ray Moore, Bill Bailey, Gordon Nelson, Hal Robie, Dan Kahn, George Kelley, Mark Connally, Russell Edmunds

*Call/frequency cross index: Richard Frcho, Bob Bundy, John Clements, Bill Bailey, Mark Katz, Chuck Rossier, Randall Kane, Gordon Nelson

*Preparation of copy: Gordon Nelson, George Kelley, Chuck Rossier, Dan Kahn, Russell Edmunds, Steve Bohac, Ron Musco

*Preparation of computer forms: Dave Fischer

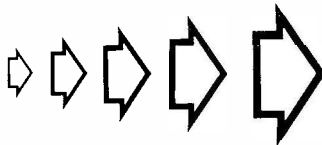

*Typing of call/frequency cross index: Randall Kane

*Other typing: Janice Mansfield, Gordon Nelson, Steve Bohac, Ron Musco, Judy Shenfeld

*Supplemental information: Russell Edmunds, David Lewis, Joe Kureth, Gordon Nelson, John Oldfield

*Preparation of updater copy for 2nd printing: Russell Edmunds, Steve Bohac, Ron Musco

SPECIAL THANKS go to all of the club members who have supplied the NRC with the Updater material used in the preparation of this Printing and to the telephone information operators for invaluable services!

How to Send a BCB Reception Report 229

This 2nd Printing of the Third Edition of the NRC DOMESTIC LOG is not completely accurate. Since the last printing appeared a year ago, more than 2,000 changes have taken place and have been incorporated into the present volume. Since this averages out to about 7 changes each day, it's obvious that a completely accurate log is a practical impossibility. Despite the volatile nature of AM station information, especially addresses and schedules, we believe this new printing is the most complete and accurate station listing ever produced. The basic information in this log has come from a wide variety of sources, and in many cases has been validated by monitors of the NATIONAL RADIO CLUB. The new log also features an alphabetical call letter/frequency tabulation and an increased amount of blank space for comments and the insertion of new information. The black dots to the left of station listings indicate that one should check the updater sections for changes. New stations are not noted in the body of the log, but appear in the updater section.

We invite users of this log to supply us with corrections and/or additions for use in the preparation of the next Edition. Members of the NRC receive Updaters to the DOMESTIC LOG at no cost as a regular feature in DX NEWS; membership in the NRC also affords the DX'er benefits in purchasing special NRC publications, unique technical articles authored by the experts and top BCB DX'ers of the NRC which are available from our Reprint Service, and electronic components at DISCOUNT PRICES! See pages 225-229 for more information.

Russell J. Edmunds
Chief Editor

How To Use the NRC Log

EXPLANATION OF SYMBOLS:

Column One gives the call letters of the station or an indication that it is an AFRS (American Forces Radio Service) station. Certain symbols concerned with construction permits are presented in this column. They are (*) for a new station not yet on the air, (+) for a permit to change power, location, or antenna on the same frequency, and (#) for a permit to change to this channel from present operation elsewhere in the band.

Column Two gives information naming the city or town to which the station is officially licensed; the ZIP code is also given if the mailing address is the same as the license address.

Column Three provides information regarding the licensed hours of operation and directional antenna patterns if used. The symbols are as follows:

- D1 Daytime operation only, nondirectional antenna
- D3 Daytime operation only, directional antenna
- D4 Daytime operation only, nondirectional antenna only except during critical hours
- D5 Daytime operation only, directional antenna only except during critical hours
- L1 Limited time operation, nondirectional antenna
- L3 Limited time operation, directional antenna
- N1 Night affiliate (Canadian only)
- N2 Day affiliate (Canadian only)
- SH Specified hours as directed by the station license (note: these are usually stations in areas of low population density which for financial reasons seek to operate less than the minimum number of hours specified for unlimited licenses).
- ST Shared time operation; broadcasting time is shared with a second station on the same channel
- U1 Licensed to operate unlimited time with nondirectional antenna
- U2 Unlimited hours of operation with directional antenna at night (defined as sunrise to sunset)
- U3 Unlimited hours of operation with the same directional antenna both day and night
- U4 Unlimited hours of operation; directional antennas both day and night but different patterns
- U5 Unlimited hours of operation; directional antennas during the day but nondirectional at night
- U6 Unlimited hours of operation; directional antennas at night and during critical hours (until 2 hours after sunrise and from 2 hours before sunset)
- U7 Unlimited hours of operation; directional antenna at all times but three different patterns (day, critical hours, and night)
- U8 Unlimited hours of operation, directional antenna at night and critical hours, two patterns (night, critical hours)

Further information regarding directional antenna patterns may be obtained from the NRC's NIGHT PATTERN BOOK and from several articles available as reprints from the National Radio Club.

Columns Four and Five show night and day operating powers respectively, in watts.

Column Six contains special power information for stations which must operate with special power during critical hours (CH) and for stations with Presunrise Service Authorities (PSA's). The PSA's are used during the months when local sunrise occurs after 0600 local time. Daytime stations (i.e., those licensed to operate local sunrise to local sunset) may begin operations during these months at 0600 with their PSA power. Under certain conditions a station licensed for unlimited operation may also use PSA power with their daytime antenna pattern - either to take advantage of the daytime pattern's ability to provide increased coverage of special areas (in spite of reduced PSA power) and/or because operation with a directional pattern requires the presence of a First Class licensed engineer at the transmitter site.

Column Seven gives the network affiliation (or, in the case of Canadian and Puerto Rican stations, the language used if not English).

(Ac) - American/Contemporary	(MB) or (Mb) - Mutual Black Net
(Ae) - American/Entertainment	(MS) - Mutual Spanish Network
(Af) - American/FM	(N) - National Broadcasting
(C) - Columbia Broadcasting System	(NB) - National Black network
(M) - Mutual Broadcasting System	(B) or (Bi) - Bilingual; French and English

Column Eight gives the mailing address of the station for reception reports. If no address is given and the station is not an LPRT (Low Power Relay Transmitter, operated by Canadian Government) or AFRS outlet, the station call letters and city are usually adequate address for reports.

Column Nine gives the schedules for fulltime and specified hours stations when this information is available. Times in parentheses (unless otherwise specified) are for Sunday operation. Because the schedules for stations operating with daytime and limited time licenses vary with the season, no attempt has been made to include these schedules. A set of maps showing the time of local sunrise and sunset throughout North America for various times of year is available from NRC Headquarters; write for further information. A number of special abbreviations are used in this column: (SP) - Silent Period; (NSP) - No Silent Period; (LSR) - Local Sunrise; (LSS) - Local sunset.

AFRS & AFCN Stations

These are generally very low powered stations operated by military authorities to provide coverage to isolated bases and sites. The AFRS (American Forces Radio Service) and AFCN (American Forces Caribbean Network) stations, being operated by a branch of the U.S. Federal government, are not licensed by the FCC; programming is usually a mixture of transcribed and locally-originated material and identifications may be infrequent. The addresses here in the NRC Log are usually adequate but reports may be routed through AFRS HQ: Deputy for American Forces Radio and Television, Office for Information for the American Forces, ASD(M+RA), Washington DC 20305.

ADDITIONAL DX'ING AIDS AVAILABLE FROM THE N.R.C.

- ** The N.R.C. Antenna Reference Manual - A compilation of articles from NRC reprints dealing with the most popular aspects of medium-wave antennas, from loops to longwires to Beverage antennas, all in one compact booklet and at much less cost than buying all of the articles through reprints, only \$2.25 ppd. for this informative 60-page book.
- ** The Mexigleann List, a tabular log of Mexican CCB stations, this book is not listed in the Reprints List, but a limited number are available at \$1.00.
- ** "Getting Started in Broadcast Band DX'ing", this is the booklet which has been our New Member Booklet, but it is now available to non-members at a cost of \$1.25 for this 52-page guide to the hobby. Includes the latest reprint list, too.
- ** COMING THIS FALL: The NRC Receiver Reference Manual, a 72-page compendium of hints to help you get the most out of your receiver and receiver reviews, many again from NRC reprint articles. Cost will be \$2.50 ppd., and a target date of late October is planned.

The above listing will provide a supplement to the existing cross-frequency index. The calls which have been deleted or which have changed frequency since the issuance of the first printing of this edition have been removed from the original section so as to avoid confusion. All new calls, or new frequencies for calls which have become effective since that time appear above. Every effort has been made to cross-check this information, but in the case of conflicts, especially in the Canadian LPRT listings, we do not guarantee total accuracy as of the effective date of printing. We trust that this index will serve to help users of the old log as well as of this new one, as this page will appear also in DX NEWS as an updater to the first printing of the log. - The Editors.

Canadian L.P.R.T. Stations

Canada's population is spread thinly over a very large area and this makes the task of supplying adequate radio service difficult; the presence overhead of the auroral absorption zone means that even 50,000 clear channel outlets are blacked out at times. The CBC has therefore established a far-flung network of low-powered local MW relay transmitters to serve isolated communities. These LPRT's are located in Canadian Pacific Railroad stations and receive their programming from special audio phone lines; they operate with a modest power of 40 watts and are completely unattended operations. In spite of their low power, these stations are often heard by DX'ers - although the fact that several LPRT's relaying the same station may operate on the same channel can make positive identification impossible. The initial three letters of the LPRT call will often (but not always!) indicate the station being relayed; thus CBNC relays CBN, etc. Reception reports should be addressed to the station being relayed; don't expect a specific LPRT QSL, though, unless there's but a single relay on the channel...

Carrier-current Stations

These are small, low-powered operations designed to provide AM radio coverage to colleges and universities. Although many of these stations use legal sounding call letters and otherwise seem to be professional broadcasting stations, they are actually unlicensed operations manned by students. The 500-odd carrier current stations exist by virtue of a FCC Rules provision which permits unlicensed operation on the AM band as long as the effective radiation from the station is below prespecified (and very low) levels. Properly operated, such an unlicensed station will be heard no further than a mile under the very best of conditions, and frequently only for a few blocks. Some carrier current stations become careless about radiation levels, though, and may be heard over much greater distances; in such a case the station is in violation of FCC regulations, of course. Most of these stations operate in the lower part of the band, with 550, 640, and 650 kHz being favorite channels. Technical quality tends to be very good and the call letters used often reflect the name of the school, e.g., WNEU at Northeastern University, etc. These stations tend to be reluctant verifiers - especially if operating with power in excess of the legal limit; it helps to stress that you're a DX'er using very special receiving equipment and not just a casual listener when reporting to these stations. No complete list of these stations exists although at this time the FCC is proposing to bring them under its control; consult the short list in the Broadcasting Yearbook for a short tabulation.

Illegal Stations

Unlike the carrier-current stations which if properly operated are completely legal though unlicensed, at any particular time there are usually quite a number of completely illegal "bootleg" or "pirate" stations on the air and these are frequently logged by the alert DX'er. These illegal operations are usually (but not always) characterized by poor audio quality, drifting frequency, and erratic schedules. Most are very low-powered operations intended for a small local audience but an occasional high-power pirate takes to the air and is heard over large distances. Most operate near or above the top of the band at 1600 kHz and several dozen are traced and closed down by the FCC every year.

The NRC is proud to announce its list of companion publications to the Domestic Station Log. All of these items are available from the National Radio Club, P.O. Box 127, Boonton, N.J. 07005.

NIGHT PATTERN BOOK

This spiral-bound volume features the nighttime directional antenna patterns of Canadian and U.S. stations on map pages of 11 x 14 inches. These patterns are drawn to scale from official government sources. Commercial publications of this sort cost more than ten times as much for this most valuable DX reference. Cost to members is \$6.00 postpaid and to non-members \$7.50. Orders from other than North America please enquire as to applicable rates.

ANTENNA MANUAL

This manual is a compilation of numerous articles on the subject of antennas for medium wave DX'ers which have appeared in the pages of DX NEWS over the past several years in one handy volume. Includes data on air- and ferrite-core loops, antenna tuners for longwires, and beverage antennas, along with various coupling devices. 60 pages, 5½ x 8½ booklet format. \$2.25 in the U.S. and Canada.

"GETTING STARTED IN MEDIUM WAVE DX'ING"

This booklet is designed to assist the novice DX'er in pursuit of the DX hobby. It includes introductory articles on foreign and domestic DX'ing, as well as on receivers and accessories. Also included are articles on reception reports and safety and preventive maintenance for your DX gear. All members who pay the New Member Fee automatically receive a copy of this booklet. For non-members, the cost is \$1.25 in the United States and Canada.

RECEIVERS MANUAL

(Available Spring 1975) This manual is similar to the above manual on antennas, except that the subject is DX receivers. It includes useful articles on receiver modifications and accessories, as well as reviews of many of the more commonly-used ECB DX receivers currently available. A must for the serious DX'er/experimenter. 72 pages, 5½ x 8½ booklet format. \$2.50 for domestic orders.

LOG & PATTERN BOOK UPDATERS

Periodic updaters for the NRC Domestic Station Log and the NRC Nighttime Antenna Pattern Book are published in the pages of DX NEWS. Non-members may obtain reprints of these updaters in composite by ordering them through the NRC Reprint Service. Updaters are available from the most recent re-issue of the Log, and from the original Pattern Book. Cost is a one-time fee of \$1.00 for members and \$2.00 for non-members.

COMING

Additional reprint reference manuals will become available in the areas of Medium Wave Propagation and Domestic DX within the upcoming year if demand is sufficient for them. Please indicate to us in a separate letter if you are interested in either of these items if you have not already done so. Further publications are still in the planning stages.

ABOUT THE NRC

The NATIONAL RADIO CLUB was founded in 1933 and is the oldest and largest organization devoted exclusively to Medium Wave DX'ing. Membership in the NRC affords many benefits to the BCB enthusiast. You'll automatically receive DX NEWS, the NRC's invaluable magazine, which is published 30 times a year; weekly during the fall/winter DX season. DX NEWS has been published regularly since 1933 - almost the "dawn of DX'ing." In the past year we have provided our membership with nearly 1,000 pages crammed with information specifically for the MW DX'er. The NRC has long been the leader among DX clubs: first to introduce the technical advances which have revolutionized the hobby, first to produce complete logs listing all BCB stations in North America, and first to publish a handy-sized, commercially printed DX magazine. The NRC's preeminence is recognized by the World Radio TV Handbook which has chosen the NRC to prepare its North American station listing.

NRC's magazine, DX NEWS contains both regular and special features. In the MUSINGS section, DX'ers write in to tell about their DX'ing experiences, latest catches, descriptions of equipment, or to ask questions and to discuss anything of interest to fellow MW DX'ers... In the INTERNATIONAL DX DIGEST section you'll find concise and very up-to-date listings of the foreign MW stations being logged by our alert, worldwide membership, as well as MW propagation information and the most detailed, accurate foreign station data available anywhere... In the DOMESTIC DX DIGEST section you'll get the latest on domestic and Canadian stations: new stations on the air, call and schedule changes, new network affiliations, tabulated information designed to keep the NRC DOMESTIC LOG up-to-date. These three sections appear regularly in DX NEWS and often feature hot information little more than a week old! Many unique and invaluable feature articles appear in the pages of DX NEWS, including articles for beginners, hints on improving MW reception, plans for special MW equipment and antennas, and reports on original scientific research on MW signal propagation to name a few. Our annual listings of all-night station schedules and listings of regular FREQUENCY CHECKS have enabled our members to log and QSL many rare stations by alerting them as to where and when to listen.

Since the NRC's membership roll includes many of the top experts on all aspects of Medium Wave DX'ing, members with problems or questions can benefit from the immense body of the NRC membership's experience by simply asking for help in the MUSINGS section. As a special service to new members, the NRC makes available reprints of over 100 important past articles from DX NEWS dealing with all phases of the hobby. Because of the concentration of top MW DX'ers in the NRC, many of the articles appearing in DX NEWS are truly unique and unavailable elsewhere at any price!

The COURTESY PROGRAMS COMMITTEE (CPC) is one of the Club's most important and interesting activities. Members of this hardy group regularly arrange special programs dedicated to the NRC from hard-to-hear stations at times favorable for long distance reception. Literally hundreds of otherwise impossible-to-hear stations have been logged and verified as a direct result of NRC Specials: you've probably heard some of these programs at various times in the past.

HOW TO SEND A RECEPTION REPORT

Given sufficient skill and patience on the part of the DX'er, very few U.S. and Canadian stations will fail to verify reception reports. Many stations are reluctant to QSL, however, in part due to the large numbers of inadequate or incorrect reports received. Even worse for DX'er/station relations are the reports which demand, rather than request verification. What goes into a good reception report on the AM band? A number of items should go into every report without fail. Give the date of reception and the frequency, and be certain to specify which time zone you are using in the report.

The most important part of the report - and the weak spot in most inadequate reports - is the listing of specific and verifiable program details. The object of a reception report is to supply the station with incontrovertible evidence that the particular reception did in fact occur; the station must be able to compare the details of programming supplied by the DX'er with the station log or their knowledge of the programming before a meaningful verification can be issued. No hard-and-fast rule can be given for how much program detail should be included, but generally speaking, the more the better. A word-for-word transcription of a one minute local advertisement would constitute excellent QSL material, whereas a list of 20 pop song titles might be worthless, since stations rarely log song titles. U.S. stations are required to enter the times of identifications, commercial spots, and public service announcements in the station log; such items make good verification material. Particular emphasis should be given to program details that are unique to the station in question: exact wording of station promos and local advertising, names of announcers, exact sign-on or sign-off formats, etc. Programming which appears on several stations simultaneously, such as Network newscasts, are often useless as proof of reception, unless some local news material is also included.

Describe the quality of reception in some detail with emphasis on interfering stations. Try to give an indication whether or not their station is frequently received in your location, or if the reception was a rare "freak". Mention other stations in the same locality that you have heard, and compare the relative reception quality. Avoid using Shortwave reporting systems, such as SINFO codes, as they are unfamiliar at most AM stations. Give details of your receiving equipment with emphasis on special items such as loop antennas, etc.

One very objectionable and unethical practice in which a small segment of an otherwise honest DX community seems to indulge itself, is the practice of sending fraudulent reports to DX stations in an effort to obtain a verification of reception, or QSL card. One can not overemphasize the fact that many BCB stations in the USA have on their staffs, at least one person, be it the verification signer, station engineer, or a technician, who is quite often a member of one of the major MW DX clubs. Frequently, when the unscrupulous "DX'er" sends a fraudulent or dud report, embarrassment is the end result. Remember, it's up to you, the responsible DX'er, to prove to the station that you actually heard the DX you claim!

Having prepared a factual report, politely request the station to check your report against their log, and if it agrees, to send you a QSL card or letter of verification. Never demand - always ask politely! AND ALWAYS INCLUDE RETURN POSTAGE FOR A REPLY!

Good Luck!

DX'ING AIDS AVAILABLE FROM THE NRC

Each year the NATIONAL RADIO CLUB publishes approximately 1,000 pages of unique MW DX information in its magazine, DX NEWS. Over the past years many valuable and original special feature and technical articles have appeared in our pages and all are as valuable today as they were when originally published in DX NEWS. Available from the NRC are reprints of more than 100 important past articles. Some of the topics are:

FOR BEGINNERS:

How to Log Your First 500 Stations... How to Log All 50 States... The First 25 MW Countries in English... The Compleat DX'er... The First 20 Transatlantic Stations... Tape Recording Your Catches... more...

FOR DOMESTIC DX'ERS:

How Networks Operate... Understanding Station Procedures... Clears and Channel Classifications... What is a Frequency Check?... Frequency Check List (Lists regularly scheduled equipment tests from many hard-to-hear stations)... It Takes Two to Verify... What is a Presunrise Authorization?... and more...

FOR INTERNATIONAL DX'ERS:

About Those Common Waves... DX'ing Polynesia and Beyond... Portuguese for DX'ers... DX'ing Rare Africans Systematically... The Odds on Even Transatlantic Stations... Broadcasting in Cuba... Reports to Latin America... Latin American Station Lists... Transpacific Reception Does Exist... much more...

MEDIUM WAVE DX ANTENNAS:

FET Altazimuth Loop Antenna Plans... The Two Foot Loop Antenna... High Precision Direction Finding on the MW Band... Beverage Antennas for the Broadcast Band... One Transistor Loop Amplifier... BCB DX Grounds... Pattern Controlled Loop Antennas... NRC Headquarters Tries the "Space Magnet" Antenna... many more...

MEDIUM WAVE PROPAGATION:

A Beginners Guide to the Ionosphere... MW Signal Paths... The Limits of Midday DX Reception... Skywave or Groundwave Reception?... Limitations in the Use of the A-Index... Summer Reception on the Broadcast Band... BCB Reception During Periods of High Auroral Activity... Trans-Polar DX Reception... many more...

RECEIVERS AND EQUIPMENT:

Adapting Receivers with Mechanical Filters... Subaudible Heterodynes on the BCB... Living with a Budget Receiver... Audio Filters... Drake SPR-4 Receiver Review... Receiver Hot Rodding Hints... Frequency Signature Analysis for the DX'er... Heath SB-620 Spectrum Analyzer... Selectivity Devices... dozens more...

FOR A COMPLETE LIST OF AVAILABLE REPRINTS, SEND A LARGE, SELF-ADDRESSED, STAMPED ENVELOPE TO:

NATIONAL RADIO CLUB, BOX 127, BOONTON, NEW JERSEY 07005, USA
