To The Announcer!

Salute the men of far renown
Whose voices ring from town to town,
Who greet us in a friendly way
No matter what they have to say.
They chat with presidents and kings,
Drop jokes on us from airplane's wings
Foretell the football's spiral curve,
The pugilistic "right" observe.
A great composer's noble strain
These lads announce with solemn mien
But when the jazzers toot and strum,
They make the English language hum.
No scene too great, no blurb too small,
The Friendly Voice enfolds them all.
And we, who listen from afar,
Perceive how wise and kind they are
And offer hospitality,
As members of our family.
They come to us in days of strain,
They loose the nagging clutch of pain,
They bring back sight to blinded men,
Unlock the doors of life again.
Through them the old folk tread once more
The merry scenes they knew before
Old age held up its warning hand,
And footsteps slowed at Time's command.
All hail the new fraternity,
Blithe spokesmen of that mystery,
That art, invention, super-show,
That magic gadget,—Radio!

RCA Radiotrons—the preference of radio experts

AND yet, an announcer is no better than the radio set which brings his voice to the listener and the receiver in turn is no better than its tubes. You cannot catch the full beauty of a voice or the inflections which create personality unless your set is equipped with tubes of the highest quality.

At the theater, you wouldn't take a back row seat when there's one available down in front at no extra cost. Why not have a front row seat in radio? The best costs no more. Equip your set with RCA Radiotrons and note the remarkable difference in your favorite announcer's voice.

And when that voice sounds scratchy or husky, check your tubes at once. Test out your set by trying your "spares" until you discover the faulty tube. Even RCA Radiotrons, good as they are, don't last forever. Give your aerial friends an even break by renewing your tubes when necessary.

RCA Radiotrons will bring you the voice you love to hear with every modulation, every friendly intonation reproduced faithfully, naturally and intact.

The Announcer's best ally is an RCA Radiotron

*When experts agree on RCA Radiotrons—why
take chances?*

Studio Slang—A Colorful New Language

The early pioneer days in radio broadcasting created many new expressions, some vagrant, some unpopular. Many of them were short lived. But there are many slang words and phrases now recognized, widely used and readily understood by production men, announcers, and studio engineers.

Here is an interesting list of some of the words, each with its singular meaning:

"Adenoid tenor:" one with a "tight" voice.

"Announcer's delight:" sarcastically applied to the announcer's control box in the studio, a complex instrument with rows of lights.

"Birdie:" the tweet-tweet sound occasionally encountered on long-distance transmission lines.

"Blasty:" the blasting sound, too much volume.

"Bring it up:" order to increase the volume.

"Bug juice:" a term describing carbon tetrachloride.

"Bugs:" trouble in equipment caused by something not immediately obvious.

"Cans:" headphones.

"Corn fed:" when the performance of either a singer or instrumentalist lacks culture.

"Cross-fire:" Morse telegraph codes picked up by program lines.

"Cross-talk:" conversation picked up from a foreign source.

"Cross-tone:" foreign tones picked up.

"Dead mike:" one out of service.

"Down in the mud:" a very low reproduction volume.

"Fade in" or "fade out:" gradual reduction or increase in volume, respectively.

"Fighting the music:" lacking ease in singing.

"Fill in:" those who standby to go on the air in case a program change must be made.

"Final shot:" the last test of a program originating outside the main studio.

"Fuzzy:" a voice lacking in clarity.

"Gelatine tenor:" one with vibrato or tremolo in his voice.

"Haywire:" relates to equipment in poor condition.

Progress in the radio art is measured by the
development of RCA Radiotrons

Studio Slang—A Colorful New Language

(Continued)

"Hold it down:" an order directed to studio engineer to reduce the volume.

"Hot switch:" a rapid program transfer from one point of origin to another.

"Killie loo bird:" a flighty coloratura soprano who sings with a florid style.

"Line hits:" when overhead transmission wires contact accidentally, usually during storms.

"Lock jaw:" the voice of one who sings as if tired.

"Nemo:" programs originating outside of studio.

"Nervous baritone:" one who over-emphasizes the dramatic effect.

"Old sexton:" a bass with a a sepulchral voice.

"On the beach:" out of a job, unemployed.

"On the log:" an entry in the studio record, complimentary or otherwise.

"On the nose:" a radio program executed according to schedule.

"Peaks" or "kicks:" the maximum point of the needle swing on a volume indicator.

"Pipe" or "patch:" a temporary and removable connection on studio equipment.

"Riding gain:" keeping program volume within practicable limits.

"Scratches:" a noise caused by faulty equipment.

"Scooper:" A singer, usually a contralto, who slides up and down the scale without distinguishing clearly between notes.

"Short voice:" one with a limited range.

"Standby:" a warning to get ready to take the air.

"Standbys:" alternatives for programs on the air.

"Sour" or "blue:" voice or instrument off pitch.

"Talking in his beard:" a muffled voice.

"Thick:" when the individual instruments in a group selection are not distinguishable.

"Town crier:" one who sings too loud.

"Up three miles:" indicates very high amount of units or volume of reproduction.

"Wooden voice:" lacks clarity and expression.

"Woof:" a word used frequently in making tests, but having no meaning.

*Every RCA Radiotron is tested and inspected in 41
different ways before it is approved*

John S. Young
National Broadcasting
Company
WEAF-WJZ
New York City

JOHN was a classmate of Rudy Vallee at Yale but although he plays the ukulele like nobody's business he never seriously considered jazzing as a vocation. He just knew he had to be either an actor, a playwright or a lawyer. Anyway he became a member of George Pierce Baker's course in play writing and when he left Yale went on the stage. Just why he didn't stick to the footlights is not sufficiently explained since John S. has all the qualities that go to make a leading man, but he next appeared as announcer extraordinary over WBZ of New England. From thence he was summoned to New York to do his stuff from 711 Fifth Avenue and now you may hear him every evening doing some of the major programs over WJZ and WEAF

John is tall and slim and dark and in the lapel of his snappy suit one may usually see a tricky boutonniere. He takes his job rather seriously and his biggest thrill came when he announced a special short wave broadcast from the Capitol Theatre put on to entertain Rear Admiral Byrd at the South Pole. Among his treasures is a radiogram from the explorer thanking him for the broadcast.

John says the biggest thing in the world is radio and the trust and confidence of the radio audience is something that must never be violated.

But to show that the lad has his frivolous moments be it known that his favorite program is Rudy Vallee's weekly broadcast from the NBC.

Hear him on the RCA Radiotron hour

RCA Radiotrons—the hallmark of a good radio set

John Gambling

WOR

Newark, N. J.

OF all the men who make us get up in the morning, none do it more tactfully than Uncle John, WOR's athlete and funny man and best beloved of the station's many listeners. Promptly at five o'clock Uncle pulls himself out of bed, rustles some coffee and steps into his little bus to make the trip across the meadows of Jersey and over to WOR's New York studio. It isn't only setting up exercises you get on WOR's wave at 6:45 each day, but a lot of fun and some philosophy and peppy music selected and directed by WOR's physical director.

John B. was born in Cambridge, England and he learned his setting up lingo in no less a school than the "King's Navee". He became chief operator on a transatlantic liner during the war and came into broadcasting through the technical end.

John B. is married and the proud father of a very young Mr. Gambling. He is a splendid example of the health doctrines he preaches but when you tell him of the size of his radio following he gets quite red and uncomfortable and changes the subject. No fan mail following will ever spoil Uncle John. He's regular. And that's what you can't help but feel when he wakes you up in the morning.

*"Take no chances with inferior vacuum tubes," says
F. A. D. Andrea, President of FADA Radio.
He recommends the use of RCA
Radiotrons.*

RCA Radiotrons—standard for every use

Graham McNamee
National Broadcasting
Company
WEAF-WJZ
New York City

AND, we might add, of The World! For wherever radio has gone Mac's voice has gone with it and his watch chain is heavy with the keys of the country's important cities, bestowed on him by admiring mayors. When Mac goes to a town to make a personal appearance the entire population turns out to welcome him and yet there is no more modest celebrity in the country than this NBC star who looks on every broadcast as just another chance to make his best, better!

In 1923 a young church singer, lately arrived in New York, wandered into WEAF to see what made the waves wave. Something in the quality of his voice and the friendliness of his manner interested the studio executives and he became a part time and later a full time announcer. His first big chance was the World Series of 1923. The sports writer who was doing the broadcasting called on Mac to relieve him during the third game and since then McNamee has ranked as the leading sports announcer in the country. The Democratic Convention of 1924 was his next big job in which he worked 16 hours a day for 15 days.

The biggest excitement if not the biggest thrill Graham ever lived through was during a certain broadcast from Chicago. "Boy, I'll never forget those eight seconds" says Mac referring to the time when a young man named Tunney rested on his elbow after getting extremely fresh with another young man called Dempsey. "The excitement within that fraction of a minute with the world's heavyweight championship in the balance, if your judgment wavered, makes most of my other broadcasts seem tame."

*Unless you use RCA Radiotrons you haven't
half heard Graham McNamee.*

A radio set can be no better than its vacuum tubes—
Use RCA Radiotrons

Jennings Pierce
National Broadcasting
Company
KGO
San Francisco, Calif.

"J. P." is a more familiar way of describing this extremely popular young man who is chief announcer for the Pacific network. Mr. Pierce started out in life to be a farmer. Born in Bakersfield, California, it was a perfectly natural ambition and since J. P. does everything well, if he does it at all, he began by attending and graduating from the Farm School at Davis. But the potatoes and the beans got a raw deal when radio and J. P. suddenly became acquainted and the young agriculturist decided he would rather comb the air waves than till the soil. KGO had the astuteness to recognize a coming star and Mr. Pierce became the singing announcer of the station. Now as head of N.B.C.'s staff of announcers, he has no time to sing, which seems a pity.

J. P. served in the Marine Corps during the World War. He is married, lives in San Francisco and, in his uneven moments, is bringing up Jennings Pierce, Jr., to be as good a radio man as his dad.

RADIO ENGINEERS ADVISE:

Replace all the vacuum tubes in your radio set with RCA Radiotrons at least once a year. This is the only sure way to maintain good performance and minimize disagreeable noises and other troubles caused by inferior tubes. RCA Radiotrons will give you the maximum in selectivity, sensitivity and tone quality.

Old tubes may impair the performance of the new

Ted Husing
Columbia Broadcasting
System
WABC
New York City

COLUMBIA'S Big Boy and a close rival of Graham McNamee in the field of sports reporting, Ted is one of the youngest of radio's stars. He gallops through his arduous schedule with the enthusiasm of a youngster and to say "office desk" or "swivel chair" in connection with Mr. Husing would be like coupling an airplane and a tractor. Ted hits the high spots and what's more he brings the high spots home to the nation-wide hook-up of the CBS.

He was born in New Mexico but migrated at a tender age to New York where he went to school and graduated with local honors as a four letter athlete, football, baseball, basket ball and soccer. In 1925 he joined the staff of WJZ in New York and in 1927 became the chief of the Boston studio WBET. From there he went to the Columbia System with headquarters at WABC, New York, and from there jumps all over the country handling the major remote control broadcasts of the chain.

Sports events are Ted's favorite medium but he will handle a classical concert or a national convention or an inauguration with equal facility and enthusiasm. If his fan mail contains a knock or two, instead of getting sore, he welcomes the criticism as a friendly boost toward better work on the air. Ted is the last word in style and his double breasted extra short waistcoats have become famous. He is married to one of the prettiest girls you ever saw and second only to his interest in athletics is his enthusiasm for dancing. No grass grows under the Husing feet or cobwebs about the Husing microphone.

Ted Husing rates the best reception—use RCA Radiotrons

*RCA Radiotrons are your best insurance against
tube troubles*

Don Ball
Columbia Broadcasting
System
WABC
New York City

SAID to be the best ukulele player in the fraternity of announcers, Don Ball does more than announce a dance orchestra, he interprets it. No corner camp chair for Don when the sax whimpers, he stands by the mike and does a little unofficial directing. Mr. Ball was born in Rhode Island in 1904 and was graduated from Brown University in 1927 with the degree of Ph.B. He was the leader of the combined musical clubs in college and also class orator.

Very naturally his talents and inclinations took him into the theatre after his graduation, and he tried his hand at various things, among them, motion picture presentations and club engagements. Then quite suddenly, since Mr. Ball is a sudden young man, he tired of the theatre and went into the hotel business in Columbus. There he became acquainted with "mike" and decided, that to be a metropolitan announcer was the sum of his ambitions. Accordingly he came East and got a job at the CBS. "In the nature of things," he writes, "the present is somewhat unfathomable and the future will have to answer for itself. Hail Columbia!"

*"Insist upon RCA Radiotrons," says E. A. Hanover,
Vice President, Stromberg-Carlson Telephone
Manufacturing Co., makers of the famous
Stromberg-Carlson Radio Set*

Improve your radio set with RCA Radiotrons

Phillips Carlin
National Broadcasting
Company
WEAF-WJZ
New York City

HE used to be a twin, a radio twin that is, and his side kick was Graham McNamee. When the two shared a broadcast from a football stadium, only the most astute listener could tell them apart, so alike are their voices. But now Phil is assistant to the Vice President.

Mr. Carlin is a native New Yorker and was orator of his class in the De Witt Clinton High School. Like McNamee he wandered into WEAF to see what it was all about and never got out. Beginning as an announcer he soon showed his aptitude for executive work and had charge of the studio.

Since WEAF became part of the NBC chain, Mr. Carlin has advanced steadily in the organization which is hard luck for his many friends in the radio audience, as his responsibilities interfere with his broadcasting. Phil is one of the humorists of the air, with a natural wit that keeps the NBC staff chuckling. He has the breadth and girth of a football player and a zest for living that no office job can dim.

"My biggest thrill?" asks Carlin. "I hate to be obvious but 120,000,000 Americans can't be wrong, so I choose Lindbergh, the day he rode up Broadway in a shower of ticker tapes, confetti, phone books and receipted bills. We thought he would land at 11 A.M. and we were just one hour wrong. What price hours! I sat in a window at 195 Broadway broadcasting about females and fire hose, waitresses, circuses, street cleaners, cops, chimneys, clouds and nobody heard me."

If you can't tell Phil and Mac apart use RCA Radiotrons

RCA Radiotrons—the standard equipment in sets of leading manufacturers

Milton J. Cross
National Broadcasting
Company
WEAF-WJZ
New York City

DOWN New York way they rate Milton ace high. In 1929 he won the gold medal of the American Academy of Arts and Letters for speaking the English language more nearly as it should be spoken than any other announcer. The ladies swear by him and no one ever swears at him. His large and benign presence makes friends for him both on and off the air and if there is a drop of conceit in his make-up no one has ever discovered it to date.

Milton was one of the first men to announce a program over the air being associated with Thomas J. Cowan when WJZ was located in Newark, N. J. in 1921. He has always been with WJZ up to and through its consolidation with WEAJ and he has steadfastly refused any executive position in the NBC, preferring his job as an announcer.

Mr. Cross was born in New York in 1897, graduated from De Witt Clinton High School and from the Damrosch Institute of Musical Art. He is a tenor and his singing is an important part of his radio work. Married? Certainly, and the delighted father of a four year old, Lillian Gale Cross.

"I've been on the air so long," says Milton, "That my family tells me that I can't even say 'please pass the butter' without sounding like a radio announcer."

*"Inferior screen-grid tubes are decidedly false economy," says Walter E. Holland,
Chief Engineer of Philco.*

RCA Radiotrons are "the heart of your radio"

Alwyn E. W. Bach
National Broadcasting
Company
WEAF-WJZ
New York City

ALWYN admits that if he had known he was to be an announcer he would have cautioned his parents to select a name that isn't so hard to spell.

Although his voice has a serious ring Alwyn is something of a humorist and regrets that nothing funny happens any more on the air—technical perfection has outlawed the impromptu laughs of the old days.

In 1922 Alwyn broke into radio via WBZ, entering the game in the role of a baritone and afterwards becoming a member of the staff. He puts on some of the major programs of the NBC and his cultured manner and fine voice have a wide popular appeal. "It may be bromidic to say your job is the most thrilling one there is," says Mr. Bach, "but I can't help it. That's the way I feel about radio. I honestly think it's the greatest thing in the world and as long as they will have me, I'm in it to stay."

Good news that, say a few hundred thousand fans, to speak modestly of the "vast radio audience" which tunes in for A. E. W. B. and who take pen in hand to address a deeply appreciative letter to "Mr. Albert E. W. Block."

And we are sure that Mr. Bach's many friends will want to congratulate him for just winning the 1930 medal of the American Academy of Arts and Letters for being the announcer having the finest diction.

"Don't compromise on vacuum tubes—use RCA Radiotrons." says A. S. Wells, president, Wells-Gardner & Company

To maintain high quality performance in your radio set—use RCA Radiotrons

Bradford Browne
Columbia Broadcasting
System
WABC
New York City

BRAD claims he isn't a broadcaster nor is he a comedian but since he is the author, director and participant in the Nit Wits, how does he think he can get away with that line? What Brad really means is that he is marking time in radio, his real vocation being song writing, having written 200 songs, more or less, some of which have been popular hits.

Graduated from Georgetown University in 1913, Mr. Browne entered the Government service and for some years was Assistant Commercial Agent with the Bureau of Foreign and Domestic Commerce, which sounds like hot stuff; anyway it takes a lot of writing to tell you all about it. In 1922 he got tired of officialdom and went places and did things until 1924 when he drifted into radio and was general factotum, announcer, singer and continuity man at a small station in Newark, N. J. From there he went to WABC in New York and is now one of the stars of the Columbia firmament and is heard in the La Palina program, the Nit Wits and a number of others.

Brad is tall, six feet and an extra inch, has dark brown hair and blue eyes and a cordial manner. He's not prepared to give his whole allegiance to radio but the fans will never give him up. A bachelor up to a few months ago—but not now. He says that writing the Nit Wits is the inspiration of the moment, and he never knows until he begins what it's all about.

*It costs no more to have the best—use RCA
Radiotrons*

RCA Radiotrons set the standard for all radio tubes

Jack Keough
National Broadcasting
Company
KGO
San Francisco, Calif.

JACK has had a lot of honor but none greater than to coin a phrase which has swept the country from California to Broadway and points north and south. In a football broadcast Jack remarked "it's just one of those things" and the echo of his phrase reaches him from every musical comedy of the day.

Mr. Keough is a veteran of the radio industry having made history on the coast when he announced the sports events over KPO. Eastern listeners are familiar with his work in the coast-to-coast hook-ups of the California classics.

Jack looks a bit like a football star himself, is unmarried at the time of going to press, and lives with his mother in Berkeley. He is a native Californian and although he is heard daily from the San Francisco studios his favorite announcing is sports events at which he has no equal on the Coast.

Fan mail is plentiful but Jack laughs it off, and modestly declares he doesn't know "why they get that way."

"Don't gamble with your radio enjoyment—use RCA Radiotrons," says McMurdo Silver, President, Silver-Marshall, Inc., Manufacturers of Silver-Marshall, Radio Sets.

There's an RCA Radiotron for every purpose

Lewis Reid
WOR
Newark, N. J.

THE fans have always been "that way" about Lewis who is one of the young-old veterans of the ancient art of broadcasting. He first became prominent when he broadcast the programs of WJZ, but since 1928 he has been chief announcer over the far reaching New Jersey station WOR.

Lewis was born in Brooklyn and at the age of twelve felt himself to be a playwright. As soon as his years would permit, he took a course in journalism at New York University and later a course in dramatic technique. Thus fortified he sought actual experience and became a member of a Morris Gest production. When Elsie Janis and her "Gang" toured the country in 1921 and 1922, Lewis was a member of the company. In 1926 Mr. Reid decided that radio was an angle of the show business that he ought to know about and he became announcer at WJZ then located in West 42nd Street, New York. He also began writing radio continuities and receiving much fan mail. It all looked pretty good to Lewis, so he turned the key on his make-up box and became air minded.

His work on WOR combines both writing and announcing. He has several distinctive radio programs to his credit, among them "Tuneful Tales," a weekly WOR feature. He is favorably known as the announcer of the Sunday concerts of the New York Philharmonic-Symphony Society broadcast over his station.

"RCA Radiotrons banish the troubles caused by poor tubes," says Alfred H. Grebe, President, A. H. Grebe & Co., Inc.

Curt Peterson
National Broadcasting
Company
WEAF-WJZ
New York City

CURT PETERSON never had any idea of being a radio announcer. He happened to be walking by the old WJZ studio on 42nd Street and went in. The next thing he knew he was sealed, signed and delivered as a guardian of mike. The fact that he happened to be a singer and was at the time a teacher of voice in a fashionable boarding school, didn't deter him from a new allegiance, and nothing has been able to drag him away from mike. When WEAF and WJZ became one, Mr. Peterson found himself director of announcers and now he is assistant to the Manager of the Program department of the Eastern Division, and as every fan knows, he still announces some of the major programs of the chain.

Curt was born in Albert Lea, Minn., and was graduated from the University of Oregon. During the World War he served as a lieutenant of infantry. His baritone voice has made many friends for him on the air and they say that no announcer gets a larger fan mail. But Curt won't confirm it. He has a Coolidge propensity for silence unless he's "telling the world" over mike. He is married and has two children who frequently broadcast over the children's hour.

Mr. Peterson is six feet tall, weighs 160 pounds and is very fair. His hobby is golf but he doesn't talk about his score. That's not because it isn't good but because he doesn't consider himself as an interesting topic of conversation. His friends of the studio and of the air know better.

*A high quality announcer deserves high quality reception,
use RCA Radiotrons*

RCA Radiotrons—the preference of radio experts

Marley Sherris
National Broadcasting
Company
WEAF-WJZ
New York City

MARLEY SHERRIS came to the microphone via the concert stage and still continues his career as a leading church and oratoric baritone. He began his radio work over WJZ and has never been connected with any other station.

Mr. Sherris was born in Toronto, Canada and has studied voice both in this country and abroad. In spite of the temperament that goes with his artistic success, he is said to be one of the NBC's most dependable and resourceful announcers.

The high point of his radio career, says Marley, was the night when Rear Admiral Byrd was supposed to be lost in the air on his trans-atlantic flight. Both WEAF and WJZ were on the air all night putting out the bulletins as fast as they came from the United Press. Some entertainment had to go on between the dispatches so Sherris sang all the songs he knew and Keith McLeod played all the tunes he could remember and they located Astrid Fjelde at a party and begged her to come to 711 and sing and Darl Bethman was dragged out of bed to sing some more. At five o'clock in the morning an exhausted quartette received official word that Byrd and his crew were safe off the coast of France.

Mr. Sherris is married and lives in New York City.

*"Avoid imitation tubes, use RCA Radiotrons," says
S. W. Gilfillan, President, Gilfillan Bros., Inc.*

*When experts agree on RCA Radiotrons—why
take chances?*

Edward Thorgersen
National Broadcasting
Company
WEAF-WJZ
New York City

IT'S a good thing that Edward is such a tall person because he has to carry with him a dual personality. There are really two Thorgersens, the electrical engineer and the pianist and singer, but at the present time both of them have been pushed into the background by a third, the NBC announcer who neither sings, plays nor electrifies. That last doesn't sound right, because he does just that to a lot of the feminine hearts to whom Edward has the most appealing voice on the air.

Mr. Thorgersen was born in New Jersey, not so long ago, and was early interested in the piano. But instead of going to a musical conservatory he went to the Lewis Institute of Technology, then Boston University, and finally Cornell. Desiring to profit by all this hard earned knowledge, upon his graduation he joined the Western Electric Company but whenever he was free he wandered off to a broadcasting studio and played for mike.

The next thing we knew he was hooked up with a dance orchestra, playing and singing baritone solos. It was but a step to the NBC announcing staff where he can hardly be persuaded to either sing or play, such is the perversity of this brown haired youth whose serious mouth is betrayed by the ever present twinkle in his eyes. The coast to coast programs which he announces make him a nationally known radio figure, and the fans hope he has at last settled down. Once in while you might catch him in a quartet and still less frequently he'll tinkle the ivories of the NBC.

"We always recommend RCA Radiotrons," says Dr. Fulton Cutting, Chairman of the Board, Colonial Radio Corp.

*Progress in the radio art is measured by the
development of RCA Radiotrons*

Wm. C. Munday, Jr.
National Broadcasting
Company
WSB
Atlanta, Georgia

PEOPLE don't just plain like Bill Munday, they are crazy about him. The men love him for his sportsmanship, his keen knowledge of whatever game he describes, but the girls fall for his drawl, his chuckle and that irresistible charm possessed by the true Southerner. Bill was born in Atlanta on Labor Day, 1903 and to quote his own words, has "been laboring ever since." He was graduated from the University of Georgia and was the youngest man ever admitted to the bar in that State. But Bill's heart was elsewhere. At fifteen he became sports writer for the *Atlanta Journal* and he continued in that capacity, law or no law. He made his radio debut over WSB several years ago, but his first broadcast over a hook-up was when Phil Carlin was announcing the Yale-Georgia game and asked Munday to give a resumé of the game between halves. Since then he has been formally attached to the sports division of the NBC staff.

Bill likes to broadcast football best but says it's the hardest of them all because on an average the ball is in motion only nine out of the 60 minutes of play. He played baseball himself on the Georgia U team and was a southpaw pitcher which he describes as "the lowest form of animal life." He likes his fan mail, reads every letter and doesn't mind being kidded because he believes people like the persons they poke fun at. Bill's Southern drawl is the real thing, and his sense of humor is spontaneous and perpetual. When he and Phillips Carlin get talking in the corridors of the NBC, all work stops.

To hear Bill's "Jawja drawl" as it really is, use
RCA Radiotrons

Bill Hay
WMAQ
Chicago, Ill.

SOME folk in the East and others in the West think of Bill as the announcer of Amos and Andy, but people out Chicago way know that Bill is that and a lot more beside. He's the Wizard of WMAQ and his regular signing off phrase "Guid nicht tae ye a'" ends the day right for thousands of fans.

Mr. Hay was born in Dumfries, Scotland and his first ambition was to be a surgeon. Then he worked for Thomas Cook and Sons and decided to be a traveller. But he finally landed in America and we find him in Nebraska, part owner of a furniture and music store, where he sang at concerts and in choirs, taught music and waited, although unconsciously, for his big opportunity on radio. KFKX was the astute studio which sought out Bill and put him on the air. After making a big hit at the Hastings station, he went over to WGN and it was there that he met up with young Gosden and Correll and announced their first Sam 'n' Henry broadcast. With them he went over to WMAQ and is chief announcer, sales director and a few other things. Bill originated that much loved program "Your Hour," put over the Mussolini broadcast for which he received the Order of the Crown of Italy, and has never missed an Amos and Andy broadcast except for a brief period when he was in the hospital for an appendicitis operation.

Mr. Hay is married, has been so for fifteen years; is a swimmer, a baseball fan, a famous golfer and the best teller of Scotch yarns in all Chicago.

*Do you catch Bill Hay's Scotch accent? No? Try
RCA Radiotrons and you will*

RCA Radiotrons are the heart of your radio set

Alois Havrilla
National Broadcasting
Company
WEAF-WJZ
New York City

DISTINGUISHED as the most musically named as well as the most musically voiced announcer on the air, Alois takes these honors lightly. Reared in the Carpathian mountains in a little place called Pressoc, the war has made him a Czecho-Slovakian although he was born an Austrian. His family were all musical, and as a boy he learned to hum the folk songs of his land before he learned to talk. At the age of six Alois was brought to this country and it was all arranged that he should be a musician. He was well started on his career when along came the World War and he found himself peeling potatoes at Fort Wright instead of singing in a church choir in New York.

He is naturally an ambitious and modest young man and, having determined to be a great singer, he could not long be diverted from his favorite field, the concert platform. It was when he was singing as soloist with the New York Philharmonic Orchestra that Graham McNamee heard him and persuaded him to try announcing. After several highly successful years at the NBC, Havrilla went over to the Judson Radio Program Corporation. Recently, however he came back to the NBC staff.

Famous for his beautiful diction, it is amazing to think that at the age of six years, Havrilla didn't know a word of English and at twelve, spoke it brokenly. He is tall, dark, blue eyed, laughs a lot, loves golf and swimming and dresses notably but not noticeably, if you get what we mean. When he gets mad he swears in Hungarian. What an advantage!

*To get all the lovely nuances of his voice, use
RCA Radiotrons*

RCA Radiotrons—The hallmark of a good radio set

A. W. (Sen) Kaney
National Broadcasting
Company
Chicago

MR. KANEY is one of the pioneer announcers of radio. He has been famous as a sports broadcaster and authority since the early days of radio in the middle west.

He has been at the microphone for some of the hottest seasons of baseball, including those of the world's series. "Sen" has portrayed motor race classics over the air to his many followers and admirers and just loves to announce events such as the Kentucky Derby. In short, about every kind of sport event there is will find Mr. Kaney just as enthusiastic if he can be present to announce it.

Mr. Kaney was born in Cincinnati. After receiving his lower school education in Chicago, he attended Northwestern University where he studied law.

All through his school and college days he took part in sports, especially basketball, and was greatly interested in the production of plays.

His hobbies are fishing, swimming, and bridge.

Married? Yes! And has one daughter three years old. His marriage was a real radio romance. The fortunate lady, now Mrs. Kaney, heard his voice over the air. It was love at first hearing. Later, through a mutual friend they met. Then followed rapid romance.

Before "Sen" broke into the radio game eight years ago, he was a broker. But this did not fit his temperament. Then he joined KYW and later was with WGN. Now we find him assistant program manager and chief announcer for the NBC in Chicago.

*"RCA Radiotrons bring out the full tone beauty,"
says E. F. McDonald, Jr., President, Zenith
Radio Corporation*

To get the best from your set use RCA Radiotrons

David Ross
Columbia Broadcasting
System
WABC
New York City

TO seek beauty where it is not, has ever been the credo of this mellow voiced announcer of the Columbia System and finding it first in the sordid slums of his native city of New York, he has pursued it to the gilded fields of commercial broadcasting. It is said of him that he can make the dullest trade talk glow with romance by the music of his tones. After trying a number of things, including the stage, he found his metier in the studios and has won nation-wide attention for his work in *Arabesque*, *Coral Islanders*, *Russian Village*, *True Story* and many other CBS features.

There is no one in radio who more deeply reveres the resounding phrase or the well turned metaphor. Troubled with a strange self-consciousness, at variance with his talents, Mr. Ross shuns personal appearances and recoils at the publicity of remote control assignments. He finds his happiest means of expression in the comparative security of the studios. There he sings the vowels and the consonants and carols the praises of the tooth paste and the truffle, as though he paid homage to his muse. Short and slim and yet impressive, he paces the corridors of WABC, an erudite volume under his arm, his eyes remote, his tossing locks the witness to his artistic clan. "Our David" strikes a new note among the sleek moderns who are the slaves of mike. "I should like" he ruminates, "to trundle a barrow back and forth under the summer sun and make me a garden of roses, but failing that, this does very well. I have no plans, I never make them. Life flows and the wise man drifts with the stream."

"RCA Radiotrons always in every socket," says Colin B. Kennedy, President Colin B. Kennedy Corporation

RCA Radiotrons—The choice of millions

Frank Knight
Columbia Broadcasting
System
WABC
New York City

NOT a knight of old, although he seems no less to the languishing maidens who fall spellbound at that "certain something" in Frank's voice. But decidedly a knight of Now, the ultra modern, up and coming matinee idol of the newest of gadgets, the errand of the microphone. Born 36 years ago in St. Johns, Newfoundland, the son of a noted barrister, his early career as a banker was interrupted by the World War and in September 1914 he sailed overseas with the Royal Newfoundland Regiment. Invalided out after the battle of the Somme, he returned to Canada and entered McGill University, determined to be a doctor. But fate again intervened and we next find him in Francine Larrimore's company, trying his deft hand at acting. From the stage to the studio is but a half step and our Knight reappears at WJZ playing the hero in the romantic scripts of the late Colonel C. T. Davis.

A little over a year ago he went to Columbia and now is heard in many of their prominent features playing an important role in "Arabesque," and the recipient of more fan mail than most film actresses can boast of.

Mr. Knight is tall and decidedly English both in voice and manner. He is suave and a bit remote, wears spats and carries a cane. He is friendly with his friends, gracious with his admirers and a shade haughty with the crowds who mill back and forth in the WABC reception rooms, hoping for a glimpse of their favorites of the air. "I shall stick to radio" he says, "as long as it will have me and it will be a sad day for me when the radio public decides that my services can be dispensed with."

"The best insurance against tube troubles—RCA Radiotrons," says John S. Gorman, Vice President and General Manager, Gulbransen Company

Look Inside the Radio Before You Buy!

WHEN you buy one of the fine new radio sets now being offered, be sure that you look at the tubes before you purchase it. Make certain that the set you buy is equipped with RCA Radiotrons, because RCA Radiotrons are the tubes that are being used as standard by leading set manufacturers in designing their sets. They are the tubes which manufacturers suggest and recommend that you use in order that you may get out of your set everything they have built into it. Don't gamble with your radio enjoyment. Be sure to make certain that your new set is delivered equipped with RCA Radiotrons—the standard radio tubes of the industry.

BSD-11-30-500M

We Are in Business to Serve You!

THE high quality merchandise we offer, plus the prompt and efficient service we render, means the utmost satisfaction to our many valued customers. This, we feel, is a real worthwhile principle upon which to base the success of our business.

At our store you will find a wide selection of the standard and popular brands of radio sets, parts, and accessories. Call at your convenience and inspect this large display of merchandise.

In our service department we employ capable and expert men who are ready to remedy your radio ills. Why not instruct us to send one of these men to your home for the regular inspection of your set? Heed the advice of authorities by having the weak or worn out tubes you are now using replaced with a set of new RCA Radiotrons. RCA Radiotrons carry our endorsement as well as that of the nation's leading set manufacturers.

May we look forward to the pleasure of serving you?
