VOICE OF AMERICA—1951

By FOY D. KOHLER, Director of Office of International Broadcasting

DURING 1951 the Voice of America made significant progress toward the goals of the Campaign of Truth. This progress was reflected by increasing evidence of the impact of the broadcasts on listeners both behind the iron curtain and in the free world. During the past 12 months the Voice of America:

Kohler

1. Added twenty new language services increasing its total from twenty-six to forty-six.
2. Increased daily programming time by about twenty hours, from thirty to fifty hours daily.
3. Expanded services to USIS radio operation overseas.
4. Improved transmitter coverage and heightened penetration of Soviet jamming.
5. Increased the effectiveness and improved the quality of its output.

The new broadcasts initiated by the Voice of America were beamed to areas not previously covered by the programs. Where previous programs to the USSR had been only in Russian and Ukranian, other daily broadcasts were added in Georgian, American, Azerbaijani, Tatar, Turkestani, Lithuanian, Latvian and Estonian. Other programs were inaugurated to Albania, Finland, Israel and Portugal in their respective languages; to China in two additional dialects—Swatow and Amoy; to Japan and to South and South East Asia in Hindi, Urdu, Thai, Burmese and Malayan.

The Voice of America refined its program formats, made greater use of dramatic and documentary techniques and became markedly more outspoken and hard hitting. One of the principal themes was the success of the United Nations effort to repel the Chinese and North Koreans aggression in Korea.

The strengthening of the free world's defense was continually stressed both in news and commentary and major attention was given to exposing the fraudulent Soviet "peace" drive.

In addition to direct broadcasts, Voice of America expanded the development and distribution of transcribed platter programs tailored for local radio use overseas. Transcribed features were distributed regularly to some seventy posts. The monthly shipment of discs ranged from 12,000 to 16,000 to more than 400 destinations; from 2,000 to 4,000 scripts also were distributed overeas each month.

In the field of facilities the Voice of America network began to assume the proportions of a world-wide radio system as new facilities were put into operation and additional progress was made on other facilities at home and abroad. On the domestic scene the construction of curtain antennae progressed at six transmitter locations and ten additional studios were constructed and put into use. Overseas, Voice of America programs were carried by expanded relay facilities in Germany, Tangier, Greece, Hawaii and the Philippines. Additional British, Ceylon and Japanese relay facilities were used under lease or agreement. Other facilities and bases were in various stages of engineering completion, construction engineering development and site acquisition and negotiation. Work was advanced on that portion of the "Ring Plan" already approved by Congress. Under the "Ring Plan," which calls for a network of powerful relay bases girdling the globe, sites were selected for two projects and were in an advanced stage of negotiations for five others. Main Diesel equipment and transmitters for all plants were on order and contracts were awarded for two of the projects and tests completed of the first high-power transmitters at those installations. Additional overseas sites were negotiated on a preliminary basis in anticipation of funds requested from Congress for completion of the "Ring Plan." Project Vagabond, which involves the construction of a ship-borne radio relay system, was nearing completion at the year's end.

Penetration of Soviet jamming ranged as high as 75 per cent to 85 per cent in most areas of the USSR and averaged around 26 per cent in Moscow, where jamming was the heaviest. Progress was made in the development and installation of anti-jamming equipment designed to increase the penetration even further.

OPERATION SUCCESS!

with du mont telecasting equipment

The rich heritage of over 12 years' experience in the design, manufacture and use of telecasting equipment is reflected in every piece of Du Mont equipment today. This experience results in equipment without peer for performance, dependability and operating economies.

Du Mont-equipped stations were among the first to "break into the black" a few years ago. Today a roster of the most successful stations in the television world shows an impressive percentage of partial or 100% Du Mont-equipped operations.

It was Du Mont who first advocated the "Grow As You Earn" basis of station equipment. This has paid dividends to the many stations who recently increased their transmitting power through the Acorn-to-Oak Series Transmitters. Such power increases were achieved with no loss of "time on the air" or loss of former equipment.

Truly, a Du Mont-equipped TV station exemplifies OPERATION SUCCESS!

Television—1952

TELEVISION, the modern miracle which combines sight with sound, dramatically surges forward in this Election Year, 1952.

With more than 100 stations, nearly 15 million sets and a viewing audience of around fifty-five million, television is on the threshold of a spectacular era of development as the Federal Communications Commission lifts the TV freeze and provides for station expansion.

Television has come a long way since the beginning of the postwar years in 1946. It has just begun to flex its muscles and the year ahead holds promises of great expansion in stations, audience and program services.

This edition of Television Year Book, fashioned from the progress of the new industry, is testimonial of television's tremendous growth and its importance to the American economy. To those who contributed to this volume we express our gratitude.

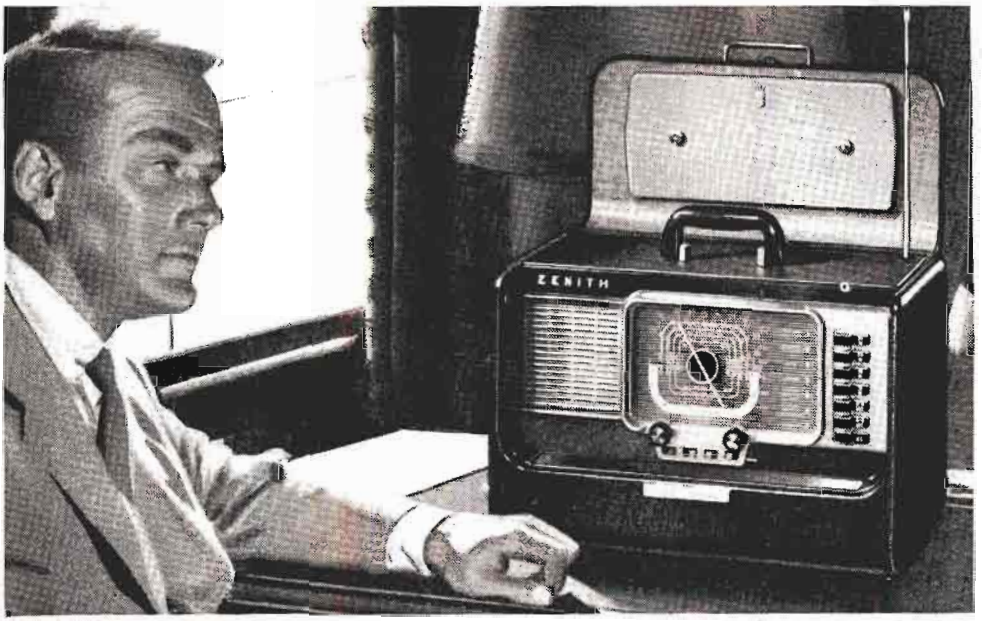
NEW ZENITH® SUPER TRANS-OCEANIC



—the portable radio that belongs on every business leader's desk

You're certain to agree that there's no finer radio for the business leader than Zenith's Super Trans-Oceanic Short Wave Portable. Its superb construction, matchless appearance and flawless performance are quickly apparent to the discerning eye and ear.

News, weather and market reports are at your fingertips as you conduct your business. On plane, train or ship at sea, the voice of the entire world is yours to hear at all times.

And when you turn from business to pleasure, at home or in the remote places of rod and gun, you reach across oceans and continents to keep in touch with the world.

Truly, Zenith's Super Trans-Oceanic Short Wave Portable is the only radio of its kind in the world.

Marine and Weather Short Wave—38 to 150 Meter Continuous Tuning Bands. Brings in ship-to-ship and ship-to-shore conversations; weather reports; amateur stations.

Trans-World Short Wave Reception—16, 19, 25 and 31 Meter Bands. Pulls in more stations, more countries than ever before.

Trans-Continental Standard Reception—Brings in stations where other portables fail—even in remote areas and steel buildings.

Humidity-Proofed—against loss of sensitivity.

TV FREEZE LIFTED

By FCC Report and Order

IN a momentous decision, the most important in the history of the Federal Communications Commission, the FCC on April 14 unshackled television by issuing its Sixth Report and Order setting forth channel allocations in both the VHF and UHF bands and defining procedure. The FCC action marks the lifting of the TV freeze and sets in motion plans for orderly expansion of television throughout the United States and its possessions.

The voluminous report, covering 500 typewritten pages, documents, 2,053 channel assignments in 1,291 communities with 242 UHF channels being allotted to non-commercial educational stations. Thirty-two existing stations are given

Your TV Question Answered

As a service to readers of RADIO-TELEVISION DAILY who are interested in the TV allocations for any specific market, the Service Department of this publication is prepared to furnish you quotations from the FCC Report and Order as it relates to any specified market. Address your inquiry to TV SERVICE EDITOR, RADIO-TELEVISION DAILY, 1501 Broadway, New York, N. Y.

changes of frequency and stations are placed in a single class with three geographic zones.

It is a complete documentation of commission TV actions from the day the proceedings were instituted on May 6, 1948, until the lifting of the freeze. Section by section the report deals with the amendment of Section 3.606 of the commission's rules and regulations; amendment of the commission's rules and regulations and engineering standards concerning television broadcast service and the utilization of frequencies in the band 470 to 890 mcs., for television broadcasting.

In announcing the report it is revealed that Commissioner Robert Bartley did not participate; Commissioner Edward M. Webster concurred; Commissioner Frieda B. Hennock concurred in part and dissented in part and Commissioner Robert F. Jones wrote a dissenting opinion.

Anticipating an unprecedented number of applications for new television stations as a result of the lifting of the freeze, the commission has announced a temporary processing procedure. Desirous of making television service available to the greatest number of people in the shortest period of time, the FCC has set up separate processing lines for different cate-

How did I become a vice president? Used my head. While others were sinking money in live TV, I got in touch with Consolidated and bought a bang-up show on film. Then I bought spot market. No wasted circulation... costs less, too. And I don't mind adding that it pleased the client no end.
