MULTI-USE DESIGN - A MASTER LAB FEATURE

All the above equipment, as separate units, adds up to over \$13000. How can the 9 kit Master Lab have it all for only \$37.55?

Multi-use design is the answer. For example, the Slide Projector quickly and easily converts into the Photo-Enlarger, Spectroscope, Cloud Chamber Illuminator, etc. Similarly, the Transit Head works as a Telescope Mount. Such multi-purpose design makes possible an all-science lab or an unbiased low price. Multi-purpose design is used only where it is advantageous. For example, it is NOT used in such applications as the permanently-mounted weather instruments, where it would not be practical.

KIT-A-MONTH - OR ALL AT ONCE
Get 9 kits in 9 months, plus the equipment. You may start with the Kit-A-Month plan, and at any time get the balance of the 9 kit series in one shipment by sending \$3.95 for each of the unshipped kits.

WHITE'S RADIO LOG

An up-to-date Broadcasting Directory of North American AM, FM and TV Stations. Including a Special Section on World-Wide Short-Wave Stations

THIS is the third and last part of *White's Radio Log*, now published in three parts twice each year. This format change, the first in over two decades, enables the Editors of RADIO-TV EXPERIMENTER to offer its readers two complete volumes of *White's Radio Log* each year, while increasing the scope of the *Log* and its accuracy.

In this issue of *White's Radio Log* we have included the following listings: U. S. AM Stations by Call Letters, U. S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters, Cuban and Mexican AM Stations by Call Letters, and the World-Wide Short-Wave Section.

In February, 1965 issue of RADIO-TV EXPERIMENTER, Volume 43, No. 1, the *Log* will contain the following listings: U. S.

AM Stations by Frequency, Canadian AM Stations by Frequency, U. S. Television Stations by States, Canadian Television Stations by Location and the World-Wide Short-Wave Section. In the event you missed any part of the *Log* published during 1964, you will have a complete volume of *White's Radio Log* by collecting any three consecutive issues of RADIO-TV EXPERIMENTER during 1964 and 1965. The three consecutive issues are an entire volume of *White's Radio Log* that offers complete listings with last minute station change data that are not offered in any other magazine or book. If you are a broadcast band DX'er, FM station logger, like to photograph distant TV test patterns, or tune the short-wave bands, you will find the new *White's* format an unbeatable reference.

WHITE'S RADIO LOG

For the DX'er. If you care to roam the bands for DX, we present here some information which will be of invaluable use to you in tracking down DX stations.

Although the current radio propagation conditions have made the high frequency bands (11 and 13 meter bands) relatively poor for DX'ers, the other bands are generally good during certain periods of the year. As a general rule, the following bands are "hot for DX" during the times indicated:

- 60-meter band=Winter nights.
- 49-meter band=Winter nights.
- 41-meter band=Winter nights.
- 31-meter band=Nights, all year.
- 25-meter band=Nights, all year.
- 19-meter band=Days all year, and Summer nights.
- 16-meter band=Days, all year, and Summer nights.
- 13-meter band=Days, all year.
- 11-meter band=Days, all year.

Something Different is being tried this time around in our listings. A number of monitors feel that they would get more use from our listings if we arranged the stations by frequency rather than by country, as we have done in previous issues. We would appreciate your comments on which way suits your DX chasing.

We are also listing, for the first time in this issue, a number of non-broadcast stations and frequencies reported by our monitoring stations. These are all indicated by an asterisk (*). In some cases, when a great number of stations of the same general category utilize a frequency, we have indicated the use of the frequency rather than attempt to list any of the specific stations monitored (2182, 2662 kc/s, etc.).

A new "clandestine" station has been monitored on 6700, 6705 and 7275 kc/s. The station is "Bayrak Radio," The Voice of the Turkish Cypriot Fighters. Although their schedules, by necessity, must be irregular, they seem to be most active at 0130 and 1230 in Turkish, 0200 and 1330 in Greek, and 0230 and 1400 in English on 6700 kc/s (times EST). Check their various frequencies at these times.

The past few months has shown an alarm-

ing outbreak of ship-based "pirate" broadcasters, mostly centered around England. A few land-based pirates have also popped into the scene. For the record, here's some data on the most talked about of these stations:

Radio Caroline, (see the article "New Pirate Broadcaster," by Tom Kneitel, R-TVE Aug-Sept, page 101) has now settled down on 1520 kc/s with a 0000 to 1500 and 1800 to 2100 (EST) schedule. The owners of *Radio Caroline* bought out the interests of a rival pirate, *Radio Atlanta*, and will now operate two pirate broadcasters on 1520 kc/s under the *Radio Caroline* identification. As a result of the merger, the original ship has now been moved from the east coast to broadcast from the west coast near the Isle of Man. This gives the station coverage into Manchester and Liverpool. The new ship will cover the old *Radio Caroline* spot on the east coast. The merger killed the opening of yet another pirate, *Radio Vannin*, which was set to open at Douglas Head, Isle of Man, with no less than four 20 kw medium wave transmitters. The only competition expected will be from *Radio Mary Rose*, which is expected to drop anchor off Liverpool and blanket northwest England.

Radio Leeds, another pirate, has been operated by students of Leeds University. The station is aboard a yacht off Harwich, Essex, England and uses 1520 kc/s (same frequency used by *Radio Caroline*).

Radio Sutch, on 1542 kc/s, will operate with 500 watts from 0600 to 0800 and 1100 to 1830.

Radio Invicta, broadcasting from an abandoned Army fort in the estuary of the Thames River, runs 10 hours of music daily. The station's claim to fame is that it broadcasts music "of a higher quality than the other pirate stations."

As an ironic twist, *Radio Free Yorkshire* was operated by two Liberal candidates "to demonstrate the dangers of pirate radio and to protest against the conditions which allow pirate radio to exist."

The above data on pirates came from Tom Kneitel, K3FLL/WB2AAI, who keeps track of such things.

R-TVE monitor John Westbrook, at the USN Sonar School in Key West, Fla., writes to tell us about the clandestine station *Radio Free Dixie* on 700 kc/s. John said that when heard at 2210 EST the signals were very strong. Programming was mostly jazz music and racist propaganda. We understand that this is a Cuban station.

Let Us Know. Listeners are invited to submit their loggings to us for publication in the Shortwave section of *White's Radio Log*. Be sure to include the following information for each station you report: approximate frequency, callsign and/or station name, city and country, and time heard in Eastern Standard Time, 24 hour clock. Address your reports to: DX CENTRAL, *White's Radio Log*, c/o RADIO-TV EXPERIMENTER, 505 Park Avenue, New York, N. Y. 10022, U.S.A.

Time To Listen. All times shown in *White's Radio Log* are in the 24 hour EST clock system. For example, 0800 is 8:00 AM EST, 1200 is noon EST, 1800 is 6 PM EST, and so on. For conversion to other time zones, subtract 1 hour for CST (0800 EST is 7 AM CST), 2 hours for MST, 3 hours for PST.

The following abbreviations are used in our listings: BC—Broadcasting Company, Corporation, or System; E—Emissora; R—Radio or Radiodiffusion; V—Voice or Voz.

TNX. We are indebted to the following DX'ers who added their loggings to those of DX CENTRAL, the official RADIO-TV EXPERIMENTER monitoring station in New York City, to bring you this month's listings:

Why not send us your loggings for our next listing? Share your DX with others!

Get those reports in *now!* Good DX!
