WASHINGTON 25, D. C.

FOURTEENTH EDITION

PART II

ACCORDING TO FREQUENCY

INFORMATION CORRECTED TO
1 JUNE 1957

FOREWORD

This edition of "Broadcasting Stations of the World" lists all known radio broadcasting and television stations except those in the continental United States of America on domestic channels. For convenient reference this publication is divided into four parts, as follows:

PART I (Blue Cover): Information is indexed alphabetically by **COUNTRY** and **CITY**. Within a city, frequencies are listed in ascending order. Other information includes call letters and/or station name, power, wavelength, frequency, status of frequency or transmitter and ownership.

PART II (Green Cover): Information is indexed according to **FREQUENCY** in ascending order. Owing to certain limitations introduced by machine processing, frequency indexing follows the right rather than the conventional left margin of the page.

PART III (Maroon Cover): This compilation is indexed first by **CALL LETTERS** and second by **STATION NAME** or **SLOGAN**. Since it is used primarily to identify stations, only items of information enabling location of full information by cross-reference to part I or part II are included.

PART IV (Brown Cover): Two sections, one for **FREQUENCY MODULATION** broadcasting stations and the other for **TELEVISION** stations, each separately indexed by country and city and by frequency, include the same elements of information as parts I and II plus additional pertinent data necessary to distinguish audio, video, polarization, and other technical factors applying in their range of the spectrum.

The column headings covering all data listed in parts I, II, and III are defined as follows:

COUNTRY: The country, colony, mandate, protectorate or overseas territory in which the station is located.

CITY: The announced location of the station, relay stations excepted. It is usually the studio and office location, since transmitters are often located in outlying areas. In order to identify the location or station more clearly in certain cases, old or alternate names, provinces, and in a few cases transmitter sites, are included in a secondary position in the column.

SYMBOLS: See page IV for explanation. Status denoted by symbols may change at any time after publication date of this edition.

CALL LETTERS: The unique identification of a station in terms of letters of the alphabet and/or minerals, usually selected from block combinations allocated each country by international agreement. Numerous countries do not assign call letters to broadcast services, hence the omission of this information from a considerable number of entries.

SLOGAN: The name announced by or applied to a station for identification purposes in lieu of or in addition to the call letters. The station name has been reduced in many cases due to space limitations, but the essential elements or abbreviations thereof have been preserved.

OWNERSHIP: The entity, individual or corporate, in whose name the station is licensed and operated.

POWER: Stated in watts. The listed figures are usually authorized power of the transmitter, but in some cases of known deviation the actual operating power has been substituted. When two powers are listed, the figures represent the lower and upper limits of power where a station uses more than one transmitter on the frequency at different times (shortwave), or varies the power of the transmitter for day and night operation (medium-wave).

WAVELENGTH: Stated in meters.

FREQUENCY: Stated in kilocycles per second. While listed as accurately as possible, due to propagational conditions, interference by other stations, jamming, malfunction of transmitter, reallocation of frequencies by a country or convention, or for some other reason, stations may use frequencies which are at variance with this publication.

ADDITIONAL INFORMATION: With numerous entries additional information has been included concerning future plans, programs carried, associated stations, network affiliation, etc.

TIME CHART: A table of summer, winter and standard time differences with respect to G. M. T. for each country is included in the back of part I.

This issue supersedes the edition dated 1 March 1955.
