FEBRUARY 13, 1984

Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Kermit:

This is a letter of confirmation on your reception of WQXM-AM, operating on its assigned frequency of 1120 kiloHertz. The information you gave was correct for Sunday evening, February 5, 1984, from 6:02 to 6:16 P. M.

Just in case you are interested, the name of the car dealer was Jimmy Childre Chevrolet-Olds. The music you heard may be familiar, that is if you have listened to one of our other affiliates. We program the Bonneville Million Dollar Sound via satellite from Chicago. Response has been great here in the middle Georgia area, especially since we are the only beautiful music station within 100 miles.

Thanks again for the letter, and hope to hear from you again!

Sincerely,

AL PARKER  
OPERATIONS MANAGER

Walnutport Pa 18088

Dear Kermit,

Thank you for the reception report of WBGA on April fourth. I am pleased to hear you can pick the station out that far north. You do have an excellent receiver with the antenna network set up properly. Your report is the northernmost report received as of now.

I can only confirm the first part of your report. The type of music is correct for WBGA and of course the call sign is proof in itself. We do have United Methodist Church aired on Sunday. Brunswick is a coastal city and that ties into the weather report you heard. The bad news is we don't have a GW Smith Lumber Company in town. In looking at your report times it appears WBGA skywave can come through at certain times, which is typical. The other station is probably more to the west about the same distance away from you as WBGA. This is only an "educated" guess.

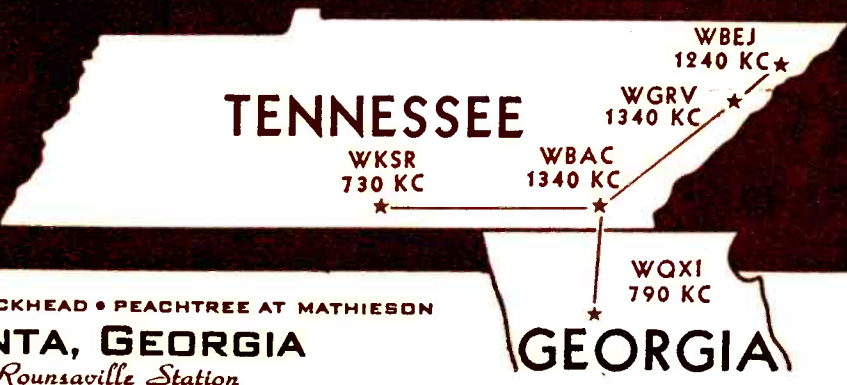

Here are some details about WBGA. The transmitter site is on Blythe Island. We use a three tower array. The power is 5000 watts nondirectional daytime and 1000 watts directional nighttime. We use a Harris MW5 PDM modulated transmitter coupled to a Harris Phasor that allows switching patterns. The audio line uses a Harris Tri Band Processor fed by a Teac console. The actual control room is about ten feet square with the console facing the production room window. Since the station is live there are a set of turntables and cart machines. In other words like a WKRP setup in the control room.

I have covered the very basic description of the station. If you care for more information please write me and I'll try to be of help.

Sincerely,

Hank Bauer  
Chief Engineer

Dear Mr. Geary,

Thank you for your letter of November 11 concerning the reception of WRIP at Walnutport, Pa. It is a wonderful feeling to know that we can be heard that far away.

In accordance with our station log the information you have is correct. The power output here is 500 watts with an directional antenna system beam Northeast by southwest.

We have these test programs once each month. They held on the second Friday of each month. The purpose of these are for frequency measurements.

Again, we thank you for your very nice letter and the best of luck in your radio DX.

Dear Broadcast Listener:

Your letter reporting reception of signals from WMOG, on July 16, 1946, has been checked and filed. It was found that your reception was authentic and therefore we are confirming same.

For your information, we receive signal reports from up your way quite often under normal conditions. This is most probably due to our antenna and ground system, not to mention our rather high broadcast frequency. Our equipment consists of a 1940, R.C.A Model 250K transmitter. R.C.A Consolette, Frequency Monitor and all Audio Equipment. We have a Lingo vertical tower of 165 feet ( $\frac{1}{4}$  wave). Our ground system is buried under salt water.

Should you be interested in other broadcast listener addresses, here are a few who have reported reception.  
F.L.VanVoorhees-33-06 165 St. Flushing, NY. Mbr. Nat Rdo Club.  
Arnold E. Gerrard-Newark News Radio Club  
134 South 6th St. Miamisburg, Ohio.  
Ralph M. Johans-364 Elm St. Buffalo 3, NY. Mbr. Nat. Rdo Club.  
John T. Tweedie-Box 103- Oakhurst New Jersey.  
K.F.Borden-Box 804-Ponca City, Okla.  
Clarence Burnham-6 Avon Court-Gloucester Mass.  
Plus one (double checked and confirmed) from Manila in the Phillipine Islands, during regular broadcast day.  
We check frequency with R.C.A. Lab. between 3-3:30 AM the last Thursday in each month. Listen in.

Thanks for the letter and more good luck on your QSL's from other stations OM.

P. O. BOX 727

WARNER ROBINS, GEORGIA  
November 3, 1954

Mr. Kermit Geary  
RFD # 2  
Walnutport, Pa.

Dear Mr. Kermit:

It was an extreme pleasure to receive your letter of October 29, and most of all to learn that we are being heard in my native state of Pennsylvania. We have had calls and letters from all over the South and Southeast, but believe me, it is a pleasure to hear from a fellow Pennsylvanian.

I have spent many happy hours in Philadelphia. However, my home is in the Pittsburgh area. I have been in the broadcast business some sixteen years in and about Pittsburgh before coming to Georgia two years ago. This explains my enthusiasm about your letter.

Needless to say, we were very pleased to learn how well our signal was received on Friday, October 29. We had made some changes on our ground system on that date and it was interesting to note that it had helped to increase our signal strength.

We are using a Collins equipment throughout, with a stainless 200 foot guyed tower with a ground system of 120 hard drawn copper wire radials 200 feet long, located 2.4 miles beyond the City Limits in bottom land.

I am enclosing a copy of the Warner Robins Story prepared by the Warner Robins Chamber of Commerce some two years ago. Since that time the population has exceeded the 20,000 mark.

Once again, Mr. Geary, may I say we were very happy to hear from you and receive your detailed log of our broadcast. Your log checks with our log sheet exactly.

Sincere warm wishes from the "Sunny South".

Sincerely yours,

*Howard George*

## **Radio 1540**

23 March 1981

Mr. Kermit Geary  
R.D. 4, Box 321  
Walnutport, PA 18088

Dear Mr. Geary;

On behalf of the entire WRSG staff, we thank you for your letter. It is very pleasing to know that 1540 WRSG is reaching listeners at such a great distance.

Your letter is significant in the fact that it is the first that we have received from Pennsylvania. We have received letters from listeners as far away as Southern Canada. Letters from Missouri, Mississippi, Southern Florida, New York, and North Georgia have arrived telling of WRSG reception. Thanks so much for the tape.

The reason we do so well on skip is two fold 1) We operate on a foreign Class I-A Clear Channel. 1540Khz is assigned to a station in Nassau, Bahamas. I have been to the city and I can't, for the life of me, understand why such a small town would get a Clear Channel, but it did. WRSG is the most southern station operating on this channel which is, compared to other radio channels, pretty open. 2) We utilize a folded-unipole radiator that projects the signal skyward, more than other types of radiators.

WRSG utilizes 1000 Watts with a Gates BC-1G transmitters that modulates with 95% peaks. Our towers is located in a good wt area, being 184 Foot tall.

I have enclosed some information on WRSG RADIO. We invite you to come see us in Sylvester, The Peanut Capitol of The World, if ever down this way.

Sincerely,  
FELDMAN BROADCASTERS, Inc.

Walnutport, PA 18088

We received your letter dated February 6, 2003 in which you state on the evening of February 5<sup>th</sup>, you listened to Praise 1040 for approximately 23 minutes prior to station sign-off. Based on the information detailed in your letter, I can confirm you did in fact receive our signal from your location – approximately 700 miles from Conyers, GA.

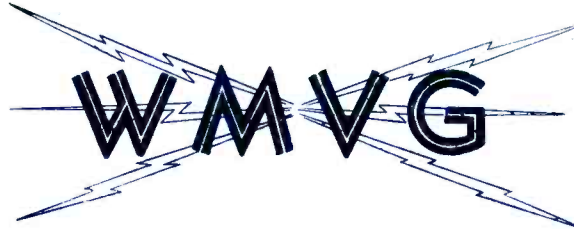

As stated in your letter, we installed a new transmitter (Harris DX15) in September 2002. We operate the transmitter at 80% capacity or 12,000-watts as approved by the FCC. Since our license does not include a “critical hour” we operate at 12,000-watts from sunrise to sunset. We have received notification from other “distant listeners” from as far away as Ohio, but you currently hold the record at 700 miles. CONGRATUALATIONS!!

Sincerely,

A handwritten signature in cursive script that reads "Lynn Battles".

Albany GA

Please confirm my reception of station WALG, Albany. I shall be very happy to receive your reply, kindly verifying the fact that I heard your Frequency Measurement Test as reported in this letter. Return postage is enclosed for your reply. As proof that I was tuned to WALG, I give the following log of the transmission to which I listened:

WALG, 1590 kc.; Thursday morning, December 1, 1960,

12:32 to 12:45 A.M., Eastern Standard Time:

12:32 to 12:34 A.M., 1000-cycle tone.

12:34 A.M., Announcement:

"This is Radio Station WALG in Albany, Georgia, testing for Frequency Measurement. Our call letters are as follows: W as in William, A as in Adam, L as in Lincoln, G as in George." The announcement was repeated.

12:34½ to 12:36 A.M., 1000-cycle tone.

12:36 A.M., Announcement as at 12:34 A.M., not repeated.

12:36½ to 12:38 A.M., 1000-cycle tone.

12:38 A.M., Announcement as at 12:34 A.M., twice.

12:38¾ to 12:41 A.M., 1000-cycle tone.

12:41 A.M., Announcement as at 12:34 A.M., twice.

12:41½ to 12:43½ A.M., 1000-cycle tone.

12:43½ to 12:45 A.M., Concluding Announcement:

"This is Radio Station WALG in Albany, Georgia. This morning we have been testing. If you have heard this test and live outside a 100 mile radius of Albany, Georgia, please send a card to Radio Station WALB, Albany, Georgia, and we will verify your report. Please do that if you live outside a 100 mile radius of Albany, Georgia."

Station identification was repeated, and WALG signed off and left the air.

Please compare the above data with your Station Log of this Frequency Measurement Test and, if my report is correct, kindly send me a reply confirming my reception of WALG, Albany, on 1590 kc. Your attention to this request will be greatly appreciated.

Best wishes to you, sir, and to WALG and its Personnel for continued success in broadcasting. I hope to have the pleasure of hearing you on the air again on future occasions. Looking forward to receiving your reply in confirmation of my reception, for which I thank you, I am,

Very truly yours,

Radio Station WMOC  
Covington, Ga.

Kermit Geary  
RFD #2  
Walnutport, Penn.

Dear Kermit,

This is to confirm your report of reception of WMOC on Nov. 20, 1948. You gave very good and accurate proof that you received us. I am glad to know that we are putting such a good signal into Walnutport now.

When you first received us some time ago, we were radiating 210 Watts instead of 250. This was due to a change in Antenna resistance which we did not discover and compensate for until recently. This means that you might receive us just a very little bit better than previously.

Many thanks for your cooperation and your fine report.

Very truly yours,

  
Robert L. White, Jr.  
Chief Engineer WMOC

Walnutport, Pennsylvania

Dear Sir:

Sorry for the delay in answering your nice reception report. I have been "snowed under" getting the station "on the air". Your reception report checks with our station log.

WCLS is 1,000 watt, daytime, independent, non-directional, operating from sunrise till sunset. We went on the air the 19th of January & began commercial broadcasting on the 20th.

Columbus is a town of approximately 85,000 population, located on the Georgia-Alabama line, just across the Chattahoochee River from the "famous" Phenix City, Alabama.

Thank you for your reception report. We were mighty happy to know we were heard in Pennsylvania.

Yours truly,  
Charlie H. Parish  
Chief Engineer

# WCNN ALL NEWS 68

1266 Riverview Drive  
Walnutport, PA 18088

Dear Kermit:

I have been in receipt of your two letters, one dated October 29, and the other dated November 6, 1982, each containing a tape of your reception of WDYX.

I am happy to report that the first letter and second letter and tapes were of a great interest to us, however, as we can best determine the first reception report was in error. However, the second one is a correct reception report of WDYX on the date of Friday November 5, 1982. In listening to the earlier tape we have been able to conclude that the actual sign off was our correct sign off, but the news report and the announcer just prior to that was apparently a cross-over of another station.

We appreciate your interest, and if we can be of any further service, please let us know.

Under cover, I am returning your tapes.

Very truly yours,

A handwritten signature in blue ink, appearing to read 'Mark S. Joseph', written over a horizontal line.

March 9, 1961

Dear *Kermit*:

In reply to your recent letter, we certainly appreciate your inferring us upon our reception in your part of the country. We have received numerous reports from people all over the United States and in every state east of the Mississippi with the exception of three.

Our furthestest point north was Vermont, south was Cuba, and west was Fort Sill, Oklahoma.

Our equipment consists of a Collins 21-E type 5kw watt transmitter, a Collins 212-G console, and a Utility 320 series tower with 24,800 feet of copper ground radials and a 32 square foot copper mesh ground screen. Our tower is 210 feet above the ground sitting in a man-made pond. We sincerely think this ground system and pond is 50 percent of the success of our signal.

We are a day time operation and hope soon to go night time. We invite you, if you are over in this part of the country, to drop by and see us.

Sincerely yours,

WSIZ RADIO

Kermit Geary  
R.D. 2, Box 298  
Walnutport, Pa.

Dear Kermit,

Thanks very much for your very complimentary letter of November 18th. Your reception log is correct for the morning of November 17th, as that was our regularly scheduled frequency measurement test.

We transmit a 500 cycle tone with station identification every two minutes during the period 0130-0140EST on the third Saturday morning of each month. You might listen again next month if you wish as I would appreciate your report of reception. The next date will be December 15th.

We use the 500 cycle tone so as not to interfere with any Conelrad monitors who might be monitoring that frequency as their alarms are activated by a 1000 cycle tone.

Our transmitting antenna is a 176' vertical radiator situated in an abandoned rice field on the edge of the city. This makes a very nice ground system.

Thanks again and best wishes,

  
George Andrews  
Chief Engineer

Thomaston, Georgia

January 3, 1949

Mr. Kermit Geary  
RFD 2  
Walnutport, Penn.

Dear Mr. Geary,

I imagine this verification is a little different from any you have received.

You called our schedule to a "T". It seems to be word for word as they were uttered, with just one word left out. Where you had Western Georgia, we say West Central Georgia.

Enjoyed your letter, and took the liberty to reproduce it in the attached folders which we will use on all outgoing mail until 500 of them have been used up. I mailed one to all local hams and they were quite interested.

We are located in that part of Georgia that was hit real hard by Sherman's march to the sea. Area showed no progress for many years, as we were pretty much as Germany now seems to be. But in the last thirty years have moved forward industrially. We have four large textile plants. The rural areas of our county shipped more peaches than any other county in the world until a few years ago when the farmers started turning to the beef cattle business. Our weather is ideal. Warm but above the mosquito and gnat territory.

Thanks again for your letter.

Yours very truly,

  
S. J. Carswell

DECEMBER 6, 1977

DEAR MR. GEARY:

THANK YOU FOR YOUR DETAILED RECEPTION REPORT OF WKBX. THIS LETTER IS TO CONFIRM THAT YOU RECEIVED WKBX ON NOVEMBER 28, 1977.

WKBX OPERATES FULL-TIME WITH 5000 WATTS USING A DIRECTIONAL ANTENNA AT NIGHTS. OUR STUDIOS AND TRANSMITTERS ARE LOCATED EAST OF SAVANNAH ON OATLAND ISLAND AT THE SITE OF AN OLD SUGAR PLANTATION. OUR ANTENNA SYSTEM CONSISTS OF THREE SELF-SUPPORTING (NON-GUYED) TOWERS 400 FEET TALL. AT NIGHT, OUR SIGNAL IS BEAMED EAST-WEST PROTECTING WMAL, WPRO AND A CUBAN STATION. THANK YOU AGAIN FOR YOUR RECEPTION REPORT AND STOP BY AND VISIT IF YOU EVER COME TO SAVANNAH, THE "GATEWAY TO THE SOUTH".

SINCERELY,

*William C. Garwood*

Dear Mr. Geary:

We should like to verify your reception of W. K.L. E. on September 3, 1955. At that time we were engaged in equipment test broadcasts.

Many thanks for your response to our signal.

Sincerely,

A handwritten signature in cursive script that reads "Grady Berry, Jr.".

Dear Mr. Geary:

We are very pleased to have your very nice report on the reception of our test broadcast of November 9th., 1947. It is helpful, and very much appreciated.

The program data checks perfectly with our log, and we are indeed happy to forward this confirmation of same. Also, hope that you will be able to hear us again on some future test broadcast.

Most cordially yours,

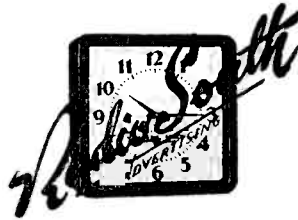

WKLY BROADCASTING COMPANY,

By *Wm L Hayes*

Mr. Kermit Geary

RFD #2

Walnutport, Pennsylvania

Dear Mr. Geary:

Thank you for your report of reception of the signals of WKMA on Saturday, September 13, from 2:45 to 3:02 AM, EST.

I have compared your report with our log for times, and checked the text of the announcements and find them both accurate. Since I was on duty at the time and did the announcing, I can verify your report completely.

Our equipment here consists of an RCA 250-D Transmitter ( PP 805s plate modulated by PP 805s) feeding a 150 foot aluminum straight sided guyed tower through a 120 foot four wire balanced transmission line. The remainder of the transmitter house equipment consists of an RCA limiter, two turntables, mike and speech amplifier, and small control console.

The studio speech equipment is all Gates except for the custom built console and QRK turntables. We have an announcing booth, a production studio, and an auditorium, with the control room operator stationed so as to be able to see all of them.

The studios are located in Quitman proper and the program is fed to two lines going to the transmitter which is located on high ground one mile northeast of the town.

Thank you again for your report, and may all your reception be DX.

Sincerely yours,

*Joseph N. Ratti*  
(engr. WKMA)

Dear Kermit:

Thanks for sending us the terrific letter and tape to Rodney Blackmon, our engineer! You really made my day because I was the afternoon D.J. who made it possible!

All of our employees at WBRO are delighted to hear from you. Our station has been a tradition for Waynesboro, Ga. for thirty-four years.

I enjoy being part of the team even though I'm a Cajun transplant from Southwest Louisiana.

Look forward to hearing from you and continue tuning-in to WBRO and perhaps you'll hear me say something in Cajun French to you!

Sincerely,

*Charleen M. Huval*

Dear Sir:

We are pleased to confirm your reception of our station on October 21, 1947. Your report was gratifying since this was our second test and naturally we were very interested in receiving information concerning the performance of our station.

For your information we are using a Raytheon RA-1000 xmrtr and a 335 feet Wincharger guyed tower and will be operating daytime only. Possibly you may hear us again in the future and you may rest assured that we will appreciate any comments on our station.

Thanking you again, we remain

Yours,  
WKTG

Dear Sir:

This is to confirm your report of 1-12-67. We were on the air during the time stated in your report for a frequency check. We make these checks on the second Thursday morning of each month at 1:45 a.m.

We are a daytime station in Jesup, Georgia on 1370 kc. We have a Collins 21/E transmitter, one antenna 197' high.

We appreciated your report very much.

Very truly yours,  
*Fred G. Hodge*  
 Fred G. Hodge  
 Chief Engineer

The 1000 watt transmitter you mentioned in your letter was replaced with the 5000 watt Collins in 1962. Mr. Nichols left this station about 1951 and Mr. Art Manning was chief engineer here until 1964. The Station was sold in 1965 and I have been chief since the change of ownership. We plan to go FM in the near future. I might add that I am very fond of our Collins Transmitter. X HAXX HXXX HXHXHXHX

I also received report from Houston, Texas and Seymour, Conn. on the same day I received yours.

Dear Kermit:

Thanks for your letter of Dec. 30. Sorry to be so late in answering, but things here have been hectic.

You did indeed hear our sign-off and I'm surprised that you were able to record the quality from 700 miles away.

Thanks again for writing and stay tuned to 1540 and you may be able to pick us up again sometimes.

Very truly yours,

Don Earnhart
