MO KTJA (CP)	Mount Vernon	to 106.7 C3 from A

WASHINGTON THIS WEEK

Buck Owens Production Co., Inc., licensee of KCWR-550/KUZZ-FM-107.9 Bakersfield, has been granted a waiver of one-to-a-market rules to allow purchase of KDOB-TV-48 Bakersfield. KDOB is now in bankruptcy and qualified as a "failed station"; it had been operated separately by Buck Owens' sister. In a similar case, George S. Flinn, owner of Flinn Bcstg Co. and WHBQ-560 Memphis TN, was granted permission to buy the construction permit for an unbuilt TV station on Ch. 50 in Memphis. Flinn claimed economies of scale would allow both the struggling WHBQ and the new CP to operate successfully. Flinn has already avoided multiple ownership rules once by selling WGSF-1210, Arlington TN (Memphis), to his brother-in-law, Fred Flinn, in order to buy WHBQ. Finally, the FCC dismissed American Legal Foundation's request for reconsideration of multiple ownership rules for AM, FM and TV stations.

The FCC has revoked the license of WRPZ-1440, Paris KY, which has been silent for over a year. As part of this action, the FCC noted that all stations off for twelve to eighteen months are subject to license revocation. With record totals of stations now silent, particularly stand-alone AMs, enforcement of licensing requirements might trigger de-licensing of dozens of facilities in the next year.

The Commission has upheld a staff action canceling KIQI San Francisco's 1980 CP for new nighttime operation and a change in city of license to Sunnyvale, CA. The FCC had acted unilaterally to cancel the CP in 1987 when a subsequent application noted that the CPs had not been constructed. KIQI has since added nighttime operation under a new construction permit.

WASHINGTON THIS WEEK (cont'd)

On July 10, the FCC's Field Operation Bureau conducted a nationwide audit of 374 AM stations. The audit revealed a high level of compliance with new emission limitation requirements (the new NRSC standards) to reduce adjacent channel interference to AM stations. Of the 374 stations monitored, 325 (87 percent) complied with the equipment installed alternative. On July 12, technical measurements were conducted on the remaining 49 stations and all were found to be in compliance.

Responding to a complaint by Rep. Beryl Anthony, Jr. (D-AR), the FCC admonished KKOL Hampton AR for failure to maintain and permit public inspection of records of ad requests from political candidates, the disposition of each request, and charges, if any, for the time. KKOL also was directed to submit to the FCC data on rebates for overcharges to candidates under lowest unit charge violations.

The Commission has affirmed a Review Board decision granting the application of Yeary Broadcasting, Inc., for a new FM station in Lebanon, VA.

KMNY-1600 Pomona CA, the flagship station of Money Radio Network, was fined \$10000 by the FCC. Violations include at least three payments by guests on KMNY talk shows in order to appear on the air; moving studios from Pomona to Anaheim before receiving FCC approval; and failure to provide qualified operators or access to public records in the Pomona offices after moving to Anaheim.

ELSEWHERE

United Family Foundation's International Media Service, producer of IMN network news, has gone into bankruptcy and terminated operations. The service targeted religious stations and had over 200 affiliates.

From Seattle comes word of a low cost overnight (10pm to 8am) programming alternative from MUZAK. YES, the people who bring you in store and office music. The music is delivered from CD's and RDAT tape via satellite in several formats. There are still a few bugs in the idea as the programming does not offer local cutaways and is only available only in mono. There is no commercial requirement and the service is expected to cost from \$200 to \$300, depending on the market. Formats available include CHR, AC, New AC, and light classical. For more information call Steve Ward at MUZAK 800-331-3340.

BFM CALENDAR NOTES

Stations in Samoa, Guam, Alabama, Hawaii, Oregon and Washington must file renewal applications (FCC Form 303-S and Form 396) by October 1. Iowa and South Dakota FM translators must file renewal applications on FCC Form 348; and Samoa, Guam, Florida, Puerto Rico, Virgin Islands, Iowa, Missouri, Alabama, Hawaii, Oregon and Washington stations must file Annual Ownership Reports (Form 323) by Oct. 1.

The Society of Broadcast Engineers (SBE) meets in St. Louis Oct. 4-7; Kansas' state broadcasters meet Oct. 10-12 and Massachusetts broadcasters meet Oct. 19-21.

THE

**STREET
RADIO
DIRECTORY**

COMPREHENSIVE MARKET DATA:
AM and FM Stations
USA and Canada
Program Formats
Arbitron and Birch Ratings
Construction Permits and Applications

Each week The M Street Journal reports over 300 format, technical, call letter and ownership changes. We add to that new station applications and activity, information on the progress of construction permits and all proposed and actual changes to the FM table of allocations. We will also let you know the major decisions and actions taken by the FCC concerning radio broadcasting.

The M Street Journal is a great way to keep up on what broadcasters in your area and across the country are doing. Keep up on new stations, find investment and marketing opportunities, format changes, proposed and granted technical changes all in one easy to read, timely publication.

The M Street Journal is delivered by first class mail each week.

The M Street Radio Directory contains full state by state station listings for every radio station in the U.S., frequency and call letter cross references, market by market station listings as well as a guide to Canadian Radio. With over 600 pages it is like having a complete broadcast database on your desk!

WASHINGTON THIS WEEK

The Commission has upheld its earlier decision to not to impose new Form 301 filing requirements retroactively on all persons with pending Form 301 applications for new commercial broadcast stations. The requirements became effective June 26, 1989. Two companies had appealed for reconsideration, asking that the additional financial, ownership and integration information also be required of previously filed, pending applications. They argued unsuccessfully that since the new requirements were intended to weed out "sham" applications, they should also be used to expedite review of pending cases. The FCC, in backing its earlier decision, noted that the paperwork generated by making the requirement

WASHINGTON THIS WEEK (Cont'd)

retroactive would further delay cases that were already the oldest amongst those pending.

Other appeals and decisions this week: The FCC upheld a ruling denying reconsideration in a case involving three competing applications for a new FM at Southern Pines NC; granted a motion for a stay and deferred until further order action on the appeal of a proceeding involving three competing new FM applications in Pawley's Island, SC; dismissed as moot a motion seeking dismissal of a recently granted noncommercial FM application in Phoenix; and dismissed a petition for Extraordinary Relief and Expedited Action in the proceeding for a new FM in Eden Prairie, MN.

The FCC has announced a nationwide enforcement effort to assess and improve compliance with tower painting and lighting requirements. All local offices will inspect radio towers this month. In the past, such FCC pronouncements have in fact preceded crackdowns on stations not adhering strictly to FCC regulations. For more information on the regulations and the enforcement effort, contact Charles Engle of the FCC's Chief Antenna Survey Branch at 202-632-7521.

Two more pirate stations have been located and their operators fined by the FCC. Nabbed by direction-finding equipment were "Midnight Radio," operating at 7410 KHz band in the Public Radiocommunication Services band in Rowland TX, and an unlicensed FM broadcasting at 90.5 in Lancaster NY. The stations' operators were both fined \$1,000 for the unlicensed operation of a radio station.

ELSEWHERE

In a rare transfer of a shortwave station within the U.S., Salt Lake City-based KUSW has been sold by Carlson Communications (owners of KKDS/KRSP) to Trinity Broadcasting Network for \$2.1 million. Trinity owns KGHO AM/FM Hoquiam WA and has interest in a number of television stations, and plans to change KUSW's format from CHR and religion to all religion.

The National Association of Broadcasters has filed comments asking the FCC to begin a new FM technical proceeding to establish realistic definitions for FM directional antennas. The filing came in response to a Hammett & Edison petition asking for clarification as to which, among the 40 measured FM antenna patterns, the FCC considers "directional," since antenna mounting and the effects of the tower itself create signal variations among every type of FM antenna. The NAB also filed a petition asking the FCC to develop standards to insure that home automation systems would not cause interference with in-house AM reception.

SMN's "Heart & Soul" format will be simulcasting the Lou Rawls "Parade of Stars" telethon to benefit the United Negro College Fund. The program will air on Saturday, December 29.

M Street's editorial gripe of the week: this past weekend, heavy rains produced the worst flooding in recorded history through much of the state of Washington. Thousands were evacuated from their homes, water supplies were contaminated, major roads and bridges closed, and flood waters reached unprecedented levels. The need for accurate, current information was critical. And radio - the only medium equipped to instantly and continuously fill that public need - wasn't there.

Of the 56 radio stations in the Seattle/Tacoma/Everett area, only two - news-talk outlets KIRO-710 and KING-1090 - devoted substantial blocks of programming to coverage of a local weather-related crisis affecting millions of people. Even these stations ran coverage for only a few daylight hours Saturday and Sunday, choosing to send their staff home on a holiday weekend and run pre-scheduled specials, network talk shows and sports programming instead. This is the latest of several incidents in major markets over the past two years of stations failing to preempt non-local programs for coverage of local, breaking news or weather crises. Setting aside the issue of stations being licensed to broadcast in the public trust, we must still ask: can radio, in competition with so many other advertising media and already not getting its fair share of ad dollars, afford to pass up chances to be the public medium of choice in a crisis? Can radio afford to train listeners to wait for periodic one-minute breaks in syndicated programs - already available through television? Can radio afford to continue abdicating its image as a foreground provider of information and entertainment?
