United States Overview

Comparison of various market, owner and station factors with the entire country provides useful indicators of its potential. Below are several nationwide benchmarks:

National Totals

1999 Estimated Population	275,999,600
1999 Estimated Retail Sales	\$2,817,167,878,000
1999 BIA's Estimated Gross Radio Advertising Revenues	\$15,692,000,000

National Growth Rates

	'93-'98	'98-2003
Population (POP)	1.1%	0.9%
Households (HH)	1.2	1.1
Retail Sales (RS)	5.3	4.5
Effective Buying Income (EBI)	2.1	4.5

1998 National Income

Per Capita	\$16,895
Median Household	\$35,377
Average Household	\$45,504

1998 National Ethnic Breakdown

Asian	3.9%
Black	12.8
White	82.4
Spanish-Speaking	11.5

1998 National Demographic Breakdown

	Men	Women	Total
Under 12	8.2%	7.9%	16.1%
12-17	4.3	4.1	8.3
18-24	4.7	4.5	9.1
25-34	7.2	7.0	14.2
35-44	8.1	8.2	16.3
45-54	6.8	7.0	13.8
Over 55	9.7	12.5	22.2

Metro Market Stations' Key

1 Market Statistics

Metro Rank: The current ranking (Fall 1999) of the Arbitron Market by size of population based on the U.S. Census.

Pop: The projected 1999 population estimate of the market from Market Statistics, Inc. (1998 population times average annual growth rate). See Copyrights.

Retail: The projected 1999 total retail sales expenditure in the market from Market Statistics, Inc. (see Copyrights). **M** = millions and **B** = billions.

Gross Rev: BIA's estimate of 1999 gross radio advertising revenues for the market. This estimate represents total time sales including local, regional and national spot sales, plus political and network compensation. The figure does not include trade and barter, production or promotional revenues.

HH Inc: The average 1998 household (HH) Effective Buying Income (EBI) for 1998 from Market Statistics, Inc. (see Copyrights). The arrow to the right of the figure indicates either a growth (up) or decline (down) as compared to last year.

2 Metro Demos

This is a graphical presentation of the gender and age percentage breakdown in the market for 1998. For comparison purposes, the national averages for the various categories is indicated in the corresponding bar by a > for men and a < for women.

3 Other Demographic Data

Ethnic Population: The percentage of the market's Black and Hispanic population is portrayed in this chart along with the national percentages for comparison which are indicated by a < mark.

FM: Based on The Arbitron Company's 12+ Average Quarter Hour Ratings (see Copyrights), this bar represents the percentage of listening devoted to FM stations in the market along with the national average (60) for comparison which are indicated by a < mark.

LL: This bar represents the percentage of **lost listening** in the market to non-commercial and out-of-market stations. Again, the national average (27) is provided for comparison and indicated by a < mark.

4 Technical Attributes

Technical information is secured from the FCC through Actions and filings for construction permits.

Call Letters: Broken out by FM and AM and listed alphabetically, these are the licensed call letters of the commercial radio stations licensed to the market

FMT: The broad category format for the type of programming aired by the station. Format information is based on announcements in trade publications and direct contact with the stations through frequent telephone surveys and annual mail surveys. For a list of formats and the abbreviations used by BIA, see Keys & Codes.

City of License: The city from which the radio station is licensed to operate as designated by the FCC.

Frequency: The location on the radio dial at which the station

can be found.

PWR (FM), Day or Night (AM): The power in kilowatts at which the station transmits its signal. A "#" symbol indicated next to the station's power signifies that a construction permit (cp) has been granted by the FCC to change some aspect of the station's technical operations.

HAAT (FM): Height above average terrain of the station's center of radiation (antenna) with respect to its surrounding terrain in feet.

Combo: By matching the letters indicated in this column you will see the stations in the market that operate together as a "combo."

LMA: Local Marketing Agreement. The number indicated in this column coincides with the other stations in the market that operate with this one under such an agreement.

5 Rep

This is an abbreviation of the station's advertising representative according to a table found in "Keys and Codes" on page XX.

6 Ownership

Ownership changes and information are gleaned from announcements in the trade publications, press releases, market contacts, FCC filings and other sources.

St: The year the station first went on the air.

Owner: The most recent owner or proposed purchaser of the station. A proposed purchaser is indicated by a "p" next to the Acquisition Date.

Acq: The date (Year Month) the station was acquired by the most recent or proposed purchaser.

Price: Presented in thousands, this is the sales price paid for the station. To the right of the price you may encounter a code that signifies the type of transaction. (See Keys & Codes, Page XX.)
NOTE: Because the actual sales price of a station or group may vary from the reported price, caution should be exercised with respect to the use of these data.

7 Contact Information

Listed alphabetically by Calls, the station's GM, mailing address, phone and fax number are listed as well as the owner's phone number. See "Station Personnel" for other key contacts at the station and "Group Owners" for more detail on owners of more than 2 stations.

8 Arbitron Ratings

BIA is licensed by The Arbitron Ratings Company to provide its Total Day, Average Quarter Hour (AQH) shares for persons 12 years and older. In this graphical presentation we profile the stations receiving at least a 1.0 share in the Monday-Sunday, 6:00 AM to Midnight category for the Fall 1999 ratings period. Stations receiving at least a 0.5 share but less than 1.0 are listed by calls on the right side of the graph. These data are copyrighted by The Arbitron Company (see Copyrights).

Keys & Codes

General Abbreviations

C: The letter codes under the “C” heading indicate a combo or duopoly. All AM and FM stations with the same owner will have the same letter code.

cp: A “cp” following the Power column indicates that the station has a construction permit to change frequency, power, or its antenna height to upgrade its technical facilities. The station is also authorized to operate at the indicated power or height for testing purposes.

EBI: Effective Buying Income - disposable household income, or gross income available after taxes to purchase goods and services.

HAAT: Height above average terrain of the station’s center of radiation (antenna) with respect to its surrounding terrain in feet.

LMA: Local Marketing Agreement - two or more stations operated by a company other than the owner. The numeric codes under the “LMA” heading indicate which stations are operating under an LMA.

Sales Price Codes

- ac:** Combo sale in adjacent market
- al:** Station sold for assumption of liabilities
- cp:** Sale of construction permit for unbuilt station.
- c#:** AM/FM combo sale. The combo price is listed with the FM station. The number following the “c” identifies the AM/FM combo involved. The AM and FM station will have the same number following the “c”.
- d#:** Duopoly sale of two or more stations in the same service, either two FM’s or two AM’s.
- d:** Distress sale
- dn:** Donation
- e:** Estimated sales price
- g:** Group sale. If a combo is involved, a number following the “g” will indicate the combo in that market. The AM and FM station will have the same number following the “g”.
- na:** No price available
- nc:** No cash consideration
- p:** Proposed sale
- st:** Transfer of stock or partnership interest
- sw:** Station swap
- +**: Plus additional considerations, (e.g., assumption of debt)

Metro Market Stations

www.bia.com

Powerful broadcast data SOLUTIONS

The most accurate and comprehensive
broadcasting information available.

Keep track of ownership, revenues, ratings, markets, technical, and contact information with just one product.

Over 500 fields of information available — *daily updates via the Internet.*

All commercial U.S. radio and television stations.

BIAfn's on-line solution for your immediate research needs. Based on a limited version of our powerful MEDIA Access Pro™ database software, MEDIA Web Search™ is perfect for occasional users.

You can access BIAfn's powerful database via the Internet anytime you want and get the accurate and reliable broadcasting information you need. We developed this site with ease-of-use in mind, yet included the vital information you need to customize your search.

BIAfn's custom broadcasting research is the perfect solution when you have too little time and too few resources. When it comes to market research our professional analytical and research teams are ready to pull together the data for you.

Just give us a call with your research criteria and we'll provide you a comprehensive report with the information you need.
