The Most Complete Transformer Line in the World . . . FROM STOCK

A quarter century of specialized experience and original research has gone into the development of UTC catalog items. Covering the range from tenth ounce units to others weighing hundreds of pounds, UTC stock items are available for virtually every application in the electronics field. Each of these items carries a plus value . . . UTC RELIABILITY, highest in the field.

Vol. 29, No. 6A

Published monthly with an additional issue in June by McGraw-Hill Publishing Company, Inc., James H. McGraw (1860-1948), Founder, Executive, Editorial and Advertising Offices; McGraw-Hill Building, 330 W. 42 St., New York 36, N. Y. Longacre 4-3000. Publication Office, 219 So. American St., Philadelphia 5, Penna. Donald C. McGraw, President; Paul Montgomery, Executive Vice-President; Joseph A. Gerardi, Vice-President and Treasurer; John J. Cooke, Secretary; Nelson Bond, Executive Vice-President, Publications Division; Ralph B. Smith, Vice-President and Editorial Director; Joseph H. Allen, Vice-President and Director of Advertising Sales; J. E. Blackburn, Jr., Vice-President and Circulation Director.

Subscriptions: Address correspondence to Electronics—Subscription Service, 390 W. 42nd St., New York 36, N. Y. Allow one month for change of address. Subscriptions are solicited only from persons engaged in theory, research, design, production, maintenance and use of electronic and industrial control components, parts and products. Position and company connection must be indicated on subscription orders.

Single copies 15¢ for United States and possessions, and Canada; 21¢ for Latin America; 25¢ for all other foreign countries. Backs? Double the subscription rates—United States and possessions, 95¢ for one year; 20.00 for two years. Canada, 110.00 a year; 210.00 for two years. Other western hemisphere countries and the Philippines, 110.00 a year; 220.00 for two years. All other countries 200.00 a year; 400.00 for two years. Three-year rates, computed on renewable basis, are double the one-year rate. Second-class mail privileges authorized at Philadelphia, Penna. Printed in U.S.A. Copyright 1956 by McGraw-Hill Publishing Co., Inc.—All Rights Reserved.

CAPACITORS

PERMAFIL CAPACITORS: Permafil high-temperature capacitors are designed to meet the performance requirements of MIL-C-25A Characteristic K capacitors, and are suitable for operation in ambient temperatures from -55 to $+125$ C at full rated voltage.

Permafil, used as the impregnant instead of mineral oil, is a solid resinous material having excellent electrical characteristics over a wide temperature range. Since it is a compound, the processing and manufacture of Permafil capacitors can be controlled to exacting requirements, and results in units that are more reliable at elevated temperatures. Because the impregnant is solid, it obviates possibilities of leaks. Write for Bulletin GEC-811.

CAPACITORS

STANDARD COMMERCIAL TYPES Fixed Paper-dielectric Capacitors

A-c/d-c dual-rated Pyranol* capacitors for motors, controls, electronic equipments, and other applications will reduce inventories, simplify design problems, and increase standardization. Capacitors in the voltage ranges 236 through 660 volts, a-c, and 400 through 1500 volts, d-c, are now dual-rated and can be used for either a-c or d-c applications. Other a-c and d-c ratings available: 0.01 to 75 μ f, 236 to 660 volts, a-c, and 100 to 100,000 volts, d-c. Write for Bulletin GEC-809.

G-E CAPACITORS TO MEET MIL-C-25A SPEC. 100 to 12,500 Volts D-c—0.01 to 15 Microfarads

These fixed paper-dielectric capacitors are designed to meet the rigid requirements of the joint Army-Navy specifications for use in electronic equipment for the armed forces. Hermetically sealed in metallic containers, these capacitors for d-c applications are available in Characteristics E and F and in case styles CP-53, -54, -55, -61, -63, -67, -69, and -70. In addition to regular applications, these units may also be used at higher temperatures, higher voltages for short-life applications, and with a-c voltages. Write for Bulletin GEC-810.

* Registered trade-mark of General Electric Co.

SUBMINIATURE METAL-CLAD TUBULAR CAPACITORS

Subminiature metal-clad tubular capacitors are now available with Permafil or Mineral-oil impregnation. The Permafil is a solid, resin dielectric for operating from -55°C to $+125^{\circ}\text{C}$ without derating. Silicone end seals of all-welded construction provide maximum resistance to thermal and physical shock. The Mineral-oil metal-clad tubular has KOVAR glass-to-metal seal appendages and operates from -55°C to $+85^{\circ}\text{C}$. Both capacitors meet performance requirements of MIL-C-25A. Right-angle leads in Permafil only. Supplied in standard case sizes in either inserted-tab or extended foil designs. Ratings range from 0.01 to 1.0 μf in voltages of 100, 200, 300, 400, and 600, d-c working.

Write for Bulletin GEC-987.

G-E TANTALYTIC* CAPACITORS

The Tantalytic capacitor was developed to fit low-voltage applications where superior performance and small size are the major factors.

The Tantalytic capacitor is a foil-type, tantalum-electrode, electrolytic unit, similar in construction to an aluminum electrolytic capacitor, but, because of the characteristics of tantalum foil and the electrolyte employed, is smaller in size. The Tantalytic capacitor has lower leakage currents, longer shelf life, and a wider range of temperature operation, without derating, than the conventional aluminum electrolytic capacitor. Tantalytic capacitors, in a wide range of ratings, are currently being used in telephone equipment and military communication and electronic equipment. They are available for 85 C and 125 C service.

Write for Bulletin GEA-6258.

G-E DRAWN-OVAL CAPACITORS

G-E drawn-oval capacitors have found wide application in fluorescent-lamp ballasts, air-conditioning and refrigeration equipment, business machines, luminous-tube transformers, submersible pumps, and industrial control. They are smaller, lighter, stronger, and 10 to 20 per cent less costly than standard fabricated fixed paper-dielectric types. Ratings range from 1 μf to 20 μf at 236 to 660 volts, a-c, and 1 μf to 15 μf at 600 to 1500 volts, d-c. They are available in single-, double-, and triple-section types with a wide range of terminal styles. Drawn-oval capacitors can be mounted in any position with suitable brackets available.

Write for Bulletin GEA-5777.

* Registered trade-mark of General Electric Co.

ENERGY STORAGE

These d-c Pyranol* capacitors for phototube and similar light-duty, energy-storage applications are the result of years of experience in the design and manufacture of capacitors for this type of service. They are relatively lightweight, small, stable capacitors having a life consistent with the application involved. Write for Bulletin GEC-1357.

MICRO-MINIATURE TANTALYTIC CAPACITORS

Designed for low-voltage applications where superior characteristics and size are important. Applications: In miniaturized assemblies with transistors: In hearing aids, and military applications employing transistors. Write for Bulletin GEA-6065.

PULSE-FORMING NETWORKS

These capacitor pulse-forming networks, Type E, are for applications in radar and industrial equipment where the normal (exponential) capacitor discharge shape is not suitable and where an impulse having a definite energy content and duration is required. Write for Bulletin GEA-4996.

COMPONENT RECTIFIERS

Vac-u-Sel, * COPPER-OXIDE, AND GERMANIUM

Rectifiers for practically any d-c power requirement are available from General Electric. Vac-u-Sel rectifiers are a new, high-quality type of selenium rectifier produced by an exclusive G-E sphere-type, vacuum-

evaporation process. In addition, General Electric also makes a full line of copper-oxide and germanium rectifiers.

Miniature Vac-u-Sel rectifiers

Standard Vac-u-Sel rectifier stack construction

Tube-mounted Vac-u-Sel rectifier stack construction

GENERAL ELECTRIC Vac-u-Sel RECTIFIERS

• 63 VOLTS PEAK INVERSE

• 130 C AMBIENT OPERATION

• 80,000 HOURS LIFE EXPECTANCY

The special vacuum-evaporation process employed in making Vac-u-Sel rectifiers makes possible the outstanding performance characteristic of this selenium rectifier. With G-E Vac-u-Sel rectifiers, you can now match performance requirements for life expectancy, ambient operating temperature, and atmospheric protection, as well as electrical characteristics. Two (2) new rectifier cells make up the new line of Vac-u-Sel rectifiers: a 26-volt and a 45-volt cell. Both are high-temperature cells.

The 26-volt cell is a long-life, standard industrial cell with a life expectancy of 80,000 hours at normal current rating at 35 C ambient. The 26-volt cell can meet operating requirements up to 130 C at full voltage. Current need not be derated where shorter life is acceptable. Life expectancy at 130 C is 1000 hours.

The 45-volt cell has a 63-volt peak inverse voltage. Unlike most

45-volt rectifiers, this is a true, long-life industrial cell. Frequently, this rectifier may be substituted for those employing 26-volt cells. Since fewer cells are required, savings of up to 30 per cent in cost, and up to 35 per cent in the size of the stacks are possible. Life expectancy of the 45-volt cells at normal current rating at 35 C ambient is 60,000 hours, and they can be used at ambient temperatures up to 110 C.

All Vac-u-Sel rectifiers operate with exceptionally low forward-voltage drop and low reverse leakage, and their margin of superiority in these characteristics increases with service. All Vac-u-Sel rectifiers undergo extensive testing and grading, and matched cells are used in assembling stacks. A variety of finishes and mounting arrangements are available to meet virtually any requirements. Write for Bulletins GEA-5935 (miniatures); GEA-6273 (standard).

COPPER-OXIDE RECTIFIER STACKS

G-E copper-oxide rectifier stacks offer these outstanding features:

- No unforming
- Ability to withstand momentary current overloads
- Ability to withstand momentary voltage overloads
- Long life with little aging
- Highest efficiency at low voltages.

These features of G-E copper-oxide rectifiers make them especially suited for certain types of magnetizing circuits, which require the

rectifier to withstand high current inrush and momentary voltage overload.

Perhaps the most widespread use of copper-oxide rectifiers is in the field of circuit-breaker operation. Here, the unique characteristics of copper-oxide rectifiers are especially important.

The above features also make G-E copper-oxide rectifiers ideal for the following applications: • Blocking • Metering • Polarizing relays • High-speed relays • Electroplating • Electrolytic reduction • Telephone and telegraph equipment • Control contactors • Low-voltage, high-current power supplies • Testing equipment • High-voltage surge protectors • D-c welders. Write for Bulletin GEA-5699.

* Trade-mark of General Electric Co.

INDUSTRIAL GERMANIUM RECTIFIERS

G-E industrial rectifiers offer these outstanding features: • Lowest forward drop per ampere per square inch • Best current output, smallest size, and lightest weight per watt output of existing metallic rectifiers • High efficiency • No unforming • Negligible aging.

These G-E germanium metallic rectifiers are of the broad-area type. Their very low forward-voltage drop gives excellent regulation. The high

output voltage per cell permits the use of fewer cells, and rectifying properties are instantaneous since they do not require artificial forming. G-E germanium rectifiers can be operated at extremely high current densities, and a large d-c output is obtainable from a very small germanium rectifier.

The regulation is less than 6 per cent when operated at the high current densities permissible with germanium rectifiers. With most metallic rectifiers, regulation is usually between 15 and 20 per cent at their normal current densities. Germanium rectifiers have a broad application in power conversion where size and weight requirements are at a premium. Write for Bulletins GEA-5773 (industrial rectifiers); GEA-6224 (power supplies); GEA-6297 (anodizing and electroplating).

Complete information on Vac-u-Sel, copper-oxide, and germanium rectifiers is available from your nearest G-E Apparatus Sales Office, or by writing to Section 640-445, General Electric Company, Schenectady 5, New York.

SPECIALTY TRANSFORMER PRODUCTS FOR ELECTRONIC EQUIPMENT

HERMETICALLY SEALED: A complete line of hermetic transformers in 22 standardized case sizes was specifically designed to meet the performance requirements of the government MIL-T-27 specifications. These units, featuring drawn-steel cases and silicone bushings, are the most dependable sealed transformers it is possible to provide and can be used on a wide range of applications.

OPEN TYPE: Usually applied where moisture resistance is not an important factor, and where size and weight must be kept to a minimum. Composed of automatically wound coils imposed on finest-grade silicon-steel core laminations, they are of the same uniform high quality as our encased transformers. Made to exacting tolerances to provide excellent electrical characteristics. Terminal boards top- or bottom-mounted, or with leads, and with mounting studs or brackets to meet special requirements.

EPERMIL TYPE: Three new encapsulated transformer lines now permit designers in the electronic industry to choose the best and least-expensive encapsulation for their applications: (1) an extremely durable elastomer formula for Class H, (2) Class A modified epoxy resin, and (3) other combinations of varnishes and epoxys or polyesters for less-rigid environmental conditions.

AIRCRAFT TRANSFORMERS

General Electric manufactures a complete line of standard 400-cycle aircraft transformers which includes general-purpose transformers, phase-changing transformers, high-temperature silicone transformers, ballasts for fluorescent lamps, ignition transformers for cabin heaters, de-icers, and jet engines. General Electric builds transformers to individual specifications, both military and commercial.

POTTED TRANSFORMERS

Particularly suitable for applications where moisture or humidity is excessive. For such applications, they are far superior to core-and-coil units. If immersionproof unit is not required, they are more economical than hermetically sealed transformers. They have wide application in the electronics field, such as in frequency-modulation, carrier-current, and speech-input equipment.

CONTROL, PANELBOARD, AND SIGNAL TRANSFORMERS

Two new lines of transformers for control and small, general-purpose loads designed to fit the needs of electronic-equipment and panel builders. Standard control transformers are available in dual-frequency, series-multiple ratings from 25 to 2000 va, enclosed construction, and from 25 to 250 va for open wiring. Panelboard transformers are available from 50 to 5000 va in a standardized line of 22 ratings featuring a choice of leads, circuit breakers, or 1-, 2-, and 4-fuse combinations. Special control transformers can be furnished for normal and high-reactance applications having special voltage and load requirements.

HIGH-VOLTAGE TRANSFORMERS

Are used as components of radio and television transmitter equipment, and allied devices which require high operating voltages above ground. Construction type shown in the photograph permits a substantial reduction in size and weight—critical factors in many installations. A cost saving is also effected over similar ratings of enclosed-type construction.

AUTOMATIC VOLTAGE STABILIZERS

For equipment which requires accurate line-voltage regulation in ratings of 15 to 10,000 va, standard G-E stabilizers can be used to cut costs and save space. Many of the standard models can be operated from either 115 or 230 volts and will deliver either 115 or 230 volts to the load, thus providing transformation, as well as regulation.

With line-voltage variations of 30 per cent, these stabilizers will maintain output voltages to within ± 1 per cent of the normal. Quiet, automatic, they provide correction within two cycles.

If your product is composed of one of the following items, it will pay you to investigate stabilizers: television and radio equipment; telephone apparatus; sound equipment; lighting circuits; photometers; x-ray equipment; rectifiers (full-wave); electrochemical apparatus; test equipment and precision processes; photographic equipment; electronic circuits; calibration devices; color comparators. Write for Bulletin GEA-5754. Special designs can be furnished in ratings in excess of 10,000 va, or with special voltages, if desired.

SPECIALTY TRANSFORMER PRODUCTS FOR ELECTRONIC EQUIPMENT

SATURABLE REACTORS

Their features are: 1. provide control in an a-c circuit by means of a direct current. 2. provide a wide range of control with smooth adjustment over entire range. 3. d-c control power required is small, obtainable from any reasonable combination of available current and voltage. 4. very efficient, even at light loads. 5. voltage drop in reactor at full saturation is small, permitting 93% or more of the voltage to be applied to load. 6. compact, sturdy, no moving parts. 7. control power readily obtained from inexpensive rectifier. 8. conveniently installed in least-crowded part of the building for remote-control operation. 9. provide a means of insulating the d-c control from the a-c circuit. These units are for use as control devices for numerous automatic and manual control applications.

AMPLISTAT

APPLICATION: The amplistat is a complete packaged d-c amplifier applicable to a wide range of control and instrumentation purposes. Standard ratings are available from 1 va to 930 va. The following are a few of the many possible combinations of SIGNAL SOURCES (Thermocouples, Strain gages, Thermistors, Photocells, Phototube amplifiers, Bismuth-wire magnetic-field sensitive resistors,

Shunts, Resistance-type temperature bulbs, other Amplistats) with CONTROLLED DEVICES (Relays, Solenoids, Small-motor fields, Generators, Amplidyne fields, Power rectifiers, Lamps, Heating elements, other Amplistats).

FEATURES: High Gain—Isolation—Input windings galvanically isolated from output. Reliable—Rugged construction, little, if any, maintenance. Static—No moving parts. No warm-up time—Has no tubes. Compact—Fits easily on control panels and chassis.

INDUCTION VOLTAGE REGULATORS

INDUCTROLS (Automatic, motor, or hand operation)

For electronic and industrial applications up to 600 v, automatic Inductrols (dry-type or liquid-immersed induction voltage regulators) provide a constant a-c output voltage as the supply voltage varies. Other controls hold a-c current, rectified d-c voltage or current. Hand- and motor-operated types are also available. NO BRUSHES TO WEAR OUT! NO OIL TO MAINTAIN! NO

RADIO INTERFERENCE! ABSOLUTELY STEP-LESS CONTROL! NO WAVE-FORM DISTORTION! AUTOTRANSFORMER EFFICIENCY! Inductrols are available for circuits up to 600 v. Popular 120/240-volt ratings give up to +100 per cent regulation. Write for Bulletins GEC-795, GEA-5824, GEA-6261.

SPECIALTY COMPONENT MOTORS

FRACTIONAL-HORSEPOWER MOTORS

Synchronous Induction Motors: High torque at slow synchronous speed for remote-control devices, indicating instruments, timing devices, etc. For

low-inertia applications requiring rapid changes in rotation. Synchronous speed: 75 rpm, 75 oz-in. torque. Motor starts, stops, reverses, within 1/2 cycle of power supply. Smaller size delivers 2 oz-in. at 100 rpm. Write for Bulletin GEC-1294.

Taxi Dynamotors: Compact, lightweight units convert low-voltage, d-c power to high-voltage, d-c for mobile radio transmitters in taxis, police cars, trucks, buses, railroads, fire departments, forestry radio transmitters, etc.

Input: 6-28 volts. Output: up to 660 v, 165 watts, 5 min on, 15 min off-duty cycle.

Permanent-magnet Motors:

Permanent-magnet, totally enclosed, shunt motors for aircraft operation (very high ambient), blower, actuator, tuner, and other applications. Can be dynamically braked by short-circuiting armature terminals, and reversed by use of relays. Explosion-proof, shock-resistant. 0.01 hp, 10,000 rpm, 27.5 v input, 130 rpm with gear reduction. With radio-interference filter. Write for Bulletin GEC-988.

ELECTRONIC AMPLIDYNE

An extremely responsive amplifier combined with a motor-amplidyne set, useful in many types of motor control where precise regulation of current, voltage, and speed is necessary or desirable.

APPLICATION: Control speed, limit loads, hold tension, speed up acceleration, position precisely, assure quick stopping. Readily adaptable to programming and processing control.

RATED—As a regulated, adjustable-voltage power supply for d-c motors up to 1 1/2 hp. As regulated exciter for large, adjustable-voltage drives up to 200 hp. The unit has an output of 1 1/2 kw, 250 volts. Can be arranged for use on 220- or 440-volt, 3-phase, 60-cycle power supply.

The G-E electronic amplidyne is applied as a part of a complete control system. Write for Bulletins GEA-4053, GEA-4889.

SWITCHBOARD AND PANEL COMPONENTS

TERMINAL BOARDS

Typical EB-5 board with short-circuit strips

Typical EB-6 board with hinged cover

For use where leads are brought to any point for permanent or temporary connection, especially if many wires are involved.

Type EB-5 are fabricated terminal boards. Each is equipped with the necessary washer-head binding screws for circuit-wire connections.

Type EB-6 are fabricated terminal boards of the same construction and size as the Type EB-5, except that clamp-type connectors are furnished.

Boards will accommodate wire sizes from No. 18 to No. 10 inclusive. Completely assembled boards can be furnished, with or without covers, for any number of poles, 2 through 18.

CONTROL and TRANSFER SWITCHES

Type SB-1 design is extremely flexible and can be applied to meet special requirements. Features include: square operating shaft with cams to provide positive contact operation; silver-to-silver contacts; totally enclosed compact design; ample space for connecting leads; choice of operating handles; permanent-finish

Textolite* escutcheons; wide range of stages and contact positions, the number of circuits to be controlled determining the number of stages and contacts needed. Switches having up to 16 stages are commonly furnished. The maximum number of positions, or throws, is twelve.

Rating of Type SB-1 switches is 600 v, 20 amp continuous, 250 amp for 3 seconds. Interrupting rating depends upon voltage and character of circuit, as well as number of contacts in series. Write for Bulletin GEA-4746.

* Registered trade-mark of General Electric Co.

INDICATING LAMPS

Types ET-5 and ET-6 offer high visibility, low wattage, and long life. Consist of telephone-type lamp with contacts mounted within an insulated tube and with a ceramic resistor for any standard voltage up to 600 v.

For any panel thickness up to 2 in. Color cap provides excellent vision from any angle. Available in 6 colors: red, white, amber, blue, yellow, and clear.

AIR CIRCUIT BREAKER

Switching and better protection of power circuits is secured by using air circuit breakers. Type AK-1 breakers are available for switchboard mounting for use, for example, as main power-supply breaker in TV transmitters or are individually enclosed for remote installations. Current ratings from 15 through 4000 amperes, up to 600 volts, a-c, and 250 volts, d-c. See GEA-5915 for full details.

HIGH-INTERRUPTING-CAPACITY FUSES

The General Electric high-interrupting-capacity Type CLF fuse provides efficient and economical short-circuit protection for control power circuits, motor starters, feeders, and similar applications on systems 600 volts and below. Not only will the CLF fuse isolate faulty apparatus and circuits, but it also affords better protection by reducing the destructive energy associated with short circuits. Rated to interrupt available short circuits of 100,000 amp, these fuses are available in ratings from 6 through 200 amp, 250 v, d-c, and 600 v, a-c.

MOLDED-CASE CIRCUIT BREAKERS

Molded-case circuit breakers comprise a complete line of fuseless protection for distribution, power, lighting, and appliance circuits. They are used in individual mountings, built-in applications, separate enclosures, switchboards,

panelboards, and load centers. The sturdy, molded-phenolic cases and trip units are sealed against tampering. The circuit breakers are quick-make, quick-break; they are trip-free and trip-indicating.

Listed by Underwriters' Laboratories, Inc.

REPRESENTATIVE 50-AMPERE FRAME TYPES

5000-ampere, a-c, interrupting ratings

and independent magnetic trip.

Type R—single-pole, plug-in units for standard-duty applications from 15 to 50 amp, 120 v, a-c, 120/240 v, a-c, 2-wire, with thermal magnetic trip.

Type ALB-1—single-pole, plug-in unit meeting Navy Hi-shock requirements, 125 v, a-c/d-c, 5 to 50 amp, thermal and independent magnetic trip. Navy breakers not U/L listed.

Type TQ—single-pole, front and back mounting for heavy-duty applications from 10 to 50 amp, 120 v, a-c, 120/240 v, a-c, 2-wire, with thermal

Type TQL—single-pole, or two-pole with common trip, plug-in units for heavy-duty applications from 10 to 50 amp; single-pole, 120 v, a-c, 120/240 v, a-c, 2-wire; two-pole, 120/240 v, a-c, with thermal and independent magnetic trip. Other types are available in standard industry sizes from 10 to 600 amp for applications up to 600 v. For further information, write for Bulletin GEC-1032 to Trumbull Components Department, 41 Woodford Avenue, Plainville, Connecticut.

Type R

Type ALB-1

Type TQ

Type TQL

When ordering or seeking information please mention Electronics Buyers' Guide.

CONTROL ACCESSORIES

A-c or D-c SOLENOIDS, CR9500

Simplify complex installations: In direct or remote control requiring short, powerful thrusts. Wide selection: 24 different ratings, to 40 lb at 1/2-in. stroke or to 36 lb at 1-in. stroke, available in push- or pull-type operation and for use on a-c or d-c circuits up to 600 volts, maximum. Used to push or pull in a straight line, or to provide mechanical motion at a remote or inaccessible location. They may be operated remotely from a push-button station or automatically by limit switches, pressure switches, float switches, or other pilot-circuit devices. Write for Bulletin GEA-6215.

OILTIGHT PUSH-BUTTON UNITS, SELECTOR SWITCHES, INDICATING LIGHTS

Push-button unit

Selector switch

Indicating light

A push button with building-block construction. This provides flexibility to meet requirements for special units by simple combination of the basic elements, which consist of separable operators, a removable color ring for identification, and a basic contact block. Operators and contact blocks are furnished separately. Single, double, or tandem contact blocks are quickly and easily attached to any type of operator. A complete line of oiltight stations, units, selector switches, and indicating lights is offered. Write for Bulletin GEA-5779.

General-purpose Relays, CR2790E

Used to control pilot circuits in response to remote-control switch or thermostat. Also, for direct control of small motors driving pumps, fans, etc; as a f-hp motor starter, and in conjunction with a magnetic switch controlling larger motors, and for signal systems. Comes in open-type or in general-purpose case. Explosion-proof and watertight cases available as kits. Three contact arrangements available; double-pole, double-throw; double-pole, single-throw; single-pole, single-throw. Protection against hazard from restarts after power failures can be provided with the double-pole form when one pole is used as a holding interlock in the coil circuit together with a momentary-contact, push-button station. Enclosed forms have convenient conduit entrances at top and bottom. Write for Bulletin GEC-257.

GENERAL-PURPOSE PHOTOELECTRIC RELAY

This general-purpose, photoelectric relay, CR7505-K100G3, including a double-pole, double-throw magnetic relay, operates from the interruption of a beam of light, making it simple for items on a production line to be counted easily and quickly. The relay also makes possible automatic weighing with a beam scale and automatic signaling for elevators or doors to save valuable time. Available with a complete line of accessories to operate over light-beam distances of 9 to 30 feet, up to 150 operations per minute. Write for Bulletin GEA-3533.

15-AMP CONTACTOR, CR2810-1265

For small motors; this normally open, single-pole, single-throw contactor is small, self-contained, and inexpensive. The coil is of the layer-wound type, requires only a few watts of power, and is connected directly across the line. The connections are easily made: all terminals are in the top molded part. A form is available which includes a non-insulated interlock, permitting the use of a momentary-contact push button for operating the contactor; the combination provides undervoltage protection. Complete line of magnetic motor starters available.

Type	110 v	220 v
Open	1/2	1/2
Enclosed	1/2	1

ELECTRONIC TIMER, CR7504-A142

For 60- and 50-cycle, 115- or 230-volt, a-c circuits. Three standard models, with selection from 0.06 to 120 seconds in ranges of 20:1. Relay may be connected to be normally energized or normally de-energized during the stand-by period; it is always de-energized during the timed period and energized after timing out. Extremely useful for timing operations of short duration or to provide automatic control for various stages of industrial processes. Repetitive accuracy: $\pm 2\%$ on all settings above 0.5 second.

The unit includes one standard vacuum tube and a magnetic relay with double-pole, double-throw contacts rated 10 amperes, a-c, at 230 volts. Time setting is adjustable by a potentiometer with dial which reads directly in seconds. Potentiometer and dial-plate assembly may be removed easily for remote mounting, if desired. Write for Bulletin GEA-5255.

PUSH-BUTTON STATIONS

For control circuits of magnetic controllers designed for push-button control. Standard- and heavy-duty stations available which may consist of various combinations of momentary-contact buttons, maintaining-contact buttons, selector switches, and indicating lights, for surface or flush mounting. Standard-duty station recommended for use with contactors rated up to and including 150 amp. Write for Bulletins GEA-3469 (Standard-duty) and GEA-5043 (Heavy-duty).

SPECIALTY CONTROL

ULTRASONIC GENERATOR For Cleaning Small Parts

Quickly and thoroughly removes oil, grease, chips, dirt, lapping compounds, and other contaminants from surfaces, corners, and small holes of precision-built, irregularly shaped parts. Time, labor, and floor space are saved.

Equipment comprises an electronic power unit (essentially a high-frequency oscillator) in a 45-inch-high cabinet. A transducer assembly with a quartz crystal is housed in a 4-inch-

diameter well. Parts are cleaned in any suitable container placed in this well. Operated at 300 kc, 500 kc, 750 kc, or 1 megacycle. Power input is 500 w at 115 v, 50/60 cycles. Write for Bulletin GEA-6056.

SELSYNS, CR9890

Indicating or control selsyns are a highly accurate and rapid means of communication. They are used successfully in such applications as indicating the positions of valves, governors, bridges, turntables, dampers, etc. Selsyns have been very successful in servo systems where the selsyns operate to guide action of power units.

Two types of selsyns are available—the high-accuracy type which has an accuracy of ± 1 degree and the general-purpose type which has an accuracy as close as ± 5 degrees. Selection can be made from a variety of sizes suited for each application. A complete line of indicators and transmitters including selsyns is available. Write for Bulletin GEA-2176.

HERMETICALLY SEALED RELAYS

The General Electric family of hermetically sealed relays has been designed to meet, or better, all provisions of applicable military specifications. Operating in its own atmosphere, completely independent of conditions outside of its rugged electro-tin-plated, drawn-steel housing, each relay offers greater reliability, longer life, and reduced size and weight for both military and industrial applications.

MINIATURE, CR2791

1. G121 series—For military applications; coil voltage 1 to 300 volts, d-c; coil resistance 10-30,000 ohms; AN 3304 type relay; designed for special reliability.
2. G126 series—For industrial and military applications; operates from 115 volts, a-c; for long-life switching, currents up to 5 amp at 115/220 volts, a-c, or 30 volts, d-c. (Example: pulsing coil of similar relay, expected life, 50 million operations.)
3. K110 series—High-speed polarized relay; switching up to 10 milliamp; operates in as little as $\frac{1}{4}$ millisecond (250 microseconds); AN 3304 size can—4PDT or 4 independent single-pole, double-throw elements.

SUBMINIATURE, CR2791

4. G152 series—Designed to give reliability of AN 3304 type relay

in subminiature-size enclosure; weighs less than one ounce; $\frac{3}{4}$ inch in diameter and $1\frac{1}{4}$ inches long; single-pole, double-throw.

5. G125 series—Same size and weight as G152. Design is modified to permit operation from 400-cycle, a-c voltage.
6. G160 series—High reliability in subminiature size; exceptionally resistant to shock and vibration; two-pole, double-throw.

MICRO-MINIATURE, CR2791

7. G200 series—Standard model—two-pole, double-throw in tiny size (weighs approximately $\frac{1}{3}$ ounce and measures only 0.350 in. by 0.785 in. by 0.875 in.); contacts rated 2 amp; has a sensitivity of 300 milliwatts.
8. G210 series—Current-sensitive model with a sensitivity of 190 milliwatts; designed for lower operating power; possesses same features as standard model, but about 0.31 in. longer.

LOW-CAPACITY RESISTANCE-WELDING CONTROL

CR7503-A140A2 synchronous spot-welding control, including heat control, for low-capacity welders.

The CR7503-A140 low-capacity resistance-welding control, designed for bench-type welding heads, provides precise timing and transient-free operation—two factors essential for consistently high weld quality. Therefore, it is ideal for jobs requiring minimum rejects without sacrifice of production speed.

Welding time is adjustable in one-cycle steps, from one to 10 cycles, by means of a single, calibrated control. Control of weld current is achieved by the phase-shift, heat-control method, providing smooth, stepless adjustment of current from 20% to 100%, regardless of rated voltage. Since both weld time and current are held constant, welding results are consistent.

PORTABLE TESTING AND RECORDING INSTRUMENTS

PHOTOELECTRIC RECORDER—Type CE: For temperature measurements, developmental testing, high-speed recording, laboratory investigations, physiological research, and equipment tests. Provides direct ink records, and is ideal for any test where only a small amount of energy is available for the operation of the recorder. Sensitivities obtained as low as 1.0 microampere or 0.2 millivolt, full-scale. Response periods as fast as 1/5 second. Four different motor arrangements provide chart speeds from 1/2 inch per hour to 72 inches per minute. Write for Bulletin GEC-254.

AC & DC PORTABLE INDICATING INSTRUMENTS

A line of instruments which is functionally designed to give the greatest convenience and readability. Precision components and spring-mounted moving elements are used to achieve sustained accuracy. These precision instruments are suitable for laboratory use, as well as for field applications and production tests.

INSULATION-RESISTANCE METER: An electronic instrument designed to measure insulation resistance over a range of 0 to 20,000 megohms. Measurements indicate poor insulating materials and materials contaminated by dirt or moisture. This instrument also makes possible the study of the effects of temperature and humidity on insulation. Consists of an electronic rectifier, a bridge circuit which contains Thyrite* resistance material, and an electronic-tube voltmeter, all in one enclosure. Meter is available in range of 0.20,000 to 20,000 megohms and has four scales. Over the range of 5 to 20,000 megohms, tests are made at a constant 500-volt d-c potential; and from 0 to 5 megohms at 0 to 250 volts. The meter is small, compact, portable—convenient for production and service testing, simple to operate. Write for Bulletin GEC-753.

* Registered trade-mark of General Electric Co.

CURRENT-LIMITED HIGH-POTENTIAL TESTER: By limiting the output current to a maximum of 5 milliamperes, the tester effectively minimizes most of the hazards encountered with high-potential testing equipment. Features: output current limited to below the maximum current which an operator can let go; nondestructive testing; line surges virtually eliminated in output; indicates voltage on sample regardless of wave shape, internal voltage drop, or variation in line voltage; faults indicated by glow lamp on panel. Output voltage: 0-3500 volts (peak $\sqrt{2}$).

Output current limited to less than 5 milliamperes when shipped. Maximum load for full output voltages: 0.005 μ f. Write for Bulletin GEC-700.

GAUSS METERS: Used for measuring: Flux density in gaps of instrument magnets; of blocked d-c relays and breakers; of blocked-rotor generators or motors. Field gradient across air gaps. Direction and density of leakage flux emitted from perimeter of magnets. Flux density in iron portions of magnetic circuits. Strength and direction of stray fields of many permanent and electromagnets. Magnetic properties encountered in laboratory work. Available in d-c ranges from 25 to 20,000 gauss; a-c ranges—60 cycles from 0-35,000 gauss. Write for Bulletin GEC-777.

INDICATING FLUXMETER: A convenient means for accurately measuring flux densities and total flux. Determines magnetic properties of permanent magnets and d-c electromagnets. Measures flux distribution in a magnet gap, leakage flux along sections of a permanent magnet or electromagnet. Write for Bulletin GEC-777.

THERMOCOUPLE VACUUM GAGE: Measures pressures encountered in laboratory studies and in many manufacturing and chemical processes. Range of 1 to 200 microns of mercury for glass vacuum systems and from 1-1000 microns of mercury for metal systems. Valuable for checking pressures for vacuum-tube evacuation, vacuum dehydration, and vacuum heat-treatment of metals, metalizing, and vacuum processing of vitamins. The thermocouple vacuum gage is sensitive to both condensable and non-condensable gases. Three different mountings are offered; portable-case style, relay-rack type, and panel type. Write for Bulletin GEC-385.

Types AP-11 (a-c) and DP-11 (d-c): Designed for general testing where a dependable, easily read instrument with 1/2 of 1% accuracy is required. Ideal for trouble shooting and maintenance work where accurate readings must be taken under adverse lighting conditions. Size—7 3/4 by 7 7/8 by 3 1/4 in. Scale length—5.5 inches. Pointer—Knife edge with mirror scale. Damping—Magnetic. Zero Adjuster—External. Shielding—Excellent shielding from stray magnetic fields.

Types AP-12 (a-c) and DP-12 (d-c): Specifications are similar to DP-11 above, except accuracy is to 1/4 of 1% full-scale.

GENERAL-PURPOSE OSCILLOGRAPH Type PM-20

Uniquely designed for fast operation and maintenance, the PM-20 will record up to 71 variables on one oscillogram. A wide range of frequencies, from d-c to 6000 cps, can be recorded. Record speed may be adjusted from 4 to 500 feet per minute. Many additional features are provided, including automatic record numbering, timing lines, trace interruption for identification, automatic record-length control adjustable from 1/2 to 5 feet, and remote control. Write for Bulletin GEA-6348.

Type PM-18: Records 2, 3, or 4 rapidly or slowly changing currents and voltages simultaneously. Transient phenomena of short duration can be recorded by means of a synchronizing switch. Records may be made using continuous-drive holder, film-pack holder, or Polaroid-Land film holder, which produces finished oscillograms in one minute without the use of a darkroom. Write for Bulletin GEC-580.

G-E INDUSTRIAL SOLDERING IRONS

General Electric soldering irons are highly efficient for all work requiring soft soldering. Reserve heat capacity of G-E irons makes them outstanding for continuous, high-speed production soldering. Write for Bulletin GEC-1318.

FEATURES

COLORIZED COPPER TIPS

Durable, interchangeable, designed for extra-long life. Colorized coating retards corrosion and oxidation, prevents freezing of tips to tip holder—increases tip life.

IRONCLAD COPPER TIPS

Couple quick heat transfer of copper with long-wearing qualities of iron—for extra-long life.

TUBULAR HEATING ELEMENTS

Provide quick, more dependable heating.

STAINLESS-STEEL SHELL

Provides high corrosion resistance and low heat loss.

MIDGET SOLDERING IRONS

Ironclad tips only

25-watt, 6-volt, 1/4-in.-dia chisel tip. Also available in 1/8-in.-dia pyramid tip and 3/16-in.-dia chisel and pyramid tips.

LIGHTWEIGHT INDUSTRIAL IRONS

Ironclad tips only

60-watt, 120-volt, 3/16-in.-dia pyramid tip. Also available in 1/4- and 3/8-in.-dia chisel tips.

INDUSTRIAL SOLDERING IRONS

75, 100, 110, 125, 200, 300 w
115 or 230 v
Colorized or Ironclad tips

THY-MO-TROL* DRIVE

Electronically Operated, Adjustable-speed Drive; Stepless Speed Control; Standard Ratings from 1/50 to 30 Hp

A complete equipment consists of an anode transformer, if required, control and rectifier panel, a control station, and a suitable d-c motor. It operates from an a-c power line. Starting, stopping, reversing, and adjustment of speed are all controlled from the single, compact control station.

OPERATING FEATURES

- FULL RANGE**—A single dial—small as a radio volume control—gives complete adjustment of motor speed.
- HOLDS SPEED**—Regardless of ordinary load fluctuations, Thy-mo-trol drive holds speed constant within extremely narrow limits.
- CURRENT-LIMIT ACCELERATION**—Regardless of the speed-control setting

when the START button is pushed, acceleration of full-wave Thy-mo-trol drive is smooth. Starting is extremely fast because of sustained maximum torque during acceleration. No sudden application of excessive torque; therefore, no shock to the machine. No current peaks on the line.

- FULL TORQUE**—Although motor may be scarcely turning over, it can deliver

full torque right up to the current-limit point. This means maximum machine output.

- OTHER ADVANTAGES**—Speed can be preset before starting; saves space; no stop for speed change; easy to control automatically; operates direct from a-c line.

* Registered trade-mark of General Electric Co.

Essential characteristics of typical G-E Electronic Tubes to aid you in selecting tube complements for your circuits.

FULL INFORMATION, DETAILED DATA ON ANY G-E TUBE SENT ON REQUEST

"Custom-Design" Service for High-power Klystrons, Magnetrons and Traveling-wave Tubes

The General Electric Tube Department offers "custom-design" service on high-power klystrons, traveling-wave tubes and magnetrons to meet your most specialized requirements.

The design and development of new types, where volume justifies, is accomplished in relatively short time, since General Electric has complete research, development and manufacturing facilities for such work. Moreover, trained staffs of G-E scientists and engineers—specialists in the field of high-power beam devices—will work closely with you in all phases of tube design and development.

To take advantage of this service, contact your Tube Department sales representative at your nearest Regional Tube Department Office listed on page 16.

General Electric also offers the following Military, Industrial and Commercial Tubes:

- Hydrogen Thyratrons
- Vidicons
- Image Orthicons
- Medium and High-power Traveling-wave Tubes
- CW, Pulse and Voltage-tunable Magnetrons
- TV, CW and Pulse-amplifier Klystrons
- Glass and Metal-ceramic Lighthouse Tubes
- Metal-ceramic UHF-VHF Triodes and Tetrodes
- High-vacuum Rectifier Tubes
- Gaseous and Mercury-vapor Rectifiers
- Power and Control Ignitrons

* Temperature ratings are expressed in terms of the ambient temperature range over which the tubes will operate.
 † These ratings apply only when the tube is used for ignitor firing.
 ‡ These ratings apply only when the tube is used in thyatron welding-control service.
 § Temperature range condensed mercury C.
 # Bracket base for panel mounting.
 ** Replaces GL-5545.
 # 5-Star high-reliability type.

See following pages for additional listings of G-E Electronic Tubes. All data subject to change without notice. The listing of any tube type does not necessarily imply immediate availability.

⊙ Indicates subminiature type
 # Glass octal base } NOTE: All other types are miniatures
 Δ Metal tubes
 The ratings and characteristics of all twin-section types are given for each section.
 Complete interchangeability between a Five-Star tube and its prototype depends on individual applications.

Complete technical data on any G-E Five-Star tube may be obtained by publication number from the G-E Tube Department, Building 3 C.A.R.T., One River Road, Schenectady, N. Y.

GENERAL ELECTRIC MICRO-MINIATURE METAL-CERAMIC RECEIVING TUBES

The 6BY4 is the first in a series of micro-miniature metal-ceramic receiving tubes developed by General Electric. The advantages offered by this unique construction are greater resistance to shock, vibration and heat, and low noise-figure with high gain.

Additional micro-miniature types for other applications will be announced in the future. Your G-E Tube Department sales representative will be happy to discuss your requirements for tubes of this nature and to keep you abreast of latest developments. Contact him at your nearest G-E Tube Department Regional Office listed on the next page.

6BY4

*First micro-miniature type developed by
General Electric*

**RF AMPLIFIER FOR
UHF-VHF TV TUNERS**

**8.5 db noise figure
15 db gain**

(Measured in grounded-grid circuit
at 900 mc., with 10 mc. bandwidth.)

G-E WIRE AND CORDS FOR ELECTRONIC EQUIPMENT

MAGNET WIRE

General Electric has the correct type in standard shapes and a wide range of sizes for every duty requirement.

Alkanex† magnet wire, a new, polyester film-insulated wire for Class B applications. Withstands "hot spot" temperatures up to 150 C and has outstanding mechanical properties.

Formex* magnet wire, the leading film-insulated wire for Class A applications. Well known for its excellent dielectric strength, toughness, flexibility, heat aging, moisture resistance, and solvent resistance.

Deltabeston* magnet wire for Class B applications either glass- or asbestos-insulated with or without Formex wire under the insulation. For Class H applications, glass or asbestos types impregnated with silicone varnishes and wires film-insulated with Teflon** are available.

SILICONE RUBBER FIXTURE AND APPLIANCE WIRE

For applications requiring high-temperature and excellent moisture resistance such as for interior lighting fixtures and other high wattage units, up to 200 C copper temperature. Listed by Underwriters' Laboratories, Inc.

PORTABLE CORDS

An extensive variety of cords for light- and medium-duty applications where long life, flexibility, and resistance to acids, alkalis, and moisture are important.

* Registered Trade-mark General Electric Company

** DuPont Trade-mark for Tetrafluoroethylene Resin

† Trade-mark applied for by General Electric Company

Among the other
G-E WIRES & CABLES
applicable to
electronic equipment are:

Communication cables
Control cables
Flamenol* wire
Heating cable
Radio hook-up wire

SPECIAL APPLICATIONS

In cases where products may require special applications, G-E engineers, constantly engaged in the development of new or improved wires, cables, and cords, will gladly give assistance to product designers and manufacturers.

For information on special applications, please write to the nearest General Electric Construction Materials Division office or the Wire and Cable Department, General Electric Company, Bridgeport 2, Connecticut.

GENERAL ELECTRIC OFFERS WIDEST SELECTION OF SEMICONDUCTORS AVAILABLE ANYWHERE

HIGH & LOW FREQUENCY PNP TRANSISTORS

High gain, medium power audio: 2N43, 2N44, 2N45. For USAF requirements: 2N43A. Commercial equivalent: 4JD1A17. Computer switching: 2N123. RF and IF amplifiers and oscillators: 2N135, 2N136, 2N137. Hobbyist type at low cost: 2N107.

HIGH & LOW FREQUENCY NPN TRANSISTORS

RF and IF amplifiers for broadcast receivers: 2N168, 2N169, 2N169A. Converters: 2N168A. Reliable industrial/military linear amplifiers: 2N78. Computer switching: 2N167. Low level amplifiers at low cost: 2N170.

SILICON POWER TRANSISTOR

8 watt dissipation at 85° centigrade.

SILICON HIGH FREQUENCY TRANSISTOR

15 megacycle operation. Designed for printed circuit board insertion.

SILICON DOUBLE BASE DIODE

Operation up to 200°C. Replaces 2 junction transistors in computer circuits.

NPN TETRODE TRANSISTOR

Up to 150 megacycle operation.

NPN HIGH FREQUENCY TRIODE TRANSISTOR

15 megacycle operation at temperatures up to 85°C.

SILICON LOW CURRENT RECTIFIER

¼ amp per cell, 150°C. rated free ambient. 175°C. storage temperature. Designed for machine assembly.

SILICON HIGH CURRENT RECTIFIER

50 amps per cell at 300 PIV. 150°C. rated stud temperature. 200°C. storage temperature.

GERMANIUM JUNCTION RECTIFIERS

For 99% rectification efficiency: 1N91, 1N92, 1N93. Single cell unit ratings are increased up to 5 times by adding single copper fin. For 500 ma output current: 1N151, 1N152, 1N153.

GERMANIUM RECTIFIER STACKS

More than 160 circuit possibilities for use up to 900 V and 10 amperes.

GERMANIUM HIGH TEMPERATURE AND MAGNETIC AMPLIFIER RECTIFIERS

Ideal for use in magnetic amplifiers, high operating temperature — up to 85°C.: 1N315. Very low reverse current, high d-c reverse voltage: 1N368.

GERMANIUM MEDIUM POWER RECTIFIERS AND RECTIFIER STACKS

Rectifier losses reduced to ¼ or less. Stacked in series or parallel, ratings in thousands of watts: 4JA3011.

Now, an expanded line of G-E transistors and rectifiers provides greater power performance at extended frequency and temperature limits.

Recent G-E developments in germanium and silicon for semiconductors have opened roads to important new ap-

plications for industry and the military.

See your General Electric Semiconductor Specialist for detailed specifications of the semiconductors shown here, or write today to: *General Electric Company, Semiconductor Products, Section X76, Electronics Park, Syracuse, N. Y.*

Progress Is Our Most Important Product

GENERAL ELECTRIC

Order General Electric "Thru-Con" Boards for positive connections through the holes

"Thru-Con" insures accurate solder filleting top and bottom for extreme strength and easier assembly.

Original Design Features. Original General Electric additive-method production techniques provide continuous copper plating through the holes. Positive connections do away with separate staking pins, assure perfect circuits. Costly rejects due to difficult soldering problems are eliminated. If desired, G-E "Thru-Con" boards may provide patterns on both sides, further reducing size and weight.

"Thru-Con" Boards Serving Many Industries. Important economies afforded by dependable G-E "Thru-Con" boards are helping manufacturers cut costs and improve profit pictures. Producers of lamps, radios, fans, street lighting

and traffic control units, television receivers, appliances, and control equipment are using "Thru-Con" now.

Full Production Facilities. The G-E "Thru-Con" plant is devoted to full-time production of printed circuit boards. New, specially-designed equipment is capable of producing thousands of boards each day. The combination of custom wiring patterns, sizes, and shapes is virtually limitless.

Investigate G-E "Thru-Con" Boards, Today. It will pay you to look into the savings "Thru-Con" boards make possible in manufacturing techniques. For a full discussion of your printed circuit program, and a sample "Thru-Con" board, call or write: *General Electric Company, Electronic Components Department, Section X76, Auburn, N. Y.*

ADVANCED COMPONENTS FOR THE ELECTRONICS INDUSTRY

★ Printed Circuit Boards ★ Ferrites ★ Distributed Constant Delay Line ★ Ceramics

Progress Is Our Most Important Product

GENERAL  ELECTRIC

G-E "Thru-Con" Printed Circuit Boards offer positive connection through the holes, without staking pins, patterns on both sides if needed. Printed circuitry cuts assembly time; eliminates product bulk, weight; reduces inspection time, parts inventory.

Positive Proof. This new transistorized portable radio features a full printed circuit using a G-E "Thru-Con" Board. Combining other advances in electronics with a "Thru-Con" circuit makes possible sweeping changes in size, weight, and styling.

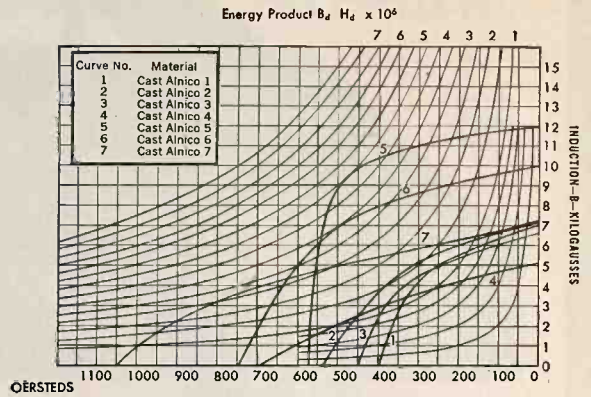

ALNICO PERMANENT MAGNETS

Provide constant, powerful magnetic field energy in a given space . . . with a minimum of volume and weight

G-E Alnico Permanent Magnets can simplify design, reduce size and cost of meters, instruments, controls, motors, and communications equipment. Guaranteed minimum external energy product up to 6,000,000 gauss-oersteds.

Available cast or sintered; stocked in a wide range of sizes and shapes. Other styles can be made to your specifications. Magnets can be furnished with steel inserts, close tolerance holes, die-cast aluminum sheaths or other coatings.

Complete magnet design and product development service available to work on your problems. Write for price lists, specifications, or Design Manual PM-101.

Demagnetization and energy product curves for General Electric Alnico Permanent Magnets

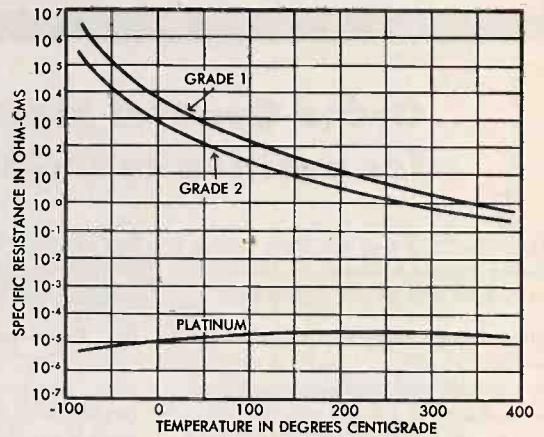

THERMISTORS

Detect, measure, compensate for minute changes in temperature

G-E Thermistors have large *negative* temperature coefficients. As circuit elements, they provide highly sensitive responses to relatively minute temperature changes.

In addition to uses in thermometry, Thermistors can provide time delay, suppress surges, control warning circuits and sequence switching.

Two grades available; stocked in rods, disks, and washers, with or without leads. Write for design assistance or Thermistor Manual TH-13.

Temperature resistance values of Carboloy Thermistors compared to a representative metal

THYRITE* VARISTORS

Nonlinear resistance material provides current that varies as a power of applied voltage

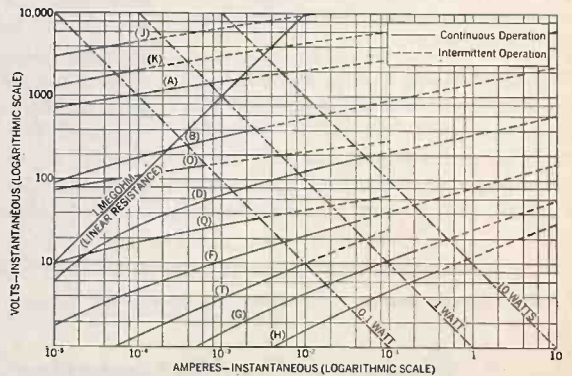

Because of their unique properties, G-E Thyrite Varistors can be used to limit voltage surges, to stabilize circuits supplied by rectifiers, to control voltage-sensitive circuits.

Also used as nonlinear resistance parameters, potentiometers, and frequency multipliers.

Thyrite Varistors are manufactured with a wide variety of volt-ampere characteristics. Stocked in disks and rods, with or without leads.

For help on your circuit-design problems, or for Thyrite Bulletin TY-101, write today.

*Registered trademark of the General Electric Company.

Typical volt-ampere characteristics of representative General Electric Thyrite Varistors.

(Sizes range from 1/2" to 6" diameter disks and from 1" to 2" long, 1/4" diameter rods. Curves from Thyrite Bulletin TY-101.)

VACUUM-MELTED ALLOYS

Have tremendously improved mechanical and electrical properties through elimination of impurities and gases

Vacuum-melting provides greater ductility, greater impact and fatigue strength, improved corrosion resistance and electrical conductivity.

Two new G-E vacuum-melted alloys—1570 and M-252—are now available. In addition, special steels and other alloys can be job-melted, and new alloys can be developed.

Vacuum-melted metals yield more pieces per pound; rejects are lower. Alloy Development Service is available to work on your design problems. Or write for the Vacuum-Melted Alloys Bulletin VM-101.

ENGINEERING APPRAISAL KITS

For laboratory testing of Thermistors and Thyrite Varistors

THYRITE VARISTOR KITS

Kit No. 1—Miniature disk-type varistors. Contains: two each of six ratings, color-coded with connecting leads. Price: \$5.00.*

Kit No. 2—Rod-type varistors. Contains: two each of five ratings, color-coded with connecting leads. Price: \$5.00.*

*Plus applicable sales and use taxes.

THERMISTOR KITS

Kit No. 1 contains 18 Thermistors: two of each in three styles and three sizes. Price: \$20.00.*

Kit No. 2 contains 104 Thermistors: 26 sizes and four styles, plus lead, steel, and fiber washers, and tubing for building assemblies. Price: \$125.00.*

Order kits directly from:

Carboloy Department of General Electric Company, 11139 E. 8 Mile Drive, Detroit 32, Michigan.

Progress Is Our Most Important Product

GENERAL  ELECTRIC

G-E QUALITY IN RADIO AND ELECTRONIC COMPONENTS—AT A PRICE YOU WANT TO PAY!

THE Lamp Leads and Bases Department of General Electric is one of the true pioneers in the electronics industry. We were solving design and production problems at a time when only a handful of companies recognized its potential. Today we

stand ready to furnish you with the highest quality radio and electronic components you can buy—as we continue to develop new processes and better materials to insure the best products at the lowest possible price.

Leads

General Electric is the largest manufacturer of all types of lead-in wires for electronic devices, radio tubes and other applications.

Dumet

To successfully seal lead wire to soft glass, the expansion coefficients must be reasonably close. Dumet, a General Electric development, meets this requirement. It is made of copper tubing, and iron-nickel core rod—and is used for sealing to lead or lime glass.

Plated Wire

General Electric produces Nickel Plated Iron Wire and Nickel Plated Copper Wire from low carbon (Armco or Low Basic) iron wire and oxygen-free high conductivity copper wire—in a variety of diameters and plate thickness.

RANGE OF SIZES

Symbol	Base Material	% of Plate	Diameter Range
Cu (NP)	Copper	*	10—50
Fe (NP6)A	Armco	2—8	20—70
Fe (NP6)B	Low Basic	2—8	20—70

*Plate thickness for all sizes of (CuNP) wire approximates .0001"

Metal Parts

Our development laboratory and fabricating facilities are offered to electronic manufacturers to design, test and produce parts from many types of metals to meet your requirements.

TWO NEW G-E PRODUCTS NOW AVAILABLE!

RECTIFIER HOUSING

TRANSISTOR HEADER UNIT

BOTH THESE FINE NEW PRODUCTS are offered with full assurance that quality craftsmanship and precision assembly are used throughout. Both are made to G-E's strict quality standards—and you get all the price benefits of high volume production.

TO GET THE FULL STORY on all our radio, television and electronic components, write: General Electric Company, Lamp Leads and Bases Department, Nela Park, Cleveland 12, Ohio.

natfab

DEPENDABLE SOURCE FOR

SOLAR CELLS • PHOTOELECTRIC
CELLS • SOCKETS • SHIELDS •
FLUGS • TERMINAL STRIPS •
RECEPTACLES • CONTACTS • LUGS •
ELECTRONIC COMPONENTS

NATFAB, the dependable source for electronic components, produces more than 3 million individual parts each working day under the most rigid quality control measures. Every NATFAB component is 100% visually inspected—your guarantee of finest quality. Whatever your needs in electronic components, you can be sure when you specify NATFAB.

molded printed circuit sockets

- available in 7 or 9 pin types
- with or without center shields
- above or below board soldering
- in mica-filled or black phenolic material
- with or without ground straps

JAN sockets and shields

Available in a variety of JAN-types in molded plastic or ceramic materials.

silicon junction solar cells*

- Instantaneous response (40 microseconds).
- Not affected by moisture.
- No deterioration due to atmospheric conditions.
- Cannot oxidize or corrode.
- Permanent life-time p-n junction.
- Compact size ideal for miniaturization.
- Operates over temperature range from -65°C to +175° C.
- Needs no auxiliary power source.
- Operates on infra-red light.

silicon junction photoelectric cells*

For use in countless photometric applications to replace less efficient selenium cells. Converts light directly into electrical energy. Fully encapsulated in plastic to withstand rugged operating conditions.

* Licensed by Western Electric Co., Inc.

octal sockets

Available in a variety of types in plastic, ceramic and wafer materials.

terminal strips

Standard terminal strips, 3/8" wide, 1/16" thick, all Bakelite insulation, are available in any combination of 1, 2, 3 or 5 lug types.

battery sockets

antenna connector sockets

Change in Voltage Drop (%/°C) -55°C to +100°C -55°C to +150°C			±.01*			±.002‡			±.001‡			±.001‡

notes

† Average values based on entire production of this type.

* Rated at 7.5 ma and 25°C

‡ Rated at 10ma and 25°C

DIODES - Notes

(1) Special Marking of Diodes: The following suffix numbers have been assigned to cover most of the special testing and selection required by customers. Diodes having no suffix numbers following the RETMA number have Zener (break-down) Voltage ranges of approximately $\pm 10\%$ voltage tolerance.

- 1 All characteristics as per specification, but no maximum Zener Voltage limit. (Thus: 1N209-1 etc.)
- 2 Close tolerance Zener Voltage $\pm 5\%$. (Thus: 1N465-2 etc.)
- 3 Close tolerance Zener Voltage $\pm 1\%$. (Thus: 1N203-3 etc.)
- 4 Special selection for back current or test of back current at special temperature.
- 5 Special selection for forward current or test of forward current at special temperature.
- 6 Tested to limits on Zener Voltage temperature coefficient.

(2) These ratings are based upon the maximum dissipation rating of 150 mw @ 25°C ambient. The de-rating schedule for elevated ambients is 1 mw per °C above 25°C.

(3) Steady state dc on basis of reduced dissipation for this type of application

(4) Zener Impedance is determined by measuring the ac voltage developed across the diode when operated with 1 ma rms ac current superimposed on 10 ma dc.

(5) Average values are based on entire production of type shown. There is no assurance that the average values of small, randomly selected groups will be as shown.

(6) Maximum dissipation at 25°C. Derating schedule for elevated ambients is 1 mw per °C above 25°C.

(7) Measured at $E_b = 3$ v.

(8) Forward Voltage measured at 15 ua; 0.45 v min; 0.50 v avg.; 0.55 v max.

STEP ATTENUATORS

PRECISION STEP ATTENUATOR MODEL #64. The only step attenuator containing low V.S.W.R., 0.1 db steps. Three drums cover the range of 0-64 db in steps of 0.1 db from DC to 1,000 MC. Long life switches and exceptional stability are among the reasons this instrument is used by standard laboratories who cannot afford to make mistakes. Impedance is 50 ohms, connectors type "N"; power capacity

100 mw. CW Calibration chart showing insertion loss, and V.S.W.R. at DC and 1,000 MC supplied. Change of insertion loss of all pads between 0 and 10 db does not exceed .1 db between DC and 1,000 MC, and 0.1 db per 10 db at 1,000 MC for pads between 20 and 50 db. Accuracy of pads at DC is better than .05 db to 10 db, and 0.1 db to 50 db. Ask for Bulletin #37.

COAXIAL ATTENUATOR PADS

Design and Manufacture of Coaxial Pads to Specific Requirements Is Our Specialty.

Not shown is our Model 50 attenuator pad. It has small attenuation errors from DC to 1,000 MC, and is available in steps of 1 db in range 1-10 db and 10 db steps in the 10-40 db range. Accuracy at DC is .05 db from 1 to 10 db, and .1 db between 20 and 40 db. Frequency sensitivity not greater than .2 db from DC to 1 KMC, except for the 30 and 40 db pads which have .3 and .4 db. Will handle average powers of 1 watt with proper termination, and 1 KW peak. Ask for Bulletin #44.

Fig. 1: Type 210 Pad, "lossy line" construction, 50 ohm impedance, with type "N" connectors. Frequency range 1 KMC to 10 KMC; loss range 3, 6, 10, 12, 20 db. Average power varies from 5 to 1 watt, peak power from 10 to 2 KW. Also available with type "C" connectors. Ask for Bulletin #17.

Fig. 2: Precision Power Pads, 50 ohms impedance, type "N" connectors, ± 1 db accuracy from DC to 1,000 KMC. Model 10, 10 watt power pad, "T" type, range 1-3 db, bilateral with male and female connectors. Model 11, range 4-10 db, is unilateral with female input and male output. Model 12, same range as model 11, is also unilateral with male input, and female output. Maximum input V.S.W.R. 1.10. Ask for Bulletin #27.

Fig. 3: "S" Band attenuators, 50 ohms impedance, type "N" connectors, CN 42, CN 43, CN 29, provide insertion losses of 10, 16, and 20 db. Our commercial versions cover the range 1-20 db in models, 301, 303, 306, etc. (1 db, 3 db, 6 db, etc.). Also similar are types 410, and 416 having an OD less than $\frac{3}{4}$ " for use with TS-125 power meter, Ask for Bulletin #43.

Fig. 4: $\frac{7}{8}$ " Rigid Line Pad, types CN 168, CN 169, CN 110, provides losses of 3, 6, and 10 db. Frequency range is 1 KMC to 4 KMC. Max. average power input is between 10 and 5 watts, peak power input is between 20 and 10 KW. Also available for $\frac{7}{8}$ " rigid line are type 46 pads with frequency range from DC to 1 KMC and insertion losses of 3, 6, 10, and 20 db. Ask for Bulletin #42.

Fig. 5: Double Stub Tuner; Model DS 109 covers 750 MC to 10 KMC; Model DS 109L covers 400 MC to 4 KMC. Stub tap positions are adjustable facilitating ease of adjustment for impedance matching. The specially designed shorts carry low current through the sliding contacts giving exceptionally smooth adjustment. Ask for Bulletin #19.

INSERTION LOSS TEST SETS, PARTS FOR:

BOLOMETER PREAMPLIFIER MODEL BA-1: Measures insertion loss between 0 and 30 db at low R.F. power levels in conjunction with recommended bolometer and VTVM. Bolometer burnout from other than R-F overload is practically impossible. Bolometer can be inserted and removed without disconnecting DC. Combined with low noise level are freedom from hum pickup, and wide dynamic linear range of

60 db with linearity better than 0.1 db. Frequency is 1 KC with band-width of 35 cps. Adjustable gain, 10,000 maximum. Equivalent input noise from 200 ohm source less than 30×10^{-9} volts RMS. Input impedance above 2,000 ohms for operation from 200 ohm Bolometer. 30 volts max. linear output into 1 megohm. Ask for Bulletin #23.

CATHODE FOLLOWER MODEL CF-1: Input impedance matches output of BA-1 Bolometer Preamplifier. Utilizes a 2,000 ohm precision attenuator with an accuracy of .01 db at 1 KC; eliminates errors in insertion loss measurements caused by accuracy limitations of VTVM. For further details ask for Bulletin #38.

MODULATED OSCILLATOR MODELS MS-1, MS-2, MS-3, R. F. sources for insertion loss measurement, cover the frequency ranges 50-250 MC, 250-920 MC, and 900-2,000 MC with 1 KC ± 5 cps. square wave modulation (100%). Minimum peak output is 100 MW into 50 ohms with excellent long-time amplitude stability. Ask for Bulletin #40.

OTHER PRODUCTS

KEYBOARD OSCILLATOR MODEL 150: Used extensively for checking filters where it is necessary to explore small portions of the curve in detail. Covers range from 1 to 100,000 cycles with rapid, accurately repeated, frequency selection. Drift less than 0.02% per hour. Steps of .1 cps. to 1 KC, 1 cps. to 10 KC, continuous tuning to 10-100 KC. Full details in Bulletin #41.

POWER PULSE GENERATOR MODEL PG-1, for the generation of high power pulses for test-

ing of components by video pulses. Output: maximum of 1,500 volts into 50 ohms, with pulse lengths of 1 to 5 microseconds, variable in 1 microsecond steps, and PRF of 20 to 2,000 cps limited by the capacity of the power supply. Ask for Bulletin #39.

MODIFICATION OF STD. PRODUCTS. There is now available in the microwave field a wide range of Weinschel engineered coaxial attenuators. In most cases this selection is large enough to cover the needs of the average laboratory. However, if special requirements call for modification

of standard equipment, our design department will gladly answer your inquiries.

CALIBRATION SERVICE: Our insertion loss calibration service for coaxial equipment, is available to certify up to 50 db from 50 MC through 10,000 MC. Two accuracies of measurement are available: A) .01 db per 5 db. B) .05 db per 5 db.

NOTE: Class "A" calibrations are usually not justified for coaxial equipment above 1,000 MC, due to inaccuracy of impedance measurements in coaxial devices.

We are also able to offer DESIGN and QUANTITY PRODUCTION of:

Bolometer Mounts,
Thermistor Mounts,

Insertion Loss Test Sets,
Coaxial Terminations,

Power Measuring Bridges,
Micro Potentiometers

HEWLETT-PACKARD COMPANY
275A Page Mill Road • Palo Alto, California, U.S.A.

-hp- Oscillators — .01 to 10,000,000 cps

-hp- 200 SERIES AUDIO OSCILLATORS

Four widely used *-hp-* oscillators have been redesigned into two compact, lightweight instruments offering wider frequency range, more operating simplicity, highest accuracy and stability. New Models 200AB and 200CD replace Models 200A through 200D, retain the time-tested RC circuits that insure constant output, low distortion; require no zero set. *-hp-* also offers Model 202A for sub-audio and audio tests; and Model 200J, a spread-scale oscillator for interpolation or where frequency must be known precisely.

-hp- 650A TEST OSCILLATOR

Highly stable, wide band (10 cps to 10 MC) multi-purpose test oscillator for audio, supersonic, video, and rf measurements. Output variable 30 μ v to 3 v. Frequency response flat \pm 1 db. Output impedance 600 ohms, or 6 ohms with voltage divider. \$490.00 Δ .

Instrument	Primary Uses	Frequency Range	Output	Price
-hp- 200AB	Audio tests	20 cps to 40 KC	1 watt/24.5 v	\$120.00
-hp- 200CD	Audio, ultrasonic tests	5 cps to 600 KC	160 mw/10 v *	150.00
-hp- 200J	Interpolation and frequency measurements	6 cps to 6 KC	160 mw/10 v *	275.00
-hp- 200T	Telemetry, carrier current tests	250 cps to 100 KC	160 mw/10 v *	350.00
-hp- 201C	High quality audio tests	20 cps to 20 KC	3 w/42.5 v	225.00
-hp- 202A	Low frequency measurements	.008 to 1,200 cps	20 mw/10 v	465.00 Δ
-hp- 202C	Low frequency measurements	1 cps to 100 KC	160 mw/10 v *	300.00
-hp- 205AG	High power tests, gain measurements	20 cps to 20 KC	5 watts	440.00 Δ
-hp- 206A	High quality, high accuracy audio tests	20 cps to 20 KC	+15 dbm	565.00 Δ
-hp- 233A	Carrier test oscillator	50 cps to 500 KC	3 w/600 ohms	475.00
-hp- 650A	Wide range video tests	10 cps to 10 MC	15 mw/3 v	490.00 Δ

*Open circuit 20 volts. Internal impedance 600 ohms.

-hp- Distortion, Wave Form Analyzers — 20 cps to 20 KC

-hp- 330B DISTORTION ANALYZER

Measures distortion as low as 0.1%, 20 cps to 20 KC. Measures noise voltages as low as 100 μ v. High sensitivity, high stability, broad applicability for broadcast, laboratory or production.

Wide band 20 db gain input amplifier. Built-in VTVM usable separately. \$410.00 Δ .

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 300A	Wave form analyzer	30 cps to 16 KC	Variable selectivity; measuring range 0.1 mv to 500 v	\$775.00
-hp- 330B	Measures total audio distortion	20 cps to 20 KC	Includes input amplifier, VTVM	410.00 Δ
-hp- 330C	For FM broadcast measurements	20 cps to 20 KC	Special VU meter to meet F.C.C. requirements	440.00 Δ
-hp- 330D	For AM-FM broadcast measurements	20 cps to 20 KC	AM detector and VU meter to meet F.C.C. requirements	455.00 Δ

-hp- Vacuum Tube Voltmeters — 10 to 700,000,000 cps

-hp- 400D VACUUM TUBE VOLTMETER

Best *-hp-* voltmeter ever built! Covers all frequencies 10 cps to 4 MC. Extremely sensitive, wide range, accurate within 2% to 1 MC, measures 0.1 mv to 300 v. Direct reading in dbm. 10 megohm input impedance insures negligible loading on circuits under test. New amplifier circuit with 56 db mid-range feedback assures utmost stability, freedom from change due to external conditions. \$225.00.

Instrument	Primary Uses	Frequency Range	Voltage Range	Input Impedance	Price
-hp- 400AB	General purpose ac measurements	10 cps to 600 KC	0.3 mv to 300 v 11 ranges	10 megohms 15 μ mf shunt	\$200.00
-hp- 400D	Wide range ac measurements. High sensitivity	10 cps to 4 MC	0.1 mv to 300 v 12 ranges	10 megohms 15 μ mf shunt	225.00
-hp- 400H	Extreme accuracy measurements	10 cps to 4 MC	0.1 mv to 300 v 12 ranges	10 megohms 15 μ mf shunt	325.00
-hp- 410B	Audio, rf, VHF measurements; dc voltages; resistances	20 cps to 700 MC	0.1 to 300 v 7 ranges	10 megohms 1.5 μ mf shunt	245.00

-hp- Voltmeter Accessories (not listed) include voltage dividers, connectors, shunts and multipliers to extend the useful range of your equipment.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

-hp- 524B COUNTER with -hp- 525A FREQUENCY CONVERTER

Frequency 10 cps to 220 MC, interval 1 μ sec to 100 days and period 0 cps to 10 KC—all measured instantly, automatically, directly by the revolutionary new *-hp- 524B* and its plug-in units. You buy just the instrumentation you need; later add inexpensive plug-ins to double, triple the versatility of this complete coverage instrument. For extended coverage to 12,000 MC, see *-hp- 540A* Transfer Oscillator below. *-hp- 524B* without plug-ins. \$2,150.00 Δ .

524B ELECTRONIC COUNTER

with plug-in units to fit your exact measuring need

**-hp- 525B
Frequency Converter**

**-hp- 526A
Video Amplifier**

**-hp- 526B
Time Interval Unit**

Instrument	Primary Uses	Frequency Range	Characteristics	Price
<i>-hp- 524B</i> Electronic Counter	Wide range highly accurate frequency, period measurements	10 cps to 10 MC	Without plug-in units measures frequency 10 cps to 10 MC, and period 0 cps to 10 KC, 1 volt rms minimum input	\$2150.00 Δ
<i>-hp- 525A</i> Frequency Converter	Extends <i>-hp- 524B</i> range to 100 MC	10 cps to 100 MC	10 mv rms minimum input 10 MC to 100 MC 0.1 volt from 10 cps to 10 MC	250.00
<i>-hp- 525B</i> Frequency Converter	Extends <i>-hp- 524B</i> range 100 to 220 MC	100 MC to 220 MC	0.2 volt rms minimum input	250.00
<i>-hp- 526A</i> Video Amplifier	Increases sensitivity of <i>-hp- 524B</i>	10 cps to 10 MC	App. 10 millivolt rms minimum input	150.00
<i>-hp- 526B</i> Time Interval Unit	Used with <i>-hp- 524B</i> to measure time interval	Range: 1 μ sec to 10 ⁷ seconds Revolution: 0.1 μ sec	Start and stop channels separately adjustable for triggering from - 192 v to + 192 v	175.00

Other -hp- Frequency Measuring and Monitoring Equipment

-hp- 521A INDUSTRIAL COUNTER

Most useful, accurate, low cost industrial counter. Measures frequency, speed, rpm, random events, other phenomena. Direct readings 1 cps to 120 KC. Time of count 0.1 or 1.0 seconds; variable display time. High accuracy plug-in crystal controlled time base, \$100 extra. Sturdy, rugged, simple to operate. \$475.00.

-hp- 523B ELECTRONIC COUNTER

Revolutionary new all-purpose counter measures frequency 10 cps to 1.1 MC, time interval 3 μ sec to 27.8 hours, period 0.00001 cps to 10 KC. Stability 2/1,000,000 per week. Results displayed in sec, msec, μ sec or KC, automatic decimal. Display time variable 0.1 sec to 5 sec or indefinitely. Accuracy ± 1 count plus crystal stability. 5 gate times, usable with 100 KC primary standard. \$1,175.00.

-hp- 522B ELECTRONIC COUNTER

Compact, low cost, versatile instrument for frequency, period or time measurements. Range 10 cps to 120 KC. Reads direct in cps, KC, seconds or milli-seconds. Count automatically reset, action repetitive. Stability of time base 5/1,000,000. Display length variable. Easily used by untrained personnel. \$915.00 Δ .

-hp- 540A TRANSFER OSCILLATOR

Extends frequency counter accuracy to microwave region. With *-hp- 524B* and *-hp- 525B* measures frequency of CW, pulse, or FM^d signals to 5,000 MC. With external detector extends range to 12,000 MC. \$615.00 Δ .

Instrument	Primary Uses	Frequency Range	Characteristics	Price
<i>-hp- 100D</i> Secondary Standard	Frequency, time measurements	100 KC, 10 KC, 1 KC, 100 cps, 10 cps	Stability 1/1,000,000 (short-time) Sine or rectangular output. Marker pips	\$ 615.00 Δ
<i>-hp- 335E</i> TV Monitor	TV visual, aural and % mod. monitor	Channels 2 through 83	Indicates visual, aural carrier frequency deviation, carrier separation, % modulation aural carrier	2,050.00
<i>-hp- 500B</i> Frequency Meter	Rapid frequency measurements	3 cps to 100 KC	9 ranges $\pm 2\%$ accuracy. Input 0.2 to 200 volts Provides expanded scale.	285.00
<i>-hp- 500C</i> Electronic Tachometer Indicator	Measurements of high speed machinery	180 to 3,000,000 rpm	9 ranges $\pm 2\%$ accuracy. Provides expanded scale.	285.00
<i>-hp- 506A</i> Optical Tach. Pickup	Phototube transducer	300 to 300,000 rpm	Utilizes reflected beam of light to permit measurement without loading	100.00
<i>-hp- 508A</i> Tachometer Generator	Low torque transducer	15 to 40,000 rpm	Provides 60 output pulses per rpm of rotating shaft	100.00
<i>-hp- 508B</i> Tachometer Generator	Low torque transducer	15 to 40,000 rpm	Provides 100 output pulses per rpm of rotating shaft	100.00
<i>-hp- 512A</i> Frequency Converter	Extends <i>-hp- 524A</i> range to 100 MC	100 KC to 100 MC	Fast, direct readings of signals to 100 MC with 524A. No charts. Interpolation. Min. input 0.01 v	350.00
<i>-hp- 512B</i> Frequency Converter	Gives <i>-hp- 524A</i> range 100 to 220 MC	100 MC to 220 MC	Same as 512A except for frequency coverage and input 0.2 v RMS min.	350.00
<i>-hp- 520A</i> Nuclear Scaler	For counting high-rate pulses	Capacity 100 counts in 2 decades. 10,000,000 pps counting rate	100:1 divider for operation of low speed scalars	615.00 Δ
<i>-hp- 521A</i> Industrial Counter	Wide-range frequency, speed, measurements	1 cps to 120 KC	Gate time 1/10 or 1 second Input sensitivity control, 60 cycle time base. Crystal plug-in \$100.00	475.00
<i>-hp- 522B</i> Electronic Counter	Wide-range frequency, period, time interval measurements	10 cps to 120 KC	Measures rate of occurrences 0.00001 to 100,000 sec.; time interval 10 μ sec to 27.8 hrs.; periods of frequency count 1/1,000, 1/100, 1/10, 1, 10 sec.	915.00 Δ
<i>-hp- 523B</i> Electronic Counter	Wide-range frequency, period time interval measurements	10 cps to 1.1 MC	Measures rate of occurrences 0.00001 to 100,000 sec.; time interval 3 μ sec to 27.8 hrs.; periods of frequency counted 1 or 10 cycles of unknown.	1,175.00
<i>-hp- 540A</i> Transfer Oscillator	UHF, SHF frequency measurement	Fundamental frequency 100 MC to 220 MC	With 524B and 525B measures frequencies to 5,000 MC; with ext. detectors to 12 KMC	615.00 Δ

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

Microwave Impedance Measuring Equipment

-hp- 415B STANDING WAVE INDICATOR

For all waveguide or coaxial slotted sections. Gives readings in SWR or db. Single frequency operation; 315 to 3,000 cps. Low noise level, 0.1 μ v (full scale) sensitivity, 60 db. calib. attenuator. \$200.00.

-hp- 416A RATIO METER

Automatically combines forward and reverse signals and displays their ratio directly, irrespective of amplitude variations. Contains rf power monitor indicating proper power level. Rear terminal signal available to operate oscilloscope or recorder. Suitable for single and swept frequency operation. \$450.00 Δ .

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 360A-D Low Pass Filters	Eliminate harmonic voltages from UHF systems	Cutoff frequencies A-700 MC B-1,200 MC C-2,200 MC D-4,100 MC	50 db rejection at 1.25 cutoff freq.	\$ 40.00
-hp- 415B Standing Wave Indicator	SWR indicator or null indicator	315 to 3,000 cps Normal freq. 1,000 cps	0 to 60 db. attn. Max. sensitivity 0.1 μ v full scale	200.00
-hp- 416A Ratio Meter	Measures reflection coefficient, SWR	1,000 cps \pm 40 cps	Min. 3 millivolts and 0.3 μ v; accuracy \pm 2%	450.00 Δ
-hp- 417A VHF Detector	VHF bridge detector (for -hp- 803A)	10 to 500 MC	Approx. 5 μ v sensitivity	250.00
-hp- 803A VHF Bridge	Measurement of VHF impedance, SWR	50 to 500 MC	2 to 2,000 ohms impedance - 90° to + 90° phase angle	495.00
-hp- 805A Coaxial Slotted Section	Measurement of SWR	500 to 4,000 MC	For Type N Connectors, flexible cables	475.00
-hp- 805B Coaxial Slotted Section	Same as above	Same as above	For rigid 3/8" RG44/U line	475.00
-hp- 806B Coaxial Slotted Section	Same as above (Mounts in 809B)	3,000 to 12,000 MC	For Type N Connectors, flexible cables	200.00
-hp- 809B Universal Probe Carriage	Supports 806B section, also G, J, H, X and P810B Waveguide sections		Accepts 442B and 444A probes	160.00

-hp- Waveguide Test Equipment - 2.6 to 18 KMC

Basic, low-cost elements offer utmost flexibility for assembly of exact instrumentation required. Each unit covers entire range of its waveguide size. Simple, sturdy mechanical design; accurate, multi-purpose operation.

Instrument	Coaxial Type N Conn.	3" x 1 1/2"	2" x 1"	1 1/2" x 3/4"	1 1/4" x 5/8"	1" x 1/2"	.702" x .391"

†For use with barretter or crystal.

‡For use with barretter only.

*Complete assembly including carriage.

§Mounts in 809B Carriage—See next page.

■ Includes Thermistor, installed. See page 5. ** J530A, 5.85 to 8.2 KMC, \$120.00; J530B, 5.30 to 7.05 KMC, \$150.00. †† Includes barretter; checked for square law characteristics.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices. Data subject to change without notice. Prices f.o.b. factory.

Microwave Power Measuring Equipment

-hp- 430C MICROWAVE POWER METER

No computations! Provides instantaneous, automatic power readings *direct* in dbm or mw at all frequencies for which there are suitable bolometer mounts. For CW measurements, uses either 1/100 amp. fuse or Sperry 821 barretter. Also measures CW or pulsed power with negative coefficient thermistor. Provides up to 16 ma bias current. Operates with all mounts in adjacent table. \$250.00.

-hp- 764D-767D DUAL DIRECTIONAL COUPLERS

New high directivity dual-coaxial couplers make reflectometer measurements practical in vhf and uhf coax systems. Flat response, high power capacity, low insertion loss. Four models, covering 216 to 4,000 MC collectively. \$125.00.

-hp- 477B COAXIAL THERMISTOR MOUNT

For frequency range 10 MC to 10 KMC. SWR less than 1.5. Thermistor element is 200 ohm negative. \$75.00 (including thermistor).

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 430C Microwave Power Meter	Measurement of rf power	Depends on Bolometer mount	.01 to 10 mw \pm 5% accuracy	\$250.00
-hp- 475B Tunable Bolometer Mount	Measurement of rf power	1,000 to 4,000 MC	Matches 50 ohm line to 100 or 200 ohms	200.00
-hp- 476A Universal Bolometer Mount	Measurement of rf power	10 to 1,000 MC	No tuning required SWR less than 1.25	85.00
-hp- 477B Coaxial Thermistor Mount	Measurement of rf power	10 to 10,000 MC	Broad band, low SWR, no tuning	75.00
-hp- 485 Waveguide Detector Mount	Measurement of rf power	2,600 to 18,000 MC	Full coverage of waveguide band	See Table page 4
-hp- 487A Waveguide Thermistor Mount	Measurement of rf power	4,000 to 12,000 MC	Full coverage, no tuning, 1.5 SWR	See Table page 4
-hp- 764D Dual Directional Coupler	Reflectometer and rf power measurements	216 to 450 MC	Coupling attenuation* 20 db, directivity 30 db	125.00
-hp- 765D Dual Directional Coupler	Reflectometer and rf power measurements	450 to 940 MC	Coupling attenuation* 20 db, directivity 30 db	125.00
-hp- 766D Dual Directional Coupler	Reflectometer and rf power measurements	940 to 1,975 MC	Coupling attenuation* 20 db, directivity 26 db	125.00
-hp- 767D Dual Directional Coupler	Reflectometer and rf power measurements	1,900 to 4,000 MC	Coupling attenuation* 20 db, directivity 26 db	125.00

*Power handling capacity all 764/767 series couplers 50 watts CW, 10 Kw peak.

Equipment below available for most waveguide frequencies

See table at left for data, prices.

-hp- 809B UNIVERSAL PROBE CARRIAGE

-hp- 810 WAVEGUIDE SLOTTED SECTIONS

Convenient, all-purpose -hp- 809B carriage operates with six different -hp- slotted sections, waveguide and coaxial. Mounts sections covering frequencies 3,000 to 18,000 MC—sections interchange in 30 seconds! Precision-built carriage calibrated in mm to 0.1 mm; dial gauge may be mounted. Operates with -hp- 442B Broad Band Probe and -hp- 440A Coaxial Detector in combination; or with -hp- 444A Untuned Probe.

-hp- 810A/B Slotted Sections. -hp- 810B, for mounting in 809B carriage, is a flanged waveguide section with accurately machined slot tapered at ends to minimize reflection. Available in 5 waveguide bands, 3.95 thru 18.0 KMC. -hp- S810A, complete slotted section assembly including probe carriage. Available for 2.6 to 3.95 KMC band only.

-hp- 420A/B CRYSTAL DETECTORS

Employs a silicon crystal to detect rf signals in Type N coaxial line. Covers frequencies 10 MC to 12.5 KMC. Model 420B, for reflectometer measurements, \$75.00. 420A, \$50.00. Uses modified 1N26 crystal.

-hp- 382A PRECISION ATTENUATOR

Precision broad band attenuation to 50 db. Completely independent of frequency; phase shift constant all attenuations. Calibrated range 0 to 50 db, maximum error \pm 2% of db reading. G, J, H, X and P bands available covering 3,950 to 18,000 MC. SWR less than 1.15 full range.

-hp- 281A WAVEGUIDE-COAX ADAPTERS

For convenient transition between waveguide and coax systems. Each unit covers a full waveguide range with SWR less than 1.25. Equipped with Type N connectors.

-hp- 444A UNTUNED PROBE

A 1N26 crystal plus small antenna in a convenient, easy-to-use housing. Variable penetration depth, no tuning required. Sensitivity equal to single- or double-tuned probes. Frequency range: 2.6 to 18.0 KMC. Mounts in 809B Carriage.

-hp- 487A THERMISTOR MOUNT

For fast, accurate waveguide power measurements. Each mount covers full range of its waveguide frequency. No tuning required, SWR less than 1.5. Rugged construction, high temperature coefficient permanent thermistors virtually eliminate delays due to detector element burn-out.

-hp- 885A PHASE SHIFTER

For accurate, precisely controlled phase variation throughout frequency band. Ideal for microwave impedance, transmission measurements, antenna and system design. Direct reading, low power absorption, 360° (electrical) range.

-hp- 752 MULTI-HOLE COUPLER

Directional couplers available in 2 models with coupling factors of 3, 10 and 20 db \pm 0.7 db over full range of a waveguide. SWR better than 1.05. Directivity 40 db or better over entire range. Available as a 3-terminal equal power splitting network.

-hp- 485B DETECTOR MOUNTS

To measure power over complete waveguide range in conjunction with -hp- 430C Power Meter and barretter. Also measures relative level, or detects rf energy using 1N21 or 1N23 crystal. Semi-tuned by movable short to SWR 1.25.

-hp- 870A SLIDE SCREW TUNERS

For flattening waveguide systems. The position and penetration of a probe is adjusted to set up an SWR which is used to cancel existing SWR in system. SWR values up to 20 can be corrected with accuracy of 1.02 SWR.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

-hp- Signal Generators — 10 to 21,000 MC

-hp- 608D vhf SIGNAL GENERATOR

10 to 420 MC. Highest stability. No incidental FM or frequency drift. Calibrated output 0.1 μ v to 0.5 v throughout range. Built-in crystal calibrator provides frequency check accurate within 0.01% each 5 MC. Master-oscillator, intermediate and output amplifier circuit design. Premium quality performance, direct calibration, ideal for aircraft communications equipment testing. \$1,050.00.

-hp- 608C vhf Signal Generator. High power (1 v max.) stable, accurate generator for lab or field use. 10 to 480 MC. Ideal for testing receivers, amplifiers, driving bridges, slotted lines, antennas, etc. \$950.00.

-hp- 626/628A shf SIGNAL GENERATORS

New instruments, bringing high power, wide range, convenience and accuracy to 10 to 21 KMC range. Frequencies, output voltage directly set and read. Output 10 to 20 db better than previous spot-frequency sets. SWR better than 1.2 at 0 dbm and

lower. Internal pulse, FM or square wave modulation; also external pulsing or FM'ing. **-hp- 626A**, 10 to 15.5 KMC, \$3,250.00. **-hp- 628A**, 15 to 21 KMC, \$3,000.00.

-hp- 212A PULSE GENERATOR

Provides continuously variable, high power "fast pulses" of superior wave form. Combines broad general usefulness with 0.02 μ sec rise and decay time to meet requirements

of radar, TV and nuclear work. Pulse length variable 0.07 to 10 μ sec; minimum overshoot; 50 watt peak power (50 v to 50 ohms load). Low impedance means accurate pulses can be delivered at a distance from the instrument. Repetition rate variable 50 to 5,000 pps; controlled internally or externally. Synchronizing pulses available in advance of, or following output pulse. \$565.00 Δ .

Instrument	Frequency Range	Characteristics	Price
-hp- 608C	10 to 480 MC	Output 0.1 μ v to 1 v into 50 ohm load. Pulse or CW modulation. Direct calibration.	\$ 950.00
-hp- 608D	10 to 420 MC	Output 0.1 μ v to 0.5 v into 50 ohm load. Pulse or CW modulation. Direct calibration and crystal calibrator check	1,050.00
-hp- 612A	450 to 1,220 MC	Output 0.1 μ v to 0.5 v into 50 ohm load. Pulse, CW or amplitude modulation to 5 MC Direct calibration.	1,200.00
-hp- 614A	800 to 2,100 MC	Output 0.1 μ v to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration.	1,950.00
-hp- 616A	1,800 to 4,000 MC	Output 0.1 μ v to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration.	1,950.00
-hp- 618B	3,800 to 7,600 MC	Output 0.1 μ v to 0.223 v into 50 ohm load. Pulse, CW, FM or square wave modulation. Direct calibration.	2,250.00
-hp- 620A	7,000 to 11,000 MC	Output 0.1 μ v to 0.223 v into 50 ohm load. Pulse, CW, FM or square wave modulation. Direct calibration.	2,250.00
-hp- 623B	5,925 to 7,725 MC (in three bands)	Output 70 μ v to 0.223 v into 50 ohm load. FM or square wave modulation. Separate power meter and wave meter section.	1,750.00
-hp- 624C	8,500 to 10,000 MC	Output 3.0 μ v to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Separate power meter and wave meter section.	2,265.00 Δ
-hp- 626A	10,000 to 15,500 MC	Output 1 μ watt to 10 mw. Internal or external pulse, FM, or square wave modulation. Direct calibration.	3,250.00
-hp- 628A	15,000 to 21,000 MC	Output 1 μ watt to 10 mw. Internal or external pulse, FM, or square wave modulation. Direct calibration.	3,000.00

SWEPT FREQUENCY OSCILLATORS

-hp- 670SM	2,600 to 4,000 MC	Output app. 10 mw entire frequency range. Automatic, adjustable, mechanical sweep.	1,175.00
-hp- 670GM	4,000 to 6,000 MC	Output app. 10 mw entire frequency range. Automatic, adjustable, mechanical sweep.	1,175.00
-hp- 670JM	5,850 to 8,200 MC	Output app. 10 mw entire frequency range. Automatic, adjustable, mechanical sweep.	1,175.00
-hp- 670HM	7,000 to 10,000 MC	Output app. 10 mw entire frequency range. Automatic, adjustable, mechanical sweep.	1,175.00

SQUARE WAVE AND PULSE GENERATORS

-hp- 211A Square Wave Generator	1 cps to 1 MC	Output 55 v peak to peak into 600 ohm load. Free running or external sync. .02 μ sec rise time. Low or high impedance output.	265.00
-hp- 212A Pulse Generator	50 to 5,000 pps	Output 50 v peak into 50 ohm load. Free running or external sync. Variable delay. .02 μ sec rise time	565.00 Δ

-hp- Regulated Power Supplies

-hp- 715A POWER SUPPLY

-hp- 715A is a versatile source of regulated beam and reflector voltage for operating most test bench klystron tubes. Beam voltage 250 to 400 v; reflector voltage 0 to 900 v; 6.3 v filament. Internal, 1,000 cps square wave modulation, also 60 cps FM modulation, both on reflector voltage. \$300.00.

-hp- 712B POWER SUPPLY

This new **-hp-** instrument features high regulation of 0.01%, 0.1 millisecond transient response, internal impedance 0.1 ohms in series with 25 μ H; full-load maximum

hum less than 500 μ v, sealed transformers, chokes and condensers. 0 to 500 v, 200 ma supply and fixed —300 v tap providing a 50 ma, 300 to 800 v variable supply for klystron operation. \$365.00 Δ .

Instrument	Primary Uses	Characteristics	Price
-hp- 710B Power Supply	For low power bench and permanent setups	100 to 360 volts at 75 milliamperes	100.00
-hp- 711A Power Supply	For powering experimental bench setups requiring wide voltage range, low power	0 to 500 volts at 100 milliamperes	225.00
-hp- 712B Power Supply	Meets requirements for heavy duty field and lab work	0 to 500 volts at 200 milliamperes 0.01% regulation	365.00 Δ
-hp- 715A Klystron Power Supply	Regulated beam, reflector source for low power klystrons	Beam 250 to 400 volts at 50 milliamperes. Reflector 0-900 volts	300.00
-hp- 717A Klystron Power Supply	Regulated beam, reflector source for Type 5721 klystrons and for -hp- 670 series Swept Frequency Oscillators	800 to 1,000 volts at 25 milliamperes	375.00

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

Amplifiers for General Use and Fast-Circuit Work

-hp- TRAVELING-WAVE TUBE AMPLIFIERS

Now -hp- offers Traveling-Wave Tube Amplifiers for all frequencies 2 to 12.4 KMC. -hp- 490B, 2 to 4 KMC, supersedes -hp- 490A and is similar except for 30 db gain and helix modulation provision. -hp- 491, also 2 to 4 KMC, has higher output of 1 watt. -hp- 492A and 494A are low level, high

gain amplifiers with 30 and 25 db gain; they offer amplitude, pulse, phase or FM modulation. All amplifiers have exclusive -hp- helical coupling system, and employ encapsulated traveling-wave tubes that can be readily replaced. -hp- 490B/491A, \$1,100.00. -hp- 492A/494A, \$1,500.00.

-hp- 460A/B FAST PULSE AMPLIFIERS

-hp- 460A Wide Band Amplifiers, in cascade with -hp- 460B Fast Pulse Amplifiers, provide up to 90 db gain, 125 v open circuit. This permits full deflection of 5XP CRT, or 2" deflection of 5CP tubes. Rise time 0.0026 μ sec. Will amplify millimicro-second pulses. Over 100 MC band width for scopes. -hp- 460A, \$185.00. -hp- 460B, \$225.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 450A Amplifier	General purpose lab amplifier	5 to 1,000,000 cps	20 and 40 db gain, freq. response $\pm 1/2$ db	\$ 140.00
-hp- 460A Amplifier	Wide band, pulse amplification	100 KC to 140 MC	20 db gain, rise time 0.0026 μ sec.	185.00
-hp- 460B Amplifier	Pulse amplification, high output	100 KC to 140 MC	15 db gain, 125 peak volts	225.00
-hp- 490B Traveling-Wave Tube Amplifier	Amplification and pulse modulation	S-Band—2 to 4 KMC	High gain, low noise, broad band 30 db gain	1,100.00
-hp- 491A Traveling-Wave Tube Amplifier	Power gain to 1 watt	S-Band—2 to 4 KMC	30 db gain, can be pulse modulated	1,100.00
-hp- 492A Traveling-Wave Tube Amplifier	AM, FM, pulse, phase modulation	4 KMC to 8 KMC	Low level, high gain, 30 db gain	1,500.00
-hp- 494A Traveling-Wave Tube Amplifier	AM, FM, pulse, phase modulation	7 KMC to 12.4 KMC	Low level, high gain, 25 db gain	1,500.00

-hp- Low Frequency, High Frequency Oscilloscopes

A completely new design philosophy enables these new instruments to set revolutionary standards for oscilloscope usefulness, convenience and long-term dependability.

Both instruments have universal automatic triggering where one preset adjustment provides optimum triggering for all conditions. Other features include unitized circuits, etched, mounted on "see-through" plastic; highest quality components, ultra conservative design; concentric color-coded controls, direct sweep-time selection.

-hp- 130A Low Frequency Oscilloscope has 1 mv/cm sensitivity, dc to 300 KC, sweeps 1 μ sec/cm to 15 sec/cm, may be triggered by internal source, line voltage or external sources 2 v or more. 21 calibrated ranges, direct reading. Similar vertical, horizontal amplifiers, input attenuator; 14 ranges, continuous vernier. Amplitude calibration 1 KC square wave, 5% accuracy. \$450.00.

-hp- 150A High Frequency Oscilloscope, dc to 10 MC, has plug-in pre-amplifiers offering either high gain or dual trace. Model 150A sweeps 0.02 μ sec/cm to 15 sec/cm. 24 calibrated sweep ranges, direct reading. Triggered internally, line voltage, or externally. Horizontal amplifier with magnification feature expanding horizontal sweep 5, 10, 50 or 100 times. Vertical amplifier rise time less than 0.035 μ sec; signal delay line permits leading edge of triggering signal to be seen. Amplitude calibrator 18 1 KC square wave voltages, accuracy 3%. Supplied separately are: -hp- 151A High Gain Amplifier, \$100.00 and -hp- 152A Dual Channel Amplifier, \$200.00. -hp- 150A Oscilloscope (without plug-in amplifiers), \$1,000.00.

Cabinet, End Frame, Or Rack Mounting

To give you greatest flexibility in your setup, -hp- equipment having the standard 19" panel can be mounted in the new, streamlined all metal cabinets; with end frames; or in standard relay racks. -hp- AC-44 aluminum-and-steel cabinets are attractive, sturdy, easily removable, equipped with carrying handles. With instrument, \$15.00. Separate \$25.00.

Smaller -hp- instruments, too, are now being delivered in new-streamlined cabinets. This rugged, lightweight metal cabinet is now offered with such instruments as -hp- 200AB, 200CD, 410B and 715A.

Many -hp- instruments are basically rack mounting and can be installed directly in 19" racks. Other instruments can be equipped for relay rack mounting at slight additional charge. Write for details.

Cathodes and Tubular

Superior Tube Company is the world's largest independent supplier of cathodes and other tubular parts for use in electron tubes. Products include nickel cathode sleeves, disc cathodes, stainless anodes for cathode ray and TV guns, transistor envelopes, glass-sealing alloys, and connectors for klystrons and magnetrons. Besides offering the widest variety of stock alloys, Superior produces special alloys to specifications. Recently Superior introduced a new series of cathode alloys called Cathalloys, with several highly significant advantages. For complete technical information on Superior's line of electronic products, write for Catalog 50, Superior Tube Company, 2504 Germantown Ave., Norristown, Pa.

CATHODES

ACTUAL SIZE

Typical cathode sleeves and disc cathodes made by Superior Tube Company. In a wide variety of sizes and shapes. To extremely close tolerances in Seamless, Weldrawn,* Lockseam† form.

Parts for Electron Tubes

SEND FOR COMPLETE 20-PAGE CATALOG

All the basic data you need on Superior's broad line of cathodes, anodes, grid cups and other tubing—including uses, dimensional tolerances, and physical properties of 23 alloys.

Complete Information on Cathalloys. The catalog furnishes complete information on these new cathode alloys developed by Superior—their low sublimation, reduced interface impedance, and other characteristics.

QUICK FACTS ABOUT CATHALOYS

Cathaloy* A-32. ‡ Active cathode alloy with extremely low interface impedance and increased strength.

Cathaloy P-50. Only passive alloy commercially available in Weldrawn as well as Lockseam cathode form.

Cathaloy A-31. For ruggedized tubes. Twice as strong as ordinary cathode alloys.

Cathaloy A-30. † Active cathode alloy with extremely low interface impedance and long life.

The table below is taken from the catalog. Send for your free copy.

GLASS-SEALING ALLOYS

Glass-to-metal seals for conductor leads into vacuum tubes, hermetically sealed chambers, or controlled atmospheres. Superior offers 8 standard uniform-expansion alloys cold drawn to close tolerances. Write for Data Memorandum # 15.

NOTE: Mechanical properties apply only to Seamless and Weldrawn Cathodes

Illustrated are some of the standard and special precision parts currently being produced by Johnson & Hoffman.

Johnson & Hoffman ingenuity

Deep-drawing techniques perfected by Johnson & Hoffman are now being used to produce larger precision parts, such as the convergence cup for 15 in. color tube, grid rings, shroud ring, and variable diameter can shown above.

Reducing the cost of small, precision metal stampings and deep-drawn parts—while maintaining quality—is a problem facing many manufacturers of radio, TV and other electronic equipment. The solution isn't easy.

However, the cost picture often can be improved considerably by ingenious design and tooling . . . combining two parts in one, for instance, or reducing the number of operations required to produce a given part.

At Johnson & Hoffman we cultivate this sort of creative engineering. It has resulted in significant savings for many of our customers, while maintaining or actually improving product quality. It can do the same for you.

All metal components of the TV gun assemblies pictured above, except heater, getter and cathode, were manufactured by Johnson & Hoffman.

keeps costs down, quality up

COLOR TUBE COMPONENTS—Johnson & Hoffman is equipped to furnish you a complete line of cylindrical color picture tube parts. The same deep-drawing techniques pioneered by Johnson & Hoffman for black and white CR tubes are now being applied to the production of anodes, grids, and lens assemblies employed in the new color gun designs. The absence of seams, plus exceptional surface luster obtained by tumbling techniques and by electropolishing, makes these Johnson & Hoffman components especially desirable for tubes operating under high voltage. Also available from Johnson & Hoffman are lockseam anodes produced on

multi-slide equipment. If you should have technical problems with your particular gun design, remember that our experience may suggest possibilities for improving your product or reducing costs.

WHATEVER YOUR REQUIREMENTS in black and white or color tube components or other radio and electronic parts, you can depend on Johnson & Hoffman as a fast, reliable source for precision metal stampings and deep-drawn parts—often produced at substantial savings to you. We have an extensive line of standard designs and are equipped to develop special components if you need them. Write for information and quotations.

OHMITE[®] FOR LONG LIFE

..... AND DEPENDABILITY

RHEOSTATS

All-ceramic and metal, close control rheostats for unsurpassed dependability and smoothness of operation. Ten stock sizes, 25 to 1,000 watts.

RESISTORS

A wide range of dependable, fixed, adjustable, tapped, and non-inductive, power wire-wound resistors. Also a wide range of precision resistors.

TAP SWITCHES

Five compact models, 10 to 100 amperes, AC, up to 12 taps. All-ceramic and metal construction. Silver-to-silver contacts, with self-cleaning rotor contact.

R. F. CHOKES

Single layer R. F. plate chokes and power line chokes, on steatite or plastic cores. Protected by a special moisture-resistant coating.

ALSO SUB-MINIATURE TANTALUM CAPACITORS

OHMITE®

AMRECON®

Relays

**HIGH QUALITY, ALL-PURPOSE RELAYS...
RUGGED, DEPENDABLE FOR LONG LIFE!**

65 types in four stock models

Ohmite Amrecon relays have proven their exceptional ruggedness and long life in years of service. Now, four popular stock models—DOS, DOSY, DO, and CRU, in 65 different types—are available from stock.

Models DO and DOS fill many industrial needs for a compact, lightweight relay that handles power loads usually requiring much larger, heavier units. They are particularly adaptable to aircraft and mobile equipment where severe shock and vibration are encountered. The increased operating sensitivity of Model DOSY relay, equipped with twin coils, makes the DOSY adaptable to a wide range of electronic control circuits, such as plate circuit controls. At 115 VAC or 32 VDC, noninductive load, Models DOS and DOSY have contact ratings of 15 amp; Model DO, 10 amp; and Model CRU, 5 amp. Available in a wide range of coil operating voltages and contact combinations.

Current ratings up to 25 amp, AC or DC.
Also made-to-order models in many contact combinations and coil voltages.

AE 16

A FASTER-BETTER ROSN CORE SOLDER

A New scientific development designed to improve and speed up your soldering operations and meet the highest standards of the Electronics Industry

"AE16" Rosin Flux is a combination of a superior grade of water white, natural rosin and a minute amount of a unique oxide removing agent, which conditions surfaces to be soldered to meet today's high speed production requirements. "AE16" Rosin Core Solder is non-corrosive, non-hydroscopic, non-conductive and exceeds the requirements of Federal Specifications QQ-S-571b and MIL-S-6872. The solder is a homogeneous alloy of Virgin Metals, scientifically blended and quality controlled assuring continuous peak performance. "AE16" Rosin Core Solder is manufactured to conform to rigid industrial standards and may be obtained in any combination of Tin, Lead and related metals. It is supplied in any diameter with controlled flux percentages.

Reports of laboratory tests furnished upon request.

Furnished on 1-5-25-50 lb. spools.

New Hyde Park, New York

"WW" a natural ROSN CORE SOLDER

A natural, water white, gum rosin and turpentine distillate flux core solder. Standard for many years for use on all electrical and electronic soldering. Guaranteed to be non-corrosive and non-conductive.

Manufactured in all commercial sizes and alloys.

Available on 1-5-25-50 lb. spools.

FLUXES

Rosin Fluxes specifically created for printed circuitry and hot dip tinning applications. Without parallel for speed and spreading power. Long shelf life. Easily and safely bites through oxides and any residues remaining, yet gives resistance in excess of 50,000 megohms after soldering or when baked dry.

ELECTRO SOLDER PASTE

A New non-corrosive Solder in Paste form. Especially designed for electrical and electronics soldering. Excellent for intricate and blind soldering operations. Ideal for induction and oven soldering where continuous and automatic production is required. Obtainable in any alloy. Available in 1 and 5 lb. cans.

PRE-FORMS

Rings — Washers — Pellets in flux-cored and solid forms. Engineered to meet your specific requirements. Packaged to eliminate damage and distortion resulting in ease of handling.

VOLTAGE REGULATED POWER SUPPLIES

for powering electronic equipment

SERIES

with **NEW-IMPROVED FEATURES**

★ **FAST RECOVERY TIME**

★ **GOOD STABILITY**

★ **LOW OUTPUT IMPEDANCE**

KR Voltage Regulated Power Supplies are conservatively rated and are designed for continuous duty at 50°C ambient.

REGULATION: Less than 0.2 volts for line fluctuation from 105-125 volts and less than 0.2 volts for load variation from 0 to maximum current.

RIPPLE: Less than 3 mv. rms.

STABILITY: The output voltage variation is less than the regulation specification for a period of 8 hours.

RECOVERY TIME: Less than 50 microseconds. The excursion in the output voltage during the recovery period is less than the regulation specification.

OUTPUT IMPEDANCE: Less than 0.1 ohms from 20 cycles to 100KC. Less than 0.5 ohms from DC to 20 cycles. Many units have very much lower output impedance.

KR-3M

KR-18MC

FEATURES:

- Fast Recovery Time, Suitable for Square Wave Pulsed Loading.
- Voltage Range continuously variable without Switching.
- Either Positive or Negative may be Grounded.
- Oil Filled Condensers.
- Wire Harness and Resistor Board Construction.
- Power Requirements 105-125 volts, 50-60 cycles.
- Terminations on rear of unit.
- Locking type voltage control AC, DC Switches, Fuses, and Pilot Lights.
- Color Grey Hammertone.
- Guarantee One Year.

All models available for 400 cycle operation on special order.

output voltage range the output voltage variation shown in the table for line fluctuations from 105 variations from 0 to maximum current.

value shown in the table.
voltage variation is less than the regulation specification shown in the table.

an 50 microseconds. The excursion in the output recovery period is less than the regulation specification from 105 to 125 volts and load variations from Models 2000B, 2600 and 2650 the excursion recovery time is less than 50 millivolts.

00B the recovery time is less than 100 microseconds and less than 0.1 seconds for load variations, and less than 1 volt during the recovery

OUTPUT IMPEDANCE: Less than 0.1 ohms from 20 cycles to 100KC. Less than 0.5 ohms from DC to 20 cycles. Many units have very much lower output impedance. Write for exact data specifying model.

***REGULATION FOR BIAS VOLTAGE:** In the range 0 to 150 volts the output voltage variation is less than 10 millivolts for line fluctuation from 105 to 125 volts. At 150 volts the output voltage variation is less than ½% for load variation from 0 to 5 ma. At settings below 150 volts the internal resistance of the supply will increase to a maximum of 25,000 ohms.

† All AC Voltages are unregulated.
‡ These units are supplied in cabinets. The chassis, when removed from their cabinets, will mount directly in to a standard 19" wide relay rack. All units are designed for relay rack mounting or bench use.
All units contain voltage and current meters except Models 103, 315B, 450D, and 2500. The Model 150 contains a voltmeter only.

TAPE WOUND and BOBBIN CORES

Only Magnetix, Inc. offers Tape Wound Cores and Bobbin Cores *guaranteed* to meet your performance specifications. They are immediately available made from Hy Mu-80, 4-79 Mo Permalloy, 48 Alloy, Orthonol,[®] Magnesil,[®] and all other commercial high permeability materials. Cores are hydrogen annealed to meet your performance specifications.

TAPE WOUND CORES:

In addition to standard sizes, the following combinations may be had:

Inside Diameters . . . 0.375-in. to 4.500-in. Heights 0.125-in. to 4.500-in.
 Outside Diameters . . . 0.500-in. to 6.500-in. Tape Thickness .001, .002, .003, .004, .006-in.

Only Magnetix, Inc. Tape Wound Cores are furnished in the revolutionary Aluminum Core Box.* They will withstand (1) temperatures to at least 450°F., (2) vacuum impregnation, (3) heavy winding stresses, and (4) unusual shock and vibration.

*Patent Pending [®]Registered Trade Mark

BOBBIN CORES:

Furnished in 14 standard sizes, and a wide choice of special bobbin and tape sizes. Wound on ceramic bobbins for rigidity.

Bobbin Diameters from 0.125-in. through 1.25-in.**
 Tape Width from 0.0625-in. through 0.25-in.**
 Tape Thickness from 0.000125-in. through 0.001-in.

**Larger sizes available upon request.

For Complete Details: Write for Tape Wound Core Catalog '100
 Bobbin Core Bulletin 102

MOLYBDENUM PERMALLOY POWDER CORES

These are the industry's first "Performance-Guaranteed" molybdenum permalloy Powder Cores.* Made of 2% molybdenum, 81% nickel, and the remainder iron, this core material was developed to meet the need for a loading coil material which would have suitable response in the audio and carrier frequency ranges.

Magnetix, Inc. molybdenum permalloy Powder Cores are available in a variety of standard sizes and permeabilities. As an extra, cores will be graded by nominal inductance.

Inside Diameters 0.500 to 0.950-in. Heights 0.250 to 0.570-in.
 Outside Diameters 0.800 to 1.570-in. Permeabilities 14, 26, 60, 125

Permeability	Core Loss Ohms/Henry/Unit of μ	Common Frequency Ranges
125±10	0.24 max.	up to 15 kc
60±5	1.70 max.	10 to 50 kc
26±2	76 max.	30 to 75 kc
14±1	65 max.	50 to 200 kc

*Manufactured under a license agreement with Western Electric Co.

Finishes: Powder cores may be furnished with standard baked enamel and wax tight varnish finishes, or with no finish at all. All units with finishes which will sustain 500 or more volts may be wound directly with heavy Formex-coated wire.

For Complete Details: Write for Powder Core Bulletin 103

Performance - Guaranteed

MAGNETIC SHIELDS

Magnetics, Inc. can guarantee performance of its Magnetic Shields because of its extensive experience with dry hydrogen annealing. Annealing in other atmospheres will not permit optimum magnetic shielding properties to be realized . . . and since hydrogen annealing is an art as well as a science, for best results it should be done only by specialists such as those who compose the Magnetics, Inc. staff.

Shields for use in moderate or high flux external fields are usually made from Mu Metal or A.E.M. 4750, respectively, but can be made from any other commercially available magnetic and non-magnetic materials when required by performance specifications. Shields are usually 18- (.050"), 24- (.025") or 29- (.014") gauge, but other thicknesses can be supplied upon request.

They can be fabricated or drawn, depending upon economy for a particular requirement, and can be furnished painted, lacquered or unfinished. Paint color can be matched to any equipment shade you select, pre-painting by Magnetics eliminating danger of damage to shields in painting operations in your plant.

The Magnetics, Inc. Engineering Department will assist in all phases of your shield design, including magnetic and mechanical design, and production engineering to your cost requirements.

For Complete Details: Write for Shield Catalog 104

Performance - Guaranteed

MAGNETIC LAMINATIONS

"Performance-Guaranteed" magnetic laminations are substantially burr-free and flat for precision stacking. They are punched at Magnetics, Inc. by progressive tungsten-carbide dies for high-production, fine tolerance laminations, and by hi-carbon, hi-chrome dies for shorter production runs. Special dies can be made to fit individual customer specifications when standard laminations are not suitable.

Nickel-iron and all grades of silicon steel laminations are available in standard shapes such as EE 24-25, EE 26-27, EE 186-187, EI 11, EI 12, EI 13, EI 21, EI 75, EI 187, EI 375, EI 625, F-12, F-13, F-20, U-1 and Rings. Standard gauges are from 0.025" through 0.006". Laminations are hydrogen annealed when necessary, to meet performance specifications.

Magnetics, Inc. is very well staffed and equipped to supply special shapes of laminations. Its tool design staff, special shop facilities and general production flexibility permit speedy and high quality work on both large and small production runs. In addition, all Magnetics, Inc. technicians are experts at heat treating high permeability alloys for your particular magnetic properties.

Complete core assemblies, providing the same Performance-Guarantee as the laminations, can be supplied.

For Complete Details: Write for Laminations Catalog 101

BUTLER, PENNSYLVANIA

Sierra 121 Wave Analyzer

LINE BRIDGING TRANSFORMERS

Converts voltmeter and wave analyzer inputs from single-ended to balanced operation. Model 130 bridges both 135 and 600 ohm balanced lines. Frequency range 3 KC to 500 KC. Write for details.

LINE FAULT ANALYZER

Sierra 124A Line Fault Analyzer

Operates on most open wire power, communications lines. Instantly pinpoints shorts, opens, grounds. Direct reading, easy to use, range 1/2 to 200 miles. Sweep marker continuously adjustable from 5 to 100 miles; locates faults with accuracy of 1/4 mile. Request Bulletin 102. (Sierra now offers Model 169 Line Coupling Network rated at 5 KV. Ideal for coupling Model 124A to "dead" power lines. Affords protection to personnel and equipment.)

REFLECTION COEFFICIENT METER

Compact, moderately-priced instrument giving great speed, convenience for measuring coaxial transmission line reflection coefficient, VSWR, or matching loads to line. High accuracy. Sensitivity permits operation with any standard CW signal generator. Provides continuous monitoring at any frequency over the range 32 MC to 1125 MC. Employs Sierra wideband directional couplers to sample incident and reflected voltage. Attenuator calibrated in reflection coefficient and VSWR. Request Bulletin 106.

COAXIAL READOUT DEVICES

Insure sensitive readout for Sierra vhf-uhf Directional Couplers. Model 148K Crystal Detector, low VSWR, high sensitivity to 3300 MC. Model 148 Crystal Detector, low VSWR, higher sensitivity to 1200 MC. Model 157 Bolometer Mount for pulse work. All models incorporate 50 ohm input impedance and filtered output. Type N input, BNC output connectors. Request Bulletin 113.

DOUBLE STUB TUNERS

New tuners match to a 50 ohm line any load having a 2:1 VSWR. Three models: 151 (155 MC to 300 MC); 152 (380 MC to 825 MC); 153 (900 MC to 1750 MC). Operates up to 1.5 KW peak power. Request Bulletin 110.

CALIBRATED RF LOAD

Sierra 141 Calibrated RF Load

Model 141 Variable Impedance Calibrated RF Load provides for direct power measurements from 25 to 250 watts at 2 mc to 30 mc. Load impedance resistance and reactance adjustable over wide range. High accuracy instrument with comprehensive individual impedance calibration charts for all frequencies, or typical charts for general purpose use. Accuracy: $\pm 5\%$ (impedance magnitude), $\pm 10\%$ (power). Request Bulletin 105.

WAVE ANALYZERS

CARRIER FREQUENCY VOLTMETERS

101B	20 KC-500 KC	± 550 cps	± 2900 cps	Note A	± 3 db	Note D	600 ohms
103A†	3 KC- 40 KC	± 400 cps	± 3000 cps	± 0.5 kc	± 3 db	Note D	600 ohms
104	5 KC-150 KC	± 300 cps	± 1500 cps	± 1 kc	± 3 db	Note D	600 ohms
108A	15 KC-500 KC	± 550 cps	± 2900 cps	± 3 kc Note B	± 2 db Note C	135 ohms Note D	600 ohms
114	100 KC-800 KC	± 550 cps	± 2900 cps	Note A	± 3 db	Note D	600 ohms

All Models feature built-in calibration oscillators and circuits for level calibration, have aural monitoring jacks, and (except 103A) are furnished with Sierra Model 149A Precision Spiral Scale Dials.

†Contains carrier re-insertion oscillator for monitoring suppressed carrier systems. Furnished with planetary drive dial. Note A. Ranges from ± 2 KC at low end of dial to ± 3 KC at upper end. Note B. ± 1 KC in the 48 KC to 256 KC region. Note C. ± 1 db for $+30$ db to -40 db attenuator steps on 135 ohm balanced measurements. Note D. All models may be converted for 135 and 600 ohm balanced line measurements by convenient plug-in bridging transformer, Model 130.

IMPEDANCE METER

Sierra Model 166 Carrier Systems Impedance Meter is specifically designed for the measurement of impedances on circuits with high noise levels at any frequency over the range 30 KC to 300 KC. Either high or low power signal sources may be used. Measurements may be made on "hot" power lines through a series carrier coupling capacitor. Request Bulletin 112.

LOW PASS FILTERS

Model 184 Series Low Pass Filters have an insertion loss of not more than 0.4 db in pass band, sharp cut-off, 1.5 VSWR or less, and rejection greater than 60 db from 1.25 to 10 times cut-off frequency. Five models: for cut-off frequencies of 44, 76, 135, 230, 400

MC. Power range 250 watts in pass band, 25 watts in rejection band. Request Bulletin 115.

WIDEBAND DIRECTIONAL COUPLERS

Coupling Factor: (In db ± 1 db)

Model	10 kc	3 mc	10 mc	30 mc	100 mc	300 mc	1000 mc	2000 mc
137, 137A				73	63	53	43	37
138, 138A				59	49	39	29	
145		52	42	32	22	12		
150				53	43	33	23	
139	50	50						

Directivity: 12 db ± 3 db greater than coupling factor at each frequency.
Impedance: Models 137 and 138 are 51.5 ohms. Models 137A, 138A, 145 and 150 are 50.0 ohms. Model 139 may be matched to most impedances.
Power: Usable to 1000 watts throughout frequency range.

PHASE CHANGER

Model 191 Phase Changers, ideal for life-testing tubes, are offered with ac or dc motor for 1 1/4" x 3/8" or 1" x 1/2" waveguides. VSWR preset at 1.5 but adjustable from 1.02 to 1.6. For powers to 200 Kw peak, average power rating 500 watts. Request Bulletin 117.

SIERRA ELECTRONIC CORPORATION

FIELD, LAB POWER MEASURING INSTRUMENTS

TERMINATION WATTMETERS

Sierra 195A-X
Termination Wattmeter

Sierra 185A Series Average Reading Termination Wattmeters and Sierra 195A Series Peak-Reading Termination Wattmeters are broadly useful, dependable new instruments for terminating rf coaxial transmission systems and measuring rf powers. All models are ruggedly built, conservatively rated, and ideal as dummy loads for testing and adjusting pulsed transmitters and oscillators. Request bulletin.

Model 185A Average-Reading and 195A Peak-Reading Wattmeters

Model Number	Connector	Frequency Range, MC	Power Range, Watts	Accuracy % of F. S.	Max. Power Dissipation	Max. VSWR
185A-15FN	N	20-1000	0-5/15	± 5%	15 watts	1.2
185A-100FN	N	20-1000	0-30/100	± 5%	100 watts	1.2
185A-500FN	N	20-1000	0-150/500	± 5%	500 watts	1.2
Model Number	Connector	Frequency Range, MC	Peak Power Range, KW	Max. Average Power	Pulse Width, μ sec	Repetition Rate, PPS
195A-Z	N	250-1000	0-1/3/10	15 watts	1.0 minimum	400 minimum
195A-X	LC	250-1000	0-10/30/100	100 watts	1.0 minimum	400 minimum
195A-Y	LC	250-1000	0-100/300/1000	500 watts	1.0 minimum	400 minimum
195A-W	N	950-1250	0-1 and 0-3	15 watts	3.0 to 5.0	48 to 300
195A-V	N	450-1250	0-3 and 0-10	100 watts	3.0 to 5.0	300 to 7200
195A-U	HN	450-1250	0-5 and 0-15	500 watts	3.0 to 5.0	300 to 7200

NOTE: Female connectors are standard unless otherwise specified.

BI-DIRECTIONAL POWER MONITORS

Sierra 164A
Power Monitor

Model 164 Series. Two plug-in elements cover 25 MC to 1,000 MC, measure incident and reflected power of 10, 50, 100 and 500 watts full scale. Also four lower power elements covering same range at 1, 5, 10 and 50 watts full scale. Power is read direct on linear scale

accurate within $\pm 5\%$. Insertion VSWR less than 1.08 (Type N connectors) except on 1 watt ranges where VSWR is 1.15. 50 ohm impedance. Model 164 available with Type N, Type C or UHF connectors, male or female. Request Bulletin 111.

Plug-In Elements for Model 164 (Note: Model 164 does not include plug-ins. Order separately as needed.)

180 Series—1, 5, 10, 50 watts full scale

180-52: 25 MC to 52 MC
180-148: 50 MC to 148 MC
180-470: 144 MC to 470 MC
180-1000: 460 MC to 1000 MC

181 Series—10, 50, 100, 500 watts full scale

181-250: 25 MC to 250 MC
181-1000: 200 MC to 1000 MC

Accessories Available: Model 164-LS Equivalent Transmission Line Section; Model 164-CC Carrying Case.

THERMOPILE

Model 189A Differential Thermopile converts differential temperatures in flowing liquids to electrical energy. Internal resistance approx. 5 ohms, output voltage approx. 1 mv per $^{\circ}$ C, max. pressure 75 psi. Request Bulletin 119.

50 OHM COAXIAL TERMINATIONS

New compact, light weight Model 160 series coaxial terminations feature stable operation over a wide frequency range and up to high ambient temperatures. High surface to volume ratio provide a very low VSWR from dc to 3300 MC.

Model 160-5: 5 watts; Model 160-20: 20 watts; Model 160-100: 100 watts; Model 160-500: 500 watts. Request Bulletin 114.

CALORIMETER, X-BAND WATER LOAD

Model 190A Calorimeter and XB187A Water Load provide fast, accurate power measurement from a few watts to kilowatts. Accuracy $\pm 2\%$. Calorimeter ranges 300, 600, 1,500, 3,000 watts, max. 50 psi, sensitivity 1.5 mv. Water Load range 7 KMC to 10 KMC, VSWR less than 1.2, power 1 Kw CW, 300 Kw peak. Request Bulletin 116.

MODEL 194 PEAK-READING POWER MONITOR

New bi-directional instrument for radar and other pulsed measurements. Quickly measures incident and reflected powers. Measures peak power directly, independently of duty cycle. Write for bulletin.

IONIZATION GAUGE AND AMPLIFIER

Model 193A Ionization Gauge and Model 192A Ionization Gauge Amplifier provide convenient, dependable and accurate monitoring of pressures during processing from 10^{-4} to 10^{-7} mm Hg. Monel-encased Phillips type ion gauges operate for months without attention; amplifier includes high voltage rf power supply, VTVM, heater transformer and low voltage supply. Request Bulletin 118.

use ROHN communication and micro-wave towers

*featuring these
special advantages*

● Self-Supporting from 50 feet to 66 feet or up to 200 feet to 300 feet when guyed!

● Hot-Dipped Galvanizing Throughout — Finest Protective Coating. Also available in weather-resistant double-coat enamel.

● Easily and Quickly Erected. Towers are in 10-foot sections; two workmen can erect a 60-foot tower in only two to four hours!

● Excellent Design and Workmanship — both proven thoroughly through the test of time — thousands of Rohn installations!

● Economically Priced — Saves you money because you can buy just the right Rohn Tower to fill your requirements.

● Variety of Rohn Sizes and Models: No. 6 with 12½" triangular design for guyed heights up to 120', 50' self supporting; No. 20 features 14" triangular design for heights up to 160'; No. 30 has 18" triangular design for heavy duty use; the No. 40 for extra heights up to 300 feet or for extraordinary wind or antenna loading — self-supporting to 66 feet!

have you Edge Lighting Problems?

The unparalleled design flexibility of the Lackon® photo-marking process may offer you the best solution. With a minimum of gimmicks and gadgetry, Lackon® gives you a panel of unequalled marking accuracy, optimum legibility and lighting uniformity, with excellent resistance to severe environmental conditions. Designed, tested and quality controlled in our government approved laboratory, Lackon® edge lighted panels, knobs and knob skirts meet and exceed lighting, legibility and durability requirements of specification MIL-P-7788.

The Lackon® engineering staff of the United States Radium Corporation will readily assist your panel engineering department during the initial design stage. The cooperative application of their skill and experience in lighting techniques to your panel design will speedily resolve design difficulties, result in decided production economies, and yield a remarkably superior finished product. NEED A **Special** REGULATED POWER SUPPLY ?

MERCURY can supply any input voltage — output voltage — current — regulation — ripple — size — finish — quantity.

For a long time the MERCURY organization has been designing and producing reliable REGULATED POWER SUPPLIES for general use. These units were considered catalog items although frequently modifications were made to suit customers requirements.

In recent years we have received many inquiries for SPECIAL POWER SUPPLIES. Now we have established a new department to handle these special requirements of our customers. You are invited to submit inquiries relative to your special problems. All inquiries will receive a prompt reply.

Some typical units designed and manufactured by **MERCURY**

Electronic Inverter
 Input: 220 V. D.C.
 Output: 115 V. A. C. 60 Cycles
 1000 Watts
 Regulation: 5%
 Special Features included
 Size, weight, shape, finish
 and application

Model 508-A
 Input: 117 volts AC
 50/60 cycles
 Output: 0-600 volts DC at
 1 amp.
 Regulation: .25% from
 10-600 volts

Model 721-A
 Input: 117 volts AC
 50/60 cycles
 Output: 0-500 volts DC at
 300 Ma.
 Regulation: .25% from
 10-500 volts

Model E-1A Converter
 400 cycle Regulated Power
 Supply
 Input: 110 volts AC
 380/1000 cycles
 Output: 300 volts DC at
 400 Ma.
 Regulation: 1% at 300 volts
 300 volts
 Ripple: 80 millivolts

Model E-1B Converter
 400 cycle Regulated Power
 Supply
 Input: 117 volts AC
 380/1000 cycles
 Output: 150 volts DC at
 100 Ma.
 Regulation: .1% at
 150 volts
 Ripple: Less than 3 millivolts

DEVELOPMENT

DESIGN

PRODUCTION

Model 610-A
 Regulated Power Supply
 Input: 117 volts AC
 50/60 cycles
 Output: 0-600 volts DC at
 600 Ma.
 Regulation: .25% from
 10-600 volts
 Ripple: 5 millivolts

STANDARD ITEMS TOO!

MERCURY, long a recognized leader in the Continuously Variable Regulated D. C. Power Supply field, would like to send you their latest catalog of Standard Regulated Power Supplies and related items.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the ELECTRONICS BUYERS' GUIDE. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

CATHODE RAY TUBES

MULTI-GUN TUBES

Pioneered and developed by ETC. 2 to 10 traces. Round or square faces . . . 3" to 12". Electron guns are electrostatic deflection type. Cross talk eliminated by adequate shielding.

SINGLE-GUN TUBES

Built and tested with same care. Standard RETMA and MIL-types as well as "special purpose" tubes. Can be designed to answer your particular radar and instrumentation problems.

DESIGN AND ENGINEERING

Modern, well-equipped plant staffed by highly skilled workers assures dependable manufacture to your special specifications—facilities are open for industry problems as well as military.

MULTI-CHANNEL OSCILLOSCOPES

. . . for which there are no substitutes, are called upon when complete information is required. Convenient for visual observation as well as photographic recording.

AT A
 DOWN-TO-EARTH
 PRICE

K-26

DUAL CHANNEL

K-26 Handles 90% of applications for 1- or 2-channel scopes. Separate single shaft controls for each channel. Concentric controls for positioning, intensity, focus. Extended sweep range from below 2 sec. to 50,000 cps. Illuminated graticule.

K-215 Dc to 15 mc. High accelerating potential. Spiral band CRT. Sweep 0.1 μ sec/cm to 1 sec./cm.

4-CHANNEL

H-43 For use primarily with continuous film type recording cameras. Each channel individually controlled for focus, intensity, positioning. Frequency range 0 to 200 kc, \pm 3 db. Deflection sensitivity better than 0.5 v. dc/in.

H-21A General purpose, versatile instrument. Sweep circuits 2 cps. to 50 kc/sec. Continuous calibration 0 to 1.5 v. peak to peak. Frequency range, dc to 100 kc, \pm 1 db or better.

H-23 For work requiring greater band width and gain. Combines high sensitivity and high gain with h-f response flat within 3 db-dc to 1 mc.

H-25 Applicable to telemetering, radar and associated uses. Direct coupling, wide band width and delayed sweep control. Rise time dc to 0.05 μ sec or better.

H-45 DC amplifiers usable to beyond 300 kc. Available with 1 or more AC amplifiers for higher frequency application. Vertical amplifier 10 mv., rms sensitivity. Individual Z-axis inputs (above).

SPECIAL INSTRUMENTS — Oscilloscope preamplifiers, custom-built instrumentation and recording cameras a specialty. Write for complete information and quotation on your requirements.

ELECTRONIC TUBE CORPORATION • 1200 E. MERMAID LANE • PHILADELPHIA 18, PA.

MULTI-CHANNEL FREQUENCY SHIFT TONE TELEGRAPH SYSTEMS

These Multi-Channel Telegraph Systems are audio carrier systems capable of multiplexing such circuits as telephone lines, VHF, UHF, or radio frequency links—or practically any type circuit from which a two-wire audio circuit can be derived. Designed to meet any speed requirements, these systems are fully electronic, without relays or moving parts to wear. They can be used for high-speed printer, Morse or time division Multiplex circuits, as well as such applications as Telemetering, Control Circuits and Servo-Mechanisms. Instantaneous and complete sending and channel control permits any binary code groups, either "Clear Text" or "Cryptographic," to be channelized without need for additional phasing or synchronizing equipment, while paralleling of channels will allow for transmission of other type codes, such as 3 element cable code. The completely independent operation of each channel, including its own power supply, localizes faults to one channel only, leaving other channels unaffected. Individual

channel separation filters are used at both transmitting and receiving ends. This arrangement

DUAL FS TONE KEYS; TYPE 153 MODEL 2:

Keying Input. . . . Relay contacts, \pm DC current or voltage pulses, neutral or polar.

Input Level. . . . DC voltage: \pm 10 volts min. DC current: 45 ma min., \pm or polar. Relay: contact rating 5 ma min.

Keying input Z. . . . DC voltage: 100K ohms DC current: 220 ohms.

TRANSMITTER

RECEIVER

DUAL FS TONE CONVERTER; TYPE 152 MODEL 2:

Input Z: 600 ohms, unbalanced.

Input Level: -40 dbm to 0 dbm.

Input Frequencies: 18 channels, 425-3315 cps, 170 cycle spacing.

Keying Speed: 45 dot cycles.

NEW! DUPLEX TELEGRAPH SYSTEM FOR MULTI-CHANNEL TONE EQUIPMENT

SEVEN NEW FEATURES in this system—simple 4-position switch selects from 12 possible duplex combinations; duplex operation between stations connected via carrier telegraph channels; all-electronic, without relays or moving parts; polar or neutral for either half duplex or full duplex; break-in now also possible for all half-duplex circuits; provided with positive feature to prevent space signal lock-out; includes individual line battery for each channel.

The Northern Radio Duplex Telegraph System consists of one each Dual Frequency Shift Tone Keyer, Type 153 Model 3; Dual Duplex Selector Panel, Type 200 Model 1; Dual Loop Switch Panel, Type 200A Model 1; and Dual Frequency Shift Tone Converter, Type 152 Model 3. The Frequency Shift Tone Keyer and Converter are our latest improved Model 3's, specifically designed for use with this system.

The Dual Duplex Selector Panel and Dual Loop Switch Panel make possible complete duplexing and break-in operation of a Northern Radio or similar multi-channel Frequency Shift tone telegraph system. Such a system meets the requirements of any standard telegraph line or terminal apparatus for either full duplex or half-duplex operation. Because this system is all-electronic, it meets all speed require-

ments and yet has the flexibility and isolation heretofore possible only with relays.

The Dual Loop Switch Panel rapidly selects half-duplex and/or full duplex mode of operation for any of the 4 standard loop options by front panel switching available from the 12 loop options in the Dual Duplex Selector Panel.

The Dual Selector Panel provides 12 loop options, patching facilities for monitoring purposes and channel routing, including the possibility of patching-in another teleprinter loop circuit (T-junction). Any of the 12 loop options are available and may be selected for the Dual Loop Switch Panel by simple strapping arrangement. It has an individual line battery for each channel for greatest circuit flexibility. Battery and line fuses are also provided for maximum protection.

The Dual Duplex Selector Panel is provided with positive non-lockout features. An accidental "spacing" of the line, even over prolonged periods of time, such as caused by patching errors, will not lock the system into a permanent space (no loop current) condition. The system will instantly be ready to operate as soon as the fault is removed. This is due to a novel arrangement of the internal batteries which at all times can provide power to the telegraph loops.

For VARIABLE CAPACITORS...

"BFC" butterfly-type capacitor with isolated rotor, very low minimum capacity and low inductance. For VHF applications as series capacitor with no rotor connection.

"MAC" Low minimum capacity and very low inductance. Ideal for VHF-UHF applications. Designed for use in miniaturization. Also available as butterfly type "MACBF".

"APC" A compact, high quality air dielectric trimmer. Extremely high resistance to temperature changes, moisture and vibration.

"MAPC" A scaled down version of the "APC". Designed to fill the needs of miniaturization. Suitable for VHF use.

"HF" A high frequency design featuring extra long sleeve bearing and positive contact nickel-plated phosphor bronze wiper. Also available as a dual unit.

naturally,

"HFA" Similar to "HF" model, but with larger air gaps for higher breakdown ratings. Used for high-frequency, low-power transmitting. Also available as dual unit.

"MC" Designed for maximum versatility in mountings, connections and capacity characteristics. Rotor stop permits 180° clockwise rotation with increasing capacity. Also available as dual unit.

"RMC" Similar to "MC-S" but featuring extra rigid design. Heavy frame of aluminum tie rods and end plates.

"NZ" Compact transmitting neutralizing capacitor designed for easy and accurate adjustment. Long leakage paths to ground from both rotor and stator.

"VU" Permits use of "lumped constant" circuits up to 500 MC. Two sections in series eliminate rotor wiper. Pyrex glass ball bearings eliminate noise from usual metal-to-metal bearings.

it's HAMMARLUND

For commercial, military and industrial applications, you just can't beat Hammarlund Variable Capacitors for uniformly high quality design, materials and workmanship. The capacitors illustrated here are just a small representative portion of the complete Hammarlund line. In addition to stock designs, Hammarlund offers you unparalleled variable capacitor know-how in development, design and production. Whatever your needs, when it comes to special or standard variable capacitors, naturally, come to Hammarlund.

Ultra-Sensitive Relays, D-C Motors...A-C Motors

polarized ultra-sensitive relays

Operating on input powers of 40 to 1000 microwatts, the Barber-Colman Micropositioner, a polarized d-c relay, is ideal for use as a differential relay in electronic plate circuits, a null detector in resistance bridge circuits, and an amplifier in photo-electric circuits. Can be operated in excess of 100 cps. This ultra-sensitive relay is widely used in many control applications — in nucleonics, communications, instrumentation, process control, railway signal transmission, and aircraft control and remote positioning. Various types: Octal plug-in; solder lug; hermetically sealed; screw terminal.

compact, powerful d-c motors...up to 1/10 hp.

Looking for a d-c fractional hp motor of unusually high quality, high dependability? Specify Barber-Colman, the *versatile* line of small motors in both permanent magnet and split series types . . . in various mountings and speeds, and outputs up to 1/10 hp. Ideally suited to power electro-mechanical actuators, switches, blowers, and programming devices. Also excellent for use as tachometer generators. Barber-Colman small d-c motors are also available with lightweight radio noise filters to meet radio interference requirements of USAF. Whatever your problem involving d-c motors, consult Barber-Colman Company for an expert solution.

high torque shaded pole a-c motors . . . up to 1/20 hp.

Barber-Colman shaded pole induction motors are available in unidirectional, reversible, and synchronous types up to 1/20 horsepower with or without reduction gearing. Unidirectional motors are designed for long life and dependable service driving cooling fans and blowers for electronic equipment and powering office machines and other industrial equipment. Reversible motors are ideal for follow-up and positioning mechanisms and are easily adapted for control by electronic circuits. Synchronous motors combine accurate timing and high torque with small dimensions and light weight. Geared-head motors are available with hundreds of reductions, open or enclosed, to fit a wide range of applications. Barber-Colman engineers will be glad to help select the right motor for your application.

FERRISTORS* for Magnetic Amplifier and Counter Circuitry

FERRISTORS® are reliable, light weight, low-power replacements for tubes consisting of simple wire-wound coils on ferro-magnetic cores, and encapsulated in epoxy resin. They are immune to damage by shock, vibration, overload, humidity or temperature, and are ideally suited for industrial electronics where long-term reliability is an important factor.

In BERKELEY's new line of long life counter-controllers, FERRISTORS® are used to perform all the functions of vacuum tubes in input amplifier, gate, time base, decimal counting unit, coincidence amplifier and control circuitry. Complete technical data and prices will gladly be supplied on request.

Compact FERRISTOR* is encapsulated in 9/16" cube, with 4 pigtail leads.

MAGNETIC Decimal Counting Units

Models 716-717 Magnetic DCU measure only 1 7/8" x 5 1/2" x 3 1/2". Model 716 has 10,000 cps max. counting rate; Model 717, 40,000 cps. Price (either model), \$110.00.

Model 736 Dual Preset Magnetic DCU produces output signal at any two pre-settable counts, handles up to 10,000 cps. Measures 1 7/8" x 5 1/2" x 3 1/2". Price, \$130.00.

Magnetic DCU's are capable of counting up to 40,000 pulses a second. Units may be cascaded indefinitely to achieve a counter of any capacity. Each DCU counts from 0 to 9, presenting an illuminated reading on the front panel.

Elimination of vacuum tubes permits an overall size reduction of up to 32% and a weight reduction of up to 59% over other units. Illustrated magnetic DCU's are plug-in units fitting standard octal sockets. Lower heat generation resulting from decreased power requirements permits more compact assembly than vacuum tube types.

VACUUM TUBE Decimal Counting Units

All DCU's are designed for a four-line binary coded output to drive Berkeley digital printers, remote in-line readouts, or data converters. Counts are displayed in digital form on the illuminated front panel; units may be cascaded to provide any desired total count capacity, and plug into standard sockets.

Model 705AH—100 kc max. count rate. Price, \$33.00.

Model 707AH—1 mc max. count rate. Price, \$95.00.

Model 711AH—2 mc max. count rate. Price, \$110.00. Designed to drive 713AH (200 kc count rate, \$75.00) which in turn drives the 705AH.

VACUUM TUBE Preset Decimal Counting Units

Model 730A Single Preset DCU produces output pulse at any single preset count. Price, \$65.00.

Model 732A Dual Preset DCU produces output pulses at any two preset counts. Price, \$75.00.

Berkeley Single and Dual Preset Counters count and display information at rates to 40,000 cps, and produce output pulses at any preset total count (Model 730A) or any two preset counts (Model 732). Output pulses will operate relays, audible or visual signals, solenoids, etc.

*Trademark

PRESET COUNTER-CONTROLLERS

Count at rates to 40,000 cps, produce output signals at any desired preset total (or any two preset counts with dual preset models). Operate on input pulse of ± 1 volt peak, or more. Instantaneous reset to zero after final count. Reliable, simple to operate. Available in 2,3,4,5 and 6-digit capacities. Long-life magnetic Model 5840 dual preset features FERRISTOR* circuitry for continuous-duty reliability.

Series 5420 single preset models range in price from \$435.00 for 2-digit capacity to \$740.00 for 6-digit capacity. Dual preset Series 5440 range from \$560.00 (2-digit) to \$840.00 (6-digit).

Series 5840 long-life magnetic dual preset counter features FERRISTORized* circuitry; 6-digit, Model 5846, \$1,295.00.

TIME INTERVAL METERS

Model 7250 Berkeley Time Interval Meters provide a direct, digital reading of elapsed time between any two events, or the duration of a single event, in microsecond (Model 7260) or 10-microsecond increments.

Any occurrences that can be changed to varying voltages may be so timed. Both models may be standardized against WWV or other external standards, and have connections for driving digital printers or data converters. Provisions are also made to measure period of input signals or use as a high-speed electronic counter or frequency ratio meter.

APPLICATIONS

Timing of relays, shutters, solenoids, controls; ballistics research; measurement of viscosity; elasticity, velocity; accurate low frequency and period measurements; calibration of pulse generators, precision phase measurements, frequency ratio measurements, etc.

BRIEF SPECIFICATIONS	Model 7250	Model 7260
Range:	10 μ sec to 1 sec	1 μ sec to 1 sec
Accuracy:	$\pm 10 \mu$ sec, ± 1 part in 10^5	$\pm 1 \mu$ sec, ± 1 part in 10^6
Input Requirements:	0.1 v rms, 10 megohms, ac or dc-coupled	
Display Time:	Adjustable, 0.1 to 5 seconds (automatic reset) Manual reset also provided.	
Price: (f.o.b. factory)	\$595.00	\$830.00

EPUT* (Events-Per-Unit-Time) METERS

APPLICATIONS

Precision tachometry; measurement of pressure, flow, temperature, viscosity, velocity, frequency, frequency period; process control or data reduction systems; calibration of frequency generating equipment; measurement of any electrical, mechanical, optical or other physical event occurring during a precise time interval.

Berkeley EPUT* Meters automatically count and display the number of events that occur during a precise time interval. Events may be any physical occurrences that can be represented by changing voltages occurring either regularly or at random at rates to 1,000,000 per second, depending on model.

7000 Series units may be used to measure frequency or period, and also as high speed electronic counters with manual on-off control.

Model 7650 Long-Life Magnetic EPUT* Meter

BRIEF SPECIFICATIONS

	Model 7150	Model 7160	Model 7650
Count Capacity:	5 digits	6 digits	5 digits
Count Rate:	0 cps to 100 kc	0 cps to 1 mc	0-40,000 cps
Time Bases: (decade steps)	10 μ sec to 1 sec	1 μ sec to 1 sec	0.1 to 10 sec
Price:	\$775.00	\$995.00	\$1,495.00

Performs the same function as models described above. Employs Berkeley FERRISTORS* in all critical circuits to assure continuous-duty reliability. Ideally suited to industrial test applications such as jet and piston-engine test cells, etc. Has digital "count-down" time base for precise gating; no adjustment of time base required.

*Trademark

MODELS 7250 and 7260 UNIVERSAL EPUT* METERS

APPLICATIONS

Counting, time interval, EPUT* measurements for precision tachometry, measurement of pressure, flow, frequency, velocity, viscosity, elasticity; timing relay, shutter action, etc.

Measurement of unknown frequencies, frequency ratios, periods, etc.

BRIEF SPECIFICATIONS

	Model 7350	Model 7360
Ranges-Frequency:	0 cps to 100 kc	0 cps to 1 mc
Time Interval:	10 μ sec to 10 ⁶ sec	1 μ sec to 10 ⁷ sec
Period:	0 cps to 100 kc	0 cps to 1 mc
Time Bases:	10 μ sec to 10 sec	1 μ sec to 10 sec
Price:	\$890.00	\$1,175.00

These truly universal instruments combine high-speed electronic counting with a precision time base in multi-purpose circuitry. They function as counters, timers, time-interval meters, EPUT* meters, frequency, frequency ratio or period meters, or as secondary frequency standards.

Frequency Meters and Frequency Measurement Systems

Basic instrument is the Model 5571, capable of measuring frequencies from 0 cps to 42 mc. Addition of the Model 5580 UHF-VHF converter and suitable plug-ins extends the range to 515 mc; Model 5582B VHF converter with plug-ins extends the range to 1,000 mc. Results are displayed in direct-reading digital form. Unit will drive a Model 1452 digital printer to provide a complete frequency logging system in which results are printed on standard adding machine tape. Model 5571 is also a Universal EPUT* and Timer with same specifications as Model 7360.

Model 5571 with 5580 converter and 5580 series plug-ins for frequencies to 515 mc. Model 5571 price, \$1,745.00. Model 5580 converter, \$300.00; 5581 series plug-ins, \$100 to \$150.00 each. All are FCC-approved.

Complete frequency logging system for frequencies to 1,000 mc. Model 5571 (with 5582B converter and plug-ins), drives Model 1452 digital printer to record results automatically on adding machine tape; 5590 WWV receiver and 5585 2 to 42 mc Selective Amplifier also shown.

BERKELEY DOUBLE PULSE GENERATORS

Produce paired or single pulses. Pulse amplitude, width, polarity, repetition rate and pulse-to-pulse spacing are independently adjustable. Outputs may be mixed internally or externally. Model 903 (\$440.00) can be driven externally by pulses; Model 4904 (\$595.00) by pulses or sine wave generators.

BERKELEY TEST ACCESSORIES

TACHOMETER PICKUPS

Consist of magnetic pickup and toothed tachometer gear (number of teeth optional). Offered in 3 types, also explosion proof. Photo-cell pickups and light sources also available.

MODEL 1452 DIGITAL PRINTER

Connects directly to any Berkeley 5510, 5571 or 7000 Series instrument, prints data in digital form on standard adding machine tape. May be modified to print "Time" or "Code" information simultaneously with data. Rack mounted; available in up to 8 digits. Price (6 digit), \$850.00.

MODEL 5916 IN-LINE READOUT

Large, illuminated in-line IN-PLANE figures reduce fatigue and error. Ideal for remote observation of data. Connects directly to any Berkeley 5510, 5571 or 7000 Series instrument. Price (6 digit) \$775.00.

*Trademark

FIELDS OF ACTIVE PARTICIPATION

1. High speed, high accuracy analog-to-digital and digital-to-analog conversion
2. Digital timing and recording systems
3. Automatic logging systems (static or dynamic)
4. High speed telemetered data handling
5. Industrial tachometry-fuel flow measuring and recording systems
6. Complete closed loop analog control systems
7. Industrial batching-sorting control systems
8. Automatic nuclear sampling and recording systems
9. Special-purpose digital computers
10. General-purpose data handling and data reduction systems
11. Machine tool control

Telemetered Data Handling Systems

Among recent systems developed by Berkeley is one capable of high speed measurement and recording of FM and FM-commutated data. Analog data represented by a frequency-modulated signal is continuously decommutated, measured, operated on, and the corrected data presented at the output in both digital and analog form. Features include:

1. Compensation for tape wow and flutter
2. Compensation for transducer drifts
3. Accuracy to $\pm 0.1\%$
4. High speed digital computation

Other systems can be provided for pulse code telemetering, featuring an airborne electronic commutator, a reliable airborne magnetic analog-to-digital converter, and on-line computation of data on the ground.

Standard component blocks have also been developed for use in telemetering systems handling Pulse-Width and Pulse-Amplitude modulated signals.

Typical Systems

1. Steel mill counter-controller. Counts, stocks, batches and records steel sheets. Eliminates costly give-away.
2. Jet engine tachometer controller. Measures high rotational speeds to an accuracy of 0.001%.
3. Tape-data-to-punch-card system. Reduces multiple channels of magnetic tape data to punch cards; does in 30 minutes a task that formerly required 80 hours.

Model 5692 Digital Flow Indicator

Automatic Logging Systems

Berkeley division has long been actively engaged in the investigation and manufacture of complete data handling systems. The approach used is to accumulate standard blocks which can be assembled into a complete system to meet individual customer requirements.

Both dynamic and static logging systems can be provided for the sampling and recording of temperature, pressure, RPM, fuel flow, position and other analog quantities. Speed of sampling may range from 1 sample per second to 40,000 samples per second with accuracies to $\pm 0.1\%$. Inputs can be from thermocouples, strain gages, or digital transducers.

Typical systems include either mechanical or electronic commutator, analog to digital converter, programmer, output storage unit and recording device.

Timing and Recording Systems

With the use of modified digital time interval meters and digital recorders, as manufactured by Berkeley division, complete industrial timing and recording systems can be manufactured to meet individual requirements.

Timing accuracies to $\pm .1$ microsecond can be provided with recordings on standard adding machine tape, paper punched tape, magnetic tape, IBM cards, typewriter, teletype machine, by the use of Berkeley data reduction converters which operate with all Berkeley instruments.

Model 5692 Digital Flow Indicator provides four-digit presentation, reading directly in pounds or gallons per hour either as a flow indicator or totalizing meter. Works with any digital flow meter.

Automatic Nuclear Sample Counter automatically counts and records data on printed tape; handles up to 250 samples. Berkeley's complete line of Nuclear instruments includes decimal scalars, count rate meters, scintillation counting systems.

BERKELEY EASE* COMPUTERS

New EASE* 1200 Series Analog Computers

The EASE* 1200 series represents maximum convenience and accuracy in large scale analog computers, including completely automatic and/or remote control of all attenuator settings by a serial type keyboard and/or punched tape input. In the EASE* 1200, the user finds tomorrow's computer today.

The patch bay system is all new, featuring complete shielding and insulation to eliminate accidental shorting of patch cords. The patch bay has sufficient capacity (3600 terminals) to interconnect more than:

- 100 dc amplifiers
- 16 servos
- 350 keyboard-controlled attenuators
- 30 electronic multipliers
- 250 spare terminals
- Adequate trunk lines and terminals for limiters, biases, etc.

Features That Set Tomorrow's Standards Today

1. High accuracy and stability
2. Complete keyboard control of all problem parameters including initial conditions and coefficients
3. Automatic punched tape or card attenuator setting
4. Complete and automatic recording of all problem parameters
5. Built-in problem checking system
6. Built-in 6-channel chart recorder
7. Completely shielded patch cord and patch board system
8. "Human engineered" centralized console design
9. Instantaneous and "stored" overload indication
10. Unitized design for complete flexibility and future expansion
11. Modular construction

MEDIUM-PRICED — .05% accuracy; includes pushbutton control unit to handle up to 100 servo-set pots, 50 amplifiers, 16 electronic multipliers. Various combinations of function generators, servo multipliers and special equipment available.

LOW-PRICED — 1% accuracy; as shown includes 10 amplifiers (stabilized or unstabilized), 16 coefficient pots, 10 initial condition voltages for integrators. Model 1031 patch board accommodates up to 42 decade stepping resistors and multiturn pots, 30 amplifiers, for future expansion.

*Trademark

Model 1048 DC Amplifier... a chopper-stabilized operational amplifier with open loop gain in excess of 10^8 and extremely low drift. Adaptable to many computing functions where accuracy and stability are important such as amplification, inversion, addition or integration. These amplifiers have also been used as isolation devices, as highly stable recorder drives, as difference amplifiers, etc.

Model 1056B Electronic Multiplier... a highly stable device with less than 0.2% drift in any 8-hour period, static accuracy of 0.2% of full scale, and frequency response flat within 1/2 db to 500 cps. Useful wherever accurate, fast multiplication of dc voltages is desired at reasonable cost.

Model 1073 Function Generator... a self-contained diode function generator requiring no patching or external connections. Approximates non-linear function by 20 straight-line segments, using locking-type knobs for adjustments, accurate null-reading meters, and precision potentiometer. Can be used for linearizing outputs of transducers or non-linear metering devices, to compensate for non-linear values or transfer characteristics in process control, or for simulating characteristic behaviour of physical systems.

Automatic Setup Function Generator... completely self contained diode function generator; one control unit sets up to 10 function generators automatically. Can be used in combination with a Berkeley servo as a "mapreader" to generate functions of two variables.

Complete technical data price and delivery information on any Berkeley product will gladly be supplied on request. Call your nearest Berkeley representative (listed below), or write us now; please address Dep't G13.

KESTER SOLDERFORMS®

BIG STEP in
Production Cost-Cutting!

You take a giant step forward in lowering assembly costs when you figure Kester Solderforms into your production. Labor costs are reduced, assembly operations speeded up. There's no solder waste, and the end result is a neater, more expertly finished product. If you don't know all about Kester Solderforms and the technique of using pre-formed solder, better write today for complete information.

WHERE TO USE KESTER SOLDERFORMS:

Relays • Transformers • Resistors
TV and Radio Tuners • Capacitors • Switches
Gauges • Small Metal Assemblies and
Controls . . . and so many others

KESTER SOLDER COMPANY

FIXED Composition RESISTORS

In all standard ranges and tolerances for industrial and military uses

The widespread use of Stackpole 1/2-, 1-, and 2-watt fixed composition resistors in much of today's finest equipment clearly attests their dependability. Accurate, stable electrical ratings combined with firmly anchored, readily soldered leads assure maximum reliability and ease of use. Types available to MIL-R-11A Specifications in styles RC20, RC30, RC31, and RC42.

PACKAGED FOR AUTOMATION—All Stackpole resistors are available packaged in strips, stacked layers, or reels to suit your automation program.

NOW AVAILABLE FROM LOCAL PARTS DISTRIBUTORS

Stackpole resistors are stocked by local parts distributors throughout the country. For the name of the distributors nearest you, write: Distributors' Division, Stackpole Carbon Co., 26 Rittenhouse Place, Ardmore, Pennsylvania.

VARIABLE Composition RESISTORS

- Metal or Phenolic Shafts
- Midget types for Transistor Sets
- Lug, Printed-wiring, or Wire-wrap terminals
- Choice of 9 Switch Types

Single, and dual concentric-shaft Stackpole controls are offered in one of the largest selections available today . . . and in the smallest sizes consistent with real dependability.

Write for the new "Quick Guide to Stackpole Variable Resistors" for complete list of types, features, and readily available modifications.

FIXED Composition CAPACITORS

Cost-Saving, Low-Value Types for VHF or UHF
Originated by Stackpole, these tiny capacitors not only represent the simplest, most inexpensive composition capacitor design yet produced—but likewise have characteristics that make them more desirable than larger, higher-priced capacitors for many uses. 47 standard types, 0.1 to 10.0 mmf. Write for full details.

NEW CeraMAGNET[®]

... the low-cost all-ceramic permanent magnet material

By combining the low-cost and light-weight of non-critical ceramic with fully available magnetic energy, exceptional resistance to demagnetization, and almost infinite electrical resistance, Stackpole Ceramagnet opens new engineering possibilities in many fields—mechanical as well as electrical.

Important new developments using this unique new Stackpole permanent magnet material are daily being engineered in television, aviation, automotive, heavy-duty electrical, and allied fields.

A full description of Ceramagnet, with detailed graphs of characteristics is available in Bulletin RC-10A.

TYPICAL CHARACTERISTICS	
Coercive Force	1650 oersteds
Residual Induction	2010 gauss
Energy product	0.915x10 ⁶ gauss-oersteds (Max.)

Electrical Resistance	6x10 ¹⁰ ohm/cm ³ @ 25° C
Linear Temp. Characteristics (including retrace)	to 400° C
Specific Gravity	4.85

IRON CORES

Insert cores

Side-molded Cores

Sleeve Cores

Cup cores

Threaded cores

"EE" CORES . . . STANDARDIZED FOR ECONOMY

Stackpole "EE" Cores meet over 80 percent of all engineering requirements with cost savings up to 300 percent over conventional cores that require set-up charges. More than 18 standard insert and threaded core types are stocked for same-day delivery in any quantity.

"CUSTOM" CORES . . . for special requirements

. . . in practically any desired size, shape, or iron grade and with assured uniformity of both electrical and mechanical characteristics.

Write for data on any type.

Ceramag®

FERROMAGNETIC CORES

High Perm, Low Loss Cores for TV, Radio, and Industrial Electronics

Look to Stackpole Ceramag for the latest cost-saving grades and types that set new higher standards of efficiency in flyback transformers, deflection yokes, width control, and other applications. Regardless of size, shape, grade, or production quantity, Ceramag characteristics are maintained with remarkable uniformity so that each production unit is like the engineering sample.

Write for full details on the latest available grades.

IRON COIL FORMS

Real Space-Savers for High-Q Coils.

Stackpole Coil Forms reduce coil sizes and cut assembly costs through simplified point-to-point wiring with fewer soldered connections. Carefully molded of high resistance powdered iron and with easily soldered leads firmly anchored to the body.

Write for handy chart giving complete specifications on all sizes and grades.

SLIDE & SNAP SWITCHES

. . . for real switch economy and versatility in less space.

Standard Stackpole Slide Switches cover practically every circuit configuration needed for instruments, record players, radios, small motors, appliances, TV, electrical toys and similar uses. Over 15 inexpensive types with AC and/or DC ratings from 0.5 to 15.0 amperes . . . many UL inspected. Stackpole Snap-Switches with outside toggles provide dependable, snap-action switching for a host of applications—from push button tuners, record changers, to other indirectly-operated switching assemblies.

For complete details write for Bulletins RC-10B and RC-10D.

Bomac...

FIRST

in microwave tubes and components

Here are three important reasons why more buyers insist on BOMAC microwave tubes and components: *first*, because every tube, every component is 100% tested for peak performance and maximum uniformity . . . *second*, BOMAC offers a complete line — over 500 microwave tubes and components . . . *third*, BOMAC offers a complete engineering and development service.

Whatever your needs — a single tube, a modification, or a completely new product — BOMAC, one of the nation's largest designers and manufacturers in this highly specialized field, has the men and the means to meet your most exacting requirements.

TR

A type for every known application — all bands — fixed-tuned or tunable — special types: shorted, dual and triple.

ATR

All standard types and many more developed in our laboratories — nearly all fixed-tuned — highly specialized, required: low-Q or high-Q, miniaturized, special shapes and mounts.

PRE-TR

Several L-band and X-band types, fixed-tuned, for operation at power levels of 550 and 3000 KW peak.

SHUTTERS

Bomac was the first to develop shutter tubes and integral TR combinations for continuous crystal protection. Today, the line includes a wide variety of tubes for the C, Ku, K, S and X-bands.

REFERENCE CAVITIES

High precision, fixed-frequency, vacuum-sealed, transmission type for use in pressurized waveguide systems. Temperature compensated to ± 0.3 MC from 0° C to 100° C.

HYDROGEN THYRATRONS

Bomac thyratrons provide the following advantages: — precise triggering — high repetition rates — high power levels — zero bias operation — electrical stability.

SILICON DIODES

The most sensitive, uniform and stable diodes available (JN23D). Also available in matched pairs for X-band and S-band. Can also be supplied as mixer diodes with either normal or reverse polarity.

MAGNETRONS

High frequency, tunable and fixed-tuned magnetrons are a Bomac specialty. Frequencies range from Ku to millimeter bands that are classified. Special types designed to meet your particular requirements.

KLYSTRONS

Bomac klystrons offer maximum performance at high altitudes without pressurization, and can be installed in existing systems without disrupting the associated equipment.

DUPLEXERS

Bomac will design, develop, and produce complete duplexers to customer specifications.

PRESSURIZING WINDOWS

Bomac has windows available for all wave guide sizes, broad band characteristics with low insertion loss, temperature range — 55° C to 100° C and 30 lb./sq. in. gage pressure in either direction.

TRAVELING WAVE AMPLIFIER TUBES

These Bomac tubes are designed to meet conditions where wide band high gain operations are required. Two types are available now — others will be available shortly.

SYSTEMS

Bomac engineers design, manufacture and assemble complete systems for any microwave band to meet your specific requirements.

SURGE PROTECTORS

Bomac surge protectors are hold-off diode tubes. A wide range of breakdown voltages is available: from 100 to 33000. Consult our engineering department for your particular applications.

RCA PROUDLY PRESENTS AN...

OUTSTANDING NEW LINE OF

Now from the RCA Commercial Electronic Products Division, you are offered a line of precision instruments designed to the same exacting standards as the electron microscope, film projectors, television cameras and similar highly precise RCA electronic equipment. Heralding RCA's entry into the field of precision apparatus, these well-built instruments will facilitate the design, development and production of a wide range of complex electronic equipment and systems.

DC NULL VOLTMETER

(TYPE LV-15,
0-100 V)

This DC Voltmeter has the ability to measure DC voltage levels to a much higher order of accuracy than is possible with deflection type instruments. Other outstanding features include high resolution, negligible loading, high sensitivity, wide range and internal calibration.

SPECIFICATIONS

- | | | |
|--|--|--|
| RANGE:
0-100 volts DC, positive or negative grounded. | ABSOLUTE ACCURACY:
0.1% ± 100 microvolts between 0 and 1 volt.
± 1 millivolt between 1 and 100 volts. | INPUT CURRENT:
Less than 10-11 amperes. |
| EFFECTIVE SCALE LENGTH:
114 feet, 30,000 indicating divisions. | LINEARITY:
0.05% on any one range, 0.1% overall. | POWER SUPPLY:
95-135 volts, 60 cycles, 40 watts. |
| RESOLUTION: | TUBES USED:
1—12AT7, 3—12AX7, 1—5879 | DIMENSIONS:
10 3/4" W x 9 3/4" H x 11" D. |
| At least 50 microvolts between 0 and 1 volt.
500 microvolts between 1 and 10 volts.
5 millivolts between 10 and 100 volts. | | |

STANDARD SIGNAL GENERATOR

(TYPE LG-21,
50 KC TO 50 MC)

This Standard Signal Generator is designed for broad application and consists of an RF oscillator, a buffer modulator, an AF oscillator, an attenuator, a diode voltmeter, a multivibrator, and a stabilized power supply. Features internal or external modulation, adjustable modulation depth, variable metered output. Choice of modulated RF CW or audio through output attenuator.

SPECIFICATIONS

- | | | |
|--|--|--|
| FREQUENCY RANGE:
50 KC to 50 MC in six direct reading ranges (plus one range spread IF 420 to 500 KC). | AF FREQUENCY ACCURACY:
± 5%. | METER ACCURACY:
± 5%. |
| READING ACCURACY:
1% to 15 MC (correction chart for the range 15 to 50 MC). | MODULATION DEPTH:
Adjustable from 0 to 80% (± 5% accuracy). Also external modulation. | STRAY RADIATION:
Negligible. |
| RF OUTPUT LEVEL:
0.3 μv to 0.1 V variable. 1 V at separate connector. | AF OUTPUT LEVEL:
3 μv to 10 V. | POWER SUPPLY:
115 V, 50-60 cps. |
| AF MODULATION FREQUENCIES:
60—150—400—1000—1500—3000 cps. | ATTENUATOR ACCURACY:
± 5% from 50 KC to 6 MC; ± 10% from 6 MC to 20 MC; ± 20% from 20 MC to 50 MC. | TUBES USED:
3—6J5, 2—EL3N, 1—5Z4, 1—Ballast tube 25/75 V, 0.5 A. |
| | | WEIGHT:
50 lbs., 9 ozs. |
| | | DIMENSIONS:
21 x 12 3/4 x 9 3/4 inches. |

**INSTRUMENTS
OF
LABORATORY
PRECISION**

Get all the facts about this outstanding new line of RCA precision apparatus, available from leading representatives throughout the United States. Write for the name of the representative nearest you. Address Radio Corporation of America, Precision Electronic Instruments, Department F-46, Building 15-1, Camden, New Jersey.

PRECISION INSTRUMENTS

Effective for the design, development and testing of radar, computers, fire control systems, radio and television receivers, communications and sound equipment, the instruments provide a high degree of precision measurement and accuracy. Many feature characteristics that are completely new in their field. We take genuine pride in offering them to you.

BACKED BY THE RCA REPUTATION FOR ENGINEERING EXCELLENCE

VACUUM TUBE VOLTMETER

(TYPE LV-10)

This is an extremely versatile instrument, combining an AC voltmeter covering a range from audio to UHF frequencies, a DC voltmeter with 100 megohms input resistance, and an ohmmeter capable of measuring resistance from zero to 1,000 megohms. Features high stability, specially balanced and rugged meter movement. Accessories include both DC and AC Probes and Adapters.

SPECIFICATIONS

DC VOLTS:
7 ranges: 1.6, 5, 16, 50, 160, 500, 1600.
Accuracy: $\pm 3\%$ full scale deflection.
Input resistance: 100 megohms $\pm 2\%$ on all ranges.

AC VOLTS:
5 ranges: 1.6, 5, 16, 50, 160.
Accuracy: $\pm 3\%$ full scale deflection.
Input impedance: equivalent to 2.2 mmf in parallel with 15 megohms.
Frequency response: ± 0.1 db near 20 cps to 500 MC.
Relative measurements: possible to 1000 MC.

DECIBELS:
Scale -4 to +6 db.
10 db between consecutive ranges.
Accuracy: ± 1 db.
0 db = 0.775 V (1 mW in 600 ohms).
RESISTANCES:
7 ranges: 1 K ohm—10 K ohms—100 K ohms—1 M ohm—10 M ohms—100 M ohms—1000 M ohms.
Mid-scale readings: 20 ohms—200 ohms—2 K ohms—20 K ohms—200 K ohms—2 M ohms—20 M ohms.
Accuracy: $\pm 5\%$ between divisions 10 and 100 on the scale.

STABILITY:
Ranges 1.6 V AC and DC, $\pm 1\%$ for 15% power supply variation. On other ranges, variation is negligible.

POWER SUPPLY:
115 V, 50-60 cps, 12 VA.

TUBES USED:
1—12AX7, 2—6DN2, 1—6X4.

DIMENSIONS:
Case: $12\frac{3}{4}''$ H x $7\frac{1}{2}''$ W x $5\frac{1}{4}''$ D.
AC Probe: diam. $1\frac{1}{4}''$, length 4".

WEIGHT:
13 lbs.

RF POWER METER

(TYPE LP-91, 1000 MC to 10,000 MC)

(TYPE LP-90 SIMILAR TO LDP-91 EXCEPT COVERS RANGE FROM 20 MC to 1000 MC)

This rugged Power Meter consists of an RF power bridge and a complete set of calibrated RF accessories which are mounted in the instrument cover and provide both high and low power ranges. Features high reliability, direct reading and CW or pulse power measurements from 1000 MC to 10,000 MC.

SPECIFICATIONS

POWER RANGE:
5 Microwatts to 5 Watts.

MODULATION ENVELOPE:
Pulse through CW.

FREQUENCY RANGE:
1,000 MC to 10,000 MC.

ACCURACY:
5% under all operating conditions.

COMPENSATION:
Automatic for all frequency and temperature variations.

INDICATION:
Direct reading, average RF power.

BOLOMETERS:
Both high power and high sensitivity types.

POWER SUPPLY:
Fully regulated for $\pm 10\%$ change in 115 volt, 50-1,000 cps line voltage.

RF PLUMBING:
 $\frac{3}{8}$ Inch coaxial, 50-ohm.

VSWR:
Less than 1.30, all RF components.

TEMPERATURE RANGE:
From -40° C. to $+55^{\circ}$ C.

CONSTRUCTION:
Rugged, meets all MIL requirements.

ACCESSORIES:
2—3 db calibrated Attenuator ($\frac{3}{8}''$ coaxial).
2—7 db calibrated Attenuator ($\frac{3}{8}''$ coaxial).
1—Bolometer Mount.
2—High Sensitivity Bolometer Element.
2—High Power Bolometer Element.
1—Calibrated RF Cable.
1—Calibration Chart.

TUBES USED:
1—5Y3GT, 1—6AS7G, 1—6AU6, 2—5651

NET WEIGHT:
45 lbs.
SHIPPING WEIGHT:
60 lbs.

COMMERCIAL ELECTRONIC PRODUCTS

CAMDEN, N. J.

5 Simmons Fasteners offer

Economy • Quick installation • Flexibility of design •

Whatever your application, Simmons Fasteners will fill your needs. Leading manufacturers are using Simmons Fasteners with perfect results in a wide range of products.

QUICK-LOCK

Millions in use on weather-tight lighting units, battery chargers, truck heaters, engine cowlings, access panels and doors, radio equipment covers, gas tank covers, map and data cases, transmitter cases, voltage regulators...

Easy to install, QUICK-LOCK is ideal for assembling removable panels and access doors. A 90° turn locks it in place. Stud is self-ejecting when unlocked; visual inspection shows whether fastener is locked. Spring loading takes initial load; solid supports carry increased load. Available in various sizes with choice of stud and receptacle types.

SPRING-LOCK

The perfect, proved fastener in such applications as removable covers and panels on electric and electronic equipment, railroad locomotives and diesels, all sheet-metal automobile parts, shipboard equipment, home appliances...

SPRING-LOCK, one-piece fastener for blind holes, has load-carrying steel spring wire. Spring steel arms lock it securely, prevent loosening under vibration. SPRING-LOCK is self-adjusting for various material thickness, locks with a twist of the wrist.

Plastic SPRING-LOCK Shelf Supports, with the strong "heart of steel," are available in your specified color...used by all major appliance manufacturers to cut costs, speed production, simplify servicing in refrigerators, ranges. Custom molded to your design requirements.

ROTO-LOCK

Ideal for portable Arctic region shelters, partitions, cabinets, built-ins of all kinds, desks, tables and other demountable furniture, knock-down shipping boxes, demountable refrigeration units, caskets, point-of-sale display assemblies...

ROTO-LOCK makes butt or right-angle joints easily. Tapered cam design permits secure locking even in misaligned or semi-open position. Carries heavy tension and shear loads; can be used for air and water-tight seals. Solidly built without springs or delicate mechanical parts; unaffected by sub-zero temperatures.

you every advantage...

Strength • Positive locking • Smooth fastening action

LINK-LOCK

Available in 3 sizes—heavy, medium, light duty. The perfect latching device where positive or heavy locking pressures are necessary, and where lock will have to withstand rough service. Proved in portable aircraft hangar construction, containers, military transit cases, instrument cases...

The springless latching device for use wherever pre-loaded closure is required. (Also spring-loaded. See below.) Impact and drop-resistant, LINK-LOCK provides heavy fastening pressure and high load-carrying capacity. Excellent for water and pressure-tight sealing. Withstands 70-below temperatures.

New! Spring-Loaded LINK-LOCK...medium and heavy duty...ideal for less expensive containers where costs won't permit precision production. Spring provides take-up to compensate for set in gasketing, irregularities of sealing surfaces.

DUAL-LOCK

An absolutely vibration-proof, impact-proof high-load fastener that will not accidentally unlock or loosen...ideally suited for demountable structures, guided missile assemblies, shipping containers, aircraft cowlings and sheet metal guards, and all butt-joint fastening...

Double-acting take-up in DUAL-LOCK insures heavy closing pressure with minimum pressure on operating tool. Trigger action of DUAL-LOCK assures full open and closed positions. Can be recessed in panels or surface mounted. Withstands 7000-lb. tension, and can be readily modified for light load applications.

Send today for your copy of the 40-page Simmons Fastener catalog, which gives specifications, applications, installation instructions. Samples of all Simmons Fasteners are available.

**WORLD'S LARGEST MANUFACTURER
OF ELECTRONIC COMPONENTS**

STANDARD TUNERS have been used in more than 19,000,000 TV receivers and designs contributed by STANDARD to the industry have been used for many millions more. STANDARD has not only a tremendous engineering department for production and development but also one of private industry's largest pure research engineering staffs for electronics. Only recently STANDARD at symposiums attended by all major TV manufacturers exposed the results of several intensive years of color TV research—results which will reduce by several years the time required for the development of practical color TV.

S-14-C

S-4-C

S-5-C

S-14-B

S-15-A

S-14-C COMPUTER POKETSCOPE is a portable oscilloscope, especially designed for computers and business machine service. Lightweight and small size together with simplicity of operation makes this instrument IDEAL for field servicing. In addition . . . signal amplifier with $0.35 \mu\text{s}$ pulse rise from dc, with signals of 1 mv observable . . . calibrated fixed sweeps and continuously adjustable linear time base from 20 μs to 2 seconds . . . 5x stable time base expansion with complete parading for accurate pulse position . . . sync limiting . . . special intensification circuits permits observation of pulses shorter than 10 μs at repetition rates slower than 1 pps . . . accessory attenuating and amplifying probes . . . make this instrument a MUST for computer type service.

S-4-C SAR PULSESOPES are improved JANized equivalents to the Gov't Model AN/USM-25. These portable instruments (only 31.5 lbs. each) are for precision pulse time measurements in radar, TV and all electronics equipment. Portray all attributes of the pulse . . . internal crystal controlled markers of 10 and 50 μs available for self-calibration . . . in R operation a small segment of the A sweep is expandable for detailed observation with a direct-reading calibrated dial accurate to 0.1%. Video amplifier band-pass up to 11 mc . . . optional video delay 0.55 μs . . . pulse rise time better than 0.05 μs . . . R pedestal (sweep) 2.4 to 24 μs . . . video sensitivity of 0.1 v rms/in. Easily convertible from μs to yards. Operates from 50 to 400 cycles at 115 volts.

S-5-C LAB PULSESOPES are JANized equivalents to the Gov't Model AN/USM-24C. These portable, AC, wide band-pass laboratory oscilloscopes are ideal for pulse as well as general purpose measurements. Internal delay of 0.55 μs permits observation of pulse leading edge. Includes precision amplitude calibration, 10X sweep expansion, internal trace intensity time markers, internal trigger generators and many other features. Video amplifier .06 v RMS/inch . . . pulse rise time of 0.07 μs or response to 11 mc . . . 5 to 50,000 μs /in. triggered or repetitive sweep . . . internally generated markers from 0.2 to 500 μs . . . trigger generator from 50 to 5000 pps. for internal and external triggering. Operates from 50 to 400 cycles at 115 volts AC.

S-11-A INDUSTRIAL POKETSCOPE is a small, compact, and lightweight instrument for observing electrical circuit phenomena. The flexibility of the POKETSCOPE permits its use for ac measurements as well as for dc. The vertical and horizontal amplifiers are capable of reproducing within—2 db from dc to 200 kc with a sensitivity of 0.1 v rms/in. . . repetitive time base from 3 cycles to 50 kc continuously variable throughout its range . . . variations of input impedance, line voltage or controls do not "bounce" the signal—the scope stabilizes immediately.

S-14-A HI-GAIN POKETSCOPE provides the optimum in oscilloscope flexibility for analysis of low-level electrical impulses. Vertical and horizontal channels: 10 mv rms/inch with response within—2 db from dc to 200 kc and pulse rise of 1.8 μs . . . non-frequency discriminating attenuators and gain controls with internal calibration of trace amplitude . . . repetitive or trigger time base with linearization from 1/2 cycle to 50 kc with \pm sync or trigger.

S-14-B WIDE BAND POKETSCOPE is ideal for investigations of transient signals, dc signals, aperiodic pulses or recurrent waveforms. Vertical channel: 50 mv rms/in. within—2 db from dc to 700 kc . . . pulse rise time of 0.35 μs . Horizontal channel: 0.15 v rms/in. within—2 db from dc to 200 kc . . . pulse rise of 1.8 μs . Attenuators and gain controls are non-frequency discriminating . . . trace amplitude calibration . . . repetitive or triggered time base from 1/2 cycle to 50 kc . . . \pm sync or trigger . . . trace expansion, filter graph screen and many other features.

S-15-A POKETSCOPE is a portable, twin tube, high sensitivity oscilloscope with two independent vertical as well as horizontal channels. It is indispensable for investigation of electronic circuits in industry, school and laboratory. Vertical channels 10 mv rms/in. with response within—2 db from dc to 200 kc and pulse rise time of 1.8 μs . . . horizontal channels 1 v rms/in. within—2 db from dc to 150 kc . . . non-frequency discriminating controls . . . internal signal amplitude calibration . . . linear time base from 1/2 cycle to 50 kc, triggered or repetitive, for both horizontal channels.

S-12-B RAKSCOPE admirably fills the need for a small oscilloscope of wide versatility. With all the features of the S-11-A POKETSCOPE, the RAKSCOPE is JANized (Gov't Model No. OS-11), and has many additional advantages; the sweep, from 5 cycles to 50 kc, is either repetitive or triggered . . . vertical and horizontal amplifiers are 50 mv rms/inch with band-pass from 0 to 200 kc . . . special phasing circuitry for frequency comparison.

RAYONIC TUBES®

SYSTEMS CONCEPT

RAKSCOPE S-12-C

The Waterman SYSTEMS RAKSCOPE, S-12-C series is a rack mounted oscilloscope with SYSTEMS CONCEPT. Systems concept is a basic means for rapid monitoring of desired signals with minimum operative effort and without the use of auxiliary switching or jack panels. S-12-C series provide the following:

1. BASIC UNIT—The basic S-12-C SYSTEMS RAKSCOPE is a complete combination systems monitoring and trouble-shooting oscilloscope with outstanding physical and electrical characteristics. The RAKSCOPE occupies but 7 inches of a standard 19" rack and extends only 10 inches behind the front panel. Identical vertical and horizontal amplifiers are DC type having rise times better than 0.35 usec, and 50 or 71 millivolts rms per inch of deflection respectively. Signal calibration method uses a direct reading accurate meter. Time base sweeps are from 1/2 cps to 50KC in trigger or repetitive operation. Sync from internal or external sources provide stable operation by means of new sync lockout circuits. Special plug-in elliptical sweep circuit for easy phase and frequency checks greatly increase its systems utility. Construction is ruggedized throughout. Tube type options include standard commercial, ruggedized commercial or ruggedized military. Operable from 50 to 400 cycles.

2. CUSTOM MODIFICATION—Desired flexibility is obtained with the optional signal input selector. For the first time it is possible to select up to eleven different signal sources with the necessary built-in attenuation (supplied by us or by you) for each source. Thus the entire switching panel can be omitted from an overall system resulting in circuit and space economics. Standard elliptical sweep is 60 cycles, but plug-in units for other frequencies can be supplied. Accessories such as attenuating, direct, and amplifying probes are available.

Improve your existing or contemplated systems by including the S-12-C SYSTEMS RAKSCOPE as an integral part. Your local Waterman representative is ready to assist you in determining specific requirements.

PANELSCOPE®

The Waterman PANELSCOPE is a custom-built cathode ray tube oscilloscope, with simplified operation, and yet available at a low price. The PANELSCOPE concept provides for the following:

(1) MINIATURIZATION—Panel space required is only 5 1/4" x 5-3/16"—depth is 10" and the weight is less than 7 lbs. The PANELSCOPE can be installed in practically any equipment—mobile or stationary—air, sea, or land—military or commercial.

(2) SIMPLICITY OF OPERATION—Twist of a single rotary switch provides a synchronized pattern of desired incoming signal (up to 11 circuits) against proper linear time base. This is ideal for monitoring and trouble shooting, as it removes the need of fiddling with knobs as is done now on general purpose oscilloscopes. The static controls, such as beam, focus, positioning, and graticule brightness are located in tube escutcheon.

(3) CUSTOM DESIGN—A wide variety of—signal amplifiers with response from dc to megacycles and sensitivities from 5 millivolts—synchronized or triggered linear time base generators from 1/2 cycle (and lower if need be) to 2 microseconds—can be specified by you to fit your needs for particular equipment.

(4) PARTIAL KIT FORM—the PANELSCOPE comes fully wired and tested with chosen signal amplifier, linear time base generator and attendant sync. amplifier. The desired signal attenuators, frequency and amplitude determining components, and method of synchronization can be installed either by us or by you.

(5) POWER REQUIREMENT—Less than 10 watts of line power for built-in high voltage supply—The required B+ and heater current as selected by your requirements. For those cases where B+ and heater power is not available, auxiliary power pack can be supplied.

There is a place in your equipment for Waterman PANELSCOPE, a custom built oscilloscope at production prices, although your needs may be but one or two. Ask for specification sheets either from our representatives or direct from the factory.

RAYONIC CATHODE RAY TUBES BY WATERMAN

TUBE	PHYSICAL DATA		STATIC VOLTAGE		DEFLECTION*		LIGHT OUTPUT**
	FACE	LENGTH	A3	A2	VERT	HOR	
3JP1	3"	10"	3000	1500	111	150	40

Your selection of electronic cables can be made easier . . . if you rely on sound engineering and manufacturing experience.

Rome Cable, for years, has specialized in the design and manufacture of multiple conductor cables for electronic, telemetering, control, signal and communication circuits. Cables illustrated above are only typical of Rome's manufacturing possibilities. Variations in construction details can run, literally, into the hundreds. The size and arrangement of the conductor assembly, its type of insulation and electrostatic shieldings, and its outer sheaths or coverings can be supplied to your specification and as best fits your particular problem.

Rome Cable during the last 20 years has manufactured millions of feet of especially designed cables for electronic and communication uses, both commercial and military. Its research and engineering staffs are well trained; its manufacturing and test facilities are of latest design.

That is why we say, again, that your selection of electronic cables can be easier . . . when you rely upon an experienced and fully equipped manufacturer.

Our Engineering Department will be most happy to study your specific requirements. Send today for descriptive literature. Ask for Bulletin TR-5.

Multiple Conductor Cables. Multiple conductor cables are invariably made to customer specification to meet specialized application requirements. Therefore, Rome's ability to manufacture a wide variety of constructions is important.

Conductors can be solid or stranded in the normal range of sizes.

Insulations can be of rubber, polyvinyl chloride (Rome Synthanol and Rome Synthanol 901) or polyethylene (RoLene).

Cable assembly can be supplied to specification with regard to direction of lay, grouping of conductors, polarity identification and type of fillers.

Polarity identification is available by means of solid colored compounds, printing of spiral stripes or colored braids with tracer threads.

Electrostatic shieldings are usually braided copper or metallic tapes.

Protective sheaths can be rubber, neoprene (RoPrene), nylon (RoLon), polyvinyl chloride (Rome Synthanol), polyethylene (RoLene) or fibrous braids.

High-frequency Coaxial Cable. Rome Cable is approved by the Armed Services Electro Standards Agency (ASESA) to supply high-frequency solid dielectric coaxial cables (RG-8/U, RG-11/U, RG-58/U, RG-59/U), manufactured in accordance with Military Specification Jan-C-17A.

Commercial Type Hook-up Wires. Rome Hi-temp rubber insulation, UL approved for 75° C. Rome Synthanol-thermoplastic, resistant to heat, moisture, corrosion, oils, UL approved for 90° C. Rome Synthanol 901—extreme resistance to heat deformation, shrinkage, cracking, UL approved for 105° C.

Military Type Hook-up Wires. Rome manufactures military types SRIR, SRHV and WL, complying with JAN-C-76, Joint Army and Navy Specification. Also shipboard types SRI and SRIB conforming to Specification MIL-C-915 A (SHIPS). Full range of sizes.

CINCH -- THE STANDARD COMPONENT ... SOCKETS -- CONNECTORS ...

STANDARD SOCKETS:

CINCH automatically assembled parts assure the uniformity and quality mandatory for use in AUTOMATION in the end user's equipment.

CINCH SOCKETS

- Tube (Receiver, Transmitter and Special): Battery, all types
- C-R Tube
- Crystal
- Electrolytic
- Glass Type: 4 to 7 prong laminated
- Infra-red Ray Tube
- High Altitude Airborne Types
- Kinescope: Magnal, Duodecal, Diheptal
- Loktal-Miniature-Multiplug-
Noval-Octal (Molded bakelite, steatite, teflon, Kel-F and laminated)
- Plexicon
- Printed Circuit
- Special Sockets to Specs
- Sub-Miniature: Hearing Aid Types
- TV: 110V Circuit Breakaway
- Vibrator
- Pencil Tube Transistor
- Diode

CINCH-ERIE PLEXICON VACUUM TUBE SOCKETS

With built-in ceramic condensers, Plexicon Tube Sockets, no larger than standard receiver socket, provide the most effective method of by-passing... with condenser close to tube element providing shortest path to the ground... capacity up to 1,000 MMF—the tube element may be coupled or by-passed as desired.

now in universal use, commercial and military types, available in seven pin miniature, nine pin Noval, and Octal.

CINCH MANUFACTURING CORPORATION

1026 South Homan Ave., Chicago 24, Illinois

Subsidiary of United-Carr Fastener Corporation, Cambridge, Mass.

NEW COMPRESSION TYPE CONNECTORS

28, 32, 40, 48 and 52 contacts. Center engaging screw with wing nut or screw driver slot and spring action contacts — permits easy, quick and reliable engagement and dis-engagement. Receptacle side available for pressurized applications.

40 contact connector "A" style for applications where plug is "live voltage" side.

CINCH MICRO CONNECTORS

Available in two styles for alternate applications where either the plug or receptacle side is the "live" voltage side. (Protective Hoods and Cable Clamps Available.) Molded of orlon filled diallyl per MIL-P-14D. Contacts gold plated; other hardware is passivated stainless steel. (Multiple polarization available.)

52 contact connector "B" style for applications where receptacle is "live voltage" side.

BARRIER TYPE TERMINAL STRIPS, PLUGS, SOCKETS, FANNING STRIPS

No. 2-141

No. 2-141-Y

No. 2-141-3/4-W

JONES Barrier Terminal Strips: Increased insulation, better connections. Leakage path is increased—direct shorts from frayed terminal wires prevented by Bakelite barriers placed between terminals. Binder screws and terminals brass, nickel plated. Insulation, black molded Bakelite. Finest construction. Add much to equipment's effect.

JONES

JONES PLUGS AND SOCKETS

Jones 300 Series are small in size with good separation between contacts. Made in two to thirty three contacts. Plugs and sockets are polarized. A popular, inexpensive connector adaptable to a thousand uses. Phosphor bronze "knife switch" socket contacts engage both sides of heavy brass plug contacts for positive connections. Molded Bakelite insulation. Can also be supplied with contacts that will take the Faston or Quick Connect solderless terminals.

Jones 2400 Series are designed for highest electrical and mechanical efficiency. Ideal for Public Address, Radio, Electronic Controls, Vending Machines, or wherever a quality connector is required. Maximum creepage distances between contacts and contact to ground makes this series a must when Underwriter label is required. Made in 2, 4, 6, 8, 10 and 12 contact. Molded Bakelite insulation. Caps are of steel with black wrinkle finish.

Jones 202 Series: Shielded type low loss plugs and sockets for high frequency connections. Ideal for antenna connections, photo-cell work, microphone connections. Phosphor bronze knife-switch type socket contacts engage both sides of flat plug contact—double contact area. Plugs and sockets have molded Bakelite insulation.

JONES FANNING STRIPS

Jones fanning strips simplify connections to the barrier strips. Makes the replacement of units an easy matter and assures correct connections after servicing. Supplied with straight or right angle terminals.

The steadily expanding variety of plugs and sockets produced at the JONES Division has a wide range of the highest quality electrical and mechanical parts to efficiently fill every need.

JONES MEANS PROVEN QUALITY!

Hundreds of standard JONES terminal panels available; complete latest equipment for specials, send your specifications for prompt quotation.

No. 6-172

Jones 172 Series—A miniature barrier strip $\frac{5}{8}$ " wide with terminals mounted on $\frac{1}{4}$ " centers. Screw size: 2-56 x $\frac{1}{4}$ ". Molded Bakelite insulation. Made in one to fourteen contacts. Also supplied in the $\frac{3}{4}$ "W and W types.

No. 6-173

Jones 173 Series—A small single contact barrier strip with terminals mounted on $\frac{5}{8}$ " centers. Made in one to eight contacts. Screw size: 4-40 x $\frac{5}{16}$ ". Molded Bakelite insulation.

The components are shown here for variety, types and uses, and are not necessarily in comparative size.

ETCHED CIRCUITRY AND RELATED ASSEMBLIES

GRAPHIK CIRCUITS

Graphic Circuits Reduce Wiring Costs • Cut Down Assembly Time • Eliminate Errors • Miniaturize • Guarantee Uniformity

RIGHT ANGLE BOARD (Right)

Developed and produced for right angle application. The right angle board accommodates all of the CINCH socket sizes, and can be bonded with epoxy resin or snapped in and retained by newly developed CINCH hardware. All units meet or exceed Military Specifications.

Sockets, terminals and other hardware installed to customer specifications using the latest equipment in automatic assembly.

CINCH EDGE CIRCUIT CONNECTOR

The etched circuit connector provides fast, easy assembly. Does not require precision tolerances on board thickness. Eliminates moisture trap. Allows greater flexibility of configuration. Lower cost.

AUTOMATION: Solderless wrapped connections. CINCH Graphic Circuits is tooled to provide wire wrap terminals on etched circuit boards. Reduction in cost of component assembly is accomplished by speeding up production and the elimination of soldering.

Complete facilities for engineering production design, drafting, artwork, development, prototyping and manufacturing photo-printing, silk screen, etching, machining and punching, fabricating, mechanical assembly, electrical assembly, encapsulating, quality control, and fluoroscopic inspection.

Electronic

WIRES and CABLES

The Symbol of **QUALITY** and **PERFORMANCE**

Staunch allies of Progress from the infancy of Radio to the present era of Television! Typical of today's modern CORNISH Wire Products are:—

MICROPHONE CABLES

Designed for low capacitance, high insulation resistance, low attenuation—in plastic or rubber insulation to stand severe service.

ANTENNA CONTROL CABLES

Made both flat and round, of polyethylene and vinyl plastic in varied range of conductors to meet all installation problems.

T-V LEAD-IN CABLES

Made both flat and hollow, in pure virgin polyethylene to insure best electrical properties and long life in severe operating conditions.

SHIELDED CABLES

When installation conditions dictate, shielded cables are recommended. Made with internal or external shield — 2 and 3 conductors.

INTERCOMMUNICATION CABLES

These quality cables are made in various constructions, utilizing plastic insulation for both conductors and jacket.

CRUCIBLE PERMANENT MAGNETS

**CRUCIBLE
PERMANENT
MAGNETS
PROVIDE
CONSISTENTLY
HIGHER
ENERGY
PRODUCT**

Most Crucible Permanent Magnets are produced to custom specifications. They're sand cast, shell molded or investment cast in any shape, tolerance and finish needed . . . in any size from a fraction of an ounce to several hundred pounds.

However, Crucible does stock, for immediate delivery, permanent magnets in the shapes and sizes most frequently needed for both pilot and full-scale production. These standard items, with their physical and magnetic properties, are listed below.

In each case the sub-grade bearing the letter "B" is the standard for that grade. Thus Alnico VB is standard Alnico V. The other sub-grades are modifications of the standard grade to produce special magnetic characteristics. For additional technical information, call your nearest Crucible representative. Crucible Steel Company of America, Henry W. Oliver Building, Pittsburgh 22, Pa.

PULLING FORCE VS. DISTANCE OF CRUCIBLE HORSESHOE MAGNETS

SPECIAL HORSESHOE MAGNETS OF ALNICO IB AND ALNICO VB

Crucible Magnet Accessories

ELECTRO-MAGNETIC MAGNETIZER

Electromagnetic Magnetizers are general purpose magnetizers for any grade of Alnico ... of any size that will fit given space limitations.

Variation of gap field strength with current and gap length for 50,000 ampere turn magnetizer—Catalog No. MC-124.

Variation of gap field strength with current and gap length for 10,000 ampere turn magnetizer—Catalog No. MC-120.

Catalog No.	Total Ampere Turns	Amperes Drawn by Magnetizer at		G (Inches)	Pole Face diameter (Inches)	L (Inches)	W (Inches)	T (Inches)
		115 Volts DC (Coils in parallel)	230 Volts DC (Coils in series)					
MC-120	10,000	1.8	0.9	0 to 4	2	16%	6	9 $\frac{3}{4}$
MC-124	50,000	14.0	7.0	0 to 8 $\frac{1}{2}$	3	28	10	13 $\frac{3}{4}$
MC-129	125,000	46.0	23.0	0 to 14 $\frac{1}{2}$	4	43%	15	18 $\frac{1}{2}$

PERMANENT-MAGNET MAGNETIZER MA-3364

Permanent-Magnet Magnetizers are suitable for magnetizing small Alnico magnets in the sizes indicated by dimensions A and B.

NOTE: DIMENSIONS (A) & (B) TO VARY IN ACCORDANCE WITH CUSTOMER'S REQUIREMENTS. MAX. VALUE OF (A) = 1 $\frac{1}{2}$ " (B) MAY VARY FROM $\frac{1}{2}$ " TO 1 $\frac{5}{8}$ "

	"Op" Designs	GOOD-ALL ELECTRIC manufactures Types CP04, 05, 08, 09, 10, 11, 53, 54 and 55 in accordance with Specification MIL-C25-A														
		Miniature Designs	Hermetically Sealed	Halowax	100-400V	-55 to +85° C	504G (Circ. 3, Ext. Foil) 505G (Circ. 1, Ext. Foil) 501G (Circ. 3, Tab.) 502G (Circ. 1, Tab.)									

SPECIAL TYPES and VARIATIONS

HIGH VOLTAGE DESIGNS—Good-All Series 5000 capacitor designs are aimed at applications involving voltages from 1500 volts to 10,000 volts. Specialized internal construction, including combinations of dielectrics and impregnants, can provide unusual properties as well as high IR and long life at high temperatures.

TEFLON HIGH TEMPERATURE DESIGNS—Teflon is largely used in applications requiring operation between 150°C and 200°C. Good-All Series 700 capacitors are housed in hermetically sealed metal cases and exhibit unusually high insulation resistance.

POLYSTYRENE HIGH STABILITY DESIGNS—Good-All Series 800 capacitors utilize polystyrene dielectric. Their application lies largely where close tolerance, high leakage resistance and low dielectric absorption are required. External cases vary with individual customer's requirements.

METALLIZED MYLAR SUB-MINIATURE DESIGNS—Metallized Mylar designs are designated as X600. Their principal advantage is in applications requiring extremely small sizes and high insulation resistance. The greatest advantage in size can be secured in units of .1 mfd and above.

MYLAR* DIELECTRIC TYPES

	Case Construction	Good-All Type No.	I.R. at 25° C	Temp. Range	Typical Sizes
Miniature Designs	Impregnated Paper Tube	620M (Ext. Foil) 621M (Tab.)	50,000 megohm-mfd	85° C without derating	620M (200V) .01 223x27/32 .047 363x27/32 .1 363x31/32 .47 450x1 5/8
					Ceramic Tube
	Metal Enclosed (Hermetically Sealed)	612G 613G (Ext. Foil) 614G 615G (Tab.)	50,000 megohm-mfd	85° C without derating	
					"Uncoated" Miniature Designs
High-Temperature Designs	Metal Enclosed (Hermetically Sealed)	616G (Ext. Foil) 617G (Tab.)	50,000 megohm-mfd	125° C without derating

PILOT LIGHTS

perform vital functions...Assure maximum dependability—specify:

THE COMPLETE LINE designed to meet every requirement. *Dialco* offers the most extensive selection of Pilot Lights — from *sub-miniature* types to *giant* units with 1½" lenses. Special features such as MIL spec insulation, water-tightness, special finishes, etc. can be furnished as standard. For NEON lamps, *Dialco* provides Pilot Lights with **built-in resistors** (patent #2,421,321) for operation on 105-125 V, or 210-250V; also simple external resistors for higher voltages.

Every assembly is available complete with lamp: Assure complete satisfaction — let the *Dialco* Engineering Dept. assist in selecting the *right* lamp and *most suitable* pilot light for your needs.

Illustrations approximately actual size.

DISCS tell the story!

In both military and civilian equipment, *Discs* inserted behind lenses can be used to deliver specific messages. A significant safety feature!

Sub-Miniature Units: (A) No. TT-51; No. TT-51A with No. 327 lamp. For edge lighting. Red or other color filters, black top... (B) No. 8-3730-111, for MIL-P-7788 panel... (C) No. 101-3830-951 two-terminal unit with omnidirectional lens... (D) No. 4-1930, light shield... (E) Patented "Press-to-Test" unit with dimming or non-dimming lens cap... (F) No. 8-1930-111, non-dimming... (G) No. 11-1930-111, mechanical dimmer; No. 3-1930-111, polaroid dimmer.
(H) No. 521308-991, for neon lamps, with multi-vue cap... (I) No. 313502-111, a 1" unit with friction cap.

SAMPLES ON REQUEST — at once — no charge

GR Oscillators 2 Cycles to 7425 Mc

Type	Frequency Range	Output	Nominal Load Impedance	Harmonic Distortion	Additional Features
1210-B RC Oscillator, \$165 ★	20 cycles — 0.5 Mc (sine or square waves)	80 mw/7v 40 mw/45v 0-30v, p-p	50Ω 12,500Ω 2,500Ω	<1.5% <2.5% square waves	Multi-purpose lab signal source — converts to Sweep Oscillator with 1210-P1 Discriminator and 908-P Synchronous-Dial Drive.
1301-A Low-Distortion Oscillator, \$505	20-15,000 cycles (27 fixed frequencies)	18 mw/6.6v 100 mw/30v	600Ω balanced or grounded 5000Ω grounded	<0.1%	Drift not greater than 0.02% per hour after first 10 min. — frequency range extends to 2 cycles with 1301-P1 Extension Unit.
1302-A Oscillator, \$450	10-100,000 cycles	40 mw/10v 20 mw/5v 80 mw/20v	600Ω balanced 300Ω grounded 5000Ω grounded	<0.5% <0.5% <1%	Output Voltage Constant ±1.0 db.
1303-A Two-Signal Audio Generator, \$1550	(1) 20-20,000 cycles (2) 20,000-40,000 cycles (3) Two signals separately adjustable (4) Two signals with a fixed difference	Normal-10 mw/5v High-1 w/50v	600Ω grounded	<0.2% <1%	Ideal for intermodulation distortion testing — drift less than 7c in first hour, completed in 2 hrs. — output constant within ±0.3 db.
1304-B Beat-Frequency Oscillator, \$575	20-20,000 cycles 20,000-40,000 cycles	1 w/50v	600Ω balanced or grounded	<1%	Converts to Sweep Oscillator with 908-P — high stability, low hum.
1214-A Unit Oscillator, \$68 ★	400, 1000 cycles (2 fixed frequencies)	200 mw/80v	8000Ω grounded or ungrounded	<3%	Has built-in power supply unlike most Unit Instruments.
1307-A Transistor Oscillator, \$80	400, 1000 cycles (2 fixed frequencies)	6 mw/2v	600Ω	<5%	Battery operated, with output meter — small and compact.
723-C and D Vacuum Tube Forks, \$185 & \$200	400 or 1000 cycles (2 models)	50 mw/31v max.	50, 500, 5000Ω	<0.5%	Frequency accurate to ±0.05% — max. drift 0.2% occurs first 30 min.
1330-A Bridge Oscillator \$540	400 cycles, 1000 cycles 5 kc — 50 Mc	0.75 w/12v 1 w/10v	50Ω 20-80Ω	<3%	Internal 400- and 1000-cycle modulation — excellent shielding for bridge work.
1211-B Unit Oscillator, \$265 ★	0.5-5 Mc 5-50 Mc	2 w 200 mw	50Ω		Compact, inexpensive well-shielded — frequency increments of 0.2% per division.
1215-B Unit Oscillator, \$190 ★	50-250 Mc	80 mw	50Ω		Converted to Sweep Oscillators with unique 1750-A Sweep Drive output regulated with 1263-A Amplitude-Regulating Power Supply.
1208-B Unit Oscillator, \$200 ★	65-500 Mc	100 mw	50Ω		Semi-butterfly tuned circuit with no moving contacts.
1209-B Unit Oscillator, \$235 ★	250-920 Mc	200 mw	50Ω		Very wide range, thorough shielding.
1218-A Unit Oscillator, \$465 ★	900-2000 Mc	200 mw	50Ω		Butterfly circuit avoids untuning difficulties — excellent stability.
1220-A Klystron Oscillator \$205 without tube ★	8 Klystrons available to cover 2700 to 7425 Mc range.	40 mw	50Ω		Audio, pulse, square-wave or frequency modulation from external source.
1217-A Unit Pulser, \$235 ★	30 c — 100 kc (12 fixed frequencies)	20 v	200Ω positive pulses, 1500Ω negative pulses		Compact, low cost microwave source — internal 1-kc square wave modulation; pulse or frequency modulation from external source.
1213-C Time/Frequency Calibrator, \$195 ★	5 Mc crystal provides 10 kc, 100 kc, 1 Mc, 10 Mc fundamentals and harmonics to 1000 Mc	10-30 v, p-p video output	cath. follower approx. 300Ω	Harmonic Spectrum	Rise time, 0.05μs — durations continuously variable 0.2 to 60,000μs.
1390-A Random Noise Generator, \$240	30 cycles — 20 kc 30 cycles — 500 kc 30 cycles — 5 Mc	1v	800Ω grounded	Noise Spectrum	Compact secondary frequency standard — accurate timing source for scope calibration, etc. — stability 1 ppm/°C after 1-hr. warmup.

★ Unit Instruments except 1214-A require Unit Power Supplies
1203-A Unit Power Supply, \$40 — 1201-A Unit Regulated Power Supply, \$30
1202-A Unit Vibrator Power Supply, \$125, for operation from 6v or 12v storage battery

GR Signal Generators

Type	Frequency Range	Output	Characteristics
1001-A \$795	5kc — 50 Mc 8 direct-reading ranges	0.1μv-200 mv; 10Ω jack becomes 50Ω with series unit supplied, 25Ω at end of output cable — 2v at 300Ω from 2nd jack	Incremental dial indicates 0.1% of frequency per division — modulation adjustable 0-80%, indicated on meter; 400c internal or 20-15,000c external am — ±1% calibration, high stability, low drift and negligible leakage and incidental fm.
805-C \$1650	16 kc — 50 Mc 7 direct-reading ranges	Less than 0.1μv to 2 v — 75Ω at panel; 75Ω cable has termination impedance of 37.5, 7.1 and 0.75Ω	Internal and external modulation variable 0 to 100%, indicated on meter — drift less than ±0.1% during 5 hrs. continuous operation — ±1% calibration; frequency increments as small as 0.01% — less than 0.05% incidental fm for full 100% modulation — no leakage or excessive harmonic distortion, no cable errors.
1021-AV \$640	40-250 Mc in one band	0.5μv — 1v at 50Ω	Butterfly-tuning circuit has no sliding contacts, no noise, good stability and very low drift — internal 1 kc and external amplitude modulation adjustable from 0 to 50% — incidental fm under 100 ppm over most of range.
1021-AU \$640	250-920 Mc one band	0.5μv — 1v at 50Ω	UHF pencil tube with tuned plate and cathode, remarkably free of noise modulation — ±1% calibration; incremental frequency control for small adjustments — drift under 0.1% per day — 100-10,000 cycles square-wave modulation from external source — stray fields cannot be detected with receiver having 2μv sensitivity.
1021-AW \$890	900-2000 Mc one band	0.5μv — 1v at 50Ω	

1391-A Pulse, Sweep and Time-Delay Generator . . . \$1745.
Complete, Accurate, Time-Domain Measurements With One Instrument
Pulse Duration: 0.05μsec — 1.1 sec.
Pulse Repetition Rate: 0-250 kc
Time Delay: 1μsec — 1.1 sec.
Delay Repetition Rate: 0-400 kc
Output Impedance: 0-600 ohms

Superior Pulse Characteristics . . . Excellent Rise and Decay Times: 0.025 ± 0.01μsec. No Duty-Ratio or Frequency Restrictions on the Pulse
High Basic Timing Accuracy . . . Timing Scales are Linearly Calibrated and Accurate to 1%
Extreme Versatility . . . Panel controls for all important instrument characteristics. Binding posts provide ready access to triggers, gates, delayed signals, pulses and internal sweeps.

For Modulating Oscillators and Signal Generators Over Wide Ranges with Negligible fm . . .

- 1000-P6 Crystal-Diode Modulator \$40** for wide-band amplitude modulation over 20-1000 Mc carrier range . . . 50 mv, rl and 0.2v at modulation terminals produces 30% am; modulating frequencies from 0 to 5 Mc.
- 1000-P7 Balanced Modulator . . . \$200** for 0-20 Mc amplitude modulation over 60 to 2300 Mc carrier range — particularly designed for 100% linear modulation and pulsing with fast rise time and short duration.
- 1000-P4 Dummy Antenna . . . \$15** connects to Signal Generator 50Ω output, providing IRE Standard output characteristics for testing radio receivers.
- 1000-P5 VHF Transformer . . . \$27.50** converts generator 50Ω unbalanced output to 300Ω balanced for measurements on fm and tv receivers — 50 to 250 Mc range.

Thyratron - Regulated HIGH-CURRENT D-C Power Supplies

FLEXIBILITY AND ECONOMY—These economical, versatile dc power sources offer many distinctive advantages.

- **WIDE OUTPUT RANGE:** Adjustable over more than 2.5 to 1 range. Wider range on special order.
- **FAST RECOVERY:** Less than 75 milli-seconds recovery time constant, for a 50% load step or a 10% line step.
- **PRECISE REGULATION:** Less than 50 millivolts from 0 - 100% of full load rating. Less than 50 millivolts for a 10% line change.
- **REMOTE SENSING:** External, remote sensing of load voltage permits correction for static line drop.
- **LOW RIPPLE:** Less than 1% RMS at any output or input condition within rating. Lower ripple available on special order.
- **SIMPLICITY:** No "trick" tubes, critical adjustments, precision mechanics. Circuit design is straightforward, uses standard tubes and components.

ZERO-LAG D-C Power Supplies

The Modern Electronic Battery

In the Zero-Lag system, the principal objection to conventional high-current DC regulators (magnetic amplifiers or saturable reactors) has been eliminated. Instead of the 200 to 500 millisecond time lag (between a step-change of line or load and the correction for it), in the Zero-Lag system the voltage never leaves the regulated region!

LOAD REGULATION —

STATIC: At constant nominal line input within rating, the output voltage will not vary by more than 1% when the output current is slowly varied from zero to full rated load.

TRANSIENT: For any instantaneous change in output current which does not exceed 25% of full load rating*, the output voltage will not leave the regulated region!

*This rating can be extended to 100% of full load rating on special order, at an increase in size, weight, and price.

LINE REGULATION —

For any change (slow or instantaneous) in line supply voltage which does not exceed $\pm 10\%$ of the nominal rated value, at any constant output within rating, the output voltage will not change by more than 1%.

RIPPLE: 0.1% RMS

SELENIUM RECTIFIER D-C POWER SUPPLIES

This fine equipment lifts selenium out of the "battery charger" class.

Less than 10% regulation, NL-FL, at maximum output voltage.

Ripple less than 1% RMS over entire output range. (Generously preloaded choke-input filter.)

Smooth, continuous, 0-100% output control. Available at reduced prices with fixed (or tapped) output.

The ELS models are line-regulated to $\pm 0.5\%$ for $\pm 10\%$ line changes. Premium rectifier cells, conservative transformers and chokes, finest workmanship.

EG/ELG Germanium Rectifier D-C Power Supplies

ELIMINATES COMPLEX REGULATED POWER SUPPLIES

The diagram above shows how to eliminate many of the complex regulated power supplies required in electronic equipment. Replace them with NJE tubeless, unregulated, stiff germanium supplies, with or without line-voltage compensation.

Load Regulation

The load regulation of these supplies is held to less than 4% no-load to full-load, at the maximum rated output voltage of the supply. By derating, better than 1% regulation is easily achieved.

Line Regulation

Line regulated (ELG) units hold constant output voltage to within approximately $\pm 0.5\%$ for $\pm 10\%$ line-voltage variations, at any fixed load within rating.

Ripple 1% RMS Max.

Standard Grade Regulated Plate Power Supplies

STANDARD GRADE NJE POWER SUPPLIES conform to these rigid specifications:

- Specifications held throughout normal tube life.
- Generous safety-margins prevent self-damage due to overload.
- No electrolytics.
- All components within manufacturer's ratings.
- 45° C maximum temperature-rise on all iron-core components.
- No "surplus" components.

STANDARD GRADE SINGLE POWER SUPPLIES (Input 105-125V AC, 60-400 cps)

Laboratory Grade Regulated Plate Power Supplies

NJE Laboratory grade supplies conform to the following exceptional specifications:

- Only 10,000-hour and super-reliable vacuum tubes are used.
- No carbon resistors, except as parasitic suppressors. Wire-wound or metal-film only.
- All fixed iron-core components fully steel-encased, vacuum-impregnated. Temperature rise less than 30° C.
- 5651 voltage-reference standard.
- Power rectifiers long-life selenium.
- All components derated at least 30% for still-air conditions. Efficient, quiet blower provides additional safety margin.
- No electrolytics. All capacitors are oil-filled.
- Main-line circuits protected by trip-free circuit breakers, resettable from front panel.

High Voltage Power Supplies

H-line supplies incorporate the famous BASIC 20 safety and performance features:

- Reversible polarity over-current trip out
- Adjustable over-voltage trip-out
- Three-range grounded voltmeter
- Three-range grounded millimeter output-grounding switch
- Automatic interlock — with bypass
- Zero-start interlock protection on doors
- Provision for auxiliary interlock
- Self-holding primary contactor
- Adjustable over-voltage
- Three-range grounded voltmeter
- Automatic output-grounding switch
- Zero-start interlock — with bypass
- Double-interlock protection on doors
- Provision for auxiliary interlock
- Self-holding primary contactor
- Safety resistor in output lead
- Output continuously adjustable, 0 to 100%
- Low corona levels
- RF interference effectively suppressed
- Neon-gap protection on meters, relays
- Three-wire primary circuit
- Six pilot lamps indicate circuit status
- Blown-fuse indicators on all fuses
- All panel elements "dead-front" connected
- Meters are hand-calibrated to 2%

CUSTOM is Standard at NJE

We offer a unique combination of facilities to the engineer in need of a special design:

- The most flexible and experienced engineering staff in the power supply field.
- A production program geared to custom work, and to a short delivery cycle.
- Everything under one roof: sheetmetal, finishing, transformer design and production, engineering, drafting, assembly and test. We buy only resistors, capacitors, and tubes. Everything else is under tight production control.
- A design file containing over 2000 previously engineered circuits.

A list of our engineering representatives follows on page 122. They offer prompt, informed cooperation in preparing specifications and obtaining quotations from our factory

NJE is the CUSTOM LEADER

American Beauty ELECTRIC SOLDERING IRONS

Angle-
shape

Whatever your soldering requirements may be, there's an American Beauty iron that will do the job better, for longer.

We are soldering iron specialists. During more than sixty years of constant testing and improving we have built irons of only one quality — THE BEST.

Whether you choose a feather-weight "Bantam" with 1/8" tip, designed for the finest of electronic jobs, a special angle-shape for hard to reach spots, or a husky giant with 1 1/8" tip for heaviest duty production, hour after hour, you'll have an iron that's built to last and is a pleasure to handle.

Replaceable, hi-efficiency, plug-type tips are available in shapes and sizes you will want.

For better soldering, investigate American Beauty equipment. Write for literature and prices.

BUYERS'
GUIDE**

Making Electrical Connections Under Pressure

by Andy Wyzenbeek, Chief Engineer

Fusite Hermetic Terminals with new V-24 glass use the principles of both fusion and compression between the metal and glass to assure a rugged air tight electrical connection.

Where great pressures are involved either internally or externally the limiting factor is often solder or other method of sealing rather than the junction of materials on the terminal itself.

The same is true of Fusite Terminals in applications subject to extreme vibrations, or mechanical or thermal shock.

Where one or more of these conditions exist, Fusite threaded bushing terminals have proved themselves capable of withstanding great punishment. The threaded mechanical seal together with soft solder, suitable gasket or epoxy resin extends the capacity of the connection and brings it more nearly to the high limits engineered into the Fusite Terminal itself.

Each of the three illustrated terminals are available in five different electrode treatments and come with standard threads as shown. In addition, for extreme pressure conditions, these terminals are made with tapered pipe plug threads.

We were gratified and a little bit alarmed by a letter of inquiry received recently from a new user of a Fusite pipe plug terminal.

"Thank you for the samples of your terminal and drawings of 1/8 pipe plug. We tested several of these units to 29,500 PSI at 212° and they did not fail. We are curious as to how much higher pressure they will stand."

We had to plead ignorance as to maximum pressure possibilities, but if you would like to test them in your own application, samples are yours for the asking.

CRITERION TUBES

Manufacturers of modern electronic equipment have encountered instrumentation problems, demanding unprecedented performance of electron tubes.

They have come to UNITED ELECTRONICS, where they find unique engineering initiative, and an ever growing *success experience* in their quest for better tubes. They find here a refreshing atmosphere of knowledge, practicality and friendliness. They find here, minds that are not too inhibited by precedent and outmoded concepts of design approach. **RESULT:** New **EXTREME-TEST CRITERION TUBES** which, understandably, other tube manufacturers are trying hard to copy.

Precision Gyros for All Applications

VERTICAL GYRO TRANSMITTER

Type 14110

FOR RADAR AND AUTO PILOT CONTROL

FEATURES: includes quick erecting mechanism which makes the remote unit ready for operation within 3 minutes. • Two erection ball system. • Non-tumbling stops. • Inclined axis (1 degree) to minimize turn error.

Power Requirement . . . 115 v, 1 phase, 400 cps Starting . . . 19 w .9 P.F. Running . . . 13 w .85 P.F.

Gyro Speed . . . 22000 RPM

Erection rate (normal) . . . 3°/minute

Weight . . . 2¾ lbs.

Size . . . 3½ diameter x 5 13/16 long

Gyro Moment . . . 600 gram cm²
Autosyn excitation . . . 26 v, 400 cps

THREE GYRO

STABLE PLATFORM

FREE GYRO

Type No. 14108-1-A

Overall Size—3 3/8" x 5 5/16"

The Three Gyro Stable Platform was designed for use as a combined vertical and directional gyro. As a master reference, it eliminates all vertical and directional gyros used for such functions as indication, auto-pilot control, fire control, radar stabilization and navigation. While the platform can be used as either free or slaved, it is normally slaved to vertical. No gimbal locks are incorporated, the instrument functioning through loops, rolls, turn in 360° rotation about any aircraft axis without encountering gimbal lock.

WEIGHT: 28 pounds without shockmount

POWER REQUIREMENTS: 115 Volts, 3 Phase, 400 Cycles, 70 Watts
28 Volts D.C. 20 Watts

INPUT: Magnetic slaving C-2 Compass Transmitter

HORIZONTAL GYRO DRIFT RATE: Less than 1° per hour

VERTICAL GYRO DRIFT RATE: 2° per hour

NORMAL ERECTION RATE: .5° per minute

ERECTION TIME: Approximately 2 minutes to within 1° minimum of vertical.

MOTOR: 26 volts, 400 cps, 3 phase with rated speed of 22,000 rpm and a rotor moment of inertia of 1260 gram-cm². Other motors can be supplied that will meet alternate requirements.

DRIFT RATE: Will not exceed 1° per minute when subjected to Scorsby test at amplitude of ± 15° and rate of approximately 6 cpm (corrected for earth's rotation). Two degrees maximum during vibration.

PICK OFF: Autosyn type with peak value of 20 volts. Initial slope of output voltage curve about null position is 0.35 volts per degree ± ten per cent. Phase shift is less than 10 degrees. Residual voltage is less than 50 mv.

WARM-UP TIME: Within two minutes.

OPERATING LIFE: Rated at 500 hours.

ENVIRONMENTAL CHARACTERISTICS: Maximum operating temperature of 195°F. and a minimum of -20°F. Maximum allowable shock is 60g. with maximum operating vibration of 7g. (from 10 to 550 cps). Maximum excursion not to exceed 0.5 inches. Positive hermetic seal.

WEIGHT: Approximately 4.5 pounds.

CAGING AND UNCAGING: Can be caged by applying 26 volts, 400 cps, single phase. Caging time is within 30 seconds for ± 15° initial displacement of roll axis about the normal caged position and within one minute for all other positions of gimbals. Uncaging time—within 0.1 seconds.

HERMETICALLY SEALED

ROLL GYRO

TRANSMITTER

Type 790412

Pickoff output	60 mv./degree

COMPLETE FREEDOM ON 2 AXES

Publication No. 564-5
Superseding Pub. No. 563-1

VERTICAL GYRO

TRANSMITTER

14119-1-A
14120-1-A
14121-1-A

These vertical gyro transmitters were designed for installations where a remote vertical stabilization reference is required. Essentially they consist of an electrically driven, vertical-seeking gyro with separate Autosyn transmitter pick-offs on the pitch and bank axis. A new feature incorporated in these transmitters is an erection to true vertical instead of vertical in relation to the instrument case, at a rate of approximately 150°/min. Other features are a sensitive measuring vertical detection system with an accuracy of better than ¼° and an improved gimbal construction resulting in greater operational stability

Size: 5" diameter, 7¾" in length

Weight: 7 lbs. 3 oz.

Power requirements: Gyro Motor and Erection System—115 volts, 400 cycles, 3 phase

Autosyn—26 volts, 400 cycles, 1 phase

Vertical Gyro

Non pendulous

Momentum: 3.5 x 10⁶ gm cm²/sec.

Freedom: 360° in roll. Controlled tumbling near ±85° in pitch.

Stops prevent minimum error at 10°/sec. rate of loop.

Type 14120-1-A: Has provision for attachment of external rate switch.

Type 14121-1-A: Mercury switch for T & B compensation.

Type 14122-1-A: Has rate switch incorporated in housing.

Bendix

SCINSEAL

WIRING ASSEMBLIES SEALED
FOR ENVIRONMENTAL PROTECTION

Here is the ideal protection for wiring assemblies requiring a high degree of environmental resistance without the use of metal conduit.

Scinseal, originated and developed by the Scintilla Division of Bendix*, is a multi-purpose thermo-plastic material designed to protect and seal vital wiring assemblies from every operational hazard.

By the combination of plasticizers, stabilizers, pigments and fillers, Scinseal has been formulated to meet the requirements of many adverse conditions.

For example, one usage may require low-temperature flexibility, while another is concerned primarily with a high temperature condition, and still other applications may present fuel and acid problems—or perhaps a combination of all of these characteristics is the desired result.

That is why Scinseal is virtually a miracle material, for it can be "tailored" to meet a wide range of requirements, and at the same time, minimize the weight of the finished product.

Scinseal can be provided in a variety of solid colors, and can be hot stamped to provide positive identification. Many electrical connector adapter molds are available, as well as the T's, Y's and variable molds necessary to provide reliable assemblies of any configuration.

Detailed information and data on Scinseal available on request.

*TRADEMARK

Can be tailored to meet
individual needs and purposes

Scinseal is used in such specialized fields as underwater devices, ground radar equipment, missile control wiring.

Original 120 TRIMPOT

BOURNS now offers an expanded line of

TRIMPOTS®

... 7 stock models of sub-miniature potentiometers to serve many special needs—at no extra cost!

First there's the 120 Wirewound TRIMPOT, with features common to all other BOURNS TRIMPOTS. It's a 25-turn potentiometer, easily adjusted, and weighing only 0.1 oz. Rectangular in shape, it fits readily into miniature electronic circuits. You can mount it individually, or stack it compactly with standard screws. Mountings are interchangeable with those on all other TRIMPOTS.

The self-locking shaft holds stable settings under extreme environmental conditions. All parts are corrosion resistant. Every unit is inspected 100% for guaranteed specifications. Resistances: 10 to 20,000 ohms, with resolutions as low as 0.2%.

Now, to give designers greater latitude, BOURNS has developed and is manufacturing the following standard models—variations of the Model 120.

120 TRIMPOT
— Carbon

Infinite resolution is provided by the carbon element. Resistances are higher, ranging from 20,000 ohms to 1 megohm.

130 TRIMPOT
— Solder Lug

For wiring direct to the instrument, using soldering iron or dip soldering techniques. Usable range of 98%.

132 TRIMR
— Variable Resistor

High resistances—up to 50,000 ohms in a wirewound rheostat.

209 TWINPOT
— Dual Potentiometer

Two outputs electrically independent, and controlled simultaneously by one adjustment.

160 TRIMPOT
— High Temperature

Operates at 175°C. High power rating: 0.6 watt at 50°C.

230 TRIMPOT
— Humidity-proof

Completely sealed, unit meets MIL-E-5272A Specifications for humidity.

**DEFLECTION YOKES
 TRANSFORMERS**

For ... Military and Commercial Avionics

Leading system manufacturers now depend on CELCO for their difficult and critical applications on many of these components.

Our design development, production and quality control experience — combined with CELCO's highly skilled operators, production foremen and engineers — comprises a team that has proven their outstanding performance for quality components.

Apply the CELCO "know-how" to your production requirements!

We specialize in the design and manufacture of **PRECISION DEFLECTION YOKES** for military and commercial applications. CELCO can give you immediate engineering evaluation on your critical display problems.

COILS FOR TRAVELING WAVE TUBES — precision wound for minimum transverse magnetic fields. High temperature windings are a CELCO engineering development —

Unit illustrated is 12" long.

HIGH TEMPERATURE TRANSFORMERS — high temperature windings and impregnations on CELCO TRANSFORMERS permit high operating temperature with reduced size and weight.

MINIATURE TRANSFORMERS & SATURABLE REACTORS — specially produced for the Transistor and Plug-in type amplifier assembly. CELCO designs these units wherever reduction in size and weight must be made.

TOROIDAL COILS — CELCO is equipped to cover an extremely wide range of toroidal windings.

DAVIES magnetic tape equipment for instrumentation

AIRBORNE RECORDERS

Data recorders for all airborne, mobile, and other applications subject to extreme environmental conditions; will record under vibration, shock, temperature extremes, and high altitude; operate from 28 v. DC and/or 115 volts 400 cps. Self-contained units incorporating tape transport and all electronic circuitry include miniature 7" cube unit (left), with six channels, and 10½" reel recorder with 14 channel capacity. Four models of tape transports with capacities ranging from 450 ft. to 3600 ft. (1 mil base tape), with associated power supplies and electronic housings provide complete flexibility in solving any problem. Plug-in electronic units for direct recording, FM carrier, PWM, or digital pulse. Tape speeds ½" to 60" per sec. Provision for Davies perfected wow and flutter compensation in all units. Bulletin 2600.

LABORATORY RECORDERS AND REPRODUCERS

Recording and reproduction by any technique—direct, FM, PWM, digital. Davies perfected wow and flutter compensation, together with chopper-stabilized amplifier-oscillators and high-stability discriminators, provide unprecedented accuracy in FM carrier recording; proper system design almost eliminates "drop-outs" in FM, PWM, and digital recording. Multispeed tape transports, with 6 or more speeds selected by front panel switch, automatic rewind and restart—electronic equipment automatically controlled by tape speed switch—remote control speed changing—these and other improvements are paving the way to automatic data handling. Standard tape speeds from 0.1 to 60 inches/sec. Unitized assemblies and plug-in components for maximum flexibility. Standard systems available completely assembled and wired in standard relay racks—specially designed systems to your order. Bulletin 2700.

AUTOMATIC WAVE ANALYZER

Heterodyne type analyzer provides completely automatic fourier analysis (amplitude versus frequency) of vibration, seismic, power line, transient, noise, shock, and similar data. When necessary, an amplitude versus time plot for a given frequency can be obtained. Suited for operation from any source supplying a repetitive signal, such as a magnetic tape loop. Frequency range 3 to 2000 cps, variable bandwidth ½ to 45 cps, amplitude accuracy ±5% of reading on logarithmic scale, frequency accuracy ½% of reading, output voltage range 60 db, input impedance 2½ megohms. Analysis recorded, and up to 14 inputs can be handled and selected automatically. Bulletin 9100.

STANDARD HEADS

Series	Tracks Width C.toC.	L mh.	R ohms	Cross- talk Rejection	Number of Tracks for Various Tape Widths								
					¼"	½"	¾"	1"	1¼"	1½"	1¾"	2"	
700	.050	.140	70	55	50+ db	2	4	5	7	9	11	13	14
800	.040	.125	57	55	50+ db	2	4	6	8	10	12	14	16

1300	.026	.078	35	55	30 db	3	6	10	13	16	19	22	26
1400	.040	.072	30	36	45 db	3	7	10	14	17	21	24	28
51400	.032	.070	67	55	34 db	4	7	11	14	18	21	25	28
2000	.020	.050	5.7	18	22 db	5	10	15	20	25	30	35	40

Precision multi-track instrumentation heads, developed to meet the rigid standards set for our equipment. Precise gap alignment (total scatter 0.2 mil per inch of tape width), maximum shielding for minimum cross-talk, completely encapsulated in thermosetting resin. Gaps from ¼ mil to 2.5 mil. Table shows standard series, including inductance and resistance for ¼ mil gap—lower inductances available in all except 2000 series. Special designs can be furnished. Bulletin 3300 gives complete details.

NO TRIMMING NECESSARY WITH BORG ABSOLUTE LINEARITY 900 SERIES MICROPOTS

BORG ACHIEVES THE IDEAL . . . ABSOLUTE LINEARITY

Borg offers the electronics industry a precision potentiometer with Absolute Linearity inherent in the pot itself. It requires no trimming of any kind!

THE END OF UNCERTAINTY

Embodied in Borg's new 900 Series 10-turn and 3-turn Precision Potentiometers are exclusive advantages that provide this high degree of accuracy. You get from zero to 100% of applied voltage over exactly 3600° (or 1080°) of shaft rotation.

This means no such parameters as electrical rotation tolerances, end resistance or jump-off resistance need be considered error in output. Many doors, formerly closed to electronic design engineers, are now opened by Borg Absolute Linearity.

ORDINARY INDEPENDENT LINEARITY

Note the line marked "Ordinary Independent" on the blackboard diagram. This line is unable to go to zero and 100% of applied voltage because of X and Y known as end resistances. Therefore, trimming is required to compensate for the potentiometer errors of end resistances X and Y.

Now, note that the line marked "Absolute" goes through zero applied voltage output at zero shaft rotation and through 100% applied voltage output at 3600° of shaft

rotation. This is the reference line for absolute linearity and is inherent in the Borg 900 Series potentiometer. Thus Borg achieves absolute linearity without trimming of any kind.

SIMPLICITY ASSURES RELIABILITY AND ACCURACY

Simplicity of the Borg 900 Series Micropot affords greater accuracy and reliability. It eliminates such possible sources of error as trimming errors, unstable trimming, resistances, etc. Another Borg advantage simplifies assembly and reduces possibility of error. The Borg CCW mechanical stop is set up to provide a phasing point. This exclusive advantage reduces field replacement to the purely mechanical process of attaching leads and phasing from the present stop.

ABSOLUTE LINEARITY REDUCES COST

The accuracy and reliability of your equipment is improved with a Borg 900 Series potentiometer which also effects a savings in time and money. Your cost is lowered by eliminating trimming resistors and the technically trained labor competent to install them.

Many other advantages of the Borg 900 Series can help solve your potentiometer problems as they are now doing in all types of equipment from jet engines to steel mills.

Airpax Products

PRODUCTS BY AIRPAX

AIRPAX PRODUCTS CO. specializes in components that have, as essential features, magnetic circuits. This fundamental approach leads to the variety of products under which you find Airpax listed in this Buyers' Guide—all related by the common feature of a ferro-magnetic structure.

Amplifiers

Ferrac magnetic amplifier Type M-943 is a highly stable and linear DC amplifier that you can use directly in the analog computer portion of your control and guidance equipments. In such applications, you achieve the reliability characteristic of magnetic amplifiers and much of the accuracy usually associated with electronic

Instrument Type Magnetic Amplifier

Gain:	100 microamperes into either of two 120-ohm control windings produces 2.5 volts output into a 1000-ohm load; peak output within linear operating range is 7.5 volts
Bandwidth:	at least 8 CPS for each 1000 ohms in a control loop
Supply Power:	3 watts at 115 volts, 400 CPS
Package:	hermetically sealed with 11 pin header, 1.5 inches in diameter by 3 inches high, weighs only 9 oz.

amplifiers. For example, two signals can be summed or subtracted in a Ferrac amplifier even if they have no common ground.

The Ferrac amplifier is basically an improved form of single-stage full-wave center-tapped push-pull DC-to-DC magnetic amplifier. Variations of the original Ferrac amplifier include Type M-1039, which is especially designed for use in integrators, and Type M-1040, whose input is specifically designed to operate from a thermocouple.

Choppers

A wide variety of Airpax choppers enables you to select the type appropriate for each application. These choppers are manufactured in a completely air-conditioned plant on precision machines that assure you of uniformly high quality. All Airpax choppers are adjusted to design centers by skilled setup operators before being hermetically sealed. Every chopper is tested for conform-

How to GET BEST RESULTS from this Buyers' Guide

This insert is designed to help you get the best results from your Buyers' Guide. Here is what it does for you.

FIRST: Look in the alphabetical directory section of the Buyers' Guide under the products you need.

SECOND: Wherever you find Airpax listed refer to this insert. Here you find, under similar headings, brief descriptions of the particular products and services that you can obtain from Airpax.

THIRD: Write, wire, or 'phone for complete details. In this way you know immediately how much of your problems you can solve by turning to Airpax.

ance to its requirement for low noise before it leaves the Airpax plant.

These choppers find wide application in automatic controls. All units have break-before-make action for maximum life and are SPDT. Contacts are usually rated for 2 milliamperes at up to 100 volts and consequently withstand occasional equipment transients.

Typical Signal Choppers

Type	Frequency (CPS)	Packaging
100	400	octal base, hi. temp. 200 C
150	400	7 pin miniature, hi. temp. 200 C
175	60	7 pin miniature
176	60	175 with drive leads out top
199	100	50 ohm coaxial
300	400	7 pin miniature
307	400	300 with mu metal can
310	400	7 pin miniature, hi. temp. 125 C
320	400	7 pin miniature, hi. temp. 150 C
400	400	300 with drive leads out top
520	400	octal base, 90 deg. phase
580	400	octal base, 120 volt drive thru external network to produce 0 deg. phase
586	60	octal base

Drive is 6.3 volts unless otherwise noted.

Circuit Breakers

To protect individual electronic chassis, Airpax introduced a series circuit breaker that mounts in the same panel space as a conventional toggle switch; it extends only about 1.5 inches behind the panel. This

RPAX

RPAX

RPAX

RPAX

breaker also serves as On-Off switch. Trip level is unaffected by temperature.

Type 401 is rated up to 50 volts DC. Type 410 is rated up to 120 volts AC (60 to 1000 CPS). Both types are available in current ratings as low as 50 milliamperes and as high as 10 amperes. Two standard time delays are available: rapid response A for protecting conventional electronic equipments, and slow response B for equipments that draw substantial starting surges.

Indicators, Frequency

The novel Airpax Magmeter audio frequency detector converts signals of varying frequency to an output whose average DC value is directly proportional to frequency. Magmeter type frequency detectors respond within the period of one cycle to changes in frequency and are relatively insensitive to changes in signal amplitude and wave shape. Appropriately driven, a Magmeter detector can also count pulses or form the basis for a simple tachometer.

Each type Magmeter detector is designed for operation with an indicating instrument having a full scale sensitivity listed in the accompanying table. About 1 watt of signal power is all that is required by a Magmeter detector. Standard types are wound for a nominal

Standard Magmeter Detectors

Type	Range (CPS)	Full Scale Output (Microamperes)
F-948	0-500	500
F-979	0-100	100
F-980	0-1,000	1,000
F-981	0-2,000	200

input of 120 RMS volts and have octal bases. They stand less than 1.5 inches above the pin base and are about 1.5 inches in diameter. Variations with other full scale frequencies and output currents within the tabulated ratings can be provided to meet your needs.

Inverters

Perfection of several 400 CPS power vibrators at Airpax has led to the custom design and manufacture of compact low power inverters for changing from DC to AC. By way of indicating the ratings that can be achieved, Type 512 is hermetically sealed and weighs

Do You Need Data in a Hurry?

You can obtain further details quickly on any of these products from the sales office nearest you. Addresses and phone numbers of Airpax sales representatives are listed on the back of this page.

AIRPAX

DESIGNERS
PRODUCTS
COMPANY
ENGINEERS

only about 14 ounces, occupies about 7.5 cubic inches, withstands accelerations of more than 50 g, and has an efficiency of about 75%. Its output is essentially a square wave, 15 watts at 110 volts, 400 CPS.

Power Supplies

Inverter power supplies are described above. Airpax manufactures compact light-weight power supplies for battery operated equipment based on 400 CPS power vibrators such as Airpax Type 500 described below. These vibrator supplies provide AC and/or DC outputs; transformers can be wound by Airpax to provide you with any specified combination of voltages and currents within the power capacity of the vibrator.

Conventional power supplies are manufactured also to your specification to assure minimum size and weight consistent with required power output and temperature limitation. Experienced Airpax engineers can optimize whatever characteristic is most important to you.

Transformers

Where you need premium performance, whether for an equipment with an expected life of 10 years or for one that must operate with certainty only a few minutes, you need Airpax transformers. These units are designed by seasoned transformer engineers, thoroughly tested in the Airpax laboratory in accordance with applicable specifications such as MIL-T-27A, and manufactured under strict quality control.

Winding equipment at Airpax includes toroidal machines, multiple winders, and universal machines. Transformers ranging in size from units for miniaturized equipment to power transformers rated for a KVA are regularly in production for Airpax customers. Along with power, audio, and related transformers, and iron core inductors, Airpax designs and manufactures audio, filter, and power chokes to your specifications. These components can be vacuum impregnated to withstand usual field conditions or hermetically sealed for the utmost in environmental protection.

Vibrators

Airpax pioneered high frequency power vibrators because of the substantial savings in size and weight of the transformers and chokes usually associated with vibrator power supplies. These savings are especially significant in airborne equipment.

Type 500 vibrator is a 400 CPS interrupter type unit for use in power supplies having a moderate continuous or a heavy intermittent load. Being hermetically sealed, its operation is unaffected by changes in atmosphere and altitude; it operates in any position. This vibrator and variations of it are used in airborne transceivers, guidance equipment, and portable sets.

ALLOY WIRE • ROD • STRIP

for Electronic,
Electrical and
Electro-Mechanical Products

Alloy Metal Wire Division offers the electronic industry a wide selection of alloys in wire, rod and strip forms in a full range of sizes. Among the nickel alloys, stainless steels, resistance alloys and special alloys we fabricate, you can find a material with outstanding heat resistance, corrosion resistance, good electrical properties, special magnetic properties, good spring characteristics or a combination of these properties to suit your needs.

Nickel-clad copper wire and other clad materials are also available.

Alloy wire can be obtained in a variety of cross-sectional shapes including oval, square, hexagonal, teardrop, half-oval, half-round, wedge, D-shape and keystone.

Alloy Metal Wire Division engineers will be glad to help you select the right material for your application. Write today for our informative technical handbooks.

COLOR TV

ONLY TELECHROME MAKES THEM ALL

COMPLETE FACILITIES FOR TV STATIONS, MANUFACTURERS & LABORATORIES

Finest color film chains, colorplexing, transmitting, analyzing, monitoring, testing equipment.

617-BR AUTOMATIC BALANCE CONTROL FOR ALL COLORPLEXERS
(Regardless of Manufacture)

An ingenious circuit locks the entire encoding equipment in balance within 20 seconds after being turned on. Thereafter balance is held under even the most difficult operating conditions.

1003-A VIDEO TRANSMISSION TEST SIGNAL GENERATOR

Portable. Completely self-contained, portable. Produces multi-frequency burst, stairstep, modulated stairstep, white window, composite sync. Regulated power supply. 12 1/4" standard rack mounting or in carrying case.

700-A 3V COLOR FILM CHAIN

Finest in quality, lowest in price. 3V provides greatest latitude in selection of color films. Designed specifically for broadcast application, requires little space. Multiplexes 35 or 16mm film, slides, opaques.

1073-A SINE-SQUARED SQUARE WAVE GENERATOR

Newest test unit produces new type of wave forms for testing any part or all of a TV or pulse system for amplitude and phase characteristics. "Go-No-Go" indication simplicity.

1601-BR CHROMASCOPE

Signal Certification Equipment. Accurately measures the performance alignment, and phase errors of color TV equipment. Presents on a cathode ray screen a continuous polar plot of the phase and amplitudes of all colors. In a composite color video signal. Capable of a .005° accuracy with 1604-AR phase magnifier.

New secondary phase standard for accurate readings to .01°

1604-AR PHASE MAGNIFIER

Expanded phase indicator of a signal for measurements of differential phase to .2° or better accuracy at chroma frequencies.

302-AR DRIVE GENERATOR

Small, portable, inexpensive unit. Provides horizontal blanking, horizontal sync, vertical drive and burst flag for driving most signal generating equipment where standard sync is not available.

1071-AR WINDOW GEN.

OSCILLOSCOPE CAMERA MODEL 1521-A

VIDEO TRANSMISSION TEST EQUIPMENT

Provides stairstep, window and multiburst signals. Now in wide use by the leading TV stations, networks and common carriers. Checks video facilities for color and monochrome. Polaroid camera recording.

1070-BR MULTI-BURST FREQUENCY GEN.

1041-BR STAIR STEP GEN.

636-B CHROMALYZER

Portable Precision Color Bar Generator for checking color broadcast studio and transmission facilities, receivers and monitors. Can be tied into a system. Provides complete composite color signals at 100 or 75% chroma.

1603-AR PHASE SLOPE (ENVELOPE DELAY) CURVE TRACER

Instantaneous slope or meter reading of the envelope delay and amplitude characteristics of any network, video amplifier, or system. Precision timing. Has separate transmitter and receiver units which allow one way or loop measurements.

DELIVERY 30 DAYS

Literature on these and more than 150 additional instruments for color TV by TELECHROME are available on request.

The Nation's Leading Supplier of Color TV Equipment
88 Merrick Road Amityville, N. Y.

Stupakoff

PRODUCTS for ELECTRICAL

Ceramics, Hermetic Seals and Kovar Alloy

STUPAKOFF DIVISION

For many years Stupakoff has specialized in the manufacture of precision ceramic parts, involving production runs into the tens of thousands. They are made in plain, ground, metallized and assembled types—for any voltage, frequency or temperature.

Stupakoff Hermetic Seals are made with Kovar alloy and hard glass. Oxidation of these materials at their interfaces forms a strong, vacuum- and pressure-tight, corrosion-proof bond.

Stupakoff facilities include large, well-equipped laboratories; extensive modern production and testing equipment; and an experienced staff of quality-conscious engineers and technicians.

TRANSISTOR

HEADERS—Kovar-glass headers for transistors are designed for soft soldering or projection welding. Can be made to meet JAN specifications.

PRECISION CERAMICS—In the assembly of electrical or electronic equipment, the use of precision-made components means faster production and the correct functioning of the equipment in service.

Through the application of experience-developed engineering and technical skills and modern equipment, Stupakoff produces, in large volume, parts that meet most exacting tolerances and specifications.

Stupakoff precision ceramics may be simple or complex; and made from various ceramic materials.

CERAMIC PARTS—Stupakoff is a leading manufacturer of ceramic products for electrical and electronic applications for all voltages, frequencies and temperatures. Parts are made by modern production methods of Alumina, Cordierite, Forsterite, Magnesia, Zircon, Stupalith® and Steatite—plain, ground, metallized or assembled.

Where thermal shock conditions prevail, parts made of Stupalith will withstand extremely severe service.

Coil forms, insulators, brazing fixtures and vacuum tube spacers are among the popular items.

METAL BONDED TERMINALS—Combine a specially developed metal bond and rigidly controlled alumina to give a strong, durable, vacuum-tight product. Terminals are supplied with Stupakoff Metal Bond which significantly reduces assembly costs by withstanding exposure to soldering temperature for prolonged period without losing bond strength.

and ELECTRONIC applications

of The **CARBORUNDUM** Company, Latrobe, Pennsylvania

KOVAR GLASS SEALS—Single terminals with tubular, solid or flattened and punched center lead; high voltage terminals for feed-through applications; multi-header terminals for applications requiring a number of leads in limited area; stand-off terminals; strain relief terminals and Special Seals made for exacting applications.

THERMISTORS—Stupakoff Negative Temperature Sensitive Resistors are used for surge suppression and for temperature-measuring or -indicating equipment. Widely used as the temperature element for Radiosonde. Supplied as rods or tubes complete with leads. Furnished plain or with reflective or moisture proof coatings.

METAL-CERAMIC SHAFTS—Made in a wide variety of sizes and designs, Stupakoff Metal-Ceramic Shafts consist of metal bands permanently attached to ceramic rods. Through care in manufacture, exceptional precision is maintained on a mass-production basis. For example, it is not unusual to hold the concentricity of components to a T. I. R. of 0.001 in.

KOVAR ALLOY—The ideal alloy for glass sealing, Kovar matches the expansivity of hard glass over the entire working temperature range. It resists mercury attack, has ample mechanical strength and seals readily with simple oxidation procedure. It is available as sheet, strip, foil, rod, tube, wire—or fabricated into cups, eyelets, leads and other shapes. Kovar produces a permanent vacuum-tight seal, is usable in any thickness, and can be welded, soldered and brazed to other metals.

HICKOK

ELECTRONIC Test Instruments

HICKOK

9 TUBE TESTERS FILL ALL REQUIREMENTS

LABORATORY TUBE TESTER

All Voltages Variable and Metered

Model 700: Most complete and accurate Tube Tester. Covers wide ranges of values to duplicate the results in tube manuals. This instrument is invaluable for electronic developmental and research work. Model 7001: Null Reading Apparatus, for use with the Model 700 to obtain bridge type Null readings with an accuracy of 1%. Most complete and accurate Tube Tester available.

MODEL 7001 MODEL 700
with an accuracy of 1%. Most complete and accurate Tube Tester available.

PORTABLE TUBE TESTER

Most Accurate

Model 539B: Features simplicity of operation in providing a complete and accurate evaluation of electron tubes. Has Mutual Conductance circuits, 6 micromho ranges, 4 AC Signal voltages, metered line voltage, metered grid voltage and other important features.

MODEL 539B

7 OSCILLOSCOPES MEET SPECIALIZED REQUIREMENTS

LABORATORY CATHODE RAY OSCILLOSCOPE

Wide Range . . . Versatile

Model 770: Provides unusually wide range of DC to 5 MC. 10 M.V. RMS per inch sensitivity. Built-in calibrating voltages. New flat-faced tube. Illuminated calibrated screen. Metal shield. Shock mounted. This highly stable 'Scope is laboratory quality throughout.

MODEL 770

TECHNICIANS' OSCILLOSCOPE

5-Inch Portable or Rack Mount

Model 670R: DC to 600 KC, within 3 db. Useable to beyond 2MC. .015 RMS volts per inch sensitivity. Sweep circuit oscillator; 3 cycles to 50 KC. Fixed sweep frequencies; 30 and 7875 cycles. Input impedance: vertical, 2.2 megohms—15 mmf; horizontal, 1 megohm—35 mmf. Features illuminated calibrated screen. Also available in portable case as Model 670A.

MODEL 670R

1 megohm—35 mmf. Features illuminated calibrated screen. Also available in portable case as Model 670A.

SMALLER SIZE LABORATORY OSCILLOSCOPE

3-Inch Portable

Model 385: DC to 4 MC, within 3 db, 0.75 RMS volts per inch sensitivity. Sweep circuit oscillator; 3 cycles to 50 KC. Input impedance: vertical and horizontal amplifiers; 2.2 megohms—25 mmf. Features replaceable circuit sections. High quality throughout. Also available in portable, moisture-proof, weather-proof aluminum carrying case as preferred by field engineers.

MODEL 385

able, moisture-proof, weather-proof aluminum carrying case as preferred by field engineers.

INDUSTRIAL LABORATORY OSCILLOSCOPE

3-Inch Rack Mount

Model 387R: Popular rack-mount style in an accurate 3-inch oscilloscope. Features identical vertical and horizontal amplifiers. DC to 500 KC response. 10 MV RMS sensitivity. Designed to permit versatile use in all phases of electronic work.

MODEL 387R

11 GENERATORS WITH SPECIALIZED FUNCTIONS

SINE-SQUARE WAVE GENERATOR

For Laboratory & Industrial Use

Model 710: Provides an accurately calibrated source of sine wave and square wave functions over a wide frequency range. Sine wave total harmonic distortion below 1%. Hum level better than 90 db down. Square wave rise time less than .1 Micro- in five ranges on both sine and square waves.

MODEL 710

second. 20 cycles to 1 MC waves.

MICROVOLT SIGNAL GENERATOR

125 KC to 175 MC on Fundamentals

Model 295X: Ideal for mobile radio and other communication equipment design and maintenance. Output 0.1 microvolt to 100,000 microvolts. 125 KC to 175 MC continuous on fundamentals. 400 cycle modulation—approximately 30%. Attenuation down to 0.1 microvolt—no external attenuator pad required. Vernier Control permits hairline settings. Silverplated copper cage shielding. Test leads are furnished.

MODEL 295X

to 0.1 microvolt—no external attenuator pad required. Vernier Control permits hairline settings. Silverplated copper cage shielding. Test leads are furnished.

5 VTVM and VOM INSTRUMENTS

TRUE VACUUM TUBE

Laboratory Size and Accuracy

Model 209A: Contains large 9" meter with zero-center scale. Highly accurate for servicing industrial electronic equipment. DC Volts: 0-1200 in 6 ranges. AC Peak-to-Peak Voltage: 0-1200 V, in 6 ranges. Capacitance 0.1 to 10,000 MMF in 2 ranges, 0-1000 MF in 5-ranges. 50 MH to 100 henries. 0.1 ohm to 10,000 megohms in 7 ranges.**

MODEL 209A

0-1000 MF in 5-ranges. 50 MH to 100 henries. 0.1 ohm to 10,000 megohms in 7 ranges.**

NEW VOLT-OHM-MILLIAMMETER

You Can't Burn It Out!

Model 455: New design portable VOM. Includes all practical ranges. Features patented protection system which protects both the meter and associated circuits from damage due to accidental overload. Quality designed for utility and attractiveness. Neoprene carrying case available.

MODEL 455

HIGHLY ACCURATE DC and AC PORTABLE INSTRUMENTS

Ammeters, Milliammeters, Microammeters, Voltmeters, Millivoltmeters, Volt-Ammeters. Thermometers are contained in a phenolic case lined with heavy steel shell which shields from the effects of stray magnetic fields. Scale divisions are spaced equal distances apart. Accuracy within 1/2 of 1%. On special order, Model 14 can be supplied with a calibration chart to provide accuracy to 0.2%. Also available is a complete line of pocket portables.

MODEL 14

accuracy to 0.2%. Also available is a complete line of pocket portables.

METERS

The many special movements developed by HICKOK are: electro-dynamometers, self-contained frequency meters, galvanometers, true logarithmic deflections, special curves for special purposes and ruggedized designs for highest shock tests. Full technical information on the complete line of HICKOK instruments and test equipment is available on request. Kindly list details of your requirements and ask for Catalogs No. 32 and 33.

THE HICKOK ELECTRICAL INSTRUMENT COMPANY

10514 DUPONT AVENUE

CLEVELAND 8, OHIO

HIGHEST QUALITY ELECTRICAL AND ELECTRONIC TEST INSTRUMENTS

*Hughes announces
3 new direct-display
cathode ray*

STORAGE TUBES

MEMOTRON®

The MEMOTRON, a direct-display cathode ray storage tube, retains traces and transients until intentionally erased. Analysis and comparison are possible without photography because MEMOTRON visually displays successive transient writings. All displays occur at uniform brightness, regardless of writing speeds, so are easily photographed for file records. Applications: viewing transients in shock testing, read-out of solutions from analog computers, curve plotting at high and low speeds, electrocardiography, vectorcardiography and heart sounds.

Photos, left, show a technique for plotting a family of curves, representing a coupled circuit with varied parameters.

General Specifications:

RESOLUTION...50 to 60 written lines per inch.

WRITING SPEED...0 to at least 100,000 inches/second (selected tubes in excess of 100,000 ips).

BRIGHTNESS...50 foot-lamberts.

USABLE SCREEN DIAMETER...4 inches, maximum.

DIMENSIONS...

Over-all length: 18 1/2 inches, ± 1/2-inch.

Bulb diameter: 5 5/8 inches, maximum.

Neck diameter: 2 1/4 inches, ± 3/32-inch.

TONOTRON®

The TONOTRON, a direct-display cathode ray storage tube with a 5-inch screen, presents a complete spectrum of grey shades. Extremely high light output of 600 foot-lamberts is available. This high light output makes a hood unnecessary, even when viewing in full daylight. TONOTRON's length of persistence and rate of decay are controllable. Superior presentation of the grey scale assures "high fidelity" picture reproduction. Applications: radar, Narrow Band Television, instrumentation, etc.

Photos: left, a TONOTRON ppi display; right, a TONOTRON TV application.

TYPOTRON®

The TYPOTRON is the first commercially available storage tube for displaying printed data rapidly. A choice of 63 characters is available for the presentation of data in words, numbers or symbols. As a high-speed digital read-out device, the TYPOTRON writes characters 1/8 inch in size at speeds of at least 25,000 characters per second. The written information remains visible indefinitely without fading or blooming, until intentionally erased. This feature makes TYPOTRON an ideal read-out device in many digital computer applications.

Photo: presentation of all available characters.

Our applications engineers invite your inquiries regarding specific uses of these tubes. For further information and descriptive literature please write to:

HUGHES PRODUCTS

A DIVISION OF THE HUGHES AIRCRAFT COMPANY

SPECIFY HUGHES

... because Hughes semiconductor products are manufactured, first of all, for reliability. This means you can *depend* on Hughes devices to stay within published specifications under varied and severe operating conditions. And their reliability *in actual performance* is backed up by a phenomenal record of failure-free service in many military and commercial installations.

GERMANIUM POINT-CONTACT DIODES

In addition to standard RETMA and JAN types, scores of special germanium diode types are available. They are especially tested to meet customer specifications for: high or low temperatures . . . pulsing and switching . . . specific recovery time . . . matching in pairs and quads.

Working Inverse Voltage	Electrical Specifications at 25°C

A DIVISION OF THE HUGHES AIRCRAFT COMPANY

Transitron[®]

SILICON

RECTIFIERS

MILITARY TYPES

Available in voltage ratings up to 570V PIV, Transitron's military type rectifiers are preferred types for new designs in all rectifier applications. Write for Bulletin TE-1336.

STUD MOUNTED TYPES

High current ratings are achieved through efficient conduction cooling. Rugged construction and rigid mountings give high shock and vibration resistance. Write for Bulletin TE-1321.

LEAD MOUNTED TYPES

The proven performance and dependability of the stud mounted types are now available in a versatile lead mounting arrangement. High forward conductance assures both high efficiency and good regulation. Write for Bulletin TE-1335.

MINIATURE TYPES

Ideal for low current power supply and magnetic amplifier circuits, the miniature rectifiers are particularly useful in aircraft, missile, or other critical applications requiring small size and high temperature reliability. Write for Bulletin TE-1338.

MEDIUM POWER TYPES

Transitron's medium power silicon rectifiers are rated up to 20 amperes per cell at 125°C. Their small size and high efficiency permits the design of compact lightweight circuits. Complete environmental protection is assured through hermetic sealing and rugged construction. Write for Bulletin TE-1337.

HIGH POWER TYPES

Transitron's high power silicon rectifiers are designed for reliable high temperature service in power supply and magnetic amplifier circuits requiring up to 35 amperes per cell. Their heavy duty flexible anode lead and 3/8" stud offer a high degree of mechanical ruggedness. Write for Bulletin TE-1337.

DIODES

HIGH CONDUCTANCE TYPES

Transitron's subminiature glass silicon diodes feature high forward conductance and reliable operation at high temperatures. They are ideal for miniaturized circuitry and other applications requiring high voltage ratings and low inverse current. Write for Bulletin TE-1339.

HIGH FREQUENCY TYPES

The silicon bonded diodes are small area junction diodes specifically designed for high frequency circuits up to 1000 mc, and fast switching applications requiring recovery times of .15 microseconds or less. They are particularly useful in detector, discriminator, logic and high speed transistor circuitry. Write for Bulletin TE-1308-A.

TRANSISTORS

Transitron's PNP junction transistors are designed for high reliability applications requiring exceptional performance under severe operating conditions. Welded hermetic sealing and 100% inspections for shock, vibration and moisture resistance insure dependability and permanent environmental protection.

A variety of types are available covering a wide range of uses. Included is the type 2N200, which is specifically intended for military applications where ambient temperatures up to 75°C are encountered. Other types feature low I_{co}, high gain and low noise figure. Write for Bulletin TE-1320.

POWER TYPES

Transitron's power transistors are intended for use in Class A or Class B output stages, servo motor drivers and similar applications requiring up to 30 watts load power at 25°C. Operation up to 75°C is possible at reduced ratings. Low saturation voltage and useful current gain up to 3 amperes permits efficient switching. Write for Bulletin TE-1320.

GOLD BONDED DIODES

Features

- Complete Reliability.
- Superior Forward Conductance.
- Higher Inverse Resistance
- More Uniform Characteristics.
- Greater Ruggedness.

The proven performance and superior characteristics of Transitron's gold bonded germanium diodes are available in a wide variety of military and commercial types. Millions of these gold bonded diodes are in use in such applications as airborne computers, high temperature magnetic amplifiers, and business machines. They have established an outstanding record of dependability in critical applications.

Mechanical and electrical ruggedness is "built in" to the Transitron diode through the unique gold bonding process and close manufacturing control. An all-glass hermetically sealed case insures complete environmental protection. All Transitron diodes are subjected to rigid 100% inspections, including shock, vibration and temperature and humidity cycling. Write for Bulletins TE-1300 and TE-1319.

Address: The Adams & Westlake Company, 1953 N. Michigan, Elkhart, Indiana. In Canada, write Powerlite Devices Limited, of Toronto.

The Adams & Westlake Company

Established 1857 • ELKHART, INDIANA • New York • Chicago

the original and largest manufacturers of mercury plunger-type relays

Tailor-Made Fasteners in Volume Quantities

MINIATURE BATTERY CONNECTORS

For use with small "B" batteries; afford quick and positive polarized electrical connections and worthwhile space savings on small electronic equipment.

POLYETHYLENE MOUNTING FOOT

No mar no scratch glide for use on TV receivers, record changers and small appliances. Assembles into round hole in either wood or metal cabinets.

FISHTAIL RATCHET PLATE

Made in a wide range of sizes to hold on smooth metal, die-cast or plastic studs. For use on refrigerators, radio cabinets, washing machines and other products to hold medallions, name plates, etc.

VIBRATOR GROUNDING FASTENERS

Holds 1 1/2" dia. beaded or non-beaded vibrator. Vibrator Can grounded to chassis. Holding prongs designed to hold several types of Cans.

RUBBER FOOT

Snap-in Rubber Foot for Record Changers and Phonograph Mountings eliminates threaded member, lock washer and nut thereby speeding assembly time and reducing costs.

NYLON COIL NUT

Designed to snap into a TV tuner and receive a 4-40 or 4-48 coil adjusting screw. No coil form or coil form fastener required.

SPEAKER MOUNTING BOLT

Pronged head prevents bolt from turning in speaker panel during application of nut and lock washer, permits one-side attachment providing production-line savings.

NYLON SNAP-IN NUT

Serves as insulator between "hot TV chassis" and cabinet. Snaps into square chassis hole and secures to cabinet with sheet metal screw.

PLUG BUTTONS

Made to snap into hole sizes 1/8" to 3". Can be embossed with ornamental or functional designs. Removable. Supplied with various finishes, in a variety of shapes and sizes.

QUICKEY FASTENER

Eliminates need for welding or swaging studs to sheet metal stampings, facilitates nesting, eliminates damage in transit because Quickey snaps in just before final assembly.

TRIMOUNT STUDS

Designed to hold two or more thicknesses of material together. Easily installed by hand. Insure vibration proof attachment. Permanent or removable attachment. Wide variety of shapes and sizes.

UNITED-CARR
FASTENER CORP.

CAMBRIDGE 42, MASSACHUSETTS

DOT

Parts illustrated are representative of the thousands of different specialized fasteners and allied devices designed and manufactured in volume by United-Carr and its subsidiaries for leading manufacturers of electronic equipment. United-Carr's wide and varied experience with special fastening problems in the automotive, aviation and appliance fields provides an unequalled background of technical knowledge which may well be applicable to your special needs.

Ucinite Electrical Assemblies

BATTERY CONNECTORS

Wired snap-on units for use with batteries equipped with United-Carr electrical snap fasteners. Wiring to customer's specifications.

BANANA PINS

Four sizes of plugs with one-piece beryllium copper springs. Adaptable mounting ends in threaded, staking, or solder lug types. Similar Mating Jacks also available.

SHOCK MOUNTS

Offered in several sizes — brackets and durometer of rubber bushings can be varied. With threaded Teenuts or plain bushings. Insulated versions if needed.

ANODE CONNECTORS

Plug button contacts for positive firm connections. Corona resistant neoprene or silicon shields in straight or right angle types. Wiring to customer's specifications.

TUBE CAPS

Positive gripping, heat treated steel springs in corona resistant metal housing. Insulated or non-insulated. Wired to specifications. Type shown has silicon shield for special application.

MAGNETRON CONNECTORS

For heater and heater cathode terminals of magnetrons. Available in many variations to answer specific needs.

SWITCHES

Oak type switches manufactured as a licensee. Variety of rotary and push-button assemblies to specifications.

SNAP SWITCHES

Precision, momentary contact push-button switches. Small and dependable. Several circuit arrangements. Water tight version shown.

TEST JACK

Ucinite's quality jack for .080 probes. Beryllium copper contacts. Nylon insulation in colors. Metal shell for firm dependable mounting.

VIBRATION ISOLATORS

Equiflex (1 to 1 ratio) metal mounts ensure long life, fit small spaces, can be used in any direction. Three sizes, cup or plate mountings.

METAL STAMPINGS

Volume production in Metal stampings. Years of engineering and tooling skill available to solve your particular problem.

With years of specialized experience in the electronics field and complete facilities for the volume production of small metal stampings as well as the assembly of metal to plastic and ceramic components, Ucinite is fully equipped to supply you with special electrical parts and assemblies...designed, assembled, wired and marked to your specifications. For complete design, engineering and production service, call your nearest Ucinite field engineer.

The UCINITE Company

DIVISION OF UNITED-CARR FASTENER CORP.

Newtonville 60, Massachusetts

ELMENCO DUR-MICA CAPACITORS

8,000 HOURS OF PROVEN COMPONENT RELIABILITY*

The Dur-Mica Capacitor is a silvered mica capacitor coated with a specially developed material which provides maximum protection at environmental extremes of moisture and temperature. This combination provides a reliability and life expectancy which far surpasses anything heretofore obtained.

COMPONENT RELIABILITY:*
 Life tests presently being performed at 125°C. and 150% rated voltage have passed 8000 hours without a single failure. This is roughly equivalent to more than 15 years of operation under normal operating conditions.

OPERATING TEMPERATURE RANGE
 -55°C. to +125°C.

MINIMUM INSULATION RESISTANCE:
 25000 megohms at 25°C.
 1000 megohms at 125°C.

STABILITY (Capacity Drift):
 ±0.05% +0.1 mmf. MAX.

DIMENSIONS:

	DM15	DM19	DM20	DM30
L	7/16	5/8	23/32	25/32
D	11/32	15/32	15/32	27/32
T	5/32 min. to 7/32 max.			5/16
S	15/64	11/32	7/16	7/16

Leads are #22 tin-coated copper, 1/4" minimum.
 Dimensions shown are maximum except "S", the tolerance of which is ±1/64".

CAPACITY RANGES: (mmf.)	DM15	DM19	DM20	DM30
MAX. CAP. 500VDCW	400	3000	3900	10000
MAX. CAP. 300VDCW	820	3900	5100	15000
MAX. CAP. 100VDCW	820	5100	7500	20000

Minimum tolerance available is ±1/2% or ±0.5 mmf., whichever is greater.

All other specifications meet or exceed applicable MIL-C-5A and RETMA standards for similar sized molded mica capacitors.

²Theoretical tangential sensitivity for a receiver bandwidth of 10 mc/s.

¹Overall Length of MA-400 and MA-407 is .086 inches shorter than standard cartridge diode assemblies.

²Designed for use with 0.2 x 0.750 X-band Miniature Waveguide.

³1N53A is intended as a replacement for the JAN 1N53 in applications requiring broad bandwidth (12%) and increased burnout resistance.

⁴The 1N32 and MA-408 series are interchangeable with 1N21 and 1N23 series mixer diodes but insure improved signal to noise video receiver performance.

⁵In the past, mixer and video cartridge types were manufactured only in forward or reverse polarity cartridges but now for the first time are available in convenient reversible assemblies. The new reversible cartridge diodes are electrically and mechanically equivalent to and are directly interchangeable with standard types and meet all requirements of MIL-E-1 specifications.

⁶Matched pairs of all Microwave Associates mixer diodes are available and are matched to the following limits: Conversion loss ± 10%; IF Impedance ± 15 ohms; Rectified Current ± 10%; VSWR unbalance less than 10% of applied signal.

Mixers and holders for all of the above MA types are available from Microwave Associates, Inc. Write for our illustrated silicon diode brochure 56S.

You'll find the Type and Size Fuse you need

• • • IN THE COMPLETE LINE OF BUSS AND FUSETRON FUSES

The following is a representative selection of the complete BUSS line of fuses that includes standard, dual-element (slow blowing), renewable and one-time types — in sizes from 1/500 ampere up . . . plus a companion line of fuse clips, blocks and holders.

FUSETRON TYPE N and TYPE C FUSES and FUSEHOLDERS

Especially suitable for protection of TV

Ears on fuses match slots in holder.

Marking on fuse and fuseholder in direct view.

Safeguard against use of wrong size and type of fuse.

BUSS KLM HIGH INTERRUPTING CAPACITY FUSES

1 3/32 x 1 1/2 inch. Capable of safely interrupting 68,000 amps.

FUSETRON ACK CLAMP TYPE FUSES

20 to 300 amp., Dual-element type.

BUSS ACO AIRCRAFT FUSES

Mechanical Indicating — Limiter type 1 to 75 amp.

BUSS AGX FAST ACTING FUSES

1/4 x 1 in. Glass tube 1/500 to 2 amp.

BUSS Series HJ and HK Non-Indicating FUSEHOLDERS

Panel mounted for 1/4 x 1 inch and 1/4 x 1 1/4 inch fuses.

BUSS IBM SIGNAL ACTIVATING FUSES

1/4 x 1 1/4 inch. Silverplated pin pops out when fuse is blown and activates signal or alarm.

BUSS Series HJ and HK Lamp Indicating FUSEHOLDERS

Panel mounted for 1/4 x 1 inch and 1/4 x 1 1/4 in. fuses.

FUSETRON MDL FUSES

1/4 x 1 1/4 inch. Dual-element — slow blowing type 1/100 to 30 amp.

BUSS No. 4051 ONE-PIECE CLIP and TERMINAL

Solder type terminal for 1/4 inch fuses.

BUSS ABC CERAMIC TUBE FUSES

1/4 x 1 1/4 inch. High interrupting capacity fuses 1/4 to 30 amp.

BUSS No. 4409 FUSE BLOCKS

Small Base, solder type Side Terminals.

BUSS GJV PIG TAIL FUSES

1/8 to 6 amp. Solder into circuit wires.

BUSS No. 4512 FUSE BLOCKS

Full Base, Screw type Terminals.

BUSS SFE STANDARD FUSES

Fuses of different amperages are different lengths — to make it impossible to insert too large a size.

FUSETRON FNM FIBRE TUBE FUSES

1 3/32 x 1 1/2 inch. Dual-element — slow blowing type.

BUSSMANN MFG. CO.
Div. McGraw Elec. Co.
University at Jefferson
St. Louis 7, Mo.

Makers of a complete line of fuses for home, farm, commercial, electronic and industrial use.

I'm DALOHN... miniature but mighty!

You can depend on the ever-growing line of precision

miniature power resistors

Conform to Applicable JAN and MIL Specifications

Carefully designed, skillfully made for all applications where equipment must survive the most severe environmental, shock, vibration, temperature and humidity conditions.

Smallest in size; completely welded from terminal to terminal; coated with special silicone material; impervious to moisture, salt ions, vapor, gases. Temperature coefficient all types 0.00002/Deg. C.

TYPE RH Silicone sealed in die-cast black anodized, radiator finned housing. Ranges from 0.1 ohm to 55,000 ohms. Tolerances 0.05% to 5%. Three wattage ranges—25, 50, 250.

Write for Bulletin R-21B

TYPES RS and RLS

Ranges from 0.5 ohm to 55,000 ohms; tolerances 0.05% to 3%. Type RS supplied with axial leads; Type RLS with radial leads. Four wattage ranges—2, 5, 7 and 10; six sizes.

Write for Bulletins R-23B and R-30

RUGGEDIZED TYPE RSE

Housed in metal tubing for clip mounting. Ranges from 2 ohms to 55,000 ohms; tolerances 0.05% to 3%. Three wattage ranges—2, 5, 10.

Write for Bulletin R-25A

TYPES WWA and WWL

Precision encapsulated, built to surpass Mil-R-93A. Non-inductive, pi-wound. Ranges from 0.1 ohm to 5 megohms; tolerances 0.1% to 1%. Type WWA axial leads; Type WWL radial leads.

Write for Bulletin R-26A

TYPE PH

A rugged new resistor for panel mounting; sealed in black anodized finned aluminum housing. Ranges from 0.1 ohm to 55,000 ohms; tolerances 0.5% to 5%. Three wattage ranges—25, 50, 100.

Write for Bulletin R-31

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

BUYERS' GUIDE

I'm DALOHM... miniature but mighty!

You can depend on the ever-growing line of precision

deposited carbon resistors

Meet MIL-R 10509A Specifications

Manufactured under rigid controls to deliver matchless performance in any high-low resistance range.

TYPE DC

Now supplied with an improved coating material which incorporates extreme toughness, low temperature cycling, humidity resistance, and high temperature characteristics. From 10 ohms to 50 megohms; temperature coefficient 140-500 PPM per Deg. C; 1% accuracy. Five wattage ranges— $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, 1, 2; seven sizes.

Write for Bulletin R-34A

TYPE DCH HERMETIC SEAL-RUGGEDIZED

Completely high temperature alloy solder sealed in envelope of non-hydroscopic ceramic. Ruggedized for incorporation into snap-in clips. Ranges 10 ohms to 50 megohms; temperature coefficient 140-500 PPM per Deg. C. Five wattage ranges— $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, 1, 2; seven sizes.

Write for Bulletin R-27A

DCH 1

TYPE DC-5

for high voltage and/or high resistance applications

High voltage up to 20,000 VDC; resistance values up to 500 megohms; tolerance 1% to 10%; voltage coefficient less than 0.002% per volt; temperature coefficient less than 500 PPM per Deg. C. Special silicone insulation.

Write for Bulletin R-28

COLLET FITTING KNOBS

for hard use at high-low temperatures

Exclusive design permits positive locking on all standard shaft diameters with no damaging effort so frequently found when using set-screw knob types. Precision cast of thermo-setting plastic in easy grip shapes; collets interchangeable; standard pointers and indicators.

ALUMINUM DIALS

Three basic types in four sizes; calibrated 0-100 and 100-0 in 180 degree and 270 degree rotation. Also plain dials for special applications or markings.

Miniaturized, transistorized test instruments; research and development service

Alto D-21 Subminiature Voltmeter

NEW SUBMINIATURE VOLTMETER

Another Alto development for new measuring convenience! Covers 10 cps to 1 MC with 3% accuracy between 20 cps to 500 KC, 5% accuracy full range. Temperature stable 0 to 120° F, provides 1 millivolt full scale sensitivity and operates for 130 hours continuous duty on standard batteries. Has 12 decade ranges, with meter readings direct in db from -20 to +2 db, or volts 0 to 1 or 0 to 3 volts. Has output terminals for monitoring with 1,000 ohm or higher impedance devices. Input impedance 10 megohms. Is ideal as null detector, for unbalanced voltage measurements; all laboratory and field voltage tests. Weight only 30 oz. \$250.00

120 MC GRID DIP OSCILLATOR

The new, pocket-size Alto G-21 is an amazing battery-powered instrument using transistor circuitry for transmitter, receiver or system frequency measurements. It covers the range 6 to 120 MC with accuracy of $\pm 5\%$. The instrument can be held and operated with one hand. A modulator switch provides 1 KC modulation with audible head-phone signal. A gain control insures good "dip" indication. Design is extremely unique, including traveling wire frequency indicator, printed circuitry, rugged construction, shock-proof alkyd-resin case. No plug-in coils. Weighs just 18 oz. \$150.00

Alto G-21 Grid Dip Oscillator

Alto D-1 Regulation Meter

Regulation Meter

Simple, accurate device for testing any industrial power supply rated 0 to 500 volts. Measures internal resistance 0.02 ohms to 1,000 ohms. Direct reading. Also measures ripple and noise, serves as a linear ohmmeter and ac voltmeter. Compact, only 10" wide. \$295.00

ALTO RESEARCH, DEVELOPMENT SERVICE

Regularly, for leading firms across the nation, Alto completes research and development assignments. Alto personnel are uniquely qualified for development of complete rf transmitters, receivers, instruments or measuring systems from LF through SHF, special systems for generating or measuring other than rf signals, design of special components, or theoretical studies in communications and related fields.

Alto Scientific has a new, fully-equipped laboratory and factory. Facilities and personnel are cleared through Interim Secret. For complete details about facilities, experience, projects and personnel, request Brochure.

PRECISION SINGLE-TURN POTENTIOMETERS

TIC offers a complete selection of all types of single-turn potentiometers with a wide range of sizes from 1/4" to 3" diameters . . . accuracies . . . and linearities. All units are designed for unique, one-piece clamp rings to join adjacent cups securely, yet allow each cup to be precisely phased. Up to 15 cups can be ganged on a single shaft.

Patented resistance-element design offers greater flexibility in linear and nonlinear function design. Precision-bored, phosphor-bronze sleeve bearings or low-friction stainless-steel ball-bearing construction . . . centerless ground stainless-steel shaft . . . servo or tapped-hole mounting . . . and complete environmental protection.

GUIDE

TO THE WORLD'S FINEST PRECISION

Potentiometers

PRECISION TRIMMER POTENTIOMETERS

TIC provides a complete selection of trimmer potentiometers for precise, stable adjustments under all forms of adverse environmental conditions — variety of sizes and shapes available, in addition to the wide range of power and temperature capabilities.

Among the trimmers available is the original metal-film potentiometer, the TIC RFT Metallfilm. Use of metallic film as the resistance element provides infinite resolution for ultra-

fine trimming. Extremely compact and stable with an over-all size that permits stacking 7 to the square inch. A 25-turn lead screw provides extreme accuracy of adjustment.

Latest addition to the TIC Trimmer Line is the low-cost, wire-wound RWT. This unit incorporates the same compact design as the RFT. Its wire-wound resistance element design provides low-cost.

PRECISION LOW-COST P-SERIES POTENTIOMETERS

Low-cost P-series precision potentiometers are designed to meet the growing demand for economical precision potentiometers in commercial instrumentation. Precision features developed for stringent military applications have been retained in the low-cost P-series. In addition, the moulded bakelite housing minimizes distributed capacitance providing wide frequency response and stability in extremes of humidity.

Low temperature coefficient of resistance wire produces stability in extremes of temperature. Up to 6 caps can be ganged on a single shaft. Specially designed clamp rings permit independent phasing of each cup.

PRECISION MULTITURN POTENTIOMETERS

TIC manufactures a complete line of precision multi-turn potentiometers of the highest quality for precision computer, servomechanisms and electromechanical instrumentation service. The M10T provides wide temperature and resistance ranges . . . extreme electrical accuracy and stability. Extremely precise tolerances in shaft diameter, concentricity, and perpendicularity assures complete transfer of M10T accuracy to external systems. One-piece unit of all functional parts . . .

stainless-steel cover . . . and bonding of cover to one-piece base provides complete environmental protection.

The 10-turn L10S precision potentiometer combines miniaturization with performance. Wide temperature range (-55°C to $+130^{\circ}\text{C}$) and wide resistance range (1K to 100K ohms) of the L10S provide versatility.

As the leader in design and production of precision potentiometers TIC conducts extensive research and development programs to fulfill — and in many cases anticipate — the needs of the electronics industry. If your application is so unique as to require modification in present potentiometer design — or a completely new design concept — TIC's experience can help solve your design problem.

PRECISION TRANSLATORY POTENTIOMETERS

TIC Precision Translatory Series differs from other potentiometers in that resistance variation is attained by means of linear (translatory) motion rather than the conventional shaft rotational method. Unique design permits up to three completely isolated resistance elements with separate brush arms and take-offs in a single housing. The RVT translatory can be provided with both linear and nonlinear resistance functions.

	RVT
Description	Translatory
Strokes	$2\ 1/2''$ $3''$ $8''$ $12''$

Conserv. Pow. Rat. (Watts at 25°C)	$2\ 1/2$ 5 6 12
Mountings Avail.	Ybrd. Bushing

SINE-COSINE AND OTHER PRECISION NONLINEAR POTENTIOMETERS

The RVP3-S59 Precision Sine-Cosine Potentiometer represents another first for Technology Instrument Corporation. Patented double-contoured resistance element card makes possible the extreme accuracy of the RVP3-S59 and other standard nonlinear potentiometers. Double-contoured card (resistance element card is contoured symmetrically on both edges) also permits greater flexibility in the design of nonlinear functions. TIC's precision sine-cosine variable resistor RVP3-S59 is

especially designed for precision resolution of voltages into sine and cosine components. High resolution adds to the high conformity of the output to a sine function to achieve the extreme accuracy of the RVP3-S59. Because of the fact that the RVP3-S59 is a resistive device no compensation is required for reactive elements or frequency characteristics. May also be used on both AC and DC systems . . . over wide frequency ranges.

NEW

**ELECTROSTATIC GENERATOR
HIGH VOLTAGE SUPPLIES**

Well-regulated, easily-controlled high voltage supplies providing substantial and laboratory applications. These highly efficient electrostatic units offer a safe, simple and compact high voltage source for many operations, such as non-destructive insulation testing, electrostatic precipitation and particle acceleration.

Model ESR150-2

ELECTRICAL CHARACTERISTICS:

- Input: ESR150-2: 220 volt, 3 phase 50 or 60 cycles
- Output voltage: 50-150 kilovolts
- Output current: 2.4 ma. maximum
- Regulation: $\pm 2\%$ against load, $\pm 4\%$ against line
- Stability: EPR150-2: 220 volt, 3 phase 50 or 60 cycles
- 5-160 kilovolts
- 2.0 ma. maximum
- $\pm 0.2\%$ against load; better than $\pm 0.1\%$ against line
- $\pm 0.02\%$ per minute with a maximum of 1% during warm-up

NEW

WIDE RANGE FREQUENCY CHANGER

Model FCR250

Latest, most versatile addition to the Sorensen line of regulated electronic frequency changers, the Model FCR250 converts your 50 or 60 cycle line to regulated output at any desired frequency between 320 and 1000 cps. This portable, practical unit can solve a wide variety of your laboratory, test or production requirements.

ELECTRICAL CHARACTERISTICS:

- Input: 105-125 VAC, 1 phase, 50-65 cycles
- Output voltage: 115 VAC, adjustable 105-125V
- Output Frequency: 320-1000 cps in two ranges
- Voltage regulation: $\pm 1\%$
- Frequency Regulation: $\pm 1\%$ ($\pm 0.01\%$ with auxiliary frequency standard fixed at 400 cycles)
- Load range: 0-250 VA

other units

Model E-6-15A

NOBATRONS (Reg. U.S. Pat. Off.)
(low-voltage, high-current, regulated DC sources).

Provide stability comparable to batteries and eliminate recharging interruptions, fume and acid hazards, installation difficulties.

Models available (numbers indicate voltage & current)
E-6-15A, E-6-40A, E-6-100A, E-12-5, E-12-15, E-12-50A, E-28-5, E-28-10, E-28-30, E-28-70, E-28-150, E-48-15, E-125-10, E-200-5.

ELECTRICAL CHARACTERISTICS

Input 95-130 VAC, 1 ϕ , 50-60 cycles.
190-260 VAC, 1 ϕ , for E-28-70,
120/208, 3 ϕ , 4-wire wye for
E-28-150.
Reg. accuracy $\pm 0.2\%$ against line (105-125
volts or 200-240 volts).
 $\pm 2.3\%$ against load (1/10 to
full).
Ripple 1% max. at 60 cycles.
Output voltage & volt units.
adjustment range 5.6 to 7.7 volts in two ranges.
E-12-50A,
9.0 to 17.4 volts in two ranges.
E-200-5, $\pm 50\%$,
all others $\pm 10\%$, -20% .
Recovery time 0.2 seconds on all models but
E-28-70 (0.55 sec.) and
E-28-150 (0.3 sec.)

Model SR2

NOBATRON-RANGERS

(wide-range-variable regulated DC sources).

These versatile and popular instruments have electrical characteristics similar to the standard Nobatrons, except that output voltage is continuously adjustable.

ELECTRICAL CHARACTERISTICS

Input 95-130 VAC, 1 ϕ , 50-60 cycles for SR30 and SR100.
190-260 VAC, 1 ϕ , 50-60 cycles for the SR2.
Reg. accuracy $\pm 0.25\%$ at any voltage setting
Ripple 1% RMS max.
Output: Model SR100 SR30 SR2
VDC 5-135 5-30 100-300
Amps 1-10 3-30 1-10

Model 600B

B-NOBATRONS

(high-voltage, low-current, regulated DC supplies).

Designed to meet the broadest technical and economical requirements. The internal impedance figures given are from measurements in accordance with IRE specifications for measurement of power supply internal impedance.

ELECTRICAL CHARACTERISTICS

Model	325B0	550B0	500B0	600B	1000B
Output voltage (VDC)	0-325	0-500	0-500	0-600	700-1100

Model FL5015

FILTER SECTIONS FOR NOBATRONS

The ripple voltage of all Nobatrons is 1% of the nominal output voltage setting, under worst conditions. This is adequate for most applications. If, however, less ripple is required, Filter Sections are available for use with units rated up to 50 amperes, which will reduce the ripple to 0.1%.

Model DE-28-10

400-CYCLE INPUT NOBATRONS

These instruments are not normal production items but are available on an extended delivery schedule.

ELECTRICAL CHARACTERISTICS

Output voltage and load range Model DE-6-40 — 6 VDC at 4 to 40 amperes.
Model DE-12-10 — 12 VDC at 1 to 10 amperes.
Model DE-28-10 — 28 VDC at 1 to 10 amperes.
Input voltage 105-125 VAC, 1 ϕ , 360-440 cycles.
Reg. accuracy $\pm 0.25\%$.
Ripple 1% RMS maximum.
Recovery time 0.2 seconds.

HERMETICALLY SEALED & MILITARIZED REGULATORS

The wound components of many Sorensen instruments can be hermetically sealed by the Fosterite process or by standard potting. Sorensen also builds equipment to meet MIL-T-27 and JAN specifications on resistance to shock, vibration, humidity, etc., as well as to the new class H type high temperature design.

Model MA65A

TUBELESS REGULATED DC SOURCES

Designed for heavy-duty industrial applications, these instruments utilize magnetic amplifier principles and offer the utmost in reliability.

ELECTRICAL CHARACTERISTICS

Model	MA65A	MA640	MA2550
Input (VAC, 60 ϕ)	105-125, 1 ϕ	105-125, 1 ϕ	190-230, or 210-250, 3 ϕ , 4-wire, wye.
Output (VDC)	5-64.4, adj.	4.5-7.3, adj.	23-32, adj.
Load range	0-3 amp.	0-40 amp.	0-50 amp.
Ripple	1% max.	1% max.	3% max.
Reg. accuracy	$\pm 0.2\%$ against line at load	$\pm 1.0\%$ for any combination of line and load	
Recovery time	0.15 sec.	0.20 sec.	0.5 sec.

Model MA650

PRECISION REGULATED TUBELESS DC SOURCE

A transistorized precision regulated DC source utilizing magnetic amplifier principles. This highly-stable, temperature-compensated unit is Sorensen's new design for use with the Beckman Model DU Spectrophotometer.

ELECTRICAL CHARACTERISTICS

Input 105-125 VAC, 1 ϕ , 60 cycle.
Output #1 — 6 VDC adjustable internally $\pm 5\%$, 5 amperes load.
#2 — 6 VDC, 100 milliamperes load.
#3 — 2 VDC, 40-60 milliamperes
Reg. accuracy $\pm 0.1\%$.
Ripple 15 mv RMS max. on #1 and #2
5 mv RMS max. on #3
Stability Typical stability after a 30 minute warm-up is .01% for an eight hour period.

Model MR3215
MAGNETIC RANGE
(tubeless wide-range variable regulated DC source).

A rugged, tubeless DC source requiring negligible maintenance, the MR3215 is a highly versatile unit providing continuously adjustable output voltage.

ELECTRICAL CHARACTERISTICS

Input 105-125 VAC, 1 ϕ , 50-60 cycles
Output 5 to 32 VDC at 1.5 to 15 amperes, continuously adjustable.
Reg. accuracy $\pm 0.5\%$ against line.
Ripple 1% RMS at 32 volts.
Recovery time 0.2 sec.

AC VOLTAGE REFERENCE SOURCES

These instruments provide highly stable AC voltage for many laboratory uses such as the direct calibration of voltmeters and oscilloscopes.

Model VRS-AC750

ELECTRICAL CHARACTERISTICS

	Model VRS-AC 10	Model VRS-AC 750
Input voltage	105-125 VAC, 1 ϕ	
Output frequency	50-60 cycles; also to 400 cycles with minor loss of accuracy	60 cycles \pm .5
Output voltage	10 mv to 10 v in 3 ranges	1-799 v in 1 v steps
Calibration accuracy	\pm 0.1%	
Reg. accuracy	\pm 0.25% with line; \pm 0.25% with load of .5 megohm or higher	overall accuracy * \pm 0.25%
Distortion (generated by instrument)	negligible	1% maximum

*Much greater accuracy possible through correction curves.

Model 1001

PRECISION AC REGULATORS (electronic).

Giving ultra-precise, \pm 0.01% regulation, these instruments are rugged and serviceable, as proved by hundreds of applications in the field. Models available with capacities of 1000VA and 2500VA.

ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 ϕ , 50 and 60 cycles.
Output	115 VAC, 1 ϕ , adj. 110-120.
Reg. accuracy	\pm 0.01% against line, \pm 0.01% against load.
Distortion	3% maximum.
P.F. range	Unity to 0.7 lagging.
Load range	0 to full load.

Model 10005

AC REGULATORS (electronic).

Utilizing the original Sorensen circuit and incorporating the Safety Diode, these regulators are noted for accuracy, economy of operation, easy maintenance. Models available with capacities from 150VA to 15KVA, single phase.

Models available (Numbers denote VA capacities): 150S, 250S, 500S, 1000S (-25 also), 2000S, 3000S (-25 also), 5000S (-25 also), 10000S (-25 also), 15000S (-25 also).

ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 ϕ , 50 or 60 cycles \pm 10%. 190-260 VAC in ".25" models.
Output	115 VAC adj. 110-120; 230 VAC with ".25" models.
Reg. accuracy	\pm 0.1% against line, \pm 0.1% against load.
P.F. range	Unity to 0.7 lagging.
Distortion	Varies to 3% max. under worst conditions.
Load range	0 to full load.

THE WORLD'S AUTHORITY ON REGULATED POWER

Whatever your power control requirements, for industry, military applications or research, Sorensen can furnish a unit which meets your specifications exactly. A wide variety of instruments available in a broad range of capacities. Sorensen offers unusual experience in the engineering and production of special equipment for unique regulation problems.

Model D2500SAN

100-CYCLE AC REGULATORS

These instruments are available in models D1500SAN, D5000SAN, D12000SAN, D25000SAN (numbers 250, etc. denote VA capacities).

ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 ϕ , 400 cycles \pm 10%.
Output	115 VAC, 1 ϕ , adj. 110-120.
Reg. accuracy	\pm 0.25% against line, \pm 0.25% against load
Distortion	5% maximum.
P.F. range	Unity to 0.7 lagging.
Load range	0 to full load.

Model MVR500

MVR's (magnetic voltage regulators).

These magnetic voltage regulators are tubeless, give utmost reliability with good regulation. Very compact, they are ideally suited for incorporation as components. Available in capacities of 15, 30, 60, 120, 250, 500 and 1000 VA. MVR's with 6.3, 12.5 and 230 volt outputs are also planned.

ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 ϕ , 60 cycles.
Output	115 VAC nominal, 1 ϕ .
Reg. accuracy	\pm 0.5% against line.
Load range	0 to full load.

Model MA10005

TUBELESS AC REGULATOR

For unattended installations requiring extremely dependable automatic line regulation, the tubeless MA10005 offers stable long-life performance with an absolute minimum of maintenance.

ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 ϕ , 50 or 60 cycles
Output	115 VAC, adj. 110-120 v.
Reg. accuracy	\pm 0.5% against line, \pm 0.5% against load.
P.F. range	Unity to 0.7 lagging.
Distortion	3% max. at 60 cycles.
Load range	0 to 1000 VA.

CONTROLLED POWER FOR RESEARCH AND INDUSTRY

FREQUENCY CONTROL

Sorensen electronic frequency changers convert 50 or 60 cycle line to 400 cycles regulated or 60 cycles regulated. These instruments have found manifold uses in laboratories, production lines and inspection sections.

1000VA FREQUENCY CHANGERS

Model FC 1000 (45-65 cps out.)
Model FCD 1000 (360-440 cps out.)

ELECTRICAL CHARACTERISTICS

Input	208 or 230 VAC $\pm 10\%$ 1 ϕ , 50 or 60 cycles
Output voltage	115 VAC, adj. 105-125V
Voltage regulation	$\pm 1\%$
Output frequency	(FCD 1000) 360-440 cps (FC 1000) 45-65 cps
Regulation accuracy	$\pm 1\%$ ($\pm 0.01\%$ with auxiliary frequency standard fixed at 50, 60 or 400 cps.)
Load range	0-1000 VA

Model FCD1000

SPECIAL EQUIPMENT

A few examples of Sorensen's wide range of specially-engineered equipment:

AIRBORNE ELECTRONIC FREQUENCY CHANGERS AND INVERTERS

Sorensen has designed and built a wide variety of frequency changers and inverters for incorporation in military aircraft. These instruments meet a great many different specifications and are not considered standard instruments. Each customer requirement is quoted on individually. For the most part, the changers convert variable (320-1000~) input power to precision ($\pm 0.05\%$) output frequency. Most models are also voltage regulated ($\pm 1\%$) with minimum distortion (5-10%).

Sorensen airborne inverters are built to convert 28 VDC input to 400-cycle, 3-phase output, with output frequency accurate to 0.05% over wide ambients.

Sorensen's wide experience with commercial and military frequency changers may well supply the answer to your precision frequency problems. Your inquiries are earnestly solicited.

COMPUTER POWER SUPPLIES

A major extension of Sorensen's know-how in the field of regulated power has been to the design of computer power supplies. Broad experience has been accumulated in the design and production of special power sources for electronic data-processing equipment. Let Sorensen apply this experience to your computer power supply problems.

COAST-TO-COAST

The authorized Sorensen representatives listed below are at your service. Do not hesitate to call on the one nearest you for advice on regulated power requirements.

WRITE FOR LITERATURE

Send for complete information, including specifications, performance data and quotations. Product data sheets are issued on all new units as they become available. Inquiries regarding special applications and specifications are invited. Address Sales Engineering Department, Sorensen & Company, Inc., 375 Fairfield Avenue, Stamford, Conn., or your local representative. In Europe, please contact directly Sorensen-Ardag, Eichstrasse 29, Zurich 3, Switzerland.

TACO eight foot dish in a typical installation.

SPECIALIZED ANTENNA SYSTEMS

SUPPLEMENTING our line of Special Purpose antennas embracing the frequencies of 50 MC through 4000 MC, our engineering design and production facilities have been expanded by the addition of dishes and multi-driven element antennas for all communication purposes. **IN SPECIALIZING ON ANTENNAS WITHIN THE FREQUENCY RANGE OF 50 THROUGH 4000 MC, TACO MAINTAINS A HOLD ON TOP PLACE WITHIN THIS PORTION OF THE SPECTRUM.**

TACO developed and built the special Mini-Track antenna design for tracking the earth satellite in the Vanguard project.

RUGGEDIZED COMMUNICATION ANTENNAS

Illustrated is one of the fully welded broad-band communications antennas designed and built by TACO. Extensively used in communications, these ruggedized antennas provide day in and day out uninterrupted service so vital in the communications field.

TACO's communication antennas embrace sixty-three (63) models, each having a specific application within the frequency range of 50 to 4000 MC. Complete details are available in a bound brochure. When requesting catalogs, it will help if you specify your application and the frequency range.

COAXIAL CABLE TERMINATION RESISTORS

IRC manufactures concentric disc type resistors in 9 different sizes—outer diameters ranging from .240 to 1 1/4". Rated wattage .8/sq. in., Standard Tolerance 20%, Temp. Rise at rated load 55°C., Max. Operating Temp. 80°C.—Values available from 5 ohms to 25,000 ohms. See Data Bulletin T-1 for individual specifications. Prices upon request.

HIGH FREQUENCY WAVE GUIDES

IRC Resistance strips are available in 6 different widths—from 7/8" to 2 3/4", lengths 12 1/2". Rated wattage .8/sq. in., Standard Tolerance 20%, Temp. Rise at rated load 55°C., Max. Operating Temp. 80°C. Values available from 19 ohms/sq. in. to 1.0 megohm/sq. in. See Data Bulletin T-1 for individual specifications. Prices upon request.

An incremental synchro positioner before wiring to header and hermetic sealing. The synchro rotor is stepped in one or fifteen degree increments clockwise or counterclockwise depending upon which of four coils is momentarily energized by a d-c pulse. The synchro can be rotated any number of degrees or revolutions. Cylindrical member next to the synchro resets it to electrical zero if a pulse is applied to "reset" circuit.

Type 9 motor-driven induction generator driving two Type 11CT synchros through gear train having ratio of 1500:1. Slip clutch permits one control transformer to operate when second control transformer has shaft restrained by stops. Cams close two switches during specified degrees of synchro rotation.

Equipment to indicate phase angle difference between two like frequency signals received over radio links. One chassis is a 400-cycle oscillator supply for two indicators, other chassis combines impedance matching and a servo amplifier for one indicator. Complete system includes an oscillator, two indicators, and two amplifiers.

**control
problems
like
yours**

...with but one solution

Typical of all Transicoil solutions are the three illustrated here. They "do the job right" because each is designed for a single application... by a company whose major function is to provide complete servo assemblies precisely engineered and manufactured to solve individual servo control problems.

Of course, if you want servo components, you'll find Transicoil's control motors, motor-gear train combinations, motor-gear train-generator combinations, and servo amplifiers built to the highest order of precision and accuracy. But it is in the "package" engineering of unique assemblies that Transicoil's experience and creative imagination offer the greatest value. And in most cases, these assemblies cost no more than the individual components would purchased separately. *That's why it pays to check your servo control problems out with Transicoil first.* For further information, call your nearest Transicoil representative.

thinking of automation ?

If you have a problem in the field sometimes referred to as automation, and have not worked on it before because you just haven't had the time, and outside organizations would only handle it on a "research and development" boondoggling

basis, Transicoil may solve it for you. You will be under no obligation and you'll pay only for results—on a fixed fee basis for equipment delivered and performing properly. Transicoil is a manufacturer—not a research and development organization!

RUGGEDIZED METERS

1½" Square

Meets MIL-M-10304 (SIG. C.) Accurate within ±3% of full scale deflection. Basic d-c ranges 0-100 d-c va, 0-3

d-c ma, and 0-10 d-c mv. RF and VU meters and other ranges also available.

SUB-MINIATURE ROTARY SWITCH

Wafer size 1" x 7/8". Twelve positions per deck . . . one to three decks. One, two, three or four poles per deck. Shorting or non-shorting contacts. Positive indexing with 30° spacing.

SPECIALISTS

in Sub-Miniature Panel Meters

- FIRST** in U.S. to manufacture 1" diameter meter.
- FIRST** to produce 1" and 1½" illuminated meters.
- FIRST** to produce 1½" self-contained DB and VU meters.
- FIRST** to produce Miniature Side Indicators.

1" ROUND

MODEL 100

1" barrel diameter. Full 90° scale arc, scale length .770". VU, DB and illuminated meters also available with external accessory attached.

MODEL 150

MODEL 153

1½" ROUND and SQUARE

1½" barrel diameter. Full 90° scale arc, scale length 1.322". Model 153 meets MIL-M-3823 requirements. Also available: self-contained VU and DB meters — illuminated meters with lamp housing attached.

SIDE INDICATORS

• Greater readability • Smaller Panel Space • Horizontal or vertical mounting singly or with scales together.

1.3" TWO SIZES AVAILABLE:

Model 1120 Scale length 1.3" Anodized aluminum case.

Model 1145 Scale length 2.75" Plastic case. Front external zero adjuster.

MODEL 1145

SINGLE HORIZONTAL MOUNTING

MODEL 1120

DUAL VERTICAL MOUNTING

MINIATURE MULTITESTER

Tests resistances and voltages. Sensitivity: 8000 ohms per volt on a-c ranges; 10,000 ohms per volt on d-c ranges. Accurate to ±2% of full scale deflection on d-c, ±5% on a-c.

ENGINEERING DATA SHEETS COMPLETELY DESCRIBING THESE INSTRUMENTS ARE AVAILABLE. WRITE FOR YOUR COPIES TODAY.

Industrial Uses Widened by New Features of GPL ii-TV®

Many additional industries are benefited, many established industrial applications made easier, by new closed-circuit equipment which has been added to the GPL ii-TV* System.

Have you a task that can be simplified by the instantaneous transmission of visual data? Like monitoring an assembly line or a remote machine? Controlling a complicated or dangerous process? Surveillance? Sales training? Stockholder relations? GPL ii-TV can help you solve these and hundreds of other business and industrial "seeing" problems.

The new GPL ii-TV equipment incorporates the same skilled design, the same top quality material and construction, for which all GPL television equipment is noted. When you use GPL ii-TV you are assured of outstanding picture quality, ease of operation and minimum upkeep. Moderate initial cost is often quickly offset by savings the equipment makes for you.

*The industrial-institutional TV System manufactured by General Precision Laboratory.

- **Basic GPL ii-TV Camera**; weighs only 5 lbs. Will resolve better than 500 lines with aperture correction to maintain high definition pick-up standards. Produces pictures with better than 20 db signal-to-noise ratio at light levels as low as 5 foot-candles. Utilizes standard 16mm C type lenses; contains only two tubes, in addition to 6198 vidicon pick-up tube.
- **Camera with Remote-Control Pan and Tilt Indoor Mounting**; provides 360° camera viewing, 90° tilt. Position accurately indicated within ± 1° on control box. Completely enclosed drive mechanisms deliver a pan speed of 1 rpm and tilt of 0.5 rpm.
- **Remote-Control Outdoor Mounting**; weather-proof under all conditions. Permits 360° camera viewing, 90° tilt. Heavy-duty pan and tilt unit equipped with solenoid brakes to prevent drift, regardless of wind velocity.
- **GPL ii-TV Control Unit**; 35 lbs. including case. Video, sweep, sync generator chassis and control panel are plug-in units. Control panel may be removed from its associated units and operated remote to provide control over beam, focus, target, blanking and gain. Wall or rack mountings for permanent installations.
- **GPL ii-TV Switching Unit**; permits push-button selection for viewing outputs of four cameras from a single control unit. Units can be cascaded to provide viewing outputs of any number of cameras. With sequencing equipment, makes possible automatic remote surveillance of entire production line or process.
- **GPL ii-TV Monitors**; industry standard; high-quality, continuous duty monitors used by TV broadcast stations. Video bandwidth essentially flat to 6.5 mc. Rack-mounted or housed in utility cabinet.
- **GPL TV Projection Set**; complete system for both "off-the-air" and video line signals. Regulated 40 KV power supply provides brilliant, steady pictures up to 9 x 12 ft. High quality sound circuits feed standard PA system. Wheel-mounted, for mobility.

**COMPUTERS
CONTROLS
COMPONENTS
BY LIBRASCOPE**

X-Y PLOTTERS

A new series of highly accurate graphic data recorders, with input amplifiers available for resistance or DC voltage inputs. Easy to load and always visible, the plotting table accepts paper up to 11 by 17 inches. Point plotting or curve tracing is accomplished with equal ease, with 1 second full scale response. Static accuracy is 0.1% and dynamic accuracy is 0.5%.

INPUTS TO PLOTTERS OR FOR OTHER DIGITAL SYSTEMS APPLICATIONS

PUNCHED CARD OR PUNCHED TAPE CONVERTERS
Units available to convert output from IBM Summary Punch or any code from Punched Paper Tape Readers.

DECIMAL KEYBOARDS
For manual insertion of tabulated data.

BINARY CONVERTER
Converts 9 bit, 2 channel data from thyatron buffer storage of parallel digital computers.

MECHANICAL SINE WAVE GENERATOR

Used in frequency syntheses to determine data on transfer functions of automatic control systems and components.

SPECIAL COMPUTERS AND CONTROL EQUIPMENT

Librascope manufactures mechanical and electrical analog computers and digital computers for military and commercial purposes. You are invited to submit your special computer requirements to our engineering staff.

LIBRASCOPE, INC. •

When ordering or seeking information please mention *Electronics Buyers' Guide*.

ELECTRONIC COMPONENTS

ANALOG-DIGITAL CONVERTERS

A series of shaft position to digital encoders featuring serial/parallel time sharing, non-ambiguous brush systems. The following codes are available: Gray, Binary or Binary-Coded Decimal.

MAGNETICALLY GATED TRANSISTORIZED SERVO AMPLIFIERS

For driving servo motors, AC electro-hydraulic valves and other related torque devices in all types of control and positioning applications.

MAGNETIC LABORATORY DRUMS

The Model 179 Laboratory Drum offers variable speed and extra flexibility in head arrangement for development and testing of computer components and storage devices. Any desired combination of data storage or clock channels can be selected. Up to 14 heads and 12 channels.

READ AND RECORD HEADS

For recording or reading of magnetic drum memory systems in digital computers. High read-back signal, low noise factor.

MECHANICAL COMPONENTS

SINE-COSINE MECHANISM

Self-contained unit converts angular rotation into linear sine and cosine movements or solves many trigonometric functions.

BALL & DISC INTEGRATOR

Precision unit with lifetime lubrication. Used in totalizing, rate determination, differential analysis. Also serves as closed loop servo-element or variable speed drive.

HOLLOW SHAFT DIFFERENTIAL

Precision computer component for measuring angular positions or velocity sums. May be installed or removed without disassembly of unit or differential itself.

LINKAGES

Various linkage computing elements are available, including: addition-subtraction linkages, linkage multipliers and function generators to express exponential, logarithmic and square root functions.

ENGINEERS, PHYSICISTS AND MATHEMATICIANS: For a rewarding career with a company that offers optimum stability with job diversification, write Librascope today Address inquiries to Don Webster, Chief Engineer.

PRECISION SYSTEMS AND COMPONENTS *in production*

NAVIGATION SYSTEMS

Kearfott Systems include 3 gyro, 3 and 4 gimbal platforms. They provide precise azimuth and vertical reference. Also Directional Gyro Compass Systems.

The Gyro Guide System shown provides Latitude Corrected Gyro and Magnetic Slaved Heading information. Weighs 20 lbs. Max. random drift 3°/hour.

GYROS, SERVO MOTORS, SYNCHROS

Kearfott produces a complete line of gyros, servo motors, and synchros to satisfy every aircraft control requirement.

FLOATED INTEGRATING GYRO

3 Gyro Platforms, Floated Rate Integrating Gyros, Vertical, Free, Directional, Rate Gyros and Gyro operated rate switches—compact, lightweight, hermetically sealed.

SERVO MOTORS, SYNCHROS

High torque, low inertia Servo motors, Servo-motor-Generators, inertial and viscous damped Servo motors 3/4" to 1-3/4" diameter, Synchro Transmitters, Control Transformers, Resolvers, Repeaters and Differentials in size 8, 11 and 15.

MICROWAVE EQUIPMENT

Kearfott offers engineering-design service, manufacturing facilities and a wide experience in the production of microwave components and test sets.

COMPONENTS

Including attenuators, directional couplers, crystal mixers, twists and tees for S, C, Xb, X and Ku bands.

TEST SETS (for X, C, and Ku)

A four-in-one instrument for functional testing of radar or beacon. Includes Wavemeter, Spectrum Analyzer, Power Monitor, and signal generator.

Bulletins giving physical and technical data on the various Kearfott Products will be sent on request. The Kearfott organization is available to assist in the development and manufacture of other precision components you may require.

FERRITE MICROWAVE COMPONENTS AND RADAR TEST SETS

KEARFOTT FERRITE ISOLATORS

For superior performance—KEARFOTT ISOLATORS—*custom* designed to fit the particular combination of characteristics desired for *your* radar system. For high or low power— for broad or narrow band use and with db ratios of isolation to insertion up to 150 to 1—KEARFOTT ISOLATORS are precisely planned to fit the available space and configuration.

FARADAY ROTATION
ISOLATOR

DIFFERENTIAL ABSORBER
ISOLATOR

DIFFERENTIAL PHASE
SHIFT ISOLATOR

Kearfott offers 3 types of Ferrite Isolators to assure the optimum performance of all microwave applications.

KEARFOTT FERRITE DUPLEXERS

The application of Ferrites to duplexer designs offers broad opportunity for improvement of radar performance and reliability. Investigate Kearfott Ferrite Duplexers— designed to meet your specific radar requirements.

THE FERRITE DUPLEXER ILLUSTRATED IS IN PRODUCTION AND IS BUT ONE OF MANY POSSIBLE CONFIGURATIONS NOW AVAILABLE TO MEET YOUR REQUIREMENTS.

KEARFOTT FERRITE ATTENUATORS AND SWITCHES

Ferrites offer new circuit possibilities and product improvement for AGC and electronic switching of R.F. energy. Kearfott designs, meticulously tailored to your most exacting requirements, assure maximum performance and reliability with minimum weight.

The 30 db attenuator illustrated, requires less than 3 watts control power.

KEARFOTT UNIVERSAL RADAR TEST SET

Completely checks radar receiver and transmitter operation on the production line, or in the field. Signal Generator, Spectrum Analyzer, Power Monitor and Frequency Meter functions are immediately available at a turn of the function switch. Improved variable pulse width with variable delay, in addition to FM, Square Wave and C. W. modulation.

Write for complete information on this multi-purpose R.F. Test Set. Available from stock—for X-Band, Ku Band and C Band.

See Kearfott for Precision Airborne Instruments and Servo System Components

Kearfott's complete Microwave engineering and fabrication facilities are at your command. Inquiries on your Microwave problems will be treated in confidence.

B.F. Goodrich

No more D.O.A.'s for your product

"Shipping damages resulting in loss ratios as high as 20% have been eliminated with Texlite package cushioning material", says Mr. Alfred D. Brown, packaging engineer for United Mineral and Chemical Corporation, Brooklyn, New York.

"Whether the problem is to package and protect unfired ceramics or live war-heads" he continued, "the fact is when Texlite has been correctly engineered for a job, the user has discarded other types of cushioning and converted to Texlite exclusively.

"Texlite differs from ordinary rubberized hair cushioning in that it's a scientifically prepared industrial product.

We can recommend, with complete accuracy, the exact amount of Texlite necessary for complete and total protection thus reducing freight and packaging charges to a practical minimum."

Texlite as a spiral-wound coil requires 25% less thickness than flat-loaded rubberized hair—in terms of cubage is less expensive by a minimum of 8%. Engineered in this manner, Texlite will not mat down. It shows only 1/7 of the height loss of flat-loaded hair under the same weight, per each 1,000 hours tested.*

Mr. Brown is shown here with a sheet of Texlite which easily cuts to any shape with a paper cutter or sharp knife. If you wish, Texlite can be pre-cut to your specifications.

* Pat. Pending

If you would like to know more about Texlite, please write to the address below.

Continental Connectors

AMERICA'S FASTEST GROWING LINE

*featuring the two most important
connector developments in recent years*

PRINTED CIRCUIT CONNECTORS with "BELLOWS ACTION CONTACTS"

MINIATURE and SUBMINIATURE CONNECTORS with POLARIZING SCREWLOCKS

Pat. #2746022

A) PRINTED CIRCUIT CONNECTORS ("Series PC") New "Bellows Action Contacts" grip printed circuit board over 100% of board contact area. Contacts in single or double rows permit up to 56 connections. Drawings demonstrate how bellows contact grips oversized and undersized board with equal retention. To fit $\frac{1}{16}$ ", $\frac{1}{32}$ ", and $\frac{1}{8}$ " boards.

B) POLARIZING SCREWLOCKS* to prevent accidental disconnection due to vibration now available in Series 20 Miniature and Series SM-20 Subminiature Continental Connectors.

C) SERIES 20 MINIATURE CONNECTOR with Hood and Polarizing Screwlocks. Available with 7, 8, 9, 11, 14, 18, 20, 21, 26, 34, 41, 50, 75 and 104 contacts for #20 AWG wire. Rating: 5 amps; Voltage: 2100V. RMS.

D) SERIES 20 with 50-ohm matched impedance coaxial contacts and 14 or 18 standard #20 contacts. Rating: 5 amps; Voltage: 2100V. RMS.

E) SERIES CCC 20 in stainless steel shells, recommended for airborne applications. 37 contacts for #20 AWG wire. (15 and 25 contacts on request.)

F) SERIES E-Z Easy Release Connectors with up to 34 solder cups or solderless taper pin contacts. Aluminum hoods, polarizing screwlocks and coaxial contacts available on order. Rating: 10 amps; Voltage: 4500V. RMS.

G) SERIES 1300 MINIATURE AN-TYPE Connector with one-piece molded inserts. Rating: 7.5 amps; Voltage: 3000V. RMS. Two shell sizes: 3, 4, 5 contacts, and 15, 19, 27, 31 contacts.

*Patent Pending

CONTINENTAL "SERIES 20" MINIATURE CONNECTORS

EASY RELEASE

MINIATURE AN-TYPE

HIGH VOLTAGE AN-TYPE

HERMETIC SEAL CONNECTORS

POWER CONNECTORS

TERMINAL STRIPS

SUBMINIATURE CONNECTORS

SERIES 800 HIGH VOLTAGE AN-TYPE Connector for AN-36 shell. 15 contacts. 3 high voltage contacts in center are removable. Current ratings: 10 and 20 amps.

SERIES HC-20 HEXAGONAL Hermetic Plug has solid glass insert. Choice of 4, 5, 7, 9 and 10 contacts.

SERIES H-20 Hermetic Plug for #20 AWG wire. Contacts individually impression sealed in glass. Fits Series 20 receptacles. With polarizing screwlock or guide pin and guide socket.

SERIES 14 Power Connector (illustrated with hood and polarizing screwlock.) Choice of 7, 9, 10, 15 or 18 contacts for #14 AWG wire. Rating: 10 amps; Voltage: 4500V. RMS.

L) SERIES MB Terminal Strip. Choice of 6 or 10 contacts. Mounting holes permit stacking in small area. For #20 AWG wire. One side accommodates taper tab solderless wiring, other side conventional wiring.

M) SERIES SM-20. Model shown has 11 contacts for #20 AWG wire. Available in 7, 11, 14, 20, 26 and 34 contacts. Rating: 5 amps; Voltage: 1900V. RMS.

High precision, dependable Continental Connectors have achieved a reputation for excellence throughout the aircraft and electronics industries. The widest range of applications can be made from our standard line.

For special designs and technical data sheets on these connectors write Electronic Sales Division, DeJUR-Amsco Corporation, 45-01 Northern Blvd., Long Island City 1, New York.

BUYERS' GUIDE

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

**For Product Data ...

you

Specialists in the control field for more than 30 years, AEMCO engineering offers you fresh, new ideas . . . ideas that save you money in automatic control . . . ideas that save you valuable time. Yes, AEMCO is selling service as well as a complete line of relays and both automatic re-set and sequence timers.

RELAYS

At AEMCO we specialize in both the design and manufacture of relays to your mechanical and electrical specifications. Should one of hundreds of stock AEMCO relays fail to meet your specialized requirements exactly, we will design and build a unit not only to meet, but to exceed those specifications.

- Open or can types
- Miniatures and sub-miniatures
- Power Relays
- Delayed make or break types
- Circuit control relays
- Current and potential relays

For detailed information on the complete AEMCO relay line, write for your copy of Relay Catalog H.

**AUTOMATIC RE-SET AND
SEQUENCE TIMERS**

Now control that vital operation . . . automatically! Available in many different models with automatic or manual reset, AEMCO industrial time controls help eliminate waste . . . help speed up production. Variations are available on standard cycling models . . . dials are easy to read, easy to set.

- AR and MAR—Automatically re-cycles at end of cycle
- ARD and MARD—Re-cycles with an interruption of current
- ARR—Repeating cycle
- MARA—Two circuits—both closed and open. Circuits completely adjustable
- No. 400—Sequence timer. Momentary start—automatic stop or continuous cycling. Any number of circuits.

For detailed information on AEMCO industrial time controls, write for your copy of AEMCO's Time Control Bulletin.

MANKATO, MINNESOTA

Manufacturers with products to sell in the Field of Nuclear Energy find that advertising in NUCLEONICS is a sure-fire method of moving those products because they reach 11,000 potential purchasers through the advertising pages of NUCLEONICS.

From Absorbent Paper to Zinc Bromide . . . products in the Field of Nuclear Energy are

SOUGHT and BOUGHT by important Physicists, Metallurgists, Geologists, Biologists, Physicians, Radiologists, Bio-Chemists, Engineers, Technicians and Management because these important buying influences go first to the sales pages of NUCLEONICS for product data in Nuclear Energy.

Custom-Made FOR YOUR MACHINES
FOR YOUR SPECIFIC
APPLICATIONS

- **CLEAN, STRAIGHT-CUT EDGES** — mean superior windings and minimum breakage, less down time and fewer rejects.
- **FREE UNWINDING** — no sticking, tearing, or wrinkling, permitting maximum winding speeds.
- **QUALITY CONTROL METHODS** — utilizing the most modern of electronic devices — assure uniform quality, accuracy and maximum yield.
- **THREE TYPES OF TOP QUALITY FOIL** — now available for your selection: DRIWYND — SILWYND — SLIKWYND.

ALUMINUM FOIL IN ROLLS SPECIFICATION INDEX

AT LAST

A SOLDERLESS TERMINAL
THAT FITS ALL

TYPES OF PRESSURE
CRIMPING TOOLS!

FEATURES:

- Full 1/4" working shank on all types
- Provides a vibration proof connection
- Manufactured from highest quality pure copper, electro-tinned for corrosion resistance
- Has tensile strength exceeding underwriters and government specifications
- Carries a load capacity greater than that of the wire itself
- Can be custom engineered for unusual applications
- Stock items that will meet most wiring needs
- Insulated types, color coded for ease in selection to fit various wire sizes (red, 22-16; blue, 16-14; yellow, 12-10)
- Bevel mouth for fast and easy insertion of wire
- V-type grooves in throat for firm grip on wire
- Off shelf, immediate delivery, on all types

SIZES:

Terminals (Fixed Insulated Insulation Grip, Fixed Insulated Terminal, Non-Insulated) 22-16, 16-14, 12-10.

Butt Splices (Insulated or Non-Insulated) 22-16, 16-14, 12-10

Pigtails (Nylon or Vinyl Insulated) 22-14, 16-10

Parallel Splices (Insulated or Non-Insulated) 22-16, 16-14, 12-10

Tags (Insulated or Non-Insulated) 22-16, 16-14

Sample kits available on request. Write today for complete details on this revolutionary solderless terminal development.

THE FIVE STAR COMPANY
10 WEST MAIN STREET
PLANTSVILLE, CONN.

1. SYSTEMS

BASIC "150" assemblies housed in either vertical mobile cabinets or separate portable cases are available in 1-, 2-, 4-, 6- and 8-channel models. Each is equipped with driver amplifiers of current feedback design and regulated power supplies for *each* channel, and a recorder featuring *nine* extremely accurate paper speeds on 2- to 8-channel models, five on single channel units. Appropriate plug-in preamplifiers quickly and efficiently equip a basic assembly for recording virtually any 0-100 cps phenomena.

new 8-channel analog system

In addition, *specialized* and complete Sanborn systems from 2- to 8-channels are available for recording *analog computer* outputs. The newest of these is the eight-channel Model 158-5490 illustrated, featuring extreme compactness, mobility and operating ease. Dual-channel DC amplifiers with a common power supply for every two channels measure single-ended or push-pull input signals. Input impedance 5 megohms each input lead to ground. Controls include individual-channel attenuators, position, balance, sensitivity, stylus temperature and paper speed (0.25 to 100 mm/sec.). Frequency response is flat to 20 cycles, down 2 db at 60 cycles for all amplitudes to 4 cm peak to peak.

SANBORN OSCILLOGRAPHIC RECORDING EQUIPMENT

2. PREAMPLIFIERS

3. UNIT INSTRUMENTS

All Sanborn Preamplifiers and Recorders, as well as various other units, are available separately for specialized applications or use as "original equipment" in other apparatus. Instruments include the Model 150-300/700 Wide Band Driver Amplifier and Power Supply, for use with low power galvanometer elements, a 'scope and/or panel meter. When equipped with suitable "150" preamplifier, this amplifier provides a portable indicator for strain, force, pressure, temperature, AC watts, audio level, etc. Other units include the Model 150-1900 Master Oscillator Power Amplifier; Model 150-3100 Triplexer; Model 601 and 602 galvanometers; Model 150-2900 Dual-Channel DC Amplifier.

A choice of *twelve* "150 Series" plug-in preamplifiers is now available, to equip systems for any of numerous recording problems. Improved control of input signals results from attenuator ratios of 1, 2, 5, etc., and calibrated zero suppression on AC-DC, Carrier, and Low Level models. Types, in addition to foregoing three, include: Servo Monitor, DC Coupling, Log-Audio, Chopper Stabilized DC, AC Wattmeter, Input Coupling, RMS Volt/Ammeter, 400 cycle Frequency Deviation, and Frequency Meter.

Added to these three aspects of Sanborn Oscillographic Recording Equipment are the basic advantages of inkless recording in true rectangular coordinates, to provide accurate, easily interpreted records; high torque galvanometer (10 ma develops 200,000 dyne cm.); over-all linearity 0.25 mm over entire 4 cm chart width; controls for timing, manual and remote coding.

Take advantage of the scope and flexibility of Sanborn equipment to answer your recording requirements. Sanborn engineers will be glad to provide further information and application assistance whenever you wish. Contact your local representative or write to the main office below.

SILVER

FOR INDUSTRIAL USES

- Fine silver (wire, strip & foil)
- Silver anodes for plating (slabs, balls, grain)
- Silver contact alloys
- Silver powders
- Silver flakes and paints
- Silver brazing alloys
- Silver solders for electronic use
- Silver sintered metals
- Solder-flushed silver alloys
- Special silver alloys to your requirements

More than half a century of silver and silver brazing alloy research, development and fabrication, has established Handy & Harman as the *place to go* when you need silver in any form for industrial use — or have a problem that involves silver. The forms listed are meeting present-day uses. They are immediately available. Handy & Harman is also prepared to develop and produce special alloys and forms to meet special requirements.

WRITE US ABOUT YOUR SILVER REQUIREMENTS

Our engineering and research departments are always ready to help you meet your particular silver needs.

ELGIN NATIONAL WATCH COMPANY**

FOR RELAYS: 2435 North Naomi Street, Burbank, California

Control...

The rockets and guided missiles which carry man's quest for knowledge into space... and protect America against enemy air attack, rely on AMP capacitors, dielectrics and pulse forming networks to withstand the environmental conditions imposed by modern flight. The use of Ampli-film, AMP's synthetic dielectric material, provides the workhorse reliability in small size which is required by the weapons of the Rocket Age.

Because AMP's integrated plant in Elizabethtown manufactures its own dielectric and controls all the processes through to the finished product, you are assured of consistently high quality products to meet your most exacting requirements.

Another Example of A-MP's Creative Approach to Network and Pulse System Problems.

This is one of the best-known symbols of our time...and precision stampings have helped make it so.

A *complete* electronic-stamping service means more than just designing...

...it means more than just building the necessary dies...

...it means more than just producing the specified parts.

It means working *with* electronics industry people day in and day out...

...to develop stampings that will improve their products...

...and stampings that will reduce their manufacturing costs.

It is this "plus" quality that makes Volkert stand out.

VOLKERT STAMPINGS, INC. 222-34 96th Avenue, Queens Village 29, New York

AIRCRAFT RADIO CORPORATION
COMMUNICATION, NAVIGATION AND TEST EQUIPMENT

TYPE 15-D VHF NAVIGATIONAL EQUIPMENT, 108-135 MC: For airborne reception of runway localizers, visual-aural ranges, omni-directional ranges, simultaneous voice and GCA voice.

TYPE R-11A RANGE RECEIVER: CAA Approved Type Certificate No. 1360, provides reception for standard airways range stations for over 200 miles under normal conditions. Knifelike selectivity permits tuning separation of stations as close as 3 kilocycles together in frequency.

TYPE H-14A SIGNAL GENERATOR, 108-132 MC: Standard omni or runway localizer signal source for testing equipment without removing from aircraft. Checks one unit or a whole squadron simultaneously.

ARC
PRECISION PRODUCTS

- SINGLE AND DUAL OMNI/LOCALIZER RECEIVERS
- 5 TO 40 CHANNELS VHF TRANSMITTING/RECEIVING EQUIPMENT
- 8 TO 16 CHANNELS UHF TRANSMITTING/RECEIVING EQUIPMENT
- COMBINATION UHF/VHF TRANSMITTING/RECEIVING EQUIPMENT
- LF RANGE AND BROADCAST RECEIVER WITH OR WITHOUT DF LOOP
- 10 CHANNEL ISOLATION AMPLIFIERS
- 8-WATT AUDIO AMPLIFIERS
- 200 MILLIWATT INTERPHONE AMPLIFIERS
- ACCESSORIES SUCH AS ANTENNAS, JACK BOXES, JUNCTION BOXES AND MANY OTHER ITEMS FOR RADIO INSTALLATIONS
- CD-1 COURSE DIRECTOR FOR USE WITH OMNI RECEIVERS—ADDITION OF AUTOMATIC COMPUTER-GYRO MAKES COMPLETE INSTRUMENT NAVIGATION SYSTEM
- OMNI RECEIVER TEST EQUIPMENT
- SIGNAL GENERATORS FOR OMNI TESTING
- SIGNAL GENERATORS 900-2100 MC

CAA Certificated equipment to assure you of reliable design and production, minimum weight and size for the job.

Multi-Contact
Electric Connectors

FOR RAPID DISCONNECT

IN RADIO • SOUND • TV AND RELATED FIELDS USE
TOP QUALITY
CANNON PLUGS

MIL-SPEC

AN is the prefix for Military Specification electric connector assemblies. Reasonably priced because of extensive tooling and world-wide demand. Light weight shells. Interchangeable inserts.

AN Series

260 different insert layouts. 15 diameters. 6 shell styles. 22 to 245 amp. contacts. Thermo-couple and coaxial contacts available. Cable clamps, conduit fittings, telescoping bushings, junction shells, dust caps, dummy receptacles, potting kits. Majority of assemblies available from shelf stock.

HIGH-TEMPERATURE... FOR AIRCRAFT AND INDUSTRIAL USE. Firewall connectors in standard steel shell varieties and insert combinations. Maintain circuitry for 5 minutes at 2000°F.

VIBRATIONPROOF-MOISTUREPROOF APPLICATIONS. With resilient inserts, interfacial sealing.

HERMETICALLY SEALED APPLICATIONS. Steel shells, glass-fused inserts. Standard, miniature, and sub-miniature sizes. For control, relay, power, instrument applications.

PRESSURIZED APPLICATIONS. AN-C pressurized for 30 psi. Cannon K's, pressurized. Wide variety for different conditions.

Also, heavy-duty watertight units; external power plugs and receptacles; high-voltage types; special breakaway designs.

MINIATURES

D Series

DPA Series

MC Series

Cannon miniatures and sub-miniatures are designed for amplifiers, miniature indicators, computer circuits, tele-metering equipment, small pre-amps, and general instrumentation where space is limited and current requirements are generally not over 5 amperes. Variety of shell styles, junction shell, and insert arrangements. 3 to 50 contacts, plus coaxials.

UNIT PLUG-IN'S

DPB Series

DPD Series

RTC Series

for RACK / PANEL / CHASSIS

Permit quick disconnect, interchange, replacement, testing and inspection of assemblies and sub-assemblies. For transmitters, TV cameras, control equipment, radar, etc. Rack-and-panel, integral clamp, shell-less types, bail-and-gear disconnects, center-screw extraction, 10 to 156 contacts including high voltage.

Printed circuit connectors in 5 sizes, 10 to 44 gold-plated contacts, Zytel shells.

PLEASE REFER TO DEPT. 149

CANNON PLUGS

Cannon Electric Co., 3208 Humboldt St., Los Angeles 31 Calif.
Factories in Los Angeles; East Haven; Toronto, Can.; London, Eng.;
Melbourne, Australia. Licensees in Paris, France; Tokyo, Japan.

AUDIO

XLR Series

XL Series

P Series

UA Series

XK Series

Cannon audio connectors give you the highest quality... in the greatest variety to meet your every need. Standard on leading microphones. Straight, angle 90°, oval; wall-mounting, panel, locknut mounting, adapter receptacles, single and two-gang receptacles; latch-lock. 5-to-30-amp. contacts, coaxials.

INFORMATION AVAILABLE

Ask for Literature
by Application

Cannon also makes plugs for switching and patching, test point jacks, external power connectors, missile launching connectors, buffer connectors, cable terminals, dc solenoids.

Cannon Connectors are available from more than 1000 audio-industrial-electrical distributors from coast to coast

METERS and TEST INSTRUMENTS

A Complete Line of Panel Instruments...
A Movement To Fit Every Requirement

MODEL 125
D. C. (Model 155—A. C.)
2½" round case, open face style. Bakelite case.

MODEL 25
D. C. (Model 55—A. C.) 3½" round case, open face style. Bakelite case.

MODEL 1160
New 5½" modern style. Supplied special orders only. Also 2½", 3½", 4½" sizes.

MODEL 127
D. C. (Model 157—A. C.)
2½" rectangular case, round hole mounting. Bakelite case.

MODEL 27
D. C. (Model 57—A. C.) 3½" rectangular case, round hole mounting. Bakelite case.

MODEL 1227
New Modern D. C. 2½" rectangular plexiglass case, round hole mounting. Can be supplied clear or painted to match requirements.

MODEL 29
D. C. (Model 59—A. C.) 4½" rectangular case, round hole mounting. Bakelite case.

The Simpson Meters shown here are representative of the 800 sizes and kinds available from stock. Whatever you need, you can be sure of extreme accuracy and ruggedness, the long-time characteristics of Simpson—"Instruments That Stay Accurate."

WORLD FAMOUS Simpson TEST INSTRUMENTS

FOR APPLIANCE SERVICING AND TESTING

SIMPSON MODEL 388-3L THERM-O-METER

Measures temperatures from -50° to 1000°F., for air, gases, liquids or solids. Three thermocouple type leads.

Complete \$64.50

SIMPSON MODEL 390 AC VOLT-AMP-WATTMETER

Check line voltage, current drain and power consumption for most appliances. Four wattage ranges.

Complete \$39.50

SIMPSON MODEL 385-3L TEMPERATURE METER

Measures temperatures from -50° to 70°F. for refrigerators, freezers, coolers. 15' thermistor lead.

Complete \$33.95

SIMPSON MODEL 397 LINE-O-METER

Pretests current capacity of electrical lines and ability to handle 13-50 amps for starting motors.

Complete \$29.95

SIMPSON MODEL 303 VACUUM TUBE VOLT-OHM-METER

Easy-to-read 4½" scale . . . wide versatility. D. C. and A. C. Volt Ranges: 1.2, 12, 60, 300, 1200. Ohms: 1k, 100k, 1 Meg, 10 Meg, 1000 Megs. AF and RF Voltages.

Complete \$68.00

SIMPSON MODEL 458 7" COLOR SCOPE

7" cathode ray tube. Displays color burst frequency with great sensitivity. Checks video, sync and sweep circuits.

Complete \$229.95

SEND FOR BULLETIN 2056

SIMPSON MODEL 269 AC-DC VOLT-OHM-MICROAMMETER

First on the market with 100,000 ohms-per-volt sensitivity. 33 ranges through one control. 7" meter; self-shielded movement. Replaces VTVM for many checks.

Complete \$88.00

SIMPSON MODEL 260 AC-DC VOLT-OHM-MILLIAMMETER

Widely used . . . over half-million now in service. 29 ranges. 20,000 ohms per volt DC; 1000 ohms per volt AC. Wt. 3½ lbs. Complete \$38.95

SIMPSON ELECTRIC COMPANY

5200-5218 West Kinzie Street • Chicago 44, Illinois
Esterbrook 9-1121

In Canada: Bach-Simpson, Ltd., London, Ontario

Type ML-6A. This unit is identical to Type ML-6 except that it is provided with pins of large diameter. See drawing.
Pin diameter: $.093 \pm .002$
Pin Length: $.400 \pm .030$

Type ML-10. Range: 15.0–50.0 mc. Supplied per mil type CR-24 when specified.
Pin diameter: $.062 \pm .002$
Pin length: $.188 \pm .005$

Type ML-14. Range: 3.0 mc–75.0 mc. Identical in performance to Type ML-6 except for height of the metal can.
Pin diameter: $.050 \pm .002$
Pin length: $.238 + .010 - .015$

Type ML-6. Range: 1.0 mc–125.0 mc. Supplied per mil Type CR-18, CR-19, CR-23, CR-27, CR-28, CR-32, CR-52, CR-54, CR-33, CR-35, CR-36, CR-48 when specified. Hermetically sealed metal holder with glass and metal base.
Pin diameter: $.050 \pm .002$
Pin length: $.238 + .010 - .015$

Midland CRYSTALS pay off in plus performance

Accuracy... uniformity... stability under toughest working conditions. Everything you want in a crystal is guaranteed you by Midland's Critical Quality Control. It's the system of checks and tests that guards the quality of every Midland crystal from selection of the raw quartz to final sealing of the unit.

Midland makes more frequency control crystals than anybody else. Only a product of the highest quality rates that kind of demand. That's why with Midland crystals you can be sure of the finest in frequency control.

Our engineering staff is ready to help you with any crystal problem, including development and production of specials for individual requirements.

Type ML-6W. Range: 2.0 mc–75.0 mc. Same as Type ML-6 except wire leads are provided, eliminating the need for a crystal socket.
Pin diameter: $.030 \pm .002$
Pin length: $2.000 \pm .250$

Type ML-4. Range: 2.0 mc–10.0 mc. Supplied per mil Type CR-5, CR-6, CR-8, CR-10 when specified. Holder is phenolic, gasket sealed.
Pin diameter: $.093 \pm .002$
Pin length: $.400 \pm .030$

Type ML-5. Range: 80–200 Kc. Black phenolic holder—gasket sealed. Wire-mounted, silver-plated. The three pin base fits standard 3-pin mounting socket.
Pin diameter: $.156 \pm .003$
Pin length: $.594 \pm .032$

Type ML-1A. Range: 2.0 mc–15.0 mc. Supplied per mil Type CR-1A when specified. Holder is phenolic, gasket-sealed.
Pin diameter: $.125 \pm .005$
Pin length: $.625 \pm .030$

Type ML-13. Range: 90 Kc to 300 Kc. Hermetically sealed. Can is taller to accommodate the low frequency crystal blank.
Pin diameter: $.050 \pm .002$
Pin length: $.238 + .010 - .015$

Type ML-171. Range: 1.5 mc–10.0 mc. Black phenolic holder. Pressure mounted, stainless steel electrodes. Banana plug pins.
Pin diameter: Not Applicable
Pin length: $.850$

Type CM-1. Range: 1.0–15.0 mc. Black phenolic holder. Fixed airgap or pressure mounting with stainless steel electrodes.
Pin diameter: $.125 \pm .005$
Pin length: $.656 \pm .030$

Type ML-1G. Range: 10.0–150.0 mc. Especially adapted to limited-space assemblies. Provided with two wire leads, eliminating need for a crystal socket. All glass, hermetic seal. No grounding problems.
Pin diameter: $.018 \pm .002$
Pin length: $1.625 \pm .125$

Type ML-2G. Range: 200 Kc–150.0 mc. An all glass 7-pin miniature of the same dimensional proportions as the eAK5 miniature receiving tube.
Pin diameter: $.040 \pm .002$
Pin length: $.250 \pm .030$

ML-300 Series
For color television. All-glass. 7-pin base ideal for printed circuits.

Type ML-18. Range: 5.0 mc–150.0 mc. This unit is a metal counterpart of the ML-1G. Hermetically sealed holder with glass and metal base. Available with fixed pins if desired instead of the wire leads illustrated here.
Pin diameter: $.040 \pm .002$ Pin length $.234 \pm .030$
Wire: $.017 \pm .001$ Dia. by $1.500 \pm .062$ long

THE Midland MINIATURE SERIES

... for every crystal application

Developed to serve the growing trend to miniaturization, Midland miniatures are now available for every crystal need, including color television. They'll do an outstanding job for you.

Whatever your crystal need—conventional or highly specialized—when it has to be exactly right, contact Midland.

FAST SERVICE on many regular stock types, available from inventory or on short order.

WORLD'S LARGEST PRODUCER OF QUARTZ CRYSTALS

...every one produced to the industry's highest standards.

BIRD COAXIAL LINE INSTRUMENTS

"ThruLine" DIRECTIONAL RF WATTMETERS

MODEL 43

Direct Reading

25-1000 megacycles . . . 10W — 100KW . . . "thru" type . . . for power measurement in complete systems under operating conditions . . . insert between transmitter and antenna or load to provide an accurate and simple means of measuring direct or reflected power . . . plug-in elements determine full scale power range and frequency range. Get Bulletins W-400 for detailed specifications.

Model	Line	Impedance	Frequency Range	Full Scale Power	Connector
43	RG-8/U etc.	50 ohms	25-60; 50-125 100-250; 250-500; 400-1000 mc	10; 25; 50; 100; 250; 500 W	N; C; HN; UHF
4712	1 1/8"	50 ohms	200-500 400-1000 mc	.5; 1.0; 1.5; 2.5; 5.0 KW	Rima Std.
460	3 1/8"	50 ohms	200-500 mc	1; 2.5; 5; 10	Flange
480	3 1/8"	51.5 ohms	400-1000 mc	25; 50 KW	Sleeve Bullet
490	6 1/8"	51.5 ohms	200-500 mc	25; 50 and 100 KW	

"Termaline" RF ABSORPTION WATTMETERS

MODEL 611

Accurate

30-500 megacycles . . . 1/2 watt-5 KW . . . "load" type . . . portable . . . direct reading wattmeter . . . accuracy $\pm 5\%$ of full scale . . . non-radiating load for power measurement. For complete specification on all available models, write for Bulletins TW-600.

Model	Freq. Range	Max. Power	Power Range Scales	Input Connector
611	30-500 mc	60W	0-15; 0-60	Female N
612	30-500 mc	80W	0-20; 0-80	
67	30-500 mc	500W	0-25; 0-100; 0-500	Coplanar with adapter to UG-21/U;
67C*	30-500 mc	2500W	0-100; 0-500; 0-2500	(optional) RG-17 & RG-19 cable assemblies; adapters to rigid lines
824*	30-220 mc	5000W	0-5000	

*Water cooled (other available models described in specification sheets)

"Termaline" RF LOAD RESISTORS

MODEL 888

Reflection-Free

Designed to terminate 50 ohm coaxial line with minimum reflection . . . low VSWR . . . non-radiating . . . water cooled ratings 2500 W to 50 KW . . . air cooled ratings to 1500 W . . . ratings can be increased by forced air externally applied. For detailed specifications get Bulletins R-800.

Model	Max. Power	Freq. Range	Max.* VSWR	Connector
80	5W	0-1KMC	1.1	"N", "C", "BNC"
80A	20W	0-500MC	1.1	
81	50W	0-1KMC	1.1	N Female
81B	80W	0-1KMC	1.1	
82A	500W	0-1KMC	1.1	Coplanar with adapter to UG-21/U
883	1.2KW	0-1KMC	1.1	LC
888	1.5KW	0-1KMC	1.1	3/8" Flanged

*Other VSWR requirements can usually be met by special selection.

COAXIAL SWITCHES

MODEL 74
(Cutaway View)

Dependable

Small compact design permits the "Coaxswitch" Selector to be incorporated into many electronic units where repeated channel switching is required. Finger-tip operation — pull knob, rotate and push in to make contact. Bulletin CS-6 contains full specifications.

Model	74	718	72R	72-2
Positions	Six	Eight	Reversing Switch	Two
Coaxial Circuits	One	One	Two	Two
Connector	Type N female connectors are standard on all models to receive UG-21/U series plug. Use adapters with other cables and connectors.			

COAXIAL RF FILTERS

Rugged

High pass . . . low pass . . . band pass . . . band elimination . . . designs utilize both distributed and lumped constant . . . feature low insertion loss and high stop band attenuation . . . many designs available . . . "know-how" and physical facilities for quantity production . . . Get Bulletin CF-6.

	Low Pass	Low Pass	Low Pass	Low Pass	High Pass	Band Pass

Today there are eleven types of GAF Carbonyl Iron Powders — each produced to rigorous standards of uniformity. Their characteristics vary by type.

Ask your core maker, your coil winder, your industrial designer how these powders can increase the efficiency and performance of the equipment or product you make. They can reduce weight, size, and also decrease cost. If your requirements call for other characteristics or different degrees of performance than are offered by any of our standard types, we welcome the opportunity to work with you in developing new grades of iron powders.

Let us send you literature, giving the applications and working properties of GAF Carbonyl Iron Powders. Send for your free copy today.

From Research to Reality...

PRECISION TRANSDUCERS

◀ PRESSURE OPERATED POTENTIOMETERS

Outputs: Linear and nonlinear functions of applied pressure.

Resistances: 100 to 50,000 ohms.

Ranges: 0-5 to 0-5000 psi.

Types: Absolute and differential.

Vibration Ambient: 0 to 55 cps, 0 to 500 cps, and severe vibration 25g to 2000 cps.

Construction: Hermetically sealed.

Write for Pressure Operated Potentiometer Bulletin

◀ ULTRA-SENSITIVE PRESSURE SYSTEM

Output: 50 volts at full scale.

Range: $\pm 3/4$ psi, differential.

Resolution: 1×10^{-6} psid.

Zero stability: Better than 1×10^{-3} psid.

Write for Bulletin EPMS

◀ RESISTANCE BRIDGE PRESSURE PICKUPS

Sensitivity: 5 mv/v at full scale.

Ranges: 0-10 to 0-1500 psi.

Types: Absolute and differential.

Construction: Hermetically sealed.

Write for Bulletin No. 7

◀ RATE OF CLIMB

Outputs: 5 volt signal and/or dial indicator.

Range: $\pm 25,000$ ft./min.

Time constant: 0.2 sec. at sea level to 2 sec. at 50,000 ft.

Write for Vertical Speed Transducer Bulletin

◀ RESISTANCE THERMOMETERS

Resistance: 5 to 500 ohms at 32°F.

Materials: Platinum or nickel.

Range: -350 to +2000°F.

Types: Liquid, surface, gas.

Characteristics: Corrosion proof, severe vibration ambient, fast speed of response.

Write for Resistance Thermometers Bulletin

Trans-Sonics, Inc.

P.O. BOX 328 • LEXINGTON • MASSACHUSETTS

UNCASED TOROIDS

Basic inductor component. Plain, wax or plastic dipped with flex-leads. Hi Q values 10cps to 10mc. Complete range of sizes: subminiature, wedding ring and up to 12" OD. Standard inductances stocked for immediate delivery. Mass production utilizing CAC-designed winding equipment enables swift completion of large orders.

PLASTIC CASED TOROIDS

CAC compression molded toroids per Mil specs have become the standard of the industry. Most compact design — may be stacked — mounted by center bushing which absorbs mounting pressures — sturdy, tinned terminals — arrangements available up to 6 terminal connections. Standard inductance values shipped from stock — special inductances and configurations supplied promptly on request.

**TOROIDAL
INDUCTORS**

Precision... Delivery... Quality...

Growth and development of CAC has been rapid since its organization following World War II. It is made up of young, but highly experienced management and personnel. Unique manufacturing equipment (much of it CAC-designed) and leadership in production "know-how" offer **PRECISION... DELIVERY... and QUALITY.**

Whether your need is for one toroidal component... or a million, CAC is prepared to serve you.

COMMUNICATION ACCESSORIES CO.

World's Largest Exclusive Producer of Toroidal Windings

HICKMAN MILLS, MISSOURI • PHONE KANSAS CITY, SOUTH 1-6111

A Subsidiary of Collins Radio Company

HERMETICALLY SEALED CASED TOROIDS

CAC "HS" series provides metal encased, hermetically sealed units complying with MIL specifications. Mounting area minimized — extremely low hum pickup — terminals of proven design using Teflon assure permanent seal at temperature extremes. Rugged construction — convenient mounting facilities. To insure stability, cores are thermo-cycled prior to encasement. Standard inductances in stock.

SUBMINIATURE TOROIDS

Uncased, plastic molded and hermetically sealed in three standard core types (others available). Designs for all requirements — for chassis mount or printed circuits.

For the engineer whose design considerations dictate the utmost in electrical performance versus size, CAC's subminiature toroids present the answer.

Catalogs on Individual Components are Available on Request.

MAGNETIC AMPLIFIERS

Custom computer amplifiers with high stability and linearity can be designed having single or multiple inputs to your specific needs. Servo drives and relay actuators are also available. Frequency selective networks can be integrally designed to provide additional useful control functions. Proven packaging techniques insure minimum size—proven toroidal construction assures highest performance.

Typical Temperatures..... -60°C. to +150°C.
 Typical Line Frequencies..... 60cps to 6000cps

MISSILE POWER TRANSFORMERS

Recommended for supply frequencies above 400 cps and where size performance and reliability are factors. Thin nickel alloy toroidal cores reduce core losses. Toroid structure cures stray field problems.

SEALED MISSILE POWER SUPPLIES combining toroidal power transformers, toroidal filter chokes, hi temp capacitors and silicon rectifiers. These units offer multiple outputs and low ripple. Low stray field of toroidal elements obviate usual internal shielding. Mag regulation where required.

**MAGNETIC
 AMPLIFIERS &
 TRANSFORMERS**

Our modern production and research facilities assure you of the most advanced solutions to your problems.

LAMINATED TRANSFORMERS AND INDUCTORS

A complete line of laminated constructed units are now available through CAC. Our highly qualified engineering staff, a well complemented laboratory, humidity controlled production facility with modern manufacturing equipment guarantees conformance with any specifications. Both power and audio transformers employing advanced techniques can be supplied either hermetically sealed or encapsulated to 150° C. ambients. Catalogues, supplied upon request, cover a wide range of standardized designs including omnirange and ILS Filters.

PRECISION RATIO COMPUTER TRANSFORMERS

Toroidal form of construction is ideal for designing precision ratio transformers since the turns of wire are applied to and adjusted on the core. Normal production procedure of zero turn accuracy, high permeability cores, low phase shift, and near unity coupling will yield laboratory quality on any production run. Advanced design and newest packaging methods provide optimum performance with minimum size and rugged construction.

Catalogs on Individual Components are Available on Request.

L-C FILTERS

L-C filters utilizing high Q toroidal inductors and high quality capacitors are the heart of these frequency selective components. Recent developments of magnetic materials and highly stable capacitors have extended the useful frequency and temperature range of electrical wave filters. Use of impedance transformations, near unity coupling, and other applications of advanced network theory result in high performance units in small volume packages.

Low pass, high pass, band pass and band stop filters can be designed covering sub audio to over 500kc range. Line, interstage or other impedances can be specified. Filters can be designed for direct paralleling where required. High permeability cases and the closed toroidal form assure low hum pickup. Temperature stabilization on the order of 0.1% frequency can be attained through use of negative TC compensation to offset slightly positive coil and capacitor characteristics.

Depicted response curve is for an integrally packaged low pass—band pass filter employing the latest design and production procedures. This unit uses less chassis area and is an excellent example of subminiature coil usage, impedance transformations, and printed circuitry. Hermetically sealed to meet the military specifications.

LC AND MECHANICAL FILTERS

Engineering...

As a result of CAC's engineering developments, more end equipment manufacturers now specify CAC toroids and filters than any other supplier. You are invited to present your network problems to our engineering staff.

MECHANICAL FILTERS *(Developed and mfd. by Collins Radio Co.)*

The Mechanical Filter provides far better bandpass selectivity in one small sealed unit than a series of bulky conventional IF transformers. Excellent characteristics allow closer spacing of information channels, lower adjacent-channel interference and improved signal to noise ratios. These Filters have been proven in thousands of military and commercial receivers, transmitters and microwave multiplex systems.

Units are designed for center frequencies of 60 to 600kc and various 6db bandwidths from 300cps to 16kc. In general, bandwidth is limited to 10% of the center frequency. In many types, the 60db bandwidth is only twice the 6db bandwidth. Filters have a frequency shift with temperature of $\pm 10\text{ppm}/^\circ\text{C}$. Normal insertion loss for the filters is 6 to 8db. Most types comply with Mil-E-5400 on shock and vibration.

In receiver IF amplifier design the Mechanical Filter replaces one of the usual IF transformers and is fixed tuned. Preceding or following stages may be coupled with subminiature toroidal transformers using fixed tuning. Variable selectivity is obtained by using two or more Filters and switching connections.

Catalogs on Individual Components are Available on Request.

PERMEABILITY-TUNED VFO's (Mfd. by Collins Radio Co.)

Mechanically stable—sealed against atmospheric changes—temperature and voltage compensated. Available as complete packages for incorporation into your equipment. Superior accuracy, stability and linear dial calibration for your transmitters, receivers, test equipment or frequency standards.

AUTOTUNES (Mfd. by Collins Radio Co.)

Electro-mechanical position systems. Ideally suited for components requiring rotary or linear motion. Positioning accuracies of 0.05 angular degrees with reset accuracy to 0.0001 inch relative to 1/4 inch shaft size. Designed for the lifetime of any equipment. Fast—versatile—high torque—accurate—dependable.

FERRITE CORES (Mfd. by Collins Radio Co.)

Requirements for extreme temperature stability and consistently reproducible cores encouraged the Collins Radio Company to enter the magnetic materials field. Now, after several years of intensive research and development, these cores are available through CAC in many standard or custom forms for all applications. Temperature characteristics developed exhibit 10 times improvement over previous materials. Special saturation and other properties are presently available. Technical bulletins upon request.

TUBE SHIELDS (Mfd. by Collins Radio Co.)

Heat treated beryllium copper corrugated liner and socket insert are highly resilient and accommodate wide variations of tube diameter. Base liner reduces bulb temperature in most critical tube area. Interchangeable with standard JAN equipment. Tube cannot work out of socket through long term vibration. Maximum electrostatic shielding.

Catalogs on Individual Components are Available on Request.

**MOBILE ELECTRONIC SYSTEMS —
Shelters, Vans, Trailers**

Air Traffic Control Central — Mobile, self-contained, fully equipped for control tower operations. Powered by mobile generators or commercial power. Transportable by air, land or sea.

Helicop-Hut — Lightweight (950 lbs.) Payloads up to 6300 pounds. Aluminum skin with plastic foam core. Inside dimensions: 76" x 76" x 96". Highly adaptable.

Radio Set AN/TRN-6 The TACAN Ground Station — Transportable by plane or truck. Shelter dimensions: 11' 8" long, 7' high, 6' 5" wide.

Craig

Whether it's a problem of building a rugged container for electronic equipment . . . or the delicate matter of laying out and installing the components in a complicated mobile air-traffic control system so that it's ready to operate the moment it reaches its destination . . . let CRAIG do the job! For CRAIG has the means and the unique skills to see the job through. Because CRAIG is the manufacturer, as well as designer, you get assurance of fully-controlled quality every step of the way. And CRAIG service includes layout and installation of electronic equipment in shelters of all types. For full information, write or phone —

CRAIG SYSTEMS, INC., Dept. G, Danvers, Mass.

JFD GIVES YOU A NEW SUB-MINIATURE TRIMMER PISTON CAPACITOR SMALLER THAN THE ERASER OF YOUR PENCIL! 2 GRAMS OF COMPACT PRECISION... ONLY 5/16" IN LENGTH.

A Giant in Performance... Sub-Miniature in Size

PISTON CAPACITORS

FOR AUTOMATION AND PRINTED CIRCUIT APPLICATIONS

Over 1 year in development, it's here at last! The new precision sub-miniature JFD Variable Trimmer Piston Capacitor, designed expressly for use in *automation* and *printed circuitry*.

Features: Stability, approximately Zero temperature coefficient... End stops at either end of adjustment... working temperature - 55° to +125°C... Anti-back lash and thread wear compensation.

These new JFD Capacitors are available in 2 models to meet your most exacting network applications:

MODEL	OVERALL LENGTH	CAPACITANCE
VC9G	9/16"	0.5 MMF. TO 8.5 MMF.
VC10G	5/16"	1 MMF. TO 4.5 MMF.

Both units feature glass dielectric and invar silver-plated rotors. Write today for Bulletin No. 106 which gives you complete electrical characteristics.

Whether you specify these new Piston Capacitors or any of the many other JFD units for your critical tuning requirements, you upgrade *efficiency* and *stability* of performance. A letter will bring you complete details. Write today.

GO FORWARD WITH JFD ENGINEERING!
JFD MANUFACTURING CO., INC. 6101 16TH AVENUE, BROOKLYN 4, N. Y.

Lapp

INSULATION FOR WATER-COOLED SYSTEMS

For carrying cooling water which must undergo a change in potential, use of Lapp porcelain eliminates troubles arising from water contamination and conductivity, sludging and electrolytic attack of fittings. Permanent cleanness and high resistance of cooling water is assured—for positive cooling and long tube life.

LAPP PORCELAIN WATER COILS

Twin-hole and single-hole models in sizes to provide flow of cooling water from 2 to 90 gallons per minute. Cast aluminum mounting bases, lead pipe or flexible metal hose for attachment.

LAPP PORCELAIN PIPE

Inside diameter $\frac{3}{4}$ " to 3", in straight, 90° and 180° elbows, fittings. Swivel-type connections. Standoff insulators attach directly to fitting bolts. Write for Bulletin 301 with specifications for Lapp Porcelain Water Coils and Porcelain Pipe.

LAPP GAS-FILLED CONDENSERS

Capacitance for high-voltage, high-current duty

The record of more than 18 years' service, in thousands of installations, proves the reliability of the Lapp Gas-Filled Condenser. For duty at high voltages and high currents, this unit offers the advantages of extreme compactness . . . low loss . . . high safety factor . . . constant capacitance under temperature variation . . . grounded tuning shaft . . . and rugged sturdiness. Units available in four tank diameters, 7" to 18" . . . in fixed or variable capacitance . . . capacitances to 30,000 mmf; current ratings to 390 amps at 1 mc; voltages to 85 Kv peak. Write for Bulletin 302.

TUBE SUPPORTS for air-cooled tubes

No longer is it necessary for equipment manufacturers to design supports for forced-air-cooled tubes. After producing many such special designs, Lapp has engineered and built a complete series of insulating supports for air-cooled tubes. Use of these supports facilitates design of transmitter and other high-power circuits. Simple, compact, efficient and attractive in appearance, in porcelain or steatite, they make for economical production, easy interchangeability, and availability of replacement units. Write for Bulletin 301, with complete description and specification data.

ENTRANCE INSULATORS

To eliminate losses which occur in ordinary types of bushings at radio frequency, Lapp units use air as major insulation, porcelain path being lengthened by its "bowl" shape. In wide variety of types for most electrical and mechanical requirements.

STAND-OFF INSULATORS

Dependable mechanical and electrical performance—and trim good looks. Hundreds of standard and special types available.

Write for Bulletin 301, listing entrance and stand-off insulators.

ANTENNA STRAIN INSULATORS

The largest of the porcelain rod insulators shown develops 12,000 lb. strength. Available, as specified, with rain shield and/or corona rings. Smaller units, in porcelain or steatite, for all strain or spreader use. Engineering and production facilities also available for special performance units. See catalog 301.

PLUG-AND-RECEPTACLE UNITS for sectionalizing circuits

For panel-rack or other sectionalized circuits, Lapp offers a variety of plug-and-receptacle units. Any number of contacts can be provided (in multiples of twelve). Male and female contacts are full floating, for easy alignment and positive contact. Contacts

silver plated, terminals tinned for soldering. Insulation is steatite, the low-loss ceramic... non-carbonizing even under leakage flashover resulting from contamination, moisture or humidity. Write for complete electrical and mechanical specifications and recommendations.

ANTENNA TOWER INSULATORS

Most of the world's radio towers are supported by Lapp insulators, including the tallest guyed mast ever built. Through the Lapp "compression cone," immense loads can be carried by electrical porcelain. Write for data on Lapp footing insulators for self-supporting radiators, mast-base insulators, or guy insulators.

SPECIAL ASSEMBLIES

Lapp business is electrical porcelain, its application, design, manufacture, and assembly. Our skill is in our knowledge of the capabilities, and limitations, of ceramic insulation... in engineering ingenuity to meet specified requirements... and in efficient production. If you have need for insulating parts and associated sub-assemblies, we may be able to show you how they can be made most economically, to perform most efficiently.

SYNCHROS
are our business

In addition to the wide variety of standard units shown, we also produce an equally large number of special units on special order in production quantities for which we are already tooled.

For more complete information on our synchros including Typical System Measurements, write for booklet SC-2 or phone MADison 6-2101 (Suburban Philadelphia).

NAVY BuOrd SYNCHROS

1/2 Actual Size

Contact Clifton Precision for standard Navy BuOrd units. If your specification requires conformance to BuOrd drawings and your system can take advantage of exceptional accuracy, CPPC can hold extra close error spread and accuracy tolerances. See CG-15-MS-1 in the tables.

PRECISION RESOLVERS

Precision Computing Resolvers with functional accuracies of the order of .1% and transformation ratios 1:1 are currently being constructed in the size 15 class for special applications. Contact CPPC for applications involving the use of Precision Resolvers in all sizes.

1/2 Actual Size

COMPANY, INC.

P E N N A .

TYPE 2003
Same as Type 2007 (at right) except Tube 12AT7 and 5 pig-tail components are external.

TYPE 2007, BASIC UNIT
Contains shock-mounted fork, double triode and all circuitry. Output, 400 or 500 cycles. Accuracy ± 1 part in 50,000. Octal base container, $1\frac{1}{2}$ " x $4\frac{1}{2}$ ". Weight, 10 oz. Power required, 75 to 200 V.-D.C. at 1 to 5 m.a. and 6.3 V. at 300 m.a. Designed for MIL equipment.

TYPE 2001-2, BASIC UNIT
Frequencies, 200 to 3000 cycles. Dividers and multipliers available for lower and higher frequencies. Output, 6 V.—JAN construction.

TYPE 2005, UTILITY
Provides 10 Watts at 110 V. Precision frequencies from 50 to 500 cycles. Input power, 50 to 500 cycles, 45 Watts.

TYPE 2121-A, LAB. STANDARD
Outputs, 60 cycles, 0-110 Volts, 10 watts; 120-240 cy. impulses. Input, 50-400 cycles, 45 Watts.

TYPE 2111A, POWER UNIT
50 Watt output. 0-110-220 V. at 60 cycles or any frequency 50 to 1000 cycles.

Precision FREQUENCIES

GUARANTEED ACCURACY
1 PART IN 100,000 (.001%)
except where otherwise noted

The basis of these frequency standards is an electronically actuated high-precision fork, temperature-compensated and hermetically sealed against barometric changes. The partial list of uses at the right not only suggests the broad range of applications but also proven dependability where there can be no compromise with accuracy. Please request details by Type No. Our engineers are available for advice or cooperation on related problems.

Hermetic SEAL

GLASS-METAL HEADERS For Every Electronic Use

The prime source for variety in sizes, terminations and shapes; quality; performance—at thoroughly acceptable cost to you. Special terminals for any purpose. In VAC-TITE® Compression Seals as well as conventional kovar designs.

*VAC-TITE is HERMETIC's vacuum-proof, compression-construction, glass to metal seal. In addition to special shapes, many standard sizes such as .800" O.D. and .900" O.D. multi-terminal headers and a large variety of individual terminals are available in VAC-TITE Compression Seals.

1. Tubular Button Seals for rectifiers, condensers, filters and other components.
2. Crystal Holders—wire and pressure mounted.
3. Individual Terminals and Feed Throughs for relays, transformers, networks, and general applications.
4. Terminal Strips for transformers and general applications.
5. Stand-Off Terminals for chassis work.
6. Multi-Terminal Headers—all glass and individual bead design . . . for relays, networks, transformers.
7. Transistor and Diode Enclosures.
8. AN Connectors.
9. Rectangular Plugs and Connectors.
10. Polarized Plugs.
11. Refrigerator Seals.

HERMETIC SEAL PRODUCTS CO.

31 South Sixth St., Newark 7, N.J.

Engineering and design service to aid in selecting best possible glass-metal seals for every application as well as application engineering.

SPECIAL SWITCHES

are **STANDARD** with

ESCO

of Weymouth

TYPE JR

TYPE P

Gear-operated
TYPE JR

TYPE A

TYPE AF

TYPE JD-JS

TYPE HT

When you need a SPECIAL switch . . .

ESCO standard, uniform components can be assembled to meet your requirements; or a deviation from one of our standard types will give you a special switch at a standard switch cost. Over 90% of our production is *SPECIAL* in one way or another.

These standard switches can be modified to fit your application:

- **TYPE A** — up to 8 positions, 7 sections maximum, detent-mechanism, rating 5 amperes — 125 volts a-c/30 volts d-c.
- **TYPE AF** — up to 8 positions, 6 sections maximum, detent-action, rating with resistive load 5 amperes at 28 volts d-c or 115 volts 400 cps, per MIL-S-6807.
- **TYPE P** — Multi-section, up to 4 positions, snap-action, rating 10 amperes — 125 volts a-c, 5 amperes — 125 volts d-c, 30, 60, 100, 200 amperes at 500 volts a-c, or 250 volts d-c. Can be assembled to meet Specification MIL-S-15291.
- **TYPE JR** — up to 8 positions, 30 sections maximum, detent-action, rating 10 amperes at 125 volts a-c, 5 amperes 125 volts d-c.
- **TYPE JD-JS** — up to 8 positions, 5 sections maximum, detent-action or snap-action, rating 30 amperes at 230 volts a-c.
- **TYPE HT** — up to 16 positions, 6 sections maximum, detent-action, rating 5 amperes at 125 volts a-c.
- Bureau of Ships No. 9000-S6202-74085 rating 10 amperes at 120 volts a-c. BuShips 9000-S6202-74090, 9000-S6202-74096, and 9000-S6202-74224, ratings 30, 60, and 200 amperes, 500 volts a-c — 250 volts d-c.

Write for data sheets or catalog on ESCO rotary multipole switches — or send us your requirements and we'll give you full specifications on the ESCO switch that meets YOUR need.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences — rely on the "Guide" for the answers to their product problems.

For Product Data . . .

ADVAC

HIGH VOLTAGE TERMINALS

Specify ADVAC High Temperature Ceramic-to-Metal Seals for:

JET ENGINE THERMO-COUPLE SEALS
 FIRE DETECTION AND TEMPERATURE CONTROLS
 EXPLOSION PROOF ASSEMBLIES
 REFRIGERATION COMPRESSOR SEALS
 KLYSTRON OUTPUT WINDOWS
 T-R TUBE WINDOWS
 IGNITION INSULATOR BUSHINGS
 VACUUM TUBE CLOSURES
 HEATING ELEMENT TERMINATIONS
 NUCLEAR ENERGY EQUIPMENT
 IMMERSION HEATER SEALS
 POWER CABLE END SEALS
 CHEMICAL RESISTANT INSULATORS
 HEAVY-DUTY TRANSFORMERS
 CAPACITORS
 PULSE NETWORKS
 RELAYS, DELAY LINES
 FILTERS, REACTORS
 MOTOR SWITCHES

- Pure silver brazed for higher temperature service
- Helium mass spectrometer tested for vacuum-tightness
- High mechanical strength and thermal shock resistance
- Adaptable for soft-soldering, brazing or welding

New ADVAC High Voltage Terminals withstand operating temperatures of over 1000°F. They have been service-proven in a wide range of applications where severe environmental conditions, including both mechanical and thermal shock, are encountered. ADVAC super-rugged high voltage terminals are available in nine economical standard types that meet most requirements. For special applications, custom terminals can be produced to your exact specifications.

HIGH TEMPERATURE, VACUUM TIGHT CERAMIC-TO-METAL SEALS FOR THE ELECTRONIC INDUSTRY

International Rectifiers

SELENIUM · GERMANIUM · SILICON

SUB-MINIATURE SELENIUM DIODES

Developed for use in limited space at ambient temperatures ranging from -50°C to $+100^{\circ}\text{C}$. Encapsulated to resist adverse environmental conditions. Output voltages from 20 to 160 volts; output currents of 100 microamperes to 11 MA. Bulletin SD-1B

GERMANIUM DIODES

This series of general purpose, high quality point contact diodes provide excellent rectification efficiency for very high frequency applications. Special "RED DOT" series available for ambient temperatures from -55°C to $+100^{\circ}\text{C}$. Bulletin GD-2

SILICON POWER DIODES

For temperature applications to 150°C , these fused junction diodes withstand exposure from -55°C to $+170^{\circ}\text{C}$. Peak inverse voltage rating from 50 volts to 600 volts. Welded, hermetically sealed construction. Four types. Bulletin SR-132

HIGH VOLTAGE CARTRIDGE RECTIFIERS

Designed for long life and reliability in Half-Wave, Voltage Doubler, Bridge, Center-Tap Circuits, and 3-Phase Circuit Types. Phenolic Cartridge and Hermetically Sealed types available. Operating temperature range: -65°C to $+100^{\circ}\text{C}$. Specify Bulletin H-2

TV AND RADIO RECTIFIERS

The widest range in the industry! Designed for Radio, Television, TV booster, UHF converter and experimental applications. Input ratings from 25 to 195 volts AC and up. DC output current 10 to 1,200 MA. Write for application information. Bulletin ER-178-A

SELENIUM PHOTOCELLS—SUN BATTERIES

Self-generating photocells available in standard or custom sizes, mounted or unmounted. Optimum load resistance range: 10 to 10,000 ohms. Output from .2 MA to 60 MA in ave. sunlight. Ambient temperature range: -65°C to $+100^{\circ}\text{C}$. Bulletin PC 649

SELENIUM POWER RECTIFIERS

For all DC power needs from microwatts to kilowatts. Features: long life; compact, light weight and low initial cost. Ratings: to 250 KW, 50 ma to 2,300 amperes and up. 6 volts to 30,000 volts and up. Efficiency to 87%. Power factor to 95%. Bulletin C-349

GERMANIUM POWER RECTIFIERS

3 Styles featuring efficiency to 97%, low forward drop, high reverse to forward current ratio, unlimited life. Ratings: 26 to 66AC input v. per junction. 150 to 100,000 amps DC output. Operating temperature range: -55°C to $+75^{\circ}\text{C}$. Bulletin GPR-1

SILICON POWER RECTIFIERS

High power-5 amp to 100 amp-silicon fused junction type. Input ratings to 200 PIV. Temp. range: up to 150°C case temperature. Available in individual diodes or all usual power rectifier circuits. Data available on models for forced air and liquid cooling.

The Lundey Line Is Expanding!

More and more, Lundey engineering facilities and technical know-how are reaching out to help solve specific hermetic sealing problems in the industry. The result is a rapidly expanding line of . . .

HERMETIC TERMINALS

CONFINED GASKET TYPE — ceramic-neoprene (or silicone) compression type of hermetic terminals, covering a wide range of voltages and amperages. Available with modifications to meet conditions requiring unusually high torque.

New SOLDER-SEAL MODIFICATION — same as the standard line except the bottom ceramic shell has two metallized areas (of the reduced metal oxide type) for either soft or hard soldering. This modification results in a non-turning, vacuum-tight installation which will pass mass spectrometer leak tests as required under certain military specifications encompassing airborne equipment, etc.

#199 SERIES — utilizing a combination of teflon shells and silicone gaskets (neoprene gaskets also available), this low-cost terminal is designed for applications where maximum savings of floor space and inside clearances are important. Nine terminals may be mounted on a $\frac{3}{8}$ " square header or panel. Alternate color available for indexing.

New METALLIZED ALUMINA TERMINALS* — combining the excellent thermal and physical shock-resistant characteristics of alumina bodies with a choice of two types of metallizing (reduced metal oxide type), these terminals withstand a wide range of operating temperatures (-80°F to $+1500^{\circ}\text{F}$); voltages; amperages; etc. Available for either soft or hard soldering. Special designs will be engineered for particular problems.

New MICRO-DIS SERIES — a group of two-piece, non-hermetic terminal assemblies, consisting of a teflon insulator and a brass stud. Available as either a stand-off or feed-through terminal, it is especially designed for high frequency, low-loss applications. Good for temperature range of -80°F to $+550^{\circ}\text{F}$. Extremely simple to install.

DONNER SCIENTIFIC
COMPANY

CONDENSED CATALOG

MODEL 3000 DESK-TOP COMPUTER
(Shown with Model 3034 Problem Board)

A basic engineering tool, used for design, research, and instruction. Solves many problems, expressed as differential equations or transfer functions. Complete DC analog computer, with all power supplies.

- 10 operational amplifiers, output -100 to $+100$ volts, 5 ma.
- 5 initial condition supplies, 0 to ± 100 volts, 5 ma.
- 2 thermionic diodes (floating), for limiting functions.
- Built-in controls, including Compute-Reset and Hold-Operate.
- Integral meter for set-up, readout, and performance checking.

Model 3000, \$1150.00

MODEL 3034 DETACHABLE PROBLEM BOARD
(Shown with Model 3073 Potentiometer Strip)

Push-connects to Model 3000 Computer, carrying entire problem; several may be used interchangeably. Provides all connections to amplifiers, diodes, operational relays, and two accessories. Utilizes Donner plug-in precision components.

Model 3034, \$95.00

Same problem board, but with soldering posts for conventional components.

Model 3033, \$75.00

MODULAR DESIGN

Versatility of the basic computer is easily increased by adding accessories in building-block manner. Each simply plugs in, without modification, and is supplied with one standard Donner cabinet module (2 sides, back, spacer), which bolts in place.

Castered floor-mounting bases and cooling-fan tops are available for larger computing facilities. Two or more computers are operated together to expand problem-handling capacity and flexibility.

PLUG-IN COMPUTING COMPONENTS

PRECISION RESISTORS are 1% tolerance, deposited carbon, molded in rubber with convenient handles. Through-connections allow "stacking" for easy problem set-up. Values 0.1, 0.2, 0.25, 0.5, 1, 2, 5, and 10 megohms, each marked and colored distinctively. (1% and 0.1% wire-wound resistors also available).

Series 30-101, \$2.80 each

PATCH CORDS in four color-identified lengths (4, 8, 12, and 24 inches) speed problem construction. Through-connections permit "stacking."

Series 30-120, \$1.60 each

INTEGRATING CAPACITORS with Mylar dielectric, 1% tolerance recommended for general use. Polystyrene dielectric, 1% tolerance (0.1% also available) provided for critical applications. Values 0.05 to 4 mfd.

Detailed Prices on request

INDIVIDUAL COEFFICIENT POTENTIOMETER is a 0.1 megohm composition plug-in unit, molded with through-connections.

Model 3061, \$7.20 each

COEFFICIENT POTENTIOMETER STRIP has ten single-turn, 0.1 megohm composition pots in a narrow cabinet which attaches to problem boards; second and third strips may be added. Jacks and switching circuits provided for measuring actual (loaded) values with Model 5000 Null Voltmeter.

Model 3071, \$85.00

Similar strip, but with ten 10-turn precision wire-wound pots, 0.1 megohm and 0.5% linearity, plus ten dual-indicating dials.

Model 3073, \$320.00

EQUIPMENT

MODEL 3730
ELECTRONIC FUNCTION
MULTIPLIER

Two separate channels (with common power supply) accept independently varying inputs U, V, X, and Y in range -100 to +100 volts, deliver products -0.01 UV and -0.01 XY. Four-quadrant multiplication or two-quadrant division, accurate within 0.5%.

With Standard Module, Model 3730, \$875.00
Rack Mounting, Model 3730R, \$860.00

MODEL 3750
VARIABLE BASE FUNCTION
GENERATOR

24 line-segments are combined to approximate (usually within 0.5%) almost any single-valued function. Generates powers, roots, empirical curves with inputs -100 to +100 volts. Two or more units may be "cascaded" to improve accuracy or capacity. Integral power supply.

With Standard Module, Model 3750,
\$385.00
Rack Mounting, Model 3750R, \$370.00

MODEL 3760
CHOPPER STABILIZER

Individually stabilizes all ten operational amplifiers of Model 3000 Computer, essentially eliminating drift. Used for multiple integrations and long solution times. Any chopper may be switched off, when not in use. True overload indicators and integral power supply.

With Standard Module, Model 3760,
\$1415.00
Rack Mounting, Model 3760R, \$1400.00

MODEL 3720
CYCLIC RESET GENERATOR

Resets and restarts computer at end of computing period (adjustable smoothly from 0.05 to 16 seconds). Furnishes synchronized oscilloscope sweep trigger, advanced in proportion to solution time to insure display from start. Power supply built-in.

With Standard Module, Model 3720,
\$200.00
Rack Mounting, Model 3720R, \$185.00
In Portable Case, Model 3720C, \$185.00

MODEL 5000
NULL VOLTMETER

Compares applied voltage (or coefficient in computer problem) with internal standard, nulling with precision divider. Reads directly in range -100 to +100 volts with 0.1% accuracy. Also is precision supply, -100 to +100 volts at 10 ma maximum, 0.05% regulation.

With Standard Module, Model 5000,
\$190.00
Rack Mounting, Model 5000R, \$175.00
In Portable Case, Model 5000C,
\$175.00

Any accessory above available with complete individual cabinet (and fan, where required). Add \$15 to price of instrument with module.

ACCELEROMETERS

MODEL 4005
LINEAR SERVO ACCELEROMETER

Outstanding for ultra-precise acceleration measurements at low frequencies. With integration, indicates velocity and position. Rugged, small, lightweight transducer with self-contained servo system.

- Response 0 (DC) to 15 cps, range ± 0.1 to ± 20 g full-scale.
- Resolution 0.0001, linearity 0.001 full-scale.
- Output ± 3.5 ma or ± 35 volts. Hermetically sealed and magnetically shielded.

Model 4005, \$540.00

MODEL 4051
ACCELEROMETER POWER SUPPLY

Supplies voltages required by Model 4005 Accelerometer (used where proper voltages not already available). Provides power input and signal output connections.

- Input 115 VAC, 50-1000 cps, 15 watts. Outputs +250 VDC, -250 VDC, 6.3 VAC.
- Hermetically sealed and magnetically shielded, servo-type mount.
- Supplied with 6-foot cable (to accelerometer) and all connectors.

Model 4051, \$175.00

**MODEL 1200
SINE WAVE
GENERATOR**

1 cps to 1 mc, plus overlap, in 6 decades.
Less than 0.1% distortion at any setting.
600 ohms constant output impedance, no DC.
8 volts RMS maximum. 2% calibration accuracy.
0.5% stability. Regulated power supply.

Model 1200, \$265.00

**MODEL 1500
LOW FREQUENCY
GENERATOR**

0.01 cps to 1 kc, plus overlap, in 5 decades.
True sinusoids (no discontinuities), 1% distortion.
Steep-sided square waves, 5 μ sec rise time.
0-1 and 0-10 volts peak, fully metered output.
1% frequency stability, 1 db amplitude constancy.

Model 1500, \$365.00

**MODEL 2100
WAVE
ANALYZER**

30 cps to 50 kc coverage, 3% calibration accuracy.
160 μ v to 500 volts RMS full-scale sensitivity.
Broad and narrow crystal filter selectivities.
VTVM reads harmonics directly in percent and db.
Simple operation, portability, reliability.

Model 2100, \$445.00

**MODEL 2800
WOW AND FLUTTER
METER**

Input 0.1-50 volts RMS, 3 kc (5-50 volts, 1 kc).
Tunable \pm 5%, with indicator. 3 kc test output.
0.3, 1, and 3% wow/flutter full-scale readings.
Pass bands 0.5-10, 10-300, and 0.5-300 cps.
Surpasses all IRE-SMPTE-ASA standards.

Model 2800, \$295.00

**MODEL 6100
VIDEO PROBE
AMPLIFIER**

Probe 2 μ pf, 4.5 M, minimizes loading.
Response down 3 db, 5 cps and 12 mc.
Input 600 volts peak, maximum.
Output 50 ohms, matching coax.
Gain X1, X0.1, X0.01 (with probe);
X40 (amplifier only).
Noise at output, 1 mv maximum.

Model 6100, \$195.00

Test instruments available rack-mounting at \$20.00 additional,
also rack-mounting with standard module, \$35.00 additional.

All prices domestic, FOB Factory. Specifications and prices
subject to change without notice.

 Spaghetti Tubing—lengths of 100, 200, 500, 1000 feet on reels
 Molded Tubing—Various wall thicknesses available from 1/4" on smaller sizes to 3/4" on larger sizes

POLYPENCO Q-200.5

Polypenco Q-200.5 (cross-linked polystyrene) is an excellent machinable dielectric for use in RF and UHF installations. Q-200.5 is rigid and form-stable, has low deformation under load combined with low power factor, and a low dissipation factor of 0.0002 over nearly entire frequency range. Use assures maximum performance at minimum cost.

POLYPENCO®

Since the choppers must fail, install a MAGNETIC MODULATOR for life

A Converter With High Shock and Vibration Resistance and Practically Unlimited Life
Operation in Ambient Temperatures From -70°C to $+150^{\circ}\text{C}$.

The Magnetic Modulator is designed to convert low level dual polarity DC signals into AC signals of corresponding amplitude and phase sense.

We specialize in control systems and MAGNETIC AMPLIFIER components for automatic flight, fire control, analog computers, guided missiles, nuclear applications, antennas and gun turrets, commercial power amplifiers, and control systems.

re·li·a·ble (rē·lī'ā·b'l), *adj.* Suitable or fit to be relied on; worthy of dependence or reliance.

re·li·

Every relay leaving the Leach plant *must* live up to that definition...reliability is the starting point in each new design and for every manufacturing and quality-control procedure. Whatever your relay need... whether starting an air-conditioning system or helping

to guide a missile through the ionosphere...look to Leach *first*. Then *test* Leach against any relay on the market. You'll learn right away why it has been a habit throughout industry for years to specify Leach when system reliability is a must.

Leach's premier line...SYSTEM DESIGNED RELAYS

"HI-SEAL" PACKAGED CIRCUITRY

COMMERCIAL CONTROLS AND CONTACTORS

MOTOR-STARTING TYPES

At left are three basic relays from a line designed around the hard facts of today's electronic, aircraft and missile systems... the toughest challenge yet for electronic components. To meet this challenge, and yet provide unusual flexibility, Leach *System Designed* Relays offer these features...

HERMETIC SEALING — every relay checked by mass spectrometer

OPTIONAL LEADS — solder terminals, potted leads or plug-in bases

SQUARE CANS — 20% more relays in the space required by round cans

SHOCK RESISTANCE — vibration and shock properties exceed MIL specs

HIGH-TEMPERATURE — dependability assured at 120°C ambient

Your best starting point when selecting any relay... the latest Leach Relay Catalog. SEND FOR A COPY TODAY.

LABORATORY AND TESTING INSTRUMENTS

THREE TERMINAL CAPACITANCE BRIDGE

- Cap. Range: .001 mmf to 11,000 mmf
- Approx. accuracy: \pm (25% + .001 mmf)
- Measures direct and grounded capacitance
- Measures conductance directly
- Self contained oscillator and detector
- Ideal for temperature coef. measurements
- Particularly suited for vacuum tube, transformer, and cable capacitance measurements

Model 74C

PRICE \$850.00

SENSITIVE RF VOLTMETER

- Range: .001 volt to 3 volts
- Freq. Range: .2-400 megacycles
- Accuracy: \pm 5% full scale
- RMS response below .1 volt
- High impedance probe
- 52 ohm probe; max. vswr 1.06
- Power sensitivity: .02 microwatt

MODEL 91A

PRICE \$375.00

RF DISTORTION METER AND VOLTMETER

- Frequency Range: 1 to 100 mc
- Sensitivity: 70DB below 3 volts
- Accuracy: \pm 2DB
- Input Impedance: approx. 50 ohms
- Fast, easy operation
- Same Voltmeter features as Model 91A above

MODEL 85B

PRICE \$675.00

UHF GRID DIP METER

- Widest freq. range: 300 to 1000 mc
- Small, lightweight probe
- High sensitivity for both capacitive and inductance coupling
- Frequency accuracy, \pm 2%
- Very stable oscillator
- High Q absorption frequency meter

MODEL 101B

PRICE \$275.00

The Exclusive Specialists in Precision Mass Production of Variable Resistors

DYNASERT
for
Automatic Assembly

Leading producers of radio, TV and industrial electronics depend on this system for regular production. Printed wiring boards are loaded at one end — and completed assemblies come off the far end at the rate of 9600 a day. Multiple station conveyorized equipment handles variety of components. Automatic assembly is faster, more uniform and costs less.

Production equipment for Electronics

Mechanized production equipment for all assemblers

Putting components into printed circuits — or considering this? Then you should know what Dynasert assembly equipment can do for you. Whether your weekly production is in the hundreds or the ten thousands there is Dynasert production equipment designed for the needs of electronics producers. Equipment can range from a single bench mounted machine to entire conveyor line set-ups with numerous stations.

In addition to component inserting machines, United's Dynasert equipment in-

cludes machines for component preparation, and automatic board loading and unloading. Equipment is versatile and readily adjusted to new set-ups. Dynasert machines provide:

- Significant reductions in assembly costs.
- Maximum freedom of printed wiring board design.
- Reliable, uniform assembly — proven performance.
- Positive feed — mechanisms engineered to fit components.

Components Handled: RESISTORS • AXIAL LEAD CAPACITORS • DIODES • AXIAL LEAD COILS
TUBE SOCKETS • DISC CAPACITORS • R-C NETWORKS • JUMPER WIRES • EYELET CONNECTORS

DYNASERT for **Semi-Automatic Production**

Single machines or groups of individual machines can provide most of the benefits of mechanized production. Can be widely used where limited lot production does not justify completely automatic conveyor system. Easily converted to conveyor use.

NEW... Designers Eyelet Kit

- Contains 63 standardized sizes and lengths
- Get exactly the size eyelet you need
- Compact package has sizes marked in cover

This kit is the best way to get acquainted with United's STANDARDIZED eyelets — the uniform eyelets that meet specifications drawn by engineers and designers. Eyelets are graduated in 32nds of an inch through seven diameters and twelve barrel lengths. This helps you explore the possibilities of eyelets as a quicker, better or more economical fastener or special component. Get one today. Only \$4.00. See address below.

by United

Eyeleting Machine MODEL G

- Simple, reliable, adaptable to many uses.
- Non-repeating clutch for less spoiled work and greater safety.
- Self feeding for eyelets up to 5/8" flange diameter.

Simple, trouble-free, the standard Model G Eyeleting Machine has been adapted to many uses. In electronics it can be equipped with a device which neutralizes excess setting pressure and cut breakage when ceramic, plastic, or other fragile materials are being eyeleted. Can also be fitted with retractable spindle to save many dollars in replacing broken tools when small eyelets are being set. It has a non-repeating clutch which makes for less spoiled work and less skill required.

Eyeleting Machine MODEL F

- Heavy duty for eyelets up to No. 5 grommet.
- Sets from 2 to 6 eyelets at the same time.
- Different sizes can be handled simultaneously.

This is the most versatile eyeleting machine of its type on the market. It is built for long, trouble-free service.

Its simplicity opens up new opportunities for utilizing low-cost eyelets on many types of work.

Raceways are easily changed to accommodate eyelets of different sizes. It is capable of exerting up to 4800 pounds pressure. With materials which can be used in conjunction with piercing or punching types of sets, no holes are required.

Other materials require holes to be made previously.

The Model F is available with a great many variations in the auxiliary devices. Investigate its many advantages now.

CHECK your insulating needs with the makers of **SCOTCH** Electrical Products

Reg. U.S. Pat. Off.
BRAND

(World's leading supplier of tapes, films and resins for electronic application)

✓ MYLAR* TAPE (Polyester Film)

One of the most stable of tapes. Pressure-sensitive adhesive. Has extremely high dielectric strength. Film backing is only one mil thick, yet tape withstands 5,000 volts in a short time test. Insensitive to heat, cold and moisture. Resists chemical action; is almost impossible to tear.

With true thermosetting adhesive

✓ PAPER-BACKED TAPE

Purified crepe or flatback paper backings are unified by impregnation with an electrical grade saturating solution. Available with standard pressure-sensitive or thermosetting adhesive that holds strongly. The true thermosetting adhesive has extremely high tack, great solvent resistance, long shelf life.

With true thermosetting adhesive

✓ "PTF" TAPE AND FILM (Made of Teflon* Resin)

Highest degree of chemical inertness of any plastic. Great mechanical strength, a minimum of pinholes, excellent electrical properties over a wide range of temperatures and frequencies. Low moisture absorption and vapor transmission. Available in tape form with pressure-sensitive adhesive, as a fused or unfused film.

✓ VINYL PLASTIC TAPE

The tape needed for mechanical and electrical protection. Conforms smoothly to odd shapes and contours. Pressure-sensitive adhesive sticks tight at light finger pressure. Resists acids, oil, alkalis, alcohols, water, sunlight and weathering. In 7, 10 and 20 mil thicknesses. High dielectric strength.

✓ ACETATE TAPES

The ultimate in non-corrosive tape for fine-wire coils. Acetate fibre, acetate cloth or acetate film cloth backings available—all with pressure-sensitive adhesive. Good moisture resistance. Attractive appearance. Ideal for splicing lead wire connections, making lead saddles or pads, strapping pads to coil, coil wraps, insulating relay coils and solenoids.

With true thermosetting adhesive

✓ GLASS CLOTH TAPE

Heat-resistant glass cloth backing won't burn, shrink or rot. Thermosetting adhesive cures at 120°C for two hours to form a permanent bond of great strength. High resistance to varnish solvents. It is Class "B" insulation, recommended for insulating and holding where high heat is normal. Tensile strength: 150 lbs. per inch of width.

With true thermosetting adhesive

ENCAPSULATING AND IMPREGNATING RESINS

"SCOTCHCAST" Epoxy Resins are available with a wide range of characteristics which equip them for innumerable applications. Available in rigid, and semi-rigid flexible forms.

TUNE IN ON RADIO CONDENSER

For Variable Capacitors Tuners Electromechanical Assemblies

The experience of Radio Condenser in producing tuners and variable capacitors to individual requirements has consistently proved its value to manufacturers through the right combination of quality and cost. However unusual a problem may be, chances are that R/C specialists have faced a similar problem and solved it.

The products shown on this page are only a brief sampling of units designed, engineered, and manufactured by Radio Condenser. A more complete description of products in each category is given in our catalog, available on request. Or, we will be happy to arrange a direct interview with a Radio Condenser Engineer at your convenience.

STANDARD HOME RADIO TYPE CAPACITORS

R/C units cover every standard application, including AM-FM receivers. Each is a product of high quality, performance-proved, and well adapted to rapid, low cost quantity production.

CAPACITORS FOR LIMITED SPACE

Among the most recently announced R/C developments is a miniature variable capacitor for transistorized radio receivers, also adaptable to color TV phasing control. R/C accomplished important reductions in size with no sacrifice of stability or calibration accuracy.

MINIATURE AIR TRIMMER CAPACITORS

For every type of electronic equipment—printed wiring board or conventional chassis—Radio Condenser miniature trimmers permit more circuit in less space. All are equipped with plug-in tabs as well as two holes for screw mounting. Ruggedly constructed, the tiny trimmers also have excellent insulation resistance, "Q", and thermal stability.

AUTOMOTIVE RADIO TUNERS

Approximately one-third of all American automobiles are equipped with R/C tuners. Because every automobile radio tuner is an individual case, R/C custom manufacturing experience is an important asset to the radio manufacturer in this specialized field.

STANDARD CAPACITORS FOR SPECIAL APPLICATIONS

Always an important part of R/C activities, design and manufacture of variable capacitors of a special nature are handled by a special division. Products include units for every type of military service, test equipment, etc.

ELECTRO- MECHANICAL ASSEMBLIES

As a contract manufacturer of electromechanical assemblies for industrial and military electronic equipment, automatic data processing systems, etc., R/C also offers engineering assistance in development and modification, leaving you completely free of production worries and details. Complete information on this well-qualified division is available on request.

		MMHC	1000	35, 40, 45		125	13	9 1/4

① Current ratings can usually be doubled with forced air cooling. Water cooled units are also available.
② Nominal Dimensions are for the largest unit of each type.
NOTE: Intermediate capacities, feed-thru capacitors, and glass insulators are available.

TYPES R AND RH HIGH VOLTAGE SWITCHES

VACUUM SWITCH RATINGS

For RF and DC Transfer Switching

Jennings Type	R5C	R1	R2	R8	RH6	RH7
Test Voltage (300 kc dry)—peak kv	20, 30	40, 50	50, 60	40, 70, 85	85, 100	85, 100
Operating Voltage—peak kv	15	30	40	30 to 85	85	85, 100
Continuous Current (rms amp)—dc ^①	50	50, 100	50, 100	100, 200	50, 200	50, 400
—300 kc	30	35	35	100	50	100
—10 mc	25	25	25	50	50	100
—30 mc		15	15	25	25	25
RF Interrupting Power—kilowatts	50	250	250	1000		

① DC continuous currents may be increased as shown by using special connectors.

For DC Switching Under Load or Capacitor Discharging

Jennings Type	R5C	R1G	R1J	R2G	R8G	R9G	RH1G	RH7G
Test Voltage (60 cycles dry)—peak kv	20, 30	40, 50	30, 40	50, 60	40, 70, 85	85	85, 100	85, 100
Operating Voltage—peak kv	15	20	20	30	50	60	85	85
Continuous Current—dc amp ^①	50	50, 100	50, 100	50, 100	100, 200	100, 200	50, 200	50, 400
DC Interruption ^② —power in kw	5	25	50	25	50	100	200	200
—current in amp	5	25	50	25	50	100	200	250
Capacitor Discharge—initial amp		500	1800	500	1000	1500	2000	2500

① DC continuous currents may be increased as shown by using special connectors.

② For DC interruption in continuous operation, neither power nor current rating should be exceeded.

For 60 Cycle Power Switching

Jennings Type	R1J	R2G	R8G	R9G	RH1G
Operating Voltage Class—rms kv line to line grounded Y capacitor load to 85% lag pf	2.5	8.25	12	15.5	2.5
Withstand Voltage—rms kv (60 cycle, 1 min. dry test)	19	26	36	50	19
Impulse Voltage—peak kv (1 1/2 x 40 μs NEMA test)	60	75	95	110	60
Operating Current—rms amp at 0% lag (capacitor load) to 85% lag pf / Break only / Make & Break	100	50	100	200	100
Interrupting Current (rms amp)—NEMA one time	50	30	50	100	50
—NEMA ten times	1500	800	2000	2500	1500
Short Time Surge Currents (rms amp)—NEMA 4 second	1000	500	1500	1500	1000
—NEMA 10 cycle mom.	2000	500	2000	2500	2500
Thermal Current (for 30° C. rise)—rms amperes	4000	1500	4000	5000	5000
	100	100	200	200	400

RELAYS USING VACUUM SWITCHES

Type R and RH Vacuum Switches are available from Jennings mounted as relays for indoor use. They may be mounted with contacts normally open or normally closed or two switches may be mounted in a single pole double throw arrangement. Either ac or dc solenoids may be used. Insulation between the switch and its actuating solenoid is provided by a 2 to 8 inch puller rod providing 40 to 100 kv insulation. CE grade phenolic laminate is recommended for dc or 60 cycle use; Grade G7 silicone glass laminate or alumina ceramic is recommended for radio frequency applications.

HIGH VOLTAGE MEASURING EQUIPMENT

MODEL JP 325 HIGH VOLTAGE PROBE
VOLTAGE RATINGS: 40, 50, or 60 KV peak.
VOLTAGE DIVISION RATIO: 325 to 1 to termination of 3 ft. of RG-58 A/U cable.
INPUT IMPEDANCE:
Resistance: above 10¹² ohms.
Capacitance: 4 mmfd.
FREQUENCY RESPONSE: High frequency limited by that of measuring instrument. (Internal resonances are above 200 mc.) Low frequency response is 100 cps if operating into 10 megohm shunt resistance; 10 cps if operating directly to vertical deflection plates of an oscilloscope.

TYPE JCD 5 MMFD SERIES CAPACITOR attaches to HV end of the V₀ 2.5 divider in the meter below and the probe at the left doubling the division ratio in each case. Decreases total loading capacity of meter or probe from 4 mmfd to 2 mmfd.
Sold without corona sphere unless ordered.
VOLTAGE RATING: 60 KV peak.

MODEL 1-1002 HIGH VOLTAGE VACUUM TUBE VOLTMETER for use in pulse, rf, and 60 cycle circuits at voltages up to 100 KV.
VOLTAGE RANGES (peak volts full scale):
Single Ended: 5, 10, 25, 50, 100 KV.
Double Ended: 5, 10, 25, 50, 100 KV.
(By using Type JCD Series capacitor, these ranges can be more than doubled.)
OSCILLOSCOPE CONNECTION: 300 to 1 division ratio.
FREQUENCY RESPONSE: 20 cycles to 20 megacycles at full rated voltage and up to 50 megacycles for lower voltages with low harmonic content.
INPUT IMPEDANCE: 10¹² ohms and 4 mmfd.
CALIBRATION ACCURACY: ±3% of full scale.
POWER SUPPLY: 117 volt, 50/60 cy.
DIMENSIONS: 16" x 10" x 10 3/4".

JENNINGS RADIO MANUFACTURING CORPORATION • 970 McLAUGHLIN AVE. P.O. BOX 1278 • SAN JOSE 8, CALIF.

IMC MOTORS FOR POSITIVE PERFORMANCE

FBC 2922 B-2

250 cfm @ .5" sp
115 volts
60 cycle
Single phase
Weight: 8 lbs.

2900 FRAME—IMC's 2900 frame series is available either as non-synchronous or synchronous (reluctance or hysteresis types) in horsepower from 1/200 to 1/8, voltages from 26-208. Units suited for use in recording instrumentation, where low noise levels and speed uniformity are critical.

BT 1708 G-1

Two phase
(Impedance 9000 ohms)
60 cycle
Two pole
3300 free rpm
Voltage-Reference winding: 115 volts
Voltage-Controlled winding: 230 volts
Weight: 1 lb.

1700 FRAME—Servo motors can be obtained in either one or two phases, 60-400 cycles, 2, 4, 6 or 8-pole construction. All are built to meet military specifications on humidity, high ambient temperatures, vibration or altitude. Units are available with high impedance controlled winding. Shaft diameter, length optional.

BD 1206 G

Torque-60 oz. in.
200 rpm
28 volts DC
Weight: 7 oz.

1200 FRAME—Miniature, permanent-magnet DC motors in horsepower from 1/300 to 1/75, are well-suited for blower, fan and gear motor applications in both military and commercial flight installations. These high-power units are available in voltages from 6-28. All are 2-pole, ball-bearing devices.

BC 1615 F-23

90 NAFM rating
115 volts
60 cycle
Single phase
Weight: 1 lb. 8 oz.

1600 FRAME—This series is comprised of induction type, non-synchronous or synchronous units with low temperature rise, in horsepower range from 1/300 to 1/10, voltages from 26-208. All have anodized aluminum housings; either ball or sleeve bearing construction and can withstand ambient temperatures up to 150°C.

3011 DYNAMOTOR

Input: 27.5 v at 3 amps
Output: 160 v at 250 ma
Speed: 9000 rpm

3000 FRAME—Newest additions to the Induction line are the 3000 frame series dynamotors. These units, which feature power output up to 110 w depending on duty cycle and ventilation, operate in the temperature range from minus 55—plus 105°C. Precise input and output voltages are available to meet your specifications in this and other dynamotor frame sizes.

Other motor, gear, fan and blower applications listed in the IMC catalog

MICROWAVE TRANSMISSION LINES AND COMPONENTS

TECHNICRAFT can serve your needs from the face of the magnetron through to the antenna.

DOUBLE RIDGED WAVEGUIDES

Flexible and rigid waveguides, bends, twists, power dividers and antennas. Transitions from ridged to rectangular waveguide within the frequency range 4.75 to 11.00 KMC/S are available.

In addition to the DR-19 size referred to above, Technicraft is expanding its components not only in this size but in other ridged waveguide sizes as well.

One double ridged waveguide replaces four conventional waveguides.

FLEXIBLE WAVEGUIDES

Only manufacturers of solderless flexible waveguides, which eliminate problems inherent in soldered structures. (Technicraft uses solder only to attach flanges.) Three types of flexible waveguides are available — Type L — Interlocked, Type S — Corrugated, and Type V — Vertebra. Technicraft's Type S — Seamless Corrugated flexible waveguide is the only seamless flexible waveguide made.

Type L — Interlocked

Type S — Seamless-Corrugated

Type V — Vertebra

OSCILLATING JOINTS

New Technicraft development designed to replace rotating joints where oscillation required is between $\pm 30^\circ$ to $\pm 210^\circ$. Overall length of unit is determined by the degrees of oscillation required. Device is broad band, has low VSWR, is capable of handling high power, is pressurizable and has exceedingly long life. Provides performance equal to a rotating joint for particular applications, but is much lower in cost.

RIGID WAVEGUIDE SYSTEMS AND COMPONENTS

Technicraft is equipped to design or manufacture to your specifications and drawings any waveguide component or system from face of magnetron through to the antenna. Most advanced test equipment and techniques, plus finest facilities for manufacture and assembly. Mixer duplexer (shown) demonstrates Technicraft know-how in designing and building components into a compact assembly.

PRECISION TEST COMPONENTS

VSWR Calibrator

Broad Band MATCHED Magic Tee

Movable Tunable Load

Precision Slide Tuner

Others include: High Power Phase Shifters
 • High Power Stub Tuners • Precision Traveling Detectors • Directional Couplers
 • Quick Disconnects

NEW DEVELOPMENTS

If you are working on a new development in microwave transmission, we suggest that you check with us. We may be already in development on the component or device you need, or we can add our specialized experience to yours in effecting a faster solution. Among the new things in process at Technicraft are: new methods of RF energy transmission, such as strip line devices, ridged waveguide components and devices, infra-red transmission; ferrite devices, rotary joints, waveguide switches, high power loads. In addition, we are constantly working on existing components to improve their performance and adaptation to miniaturization.

IMMEDIATE DELIVERIES

This is only a partial listing of our many electronic products. Immediate deliveries from the World's most complete warehouse stock. Available in bulk or in new tarnish-free packages. Write for name of nearest stocking USECO Distributor. Please address Dept. 15.

STANDARDIZED ELECTRONIC HARDWARE

U. S. ENGINEERING CO.

STANDARD TERMINAL LUGS

INSULATED TERMINALS

STAND OFFS

TAPER PIN TERMINALS

SHAFT LOCKS

USECO Terminal lugs are made in these size ranges:

SHANK DIAMETERS FROM .062 to .203

SHOULDER DIAMETERS FROM .093 to .250

SHANK LENGTHS FROM .037 to .230

LENGTHS ABOVE SHOULDERS .095 to .468

Special designs by request. Write for catalog with complete specifications. Please address Dept. 15.

REPRESENTATIVES

Representatives in all principal cities. For name and address of representative in your locality, write Dept. 15.

ETCHED CIRCUITS

Quality etched and printed circuits require specially trained personnel. USECO's Staff offers you unsurpassed experience, creative imagination and technical skill. Circuit samples of your design are often supplied at cost. Your prototype inquiries are invited. Furnished in any plated finish as specified.

"PLATED-THRU" CIRCUITS

Made by an exclusive USECO process, our "PLATED-THRU" circuits assure you of optimum performance. Experienced in producing circuits with all types of base materials and all precious metal platings. Engineering and design facilities are available.

Write for catalog which tells how to prepare master drawings and gives complete information on how to order. Please address Dept. 15.

TERMINAL BOARDS

USECO manufactures Terminal Boards to customer specifications. In addition we maintain a large stock of Standard Terminal Boards. See catalog for complete line. Made to meet all approved MIL and JAN specs.

MULTI-CELL®

NEW

UNIQUE SOLUTION TO DIFFICULT INSTALLATIONS!

Universally **ADAPTABLE...**
SHIELDING'S MULTI-CELL® ENCLOSURE

Designed and developed by Shielding engineers, here's installation versatility never before offered in any type of shielding room!

Featuring completely interchangeable standard panels of either solid and/or mesh construction, this Multi-Cell® Enclosure makes installation a snap...and no special tools are required either! Erection poses no problem as this versatile enclosure can be fastened from the inside or outside, by use of a single screw driver!

Other engineered-design features include: (1) Modular panel construction of single or double shielding thickness; (2) Standard door installation in any wall position to swing left or right, in or out; (3) Composite enclosures constructed in combinations of 40 or 48 inch wide panels; (4) Choice of cell or isolated type enclosure.

Supplying attenuation characteristics to meet any demand, all Shielding Enclosures have passed all applicable military tests—concrete proof that Shielding has the answer to your RF Suppression problems.

POTENTIOMETERS...

For those unusual requirements where usual controls (as used in radio/TV sets, simple instrumentation, etc.) do not quite measure up, Clarostat provides a wide choice of critical-need potentiometers. Typical are the following types:

Use our IMAGINEERING! Regardless what your control or resistance problems or requirements may be, draw on Clarostat's **IMAGINEERING** for the logical and economical answer. Engineering literature on request.

for MINIATURIZATION...

Series 48M Composition-Element Potentiometer. 0.2 watt. Only $\frac{5}{8}$ " d. $\frac{1}{8}$ " round shaft. Available with split-locking bushing as Series 48M-9. Also with screwdriver slotted shaft. 300° rotation. Single or dual combinations. SPST switch for low-voltage applications. 1000 ohms to 2.5 megohms. 10 and 20% plus/minus tolerances.

Series 49M Wire-Wound Potentiometer. 1.5 watt. Only $\frac{3}{4}$ " d. $\frac{1}{8}$ " round shaft. Available with split-locking bushing as Series 49M-9. Also with screwdriver slotted shaft. 300° rotation. Single or dual combinations. SPST switch for low-voltage applications. 10 ohms to 20,000. 10% plus/minus tolerances.

WRITE FOR CATALOG
OF THE COMPLETE LINE OF
FXR PRECISION MICROWAVE
TEST EQUIPMENT

A Message from our President...

It has been our pleasure to serve the microwave field for more than a decade. Originally, our products were chiefly components for radar and microwave relay systems. As our plant grew and the engineering department expanded, we undertook prototype development of various microwave systems for relay and guided missile applications. High power modulators were then added to our product line and received enthusiastic response.

About two years ago, we began marketing the FXR line of precision microwave test equipment. Today, we have one of the most complete lines of ready-for-delivery units in the field. Further expansion is being made in our product line, such as the new instruments described.

FXR's success has been achieved because of the ready acceptance of our products in industry and laboratories throughout the world. Prospective customers are invited to try our quality equipment and thorough service. We are especially proud of our modern plant and engineering facilities which are always open to your inspection. When further requirements and problems occur, we will, as always, be happy to provide the individual attention needed.

Henry Feldmann
President and General Manager

Thomas A. Edison

INCORPORATED

Hermetically Sealed Time Delay Relay Model 501

Glass-sealed thermal action Time Delay Relay for cathode protection in high voltage electronic tubes, gyro erection in fire control stabilizers and aircraft autopilots and hundreds of other uses involving a time delay in an electrical circuit.

Time delays: 2 seconds to 300 seconds
 Heater voltages: 6.3, 26.5, and 117 (intermediate voltages available in special circumstances)
 Heater input: 5 watts nominal (continuous excitation)
 Contacts: SPST normally open or closed. Rated for 6 amperes max. at 450 volts a.c. or d.c.
 Ambient: Compensated for -60°C to $+85^{\circ}\text{C}$

Vibration: Resists $1/4$ " overall amplitude at 55 cps
 Tolerances: Heater voltage: Positive contact operation with variation of $\pm 10\%$. Operating time at 25°C : $\pm 15\%$

Weight: $1 1/4$ to $2 1/4$ oz.
 Sealed height: $3 1/4$ "
 Diameter: 1.275" max.

Shock: Resists impact of 50g

Current Ratio Indicator Model 222-1J

This meter indicates the ratio of two direct currents using a d.c. galvanometer type movement having fixed coils and a moving magnet.

With equal current in both field coils the pointer will indicate unity ratio (1). Increasing one current over the other pulls the pointer right or left of center to indicate a ratio. A proportional increase or decrease in current through both coils does not affect the indication because the pointer assumes the resultant rather than the absolute measure of either magnetic field.

Accuracy: Scale tolerances are based on an angular tolerance of 1°.

Coil Current Strength: For accurate calibration the current in either coil should be between 2 ma. minimum and 50 ma. maximum.

Depth: 3-1/16"
 Dial Diameter: 2 3/4"

WIRING DIAGRAM

Hermetically Sealed Thermostats

STANDARD TYPE S1-1A

Manufacturing tolerance: $\pm 0.5^{\circ}\text{C}$
 Control sensitivity: Will hold temperature within $\pm 0.1^{\circ}\text{C}$ at low contact load when properly applied.
 Maximum load: 1.0 ampere
 Maximum voltage: 250 a.c. or d.c.
 Maximum temperature: 150°C
 Diameter: .388 inches
 Length: $2 1/2$ inches

STANDARD TYPE S1-2A

Manufacturing tolerance: $\pm 2.5^{\circ}\text{C}$
 Maximum load: 0.5 ampere; 1.0 ampere in alarm service
 Maximum voltage: 250 a.c. or d.c.
 Maximum temperature: 190°C
 Diameter: .388 inches
 Length: $2 1/2$ inches

Approved by Underwriter's Labs for fire alarm service with spacing 15 feet between centers.

MECHANICALLY SEALED Miniature, Model 210

Manufacturing tolerance: $\pm 5^{\circ}\text{F}$
 Maximum load: 1 ampere at 115 volts a.c.; 0.5 ampere at 115 volts d.c.
 Maximum voltage: 125 a.c. or d.c.
 Maximum temperature: 350°F
 Adjustability: $\pm 60^{\circ}\text{F}$ from original setting
 Diameter: .318 inch
 Length: $1 1/4$ inches

These precision-made bimetallic thermostats are permanently sealed in glass and enclosed with an inert arc-quenching gas fill. Because of their lifetime protection from corrosion and contaminating substances, these thermostats are widely used as fire detectors in marine and industrial applications. Their close temperature control and exceptional stability make them ideal for crystal oven ambient compensation and other exacting temperature control requirements.

STANDARD TYPE D8-2A

Manufacturing tolerance: $\pm 2.5^{\circ}\text{C}$
 Maximum load: 8.0 amperes
 Maximum watts: 1000
 Maximum voltage: 250 a.c. or d.c.
 Maximum temperature: 320°C
 Diameter: .550 inch
 Length: $2 3/4$ inches

When ordering any thermostat, give following information:
 Operating voltage and current
 Temperature setting
 Contact arrangement—are contacts to open or close on rising temperature?
 Medium to be used in
 Load—resistive or inductive

Sensitive Control Relay

Operates directly from thermocouple, photocell or vacuum tube plate current. Polarized operating characteristic makes it ideal for use as a null detector in universally-used bridge circuit. Power consumption is so low that this Relay can be used in servo control circuits without danger of draining power from other system components. These relays have proved their reliability in military and commercial airborne applications.

Closing current: Contacts close on input currents from 30 microamperes d.c. to 12.5 milliamperes d.c. Lower closing currents available in special circumstances.

Coils: Formvar-coated copper. Resistances from 0.5 ohm to 23,600 ohms. Normal closing power may be increased 10,000 times without adverse effects.

Contacts SPST or SPDT normally open or closed. Rated for 1/2 ampere at 28 volts d.c.

Hermetically sealed: Model 220
Gasket sealed: Model 219

Vibration and shock resistant: Relay unenergized will withstand shock of 50g in all planes without damage or change in calibration.

When ordering, specify:

MODEL NO. TYPE OF BASE CONTACT STYLE COIL RESISTANCE CLOSING CURRENT IN MILLIAMPERES D.C.

Model 219—Gasket Sealed

Current Limiting Switch

Hermetically sealed in glass

A SPST normally closed hot-wire type of switch designed to open when the current through the wire reaches 125 milliamperes. This switch serves to protect the input circuits of radio receivers from over-currents induced by nearby transmitting equipment.

Operating current: 125 milliamperes \pm 25

Ambient: Compensated for 0 to 90° C

Shock: No damage under 60g in all directions

Diameter: 7/16 inch nominal

Length: 2 5/8 inches

World's Finest Cored Solder!

THIS PROVES IT!

If You're
SOLDERING A "TOUGH JOINT"...

And You
CHANGE TO NEW MULTICORE 5-CORE SOLDER

Being Nearer The Source Of Heat,
THE 5 CORES OF ERSIN FLUX

Melt Faster...
WET THE SOLDER AND THE METAL FASTER...

And Presto...
YOU GET A THIN, WIDE JOINING—NOT A BALL!

Remember that "dry" or corroded joints, on the production line, lead to slow-ups, rejects... cost you money!

It's the only solder with non-corrosive, extra-active Ersin Flux... 5 cores to guarantee uninterrupted flux in every smallest piece of the wire!

There's only a skin-thin wall of solder between the flux and the iron... yet with less total percentage of flux than in many single-cored solders!

The Ersin Flux spreads from 5 areas instead of 1, and the entire solder is instantly fluid... runs faster and more evenly, though its actual melting temperature, alloy for alloy, is of course, the same as that of any other solder!

Pre-wetting, by 5 molten cores of flux, insures instant... spreading and gripping, even on difficult metals. Yes... it saves money... permits lower tin content alloys than you may be using in other solders!

Made of virgin metals only:
TIN: 99.95% pure
LEAD: 99.97% pure

5 CORE

ERSIN

Multicore

World's Finest Cored Solder

Conforms with QQ-S-571b and other Federal specifications

B.I.W. CAN PROVIDE

Wires and Cables

FOR ALL YOUR APPLICATIONS

AIRCRAFT & MISSILE WIRES & CABLES

Antenna Wire & Transmission Cables:

Laminated teflon insulation having unusual high corona level and breakdown voltage complying with Air Force Specifications.

Coaxial Cables:

A complete range of sizes, impedances and attenuation of teflon insulated — 55°C to 250°C complying with Government specifications and in addition BIW designs for special applications.

Coaxial Cables Miniature for Electronics:

Extremely small teflon insulated of unique design having low noise characteristics, and very suitable for miniaturization.

Electronic Hook-up Wire:

Extruded high-temperature vinyl, Kel-F and teflon for miniature high-temperature applications.

Engine Ignition Cable:

A variety of sizes of teflon ignition cable for jet engine installations approved by leading manufacturers.

Flame Detector Cable:

Heat and fire resistant special designs approved by major manufacturers of flame detector devices.

Flexible Telemetry Cable:

Miniature shielded cables, single, 2, and 3 conductor approved by many years of satisfactory service.

Fuel Gauge Wires:

Specially designed teflon insulated cables approved and adopted by the major manufacturers of fuel gauges.

Jet Engine Control Wire:

BIW standard teflon and fiberglass insulated approved and service tested as a dependable jet engine control wire.

Missile Wiring:

Complete range of teflon and fiberglass insulated small-size, high-performance missile wiring approved by leading missile manufacturers.

Multi-Conductor Cable:

BIW designs and manufactures multi-conductor cables to withstand the aircraft service conditions of low-temperature, vibration, light-weight and serviceability.

Power and Lighting Cable:

Complete range of sizes and ratings: 100°C, 125°C, 150°C and 200°C.

SOX Low Temperature

Multi-Conductor Cable:

A special series of low-temperature, multi-conductor cables approved from operating service life and applications such as propeller de-icers, rudder control, bombay doors, missile launching.

Thermocouple Wire:

Made to order special types for unusual applications utilizing teflon and fibre-glass insulation.

ELECTRICAL EQUIPMENT

Elevator Cables for Control,

Annunciator and Lighting:

2 to 40 conductors, with and without steel supporting strands. Accepted standard by principal elevator manufacturers.

Extra Flexible Power, Lighting &

Instrument Cable:

#24 to #0 flexible and extra-flexible strandings with pliable heat-resisting rubber and neoprene insulation for numerous applications such as relay contactors, mercury switches, reciprocating equipment and hinged panel apparatus.

Flexible Motor Lead Wire and

Appliance Wire:

Underwriter's approved #24 to #8 in temperature ratings of 75°C rubber, 80°C, 105°C vinyl insulation. Numerous colors and stripes available.

High temperature Wires and Cables:

BIW specializes in high-temperature wires using 105°C vinyl, silicone rubber, and teflon to produce cables with higher temperature ratings required in many applications:

- Motor and transformer lead cable

- High voltage units: precipitator, static neutralizer, Etc.
- Chemical apparatus requiring resistance to corrosion
- Multi-conductor cables

Multi-conductor cables:

BIW designs and manufactures multi-conductor cables of all types for electrical apparatus and equipment such as automatic machinery, x-ray apparatus, remote control devices and signaling equipment.

ELECTRONICS

Flexible coaxial transmission cable and pulse cable for airborne electronics.

- Hook-up wire: • 80°C, 105°C with or without fabric coverings.
- Shielded with protective covering
 - Available in a wide range of colors and tracers.

Low capacity Probe cables:

Low capacitance of 8 to 10 mmf/ft., extra flexible.

Low Noise Shielded Cables:

As a result of BIW developments a wide range of types and sizes are available designed to fit standard connectors.

Multi-conductor Cables:

BIW designed and manufactured over 900 made-to-order multi-conductor cables complying exactly with requirements for particular equipment.

Radiation Monitoring Cable for Nuclear

Energy Locations:

Approved designs for use with the principle detection instruments.

TV Camera Cables:

BIW design has been approved and adopted by the major manufacturers of TV cameras and recognized by leading studios as the most serviceable cables available.

Telemetry Cables:

Miniature shielded cables single, 2 and 3 conductor as well as a variety of multi-conductor types.

New cables, designed and manufactured to your requirements
Facilities for large or small quantities

High Speed - High Accuracy Data Conversion. Epsco data conversion equipment offers an unusual combination of high speed with a high degree of accuracy. This is made possible by a completely new approach to conversion instrumentation utilizing novel electronic and magnetic circuitry.

Epsco Datrac Instruments are fully reversible. They will convert voltage information to digital form and digital information

DATRAC MODEL B611 CONVERTER

This *completely reversible* voltage-to-digital converter makes a complete, independent voltage-to-digital conversion every 22 microseconds - or a complete digital-to-voltage conversion every 2 microseconds!

Model B611 is a precision, high speed, high accuracy data reduction unit capable of ultra high speed combined with accuracy without need for manual calibration or adjustment of any type!

This Datrac instrument is capable of converting unknown input voltages to digital coded form at high speeds and at precisely known times. Digital codes may be applied as inputs and proportional voltages obtained as outputs.

Conservative design and absence of mechanical switching assures reliable field operation.

Model B613 Datrac Converter is a binary coded decimal unit having a voltage-to-digital conversion time of 26 microseconds. All other specifications are the same as Model B611.

Model
B611
DATRAC

DATRAC B611 FEATURES

Voltage-to-digital conversion time:	22 microseconds
Digital-to-voltage conversion time:	2 microseconds
Maximum full scale input voltage:	±1,000 volts
Minimum full scale input voltage:	±10mv
Data Code:	Binary
Accuracy:	±.05% full scale ±1/2 least significant digit
Calibration:	Automatic to an internal standard cell reference.
Data Code Output Forms:	a. Serial pulse train. b. Parallel semi-static binary valued voltage lines. c. Positive parallel-line trigger pulses.
Size:	19 inches wide by 26 1/4" high (relay rack mounting (also available with cabinet as shown).

Send for detailed specifications and prices.

COMPUTER DATA CONVERSION SYSTEM

log equipment - translating the digital language of one into the analog language of the other.

The equipment accepts voltages from analog inputs and delivers converted numbers to a digital computer. Conversely, it can take numbers from the digital computer

and deliver converted voltages to analog outputs.

There are 15 channels in each direction, i.e., 15 digital-to-analog converters (DAC) and 15 analog-to-digital converters, (ADC), or optionally 10 channels of ADC.

Write for detailed specifications.

DATRAC J

Multi-channel, high-speed, data conversion equipment permits linking a digital computer with an analog computer or direct analog devices.

Epsco multiple channel high speed computer data conversion equipment makes possible bi-directional communication between digital computers and external ana-

SUB-CARRIER FM DISCRIMINATOR

FEATURES

- ★ Long term stability without manual corrections for "0" drift or gain variations.
- ★ Remote and/or manual selection of any standard IRTWG sub-carrier channel 1 through 18 and A through E or 100kc reference signal.
- ★ Automatic wow and flutter tape recording corrections when used with Epsco Type FM 108 velocity deviation unit.
- ★ Can be used for either frequency modulation data conversion or pulse width (PDM) modulation signals by manual selection.
- ★ No spurious transient outputs result from change of input signal level over an input operating range of 10 millivolts to 10 volts.
- ★ Automatic servo actuated corrections for arbitrary 0% and 100% information levels (or 0% and 80% information levels).

WRITE FOR PRICES AND DELIVERY.

VELOCITY DEVIATION DETECTOR

The Epsco Type FM 106 Velocity Deviation Detector has been designed to detect the wow and flutter components in the playback of recorded FM telemetry data.

This unit obtains wow and flutter information from a pre-recorded carrier channel and provides suitable outputs for use in the Epsco FM 108 FM Sub-Carrier Discriminators.

This unit operates from 100kc carrier frequency. (Can be supplied on special order to obtain correction information from a carrier frequency other than 100kc.) No adjustments or calibration corrections are required.

Input: 10 millivolts to 10 volts from sub-carrier filter.

Output: suitable to provide correction data to Epsco Type FM 108 Discriminator.

AIRBORNE DATA PROCESSING SYSTEM 1619A

An ultra high-speed, miniature system specifically designed for airborne use. It will measure and time-multiplex transducer voltages, and provide digital outputs suitable for direct tape recording, transmission over teletype links or direct analysis in computers with no intermediate step required.

This system fully meets all the general environmental conditions peculiar to aircraft and will operate over an ambient temperature range from -55°C to +70°C and at altitudes from sea level to 60,000

feet. It will operate in any position. Power input requirements: 115 volts (±5 volts) AC, 400 cycles (±20 cycles). Electronic timing is crystal controlled - all from a single crystal oscillator.

The following units comprise the system:
Ultra-high-speed airborne digitizer
20-Channel Electronic Multiplexer
20-Channel Transducer Filter
High capacity mechanical multiplexer
Digital tachometer
Power Unit and Standard Reference
2200 Cycle Generator and Programmer
Tape Control Programmer
Power Supplies for 60 and 120, 350 ohm strain gages DC

Power Supply for 20-350 ohm strain gages AC Block counter 0-999999

ACCURACY . . . Overall system accuracy of 0.25% to 0.10% or better is obtainable, depending on the specific system components selected for the application.

FURTHER INFORMATION . . . Write for detailed specifications on this system and on Epsco subminiature airborne data processing systems. A brief description of your intended application will help us advise on the use of this equipment in relation to your requirements.

When ordering or seeking information please mention Electronics Buyers' Guide.

data reduction systems and components

A MULTI-CHANNEL DATA REDUCTION SYSTEM

18-Channel Simultaneous Sampling System reduces voltage data into magnetic tape and IBM punched-cards.

The EPSCO DATRAC 'C' SYSTEM simultaneously samples and converts 18 bipolar input voltages into their numerical representation and stores the resultant digital codes on a magnetic tape. Up to 750,000 individual data points may be stored on a single 10 1/2" reel of magnetic tape. The in-

coming data may be visually monitored during the data run. Following the data run, the DATRAC 'C' SYSTEM transfers the information from the magnetic tape on to IBM punched cards. In operation, the system is entirely automatic; although provision is made for both manual control and synchronization to an external timing source. Further, the DATRAC 'C' SYSTEM automatically checks the accuracy of the

DATRAC 'C' SYSTEM

FEATURES

Input full scale voltages.....	Multiple ranges from ± 10 mv full scale to ± 1000 v full scale.
Overall system:	
Relative accuracy.....	$\pm 0.025\%$
Absolute accuracy.....	$\pm 0.05\%$
Effective sampling time for 18 input channels.....	0.25 microseconds
Number of data points per second.....	Up to 180
Tape Coding.....	Sign and 4 decimal digits in 8-4-2-1 binary decimal code with parity check and sprocket pulse.
Information content for each magnetic tape block or IBM punched card.....	One complete set of 18 readings plus frame number.
Magnetic tape output.....	Either single block or continuous.

data as it is being transferred from the magnetic tape to the punched cards.

The system features extensive use of magnetic circuit elements; chopper stabilized input amplifiers; standard cell automatic internal reference; conservative computer-type circuit design.

Send for specifications and prices.

MINIATURE

PULSE TRANSFORMERS

EpSCO pulse transformers are high quality, low cost units capable of transferring pulses in the millimicrosecond to microsecond range.

They have wide application in digital computer, radar, and telemetering systems. High quality and low cost are made possible by special manufacturing techniques which provide low capacity, high inductance windings, on a small ferrite core with high coefficient of coupling.

The transformers are completely encapsulated in a thermosetting resin, which enables the units to withstand severe mechanical shock and environmental conditions.

New Subminiature Magnetic Storage Elements Feature Small Size, Low Power, Reliability and Rugged Construction.

New EpSCO Magnetic Storage Elements Type SR-11 are designed for airborne and missile applications. Due to their extremely low power requirement, they may be driven by either subminiature tubes or transistors.

Measuring only 3/4" x 3/4" x 7/16", these new subminiature units are entirely suitable for mounting on etched wiring boards. EpSCO SR-11 storage elements also offer

the advantages of high ratio of storage elements to drive tubes. Wide operating limits and encapsulated packaging insure the ultimate in reliable performance.

SR-11 elements have an information rate design center of 10kc, with a practical upper information rate of 15kc. Peak power per shifted "one" at design center is only 0.5 watts.

SIMILAR UNITS AVAILABLE FOR USE UP TO 200 KC. WRITE FOR DATA SHEETS

NEW EPSCO DELAY LINES

20.30 MICROSECOND UNIT

If you use delay lines in telemetering, digital or analog computers, pulse circuits, coders and decoders, etc., you'll find this brand new EpSCO delay line of interest. It has been specifically developed for pulse encoding in data transmission links.

FEATURES:

- 20.30 microseconds — with end delays
- Taps every 1.45 microseconds
- Tap accuracy = 0.1 microseconds
- Rise time Better than 0.7 microseconds
- Low attenuation — less than 4db overall
- Wide operating temperature range — will maintain above characteristics from -55°C to 105°C
- Characteristic impedance 180 ohms for standard unit
- Light weight, small size — 2" x 4" x 8"
- Hermetically sealed
- MEETS MIL-T-945A SPECIFICATIONS

EpSCO offers delay lines covering frequencies from the sub-audio range to ultrasonic. Applications include telephone and communication lines, seismic exploration and sonar equipment. Delays up to 1/10 second are available. *5000 Microsecond Unit Features Long Delay—Low Attenuation—Excellent Phase Linearity.*

Model DL0510-400/125, 5000 microsecond precision delay line

New EpSCO 5000 microsecond Precision Delay Lines Model DL0510-400/125 are specifically designed for use in precision analog computing, auto-correlation, function generation and sub-sonic applications. These units have found application in the study of speech waveforms, wow and flutter of tape transport mechanisms, sonar returns, sonar rang-

ing and servo analysis. Design is based on M-derived techniques and employs very high-Q toroidal inductance assemblies and ultra-stable capacitors. Taps are brought out on the front panel by heavy double-turret lugs for easy accessibility.

CHARACTERISTICS AND SPECIFICATIONS

Overall Delay.....	5000 μ s $\pm 1\%$
Characteristic Impedance.....	510 ohms*
Number of Taps.....	125
Delay between Taps.....	40.0 μ s $\pm 1\%$
Attenuation including Insertion loss	
Better than 3db at 4kc	
Better than 6db at 7kc	
Low Frequency Insertion Loss.....	1.7db
Cutoff Frequency.....	9.5kc
Phase Linearity.....	$\pm 0.2\%$ up to 6kc
	$\pm 1\%$ up to 8kc
Size.....	1.9" x 5 1/4" x 9" for relay rack mounting
Weight.....	35 lbs.
*Also available with 470; 600 and 1,000 ohm impedance.

Designed with the future CHATHAM

Reliable Tubes—Pioneered by Chatham

Offering the utmost in electronic tube dependability, these Reliable types are a product of Chatham research and development. Today, the Chatham line of Reliable Tubes is an industry standard for both military and commercial tube applications. For complete information consult the new Chatham Bulletins available on request.

Engineering Service for Special Requirements

Where unusual requirements indicate the use of special purpose tubes, these can be designed and produced to your specifications. Chatham's Tube Division is equipped to handle both large or small production runs efficiently and economically. Chatham engineers are available for special tube problems.

THYRATRONS

Type 2D21W
Ruggedized Xenon filled, shield grid thyratron for relay-pulse and grid controlled rectifier service. Conforms to MIL-E-1B specifications.

Type 3C23
Mercury Vapor Argon filled thyratron for grid controlled rectifier service. Wide ambient temperature tolerance. Medium 4 pin phenolic base.

Type 323B
Same as 3C23 but has medium shell 5 pin base. Heater 2.5 volt 7.0 amperes; peak inverse anode volt. 1250 v. average anode current 1.5 amps.

Type 5594

Xenon filled, operates in ambient temp. from -55° to +90° C. Filament 2.5 v., 5 amps. Peak inverse anode volt. 4500, aver. anode current 0.5 amp.

Type 884

Argon filled, for sweep circuit oscillator in CRT circuits. Heater 6.3 volts, 0.6 amp. Peak forward anode voltage 300, aver. plate current 75 ma.

Type 395-A

Cold cathode, requires no filament supply. For grid controlled rectifier, relay applications. Max. D.C. anode volt. 150. Max. anode current 10 ma.

Type 5696

Xenon-filled, shield grid thyratron with low filament drain. Heater 6.3 volts, 150 ma. Peak inverse anode voltage 500, average anode current 25 ma.

Type 6D4

Miniature thyratron used as a relay tube or gas tube oscillator. Also extensively used as an RF noise source. Average anode current 25 ma.

Type 2050W

Ruggedized Xenon filled shield grid thyratron for grid controlled rectifier service. Provides longer service in presence of shock, vibration.

HYDROGEN THYRATRONS

Type VC-1257
Hydrogen filled, zero bias thyratron with hydrogen generator for generation of pulse power up to 33 megawatts.

Type 5948/1754
Hydrogen filled, zero bias thyratron with hydrogen reservoir for generation of peak pulse power up to 12.5 megawatts.

Type 5949/1907

Hydrogen filled, zero bias thyratron with hydrogen reservoir for generation of peak pulse power up to 6.25 megawatts.

Type VC-1258

Zero bias miniature hydrogen thyratron for the generation of peak pulse power up to 10 KW.

DECADE COUNTERS

COLD CATHODE DECADE COUNTER TUBE

Chatham Type 1047 is a cold cathode decade counting tube intended for use in medium speed applications such as scalars and computers operating from 0 to 2000 pps. Type 1047 features high current handling capacity per count cathode. It has ten individual cathode outputs.

D.C. Supply Voltage—340; Output Voltage—45; Transfer Pulse Amplitude (Volts)—150; Transfer Pulse Width Microseconds—150; Cathode Current 4.5 ma.

SPECIAL PURPOSE TUBES

Type 6542

Subminiature voltage regulator in a T-3 bulb. Maintains approx. 150 volts over a current range of 5 to 25 ma. Will withstand a 450 g shock impact.

HIGH VOLTAGE VACUUM FUSES

These are supplied by Chatham to customers' specifications. If ordered in reasonable quantity. Full particulars and quotations supplied promptly.

HIGH VOLTAGE VACUUM SWITCHES

Available in two standard types for high voltage switching at high altitude. Glass enclosed, mechanically actuated, these switches feature extremely long operating life.

**DESIGNERS
ENGINEERS and
MANUFACTURERS**

in mind...

ELECTRONICS

TWIN POWER TRIODES

Type 6336

Low mu, high permeance twin power triode for use as a series regulator tube in D.C. power supplies. Plate Dissipation 30 watts per sect.

Type 6AS7G

Low mu, high permeance twin power triode for use as a regulator tube in D.C. Power Supply Units. Plate dissipation 13 watts per sect.

Type 6520

Same as 6AS7G for use where utmost reliability is required in triode balance, absence of excessive plate current drift, high grid to plate insulation.

Type 5998

Similar to 6080 and 6AS7G but with higher amplification factor. Mu 5.5, transconductance 14,000 micromhos, plate dissipation 13 watts per plate.

Type 6080WA

Ruggedized Twin Power Triode made under reliable tube program. Plugs directly into any socket using 6080 or 6AS7G regulator tubes.

Every Chatham Tube is Rigidly Tested to Insure Dependable Performance

All tubes manufactured by Chatham are thoroughly tested for periods up to 30 hours. Many tube types are held for a minimum of 96 hours and retested to determine the effect of storage. Test equipment employed includes small table type sets and large hydrogen thyratron units with inputs

up to 100 KW. Chatham test equipment is continuously checked for accuracy of calibration by technicians specializing in calibration and maintenance of equipment. Tube types are life tested on a year round basis to insure maximum performance and service life.

RECTIFIERS

Type 1Z2

A high voltage vacuum rectifier for constant supply circuits. Filament 1.25 volts, 275 ma., Peak inverse anode voltage 15,000. Aver. anode current 1.5 ma.

Type 3B25

Half wave, Xenon Rectifier. Wide ambient range -75° to +90°C. Filament 2.5 volts, 5.0 amp. Peak inverse anode voltage 4500. Aver. anode current 0.5 amp.

Type 3B28

Half-wave, Xenon rectifier. Wide ambient range of -75° to +90°C. Filament 2.5 volts, 5.0 amps. Peak inverse anode voltage 10,000. Aver. anode current 250 ma.

Type 4B32

Half-wave, Xenon rectifier. Wide ambient range -75° to +90°C. Filament 5 volts, 7.5 amps. Peak inverse anode voltage 10,000. Aver. anode current 1.25 amp.

Type 5B3

Small size high vacuum clipper diode and high voltage rectifier. Clipper ratings: Peak inverse voltage 15 KV, peak anode current 8 ma; average anode current 20 ma.

Type 5R4WGY

Full wave rectifier ruggedized to stand 980 g shock. Max. inverse voltage 2800 volts at 165 milliamperes or inverse voltage 2400 volts at 275 milliamperes.

Type 5R4WGA

Same as 5R4WGY but designed to operate at full inverse ratings up to 40,000 ft. altitude and at reduced rating to 60,000 ft. altitude.

Type 5R4WGB

A reliable version of the 5R4WGA designed and manufactured to MIL-E-1B reliable tube specifications.

Type 719-A

High vacuum tube for clipper diode service in hard tube modulator circuits. Filament 7 volts, 7 amps. Peak inverse anode volt. 25 kv. Max. peak anode current 10 amps.

Type 6H6WGT

Ruggedized twin diode with octal base. Heater 6.3 volts 300 ma. Peak inverse anode voltage 465 volts. D.C. output current, 8.8 ma. per plate.

VOLTAGE REGULATOR & REFERENCE TUBES

Type OC3W

A ruggedized glow discharge tube. Maintains D.C. voltage constant at 105 volts. Max. regulation current 5 to 40 ma.

Type OD3W

A ruggedized glow discharge tube. Maintains D.C. voltage constant at 150 volts. Max. regulation current 5 to 40 ma.

Type 5651WA

Reliable miniature Cold Cathode Gas Discharge Tube for voltage reference. Maintains voltage of approx. 87 v. at a current range of 1.5 to 3.5 ma. Available JAN 5651.

Type 6627/0B2WA

Miniature cold cathode glow discharge tube for use as a voltage regulator. Regulating voltage is approx. 108 volts at a current range of 5 to 30 milliamperes.

Type 6626/0A2WA

Same as Type 6627/0B2WA with regulating voltage of approx. 150 volts at a current range of 5 to 30 milliamperes.

NEW!

for efficient,
precise recording
of up to eight
channels of data
simultaneously

OSCILLOGRAPH CONSOLETTA

This completely redesigned recording instrument is available in two models; with modular interchangeable preamps and standard amplifiers; and with standard rack and panel amplifiers. Modular unit includes up to 8 preamps mounted in control panel, with amplifier chassis out of the way in the lower section of the consolette. Records up to 8 channels simultaneously.

A Wide Choice of Amplifiers					
SPECIFICATIONS					
Type	Model	Gain*	Response	Noise Level RMS**	
High Gain DC	8238	5,000	DC-5K	10 μ v	
Low Gain DC	8231	125	DC-5K	50 μ v	
Condenser Coupled	8234	10,000	1-3K	10 μ v

** In microvolts referred to input

NEW!

for automatic,
continuous analysis
of complex
waveforms

Basic amplifiers are mounted in the base cabinet, out of the way. Preamplifiers and controls are panel-mounted, above, for easy access, changing, and servicing.

WAVEFORM FREQUENCY ANALYZER

- Bandwidth Requires No Adjustment. Once set at factory, needs no further recalibration.
- Complete Range Available From 0.5 to 20,000 cps. Where frequency analysis is essential, it helps eliminate laborious, impractical arithmetical processes. Readout is an oscillograph recorder providing a permanent, highly legible record. Plug-in filters provide unusual flexibility of choice of frequency bands. Band width may be chosen to customer specifications.
- Ideal for Analyzing Data Processed by the Industrial Type Recorder
- Simplified Operation Only incoming voltage gain, pen excursion, and selector switches require setting.

Write for informative, illustrated literature on oscillograph recording equipment and waveform analysis.

EDIN COMPANY, INC. 207 Main St., Worcester, Mass.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the ELECTRONICS BUYERS' GUIDE. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

**NEW
LIQUIDOMETER
SENSITIVE
RELAY...**

**SENSITIVITY . . . 80-microwatts
at -55° through +100° C.
VIBRATION . . . 10 G's from 5 to
500 CPS**

The new Liquidometer miniature magnetic amplifier relay, model B250-1, features high sensitivity and vibration resistance.

Designed for use in guided missiles, airborne computers and circuits employing photocells, transistors or thermistors, the new 6 oz. Liquidometer relay has been designed to meet the requirements of MIL-R-5757C and MIL-E-5272A. The B250-1 has virtually no external magnetic fields. It requires no shock mounting.

SPECIFICATIONS

Sensitivity: 80 microwatts from 0-5000 ohm resistive source, decreasing to 100 microwatts for a 15,000 ohm source
Vibration: 10 G's from 5 to 500 CPS
Ambient Temperature: -55° to +100° C.
Contact arrangement: DPDT
Contact life: 100,000 operations at 2 amps resistive
Dimensions: 1¼ in. diameter by 2¾ in. long
Weight: six ounces

For complete details, write Dept. U
for Bulletin 562.

THE LIQUIDOMETER CORP.

SKILLMAN AVENUE AT 36 ST., LONG ISLAND CITY 1, N.Y.

**SPECIFY SOLID ULTRASONIC
DELAY LINES BY BLILEY
FROM 3 TO 3500 MICROSECONDS**

Solid ultrasonic delay lines by Bliley are supplied for any specified delay interval from 3 to 3500 microseconds.

Without resorting to temperature control and temperature adjustment, the following table shows practical tolerances that can be maintained with Bliley delay lines.

2-10	microsecond delay	±.05%	at 25°C
10-50	microsecond delay	±.03%	at 25°C
50-100	microsecond delay	±.05%	at 25°C
100-500	microsecond delay	±.07%	at 25°C
500-3500	microsecond delay	±.1%	at 25°C

Special bonding methods (transducers to fused quartz) and hermetically sealed cases assure permanent performance characteristics from -60°C to +85°C.

PULSE, TRANSISTOR, AUDIO, HI-FI, MILITARY AND TV TRANSFORMERS

Now available!

Transistor circuit for normal conversation by headset in areas of extremely high noise level. Two-way units also available in combination with oscillator for circuit checking and conversation at distances to 100 feet. Units designed to fit in shirt pocket or attach to belt.

MINIATURIZED ENCAPSULATED TRANSISTOR AUDIO AMPLIFIER

Style I. Plug-in. Designed for standard 7 pin miniature tube socket. Standard tube shield can be used if necessary.

Style II. Case unit. Firmly supported by four leads to withstand severe shock and vibration.

Special frequency characteristics can be built to your requirements.

- Total harmonic distortion**
Less than 1/2 of 1%
from 100cps to 10 kc
- Intermodulation distortion**
Less than 1/2 of 1%
- Noise and hum level**
80 db down from full output
- Input impedance**
2 K ohms @ 1000 cycles
- Output impedance**
100 K ohms @ 1000 cycles
- Input voltage**
2 mv. max.
- Supply voltage**
-5v dc @ 2 ma

Non-microphonic units hermetically sealed and assembled from selected and matched components, double-sealed for indefinite unit life.

Linear frequency characteristics from 20 cps to 100ke. Plug-in or cased types for top performance and efficient assembly. Write for complete data sheet.

Precision Products

BY **Greenleaf**

FOR TODAY'S PROJECTS — TOMORROW'S PLANS

HIG-3 MODEL 2 GYRO

The smallest integrating Gyro available to meet the exacting requirements of guidance systems. This viscous damped, single degree of freedom Gyroscope has a drift rate of .005 milliradians/second.

PRESSURE SENSING DEVICES

Used for the measurement of absolute, differential and gage pressures. Accuracies within $\pm 2\%$ or better throughout entire operating range.

HIG-4 MODEL 2 GYRO

Greater accuracy, including low drift rate, is a feature of this HIG-4 Gyro, now being used for missile guidance and fire control systems. The design and development phases of this Gyro have long been completed and it is now a production item.

FREE, RATE, DIRECTIONAL AND VERTICAL GYROS

For telemetering, missile guidance, inertial guidance and navigation. Whatever your gyroscope requirements, Greenleaf has the accurate, economical answer.

ACCELEROMETERS

The Greenleaf line includes linear, angular and three-axis accelerometers. Accuracy is within $\pm 2\%$ or better throughout the entire operating range. Military environmental conditions were considered in the design of these units in order to comply with the reliability concept.

All these, and other Greenleaf products, may readily be modified in many respects to meet your individual requirements.

Complete specifications and technical Bulletins will be sent immediately upon request. Write, wire or 'phone today.

INSULATION FOR ELECTRONIC APPLICATIONS

SIL-THIN-GLAS AND SIL-THIN-BESTOS

Ideally suited for such electronic applications as wrapping of armatures, fields, stators, relays, transformers and coils. Insulating barrier where excessive moisture prevails. Layer insulation for motors and dry-type transformers. Features exceptional dielectric and tensile strength. Lightweight, thin and flexible. An EXTRA-THIN high temperature insulation available in rolls, sheet or tape form.

Property	Sil-Thin-Glas	Sil-Thin-Bestos
Gauge (inches)	.002 ± .0003	.0035
Weight (oz./sq. yd.)	2	2.3
Tensile (lb./in.) MD	19 (AMD 28)	6
Tear, in grams Elemendorf (MD)	90 (AMD 110)	55 (AMD 85)
Moisture Absorption	1% after 24 hr.	
Thermal Resistance	180°C (constant)	
Dielectric Strength (VPM)	2300	350

STICK-GLASS*: Used as wrapping for small coils where space is limited and holding down of wrapping is difficult. Ideal for toroidal coils. Class B cloth or tape with adhesive backing. Thicknesses .005"-.015". Dielectric strength of "A" glass (1300 vpm).

SUN-PLI—Asbestos paper combinations provide improved mechanical and electrical strength plus high moisture resistance.

SIL-GLAS—Class H sheets or tape. Uses: coil wrap or tape—slot cell insul.—layer insulation. Uses silicone resin and ground mica coats over Fiberglas cloth. Flexible, 200°C heat resistance, good abrasive resistance, 2.5 Dielectric constant at 25°C. ¼" diel. breakdown 5000V @ .003" to 10,000V @ .010". 1% power factor. Thicknesses .003"-.010".

ELASTOMERIC FIBERGLAS—Highly water repellent. Impregnated and coated with silicone rubber. Available cured or uncured. Uncured can be wrapped and baked at 360°F to an hermetic seal. Baking provides after-cure for tough, abrasive-resistant finish. Cured E-F has dielectric strength of 800 VPM @ 25°C for .007", and power factor of 0.7%. Constant operating temp. to 200°C. Flexible from -60°C to 250°C.

BI-GLAS—Class "B"—bias-woven Fiberglas tape for fast wrapping of coils, spirals, etc. Stretches and contour wraps without electrical loss, coning or air pockets. Excellent resistance to oils, acids, moisture, fungus and ozone. High thermal stability withstands high ambients.

Typical Properties—		
(In accordance with A.S.T.M. Specifications where applicable)		
Dielectric Strength	Gauge	.007-in.
Short-Time Test, ¼-in. electrodes	Tensile M.D.	100 lb./in.
V.P.M. as received	Base Glass	ECC-B302
V.P.M. after 5%		

ACTO-GLAS—woven Fiberglas cloth preimpregnated with polyester or silicone resin. Furnished only uncured in 36" rolls or tape. Dielectric strength to 700 VPM. Low moisture absorption, high impact resistance, high flexural strength. Gauges from .004" to .012". Can be formed, molded or laminated at contact pressure. Cures in 5-10 min. @ 250°-300°F under 30 lbs. pressure per sq. in., good resistance to acids, alkalies & moisture.

A Division of  Chemical Corporation

ALL ELECTRIC insulation is available from authorized distributors located in principal cities or from our own plant. For complete data and samples send your request to our Department E11-683. Special insulation problems will receive immediate attention in our modern, fully-equipped research laboratories.

Precision Frequency Source...

ULTRA STABLE OSCILLATOR

HYCON EASTERN

Hycon Eastern's new Ultra Stable Oscillator is a one megacycle signal source of exceptional stability. It is useful wherever precise time measurements or frequency control are required, as in insertion of carrier in suppressed carrier systems, telemetry, astronomical measurements, navigation systems, geophysics or other critical applications.

STABILITY: 1 PART IN 10⁹

- FREQUENCY STABILITY: DRIFT RATE LESS THAN 1 PART IN 10⁹ PER DAY AFTER ONE MONTH'S OPERATION.
- FREQUENCY: 1 MEGACYCLE, VARIABLE OVER A RANGE OF 1 CYCLE. AVAILABLE AT OTHER FREQUENCIES ON SPECIAL ORDER.
- CRYSTAL OVEN: STABILIZED TO BETTER THAN 0.01°C BY TEMPERATURE-SENSITIVE RESISTANCE BRIDGE. OVEN CONTAINS NO MOVING PARTS.
- DISSIPATION IN OSCILLATOR CRYSTAL: STABILIZED AT A POWER LEVEL LESS THAN ONE MICROWATT.
- 2 OUTPUTS: SINE WAVE—4 VOLTS RMS; PULSE—1 VOLT.
- OUTPUT IMPEDANCE: APPROXIMATELY 250 OHMS.

eliminate the "BUGS"

with Eastern aviation products

PRESSURIZATION

Eastern pressurization units for airborne electronic equipment are available in many capacities to handle a broad range of requirements. Units consist of an air pump and motor assembly, pressure switch, check valve, tank valve, and terminal connectors. They meet government specifications and can be modified to your needs.

COOLING UNITS

Hold temperatures to safe operating limits in liquid cooled electronic tubes or similar devices. By virtue of long experience and using standard component parts, Eastern can suit your specific needs at a minimum cost for equipment.

REFRIGERATION-TYPE

Enable specified components to be held to fairly constant temperatures by use of various types of refrigeration units. Because of the variation in methods possible, Eastern units fill every requirement where the use of a refrigeration cycle is called for.

AIRCRAFT PUMPS

Precision-built to rigid government specifications, a broad selection among Eastern pumps offers flexibility to your choice. Modifications can be made, or custom-made units designed to suit your project. Trim in size, light in weight, Eastern Aircraft Pumps give reliable long-term service.

CHECK THESE 3 OUTSTANDING FORMICA LAMINATED PLASTICS . . .

for your electronic applications

1 New translucent Formica XXXP-36 offers cold punching and high IR

XXXP-36—new paper base phenolic grade—brings 1,000,000 megohms resistance value, precision and translucency to printed circuitry!

The new XXXP-36 sheet punches cold up to and including 1/16". Therefore, it is not subject to dimensional change as in grades which must be heated before punching. This means that with Formica XXXP-36, you can now produce circuits with new and higher standards of accuracy.

Also recommended for terminal boards, tv insulators and other applications requiring high IR. Send for bulletin 599.

2 new glass silicone

New G-7-2 offers greater hot strength, lower moisture absorption, lower wet power factor. Comes in larger sheets (up to 36" x 72" x 2"), and has a uniform creamy white color. Send today for free data sheets.

3 FF-91 glass epoxy

FF-91 is a super-insulator, has high operating and solder temperature and better bond strength. Especially valuable in hot, humid conditions, since its inorganic base resists fungus attack. Also has very high mechanical strength and cold punching characteristics. Send today for free data sheets.

plus special Terminal Board grades

Terminal boards made of Formica offer electrical insulation, plus heat-, flame- and arc-resistance . . . and dimensional stability under extremes of temperature and atmospheric conditions.

plus the complete Formica line of 18 standard electronic grades

CLARK CRYSTALS and OVENS

Complete line for commercial or military applications.

SPECIAL CRYSTALS

Quartz crystals designed for filter, delay line, discriminator, or oscillator use. Optimum parameters available for any electronic application.

JAN CRYSTALS

A complete line of quartz crystals made to standard military specifications, available at frequencies from 2.5kc to 250mc.

COMMERCIAL CRYSTALS

Quartz crystals in standard or non-standard holders for replacements in all existing equipments.

CUSTOM-MADE CRYSTALS

Special crystals of natural or fused quartz, tourmaline or synthetics, for delay line, filter, optical, oscillator, resonator or ultrasonic applications.

CRYSTAL OVENS

A complete line of ovens for housing any type of crystal unit, small component or electronic circuit.

Descriptive literature available for all types. Consult us first on any crystal or temperature stabilization problem.

BUYERS'

GUIDE

CONTROL SYSTEM COMPONENTS

by DAYSTROM PACIFIC CORPORATION

PRECISELY ENGINEERED FOR

- ACCURACY
- RUGGEDNESS
- RELIABILITY

POTENTIOMETER DIVISION

Daystrom Potentiometer Division is a leader in the development and production of precision-built, miniaturized, wire-wound potentiometers. Whatever the application, there is a Daystrom "Pot" to do the job accurately, reliably, and with a built-in ruggedness that is rapidly becoming the standard in this field of flight instrumentation. The division's development facilities are also at your service to provide custom designs to meet particular requirements.

MODEL 300-00 the smallest precision-built, wire-wound, subminiature trimming potentiometer available today featuring high power rating, extremely fine resolution, operation over extreme temperature ranges, and compact stacking (21 per cubic inch).

ACTUAL SIZE

MODEL 303-00 "big brother" to the Model 300-00, this miniature trimming potentiometer offers the same high precision standards of accuracy and reliability of operation plus a greater power rating and higher resistance ranges.

ACTUAL SIZE

MODEL 341-00 the smallest precision, subminiature, 10-turn potentiometer on the market offering full scale electrical and mechanical performance usually associated with precision potentiometers twice its size and weight.

ACTUAL SIZE

AMERICAN GYRO DIVISION

American Gyro Division, designer and producer of precision target and missile flight control systems and system components, has earned an enviable reputation in the field for the manufacture of accurate and reliable electronic and electro-mechanical devices. The division's carefully selected combination of engineering, technical, sales, and service personnel makes up one of the nation's strongest teams for the solution of your gyro, control, automation or electronic problem.

Miniaturized gyros produced by American Gyro incorporate the latest features in flotation design, assuring a rugged reliability unavailable in other models . . . these units meet all known aircraft and missile specifications.

The Model A-10 Linear Accelerometer is American Gyro's newest entry in the field . . . designed for altitudes up to 90,000 feet and a working range through 50 g's, its matchbook height makes it most suitable for various missile applications.

American Gyro's advanced designs, precision engineering, and special production techniques have placed this armament intervalometer foremost in its field . . . these units are now "on duty" with the most advanced USAF fighter aircraft.

Openings exist for highly qualified engineers.

OPERATING TEMPERATURES

FROM -60°C TO 210°C

SIZES FROM 32 TO 4/0

Surco

WIRE • CABLES • TUBING

A Coaxial Cables — "Surco" coaxial cables include a wide variety of types, such as low capacity, extra flexibility, small diameter, microphone 2 conductor, and high temperature "Teflon". Conform to Military Spec. MIL-C-17B. Many special designs. If you have a coaxial cable problem consult us.

B "Miniature Coaxial Cables — Extruded low-loss Teflon dielectric O. D. under 1/16 inch for 50 ohm cable and under 1/8 inch for 95 ohm cable. Low capacitance, stable electrical characteristics."

C Miniature Wire and Cable — "Surco" miniature wire and cables are made in conductor sizes down to No. 32 AWG in stranded and No. 30 AWG in solid. Close control in manufacturing permits small finished diameters on both single and multi-conductor cable. Available in standard colors with and without nylon jackets or shielding in the various vinyl or polyethylene compounds.

D "Surflene" Insulated Hook-up Wire and Tubing — "Surflene", extruded monochlorotrifluoroethylene, has excellent resistance to heat, abrasion and most chemicals, including nitric acid. Having high dielectric strength and insulation resistance, it is especially useful in totally enclosed applications with continuous temperatures up to 135°C . "Surflene" is available in 15 solid colors and wall thickness down to 0.008". Also available in limited range of sizes in transparent or colored tubing.

E Multi-Conductor Cables — "Surprenant" Multi-conductor cables are available with conductor sizes from No. 32 AWG and larger with vinyl, "Surflene", or Teflon insulation, with or without nylon jacket or shielding and can be made to specification for special design and applications. Close tolerances permit unusually small overall diameters and "Spiralon" color coding permits easy identification even when hundreds of conductors are involved.

F New Improved Aircraft Wire — Surprenant new lightweight, smaller diameter MD wire (vinyl, glass braid, nylon) and the standard Surprenant sandwich construction (Vinyl, glass braid, vinyl, nylon) give excellent overload safety, high and low temperature performance, good electrical properties and have a nylon jacket

giving greater resistance to abrasion, fungus, moisture, hydraulic and other oils (nylon braided jacket on size 10 AWG and larger for greater flexibility) and are made to conform to MIL-W-5086. "Surprenant" also offers nylon jacketed polyvinylchloride construction made to conform to Military Spec. MIL-W-5086, MIL-C-7078, and MIL-W-7072.

G "Spiralon" — "Surco-Spiralon" color coding is available on all vinyl, nylon, Teflon, and Kel-f insulated wires, with or without nylon jackets. One, two or three color stripes are available in the Nema colors providing almost unlimited color identifications. Solid color insulation is also available in the 10 standard Nema colors.

H "Surco" A-10 for (105°C) Hook-up Wire — A-10 is an unusually high grade vinyl insulating compound developed in our own laboratories for a better hook-up wire. It has excellent resistance to deformation, soldering, high temperature, low temperature and aging; high electrical properties; Underwriters Lab. approved for continuous operation to 105°C without fibrous covering. A-10 insulated wire made to conform to MIL-W-16878A, Types B, C, and D, with or without nylon jackets or synthetic braids.

I "Surco" Tubing — "Surco" vinyl, nylon, polyethylene, silicone rubber, Kel-f and Teflon tubing available in a wide variety of sizes, temperature ranges, electrical and physical characteristics.

J MIL-W-5274A Radar & Electronic Hook-up Wire — Made to conform to Air Forces Spec., this wire offers excellent low temperature performance. Nylon jacketed, it has high abrasion resistance and superior surface resistivity even under adverse humidity conditions, making it very adaptable for high impedance circuits.

Silicone Rubber Wire and Cable — Thin wall silicone wire for 600 and 1000 volt service up to 400°F continuously and higher with short life ratings. Remains flexible at -100°F . Braided and jacketed constructions available for increased mechanical and abrasive characteristics.

Extruded THIN WALL Teflon INSULATED (210°C) HOOK-UP WIRE

Continuously operable over the range from -90°C to 210°C without appreciable deterioration, extruded "Teflon" (polytetrafluoroethylene) is now available in walls as thin as 0.010" (type WTE) and 0.015" (type RTE). Teflon combines non-flammability, chemical and solvent resistance, high volume and

surface resistivity with extremely low electrical losses. This wire is available in all flexible strandings from AWG 10 and conforms to performance requirements of MIL-W-16878A. Colors and Spiralon markings conform to MIL-STD-104. Also, available in limited range of sizes in natural or colored tubing.

Test and Service Equipment

**Model 107A
MAGNET CHARGER**
*Charges all Kinds and
Shapes of Permanent Magnets
Safely & Quickly*
**RECOMMENDED BY LEADING
INSTRUMENT MAKERS**

MODEL 107A Magnet Charger has dual range charging current output: 12,000 amperes for small magnets and 24,000 amperes for larger, Alnico V magnets. Any shape or kind of magnet can be charged, including core type mechanisms, using charging bar or special adapters. Booster Unit available for increasing output to 28,000 amperes. Carrying handle added for easier portability. Unit is self-contained, simple to operate; all exterior parts can be handled during complete charging cycle without danger to operator. Designed for production charging, its average magnetizing cycle is under 5 sec. Weight 75 lbs., size 12 x 7 x 17, operates on 110 volts, 15 watts. Net price \$490.

**Model 942*
MAGNET
CHARGER**
*A High Powered
Charger capable of
charging large Alnico
& Ceramic Magnets*

The Model 942 Magnet Charger with its accessories is designed to charge permanent magnets, including Alnico and ceramic magnets, requiring up to 200,000 ampere-turns peak magnetizing force for saturation. This Charger is essentially a high voltage power supply and control circuit with up to eight 100-uf storage capacitors. The ampere-turn rating depends in a large measure upon the size and type of fixture or transformer purchased to operate with the Model 942 Magnet Charger and the number of 100-uf capacitors employed. By using the Model 942 Magnet Charger as a central building block, magnetizing equipment can be set up for almost any magnet. Two standard transformers, a 30-cubic inch wire-wound fixture, and many adapters and inserts are available to charge rod, bar, ring, and U magnets, multi-pole rotors, and special complex shapes. Price for basic unit is less than \$2000.

MAGNETREATER®

*De-magnetizes Saturated
Magnets to any desired
Level of Flux*

Model 889A*

MODEL 889A Magnetreater can be used with Model 107A Magnet Charger or Model 206A Booster to provide a controlled, precise method for rapidly treating permanent magnets, particularly the new core type instrument mechanisms. Also useful for de-magnetizing tools or machined parts. Net Price \$163.

CHASSIS SLIDES* Part No. H-5798

Inexpensive Chassis Slides designed for standard relay rack mounting on Navy and Signal Corps equipment are available as a stock item. Materials and finishes comply with MIL-E-16400 (Ships). Slides carry chassis to 100 lbs., tilt for easy access to bottom of chassis, and are easily removed. Rugged, cadmium plated, iridized steel rails with bronze rollers, stainless steel pins and nylon bushings. Write for detailed data sheet.

CRYSTAL TESTING EQUIPMENT

Three standard Crystal Impedance Meters will measure resonance and anti-resonance resistance of quartz crystals, including those covered by Spec. MIL-C-3098A. Capacitance, inductance and performance index (PI) of the crystal can be determined from these parameters. Model 541A (TS-710/TSM) covers frequency range of 10-1100 kcs; Model 459 (TS-330/TSM) covers 1-15 mcs; Model 531 (TS-683/TSM) covers 10-140 mcs. RFL C.I. Meters are in service throughout the world and can be relied upon for accurate, extended performance.

**Model 541A
CRYSTAL
IMPEDANCE METER**

CALIBRATOR—RECEIVER—AMPLIFIER—MIXER

Model 1051 C-R-A-M UNIT*
*A New Instrument of Wide Versatility Used as
a Secondary Frequency Source, WWV Receiver,
Precision Timing Source and Signal Tracer*

CALIBRATOR

Signal source — radiates harmonics of 10 mc to over 500 mc, harmonics of 1 mc to over 300 mc, harmonics of 100 kc to over 150 mc, and harmonics of 10 kc to over 50 mc to an accuracy of $\pm 0.0005\%$ at ordinary room temperatures.

RECEIVER

Receives WWV time and frequency broadcasts on 5 mc, with a self-contained tuner of 5 μ v sensitivity. The standard frequency broadcasts are used to adjust the oven-controlled 10.0 mc crystal in the unit to exact frequency, or to standardize an external oscillator connected to one of the input jacks.

AMPLIFIER

Increases the strength of the audio output for operation of self-contained speaker or phones. The amplifier, with a gain to several hundred times, and a frequency response to 15 kc, may be picked up on panel jacks for external use.

MIXER

Enables comparing two external signals up to 1000 mc, or comparing one such signal to harmonics of one of the internal oscillators. An audio difference frequency may be amplified and delivered to speaker or phones. A radio difference frequency may be picked up for external use through a panel jack.

Operates from 115 v, 60-cycle line. Plate voltage regulated. Price \$375.

INSTRUMENT CALIBRATION STANDARDS

Model 829*

A Model for Every Purpose and Price Range

*All Circuits and
Power Supplies in
One Single Cabinet*

MODEL 829 checks AC and DC meters of all types and ranges. Compact cabinet contains power supply, special Weston standard meters, Wheatstone Bridge and all circuits for quick, convenient instrument calibration to 0.5% accuracy by non-technical personnel. Automatic protection for both operator and instrument under test is provided by interlocks and high voltage discharge circuits. Net price \$2345.

DUAL POTENTIOMETER DC STANDARD

MODEL 262B Dual Potentiometer Standards for calibrating meters to 0.1% through a range of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Uses L & N Brooks Mod. 7 pot. and Weston Mod. 4 standard cells. Voltage and current ranges are separate for the calibration of wattmeters. Operates on 105/125 volts, 50/1600 cycles, 350 watts, with internal voltage regulator. Operator is protected by interlocks. Price \$14,300.

Also available are MODELS 261B and 454 Standards for calibrating AC meters to 0.5% through ranges of 10 millivolts to 1500 volts and 1 microampere to 200 amperes; MODEL 260C Standards for DC meters to 0.5% over ranges of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Accuracy of 0.25% using charts. These standards have been used for 8 years by the government services and leading industrial organizations.

Model 262B

SEALNUTS U.S. PAT. 2462023
*Seal out Water,
Dirt & Corrosion*

SEALNUTS mount and seal electric switches. 12 styles fit most toggle, rotary and push-button types; provide rigid, metal-to-metal contact with panel for secure mounting, while Silicone sleeve and O-ring seal against external pressures to 200 psi; stay flexible at -65° C. SEALNUTS meet requirements of Spec. MIL-B-5423. Over a million in service; approved by all government services.

**Insulated
HANDLE**
Type H-5371

Combines comfort, utility and wide load range. Design conforms to MIL-T-945A and NAVORD OSTD 600. Black or gray vinyl coated grip over black anodized aluminum; swings 180° and lies flat when not in use. Mounting plate available with holes or plain for spot welding is heat-treated for max. strength. Lifts 125 lbs.

*Patents Pending

Prices are FOB Boonton, N. J. Descriptive literature on each product is available. Telephone: DEerfield 4-3100

Radio Frequency Laboratories, Inc. BOONTON N.J., U.S.A.

DESIGNERS AND MANUFACTURERS OF ELECTRICAL EQUIPMENT AND PARASOLS SINCE 1922

SHURE

Small Controlled Reluctance Microphones

*for use where
space is limited
stability is essential
intelligibility is important*

These rugged, magnetic microphones are designed for use in transistor-type hearing aids, small amplifiers and transmitters, dictating equipment, magnetic recorders . . . wherever size and weight must be kept at a minimum.

SHURE microphones based on this same design principle have been used extensively by the Armed Forces in many military applications where severe operating conditions are encountered.

MC 20

This microphone measures only $1\frac{5}{16}$ " x $\frac{3}{8}$ " x $\frac{5}{16}$ ", and weighs $9\frac{1}{2}$ grams. Its rectangular shaped case simplifies placement of other circuit components, and permits an appreciable reduction in the size of the equipment using it.

Output Level: 75 db below one volt per microbar (0.56×10^{-10} watts for one microbar—at 1,000 c.p.s. for 1,100 ohms impedance).

Frequency Response: 400 c.p.s. to 4,500 c.p.s.

Impedance: 1,100 ohms (at 1,000 c.p.s.). Other impedances available on special order.

MC 10

One-inch diameter microphone, less than 0.4" thick, weighing only 11 grams. Similar in construction to the MC20, for use where amplifier gain is at a premium, and a more sensitive microphone is needed.

Output Level: 71 db below one volt per microbar (approximately 10^{-10} watts for one microbar—at 1,000 c.p.s. for 1,000 ohms impedance).

Frequency Response: 400 c.p.s. to 3,000 c.p.s.

Impedance: 1,000 ohms (at 1,000 c.p.s.). Other impedances available on special order.

R 5

Where a still higher output is required and space is not so limited, the R5 is an ideal unit. It is $\frac{3}{8}$ " thick and $1\frac{3}{8}$ " in diameter, weighing only 4 ounces. Encased in its rubber mounting ring the R5 measures $1\frac{1}{2}$ " thick and $2\frac{3}{4}$ " in diameter.

Output Level: 51.5 db below one volt per microbar—at 1,000 c.p.s. for 14,000 ohm impedance.

Frequency Response: 100 c.p.s. to 9,000 c.p.s.

Impedance: 14,000 ohms at 1,000 c.p.s. Other impedances available on special order.

The SHURE Engineering staff will work with you in confidence to adapt these and other Controlled Reluctance microphones to your specific applications. Write on company letterhead to our Sales Department—explaining your requirements.

ENGINEERS:

These DRIVER-HARRIS alloys do most to improve the quality of

Your Resistors

Your Electron Tubes

Your Glass-to-metal Seals

DRIVER-HARRIS RESISTANCE WIRE ALLOYS

NICHROME* V (Nickel-Chrome) Essential for resistor elements in the higher temperature applications such as electric furnaces, electric ranges, radiant heaters, etc.

KARMA* (Nickel-Chrome-Aluminum-Iron) Permits the manufacture of miniaturized wire wound precision resistors of best temperature coefficient of resistance at low cost per ohm; also resistance standards.

NICHROME* (Nickel-Chrome-Iron) The internationally accepted material for heating devices operating up to 1700°; also industrial applications for rheostats and resistance units.

CHROMAX* (Nickel-Chrome-Iron) A lower cost alloy for electrical heating under conditions less critical than those satisfied by Nichrome.

ADVANCE* (Copper-Nickel Series including MIDOHM*, 95 ALLOY, LOHM*, 30 ALLOY) Possess a number of properties which make them useful for winding heavy duty industrial rheostats, precision resistors, thermocouples, and thermocouple leads. Specific resistance range of this series is from 294 to 30 ohms/cm.

MANGANIN (Manganese Copper) Most stable resistance wire known at ambient temperature. Indispensable

for resistors used in many types of precision direct current apparatus such as Wheatstone Bridges, National Bureau of Standards type resistance standards, etc.

HYTEMCO* (Nickel-Iron) Combines high temperature coefficient of resistance with high specific resistance; ideal for winding compensating or ballast resistors.

DRIVER-HARRIS GLASS SEALING ALLOYS

THERLO* (Nickel-Cobalt-Iron). For sealing glasses such as Corning 7052 and 7040.

142 ALLOY (Nickel-Iron). For sealing glasses such as Corning 776, also 8160.

152 ALLOY Contains 50% nickel. It provides a slightly higher coefficient of expansion than 142 Alloy and seals successfully with 0120 glass.

146 ALLOY Contains 46% nickel. It offers special expansion properties, permits seals with ceramic coated resistors.

DRIVER-HARRIS ELECTRON TUBE ALLOYS

The Driver-Harris Company, since the inception of radio, has been making alloys for this field, supplying the industry with alloys for support wires, plates, grids, cathodes, and lead-throughs.

All Alloys are available in:
WIRE

(Sizes as fine as .0005)

ROD
RIBBON
STRIP

(Foil as thin as .00045)

Insulations:

ENAMEL
COTTON
SILK
NYLON
GLASS
FORMVAR

Singly or in combination

Every Driver-Harris alloy is made to the most precise metallurgical checks and controls known to the industry. And each of these highly specialized alloys is custom-made . . . produced exactly to the specifications of our customers.

Send us your specifications. If your needs are in any way unusual, and cannot be met by one of our current 112 alloys, our engineers will be happy to start tomorrow to devise a new one, custom-made for you. Just tell us exactly what you wish to accomplish.

Specialists in the design and fabrication of automatic electronic testing equipment for Quality Control, Production Test, and High-reliability programs.

ELECTRONICS DIVISION

BRISTOL ENGINEERING CORP.
BRISTOL, PENNA.

TESTING IS OUR BUSINESS

Operational reliability of electronic equipment is often in direct proportion to accurate, meaningful testing of the individual components comprising the system. The Electronics Division of Bristol Engineering Corporation specializes in the design and fabrication of automatic testing devices for rapid and accurate evaluation of electrical, electronic, and electro-mechanical components and systems. In addition, a complete environmental laboratory is available for testing to military and commercial specifications.

Quality Control, Test, Inspection, and High-Reliability program activities are invited to learn how we can offer significant assistance in the solution of testing problems involving:

- Cores
- Coils
- Capacitors
- Resistors
- Chokes
- Transformers
- Vacuum Tubes
- Transistors
- Relays
- Regulated Power Supplies
- Cable Assemblies
- Wiring Harnesses
- Electronic Systems

Your wire, phone call or letter will command immediate response.

ELECTRO TEC

PRECISION-MINIATURE

slip ring assemblies AND COMMUTATORS

offer all these advantages:

EXCLUSIVE* ELECTRO TEC TECHNIQUES

insure closer tolerances, absolute uniformity, and the ultimate in miniaturization

Electro Tec units are the product of an exclusive manufacturing technique that results in accuracy unattainable by conventional fabricating methods. In this process a plastic is moulded around the wire leads. Accurate machining reduces this blank to the proper shape, complete with grooves. Hard silver is deposited into the grooves by electroplating to produce the required rings. Final machining insures concentricity and dimensional accuracy. The result is one-piece, unitized construction with conducting rings of 70 to 95 Brinell hardness.

Diameters of these assemblies range from .045" to 24" cylindrical or flat. Cross-sections may range from .005" to .060" or more. Rings are polished to a jewel-like finish and can be held to 4 micro-inches or better. Even the smallest sizes withstand a 1000 V.A.C. breakdown test. Most types easily withstand rotational speeds up to 12000 rpm.

ELECTRO TEC Assemblies are Specified by the Nation's Leading Precision Instrument and Equipment Manufacturers for Proven Greater Dependability, Longer Life, Smoother Functioning.

The uniformly superior performance of Electro Tec slip ring and commutator assemblies in thousands of industrial and governmental applications has resulted in wide adoption of these component units by most leading manufacturers of precision instruments and equipment. Although these products provide improved performance and extra dependability, prices are strictly competitive. Write today for fully illustrated literature.

A NEW LINE OF

precision electronic test equipment

WITH "DESIGNED-IN"
ACCURACY • SIMPLICITY • VERSATILITY

MODEL 901A Transconductance Analyzer and Circuit Designer

Performs transconductance, short, gas, VR, emission, leakage and noise tests. Facilitates rapid design of vacuum tube circuits without breadboarding. Matrix of color-coded push-button switches rapidly connects any electrode to any power supply. 1% regulation for plate, screen, suppressor and grid supplies.

New London's new line of precision electronic test instruments includes special equipment (like the Model 901A and the Model 400) as well as a full line of signal generators, noise sources, amplifiers, modulation monitors, attenuators and frequency standards, all available from stock, or modified to meet your particular test requirements . . . or New London will design-engineer to your specifications.

We have full catalog information, including performance specifications on all of our equipment . . . yours for the asking.

MODEL 701 Frequency Standard

An excellent source of highly stabilized frequencies. Ideal for nuclear resonance measurements and determination of crystal frequencies. Very high frequency stability. Output frequencies, 10 to 50 mc at intervals of 10 kc, 100 kc, and 1 mc.

MODEL 257A FM Mod. Monitor

Measures frequency deviation, carrier noise, hum & modulation distortion of transmitters and signal generators. Measures FM of AM transmitters, monitors TV, FM and telemetering transmitters. Audio frequency response is ± 1 db from 50 to 70,000 cps; Carrier frequency range is 20 to 1000 mc in 5 bands. Low internal hum, noise and distortion. Insensitive to 30% spurious AM.

MODEL 400 Transistorized Volt Ohmmeter

This portable, highly sensitive instrument reads voltages as low as 1 millivolt with very high input impedance. Replaces many non-portable VTVM's and VOM's. Transistors greatly extend battery life. Accuracy: DC, 2%; AC, 3%. Voltage range (at 200,000 ohms/volt): 0.03 to 1000, full scale. Resistance range, $R \times 1$ to 1 meg. with 1 ohm at midscale.

Versatile 'DIAMOND H' Relays

Handle Many Different Jobs

"Diamond H" Series R hermetically sealed aircraft type relays perform outstandingly over such a broad area that they are frequently used to do many different types of jobs in a given application. For example, they give excellent reliability in dry circuits yet will carry up to 10 amperes in power circuits . . . or even 20 amperes for reduced life requirements.

Savings inherent in uniform size and mounting arrangements for one relay family can be multiplied by the lower inventory of spare parts needed when a single model is used for two or more functions. Matching or surpassing requirements of USAF Spec. MIL-R-5757B as well as important provisions of MIL-R-25018, tens of thousands of Series R 4 PDT and DPDT relays are in use, engineered for:

Various brackets of vibration resistance from 10 to 2,000 cps, temperature ranges from -65° to $+200^{\circ}$ C, coil resistances from 1 to 50,000 ohms, operational shock resistance of 30, 40 or over 50 "G" and mechanical shock resistance to 1,000 "G", contact capacities from 350 V., D. C., 400 MA, to 10 A., at 30 V., D. C., as well as signal circuits.

For complete information, send for a copy of Bulletin R-250.

Bathtub Type Military Capacitors

MIL-C-25 Types
CP53, CP54, CP55 Case Styles
Temperature Ranges:
-55°C to +85°C
-55°C to +125°C

"XC" Plastic Film Dielectric Capacitors

The development of the Gudeman "XC" capacitors provides high temperature capacitors that have exceptionally high insulation resistance, low power factor and low dielectric absorption. No voltage derating is required when used within a temperature range from -65°C to +165°C. Bathtub and rectangular case styles also are available.

Miniature Feed-Through Capacitors

The Gudeman Feed-Thru Capacitor, Types 271 and 272 is a three-terminal component designed to be used for R. F. Interference suppression in a manner similar to a low pass filter. The typical insertion loss characteristics for these Feed-Thru Capacitors when measured in a 50 ohm line are in accordance with MIL-Standard 220.

Military Capacitors

MIL-C-25 Types
CP70 Case Styles
Temperature Ranges:
-55°C to +85°C
-55°C to +125°C

Tubular Laminated Cardboard Capacitors

The 633 series gives extra protection in extremely high humidity applications.
Paper Dielectric: Wax or Oil Impregnated Resin End Seals
Temperature Range: -40°C to +85°C

Dry Electrolytic Capacitors

ME and Printed Circuit Types
High Purity (99.99%) Aluminum Foil
Low Leakage
Temperature Range:
-30°C to +85°C

IMMEDIATE DELIVERY FROM STOCK

Model MR532-15A

2-36 VOLTS @ 15 AMPS SPECIFICATIONS

Regulation: 5-32 Volt Range: ± 1/2%
2-5 Volt and 32-36 Volt Range: ± 2%
AC Input: 105-125 Volts, (for 2-32 V.DC), 110-125 V, (for 32-36 V.DC), 1 phase, 60 cps (8 amps)
Ripple: 1% rms max. (@ 36 volts and full load, increases to 2% @ 2 volts and full load).
Remote Sensing • Vernier Control

Model M60V

0-32 VOLTS @ 25 AMPS SPECIFICATIONS

Regulation: ± 1% @ 28 Volts (Regulation increases to 2% over range of 24-32 volts; does not exceed 2 volts over 4-24 volt range. Not stabilized for AC line changes.)
AC Input: 115 Volts, 1 phase, 60 cps (12 amps).
Ripple: 1% rms (@ 32 volts and full load—2% rms max. @ any voltage above 4 volts).

Model MR1040-30A

5-40 VOLTS @ 30 AMPS SPECIFICATIONS

Regulation: ± 1% (over entire 5-40 volt range)
AC Input: 100-130 Volts, 1 phase, 60 cps
Ripple: 1% rms

Model 28-30 WXM

24-32 VOLTS @ 30 AMPS SPECIFICATIONS

Regulation: ± 1/2%
AC Input: 100-125 Volts, 1 phase, 60 cps (20 amps). (Unit rated for DC output of 28 volts ± 10% for 95-130 volt input.)
Ripple: 1% rms

Model MR2432-100XA

24-32 VOLTS @ 100 AMPS SPECIFICATIONS

Regulation: ± 1/2%
AC Input: 208, 230 or 460 Volts, ± 10%, 3 phase, 60 cps (14, 12 and 6 amps respectively). 230 volt input will be supplied unless otherwise specified.
Ripple: 1% rms

CTC Components shown include: A. capacitor; B. standard and insulated terminals; C. coil form kit; D. RF choke kit; E. coil forms

and coils; F. coil kit; G. RF chokes; H. diode clips; I. panel hardware; J. standard and custom terminal boards; K. shielded coil form.

One big family with a single thought

Whether you need terminals, clips, coils, chokes, capacitors — or any of a number of electronic components — you can be sure they're right if they're made by CTC.

One continuing basic idea governs the manufacture of every CTC product. And that idea is: *quality control*. We could not guarantee our products as we do without a constant check of numerous details that determine reliable performance. Our quality control engineers see to it that these manufacturing standards are consistently maintained — right through to periodic microscopic inspection.

Pictured here are a number of components available at CTC including our three kits. These items come in standard forms and are also custom engineered to meet your particular require-

ments. We would be glad to give you complete details, including specifications and prices, on any or all CTC units — as well as information on how CTC components can be specially designed to solve your individual electronic components problems.

You will find it well worthwhile to

use components that are *guaranteed*. Write to Cambridge Thermionic Corporation, 438 Concord Avenue, Cambridge 38, Mass. West Coast manufacturers contact: E. V. Roberts, 506 West Washington Blvd., Los Angeles 16 and 988 Market Street, San Francisco, California.

Miniaturized

Slip Ring Assemblies
Brush Assemblies
Commutators

TO FIT *Any* REQUIREMENT

Poly-Scientific offers you the greatest versatility, precision and performance in the slip ring industry. Every slip ring and brush assembly by Poly-Scientific is custom made to fit your individual requirements... permitting almost limitless variation in design.

Poly-Scientific's perfected manufacturing processes result in improved all-around performance... allow for greater miniaturization through increased strength and rigidity... provide closer dimensional tolerances and better alignment. Of particular importance to design engineers is the availability of all the noble metals and alloys for the contact surfaces. The resulting flexibility of design enables selection of the optimum material with the proper hardness for each specific application, thereby significantly improving electrical characteristics, increasing wear resistance and reducing noise. Poly-Scientific offers a variety of Epoxy formulations for the dielectric portion of the assemblies... the proper formulation for each application.

Poly-Scientific's technical staff has had very wide specialized research experience in solving slip ring and commutation problems for leading instrument manufacturers... a wealth of information and experience is thus available to you at no obligation. So remember... for increased flexibility in design, for guaranteed improved performance, for dependable... longer tarnish-free life... in short, for the finest in the industry, specify Poly-Scientific. Best of all, these precision products are competitive in price.

Get the full story... write today for descriptive literature.

Slip Ring Assemblies • Brush Assemblies • Commutators

Poly-Scientific

CORPORATION
BLACKSBURG, VIRGINIA

1. A four element miniature brush assembly cast in epoxy to attain optimum mechanical and electrical properties.
2. A three circuit, raised barrier slip ring assembly cast directly into the customer's trunnion.
3. A subminiature three ring assembly with teflon insulated leads and a typical stainless steel backshaft.
4. A twelve circuit assembly highly miniaturized by the use of narrow rings and barriers. Raised barriers are used between power circuits, and rings are V-grooved to minimize noise generation. The three different ring diameters hold friction torque to an extremely low level.
5. Encapsulated cross-section of a miniature thirty-two ring assembly (illustrated as Item 13) illustrating internal construction features.
6. A two element flat slip ring assembly having tarnish proof coin gold rings with excellent contact characteristics and wear resistance.
7. A two segment switching commutator using platinum-silver alloy rings and arc-resistant epoxy resin.
8. A typical drum type commutator with very accurate segments precisely located to accomplish a critical impinging function.
9. A typical multi-element cast brush assembly with a strip brush for an end contact on mating slip ring assembly. Brush loading is preset to close tolerances.
10. A real achievement in miniaturization: fifteen rings with raised barriers insulating circuits to 1500 volts. Ring diameter is 0.120 inch and front shaft length is 0.630 inch.
11. A two ring assembly for shaft mounting. Rings are coin gold with ideal hardness of 140-145 Brinell for maximum wear resistance.
12. A miniaturized switching assembly with a .180" diameter ring having a precise 180° live segment.
13. An outstanding assembly having thirty-two rings in less than one inch of length, produced with a very accurate stainless steel mounting flange and teflon insulated color coded leads.
14. A larger type of brush assembly with noble alloy brushes welded to teflon insulated color coded leads.
15. A four element "ruggedized" slip ring assembly illustrating the versatility of our casting process. The wide ring is coin silver alloy and the three signal circuit rings are coin gold.
16. Another highly miniaturized slip ring assembly, with a center contact on the end. Nine circuits are built into the .060" frontshaft diameter.

INVERTERS**

CONVERTERS

**WOUND FIELD AND
PERMANENT MAGNET TYPES**

DYNAMOTORS—available in 8 diameters from 2¼" (1 lb.) and up. For radio and sound apparatus in airborne, marine, vehicular or portable applications. These highly efficient dynamotors have low ripple and regulation. For any DC input voltage. They have outputs from 5 to 1000 watts and regulated or nonregulated voltages up to 1500 volts DC. Two to four commutator combinations in enclosed or ventilated types with or without filters.

MOTORS, GENERATORS, FREQUENCY CHANGERS, etc., in all industrial and marine types to standard or special design. 1 to 600 HP, DC and AC, all frequencies, including 400 cycles, with Drip Proof, Splashproof, Enclosed or Explosion Proof enclosures.

As designers and manufacturers of industrial motors and light weight rotary power supplies for more than 25 years we solicit your inquiries and specifications.

DIMCO-GRAY

SNAPSLIDE FASTENERS

**PROVIDE VIBRATION-PROOF HOLDING
AND QUICK, FOOL-PROOF RELEASE!**

APPROVED UNDER ARMY-NAVY STANDARDS

Here's a simple, easy means of securely fastening assemblies to withstand shock or vibration, and yet allow quick removal for inspection or repair. Instant snap action engages or releases fastener . . . no tools are required! After installation, fasteners never need adjustment . . . even with repeated use.

Three sizes available for different load requirements. Large and medium sizes are made of corrosion-resistant stainless steel. Small size is made of nickel-plated brass. Stock parts fit various thicknesses of flanges and mounting plates . . . special parts can also be supplied.

DIMCO-GRAY COMPANY

204 E. SIXTH STREET DAYTON, OHIO

SIGMA SENSITIVE RELAYS

25 AMPERE SENSITIVE CONTACTORS

For switching high power from DC inputs of 0.1 to 0.5 watt. Series 51 operates at 100 milliwatts (0.1 watt, 3.2 milliampere signal in 10,000 ohm coil) and is SPST, normally closed. Series 61 is a polarized latching contactor with DPDT switch. It latches firmly in either position in response to momentary coil signals of 0.25 or 0.5 watt magnitude.

HIGH SPEED RELAYS

Series 72 is a highly developed refinement of the conventional polarized telegraph relay. It is exceptionally good for telegraph service and useful for handling many other forms of data up to 500 pulses per second. High operating speed is combined with switching life of hundreds of millions of operations at a load rating of 60 milliamperes, 115 volts DC. All critical parts are easily adjustable and repairable. Other Sigma relays used sometimes for high speed switching are the Series 7 and Series 41.

SERIES 8000 MAGNETIC AMPLIFIER RELAYS

Stable, high gain magnetic amplifiers connected to built-in output relays are assembled in various standard combinations in this series. Single or push-pull relay arrangements are available. Standard input sensitivities are 1.0 and 0.1 microwatt at levels from 1 to 20,000 ohms. Relay switch ratings are listed between 1 and 5 amperes. Catalog data sheet gives curves on response time from 20 to 1000 milliseconds based on standard 60 cycle energized units.

MISSILE RELAYS

For use where sensitive relays must be small in size and resistant to vibration, impact, and general punishment. Series 72 (see "High Speed Relays") is very sensitive, stable and resistant to vibration when used for switching at sensitivities less than 1 milliwatt. Series 73, also polarized, is nearly as good and much smaller. Series 22 is not polarized, is compact, and available DPDT at 40 milliwatts sensitivity. All are capable of operating under high frequency vibration, some to 500 cps, others to 2,000 cps.

NULL-SEEKING RELAYS

Illustrated are five different polarized relays, each available in the "X" or center neutral arrangement. The switch occupies the third or central position until energized. One polarity of energizing current will cause armature motion in one direction; opposite polarity will cause armature motion in the opposite direction.

Sensitivity Range milliwatts	35-70	.03-.2	6-12	8-44	2.5-13.0
Number of Poles	1	1	2	4	1
Switch Rating amperes	1.5	.5	2.0	2 or 5	2.0
Relay Series	73	72	23	6	7

SENSITIVE, LOW COST AC RELAYS

Series 41 SPDT and Series 42 DPDT are shaded pole AC relays of unusual sensitivity and almost perfect quietness (quiet enough for use in automatic electric blankets). Series 41 can operate on less than 1.5 milliamperes at 115 volts 60 cps and yet can withstand 260 volts without overheating. Voltage-operated (shunt connected) and current-operated (series connected) versions of this relay are available. Can be furnished for other frequencies from 16 to 400 cps. Switch rating, 2 or 5 amperes.

GENERAL PURPOSE SENSITIVE DC RELAYS

These relays are designed for everything from juke boxes to radio sondes; for requirements from 500 g shocks to 75¢ quantity prices.

Sensitivity Range milliwatts	20-50	1-40	50	35-200	100-200
Number of Poles	1	1	1	1	2
Switch Rating amperes	2.0	.25 to 3.0	1	2 or 5	2 or 5
Price Range	Medium	High	Low	Low	Low
Relay Series	4	5	11	41	42

MINIATURE SENSITIVE, GENERAL PURPOSE DC RELAYS

Not the smallest relays available, but among the smallest that are sensitive. Series 22 (see "Missile Relays") is conservatively rated for 2 ampere switching at sensitivities of 20 milliwatts for SPDT and 40 milliwatts for DPDT. Series 26 is a stripped down SPDT version which can be used without enclosure. It can be used at sensitivities as low as 4 milliwatts. It has acquired a favorable reputation in radio control of models.

HIGH SPEED ELECTRICALLY OPERATED COUNTER

8,000 counts per minute max.

The Sigma Cyclonome Pulse Counter, Type 9A, consists of a special 6-figure Veeder-Root register driven by a completely novel stepping motor (Pat. applied for) with but one moving part which rotates in ball bearings and drives the register through a Nylon worm.

The motor, which may be purchased separately for special applications, is analogous to a synchronous AC motor capable of starting and stopping each half cycle at any frequency from zero to around 130 cps. Yet unlike a synchronous motor, it can be operated from DC pulses.

SIGMA RELAY MANUAL

An extensive compilation of exhaustive data on Sigma relays. Application Notes of broad pertinence and general information. Revised and enlarged from time to time by means of a regular supplement service. Approximately 300 pages in loose leaf binder; price \$5.00. Including supplement service for one year.

SIGMA RELAY CATALOG

A folder containing data sheets on all classes of Sigma relays with tables of condensed information which are adequate in most cases for small lot purchasing. Advance bulletins on new products not yet published in the Manual are included. Available on request without charge.

BRUSH ELECTRONICS

RECORDING SYSTEMS

provide full range instrumentation

Here are *complete* recording systems—designed to give you the greatest flexibility in measurement problems. For example:

- A greater range of signals can be recorded with optimum resolution than with any other direct writing Oscillograph. New Brush Oscillographs have the widest chart speed range available—from 10" per day to 10" per second.
- The units are designed for physical interchangeability. The 4 and 6-channel Oscillographs are mounted in identical chassis. Systems can be mounted in standard 19-inch racks, or bench top or floor consoles.
- Coordinated *system* design means that one system can meet many requirements. You can cover the full range of direct writing Oscillograph application with Brush equipment.
- Accessories available: event markers, timing markers and remote control units.

WHAT IS YOUR MEASUREMENT PROBLEM?

These Brush instruments can simplify your testing and development work.

FOR ELECTRICAL MEASUREMENTS

Amplifiers for systems to measure and record voltages and currents.
BL-530 Dual Channel D. C. Amplifier
BL-533 Portable D. C. Amplifier
BL-536 Six-Channel Plug-In D. C. Amplifier
BL-550 D. C. Amplifier, High Gain
BL-560 Servo-Analyzer
BL-905 A. C. Amplifier, High Gain
BL-954 A. C. Pre-Amplifier, High Gain

FOR PHYSICAL MEASUREMENTS

Amplifiers for measuring stress, strain, torque, force, pressure, etc.
BL-520 Universal Amplifier (Tension Analyzer)
BL-350 Input Box (Resistive)
BL-345 Input Box (Inductive)

FOR RESISTANCE-WELDING MEASUREMENTS

For measuring and recording welding variables.

BL-213 Welding Analyzer*

FOR SOUND MEASUREMENTS

BL-1014 Beat Frequency Oscillator
BL-1602 Frequency Distortion Measuring Bridge
BL-1606 Vibration Pickup Pre-Amplifier
BL-2002 Heterodyne Voltmeter
BL-2105 Frequency Analyzer
BL-2109 Third Octave Spectrum Analyzer
BL-2304 High Speed Level Recorder
BL-2370 Polar Diagram Recorder
BL-2601 Microphone Amplifier
BL-3302 Frequency Response Recorder
BL-4002 Sound Absorption Measuring Equipment
BL-4109 Artificial Ear

DIRECT WRITING OSCILLOGRAPHS

Portables
BL-201 Single Channel Direct Inking
BL-202 Double Channel Direct Inking

FOR METAL MEASUREMENTS

BL-110 Surfindicator*
BL-140 Metal Monitor

PRODUCTION INSPECTION EQUIPMENT
BL-1504, BL-1506 Impedance Deviation Test Bridge
BL-2423 Megohmmeter and D. C. Tube Voltmeter

DIGITAL DECADE COUNTERS
 High speed counters, accept pulses at rates from zero to 100,000 counts per second.
 (*Trade-Mark)

OSCILLOGRAPHS

Model BL-254, Four-Channel.

Model BL-266, Six-Channel.

Model BL-274, Portable Four-Channel

Oscillographs for standard rack or bench top console. The 4-channel unit can be expanded to six channels to meet your changing requirements. Electrically controlled chart drive transmission—standard in all multi-channel oscillographs—permits instantaneous switching and remote control. Choice of 8 or 16 chart speeds. Choice of ink or electric.

Portable Oscillographs feature light weight and small size; they are self-contained. Equipped with electrically controlled chart drive transmission—16 chart speeds available.

AMPLIFIERS

Model BL-530, Rack Mounting

Universal* Amplifier BL-520; with Portable Case BL-380.

Brush Amplifiers feature low drift scale expansion, choice of single ended or balanced inputs. May be operated on a wide range of line voltages and frequencies. New Universal* Amplifier can be used with *both* resistive or inductive transducers. When used with Brush Direct Writing Oscillograph, permits measurement and direct recording of physical phenomena such as strain, stress, torque, force, etc. Amplifier includes direct coupled section that may be used separately for voltage and current measurements.

SERVO-ANALYZER AMPLIFIER

New amplifier, coupled to a Brush direct writing oscillograph, provides a package unit to record performance of servo systems in carrier frequency range of 50 to 10,000 cps. Offers exceptional frequency response, flexibility, high accuracy.

DIVISION OF

BRUSH ELECTRONICS

SOUND & NOISE INSTRUMENTATION

Chart record produced by the Brush Spectrum Recorder presents a complete frequency and noise level analysis. It is an example of the way Brush instrumentation can aid *your* analysis of noise, vibration or strain.

- All sounds from 14 cycles to 36,000 cycles per second automatically scanned and recorded by the Brush Spectrum Recorder

to eliminate laborious plotting of data.

- Measurements made in one-third octave steps, to positively identify frequencies.
- Complete recording through the complete frequency range made in 21 seconds, to save valuable engineering time.

The Spectrum Recorder is one unit in the most com-

plete line of noise and vibration instrumentation available (manufactured in Denmark by Bruel & Kjaer). (See box opposite page). Thus Brush can offer you matched systems, and offer application assistance on complete projects.

MAGNETIC HEADS

Brush offers single channel record-reproduce and erase heads, multi-channel record-reproduce heads, miniature record-reproduce heads and erase heads.

Multichannel heads available in standard designs in encased assembly or cartridge assembly up to 26 channels. New high precision models offer extremely close tolerances.

MULTICHANNEL HEAD DESIGN FEATURES

- Balanced magnetic structure with gaps at front and rear.
- All gaps in precise alignment.
- Individual channels are cast into one integral block of specially selected synthetic resin.
- Complete assembly is non-microphonic and impervious to moisture.
- Mu-metal shields between individual channels.
- Ground lead supplied for shields and pole pieces.
- Wide range temperature operation.
- Special design features may be supplied to meet your requirements.

SINGLE-CHANNEL REDHEADS

Halftrack
BK-1090 Record/Reproduce
BK-1091 High Impedance
BK-1110 Erase

Fulltrack
BK-1250 Record
BK-1251 Reproduce
BK-1252 Erase

CARTRIDGE TYPES

The BK-900 series heads were designed for single-channel recording on any magnetic medium.

HEADPHONES

Brush crystal headphones have Bimorph® crystal drive element of high impedance, offer wide range response with uniform output, are lightweight, rugged, shock-proof. Brush also offers a complete line of cartridges for acoustic applications.

BA-206 Headphone
Model A-1 High fidelity headphones

Model A General purpose headphones
Model A Single phone

Model "A". Designed for GENERAL PURPOSE applications including laboratory, studio and skilled amateur home use. High impedance; ideal for multiple installations.

Model BA-206. Designed for use where high fidelity and smooth frequency response are of paramount importance. Features exceptionally flat frequency response.

PIEZO-ELECTRIC ELEMENTS

for electro-acoustical and electro-mechanical applications: Plates of Rochelle Salt; Ammonium Dihydrogen Phosphate (ADP); Lithium Sulphate; Barium Titanate (Brush Ceramics A & B); Dipotassium Tartrate (DKT); Cylinders, curved plates, bowls and other shapes of Barium Titanate (Brush Ceramics A & B);

For complete information write Dept. KK

DEPENDABLE ELECTRICAL INSULATION

BH TUBINGS AND SLEEVINGS

BRAIDED FIBERGLAS • COATED BRAIDED FIBERGLAS • EXTRUDED VINYL

Check these superior Bentley, Harris products for the electrical insulation you need to protect *your* products. We invite you to send for samples to make your own tests. Feel free to call on the BH Laboratories for help in specific insulation problems — we welcome tough assignments. Write for complete BH Insulation details, or additional catalog information.

BH VINYL-SIL 8000

Combines stabilized organic resins with those of the silicone group to form a product of unequalled heat resistance and non-corrosiveness. Short-time dielectric breakdown is 8000 volts minimum. Withstands continuous exposure to 232°C. for 5 hours; 180°C. for 130 hours; 150°C. for 825 hours and 130°C. for over 2000 hours. Meets requirements for Grades B-A-1, MIL-I-3190A, ASTM and NEMA. Available in Black and colors.

BH VINYL-FLEX 4000

Offers the versatile properties of vinyl-glass sleeveings at low cost. Meets all requirements of MIL-I-3190A, ASTM and NEMA standards for Grades B-B-1, B-C-1 and B-C-2. 4000 volt short-time dielectric breakdown. Excellent flow, chemical and oil resistance. Combines advantages of many grades, offers sleeving economies by standardization of inventories. Available in standard sizes and colors.

BH "1151"

A permanently flexible silicone rubber Fiberglas Class H (inorganic) insulation for continuous operation through a temperature range of -90°F. to 400°F. Meets specification MIL-I-18057. No dielectric loss from handling, bending or operational stresses. Won't craze or crack when used to cover bent wire. Grades H-A-1 through H-C-2. In Natural White and colors.

BH EXTRA FLEXIBLE FIBERGLAS SLEEVING

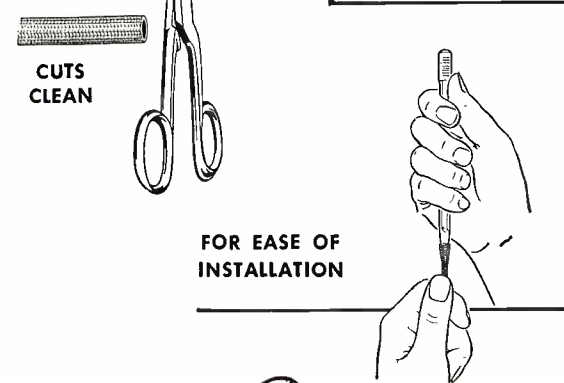

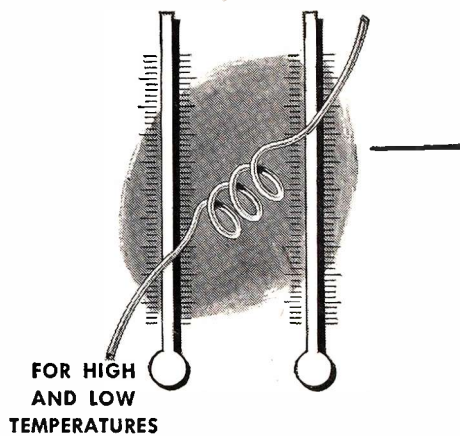

Comparable to single saturated (B-C-3) sleeveings but completely flexible, even after exposure to heat aging, since no hardening varnish is used. Non-fraying because of patented braid treatment.

BH SPECIAL TREATED FIBERGLAS SLEEVING

An unsaturated sleeving. Patented process retards raveling without the use of impregnants or binders. For temperature applications up to 1200°F.

BH FLEXTRUDE-105

A 100% extruded vinyl tubing. Designed especially for insulating electric motors, transformer leads and other instances where high cut-thru, heat and oil resistance is important. Underwriter's Laboratory approved for continuous operation at 105°C. Available in colors and transparent from #24 to 2½".

BENTLEY, HARRIS

Fiberglas* SLEEVINGS

*BH Non-Fraying Fiberglas Sleeveings are made by an exclusive Bentley, Harris process (U.S. Pat. Nos. 2393530; 2647296; and 2647288). "Fiberglas" is Reg. TM of Owens-Corning Fiberglas Corp.

RADIO RECEPTOR

SELENIUM RECTIFIERS

*Choice of thousands in diversified industry
— as original equipment and replacements!*

INDUSTRIAL TYPE RECTIFIERS

Years of service in every kind of application have proved the long life and dependability of these rugged units. Available in various voltage and current combinations up to several hundred kilowatts, they are useful in a multitude of industrial and power circuits such as power supplies, magnetic amplifiers, electro-plating, battery charging, etc.

RADIO TYPE RECTIFIERS

Millions of these stacks are in service in radio and TV circuits as well as many small power applications. Thoroughly dependable under all types of grueling conditions, they are specified by an increasing number of engineers in the U. S. and throughout the world. Available for black and white as well as color TV in ratings up to 750 MA.

EMBEDDED RECTIFIERS

For top protection in military and other applications calling for the strictest requirements. Recommended for use where size and weight are important considerations such as in aircraft.

HIGH TEMPERATURE TYPES

High temperature rectifiers are now available in the larger cell sizes up to 5" x 6" to operate without derating at 125°C. Radio Receptor research has brought the cost down so that the field is now wide open for use in many applications once considered prohibitive because of size and price.

HERMETICALLY SEALED UNITS

Built to special requirements to meet unusually severe conditions. Designed to meet individual needs.

If you have a problem involving rectification, submit your requirements and our engineering department will be glad to aid you in the solution . . . without obligation, of course. Write for our latest bulletin no. T-7.

RECTIFIERS FOR MAGNETIC AMPLIFIERS

Special designs will be submitted to meet individual requirements. However in many cases standard Radio Receptor stacks will give highly satisfactory performance in mag-amp applications, saving both time and money. Let us study your specs and make recommendations.

OLDEST AND LARGEST COMPLETELY INTEGRATED ELECTRONICS FACILITY IN THE WEST

MicroMatch

RF POWER AND VSWR MEASURING EQUIPMENT

MICROMATCH is the registered trade name which identifies a complete line of M. C. Jones Electronics Co., Inc. R. F. Power and VSWR measuring instruments.

These instruments contain a patented circuit designed to produce an output essentially independent of frequency. They cover the frequency range of 0.5 to 4000 mcs. and power levels of 10 milliwatts to 120 kilowatts.

The R. F. Power and VSWR instruments are rugged field and laboratory type complete measuring equipment, consisting of both coupler and indicating units.

The DC and RF output coupler units only are sold principally to manufacturers who incorporate these units directly into government or commercial type transmitters.

Because they are made in quantity to the highest government and commercial standards, MICROMATCH instruments combine the highest quality with extremely low cost.

Please write for our 46-page catalog describing the complete M. C. Jones line.

EFCON

...where close tolerance is standard tolerance

**DON'T DERATE
DELIVERY
DATES
FOR
CLOSE
TOLERANCE
CAPACITORS**

Only EFCON mass-produces miniature plastic film capacitors to close tolerances.

No need to delay your equipment delivery dates while awaiting delivery of precision capacitors. At Electronic Fabricators, Inc., the standard production runs are for $\pm 1\%$, $\pm 2\%$, and $\pm 5\%$ tolerance capacitors. It is not necessary to pick and choose from wider tolerance production runs nor is it necessary to pay premium prices for close tolerance.

EFCON Mylar* and Polystyrene Film Capacitors are each available in two styles: Types MC and PC have a rigid cardboard tube construction; Types MH and PH are hermetically sealed in a metal case with glass-to-metal, solder-sealed terminals. Extended foil construction with leads directly soldered to the foil minimizes inductance and contact resistance for all types.

The plastic film ensures high insulation resistance, low dielectric absorption and stability over extended temperatures and life. Types MC, PC, MH and PH capacitors are available in a range of standard capacitance values from 0.001 to 2 mfd. Non-standard values and tolerances closer than $\pm 1\%$ are obtainable to your specifications.

Other EFCON CAPACITORS . . .

Type TH Teflon* Film Capacitors . . . for high-temperature and high humidity application.

Type S Molded Silver Mica Capacitors

SINGLE PHASE BRIDGE ASSEMBLY

Westinghouse Semiconductors are characterized by long life, very good reliability, no detectable aging, and excellent mechanical stability. All devices are ruggedly designed to withstand a wide range of operating conditions. They are hermetically sealed to protect the junctions from atmospheric contamination. More power output is obtainable with Westinghouse semiconductors which means considerable reductions in space and weight.

XD-5081 is a 2 ampere germanium power transistor which is designed for various switching and audio applications. It is characterized by very high, large signal current gain throughout the operating range.

The XP-5053 is a 900 ma silicon rectifying cell for communications and control devices. It is available in peak inverse voltage classifications up to 600 volts and is distinguished by low forward voltage drop and very low leakage current. Operation up to 150°C. is quite permissible.

The WN-5051 and WN-5091 silicon rectifying cells are used for medium and high power applications where D-C current is required. The WN-5051 diode is rated at 35 amperes, half-wave, average forward current with forced air cooling and mounted on a suitable heat dissipating plate. It is available in voltage classifications up to 350 volts maximum peak inverse. The WN-5091 is available in the same voltage classifications but is rated at

about 22 amperes forward current, half-wave rating.

The WN-5081 and WN-5082 are high power diodes of rugged construction. The WN-5081-D is rated at a maximum of 40 amperes and 200 volts max. peak inverse. The WN-5082-F is rated at 160 amperes and 300 volts max. peak inverse. Both current ratings are room temperature and with heat dissipating plates. Mounting versatility is achieved through the screw bases which are made to be mounted on aluminum plates.

The WN-5081 and 5082 diodes are also available with cooling fins for various applications. The current and voltage ratings are similar to the 5081 and 5082.

The WA-4052 Semitron is a high current low voltage germanium rectifying cell which is designed for electroplating, electrochemical, and anodizing applications. The cell is available in voltage ratings of 26, 45, 66 and 86 volts rms and is rated at 250 amperes half-wave average fwd. current. No derating for parallel operation is necessary.

Pictured here is an example of a variety of bridge assemblies which are manufactured by the Semiconductor Department. Single-phase full-wave, three-phase full-wave, single and three-phase half-wave, and single-phase center tap circuits are all available with different current and voltage requirements up to 600 amps and 300 volts.

For more detailed information, please request Descriptive Bulletin 54-151 or write Westinghouse Electric Corporation, P. O. Box 868, Pittsburgh 30, Pennsylvania.

125 VOLTS

Panel Mounting—Indicating lights have shock resistant lens with wide angle visibility. They are available in six standard

**FOR A-C VOLTAGES
UP TO 550 VOLTS**

Uses a transformer and a 6-8 volt bulb and is designed for voltages up to 550 volts, 60 cycles, a-c. The three major components of this unit are: (1) lamp

A-C OR D-C SERVICE, 125 VOLTS

Is designed for either a-c or d-c service, 125 or 250 volts, and uses a 6-S-6 vibration type candelabra base bulb—with a resistor for 250 volts and full voltage for 125 volts. The major components

colors; red, green, amber, blue, opalescent, and crystal. Two types of lights are available:

base with transformer and miniature bayonet #44 bulb; (2) shock resistant colored lens; and (3) legend plate.

are: (1) lamp base, with resistor if required, and 125 volt 6-S-6 vibration type bulb; (2) shock resistant colored lens; and (3) legend plate.

MICARTA[®]

LAMINATED SHEETS AND SHAPES

MOLDED PIECES

MICARTA 444

MICARTA SHEETS AND SHAPES

Twenty grades of sheets, most of which are available in black or tan. Fillers include paper, cotton, asbestos and glass. The most commonly used by communication engineers is Micarta tan (254) and black (464), both of which are paper base plastic. Either color supplied in 36" x 36" sheets, 1/32" to 2"

thick. Micarta 259 is made of melamine resin in a base of glass cloth. It is white, fire-resistant and very strong. Standard Micarta shapes include angles, channels, zeeks, rods and tubes. All are produced in six or more grades, in various dimensions.

MOLDED MICARTA

For large production quantities of simple or complicated shapes. Material placed in the mold may be in one of four forms: (a) wood flour and plastic, (b) impregnated cloth or paper in laminated form, (c) impregnated

cloth or paper chopped into small pieces, or (d) a combination thereof. Grades using sheets and chopped pieces make the strongest parts: those containing wood flour are useful for intricate shapes.

MICARTA "444"

This form of Micarta offers a practical and economical means of obtaining molded forms or shapes with low-cost equipment and dies. Examples of the shapes are shown at left. A tan, green or black product, processed in

flat sheets of various thicknesses, from cotton cloth impregnated with a phenolic resin binder. Micarta "444" is a practical material for post forming many parts ordinarily made of drawn sheet steel.

For complete details on Micarta, request Bulletin B-3184

TRANSFORMER CORES

Hipersil® Type C Cores

1 MIL

2 MIL

4 MIL

5 MIL

12 MIL

The Hipersil Type C core was originally developed by Westinghouse to use oriented silicon steel to full advantage. Since its introduction 14 years ago continual developments have been made in the product to insure better performance. Along with the great improve-

ments in the magnetic materials themselves toward lower core loss and higher permeability, have been improvements in construction such as a lower loss etched butt joint and the more recent grooved core construction for greater stability in transformer operation.

1 MIL—For pulse transformer applications $\frac{1}{4}\mu$ sec. and below and for IF transformers these cores give the advantage of low-cost assembly as well as high performance. 1 Mil cores . . . Available in same size as 2 Mil.

2 MIL—For pulse transformer applications down to $\frac{1}{4}\mu$ sec. these cores have been standard for the past 9 years.

4 MIL—For 100 cycle transformers where the cores are worked at high inductions (these cores are tested at 17.6 Kg. prior to shipment) these cores with extra low exciting current, give the smallest possible 400 cycle transformers.

5 MIL—For 400 cycle applications, these cores have been standard for airborne electronic applications for the past 8 years.

12 MIL—For 60 cycle applications, 12 mil cores (formerly called 29 gauge) furnish the best transformer core for 60 cycle shipboard and land-based military applications as well as industrial. These cores effect economy of assembly as well as the advantages of small size and weight.

MODERN EQUIPMENT FOR MAINTENANCE-FREE ELECTRONICS USE

Fosterite treated transformers utilize Type C Hipersil® cores in a one loop design to achieve a standard design transformer that will fit most applications with minor adaptations. The Fosterite coating applied to these units gives the best protection available for uncased transformers against humidity, immersion and temperature extremes. In addition to standard communications and radar applications, these transformers are being used extensively in other air-borne equipment.

Low Power Pulse Transformers — These pulse transformers are designed for use in low

power, low voltage pulse circuits. The four general types are: (1) Blocking Oscillator or regenerative drive, (2) Pulse Trigger or current transformer, (3) Low Power Pulse output transformer, and (4) Coupling Transformers.

Charging Reactors—Charging reactors are used between the D-C power supply and Pulse-forming network in low voltage pulse circuits. Depending on circuit constants and repetition rates, they operate as resonant, hold-off diode, or linear types.

MAGNETIC AMPLIFIERS MAGAMP

Westinghouse MAGAMP magnetic amplifiers can be used to advantage in most applications requiring reliable static power amplifiers that need little attention or maintenance and that will withstand high shock or vibration.

MAGAMP amplifiers give high ratios of power output per unit volume and weight, high sensitivity and power gain, and good amplifier linearity.

The Westinghouse type K MAGAMP selenium rectifiers used have low reverse leakage currents necessary to assure long life and minimum aging in amplifiers utilizing high gain core materials. The thermo-setting resin protective coating and winding impregnation results in a reactor assembly that will present a maximum of environmental protection and yet be comparatively small and lightweight. These Westinghouse components and materials of known and proven quality combine to make a MAGAMP capable of long, high performance operation.

MAGAMPS have been applied in servo systems as complex as aircraft autopilots, in the control of motors from the smallest fractional horsepower size to the largest steel mill drive, in the regulation of generator voltages from the miniature aircraft unit to the central station generator. They have been used to amplify the minute outputs of thermocouples, photocells, ionization chambers, and strain gauges. Other applications have included arc welding controls, ignitron firing controls, paper mill reel control, automatic battery chargers, and isolation metering of d-c voltages and currents.

MAGAMPS are available in the 3700 series under five general numbers, as shown in the table below. They may also be engineered for specific applications. This service is available through Customer Application Engineering, Westinghouse, East Pittsburgh. For complete descriptive information, request Technical Data 52-600.

INSTRUMENTS

THE MOST COMPLETE LINE IN THE INDUSTRY

Westinghouse instruments are designed, manufactured and approved under the most severe National Standards to meet exacting engineering requirements. The completeness of the lines of Westinghouse instruments gives the builder and the ultimate user the widest choice of matched instruments for any application.

The general points to consider when selecting instruments are: 1. Accuracy desired; 2. Scale range; 3. Single or multiple scale; 4. Size; 5. Appearance.

With literally hundreds of types available—for measuring all electrical quantities, temperature, position and time—Westinghouse brings you the results of over 65 years' experience in designing and manufacturing better instruments for better performance. We built our first instruments in 1888.

Westinghouse representatives and specialized instrument sales engineers are available all over the country to help you make the proper selections.

SWITCHBOARD As the name implies, these instruments are standard equipment on switchboards in power and switching stations, aboard ships, and in the factory. They also are generally applied to control boards and test boards in laboratories and on production lines and to large radio transmitters because they provide maximum accuracy and readability for this type of service. For complete explanation of types of A-C or D-C Switchboard Instruments available, request Catalog Section 43-200.

PANEL Westinghouse Panel Instruments are available for measuring direct current, alternating current, audio frequency, radio fre-

quency, decibels and elapsed time. Available in sizes of 2½, 3½ and 4½ inches, in surface or flush mounting styles and in round or rectangular design. Request Catalog Section 43-300.

PORTABLE Because of their broad scope of operation, portable instruments are required in a wide variety of ranges, sizes and accuracies. Each type has many different applications . . . but each application can best be served with a particular instrument. The portable instruments shown below represent only a small portion of the varieties available. To aid your selection of the best instrument for your particular application, request Catalog Section 43-100.

RECORDING Westinghouse Recording Instruments are available in switchboard, portable and wall mounting styles in direct current and alternating current types and with round or strip charts. The Recorders are furnished with a broad line of movements to meet all electrical measuring requirements. For complete data ask for Catalog Sections 43-415 and 43-440.

AUXILIARIES These include self-contained units for extending the application of instruments into the measurement of speed and for the measurement of high values of a-c and d-c current and voltage. The general auxiliaries Westinghouse features are Tachometer Generators, Portable Transformers, External Resistors and Shunts in a wide selection of ratings. Request Catalog Section 43-800 for complete details, ratings and descriptive data.

PORTABLE INSTRUMENTS

Conform to A.S.A. Spec. No. C 39.1 MIL-M-16034A

TYPE P-5 LINE (Accuracy ½ %)

The Type P-5 series of Westinghouse instruments is designed to withstand severe portable service and still maintain the highest degree of accuracy over long periods of time. A combination of high-grade mirrored dials and knife-edge pointers eliminates parallax and

assures accurate reading. Scale length is 5 inches and divisions are arranged to aid quick reading. Maximum versatility is achieved with multi-range scale, some of which incorporate seven ranges. Pre-aged Moldarta* case does not warp or deteriorate.

Millivoltmeters	0-10 to 0-5,000
Ammeters	0-.5 to 0-50
Milliammeters	0-1 to 0-2,000
Microammeters	0-20 to 0-5,000

Also available in rectifier and thermocouple types.

(For Complete Ordering Information, See Catalog Section 43-100)

TYPE P-12 LINE (Accuracy 2%)

The Type P-12 line includes single and multiple range ratings for complete D-C and A-C current and voltage measurements. Provides the same high degree of reliability, overload capacity and range coverage contained in

larger types.

LIGHTWEIGHT: A-C instruments weigh from 1 to 1 1/2 lbs. D-C instruments from 1 1/2 to 2 lbs.

POCKET SIZE: A-C—4 1/4" x 3 1/4" x 2 1/8"; D-C—4 1/4" x 3 1/4" x 1 3/4".

FULL SCALE RANGE OF STANDARD RATINGS

TYPE PA-12 FOR ALTERNATING CURRENT

Self Contained Current—From 5 milliamperes to 50 amperes
Self Contained Voltage—From 1.5 volts to 300 volts. Also available in rectifier types.

TYPE PX-12 FOR DIRECT CURRENT

Self Contained Current—From 20 microamperes to 50 amperes
Self Contained Voltage—From 10 millivolts to 800 volts

(For Complete Ordering Information, See Catalog Section 43-100)

SWITCHBOARD INSTRUMENTS

Conform to A.S.A. Spec. No. C 39.1 MIL-M-16034A

24-LINE (Accuracy 1%)

4 1/2" Class—Circular Scale, Rectangular Front—Round-body Case for Flush Mounting. Because of its extra-long scale, the 24-Line instrument combines high readability with minimum panel space requirements, particu-

larly useful where panel area is at a premium. The pointer travel gives a scale length more than twice as long as other types which require the same panel space.

25-LINE (Accuracy 1%)

6" Class—Rectangular Case—Flush or Projection Mounting—Optional Internal Illumination. Westinghouse 25-Line instruments meet the requirements of many special installations. Simplicity of design, uniform appear-

ance, interchangeability and availability of movements for any measurements, make this instrument especially suited for modernization as well as for new installations.

FULL SCALE RANGE OF STANDARD RATINGS—24 and 25 LINES

DIRECT CURRENT

Ammeters—0-1 to 0-50 (self-contained)
Ammeters for use with shunts—0-50 or 0-100 millivolts
Voltmeters—0-2 to 0-800 (self-contained)
Milliammeters—0-1 to 0-500
Wattmeters—120 or 240 volts, 0-50 or 0-100 millivolts for external shunts. (25 line only)

ALTERNATING CURRENT

Ammeters—(24 line)—0-1 to 0-20 (self-contained)
(25 line)—0-1 to 0-50 (self-contained)
Ammeters for use with transformers—0-5
Voltmeters (24 line)—0-150 to 0-600 (self-contained)
(25 line)—0-15 to 0-800 (self-contained)
Voltmeters for use with transformers—150
Wattmeters for use with transformers—5 amperes—120 volts
Frequency meters—(24 line)—120 volts, 60 cycles
(25 line)—120 volts, 25 or 60 cycles

RECORDING INSTRUMENTS

Conform to A.S.A. Spec. No. C 39.2

TYPE 44 DIRECT ACTING STRIP CHART RECORDER (Accuracy 1%)

The new Type 44 Recorder was the result of an intensive design investigation aimed at providing the most modern combination of features obtainable today. The exclusive iron-core mechanisms provide highly efficient, positive performance with complete reliability. For ease of use and service, all parts are accessible from the front of the recorder. Operation for longer unattended periods is possible because

of longer charts and greater ink capacity. The high ratio of scale width to case width provides maximum efficiency of space utilization while assuring full readability. Choice of either synchronous-motor or hand-wound chart drives. Chart speed of $\frac{3}{4}$ ", $1\frac{1}{2}$ ", 3", 6", or 12" per hour or per minute. Available for switchboard or portable applications.

TYPE A ROUND CHART RECORDER (Accuracy 2%)

A low first-cost, low-maintenance recording instrument for a variety of applications where chart records of 2% accuracy are adequate for their purpose. Extra-sturdy construction makes this a particularly convenient instrument for field service jobs. Portable, switchboard

mounting, wall mounting or detachable socket-mounting cases are available. Scale length is 2 inches, but chart has suppressed zero scale with divisions comparable in size and readability to those of much longer scales.

TUBULAR RESISTOR

PORTABLE SHUNT

CURRENT TRANSFORMER

AUXILIARY EQUIPMENT

SECTIONAL TUBULAR RESISTORS FOR D-C INSTRUMENTS:

The sectional construction of these resistors permits a wide range of accurate measurements of high voltages with one milliamper instrument. Resistance values $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ or 1 meg-

ohm are standard, and combinations of these may be easily and quickly put together to form any complete unit. Designed for panel mounting or portable use.

TYPE G AND GG SHUNTS FOR D-C MEASUREMENT:

Type G and GG shunts provide a complete line for use with indicating or recording instruments for measuring direct currents beyond the range of self-contained instruments.

Portable and switchboard types are available in 50 and 100 millivolt sizes with many different current ratings.

PORTABLE POTENTIAL AND CURRENT TRANSFORMERS:

For measuring electrical quantities greater than the self-contained ranges for which the instruments are rated, these portable poten-

tial and current transformers offer a convenient and accurate means of increasing the usefulness of an instrument.

WESTINGHOUSE ELECTRIC CORPORATION, P. O. BOX 868, PITTSBURGH 30, PA.

SELENIUM RECTIFIERS MAGAMP

Westinghouse MAGAMP Selenium Rectifiers have three classifications according to reverse leakage current. The upper limits for Classes A, B and C are 0.3, 0.4 and 0.5 milliamperes per square inch respectively, at 15 volts 400 cycles per second. Table below lists the sizes that are available, giving the active area for each size, the rated half-wave forward current, the maximum limit for forward voltage drop, and the maximum leakage currents at 15 volts, 400 cycles for Classes A, B, and C rectifiers.

Although leakage limits are given here for 400 cycles per second, Westinghouse MAGAMP Selenium Rectifiers

are equally suitable for 60 cycle applications. The 60 cycle leakage current is approximately one-half the 400 cycle leakage current at any given voltage at room temperature.

Westinghouse Type K cells are tested individually and retested after assembly and sealing or treatment with a protective coating. Unless otherwise specified, the insulation of all rectifier assemblies is given a 60 cycle one minute withstand test, at twice the terminal voltage rating plus 1000 volts, between cell terminals and mounting brackets or case. Request Technical Data 52-650 for complete information.

CURRENT RATINGS AND ELECTRICAL LIMITS

CELL NUMBER	CELL SIZE INCHES	ACTIVE AREA SQUARE INCHES	ELECTRICAL CHARACTERISTICS—UPPER LIMITS							
			Rated Forward Current ¹ Milliamperes Half-Wave			Forward Voltage Drop ² Per Cell Half-Wave at Forward Current Shown	Reverse Leakage in Milliamperes Half-Wave at 15 RMS Volts, 400 Cycles ³

Hipernik

MAGNETIC METALS AND ALLOYS

Conpernik

Hiperco

Westinghouse Special Magnetic Alloys fill a variety of electrical and magnetic applications. These alloys provide a wide range of magnetic properties needed for many special requirements. For special needs these alloys will result in improved performance and are superior to the more common commercial magnetic materials.

Hipernik®—A magnetic alloy approximately equal proportions of iron and nickel having exceptionally high initial and maximum permeability and extremely low losses. Used in audio and instrument transformers, relays, magnetic bridges, shields for electronic tubes, etc.

Hipernik V®—A highly oriented magnetic alloy of approximately equal proportions of iron and nickel possessing a very high remanence accompanied by a low coercive force. This material is specifically designed for

saturable reactors and magnetic amplifiers.

Conpernik®—A magnetic alloy of approximately equal proportions of iron and nickel having constant permeability over a range of low flux densities. It is used where constant inductance cores are required over a low range of inductions.

Hiperco®—A magnetic alloy of approximately one-third cobalt and two-thirds iron. Hiperco has the highest magnetic saturation of any known commercial alloy. Permeability above 100 oersteds is far superior to iron and the electrical sheet steels. It is used as a core material for motors, generators, and transformers where minimum weight and size are prime requisites.

Other Alloys Discaloy®, Refractaloy® and K42B® are three of the special high-temperature alloys developed by Westinghouse to meet special applications.

Request Technical Data 52-100 and 52-200 for complete information

INDICATING LIGHTS — SWITCHES

Rectangular Minalite® is a medium sized low-drain indicating light designed for extreme angular visibility and to provide the utmost in sturdiness, compactness, and appearance. Its design matches modern rectangular switchboard devices, such as instruments, relays and control switches. It is intended for general indicating or signal purposes on switchboards, control desks, etc.

Round Minalite® is a compact, medium-drain indicating lamp developed especially for miniature steel switchboards, providing the maximum illumination in the smallest possible space. Since some rigidity was sacrificed to obtain the long slender construction, which permits close center spacing between adjacent lamps, it is intended only for such applications where the wire size is not larger than No. 18.

Complete information on component parts, hardware, receptacles and resistors available are contained in Catalog Section 37-200, which will be sent free on request.

The Westinghouse Minatrol® Switch is a compact control switch of smaller dimensions than the conventional Type W control switch, designed particularly for use on miniature switchboards. It is available in forms to suit the varied requirements of control switch applications, and will handle the full control voltage without interposing relays. Its flexibility of application is practically the equivalent of the Type W switch.

Construction—The Minatrol is a rotary-type switch with the same design features which have made other rotary-type control switches outstanding in performance.

The switch handles 125 or 250-volt control circuits directly, using toggle switches with quick-make and quick-break contacts mounted in unit-construction frame. It occupies only about one-fourth of the switchboard space required by the conventional switch and has a pleasing appearance, unmarred by the mounting screws.

Performance—The current-carrying capacity and interrupting ability of the Minatrol is ample to handle the usual control circuit without the use of auxiliary interposing relays or intermediate control voltages. The switches are rated at six amperes continuous and can interrupt a non-inductive load of three amperes at 250 volts and six amperes at 125 volts d-c. The switch will interrupt highly inductive currents up to five amperes at 125 volts d-c or up to one ampere at 250 volts d-c. On a-c, values can be at least doubled at 250 volts maximum.

Classification—The Minatrol control switches are of two types:

1. Type C, for stay-put and spring return with fixed handles.
2. Type S, for stay-put with removable key handles.

Two standard lengths are available, one to accommodate a maximum of four switch units, and the other a maximum of eight switch units. A special twelve-switch unit length is available on order. Request Catalog Section 37-175 for complete information.

CONTACTORS of the famous Westinghouse Life-Linecontactor® design are available in three general classes: Reversing Mounted Life-Linecontactors • Mounted Life-Linecontactors* • Unmounted Contactors.

transformers or special combinations of modifications to suit the user. E Standard pole combinations are available for 5 to 2,500 amperes, 600 volts maximum, a-c or d-c. Oil-immersed contactors operate up to 5,000 volts at 200 amperes.

In addition, they may be modified with built-in pushbuttons, selector switches, control

RELAYS built for heavy-duty service on industrial electronic equipment are offered in both a-c and d-c. Among the types available are: Thermal Overload • Magnetic Overload • Time Limit • Thermostatic • Auxiliaries • Mechanical • Multi pole • Shunt Coil • Vibrating.

In addition, complete control panels for special applications can be built to order. Write for Price Lists and Dimension Sheets 15-820 and 15-827 for expanded information on types, sizes and ratings.

The New TRANSFORMERS, INC. Plant

Functionally Designed for the Manufacture of Transformers

Manufacturing transformers requires special equipment which is unique in that it cannot be used for other purposes. In the layout of the plant of Transformers, Inc., three objectives have been closely aimed for: a laboratory capable, not only of measuring all the parameters of transformers, but making measurements on all types of electronic equipment in which transformers are to be used. The second objective was a Prototype plant or Sample Department complete and independent of the Production Department. The third objective was manufacturing space laid out in such a manner that complete control can be maintained on the quality of the transformer while it is in the various stages of manufacture.

The floor plan on the left shows Transformers, Inc. successfully achieved its purpose. The plant is so laid out that an easy flow of production is assured and supervision can be maintained with the least effort. All three objectives have been achieved at Transformers, Inc.

and special test equipment

.....to meet today's critical requirements demands highly specialized skills and equipment

The accuracy required in voltage reference transformers and computer excitation transformers demands exacting specifications, supervision and material control. In order that high precision transformers be acceptable they must have predictable performance for all temperature and load conditions. A specialized method has been developed at Transformers, Inc. to make this possible. The measurement of voltage ratio is not sufficient, data must be also obtained which will indicate in which manner the variables of a particular transformer is effected by temperature and changes in the load.

MINIATURIZATION

Airborne equipment may require the same accuracy as ground equipment with the additional requirement of miniaturization. Miniaturization can only be achieved by the use of higher operating temperatures with a resulting loss of efficiency. Thus highly accurate transformers can be designed and manufactured which operate at very high temperatures and are extremely small. Methods of encapsulating transformers in order to reduce weight have been developed at Transformers, Inc.

General laboratory covers approximately 5,000 sq. ft., has the necessary equipment to make measurements from .01 cycles to 50 megacycles. Sections of the Lab. on succeeding pages show specific test set-ups. There is sufficient equipment available that all the set-ups can be operated simultaneously without interference.

TESTING TECHNIQUES AT TRANSFORMER, INC.

Measurement of core loss. The set-up as shown can measure power from 10 microwatts full scale to 9 kilowatts full scale at any frequency from 30 cycles to 20 kilocycles.

The measurement of impedance or admittance. This set-up as shown is used in the measurement of leakage inductance. It is used for measuring real and imaginary impedances or admittances of "black boxes."

Measurement of vacuum tube and transistor characteristics.

Measurement of inductance.

The measurement of filter characteristics as an aid in the design of the most efficient and economical filters.

Testing pulse transformers. This set-up can simulate the operating conditions of pulse transformers up to one million volts.

Equipment used in the design of pulse transformers to eliminate the "cut and try" method generally employed.

Intermodulation distortion measurements and frequency response measurements of experimental amplifiers employing our transformers.

A detailed view of the automatic winding machines.

MEASURED ACCURACY IN TRANSFORMER WINDING

SEMI-AUTOMATIC WINDING MACHINE (PROTOTYPE WORK). The Prototype and Sample Department covers approximately 2,500 square feet and is completely equipped to perform all operations from winding to finishing independently of the Production Department.

HAND WINDING OF VERY HEAVY WIRE. The proper tension is obtained by a tension device behind the operator.

VACUUM IMPREGNATION

Production vacuum impregnated in these tanks and then subjected to a pressure of 100 lbs. per square inch while they are still submerged in the varnish. This insures complete penetration of the varnish. The multiplicity of tanks permits simultaneous vacuum impregnation with different resins.

TRANSFORMER POTTING

A section of the Production Potting Department. All transformers are pre-heated prior to potting to insure the removal of moisture and the absence of voids.

When ordering or seeking information please mention *Electronics Buyers' Guide*.

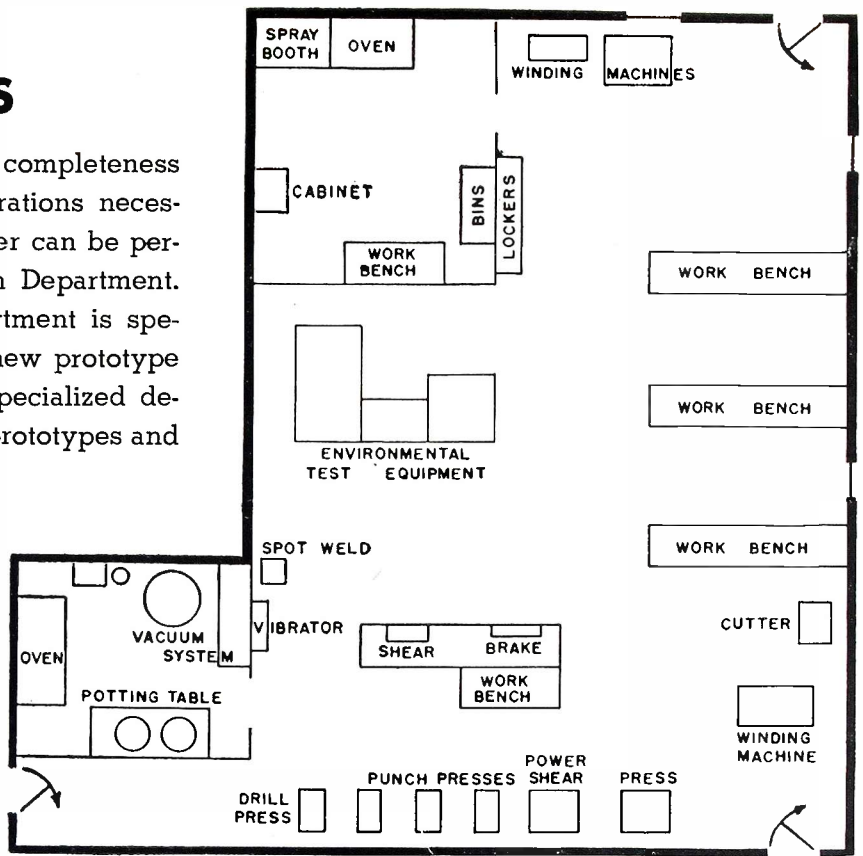

PRETESTED PROTOTYPES

The floor plan on the right shows the completeness of our Prototype Department. All operations necessary to the manufacture of a transformer can be performed independent of the Production Department. The personnel in the Prototype Department is specially trained to follow the design of new prototype transformers accurately. This highly specialized department is at your service to produce prototypes and samples at short notice.

COMPREHENSIVE PROTOTYPE REPORTS

Test data and design data are accurately maintained in files of all transformers manufactured by Transformers, Inc. This data makes possible repeat orders without delay or additional costs.

PROTOTYPE AND SAMPLE DEPARTMENT

ENVIRONMENTAL TESTING

One chamber performs MIL-T-27 humidity cycling and Monmouth cold shock. Another chamber is a combination altitude and extreme cold chamber. Altitude up to 100,000 feet can be simulated. Temperatures as low as 100 degrees below zero fahrenheit can be readily obtained. Another installation not yet completed will perform vibration testing up to 3,000 cycles at any simulated altitude up to 125,000 feet and at any temperature from 125 degrees below zero to 190 degrees above zero.

Transformers, Inc. environmental test chambers are shown in the photographs at the right, above. The photo below shows the low frequency vibration testing.

**LONG
LIFE?**

El-Menco DUR-MICA Capacitors will match your equipment's life expectancy to at least 15 years!

A recent series of the toughest trials has proved El-Menco DM15, DM20 and DM30 Dur-Mica Capacitors outlast all others. Accelerated conditions of 1 1/2 times rated voltage at ambient temperature of 125° centigrade found El-Menco capacitors still going strong after 10,000 hours. Similar conditions obtaining under normal usage would equal a lifetime of over 15 years!

Tougher phenolic casing means longer life, greater stability, over wide temperature range.

Meet all humidity, temperature, and electrical requirements of both civilian and MIL-C-5 specs.

Parallel leads simplify use in television, electronic brains, miniature printed circuits, computers, guided missiles, and other civilian and military applications.

DM15

Actual Size

DM20

El-Menco Dur-Mica DM15, DM20, and DM30 Capacitors Assure:

- | | |
|-----------------|--------------------------------------|
| 1. LONGER LIFE | 4. EXCELLENT STABILITY-SILVERED MICA |
| 2. POTENT POWER | 5. PEAK PERFORMANCE |
| 3. SMALLER SIZE | |

HARDWICK-HINDLE : RESISTORS • RHEOSTATS

VITREOUS ENAMEL RHEOSTATS — Insulated shafts and mounting bushings

Type A-25 — Will withstand rugged treatment under adverse conditions. Has unusually smooth mechanical operation. Terminals of strong corrosion resistant alloy; permanently welded to winding form. Wound ring integral part of refractory base with vitreous enamel. Phosphor bronze actuating arm with graphite brush for smoothest action; excellent electrical control. Shafts insulated. 3 terminals for potentiometer or rheostat use. Added safety factor with new high temp. gray enamel.

Types H-50, H-100, H-150 give longer service, greater protection. Designed for extremes of humidity and abnormal atmospheric conditions. Unique "buss bar" brush automatically adjusts tension for continuous contact. Eliminates backlash; no binding. Perfect contact with winding surface. New High temp. gray enamel bonding increases safety factor and overall service. Improved rheostats comply with current standards of Military Specs MIL-R-22; RETMA, NEMA; listed by Underwriters Laboratories, Inc.

TABLES OF SIZES AND RATINGS OF RHEOSTATS

Tables on request for 5 higher wattage models — 225 to 1000 watts.

RATING—current ratings shown for all Rheostats are for use in free air. When units are enclosed values should be reduced about 50%. Data on non-stock Rheostats—special shafts and bushings; values intermediate to those listed; tapered windings; tandem assemblies, etc., furnished upon request.

When ordering or seeking information please mention Electronics Buyers' Guide.

HARDWICK-HINDLE : RESISTORS • RHEOSTATS

ADJUSTABLE VITREOUS ENAMELED RESISTORS

with mounting brackets

Resistor possesses the many advantages of Vitreous Enamel Construction, plus an adjustable feature. Winding closely and evenly spaced, giving ample insulation between turns. Where winding appears exposed in track, underside tightly embedded in enamel, upper surface only exposed for contact with adjustable band. All sizes of Adjustable Resistors listed here, furnished complete with mounting brackets and one adjustable contact band.

BLUE RIBBON RESISTORS

Differ from tubular types. Wound on elliptical core. Aluminum bar through center insures even distribution of heat, avoiding hot spots. Gray enamel eliminates crazing which results in failure of resistive element due to moisture penetration from humidity, salt and other severe atmospheric conditions. Mounting studs—corrosion and rust resistant—peened to ends of thru-bar conduct heat to mounting surface. Stack 2 or more units. Method of fastening tube to thru-bar prevents loosening. Compared with tubular units of equivalent rating, these resistors offer: higher wattage rating per unit space requirement; needs less space; simple sturdy mounting; single or stacked; light weight; lower inductance. Designed for and made in accordance with MIL-R-26 specs.

* This rating based on a maximum temperature rise of 300 degrees C. with the Resistor mounted horizontally on a 10" x 10" x .040" steel plate supported horizontally 1/2" above a wooden surface. When Resistors are mounted on a non-metallic base the nominal watt rating should be reduced by approximately 15%.

10 AND 20 WATT FIXED VITREOUS ENAMELED RESISTORS

Designed for radio service and replacement use—conservatively rated—wound upon Steatite Tube—combination lug and pigtail terminal connections. Vitreous enamel insulation, insures proof against moisture. 10 watt and 20 watt sizes, in the range of resistance values shown.

ANTENNAS • TRANSMISSION LINES

The ANDREW product line covers the related fields of antennas for communications and broadcasting, and transmission lines to connect these antennas to transmitters, receivers, or other electronic apparatus.

ANTENNAS

Communication—A complete selection of high performance antennas to your particular coverage requirements and frequency allocation. Representative of this selection are:

FOLDED UNIPOLE

FOLDED UNIPOLES (25 MC to 174 MC range), omnidirectional, ideal for fixed station installation, transmitting and receiving. Inexpensive, light weight, easily installed—excellent impedance matching.

J-POLE—A new antenna of superior performance, especially designed for 152-174 MC range—omnidirectional pattern.

HIGH GAIN for 148-174 MC—450-470 MC range. ANDREW Types 3000 and 4000 High Gain omnidirectional antennas will increase your coverage and multiply its benefits by the number of mobile units in your system. Antenna gain—Type 3000—6.3 db, Type 4000—7.6 db. Factory adjusted for low VSWR at your operating frequency.

HIGH GAIN

Microwave Standard and special models available for all frequencies. Rugged, dependable, corrosion resistant, designed to withstand windloading far above industry standards. Standard sizes: 4, 6, 8, 10, 15, 20 and 30 foot diameter. Stock antennas in 860-990 MC, 1700-2110 MC, 2450-2700 MC, and 6700-7400 MC ranges. Also available: many special purpose parabolic antennas in sizes to 60 feet in diameter, feed systems throughout the range 50 MC to 35,000 MC, and high power models to 50 KW.

Broadcast MULTI-V antenna for FM produces omnidirectional pattern—mounts to side of existing tower—power gain from 1.6 to 7.3, with power rating of 10 KW. Factory tuned for low VSWR. **CORNER REFLECTOR** TV antennas for VHF and UHF low power transmitting and community receiving.

TRANSMISSION LINES

HELIAX

HELIAX—flexible air dielectric cable. Combines efficiency of finest copper cables with handling ease of solid dielectric, yet is lower in price. HELIAX has its own complete series of pressurized connectors, matching the superior electrical performance of the cable. Available in 7/8" and 1 1/8" sizes in continuous lengths to 3,000 feet.

COAXIAL CABLE AND LINE. Complete range of sizes for UHF and VHF systems—semi-flexible soft copper cable in 3/8" and 7/8" sizes. Rigid copper transmission line 7/8" to 9" sizes. Adaptors and fittings available from stock.

COAXIAL SWITCH

COAXIAL SWITCHES for 3 1/8" UHF and VHF coaxial line systems permit switching over to standby equipment in 4 seconds. Handles up to 50 KW power load. Available in manual or remote controlled models.

WAVEGUIDE

WAVEGUIDE. Copper clad steel construction for high efficiency UHF transmission systems. ANDREW waveguide system includes all accessories for complete installation.

ACCESSORIES. For every type of ANDREW transmission line, there is a complete selection of elbows, end fittings, adaptors and other required items to completely install a transmission line system. Line hangers, pressurizing equipment and tower lighting equipment are also available from stock.

ANTENNA SYSTEMS and PLANNING

ANDREW Corporation, offers engineering assistance in the planning of your antenna-transmission line system at no cost to you. Contact the nearest ANDREW office for this service. Other associated ANDREW products are:

- Antenna Reflectors, Radar Parabolic
- Antenna Tuning Units
- Antennas, Tropospheric
- Antennas, Ground Plane
- Antennas, Radar Receiving & Transmitting
- Antennas, Mobile
- Antennas, UHF & VHF
- Cable, Transmission Line (all types)
- Connectors—Coaxial Cable
- Controls, Photoelectric
- Dehydrators, Automatic
- Detectors, Standing Wave
- Filters, Microwave
- Filters, UHF & VHF
- Flanges, Microwave
- Lighting Equipment, Tower
- Lines, Slotted
- Masts, Telescoping
- Phasing & Tuning Equipment

METAL CLADS

For better printed circuits . . . lower costs . . . fewer rejects

HIGH BOND STRENGTH—C-D-F's special adhesive for metal-clad Dilecto bonds the copper foil to the plastic without affecting the laminate's superior electrical properties. Heat-resistance, dissipation factor, dielectric constant, dielectric strength, and insulation resistance of the Dilecto base remain unaffected. The closely-bonded foil can be etched cleanly and dipped in hot solder to 450°F. for ten

seconds with a guarantee of no blistering or separating. Metal-Clad Dilecto can be punched or machined either before or after etching.

EXCELLENT WORKABILITY—On all four Dilecto metal-clad grades, you can solder, punch, saw, and assemble components either by hand or automatically. Thanks to the inherently superior workability of the plastics laminate over that of ceramic-type materials, Dilecto can be dropped, jammed into tight chassis, and otherwise treated roughly on the assembly line and in service.

HIGH HEAT-RESISTANCE—Metal-Clad Dilecto Laminates are made of phenolic, epoxy, or Teflon* resin for various conditions of service and assembly, and have either cellulosic paper or woven glass-fiber base. All are ideally suited to printed-circuit applications in which heat-dissipation is a major problem. Continuous exposure to high ambient operating temperatures in enclosed electronic equipment has no significant effects on Dilecto's electrical and physical properties.

Write for new Metal-Clad folder MC-1-56.

TYPICAL PROPERTY VALUES

	Copper-Clad PHENOLIC (Grade XXXP-26)	Copper-Clad PHENOLIC (Grade XXXP-28)	Copper-Clad EPOXY (Grade GB-181E)	Copper-Clad TEFLON* (Grade GB-112T)

All these standard grades are available with 0.0014", 0.0028", 0.0042", or thicker electrolytic or rolled copper foil on one or both surfaces. Other metal foils and other resin-and-base combinations can be supplied on special order.

*duPont Trademark

MICABOND

Available in a wide range of sizes with many different backings including glass-fiber cloth, silk, cellophane, cotton fabric "Mylar," and paper. Micabond Tapes are hand laid; flexible sheets are both hand and machine laid; both retain their electrical insulating properties at elevated temperatures.

New . . . Micabond with glass-fiber cloth backing! When you need

maximum reliability under high-temperature service, resistance to mechanical abuse, coupled with the maximum safety factor, specify Micabond glass-fiber sheets, tapes, wrappers. Composed of India Mica splittings, bonded with flexible resin and faced on one or both sides with impregnated glass-fiber cloth, these new C-D-F products are superior to varnished glass-fiber combinations in deeply imbedded "hot-spot" applications. Write for technical bulletin and samples.

CONTINENTAL DIAMOND FIBRE

MOLDED AND LAMINATED PLASTICS — FOR ELECTRICAL INSULATION . . .

L A M I N A T E D P L A S T I C S

DILECTO

POST-FORMING: Certain Dilecto grades (CF-1 and XF) may be formed to special shapes by heating and placing in an inexpensive cold mold. The thermoelastic properties of these Dilecto laminates open many production and design opportunities. Already widely used by the aircraft industry, Post-Forming Dilecto merits full investigation by every alert manufacturer. Write for complete C-D-F engineering service.

DILECTO ROLLED OR MOLDED TUBING finds wide usage in radio and electrical equipment because of excellent electrical insulation and mechanical strength. Impregnated paper or fabric is rolled on a mandrel between heated pressure rolls, then oven baked or press cured in a heated mold to set up the resin.

Dilecto, a laminated resin-bonded material, meets the need for a non-metallic light-weight insulating material that is moisture resistant, good electrically, strong and adaptable to all fabricating operations. Some grades have exceptionally high mechanical strength—tensile, flexural, impact; others have high dielectric strength, high insulation resistance, high arc resistance, or low loss factor.

Dilecto is a laminated material made from a base of either cellulosic paper; heavy or fine weave woven cotton fabric or mat; asbestos paper, woven asbestos fabric or mat; woven glass fabric or mat; and is coated with a synthetic resin.

The selection of the proper base material, the proper resin in the correct proportion, is C-D-F's job, but the end user must realize how important it is that he fully understands what dividend results can be gained mechanically, and electrically, and from a cost standpoint, by getting the very best C-D-F material for the project. Here is a brief, yet complete listing of Dilecto sheet grades, each one with a combination of proven characteristics built into the material for the specific job.

SHEET GRADE CLASSIFICATIONS (Rod and Tubing similar to sheet stock)

- X For mechanical applications when electrical properties are secondary.
 - P For punching (paper-based grades).
 - XX For electrical applications requiring mechanical strength.
 - XXX For high humidity applications with minimum cold flow.
 - L For mechanical applications requiring fine machining.
 - C For mechanical applications requiring toughness plus impact strength.
 - CF and LE For electrical uses requiring greater toughness than paper-based grades.
 - GB For applications requiring heat resistance and high mechanical strength. Supplied in combination with phenolic, silicone, melamine, polyester, epoxy, or Teflon resin.
- Note: Various C-D-F grades, identified by numbers affixed to the grade classification, are available. Ask for catalog D-55.

TEFLON

OUTSTANDING PROPERTIES

HEAT RESISTANCE: Due to the non-flammability and high heat resistance of Teflon,* it easily meets both Class B and Class H, AIEE standards for maximum hot spot insulation temperature. Teflon coated glass fabric laminates withstand 250°C. continuously and up to 300°C. intermittently. One factor which influences the heat resistance of Teflon is that there is no apparent degradation from oxygen, which does have a definite degrading effect on silicone materials, for instance.

* Du Pont Trade Mark

MOISTURE RESISTANCE: A Teflon laminate has practically zero water absorption and its electrical properties are little affected after long exposure to high humidity. Teflon is unaffected by fungus and temperature changes. Not only has it lower moisture absorption than any other laminate known, but it tends to repel water . . . retaining high surface insulation resistance properties even under extreme humidity conditions.

DIELECTRIC STRENGTH: The dissipation factor and dielectric constant of Teflon glass-fiber base laminates are both extremely low over a wide frequency range. From 60 to 100 megacycles, the dissipation factor range is between .005 to .0005 and the dielectric constant ranges from 2.8 to 2.5 when measured in a field perpendicular to laminations. As corona will slightly degrade Teflon, care should be taken in designing parts used at voltages over 2500. Sharp corners, and other contributing factors to corona should be avoided.

CHEMICAL INERTNESS: Resistant to hot corrosive salts and most concentrated acids. Pure Teflon is unaffected by all known chemical agents, excepting molten alkali metals and, under special conditions, fluorine and chlorine trifluoride. Glass-supported Teflon, when exposed at cut edges, is affected only by those chemicals which attack glass. Otherwise, its properties remain the same. Write for Catalog T-55.

* Will not form complete conducting path. Arc continues indefinitely but material gradually erodes away on full time continuous arc.

CONTINENTAL DIAMOND FIBRE

FOR EVERY APPLICATION IN ELECTRONIC MANUFACTURING

FABRICATED AND FORMED

VULCANIZED FIBRE

GOOD EXAMPLES of Diamond Fibre formed and machined by C-D-F. Left—An insulating barrier made from three pieces of fibre, punched and formed. Fibre tubing is even used for rivets. Right—A fibre tube which has been smooth-sawed to length, punched twice and countersunk. C-D-F can handle the entire job for you, do it faster and at low cost. This includes selecting and testing the proper grade of fibre, machining and inspection, assembling if needed.

If your job is to select a general-purpose insulating material that is low cost, useful for both electrical and mechanical applications, easy to machine and form, consider the advantages of a unique old-timer—C-D-F's Diamond Vulcanized Fibre.

WHAT IS FIBRE? Vulcanized fibre is made by combining layers of chemically jelled paper. The chemical compound used in gelling the paper is subsequently removed by leaching and the resulting product, after being dried and finished by calendaring, is a dense material of partially regenerated cellulose in which the fibrous structure is retained in varying degrees, depending upon the grade of fibre. —NEMA Standard VU 1-1.1

GOOD ELECTRICALLY. Although given a modest insulation rating for resistance to heat (A.I.E.E. Class A with a temperature limit of 221°F.),

Diamond Fibre is often used because of its excellent arc resistance and good dielectric strength. It also has desirable deionizing properties and low heat conductivity. Fibre can be combined or surrounded with moisture-resistant laminated plastic.

MANY GRADES AND FORMS. Diamond Fibre sheet and roll grades include Bone, Commercial, and Electrical Insulation (fish paper) NEMA grades. Fibre tubing is normally made only in Bone grade, with rods available in both Bone and Commercial grades. The chart shown outlines the major characteristics of these grades.

C-D-F BONE FIBRE	Hard, stiffest grade. High density. Resists wear, abrasion, has high compressive strength. Good dielectric strength when dry. Super machining qualities. Not recommended for bending.
C-D-F COMMERCIAL FIBRE	Mechanical and electrical grade. Medium density. Tough, pliable. Good mechanical properties. Fair dielectric strength, normally high when dry. Can be bent, punched, and formed.
C-D-F DIAMOND INSULATION	Electrical insulation "fish paper" grade. Unusually free from foreign matter. Withstands extreme bending and forming without cracking. High dielectric strength, except under high humidity.

TOUGH, RESILIENT, STRONG. How long has it been since you examined the unique properties and wide range of C-D-F fibre grades? Vulcanized Fibre is arc resistant, mechanically strong, non-corroding, half the weight of aluminum. Repeated moistening and drying in forming insignificantly alters the nature, structure or quality of the fibre.

A BIG, RELIABLE SOURCE. C-D-F does business with the largest tonnage users of sheet, rod and tube fibre in the world. This means good deliveries, good prices, reliable products for every new customer. You deal with a materials engineer, a C-D-F man who knows how to give you the most value in Diamond Vulcanized Fibre. If you want to improve design, simplify purchasing, speed production, use Diamond Fibre and the facilities of C-D-F. Write for new Diamond Fibre catalog DVF-55, free test samples, or send us your print for quotation.

MECHANICAL PROPERTIES OF DIAMOND VULCANIZED FIBRE

Property	Sheet thickness, tube wall or rod diameter	SHEETS				TUBES	RODS	
		Bone Grade		Diamond Insulation* & Commercial Grades			Bone Grade	Commercial Grade

NOTE—* Tensile strength only.

RESIN-IMPREGNATED FIBRE

VULCOID

Only C-D-F supplies Vulcoid in sheets, tubes, rods, and fabricated parts. Made from Diamond Vulcanized Fibre that has been uniformly impregnated with a special resin, Vulcoid is a material approved and identified by the Underwriters' Laboratories as Class A Insulation. Natural greenish-tan in color, it is economical, easy to machine and punch. Property-wise, Vulcoid is an intermediate grade between Commercial Fibre and XX phenolic Dilecto.

USES: (requiring arc resistance and mechanical strength)—contact and connector panels, knife switch arms and guides, arc deflector spacer bushings; (requiring dielectric strength and moisture resistance)—electrical fixture insulation, wiring devices, plugs, receptacles; (requiring moisture and arc resistance)—motor and transformer lead bushings and terminal blocks. Write for folder V-55 and test samples.

GOOD DIELECTRIC STRENGTH

LOW DIELECTRIC LOSS PROPERTIES

GOOD MECHANICAL STRENGTH & MOISTURE RESISTANCE

C-D-F Spiral Tubing is a high-strength plastic made from paper or vulcanized fibre that is spirally wound. It is available in two forms: 1. as plain untreated tubing, 2. as impregnated tubing containing phenolic resin or insulating varnish.

Used in many coil form and electronic applications, C-D-F Spiral Tubing can be used to replace rolled or molded laminated phenolic tubing in many cases. The degree of mechanical strength and mois-

ture resistance is established during the manufacturing process, so that the designer and production man obtains the correct properties required for the application.

Write for new catalog and samples. Call the C-D-F sales engineer listed for complete information about C-D-F's fabricating and inspection facilities. Unit costs can be reduced, products improved with new C-D-F plastic Spiral Tubing!

NEW CONSTANT TORQUE

TUBING, for permeability tuning with iron cores, features stable torque ratings, exact internal threading with three point suspension of core to prevent binding, no external embossing. Write for samples.

ONE OF MANY GRADES is

Grade 3, a softer tube for difficult fabricating. May be notched and formed—suitable for severe stapling and riveting.

WIRE PRODUCTS

HIGH TEMPERATURE CABLE

As Electronic tube size increases temperatures go up. Wire that was adequate no longer fits the bill. A new high temperature wire has been developed for operation at 650°F that has excellent qualities of dielectric strength and moisture resistance necessary for new design.

SELECT THE SIZE FOR YOUR REQUIREMENTS FROM THIS TABLE:

AWG Size	Finished Diameter	AWG Size	Finished Diameter	AWG Size	Finished Diameter
20	.115"	10	.210"	1	.525"
18	.125"	8	.275"	1/0	.570"
16	.140"	6	.335"	2/0	.630"
14	.160"	4	.395"	3/0	.690"
12	.185"	2	.470"	4/0	.760"

FIXTURE AND APPLIANCE LEAD WIRE

A complete line of Underwriters approved fixture wire and appliance lead wire with dense, firm and uniform insulation of felted asbestos. Also supplied with outer braids of cotton, rayon or glass with or without finishing compounds. Used on toasters, waffle irons and other appliances as well as usual high temperature fixtures.

HEATING CABLE

A #19 AWG Nickel Chrome conductor with special laminated insulation consisting of asbestos, Teflon* and glass with silicone impregnation and finish. Resistance .5208 ohms per foot. Insulation good up to 440 volts. Operating temperature 500°F. Widely used by central stations for maintaining proper temperature of pipelines subject to wide changes in ambient temperature.

* DuPont Trade Mark

RESISTANCE ELEMENT & UNITS

Core wound flexible heating element and units for low wattage appliances such as heating pads, curling irons, sealers, toys, etc. Insulations of asbestos or glass.

THERMOCOUPLE AND LEAD WIRE

Thermocouple wire and thermocouple lead wire with usual Iron-Constantan, Copper-Constantan or Chromel-Alumel conductors with high temperature insulation to meet MIL or AN specifications.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.

LOW NOISE • PULSE • DELAY CABLES

FEDERAL VARIETY OF CABLE TYPES

Federal's cable department produces a variety of R-F cable types. Some of these cables are produced by Federal exclusively. All are made to the

most exacting standards of quality and control. The materials used are the finest research has developed, assuring top electrical characteristics. Initial dimensional precision helps to maintain stability over a wide temperature range.

SOLID DIELECTRIC COAXIAL CABLES

consist of a solid or stranded inner conductor, dielectric material, one or two copper wire braids, a synthetic resin protective jacket and, in some cases, a protective armor or metal braid. Dual coaxial cables are similar in design to the solid dielectric types, except that two accurately-spaced inner conductors are used.

LOW-CAPACITANCE COAXIAL AIR-SPACED CABLES

have a construction similar to that of the solid dielectric types, except that air is made a portion of the dielectric. One method of accomplishing this effect and still maintaining a high dielectric strength is through a construction involving an inner conductor in a thin-walled polyethylene tube. This is achieved by means of a polyethylene thread wound in a long spiral. This type of cable is also made in Teflon for high temperature applications.

SPIRAL DELAY, HIGH IMPEDANCE LINES

There are three types available with delays of 1 microsecond per foot; .2 microsecond per foot; .1 microsecond per foot and .042 microsecond per foot. 1 microsecond per foot delay line is ideal for color TV use.

TELEVISION ANTENNA LEAD-IN WIRE consists of two accurately-spaced conductors over which is extruded the dielectric material. These lead-in wires have no braid, jacket or armor except in

special cases. The advances in television have meant ever-new approaches to the design of TV lead-in to the point where it has taken many varied forms, the latest being the tubular shaped "pipeline" lead-in.

TEFLON HIGH TEMPERATURE CABLES

In a wide temperature range—from 100°F to +500°F Teflon insulated cable maintains its low loss and high voltage characteristics. Chemical inertness indicates use of Teflon insulated cables under extremely adverse conditions as in chemical plants, boiler rooms, or where highly corrosive acids and alkalis are present. Other application are on ship board (engine rooms, stacks, etc.) in aircraft, guided missiles, "Black Boxes" wherever high temperature is likely to be encountered. Three types are listed below, but all RG types are available.

	VP%	Cap. mmfd/ft	Max. Oper. Volts	Nom. Imp. Ohms
RG-87 A/U	70	29.0	4,000	50
RG-140/U	70	19.5	1,700	75

MINIATURE COAXIAL CABLES TEFLON INSULATED

For High Temperature Applications

Meet operating requirements of high temperature, abrasion resistance, long term stability and light weight. Approximately 1/4 size of comparable RG types and provide the same impedance characteristics. Ideal for installations where space and weight are at a premium (aircraft, instruments). Meet operating temperatures of 150°C for use in confined areas at higher ambient or high conductor temperatures. Operating temperatures up to 200°C may be had by using an impregnated fiberglass jacket. Federal's Miniature Coaxial Cables are made with teflon dielectric and trichlorofluoroethylene jackets; other jacketing materials are available upon request.

Type	Imped (ohms)	Max. Cap.	Attenuation (max) db/100 ft at 400 mc	Conductor*

K 257	70 ± 3	21 mmf/ft	14	7/34AWG
K 258	93 ± 5	16 mmf/ft	15	7/38AWG

Velocity Propagation 72% approx.
Corona (min) 850V RMS
O.D. Dielectric (nom) 0.095 O.D. Jacket (nom) 0.135

*Silver-plated Copperweld

"PRECISION-COAX"

A Semi-Flexible Coaxial Cable

Various types of semi-flexible coaxials that are smaller, stronger equivalents of RG 8/U, 11/U, and semi-solid types. Instead of conventional braid and jacket (vinyl, Kel-F, Nylon or Fiberglass) these semi-rigid coaxials have a seamless extruded metal tube (1, 2) over polyethylene or teflon dielectric. Feature lower attenuation, better heat stability, are non-contaminating, and completely weatherproof. The cable is semi-rigid and lends itself readily to different pre-formed shapes.

(1) Copper tube can be silver plated per sales order.
(2) Brass or aluminum per sales order.

Triaxial PULSE CABLES

RG 156—15 KW Pulse* • RG 157—24 KW Pulse • RG 158—18 KW Pulse

Meet requirements for a high voltage pulse cable. Features include • Higher corona level—than any other corresponding plastic cables • Low self generated noise level • Low radiation characteristics • Higher power capabilities. Applications include radar, telemetering, automation controls, servomechanisms and wherever low level signals are highly amplified and used by control or instrumentation devices.

*1 microsecond pulse

NON-MICROPHONIC LO-NOISE CABLES

Inherently free of self-generated microphonic voltages, when subjected to shock or vibration. A special process insures the best obtainable low noise characteristics, permanence and stability. Can withstand severe mechanical abuse and wide ambient temperature variation without deterioration of their characteristics. Microphonic voltage maximum is 60 microvolt peak for 50 ohm types similar to standard RG cables. Applications include telemetering, automation controls, servomechanisms and wherever low level signals are amplified and used by control or instrumentation devices.

MULTI-CONDUCTOR CABLES

We can produce multi-conductor cables of an infinite variety of constructions. This would include combination of coaxial cables, coaxial cables with control wires, TV camera cable, intercommunication cables. These can be produced in polyethylene, vinyl and teflon.

COMMUNITY TV COAXIAL CABLE

Federal has a cable to meet every Community TV requirement—single shields, double shields, vinyl jackets, non-contaminating vinyl jackets, and polyethylene jackets. Aluminum jackets are available. All cables meet ASTM and REA Standards.

Federal has all cable types and sizes from very low attenuation K-14 for long primary runs and RG-11/U single and double shielded type for distribution and feeder runs to RG-59/U for tap off drop lines.

Federal Telephone and Radio Company stands ready to help with technical aid for old or new systems.

COMPLETE COAXIAL CABLE ASSEMBLIES

also are available from Federal to meet your requirements. This service offers the same "Precision Production" that made Federal the outstanding name in coaxial cables.

SPECIAL CABLE PROBLEMS

Federal Telephone and Radio Co. maintains a stock of most of the required types. When requirements are so special that they cannot be met by Federal's cable types, Federal research and engineering facilities are readily available to develop any new cable constructions. Charges are based on quantity. Special Orders are executed under the high standards maintained by Federal "Quality Control." Every length of cable is carefully checked to see that it meets all tests indicated for the type ordered. Toughness, heat resistance, moisture resistance, dielectric strength, cold-bend—a few of the many tests that must be passed before approval for shipment is given.

Federal also manufactures many types of plastic-insulated wires and multi-conductor cables for television, intercom and numerous special purposes.

FEATURES

1. Longer life.
2. Higher output voltage.
3. Lower temperature rise.
4. Superior humidity resistance.
5. Proven mechanical construction.
6. 85° C. UL acceptance.
7. Conservative ratings.
8. More uniform quality.
9. Largest plant capacity.
10. More engineering know-how.

OTHER AVAILABLE TYPES

- Printed circuit rectifiers
- Plug-in rectifiers
- Encapsulated Radio-TV rectifiers
- Special purpose rectifiers manufactured to customer specifications

FEDERAL'S RADIO-TV SELENIUM RECTIFIER HANDBOOK

80 pages of valuable designs, characteristics and applications. Available for 50 cents (coin only).

*A' after code number indicates locking lug.

**These rectifiers have two sections—characteristics given apply to one section only. If both sections are used in series, voltage input is 320 volts.

***(E) Eyelet. (S) Stud. (T) Paper Tube.

For INDUSTRIAL and MILITARY APPLICATIONS

FROM MILLIWATTS TO KILOWATTS

Federal Industrial Rectifiers are available in a standard line covering a tremendous variety of voltage and current ratings. Cell sizes range from tiny 1/8" diameter cells to giant 6 x 10 inch plates for heavy electrical currents. Cells with voltage ratings of 18-36 volts may be combined to give stack ratings of many K.V. Finishes conform to MIL specs. High standards of construction assure excellent temperature qualities, long life, stable aging properties, low reverse leakage and minimum forward resistance.

FOR COMPLETE DATA write for Federal's Data Booklet on Industrial Selenium Rectifiers... an informative guide to characteristics and applications of the industry's most comprehensive line of high quality rectifiers.

GLASS ENCLOSED

PLASTIC ENCLOSED

FIBRE ENCLOSED

hermetically sealed. Simple fuse-clip mounting of ferrule-terminal stacks. For details, send for "High Voltage" brochure.

HIGH VOLTAGE SELENIUM RECTIFIERS

250-5000 volts • 5-40 ma

Federal High Voltage Rectifiers are encased in either paper, glass, bakelite, nylon, or metal tubes. Glass and metal types are

ENCAPSULATED RECTIFIERS

Features: Resistance to shock and vibration. Complete protection from harmful external conditions. Rapid dissipation of internal heat by conduction.

Other components such as capacitors, transformers, resistors, can be encapsulated with the rectifier to form a compact, convenient, rapidly replaceable circuit. Send for "Encapsulation" brochure.

HIGH TEMPERATURE RECTIFIERS

For maximum operating life at ambient temperatures up to 150° C. A full range of voltage/current combinations for medium and high temperatures. Let us review your requirements.

MAGNETIC AMPLIFIER RECTIFIERS

Selenium cells and stacks precisely processed, tested and selected to assure a high degree of stability and very low reverse current. For use with saturable reactors, regulated DC power supplies, etc.

SELENIUM CONTACT PROTECTORS

Federal contact protectors can extend contact life by more than 1000 times. Recommended for inductive circuits to prevent erosion of switch contact surfaces and to suppress interference caused by arcing. Minimum effect on release time. Available hermetically sealed to meet JAN specs. Send for "Contact Protector" brochure.

CAPACITANCE METER

The KARU and LARU meters, solve virtually all problems of capacitance and inductance measurements in the r-f field. Provide accurate direct reading.

SPECIFICATIONS — TYPE FT-KARU

• Capacitance Range: 0.5 uuf to 10 uf — divided into 6 ranges: 0 to 100/1000 uuf / 0.01/0.1/1/10 uf • Accuracy: $\pm 1\%$ ± 5 uuf • Measuring Freq: 1.6 to 180 kc • Power Supply: 110/125/150/220 volts ac, 40 to 60 cps, 10 va.

FT-KARU

INDUCTANCE METER — TYPE FT-LARU

• Inductance Range: 0.1 uh to 1 h—divided into 7 ranges: 0.1 to 1/10/100 uh/1/10/100/1000 mh • Accuracy: $\pm 1\%$ ± 0.01 uh • Measuring Freq: 2.2 kc to 4.7 mc • Resonance-Freq Measuring Range: 2.2 kc to 4.7 mc—divided into 7 ranges: 2.2-7/22/70/220 kc/0.7/2.2/4.7 mc • Accuracy: $\pm 0.5\%$ • Power Supply: same as above.

Test Terminals: 2 knurled binding posts, one at ground potential. (for both types)

TOLERANCE INDICATOR

Checks resistors, inductors and capacitors • Shows deviation directly on a meter calibrated in percent • Values can be read directly without adjustment • Also determines temperature coefficient of capacitors and coils.

For resistances	10 ohm to 1 megohm
For inductances	100 uh to 2 mh
For capacitances	10 uuf to 1 uf
4 tolerance measuring ranges.....	-2.5% to +2.5%, -6% to +6%
	-12% to +12%, -25% to +25%
Accuracy of indication.....	$\pm 5\%$ of full-scale reading
Measuring voltage	1 v
Measuring freq.	17 kc

Type FT-KZS

TERA-OHMMETERS INSULATION MEASUREMENTS up to 5000 MILLION MEGOHMS

For testing resistors, capacitors, cables, switches, tube sockets, transformers and many other components...incoming inspection and quality control.

Type FT-D

TYPE FT-H4

Range: 20 megohms to 5000 x 10⁶ megohms in 6 ranges • Test Voltage: Adjustable from 100 to 1000 v., dc • Accuracy: $\pm 3\%$ in scale center • Power Supply: 115 v., 50-60 cps. Instrument can also be operated from its own battery supply.

TYPE FT-D

Type	Test Voltage	5 measuring Ranges
D1.....	100v.....	0.2 megohms to 0.5 x 10 ⁶ megohms
D2.....	100v.....	2 megohms to 5 x 10 ⁶ megohms
D3.....	100v.....	20 megohms to 50 x 10 ⁶ megohms

Power Supplies: same as above

Note: Other types available to cover ranges from .2 megohms to 500 x 10⁶ megohms with fixed test voltages between 3 and 1030 volts.

Z-G DIAGRAPH

Plots Impedance Instantaneously

Eliminates complex, time-consuming calculations... all measurements read from interchangeable charts.

Type FT-ZDU

SPECIFICATIONS:

Freq Range: Type FT-ZDU... 30 to 300 mc; Type FT-ZDD... 300 to 2400 mc • Characteristic Impedance: 50 ohms • Measuring Range: Impedance... 1 to 2500 ohms; Phase... 0 to 360°; Attenuation... 0 to 30 db • Accuracy: Amplitude... $\pm 3\%$; Phase... $\pm 1.5^\circ$ • Terminals: Type N • Power Supply: 115 volts (or 220 volts), 50 to 60 cycles.

Federal

TRANSFORMERS

MINIATURE TRANSFORMERS

Miniature Hermetically Sealed input, output and inter-stage Audio Transformers, featuring Federal's new hermetically sealed terminal. Hermetically sealed power transformers and chokes. Meet government specifications.

Federal, with many years of technical experience in making high quality Transformers for use in their equipment, is now making that experience and know-how available to the industry. All manufacturing processes are done in-plant and all Mil T-27 testing facilities are available. Federal can solve your Transformer problems for various MIL T-27 types as

POWER • CHORES or REACTORS • NETWORKS
TOROIDS • DELAY LINES • AUDIO • PULSE

ENCAPSULATED

To meet the requirements of small space, light weight and humidity and still provide mechanical protection, Federal Transformer of the above mentioned types are available in encapsulated forms.

VOLTAGE REGULATING TRANSFORMERS

6 stock models with these features

Regulation—closer than $\pm 1\%$

Response time 1 1/2 cycles

Sizes 1 KVA and up have multiple primaries

Completely automatic—no moving parts or tubes

Low external stray field

Isolation between primary and secondary

Federal Telephone and Radio Company

A Division of INTERNATIONAL TELEPHONE AND TELEGRAPH CORPORATION

100 KINGSLAND ROAD, CLIFTON, N. J.

In Canada: Standard Telephones and Cables Mfg. Co. (Canada) Ltd., Montreal, P.Q.
Export Distributors: International Standard Electric Corp., 67 Broad St., N. Y.

M2A SUBMINIATURE RELAY Built to withstand severe mechanical vibration and shock. Designed to permit excessive vibration and shock without opening closed contact or closing open contacts. Has a completely balanced armature, palladium contacts for reliability and low contact resistance and is hermetically sealed.

SPECIFICATIONS: Electrical—Insulation Resistance—100 megohms minimum between all contacts and frame. Dielectric Strength—1000 RMS 60 cycles between all contacts and frame. Contact material—palladium. Contact rating—

2 amp non inductive. Contact combinations—SPST, DPDT, 4 PDT. Coil resistance—400 Ω or as required. Operating current—.040 amp.

Mechanical—Weight—1.7 ounces. Height from socket— $1\frac{1}{16}$ inches. Diameter of case— $1\frac{1}{16}$ inches. Terminals arranged either for wiring or octal socket.

Environmental—Temp. Range—65° to + 125°. Vibration—10 to 2000 CPS at 20 G. Shock without opening contacts 100 G. Shock without physical damage to relay—1500 G.

TELEPHONE TYPE RELAYS

Telephone type relays available with a wide variety of contact combinations and ratings. Single and double coil combinations are available with coil resistances ranging from a few ohms to several thousand ohms.

LAMP SOCKET: Federal's new Lamp Socket is of exclusive design and features an easily adjustable side bracket that will fit all panel wall thicknesses. The crown of the Lamp Socket will hold all standard lamp caps.

SILICON RECTIFIERS: Exceptionally low forward voltage drop when passing full rated forward current with negligible leakage current for most applications. Simple, strong mechanical construction provides for temperature extremes, vibration and shock. Stud-type construction of higher current series assures mounting rigidity under the most adverse conditions.

Model No.	Terminal Construction	Forward Current	Peak Inverse Voltage	Temperature Ambient
CP-614-91	Axial Pigtail	300 ma	100	100°C
CP-614-92	Axial Pigtail	300 ma	200	100°C
CP-614-93	Axial Pigtail	300 ma	300	100°C
CP-614-1	Stud	400 ma	100	125°C
CP-614-2	Stud	400 ma	200	125°C
CP-614-3	Stud	400 ma	300	125°C

Others available at 10 ampere rating at 100 and 200 volt peak and 50 ampere rating at 71 volt peak.

GERMANIUM RECTIFIERS: High power, small size and good efficiency in new water cooled types rated 200 amperes at 93 volt peak. With proper series or parallel construction they will handle most high power requirements. In the medium power field, Germanium Rectifiers rated at 5 amperes can be stacked to deliver from 5 to 48 amperes with 70 to 315 volts A.C. input. Federal also produce 1N91, 1N92, 1N93 and 1N368 low power junction rectifiers and stacked assemblies.

Economical solutions to your design, construction and servicing problems using Alden Products

WHEN YOU ARE CONFRONTED WITH PROBLEMS OF SIMPLIFYING DESIGN; SIMPLIFYING TROUBLE-SHOOTING AND SERVICING; OR PROVIDING MORE EFFICIENT CONNECTIONS FOR AC, HIGH VOLTAGES, AND IN-OUT CONNECTIONS; THE ALDEN PRODUCTS SHOWN BELOW CAN HELP YOU FIND PRACTICAL, ECONOMICAL SOLUTIONS.

IF YOUR PROBLEM INVOLVES DESIGN FOR SIMPLE CONSTRUCTION AND SERVICING . . .

The Alden Terminal Card Mounting System is certainly for you!

Here's how you use it: First, lay out your circuitry on Alden's full-scale planning sheets. Second, wire the components indicated into pre-punched terminal mounting cards. Alden miniature ratchet terminals permit you to snap pig-tail leads into place, shift them for experimentation, yet always provide a perfect electrical connection. Jumper strips eliminate wiring for common circuits. Card-mounting sockets for tubes, coils, crystals and condensers of the plug-in types provide direct mounting to the card. Third, lift circuitry direct from breadboard to production models. Fourth, adapt the card system to printed wiring. Fifth, Alden Basic Plug-in Chassis organize cards in "planes of circuitry," provide protective housing for the cards, organize all in-out wiring at a single point-of-check color-coded for easy servicing, and provide for quick removal or installation. Sixth, incorporate tiny Alden "tell-tales" to monitor the functioning of each chassis, then plug the chassis into an Alden Uni-Rack, a portable case, or a standard rack. Plug-in Chassis are available in 2", 4", 8", and 17" standard models.

IF YOUR PROBLEM IS AC INPUTS AND TAKE-OFFS . . .

Alden can provide a wide variety of connectors and outlets which will provide better than adequate power handling capability. They are unusually compact, and are fitted with tabs or leads to meet your wiring requirements. Alden Mini-SpAcE AC outlets (Type 402ACE) have been widely adopted in the electronics industry as female convenience outlets. Alden AC outlets and connectors are also commonly used in a variety of electrical appliances.

Alden Detachable Line Cords and Plugs provide an efficient, simple way to bring power into electronic chassis or electrical appliances. The plug is simple to mount, and the cord may be furnished in lengths to suit your requirements.

IF YOUR PROBLEM INVOLVES MONITORING CIRCUITRY AND TROUBLE-SHOOTING . . .

Tiny Alden Sensing Elements are compactly, sensibly designed to provide front panel "tell-tale" indication for instrumentation, controls and computers. Alden Pan-I-Lites provide visual front panel monitoring of critical circuitry by indicating malfunctioning units instantly. Alden Fuselites give instant, visual indication of blown or defective fuses. Mini-Test Jacks provide space-conserving front panel access for taking voltage readings at critical points in the circuitry, and eliminate the need for pulling out chassis and unscrambling wiring to check meter readings.

All these sensing elements simplify trouble-shooting. Used as an integral element in the Alden Terminal Card and Basic Chassis System, they permit non-technical personnel to spot trouble instantly and replace defective circuit "packages" with a serviceable spare.

IF YOUR PROBLEM INVOLVES MORE EFFICIENT, ECONOMICAL CONNECTORS . . .

Alden offers a complete selection of assembled connectors with leads tailored to your specifications. In addition, Alden now offers IMI (Integrally Molded Insulation) Connectors which eliminate potting, provide for moisture sealing and individual lead strain relief, minimize arc-over. IMI Connectors are available for up to 11 conductors in the standard series. IMI Connectors by Alden are in common use as single-lead high voltage disconnects; for two- and three-lead antenna terminations; in multi-wire speaker connectors; and in tube cap connectors. They are also available in non-interchangeable sets which simplify assembly and maintenance by preventing misconnects. Complete high voltage cables of IMI construction are available to handle up to 30 kv.

Whatever your problem involves in devices to mount, house, fasten, monitor or connect electronic circuitry, you're sure to find a wealth of valuable information in Alden's handbook—IDEAS, TECHNIQUES, DESIGNS. Let us know about your problem, and we'll send along appropriate information to assist you in finding the economical solution.

ALDEN PRODUCTS COMPANY, 112 N. Main St., Brockton 64, Mass.

TENSOLON WIRE & CABLE

... for -90°C to
 $+250^{\circ}\text{C}$ operation

A *Tensolite*
PRODUCT

For an extra margin of dependability at maximum operating temperatures, specify Tensolite's rugged Teflon[®] insulated wire and cable products. Resistant to all chemicals and solvents, Teflon combines minimum wall thickness with highest dielectric strength. © Du Pont

TEFLON INSULATED HOOK-UP WIRE	<p>Extruded Teflon insulation to meet the requirements of MIL-W-16878A Types E and EE, sizes 10-30 AWG in 14 solid colors and spirally striped.</p> <p>Parallel wrapped Teflon—exclusive patented construction featuring super-flexibility, sizes 20-34 AWG in 14 solid colors to MIL-W-16878A Types E and EE.</p> <p>Spiral wrapped Teflon—special cross-lapped construction with spiral striping conforming to commercial (GEN-104) and military (MIL-W-76A) specifications having the standard stripe width, lay and spacing. Sizes 8-30 AWG to MIL-W-16878A Types E and EE Specification.</p> <p>NEW 5 mil wall miniature Teflon hook-up wire for applications where space factor is extremely critical. Sizes 26, 28, 30 and 32 AWG in 4 solid colors.</p>
TEFLON LEAD WIRE	<p>Teflon impregnated fibreglas braid over Teflon insulated wire for high temperature motor and transformer leads. Sizes 8-32 AWG, solid and tracer colors.</p> <p>Silicone lacquered fibreglas braid over Teflon insulated wire for class H applications. Sizes 8-32 AWG, solid and tracer colors.</p>
SHIELDED TEFLON WIRE	<p>All of the above described hook-up and lead wires are available with closely woven wire braid shields to all military and customer specifications.</p> <p>100% shielding provided with a close-fitting drawn copper or aluminum tubing available on request.</p>
TEFLON TUBING	<p>Ultra-flexible slip-on insulation for 20-30 AWG sizes available in 14 solid colors.</p>
TEFLON AIRCRAFT WIRE	<p>New improved Teflon-glass-Teflon sandwich construction providing superior resistance to abrasion and vibration, as well as increased margin of safety for overload protection and emergency operation. Conforms fully to MIL-W-7139A, available in sizes 6 to 22 AWG.</p>
JACKETED SHIELDED TEFLON INSULATED CABLE	<p>Teflon outer jacket cross-lapped and fused to provide an impervious and flexible covering completely resistant to all corrosive chemicals. Available in 10 solid colors, or spiral striped, sizes 10-30 AWG.</p> <p>Teflon impregnated or silicone lacquered fibreglas braid outer covering over shielded Teflon insulation. These class H cables are available in solid and tracer colors, sizes 10-30 AWG.</p> <p>Extruded vinyl or nylon jackets over shielded Teflon wire for high frequency, moderate temperature applications. All standard sizes and colors.</p> <p>Nylon lacquered nylon braid outer covering over shielded Teflon wire for extra rugged applications at temperatures not exceeding 120°C. Solid colors and tracers, sizes 10-30 AWG.</p>
MINIATURE TEFLON COAXIAL CABLE	<p>50, 70 and 93 ohm extruded Teflon insulated miniature coaxial cables with extruded vinyl, nylon or Teflon outer jackets. Also available with lacquered over-braids.</p> <p>Finished coaxial cable assemblies are now being supplied with miniature connectors and fittings.</p> <p>Copper or aluminum clad miniature Teflon insulated coaxial cables for rugged applications with extreme size and weight limitation. The semi-rigid nature of this construction minimizes self-generated noises.</p> <p>Flexible low-noise miniature Teflon insulated coaxial cables are also available on request.</p>
MULTI- CONDUCTOR TEFLON CABLE	<p>Teflon insulated conductors cabled together to exact customer specifications.</p> <p>Shielded multi-conductor Teflon insulated cables.</p> <p>Teflon outer jacket, silicone or Teflon impregnated fibreglas braid and nylon lacquered nylon braid over shielded multi-conductor Teflon insulated cables are available for numerous specialized applications in tele-metering and instrumentation.</p>
CUSTOM TEFLON CABLE	<p>Tensolite's development facilities are ready to assist you in the design and selection of special Teflon wire, cable and thermocouple constructions as well as custom wire assemblies and harnesses.</p>

One Source for All Your Requirements

Raytheon, world's largest manufacturer of magnetrons and klystrons, offers the widest selection of microwave oscillators in the industry, including selected traveling wave tubes and reliable combinations of magnetrons and klystrons. This leadership results in mass production economies which mean important savings for you.

The list shown on this page includes only part of the tube selection available to you.

Contact Power Tube Sales for further details on any of the above types and classified and developmental types not yet listed. Complete Magnetron, Klystron and Special Tube Data Booklets available on request.

Also Available—A line of Backward Wave Oscillators, Traveling Wave Tubes, Storage Tubes and Other Special Types.

*Harmonic filtered models. Harmonic content less than 3%.

†Portable models, supplied with cord and plug and output receptacle.

FEATURES

1. Deliver accurate AC voltage within $\pm \frac{1}{2} \%$
2. Stabilize output with more precision
3. Regulate better at full load
4. Hold up better under over-load
5. Better no-load to full-load regulation
6. Accept wider input voltage range
7. Less voltage change as units heat up
8. Less change in output as frequencies fluctuate
9. Smaller, lighter, more compact; no moving parts
10. Cost less to operate

RAYTHEON PANEL COMPONENTS

Printed Circuit Test Jacks

Specially designed for printed circuit use • Accepts standard 0.080" test prod • Simple mounting—just insert and dip-solder • 8 brilliant insulator colors for circuit coding

Subminiature Test Jack

Fixed or snap-in contact types available • Fast, easy expansion mounting • Accept standard 0.080" test prod • Colored insulators for circuit coding

Terminal Board Bracket

Provides rigid support under shock or vibration • Mounts single or double panels • Meets military specifications • Cold-rolled carbon steel, cadmium plated

Knob Lock

Prevents control movement by shock or vibration • Replaces potentiometer mounting hardware • Neat appearance—matches standard Raytheon knobs • Available in Mirror or Matte finish

Binding Posts

Provides 5-way connection • High strength nylon and brass construction • Accept standard 0.080" test prod • Available in black or red

Shaft Lock

For use with screwdriver-adjusted controls • Constant friction drag prevents accidental rotation • Provides seal against dirt and moisture • Replaces standard mounting hardware

Captive Hardware

Stainless steel construction • Wide assortment of stock sizes • Meets government specifications • Neoprene gasket provides dirt and moisture seal

Pull Handles

Functional design—integrated with Raytheon Standard Control Knobs • Tenite II—anodized aluminum inserts • Mirror or Matte finish

Typical Q vs. frequency characteristics of Variable Inductors.

ADJUSTORIODS®

The Adjustoroid, a low cost adjustable toroid, exclusively developed by Burnell & Company, Inc., contains an actual complete toroid with all the excellent characteristics of the non-adjustable types. Adjustment is obtained by a completely stepless function with magnetic biasing.

The nominal inductance value for an Adjustoroid is the **maximum** value, and the inductance range is the nominal value minus approximately 10%.

Hermetically sealed to meet Government MIL specifications. Many types of networks in tuned circuits are being produced which employ the Adjustoroid in completely hermetically sealed packages.

Intermediate inductance values as well as special taps and extra windings available on special order with minimum delay.

For additional technical data on Adjustoroids, refer to equivalent toroid in catalog.

Case CS-3357

Telemetering Band Pass Filters—This series of filters is produced in accordance with the most widely accepted specifications for telemetering systems.

Telemetering filters are now available for every channel ranging from 400 cycles to 70,000 cycles and for various band widths between 15% and 40%. In addition to the standard case types which conform to the original A.P.L. specifications, special case sizes are also supplied.

Telemetering Low Pass Filters—These filters are supplied for operation in the sub-carrier discriminator of telemetering apparatus and are employed in the demodulating circuit for the purpose of attenuating all unwanted signals and harmonics leaving only the modulation intelligence. These filters are available for operation in an unbalanced line or balanced line and range in cut off frequency from 6 cycles up to 10,500 cycles. Operating impedance is generally 330 ohms.

MINIATURIZED BAND PASS FILTERS

Miniaturized Band Pass Filters—In view of the large number of filters that are employed in telemetering equipment, the size of the filters is a major contributing factor to the size of the equipment. As the approximate volume of a set of twenty standard telemetering band pass filters is 1500 cubic inches, even for ground based equipment this bulk can be objectionable. This is particularly true of mobile stations. Our cognizance of this led to the development of a series of miniaturized filters that necessitates practically no sacrifice of desired attenuation characteristics.

The tremendous advantage of these new filters can be seen from the fact that a set of the same twenty filters would have a volume of less than 300 cubic inches representing a reduction by volume of 80%. Every telemetering filter now being supplied in the standard case is also available in the new miniaturized version.

An additional feature of these new compact filters is hermetic sealing to conform with MIL-T-27 specifications. These are also equipped with an octal plug for ease of interchangeability.

OUTPUT.

THE BEHLMAN

INVERTRON

IS A HIGHLY ACCURATE, EXCEPTIONALLY
STABLE, COMPLETELY ELECTRONIC

A. C. POWER SOURCE

The INVERTRON is available with power output ratings from milliwatts to kilowatts. Frequencies from subsonic to supersonic, fixed or variable, with accuracies to .001% for fixed frequencies and to .1% for variable frequencies. Sine wave distortion is never greater than 2%, with .5% or less available. Standard regulation from no load to full load is 1% with .5% or better obtained by adjustment of regulation control. If you are developing or testing Magnetic Amplifiers, Servo Systems, Airborne Instrumentation, Synchros, Motors, Shaker Tables, Choppers, Etc., consider the BEHLMAN INVERTRON.

VHS RELAY

(Very High Sensitivity)

NEW: Some VHS Relays can now be built with adjustable sensitivity.

Model 266

Sample specs. are:
0.2 microamperes,
(12,000 ohms coil)
or, 0.1 millivolts (5
ohms.)

The VHS is a D'Arsonval moving coil relay, internally shock-mounted. The screw-on cover is gasket-sealed. Connections: 9 pin octal style. Dimensions: 1 3/4 diameter x 2 1/4 long. Weight: 4 ounces. Sensitivity: Infinite variations from 0.2 Ua to 10 Amp. or 0.1 Mv to 500 volts, self contained. Higher volts or amps with external multipliers or shunts. AC rectifier types. Trip point accuracies to 1%. Differential 1%. The degree of resistance to shock and vibration depends upon sensitivity and type of action wanted. In general, the relays will not be permanently damaged by shocks of 100G's and vibrations up to 2,000 cps at 3 to 4 G's. The most sensitive relays may close their contacts under these conditions.

Contacts: SPST or SPDT, 5-25 Ma. DC. Other ratings to 1/2 Amp. AC. A locking coil gives high pressure and chatter-free contact even under shock and vibration. Prices \$20 to \$80.

Series 1816 and 1818 Relays

Low operating current, snap action contacts, 5 amps, 125 volts (AC non-inductive) Designed for use with meter-relays. Combine high sensitivity with heavy load capacity. SPDT or DPDT. Also available in plug-in cans. Prices \$6 to \$14.50

LIAD MULTI-CONTACT METER-RELAY

This is a device made up of: a D'Arsonval meter movement—with one or several contacts carried on the moving pointer, a printed circuit scale (95 angular degrees) in place of a normal meter dial, and a device for gripping the pointer and its contacts to the scale contact bars. The unique combination of contact closures resulting from this gripping is indicative of the level of the signal—and can be transmitted or used for: telemetering; automatic production testing or grading; maximum value reading; simple quantitative read-out, etc. Standard LIAD with 10 segment scale band, one milli-ampere sensitivity, 12 volt read-out coil. Price \$100.00

Delivery is 3 to 6 weeks on most special orders. Some ranges are kept in stock for immediate delivery.

**ASSEMBLY
PRODUCTS, INC.**

INDICATING PYROMETERS AND API PANEL METERS

Model 461
0-2500°F. \$32.70

Medium resistance pyrometers (4 ohms per millivolt). Automatic, bimetal cold junction correction. Compensated for copper error. Accuracy 2%. Available with 1% accuracy or thermistor compensated for wide ambient variations.

Furnished with adjusting resistor to take thermocouples up to external resistance of 10 ohms. Higher external resistance for some ranges. White or black face dials.

Standard ranges are:

0-3000°F. The minimum range for a pyrometer is 300°F. for full scale deflection from one thermocouple. Two or more thermocouples can be used in series to cut down this minimum—if their resistance does not become excessive.
0-2500
0-2000
0-1500
0-1000
0-750
0-500
0-300
-75 to +225
-200 to +100 (Many other ranges available.)

Model 255, 2 1/2"

Ruggedized-Sealed Pyrometer with shock-mounted movement.

0-2000°F. \$28.40

Model B Portable Pyrometers

Price: \$30.50 to \$55.25

Includes thermocouple with 5' lead and oak carrying case. Permits spot checks without requiring a permanent installation.

API PANEL METERS

Model 261
0-1Ma DC \$11.50

Model 451
0-20 Ua DC \$27.50

D'Arsonval movements, Alnico magnets, tubing or knife-edge pointers. AC meters are rectifier type. Normal DC accuracy, 2%, AC 3%. Higher accuracies available. Zero right, zero center meters or up to two-thirds of range suppressed available. AC and DC meters in multiple ranges. Special dials in colors, black face, your name, etc.

STYLES: PYROMETERS & API PANEL METERS

Ruggedized-Sealed

2 1/2, 3 1/2, 4 1/2 inch round metal case, sealed zero adjust, shock-mounted movement.

Black Bakelite

2 1/2", round or square, 3 1/2" round or square, 4 1/2" rectangular. (Other colors in 4 1/2" size only).

Clear Plastic

2 1/2", 3 3/4" and 4 1/2" rectangular.

Note: Special panel meters and pyrometers (including ruggedized-sealed) can be engineered to your requirements.

CONTROLS

SIMPLYTROL AUTOMATIC TEMPERATURE CONTROL, THERMOCOUPLE-ACTUATED

Cat. 4535 0-1000°F. 1/C
Approx. 10 x 6 x 7" \$135

Compact
Reliable
Simple

Ranges from
-400°F. to
+3000°F.

Indicating
accuracy 2%.

Control accuracy
often better
than 1/2%.

On-off control or automatic shut-down for furnaces, ovens, kilns, etc.

Few moving parts—no vacuum tubes. Regular load relay is SPDT 5 amps. Optional heavy duty relays to 40 amps. Indicating meter-relay is medium high resistance and has bimetal cold junction compensation. For use with all standard thermocouples.

No leveling required—just connect thermocouple, connect load (two or three wire), and plug in to 115 or 230 volt AC line.

OPERATION: Control action starts when the EMF generated by the thermocouple moves the D'Arsonval coil in the meter-relay, and causes a contact carried on the indicating pointer to touch one mounted on the control pointer. This causes a load relay to turn the heat off. Only if the temperature drops below the control point will the load relay drop out to turn the heat on again.

SILHOUETTE
Meter-relay mounts
in front of panel,
chassis behind.

BEARING TEMPERATURE MONITOR

Cat. No. 3590-4 \$355.00

Meter-relays, operating directly from thermocouples, give immediate warning or shut-down upon dangerous temperature rise in bearings (or other danger points). Any number of points can be monitored.

VERSATROL AUTOMATIC CONTROLS

For any variable that can be measured electrically. Adjustable control points. Automatic operation.

Cat. 3581
Versatrol High Limit
Automatic with
451-C Meter-Relay
(0-20 Ua DC)
Approx. 10x6x7"
Price \$154.25

The Versatrol consists of a meter-relay and all additional components for a complete control assembly. Any range or type of meter-relay can be supplied in a Versatrol. Self-contained load relays have 5 ampere contacts. The control point is adjustable from the front—can be set to any place on the meter scale. Meter-relays for Versatrols can be calibrated in "Feet Per Minute" (tachometers), "Foot Candles" (photo cells), "Counts per minute", (Geiger), "Deflection", (Strain gages), "Deviation", (zero center)—and any other function that can be converted to electrical units.

Control can be high limit (on an increase in signal), low limit (on a decrease in signal), or double (control action on rise or fall of signal). Versatrol can be used for continuous on-off control (automatic) or for shut-down or alarm (requiring manual reset). No vacuum tubes are used. Available in wall cabinet, panel mount, "U-Mount-It" etc.

METER-RELAYS

D'Arsonval indicating meters with built-in locking contacts for sensitive control or alarm.

Typical Applications:

Radiation detection and alarm
Automatic component testing
Heat and pressure control
Reactor protection
Signal detection in radar warning systems
pH control in automatic titration
Speed control for machines and conveyors
Control of evacuation pumps in vacuum tube mfg.
Chemical process control
Continuous monitoring of current and voltage
Automatic prospecting
Controlling rates of flow of bulk materials
Automatic switching of standby microwave equipment
Bearing temperature monitoring on pumps, turbines

Model 255-C
High limit,
Ruggedized-Sealed
0-100 Ua DC
\$46.00

Narrow bezel permits longer scale length, takes less panel space.

Operation:

Trip point adjustable to any point of scale arc. Sensitive to changes of less than 1%. One contact carried on moving pointer. The other on an adjustable pointer. When two pointers meet, contacts close and lock. Holding coil is wound directly over moving coil, locking action is electro-magnetic. Manual or automatic reset. Spring action in contacts kicks them apart.

Model 461-C Bakelite
Double Contact
10-0-10 Ua DC
\$83.25

Styles:

RUGGEDIZED-SEALED metal cases are 2 1/2, 3 1/2, and 4 1/2" round, shock-mounted movement, gasket-sealed.

BLACK BAKELITE . . . glass front, 4 1/2" rectangular case. Other colors on special order.
CLEAR PLASTIC CASES 2 1/2, 3 3/4, & 4 1/2" rect.

Ranges:

0-5 Microamps to 0-50 Amps. 0-5 Millivolts to 0-500 volts, AC or DC. (Minimum AC voltage range 0-250 Mv.) Thermocouple temperature ranges cover from -400 to +3000°F. Minimum full scale movement from one thermocouple is 300°F. Thermistors and thermopiles are used for more sensitive ranges.

Model 451-C
Double Contact -100
to +400°F. — \$64.00

Environmental:

Typical ruggedized-sealed meter-relays will meet these specs:
Shock: 1 and 3-foot drops, 400 lb. hammer, 3 planes.
Vibration: MIL-M-10304A.

Salt Spray: QQ-M-151A.
Temp.: -30°/+70° C.
Sealing: MIL-M-6A.

Accuracy:

Point of contact: 1/4% to 1%.
Indicating: ±2% of full scale at any point of dial. Can be 1% on request. Thermistor compensation can be supplied for ambient variation of 0 to 140°F.

Contacts:

Rating: Standard is 5-25 milliamperes at 75-125 volts DC. Can be to 100 milliamps at 6-125 Volts DC.
Arrangement: High Limit (makes on increase of signal), Low Limit (makes on decrease of signal), Double (both high and low contacts)
Life: 10 to 20 million operations.

TRANSFORMERS FOR MILITARY & INDUSTRIAL APPLICATIONS

Manufacturers of Transformers since 1930

SPECIALLY TREATED TRANSFORMERS

For those innumerable transformer applications in electronic equipment where size, weight and resistance to various atmospheric and temperature conditions are the determining factors, ITC can encapsulate or mold to meet practically any specified condition. This can be accomplished without any deviation in transformer performance due to special ITC techniques and materials. Special ITC test equipment can simulate temperature, humidity and atmospheric conditions thereby permitting transformer testing under identical operating conditions. ITC specially treated transformers have been "use-proven" in the field under rigid MIL-T-27A specifications.

HIGH TEMPERATURE TRANSFORMERS

Constant technological developments in the electronic industry, primarily in the area of military defense, are rapidly increasing the applications for reliable, high temperature transformers. ITC has accumulated much data and experience in the design, fabrication and testing of these transformers to meet rigid Military Specifications.

Transformers have been constructed using practically every high temperature material that has been available in the last decade to insure transformer reliability and performance in the field. ITC's work on high temperature transformers has met with

complete acceptance by both government and industry . . . you can put their "know-how" to work with confidence on high temperature transformer applications.

PULSE TRANSFORMERS

ITC's design file includes pulse transformers varying in size from the subminiature molded types used for blocking oscillator and low power matching purposes to high power pulse output transformers feeding magnetron loads.

ITC engineers have produced a great variety of pulse transformer designed for a wide range of specialized electronic equipment and as a result are considered outstanding specialists in this field. This, coupled with their many other design specialties, points out the versatility of design and manufacturing facilities available at ITC.

COMPUTER TRANSFORMERS

ITC engineers have, for several years, devoted considerable time in developing precision transformers for computer applications. These transformers have found complete acceptance among the outstanding computer manufacturers.

Illustrated are some examples of computer precision transformers typical of the engineering skill and resourcefulness gained as a result of constantly working to rigid technical requirements demanded in computer components.

HIGH VOLTAGE RF TYPE POWER SUPPLIES

MODEL 2040 40 KV DC POWER SUPPLY

A ruggedly built RF type power supply which is in constant use in laboratories and industrial plants throughout the world for condenser charging, electrostatic spraying and stress testing, etc. In wide use for spot knocking by TV tube manufacturers. Nothing finer available at five times the price. Designed for constant use and will stand severe abuse. Available with either positive or negative 40 KV output. Voltage range of approx. 15 to 40 KV. The 15 to 40 KV variance in voltage is controlled through a knob on the front panel. If required for TV use, a voltage output of approx. 4 to 6 KV is available through a tap. Voltages supplied through a 4 ft. HV Safety Cable. Specify desired polarity when ordering. 19 1/2" wide x 12 1/4" high x 13" deep.

\$136.90 Net
With HV meter installed in front panel.....\$50 additional

MODEL PN-30R REVERSIBLE POLARITY CONTINUOUSLY VARIABLE 1-30 KV UNREGULATED DC POWER SUPPLY

A light, compact unit in wide use for insulation testing, precipitators and laboratory research. Polarity reversible from front panel. Current output—approx. 2 milliamperes at 20 KV; 250 microamperes at 30 KV. Input—110V AC 60 cycles. Dimensions: 19" x 12 1/4" x 13"**\$205 Net**
With meter installed on front panel.....**\$50 additional**

MODEL PN-60 REVERSIBLE POLARITY RF TYPE DC POWER SUPPLY

Polarity changes made on front panel. Continuously variable from 0 KV to 60 KV. Current output 1 milliampere at 60 KV. Overall Dimensions 22 1/2" x 21" x 15". Ideal for electrostatic paint spraying, capacitor charging and testing as well as many other uses.

PN-60 Complete with Meter \$675.00 Net

MODEL 4575 4 1/2 KV POWER SUPPLY

This compact, well designed, ruggedly built DC supply utilizes two 6AQ5 tubes as a parallel oscillator feeding a 1X2 rectifier tube. For an output voltage of 4 1/2 KV DC at 1 milliampere, the low voltage input requirement is 250 V at 50 milliamperes. By varying the DC input the output voltage can be varied from approx. 1 KV to 7 1/2 KV. Dimensions: 5 5/8" high x 5" deep x 4 1/4" wide. In completely enclosed metal housing (not shown). Less low voltage DC supply.....**\$32.50 Net**

MODEL LAB-30PN • REVERSIBLE POLARITY—Continuously Variable 1 to 30 KV

Regulated DC Power Supply with regulations of 0.5% at 1 milliampere. Although rated at 1 ma. this unit is capable of 2 ma. operation within regulation specifications. This 16 tube unit is of the RF type consisting of a separate oscillator and buffer feeding the power oscillator into a doubler rectifier. Regulations accomplished through feed-back into a DC amplifier plus simultaneous output control of the buffer. Polarity reversible from front panel. Standard Rack Model—19" wide x 12" high x 13" deep. Standard Bench Model—21" wide x 14" high x 15" deep.

With Meter \$670 Net—Less Meter \$595 Net

MODEL LAB-30 is a positive polarity output regulated High Voltage DC Power Supply with same electrical characteristics and dimensions as the LAB-30PN. Available in either positive or negative polarity.

With Meter \$570 Net—Less Meter \$495 Net

MODEL LAB-40 CONTINUOUSLY VARIABLE REGULATED 25 TO 40 KV DC POWER SUPPLY

Unit has a 4 to 6 KV focus tap for use with flying spot kinescope recording tubes, etc. Regulations of 0.5% at 1 milliampere. Available either with locking controls or standard knob. 19 1/2" wide x 12 1/4" high x 15" deep.

With meter \$620 Net

Less Meter \$545 Net

MODEL LAB-60 CONTINUOUSLY VARIABLE REGULATED DC POWER SUPPLY

0-60 KV at 1 ma. regulated. 2 ma. may be drawn from 45 KV to 0. 21 3/4" wide x 22 3/4" high x 15 1/4" deep.

LAB-60 Complete with meter\$695.00 Net

MODEL RG-30 Continuously Variable 15-30 KV Regulated DC Power Supply With Regulated Focus Voltage Tap

A high grade supply which incorporates a voltage tap in the range of 4 to 6 KV for use with 5WP15, 5TP4 and flying spot tubes. Regulations better than .5% at 1 milliampere. In wide use for color tube development work, transcription recording systems. 19" wide x 12" high x 13" deep.

\$295 Net
With meter installed on front panel.....\$50 additional

 Secondary Current . 2 Milliampers
 Approx. Frequency 175 KC
\$12 Net

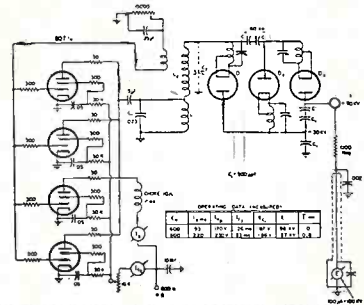

L4, L5, L6 are Spellman RF Filament Transformers

35 KV

Secondary eight 7"
 Secondary Windings 3" dia.
 Consisting of 10 Pie Windings
 Primary (separate from secondary)
 Height 4"
 Diameter 4 1/4"
 Secondary Voltage Output . . 35 KV
 Secondary Current . 5 Milliampers
 Approx. Frequency 70 KC
42.00 Net
25KV—Same as 35 KV except
 Secondary Height 6"
\$36.00 Net

D1, D2 and D3 are RCA type 5825 tubes.

RF FILAMENT TRANSFORMERS

A self-resonant auto transformer for use with type 1B3 Rectifier tube. Will operate with Spellman HV coils **\$1.50**
TUNING PADDER for Filament Transformer **0.58**

MODEL 7512 7 1/2 KV POWER SUPPLY

Model 7512 is an RF type power supply with a voltage output of approx. 7.5 to 12 KV. 1 ma. of current may be drawn throughout the voltage range. To obtain an output voltage of 7.5 KV at 1 ma., low voltage input requirement is 300 V DC at 50 ma. By varying the DC input, the output voltage can be increased. Maximum input voltage of 425 V at 100 ma. will give an output of 12 KV at 1 ma. 5 3/4" wide x 8 1/4" high x 6 3/4" deep. **Net price \$42.50**

MODEL 100

TWO SECTION 100,000 VOLT DC POWER SUPPLY

This constant duty supply is constructed in accordance with the highest electrical standards.

Voltage Range: 0 to 100,000 V DC—Current Output: 10 milliamperes
 —Available in both positive and negative polarities

SAFETY FEATURES:

- Automatic output voltage starting mechanism that reduces the output voltage to zero.
- Zero start interlock ensuring zero output voltage upon initial application of high voltage to load.
- Series resistance in output circuit, limiting initial short circuit surges available from power supply.
- Automatic high voltage cut-off in the event of any external arcing.
- Unit incorporates many other safety and protective features not listed. SEND FOR FULL ENGINEERING SPECIFICATIONS.

SPELLMAN TELEVISION CO., INC. 3029 WEBSTER AVENUE

WILBUR B. DRIVER

For Wilbur B. Driver engineers are resistance alloy specialists. Over the last 25 years, the laboratories and production divisions have encountered, and solved, many unusual and difficult applications involving the use of electrical, electronic, mechanical and chemical alloys. This broad experience is available to assist you in working out your designs and specifications. Why not contact a Wilbur B. Driver sales engineer for assistance on special alloys, today!

WIRE, ROD, RIBBON and STRIP

All forms of resistance alloys available for all applications in the electrical and electronic fields. Insulations to specifications including enamel, cotton, silk, nylon and glass.

1. RATE GYROS. Doelcam K, JR, and Gnat rate measuring gyroscopes combine extreme ruggedness with high precision in applications where accuracy and superior dynamic response are essential. They are proven components in many missile homing, fire control and autopilot systems.

Write for Gyro Bulletin-7

2. LOW LEVEL D-C AMPLIFIERS. Doelcam D-C Amplifiers excel in linearity and stability in proportionally amplifying low level d-c voltages for measurement and control applications. Isolated input and wide-band response, outstanding features of all Doelcam D-C Amplifiers, are achieved by use of the exclusive Doelcam Second Harmonic Magnetic Converter as the input modulator instead of a mechanical chopper.

Write for Amplifier Bulletin-7

3. 400-CYCLE SERVO MOTORS. The extremely high torque-to-inertia ratio of Doelcam servo motors provides the fast dynamic response required in high performance servo systems. These servo motors comply with the rigid specifications of MIL-S-17087. They are available with internally or externally threaded gear pinion shafts. Doelcam servo motors can be equipped with gear heads to meet customer requirements.

Write for Servo Motor Bulletin-7

4. SYNCHROS. (115 volt, 400 or 60 cycle) Doelcam synchros are proven components in numerous military servo systems. Their accuracy, reliability, and over-all performance characteristics are guaranteed to equal or surpass the stringent requirements of MIL-S-16892, FXS-1066, MIL-S-12472, and MIL-S-17245. All types are available with either splined or keyed shafts.

Write for Synchro Bulletin-7

Dynamic Recording Systems

Galvanometers

Bridge Balance Unit

401 Portable Oscillograph

Amplifier Systems

700-C Oscillographs

Galvanometers—subminiature and solid frame. Maximum stability and sensitivity; natural frequencies from 40 to 4000 cps; frequency response from 0-3000 cps. For details on solid frame galvos, write for Bulletin 201; for sub-miniature, Bulletin 301.

Model 700-C Recording Oscillographs—up to 60 channels; paper speed 0.03 through 144"/sec. AC or DC operation. Operates from one surface. Relay rack, table or mobile mounting. Write for Bulletin 701.

Model 401 Portable Oscillograph—1 to 6 channels on a 2" record. Standard record speeds 3, 6 or 12"/sec., with others available. Powered by 8, 12 or 24 volt DC or 115 volt, 50 to 400 cycle AC. Write for Bulletin 401.

Model 82-6 six-channel Bridge Balance and Strain Indicator—allows simple, accurate balancing, calibrating and measuring of static and dynamic phenomena for oscillograph recording. Write for Bulletin 801.

Model 119 Carrier or Linear/Integrate Amplifier Systems—Accurate, highly stable. For resistive, self-generating and differential transformer type transducers. Write for Bulletin 101.

Honeywell Instrumentation

for the electronics industry

BROWN INSTRUMENTS

For measuring, recording and controlling temperature, pressure, flow, liquid level and many other variables. The line of *ElectroniK* potentiometers includes special models for research work . . . such as the Function Plotter, Duplex Function Plotter, Extended Range Recorder, 1/4-second Pen Speed Recorder, Adjustable Span Recorder, High Impedance Recorder, and Brown-Rubicon Precision Indicator. See Catalog 1561.

THE *ElectroniK* NULL INDICATOR

the modern successor to the galvanometer, is ideal for either lab or production work. Resists vibration, responds quickly, takes heavy overloads without "loss of spot." See Data Sheet 10.0-12.

BROWN SERVO COMPONENTS

Amplifiers, motors, converters

Proved in thousands of *ElectroniK* instruments, these components are available as individual units. For remote positioners, null balance circuits, analog computers, coordinate translators, servo loops. Order in small quantities for prototype development, or by the thousands for production use. Write for Data Sheets.

SPECIAL AMPLIFIERS FOR NUCLEAR REACTOR CONTROL

Designed by Honeywell's staff of nuclear instrumentation engineers. Standard models include A1A wide band pulse pre-amplifier . . . A1D linear pulse amplifier . . . log count rate amplifier . . . low-level period amplifier . . . Log N and period amplifier . . . Safety amplifier with two ion chamber inputs, and power for four magnets.

THESE INSTRUMENTS and components can fill scores of measurement, control and servo applications in your research and production work. Honeywell's worldwide engineering and service organization can give you valuable help in applying these products. Call your local Honeywell office today . . . it's as near as your phone.

BULOVA

CRYSTALS

The crystals shown are typical of a family of products which include quartz crystal delay lines, special crystal ovens and assemblies and over a hundred basic crystal units. Write for new catalog.

AB-200 CRYSTAL OVEN

Hermetically sealed thermostat • Miniature size • Rapid warmup • Single thermostat control • Built-in spark filter • Rugged construction • Low power requirements • Long life.

INSTRUMENTS

The instruments shown illustrate specific products developed and instrumentation skills and techniques inherent in Bulova. Write for data sheets.

ULTRA-HIGH-SPEED SPIN RIG

World's fastest electrically powered centrifugal force test instrument. Widely used in the evaluation of spin-operated fuze mechanisms, rotational analysis and ultracentrifuging.

AUTOMATION • ALTIMETERS • GYROSCOPES • FUZES • GUIDED MISSILE COMPONENTS • CAM

A CREATIVE NEW FORCE IN RESEARCH, DEVELOPMENT AND PRECISION PRODUCTION

Something has been going on at Bulova that you should know about.

The talents of the world's foremost precision manufacturer are being applied to the research, development and production of electronic, electro-mechanical and mechanical systems and equipment.

What does this mean to you? Simply that you now have a source of *creative* engineering available to you. In many ways, it is unique.

Bulova Watch Company has as its most valuable asset an outstanding group of engineers

and skilled craftsmen, to whom micro-miniaturization is almost a way of life, to whom tolerances as small as 4/1,000,000 of an inch are commonplace. It has taken over half a century to assemble and train these men.

Their skills—coupled with the imaginative concepts of Bulova Research and Development Laboratories—form a most efficient combination. This unique relationship has already borne fruit in many exciting new products.

But the present only foreshadows the future. Watch Bulova—"Frontier for precision engineering and production!"

AT BULOVA, THE ACCENT IS ON CREATIVITY! To learn more about what has been going on, write today for a full report. Department of Government and Industrial Sales, Bulova Watch Company, Inc., 62-10 Woodside Avenue, Woodside 77, N. Y.

**GA-100
100 KC CRYSTAL UNIT**

Glass enclosed evacuated unit • Temperature coefficient of frequency which is less than 2×10^{-7} Per Degree C over a relatively wide temperature range • Used as frequency standards.

TYPE 73

Optional turnover point from 0°C to +75°C for minimum frequency deviation with oven control • Frequency range is 10 KC thru 100 KC • Conforms to Mil C-3098B.

TYPE ST 70X

Shock mounted crystal unit. Frequency range — 200 KC thru 500 KC • Hermetically sealed miniature holder • Frequency excursion as low as .001% over a 30°C temperature range • Meets all latest missile requirements.

AUTOSTROBE

Automatically programs stroboscopic equipment so that rotational motion is "arrested" at speeds up to and in excess of 130,000 rpm.

MAGNETIC MATERIALS ANALYZER

Employing a unique method for measurement of hysteresis and eddy current losses, this instrument provides for the direct determination and visual indication of EDDY CURRENT LOSS AND HYSTERESIS.

TORQUEMETER MODEL 40

A calibrated torque source, ideally suited for testing torque characteristics of fractional horsepower motors, small clutches, torsion springs, servo motors and similar devices.

SYSTEMS • CAMERA APERTURE CONTROLS • TIMING DEVICES • INFRA-RED SENSING DEVICES

VARIPHASE OSCILLATOR

Self contained oscillator provides two signal outputs. Phase Difference dial provides any phase angle between them.

Frequency Range 0.2 cps-20 kc
Phase Range 0-360°
Phase Accuracy ± 2°
Output Power 100 mw
Distortion below 1%

MULTIPAC

High precision AC voltmeter and Milliammeter. Accuracy better than 1/2 of 1% on all ranges. Protected Meter cannot be overloaded.

Volts Range 0-0.5 to 2000
Ma. Range 0-5 to 2000
Frequency Range 25-1000 cps
Calibration True RMS
No. of Ranges 21

GERMANIUM DIODE TESTER

Quickly determines backward and forward resistance of various diodes. Reads directly in ohms; eliminates calculations. Small portable case, easy to carry about.

Test Volts + 1 to -100
Accuracy ± 5%
Ohms range 50-500
100 K-1 meg
Total weight 9 pounds

METER TEST SET

Accurately tests and calibrates all military panel meters, AC & DC, and commercial equivalents. Tests Multimeters and VTVM's. 1/4 of 1% error. Precision meters cannot be overloaded.

Volts Range 0-1 to 2000
Current Range 0-100 ua to 100A
No. of Ranges 41

DC SYNCROSCOPE

A wide range 'scope with identical X and Y amplifiers. Triggered sweep. Separate AC and DC inputs. Voltage regulation for critical circuits. Standard rack mounting.

Freq. Range Flat DC to 5 mc
CR Tube 5ADP7
Accel. Volts. 3000

DECADE RESISTOR

For obtaining known values of resistance with high accuracy. No bigger than a book, yet ranges from 1/10 ohm to over 100 megohms. Maximum error is 0.1% on most ranges. Rugged molded case.

Ohms range—0.1 ohm to 111 megohm
No. of decades Nine
Total Weight 2 pounds

MAGNET CHARGER

For initial charging of new magnets or restoring charge in magnets gone soft. Puts 40,000 amperes through built-in charging bar. No dangerous potentials on exposed surfaces.

Discharge Time002 Sec.
Duty Period Constant Duty
Total Weight 90 pounds

DUAL DC AMPLIFIER

Contains two independent amplifiers for driving pen motor oscillographs. Adjustments produce flat response DC to 100 cps. Matches all makes of recorders.

Drift Less than 1/5 mm/hr
Sensitivity 10mv. Max.
Frequency Range DC to 30 kc

DC AMPLIFIER BOOSTER

Companion equipment to the Dual DC Amplifier. Provides high current output for operating photographic oscillographs. The high stability and gain of the DC Amplifier is retained.

Freq. Range DC to 30 kc
Sensitivity 10 mv max.
Output Cur. up to 100 ma.

VIBRATION METER

Used by the Air Force to test jet engines. Applicable to all types of engines and machines. Measures velocity and displacement within ± 4%. Adaptable to all makes of velocity pickups.

Displ. Range 0-3 to 100 mils
Velocity Range 0-3 to 100 in/sec
Filters 30, 70, 110 cps

ELECTRONIC SWITCH

Changes an ordinary 'scope into a modern dual beam job. Also operates as a square wave generator and a "chopper" for sending DC signals through AC Amplifiers.

Freq. Response 0-5 kc
Switching Rate 10-2 kc
Gain 10

New! 200, 400, 800 MA SERIES
SAVE PANEL SPACE!

New! HERMETICALLY SEALED
TRANSFORMERS!

New! TRANSIENT-FREE!

These new, compact, regulated Lambda D.C. power supplies are precision engineered, designed to displace minimum panel space. Wiring and tubes are easily accessible for maintenance and replacement. Hermetically-sealed transformers and chokes, protected from moisture, for long trouble-free service. Meters optional.

New! Fuse Failure Indicators

New! Service Accessibility

Send for new 1956 catalog. Complete specifications for all Lambda Power Supplies.

**LAMBDA 1.5 AMP
REGULATED D.C.
POWER SUPPLIES**

Versatile, heavy duty component power supplies for original equipment

Lambda 1.5 ampere models are recommended as component power supplies for original equipment where heavy current is required: in laboratories; for experimental models and prototypes, computers, transmitters; and radio and television stations.

Available in three ranges — Wide, Intermediate, and Narrow. This series gives you the economy of standard production models and the adaptability and precision of engineering of custom units.

MODELS AND PRICES

WIDE RANGE MODELS: Voltage range is completely covered in 16 continuously variable bands. Each band range is 50 volts (± 25 volts).

1500 0-400 VDC 1530 W \$695*

INTERMEDIATE RANGE MODELS: Voltage range is completely covered in 4 continuously variable bands. Each band range is 50 volts (± 25 volts).

1510	0-125 VDC	980 W	\$595*
1511	25-150 VDC	1030 W	\$595*
1512	50-175 VDC	1080 W	\$615*

MODEL 71 (PORTABLE)

MODEL 71
0-500 VDC, 0-200 MA
\$289.50

Combining every good engineering feature with maximum compactness and portability, Model 71 has broad field and laboratory applications. Cannot be damaged by external overloads. All aluminum construction with time delay tube protection, AC and DC circuit protection.

MAGNETIC CIRCUIT BREAKERS • HEAVY DUTY • WEIGHS ONLY 49 LBS.

"500 MA" SERIES MODELS 50 AND 50R

MODEL 50	0-500 VDC, 0-500 MA	
	0-50, 0-200 VDC bias	\$415.00
MODEL 50R	0-500 VDC, 0-500 MA	
	0-50, 0-200 VDC bias	\$395.00

General purpose, heavy duty power supplies for bench use. Feature oil-filled and hermetically sealed capacitors, magnetic circuit breakers, Vernier high voltage adjustment and continuous output voltage, 0-500 V.

Cabinet Model 50 with rear access door and two carrying handles. Rack Model 50R intended for mounting in standard 19" rack, has ventilated dust cover.

HEAVY DUTY, PRECISION-ENGINEERED REGULATED POWER SUPPLIES

"100 MA" SERIES

MODELS 25 & 26 (PORTABLE)
28, 28M*, 29, 29M*

**COMPACT!
LOW COST!**

MODEL 25200-325 VDC, 0-100 MA..... \$64.50
MODEL 26100-200 VDC, 0-100 MA..... \$74.50

MODEL 28200-325 VDC, 0-100 MA..... \$57.50*
MODEL 29100-200 VDC, 0-100 MA..... \$67.50*

Supply both regulated voltages and unregulated AC for a variety of uses. Frequently employed for electronic equipment and many other applications requiring a source of stabilized DC voltage. Handy models for breadboard, production-line test positions, and other set-ups where speed, convenience, size, light weight and ease of handling are prime considerations. Basic equipment for every bench and test position.

* Metered models identified by letter "M", add \$30 to base price.

"300 MA" SERIES

MODELS 32, 32M*, 33, 33M*, 34, 34R, 35, 35R

Eight excellent supplies for intermediate power requirements. Oil-filled, hermetically sealed capacitors. Separate AC and DC switches. Models 34 and 35 offer panel controls and binding posts for convenient bench use. Models 34R and 35R are identical to models 34 and 35 except that they are not enclosed in cabinets and may be used for rack mounting.

OIL-FILLED, HERMETICALLY SEALED CAPACITORS
VACUUM-VARNISH IMPREGNATED TRANSFORMERS, CHOKES

MODEL 32200-325 VDC, 0-300 MA..... \$129.50*
MODEL 33100-200 VDC, 0-300 MA..... \$144.50*
MODEL 34200-325 VDC, 0-300 MA..... \$199.50
MODEL 34R200-325 VDC, 0-300 MA..... \$179.50
MODEL 35100-200 VDC, 0-300 MA..... \$214.50
MODEL 35R100-200 VDC, 0-300 MA..... \$194.50

* Metered models identified by letter "M", add \$30 to base price.

"600 MA" SERIES

MODELS 60, 60M*, 61, 61M*, 62, 62M*,
63, 63M*, 64, 64M*, 65, 65M*

Units in this series are designed primarily for industrial applications, based on continuous-duty operation at maximum ratings. Engineered by power supply specialists, they free your own staff from design and construction supervision, and are economical in cost.

MODEL 60345-405 VDC, 0-600 MA..... \$259.50*
MODEL 61295-355 VDC, 0-600 MA..... \$249.50*
MODEL 62245-305 VDC, 0-600 MA..... \$239.50*
MODEL 63195-255 VDC, 0-600 MA..... \$239.50*
MODEL 64100-200 VDC, 0-600 MA..... \$244.50*
MODEL 650-100 VDC, 50-600 MA..... \$249.50*

30 SECOND TIME DELAY RELAY CIRCUIT • LOW OUTPUT IMPEDANCE • LOW RIPPLE

* Metered models identified by letter "M", add \$30 to base price.

Condensed Check List of LAMBDA POWER SUPPLIES

GENERAL

SPECIFICATIONS

INPUT:

105-125 V, 50-60 C, single phase

DC OUTPUT:

Voltage Range: Continuously variable over ranges specified, except for Models 60, 61, 62, 63, 64, 65, 281, 282, 481, 482, 881 and 882. The voltage ranges for Models 60, 61, 62, 63, 64, 65, 281, 282, 481, 482, 881 and 882 are completely covered in four continuously variable segments.

Current Range: The current ranges given apply to the entire DC output voltage range, and for input voltages from 105 to 125 VAC. No "derating" is necessary.

Polarity: Either positive or negative terminal may be grounded.

AC OUTPUT:

The AC output is unregulated, isolated and ungrounded. It has a value of slightly higher than 6.3 V (when fully loaded) at an input of 115 VAC. This value allows for voltage drop in connecting leads. Dual outputs may be connected in series or parallel.

DUTY CYCLE:

Continuous duty at full load.

METERS:

Where meters are indicated, a separate voltmeter and milliammeter are provided.

OVERLOAD PROTECTION:

Ample protection is provided against external overload and internal failure conditions by means of fuses.

Circuit breakers of the magnetic, "trip-free" type are employed in Models 50, 50-R, 71 and "1500" series as protection against external overloads.

STYLE:

Rack Models are designed for mounting on standard 19" relay racks.

Bench Models are provided with compact, specially-designed, ventilated cabinets equipped with carrying handles. The power supply units may be removed from their cabinets for mounting in standard relay racks (except Models 25, 26 and 71).

RATINGS AND COMPONENTS:

All components used are of the highest quality and are operated well within manufacturers ratings. Hermetically-sealed, oil-filled capacitors are used exclusively. Ample safety factors are provided in the design to insure the long life, and the dependable, trouble-free operation so desirable in industrial and laboratory applications.

LAMBDA Electronics Corp.

THE FIRST NAME IN POWER SUPPLIES

11-11 131 STREET • COLLEGE POINT 56, NEW YORK • INDEPENDENCE 1-8500

New REAC 400 Series

- Building-block construction
- "Problem check" verification of solutions
- High Speed Servos
- Patchbay switching
- Simplified operation and maintenance

REAC analog computers

This "400" is the newest model of the famous REAC (Reeves Electronic Analog Computer). The new modular construction allows assembly of exactly the computer necessary to do a particular job or expand an existing installation. Problem check, a new Reeves development, permits verification of problem solutions before problem is run. New high speed servos and improved components facilitate high speed real time operation.

20 IG Integrating Gyro

Extremely low drift rate, high sensitivity

20 R.G. Rate Gyro

Small size. Fully floated construction.

precision GYROS

Single-degree-of-freedom, viscous damped. Features fully floated construction that reduces friction, yet provides extreme resistance to shock. Small size, high precision. Ideal for airborne or shipborne equipment for space stabilization, rate tracking control, or rate measurement.

R-600 Resolver

functional accuracy better than 0.05%.

R-150 Resolver

miniature version of R-600.

precision RESOLVERS

The highest precision resolvers commercially available. Small size makes them ideal for use as computing element in military and precision industrial electronic systems. Special wide band units are available for irregular wave shapes having rise times as low as one micro second. Units are built directly to required accuracy without selection or culling.

Series SR 6066

MAGNETIC CLUTCHES

High quality magnetic clutches for all control applications. Single and double-ended models, as well as combination that provides effective SPDT action. Standard and Miniature models, with or without crown tooth construction. Quick acting, high torque.

SERVO mechanical parts

Shaft hangers, shafts, precision gears, differentials, couplings, terminal blocks, limit stops, dial assemblies, etc. Easy mounting on convenient slotted plate. Changes easily made, parts re-usable. Tremendous time-saver in prototype work on servo and instrumentation systems.

Reeves Sub-contract Service: Our facilities are available to you for help on computing systems, gun fire control, and precision electronic systems of any kind. For complete information, contact Reeves Sub-contract Department.

ELECTRICAL - ELECTRONIC WIRE • CABLE INSULATING TUBING • IDENTIFICATION MARKERS

WIRE

HOOK-UP WIRE: Turbotherm plastic insulated wires manufactured by William Brand and Company are normally supplied uncovered. They can be furnished with textile overbraids, with extruded vinyl or nylon jackets, and with braided or spiral copper shields. Color coding is in accordance with RETMA or MIL-STD-104 requirements. One, two or three spiral stripes can be applied over base colors where necessary for positive circuit identification. Turbotherm wires are resistant to the effects of water, oils, aircraft engine fuels, hydraulic fluids ethylene glycol, dilute acids and alkalis. They remain flexible over a wide range of operating temperatures, have low surface leakage and permanent color retention.

Several types of hook-up wires are available to meet different requirements and specifications:

- A. Underwriters' Laboratories Approved for 80°, 90° and 105° C at 300, 600 and 1000 volt operation.
- B. C. S. A. Approved appliance wires for 80° and 90°C operation; radio and electronic wiring (types TR-64, TR-32, TRB-64 and TRB-32).
- C. MIL-W-76A — Types LW, MW, and HW for 300, 1000 and 2500 volt operation respectively at 80°C.
JAN-C-76 — Types WL, SRIR and SRHV for 600, 1000 and 2500 volts respectively at 80°C.
MIL-W-16878B — Types B, C and D for 600, 1000 and 3000 volts respectively at 100°C. Type F, a silicone rubber insulated wire available with or without glass overbraids for operation at 200°C.
- D. Turbo Instrument Wire: a thin-walled uncovered wire for use in low current, low voltage instruments such as high accuracy indicators, meters and servo-mechanisms. Turbotherm 80

instrument wire is recommended where a high value of insulation resistance is required; Turbotrans 105 instrument wire is recommended where varnish impregnation and high temperatures are encountered.

- E. Turbo Miniaturization Wire: a thin-walled plastic insulated wire with nylon jacket, specifically designed for equipment operating at temperatures from -55°C to +105°C. Ideal for use in miniaturized equipment both as hook-up wire and leads for transformers, chokes and other components where space is at a premium and operating temperatures are high. Insulation resistance values exceed 1000 volts per mil and dielectric strength exceeds 900 volts per mil. This wire is recommended for potting operations and varnish dipping and baking.
- F. High Voltage Leads: Two types are presently manufactured; an unjacketed flame-retardant polyethylene insulated wire, U/L approved for 10,000 and 20,000 volts D.C., and a vinyl jacketed polyethylene type made to individual specification.

CABLES

MULTI-CONDUCTOR CABLES: Precisely made to specification from any of the conductor types above, but including also, where required, coaxial cables. These cables can be furnished with exact positioning within the cable of individual coaxials, twisted pairs, triples or groups. Constructions are available using fillers, tapes, wraps, shields and jackets either over the entire cable or any portion of the cable.

TURBO TUBING AND SLEEVINGS

The many varieties of quality controlled, electrical insulating tubing manufactured by William Brand and Company fall into two general categories: coated tubings and extruded plastic tubings. Within each of these categories many types exist, each engineered to do a specific job.

- A. **COATED TUBING:** All coated tubings are available in standard AWG sizes from #20 to #0 inclusive and fractional sizes up to 1 1/2" I.D. Generally stocked in Black, these tubings are also available in Brown, Red, Orange, Yellow, Green and Blue. Tubings are supplied in five standard grades meeting applicable ASTM, NEMA and MIL specifications as shown below.

Grade Designation	Average Dielectric Strength
A-1	7000 volts
B-1	4000 volts
C-1	2500 volts
C-2	1500 volts
C-3	No dielectric guarantee

1. **Class A Tubing:** An excellent general purpose tubing with smooth inner surfaces to facilitate snaking and assembly. Turbo Varnished Tubing is a cotton or rayon braid impregnated with organic varnishes.

2. **Class B Tubing:** Turbofuf Tubing . . . a vinyl coated glass tubing with exceptional flexibility, abrasion resistance, dielectric properties and good heat endurance characteristics. Turbofuf is used extensively in electronic equipment as insulation over bare leads. Furnished in two grades: Turbofuf-8 and Turbofuf-4 with minimum dielectric strengths of 8,000 volts and 4,000 volts respectively.

3. **Class H Tubing:** The trend toward miniaturization has intensified heat problems within electronic apparatus and has created serious problems in soldering in close quarters without injury to conventional insulations. Turbosil silicone var-

nished glass tubing and Turbo 117 silicone rubber coated glass tubing have been used successfully to overcome these difficulties. These tubings retain their physical and electrical properties at temperatures of from -80°F to +500°F. Turbosil has great physical toughness and is abrasion and peel resistant. Turbo 117 is extremely flexible and retains its dielectric properties under severe mechanical stress. Both are chemically inert and furigous resistant.

- B. **EXTRUDED PLASTIC TUBING:** The various formulations of vinyl plastic tubings have been established to meet the wide range of Underwriters' Laboratories or military specification requirements. Tubings are available in standard AWG sizes #24 to #0 inclusive and in fractional sizes up to 2" I.D. Special sizes and wall thicknesses can be supplied to meet specific requirements. While generally stocked in Black and Transparent, all RETMA colors are available.

1. **High Temperature:** Turbotherm 105 and Turbotrans 105 are Underwriters' Laboratories approved for continuous operation at 105°C. Both combine high dielectric strength with optimum physical properties at elevated temperatures. Turbotrans 105, especially formulated to withstand potting and baking temperatures, will also meet the requirements of MIL-I-631B, Grade c.

2. **General Purpose:** Two types are available; Turbolex 85 recommended for applications where moderate heat may be encountered with occasional exposure to oil. It is adequate for most low temperature work. Turbolex 76, meeting the MIL-I-631B requirements for Grade a tubing is optically clear when unpigmented, and is fungus resistant.

COAXIAL CABLE

TURBO "RG" TYPE TRANSMISSION LINE CABLES are fabricated in exact accordance with the military specifications for this type of product. Continuous quality control testing during every phase of the manufacturing process insures a final product which will pass all requirements with ample safety margins.

TURBO "RG" TYPE TRANSMISSION LINES have high dielectric and high impulse strength, high resistance to corona cutting and low power loss. The typical cables are of standard design construction. The "A/U", "B/U" and "C/U" types are covered with low temperature type IIA non-contaminating vinyl jackets, as specified in JAN-C-17A Amendment 2 and MIL-C-17B. Others can be manufactured in accordance with this specification or in accordance with individual or special requirements.

TURBO IDENTIFICATION MARKERS

Turbo Identification Markers are manufactured from Turbo Varnished Tubing and Turbo Extruded Plastic Tubing of all types. This product will meet applicable Army-Navy and Air Force specifications. Their tubular form insures positive, permanent identification once applied and eliminates time-consuming, injurious crimping operations and the flammability of paper and similar devices.

Turbo Identification Markers are available in all standard sizes from #14 to 1 1/2" I.D. The extruded plastic type can also be furnished in special non-standard sizes. Markers are normally furnished in lengths of 3/8" to 4" inclusive, but longer lengths can be supplied on request.

Cramer

ELECTRICAL TIMING DEVICES SYNCHRONOUS MOTORS

SPECIALISTS IN TIME CONTROL

INTERVAL TIMERS

To control opening of one circuit, closing of another, for manually selected time interval. Acts as a highly accurate switch to control ON-OFF operations where duration of operation is variable.

◀ 230 . . . readily adjustable . . . automatic mixers, etc. Time Ranges: 15 sec. to 24 hrs.

◀ 210 . . . for built-in applications in micro-filing equipment, battery chargers, ovens, etc. Time Ranges: 15 sec. to 24 hrs.

▶ 241 . . . used in laboratory equipment, copying machines, etc., where process work demands repeat accuracy. Time Ranges: 15 to 120 sec.

TIME DELAY RELAYS

Fixed and adjustable types. Provides an accurate time delay between operation of a control circuit and subsequent closing or opening of load circuit.

◀ 310, 412, 422 . . . adjustable, for process controls and automatic equipment. Time Ranges: 6 sec. to 24 hrs.

◀ 330 . . . provides time relay for protection of high voltage electronic tubes, control of machines or processes. Time Ranges: 20 to 80 sec.

▶ 440A . . . for machine tools, sterilizers, etc., where shock and vibration are important considerations. Time Ranges: 30 sec. to 60 min.

CYCLING TIMERS

Program, percentage, pulse timers — repeat a definite time cycle or sequence continuously. Two main types: (a) where cycle is fixed (switch operation fixed or adjustable); (b) total cycle is variable (switch operation fixed).

◀ 510, 520 . . . fixed type, up to 8 load circuits . . . dishwashers, signals, etc.

◀ 610 . . . establishes or interrupts circuit for percentage of time period. For furnaces, blowers, pumps, etc. Time Ranges: 15 sec. to 24 hrs.

▶ 650 . . . a pulse timer applied where total time cycle must be readily variable; e.g., conveyors, sludge pumps, signal systems. Time Ranges: 15 sec. to 24 hrs.

HERMETICALLY SEALED UNITS

Line includes time delay relays, cycling timers or intervalometers, and circuit reclosing relays or time-limiting devices. Meet stringent military specifications for radio, radar, fire control applications. Every timer tested before shipment.

◀ 430H . . . miniature time delay relay. Time Ranges: 30 sec. to 30 min.

◀ 670H . . . circuit reclosing relay — automatically restores service due to overload faults, provides circuit and equipment protection, etc. AC or DC.

▶ 440H . . . in standard or reverse clutch designs, relay equipped with one or two heavy-duty load switches. Time Ranges: 30 sec. to 60 min.

TIME TOTALIZERS

For use wherever time must be accurately measured and accumulated. Applied to forecast need for servicing and repair, check operating characteristics of any circuit, machine or system.

◀ 690 . . . time totalizer for laboratory testing, etc. Time Ranges: 60 sec. and 60 min.

◀ 631E . . . Running time meter registers either tenths of minutes and hours, or minutes and hours. Precision-built 5-digit counter.

▶ 640E . . . with reset feature on dial. Registers hundredths of minutes and hours; tenths of seconds, minutes and hours; seconds, minutes and hours.

SYNCHRONOUS MOTORS

Complete line of standard timing motors, clutch-unit and dual motors. For instrument and control applications. Truly synchronous. High torque, 30 in. oz. at 1 r.p.m. Runs in any position. Highly dependable and accurate.

◀ 112 . . . available in many speeds from 1 r.p.s. to 1 r.p.d. with various output shafts.

Write for descriptive literature on specific timers, or for General Bulletin GB-905. Cramer sales engineers will gladly discuss special application problems on request.

WE MAKE THE KIND OF TRANSFORMERS YOU NEED

If you buy transformers on a "quality foremost" basis, then you should be interested in the advantages of having Acme Electric produce the transformers you need.

If you need engineering help with a design, we have a staff of qualified engineers to assist you. If you need quantity production quickly, we have every modern facility and carry large stocks of basic supplies to ship your production requirements as your needs demand. And, with our modern production equipment, experienced assemblers, we quote prices that are usually competitive.

MINIATURE PULSE TRANSFORMERS

Miniature Pulse transformers can be supplied to your exact electrical characteristics in a variety of mounting designs. Our facilities permit quantity production of uniform high quality performance.

FOR DEPENDABLE PERFORMANCE

Why not find out what Acme Electric can do for you. Write for a copy of our Facilities Handbook.

FROM GUIDED MISSILES TO ATOMIC SUBMARINES... FILTRON PROVIDES EXACTLY THE FILTER THEY NEED

From the best equipped Radio Interference Laboratories in the world—staffed with the most experienced Radio Interference Engineers, tomorrow's electric and electronic components and systems are made "Radio Interference Free" today.

FILTRON's exceptional facilities are available for the Radio Interference testing AND filtering of your equipment to meet Military Radio Interference Specifications.

Combining engineering facilities, application experience, and manufacturing ability, Filtron competently handles RF interference problems from start to finish.

FILTRON's four plants, with complete production facilities—capacitor manufacturing, coil winding, metal fabricating and stamping, tool and die department, assembly division—are producing more RF interference filters than ever before.

FILTRON—the most dependable name in RF Interference Filters—is the choice of engineers, manufacturers, and military and commercial laboratories the world over.

Will these Components Solve a Problem?

FORK OSCILLATORS

for the most precise timing and frequency control
FEATURES

In Audio Frequency systems, the fork has advantages over other types of oscillators including crystals.

- **INTRINSIC STABILITY**— superior at audio frequencies.
- **TEMPERATURE COMPENSATED**
- **RUGGED MECHANICAL DESIGN**
- **STABILITY NOT DEPENDENT ON AMPLIFIER COMPONENTS** (in recommended circuits)
- **STABLE OPERATION WITHIN 5 MINUTES**
- **LOW AGING RATE**

SPECIFICATIONS frequency stability

- a. ± 3 ppm room ambient (no oven)
- b. ± 1 ppm after temperature equilibrium is attained $\pm 5^\circ\text{C}$
- c. Long term drift less than 5ppm per annum after first 3 months.

SYNCHRONOUS MOTORS

Wherever highly constant angular velocity at approximately 1/100 H.P. is desired, these motors, in combination with a suitable control frequency source, will give excellent performance. Motors will operate on control frequencies from 200-2500 CPS.

FEATURES

The model KBA is a self-contained synchronous motor with integral start motor and reduction gear box permitting a choice of 30:1 or 20:1 reduction. Provision is made for a fast acting clutch and phasing (indexing) magnet as accessories.

KBA integral start motor

The motor speed range is 400 RPM to 5000 RPM.

TUBE CLAMPS TOP HAT

RETAINERS FOR PLUG-IN COMPONENTS

An improved clamp for securing electron tubes, relays, capacitors and other pluggable parts.

POSITIVE Component even when inverted will not loosen under the most severe shock or vibration.

RESILIENT Positive retention is achieved with minimum rigidity or strain on component.

ACCESSIBLE Clamp fits on top of component and can be fastened or released easily without tools.

CORROSION RESISTANT Hats and Posts are stainless steel. All materials and finishes comply with Armed Forces Specifications.

MS-2 SYNCHRONOUS MOTOR

CONSTANT ANGULAR ROTATION FOR PRECISE SPEED CONTROL!

A phonic wheel type motor capable of operating from vacuum tube amplifiers on signal frequencies from 60 to 4000 cps. It was designed to provide the extremely accurate and invariable speed required for driving fork-synchronized facsimile equipment. Its unique characteristics will be found the answer to many problems involving the need for constant angular rotation or precise synchronization.

The Model MS-2 Motor can be operated single phase in the plate circuit of a single-ended amplifier or as a two-phase motor when driven by a push-pull amplifier. The latter is recommended since the two-phase connection runs quieter and provides more power with less heating. The motor current is about 75 milliamperes per phase. The power input may be as high as 20 watts.

Complete information and prices will be mailed promptly on request.

NOTES

*RADIUS shown is maximum size of shaft or housing fillet that bearing will clear.
 **TOLERANCES shown are ABEC 5 or better. Bearings can also be supplied to ABEC 7. The tolerance on width is for individual rings only.
 †MATERIAL is Type 440 C stainless steel. Unshielded bearings (Figures 1 and 2 only) can be supplied in SAE 52100 chrome steel at same prices.
 ‡LOAD CALCULATIONS — Use C Rating and nomograph in our catalog. For chrome steel (Figures 1 and 2 only) multiply C by 1.2.
 ††WIDTHS shown have been accepted as standard by the AFBMA for SINGLE or DOUBLE shields.
 ††SFR133 has fillet (.005 max. radius) instead of undercut.

HOW TO ORDER

Use bearing numbers shown. For single shield (Figures 3 and 4) use the following suffixes instead of PP:
 Figure 3, suffix P1 — Shield on side opposite flange.
 Figure 4, suffix P2 — Shield on side opposite flange.

- In all cases, the following should be specified:
1. Radial Play (see our catalog).
 2. Lubrication (see our catalog).
 3. The following should be specified only if they are essential to the application:
 a. Coding (see our catalog).
 4. ABEC 7 tolerances (see our catalog).
 5. Other special specifications should be checked with the Plant before ordering.

MICROWAVE SPECTRUM ANALYZERS

Model SA25

800 mc/s to 10,250 mc/s
on fundamentals
K-Band Coverage
to 40,000 mc/s

Plus these features

- Frequency accuracy to 0.05%
- Stable low noise 20 kc bandwidth double conversion IF amplifier
- Amplified transmission wavemeters
- Improved power-response display
- Choice of 2-20 or 6-60 cps sweep
- Fully regulated power supplies
- Simple, reliable, proven circuitry

New single unit K-Band Heads
for use with SA25 or SA30

- 27K1 for 12.7 — 18.0 kmc/s
- 27K2 for 18.0 — 26.5 kmc/s
- 27KQ1 for 34.0 — 40.0 kmc/s

new
Model SA30

... has the features
of Model SA25 plus
many new developments.

- New IF Strip with modified cascode input
- New Image Check permits direct frequency calibration
- New Simplified Control panel speeds operation
- New Frequency Difference Control for direct incremental measurements 100 kc/s to 5 mc/s
- New Brightness Controls for signal and baseline
- New Dual Unit for rack mounting or portable 80 pound bench top "package"
- New Independent Power Supply for display; klystron power supply includes D.C. filament operation

COMING — NEW WIDE RANGE RF HEAD —
30WR1 — 2000 mc/s to 12,000 mc/s

Interchangeable R.F. Heads for use with SA25 or SA30

VARIABLE FREQUENCY POWER SUPPLIES

For testing electronic and electrical equipment

For powering vibrators and choppers

For controlling synchronous motors

New design features provide a wider range of applications for this unit. Operating on 105 to 130 volts AC single phase and having no rotating parts, the VFS-250-A requires no filters to prevent interference. It provides up to 300 VA at 0-130 volts, 45 to 200 cycles.

CONTRACT MANUFACTURING

Precision Components

Vectron Potentiometers, manufactured to your specifications, provide performance, uniformity and linearity which fully meet your specification requirements. Close tolerances, mechanical and electrical, are the result of long experience. Write for further information.

Precision Assemblies

Electro-mechanical, mechanical and electronic equipment to your specifications and standards.

Vectron's Manufacturing Division offers complete facilities for the manufacture, on contract or sub-contract, of components, sub-assemblies or complete products. If needed, our Engineering Division can develop and prototype your product idea.

Write for literature and information on the products or services in which you are interested.

SKL

PRECISION INSTRUMENTS FOR YOUR MEASUREMENT PROBLEMS

• QUALITY • ACCURACY • EASE OF OPERATION

VARIABLE PRECISION FILTERS: SERIES 300

The 300 single section and 302 dual section models are designed to have responses identical to constant k-pi section filters. The attenuation in the rejection band per section is 18 db per octave, or maximum 36 db attenuation for the Model 302.

MODEL	FUNCTION	CUT-OFF FREQUENCY RANGE	ACCURACY
300	Hi or low pass	20 cps to 200 kc	±3%, 20 cps to 20 kc ±5%, 20 kc to 200 kc
302	Band pass & rejection	20 cps to 200 kc	"

The Series 300 Variable Electronic Filters were developed to meet the problems of inflexibility and expense inherent in conventional multi-frequency filters. Where the fixed filter made for a specific application becomes useless for any other need, the SKL Variable Electronic Filter serves to fulfill broad and diversified laboratory requirements.

Its continuous range of cutoff frequency and its ability to produce band-pass and band-rejection characteristics with independent control of the upper and lower cutoff frequencies are valuable in many applications. Its infinite-rejection connection suggests a further variety of uses.

As a low-pass filter, it provides the only convenient way for reducing the harmonic content of variable-frequency oscillators. It is likewise ideal for modifying the waveform of a complex signal.

When used as a low-pass, high-pass, band-pass or band-

elimination filter, it permits the selection of certain components of the signal for measurement and analysis, while rejecting other components. For the first time, it is possible to eliminate a variable-frequency interfering signal.

When used either low-pass or high-pass, it permits continuous adjustment of phase shift for components within its pass band.

As frequency meters, SKL Variable Electronic Filters meet many applications in determining the frequency or spectrum width of unknown signals.

The ability to set the cutoff frequency as low as 20 cycles per second, either low-pass or high-pass, makes the SKL Filters well suited to physiological, geophysical, electro-medical and seismological work. With the cutoff frequency placed as high as 200,000 cycles per second, the instrument becomes adaptable to sonic and supersonic research applications.

WIDE-BAND CHAIN AMPLIFIERS: SERIES 200

Broad bandwidth, short rise time, stable gain, and linear phase shift make SKL Chain Amplifiers

ideal for amplifying either continuous wave signals or pulses. Each model comes complete with a regulated power supply.

MODEL	BANDWIDTH	GAIN	APPLICATIONS
202D	1 kc - 210 mc	20 db	Pre-amplifier
214B	200 cps - 90 mc	30 db	Pulse Amplifier for C.R.T.
211	15 mc - 110 mc	33 db	TV Distribution Systems
212C	54 mc - 216 mc	20 db	TV Distribution Systems

504 SQUARE WAVE GENERATOR

A rise time of .05 microseconds and a wave form without tilt or overshoot characterize the performance of this moderately priced instrument. The Model 504 Square Wave Generator has a frequency range from 0.5 cps to 1 mc in eight steps. The output voltage is continuously variable from 0 to 10 volts peak to peak. The unit comes complete with its own regulated power supply.

503 PULSE GENERATOR

Provides a rectangular pulse shape with a rise time of less than 1 millimicrosecond. Pulse width is varied by changing length of external cable; minimum pulse width less than 1 millimicrosecond while maximum pulse width is unrestricted. Pulse repetition rate is variable from 50 to 150 pps. The pulse output voltage is continuously variable up to 150 volts; either positive or negative. Output impedance is 50 ohms. The Model 503 Fast Rise Pulse Generator is a convenient instrument for testing the response of any wide-band network.

VHF transistors NOW!

**NEW 'GROWN-DIFFUSED'
TYPES COMMERCIALY
AVAILABLE IN
PRODUCTION QUANTITIES**

HIGH GAIN VHF TRANSISTORS with usable power levels and band widths are now immediately available from Texas Instruments . . . another first for the leading producer of silicon and germanium transistors. Your design horizons are now extended to include all-transistor TV, FM, and VHF receivers . . . and transistorized amplifier, oscillator, or switching applications in communications, telemetering, or radar.

NEW VHF GERMANIUM TRANSISTOR

OSCILLATING FREQUENCY IS ABOVE 250 MEGACYCLES . . . alpha cutoff frequency is 200 mc. Typical gain is 12 db at 100 mc (unregenerative). This performance in a production transistor was unheard of prior to perfection of the "grown-diffused" method — an exclusive Texas Instruments technique.

NEW HF SILICON TRANSISTORS

FREQUENCIES TO 30 MEGACYCLES, rated 30 volts and 125° C, make these "grown-diffused" units ideal for high temperature military and commercial applications. They increase to 10 the types of silicon transistors now available from Texas Instruments, and represent the continual improvement in frequency, gain, and power made by the pioneer producer of silicon transistors.

OTHER NEW SEMICONDUCTOR DEVICES FROM TI

NEW HIGH POWER TRANSISTORS — 12-watt dissipation germanium power transistor and 8.75-watt dissipation silicon power transistor. NEW HIGH VOLTAGE RECTIFIERS — full wave and single junction half wave 1500-volt silicon units stable to 150° C. NEW HIGH CONDUCTANCE DIODES — 4 types of axial-lead silicon junction diodes with 100 ma forward currents and 0.1 μ a back currents.

All these devices in production and available immediately. Write today!

LOOK TO TI FOR: GERMANIUM VHF, POWER, RADIO, & GENERAL PURPOSE TRANSISTORS • SILICON HF, POWER, & SMALL SIGNAL TRANSISTORS • SILICON RECTIFIERS AND DIODES

ARNOLD

YOUR SOURCE OF THE MOST COMPLETE LINE **of MAGNETIC MATERIALS AVAILABLE**

(1) Typical group of C and E cut cores, various types of tape wound cores, and bobbin cores (foreground). (2) Mo-Permalloy powder cores. (3) Iron powder cores. (4) Cast Alnico magnets for rotors and stators. (5) Permanent magnets and assemblies for wave guides, traveling wave tubes and magnetrons. (6) Various types and sizes of sintered Alnico magnets.

Arnold magnetic materials can answer *any* requirement you may have. It is the most complete line in the industry; and in addition, Arnold maintains complete control over every production step from raw materials to finished products. Such a source can bring you advantages in long experience and undivided responsibility, and in unequalled facilities for quality production and control. • *Let us supply your needs.*

TYPES "C" AND "E" CUT CORES

Available in more than 500 standard sizes and almost any special size, Arnold "C" and "E" Cores are made from precision-rolled Silectron strip (highly oriented silicon steel) in 1, 2, 4 or 12-mil thicknesses and a wide variety of window sizes and core areas, for high and low-frequency applications. Sizes range up to 100 lbs. in 12-mil strip, and from fractions of an ounce to hundreds of pounds in thinner gauges.

Insulated strip of the proper width is wound on a mandrel, then heat treated, bonded and cut into halves. Careful control results in accurately dimensioned and matched core halves whose effective air gap at the butt joint is very small.

In 3-phase applications, the use of "E" cores provides weight and size reduction, as well as higher efficiency and possible cost savings. Rigid standard tests are employed for both "C" and "E" types of cores, and special tests where required.

Write for Bulletin SC-107

TAPE WOUND CORES

Depending upon the specific properties required, Arnold Tape Wound Cores are available made of Deltamax, 4-79 Mo-Permalloy, Supermalloy, Mumetal, 4750 Electrical Metal, or Silectron . . . in standard tape thicknesses of 1, 2, 4 or 12-mils, and in ultra-thin gauges of 1/2 and 1/4-mil where required.

This gapless type of core construction results in maximum effective working permeability with minimum flux leakage. Practically any size core can be supplied, from a fraction of a gram to hundreds of pounds. Toroidal cores are made in 27 standard sizes with protective nylon or aluminum cases. Special sizes of toroidal cores, and all square or rectangular tape wound cores, are produced to individual requirements.

Write for Bulletin TC-101A

MO-PERMALLOY POWDER CORES

These toroids provide high Q in a small volume, characterized by low eddy current and hysteresis losses.

Arnold Mo-Permalloy powder cores are supplied in four standard permeabilities: 125, 60, 26 and 14 Mu. They provide constant permeability over a wide range of flux density. The 125 Mu cores are recommended for use up to 15 kc; the 60 Mu at 10 to 50 kc; the 26 Mu at 30 to 75 kc; and the 14 Mu at 50 to 200 kc. Many of these cores may be furnished stabilized to provide constant permeability ($\pm 0.1\%$) over a specific temperature range.

Arnold Mo-Permalloy powder toroids are available in a wide range of sizes, to obtain nominal inductances as high as 281 mh/1000 turns. They are given various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

Write for Bulletin PC-104 A

ALNICO MAGNETS—Cast and Sintered

Arnold manufactures permanent magnets from all grades of Alnico, although Alnico V is usually the preferred type due to the high value of energy product of that alloy. Alnico magnets are quite hard and somewhat brittle and may be machined only by grinding. Most sizes and shapes are manufactured as sand castings and are made to the customer's drawings and specifications. Some types and shapes of Alnico Magnets are carried as stock items.

Some small sizes of magnets may be furnished in sintered Alnico, and a wide range of shapes are carried in stock for quick delivery. Special shapes made in this way, however, require rather expensive dies.

Write for Bulletin GC-106A

IRON POWDER CORES

Arnold quality control of iron powder cores includes the maintaining of rigid electrical, physical and dimensional specifications unmatched in the industry. A wide selection of cores is available, from simple cylinders to special cores of complicated design. The line includes all standard types and sizes of threaded cores, cup, sleeve, slug and cylindrical insert cores: for use in antenna and RF coils, oscillator coils, IF coils, perm tuning, FM coils, television RF coils, noise filter coils, induction heating and bombardier coils, and other low frequency applications. A standard series of iron powder toroids is being manufactured, conforming to the standard sizes proposed by the Metal Powder Association.

Write for Bulletin PC-109

BOBBIN CORES

These cores, fabricated by winding ultra-thin tape of high-permeability magnetic materials on ceramic bobbin cores, possess ideal qualities for use in electronic computer assemblies. Their desirable properties include quite rectangular hysteresis loops, relatively low coercive values and high saturation densities; plus temperature stability and the ability to shift in a few microseconds from negative remanence to positive saturation, and vice versa, under conditions of pulse excitation.

Arnold Bobbin Cores are available in a wide range of sizes, tape thicknesses, widths and number of wraps to suit the ultimate use of the core. Magnetic materials usually employed are Deltamax, Square Permalloy and Supermalloy, in standard thicknesses of 1, 1/2, 1/4 and 1/8 mil. Special advantages derive from Arnold's position as a fully-integrated producer of wound cores, able to maintain precise control over every production operation . . . melting, rolling, winding, testing, etc.

Write for Bulletin TC-108

SPECIAL MAGNETIC MATERIALS

Vicalloy is a permanent magnet alloy containing about 10% vanadium, 50% cobalt and the balance iron. It may be fabricated in the form of castings, hot rolled bars and forgings or cold rolled strip, wire and tubing. After suitable heat treatment, the material is quite readily machinable. The alloy finds its greatest usefulness in the form of forged rotors, stamped parts and special recording tape. The coercive force, Hc, is about 300 oersteds, the residual induction, Br, is about 9000 gauss and the energy product, (BH) max, is about 1.0×10^6 .

Cunico is a permanent magnet alloy which can be produced in a large variety of forms since it is ductile, malleable and machinable. It has a high coercive force, Hc, of 715 oersteds, a residual induction, Br, of 3200 gauss and an energy product, (BH) max, of $.81 \times 10^6$.

Cunife is an alloy of copper, nickel and iron which is malleable, ductile and machinable, even after it has been age hardened. The magnetic properties of Cunife are developed by cold working and are directional, with the best magnetic properties found only in the smaller sizes of rods or wires.

Vibrallloy is an alloy of nickel, molybdenum and iron whose temperature coefficient of elastic modulus is controllable over a wide range. It has high ferromagnetic permeability, and a rather high coefficient of magnetostriction. It is manufactured in the form of cold rolled strip as well as cold reduced rod and bar stock. It is used in applications where a zero or controlled thermo-elastic coefficient is desired.

32 YEARS OF CAPACITOR EXPERIENCE

MICAMOLD pioneered the development, design and manufacture of capacitors — and is still producing under the original management.

MICAMOLD METAL ENCASED PAPER CAPACITORS — hermetically sealed, are available in all the Military Standard styles and many special designs. Micamold also manufactures complete lines of oil filled capacitors for industrial applications. Another Micamold first — the exclusive Ambirite line — the only paper capacitors for operation at 150°C.

MICAMOLD ELECTROLYTIC CAPACITORS are manufactured in all Military Standard styles, and types for radio, television and industrial applications. The Motorlytics are for capacitor motor starting.

MICAMOLD's exclusive 'lytics include: Thermalytics, the only capacitors capable of operation up to 100°C, and Chromalytics that work at voltage ratings up to 700VDC.

MICAMOLD MOLDED PAPER CAPACITORS, hermetically sealed in rectangular cases are the only complete line of Military Standard styles. A commercial line is manufactured in the same case sizes for industrial applications.

MICAMOLD TROPICAPS are molded tubular capacitors that afford protection from exposure to high humidity or even total immersion. The case is non-flammable and not injured by severe mechanical and thermal shocks.

MICAMOLD originated and introduced the first **MOLDED MICA CAPACITORS** thirty years ago. The company manufactures Military Standard styles from CM15 through CM70, and also makes the same types for industrial uses. Another Micamold first — the development and manufacture of high temperature types AO, AW and AV for operation to 150°C.

MICAMOLD manufactures all types of Paper, Electrolytic and Mica Capacitors, Radio Frequency Interference Filters, Pulse Networks and Delay Lines.

The Micamold Catalog giving complete specifications is available upon request.

THE ELECTRONIC TUBE

with

A "MILLION" APPLICATIONS

does the work of transistors
more efficiently,
more reliably
more effectively

Now, another revolutionary development from Haydu's research laboratories . . . **The Low Voltage Beam Switching Tube** (type 6701). An electronic achievement of importance in many applications including critical transistor operations.

Haydu's basic ten-position Beam Switching Tube has introduced entirely new concepts for simplifying electronic circuits and designs. This new electronic tube is so versatile that any desired type of sequential or random switching of any number of positions may be obtained.

The Beam Switching Tube has contributed new levels of *speed, reliability* and economy in unlimited applications such as:

- DISTRIBUTING • SAMPLING • COUNTING
- FREQUENCY DIVIDING • CODING
- MODULATING • GATING • TIMING
- CASCADING • MULTIPLEXING
- MATRIXING • OSCILLATING

LIFE TESTS INDICATE A
LIFE SPAN OF 50,000 HOURS.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.

NEW FROM ASCOP
LOW LEVEL PW MULTICODERS
Open a Whole New Field
of Mobile Instrumentation!

Announcing a **NEW** Line of
SUPERSENSITIVE PW AIRBORNE EQUIPMENT

For Remote Measurement, Recording, Transmission

The new ASCOP D Series PW Multicoders provide, for the first time, supersensitive, low-level remote measurement of data from airborne vehicles. The extremely high input sensitivity, fast sampling rate, and wide selection of data channels (up to 88) of these new Multicoders . . . together with their critical accuracy, ultra-high altitude pressurization, and rugged design . . . suit them ideally to today's most important testing and prototype applications involving recovery and repeat use.

Provides A Complete Data System

The new ASCOP Multicoder, combined with ASCOP M Series Ground Station Equipment and suitable transmission or recording equipment, constitutes a complete data handling system that is easy to operate, flexible in application and provides simplified real time reduction. ASCOP also produces a complete line of PW Data Systems and equipment, Telemetry sets and High and Low Speed Rotary Sampling Switches. Contact ASCOP regarding your present program *today*.

production

33,000 mc

25 mc

**ADVANCED
= ANTENNA
PERFORMANCE**

From Gabriel's integrated facilities for development and production came the unsurpassed antenna performance shown here . . .

Gabriel integrates its antenna specifications with your system requirements. Ask a Gabriel Field Consultant for recommendations.

GABRIEL MICROWAVE ANTENNA

Field proved the world over, Gabriel Parabolics are produced for commercial, industrial, and military frequencies.

Request Catalog EMP for complete specifications in these and other frequencies.

7000 mc. — 7000 mc. Railroad Microwave System Operates in mid-west weather conditions ranging from -27° to 110°F — and often mounted where difficult access makes reliability critical. Photo courtesy of Philco.

Important features are **COMPLETE COVERAGE** — 5925-7425 mc • **HIGH GAIN** — to 42.5 db over isotropic source • **LOW VSWR** — 1.13 max. • **LOW SIDELOBES** — better than 22 db down.

2000 mc. — Narrow-beam Parabolic Antenna gives non-interfering operation in the crowded 2000 mc. microwave relay band, with no discernible "squint" and remarkably improved primary and secondary radiation patterns.

Important specifications are: **HIGH GAIN** — 28.5 db • **LOW VSWR**—below 1.3 over entire band • **BEAM WIDTHS** — E plane 6.5° , H plane 6° • **LOW SIDE and BACK LOBES** — better than 25 db down.

RADAR ANTENNAS for a wide variety of uses • development, design, and construction of feed and reflector systems • construction of reflectors up to 60 feet in diameter, with complete mounting and drive equipment.

GABRIEL PASSIVE REFLECTORS

For maximum point-to-point transmission in microwave relay links. Fast, accurate, easy adjustment permits peaking for an efficient system that can out-perform line-of-sight transmission — at lower system cost. Request Bulletin EPR-11 for complete mechanical and electrical systems data.

GABRIEL COMMUNICATIONS ANTENNAS

A complete line for wide-range dependable mobile communications for increased signal power with wider coverage at great savings over cost of high power station and mobile transmitters. Request 24-page Catalog EMC.

HIGH GAIN BEACON ANTENNAS — Gabriel HW series covers 450-470, 144-174, 108-144 mc bands. Gain up to 6.5 db over $\frac{1}{2}$ wave dipole, with equal power radiation in all horizontal directions and low VSWR.

MOBILE ANTENNAS — Gabriel's complete line with bases, springs, and rods, meets every mobile communications need. Typical models are famous "disguise" Model SPPB-71 for all police frequencies; Model SPP-3 series of swivel-base, spring, and whip antennas; Model SPP-18 roof-top model for 140-165 mc.

AMPEX TAPE RECORDERS FOR EVERY DATA RECORDING NEED

A complete line that works together with compatible characteristics and a consistent standard of excellence

VERSATILE

FR-100—Overall performance specifications are the best of any magnetic tape recorder now in production. Modular design of the FR-100 provides broad scope that gives engineers and scientists a freedom to experiment and develop advanced data gathering techniques.

6 tape speeds 1 7/8 to 60 in/sec; D-C to 100,000 cycle/sec. frequency response; choice of 3 recording methods on any track by plug-in interchangeable amplifiers.

MOBILE

800—For airborne, shipboard or vehicular use, this recorder combines excellent performance specifications with ruggedness, compactness and light weight. It is also resistant to shock, vibration and environmental extremes. The 800's versatility is second only to the FR-100.

4 tape speeds; D-C to 30,000 cycle/sec. frequency response; choice of 3 recording methods on any track by plug-in interchangeable amplifiers.

DIGITAL

FR-200—This magnetic tape transport fulfills the fast start-stop requirements of digital handling. It also provides a unique single loop threading feature which greatly simplifies tape change and minimizes chance for faulty threading by inexperienced personnel.

Tape attains full speed or full stop within less than 5 milliseconds; standard machine has 30 in/sec. tape speed and 7 tracks on 1/2-inch tape; other combinations on order.

REPEATABLE

S-359—The endless tape loop handled by this transport serves a number of special needs: time delay, repeating signal for analysis, monitoring with "infinite" time limit, and various programming functions. Loop length is continuously variable from 3 1/2 foot minimum to 25, 50 or 75 foot maximum.

Available for 1/4, 1/2 or 1-inch tape; same tape speeds, heads and other characteristics as Ampex reel-to-reel recorders.

DEPENDABLE

300 SERIES—These are Ampex's long established line. For many applications where the great versatility and extremely high performance specifications of the newer FR-100 are not needed, a 300 series machine provides high quality performance and great reliability at less cost.

Available for various types of recording: 303 for pulse-width modulation; 306 for FM-carrier recording; 307 for direct recording; also combinations.

A mark of the Ampex leadership in magnetic tape recorders is the fact that every machine produced equals or exceeds all published performance specifications. A general tape instrumentation brochure and descriptive literature on various models are available on request. Write Dept. E-2788

Available voltage range
10 KV to 27 KV.

There is a corona type regulator for every high voltage — low current application.

VARIABLE VOLTAGE REGULATORS

The MV1 voltage regulator was designed to regulate the output of a

high voltage, low current supply. It is available with nominal voltage ratings from 1000 to 8000 volts (in 500 volt steps). Adjustment is $\pm 15\%$ from centerline of nominal voltage. This adjustment is accomplished by 5 revolutions of the control shaft.

COUNTER TUBES

These are self-quenching geiger tubes designed to cover the general field of beta, gamma, X-ray and cosmic ray measurements.

SPECIFICATIONS

TUBE TYPE	1B85 Beta-Gamma Alum. Wall	1B86 Gamma Ray Glass Wall	6306 Beta-Gamma Bismuth Lined Alum. Wall
Description			
Operating Voltage	900	300	900
Threshold Voltage	800	280	800
Plateau Length Volts	200	60	150
Plateau Slope Per 100 V (% — 100V)	3	10	5
Active Length (inches)	2.75	2.5	2.75
Wall (mg-cm ²)	30	300	30
Life (counts)	10 ⁹	5x10 ⁷	10 ⁸
Type Base	Coaxial A1-A2	Tinned Leads	Coaxial A1-A2

SUBMINIATURE ELECTROMETER TUBES

Victoreen has every facility for making diode, triode, tetrode,

and pentode tubes to standards of operating performance that will inherently improve the performance of their application. In addition to exceptional quality, Victoreen offers engineering skill to assist in solving your problems and production facilities to meet your requirements.

CERAMIC METAL SEALS

The Victoreen bonding process results in a diffusion of the metal into the sub-surface of the ceramic, resulting in a bond that is as strong as the ceramic body itself. Forcible removal tears the ceramic from the body, indicating the unusual adhesive qualities of this process. This seal permits the use of an inside or recessed metal-to-ceramic seal which may increase the leakage path by as much as double the normal without increasing the overall length of the seal, or permit maintaining a specific leakage path and reducing the overall length by as much as one-half.

A wide range of ceramic compositions as well as a variety of metals have been tested in this sealing process, all with improved quality over conventional methods. We invite inquiries.

HERMETICALLY SEALED RESISTORS (GLASS ENCAPSULATED)

Victoreen carbon deposited resistors are used in applications where ultra-stability and life requirements exceed the MIL-10509A specifications.

RESISTOR DATA CHART

Type	Resistance	Tolerance %	Voltage Coeff. %/V.	Temp. Coeff. %/°C.	Max. Work. Volt.	Watt.	Max Temp °C.	Dimensions (Inches)		
								At	B†	C‡
RX-1	10 ⁸ to 10 ¹⁴ Ohm	*2, 5, 10	-0.03**	± 0.15	1000	100	1 7/8	.20	1

"PIG-TAILOR"*
T.M.

For PREPARATION of axial lead components

**PREPARED
COMPONENTS
IN SECONDS
WITH THE
"PIG-TAILOR"**

"PIG-TAILORING"

... a revolutionary new mechanical process for higher production at lower costs. Fastest PREPARATION and ASSEMBLY of Resistors, Capacitors, Diodes and all other axial lead components for TERMINAL BOARDS, PRINTED CIRCUITS and MINIATURIZED ASSEMBLIES.

The "PIG-TAILOR" plus "SPIN-PIN"—accurately MEASURES, CUTS, BENDS, EJECTS & ASSEMBLES both leads simultaneously to individual lengths and shapes—3 minute set-up—No accessories—Foot operated—1 hour training time.

PIG-TAILORING provides:

1. Uniform component position.
2. Uniform marking exposure.
3. Miniaturization spacing control.
4. "S" leads for terminals.
5. "U" leads for printed circuits.
6. Individual cut and bend lengths.
7. Better time rate analysis.
8. Closer cost control.
9. Invaluable labor saving.
10. Immediate cost recovery

PIG-TAILORING eliminates:

1. Diagonal cutters!
2. Long-nose pliers!
3. Operator judgment!
4. 90% operator training time!
5. Broken components!
6. Broken leads!
7. Short circuits from clippings!
8. 65% chassis handling!
9. Excessive lead tautness!
10. Haphazard assembly methods!

**FOR
ASSEMBLY**

GAR electroformed waveguides

LOWER RF LOSSES

Losses approach design minimums for microwave transitions, couplers, horns, elbows, transformers, cavities and similar components produced by Gar's advanced electroforming process — Gar-forming — due to extreme accuracy, surface finish and part-for-part identity.

NEW DESIGN FREEDOM

This unique process produces parts in complicated configurations to accuracies and finishes unobtainable by any other method. Using specialized techniques developed from the entire field of electroforming, Gar-forming offers unusual capabilities that permit much wider freedom and latitude in designing:

COMPLEX SHAPES — solid and thin-wall parts of all sizes — intricate interior forms — heretofore impossible configurations.

ABSOLUTE ACCURACY — dimensional accur-

acy to any required degree — absolute part-for-part identity.

SURFACE FINISH — to the atomic dimensions of the electrodeposited material itself, without regard to shape or interior accessibility — no other finishing necessary or desirable.

PROTOTYPE or PRODUCTION QUANTITIES

Gar-forming is low in cost for production runs of any quantity, and specially economical for experimental or prototype work. It cannot be approached where extreme accuracy and mirror finishes are required for internally shaped parts.

FULL INFORMATION

Get the full facts about this outstanding new process and its special advantages for highly-accurate complex shapes required for microwave components. Write or phone us your specifications today.

A New Concept of Vibration and Shock Control

ROBINSON All-Metal Vibration and Shock Mounts for Airborne Electronic Equipment...

Outstanding feature of Robinson Mounts is the employment of resilient, primary load-carrying cushions of metal wire (MET-L-FLEX). These MET-L-FLEX cushions are fabricated in such a way that all wires are continuous from top to bottom. They are inherently and permanently damped, and do not drift, pack down or wear out.

Robinson Mounts completely lack the faults and failings of outmoded mountings that incorporate rubber, organic or synthetic materials.

ROBINSON COMPLETE ENGINEERED MOUNTING SYSTEMS

For maximum protection, most problems of vibration and shock can best be overcome by a complete Robinson Engineered Mounting System. When such a system is designed for the particular equipment with careful regard to the acceleration forces, frequency characteristics, and other requirements, the greatest possible efficiency is achieved. At the same time, a Robinson Engineered System can effect decided economies. It not only permits simplified construction and "de"ruggedization of equipment, but also contributes to far longer useful life, and eliminates the need of replacements.

Model 1128-2

Single stage mounting system incorporating these Robinson design features: 1) light weight; 2) outstanding stability; 3) high damping; 4) one piece base plate with only four attachment holes; 5) minimum vertical height; 6) complete unit ready for equipment installation.

Model 728-4

An all-attitude engineered system designed and used for mounting an Antenna Coupler. Excellent damping and snubbing in all directions. Suitable for any small sensitive equipment requiring maximum protection. Provides for easy removal and accessibility of equipment.

Model K130

Center-of-Gravity type mounting designed for individual instruments such as the Oxygen Flow Indicator. This mount is the first of its kind to be successfully installed in important military aircraft. Ideal for instruments not provided for on the main instrument panel.

EXAMPLES OF ROBINSON ENGINEERED UNIT MOUNTS

Series No. 1202

Cup type mount with unusual stability and close limiting action provided by extra thick top and bottom MET-L-FLEX buffer pads within the housing. These buffers provide a gradual increase in stiffness plus high damping. *Natural frequency:* 15-30 c.p.s. (vertical). Axial to lateral stiffness ratio selected to provide for maximum isolation compatible with stability.

For detailed information, write us, outlining your requirements.

Series No. 930

Plate type, double-acting mount. Isolates vibration and shock for positive, negative and radial loads. Particularly adapted to installations where mounts can be located about in the plane of the C.G. and where mounting or missile attitude may vary. *Natural frequency:* 12-15 c.p.s. Higher stiffnesses available.

Series No. 809

A small plate type mount, low in installation height, designed to isolate vibration and shock for positive, negative and radial loads. It is particularly adaptable for the mounting of equipment in cramped spaces. *Natural frequency:* 25-30 c.p.s. This assures a high degree of stability to the mounted equipment and effective vibration isolation at high frequencies.

Various adaptations available to meet your particular dimensional and load requirements.

HOLD

FAST

"Fast" means a lot of things when you're talking about production line fabrication, equipment operation or maintenance and service. In every case "fast" means CAMLOC, because Camloc Fastening Devices are designed with all meanings in mind. They speed up maintenance and service of operating equipment by providing quicker accessibility to vital components . . . and they save manufacturing time and money by affecting production line economies during fabrication.

Camloc Fastening Devices not only install easily and quickly, but also permit greater tolerances between sheets; support heavy loads without binding. And they're designed to withstand severe shock and vibration (you'll find them on America's fastest aircraft; on access panels, doors, cowlings, electronic equipment).

For fast fabrication, fast open-close action, fast holding . . . whatever "fast" means to you . . . it always means Camloc.

Complete catalog information on any of Camloc's fastener products is yours for the asking . . . just specify your interest.

QUARTER-TURN FASTENERS

To get to the heart of the problem fast a quarter turn of this popular fastener is all it takes. Access panels, doors, other closures open fast, close fast, hold fast!

ELECTRONIC CHASSIS LATCH

Inexpensive, vibration-proof Chassis Latch of attractive design eliminates protruding attaching bolts and hole preparation . . . Opens and closes easily . . . provides leverage to overcome frictional loads of multiple contact plugs.

SPF (STRESSED PANEL FASTENERS)

Offers all the advantages of a thread with added feature of continuous thread engagement . . . overcomes cross threading . . . saves structural weight in design and hours of maintenance time. For highly-stressed panels carrying structural loads. Takes less than a turn to operate . . . has low deflection under load . . . long torque life.

HIGH STRENGTH LATCHES

For maximum safety and ease of operation when high shear-tension and heavy loads are factors. Long fatigue life under loads. Wide range of strengths and sizes fulfills a variety of requirements.

NOISE AND FIELD INTENSITY METER, Model NF-105
(Commercial equivalent of AN/URM-7) 150 KC to 1000 MC

Four quick-change tuning heads • Single knob tuning for easy scanning
Built-in impulse generator serves as calibrator • Carrier and peak reading
V/FVM • Aural slideback • Coaxial step attenuators • Regulated 'A' and
'B' supply.

COAXIAL CRYSTAL MIXER, Model CM-107

Broad Band, Fixed Tuned • 225 MC to 5600 MC in 8 models • Input and L.O. VSWR better than 2 to 1 • L.O. rejection at IF output better than 30 DB.

UHF ATTENUATORS, Models AT-50, AT-60

50 ohm resistive T-networks of concentric line construction.

FREQUENCY RANGE:
AT-50: DC to 4000 MC.
AT-60: DC to 3000 MC.
VSWR: Better than 1.2 at all frequencies.

ACCURACY: $\pm 1/2$ DB.
RATED POWER:
AT-50: 1W continuous
1KW peak
AT-60: 2W continuous
2KW peak

STEP ATTENUATORS, Models AT-103, AT-104

These units use AT-50 pads in 6 step and 12 step coaxial turret arrangements respectively.

COAXIAL TERMINATION, Model TE-80

1 watt, DC to 4000 MC, also available

VARIABLE FREQUENCY POWER SUPPLY, Model VP-400

POWER OUTPUT: 500 watts
VOLTAGE REGULATION: 2%, no load to full load
HARMONIC DISTORTION: 5% maximum, total, (to 400W).

CRYSTAL DETECTOR, Model DT-123
also available.

UHF IMPULSE GENERATORS, Models IG-102, IG-115, IG-118

Model	Flat Spectrum ($\pm 1/2$ DB)	Peak Output Level	Repetition Rate
IG-102	10 KC to 1000 MC	70,000 μ V/MC	2.5 to 2500 cycles
IG-115	10 KC to 1000 MC	100,000 μ V/MC	60 cycles
IG-118	100 MC to 10,000 MC	9,000 μ V/MC	2.5 to 2500 cycles

POWER DIVIDERS, Model PD-90

FREQUENCY RANGE: 800 to 10,000 MC in 5 models, also available.

WHEREVER HIGH TEMPERATURES EXIST

THAT'S THE PLACE FOR HITEMP WIRES!

-90°C. to +250°C.

TEFLON* MAGNET WIRE — "TEMPRITE" Sizes 14 to 50 AWG, single, heavy, triple, or quadruple thicknesses.

SPECIAL TEFLON MAGNET WIRE — "TEMPRITE X" Same characteristics and sizes as regular Temprite, but specially processed for severe application.

FLEXIBLE TEFLON TUBING — "TEMPRENE NON-RIGID" Sizes 10 to 26, solid colors and special striped combinations.

TEFLON EXTRUDED TUBING — "TEMPREX TUBING" Sizes 4 to 24. Fourteen solid colors.

TEFLON SATURATED GLASS BRAID LEAD WIRE — "RETEP" Low cost, low voltage, push back type. Sizes 14 to 30 AWG.

TEFLON HOOK-UP WIRE — "TEMPRENE" Sizes 14 to 30 AWG. Two and three color striped combinations, plus 10 solid colors. Conforms to MIL-W-16878B (E and EE).

TEFLON EXTRUDED HOOK-UP WIRE — "TEMPREX" Sizes 10 to 32 AWG, in both striped and solid colors. Conforms to MIL-W-16878B (E and EE).

TEFLON INSULATED LEAD WIRE — "TEMPCLAD" Teflon insulated lead wire with an outer covering of Teflon impregnated glass fiber braid. Sizes 8 to 30 AWG.

TEFLON GLASS FIBRE CORD, TAPE AND THREAD — "NEBROC®" Developed especially for coil and harness tying.

TEFLON FIBER LACING TAPE "NEBROC® TF" All Teflon lacing tape, exhibits excellent thermal and mechanical properties. An ideal tape for Class H assemblies.

TEFLON GLASS FIBRE SLEEVING — "TEMPTUBE" Available in sizes up to 1¼" I.D. Colors on request.

SILICONE MAGNET WIRE — "THERMALON" Sizes 14 to 42 AWG Incl. Used for temperatures from -54°C. to +150°C. Made in single or heavy thicknesses.

SHIELDED AND JACKETED MINIATURE CABLES Consist of Temprene or Temprex conductors, shielded and jacketed for high temperature operation.

MINIATURE COAXIAL CABLES Consist of 50, 70, and 93 ohm cables, shielded and jacketed for applications up to +250°C.

RIBBON CABLE ASSEMBLIES — "TEMPBRAID" 100% Teflon, flexible, flat ribbon multi-conductor cables.

SHIELDED RIBBON CABLES — "METALBRAID" Flexible, shielded, flat, multi-conductor cables, i.e. tinned or silver plated copper.

*Du Pont's Trade Name for POLYTETRAFLUOROETHYLENE

All Teflon products are rated for continuous operation from -90°C. to +250°C., have excellent dielectric strength, and are impervious to all commercial solvents. All colors conform to MIL Std. 104.

ALL-ANGL MOUNTS — for jets and missiles

The practical solution to mounting problems in jets and missiles; work at any angle, in maneuvers through every position; have high damping in all directions, low transmissibility at resonance. Built to handle the new jobs that are too tough for MIL-standard mounts. Available in all MIL sizes.

Type	MIL size	Max. load rating
B22	0	3 lbs.
B44	1	10 lbs.
B64	2	40 lbs.

ASK FOR BULLETIN 56-01.

ALL-METL MOUNTS

— for MIL-spec service

Types M24, M44, and M64. Have non-packing wire-mesh damper; meet latest Government specifications for air-borne electronic equipment; ruggedized; lightweight; operate over wide temperature range; load ratings 0.1 to 40 pounds.

ASK FOR BULLETINS 534, 536, and 542.

RACKS and MOUNTING BASES

Standard MIL-C-172B Units

Meet dimensional and material requirements of MIL-C-172B; in special sizes to fit customers' needs. With ALL-METL mounts, ask for Bulletins 534 & 536; with AIR-DAMPED mounts, ask for Bulletin 523-B.

CUP-MOUNTS

for shipboard, vehicular, and industrial use

Barry cup-mounts, Series 1000, 2000, 4000, and 3000; protect sensitive equipment against shock and vibration in shipboard, vehicular, railway, and industrial service; load ratings up to 1800 pounds.

ASK FOR BULLETIN 56-02.

Special Designs

Barry prototype service can help you with all necessary design, development, testing, and production of special mounting bases specifically engineered to your equipment and service requirements. Typical Barrymount® specials using standard isolators, or new integral isolation systems, are shown here. To learn all about this service,

ASK FOR "DESIGN NOTES - EBG".

THE COMPLETE BARRY LINE also includes . . .

AIR-DAMPED MOUNTS
for air-borne equipment.
Ask for Bul. 523-B.

BALL MOUNTS
for very light loads.
Ask for Bul. 543.

TYPE 5200

SIE**SOUTHWESTERN INDUSTRIAL
ELECTRONICS CO.****2831 Post Oak Rd. P. O. Box 13058 Houston 19, Texas Phone: MO 4-4507**

THE MODEL R-1 VOLTMETER is intended for precise voltage measurements in circuit design work. It offers accuracy, reliability, and convenience. In addition to its wide range AC and DC scales, it includes a precision ohmmeter, a D-C pre-amplifier for driving oscilloscopes and recording devices, a built-in standard cell for instant calibration, and provision for expanding the DC voltage scales.

SPECIFICATIONS:

Range: 1 mv. to 1000 volts, full scale AC and DC

Frequency response: 0 to 100 kc

Accuracy: DC, 1½%. AC, 3%

Input impedance: 10 megohms, 20 mmf.

Price: Standard model, \$620.00
Rack-mounted, \$700.00

THE M-2 OSCILLATOR, the standard of the geophysical industry, is an extremely versatile instrument. It combines many desirable features—wide range, accurate calibration, low distortion, high output, low drift, excellent dynamic stability, and constant output throughout the range—in a compact, rugged instrument of reasonable price. For geophysical, audio, servo, vibration, medical, and computer work, the M-2 is unexcelled.

SPECIFICATIONS:

Frequency range: 1-120,000 cps.

Distortion: less than .2% in audio range

Calibration accuracy: 1½% + .1 cps.

Output: 20 volts at 20 ma.

Amplitude stability: ± .5 db.

Price: \$425.00

THE MB-1 OSCILLATOR is powered by self-contained batteries, providing signals completely free of power line transients and 60 cps ripple. It provides low-distortion sine wave signals and covers the geophysical, medical, and audio ranges with good dynamic and amplitude stability characteristics. The addition of the Geophysical Microvolter (shown installed below) provides signals of accurately calibrated amplitudes at low levels.

SPECIFICATIONS:

Frequency range: 2-20,000 cps

Distortion: less than .5% in audio range

Calibration accuracy: 2% + .1 cps

Output: 5 volts at 5 ma.

Price: \$215.00 (Microvolter \$80.00 extra)

THE MODEL C-6 RESISTANCE METER features a quick-charge go, no-go capacitor leakage checker. Operating from a 110-volt 60 cps power source, it measures resistances at 1½, 50 or 500 volts, enabling it to meet MIL specs on insulation tests, measure the leakage of 200 WVDC capacitors, and check continuity. It is accurate, stable, and covers the widest range of any direct-reading ohmmeter.

SPECIFICATIONS:

Range: 0 to 10,000,000 megohms

Test voltages: 1½, 50, and 500 volts

Accuracy: 3% of scale below 1,000,000 megohms

5% of scale above 1,000,000 megohms

Price: \$200.00

THE MODEL E-2 COMPARISON BRIDGE indicates percentage differences between resistors, capacitors, and reactors at 60-cycle frequency. It is useful for rapid acceptance and production-line tests and can be used in conjunction with decade boxes. SIE Comparison Bridges with other test frequencies and voltages are also available.

SPECIFICATIONS:

Full scale ranges: 1, 2.5, 5, 10, & 25%

Accuracy: ± .1% on the 1% range

Test limits for

Resistors: 1 ohm to 5 megohms

Capacitors: 500 mmfd. to 2000 mfd.

Inductors: 3 mh. to 10,000 henries

Price: \$185.00

THE MODEL B DIRECT-COUPLED POWER AMPLIFIER is capable of producing up to 6 watts output. It may be used to amplify the output of the D-1 amplifier, low frequency oscillators, or various transducers and will drive recorders, shaking table loudspeakers, electric motors, Helmholtz coils, and other transducers. It finds application also as an ultra-low-frequency transformer.

SPECIFICATIONS:

Voltage gain: 2.5

Power gain: 30,000

Output: 25 volts RMS, 250 ma.

Frequency response: 0-20,000 cps ± 1

Input impedance: 500,000 ohms

Price: \$575.00 (less cabinet)

"One of the
Dresser Industries"

THE MODEL MO MULTI-CHANNEL OSCILLOSCOPE permits visual observation of twenty-four channels of dynamic data, simultaneously displayed on a 21" single-gun cathode ray tube with a long-persistence P-7 phosphor. A raster scanning technique provides useful frequency response to 500 cps, while a special "window" circuit accelerates the sweep for detailed examination of certain signals.

The auxiliary Model EP Event Pre-selector generates .1 and .01 second timing lines, and provides calibrated sweep delays.

SPECIFICATIONS:

Sweep speeds: 3-30 ips.
Sensitivity: 2 volts/inch
Prices: Model MO, \$6000.00
Model EP, \$1500.00

MAGNETIC RECORDERS . . . SIE manufactures a varied line of drum-type magnetic tape recorders, with as many as fifty-six channels, for portable, mobile, and laboratory installations. Among the special features available are servo-controlled individually movable heads, viewing screen and photographic attachments, and tape storage magazines for long-time recording.

TYPICAL SPECIFICATIONS USING WIDE-DEVIATION FM (SIE SLOPE MODULATOR):
Frequency response: 0-500 cps (down 3 db.)

Harmonic distortion: less than 1%
Signal-to-noise ratio: better than 54 db.
Timing accuracy: .25 millisecond
Sensitivity: 1 volt RMS for 100% modulation

Price and delivery will be quoted on receipt of specific inquiry.

GEOPHYSICAL INSTRUMENTS

SIE is the world's largest manufacturer of electronic seismograph instruments, having supplied more than 325 complete systems to organizations operating throughout the world. The complete SIE line of geophysical equipment includes geophones, galvanometers, recording oscillographs, magnetic tape recorders, matched sets of amplifiers, control and checking units, blasters, power supplies, and special vehicle bodies.

Shown above is an SIE G-22A high production seismograph system. The RO-22A-10 Oscillograph records fifty channels on ten-inch paper, and all of the components in the GA-22A amplifiers are hermetically sealed for low noise and long life.

TRANSFORMERS AND INDUCTORS

SIE Precision Engineered Transformers and Reactors are manufactured in a wide range of standard types, as well as to order. Standard designs are small hermetically sealed units for applications where uniform response characteristics from 5 to 1000 cps are required. Special precautions are taken to insure identical phase characteristics for use in matched sets of amplifiers.

Custom designed transformers and chokes are also available on short notice, at economical prices, and in small quantities. Specialties include low-level, low-frequency, high-inductance coils, hum-bucking construction, single, double, or triple Mu-metal shielding, high temperature insulation, and toroidal windings on a wide range of core materials. SIE products have been built to MIL-T-27A.

Other wound components manufactured by SIE include magnetic recording heads and magnetic amplifiers.

Laminated Sheet

Laminated Wire

Laminated Tubing

“IMPROVED” Laminated Products that assure quality...speed production

From Improved's modern metal mill comes a variety of composite metals . . . sheet, strip, tubing or wire . . . in a wide range of alloys, widths, thicknesses and diameters, for a multitude of industrial applications.

Every advantage of solid precious metal is in Improved's laminated metals . . . conductivity, non-corrosiveness, high tensile, long wear . . . while the base metal provides strength, resiliency, economy and solderability.

Improved will custom-make the composite metal you require adhering to your most exacting specifications. Modern mill facilities combine with nearly 60 years experience to assure highest quality . . . fastest delivery. Your inquiry is invited. Write for catalog 564.

ENGINEERS AND MANUFACTURERS OF REFRIGERATION AND ENVIRONMENTAL TEST EQUIPMENT

look to Stemco Thermostats first

for precise, sensitive temperature control

If your product requires precise, sensitive temperature control . . . if it's scheduled for volume production—look to Stemco thermostats first. Since Stevens produces the broadest range of bimetal thermostats in the industry, chances are you can use a standard production-line unit to satisfy all your special requirements exactly. This saves design, development and tooling expense . . . cuts down on lead time . . . gives you a better, proven thermostat at lower cost—sooner.

- 1 TYPE S Adjustable. Positive-acting, with electrically independent bimetal. Adjusting stem and terminals to customer specification. See Bulletin F-2006.
- 2 TYPE S Non-Adjustable. Electrically identical to adjustable Type S. Single-stud mounting. Operates to 650°F. Rating: 15 amps at 115 volts AC, 10 amps at 230 volts AC. See Bulletin F-2006.
- 3 TYPE SA Adjustable. Snap-acting with electrically independent bimetal. Also single-pole, double-throw. Adjusting stem and terminals to customer order. See Bulletin L-6397-A.
- 4 TYPE SA Non-Adjustable. Is electrically identical to adjustable Type SA. Non-inductive-load rating 15 amps at 115 volts AC, 10 amps at 230 volts AC. See Bulletin L-6397-A.
- 5 TYPE SM Manual Reset. Mechanically and electrically same as adjustable and non-adjustable Type SA except for manual reset feature. See Bulletin L-6397-A.
- 6 TYPE W. Adjustable (shown) or non-adjustable types. Snap action prevents arcing. Operation to 350°F. Rated at 12 amps at 115 volts AC, 8 amps at 230 volts AC. See Bulletin L-6395.
- 7 TYPE A Semi-enclosed. Insulated, electrically independent bimetal disc gives fast response and quick, snap-action control. Operation from -40° to 400°F. Various mountings and terminals. See Bulletin L-9070.

8 TYPE A Hermetically Sealed. Electrically identical to semi-enclosed Type A. Rated at 8 amps at 115 volts AC, 4 amps at 230 volts AC, and 4 amps at 28 volts DC. For appliance, electronic, apparatus applications. See Bulletin L-9070.

9 TYPE C Semi-Enclosed. Small, positive-acting. Electrically independent bimetal strip for operation from -75° to 300°F. Terminals and mountings to customer specifications. See Bulletin L-6934.

10 TYPE C Hermetically Sealed. Electrically identical to semi-enclosed Type C but sealed in crystal can. Also supplied as double thermostat "alarm" type. Rated at approximately 3 amps, depending on application. See Bulletin L-6934.

11 TYPE R. Sealed, non-adjustable (shown) or adjustable styles. Positive acting for operation to 650°F. Rated at 15 amps at 115 volts AC, 10 amps at 230 volts AC. See Bulletin F-2003.

12 TYPE M Semi-Enclosed. Compact unit with electrically independent bimetal disc for appliance and electronic applications from -60° to 400°F. Virtually any type terminal. See Bulletin F-2009.

13 TYPE M Hermetically Sealed. Electrically same as semi-enclosed Type M. Rating: 8 amps at 115 volts AC, 4 amps at 230 volts AC, 4 amps at 28 volts DC. See Bulletin F-2009.

Subminiature I-F Amplifiers

- High gain
- Broad band
- Rapid recovery
- 40 db manual gain adjustment

Model No.	Center Freq. mc/sec	Bandwidth mc/sec	Noise Fig. (db)	Gain (db)
M1201	30	12	1.7	100
M1202	60	12	3.7	100
M1203	90	12	5.0	100

Also available: FM discriminators; 50:300 ohm matching pads

NEW

Precision Phasemeter

Model 901

30 cps
to
20 kc

- 0.1° absolute accuracy
 - 0.01° incremental accuracy
 - 0 - 360° phase range
 - 10-megohm input impedance (shunted by 25 μfd.)
- Frequency may be extended with slight decrease in accuracy.
Also Available: Variable phase generators.

ROTARY-EQUIPMENT CONTROLS

NEW

Frequency Regulator for aircraft inverters

Model M-1087

- 2.5 kva controlled output
- +0.25 % steady-state frequency control
- +0.025 % average frequency control
- High-speed transient recovery

These regulators provide precise control of output frequency for 400-cycle aircraft inverters and similar equipment.

Mag-Amp Voltage Regulator for aircraft alternators

NEW

Model M601

- Controlled 4.0 kva output
 - Accurate, trouble-free regulation
 - High-speed transient recovery
 - Rugged, environmentally tested design
- These controllers provide rapid, accurate regulation of output voltage for 400-cycle alternators

METERING DEVICES

NEW

Ultrasonic Flowmeters

Accurate gravimetric flow rates Precise mass totalization

- Smooth bore—negligible pressure drop
- Rapid response
- Linear rate output
- No moving parts
- Reversible flow accommodation

A series of unusually precise instruments with important applications in metering and control of flow processes.

NEW

Statistical Accelerometers

- Accurately pre-settable acceleration levels — 2.5 to 10 g.
- Direct-reading digital record
- Simple installation
- Self-contained — service-free

These instruments provide a digital record of acceleration levels experienced. Direct-reading indicators eliminate need for data reduction. Modular design permits choice in number of acceleration levels recorded.

SYSTEMS AUDIO Components and Amplifiers

DIGIMAX DIALS, ACCELERATION SENSITIVE SWITCHES, TRANSFORMERS AND AMPLIFIERS

NEW

Digimax Dial

For accurate digital indexing of precision potentiometers to 1 part in 2000.

Featuring:

- 1 1/16" x 1" panel space. (3/4 actual size)
- Direct reading dial 0 to 999.
- Detenting in 1/2-digit increments.
- Adjustable by a gloved operator.

NEW

Sub-Miniature Servo-Amplifiers

Model 805 Servo Amplifier

Unique vacuum tube amplifier providing output up to 5 watts.

- Weight: 4 oz., Dimensions: 1" x 2 1/2" x 3".

Model 800 TRANSISTOR SERVO AMPLIFIER

Designed to drive 400 cps servo motors with stall power requirements of up to 6 watts.

- Weight (for 6w.): 5 oz., Volume: 8 cu. in.

Models 806 and 806-1 SUMMING AMPLIFIERS

Precisely add or subtract up to 7 input signals. Available with 90° phase shift to drive 2-phase servo motors.

- Weight: 4 oz., Dimensions: 2" x 2" x 1".

NEW

Acceleration Sensitive Switches

Precision, factory-set to close or open at predetermined acceleration levels, 2.5 to 35.0 g, or to specification.

- Model 131 — SELF-RESETTING TYPE
- Model 132 — MANUAL-RESETTING TYPE

Langevin

Transformers

Type L-1620 — COMMERCIAL

- Step-down voltage 115 v. to 16 v.
- 400 cps operation. • Weight 4 oz.
- Dimensions 1 3/8" x 1 1/16" x 1 5/16".

Type L-1505, MIL-T-27A — CLASS A

- Voltage Standard.
- Hermetically sealed.
- 6 windings, 33 terminals.
- Dimensions: 1 5/8" x 1 3/16" x 2 5/16".

Type L-2834 COMMERCIAL

- Saturable reactor.
- Open construction.
- Dimensions: 4" x 4" x 6".

Type L-1570, MIL-T-27A — CLASS B

- Power transformer plate.
- Incapsulated.
- 3 1/8" x 3 1/2" x 3 3/16".

Type L-2769 MCREE-553 — CLASS B

- 6000 v. rms.
- High altitude—low corona.
- Incapsulated.
- 5 7/8" x 6 1/2" x 6 1/8"

- Type L-2562 MIL-T-27A — CLASS A
- Filament transformer.
- Hermetically sealed.
- 2 to 6.3 volts, 10 amps. secondary winding.
- Low temperature rise.
- Dimensions: 5 1/16" x 6 5/16" x 7 1/2".

Langevin

Miniature Amplifiers

The accepted standard for network and commercial sound systems. The smallest, high quality amplifiers available to the industry!

Broadcast Amplifiers

- Model 5116 PLUG-IN BROADCAST PRE-AMPLIFIER
- Length 9", Width 1 3/8", Height 3".

Model 5117 PLUG-IN BROADCAST PROGRAM AMPLIFIER

- Length 10 1/4", Width 2 5/8", Height 3".

Industrial Amplifiers

Model 138-G with INTERCHANGEABLE INPUT PANELS

- Length 13" Width 3 1/8" Height 5"

High Fidelity Amplifiers

The COOK-LANGEVIN "Ultimate" AMPLIFIER

- Exceptional Class A power.
- Negligible distortion, low noise.
- Automatic adjustment to speaker imped.
- Low impedance plate load.
- 4—6550's power output tubes.

NEW

50 watts over the entire frequency spectrum! Product of the combined talents of Cook Laboratories and Langevin engineers.

In-plant MIL-T-27A Test Facilities — Langevin has complete in-plant test facilities for transformers in conformity with MIL-T-27A and other government specifications requiring qualification approval. In addition to all required electrical test equipment, these facilities include a temperature and humidity chamber with automatic cycling controls, cold chamber, altitude chamber and vibration table for the specified environmental tests.

From miniature components to integrated systems

AMF has electronics experience you can use

- AMF experience in electronics covers practically every area of the field, from design through production, of individual components and complete systems, for both government and industry.
- AMF has organized development and production teams experienced in the latest mechanical and electronic techniques. These teams, located throughout AMF, achieve the fine balance so necessary to produce efficient, reliable equipment.

- Particular AMF electronics capabilities and products include...

ILLINOIS CAPACITORS

KNOWN THE WORLD OVER FOR

Time Tested Quality

For over 20 years ILLINOIS CONDENSER COMPANY has been foremost in the development of ever greater dependability and longer life in all types of capacitors. Listed below are only a few of the more popular — and most recently developed ILLINOIS types.

NEW!

TYPE SMT SUB-MINIATURE ELECTROLYTICS

Newly developed sub-miniature electrolytics with hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 100 MFD and from 3 to 50 WVDC.

- TYPE UMP** Standardized twist-prong type. Patented molded terminal construction for efficient, stable operation under extreme temperature ranges. Capacity ranges from 10 to 3,000 MFD and from 6 to 525 WVDC.
- TYPE PE** Hermetically sealed plug-in octal base type. Especially useful in fixed or mobile communications equipment. Operating temperature range -40°C to $+85^{\circ}\text{C}$. Available in wide ranges of capacities and voltages.
- TYPE IHC** Popular multiple section types with flexible leads, insulating sleeves and mounting straps. Equally adaptable for original equipment or replacement purposes. Available in capacities from 10 to 250 MFD at 25 to 500 WVDC.
- TYPE LN** Extruded aluminum can type with screw neck mounting and flexible leads. Capacity ranges from 8 to 80 MFD and from 450 to 600 WVDC.
- TYPE UMS** Hermetically sealed inverted can type with screw neck mounting and molded-in terminals. Wide ranges of capacities and voltage ratings. Meets all government specs.
- TYPE UMT** Inverted can type with clamp mounting. Hermetically sealed, shock resistant with new molded terminal construction. Ideal for use in highest quality equipment. Meets all government specs. Wide capacity and voltage ranges.
- TYPE IHT** Popular tubular aluminum can, pigtail type electrolytic. Internal riveted construction. In capacity ranges of 1 to 2,000 MFD and from 6 to 600 WVDC. Also available with solder lug terminals. Supplied with insulating sleeves.
- TYPE UMC** Low leakage - high capacity electrolytic for power filter packs, voltage stabilization, energy storage and photo flash. Capacity ranges up to 10,000 MFD to 50 V. and 1000 MFD at 450 V.
- TYPES IMT and SMT** Newly developed "miniature" and sub-miniature electrolytics with hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 100 MFD and from 3 to 50 WVDC. Ceramic case and aluminum case types.
- TYPE MS** Motor starting capacitors available in bakelite and aluminum cases. Long wire leads with terminals. Capacities to 5,000 MFD at 115, 220 and 320 VAC.
- TYPE BT** Hermetically sealed bathtub type especially designed to withstand vibration and shock. Available in electrolytic and paper capacitor types for government and commercial use.
- ILLINI 300 ELECTRONIC FLASH KIT** A new high intensity, low voltage electronic photoflash kit featuring latest advances in tube, capacitor and reflector design. 100 watt second output. Uses standard type batteries. Easily assembled, rugged, reliable and economical to operate. AC Power Pack also available.

STANDARD printed circuit TOLERANCES

...for lowest cost!

Ask for our
Technical Bulletin P-9,
"STANDARD
Printed Circuit
TOLERANCES."

EXCLUSIVELY PRINTED CIRCUITS
and Associated Sub-Assemblies
ADVANCED TECHNIQUES & RESEARCH
MAXIMUM EXPERIENCE

NOW, after five long years of production experience on well over 1000 different purchase orders, we are proud to offer you this technical bulletin. We are confident that you will accept this material as the standard of the industry! Every item in this bulletin has already been adopted in varying degree by the larger well-known electronics manufacturers.

The present state of the "printed circuit" art dictates (and our experience has proved) that **DESIGNS BASED ON THESE STANDARDS ARE THE ONES THAT STICK!** These standards are practical and realistic, not experimental, not based on laboratory techniques, but sound bases to incorporate in your purchasing, engineering and production manuals. Furthermore, *their cost stays down where you want it!*

Your own product reliability can be based on and guaranteed by the use of Printed Circuits by Photocircuits Corporation.

Consult our Engineering Department or any of our Sales-Engineering Field Offices.

Data for Designers

- RF Shielding
- Wave Guide Gaskets
- Heat Dissipating Tube Shields

Electronic Weatherstrip

Knitted, metallic wire structure combines maximum conductivity for efficient performance with inherent resiliency that assures continuous line contact between imperfect mating surfaces. Interlocked loops, of continuous wire strands, assures maximum cohesion. Available in continuous lengths in more than 500 shapes and sizes to meet all installation requirements.

Type	Size	METEX PART NUMBER		
		Monel	Aluminum	Silver Plated Brass
□ { Rectangular	1/8" x 1/8"	10-199	10-204	10-230
	1/8" x 3/32"	10-194	10-182	10-338
○ { Round	1/8" dia.	10-006	10-035	10-118

	5/8" o/a			
Single Fin	1/4" dia.	10-109	10-341	10-342
	5/8" o/a			

Standard strips shown above available from stock without minimum charge. Other types available on order.

Choke Flange Gaskets

The controlled resiliency and compressibility of METEX Knitted Wire Gaskets for standard Waveguide Choke-Flanges insure complete metallic contact, flange to flange. Assures RF-tight joint when distortion makes choke inefficient. Supplements choke to prevent RF leakage at high power levels. Eliminates leakage at other than choke frequencies.

ASESA FLANGE NO.	METEX PART NO.	GASKET MATERIAL	REFERENCE WAVEGUIDE

UG-440A/U	MT 426-2	Aluminum	RG-106/U	1 1/2 x 3/4	Aluminum
UG-541A/U	MT 157-2	Monel	RG-91/U	.702 x .391	Brass
UG-585/U	MT 406-2	Aluminum	RG-107/U	.702 x .391	Silver
			RG-75/U	3 x 1 1/2	Aluminum

Standard RF gaskets shown above available from stock without minimum charge. Other RF gaskets available on order.

Heat Dissipating Tube Shields

METEX Resilient Cooling Sleeves for subminiature tubes combine high heat conducting ability with inherent vibration dampening and shock absorbing properties. Provides an efficient, practical and economical method of conducting heat away from the tube envelope, directly to a heat sink. Aluminum alloy wire assures maximum thermal conductivity with minimum weight. Thermal peaks and valleys are leveled out assuring consistency of thermal performance among tubes.

METEX Part No.	Tube Envelope	HEIGHT
MT-204E-1	T3-1; T3-6; T3-7	1"
MT-204E-2	T3-2; T3-5; T3-8	1 5/16"
MT-204E-3	T3-3	1 1/2"
MT-204E-5	T3-4	1 1/16"

Sizes shown available from stock. Other sizes available on special order.

METEX Engineers will be glad to work with you on any problems involving RF Shielding or Heat Dissipation in electronics or related equipment. No obligation, naturally!

SPECIAL R-F FITTINGS of ALL TYPES

Wave-guide flange—special

Subminiature connector—TM series

Crystal mount

Cable jack—special

Whenever you need special r-f fittings — for wave-guide or coax connection — you can profit by our years of experience in designing and producing fittings for specialized service. Ask us about

- High-temperature connectors
- High-voltage connectors
- Pressurized connectors
- Captive-pin connectors
- Sub-miniature connectors
- Special anti-noise connectors
- Directional couplers
- Special-flange wave-guide fittings
- Adapters
- Power connectors
- All standard military types

And when you need wiring harnesses, we offer efficient facilities for producing the most complex, or the simplest, harnesses in large or small lots — at prices that reflect our production capabilities.

Directional coupler

TNC plugs

6000-volt and 3000-volt plugs

NEW CONNECTOR DEVELOPMENTS

"TNC" Series (GRFF designation)

A complete line of small, thread-coupled coaxial connectors that assure tight, permanent contact and low noise-level. Specially designed for airborne services. Available hermetically sealed, pressurized, weatherproof; in all standard forms, including adapters to other services. Have characteristics of latest type BNC plus advantages of type N.

SUBMINIATURE

"TM" Series (GRFF designation)

A 50-ohm, subminiature, low-noise, thread-coupled, coaxial connector series. Used with .075" max. cable. Available hermetically sealed and pressurized.

HIGH-VOLTAGE, HIGH-ALTITUDE D-C, SHIELDED SERIES

Small, light-weight, weatherproof, pressurized, fully shielded connectors with ratings of 3000 and 6000 volts d-c at 50,000 feet; can be furnished thread-coupled and in other forms. Suitable for pulse-power connection — as between modulator and transmitter.

Axel

RADIO NOISE SUPPRESSION FILTERS

- Maximum attenuation from 14 kc to 22,000 mc
- Low impedance and voltage drop, minimum heating
- Maximum vibration and shock resistance
- Standard, miniature and sub-miniature sizes
- Operating temperatures -55° C. to 125° C.

PULSE FORMING NETWORKS

- Hermetically sealed welded cases with solder-seal bushings
- Completely filled with purified high-strength dielectric fluid
- Stable performance at high temperatures
- Widest range and combination of electrical parameters

DELAY LINES

(Lumped-Constant-Fixed)

- Low attenuation
- Minimum pulse distortion
 - Hermetically-sealed
 - Constant delay over wide temperature range
 - 100% production-tested for all parameters

LOW INDUCTANCE CAPACITORS

- Low inductance, high ringing frequency
- High voltage ratings
- High energy content per unit
- Hermetically-sealed, liquid-filled
- Minimum cost per joule

ENERGY STORAGE CAPACITORS

Catalog No.	Capacitance	Rated Voltage

30ES11	1.25 mfd	30 kv
40ES11	1.25 mfd	40 kv

PRECISION WIRE-BOUND RESISTORS

- Maximum loads from 0.1 to 2.0 watts
- Resistance from 0.1 ohms to 10 megohms
- Non-inductive, low-capacitance winding
- Tolerances as close as 0.2%
- Standard, miniature and sub-miniature types

MINIATURE ROTARY ELECTRIC SWITCHES

- Low-resistance beryllium copper contacts
- High insulation resistance
- 1 to 5 poles, 2 to 10 positions
- Shorting or non-shorting contacts
- Surpasses MIL-S-3786 environmental specs

William A. Franklin 3 Holly Road North Syracuse, N. Y.

. . . and backed by MOLDITE'S reputation for highest quality and guaranteed uniformity from first to last.

The use of a MOLDITE ferricore properly designed into a specific coil has the following advantages.

- Lower losses (eddy current)
- Smaller sizes for more compact construction
- Higher efficiency
- Higher permeability
- Lower operating temperatures
- Less corona effect
- Lighter weight
- Lower cost

Problem:

To convert
Inter-Unit
Circuitry
to cable.

Solution:
See **Pacific
Automation
Products**
for your
**Electronic
Cable needs**

Pacific Automation treats each inter-unit cable as a systems component. In so doing the time-consuming, inadequate and costly "fixes" previously resorted to are eliminated.

Instead **Pacific Automation Products** engineers, designs, and manufactures flexible multi-conductor electronic cable.

- for any circuitry requirement
- in large or small quantities
 - in long or short lengths
- with neoprene, plastic, or any special jacket
- with or without connectors
- in time to meet schedules

Write for *Bulletin 158*

Engineers and technicians will find a challenging and fascinating career with us. Your qualifications are welcomed.

*True Hermetic Sealing
assures Maximum Stability*

in **AMPERITE** **RELAYS and REGULATORS**

Simplest • Most Compact • Most Economical

STANDARD

MINIATURE

Thermostatic DELAY RELAYS

2 to 180 Seconds

- Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.
- Hermetically sealed. Not affected by altitude, moisture, or other climate changes.
- SPST only — normally open or normally closed.

Amperite Thermostatic Delay Relays are compensated for ambient temperature changes from -55° to $+70^{\circ}$ C. Heaters consume approximately 2 W. and may be operated continuously. The units are most compact, rugged, explosion-proof, long-lived, and — inexpensive!

TYPES: Standard Radio Octal, and 9-Pin Miniature

**PROBLEM? Send for
Bulletin No. TR-81**

Also — Amperite Differential Relays: Used for automatic overload, under-voltage or under-current protection.

BALLAST REGULATORS

Amperite Regulators are designed to keep the current in a circuit automatically regulated at a definite value (for example, 0.5 amp.) . . . For currents of 60 ma. to 5 amps. Operate on A.C., D.C., Pulsating Current.

T9 BULB

Hermetically sealed, they are not affected by changes in altitude, ambient temperature (-55° to $+90^{\circ}$ C.), or humidity . . . Rugged, light, compact, most inexpensive.

ELECTRICAL INDUSTRIES

44 SUMMER AVENUE, NEWARK 4, NEW JERSEY

N-CAPS

ENCAPSULATED IN EPR's own thermo-setting resin to surpass the requirements of MIL-R-93 amendment 2 characteristic "A". Available in all the standard military sizes plus hundreds of sub-miniature and special sizes and shapes, N-CAPS have become the standard in the precision wire wound industry.

Realizing the importance of encapsulation, EPR is the only manufacturer of resistors who produces its own plastic, extrudes its own rod, and machines its own bobbins. It is because of these controlled manufacturing techniques that EPR is able to offer N-CAPS at prices comparative with outdated varnish impregnated resistors.

"PC" RESISTORS FOR PRINTED CIRCUIT APPLICATIONS

Designed to meet the requirements of Mil-R-93 characteristic "A" these new PC-type resistors are a boon to the engineer confronted with environmental problems.

The use of EPR high temperature N-CAPS encapsulation material, allows these miniature components to be operated at full rated wattage in ambient temperatures up to 125° C.

Cylindrical in configuration, EPR's PC-type resistors can be mounted with 25% saving in precious "Plate" space. Standard units are supplied with EPR's alloy E wire, having a temperature coefficient of 22 parts per million per degree C. Other temperature coefficients are available upon request.

TEMPERATURE COMPENSATING RESISTORS

Temperature coefficients that range as high as 10,000 parts per million per degree C are now available in sub-miniature encapsulated type.

Special technique and equipment has enabled EPR to produce closely matched temperature compensating resistors to solve problems involved in the design and manufacture of such critical items as magnetic amplifiers, altitude computer servo systems and special bridge networks. These lightweight encapsulated resistors have replaced entire circuits in many instances.

RC AND L NETWORKS

EPR introduces complete RC-L networks in a plug-in unit. These are hermetically sealed to withstand extreme environmental and vibration conditions. Built to consumer specification and matched to as close as .01%, these encapsulated packages save valuable chassis space.

Where needed a built-in heater element and thermostat to control the operating temperature of the network is provided. The illustrated plug-in contains precision wire wound resistors and polystyrene capacitors aged and matched to within seven parts per million of each other. The built-in oven maintains a temperature of $75^{\circ}\text{C} \pm 1^{\circ}\text{C}$.

Units from 1 inch by 1 inch with an octal base to 12 inches by 18 inches with 48 standoff and mounting studs are being manufactured in a choice of colors to help identify different circuits packaged in similar sizes.

means

PRECISION

LOW DISTRIBUTED CAPACITANCE MATCHED TEMPERATURE COEFFICIENT RESISTOR

Excellent matched characteristics over wide temperature and frequency ranges, combined with very low distributed capacitance are the outstanding features of the Type SSS Matched Precision Resistors shown above. These attributes make the units useful for such applications as high frequency precision test equipment, for computers where input capacity is important, for many types of bridge networks, in d-c amplifiers, and in servomechanisms where phase shift may be critical.

The distributed capacitance of these wire wound units is held to values as low as 0.5mmfd to 1mmfd on a 1 megohm resistor. This feature is especially valuable in high frequency applications.

The unusual features of these precision resistors will help solve many difficult design problems where accurately matched circuits and low distributed capacitance are required.

Individual resistors are accurate within $\pm 0.05\%$, and are available in resistance values from 25 ohms to 2 megohms in $\frac{1}{4}\text{W}$ to 1W ratings. A typical 1 megohm unit is $1" \times \frac{3}{8}"$ diam.

COMP-U-TRIM

A revolutionary departure in trimming potentiometer design. Such sought after features as high resolution, encapsulation to protect against humidity and wide range of temperature coefficients are combined for the first time into a single trimming potentiometer. This new trimming potentiometer offers numerous additional advantages including amply aged resistance wire to assure maximum stability... specially selected resistance wire and many more. A combination fixed and variable resistor is made possible thru the unique design of COMP-U-TRIM. Fixed values up to 1 megohm with a variable of as little as 50 ohms are feasible.

VIBRATION INDICATOR METER, MODEL 156

The newest addition to the growing EPR line, Vibration Indicator Meter Model 156, with integrating amplifiers and the scale reading amplitude in thousands of an inch is small

enough to allow four meters to be installed in a panel space of less than one foot square. Each meter has a self-contained regulated power supply. Plug-in, high pass frequency filters are available for any given engine or rig. Filters can be chosen to pass rotor-unbalanced frequency and to eliminate lower frequency shaking of the rig. Two filters of different cutoff frequency can be inserted at one time while a selector switch permits choice of either filter or none.

A 10-turn precision potentiometer is provided for accurately setting the calibration constant of any vibration pickup. Amplifier sensitivity is easily accomplished with the use of built-in calibration circuits. Two different full scale meter ranges are made available by the use of the selector switch. Warning lights, sirens, or complete shut down of engine or rig are actuated by vibration exceeding a pre-calibrated amplitude.

HIGH-FIDELITY TURNTABLES

Professional performance standards combined with maximum simplicity of operation. Beautifully machined 12" or 16" cast aluminum turntables for super-smooth, rumble-free operation. Choice of heavy-duty four-pole motor or hysteresis synchronous motor to meet all requirements in speed accuracy. Three-idler drive system with interchangeable idler wheels minimizes wear. Single-flick shift, operated in one plane, selects 33 $\frac{1}{3}$, 45 or 78.26 r.p.m. speeds and shuts off motor.

Model T-18, 12" turntable, four-pole motor.....\$ 66.00
 Model T-18H, 12" turntable, hysteresis motor..... 117.00
 Model T-68, 16" turntable, four-pole motor..... 87.00
 Model T-68H, 16" turntable, hysteresis motor..... 147.00

DISC RECORDING EQUIPMENT

Ideal for home or semi-professional use. Three-speed operation without adapters. PRESTO cutter head for both standard groove (110-line pitch) and microgroove (220-line pitch). Records discs up to 13 $\frac{1}{4}$ " diameter. Comprises the popular T-18 Turntable, recording and playback amplifiers, high-fidelity pickup with turnover cartridge, and two speakers (woofer and tweeter) mounted in cover of carrying case. Separate microphone and radio inputs, monitor jack, level indicating meter and recording equalizer also featured.

Model K-11, complete with four-pole motor.....\$396.00
 Model K-11, complete with hysteresis motor..... 445.00
 Recorder mechanism only, with four-pole motor 210.00
 Recorder mechanism only, with hysteresis motor 259.50

RECORDING DISCS

PRESTO Green, Brown, White and Orange Labels for Instantaneous Recording. Single and Double-Sided Masters.

The perfect disc for every recording need. Optimum performance combined with highest permanence. Made to conform with rigid PRESTO standards and quality-controlled at every step.

Also available from PRESTO — a complete line of sapphire and stellite cutting and playback needles.

Export Division:
 25 Warren Street, New York 7, N.Y.

Canadian Division:
 Instantaneous Recording Service,
 42 Lombard Street, Toronto

TAPE RECORDING and PLAYBACK EQUIPMENT

PRESTO R-11 Series

Professional Tape Recorders

The ultimate in recorder-reproducer units. Three full-track heads. Tape speeds 15 and 7 $\frac{1}{2}$ ips, with others on special order. Reels sizes 10 $\frac{1}{2}$ " or 7". Exclusive capstan drive with hysteresis motor. Torque-type reel motors. Solenoid-operated, self-adjusting brakes. Variable fast-speed control. Wired for remote control.

Model R-11 tape transport mechanism (chassis only).....\$ 775.00
 Model R-11 in carrying case..... 827.00
 Model SR-11 recording console (includes R-11 mechanism, A-901 amplifier and CC-2 studio console)..... 1250.00
 Model SA-5 remote control switch..... 40.00

PRESTO SR-27 Tape Recorder

A moderately priced tape recorder for professional and home use. Consists of R-27 tape transport mechanism and A-920B amplifier. Three separate heads. Three-motor drive, including hysteresis capstan motor. Tape speeds 15 and 7 $\frac{1}{2}$ ips, plus fast forward and rewind. Reel sizes up to 8". 10-watt amplifier has two built-in speakers and controls.

Model SR-27 complete in two portable carrying cases.....\$588.00

PRESTO Long-Playing Tape Reproducer for Background Music

8 hours continuous playback from 14" reels with dual-track operation at 3 $\frac{3}{4}$ ips. Fool-proof, trouble-free, economical. Complete assembly includes PB-17A tape playback mechanism, A-904 preamplifier and CC-4 (horizontal) cabinet*.

Complete.....\$996.00

*Cabinets for vertical mounting available

the
PRESTO
LOOK...

different where
 it counts

Functionally designed without mechanical or electronic "gingerbread"... precision-engineered without compromise... massively constructed without economizing on components and machined parts... custom-built without short-cuts... quality-controlled without fail... THAT'S the Presto Look — result of a quarter century's experience as America's leading manufacturer of tape and disc recording equipment.

TAPE DUPLICATING EQUIPMENT

PRESTO DA-11 High-Speed Tape Duplicator

Adaptable for Telemetry and Digital Computers

Copies at 60 ips both single and dual-track tapes previously recorded at 3 $\frac{3}{4}$, 7 $\frac{1}{2}$ or 15 ips. Duplicating time 4 min. for 7" reel and 8 min. for 10 $\frac{1}{2}$ " reel, single or dual track. Duplicates within ± 2 db of original at all frequencies. Assembled on two separate relay rack cabinets, one holding PB-111 Playback Group (Master) with tape reproducer mechanism, two amplifiers and control panel; other holding R-111 Recorder Group (Slave) with tape recorder mechanism, two recording amplifiers and meter panel.

Three magnetic heads on each rack — 1 full-track, 2 half-track. Frequency response up to 120,000 cps.

Model DA-11 Complete.....\$3575.00
 Additional Slave Units (each)..... 1980.00

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

For Product Data . . .

750 volts—"one-piece" units, or separate sections—slip-fit sections for hand-assembly, pres-fit for permanent assembly—contacts for stripped wire (#18 thru #4, to 70 amp's), for terminal-ended wires (#8 and smaller, to 35 amp's)—any number of circuits.

"One-Piece" Terminal Blocks . . .

750 volts, 50 amp's—solderless connectors for #16 thru #6, strap connectors for terminal-ended wires—4, 6, 8, & 12 circuits.

AN type Terminal Strips . . .

Per AN 3436 or other Government or commercial specifications—#6 studs, 1-20 circuits; #8 or #10 studs; 1-16 circuits, 1/4", 3/16" or 3/8" studs, 1-8 circuits.

New . . . **LOW COST
PRECIOUS METALS
PLATING PROCESSES!**

From coast to coast, electronic and electrical manufacturers are installing Sel-Rex Bright Gold, Rhodium and Silver Processes as best suited to their exacting requirements.

Sel-Rex PROCESSES used extensively in following products

Printed Circuits

Connectors

Tubes

Wave Guides

Switches

Reflectors

Sel-Rex BRIGHT PRECIOUS METAL PROCESSES have unique features which make them particularly suited for the electronic and electrical industries. Sel-Rex Bright Gold, for example, gives a mirror-bright finish directly from the bath—regardless of thickness requirements . . . economical, too— one gram does the job of 2 grams of conventional 24 K. gold.

Among the many advantages of Sel-Rex Bright Rhodium is that it actually plates bright longer (heavier deposits) than other rhodium processes.

*EXTRA — Sel-Rex offers A.S.C. — Automatic Stress Compensation — a special technique which counteracts the high stress characteristics inherent in conventional precious metals plating.

TIMERS, electronic

provide split-second timing
with no-filament tube

Compact electronic timers use Type 5823 cold-cathode tube, providing long tube-life with instant timing, no warm-up needed; immediate recycling—no re-charging time for condenser required.

Ideal for Short intervals—0.03 to 24 seconds.

Easy time adjustments—small time intervals can be spread over 320-degree dial.

Six-time ranges—can be furnished with full-scale range of 0.2, 0.5, 1.5, 3, 6, 12, or 24 seconds.

Eight-ampere contacts.

Small size— $3\frac{3}{4}'' \times 4\frac{3}{8}'' \times 2''$.

The new Model 3 Repeat-cycle Timer is fully enclosed; has plug-in relays for easy servicing.

Synchronous Contactors

Positive, precise coordination of electrical circuits with mechanical systems. Rotating camshaft actuates distributor-type switches to open and close electric circuits to

control punch presses, machine tools, and computers; provides protection of looms, punch and die tools. Single- and double-circuit models available. Descriptive bulletin on request.

RELAY, electronic

Operated by
high-speed,
low-energy
impulses.

Type CK Electronic Relay picks up impulses too small to operate a mechanical relay directly and holds circuit closed long enough for heavy mechanical equipment to be actuated.

Fast response—relay operates on contact of less than 0.5 millisecond.

High Sensitivity—above response speed even thru contact resistance as high as 500,000 ohms.

Adjustable actuating time—relay operates in 10 milliseconds after impulse and stays "on" for time adjustable between 0.25 and 1.5 seconds.

Long life—Cold-cathode tube energized only when pulse is received.

Easy maintenance—Enclosed plug-in relay.

Small size— $3\frac{3}{4}'' \times 4\frac{7}{8}'' \times 3''$.

Prefixes indicate material: Standard is chrome bearing steel (SAE 52100); use no prefix. All bearings, except No. 1½PR, also available in 440 stainless: use prefix SS in ordering. ▼ Indicates also available in 25 beryllium: use prefix NM in ordering. § Indicates sizes available with spring separator, specify suffix S in place of C as shown. † Indicates minimum shaft (S) dimension, (SE) dimension on request. Single Shielded Radial Retainer Series also available, specify CH, dimensions identical to Radial Retainer Series with exception of following which are wider: 2½ CH (.0937), 3CH (.0937), and 4CH (.1094). Single Shielded Flanged Radial Retainer Series also available, all dimensions identical to Double Shielded Flanged Radial Retainer Series. Specify FCH and side to be shielded. Grooved Radial Retainer bearings are also available in 9 sizes. Root diameter of groove is the same as O.D. of equivalent Radial bearing. Self-Aligning Series and extended inner bearings available. Details on request.

MPB ball bearings

are available in ten design series and in more than 500 different types and sizes which normally can be supplied from stock for prompt installation.

Instrument manufacturers and users of small precision mechanisms can now utilize all the well known extra advantages of anti-friction bearings (accurate alignment, long wear, freedom from attention) universally accepted in larger quality equipment.

For more than 20 years MPB ball bearings have contributed to the successful operation of precision mechanisms. A pioneer in designs and

dimensions now being internationally standardized, MPB has also originated many precision manufacturing techniques. All MPB ball bearings are ground, lapped, honed and/or burnished in accordance with highest quality practice for optimum operating characteristics. Inspection limit tolerances are equal to ABEC 5 or better.

The most extensive engineering knowledge in miniature bearing applications is available to you. More than a million MPB ball bearings have been installed in precision mechanisms. Catalog 55-56 giving complete specifications, and additional data sheets mailed to you on request.

Thor for STEATITE and EPOXIDE RESIN INSULATORS

- LOW LOSS FACTOR
- HIGH DIELECTRIC STRENGTH
- QUALITY CONTROL TO GOVERNMENT SPECIFICATIONS

YOU CAN SAVE MONEY and get speedy deliveries on custom-made epoxide and steatite bobbins because THOR CERAMICS is a specialist in this field . . . supplying most of the nation's leading bobbin users.

Leaders in the electronic field specify THOR for their steatite EXTRUDED, PRESSED and MACHINED parts. That's because THOR has the production "know-how" for producing standard and custom-made items to Jan-I-10 or customers' specifications for insulators, metalizing and close tolerance ground parts. Let us quote on your requirements.

supramica® ceramoplastics

... THE WORLD'S MOST NEARLY PERFECT INSULATION

The research and production skill of Mycalex Corporation of America has for many years given design engineers the ultimate in versatile electrical insulation materials . . . MYCALEX®, the original glass-bonded mica . . . SYNTHAMICA,

the first commercially produced synthetic mica . . . and a completely new ceramoplastic — SUPRAMICA® — for applications that demand the ideal combination of physical, thermal and electrical characteristics.

TYPICAL APPLICATIONS

SUPRAMICA® 555 IS MOLDABLE!

This superior ceramoplastic insulation features . . . continuous operation at temperatures up to 950°F . . . complete dimensional stability . . . moldable to precision tolerances . . . positive bonding to metal inserts . . . low electrical

loss . . . very high arc resistance . . . no carbonization . . . resistance to moisture, oil and organic solvents . . . permanent radiation resistance . . . high dielectric strength . . . thermal expansion coefficient same as steel.

TYPICAL APPLICATIONS

SUPRAMICA® 500 IS MACHINEABLE!

This superior ceramoplastic insulation features . . . continuous operation at temperatures as high as 1000°F . . . machineable to precision tolerances . . . absolute dimensional stability . . . high dielectric strength . . . low electrical loss

. . . very high arc resistance . . . no carbonization . . . thermal expansion matching steel . . . water-, organic solvent-, and oil-proof performance . . . permanent radiation resistance . . . good mechanical strength.

Other Famous MYCALEX Products . . . for Special applications

MYCALEX 410®

Standard quality moldable glass-bonded mica insulation.

MYCALEX 410X®

Lightweight moldable glass-bonded mica insulation.

MYCALEX 400®

Standard quality machineable glass-bonded mica insulation.

MYCALEX® K and KM

Capacitor dielectrics.

TELEMETERING EQUIPMENT and COMPONENTS

Mycalex Model TM55 Series Commutation Switches and SUPRAMICA 555 ceramoplastic Commutator Plates . . . perfect for low-voltage, low-noise-level switching . . . write to Department 111 for full technical information.

**MYCALEX
CUSTOM-
MOLDING
AND
CUSTOM-
MACHINING
SERVICES**

. . . unexcelled facilities are ready to fill all your insulation requirements . . . short runs or mass production to meet the most stringent tolerances and delivery schedules . . . write to Department 112 for full details.

SILVER GRAPHALLOY BRUSHES

Silver GRAPHALLOY Brushes have been widely used because of LOW and CONSTANT CONTACT DROP, EXTREMELY LOW ELECTRICAL NOISE and LONG LIFE... especially for rotating strain gages, thermocouple circuits, synchros, guided missiles, fire control equipment, transducers, radar and sonar equipment, servo-mechanisms, selsyns, dynamotors and other avionic applications.

The GRAPHALLOY process was patented over 40 years ago and the name GRAPHALLOY has been our registered trademark since that time. While this company has been selling GRAPHALLOY for over 40 years, recent developments have added materially to its properties. Over 200 grades are now used in a wide variety of applications. Silver GRAPHALLOY Brushes on 1/2"-diameter coin silver slip rings have been used successfully in highly critical electrical circuits at speeds up to 100,000 R.P.M. Our Engineering Department will assist in determining the exact grade of GRAPHALLOY for your needs. Ask for our Brush Inquiry Form 109.

BRUSH and SPRING ASSEMBLY

Silver GRAPHALLOY Brushes are available for the standard Brush Holders described in the next column. Springs are supplied, as part of the assembly, to give the correct brush pressure for each brush application. Shunts are provided to insure extremely low electrical noise level and for carrying heavy currents.

COIN SILVER SLIP RINGS

Standard Coin Silver Slip Rings, both cylindrical and flat types, are illustrated below. We recommend the cylindrical type ring with three brushes per ring... spaced at 120°. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type or slip ring assemblies can be furnished with leads attached.

Standard "Flat" rings have 1/4" radial contact surface and 1/8" radial spacing between adjacent rings.

**To outer end of coupling.

Applications: from strain gage or thermo-couple up to 3 amperes, 125 volts, 250°F. Speeds to 5,000 RPM.

Three Silver-GRAPHALLOY Brushes per solid coin silver slip ring.

Extraneous noise level extremely low. Rugged in design and construction. Readily connected mechanically and electrically.

Complete coupling provided for 1 5/16" shaft. More rings and higher speeds available upon application.

GRAPHALLOY CONTACTS

GRAPHALLOY, because of its inherent non-welding and arc-quenching characteristics, is used widely for contacts...especially where positive breaking of a circuit is required.

STANDARD SOLID COIN SILVER CYLINDRICAL SLIP RING ASSEMBLY

Part	Rings	Length
319-4	4	2 9/16
319-6	6	3 5/16
319-10	10	4 1 3/16
319-14	14	6 7/16

Slip ring O.D. 1 5/8". Terminal O.D. 4". Range: Same as for Model 399.

STANDARD SOLID COIN SILVER FLAT SLIP RING ASSEMBLY

Part	Rings	Overall O.D.—"A"
409-2	2	5 1/2
409-4	4	7
409-6	6	8 1/2
409-10	10	11 1/2

To 3 amperes, 125 volts. More rings available upon application.

GRAPHALLOY BUSHINGS

With military requirements demanding operation from -100° to +250°F., GRAPHALLOY Bushings, which are inherently oilless, have been used successfully in potentiometers, synchros, cameras, instruments and missiles. Properly designed GRAPHALLOY Bushings will take considerable shock (50 g.). They have replaced oil-lubricated bushings for the following reasons:

- 1) Lower friction at room temperatures.
- 2) No oil to solidify at low temperatures.
- 3) No oil to carbonize at prolonged elevated temperatures.

Ask for Data Sheets 270 and 277 on Miniature, Bronze-GRAPHALLOY Bushings.

GRAPHALLOY BRUSHES

are used on
such equipment as...

- SERVO SYSTEMS
- SYNCHROS
- SELSYNS
- CHOPPERS
- RADAR
- GYROS
- INVERTERS
- PULSE SYSTEMS
- GUIDED MISSILES
- DIGITAL COMPUTERS
- WAVE GUIDES
- SONAR
- TRANSDUCERS
- TORQUE INDICATORS

GRAPHITE METALLIZING CORPORATION

1053 NEPPERHAN AVE.
YONKERS, N. Y.

TYPE 10
INPUT: 120 volts, 60 cycle, 1 phase. OUTPUT: 0-120/132 volts, 1.25 amperes, .165 KVA. For Back-of-Panel.

TYPE 20
INPUT: 120 volts, 60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 3.0 amperes, .42 KVA. For Back-of-Panel.

TYPE 116U
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 7.5 amperes, 1 KVA. For Back-of-Panel.

Excellent Regulation

TYPE 116
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 7.5 amperes, 1 KVA. Enclosed with Cord-Plug, Receptacle, Fuse, Switch.

TYPE 3PN116
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 7.5 amperes, 1 KVA. Third Wire Grounded.

POWERSTAT®

Variable Transformers

STANDARD TYPES meet even the most unusual conditions

The most extensive line of variable transformers is POWERSTAT. Only the POWERSTAT line offers the innumerable standard air-cooled types for manually-operated or motor-driven duty; the oil-cooled models; the explosion-proof units. Look to POWERSTAT for the complete line of variable transformers of the highest quality . . . designed, engineered and manufactured to provide long, dependable service.

TYPE 136
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 20.0 amperes, 2.8 KVA. Exposed Terminal Connections.

High Efficiency

TYPE 2PF136
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 20.0 amperes, 2.8 KVA. With Cord-Plug, Fuse, Receptacle.

Manual and Motor-Driven Operation

TYPE 15M136-3Y
INPUT: 240 volts, 60 cycle, 3 phase. OUTPUT: 0-240/280 volts, 20 amperes, 9.7 KVA. Motor-Driven for Remote Control.

Conservative Ratings

TYPE 1156
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 45 amperes, 6.3 KVA. For Heavy Duty.

Rugged Construction

TYPE 1126-1001
INPUT: 115 volts, 400/800 cycle, 1 phase. OUTPUT: 0-130 volts, 15 amperes, 1.95 KVA. With a Dust-Proof Container.

TYPE MW1156-6Y
INPUT: 240 volts, 60 cycle, 3 phase. OUTPUT: 0-280 volts, 90 amperes, 43.6 KVA. Motor-Driven for Easy Operation.

120, 240, 480 Volts — Single & Three Phase

TYPE MZ1156
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 45 amperes, 6.3 KVA. Motor-Driven for Remote Control.

TYPE 2106LC
INPUT: 95-135 volts, 50/60 cycle, 1 phase. OUTPUT: 115 volts, 52 amperes, 6.0 KVA. Limited Output Range or A Line Corrector.

Effortless Control of Power

TYPE O-1126
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 30 amperes, 4.2 KVA. For Oil-Cooled Operation.

Air-Cooled Oil-Cooled Explosion-Proof

TYPE X-1126
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 12 amperes, 1.7 KVA. Explosion-Proof for Hazardous Locations.

TYPE 10-1002
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120 volt, 1.25 amperes, .15 KVA. Complete Rotation.

THE SUPERIOR ELECTRIC COMPANY

For a constant
output voltage
from a-c power lines

STABILINE[®]

Automatic Voltage Regulators

STANDARD TYPES are available to fulfill the most exacting needs of automatic voltage regulation

STABILINES maintain a constant output voltage regardless of line or load changes. Type IE is completely electronic without moving parts; Type EM corrects faster than most regulators and maintains constant voltage to large loads without waveform distortion; Type TM, without tubes or moving parts, provides constant voltage regardless of line voltage or load changes. For the solution of automatic voltage regulation problems, check STABILINE.

TYPE IE5101R
INPUT: 95-135 volts, 60 cycle, 1 phase. OUTPUT: 115 volts, 8.5 amperes, 1.0 KVA. Instantaneous Electronic. No Moving Parts.

TYPE EM4102R
INPUT: 95-135 volts, 50/60 cycle, 1 phase. OUTPUT: 115 volts, 17.5 amperes, 2.0 KVA. Electro-Mechanical with Zero Waveform Distortion.

TYPE TM7101R
INPUT: 95-135 volts, 60 cycle, 1 phase. OUTPUT: 115 volts, 1.0 KVA. Tubeless Magnetic with No Moving Parts.

Three Types
to
Suit Individual
Applications

TYPE TM7105
INPUT: 95-135 volts, 60 cycle, 1 phase. OUTPUT: 115 volts, 5.0 KVA. Tubeless Magnetic without Transistors, Tubes or Moving Parts.

TYPE EM64100Y
INPUT: 420-500 volts, 50/60 cycle, 3 phase. OUTPUT: 460 volts, 131 amperes, 100 KVA. Electro-Mechanical for Large Industrial Loads.

TYPE EM10004
INPUT: 195-255 volts, 50/60 cycle, 1 phase. OUTPUT: 230 volts, 24 KVA. Electro-Mechanical Designed for MIL-E-16400.

TYPE EM10002
INPUT: 105-135 volts per phase, 55/65 cycle, 3 phase. OUTPUT: 120 volts, 55.5 amperes, 20 KVA. Electro-Mechanical Meets MIL-E-4158.

TYPE EM10006
INPUT: 385-490 volts, 45/65 cycle, 1 phase. OUTPUT: 440 volts, 2.2 KVA. Electro-Mechanical Meets U. S. Navy Specifications 16-E-4 and 40-T-9.

TYPE IE51002
INPUT: 95-135 volts, 60 cycle, 1 phase. OUTPUT: 115 volts, 2.2 amperes, .25 KVA. Completely Electronic Portable with Cord-Plug Receptacle.

TYPE EM10003
INPUT: 80-115 volts, 50/60 cycle, 1 phase. OUTPUT: 115 volts, 2.0 KVA. Electro-Mechanical for Normally Low Input Voltages.

TYPE EM10009
INPUT: 184-229 volts, 410 cycle $\pm 5\%$, 3 phase. OUTPUT: 203-213 volts, 14 amperes, 5.0 KVA. Electro-Mechanical Meets Specification MIL-E-4158.

TYPE IE20003
INPUT: 95-135 volts, 60 cycle $\pm 10\%$, 1 phase. OUTPUT: 115 volts, 8.5 amperes, 1.0 KVA. Completely Electronic for Military Applications.

TYPE IE20002
INPUT: 190-250 volts, 50/60 cycle, 1 phase. OUTPUT: 230 volts, .15 KVA. Completely Electronic, withstands High Humidity.

▶ Thermal Time Delay Relays

Stainless steel mechanism welded into a single integral structure for unequalled resistance to vibration and shock. Heater built inside expanding member for maximum efficiency and protection. Rolling contact action for positive operation.

RED DOT RELAYS—NEW low cost timing relay for Industrial Controls, Heating Equipment, Communications, Air Conditioning, Electronics. Available from stock in standard heater voltages and time delays.

HERMETICALLY SEALED TYPE—Adjustable time delay • Miniature and octal sizes—metal shells • Time Delays—1/10 sec. to 5 min. • Heater voltages up to 230 • Fully temperature compensated • For industrial and military applications • Contact ratings up to 6 amp.

TYPICAL USES Delaying plate voltage application • Producing hold-over interval after interruption of power • Delaying automatic shut-down until a fault has continued for a specified period.

Notably Efficient • Widely Used

Precision Thermal Devices

A quality line skillfully designed and thoroughly field-tested.

G-V Thermal Relays Have Proved Performance Advantages—

- So reliable that the country's principal producers of electronic equipment have adopted them as production components!
- So reliable that they have been used on hundreds of government contracts!
- So reliable that they have been in successful field use for over three years!

And G-V offers you helpful engineering cooperation and the most complete technical data service.

▶ Electrical Thermostats

Features: Hermetically sealed • Adjustable or fixed temperature • Rapid in response—metal shell is the sensing element • Wide variety of sizes and mounting forms • Exposure to -70°C . does not change setting • High shock and vibration resistance • Current rating—1 amp. to 10 amp. • Stable setting and precise control.

Voltage Sensing and Current Sensing Relays—Thermal Type

Features: Responds to changes in current or voltage • Currents .015 to 5 amp • Voltages 2 to 230 volts • Time constants—1 sec. to 200 sec. • Adjustable operating point • Minimum differential • Independent of ambient temperature • Independent of frequency • Hermetically sealed in metal shell • Miniature size • Small, light, and noiseless.

Typical Uses: Over- or under-voltage alarm or cut-off • Overload protection • Voltage or current regulation.

Write for bulletin and help with your particular problems.

Greatly expanded production facilities assure prompt deliveries.

RICHARDSON PLASTICS

LAMINATED INSUROK

Available in sheets, rods, tubes, and fabricated parts, in many grades, sizes, and thicknesses. Meets practically any requirement for uniformity, machinability, dielectric, printed circuitry, and physical strength.

MOLDED PRODUCTS

Parts molded from specially developed plastics materials as required for your product. Standard materials also used. Produced by compression, transfer, or injection process. Metal inserts molded into position.

RICHARDSON OFFERS YOU A Complete Range of TECHNICAL SERVICES

Richardson offers its wide experience in developing special plastics materials for your product. Also, research, design, and extensive engineering services without cost or obligation. We provide molding, laminating, molded-laminates, and fabrication facilities and techniques. This assures the correct selection of material and process for each application.

RESEARCH

For over one-quarter century, Richardson has pioneered in the development of new plastics and the improvement of old.

DESIGN

Experienced engineers analyze your requirements and help you select material, form, and process best suited to your needs.

PRODUCTION

Richardson has the plant equipment and know-how to handle even the largest, most difficult molded or laminated job.

FABRICATION

Complete facilities for punching or machining parts to your design and in any quantity.

DESIGN FACTORS: Every special need is prompted by requirements which cannot be met by standard units. As a check list for yourself and to assist our engineers in answering your inquiries, please include details of any critical requirements listed below:

ELECTRICAL CHARACTERISTICS:

MOTORS — Horsepower • Torque • Speed • Duty Cycle • Power Supply Voltage • Power Supply Frequency & Phase (AC)
GENERATORS — Voltage limits or adjustable range • Frequency limits or adjustable range (AC) • Watts or KW output • Number of phases (AC) • Load Power Factor (AC) • Speed • Type of Driving Motor • Excitation

MECHANICAL CHARACTERISTICS: Where critical, please indicate size, weight and mounting limitations; shaft lengths, keyways or splines, etc.; material; insulation; finish; environmental conditions or other special requirements.

Write today for free catalog 56 PD . . . we may already have the particular motor or generator you need!

DO YOU NEED
a really
RUGGED*
COMPACT
SENSITIVE
LIGHT-BEAM
GALVANOMETER

this is it...

*Will take
25 G's!

Here is a new series of light-beam galvanometers that were developed to withstand the extremely severe conditions of shock and vibration encountered in field servicing and testing of jet aircraft.

Through unique folding of the light beam, great compactness is achieved while retaining sensitivity to the highest degree... *equal to that of laboratory instruments!*

These Howell Galvanometers feature excellent readability. They are readily adaptable to existing instruments. They are competitively priced.

SPECIFICATIONS:

Sensitivity to .105 microamperes per millimeter. Resistances: 20, 100, 500 and 1000 ohms. Short period; high speed response. SIZE: ONLY 2.6" x 3.62" x 3.615" Sealed construction.

U.S. & Foreign Patents

ruggedized and sealed meters

Marion HS Series ruggedized meters are the original, glass-to-metal hermetically sealed, Mil-M-10304-A panel instruments. Withstand extreme shock, vibration, stress and strain. MIL 1 1/2", 2 1/2", 3 1/2" sizes. Standard ranges from stock; ua, ma, amp, mv, volt, kv, AC rectifier types.

HM Series hermetically sealed meters for use in severe climatic, atmospheric conditions. Shielded, high linearity, sustained accuracy. Dust and moisture-proof; MIL 2 1/2", 3 1/2", 4 1/2" sizes.

standard meters

Series 55 4-21/32"
by 4-5/32" 100° scale

Improved performance at moderate price for commercial use. High torque. Phenolic and metal cases. Widely used in portable equipment, testers, medical and communication equipment, general electronic service.

marion RELATED PRODUCTS

NULL INDICATORS

Unique core and magnet structure. Expanded sensitivity at null point, sharply attenuated as pointer departs from null point. Medalist type features high readability, null point mirror, many case colors. Interchangeable with ASA/MIL 2 1/2" sizes. Also available in HS Series 2 1/2", 3 1/2" round styles.

3/4" INDICATOR

Rugged, miniature indicator with easily read, colored sector disc dial. Hermetically sealed, meets MIL-E-5272A Proc. 1 vibration requirements. In all standard DC instrument sensitivities.

INDUCTION SOLDERING UNIT

Portable, bench type. Safe, simple, rapid operation. Locally heats hard-to-reach spots. Max. input 775 watts, 100 watts standby; 115 volts, 60 cycles. Dimensions 15 3/4" x 21 1/2" x 15".

ELAPSED TIME INDICATORS

Compact, low cost, tamper-proof, easily read. Shielded, hermetically sealed. Starts, operates -55° to +85°C. Registers 1/10 hour steps to 9999.9 or hour steps to 99999. ASA/MIL 2 1/2", 3 1/2" sizes. For 110-125 or 220-250 VAC, 60 cycles.

ULTRA-SENSITIVE RELAY

Rugged, reliable, weighs 1.5 oz. Utilizes Marion Coaxial mechanism. Hermetically sealed, standard 7 pin tube base. Engineering, application data on request.

*T.M. basic Marion moving coil mechanism. Pats. Pend.

VERSATILE METER TESTER

... power supply and limit bridge. Sensitivity ranges 25 ua to 10 ma full scale; 0-100V DC; 0-5000 ohms as limit bridge. Reg. power supply, stepless v.t. voltage control. Illuminated 8 1/2" hand calibrated mirror scale. Accuracy exceeds 1/4% (current), 1/2 ohm or 1/2% (resistance). For 115V 60 cycles. Complete -- needs no accessories.

VU METERS

New Medalist style offers greater readability, choice of case, dial colors. Meets latest A.S.A. specs. Standardized response time, damping. Interchangeable with ASA/MIL 2 1/2" and 3 1/2" sizes. Also available in Series 55 models.

WIRES & CABLES

SPECIALISTS IN THE DESIGN AND MANUFACTURE OF PLASTIC INSULATED CABLES

ELECTRONIC CONTROL SOUND SYSTEM

MILITARY SPECIFICATION WIRES

MIL-C-915 — Types SRI-MRI
 JAN-C-76 — Types WL-SRIR-SRHV-SRRF
 MIL-W-16878A — Types B-C-D-N
 MIL-W-76 — Types LW-FX-MW-HF-HW
 Above insulated with PVC — PVC & Nylon-
 Shielded, and PVC or Nylon Jacket. Avail-
 able in solid colors or stripes.

COAXIAL CABLES

Made to commercial Specifications as well
 as JAN-C-17A.

INTERCOM COAXIAL

REX K-F INSULATED WIRES & CABLES

Rex K-F wire insulated with trifluoromono-
 chloroethylene (Per MIL-W-12349) has excel-
 lent resistance to heat, abrasion, and most
 chemicals including nitric acid. Rated for
 continuous operation up to 150°C. It comes
 in 17 standard colors and special striping.

REX MICROWALL WIRES & CABLES

High precision miniature Nylon insulated
 wires for continuous use up to 125°C
 rated at 300 and 1000V service.

COMMUNICATION TELEPHONE

UNDERWRITER APPROVED WIRES

Types TF and TFF-AWM 80°C to 105°C.
 Approved in continuous service to 105°C.

TELEPHONE CABLES

All Plastic Types — Rural Distribution —
 Inside Cables — Aerial and Duct.

MISCELLANEOUS CABLES

Designed for or manufactured to cus-
 tomer specifications employing the use of
 Polyvinyl Chloride — Polyethylene —
 Nylon or Trifluoromonoethylene as
 insulations with temperature ratings from
 -125°C to +150°C.

REXOLITE #2200 — NEW — A glass reinforced sheet with UHF
 electrical properties in the same general range as Rexolite #1422
 but with the added properties of good punch-ability, high impact
 strength and lower price.

REXTRUDE #105 TUBING is a polyvinyl plastic tubing having excep-
 tional insulating characteristics at high operating temperatures. It is ap-
 proved by Underwriters Laboratories and rated for -30°C to +105°C.

UHF INSULATION

REXOLITE #1422 — A Thermosetting Styrene Co-Polymer available in
 sheets and rods having high heat resistance and the machinability of
 free-turning brass. Dielectric Constant 2.5 from 10² to 10¹⁰ cycles
 per second. Dissipation factor .00015 at 1 megacycle.

ELECTRICAL TUBING

REXTRUDE #1000 TUBING is a vinyl plastic tubing formulated to
 comply with Military Specification MIL-I-631C It is used wherever
 exceptional resistance to tear and abrasion is required. It has excel-
 lent elasticity permitting stretch over lugs and splices.

OTHER PRODUCTS

RIGID, SEMI-RIGID AND FLEXIBLE plastic extrusions.

Precision Sub-Fractional & Fractional

50, 60, 400 cycles and variable frequency; single and dual frequency; single, two and three-phase operation; 1/3500 to 1/2 hp; 1" to 6 5/8" diameter.

Precision Gear Motors

50, 60, 400 cycles and variable frequency; single and dual frequency; single, two and three-phase operation; high torque; wide variety of gear ratios up to four speeds.

BLOWERS & FANS

Axial Flow & Vane Axial

A complete line of light-weight, centrifugal blowers, ring mounted fans and vane axial fans for cooling electronic equipment or for general purpose use.

Capacities range up to 1000 cfm with special designs available for high static pressures. Single and double ended—50, 60, 400 cycle and variable frequency (360-1600 cycles).

ALTERNATORS

Alternators available from 1" diameter, .01 va; to 6 5/8" diameter 800 va; power up to 400 volt-amps; wide frequency range. Low harmonic content—units are capable of delivering a sine wave with less than 2% distortion. Dual frequency units produce a combination of frequencies and voltages for special applications.

DC TACHOMETER GENERATORS

DC voltage generators provide a voltage signal proportional to speed, with high linearity for tachometer and control applications.

NEW

Heldor
**DRAWN
CANS**

ALL STANDARD MIL-T-27A and many
Civilian Sizes NOW AVAILABLE !

HELDOR'S new and enlarged production facilities now include complete dies for the drawing of cans and covers to all standard MIL-T-27A sizes. Tooling may be available for your requirements. If not, HELDOR provides tooling facilities for other draws.

Whether you require drawn or fabricated cans, you'll find HELDOR the first source for quality, service and economy.

See for yourself! Send us your "specs" or prints for money-saving quotations on existing or custom-made sizes.

NEW

SINGLE-ENDED
MOUNTING STUD

Pilot insures positive centering, making possible the holding of fixed mounting centers.

DOUBLE-ENDED
MOUNTING STUD

Heldor
carbon or stainless steel
**MOUNTING
STUDS**

HELDOR now makes available single and double-ended mounting studs of carbon or stainless steel which definitely cut production costs. The unique Heldor design (see illustration above), with shoulder acting as a pilot in locating mounting centers, eliminates the need for locating fixtures at stud welding. This lowers production costs and eliminates rejects. And, HELDOR Mounting Studs cost initially less than ordinary ones. Why be satisfied with less than the best?

Write for prices for the *sizes you require.

with *Heldor*
MOUNTING PILOT

Other famous HELDOR Products and Services

- Hermetic seal LOCK-IN, non-twist Terminals as well as standard compression types.
- Custom metal cabinets, chassis, brackets and panels.
- Centrifugal hot finning and other finishes.
- A complete hermetic seal assembly service!

*Popular sizes in stock. Minimum quantity orders of 25,000 pieces on custom sizes.

HELDOR MANUFACTURING CORPORATION

238 Lewis Street

Paterson, N. J.

Weston OSCILLOSCOPE (Model 983)
 — a high gain, wide band scope with identical amplifiers, ideal for phase measurements, frequency comparisons, and *all-purpose* visual wave form analysis. Choice of a-c or d-c coupling — excellent square wave reproduction, overshoot 2 to 5% — rise time 0.1 microsecond. Sensitivity (both amplifiers) 15 millivolts per inch RMS — band pass characteristics within 3 db at 4.5 megacycles.

Weston TUBECHICKER (Model 981)
 — standard throughout industry since 1926. Filtered d-c potentials provide better Gm accuracy. Voltage divider network for better grid bias settings. The four signal levels provided protect against excessive grid current surges. Provision for tube interelectrode leakage measurements as high as 10 megohms.

Weston Miniature ELECTRICAL RECORDER (Model 6401)
 — ideal for recording current variations — monitoring radio detectors — recording speeds — making life tests on batteries, lamps, etc. Employs Cormag® self-shielded mechanism — size only 6 3/4" x 6 1/4" x 7" — chart size 4" dia. Available in required ranges for a-c or d-c voltage or current measurements.

Specialized Instruments..

— to do important electronic and electrical measurement jobs better, quicker, at lower cost

WESTON Instruments

Literature on these and other Weston instruments for production, laboratory or maintenance needs, gladly sent on request.

WESTON ELECTRICAL INSTRUMENT CORPORATION
 614 Frelinghuysen Avenue, Newark 5, New Jersey

Weston 1301 Line Panel Instruments
 — a new line of 3 1/2" panel instruments employing the CORMAG® self-shielded mechanism, which provides added dependability and substantial cost-savings on built-in requirements. Instruments can be mounted on magnetic or non-magnetic panels interchangeably, and there is no magnetic intereffect when mounted in close proximity.

Weston Precision Portables (Model 901)
 — provide unequalled scale visibility due to wrap-around windows, efficient shielding, accuracy of 0.5%. Available as d-c voltmeters, volt-ammeters, ammeters and milliammeters — a-c single and 8 range voltmeters, single and 7 range ammeters, milliammeters — also a-c and d-c single phase wattmeters.

Weston All-Purpose ANALYZER (Model 980)
 — a versatile, rugged instrument with a combination of functional ranges to cover a wide range of test measurement needs. D-c sensitivity 20,000 ohms/volt, a-c sensitivity 1000 ohms/volt. Range and functional switching greatly simplified by use of a single dial. Accuracy 2% d-c; 3% a-c. Scale length 4.63" — size 6 1/4" x 7 1/2" x 3 1/4".

Weston Miniature CLAMP VOLT-AMMETER (Model 749)
 — light weight, pocket size, and really rugged. Employs CORMAG® self-shielded, shock-mounted mechanism. Shatter-proof Plexiglas window. One scale for all ranges and functions. Jaws take up to 1" round or 1 3/4" rectangular conductors. Ranges — current: 300/150/60/30/15/6 amperes a-c...voltage: 600/300/150 volts a-c.

microwave absorbers by

McMillan

McMillan Industrial Corporation makes various materials for the absorption of microwave energy, for indoor or outdoor use and for ground or airborne applications. Listed below are the three most popular absorbers, their typical applications, specifications and characteristics.

TYPE "T"
THIN — FLEXIBLE

Especially adaptable for airborne applications, the type "T" is an extremely versatile absorber where space and weight limitations are essential. Easily formed, it is impervious to effects of moisture, hydraulic fluids, gasoline etc., when edge sealed.

SPECIFICATIONS

Frequencies:	2500 to 35,000 MC.
Bandwidth:	± 3%
Power Reflection Coefficient:	
Perpendicular Polarization	2%
Parallel Polarization	4%
Perpendicular & Parallel Polarization	3%
Power Dissipation:	2 watts/sq. in.
Temperature Range:	-62°F to 172°F
Thickness & Weight:	at 9375 MC., $\frac{3}{16}$ " thick, 4.7 oz. sq. ft.
	at 5400 MC., $\frac{1}{4}$ " thick, 5.7 oz. sq. ft.
Standard Sheet Size:	18" x 36"

TYPE "BL" & "BH"
PERMANENT — LIGHTWEIGHT

Two stable absorbers whose high performance and long life is not affected by moisture, humidity and dust. Type "BL" is fine for walls, ceilings and test panels. Type "BH" is excellent for test room floors and outdoor installations, as its high absorption characteristics are unchanged when it is walked on.

SPECIFICATIONS

Frequency range:	2400 to 35,000 MC.
Power reflection coefficient:	0.4% at 24,000 MC.
(perpendicular and/or parallel polarization)	1.0% at 9,400 MC.
	2.0% at 5,400 MC.
Power dissipation:	2 watts sq. in.
Temperature range:	(type "BL") -62°F to 155°F
	(type "BH") -62°F to 175°F
Standard block size:	2 $\frac{1}{8}$ " thick, 4' long, 1' wide
Weight:	(type "BL") 1.5 lbs. sq. ft.
	(type "BH") 1.8 lbs. sq. ft.

TYPE "H"
LIGHTWEIGHT — ECONOMICAL

Recommended for indoor, temporary or portable type of panel test ranges. Lightweight — easily mounted. A good absorber for fast, accurate measurements.

SPECIFICATIONS

Frequency range:	500 to 35,000 MC.
Power reflection coefficient:	2%
(perpendicular and/or parallel polarization)	
Power dissipation:	1 watt sq. in.
Sheet size:	2' x 2'
Thickness and Weight:	(1" thick) .5 lbs./sq. ft.
	(2" thick) .65 lbs./sq. ft.
	(4" thick) .94 lbs./sq. ft.
	(8" thick) 1.9 lbs./sq. ft.
Temperature range:	-65°F to 122°F

BUYERS' GUIDE

**"free space"
 rooms . . . by**

McMillan

McMillan offers a **Prefabricated "Free Space" Room** which can easily be assembled, dismantled or changed in size. The room comes in "modular" units, consisting of structural steel frames 4' x 8', which are easily bolted together to form the size room for your requirements. Strong plywood panels, mounted with the proper microwave absorber, are then quickly clipped into place on the framework to form a complete portable "free space" room.

McMillan modular "free space" rooms can be produced for either indoor or outdoor use with whatever type absorber may be required. Generally, McMillan Type "BL" is used on ceiling and walls due to its light weight, while floor panels utilize McMillan Type "BH", which can be walked on without affecting its electrical performance. "Modular" panels are usually backed with copper shielding to prevent R.F. disturbance from outside.

McMillan also produces **Permanent "Free Space" Rooms** to meet your specific requirements. For such rooms, McMillan offers a complete design and consulting service in addition to the materials for the room.

**and
 special microwave absorbers**

McMillan also designs and produces their microwave absorbers in special configurations to meet specific size and shape requirements as well as for unusual environmental and temperature conditions.

Bird

COMPLETE JEWEL ASSEMBLIES

Cut assembly time, lower costs, stops rejects by specifying complete jewel assemblies for your products. Special mounting techniques developed by Bird provide assemblies, set in screws or bushings of any style, to your specifications — ready for immediate installation. Prove it in your own plant — send a print with specifications — we'll provide samples for testing.

NEED SHOCK PROTECTION?

Bird jewels mounted with resilient silicon rubber provide real protection for movements under severest conditions. Variable cushioning to suit different operating conditions; mountings of any style; controlled jewel movement; elimination of rejects and tear-down due to faulty adjustment — actual tests prove these advantages can be incorporated into your instruments at low cost by using Bird Cushion Jewel Assemblies.

PROTECTION

USE *Bird* JEWEL BEARINGS
for built-in accuracy and performance

Low torque instruments and control devices must operate with the lowest possible coefficient of friction for true accuracy. Bird Jewel Bearings, of sapphire or borosilicate glass, insure precision performance and longer instrument life because they are made to exact tolerances under strict quality control methods. Bird jewels are used in the world's most famous aircraft, electrical and timing instruments; all types of recorders; and fine indicating apparatus.

Bird Jewels are available in a wide variety of styles in standard sizes or supplied to customers specifications — mounted or set in bushing or screw type assemblies. The engineering staff is at your service for all small bearing problems. A request on your letterhead for Bulletin 100-6 will bring complete information.

Over 40 years of serving industry with Quality jewel bearings

SELENIUM

SILICON

RECTIFIERS

Selenium Power Rectifiers

A full range of ratings is available. Cell sizes range from 1/16 inch diameter to 4 1/4 inch by 12 inches to provide extreme flexibility of design.

HIGH TEMPERATURE—Made by a special process Sarkes Tarzian High Temperature Selenium Rectifiers provide the same range of ratings as standard types, with no derating to cell temperatures as high as 150° C.

Radio-Television Types

Produced under mass production techniques but with very close quality control, Sarkes Tarzian Radio-Television type Selenium Rectifiers are the low cost answer on many medium power applications in all types of electronic equipment.

HIGH DENSITY—A new development in artificial barrier layers allows operation of rectifiers at high current density at no sacrifice of performance. Another Value-plus feature offered by Sarkes Tarzian.

Embedments

Sarkes Tarzian embedments offer the advantages of hermetic sealing at a fraction of the size, weight and cost. Ideal for use in military equipments.

High Voltage Rectifiers

Five basic sizes of Sarkes Tarzian High Voltage Rectifiers offer the design engineer a wide range of voltage and current ratings. All types are available either sealed or unsealed.

Write for your copy of the Selenium Rectifier Handbook—72 pages of engineering information on power conversion.

SILICON Area Rectifiers

New design concepts offer the ruggedest package available. Check these features:

- 1 Built-in heat sink on stud types for optimum heat transfer.
- 2 Special cell process produces low forward and high reverse resistances.
- 3 Ceramic case provides extremely long path for minimum corona and leakage effects.

- 4 "O" ring seals for positive sealing.
- 5 Flexible connections eliminate shock problems.
- 6 Special pressure contact assures positive pressure under all conditions.
- 7 Pure silver contacts to avoid migration and contamination of the cell.
- 8 Three case sizes and seven terminal arrangements provide the widest range of ratings available.

Write for your copy of the Silicon Rectifier Handbook.

PSP SOLENOIDS COVER THE FIELD!

What do you want in SOLENOID PERFORMANCE?

HIGH PRESSURE TYPES?

PSP high pressure DC solenoids, engineered in accordance with aircraft solenoid specification MIL-S-4040A, will withstand internal fluid burst pressures to 7,500 psi, operate at pressures to 1,500 psi in the plunger cavity, withstand ambient temperatures to 500°F! Other features: dynamically balanced plungers, precision adjustable plunger stroke, continuous duty operation on 30 Volts DC.

HIGH TEMPERATURE TYPES?

PSP "hot" solenoids incorporate special wiring, special insulation and high temperature switches to operate without fail in ambient temperatures to 600°F. and beyond. Engineered to provide positive, reliable actuating force in applications where heat is a problem. Made in single and double coil and push or pull types.

HIGH VOLTAGE TYPES?

PSP provides DC solenoids in the 60-300 Volt range for electronic control systems on computers, missiles and aircraft. Important advantages: the same power can be obtained with less current . . . savings in weight can be realized . . . units will operate directly in electronic equipment without special circuits.

MINIATURES?

These little PSP solenoids can do big jobs in computers, memory units, gyros and other avionic controls! They are made in a range of types for all applications requiring short strokes.

CO-AXIAL VALVES?

This miniature co-axial solenoid-operated valve uses the plunger of the solenoid as a means of admitting and shutting off flow of air. Model shown has $\frac{1}{16}$ " flow orifice, operates on continuous duty and under opening and closing pressures to 200 psi with 14-30 Volts DC applied, at ambient temperatures to 500°F.

PSP engineers will be glad to recommend one or more of 400 standard solenoids to fit your needs—or work with you toward solution of your problem.

YEARS OF ENGINEERING KNOW-HOW, PERFORMANCE-PROVEN DEPENDABILITY AND THE HIGHEST STANDARDS OF QUALITY ARE BACK OF EVERY PSP SOLENOID MANUFACTURED.

Send for the informative PSP catalog!

HERMETIC SEALS

Standard compression headers, plugs and individual seals now available

Compression individual with lug

Pressure terminal

Compression multiple header

New fusing equipment plus new plating plant plus top-notch technical engineering supervisors have been important factors in Bennett's progress toward greater service to hermetic seal users.

Our vacuum-tight compression seals give greater latitude in design applications. They can be used wherever leakage requirements are critical. They will also withstand thermal shocks of dry ice to boiling water, check out in excess of 10,000 megohms, and pressure check in excess of 10,000 psi.

We also design pressure and solder seals to meet your requirements.

SHALLCROSS

AKRA-OHM® PRECISION WIREWOUND RESISTORS

Not only are Shallcross Akra-Ohm precision wire-wound resistors made to extremely close tolerances; equally important, they are physically protected to maintain their accuracy under difficult operating conditions. Standard ceramic bobbin types as well as new "P" Type

epoxy resin encapsulated resistors in sizes and mounting styles for MIL-R-93A and other exacting needs. Guaranteed tolerances to 0.01% and stabilities as low as 0.003% where required. Matched pairs and sets available. Write for detailed engineering bulletins on any type.

MULTI-POSITION SELECTOR SWITCHES

Shallcross regularly manufactures a wide variety of single or multi-deck selector switches having up to 180 positions and designed for dependable performance up to 250 volts 10 amperes, or 2500 volts 1 ampere A.C. Contact resistance ranges from as low as 0.0005 ohm to a maximum

of 0.005 ohm depending upon the size and material of the contacts. Standard types readily adaptable to over a thousand variations are described in Engineering Bulletins L-31, L-32. Outline your special requirements on Specification Sheet No. 6 for prompt recommendation.

PRECISION AUDIO ATTENUATORS

Improved materials and production techniques and careful quality control for Shallcross Attenuators have resulted in a line that sets higher standards of attenuation performance for practically every audio and communications use. Included are single and dual potentiometers, variable im-

pedance matching networks, V. U. meter multipliers, cueing attenuators, fixed pads, pre-emphasis and de-emphasis networks, attenuation boxes, ladder and balanced ladder controls, bridged T, straight T, bridged H, and straight H attenuators. Write for Attenuator Bulletin 4-A.

PRECISE MEASURING INSTRUMENTS

As long-time specialists in standard and special electrical measuring instruments.

Shallcross welcomes your inquiry for any desired types. Standard instruments include:

Resistance standards • Decade Potentiometers • Decade Resistance Boxes • Wheatstone Bridges • Combined Kelvin-Wheatstone Bridges • Wheatstone-Megohm Bridges • Wheatstone-Limit Bridges • Percent-Limit Bridges • Capacitor Analyzers • Decibel Meters • Tone Generators • Telephone Test Equipment • Low-Resistance Test Sets • High-Voltage Test and Measuring Equipment.

Write for Shallcross Bulletin DC

NEW! MINIATURE PRECISION SELECTOR SWITCHES

A compact new selector switch design for r-f switching, computer, and instrument applications. Uses highest quality materials—solid silver contacts, Silicone-Fibreglas, Nylon, and Melamine. 1 to 6 deck types with 1 to 4 poles /deck, 2 to 32 positions/pole. Shorting or non-shorting action. Positive ball-detent action and adjustable stop.

Operating voltage: 1500 volts
Breakdown voltage: 4000 volts
Contact resistance: 0.002 ohm
Breaking current: 5 amps @ 125 volts
Carrying current: 15 amps.
Indexing: 11¼°, 15°, 22½°, 30°
Back Panel Depth: 1st deck—1" additional decks—5/8"

Write for Bulletin L-45

CUSTOM-BUILT SPECIALTIES AND ENGINEERING SERVICE

Sealed networks, high voltage measuring equipment, special test sets, delay lines thermally controlled networks, precise decades and networks for computer devices, high resistance standards, and critical coil assemblies are designed by Shallcross Engineers and built to meet your requirements.

HIGH VOLTAGE MEASURING APPARATUS

Precision Shallcross kilovoltmeters, kilokilovoltmeter multipliers, hermetically sealed tubular resistors, Surge resistors, and Taylor Type corona-protected resistors. Combine close accuracy with safety and dependability. Types for voltages up to 200,000 volts or higher if required. Write for data on any type.

0.02 to 500 ohm resistance scale with
decade multipliers up to 10 meg.
- Frequency Range to 100 MC — 800-A;
700 MC — 800-B.
- High accuracy
- Very high stability

TYPE 320-AB PHASE METER

- Direct Reading from 0° to 360°
- 1 cps to 100 kc Frequency Range
- Operation Independent of Input Wave Shape

TYPE 322-A PRECISION PHASE METER

- $\pm 1^\circ$ Absolute Accuracy
- Incremental Accuracy of 0.25°
- 20 cps to 20 kc Frequency Range
- Expanded Scale Operation in any 30° Segment
- Direct Reading from 0° to 360°

TYPE 500-A WIDE BAND DECADE AMPLIFIER

- Zero Phase Shift for Use with 320-AB Phase Meters
- Constant Gains of 10, 100, and 1000
- Wide Frequency Range — 5 cps to 2 mc
- High Input Impedance
- High Output Voltage — 20 volts at All Ranges

precision electronic instrumentation on **FREE TRIAL**

You can't tell a book by its cover—and you certainly can't judge the quality of an electronic test instrument from an ad! Because of this obvious fact ALI has decided to make it easy for you to measure the quality and versatility of ALI instruments. Just for the asking, you can have a free, no-obligation trial of any standard ALI instrument.

Test ALI precision instrumentation in your own application. Compare the accuracy, stability and versatility with present equipment — or other equipment you contemplate purchasing. We are sure once you compare you will specify ALI.

Whether your requirements are direct-reading phase meters . . . precision phase standards . . . wide-range VTVM's . . . amplifiers . . . oscillators . . . direct-reading, 8-channel oscillographic recorders . . . or potentiometer test equipment — there's an ALI precision test instrument for your application.

Request your ALI Handbook of Precision Electronic Instrumentation. And ask for your free trial.

TYPE 310-A Z-ANGLE METER

- Direct Readings of:
Impedance (Ohms)
Phase Angle (Degrees)
Dissipation Factor (D)
Storage Coefficient (Q)
- 30 cps to 40 kc Frequency Range
- Internal 60 and 400 cps Test Signals
- Only One Balancing Step
- Compact and Portable

TYPE 550-A DIRECT-WRITING OSCILLOGRAPHIC RECORDER

- 0-1000 cps Frequency Range with Equalized Amplifiers
- Eight Channels Plus Marker Channel
- Wide Range of Recording Speeds
- Direct Writing
- Portable

VIBRATION TEST and CONTROL EQUIPMENT

MB MANUFACTURING COMPANY

1070 State Street, New Haven 11, Conn.

A Division of Textron American, Inc.

for vibration GENERATION

Model C100 - 12,500 pound force generator

MB VIBRATION EXCITERS

MB electromagnetic-type shakers have the versatility, force output, and dependability necessary for test applications such as: (1) Fatigue testing components to destruction . . . (2) Locating noise sources in automobile bodies and chassis, blowers, etc. . . (3) Shake testing electrical components like relays, switches, or radio chassis to determine their ability to operate under

high vibratory loads . . . (4) Determining the damping characteristics of rubber, steel, plastics, etc. . . (5) Identifying resonant frequencies and (6) Determining natural modes of aircraft structures such as wings, fins, and control surfaces.

Vibration tests to MIL-E-5272A and 41065-B and other specifications are performed easily on these exciters.

Automatic Control Systems for MB Vibration Exciters provide automatic control over table amplitude (displacement and acceleration) and frequency; manual control of either function also possible. Performance more than adequate to meet MIL-E-5272A vibration requirements.

MB VIBRATION EXCITERS and CALIBRATORS

Rated Force (Model)	Total Stroke	Power Supply	Frequency Range c.p.s.
1.2 lb. (C8*) (or C7 sub-miniature tube tester)		Electronic	20 to 10,000
10 lb. (SD)	1/2 in.	Electronic	20 to 2,000
25 lb. (C31*)	1/2 in.	Electronic	5 to 2,000
50 lb. (C1*)	1/2 in.	Electronic	5 to 500
50 lb. (C11*)	1/2 in.	Electronic	5 to 2,000
150 lb. (S6)	2 in.	Electronic	0.35 to 500
200 lb. (C6)	1 in.	Electronic	5 to 5,000
600 lb. (C5H)	1 in.	Rotary or Electronic	2 to 2,000
1,200 lb. (C10)	1 in.	Rotary or Electronic	5 to 3,000
3,500 lb. (C25H)	1/2 in.	Rotary or Electronic	2 to 2,000
12,500 lb. (C100)	1/2 in.	Rotary	2 to 2,000
25,000 lb. (C250)	1/2 in.	Rotary	2 to 2,000

* Force generator or calibrator. Other models available.

for vibration MEASUREMENT

VIBRATION PICKUPS Sensitive to low-amplitude vibration, yet rugged for field test work. Electrically damped; maintain calibration over wide temperature range. Resonant frequency below 5 c.p.s. Over twelve types available for specific requirements. Type 122 for temperatures to 500° F; Type 115 probe-type for hand-held exploratory testing.

Type 122

Type 115

METERS MB Meters are compact, portable units, designed for use with MB vibration pickups. They give direct readings of vibration acceleration, velocity, or displacement. Model M6, designed specifically for jet-engine testing, has three high-pass filter networks (cut-off at 30, 70 and 110 c.p.s.) and features push-button selection of four pickup signals. A.C. operated. Also suitable for general test purposes.

Model M6

for vibration ISOLATION

ISOMODE* INDUSTRIAL-TYPE ISOLATORS - provide large deflection ratings with high load capacity, small size, and exceptional stability. Spring rate equal in all directions - mount at any angle-absorb vibrations for every plane. Unit load-range 50 lbs. to 2500 lbs.

MIL-I-5432 (AN-I-16a) is met with Isomode* Type 17 vibration isolators: Load range 1/2 to 100 pounds per unit. They feature equal spring rate in every direction.

MANY OTHER ISOLATOR TYPES available, including units for special applications; Isomode grommets; mounts with small dimensions. Contact us on your specific requirements.

* Reg. U. S. Pat. Off.

FIXED MOLDED RESISTORS—In 1/10, 1/2, 1, and 2 watt ratings at 70C ambient. Available in standard RETMA values.

Allen-Bradley engineer checking resistors after humidity test.

HERMETICALLY SEALED RESISTORS—Composition resistors sealed in a ceramic tube. 1 & 1/8 watt, 10 ohms to 500,000 megohms.

INSURE AGAINST CATASTROPHIC FAILURES BY USING ALLEN-BRADLEY QUALITY PARTS

VARIABLE RESISTORS—Type J molded resistors, rated at 2 watts at 70C ambient. Total resistance values from 50 ohms to 5 megohms. Outstanding for low noise characteristics. Taps can be provided at 40, 53, and 68% of effective rotation. Metal parts are corrosion-resistant. Have solid molded resistor element.

COPPER-CLAD FIXED RESISTORS—Type GM rated at 3 watts at 70C and 4 watts at 40C. Type HM rated at 4 watts at 70C and 5 watts at 40C. Mounted in heavy copper clamps. Must be mounted on steel panel to radiate heat. Will not open circuit or exhibit erratic changes in resistance. Send for Bulletin 5002.

VARIABLE RESISTORS—Types G and F molded resistors are 1/2 inch in diameter. Available with plain or lock-type bushings. Total resistance from 100 ohms to 5 megohms. Type F is equipped with adjusting screw. Ideal for use in printed circuits. Rated at 1/2 watt. Available in standard tapers. Send for data.

CERAMIC CAPACITORS—Available in nominal capacitance values from 10 mmfd to .022 mfd in continuous d-c voltage ratings of 500, 1000, 2500, and 5000 volts. Also available in ceramic enclosures for greater mechanical strength and higher insulation dielectric strength. Operate up to 150C ambient temp.

VARIABLE RESISTORS—Type T solid molded resistors for rheostat and potentiometer applications. The molded plastic actuator serves also as the cover which makes this unit extremely flat and compact. Rated at 1/2 watt at 70C ambient. Available in maximum resistance values from 100 ohms up to 5 megohms.

FEED-THRU & STAND-OFF CAPACITORS—These rugged capacitors exhibit no parallel resonance effects normally encountered with tubular capacitors in the VHF and UHF frequency ranges. Available in standard nominal values from 5 mmf to 1000 mmf, with solder tabs or with screw-thread mountings.

INDUSTRIAL POTENTIOMETERS—Type H rated at 5 watts at 40C ambient. Resistance range 50 ohms to 2 megohms. Good for 100,000 cycles with less than 10% resistance change. Derate to zero at 120C. Maximum voltage 750 v, d-c. After 100 hrs. at 40C and 98% humidity, resistance change not more than 5%.

FERRITE CORES—In various shapes and sizes to fit needs of black and white, color television and general applications. There are U and L cores for color convergence and O cores for color convergence shields; also U and E cores for flyback transformers, and QR cores for deflection yokes. Many other shapes available.

What characteristics do you need in a precision potentiometer?

The 3" Type 753 sine-cosine, $\frac{3}{4}$ " Type 771 FilmPot* and Type 769 FilmPot Trimmer shown represent extremes of the wide variety obtainable in the standard Fairchild line.

*Registered Trade Mark

Size?

In pioneering the manufacture of precision potentiometers, Fairchild has developed a line of more than twenty different types, ranging in size from 3" down to a miniature $\frac{3}{4}$ " unit. And even the smallest miniature meets the same requirements for accuracy and reliability as most larger units. Hence our claim "Miniaturization without sacrificing performance."

Construction and functions?

In addition to multi-turn, single-turn, wire-wound, metallic film and linear and non-linear function potentiometers, Fairchild presents a new line of pressure transducers having precision potentiometer outputs.

Performance?

Fairchild potentiometers have an outstanding reputation for sustained high accuracies, high resolution, low noise level and long life—a reputation built on performance.

Development facilities?

A staff of experienced Fairchild designers is always at your disposal to design potentiometers to meet your special requirements.

Fast Service?

Fairchild can help you solve all your precision potentiometer problems quickly. To do this, duplicate facilities have been set up on the east and west coasts. You get rapid, efficient assistance and service in any location from a large staff of Fairchild's own Sales Engineers. For more information, write Fairchild Controls Corporation, Components Division, Dept. 140-75G.

specify the tape and discs that are...

GUARANTEED DEFECT-FREE

type **EP** *Extra-Precision*
audiotape TRADE MARK

Magnetic-coated
audiodiscs TRADE MARK

Type EP Audiotape is especially produced to meet the most exacting requirements for uniformity and freedom from microscopic imperfections. This *extra precision* in manufacture contributes greatly to the dependable operation of magnetic data recording equipment for telemetering, electronic computers and other specialized applications. Type EP Audiotape is available on a base of 1 1/2-mil cellulose acetate and 1 1/2-mil or 1-mil Mylar* polyester film, in widths from 1/4" up and footages from 1200 to 7200 ft per reel. For complete information send for Bulletin T112A. *DuPont Trade Mark

Magnetic-coated Audiodiscs, for geophysical exploration, computers and specialized data recording work, are made to the same standards of extra precision as EP Audiotape. Magnetic oxides are precision-coated on strong, mirror-smooth aluminum discs, providing a uniform surface that is guaranteed free from dropouts or other defects on a free replacement basis. They are available in 10", 12", 13 1/4", 16" and 17 1/4" diameters and can be coated with any of the Audio magnetic oxides listed below.

MAGNETIC PROPERTIES OF STANDARD "EP" AUDIOTAPE

Property	Test Value	Test Method
Coercive Force (Hc)	250-260 Oersteds	60 cycle B-H curve tracer, at 1000 Oersteds magnetizing field
Remanence (Ør)	0.7 Maxwell	
Retentivity (Br)	650 Gauss	
Uniformity at 1 Kc, Peak Bias, 7 1/2" / sec.	±0.5 db or better ±0.25 db or better	Esterline-Angus Recorder
Reel-to-reel Within a reel		

PROPERTIES OF AUDIO MAGNETIC OXIDES

Type No.	Color	Coercive Force† (oersteds)	Remanence (gauss)	Range of Dimension (microns)	Specific Gravity

Design made easy with reliable RESISTORS, RELAYS, RHEOSTATS

Want to know how? These data-packed bulletins and catalogs will show you.

RESISTORS—you'll find the widest selection of stock power resistors ever offered by any manufacturer in Ward Leonard Catalog 15.

RELAYS—long, trouble-free life under the most adverse conditions is the big plus the system designer gets with the a-c and d-c relays described in Ward Leonard's relay catalog.

RHEOSTATS—complete application data on smooth-acting 25- to 300-watt Vitrohm ring rheostats is contained in Ward Leonard bulletins 1105-16.

Write today for this helpful literature. You'll find plenty of design tips. And, you'll find Ward Leonard offers a wider selection of stock items, quicker service on made-to-order controls, and more performance per dollar than anyone else. AMERAC'S PRECISION MICROWAVE PRODUCTS

MICROWAVE CAVITIES

Amerac, Incorporated manufactures a comprehensive line of co-axial line cavities, utilizing various standard tubes, for numerous microwave applications including aircraft, guided missile and beacon work.

FEATURES

These cavities have such features as—single control tuning, fixed feedback, rugged anti-backlash tuning mechanism, accurate Root counter (optional), adjustable type "N" or "BNC" 50-ohm inductive loop coupling, convenient tube receptacle for quick replacement, long-duration R.F. output stability, operates on inexpensive power supply.

SPECIFICATIONS

MODEL	FREQUENCY RANGE	TYPE	CAVITY MODE	TUBE TYPE
192	2400—3200 MC	CW	3/4	2C36
192-A	2400—4000 MC	Pulse	3/4	2C36
192-AB	750—2000 MC	Pulse	1/4	2C36
192-B	750—2000 MC	CW	1/4	2C36
193-A	2400—4000 MC	Pulse	3/4	2C36
194	2300—3300 MC	CW	3/4	2C39B

MICROWAVE CAVITY

#193
"BEACON" CAVITY

CO-AXIAL LINE WAVEMETERS

FOR LABORATORY USE, Amerac, Incorporated manufactures a precision wavemeter that is handsomely finished with golden anodized aluminum panel and hand-rubbed walnut cabinet. The panel is sloped for easy observation. These Models feature high accuracy of measurement ($\pm 0.02\%$), high frequency stability (10°C to 40°C), extreme mechanical stability, ease of operation, rugged components and tri-plated surfaces.

GENERAL SPECIFICATIONS

Type "N" constant impedance input connector. BNC or Selector co-axial fitting for external video connection. Power handling capability: absorption — .5mw to 1 watt; transmission — 1mw to 1 watt. Peak power: up to 25 watts (transmission).

INDIVIDUAL SPECIFICATIONS

MODEL	FREQUENCY RANGE	LOADED Q	WIDTH	DEPTH	HEIGHT	NET WEIGHT
#228*	900—2400 MC	1000	15"	9 3/4"	7 3/4"	13 1/2 lbs.
#229	2300—4500 MC	1500	8"	6 1/2"	5"	4 3/4 lbs.
#230	3500—6500 MC	1500	8"	6 1/2"	5"	4 3/4 lbs.

*Model 228 has a direct-reading frequency control dial.

#230 "C" BAND WAVEMETER

FOR FIELD USE, Amerac, Incorporated manufactures two co-axial line wavemeters covering the "S" band, the Model 131 (Amerac's version of the popular military model TS-117) and the inexpensive, C&D Wavemeter Model 232.

Both models feature a rugged metal case, finished in gray, baked enamel; highly sensitive indication of resonance; rugged components; precision cavity assembly and anti-backlash device, for high accuracy.

GENERAL SPECIFICATIONS

Input connections are two type "N" jacks. R.F. detector is a selected type 1N21B silicon diode. They have a ruggedized 50 microampere indicating instrument for abusive field work and all silver-plated parts are Rhodium flashed to minimize corrosion.

INDIVIDUAL SPECIFICATIONS

MODEL	FREQUENCY RANGE	LOADED Q	LENGTH	DEPTH	WIDTH	NET WEIGHT
#131	2400—3400 MC	1500	6"	3 1/4"	5 1/2"	3 1/2 lbs.
#232	1800—3800 MC	1000	8"	2 1/4"	7 3/4"	2 1/2 lbs.

#232 "C & D" WAVEMETER

Complete line of Microwave Components

From Magnetron Through Antenna

Designed and Produced

by **Airtron** INC.

Whether it is "Standard" plumbing or designing an entirely new waveguide system, Airtron's complete facilities can substantially reduce the time and expense between concept and reality. Here are just a few examples:

FLEXIBLE WAVEGUIDE ASSEMBLIES. Flexible double ridge waveguide for airborne commercial weather radar. Beryllium copper flexible in convolute or type S construction. Waveguide sizes from Ka-Band to 9.750" x 4.875" I.D. in standard lengths or preformed to your installation.

ROTARY JOINTS. Waveguide rotary joints of the coaxial or circular waveguide type in many frequency ranges designed for high power VSWR performance. Produced in volume to your specifications or designed to meet requirements.

WAVEGUIDE SWITCHES. For frequent, rapid switching to or from noise sources, signal generators, dummy loads, etc. Reversing switches for dual channel systems in GCA or microwave relay radars. Low VSWR, excellent crosstalk characteristics, and high peak power performance. Switching tees, ferrite switches and other special designs.

PRECISION CAST BALANCED MIXERS. Low noise figures over a broad bandwidth are achieved by compact balanced mixer design and use of latest type crystals. Equipped with coaxial or waveguide crystal mounts for frequencies up to 40,000 mc. Standard and special types available. Mixer-Preamp packages designed to meet your requirements.

ANTENNAS AND ASSOCIATED COMPONENTS. Horn antennas and feeds for fire control, countermeasure, guided missile, navigational or weather radars. Designed to your specifications and produced in the Airtron precision casting foundry. Complete with rotary joints, flexible sections and associated waveguide assemblies.

FERRITE DEVELOPMENT PROGRAM

Including such MICROWAVE FERRITE COMPONENTS as duplexers, waveguide switches; high and low power load isolators, variable absorption attenuators and other special ferrite devices.

A McGraw-Hill Publication

We need
50,000 wire markers
— — quick!

call **MARKWIK!**

CALL MARKWIK FOR PROMPT DELIVERY!

Since we are the manufacturers of the *Hodifier*[®] heatless marking machine, at a moment's notice we can place at your disposal as many machines as necessary to turn out your job. We also maintain a large stock of various types and sizes of flexible vinyl tubing to meet your marking requirements. In most cases we can give 24 to 48 hour service!

CALL MARKWIK FOR TRULY PERMANENT MARKERS!

We pioneered and developed the new *COLD Indeli-Dent*[®] process which produces markers on flexible vinyl tubing with permanency unmatched by any other process or service. Our *Indeli-Dent*[®] markers are unexcelled for clarity and legibility — they are resistant to ultra violet light, oils, gasoline, alcohol, hydraulic fluids, salt spray, and carbon tetrachloride — markings cannot be rubbed off or affected by abrasion, temperature, mildew, fungus, or elongation. Numbers on the terminal board are legible and permanent. In other words—these markers are made to last!

CALL MARKWIK FOR GOVERNMENT APPROVED MARKERS!

Our *Indeli-Dent*[®] process printed markers meet and surpass the exacting requirements of the Janization program of the armed services. No longer will you have to apply special coatings and lacquers, as is required with old fashioned foil leaf, hot-stamped markers.

CALL MARKWIK FOR SAMPLES!

Ask for samples of our *Indeli-Dent*[®] process markers. Subject them to any durability test — then compare results with the markers you now use! You'll discover why so many engineers specify Markwik permanent *Indeli-Dent*[®] code markers throughout every piece of equipment they design.

CALL MARKWIK FOR PRICE AND DELIVERY QUOTATIONS!

Phone us your marking requirements, (or wire or write). We'll be glad to give you prompt, personal attention. Send for brochure B1 and samples.

ENGINEER'S REFERENCE CHART

Goat has compiled a complete reference chart for design engineers. It lists miniature tube types, methods of mounting them, type sockets in general use, and appropriate shield for each application. Write today for this handy chart.

GOAT PRECISION METAL STAMPING

ELECTRONIC TUBE PARTS—As an original manufacturer of electronic tube parts, thirty years ago, Goat offers tube manufacturers top technical know-how in the fabrication of tube parts. Able to work any metal, and perform all types of close tolerance drawing, forming and stamping operations, Goat's versatile facilities are being employed more and more by tube producers who require economical, top-quality parts delivered on time.

ELECTRONIC EQUIPMENT—Manufacturers of electronic equipment and components, who require a dependable source of quality small and medium size metal stampings, find Goat's broad metal-working facilities an ideal complement to their operation. Goat is not only a source of stamping, but mechanical assemblies and sub-assemblies to your most exacting specifications.

COMPLETE FACILITIES LIST

Here is a complete list of Goat's excellent facilities. It details the types of equipment, stamping, assembling and finishing, that are available to you. Write today for this ready reference.

THE FRED GOAT CO., INC.

308 Dean Street, Brooklyn 17, N. Y.

There's Always Something New at PRD...

Just a reminder that PRD Polyohm 1% resistors are made of pure evaporated chromium—no carbon. Full load at 120°C. For the toughest applications use the hermetically sealed type. Exceeds MIL-R-10509B specifications, characteristic B.

PRD DRY-TYPE LOW-LEVEL MICROWAVE CALORIMETER

Invaluable for any precise low level measurement or power monitoring in systems. Unique, because it measures low microwave power with primary standard accuracy by means of thermocouples. *No troubles with fluids, pumps or thermometers.* Easy to use, accurate, rugged and reliable. Indicates average power regardless of modulation. Provision for null indication against standard dc power.

TYPE 666 FREQUENCY RANGE: 18 to over 75 mc/s • ERROR: Because the intrinsic error is less than $\pm 1\%$ plus $\pm 20 \mu\text{w}$ thermal drift, the combined error including instrumentation can be held to within $\pm 3\%$. Good approximations can be achieved within one time constant (1.5 to 2 minutes) • POWER RANGE: From 30 μw to at least 1 watt cw • SENSITIVITY: 35-40 $\mu\text{v}/\text{mw}$ (calibrated for each instrument) • MAX. VSWR: less than 1.2.

PRD HETERODYNE FREQUENCY METER

Especially useful for precision measurements of microwave frequencies where accuracy combined with range is required. *Takes the place of several cavity type meters each of which usually has a more restricted frequency range.* Unlike other heterodyne frequency meters, Type 504 is simple to use. Both CRT and aural presentation are available as well as a new exclusive interpolating dial which saves time and avoids ambiguity. Lightweight, therefore advantageous for field testing of transmitters, receivers and signal generators. Will deliver a signal of precisely known frequency at the RF input connector when used as a calibrating instrument.

TYPE 504 FREQUENCY RANGE: Measures 100 to over 10,000 mc/s. Generates 500 to 900 mc/s and harmonics • INTERPOLATION ACCURACY: 0.03% or better • INPUT SENSITIVITY: -30 dbm at 500 mc/s and above • CALIBRATION REFERENCE: 5 and 50 mc/s quartz crystal standards.

RADIO INTERFERENCE AND FIELD INTENSITY *measuring equipment*

Stoddart equipments are suitable for making interference measurements to one or more of the following specifications:

AIR FORCE—MIL-I-6181B

150 kc to 1000 mc

BuAer—MIL-I-6181B

150 kc to 1000 mc

BuShips—MIL-I-16910A (Ships)

14 kc to 1000 mc

SIGNAL CORPS—MIL-I-11683A

150 kc to 1000 mc

SIGNAL CORPS—MIL-S-10379A

150 kc to 1000 mc

The equipments shown cover the frequency range of 14 kilocycles to 1000 megacycles.

Measurements may be made with peak, quasi-peak and average (field intensity) detector functions.

F.C.C. PART 15—Now in effect, the revised F.C.C. Part 15 places stringent requirements upon radiation from incidental and restricted radiation devices. Stoddart equipment is suitable for measuring the radiation from any device capable of generating interference or c-w signal within the frequency range of 14 kc to 1000 mc.

Write Stoddart Aircraft Radio Co., Inc., for your free copy of the new revised F.C.C. Part 15.

NM-10A (AN/URM-6B)
14 kcs to 250 kcs

NM-20B (AN/PRM-1A)
150 kcs to 25 mcs

NM-30A (AN/URM-47)
20 mcs to 400 mcs

NM-50A (AN/URM-17)
375 mcs to 1000 mcs

The Stoddart NM-40A is an entirely new radio interference-field intensity measuring equipment. It is the commercial equivalent of the Navy type AN/URM-41 and is tunable over the audio and radio frequency range of 30 CPS to 15 kc. It performs vital functions never before available in a tunable equipment covering this frequency range. Electric and magnetic fields may be measured independently over this range using newly developed pick-up devices. Measurements can be made with a 3 db bandwidth variable from 10 CPS to 60 CPS and with a 15 kc wide broadband characteristic.

HIGH VACUUM PRODUCTS for the ELECTRONICS INDUSTRY

Metavac Metallized Components, manufactured by evaporating pure metals in high vacuum to a suitable base material, are highly stable, unaffected by humidity, controllable as to resistance, and are reproducible.

The films are negligibly thin compared to the highest microwave frequencies; they are non-inductive, and their noise level is barely measurable. By precise measurement during evaporation, the resistance films are held to an accuracy of 1% and they offer an extremely low temperature coefficient of resistance of approximately 75 parts per million per Degree C.

Metallized Glass Attenuator Plates with Metallized Eyelet.

U. S. Gov't. approved Metallized Glass Attenuator plates with Metallized Eyelets were developed under Prime Contract with the Signal Corps Supply Agency. These elements meet Gov't Specs MIL-A-11052A, and are available in six specific sizes for use with Waveguides RG-48U; RG-49/U; RG-50/U; RG-51/U; RG-52/U; and RG-91/U. Other types and sizes of Attenuator Plates with Metavac Metallized Eyelet are fabricated to customer's requirements.

Waveguide Resistance Elements

Disc & Coaxial Resistance Elements

METAVAC, INC., has also been a pioneer in the development of High-Vacuum coatings for optics. The Lenscote Co., a division of Metavac, Inc., is devoted exclusively to the research, development and production of optical coatings, in all its complex forms. METAVAC, INC., has a completely equipped laboratory, and production facilities, staffed with competent research and development engineers specializing in the applications of the High-Vacuum techniques.

BOGART
9303
BROADBAND
ANTENNA

MODEL S9303

MODEL X9303

The Bogart 9303 Series of Broadband Antennas is used primarily for countermeasure applications. The circularly polarized antennas shown above are each designed to operate over approximately a 45% bandwidth centered about 10 CM. and 3 CM. respectively. Two basic designs are featured in this series. The S-9303 is a coaxially fed helix, designed to operate with RG-117/U coaxial cable and offering a minimum beamwidth of 50°. The X-9303 is a horn antenna with a dielectric phase shifter, designed to mate with Bogart Double Ridged Waveguide and also offering a minimum beamwidth of 50°. The Bogart Double Ridged Waveguide operates satisfactorily over the frequency range from 4750 to 11,000 MC/S. The Bogart L-9303 (30 CM.) and C-9303 (6 CM.) broadband antennas will soon be available. Our applications engineering group will be pleased to discuss your specific requirements with you.

BOGART
5802
COAXIAL
BALANCED
RING HYBRID

MODEL NC5802

The Growth of the Guided Missiles Field has provoked increased engineering activity directed towards the miniaturization of microwave components. Special techniques and materials have been developed due to severe space limitations and extreme temperatures. The Bogart Model NC-5802 balanced ring hybrid has been designed to replace single ended and balanced waveguide mixers where space and weight factors have made it impractical to employ these traditional waveguide components. In addition to the NC-5802 which is intended for operation centering about 10 CM., Bogart applications engineers have designed the NL-5802 for 15 CM. use.

An Exceptionally Broadband balanced coaxial ring hybrid mixer is presently under development. Intended to operate over a 50% bandwidth, this unit will present a compact, light-weight design that is ideal for aircraft or missile application. A detailed technical analysis of properties of coaxial ring hybrids is available upon request. Special applications of Bogart Broadband Mixers can be designed to meet your specific requirements. Our applications engineers will be pleased to discuss your particular problems with you.

BOGART
4063
VHP*
DUMMY
LOADS

MODEL H4063

The Bogart Model 4063 Series of VHP Dummy Loads has evolved from a need by the Armed Forces for very high power dummy loads for both field and laboratory use. Originally developed for the Army Ordnance Fire Control Instrument Group, the 4063 series has won wide acceptance by other service branches by providing R-F silence during tuning and maintenance, ease of maintenance and standard test conditions. Designed to operate with the highest power radar systems, these dummy loads are lightweight, compact, resistant to moisture absorption and intended to last at least the life of the equipment with which they will be used. Reduced operating temperatures are obtained through the use of cooling fins. The 4063 series, as adopted by Armed Forces agencies, are provided with flanges noted in the chart. However, non-standard flanges, or adapters, are available for special applications. High temperature pressure sealing "O" rings are available as accessory equipment. All units are finished in a black enamel.

Special Applications of Bogart VHP Dummy Loads can be designed to meet your specific requirements. Our applications engineers will be pleased to discuss your particular problems with you.

BOGART
9306
WAVEGUIDE
SWITCH AND
DUMMY LOAD
ASSEMBLY

MODEL 9306

The Bogart Model 9306 Waveguide Switch and Dummy Load Assembly is the result of an engineering program initiated with Bogart Manufacturing Corp. by one branch of the Armed Forces to retrofit an aircraft currently in the field. The purpose of this retrofit kit is to provide R-F silence during tuning and maintenance, ease of operation and maintenance, decrease vulnerability to jamming and permit standard test conditions. Due to the extreme space limitations, the utilization of standard components was not possible. It was necessary for the Bogart applications engineering group, working in conjunction with service engineers, to design a special waveguide switch and dummy load for this aircraft. This 9306 assembly is so uniquely tailored for this particular project, that it is doubtful that in its exact form, it may be used in another installation. However, where standard components cannot be used due to electrical or mechanical limitations, the Bogart applications engineers will work with the customers' engineers to modify existing components, or design new units for the particular application. The model 9306 is a typical result of just such an engineering program.

ELECTRO-MECHANICAL CHARACTERISTICS

Frequency Range	8500—9600 MC/S
Waveguide Flanges (Input and Output)	UG-135/U,—UG-136A/U UG-138/U OR UG-137A/U (Upon Customer's Request)
Max. V.S.W.R. Antenna Arm	1.10
Max. V.S.W.R. Dummy Load Arm	1.10
Switch Isolation	60 DB
Switching Time	0.05 SEC.
Peak Power	250 KW
Average Power	250 watts
Weight	Approx. 3 3/4 lbs.

This unit has been tested satisfactorily in accordance with MIL-E-5400 environmental test conditions.

Electro-Pulse presents a NEW SERIES of ELECTRONIC COUNTING EQUIPMENT

featuring **ECONOMY, RELIABILITY, COMPACTNESS**

Using cold cathode glow transfer tubes for counting and indication, Electro-Pulse counting and measuring equipment features the reliability inherent in simplified circuitry and virtual elimination of counting circuit malfunctions due to component ageing. Low power drain, long life, compactness, and economy are additional advantages resulting from the use of these recently developed techniques.

Inputs are of sufficient sensitivity for direct operation from common transducers, are DC coupled and incorporate a trigger circuit for operation from slowly changing waveforms and provide stable threshold controls for discrimination against unwanted signals.

MODEL 7240A PRESET COUNTER

For Time Interval Generation

For Control of: • Sorting Equipment

• Counting and Packaging • Automatic Feeds

Model 7240A counts and indicates the number of input events up to a number (1 to 9,999) preset by four decade switches, at which time a relay operates and the count is held. Automatic recycling or manual reset to repeat the counting operation is provided. Provision is made for use of the equipment as a time interval generator by preset counting of the line voltage frequency.

Capacity: 1 to 9,999 events.

MODEL 7340A FREQUENCY INDICATOR AND COUNTER

Measures Frequency

Measures Speed or Repetition Rate

Counts Events Per Unit Time

Available with Print-out

Model 7340A counts the number of input events during the duration of a 1 or 10 second gate established by a precision synchronous motor. Indication is directly in events per second, with automatic decimal point location. Automatic recycling is provided, or the measurement may be held and indicated until a manual reset is operated.

Indication: .1 to 9,999 events per second.

Gate Times: 1 sec., 10 sec. or manual.

Accuracy: $\pm 0.1\%$ ± 1 count, based on line frequency.

MODEL 7440A TIME INTERVAL METER

Measurement of:

• Time Intervals • Periods • Velocity

Available with Print-out

Model 7440A utilizes electrical impulses defining the interval to be measured to start and stop a gate, then counts the number of cycles of an internally generated crystal controlled frequency occurring during this gate. Indication is directly in milliseconds, with automatic decimal point location. Automatic recycling is provided, or the measurement may be held and indicated until a manual reset is operated.

Indication: .1 to 9,999 milliseconds.

Time Bases: 1 KC, 10 KC, or external.

Accuracy: crystal stability ± 1 count.

BUYERS' GUIDE

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences — rely on the "Guide" for the answers to their product problems.

• OIL COOLED • WATER COOLED • AIR COOLED

WAVEGUIDE AND COAXIAL

Coaxial Loads: up to 10 KW Average Power.
Waveguide Loads: X-Band Loads up to 1000 Watts Average Power.
 S-Band Loads up to 4000 Watts Average Power.
 L-Band Loads up to 6000 Watts Average Power.

HI-POWER

WATER LOADS AND CALORIMETERS

1 MEGACYCLE TO
12,000 MEGACYCLES

COAXIAL

self-contained High Power Calorimeters and Water Loads up to 3,500 megacycles.

WAVEGUIDE

High Power Calorimeters and Water Loads—900 to 12,000 megacycles.

Average Reading R. F. POWER METERS

100kc to 700mc

1.5 watts to 6000 watts
50, 75, 600 ohms & other impedances.

Dummy Load Crystal Voltmeter Type, Feed Thru Type reading both incident & reflected power, and Thermistor Bridge Type.

These broad band R.F. power meters are of the absorption type consisting of an oil filled, air cooled, coaxial load resistor and a voltmeter calibrated to read watts. The power meter is suitable for use as a field or laboratory test instrument, is completely shielded and non-radiating, permitting transmitter testing and adjustment without interference. The meter box is easily detached, permitting location of the load resistor at a remote point. In cases where power measurements are not required the load resistor may be used as a dummy load.

PEAK READING

R. F. POWER METERS

.2 to 700 Megacycles • 0-50 or 0-500 Kilowatts

These peak reading power meters are designed to accurately measure the peak power of pulsed R.F. signals in the range of .2 to 700 MC with PRF of 800 to 10,000 pps and pulse duration of .5 micro-seconds or more, and less than specified maximum average power dissipation.

Model	Power Range	VSWR	Maximum Average Power Dissipation	Connector	Impedance	Supply Voltage	Accuracy	Frequency Response
PM-12.....	0-50 kw	1.15	60 Watts	To Be Specified	51.5	110 volts 60 cps	±10%	.2-700MC
PM-18.....	0-500 kw	1.15	500 Watts		51.5	110 volts 60 cps	±10%	.2-700MC

VOLTAGE REGULATED DC SEMI-CONDUCTOR POWER TRANSFORMERS

HIGH-POWER

STANDARD

MINIATURE

WRITE FOR
ENGINEERING
DATA

Now available, a comprehensive range of INTERVERTERS, efficient semi-conductor power transformers from $\frac{3}{4}$ to 1 kilowatt. Input voltage from $1\frac{1}{2}$ to 60 volts DC. Output—one or more filtered DC or controlled frequency AC voltages. Voltage regulated types available. Efficiencies up to 90%, weight and volume a small fraction of conventional rotating equipment. Meets applicable MIL specs for shock, acceleration and environment. Completely static, does not generate radio noise, undamaged by short circuits. Miniature series supplies plate and bias power from $\frac{3}{4}$ to 6 watts, for telemetering, missiles, beacons, fuzes and portable equipment. Standard series supplies power to 50 watts. High Power series to one kilowatt or more.

Interelectronics also produces high-rate reserve and rechargeable batteries for powering INTERVERTERS and other equipment.

ELECTRO POWER SUPPLIES

Operate DC Equipment from AC Source

NEW UNIVERSAL HEAVY DUTY UNIT: 0-125 VOLTS

model "GF" . . . 0-10 amps. continuous duty, 20 amps. intermittent rating . . . less than 1% ripple. Bridge-type rectifier, forced air cooling. Voltage control over entire range.

INDUSTRIAL DUTY: 0-28 VOLTS

model "NF" . . . 0-15 amps. continuous rating, 25 amps. intermittent. Less than 1% ripple.

12/6 VOLT DUAL RANGE: 0-16, 0-8V.

model D-612T . . . Continuously variable. 10 amps. continuous rating to 12 volts, 20 amps. intermittent. Less than 2% ripple.

ELECTRICAL ENERGY TRANSDUCERS

Convert Mechanical Motion into Electrical Energy for Control or Counting Applications Without Contact

Proximity Actuated Pickup Systems Produce Control Voltages or Provide Relay Action

New 4900 and 4950B systems: Produce constant DC voltage or 40 volt spikes as metal object approaches metal-sensitive pickup.

4900R and 4950RB systems: Contain relays which operate to 600 and 3600 operations/min. respectively. Used with electronic or electro mechanical counters, control circuits, electrical machinery, recording devices.

Magnetic Pickups Produce Variable AC Voltage

Standard model 3010-A . . . Converts motion into variable AC voltage in proportion to any ferrous object's rate of speed. Actuated by motion of metallic material in field of pickup. Generates synchronizing voltage. Used with indicators for motion, speed, displacement and with counters or control devices.

Miniature model 3015 . . . For small space and light weight requirements in airborne devices, guided missiles . . . applications where space and low cost are essential.

High temperature, extra sensitive model 3030 HTAN . . . For temperatures up to 500° F. Useful output at slower speeds. Army-Navy type connectors.

ECONOMY

PERFORMANCE

Where Flexibility is Essential

BALL BEARING RIGHT ANGLE ADAPTER

To provide a connection for flexible shaft control where a bend sharp enough to damage the shaft is required. Ball bearing construction enables the handling of heavier loads.

H TYPE ADAPTER

This adapter provides three outlets, which enables the running of three units from the same power source. Ball bearing construction enables this adaptor to handle heavy loads.

DUAL DRIVE ADAPTER

To drive more than one unit from the same power source and to provide two gear ratios from the same power source.

Flexible Shafting Offers You

Direct alignment in either remote control or power transmission.

Less working units needed in flexible shafting direct grouping.

Sturdier construction but lighter weight.

Write on your letterhead for our latest *Fluexible Shaft Manual*.

CORNING GLASS WORKS

Products for
Radio, TV and
Electronics . . .

CAPACITORS

Fixed-glass . . . Rugged high-temperature reliability Extreme miniaturization

Dielectrically excellent glass and alternate layers of conductor fused by heat and pressure into a rugged monolithic form. Values cannot be altered except by complete mechanical destruction. TC is plus 140 ± 25 ppm/ $^{\circ}\text{C}$. from -55°C . to $+85^{\circ}\text{C}$. Excellent retrace. TC variation between capacitors: under 15 ppm. Negligible capacitance

drift. Moistureproof. Sizes CY10, CY15, CY20, CY30. Custom variations to your specifications. (Distributed by Erie Resistor Corp.)

Medium-power transmitting

CY60, CY65, CY70. Small, light, strong. Ideal for mobile RF transmitters. Electrically replace mica types CM45—CM70, offer many advantages.

High-capacitance, canned*

Characteristics and advantages of glass construction, to your specifications. Values and canning to your specifications.

Subminiature, tab-lead*

Up to 90% volume reductions possible when compared with wire lead types.

Extreme dependability plus temperature and moisture resistance in tiny-case sizes. To specification.

Special combination*

Advantages and characteristics of glass construction and performance in an infinite variety of shapes, sizes, leads, for unusual assignments.

RESISTORS

Type N . . . accurate Stable, economical

Critical accuracy and extreme stability, even under high temperature, high moisture, vibrating conditions. Range: $\frac{1}{2}$, 1, 2W. Operate to 140°C . ambient temperature with derating. Low noise level. Voltage coefficient less than .001% per volt average. Infinite load life. Average resistance change after 500 hours maximum dissipation is less than 0.5%. Permanent resistance change after standard 5-second overload of 6.25 times rated power is under .75%. And Corning Type N's are low-cost. To MIL-R-10509A specs.

Low-power resistors . . . Highest resistance range of any low-power resistor

Small, space-saving, noninductive and stable. *Low-priced!* Like all Corning resistors, the fired-in conductive film is tough, abrasion-resistant, requires no special handling. Resistance spiraled automatically under electronic control for uniformity and interchangeability. Impervious to moisture. Range: LP3—3W., 200—20,000 ohms; LP4—4W., 200—40,000 ohms; LP5—5W., 200—45,000 ohms; LP7—7W., 200—36,000 ohms. Tolerances $\pm 5\%$ and $\pm 10\%$. With derating, operate at ambient temperatures over 120°C . (Distributed by Erie Resistor Corp.)

Type S . . . high-temperature To MIL-R-11804A specs

Stable performance to 200°C . without encapsulation or hermetic sealing. Low-voltage coefficient, negligible inductive and capacitive effects. Difficult to measure noise level. Made to customer specifications rather than RTMA values. Size: 1, 2 and 4W.

Type R . . . high-power 2% resistors—to 1 M Ω

Range from 25 to 1,000,000 ohms, ratings from 7 to 115W., are noninductive. Well suited to sharp pulse work. Vertical or horizontal operation. Operate up to 200°C .; hot-spot temperature to 225°C . Meet MIL-R-11804A specifications.

Type H . . . high frequency Save space

For dummy antennas, circuit loading, damping and terminating. Also for circuits subject to steep surges and saw-tooth patterns. Stable, rugged, noninductive. Standard line ranges from 10—1,000,000 ohms and has ratings of 5—150W. Also to your own requirements.

Type WC5 . . . water-cooled HF . . . high-power TV, FM

Mechanical design permits direct mounting on 3" coax line end at RF ground potential. Extremely versatile, adaptable. Negligible skin effect. Range: 35—300 ohms with $\pm 15\%$ standard; 10 and 5% available, extra.

TRIMMER CAPACITORS — METALLIZED GLASS COMPONENTS

Direct-traverse and midjet-rotary

D.T.—For applications of extreme ruggedness plus thermal stability and smooth tuning characteristics. Has practically zero TC in the VHF range. Negligible capacity shift with widely variable ambient temperatures. With brass or invar core. Four standard ratings: 0.5 to 3.0 mmfd; 1.0 to 7.5 mmfd; 1.0 to 8.0 mmfd; 1.0 to 12.0 mmfd.

ROTARY—For outstanding performance and economy. Three capacity ranges at 50 mc. Four terminations; push-on mount with saddle-clip brass core; push-on mount with wire lead, brass core; push-on mount with solder spot, brass core; split-bushing mount with pan terminal and invar core. Also custom design and manufacture to your specifications. (Distributed by Erie Resistor Corp.)

Metallized glass enclosures . . . Keep moisture, molds, dirt out

Delicate components get rugged protection when they're inside these tubes. Hermetically-sealed resistors, rectifiers and capacitors. Give components the ability to withstand conditions they otherwise would not be able to. With metal end caps, tubes take thermal shock from 275°C . to ice water. Not affected by atmospheric change. Metallizing bond strength has been measured at 1500 to 2000 pounds per square inch. Transparent. Good electrical characteristics.

Metallized glass inductances Stable . . . High Q

Noted for their exceptionally high electrical stability and negligible drift characteristics, even under widely variable ambient temperatures. High Q is inherent. They can be furnished with uniform, variable, or double-pitch windings and for fixed-tuned, permeability-tuned inductance trimmer combinations. Mass produced on automatic machinery to close tolerances. You get consistent duplication.

*Our engineering and design facilities are at your service on custom units.

• High-power resistors . . . Type HP—2% and 5% resistors, from 25-500,000 ohms, and ratings of 17-150 watts. Noninductive, stable, long service life.

• Attenuator plates . . . Chrome and nichrome films now available in resistivities from 20 to 200 ohms per square. To MIL-11052A specs.

• Design problem solutions . . . The varied properties of glass may make it possible to find answers to seemingly evasive electronics problems. Send us your problems and see if we can find the answer in glass.

TRUFLEX THERMOSTAT METALS

TRUFLEX thermostat metals are manufactured in a wide variety of types, each with a different reaction to temperature. Uniformity of metal insures accurate and consistent performance. Precision parts fabricated to exact specifications.

CLAD METALS

Available in practically any combination of precious to precious, precious to base or base to base metals. Combinations for electronics include aluminum-clad iron, nickel-clad iron for anode materials.

COPPER
ALUMINUM
COPPER
COPPER
ALUMINUM

ALCUPLATE

Copper-clad aluminum for component cases or cans, chassis, cooling fins, etc., light weight, excellent conductivity. Copper surface is ideal for soft soldering and electroplating.

CLAD CONTACT MATERIAL

Precious metals and alloys bonded to base metals available in following types — overlay, single and double edgelay, single and double inlay, Top-lay, ready for you to fabricate into contacts.

CLAD CONTACTS

General Plate can supply all types of fabricated clad contacts, buttons, rivets, contact assemblies made to customer's specifications. These contacts give electrical conductivity and long life at reduced costs.

WAVE GUIDE and COLLECTOR RINGS

RECTANGULAR WAVE GUIDES. Solid silver, silver lined brass or aluminum. Sizes to government specifications. COLLECTOR RINGS. Solid silver or precious metal on base metal. All sizes.

General Plate Products

that solve your Electronic Design Problems

General Plate Clad Metals, made by metallurgically bonding one metal to another, are available in sheet, strip, tubing or wire in various widths, thicknesses and diameters.

Silver, gold and platinum-group metals bonded on base metals give solid precious metal performance at a fraction of the cost of solid precious metal. The precious metal provides specific performance requirements such as electrical conductivity and corrosion resistance while the base metal provides workability, strength, and solderability.

Clad base metals provide a new group of engineering metals with properties not available in solid metals. Their use frequently results in lower material costs as compared to solid metals.

In many electronic applications further economy results when General Plate supplies fabricated parts ready for assembly into your product. General Plate makes an infinite variety of fabricated parts, such as electrical contacts, collector rings and TRUFLEX thermostat metal parts to customer's exact specifications.

General Plate Engineers will gladly help you with your problems.

Diffusion and Booster Pumps

NRC Booster and Diffusion Pumps

While NRC high vacuum diffusion and booster pumps are unsurpassed for through-put, blank off, and fore-pressure tolerance, they are especially outstanding for reliability. They offer long, trouble-free life, and are easy to maintain. Narcoil pumping fluids are unusually stable, have excellent pumping characteristics, and are low-priced. Narcoil-10 is \$10.50 per gallon and Narcoil-40 is \$38.50 per gallon.

PUMP MODEL	BLANK-OFF, mm. Hg (C)	MAX. SPEED LITERS/SEC.	TOLERABLE FOREPRESSURE mm. Hg	PUMPING FLUID	PRICE (D)
DIFFUSION PUMPS					
G-2-M (A)	8×10^{-7}	30	0.50	Mercury	\$225
H-2-P	2×10^{-7}	80	0.25	Narcoil 40	125
A-2-P (B)	2×10^{-6}	85	0.20	DC 703	150
H-4-P	5×10^{-7}	300	0.31	Narcoil 40	245
H-6-P	5×10^{-7}	730	0.20	Narcoil 40	410
H-10-P	5×10^{-7}	1900	0.19	Narcoil 40	745
H-16-P	5×10^{-7}	5500	0.30	Narcoil 40	1320
BOOSTER PUMPS					
B-1	1×10^{-4}	8	0.30	Narcoil 10	\$ 65
B-2	1×10^{-4}	85	0.85	Narcoil 10	195
B-4	1×10^{-4}	260	1.30	Narcoil 10	355
B-6	1×10^{-4}	530	0.90	Narcoil 10	990
B-12	1×10^{-4}	3500	0.90	Narcoil 10	

Note A: Glass pump
 Note B: Air-cooled. Price includes blower
 Note C: Untrapped ion gauge, except for G-2-M
 Note D: Includes initial charge of pumping fluid

Vacuum Gages

Model 520

NRC vacuum gauges are outstanding for their accuracy and ability to withstand hard usage. The NRC Model 520 shown above is an all-purpose gauge with uniquely wide range and accuracy. Its ruggedized new circuitry eliminates troublesome components, minimizes contamination effects and provides highly stable linear amplification.

MODEL	TYPE	RANGE mm. Hg	PRICE complete with head(s)
NRC HIGH VACUUM GAUGES			
501	Thermocouple Head	10^{-3} to 1.0	\$10.50
507	Ionization Head	2×10^{-8} to 5×10^{-3}	22.00
510	Alphatron® Ionization	10^{-3} to 10.	520.00
515	Logarithmic Alphatron® Ionization	10^{-3} to 10.	250.00
516	Pirani	10^{-3} to 1.0	175.00
520	Alphatron Ionization	10^{-4} to 10^3	550.00
701	Thermocouple	10^{-3} to 1.0	130.50
710	Thermocouple Ionization	2×10^{-8} to 1.0	438.00

NRC HIGH VACUUM SYSTEMS

As one of the pioneers and leaders in the design and manufacture of many kinds of high vacuum systems, NRC also can supply standard and specially engineered equipment such as:

Vacuum Furnaces, Vacuum Coaters
 Freeze Driers, Impregnators, Vacuum Driers
 Vacuum Analytical Equipment
 (for measuring gas content of metals)
 Specially engineered vacuum systems

NOW WE CAN IMPACT EXTRUDE UNUSUAL SHAPES IN ONE PIECE

*Important new
service assures:*

- Unusually shaped, one-piece extrusions.
- Low piece price.
- High degree of strength.
- Low tool costs.
- Many finished dimensions.
- Prompt delivery backed by this company's 30 year reputation of serving industry.
- Important savings in new designs and economies in present production.

Let us examine your blueprints or the part itself.

LIBERTYVILLE ILLINOIS

A RELAY for every application . . .

From extremely sensitive to heavy duty relays . . . whatever the need . . . you'll find Wheelock Relays built to meet the severest operating conditions.

Backed by more than a quarter-century of specialized engineering experience, each relay embodies design features which insure accurate, efficient and dependable operations to meet exacting standards of performance. That is why . . . whenever performance counts . . . Wheelock Relays are used as components by many of the largest manufacturers of electronic equipment and devices, and for other control operations by leading industrial firms everywhere.

Many of our relays are designed to meet Navy and military applications without modification. Other standard relays are available, or relay assemblies modified to fit various armed services' requirements. Tell us your requirements and we will gladly submit our recommendations.

ELECTRONIC
COMPONENTS**

**HERE'S
WHY:**

We are specially equipped to furnish standoff and feed through terminals in a full range of materials and sizes . . . in economical quantity runs . . . from either our standard line or custom fabricated to your specifications . . . and *deliver them promptly.*

Whitso Standoff Terminals are available in over 100 varieties . . . fork, single and double turret, post and miniature types . . . male, female or rivet mountings . . . molded or metal base. They are molded from melamine thermosetting materials for best electrical properties.

Whitso Feed Through Terminals can be furnished as standard or to your individual specifications.

Whitso Melamine Jacks are electrically and mechanically designed for long, reliable service. A wide range of colors are available for color coding. Special colors can be supplied.

Whitso Pointer Knobs, widely popular in military use, are readily suited to countless communications and industrial applications. They are supplied in attractive black phenolic with satin finish.

Whitso Custom Molded Parts for electro-mechanical use include general purpose, mica filled and high impact phenolics, ureas, melamines, alkyds, glass reinforced alkyds and nylons.

Get full facts on Whitso terminals and other electronic components. Ask for our new catalog.

I-S SPRINGS of beryllium copper can help you

IMPROVE YOUR PRODUCT'S QUALITY, REDUCE YOUR COST, INCREASE YOUR PRODUCTION

Instrument Specialties Company specializes in the design and custom manufacture of age-hardened alloy springs. With our specially developed processes and machines, our engineers are able to

realize the fullest performance potential from the superior spring materials around which I-S service to designers and manufacturers has been developed.

**FOR
HIGH
PRODUCTION**

STRIP SPRINGS

Fabricated from beryllium copper. Easily handled, readily broken apart by hand or used in automatic or semi-automatic assembling devices and contact riveting machines. Individual pieces may be broken off without trace of burr. Eliminate sorting, untangling and handling of loose pieces. Springs may be produced in strips to various shapes; formed angles may be held within plus or minus one degree. Heat treated in multiple fixtures to insure uniformity, close tolerances and elimination of variations in spring-back.

COIL SPRINGS

Made from laboratory tested beryllium copper wire. Special coil and heat treating equipment insures 100% uniformity. Guaranteed rigid tolerances held on diameter and load tests at specified deflection. These factors combine to assure increased service life through higher endurance strength—make products perform more consistently by eliminating drift, set or fatigue. Furthermore, they eliminate expensive hand adjustment and reduce inspection costs of finished product.

**FOR
LOW
ACTIVITY**

HIGH FREQUENCY SPECIALTIES

We are equipped to supply standard mating parts for use with 2C-39, 2C-40, 2C-43 and 3C-37 tubes, or custom made parts in related fields.

Grounding strips and contact fingers can be supplied in standard or special contours.

"Flea" contacts for subminiature tubes.

SHORT-RUN SERVICE

For those who need quick delivery of parts in pilot quantities or require a low-cost proving ground for spring designs. I-S methods eliminate expensive tooling. Laboratory controlled, precision produced—yet at lower cost than is possible with permanent, high-activity tools.

We are equipped to handle conventional stampings in short runs or in high production.

A COMPLETE ENGINEERING AND SAMPLE SERVICE

When your product is in the design stage, let us show you how I-S springs of beryllium copper may be designed to fit your needs. Ample stock, flexible facilities, short set-up time speed production of sample lots and trial orders.

over **100** designs of **Grant** INDUSTRIAL SLIDES

to meet **every operating situation!**

for
accessibility
space saving
speedy maintenance

Grant Industrial Slides afford substantial, practical mountings for nearly all types of assemblies—electronic, hydraulic, pneumatic, mechanical. They allow quick access... the pivoting types permit testing or work on underside as well as top of chassis... also provide for quick release of chassis for bench servicing. Slide mounting usually eliminates need for rear access doors and rear aisles—a very important saving of space. Grant slides are soundly engineered, durable and dependable. Load capacities range up to 500 lbs. and more.

Grant engineers and representatives in all important industrial areas offer specialized experience—will aid in working out custom variations to adapt standard slides to especially exacting requirements.

***CUSTOM BUILDERS
AND DESIGNERS OF:**

CAVITIES

**MIXERS • DETECTOR MOUNTS
DUPLEXERS • MULTIPLIERS
ROTARY JOINTS • BENDS
TWISTS • OTHER COMPLEX
COMPONENTS & ASSEMBLIES**

Application-engineered microwave parts and complex assemblies are our specialized field. We'll manufacture components to your prints ... or we will design and integrate them into your application.

You can depend on J-V-M for close coordination, guaranteed electrical performance and "know how" that is attested by innumerable assemblies ranging from dc. to 40,000 mc. now in industrial and military use.

FOR EXAMPLE:

1. Variable vane directional coupler ... sliding vane type ... high directivity—low VSWR.

2. Pre-selector-mixer ... S band ... 50 ohm input impedance ... high Q double-tuned ganged cavities ... detector output ... frequency stable from -55° to +85° C.

Get full information on J-V-M standard or custom-engineered microwave parts and components, also complex mechanical assemblies. Request catalog today.

**PRECISION TRANSFORMERS
MAGNETIC AMPLIFIERS — PULSE TRANSFORMERS
REGULATED POWER SUPPLIES**

ATLAS has built an enviable reputation as a thoroughly reliable source of supply for custom built precision transformers and magnetic amplifiers. Designed to your performance requirements, Atlas products incorporate the latest manufacturing techniques. Comprehensive engineering, production and testing facilities allow us to produce the most exacting circuits, meet military specifications, and handle large or small quantities. Transformers can be made in hermetically sealed cans, fosterite, scotch cast or open type.

LIST OF PRODUCTS

... power transformers, magnetic amplifiers, pulse transformers, audio transformers, filter chokes, toroidal coils, filament transformers, reactors, bobbin windings, instrument transformers, layer wound coils, MIL-T-27 types, hermetic sealing and special moisture-proof coatings.

GREEN

Model D-2

Pantograph Engraver

Unique design of the two-dimensional Model D-2 features — Single micrometer adjustment controls vertical depth of cut, and adjusts height of copy table and pantograph.

Range of ratios from 2 to 1 to infinity!

Accessibility on three sides permitting panels up to 30" diameter to be engraved, milled or profiled. Vertical range over 10" allowing operations on complete chassis, cabinets or other bulky objects. Ruggedness, stability and precise accuracy inherent in construction.

Mounted on the ruggedly constructed heavy duty steel Green Engraver Bench. All functional parts are conveniently within reach of the operator while seated. Accessibility of master type sets stored in lower cabinet trays, tools and accessories contribute to productive capacity.

A brochure with full details is yours upon request.

Literature also available on the smaller Model 106 three-dimensional engraver.

NEW!

AUTOMATIC'S TYPE BSM COAXIAL CONNECTORS FOR SUB-MINIATURE CABLES

For the first time... A new series of precision connectors unit-engineered to fit all specifications of sub-miniature cables.

NEW because . . .

No special tools required for assembly.

NEW because . . .

Foolproof clamping insures accurate alignment... positive contact... extra strong grip.

NEW because . . .

Unique bayonet lock for sturdier mating... quick and easy disconnect... good contact... accurate alignment.

NEW because . . .

Exclusive internal-parts design allows outside dimensions of connectors to remain constant regardless of cable dimensions.

Remember Automatic's Type BSM Coaxial Connectors the next time you have a design that calls for Sub-miniature cables and components. Our engineers are always ready to discuss your special requirements.

PRECISION-EERING

THE DIFFERENCE IN ATLAS DIFFERENTIALS

• Every tooth a masterpiece in finish, fit and motion. Atlas differentials are "precisioneered" to provide Nth degree accuracy in addition, subtraction and other electro-mechanical applications. The high sensitivity and minimal lost motion of precision Zerol gears ... plus corrosion and wear resistance assure long life in every assembly. Atlas gears and assemblies are made to meet your design and specifications. Have proved themselves by their acceptance and constant re-orders from the world's largest users of electro-mechanical equipment. From drawing board to production line Atlas design, production and methods engineers and skilled tool-makers work with you on a job basis. Let them help you. Write for your copy of "Precision-eering Electro-mechanical Equipment" to Atlas Precision Products, Philadelphia 24, Pa.

Sonex TRANSISTOR TESTER

Sonex CURVE TRACER

At last, a curve tracer both the small and large laboratory can afford. The Sonex Model CT-103 Curve Tracer will display on an oscilloscope the functional relationship between collector voltage and current for a fixed base current. Base current can be varied from zero to 500 microamperes. Calibrated axes are also displayed simultaneously. The forward and reverse characteristics of diodes can also be displayed with calibrated axes.

Net Price is \$99.00.

Model TT-102

\$150⁰⁰ Net

A general purpose transistor tester for laboratory, field, and industrial use. Its simplified operation makes it ideal for the engineer, serviceman, and production worker. Models available with a fixed or selection of operating points. It measures and reads directly

on a four inch meter the following transistor parameters:

- Beta: 0-50
0-150, or as calibrated
- I_{co}: 0-50 microamperes
0-150 microamperes
- R_c: 0.02 megohms to 1 megohm

THYRATRON CONTROL

Employing Inert Circuit Elements

A simplified, fast response, grid control circuit producing a steep wave front grid firing potential which can be varied in phase from zero to 180° is available for application such as high power fast response servos, regulated power supplies with variable frequency inputs, motor controls, etc. Units are supplied in matched sets for full wave or three phase applications. Where extremely small levels of control power are available the unit can be driven by a transistor.

WacLine Precision Electronic Products

Now Available Commercially

Famous WacLine military electronic products are now available for use in your commercial or military products. WacLine's experience in manufacturing products to rigid government specifications and time schedules assures the finest quality components and excellent deliveries.

MICROWAVE

Waveguide test components, adapters, probes, slotted lines, mounts, dummy loads, attenuators, and special assemblies. For all band applications, from "K" to "L."

TACHOMETERS

Direct-connected types for RPM indication and controlling speed of electric motors, processes, etc. New flat, pancake design features special, non-protruding axial design. Adaptable for motor sizes from 2" diameter and larger.

ADJUSTABLE SPEED A-C DRIVES

Induction motor units with closely-regulated, variable speed, for constant torque applications. From 0.1 oz.-in. to 50 lb.-ft. torque capacities. Adaptable to explosion-proof or hermetically sealed designs. Remote indicating and controlling optional. Can be adapted to a large variety of applications with close tolerances and wide ranges of speed.

Have a Problem? Let WacLine engineers help solve it. Our complete staff and laboratory facilities are at your disposal.

**BUILD
RELIABILITY
INTO
EVERY
CIRCUIT**

Specify Birtcher tube cooling and retention devices

Eighty-five percent of all electronic equipment failures are caused by tube failures, and one of the main causes for tube failures is high temperatures.

The Birtcher Corporation, with more than 15 years experience in the manufacture of tube retention and cooling devices, is currently solving tough reliability problems for both government and industry through the use of its Kool Klamps, JAN shield inserts, and other tube-cooling devices—specially adapted where necessary to fit customers' special needs.

KOOL KLAMPS

Birtcher KOOL KLAMPS perform two important functions. Being made of 99½% pure, heat-treated silver, they reduce sub-miniature and miniature tube temperatures by as much as 40°C. They also serve to hold tubes and components secure against shock and vibration. For applications where heat is not the prime problem, KOOL KLAMPS are also available in beryllium copper.

TUBE CLAMPS

Available in more than 6,000 modifications for your every tube and component retention need. Manufactured from type 302 stainless steel, Birtcher TUBE CLAMPS hold tubes and components securely in place, even under severe shock and vibration. The dual tension loops on the Type 22 Clamp illustrated are specially designed to compensate for the wide range allowed tube manufacturers by JAN specifications on base diameters.

CORRUGATED JAN SHIELD INSERTS

The Navy Electronics Research Laboratory (N.E.L.) developed these Birtcher-manufactured corrugated JAN shield inserts to combat the high rate of tube failures due to excessive heat. Made of blackened spring brass, they are designed to be inserted between tube and shield, to transmit heat from the tube to the shield. N.E.L. tests show that the use of these inserts usually brings tube temperatures well within the manufacturer recommended operating range.

*Let us help you build reliability into your circuits
—as we've done for so many others. Write for catalogs
or contact your local Birtcher representative.*

Color coded constructions available
For high temperature (200° C) and low-loss applications
Extreme chemical resistance

HYRAD

Hyrad insulation is a new development by Sequoia Process Corporation.
A modified polyethylene (irradiated) to provide increased resistance
to high temperatures and chemical attack. Retains the high-voltage, low-loss
characteristics of conventional polyethylene.
Features absence from cold- and hot-flow; does not shrink during solder-
ing; non-toxic; and is rated for continuous operation at 150° C, 20-hour
cumulative service at 200° C. Color coded, solid or cellular types available
in miniature and standard coaxial cables, special cables, and sleeving or tubing.

Multi-Swage

Choose right and make Big Savings on SMALL METAL PARTS

COSTS HALVED! Instead of turning and drilling parts like these from solid rod, or stamping and forming them, the **BEAD CHAIN MULTI-SWAGE** Process automatically swages them from flat stock. By doubling the production rate and eliminating scrap, this advanced process can save you as much as fifty percent of the cost of other methods.

The **BEAD CHAIN MULTI-SWAGE** Process produces a wide variety of hollow or solid metal parts—beaded, grooved, shouldered—from flat stock, tubing, rod, or wire—of any metal. Sizes to 1/4" dia. and 1 1/2" length.

GET COST COMPARISON ON YOUR PARTS—If you use small metal parts in quantities of about 100,000, don't overlook the almost certain savings of this high-speed, precision process. Send sketch, blueprint or sample part and our engineers will furnish facts about Multi-Swage economy. Or, write for Catalog. UNIVERSAL

CAN & CONDENSER CO., Inc.
Division of McNaught Metal Products

Molded Plastic Tubular

UNIVERSAL'S molded plastic tubular capacitors are enclosed in a specially modified polyester resin.

A careful controlled molding cycle with a balance of the right heat and pressure assures a positive heat resistant, rugged thermo-setting plastic, which provides maximum protection against humidity, and is capable of withstanding severe physical shock.

Each section is of the non-inductively wound extended foil type. The tinned copper weld leads are firmly soldered to the extended foil, and imbedded in the plastic case so they can not pull or break off.

OPERATING TEMPERATURE: -40°C to 85°C.

LIFE TEST: 500 hours at 150% of rated voltage at 85°C.

HUMIDITY: 10 cycles of standard RETMA humidity resistance test.

DIELECTRIC STRENGTH: 2 1/2 times rated voltage for 5 seconds.

INSULATION RESISTANCE: 2000 megohms per microfarad or 8000 megohms per unit whichever is lower.

POWER FACTOR: Less than 1% at 1000 cycles at 25°C.

Ceramic Cased Capacitors

UNIVERSAL'S ceramic cased capacitors. These units are sealed into steatite tubes with a plastic end seal, which insulates the capacitor electrically, and prevents contamination with moisture. This assures **LONG LIFE, LOW POWER FACTOR** and unusually **HIGH INSULATION RESISTANCE**.

OPERATING TEMPERATURE: -40°C to 85°C.

LIFE TEST: 500 hours at 85°C, at 150% of rated voltage.

HUMIDITY: 10 cycles RETMA humidity test.

Generator Capacitors

UNIVERSAL'S Generator Capacitors: are of hermetically sealed construction and enclosed in tinned brass cases. All electrical connections are soldered, assuring trouble free operation, and eliminating open circuits. This type of generator will meet thermocycle, immersion, and vibration test requirements. Mounting brackets are securely soldered to the tinned cases, and available in various sizes and types.

Waveguides?

The F. C. Kent Company has long been recognized as the outstanding source for formed waveguides in the country. If you have requirements for bent and formed waveguide sections — waveguides with as many as seven or eight different bends in one continuous section of tubing—in different planes and with sharp radii; if your assemblies call for waveguide tubing to be twisted, offset, tapered, expanded or call for a transition from rectangular to round; then we wish to bring to your attention our exceptional ability as specialists in bending and forming waveguide tubing in all sizes.

This **MARCONI** *F.M./A.M. Signal Generator* **COVERS ALL MOBILE COMMUNICATION BANDS**

The new Marconi Signal Generator type 1066/1 meets all requirements for the design and maintenance of f.m. equipment in the range 10-470 Mc. Here is a precision Marconi instrument for an exacting job.

The oscillator works on fundamentals throughout and there are no spurious submultiple outputs; its temperature compensation and fully-regulated plate and filament supplies give excellent frequency stability. A magnetically-biased ferrite frequency modulator ensures rock steady deviation characteristics. Other major features are the Marconi-patented contactless range turret and a 50Ω piston attenuator which is truly resistive. Engineers will appreciate the separate incremental frequency controls with meter calibration; these enable precise f.m. carrier shifts of as little as 1 kc in 450 Mc without readjustment of main frequency control.

F.M./A.M. SIGNAL GENERATOR TYPE 1066/1 Abridged Specifications

Frequency Range: 10 to 470 Mc in five bands—all on fundamentals • Frequency Stability: Better than 0.0025% per 10 minutes period after warm-up • Modulation, F.M.: 0 to 20 and 0 to 100 kc deviation monitored and continuously variable • Modulation, A.M.: 0 to 20 and 0 to 80% depth, monitored and continuously variable • Modulation Frequencies: 1 and 5 kc • Distortion due to Modulator: Less than 1% • Output: 0.1 μV to 100 mV across a 500 termination • Output Accuracy: Incremental, 0.2 dB; within 2 dB overall • Leakage: Negligible; allows full use of 0.1 μV output • Incremental Frequency Controls: Variable, 0 to ±100 kc. Stepped, ± 5, 10 and 15 kc. • Tubes: 5Z4G, 6AK6, 6CD6G, 6AK5, OB2, 5861, 6C4, 6L6G, 12AT7.

▲ **ELECTRO-HYDRAULIC** servo valve (Model 10 Series) operates linearly through flow range from 0.1 to 6.0 gpm. at 500 to 3000 psi. Response to 75 cps. with 45° lag, maximum current 8 ma. Weight only 0.87 lb.

◀ **RADAR SCANNER** development brings together Dalmo Victor's composite technical experience. From original design to quantity manufacture, DV integrates separate design and production skills for balanced, optimum performance of all components.

"SYSTEM-MINDED" MEANS OPTIMUM COMPONENT PERFORMANCE

System requirements are the starting point for Dalmo Victor. DV engineers bring to every job a broad comprehension of system needs supported by versatile production skills in electro-mechanics, hydraulics, servo-electronics, and microwaves.

Dalmo Victor's advanced component designs are the result. Engineered and produced for optimum performance, they are light, precise, reliable. Write for technical data sheets on DV "system-minded" components applicable to your system needs.

SPEED REDUCER features negligible backlash and high accuracy. Exacting lightweight design up to 3 hp. has been proved in precision airborne electro-mechanical equipment. Gear reductions can be varied to suit your design.

HORN-TYPE fixed microwave antenna comes in two models covering frequency ranges 4750-7350 and 7050-10800 mc. Features are low VSWR, and VER as low as 1.6. Wide radiation angle — half-power beam width greater than 45° — suits these antennas to telemetering, communication, direction finding.

RECESSED HELICAL antenna, product of historic DV competence in microwaves. Six models cover frequencies from 380 to 5000 mc. Features are low VSWR, and VER as low as 1.6. Adapter rings and crystal monitors optional. Compact and light antennas fit telemetering, communication, military applications.

AIR COMPRESSOR, a positive displacement unit, provides dust-free, oil-free output ideal for waveguide pressurizing systems and air-operated instruments. Capacity of 65 cu. in./min. at 15 psi. absolute, at 50,000 ft. AC or DC motor. Assembly weight 4.625 lb. Mating dehydrators and pressure switches available.

New

a PROGRAMMABLE regatron® power supply (Remote Control)

another EM "first" in the power field

- Specially designed for automation, test consoles, computers.
- Ideal for laboratory and production purposes.
- Main and vernier controls.
- Auxiliary bias and filament outputs.
- Super regulation over full range and for all load conditions.
- An unusually low-priced, high-quality unit.

	VOLTS	CURRENT	REGULATION	RIPPLE
Model 231-A	0-300	0-100 MA	0.1 V	1 MV
Model 232-A	0-300	0-200 MA	0.1 V	1 MV
Model 233-A	0-300	0-300 MA	0.1 V	1 MV

OTHER EM POWER SUPPLIES: nonprogrammable REGATRON types • general-purpose series • airborne series • the new lightweight, compact REGATRON transistor-type power packs for low-power applications.

EATONTOWN, NEW JERSEY • EATONTOWN 3-0300

PERFECT ALIGNMENT

of miniature & sub-miniature tube pins & sockets featuring stainless steel #303 inserts and pins

★ STAR TUBE PIN STRAIGHTENERS

Miniature Type
JE-13 and JE-13B with 8 holes for 7 pin tubes.
JE-15 and JE-15B with 10 holes for 9 pin tubes.

Dual Type
JE Mark III Dual Type with 10 holes for 9 pin miniature tubes and 9 holes for 8 pin sub-miniature tubes.

Sub-Miniature Type
JE-5 with 9 holes for 8 pin tubes.
JE Mark IV with 7 In-line holes for sub-miniature tubes.

★ STAR MINIATURE and SUB-MINIATURE SOCKET WIRING PLUGS

Also manufactured to your specifications. Write Dept. 162 for technical data.

★ STAR EXPANSION PRODUCTS COMPANY

(INCORPORATED)
142 LIBERTY STREET NEW YORK 6, N. Y.

POLYSTYRENE AND TEFLON CAPACITORS

- Highest Insulation Resistance
- Lowest Dielectric Absorption ("Soakage")
- Lowest Power Factor
- Highest Capacitance Stability
- Low Temperature Coefficient
- Stable Operation Up to 85°C. (Polystyrene) and 200°C. (Teflon)

ADJUSTABLE CAPACITORS

- Large Capacitances of Close Tolerance
- Instantaneous Capacitance Changes without Drift Range
- Adjustment Range $\pm 1\%$ of Nominal Value
- Noninductive Winding for Minimum Power Factor and Soakage
- Same Electrical Characteristics as Above

fci

*the stabilized
precision capacitor
for critical applications*

HIGH VOLTAGE CAPACITORS

- New "High-Breakdown" Plastic Film Dielectric
- Small Size - Light Weight - Low Price
- Operation Up to 125°C.
- Voltage Up to 60,000 V

STOCK AND SPECIAL-ORDER CAPACITORS TO MEET EXACTING INDUSTRIAL SPECIFICATIONS

TYPE D CAPACITORS

- Small Size - Low Cost
- Very High Insulation Resistance
- Moderate Dielectric Absorption ("Soakage")
- Available in Styles CP04, CP53, CP70, and Ceramic Jacketed

ROGAN BROTHERS

8031 N. Monticello Ave., Skokie, Illinois

YOUR "SPECIAL" TIMER may be one of our 721 STANDARD UNITS!

FUNCTION	no 1		
	no 2		
	no 3		Time Delay Timers
	no 4		
	no 5		
TIME		Running Time Meters	20' 30' 40' 50'

We have 20 years of experience in developing new timers to meet our customers' widely varying requirements. Our Engineering Department not only originates new designs, but also develops modifications for that purpose. That's why most requests for special timers can be filled without delay—by one of the 721 combinations we've developed so far from our 17 basic types of timers. But if we don't have what you want on hand, we'll welcome the chance to design and make it for you! And quickly too!

We manufacture a complete line of timers in these 4 broad classifications:

- INTERVAL TIMERS • TIME DELAY TIMERS
- RE-CYCLING TIMERS • RUNNING TIME METERS

Our large stock assures you of rapid deliveries—even when we have to create a brand new timer for your special needs. Ask us first—you may save yourself much lost motion...and your inquiry will receive prompt attention.

*Timers that Control
the Pulse Beat of Industry*

DIETZ

a dependable source for

TOROIDS

all types — standard or special designs

Uncased • Plastic Cased • Metal Cased

to meet your most exacting specifications

UNCASED: Plain or impregnated with wax or Permafil. Complete range of sizes and temperature coefficient characteristics. High Q values.

PLASTIC CASED: The Dietz molding technique assures no shifting of inductance value during molding. Furnished to your closest tolerances.

METAL CASED: Hermetic sealed to MIL-T-27A specs. Single or multiple assemblies. Combinations with other components to your sub-assembly requirements. Temperature controlled units for "on-the-nose" operation.

FILTERS: All types—maximum stability, sharpness, and attenuation characteristics. Temperature controlled units for no-frequency-shift performance.

Vibrator Power Supplies from Milli-watts to Kilowatts

Allied Industries

All government specifications met by our coaxial cable U.G. CONNECTORS..

UG-37A/U — A1-11032 — Ceramic insert, pressurized, high voltage receptacle. Weatherproof. Operating voltage—15 kilowatts. Flash over does not break down insulation. May be operated with high temperatures with no break down in pressure seal.

UG-21D/U—A1-11072—Improved Type N Plug. Mates with standard type N and Improved Type N Jacks. For use with RG-8, 9, 9A and 10/U cable. Weatherproof. Performance is good to 10,000 megacycles. Nominal impedance—50 ohms. May be used with 70 ohm cable if impedance matching is not important.

A1-11047—High voltage quick disconnect right angle adapter. One male—one female end. Similar to, but does not mate with, BNC series. Weatherproof. Teflon inserts. Constant impedance of 50 ohms. Operating voltage—5 kilovolts. Operates satisfactorily to 10,000 megacycles.

A1-11022—High voltage quick disconnect plug similar to, but does not mate with BNC. Weatherproof. Teflon insert. For use with RG-59, 62, and 71/U cable. Constant impedance of 50 ohms. Operating voltage—5 kilovolts. Operates satisfactorily to 10,000 megacycles.

UG-154/U — A1-11070 — Type LC Plug for use with RG-17/U cable. Fifty ohm impedance. Weatherproof. Five kilovolt rating. It may be used with RG-19/U cable at a rating of 10 kilovolts.

MX-554/U—A1-11039—Type BNC Termination. Mates with BNC Receptacles and jacks. Weatherproof. Furnished at any desired impedance. Operating frequencies same as standard BNC.

UG-355/U—And UG-356/U—A1-11006 Klystron Coupler. The UG-355/U couples two type N Jacks to a 726 C Klystron. The UG-356/U couples two type N Jacks to a 2K29 Klystron.

All orders delivered promptly
For quotations and fast action on quality connectors at the right price—phone, wire or write;

The latest in ULTRASONIC SOLID DELAY LINE

Research and development applications for particular customers in computer and radar work, etc., Standard units are now available in fused quartz and zero temperature coefficient glasses. Containers will meet all applicable JAN Specifications.

COMPLETE CASTING EMBEDMENTS AND ENCAPSULATION

- **For your Hermetic Sealing Requirements**
Impervious to climatic destruction—greater mechanical strength—improved appearance—reduction in size and weight—tamper proof.
- **You only spend engineering time and money to:**
Design your transformer, amplifier, rectifier and transistor. Give us your outside dimension requirements.
- **We will:**
Encapsulate or cast your units with the best one of our over 1200 different formulations using materials such as — Fosterite — Permafil — Scotchcast — Acme — Stypol — Araldite — Hysol — Epon — Paraplex — Stycast — Silastic.
Save you time and money with our tooling techniques. These modern methods of Hermetic Sealing are adaptable to the smallest component or the largest assembly.

★ *Our engineers will be pleased to discuss applications with you and embed or encapsulate samples to your requirements. Write, wire, or phone today.*

D-79 GAUSSMETER

Means More
In **MAGNETICS** . .

HERE'S WHY:

- Reads 10 to 30,000 Gauss Flux Fields
- Probe is only .025" thick
- Active area .01 square inches
- Net Weight 10-1/2 lbs.
- Power Supply 105-125 Volts, 50-60 Cycle
- Overall size 13" high, 10-1/2" wide, 6-3/4" deep

Precision built to give accurate flux density measurement and determine "flow" direction. The unit also locates and measures "stray fields," plots variations in strength, and is ideal for checking production lots against a standard. Simple to operate, the D-79 gives no ballistic reading . . . doesn't jerk or pull. Comes in protective carrying case.

The leader in **MINIATURE** audio transducers

Knowles audio transducers have set new performance and size standards.

The microphone and receiver shown here have made possible the miniature head-worn and eye-glass transistor hearing aids.

We are custom designers and manufacturers of products geared to particular requirements. Because of our diversified experience and numerous designs, we can often engineer and produce a product for a specific use faster and at lower cost.

Design Engineers! Write for details on company letterhead.

Powerunits furnish an adjustable source of DC from AC lines. New in appearance and functional in operation, this group of high current DC Power Supplies has been designed on the basis of our experience in supplying industry and government agencies during the past several years. Simplicity of circuit, lack of moving parts and quality of components have reduced maintenance problems to zero. A reduction in volume by as much as 50% without sacrifice of other characteristics has been achieved.

Front panel controls include a combined primary circuit breaker and on-off switch, low voltage circuit breaker, output control knob, voltmeter and ammeter, pilot light and output binding posts. Positive overload protection is assured by two circuit breakers, one in the primary circuit, and another in the output circuit. The primary circuit breaker functions if the AC current demand of the unit becomes abnormal. The secondary breaker, placed in the low voltage circuit, operates when rated DC current is exceeded. Both breakers may be reset from the front panel. Circuit breakers are chosen for their time delay characteristic. Powerunits using Germanium or Silicon rectification are generally provided with instantaneous circuit breaker protection while longer time delays are optional on units using selenium rectification.

The output control is in the form of a continuously variable autotransformer which affords almost stepless variation of output within the complete range of the instrument. A tap on this transformer may be used to secure full DC output with an AC line as low as 105 volts. Voltmeter and ammeter are 4" rectangular instruments accurate to 2%. Meters are placed adjacent to each other to facilitate simultaneous readings of voltage and current. The pilot light face is 1" in diameter and uses a standard 117 volt lamp replaceable from the front panel. Binding posts colored red and black give polarity identification for DC output. The DC output is completely isolated from AC input and, if required, either side may be grounded. Standard Powerunits are designed to operate from an AC input of 117 volts, 60 cycles, single phase. An 8 foot cord set with AC plug is supplied.

TRANSFORMERS FOR ELECTRONICALLY REGULATED POWER SUPPLIES

Now... over the counter

Avoid delay in making your breadboards, no waiting for a special when a

STERLING 2K SERIES

transformer will meet your requirements exactly. Stock STERLING 2K units are available for supplies from 100 milliamperes at 100 volts to 400 milliamperes at 300 volts

Each 2K transformer provides:

- PLATE VOLTAGE ALLOWANCE FOR PASS TUBE..... VOLTAGE DROP
- RECTIFIER FILAMENT POWER.....
- PASS TUBE FILAMENT POWER.....
- REGULATOR CIRCUIT FILAMENT POWER.....
- AUXILIARY FILAMENT POWER FOR OTHER CIRCUIT REQUIREMENTS.....
- REGULATOR CIRCUIT PLATE POWER.....
- APPLICATION BULLETIN WITH EACH UNIT

Military versions of each of these units is also available. Technical data on the complete line is available on request.

SAMPLES? SPECIALS? SHORT RUNS?

The 2K series is only one of the many types we make. We specialize in custom-built transformers to your specifications. Let our engineering staff help solve all your transformer problems.

Samples delivered in 1 to 3 weeks.

Technical specifications on a typical unit of this family of transformers for use in a 300 volt 200 milliamperes dc regulated power supply with 90 to 130 V AC input:

"LINDE" M.S.C. RARE GASES
Trade-Mark (Mass Spectrometer Controlled)

- Helium
- Argon
- Neon
- Krypton
- Xenon

In radar electronic equipment, nuclear radiation counters, cosmic ray cloud chambers, and thyratrons, where the purest rare gases are demanded, LINDE M.S.C. Grade gases meet the specifications. They are produced under continuous mass spectrometer control to assure you of gases of known purity and consistently high quality. LINDE, the world's largest producer of gases from the atmosphere, can meet your individual needs of volume, mixture, and container.

For information on the physical, chemical, and electrical properties of these gases, send for the booklet, "LINDE Rare Gases."

KOCH FIBERGLAS CASES

give greater protection to

ELECTRONIC EQUIPMENT

than any ever designed in any material

T-11 Camera manufactured by Fairchild Camera and Instrument Company travels safely in case of Koch Fiberglas.

In a field test by the U.S. Air Force, a Koch Case loaded with delicate equipment was parachuted from 600 feet by a plane flying 300 miles per hour. There was no damage to equipment or case. A Koch Case loaded with three times its weight was dropped 250 feet into water without a 'chute, and was recovered undamaged. Another Koch Case loaded with equipment was dropped from 500 feet at -30° C. onto snow, without parachute. Neither case nor contents suffered injury.

Not one instance of damage ever reported to Koch Case or Contents

Koch Fiberglas has the highest Quality Control rating in its industry. Koch Cases provide a Method 2-D package which far surpasses any military specifications. Koch carrying cases can be used for instruments, electronic equipment, aerial cameras, film, sound equipment, and missile-control systems.

Do you have a shipping, storage, packaging, or materiel problem? If so, Koch Fiberglas may well be the answer! Write for free 20-page illustrated Tenth Anniversary Manual of Fiberglas Fabrication, on your business letterhead.

The cheapest insurance you can buy

- Will not dent
- Moisture-proof
- Air-tight
- Fungus-proof
- Mildew-proof
- Withstand parachute drops
- Withstand submersion
- Require no paint
- Can be self-palletized for fork lift
- Corrosion-proof
- Shock-proof, vibration-proof when fitted to Koch specifications with special hair-latex shock pads
- Provide insulation when fitted by Koch with foamed-in-place plastic
- Used for long-term storage
- Re-usable. Cost amortizes through re-use.
- Require no outer packaging for overseas shipment
- Aluminum closures can serve as antennae.

magnetic research corp.

a complete line of ALL-MAGNETIC COMPONENTS and MAGNETICALLY REGULATED POWER SUPPLIES

STABVOLT* DC COMPUTER POWER SUPPLY

Dual magnetic regulation—line transient-free

Stabvolt d.c. power supply provides line transient-free, precision-regulated d.c. output voltage, meeting the strict requirements for analog and digital computer applications. Flux oscillator controlled. Very low ripple, excellent dynamic and static regulation. Extremely low internal impedance. Maintenance-free. Ultra-fast response. Short-circuit proof. Available in a wide range of voltage and current levels.

Write for complete data.

TUBELESS PRECISION MISSILE AND AIRCRAFT INSTRUMENT POWER SOURCE MRP-5-1S

5 VDC transient-free output

Dual magnetic system isolates line voltage transients from the output, regulates d.c. to 0.1% accuracy. Does not distort line voltage wave form. Use of 2306-55 Cannon connector permits unit to carry 115 VAC up to 60,000 feet. A 25-turn Trimpot has 5 millivolt resolution, provides 0.5 volt output adjustment. Mounts easily in any position. Rugged, compact, short circuit-proof. Current capacity, 1 amp. Vibration tested with 15g up to 2,000 cps. Hermetically sealed; all components cast in thermosetting plastic. Meets MIL-T-27 and MIL-E-5272-A specs.

For full data, request Engineering Bulletin EB-5-1

ALL-MAGNETIC AIRBORNE PULSE GENERATOR MP 414

For commercial radar and digital computer uses

Uses only 1 watt of power, provides 250V pulse into 500 ohms. Pulse width: 4.5 microseconds; repetition rate: 400 pps. Weighs only 14 ounces, is hermetically sealed, and operates on 115V-400 cycle supply. No tubes, no moving parts. Short circuit-proof. Units available in ranges from 1 to 10 megawatts to replace conventional hydrogen thyatron pulse modulators in radar systems.

For full data, request Engineering Bulletin EB-204

MICROMAG* LOW-LEVEL MAGNETIC DC SIGNAL AMPLIFIER

Drift-free—for thermocouple and strain gauge applications in telemetering systems

Provides ripple-free 5 VDC output from 1 millivolt d.c. input, with extremely high gain stability. Response time: 40 milliseconds. No pick-up—no shielding required. No tubes, no warm-up time. Withstands extreme vibration and shock without introducing spurious noise. Reliable in high environmental temperatures. Operates on 400 cycles. Also useful for temperature and strain measurements in industrial and medical work. Weighs less than 7 oz.

For full data, request Engineering Bulletin EB-201-A

HIGH-POWER INDUSTRIAL MAGNETIC SERVO AMPLIFIERS

For servo systems in automatic control
Operate on standard commercial 50-to-60 cps power. Amplifiers are entirely static with power outputs from 0.1 to 5 kw. Compact, rugged units provide maintenance-free, reversible a.c. or d.c. control for high-power a.c. or d.c. servo motors. Transistor or tube control. These single and two-stage magnetic amplifier units require less than 1 watt of control signal power. Response time: Less than 25 milliseconds. Long life, low cost.

Write for complete data.

INSTRUMENT MAGNETIC SERVO AMPLIFIER SERIES

For aircraft and missile servo systems
Precisely engineered Magnestat Magnetic Servo Amplifiers are available from stock, from the smallest model rated at 3 watts, and having a frequency response of 0-30 cps, to the high-power 40-watt model, frequency 0-10 cps. These units have sinusoidal phase reversing output, with transistor or tube control... a.c. or d.c. input. Currently being applied in many major aircraft and missile servo systems.

For complete data, request Magnestat* Series engineering bulletins.

DC LABORATORY STABVOLT POWER SUPPLY MR 532-15

Line transient-free—

ideal for transistor work

Highly versatile, filtered d.c. lab power supply offers continuous, precise regulation from 3 to 36 VDC at 15 amps. Dual magnetic circuitry isolates line voltage transients from the output. Short circuit-proof, maintenance-free. No tubes, no moving parts. Excellent static and dynamic regulation. Has vernier d.c. voltage adjustment control. Uses flux oscillator type AC line voltage regulator. Has many uses in the laboratory, in original equipment and in industrial quality control. Competitively priced.

Write for complete data.

FOR YOUR SPECIAL DEVELOPMENT NEEDS...

MRC offers a complete service in creative engineering, design, development and production. Whatever your field of application—automation, computer, communication, electronic, instrumentation, aviation or guided missile—you'll find that MRC men have the highly specialized magnetronic experience and skill to do a fast, successful job. If you have a special problem involving magnetronic components, write or call MRC. Prompt response, no obligation.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences — rely on the "Guide" for the answers to their product problems.

For Product Data ...

the electronics BUYERS' GUIDE

The

Curtiss-Wright "SNAPPER"

U. S. Pat. No. 2658975

NEW CONCEPT... ADVANCED DESIGN IN THERMAL TIME DELAY RELAYS

Designed for high performance and long life, the Curtiss-Wright "SNAPPER" Thermal Time Delay Relay is proving itself in countless applications involving time delay in electrical circuits. Such applications include circuits to provide definite on-off time intervals to delay the application of high voltage until after warm-up period and for over and under voltage protection with simultaneous fault indication.

These relays have single-pole double-throw contact action,

high ambient temperature range, freedom from chatter and arcing, and are small in size. The "SNAPPER" thermal time delay relays are factory pre-set from 3 to 120 seconds. They are available in metal envelope, miniature (7 and 9 pin) or octal (8 pin) and in a glass envelope in 9 pin only.

Curtiss-Wright manufactures the High-Low "SNAPPER" Differential Thermostat with high precision characteristics. Write to Thermal Devices for complete information.

**SO SENSITIVE
IT CAN MEASURE THE CHARGE
BETWEEN YOUR FINGERS**

CURTISS-WRIGHT DYNAMIC CAPACITOR ELECTROMETER

FOR STABLE AMPLIFICATION OF LOW-LEVEL DC SIGNALS

Measures currents as low as 10^{-16} amp. • Extremely high input impedance . . . 10^{15} ohms. • Low drift — less than ± 1 mv per 24 hours. • Uses dependable, durable dynamic capacitor. • Accuracy of $\pm 1/2\%$ full scale. • Only 14" x 10" x 9"

The Curtiss-Wright Dynamic Capacitor Electrometer is ideal for measuring minute currents or voltages from high impedance sources. There is no 60 cps interference since the Dynamic Capacitor Electrometer operates at 1,000 cps. The instrument can be used to measure static charges, potentials of floating grids, insulation leakage currents, capacitor dielectric leakages; and to study transistors and diodes. Its ruggedness, reliability, and high sensitivity make it especially suited for use in the nuclear field as a component in reactor control systems and in industrial control systems employing radioisotopes as energy sources. It can be used for pH determination, and in mass spectrometry. In biophysics and medicine it may be used to measure cell potentials, skin potentials, streaming potentials, injury potentials, and nerve impulses. Besides providing an indication on its own meter, it will operate any standard recorder. For details, write Nuclear Equipment Sales Dept., Curtiss-Wright Corporation, Electronics Division, Carlstadt, N. J.

BUYERS'
GUIDE

Regulation in less than $1/50$ th cycle . . .

Output of typical electromechanical regulator.

Output of Curtiss-Wright Distortion Eliminating Voltage Regulator from same input. Actual oscillograms of 60 cps voltage.

Actual 60 c.p.s. waveform

PLUS Pure Sine Wave Power

CURTISS-WRIGHT LINE REGULATOR

- Electronically regulates r.m.s. and peak voltage simultaneously to $\pm 1\%$.
- Reduces typical power line distortion to less than 0.3%.
- Furnishes 1.4 KVA of distortion-free power.
- Introduces no phase shift between input and output.
- Simultaneously provides additional 4 KVA of $\pm 1\%$ electromechanically regulated power.

Faster recovery time (less than $1/50$ th cycle, or 330 microseconds) plus the unique ability to *eliminate* line distortion — these are the reasons why the Curtiss-Wright Distortion Eliminating Voltage Regulator has been chosen by more and more laboratories and production test departments. Besides general laboratory use, this line regulator provides sim-

pler, more accurate calibration of meters . . . better design of transformers, synchros, motors . . . easier testing of such components, with fewer rejects . . . easier, more accurate measurement of magnetic properties and receiver sensitivity . . . better a.c. computer performance . . . elimination of fast line transient effects. Write for details.

**Heathkit
PRINTED CIRCUIT
OSCILLOSCOPE KIT
FOR COLOR TV!**

① Check the outstanding engineering design of this modern printed circuit Scope. Designed for color TV work, ideal for critical Laboratory applications. Frequency response essentially flat from 5 cycles to 5 Mc down only 1 1/2 db at 5.8 Mc (TV color burst sync frequency). Down only 5 db at 5 Mc. New sweep generator 20-500,000 cycles, 5 times the range usually offered. Will sync wave form display up to 5 Mc and better. Printed circuit boards stabilize performance specifications and cut assembly time in half. Formerly available only in costly Lab type Scope. Features horizontal trace expansion for observation of pulse detail — retrace blanking amplifier — voltage regulated power supply — 3 step frequency compensated vertical input — low capacity nylon bushings on panel terminals — plus a host of other fine features. Combines peak performance and fine engineering features with low kit cost!

**Heathkit TV
SWEEP GENERATOR KIT
ELECTRONIC SWEEP SYSTEM**

② A new Heathkit sweep generator covering all frequencies encountered in TV service work (color or monochrome). FM frequencies to 4 Mc — 220 Mc on fundamentals, harmonics up to 880 Mc. Smoothly controllable all-electronic sweep system. Nothing mechanical to vibrate or wear out. Crystal controlled 4.5 Mc fixed marker and separate variable marker 19-60 Mc on fundamentals and 57-180 Mc on calibrated harmonics. Plug-in crystal included. Blanking and phasing controls — automatic constant amplitude output circuit — efficient attenuation — maximum RF output well over 1 volt — vastly improved linearity. Easily your best buy in sweep generators.

YOUR PRODUCT**

at point of strain

Protect product saleability too — by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—

- ★ Anchor cords to housing
- ★ Eliminate taping or threading
- ★ Prevent unraveling
- ★ Prevent cord pull damage
- ★ All sizes and styles
- ★ Easy to apply
- ★ Inexpensive

Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!

Ask for samples.

4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES

Economically

**CRIPMASTER
STRAIN RELIEFS**

Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.

WIRE BINDING SLEEVES—Preventing fraying of cord ends, these specially-treated rubber tubes are available in five sizes to fit wires to .790

Model 201A Frequency and Period Counter—\$700.00

setting the pace for modern industry...

America's Finest Instruments

Advanced Design

ELECTRONIC COUNTING and CONTROLLING INSTRUMENTS

by computer-measurements

Improved Readability

—new, wide-angle display minimizes parallax

Improved Sensitivity

—more than 500% over the usual operating range

Greater Stability

—crystal oven as standard equipment at no extra cost increases stability to .0001%

Quick Time Base Alignment

—without auxiliary equipment

Completely Regulated Power Supply

Model 200A Frequency Counter \$425.00

Model XD-100A Crystal Time Base \$100.00

frequency and period counters

Compact, streamlined, easily portable—used for precise frequency and period measurements, production line testing, telemetering, calibration, etc. Direct digital read-out.

Exclusive features of the Model 201A are the inclusion of a crystal oven to bring the accuracy to .0001%... plus .1 sec., 1 sec., 10 sec., and 1 cycle time bases at no extra cost.

The economy Model 200A is designed to permit the use of a plug-in Crystal Time Base at any time in the field to increase accuracy from .1% to .0001%. It is also available with five decade display at \$75.00 additional.

The all-new CMC line of electronic counting instruments has been designed and engineered to meet the rigid requirements of science and industry and, at the same time, offer functional layout to simplify operation, reduce eye fatigue and enhance equipment appearance. Years ahead engineering utilizing proven developments make it possible to include features usually available only as optional accessories. Exacting test and laboratory requirements make the CMC line... the standard in excellence for the industrial world.

preset controllers

Model 314A Preset Controller (4 digit) \$495.00

High speed counters used to automatically control any operation after a pre-selected count has been reached. Batching and packaging of pills, bottles, caps, machine parts, etc., are a few of the many applications. Sweeping design changes offer many new features...

COINCIDENT TYPE ABSOLUTE ACCURACY

PRECISION MFG. CORP.

540 CASANOVA STREET

NEW YORK 59, N. Y.

LUdlow 9-6330, 9-5682

ADDAPLUG CONNECTING LEADS

- (1) Self-wiping action insures contact resistance of less than 0.001 ohm
- (2) Spring-loaded pressure bar provides contact pressure without wear on spring element and compensates for wide variation in hole diameter found in commercial terminals
- (3) Instant unlimited multiple connections at any plug body
- (4) Four standard lengths—(others to specifications) in red or black

Reduces equipment setup time

Outlasts homemade leads 4 or 5 times and therefore costs less than homemade leads; tough polyvinyl insulation on highly flexible stranded wire; integrally molded in high voltage plastic—resists failure due to flexing at junction of wire and plug body; fits standard terminal posts, jacks, alligator clips and spade lugs. Needs no special adapters for most connections.

THE LEADING MANUFACTURER OF COAXIAL CONNECTORS AND CABLE ASSEMBLIES

CALIDYNE

keeps pace with **VIBRATION TESTING REQUIREMENTS**

Eight years of vibration testing achievements

Rapid development in the past decade of more complex weapons, instruments, communications gear and new components has placed tremendous importance on reliability. Electrical, mechanical and aeronautical engineers — in seeking to solve their problems — have made increasing use of *vibration analysis* as a valuable research and development tool. The Calidyne Company was formed eight years ago, to develop and build custom electrodynamic shaker systems which

would permit accurately controlled testing over wide frequency ranges. A few of the many Calidyne accomplishments — each a "first" in the field — are shown here. Together, they have proved extremely useful in three major fields of application: "brute force" environmental shake testing; structural response determination, typical to airframe design analysis; and fatigue testing by application of high stresses at high frequency.

1949

A twenty-four channel multiple Shaker System for aircraft ground vibration studies.

1951

The first 2500 pound force Shaker System.

1954

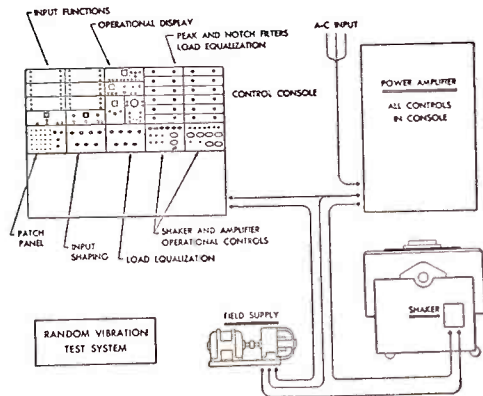

The 12,500 pound force Shaker System with its integrated, automatic control system.

NOW . . . NEW SYSTEMS FOR RANDOM VIBRATION TESTING

Available for the first time are 1500, 5,000 and 15,000 pound force Shaker systems specifically *designed* for random input operation, and featuring *matched* Shaker-Amplifier units. Shakers in this new series operate at higher frequencies on lower input requirements for a given armature weight and matched load rating. Shaker and Amplifier units are matched in rating to meet arbitrary specifications of rms random vibration levels, and to deliver instantaneous peak acceleration several times the rms value. Component matching provides optimum over-all system performance, unobtainable when other types of amplifiers are substituted for the specifically designed Calidyne units.

Field supplies for the new random vibration systems are either electronic or rotary motor-generator types. Control consoles comprise basic Shaker-Amplifier operational controls, together with input shaping and compensation circuits, monitoring and control equipment. Applications within the scope of these new Calidyne systems include random vibration testing; random vibration testing plus multiple or swept sinusoidal input; multiple frequency or complex wave input; and programmed or servo-controlled single frequency testing.

Complete performance and application data on the new Random Vibration Testing Systems are available from Calidyne. Since Calidyne develops and builds *complete* systems to meet individual requirements, your needs are logically and capably served by *one* competent responsibility. Contact Calidyne now . . . with confidence.

RESISTORS

HIGH VOLTAGE • HIGH MEGOHM • HIGH FREQUENCY

RPC HIGH VOLTAGE RESISTORS

are stable compact units available in many sizes for use up to 125 KV. These resistors are used for VT voltmeter multipliers, high resistance voltage dividers, bleeders, high resistance standards and in radiation equipment. They can be furnished in resistance to 500,000 megohms. Available as tapped resistors and matched pairs. Low temperature and voltage coefficients. Standard resistance tolerance 15%. Tolerances of 10%, 5% and 3% available. Tolerance of 2% available in matched pairs. ENCAPSULATED RESISTORS AND SPECIAL ASSEMBLIES CAN BE FURNISHED.

RPC HIGH MEGOHM RESISTORS

are used in electrometer circuits, radiation equipment and as high resistance standards. Resistance available to 100 million megohms. (10^{14} ohms). For utmost stability under adverse conditions Type HSD and HSK Hermetically Sealed are recommended. Voltage rating to 15,000 volts. Low temperature and voltage coefficients. Standard resistance tolerance 10%. Tolerance of 5% and 3% available. Also matched pairs 2% tolerance.

RPC HIGH FREQUENCY RESISTORS

are used in circuits where the requirements specify resistors having extremely low inductance, capacitance and skin effects. These resistors find application as concentric line terminators, transmitter dummy loads, radio frequency probes, rhombic antenna terminators, etc. They are used in radar equipment, surge generators, television transmitters, high frequency heating equipment and circuits involving steep wave fronts. Standard resistance tolerance 20%. Tolerance of 15%, 10% and 5% available.

RESISTORS

PRECISION WIRE WOUND • HIGH VOLTAGE • HIGH MEGOHM • HIGH FREQUENCY

HIGH QUALITY RESISTORS FOR ELECTRONICS

RPC is a widely recognized supplier of high quality resistors to industry, Government Agencies and the Armed Forces. Advanced production methods, modern equipment and scientific skill enables RPC to manufacture resistors of highest quality in large quantities at reasonable cost. Modern manufacturing plant is completely air conditioned and equipped with electronic dust precipitators to insure highest production accuracy. RPC resistors are specified for use in instruments, electronic computers, radiation equipment, aircraft equipment and scientific instruments.

Test equipment and standards for checking and calibrating are equalled by only a few of this country's outstanding laboratories. Our ability to produce resistors of highest quality coupled with prompt delivery have established RPC as a leading manufacturer of resistors. Small or large orders are promptly filled.

Representatives in principal cities. For full information send for latest catalog.

RPC Type L Encapsulated Resistors will withstand temperature and humidity cycling, salt water immersion and extremes of altitude, humidity, corrosion and shock without electrical or mechanical deterioration. Type L resistors are available in many sizes and styles, ranging from sub-miniature to standard with lug terminals, axial or radial wire leads. Available for operation at 105° C. or 125° C. ambient temperatures. These resistors will meet all applicable requirements of MIL-R-93A, Amdt. 3. Type L can be furnished with all resistance alloys and resistance tolerances from 1% to .05%.

To meet the requirements for printed circuitry, RPC has developed Type P Encapsulated Wire Wound Precision Resistors, Miniature, single ended units designed for easy rapid mounting on printed circuit panels with no support other than the wire leads. Many newly developed techniques are employed in the manufacture of Type P Resistors. These units can be operated in ambient temperatures up to 125° C. and will withstand all applicable tests of MIL-R-93A, Amdt. 3.

SPECIALIZING IN THE MANUFACTURE OF QUALITY RESISTORS IN ANY AMOUNT

MOLDED PLASTIC COIL FORMS AND BOBBINS

for DEFLECTION YOKES • HORIZONTAL OUTPUT
TRANSFORMERS • SPEAKERS • HEADSETS • SOLENOIDS
• MOTORS • RELAYS • VIBRATORS • TRANSFORMERS
• FOCUS COIL AND EVERY COIL REQUIREMENT

TESTED AND APPROVED BY LEADING ELECTRONIC,
RADIO AND TELEVISION MANUFACTURERS

Molded plastic bobbins including stock sizes for
standard transformer laminations

AMERLINE 250

COPYRIGHT & PAT. PENDING

A new material developed by
AMERICAN MOLDED PRODUCTS
especially for television yokes.

Outstanding properties:

Dielectric constant—2.2

Dielectric strength—1500 volts per
mil.

Heat distortion—250°F

Flame resistant

Especially adopted for color yokes
and components.

Combination yoke
insulator and case
for lower cost as-
sembly. Utilizes new
improved material.
For 70°, 90° and
color yokes.

Tape recording and telemetering reels of all sizes

IMMEDIATE DELIVERY FROM STOCK ON MANY SIZES
Write, wire or telephone for samples. Send us prints or
samples on stock size requirements. No mold cost.

Get every important value . . .

GET KOBZY

. . . QUALITY:

When you put your requirements up to Kobzy, you make sure that the quality is exactly right for each application. The highest standards are maintained throughout our production. Our facilities are complete and modern. All this insures full quality control.

. . . DESIGN:

Our engineers and designers have worked closely with both the radio and electronic industries over a long period of years. Ideas suggested by these various sources have been a factor in the development of the Kobzy line. This practice is continued as these industries grow and their requirements increase.

. . . UNIFORMITY:

When you order a few or many of any one Kobzy product, you can be sure that the entire order is uniform. This is also true on repeat orders. You take no chances. Strict inspection is maintained all along the production line.

For Instrumentation and Control

MOTORS GENERATORS SPECIAL ROTARY UNITS

Elinco specializes in precision manufacturing of instrument type motors, generators, and rotary electrical equipment to meet difficult, unusual and exacting specifications. Over 900 basic models plus thousands of variations is your assurance that Elinco will supply the right unit to fit your needs. Elinco's 28 years experience in this special field is your guarantee of utmost reliability, high electrical efficiency and dependable standards of performance.

Detailed electrical, physical, and performance specifications are provided in the following free catalogs of basic Elinco equipment:

AC & DC GENERATORS Catalog EI-1A. Over 170 different models, including sine wave, tachometer, and special types.

COMMUTATOR MOTORS Catalog EI-2A. Permanent Magnet ★ DC Shunt ★ Separately Excited Shunt ★ Split Field Shunt ★ Series ★ Split Field Series ★ Universal ★ Split Field Universal ★ Governor Controlled

INDUCTION & TORQUE MOTORS Catalog EI-3A.

SYNCHRONOUS MOTORS Catalog EI-4A. Hysteresis single, dual, three and five speeds ★ Salient Pole Induction ★ Hysteresis Motor - AC Permanent Magnet Generator Combinations

SELF-SYNCHRONOUS MOTORS Catalog EI-5A.

SPECIAL UNITS Catalog EI-6A. Induction Generators ★ Drag Cup Motors ★ Low Inertia Servo Motors ★ Motor-driven Induction Generators ★ DC Motor-Tachometer Combinations

Every Elinco component is a precision unit, manufactured to strict specifications — construction includes precision ball bearings, dynamic balancing, and individual 100% testing. Special treatments are available for altitude, humidity, shock, high temperature, fungus, or as required.

Write today specifying the catalogs you desire, or send us your specifications for the exact unit you need.

S-25 Oscilloscope

New . . . unparalleled operating convenience and versatility . . . 36 channels . . . push button selection of chart speed change . . . complete remote control . . . time lines 1 to 1/1000 sec. intervals. *Write for Bulletin 61-A.*

S14-E Oscilloscope

This low cost, versatile, general utility oscilloscope has 9 easily selected chart speeds . . . drum and continuously-driven record magazines available . . . 1/10 to 700 in/sec. chart speeds. *Write for Bulletin 62-A.*

SC-16B Cathode Ray Oscilloscope

Indispensable for multichannel, high-frequency recording . . . records over a frequency range of d-c to 200 KC . . . to 12 channels . . . chart speeds up to 6000 in/sec . . . writing rate up to 5,000,000 in/sec. *Write for Bulletin 63-A.*

RS-20 Strain Indicator

For reading static strain easily and accurately . . . indicates strain on one large, easy-to-read dial . . . resistance and capacitance balancing controls . . . 2 micro-inches-per-inch accuracy. *Write for Bulletin 64-A.*

MRC-16 Strain Gage Control Unit

Choice of carrier or wide-band amplification . . . 3 channels . . . calibration circuits . . . response 0 to 6000 cps . . . all types of transducers available for use with this Hathaway instrument. *Write for Bulletin 65-A.*

MRC-21 Strain Gage Control Unit

Choice of carrier or wide-band amplification . . . 6, 8 or 12 channels . . . automatic calibration . . . response 0 to 6000 cps . . . all types of transducers available for use with the Hathaway MRC-21. *Write for Bulletin 66-A.*

Transducers

For the measurement of physical phenomena such as acceleration, pressure, vibration, force, temperature . . . illustrated are the Hathaway PS-16 and PS-14 pressure type transducers. *Write for Bulletin 67-A.*

PHASE MEASURING INSTRUMENTS

by **ADVANCE**

PRECISION PHASE METER

TYPE 405

Type 405 Precision Phase Meter—Accuracy $\frac{1}{4}^\circ$, direct reading in degrees 0-12°, 0-36°, 0-90° and 0-180° full scale, sensitivity 0.3 v rms, no amplitude adjustment.

PRECISION PHASE DETECTOR

Type 205 and Type 205A Precision Phase Detectors have an Accuracy of 0.1° or 1% of dial reading. Frequency 100 kc to 15 mc. Sensitivity 0.01 v rms.

VECTORLYZER

Type 202 Vectorlyzer—10 cps to 500 mc, measuring phase angle, vector sum and difference of two voltages.

PHASE ANGLE COUNTER

Phase Angle Counter has an accuracy of 1 count per 100,000, .00001 cps to 1000 cps.

CONTINUOUSLY VARIABLE DELAY LINES

Continuously variable delay line with incremental time delay less than 8×10^{-10} second. Time delay continuously adjustable from 0 up to 1.2 us. Impedance 150 to 500 ohms. Rise time 8% of the time delay at any point.

TYPE 505

STEP VARIABLE DELAY LINES

Time delay variable in 11 steps. Total time delay 2 to 20 us, equal input and output impedance.

TAPPED DELAY LINES
Total time delay from .1 to 10 us with 10 different taps.

PLUG-IN DECIMAL COUNTER
Plug-in decimal counter—Speed 100 kc and 1 mc.

CUSTOM BUILT Fixed Delay Lines to Jan specifications.

- TIME INTERVAL COUNTER
- UNIVERSAL COUNTER
- FREQUENCY COUNTER

Why "CHOKE" your soldering iron?

— just "CRADLE" it with a **HEXACON HATCHET SOLDERING IRON**

The operator has to "choke" the conventional straight iron to hold it, whereas the HEXACON HATCHET IRON "cradles" in the hand with no perceptible grip whatsoever — thus relieving hand strain and eliminating the "heavy hand", the cause of poorly soldered joints. Because HEXACON HATCHET IRONS are perfectly balanced in weight, they enable the operator to solder in a natural position and relieve fatigue of arm and back.

A COMPLETE LINE OF HATCHET IRONS BY HEXACON — Originator and Pioneer

PRECISION ELECTRICAL COMPONENTS

for industrial control, guidance, telemetering

and audio equipment

Any bulletin listed will be gladly sent on request.

HYCOR

RESISTORS

Over 50 encapsulated, precision wire-wound types from 0.1 watt to 4 watts. Shock-moisture-temperature proof. Meets MIL-R-93A spec. Axial leads, radial leads, lug types and units for printed circuitry.

send for bulletin PH

precision WAVE FILTERS

Low-pass, high-pass, band-pass. High "Q" toroid inductor elements. Standardized designs. Available over wide impedance and frequency ranges. Special designs in circuitry and miniaturization on request.

send for bulletin F

TOROID COILS

Shock-moisture-temperature proof. Encapsulated. Withstand 95% humidity, severe mechanical shock. Also available in metal cased and unencapsulated forms.

send for bulletin STP

miniature MAGNETIC CLUTCHES

Develop 15 oz.-in. of torque on only one watt of power. Response time: 5 milliseconds. Only 2 moving parts—no maintenance. Just 1" o.d. Low cost permits economical multiple clutching in inexpensive equipment.

send for bulletin C-2

miniature toroid. POWER TRANSFORMERS

Plastic encapsulated, catalogued types to 15 V.A. Excellent regulation. From 400 cps and 115 V. Multiple secondaries for heater and plate voltages. Special designs on request.

send for bulletin WT

MAGNETIC AMPLIFIERS

Toroid construction. Standard catalogued types. Line frequencies of 60, 400 and 800 cps. Operating temperature: -55°C to +100°C. Cased per military specs. Special designs on request.

send for bulletin MA

DECADE INDUCTOR units

For design and experimental work on audio filters, equalizers and tuned circuits from 150 to 20,000 cycles. Four units available, from 10 x .001 Henry to 10 x 1.0 Henry. Excellent stability.

send for bulletin D-2

PROGRAM EQUALIZER

Bridged T constant impedance circuit. Impedance: 500/600 ohms, in-out. Insertion loss: 14 db constant. Pad compensation when key is in "out" position. Low and high frequency selectors. Also available in kits.

send for bulletin E

VARIABLE FILTER

Low-pass, high-pass. Both low and high cutoffs cover 100, 250, 500, 1000, 2000, 3000, 4000 and 5000 cycles. Approx. 16 db attenuation per octave on both high and low cutoff points. Impedance: 500/600 ohms, in-out. Also available in kits. Ideal for use as sound effects filter.

send for bulletin S-1

VARIABLE ATTENUATORS

Plastic-imbedded resistive elements and contacts withstand extreme humidity, mechanical shock and wide temperature variations. Switch contacts, flush in plastic, are easily cleaned. Brushes can't trip. Low switch noise level.

send for bulletin A-2

- Accessories

ULTRA RANGE SWEEP

Model H-3

Freq. Range: 1-350 mc.
Center Freq.: 1-200 mc.
Sweep Width: 0-300.

Output: .2v. p. to p. into 50 ohm load.

LOW FREQCY. IF SWEEP

Model I-1

Freq. Range: 25-70 mc.
Sweep width: 0-40% of center freq.

UHF WIDE BAND SWEEP GEN.

Model SX-500

Freq. Range: 440-940 mc.
Fixed Center Freq.
Output: 1 v. 50 ohms
10% Flatness

BASIC SWEEPS COVERING FREQS. FROM 100 to 1400 MC.

Model	Center Freq.	Sweep Width
S-4	950-1250 mc.	0-50 mc.
S-5	225-500 mc.	0-30 mc.
S-6	1200-1400 mc.	0-50 mc.
S-2	100-225 mc.	0-25 mc.

Output: 1 v. 50 ohms.
Flat within 5%.
Other Models with Markers Available.

—Outstanding Features

- Broad frequency coverage: 0-2400 • Wide sweep widths: up to 85% of center frequency
- High output voltage: 1 volt into 50 ohms
- Low leakage • Low maintenance • Automatic controlled flatness • Compact portable size.

Many other models also available . . .

- High-power Sweep Generator with Watts of Output • Accessory items: Detectors; Attenuators • Special Ranges available: 0-2400 mc. Telonic engineers will design and build any unit to individual customer requirements.

TV PRODUCTION MODELS

Model S-3A UHF

Freq. Range: 460-910 mc.
Sweep Width: 0-50 mc.
Output: 1 v. 50 ohms.
Flat within 5%.

Model SV-3A VHF

Freq.: 1F and Ch. 2-13
Video and Sound Markers
25 mc. Sweep Width.
Electronic Sweep.
2 identical outputs.
Flat within 5% max. sweep width.

Sub-Miniature Potentiometers

±.3% linearity or better—highest resolution

Answer your potentiometer needs with these space and weight saving, yet highly accurate and dependable units . . . the result of 4 years' development and over a year of successful use by leading manufacturers of commercial and government electronic equipment.

ACEPOT . . . the smallest wire-wound precision potentiometer on the market . . . offers you outstanding features packed into the tiniest possible size. Special design, new materials, and unique manufacturing and testing techniques assure you of the precision accuracy and dependability you usually get only in much larger units. You know Acepots meet specifications before they are shipped, for each Acepot is performance tested and a Polaroid picture record is supplied showing linearity and resolution.

Condensed Specifications

size: 1/2" x 1/2"
 weight: 1/4 oz. including lock washer and nut
 resistance range: 200Ω to 250K standard, ±2%. Higher or lower on special order
 linearity: ±.3%
 resolution: extremely high
 torque: .035 oz./in. @ 20° C.
 power rating: 2 watts for 60° C. rise
 ambient temperature: -55° C. to 125° C.

case: one-piece precision machined aluminum, corrosion-resistant bushing
 standard threaded bushing, servo or flush mountings, and ganged units
 special shaft lock is self-contained no addition to size
 indexing pin provides non-rotational mounting
 all units fully sealed, moisture-proofed, anti-fungus treated
 meets applicable portions of JAN specs and MIL-E-5272A standards

ACETRIM . . . a new standard in sub-miniature wire-wound potentiometer trimmers, at a low price. Here again, through our special design, unique manufacturing and testing techniques, and use of new materials, you get precision accuracy and dependable performance in an ultra compact space and weight saving unit.

Condensed Specifications

size: 1/2" x 1/2"
 weight: 1/4 oz. including lock washer and nut
 resistance range: 10Ω to 150K standard, ±3%. Other values on special order
 linearity: ±.3%
 resolution: excellent
 torque: low or high as required
 power rating: 2 watts for 60° C. rise
 ambient temperature: -55° C. to 125° C.
 case: one-piece precision ma-

chined aluminum, corrosion-resistant bushing
 standard threaded bushing, servo or flush mountings, and ganged units
 special shaftlock is self-contained; no addition to size
 indexing pin provides non-rotational mounting
 all units fully sealed, moisture-proofed, anti-fungus treated
 meets applicable portions of JAN specs and MIL-E-5272A standards

Prompt delivery on prototypes or production quantities (prototype orders handled by special department to render expedited service).

Also available are other sizes to RETMA specifications: 1/2", 7/8", 1", 1-1/16", 1-1/2", 2", 3" . . . standard, special, prototypes, and production units.

Consult Ace Electronics Associates about your next sub-miniature potentiometer or trimmer need and you'll be sure of high precision, fine linearity and dependable space and weight saving units to meet your most exacting requirements. Send coupon today for complete Fact File, prices, and delivery schedules.

ELECTRONIC MECHANICS INC.

101 CLIFTON BOULEVARD,
CLIFTON, NEW JERSEY

Webber Manufacturing Co., Inc. 2740 MADISON AVE. INDIANAPOLIS, IND.

if you make or test anything—

WEBBER

can change your environment...

If you want to simulate altitudes to 200,000 ft. or more; if you need to control temperatures from extremely low sub-zero to extremely high; if accurate control of humidity is vital to your test results; if controlled cycling of any or all of these factors is helpful to you . . . then WEBBER is a name to remember.

Webber environmental Test Equipment is designed and manufactured to your specifications—to help you change your environment!

Webber engineers want to be of service to you. Write now—today—and ask about Webber Field Engineering Service.

This Altitude Test Chamber was designed and built by Webber for Canadian Westinghouse to simulate altitudes to 150,000 ft., with temperatures controlled from -100 F to +250 F; Humidity from 20 to 95%. This type unit is available in sizes from small test compartments to large walk-in altitude rooms.

NEW "PARAFORMED" PAPER TUBES

MAKE YOUR COIL WINDING EASIER! FASTER! BETTER!

SPIRAL WOUND NOT DIE FORMED

ANY SIZE—SQUARE OR RECTANGULAR

Entirely new technique in tube making developed and perfected by PARAMOUNT now for the first time solves many coil winding problems, yet costs you no more! Hi-Dielectric. Hi-Strength. Kraft, Fish Paper, Acetate, Red Rope or any combination wound on automatic machines. Produced from stock arbors or special sizes engineered for you.

Write on Company letterhead for Stock Arbor List of over 2000 sizes

PARAMOUNT PAPER TUBE CORP.
606 LAFAYETTE STREET, FORT WAYNE 2, INDIANA
Manufacturers of Paper Tubing for the Electrical Industry Since 1931

- No sharp outside edges to cut wire
- Has full rigidity and physical strength
- Permits winding coils to closer tolerances
- No need for wedges to tighten wire
- Allows faster stacking of wound coils

Electronic TEST UNITS

Formica Company offers the industry the latest development in electronic laboratory furniture and equipment — test benches and units made up of prefabricated sections, factory assembled from stock to suit the special requirements for your individual application.

These testing units offer unusual space-saving arrangements. Through their design, available working area has been increased at least 50% over that in other types now in use. For more information write for brochures and specifications.

Designed by engineers for engineers, with serviceability in mind — the individual sections are constructed to afford the greatest number of varied selections and combinations. Made of heavy-gauge furniture steel, Formica's benches are sturdy and can take a beating, yet are modern in style and practicability, to meet today's laboratory needs.

CIRCON

SPECIALIZED MINIATURE and SUB-MINIATURE ELECTRONIC-INSTRUMENT EQUIPMENT

PRINTED CIRCUIT CONNECTORS

FEMALE Compression loaded Female Connectors give a wide range of flexibility of contact arrangement, cabling, and design application. They are open end design for all standard circuit thicknesses in one and two ampere models. 4, 12, 24, 36, 48 and 60 contacts—IN STOCK.

MALE Connectors in compatible sizes give two-way cabling to precision printed or instrument circuits with highest contact performance. All connectors exceed temperature requirements MIL-E-5400, humidity MIL-P-15035, Type PRE-P, and conform to N.E.M.A. tolerances.

MINIATURE PRECISION HARDWARE

Finest premium quality instrument and electronic hardware. Instrument screws, nuts, split lock and flat washers. Gold plated, shot burnished instrument rivets and eyelets. Forty-five sizes start at 1/16" x 3/64" and up in 1/32" increments. IN STOCK

NEW MINIATURE INDICATOR LAMP ASSEMBLIES

For printed or regular circuits. 3/8" x 5/16" front, 1/2" rear projection. Mount 7/16" centers. Over 1000 on 12" panel. Available in 1.3, 2.7, 6, 14, 28 volts in stock. Standard and special message indications and colors. Vibration proof mounting without fasteners and easily replaced standard incandescent bulbs are prime service features of the unit. Finest quality materials and sealed construction for military end use and finest commercial applications.

VIBRATING REED FREQUENCY METERS

Meters illustrated are typical panel mounting or portable—for use where constant or known frequency is important to efficient operation of equipment.

- **Permanently Accurate** within $\pm 0.3\%$ or better at reference temperature, depending on the model. This accuracy is not affected by poor wave form, external magnetic disturbances, or voltage fluctuations.
- **Size and Type for Every Service.** Made in a wide variety of portable and panel case styles, reed groupings and frequency ranges from 12 to 650 cycles and above; 100-130 volts furnished unless otherwise specified.
- **Rugged Construction** of simplified, patented design, with no moving parts to wear out or get out of calibration. Ideal for field and mobile applications.
- **Suitable for Electronic Circuits** because of relatively low power consumption and J-B-T reeds with high Q and sharp, immediate response.

3 1/2" and 2 1/2" SEALED Types

3 1/2 inch FHXX Meters sealed, glass-to-metal construction with solder terminals, meet or exceed the sealing and electrical requirements of JAN-I-6 and MIL-M-6A including the 3000 volt breakdown, and use the front mounting dimensions specified. Max. barrel diameter, 2 1/16"; 2 7/8" overall depth behind flange. While not regularly stocked, these meters are in volume production. New 2 1/2" meters Model 21-FHXX available on special order.

1 1/2" SEALED Types

Model 15-FHAC (illustrated above). 60 and 400 cycles, 2 reeds, 8-10 volts, for cathode follower circuit. Widely used on audio oscillators to standardize output. Meets intent JAN-I-6, MIL-M-6A and amendments on sealed meters. Barrel, 1 1/2" diameter; detachable flange, 2.094" diameter; solder terminals.

Model 15-FH Series (not illustrated) — Same case, sealed, 5 reeds, 58-62 cycles, 100-130 volts, or 390-410 cycles, 100-130 volts. Variations such as 6 reeds or 25 cycles available on special order.

ASK FOR CATALOG 556

ELAPSED TIME METERS

For Maintenance, Tube Life Data, and Operating Time Records—on Motor Generators, Transmitters, Receivers, Rectifiers, Test Set-ups, etc.

Model 31-EX (illustrated) also known as running-time or total time meter, registers in 1/10 hours to 9,999.9 hours, then automatically resets. Normally stocked for 60 cycles, 110-130 volts. 3 1/2" standard meter mounting. Variations such as 50 cycles; 230 volts; 0-99,999 hours; 3" rectangular case; and readings in minutes available on special order.

SEALED ELAPSED TIME METERS

Model 31-EHXX—Fully sealed meter, reading 0-9,999.9 hours, same as Model 31-EX above. Glass-to-metal construction, solder terminals, and 3 1/2" detachable flange, all match XX metal frequency meter case. 1000 volt breakdown.

Model 33-EHXX — Operates on 400 cycles, 110-125 volts, to read 0-9,999.9 hours in 1/10 hour steps. It is presently made only in 3 1/2" flange sealed metal case, 2 3/4" diameter, 4" deep behind panel. 1000 volt breakdown.

Model 21-EHXX—New. 2 1/2" flange, sealed, full size counter.

FREQUENCY — TIME METERS

Combination Reed-Type Frequency — Elapsed Time Meters—One Meter Does the Work of Two.

Model 31-FE (illustrated) pioneered by J-B-T, saves panel space and cost, and encourages periodic maintenance; 3 1/4" flange, metal case, 4 1/32" overall depth, standard. 3 1/2" case known as 31-FEX-1 supplied on custom orders. 5 reeds, 60 cycle range, standard; 7, 9, 11 reeds or 50 cycle range on special order.

DISTRIBUTOR SERVICE

Standard J-B-T items are available through authorized electronics parts distributors.

TOGGLE SWITCHES FOR JAN or MIL

J-B-T now manufactures over 100 models of toggle switches, designed for exceptional reliability, as in JAN-S-23 and Ordnance Standards DDAX. Variations at additional cost are being added for MIL-S-6745 specialized AN Air Force Requirements and 4 series of MIL-S-3950 are being added.

ST40, 42, 50, 52 series—Solid coin silver contacts and rocker arms, unique to J-B-T, add overload protection and keep contact resistance under .005 ohms. Nominal ratings 20 amp at 125 VAC, 10 amp, 250 VAC. See Bulletin TS-4A. ST12, 13, 16, 17, 22, 23, 26, 27 series—Nominally rated 6 amp at 125 VAC, 3 amp, 250 VAC; threaded bushings 2 3/4" or 1/4" long. Current carrying parts heavily silver plated. See Bulletin TS-5A.

MOLDED ROTARY SWITCHES

Shorting and Non-Shorting... 14 or 20 Positions

... 1 to 6 Decks (more on special order)... All moving contacts enclosed — eliminates dirt and corrosion... sturdy construction with 3-post deck suspension, double-grip collector arms, and rectangular drive shaft through decks for precision indexing... test results available covering certain procedures of MIL-E-5272 A... interchangeable, electrically and mechanically with J-B-T Series SS-14 and 20 position Laminated Switches. Carrying capacity (not make-and-break): 1 amp; maximum momentary, normal 5 amp; maximum voltage between contacts and ground, 1000 volts R.M.S.; between decks and ground, 2000 volts R.M.S. Average contact resistance 0.007 ohms or less. Also available in 6-pole per deck double throw construction. Non-shorting (break before make) and shorting (make before break).

Model MS-14-2

LAMINATED ROTARY SWITCHES

Used widely in quality test equipment, portable instruments, inspection setups and avionics where trouble-free, dependable performance counts. Two basic types — 14 pos. (2" dia.) or 20 pos. (2 3/32" dia.) give extra contacts in minimum space. One to six decks.

Model SS-14-2

LEVER ACTION SWITCHES

Same top-quality parts as in SS-14 series. Single deck types may be mounted in groups 3/4" between centers; 2 deck types, 1 1/16" between centers. For new ganged-lever types, SSG series, in 3, 4 or 5 positions, 2 to 10 decks, see print SK-74.

Pioneers in Rhodium Plating and Electroforming of
Reflectors, Electronic and other Precision Parts.

Electro-Sealing Service

Provides the design, enclosure, base, brackets
and terminals.

Assembles, wires and seals your component
in an atmosphere of dry, inert gas.

Evacuates enclosure by high-vacuum system
and thoroughly tests for leaks by means of mass
spectrometer.

In addition to volume production, provides
small quantities for engineering samples or for
limited production schedules.

Invites you to send complete engineering in-
formation and samples of parts to be hermeti-
cally sealed.

a complete line of Printed Circuit Hardware and Terminal Inserting Equipment

Tubular Pin Terminals—Insert automatically into printed circuit board at huge production savings. Snap into position with positive locking action by means of self-retaining snap-in feature. Double ends permit wrapping or inserting leads at either end. Ask for Bulletins 550 and 551.

Solderless Wire Disconnect Female Terminals—Speedily applied to leads by means of cost-saving automatic equipment. Fits quickly and firmly to tubular pin terminals. Solderless wire crimp can be varied to fit various size insulated wires. Ask for Bulletin 553.

Line Cord Interlock Terminals—For single or multiple lead connections. Another Malco automation development to provide production short cuts and assembly economy. Terminals are staked quickly and firmly into printed circuit boards. Ask for Bulletin 554.

Malco printed circuit hardware can be engineered to your specific requirements. Give us the facts about your operation. We'll show you how your costs can be lowered and your production increased. Ask for Bulletin 551.

Dept. ED, Milwaukee 1, Wisconsin

We can produce any of these pieces

WITHOUT COSTLY DIES!

Parts similar to those above now available even in small quantities by special photoetching process. Print or drawing of part all that is needed. In most cases the same material you are now using can be photoetched. Identification accomplished during process. If not used flat, we can form to specifications.

Photoetching does not replace all punch press work, but in small runs, especially complex pieces, entire job will cost less than dies. Our engineers will help you with your particular problem.

ETCHED CIRCUITS

Produced on one side or on both of any material from paper base to ceramics. Sizes: miniature to large (36" x 36")

Etched part of all sizes
AVAILABLE IN 24 HOURS
You don't have to wait for days.

Industrial Counting and Control Systems

Instruments are constructed with functional plug-in strips permitting a wide variety of standard models with flexibility for industrial applications.

TOTALIZERS

for accurate, automatic counting of discrete items, events, and units of linear measure or volume. Counting by units, dozens and gross . . . count capacities up to 10 digits . . . counting speeds up to 20,000 c.p.s. Available in cabinets or standard R.M.A. rack mounting.

PRE-SET COUNTERS

Single and dual Pre-set Counters for automatic production control. Allow pre-selection of the count at which some production operation can automatically be activated. Counting speeds up to 2000 c.p.s. . . . locking or momentary output relays . . . batching register . . . pulse or contact inputs available.

UNITIZED PLUG-IN STRIPS

Complete selection of unitized plug-in strips for custom designed counting and control applications. Output, input, counting, and pre-set counting strips available. Also cabinets with self-contained power supply for mounting strips.

DEKATRON COUNTING TUBES

Cold Cathode Glow Transfer Tubes combine switching and visual indication in a single envelope for use with simplified, reliable circuits. Exceptionally long life . . . low heat and current operation . . . greater stability . . . 8 decade and duodecade types . . . counting speeds up to 20,000 c.p.s. distributed in U.S. and Canada by Atomic.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

NEW! SHARP! UNIFORM!

engraved markings with

KRENGEL BLACK-TEX
 Stamps and Dies

3 WAYS BETTER THAN ORDINARY RUBBER

Engraved BLACK-TEX Is Acid Proof. Acid etching inks, used for permanent stamping on metal and all non-porous surfaces, will eat away at ordinary rubber. Black-Tex resists this action—gives longer life by far.

Engraved BLACK-TEX Stamping Gives Razor-Sharp Impressions Every Time. Opaque inks will clog shallow rubber stamp faces rapidly. Our deep-molded engraved Black-Tex stamp faces have more than three times the depth of ordinary rubber stamps. Markings always remain super sharp even on irregular surfaces . . . an important advantage since this mark is your record.

Engraved BLACK-TEX Has Cushion-Like Resilience. Stamping is accomplished quickly with just a firm contact of stamp to material. Engraved Black-Tex conforms to the shape and texture of the surface being marked, resists abrasive action. And, while ordinary rubber dulls, and lives but a short time, Kregel Black-Tex continues stamping clearly. It's made for hand stamps and all types of automatic machines . . . to your design or we will design for you . . . at low direct from manufacturer prices.

American industry now uses Kregel Black-Tex for coding, inspection, identification, parts numbering, stock numbering and trademarks . . . in fact, in all places where permanent marking is needed.

Catalog of Kregel Marking Devices for every purpose sent upon request.

ENGINEERING DEVELOPMENT FACILITIES

Pulse Engineering

Redwood City California

HOW TO ORDER

PULSE ENGINEERING catalog numbers refer to general design file. Exact requirements should be specified. For example: ES6-2, 1:1:1 specifies a miniature blocking-oscillator transformer. (E = Epoxy-sealed; S = Silicon-oriented core; 2 = 2 microseconds nominal pulse with standard circuit; 1:1:1 = 3 windings of 1:1:1 ratio). State if transformer is for pulse coupling or amplifying. For all units and especially high-power types, circuit and tube to be used should be identified with critical requirements: (1) rise time; (2) pulse width; (3) frequency; (4) pulse voltage; (5) droop; (6) input and output impedances.

Request Pulse Transformer Engineering Bulletin for helpful use data.

2431 Spring Street

High Purity Baker ELECTRONIC CHEMICALS

New standards of precision have marked the rapid growth of the booming electronics industry. To help attain those standards, chemical purity is highly essential for phosphors, emission coatings, activating agents, etc.

Some of the Baker Chemicals popular with the electronics industry are shown on this page. As your electronics development work requires these or other chemicals to precise standards, Baker is your logical source of dependable supply.

REVOLUTIONARY BURGESS "WAFER-CELL" offers SMALL, COMPACT POWER PACKAGES

A major step toward the application of automation to the manufacture of dry batteries has been achieved with the development of the new BURGESS "WAFER-CELL" making possible a 30 PER CENT INCREASE IN BATTERY LIFE.

The new cell consists of a sandwich of artificial manganese dioxide mix between tiny discs of flat zinc and carbon electrodes wrapped in platinum envelopes and heat sealed. A dab of SILVER WAX on the positive and negative sides of the cells permits stacking them in

a column eliminating welded or soldered connections. Rigid inter-cell connections are maintained since the silver wax yields and molds itself to any necessary configuration between the cells to hold PERFECT ELECTRICAL CONTACT.

Small batteries for hearing aids, pocket radios, B-C photo guns and transistorized instruments are made by wrapping the cell stack in MYLAR FILM and packaging it in a leakproof tube of drawn aluminum.

Your local Burgess distributor carries complete stocks of fresh BURGESS BATTERIES including new "Wafer-Cell" types.

BATTERY DESIGN SERVICE AVAILABLE

The same engineering "know-how" that made possible the new "Wafer-Cells" is available TO YOU. Long before you run into a battery design problem, call on Burgess for expert battery design assistance.

BURGESS BATTERY COMPANY
FREEPORT, ILLINOIS

53 VICTORY LANE, LOS GATOS, CALIF.

UNILINE . . . an exclusive Cascade Research development . . . will provide substantial isolation between source and load with negligible loss in transmitted power. These characteristics are particularly important in radar systems where it is impractical to use a resistive attenuator to improve magnetron or klystron stability. Use of Uniline in communications applications provides isolation for the microwave transmitter tube by absorption of the transmitted energy reflected into the transmission line from the antenna. Phase distortion, due to the transmission line, is markedly reduced. Uniline also has many uses in test bench service. A typical application is the elimination of pulling of the microwave oscillator caused by variations in load impedance.

Both high and low power Unilines apply the desirable properties of ferrites at microwave frequencies. High power Unilines utilize the resonant absorption principle because designs based on this principle provide superior heat-dissipating characteristics. Low power Unilines operate upon the Faraday rotational principle for compactness and ruggedness.

HIGH POWER UNILINES

GYRALINES . . .

Gyraline is an electronically controlled variable attenuator. It may be used as an amplitude modulator, an automatic gain control or an on-off switch when operated in conjunction with suitable electronic equipment. Slight modification will also permit its use as a transfer switch. A Gyraline-modulated CW signal eliminates frequency modulation and double moding often present with square wave modulated klystron signals.

FREQUENCY RANGE KMC	MODEL	MAXIMUM CONT. DISS.	MAX. MOD. FREQUENCY	TYPICAL MAX. INSERTION LOSS	WAVEGUIDE	SPECIAL FEATURE	PRICE

CIRCULATOR . . .

A circulator is a non-reciprocal microwave network which transmits power from one terminal to another in sequence. Power introduced at "A" leaves the network at "B" while power introduced at "B" leaves the network at "C". Similarly, power introduced at "C" goes to "D", that introduced at "D" goes to "A". This unit represents an entirely new parameter for the design of microwave circuits. The duplexing effect of the circulator is helpful in both radar and microwave relay applications.

FREQUENCY RANGE	MODEL	PEAK POWER	AVERAGE POWER	FORWARD INSERTION LOSS	REVERSE ATTENUATION	TYPE	PRICE
34.5-35.2	KA432	60KW	25W	0.5 db	25 db	FOUR TERMINAL	---

8.2-10.2	X441	150KW	150W	0.5 db	25 db	THREE TERMINAL	325.00
8.2-10.2	X442	150KW	150W	0.5 db	25 db	FOUR TERMINAL	365.00

UNIPLEXER . . .

The Uniplexer combines a circulator and a Gyraline amplitude modulator in such a way that load isolation, duplexing action and sensitivity time control are provided. The Uniplexer provides several advantages over a conventional duplexer. By its use, no transmitter spike enters the receiver to cause deterioration of the crystal, there is no uncertainty of gas tube deionization time, the required dynamic range of the receiver input is reduced.

FREQUENCY RANGE	MODEL	PEAK POWER	AVERAGE POWER	TRANSMITTER RECEIVER	INSERTION LOSS ANTENNA RECEIVER	ANTENNA TRANSMITTER	ANTENNA TRANSMITTER	PRICE

8.6-9.6	XL441	250KW	250W	80 db 25 db	35 db 1.5 db	0.4 db	25 db	---

MISCELLANEOUS FERRITE DEVICES . . .

Other Cascade Research ferrite devices for which complete technical information is available upon request include: SINGLE SIDEBAND MODULATOR . . . PHASE SHIFTERS . . . POLARIZATION ROTATOR . . . VARIABLE MISMATCH . . .

Z-SCOPE VISUAL MICROWAVE IMPEDANCE PLOTTER . . .

Z-Scope, an exclusive Cascade Research development provides a complete visual presentation of the impedance characteristics of a microwave antenna, or other load, over the entire X band. When used in conjunction with a swept source, an instantaneous plot of impedance is obtained.

Z-Scope is complete, self-contained, and ready to operate. One cabinet contains all the electronic circuits while another cabinet contains the waveguide circuits. The magnitude and phase of the reflection coefficient is displayed on a 7" C-R tube provided with a Smith Chart reticle. All information necessary to calculate matching irises or other matching devices is available.

Paint-by-point measurements over a frequency band are eliminated. Z-Scope has no moving mechanical elements and is wholly electronic in operation. The wave guide control section is inserted in the microwave circuit between the power source and the unknown load. Samples of the direct and reflected waves are obtained by the control section and electronically analyzed by circuits in the presentation cabinet.

Presentation section, \$1650.00

Waveguide Control Section, \$1600.00

D-92A GYRALINE DRIVER . . .

D-92A Driver supplies driving power over a wide frequency range (30 cps to 70 kcs) for several Gyraline models. The driver consists of tunable oscillator, AC power amplifier and self-contained power supply. Provision is made for an external input to power the amplifier. The Gyraline and Gyraline driver combination permits a large number of microwave test arrangements in which standard 1000 cycle, or other AC test instruments may be employed.

D-92A Driver \$350.00

MICROWAVE VACUUM TUBES . . .

Backward Wave Oscillator, Model X521 is the first tube in a new series. This tube is all metal and ceramic and uses a folded line rather than a helix thereby improving mechanical characteristics and appreciably reducing both size and weight. Output level is one-half watt, nominal. Waveguide output covers the X band.

BWO X521 \$950.00

Solenoid \$250.00

OSBORNE Specialty TRANSFORMERS

"Quality in Quantity"

PRECISION TOROIDAL TRANSFORMER

- Transfer function accuracy better than 1 part in 10,000.
- Phase shift less than 5 milliradians at 400 CPS.
- Low external field; high astaticism.
- Temperature range —55 C to +90 C.
- Built to Mil-T-27 specifications.
- Can be supplied with individual shielding between windings.

AIRCRAFT CURRENT TRANSFORMER

- 400 cycle. Ratio 250 to 2 amperes. Osborne high temperature moisture-seal treated. Good to 340° F.
- Meets Mil-T-7210 electrical and environmental specifications plus: thermo shock —65° F to 340° F; vibration 12 hours in each plane at double amplitude of 0.018 inches at 100 CPS.

MAGNETRON FILAMENT TRANSFORMER

- 380-1000 cycles, 171 VA, weight 1.032 lbs.
- Designed for maximum size and weight reduction. Volume and weight reduced 1/3 of conventional construction. Osborne high temperature moisture-sealed.

Behind every OSBORNE Transformer—

- Nine years' experience in the solution of unique transformer problems in the electronic field.
- Significant qualification in the solution of transformer problems involving high temperature, reduced size, minimum weight.
- Engineering and production staff and facilities for rapid and practical solution of specific transformer problems.

PORTLAND 14, OREGON

LA-17 SPECTRUM ANALYZER

Bench-size Spectrum Analyzer featuring high stability and wide range in small size. Continuous coverage, 10.0 to 16,000 mc calibrated without external heads. 3.0—32,000 mc usable range. 0.5 to 25 mc spectrum width, 7.5 kc resolution. Internal spectrum calibrator. Bulletin LA-17

LA-61 FREQUENCY METER

Highly accurate UHF Frequency Meter featuring internal calibration, rugged construction.

Frequency range 500 to 2000 mc in two bands, 0.001% accuracy, precision high-speed semi-direct calibration, 0.0001% oven-controlled crystal standard. Standard 19" panel 12 1/4" high, rack or table mounting. Bulletin LA-61

LA-592D PULSE GENERATOR

Light, compact, double-pulse generator for general field or laboratory use. Bench or rack mounting.

20-200,000 pps internal trigger, 0-200 kc external; 1.5 to 2500 microsecond delay, 0.5 to 2500 microsecond pulse width, one or two pulses. Output impedances 2000, 200 or 75 ohms. Approx. 0.1 microsecond rise time. Bulletin LA-592D.

LA-5 FREQUENCY METER

Convenient field instrument designed and built to military standards for fast and accurate frequency measurement.

Frequency range 10 to 100 mc in three ranges, color-coded scales for use by production line personnel, semi-direct calibration, accuracy 0.001%, internal oven-controlled crystal standard, 0.0001%, input less than 500 microvolts. Standard 19" panel, 12 1/4" high, rack or table mounting. Bulletin LA-5-6.

LA-6 FREQUENCY METER

VHF frequency meter matching LA-5 in appearance, identical in operation.

Frequency range 100 to 500 mc in two color-coded ranges. Internal high-speed semi-direct calibration, with accuracy of 0.001%, internal oven-controlled crystal standard 0.0001%. Input less than 500 microvolts. Standard 19" panel, 12 1/4" high, rack or table mounting. Bulletin LA-5-6.

LA-239C OSCILLOSCOPE

General purpose, wide band oscilloscope, covering 5 to 20 mc, military standard construction, nomenclatures AN/USM-50.

Frequency range 5 cycles to 15 mc flat, 0.03 v/cm sensitivity, internal voltage calibration, Z axis timing markers 0.2 to 2000 microseconds, internal trigger generator. Sweep speeds to 14 cm per microsecond. Ruggedized construction, standard rack mount. Bulletin LA-239C.

LA-418B UHF SIGNAL GENERATOR

Rugged field signal generator featuring extremely low external field, smooth attenuation.

Frequency range 400-1000 mc, cw or pulsed, internal pulse modulator, 40-4000 pps, 1-10 microseconds, RF output 0.2 to 200,000 microvolts at 50 ohms (0 to -120 dbm). Variable pulse delay 3 to 300 microseconds, 115 volts, 50-1600 cycles power.

CRYSTAL OVENS

Standard and miniatures, to $\pm 0.025^{\circ}\text{C}$, in more than 20 catalog types. MIL-T-945A Specs for airborne or other severe use. Over 30,000 in use. Write for special catalog.

ROBOTESTER

Automatic tape-controlled equipment tester checks 1 ohm to 10 megohms from any of 240 points to any other. Change over in seconds; sets up in as little as an hour. Up to 120 tests per minute.

DESIGNERS AND MANUFACTURERS OF ELECTRONIC EQUIPMENT

Have You Considered CROSSBAR SWITCHES?

Whether it's the design for tomorrow's new computer—or for automatic process or production equipment, or a telecasting or radar control system, or any one of countless other situations calling for fast and reliable multiple circuit selection—you'll want to know and consider Cunningham Crossbar Switches.

FROM MANY SOURCES TO A SINGLE DESTINATION

Where electrical information originating from many points is to be measured or analyzed at a single destination, quick and reliable circuit selection is provided by the new Cunningham Type "F" Crossbar Switch.

OR TO SEVERAL...

The same multi-source electrical signals may, in addition to single point reading, be relayed to many other points simultaneously. The Cunningham Type "A" Crossbar permits each of a group of 10 circuits to be set up to one or more circuits of another group of 10.

THE *Cunningham* CROSSBAR

is a new concept of switching, doing the work of many relays without costly, bulky, multiple wiring—with greater capacity, speed and efficiency. Its electrical characteristics fully qualify it for today's most demanding multi-selection switching applications. For example, the Type "F" switch is used in test stands where hundreds of remote thermocouple readings can be taken from a single dial. It serves the petroleum industry with central station readings taken on temperature, pressures and liquid level at hundreds of remote points. Perhaps it can solve your problem with equal facility. And when this multi-source information must be supplied to more than one destination simultaneously, the Type "A" Crossbar can provide the answer. Check these features:

- HIGH FREQUENCY—switches over 35 mc
- LOW CROSSTALK—under 60 db at 10 mc (75 ohm term.)
- LONG LIFE • COMPACT • FAST • QUIET
- LOW OPERATING POWER
- EXCEPTIONAL LOW CONTACT NOISE
- UP TO 6 CONDUCTOR CIRCUITS

Let us help solve your switching problem.

IF THIS IS YOUR PROBLEM

If you need effective, highly readable, smartly illustrated company literature (booklets, pamphlets, manuals) to display your products, inform the public of your operations, attract key personnel to your plant, train employees, and perform any of the other communicative functions that are vital to your business . . .

THIS IS YOUR ANSWER

The McGraw-Hill TECHNICAL WRITING SERVICE has a staff of more than 150 highly-trained writers, editors, and illustration specialists whose job it is to create technical and general literature for industry. We write, illustrate, design, and print Equipment Manuals, Product Bulletins, Handbooks, Company Histories, Annual Reports, and other specialized material. Save money and time. Let our staff be your staff for Technical and Business publications.

This service is available through ad agencies.

IN PLANTS AND LABORATORIES

designed and
perfected by
PANORAMIC
... the leader:

for accurate
spectrum
analysis from
sub-sonic
through
microwaves

Pioneers in the field of spectrum analysis . . . through the years Panoramic has demonstrated leadership . . . and Panoramic Instruments have been proven unexcelled for research development and production applications requiring accurate, high-speed spectrum of waveform analysis.

Whatever your problem, from subsonic through microwave analysis, there is a Panoramic analyzer to answer your needs. Operation is simple and reliable. Design and construction are the finest. Many models are used in military applications.

Day in and day out, Panoramic Instruments play a vital part in monitoring communications channels . . . telemetering analysis . . . vibration and sound studies . . . transmitter analysis . . . FM deviation measurements . . . microwave spectrum analysis . . . servo analysis.

PANORAMIC TIME-FREQUENCY ANALYZER, Model TFA-1

A new instrument designed to perform as a companion instrument to various Panoramic Spectrum and Waveform Analyzers, Panoramic Time-Frequency Analyzer TFA-1 provides a complete history of the time occurrence of transient waveform components, in addition to frequency and amplitude information.

Y-axis scan, synchronized to loop recording represents playback interval. X-axis represents frequency distribution. Intensity indicates component level.

Panoramic Time-Frequency Analyzer, Model TFA-1

PANORAMIC SUB-SONIC ANALYZER, Models LF-1 and LF-2

for SUB-SONIC WAVEFORM ANALYSIS 0.5 cps—2250 cps features 0.1 cps resolution, 40 db amplitude range, high sensitivity, permanent-spectrum recordings.

PANORAMIC SONIC ANALYZER, Models LP-1 and AP-1 for AUDIO FREQUENCY WAVEFORM ANALYSIS 20 cps—20 kc feature direct reading waveform analysis in only one second, 60 db dynamic range, simple operation.

PANORAMIC ULTRASONIC ANALYZER, Model SB-7a

for ULTRASONIC WAVEFORM ANALYSIS 1 kc—300 kc features continuous variable scan width 0-200 kc continuously variable resolution 2 kc—500 cps, direct reading frequency and amplitude scales

PANALYZOR, Model SB-8b and PANADAPTOR, Model SA-8b for RF, VHF, and UHF SPECTRUM ANALYSIS.

Each model available in three types with maximum sweep widths of 200 kc, 1 mc, and 10 mc, and maximum resolution of 50 cps, 200 cps, and 9 kc respectively. Numerous other models and types also available to suit practically every special need.

PANORAMIC SPECTRUM ANALYZER, Model SPA-1

for microwave spectrum analysis 50 mc—4000 mc—Sensitivity: up to -100 dbm; SWEEPWIDTH: 10 mc continuously reducible to 0 mc; RESOLUTION: 9 kc—100 kc, continuously variable; SCAN RATES: 1 cps—60 cps, continuously variable; FREQUENCY COVERAGE: tuning heads RF-2 50—250 mc and RF-3 220—4000 mc.

Also makers of Sweep Generators and Frequency Calibrators
Inquiries invited for development of special Panoramic analyzers.

When ordering or seeking information
please mention Electronics Buyers' Guide.

**FURST
ELECTRONIC
INSTRUMENTS**

**WOW-METER
Model 115-RA**

Direct reading instrument simplifies measurements of variations in speed of phonograph turntables, wire recorders, motion picture projectors and similar recording or reproducing mechanisms. Ideal for laboratory and production applications — eliminates complex test set-ups.

**WIDE-BAND
DC AMPLIFIER**

Model 220

A precision instrument for use as a preamplifier in conjunction with cathode-ray oscilloscopes, vacuum tube voltmeters and other instruments when unusually low frequencies are encountered—eliminates long waiting times due to coupling time-constants.

**Model 210
TWIN Power Supply**

Two independent sources of continuously variable DC are combined in this one convenient unit. Double utility makes it useful for laboratory and test station work. Three power ranges instantly selected with rotary switch.

Model 710 PR

A 1500 volt regulated power supply to provide proper power for making precise quantitative measurements with photomultiplier tubes. It is continuously adjustable from 600 to 1500 V.D.C. at 0-1 milliamperes.

ANTON... Where PRECISION Counts

442

413

401

"Varijust"

CORONA DISCHARGE VOLTAGE REGULATOR TUBES... Anton's miniature and subminiature, fixed and adjustable regulators will stabilize voltages from 300v-30kv at currents below several milliamperes, with voltage tolerances within plus-minus 1%. Patented "Varijust" tubes, for precise regulation in the 650-800v range, permit variation of gas pressure in tubes resulting in smoothly adjustable regulated voltages. JAN approved types (fixed and "Varijust") available. Well-suited for use as voltage reference tubes, for stabilization of all high voltage, low current power supplies and for control of high voltage, accelerating potentials of cathode ray devices. (Request Bulletin 56V)

Special connector

CONNECTORS... Anton precision-built connectors are designed for use under specified conditions of altitude, temperature and pressure. Extensive research enables Anton to incorporate new techniques in hermetic sealing, high altitude operation, molding and waterproofing in its connector design and production. Anton facilities for connector design, development and production are supplemented by an experimental model shop and a complete environmental test installation. We welcome your "difficult" as well as your standard connector design and application problems. (Bulletin 56C)

MS20-34

MP20-34

PCD22

S20P21-2

S20S21-2

229A Ratemeter

NUCLEAR TUBES AND INSTRUMENTATION... Anton produces the widest selection of neutron detectors, halogen quenched counter and integrator tubes, organic quenched and other types of alpha, beta and gamma detectors, survey and monitoring instruments, ratemeters, scalers and control devices. JAN approved types available. (Bulletins 56TE, 56IE)

Other Anton custom components include precision potentiometers, meters, precisely-regulated high voltage power supplies and special vacuum and gas discharge devices. Send us your individual specifications.

NEY

offers all three

RESEARCH AND DEVELOPMENT

As a manufacturer of precious metal products for more than 144 years, THE J. M. NEY COMPANY has accumulated a vast store of information on the properties and uses of precious metals and their alloys in many fields. Ney's Research Department has facilities for subjecting experimental and standard alloys to a full range of chemical, physical, electrical, mechanical and metallographic tests as well as tests simulating actual and accelerated conditions. Ney Research Department services and facilities are freely available to Design and Production Engineers.

Potentiometer linearity and life test instrument using standard oscilloscope.

COMPLETE MANUFACTURING FACILITIES

SCREW MACHINES

TOOL ROOM

PRODUCTION AREA

Ney manufacturing facilities include wire drawing equipment, two and four high rolling mills, punch presses up to 50 tons, automatic screw machines up to 1½" capacity, cold-heading, wire-forming, welding and soldering equipment and a complete tool room. Efficient organization of these facilities means economical handling of large or small quantity production of the simplest part or the most intricate assemblies.

PRODUCTS TO YOUR SPECIFICATIONS

Ney has a long list of important accomplishments in the development of sliding contacts, slip rings and assemblies, commutator segments and assemblies, brush and brush holder assemblies, and precious metal resistance wire. Ney engineers are available for consultation on all problems involving the use of precious metals to improve your products.

Write for your copy of Ney Data Book, "NEY PRECIOUS METALS" (Bulletin R-12) or call our Engineering Department outlining your needs.

NEY'S small parts play a BIG part in precision instruments

TRADE MARK

ELECTRICAL MEASURING INSTRUMENTS

RUGGED • ATTRACTIVE • MODERATELY PRICED

TYPES—ammeters, milliammeters, voltmeters, AC and DC; resistance meters; many with zero adjusters; also pocket types.

ACCURACY—well within 5%. AC meters are double-vane, repulsion type jeweled bearing; DC meters are polarized-vane solenoid type or moving magnet sensitive type. Pointer damping available.

METAL CASES—three basic styles, round or rectangular, all requiring 2-5/32" hole. Also pocket types.

DIALS—all metal—age and moisture resistant. Special calibrations, one to five colors.

USES—plate current and voltage readings; battery charging, emergency lighting, fire or burglar alarm units; TV antenna rotator indicators; voltage regulators, transmitters, receivers, plating equipment, AC line testers, field indicators, etc.

STOCKED—by leading electronics parts distributors. Ask for Bulletin 63 showing 234 models.

**NO. 360 HARD GOLD
PLATING SOLUTION**

Specially Developed for
**PRINTED CIRCUITS
and ELECTRONIC PARTS**

An exclusive product of DAVIS-K research . . . pioneers and leaders in Electrolytic Precious Metals. Used by leading electronic manufacturers and proved the finest and most economical hard gold electroplate. No. 360 contains no base metals. Plates bright at room temperature. Has extremely high throwing power and deep penetration. Its close grain structure is ideal for Still & Barrel Plating on Electronic Parts and Printed Circuits.

**No. 360
HARDGOLD ELECTRO-PLATE**

The right and lasting connection for Printed Circuits . . . greater beauty and durability for Electronic parts.

**DAVIS-K
PLATING SERVICE**

Our modern plating plant is equipped for production plating of precious metals: Platinum, Rhodium, Gold and Silver. Write for quotations stating type of work.

MONEY SAVING FEATURES:

- No Elaborate Set-up required
- Solution is stable, simple & easy to control
- Speeds up plating . . . reduces rejects to a minimum
- Will not deposit by immersion
- Extremely durable and resistant to contact and abrasion
- Plates to any desired thickness
- Reduces gold deposit 50%

FULLY GUARANTEED not to lift from any plastic.

Write for full details. Small samples plated **FREE!** Send today!

NATVAR FLEXIBLE ELECTRICAL INSULATING MATERIALS

VARNISHED FABRICS AND PAPERS

VARNISHED CAMBRIC—Straight cut for application to regular smooth surfaces; bias for irregular surfaces. Supplied in all standard sizes and thicknesses, in yellow or black and in greasy, mica-dusted, or dry finishes. Yellow has higher resistance to mineral oils and is therefore used extensively in oil immersed apparatus; black has better electrical qualities and is therefore recommended for applications where dielectric strength, power factor and preservation of these qualities even under humid conditions is important. Natvar varnished cambric is manufactured to conform to the latest revisions of NEMA Standards and A.S.T.M. Specifications. Full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

VARNISHED CAMBRIC TAPE—Straight cut or seamless bias, in all standard widths and thicknesses, yellow or black, greasy, mica-dusted or dry. Characteristics same as for varnished cambric. Accurately slit for use in taping heads. Standard lengths 36 yd. and 72 yd. rolls.

VARNISHED CANVAS AND DUCK—Recommended for applications where electrical insulation is subject to severe mechanical strain and abuse. Widely used as phase insulation in rotating machines. These high strength fabrics are coated with the same high grade varnishes as Natvar varnished cambric. Full width rolls, 25 yd. and 50 yd.; sheets 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

VARNISHED SILK—Thin, high dielectric strength insulation with great flexibility and mechanical strength. Particularly applicable to relays, magnets and other components used in airborne equipment, where space and weight are important considerations. Available in yellow only; finish, dry. Full width rolls, 25 yd. and 50 yd.; tapes, 25 yd. and 50 yd.; bias cut strips approximately 51 in.; standard; other lengths on special order.

VARNISHED RAYON—Developed as an alternate for varnished silk, and used in substantially the same applications. High tensile and dielectric strength with exceptional smoothness. Available in yellow only; finish, dry. Full width rolls, 25 yd. and 50 yd.; tapes, 25 yd. and 50 yd.; bias cut strips approximately 51 in. standard; other lengths on special order.

VARNISHED FIBERGLAS—Class B insulation (130°C) used primarily to insulate equipment which operates at temperatures above the normal safe working range of varnished cambric. Permits higher current densities with consequent reduction in size and weight. Has great mechanical strength and excellent dielectric properties. Available in standard weave or open-weave; yellow or black; in all standard commercial sizes and thicknesses; standard finish, dry; mica-dusted on specification. Full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36"; tapes, 36 yd. and 72 yd.; standard; other lengths and sizes on special order.

ISOGLAS—For higher continuous operating temperatures (150°C). Consists of glass fabric coated with newly developed isocyanate type resin. Has outstanding resistance to heat, to crazing and cracking, and to solvents including the askarels. It is tough and has excellent abrasion resistance, wet dielectric strength, low temperature flexibility and fungistatic qualities. Full width rolls (approx. 36"), 25 yd. and 50 yd.; standard; slit tapes also available.

SILICONE COATED FIBERGLAS—Class H insulation (180°C) used wherever reduction of size and weight are vitally important. Retains its excellent mechanical and dielectric properties at higher temperatures. Full width rolls, 25 yd. and 50 yd.; tapes, 36 yd. and 72 yd., standard; other lengths on special order.

VARNISHED PAPERS—Chemically inert rope and kraft stocks selected for uniform thickness, tensile and dielectric strength and coated with highest grade electrical varnish. Yellow varnished condenser type tissues, single or multiple ply; yellow or black varnished heavy papers, single ply. Full width rolls, single ply, 25 yd. and 50 yd.; multiple ply, 25 yd.; sheets, 36" x 36" and 24" x 36"; tapes, 36 yd. and 72 yd., standard; other sizes and lengths on special order.

COMBINATION INSULATIONS—Slot cell insulation is a combination of 100% rag paper stock firmly cemented to a layer of varnished cambric, either straight or bias cut. The high dielectric strength and moisture resistance of Natvar varnished cambric with the toughness and abrasion resistance of rag paper make a slot insulator which will withstand pounding and chafing without impairment of its electrical properties. Available in black and yellow; full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

Aboglas® insulation is a new class B insulation (130°C) consisting of a layer of varnish saturated asbestos paper sandwiched and securely bonded between two layers of varnished open-weave Fiberglas. It is less expensive than mica combinations and does not flake. Excellent resistance to breakdown even under extreme heat, moisture, abrasive dust, oil and grease. Standard sheets approximately 36" x 36"; other sizes on special order.

Other duplex and triplex composite insulations such as silicone coated Fiberglas, Quinorgo, Mylar, etc. are also available.

FLEXIBLE TUBING AND SLEEVING

VINYL COATED OR VARNISHED—Electrical grade rayon (Class A) or Fiberglas (Class B) braid coated with high grade electrical varnish or specially formulated vinyl base plastic compound. Standard lengths, 36"; vinyl coated also available, #24 to #15 in 500' coils; #14 to 4 in 100' coils. Pieces 3/8" or longer cut to specification.

ISOGLAS—Tubular glass braid coated with newly developed isocyanate type resin (150°C). Same properties as Isoglas fabric. Standard lengths, 36".

EXTRUDED PLASTIC TUBING AND TAPE

NATVAR 400 VINYL TUBING AND TAPE—Natvar 400, for applications requiring high resistance to both heat and oil, is approved by Underwriters' Laboratories for continuous operating temperatures of 105°C. It remains flexible under continuous operation immersed in hot oil. It is a well balanced plastic that is tough, elastic, flexible, resistant to abrasion and tear, and resistant to ozone, oils, waxes, alkalies, acids and most solvents. Available in transparent, black, opaque white, yellow, red, green, blue, brown, and gray. Tubing is stocked #24 to #15 in 500 ft. spools; #14 to 1/2" in 100 ft. coils; 3/16" to 1 1/4" in 50 ft. coils; 1 1/2" and larger in 25 ft. coils; cut pieces 3/8" or longer on specification. Tapes, standard length, 36 yd.; standard color, black.

NATVAR 200 VINYL TUBING—Natvar 200 is a general purpose tubing with excellent flexibility through a temperature range of -40°C to +85°C. Will not support combustion. Shows no disintegration or flaking when immersed in oil. In general has the same inherent characteristics as Natvar 400, but slightly higher tensile strength, averaging 3600 p.s.i. Stocked in same lengths and colors as Natvar 400. Cut pieces 3/8" or longer furnished on specification.

NATVAR STYROFLEX® FILM—Specially processed flexible polystyrene film developed for insulation of UHF coaxial cables and capacitors. Excellent mechanical and electrical properties. Available in thicknesses .0004" and thicker in precision cut tapes up to approximately 10" width.

EXTRUDED PRINTED MARKERS

Printed with indelible vinyl ink on Natvar extruded tubing cut to specified lengths. All combinations of letters, numbers, and symbols available for identification of circuits, terminals, airplane electrical systems, etc. Wide color range for coding.

SPECIAL PRODUCTS

In addition to Natvar standard products, there are many Natvar products developed for a special application. These materials, now in limited production, are available on special orders.

Where specifications call for materials with special mechanical or electrical characteristics, check with our representative in your area, or directly with us. If the materials you are looking for are not already in production, our engineers will be glad to work with your engineers to provide a practical answer.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

USE STOCK DIALS

*SAVE TIME in designing,
drafting and fabricating!*

New "G" Series

This series of Dials and Dial Rings are precision machined, calibrated and engraved to close tolerance. They are interchangeable and will allow thousands of combinations, including Vernier readings of 1/4 and 1/10 degrees of Arc. As many as 5 scale readings can be read from a one dial assembly . . . available in many sizes and finishes which meet government specifications.

Whatever your Dial specification, stock or custom, consult Ackerman Engravers.

APPLIED RADIATION CORPORATION

A COMPANY SPECIALIZING in research and development of VERY HIGH POWER microwave linear accelerators and components

Offering these Services . . .

- **DESIGN and DEVELOPMENT** of VERY HIGH POWER klystrons, pulsed modulators and pulse transformers.
- **CONTRACT IRRADIATION SERVICE**—the only irradiation service facility equipped with an electron linear accelerator to provide large throughput and deep penetration of product. Semi-production runs of products such as polyethylene* insulated wire and cable, binding posts, terminal strips, capacitor films, etc. are encouraged.

Offering these Products . . .

● MARK 1 ELECTRON LINEAR ACCELERATOR

Standard unit for research or pilot plant applications
 Output beam power 4 Kw at 6 million volts
 Beam energy variable to 8 million volts

● MARK 5 ELECTRON LINEAR ACCELERATOR

For industrial radiography—the highest power radiographic unit ever offered
 Radiation output 600 roentgens per minute at 1 meter
 Electron beam power 500 watts
 Electron beam energy 5 million volts

Other accelerators with energies to 50 million volts or beam power to 60 kilowatts are available on special order.

*—Irradiation improves the high temperature properties of all types of polyethylenes. Melting points are increased from the range of 230-270°F to over 380°F.

● MODEL PO 10-3X 3 CAVITY HIGH POWER KLYSTRON OSCILLATOR-AMPLIFIER (S-BAND)

The first multi-megawatt klystron operated as an oscillator
 Peak power 3 Megawatts
 Average power 12 Kilowatts
 Pulse lengths to 15 μ seconds
 Tuning range 30 Megacycles

● MODEL 40-9-15 PULSED MODULATOR & PULSE TRANSFORMER

Maximum average output power 40 Kilowatts
 Maximum peak output power 9 Megawatts
 Repetition rate variable to 360 per second
 Pulse length variable to 15 μ seconds
 Peak voltages variable to 150 kilovolts
 Maximum peak current @ 150 kilovolts and 15 μ seconds 60 amperes

HOLD IT!

You can etch
Soldered Circuits
FASTER in
**HUNT
S.C.E.**

(Solder Circuit Etch)

Hunt saw the need for an etchant that was faster, would work at normal temperatures and was more reliable in its action than the commonly used sulphuric-chromic acid solution.

Hunt now offers you Hunt S.C.E. (Solder Circuit Etch) a ready-prepared product designed to etch solder plated circuit boards . . . designed to do it more easily, more effectively than it has ever been done before. You'll find that Hunt S.C.E.:

1. Etches rapidly at room temperatures.
2. Has a fairly high capacity for copper.
3. Never attacks the solder-plated circuit.
4. Has guaranteed uniformity, and is of the highest quality because of rigid laboratory control.

Hunt S.C.E. is essentially an oxidizing solution with the capacity to keep the oxidized copper permanently in solution. Although many acids will etch copper, S.C.E. solution has the peculiar property of not attacking the solder . . . but giving fast, odorless etching of the copper.

HUNT R.C.E. (RAPID CIRCUIT ETCH) FOR PRINTED CIRCUITS

Hunt R.C.E. is a proprietary etchant, formulated to etch printed circuits fast and to speed up production.

It offers these 6 big advantages:

1. 15% increase in etching speed.
2. Immediate action over entire circuit.
3. Uniformly smooth etching.
4. Easily removed by washing.
5. Substantial increase in capacity.
6. Freedom from fumes.

A temperature between 100°F and 120°F is recommended as optimum etching temperature. With splash etching and 110°F temperature, a printed circuit board should etch in 2½ minutes in fresh R.C.E. solution.

Both etchants are described in Technical Bulletins No's 1 & 3 available from your nearest Hunt branch or Palisades Park, N. J.

Hunt S.C.E.
solution is
supplied
in 125 lb.
carboys;

COAXIAL RELAYS & SWITCHES

ACTUAL SIZE
CM - 26

- **SMALL SIZE • LIGHT WEIGHT.**
- **LOW COST • EXTREME RELIABILITY.**

Low VSWR not only through the UHF frequencies but in many types into the microwave range.

Excellent Crosstalk Figures—Most types ground the output(s) when not connected to the common input.

Any Connector Type with almost any orientation.

Fast Operation—15 milliseconds for CR types operated by DC.

Long Life—1,000,000 cycles minimum for CR types, 100,000 for CM types.

Low Coil Consumption—Approximately 2W for most DC operated coils, 6VA for most AC coils.

Teflon RF Insulation in all types using BNC, UHF, N, or C connectors.

Resistant to Military Environmental Conditions of temperature, shock, humidity, and salt spray.

Resistor Terminations in types intended for video switching and similar applications.

Remote Electrical or Toggle-Actuated Manual Operation available in most types.

Access to Contacts Without Disassembly provided in CR and CM types.

Twin Silver Contacts on switches rated for powers exceeding 250 watts.

Fine Silver Contacts—On special order Palladium contacts can be supplied in most types.

Complex Switching Accomplished by crossover, DPDT, and multiposition types.

Write for our catalog describing these and other types of coaxial switches and relays.

HERE IS THE MOST VERSATILE SOLDERING GUN!

The Esico Luger with its wide range of tips meets a long felt need on the part of radio servicemen, engineers and laboratory technicians. Due to its special construction, it is adaptable for use with tips of high and low temperatures, thus meeting a wide range of soldering requirements. Whether you now have a gun or not, you will want a Luger.

FINE BALANCE! Once you have soldered with a Luger you will want no part of the top heavy conventional type guns. The ease with which you will make small, delicate soldered connections will be reflected in the high quality work you will do.

GET A LUGER TODAY! If your dealer has not yet stocked this new gun, send your order to us with his name. Model A, single heat \$9.95. Model B, dual heat \$11.95.

Famous ESICO Production soldering irons

Twenty-one different styles of irons ranging from 25 to 550 watts make up the Esico line. These tools have been used in the radio and electronic industry practically from its inception. Many famous name radio and TV manufacturers standardized on Esico upon their entrance into the industry and continue to use Esico irons exclusively.

If you are not familiar with our wide range of sizes and the excellent maintenance features of our irons we suggest that you request catalog and samples at the first opportunity.

Industry's Most Widely Used solder pots

Ruggedly constructed, inexpensive, easily serviced Esico solder pots ranging from 200 to 1200 watts, 1½" I.D. to rectangularly shaped 6" x 12" thermostatic and non-thermostatic controlled pots available for 115V or 230V operation. We can supply special wattage elements to maintain the customer's temperature requirements. Write for our complete catalog.

UNEQUALLED FOR
ACCURACY and DEPENDABILITY

MURPHY & MILLER

TEST CHAMBERS

• ALTITUDE SIMULATION • HUMIDITY SIMULATION • LOW TEMPERATURE • HIGH TEMPERATURE

Advanced design features, highest quality materials and superior craftsmanship go into every M & M test unit to assure accurate tests and dependable operation. Before you specify or buy any test equipment — see what Murphy & Miller has to offer you.

MODEL LTA 12
12 CUBIC FT. TEST SPACE

ALTITUDE SIMULATION UNIT

- Altitude Ranges over 200,000 ft.
- Temperature Range from +1200°F to -120°F
- Humidity cycle 20% to 95% from +35°F to 185°F
- New design—greater capacity per horsepower—lower operating cost . . . greater efficiency

Available in units with 12 to 64 cubic ft. of test space, M & M Altitude Simulation Chambers offer every standard and optional feature for faster, more flexible testing. Optional features include Program Controlled Heating, Cooling and Humidity Cycles, Automatic Recorders, Special Wiring, etc. etc.

MODEL H 12
12 CUBIC FT.
TEST SPACE

HUMIDITY TEST CABINET

- Provides Relative Humidities between 20% and 95%
- Temperatures from +185°F to -35°F
- Instant response of humidity system insures accurate testing
- Uniform temperature and humidity throughout test cycles.

High capacity heating, refrigeration and forced air systems insure fast, accurate temperature rise and pull-down. Program control cycle for temperature, humidity and cooling available. Models manufactured with test spaces to 64 cubic feet.

DRY ICE FUNGUS HUMIDITY

NEW SLOPING FRONT UNITS

- Exclusive sloping front for easier viewing . . . faster loading
- Available in single units or combinations

Compact, portable and inexpensive, M & M Slope Front test cabinets are made for low temperature (dry ice refrigerant) Fungus, humidity testing. Cabinets are fully automatically controlled.

Write for illustrated literature and complete specifications.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

**For Product Data ...

BUYERS' GUIDE**

ULTRASONIC CLEANING

BY THE SQUARE FOOT

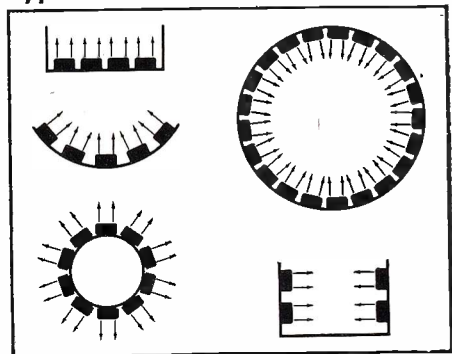

Recent improvements in ultrasonic power-generating equipment, and the perfection of hermetically-sealed transducers operating at 40 kc/sec, have now made it economically feasible to apply ultrasonic cleaning to areas measured by the square foot. Up to now, cost and technical problems have largely confined the benefits of this fast and efficient technique to relatively small units.

The large, uniform radiating surface of the transducers makes them particularly suitable for the removal of buffing compounds, radioactive contamination, soldering flux, plaster, carbon smut, etc. The transducers can also be used for other processes such as quenching, plating, pickling, descaling and dyeing. The cleaning action penetrates deeply into blind holes and other areas difficult or impossible to clean by conventional methods.

The Branson LF-15 Transducers have a radiating surface 2½" x 6", with thick barium-titanate driving elements that transmit the energy through the top of the stainless-steel housing directly into the cleaning solvent. The modular design of the

transducers facilitates a wide choice of flush and focused arrangements of transducers.

Typical Transducer Arrangements

Generator-Transducers combinations are available with radiating areas from ¼ to 10 square feet:

SONOGEN® MODEL	TRANSDUCER CLEANING AREA
AP-25	¼ Sq. Ft.
APT-100	1
APT-400	4
P-1000	10

Cost of complete equipment, per square inch of radiating surface, ranges from \$23 down to \$14. We will be happy to send you complete information on request.

PERFORATIONS by **MUNDT** for electronic applications

Your electronic equipment requires THE BEST IN PERFORATION

With 85 years and over, of experience in perforating, we can manufacture the particular perforated screen or panel, in accordance with your specific requirements, in any of the following materials:—

ALUMINUM	GALV. STEEL	NICKEL	SILVER
BRASS	HARDBOARDS	NICKEL SILVER	STAINLESS
BRONZE	IRON	PAPER	STEEL
COPPER	LEAD	PLASTICS	TERNE PLATE
CUPRO NICKEL	MAGNESIUM	PLYWOOD	TIN PLATE
FIBRE	MONEL	RUBBER	ZINC

Many variations of patterns can be had with holes ranging from .018" to 2" and larger, in straight or staggered formations, of round, square, slot, or decorative designs, perforated material guaranteed to be perfectly flat, straight and parallel, and free from buckle or camber.

When considering your next perforated part in your equipment, consult our engineering department whose vast knowledge in the perforating field can assist you with the perforating applicable to the Electronic Industry which will enable you to procure the best in Quality & Workmanship.

APPLICATION OF MUNDT PERFORATIONS

PANELS: For receivers & transmitters

HOUSINGS: For Transformers, computers, amplifiers & special instruments

GRILLES: For speakers & Microphones

BACKING SCREENS: For Radios & Television

COVERS: For shielding Hi Frequency Equipment

and other perforated electronic parts or equipment

BUYERS'
GUIDE

Now you can
WELD almost any electronic assembly

Ultra-fine whiskers in semi-conductor devices,
 shunts and header pins in relays, slit and
 filament assemblies for isotron and mass
 spectrometer guns, and electronic
 sub-assemblies of wide variation are now
 reliably and precisely joined at greatly
 increased production rates by the
WELDMATIC Model 1015

The WELDMATIC Model 1015 is a
 bench-mounted precision resistance
 welder, compactly self-contained.
 Weldmatic's stored-energy principle
 permits welding of copper, silver,
 high-carbon steel, tungsten,
 molybdenum, and other "difficult"
 materials. Weldmatic millisecond
 weld-time insures reliable welds without
 discoloration, excessive deformation,
 or metallurgical change. Dissimilar
 metals and parts of widely different
 thicknesses are joined with ease.
 The Model 1015 performs
 outstandingly in both laboratory
 and production line operation

Kodak Ektron Detector

An extremely sensitive lead sulfide photoconductive cell with the following characteristics:

- Response extends from 0.25 microns to 3.5 microns with maximum sensitivity at 2.2 microns in the infrared
- High signal-to-noise ratio in infrared
- Signal response is almost independent of size of sensitive area
- Unaffected by vibration, small in size
- Available in complex and exact arrays and mosaics

For a booklet giving detailed information on Kodak Ektron Detectors, write Military and Special Products Sales,

EASTMAN KODAK COMPANY
Rochester 4, N. Y.

Produced in any decimal size up to 8" I. D. Fabricated from kraft, fish paper, cellulose acetate, mylar, polystyrene, quintrera, fibre glass and other dielectric materials.

RESINITE COIL FORMS

These coil forms have the highest resistivity of any resinated product. Furnished plain, embossed, internally threaded or triangular shape . . . also flyback transformer forms.

BOBBINS

Supplied round, square or rectangular. Cores fabricated from any of the above materials. Metal, asbestos, plastic or fibre flanges. Constructed to fit smaller spaces and permit multiple winding.

MANDRIL SERVICE

Accurately ground steel and aluminum coil mandrils at cost economy comparable to commonly used undependable wood or undersized steel mandrils.

FABRICATING SERVICE

We have modern high speed equipment to provide you with any special shape or form . . . rolled, spun, flared, punched or formed to your particular requirement.

Ask about Precision's complete coil form service.
Request informative bulletin.

FERRANTI

HIGH SPEED TAPE READER

... handles punched tape data
at electronic speeds

The Ferranti High Speed Tape Reader accelerates to full speed within 5 milliseconds and stops within 3 milliseconds. It has been in use at leading computer installations for over two years and has achieved a sound reputation for simplicity and reliability in regular operation.

FAST (1) Mark II model reads at speeds up to 200 characters per second, and stops the tape from full speed within a character position — within .03 inch. The tape is accelerated to full speed again in 5 milliseconds and the following character is ready for reading within 6 milliseconds of rest position.

(2) Mark IIA model reads at speeds up to 400 characters per second, and stops within .1 inch.

VERSATILE Both models read either 5 level, 6 level or 7 level tape by simple adjustment of an external lever.

SIMPLE The tape is easily inserted without complicated threading. Lap or butt splices are taken without any difficulty. The same tape may be passed thousands of times without appreciable tape wear. The optical system has no lenses or mirrors to get out of alignment. Friction drive is independent of sprocket hole spacing.

LARGE OUTPUT Amplifiers are included for each channel, including a special squaring circuit for the sprocket hole signal. Output swing between hole and blank is greater than 20 volts.

Dimensions: 9" x 11½" x 11¼" **Weight:** 37 lbs.

For use with long lengths of tape up to 1000 feet, spooling equipment operating up to 40 inches per second for take-up or supply is available separately.

*. . . you're sure of positive accuracy,
dependability, and uniformity
with BREW custom made lines!*

Brew offers complete design, development, and large scale production facilities to meet your most critical delay line requirements . . . covering an extremely wide range of characteristics . . . for both commercial and government applications. Newest packaging techniques, newest materials, special manufacturing and test procedures assure you of ultra compact units with best possible operational characteristics. Prompt delivery on prototype and production quantities.

Lumped Constant Delay Lines

A wide variety of precision lines are offered. Our success and vast experience in the design of this type line is your assurance that we can meet your special requirements to complete satisfaction. Special attention is given to construction so that lines can be produced at lowest possible cost.

Ultrasonic Delay Lines

Brew Company holds basic patents on bonding techniques of crystal transducers to quartz and special glasses for Ultrasonic Solid Delay Lines. Brew's Solid Lines are noted for their ruggedness, low loss, and accuracy. A constant research and development program is in effect to assure you of the latest and most improved designs.

Send us specifications on your requirements . . . or Send for your copy of catalog 54. 12 pages of facts.

Distributed Constant Delay Lines

Available in flexible stick and canned form. Flexible lines are totally enclosed and hermetically sealed in a tough polyvinyl sheath with molded polyvinyl end caps. They are specially designed to give long life even under roughest conditions. Canned lines are available in square or round form, encased in hermetically sealed, copper plated cans. Molded Plaskon cans are available for large production runs. Intermediate taps on the line can be provided. Distributed Lines have a delay of 0.05 usescs per ft., with characteristic impedance of 1250 ohms $\pm 10\%$. They conform to JAN or MIL specifications. Custom designed Silver Ceramic Rods are also offered at surprisingly low cost.

Fenwal Electronics
a dependable
source of supply for
**ALL TYPES OF
THERMISTORS**

Fenwal Electronics manufactures a complete line of highly stable thermistors in the form of small beads, discs, washers and rods. Each is precision manufactured to assure you of rugged high quality construction and complete uniformity.

Fenwal precision-made Thermistors are extremely sensitive to temperature change. A minute variation produces a wide resistance change in Fenwal thermistors. Because of their high sensitivity and great stability Fenwal thermistors are ideal for such applications as voltage regulators, wire communications, temperature compensation, time delay circuits, liquid level control — and many others.

Fenwal Electronics
can help you

Fenwal engineers have a vast knowledge of thermistors and their applications. This not only assures you of a uniform high quality thermistor but a problem-solving service second to none in the thermistor field.

For complete data write to Fenwal Electronics Inc., Mellen Street, Framingham, Massachusetts.

NEW

TUBE ACCESSORIES and ELECTRONIC HARDWARE

"Ventilator" shields not only improve "hot" tube performance by dissipating heat but are the most economical shields in Methode's extensive line. Easily handled and compression fitted to ground terminals on Methode laminated or printed circuit sockets, shields are available in lengths of 1-11/16" or 2-1/16" with one standard diameter which fits either seven or nine pin tubes. Available with fin or black oxide finish.

Molded phenolic plugs, with seven pins, 45° apart on .375" centers, mate with economical standard miniature sockets. Designed to save space and competitive in price with bulky wafer pin plates, these units are ideal for base assemblies on plug-in components or quick-disconnect harness assemblies. Plugs are available with or without vinyl caps or mounting saddles. General purpose or mica phenolic insulators with cadmium plated brass pins are standard.

For high voltage tubes these corona caps and socket combinations for both octal and noval sizes feature generously rolled outer surfaces. Assemblies are designed for screw mounting to condenser studs or stand offs and are available with general purpose black or low loss mica phenolic insulators. Noval caps available with 1-5/16" or 1-1/2" major rim diameter. Octal units have insulating fibre liners.

Newly designed laminated tube sockets for dip solder attachment to printed wiring panels supplements Methode's earlier development of molded snap in printed circuit sockets. Individual terminal hole punching permits printing of jumper and cross over connections directly on circuit panel. Springlike tabs permit amazingly strong terminal dip solder connections.

The FASTEST WIRE CUTTING and STRIPPING MACHINE

STRANDED WIRE CAN BE BULK SOLDER DIPPED WITHOUT RE-TWISTING STRANDS

- Up to
- 9000 pieces per hour from 1" to 40".
 - 7500 pieces an hour; 40 to 60 inches.
 - 6000 pieces an hour; 60 to 80 inches overall.

Machine is automatic and doesn't require operator in attendance. All wire discharged from machine can be stacked in trough end to end except for smaller sizes. "Sticky or Tacky" types of insulation are stripped as easily as the hard surfaced types; scrap is readily removed from between the cutting blades automatically. Four different models to serve you. Send for literature.

SWITCHCRAFT[®] COMPONENT PARTS

ADVANCED DESIGN — DEPENDABILITY — CONSISTENT QUALITY

JACKS

PHONE PLUGS

FOR MILITARY AND INDUSTRIAL EQUIPMENT
—MOST COMPLETE LINE

"LITTEL-JAX"—require minimum panel space—available in all common and many special circuits.

"SF-JAX"—short frame design—innumerable circuits.

"LF-JAX"—long frame design—all circuits.

"TINI-JAX"—sub-miniature.

THE LARGEST VARIETY OF STYLES,
SIZES AND TYPES

"LITTEL-PLUG"—small—fits standard Jacks.
"LUG PLUG"—small—low cost.

"STANDARD"—conventional size heavy terminals—rugged design.

"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".

"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.

TELEPHONE & MILITARY JACKS

"T-JAX"—a conventional telephone switchboard design—all standard circuits and military specifications.

"M-JAX"—(illustrated) a heavy duty design used in heavy industrial equipment.

"SHIELDED JAX"

A unique modification of the "Littel-Jax". The shield is assembled into and made a part of the jack.

"EXTENSION JAX"

For cable extensions. Features "Switchcraft" clamp type terminal. 2 and 3-conductor circuits.

"LEV-R-SWITCH"

A lever action switch requires only single hole for mounting. Available in numerable circuits; various contact materials.

"FF-SWITCH"

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

"TELEVER SWITCH"

Rugged telephone type lever switch.

Available in single or double hole mounting, non-locking and locking, 2 or 3 position types.

"LITTEL-SWITCH"

Rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.

JACK COVERS—Provide a dust and moisture-proof seal over the opening of a jack.

"MINI-MIX"—Miniature 2-input Audio Mixer—connects directly to equipment—no external cables.

"MIC CONNECTOR"—For use with single conductor microphone cable.

"PHONO CONNECTOR"—Used extensively in record players, FM-AM tuners, sound recording equipment.

"RS-SWITCH"

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or non-locking action.

"MULTI-SWITCH"

Features choice of switching functions. 2 to 12 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons.

Write for Bulletin 560.

ADAPTERS—For connecting equipment having different type connectors.

Illustrated are representative parts of the regular line. Send for catalog No. S-57

Inquiries on custom-made components will receive prompt attention. Switchcraft components are carried by all leading Radio Parts Jobbers.

SWITCHCRAFT, INC. 1320 N. Halsted Street, Chicago 22, Illinois

Canadian Representative: Atlas Radio Corporation, Ltd.,
50 Wingold Avenue, Toronto, Canada.

When ordering or seeking information please mention Electronics Buyers' Guide.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry — the buying influences—rely on the "Guide" for the answers to their product problems.

SAGE "SILICOHM" RESISTORS

TYPE "S" SILICONE COATED

NOW . . . An ALL-NEW line of SAGE miniature, wire-wound power resistors in 7 dimensions and 2 to 10 watt ratings—engineered to meet today's electronic equipment requirements in accordance with MIL-R-26B qualifications.

This is the only Silicone Coated Resistor that can be clip-mounted

POWER RATINGS	RESISTANCE RANGES	DIMENSIONS
2 WATT (S2W)	.05—4000	5/8" x 1/4"
3 WATT (S3W)	.05—7000	3/4" x 1/4"
5 WATT (SS5W)	.05—12000	7/8" x 5/16"
5 WATT (SR5W)	.05—16000	1" x 5/16"
5 WATT (SL5W)	.05—21000	1 1/8" x 5/16"
7 WATT (S7W)	.05—29000	1 3/8" x 5/16"
10 WATT (S10W)	.05—60000	1 5/16" x 3/8"

SAGE TYPE "M" METAL-CLAD RESISTORS

These resistors are greatly improved by the use of a new internal coating and a new potting method. Internal hot spot temperature has been reduced 25%—guaranteeing longer life and greater stability. These resistors meet the qualifications of MIL-R-18546.

Power Ratings	Resistance Ranges	Tolerances
25 Watt	.05-18000 ohms	.05%—3%
50 Watt	.05-60000 ohms	.05%—3%

WILLIAMS

Iron and Iron Oxide Powders for the Electronics Industry

IRON MAGNETIC IRON POWDERS—

Hydrogen reduced magnetic iron powders of high purity are available in 8 different grades for high-frequency cores, core material, tele-communication, and magnetic applications.

IRON MAGNETIC IRON OXIDES—

Magnetic iron oxides, both the black and brown types, are produced in several grades for magnetic recording devices—sound recording, memory drums, film striping, etc.

PURE FERRIC OXIDES—

Synthetic red iron oxides of high chemical purity are available in wide range of particle sizes for the manufacture of all types of ferrites.

Q. A.

Coaxial Connectors?

**COAXIAL
CONNECTOR CO., Inc.**

- When you need coaxial connectors, think of Coaxial Connector Co., Inc.
- Our precision-engineered connectors are quality controlled to meet and surpass MIL specs and are top-rated throughout the industry.
- If you need design and engineering assistance to solve your special requirement problems, our expert engineering staff will put their skill to work for you.
- This is typical of the many special types of connectors that we design and manufacture for nuclear work and other applications.
- To see them all, send for our catalog.

HI-VOLTAGE
UHF TYPE

COAXIAL CONNECTOR

- The Hi-Volt 259 and 239 are designed expressly for high voltage application where RG cable is used in conjunction with power supplies. These connectors are rated for 5000 volts DC.
- The assembly of the cable to the connector employs the same techniques as the conventional UG, UHF type connectors.
- These connectors are not impedance matched, but may be used in the same circuitry where the S0239 and PL259 are employed.

COAXIAL CONNECTOR CO., INC.

- 37 N. 2nd AVE.

TI-CO WIRE STRIPPER

The TI-CO Wire Stripper completely strips single or multiple leads of fine magnet wire in sizes No. 18 to No. 48; removes all types of insulation, formvar, nylclad, glass, etc., without damage to wire; exceptionally fast, clean stripping with minimum rejects. Speeds up production; guarded machine, safe for operator. Wire diameter kept to within .0002". Machine compact, portable and relatively quiet; rugged; stands up under steady use; precision ball bearings throughout. General-purpose brushes are of fibreglas. Machine can be adapted to strip any coil form, or to strip wire outside 18-48 range. Efficient built-in vacuum dust collector.

alfax is revolutionizing
graphic recording!

ALFAX PAPER AND ALDEN ADJUSTERLESS RECORDING TECHNIQUES MAKE POSSIBLE—

- Fastest, Most Accurate Means of Communication!

New, high or low speed facsimile recording systems which are the most accurate means of communication today are simple to install and operate virtually unattended.

High Speed Selective Dispatch Facsimile System
Specially designed to permit selection of pertinent data from any copy—letters, dispatches, reports, etc.—for instant transmission to wherever needed—yet complete reproductions can also be sent. 72 square inches of copy, 1800 words of newspaper type, or 900 words of typewriter text can be transmitted and received per minute.

Continuous Reproduction Facsimile System
Extremely high quality reproduction of large copy: such as newspapers, weather maps, blueprints, finished advertising layout, drawings, photographs, etc. can be transmitted easily with this equipment. Copy is scanned flat and reproduced automatically on remote continuous recorder.

Alden Giant Bulletin System
Fastest, accurate means of disseminating information to large groups of people. Automatically provides changing "up to the minute" bulletins 4 feet wide and up to 10 feet high and as much as 12 square feet of copy per minute, enlarged 10 times from remote flat-copy scanner as sent out either by wire or a microwave system.

- Better Control of Processes and Operations!

Simple, rugged recorders which monitor up to thirty operations simultaneously or capture faithfully the full output of electronic detection devices.

Magazine Fact Finder—2 Channels Plus Timing
Here is a compact Magazine Recorder which will permanently record two separate operations and automatically print a recurring time signal on the Alfax Tape. Simple to install—they will operate unattended—remotely or on the spot.

Multi-Channel Fact Finder—30 Channels Plus Timing
Now it is possible to monitor and permanently record 30 operations simultaneously on Alfax Paper. This 30 Channel Fact Finder is portable for lab or bench use, yet easily adapted for rack mount. Construction is simple, yet rugged, and as the paper is smooch-proof, unaffected by humidity, or even rain, the instrument can be located anywhere.

Flying Contact Spot Recorder
Tremendous amounts of related information can be recorded accurately in a very small space using the Alden Adjusterless Helix Sweep Recorders.—Available for continuous paper roll width of 2", 3", 8", 12" and 19". Helix and paper feeds are supplied with external drive shafts or with special drives to your own specifications.

Alden Curve Plotters
The Basic Helix Recorder with special electronics can provide continuous, automatic plotting of any phenomena that can be converted to voltage. Any number of channels can be recorded simultaneously along with standard or reference signals so that the information is instantly and permanently self-calibrated.

SOLDER *aluminum, germanium, silicon, electronic components with*

Insulated fine magnet wire soldered by SONOBOND without pre-stripping

Silicon wafer tinned by SONOBOND. Also can be used successfully on germanium

SONOBOND[®]
ULTRASONIC
FLUXLESS
Soldering

SONOBOND is now at work for scores of electronic equipment manufacturers—joining metals and alloys heretofore resistant to soldering.

If your production includes the soldering of aluminum, copper, brass, silver, germanium and silicon, you can do it ultrasonically with SONOBOND. Eliminates preparation of metals for soldering. Eliminates thorough washing operations to remove flux.

In the soldering of insulated fine magnet wire, you can eliminate the costly pre-stripping operation. Each connection can be tinned in seconds. Joints are uniform, rejects reduced.

SONOBOND is made in a complete range of sizes and models, from small hand tools to continuous coating high-production units. Bulletin SB-5 gives full details. Write for your copy.

NATIONAL ELECTRONICS, INC.

GENEVA, ILLINOIS U. S. A.

ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the ELECTRONICS BUYERS' GUIDE. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past fifteen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.

PICKERING solenoids

for DC Circuits

Pickering engineering service is available for special applications where Pickering standard Solenoids do not apply.

PICKERING & CO., Inc.

Manufacturers of world-famous electro-magnetic phonograph cartridges and audio equipment.

Oceanside, L. I., New York

SPECTROL

Precision

Potentiometers

MODEL 100

Precision 1 1/8" dia. single-turn potentiometer. Standard Resistance Range—10Ω to 30 KΩ ±3.0%. Standard linearity ±0.5%. May be ganged—2 to 15 sections. Up to 14 extra taps per section.

MODEL 200

Precision 1 3/4" dia. single-turn potentiometer. Standard Resistance Range—10Ω to 65 KΩ ±3.0%. Standard linearity ±0.3%. May be ganged—2 to 15 sections. Up to 21 extra taps per section.

MODEL 300

Precision 2" dia. single-turn potentiometer. Standard Resistance Range—20Ω to 75 KΩ ±3.0%. Standard linearity ±0.3%. May be ganged—2 to 15 sections. Up to 21 extra taps per section.

MODEL 400

Precision 3" dia. single-turn potentiometer. Standard Resistance Range—100Ω to 100 KΩ ±3.0%. Standard linearity ±0.3%. May be ganged—2 to 15 sections. Up to 33 extra taps per section.

MODEL 500

Precision 7/8" dia. miniature 10-turn potentiometer. Standard Resistance Range—25Ω to 120 KΩ ±3.0%. Standard linearity ±0.3%. Up to 38 extra taps per section.

MODEL 700

Precision 7/8" dia. miniature single-turn potentiometer. Standard Resistance Range—10Ω to 20 KΩ ±3.0%. Standard linearity ±0.5%. May be ganged—2 to 6 sections. Up to 9 extra taps per section.

MODEL 800

Precision 1 1/8" dia. 10-turn potentiometer. Standard Resistance Range—50Ω to 400 KΩ ±3.0%. Standard linearity ±0.3%. May be ganged—2 to 3 sections. Up to 48 extra taps per section.

MODEL 850

Precision 1 1/8" dia. 3-turn potentiometer. Standard Resistance Range—20Ω to 120 KΩ ±3.0%. Standard linearity ±0.3%. May be ganged—2 to 3 sections. Up to 18 extra taps per section.

Spectrol potentiometers may be tailored to comply with a wide variety of electrical and mechanical requirements.

QUALITY INSTRUMENTS
FOR PRECISION TESTING OF
Tomorrow's Circuitry

SG-25 STANDARD SIGNAL GENERATOR

Equivalent to AN/URM-25D For alignment of radio receivers measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

- Frequency Range: 10 KC to 50 MC in 8 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- High Output: 2.0 volts, 500 ohms impedance

SG-26 STANDARD SIGNAL GENERATOR

Equivalent to AN/URM-26B. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

- Frequency Range: 4 to 405 MC in 6 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- Output Impedance: 50 ohms nominal

RT-500 RECEIVER-TRANSMITTER TESTER

Equivalent to AN/TRM-1. Laboratory-quality portable instrument, designed to measure performance on transmitting and receiving equipment.

- Frequency Range: 190 KC to 400 MC
- Signal Generator Output: 2.5 to 100,000 microvolts into 50 ohms
- Transmitter Tester Power Range: 3 to 100 watts
- Volt/Milliwatt Meter: multi-range meter measures AC, DC volts and milliwatts

PO-400 PULSE OSCILLOSCOPE

Equivalent to AN/USM-38. Precision portable oscilloscope for analyzing amplitude and time characteristics of complex electrical waveforms.

- Transient Response: 0.06 microseconds (rise time)
- Square Wave Response: less than 5% drop at 50 cycles
- Deflection Sensitivity: 0.1V RMS per inch
- Sweep: 1 to 100,000 microseconds per inch, triggered or recurrent

AT-120 R. F. STEP ATTENUATOR

Designed for use in output systems of signal generators, precision microvolters, IF strips of microwave receivers, etc.

- Frequency Range: 0 to 1000 MC
- Attenuation Range: up to 120 db in ten steps
- Output Impedance: 50 ohms standard, 75 ohms optional
- VSWR: 1.1 up to 500 MC, 1.2 up to 1000 MC

CS-200 SERIES COAXIAL SWITCHES

For all types of coaxial switching.

- Positions: up to 12
- Nominal Impedance: 5 ohms
- VSWR: 1.2 up to 500 MC, 1.3 up to 1000 MC
- Cross-talk for 12 Position: greater than 75 db down at 1000 MC

CM-300 CRYSTAL DETECTOR MOUNT

For general purpose in RF monitoring 50 or 75 ohm coaxial systems. Can be used with Trad Attenuator AT-120.

- Frequency Range: 10 to 1000 MC
- Accuracy: 1/2 db
- Impedance: available in 50, 75, 100, 150 and 225 ohms
- Maximum Signal Output: 2.5 V RMS

Trad has a complete, diversified line of electronic products, some of which are listed here. All products are available for speedy delivery. Trad's national representative organization is now being expanded. Interested reps may write or call George Trad at Prospect 6-7445 for appointment.

Manufacturers with products to sell in the Field of Nuclear Energy find that advertising in NUCLEONICS is a sure-fire method of moving those products because they reach 11,000 potential purchasers through the advertising pages of NUCLEONICS. From Absorbent Paper to Zinc Bromide... products in the Field of Nuclear Energy are SOUGHT and BOUGHT by important Physicists, Metallurgists, Geologists, Biologists, Physicians, Radiologists, Bio-Chemists, Engineers, Technicians and Management because these important buying influences go first to the sales pages of NUCLEONICS for product data in Nuclear Energy.

ATTENTION! MR. PURCHASING AGENT

There's A

Borthig Insulating Varnish FOR YOU TOO

The George C. Borthig Company are specialists in the Insulating field. When you are looking for the *right* insulating varnish, call Borthig and be assured of prompt attention to your problem and a high quality, uniform product.

- ★ High Temperature Varnishes for the new operating temperatures over Class B.
- ★ Modern type thermosetting clear and black baking varnishes for all purposes.
- ★ Air Drying Varnishes.
- ★ Finishing Type Varnishes.
- ★ Epoxy Casting Resins.
- ★ Materials to meet MIL Specifications #V-1137A.
- ★ Fungicidal Varnishes meeting MIL Specifications V-173A Type 1 and Type 2.
- ★ Special Insulating Varnishes for tough corrosive conditions including freon, sulphuric acid, caustic soda and many other conditions.

Solved Problems Are Another Product We Deliver

GEORGE C. BORTHIG CO., INC.

Insulating Varnishes

EAST RUTHERFORD 6, N. J. P. O. BOX 11

LIGHTWEIGHT MOUNTING BASES

**THE MOUNTS
THEMSELVES WEIGH
TWO OUNCES LESS THAN AVERAGE**

FINNFLEX All-Metal Mounts meet *all* requirements of MIL-C-172-B and yet weigh two ounces less than average. On this base alone that means a half-pound savings!

**THEY SAID IT
COULDN'T BE DONE IN ALUMINUM**

Previous aluminum models of this widely used base failed the shake and drop tests, and their makers were forced to use stainless. Finn designers, however, came up with an all-aluminum model that passed every test—is officially approved.

**AND NOW ...
MAGNESIUM!**

...25% lighter with no sacrifice in strength of performance. Finn magnesium bases are available in MIL-C-172-B standard sizes or in special designs.

Finn has the staff, the laboratory and the plant facilities to solve your toughest shock and vibration problem. "QPL", of course. Write for complete engineering bulletins and learn how you can cut both weight and costs with Finn-engineered vibration mounts and bases.

FINN

*Pioneers in lightweight shock
