

INDEX—VOLUME XIII

OCTOBER 3RD, 1923, TO MARCH 26TH, 1924

	<i>Page</i>		<i>Page</i>
Accumulators, Sulphating in Small	135	Another Variable Grid Leak	49
Accurate Frequency Calibration, A Method for	639	— Wireless Milestone	368
A C D, Italian Transmitter	793	Answers, Questions and	29, 63, 94, 122, 156, 197, 233, 267, 300, 333, 365, 395, 425, 455, 485, 517, 549, 577, 605, 635, 665, 695, 725, 753, 778, 808
A.C. Mains for Filament Heating and Plate Current	641	Apparatus of Amateur Interest	107
Adapting the R.A.F. Receiver, Type 10	349	Arc Transmitter, Methods of Keying an (Novel Ideas)	437
Aerial, A Novel	363	Armstrong "Super," A Portable	7
— Carnarvon's New	553	— Super, The Operation of the	239, 360
— Insulators	117	Around the Wireless World	154, 215, 253, 287, 325, 355, 389, 419, 449, 477, 512, 542, 569, 595, 627, 661, 686, 719, 746, 775, 803
Aerials and Earths: A Popular Talk Broadcast recently from 2 LO	504	Artificial: Galena—Natural and	435
Affiliated Societies, Association of	93	Association of Affiliated Societies	93
Air Spaced Coil, An	650	Atmospheric Interference, Reducing	318
All-British Wireless Exhibition: Description of Exhibits	188, 219, 263, 297	Atmospherics, Another Scheme for Reducing Interference due to	16
— Wireless Exhibition, The	148, 162, 215	Audio Amplifiers, Transformers and (Inventions and Novel Ideas)	749
Amateur Achievements, A Report of the More Recent (Long Distance Transmissions)	655	Australian Broadcasting Regulations	288
— International Working	756	Automatic Reception of Wireless Signals, The	114
— Legal Points for the Wireless	98	— Transmitter, A Simple (Novel Ideas)	438
— Organisation, An International	668	Avoiding Errors in Direction Finding	8
— Radio Call Signs, International	767	Battery Charging, The Thermionic Rectifier for	376
— Reception, Transatlantic	118	B.B.C. Oscillating? Is the	638
— The Importance of the	620	Belfast Station, A	742
— The Transmitting	750	Bell, An Historic	541
— Two-Way Communication with U.S.A., First Successful	412	"Blind Spots" and "Fading of Signals"	174
Amateur's Frankenstein, The	130	Blowpipe Soldering	102
— Parliament, The	658	Books and Catalogues Received	26, 91, 121, 186, 286, 479, 597, 777
— Part in Wireless Development, The (Presidential Address)	50	— New	230
American Amateur Station 1 MO, The	503	British Broadcasting Company, Anniversary of the	254
— Broadcasting, Experimental Work on the Relaying of (KDKA)	609	Broadcast from European Stations, Regular Programmes	27, 62
— Broadcasting Stations, The Higher Powered	105	Broadcasting	187, 217, 255, 289, 326, 356, 391, 422, 478, 514, 545, 634, 662, 687, 748, 810
— Broadcasting, The Retransmission of	463	— Promise, The	34
— Calls Heard	604	— Report, The	55
— Wireless Award, An	293	— Station, The 1,600	713
Amplifier, Building the Three-Valve Resistance Coupled	74	— Success, The Transatlantic	304
— for Telephony Reception, Detector and	313	— Topics	26
Amplifiers, Distortion in Low Frequency	3, 40	—, 200-metre Transmission during	304
— for Short Wave Reception	776	Broadcast Tests, The Transatlantic	256, 270, 361, 420
— Resistance Coupled Low-Frequency	99	— Tests, Transatlantic	200, 583
An Aid to the Deaf: The Otophone	147		
Anniversary of the British Broadcasting Company Annual Exhibition of the Physical Society of London, The	490		
— for Amateurs and Experimenters, The Wireless	418		
— General Meeting of the Radio Society of Great Britain	507, 539		
— Transatlantic Amateur Tests, The	390		
Another Application of the Neon Lamp	674		

	<i>Page</i>		<i>Page</i>
Brussels and Rome—Two New Broadcasting Stations	352	Direction Finding, Avoiding Errors in	8
Building the Three-Valve Resistance Coupled Amplifier	74	— Finding, Errors in Radio (Novel Ideas)	380
Cabinet Receiver, Design for a	131, 205	— Finding Sets, Experimental	698
Calculating the Inductance of Coils, Some Notes on	572	Discussion on Loud Speakers for Wireless and other Purposes	472
Calculation of Capacity	598	Distortion in Low-Frequency Amplifiers	3, 40
Calculator, An Inductance	464	— in Radio Telephony	225, 257, 291, 328, 356
Calibrating Small Condensers	494	Distortionless Telephony Reception: Resistance Coupled Low-Frequency Amplifier	25
Calibration Signals from 6XX	612	Divers, A Microphone for	475
Calls Heard	27, 62, 91, 121, 155, 187, 217, 288, 326, 391, 422, 479, 514, 546, 597, 634, 662, 721, 748, 780, 810	Double Grid Valves for Radio Telephone Transmitters	88
Call Signs, International Amateur Radio	767	Dual Amplification Circuit, A Stable	525
Carnarvon's New Aerial	553	— Circuit, A New	181
Cathode Ray Oscillograph, A Practical Demonstration of some Applications of the	705, 805	— Neutrodyne Receiver, A Four-Valve	555, 587
— Ray Oscillograph, Investigations with the	309	Duolateral Winding, The (Instructional Article)	20
Choke or Transformer Low-Frequency Couplings? Resistance	580, 624	Duplex Radio Telephony (Inventions and Novel Ideas)	651
Chopper for Tonic Train Transmission, A	88	Earths, Aerials and (A Popular Talk Broadcast from 2 LO)	504
Clock for Wireless Purposes, A New	466	Economical Valve Circuits	338
Coal Mines, Wireless in	154	Electrical Engineering, Scholarships in	799
Coil Calibration, A Simple Method of	38	— Engineers, Institution of (Discussion on Loud Speakers)	715
— Holders, Useful New	84	Electrolytic Detectors and Liquid Valves	533
— Tuner, A Gimbale	243	Electrostatic Transmitter, The	785
Combined Frame Aerial and Radio Set	411	Errors in Radio Direction-Finding (Novel Ideas)	380
Compact Four-Valve Receiver	143	European Stations, Regular Programmes Broadcast from	27, 62
— Two-Valve Receiver, A	9, 381	— Wireless Telegraphy and Telephony Stations, Meteorological and other	417
Competition, Prize (Radio Society of Great Britain)	92	Exhausting Vacuum Tubes	278
Components, Some Useful	682	Exhibition, The All-British Wireless	148, 162, 215
Condensers for High-Power Radio Circuits (Novel Ideas)	380	— The Paris Wireless and Physical	461
Condenser Tip, A Useful	650	Exhibits, Description of (The All-British Wireless Exhibition)	188, 219, 263, 297
Conference of Radio Societies, The	739	Experimental Direction-Finding Sets	698
Constructing Vernier Condensers	527	— Interest, New Devices of	452
Construction of Variable Condensers, The	305, 346, 382	— Receiver, Portable	113
Control Service for Radio Telephony, An Interesting	168	— Valve Panel, Multi-Circuit	735
Correspondence	28, 62, 89, 118, 153, 184, 254, 320, 327, 364, 387, 421, 480, 511, 540, 604, 659, 692, 722, 774, 804	— Work on the Relaying of American Broadcasting (KDKA)	609
Coupled Inductances, Holder for (New Devices)	452	"Fading of Signals," "Blind Spots" and	174
Couplers, Loose	140, 177, 212, 245	Fibre, Vulcanised	276
Crystal Detector Design, Ingenious	734	Filament Current from the Mains	740
Crystal Set, The	149	— Switching at a Distance, A Useful Device for (Relay for Remote Control)	653
Crystal Set with Note Magnifier, The Design of a	790	First Successful Amateur Two-Way Communication with U.S.A.	412
Cylindrical Variometers (Instructional Article)	110	5HW: The Experimental Transmitting Station of the National Physical Laboratory	467
"Dancing-Contact," Relay, The	438	Five-Valve Cabinet Receiver, A	238
D.C. Mains, A Useful Plate Current Regulator for (The Neon Lamp)	674	Flat Coils, Mounting (Novel Ideas)	411
Debates, Parliamentary: Should they be Broadcast?	283	— Spiral Coil, The (Instructional Article)	49
Denmark's Broadcasting Station: Description of the Equipment at Lyngby	428	Four-Valve Dual Neutrodyne Receiver, A	555, 587
Description of Exhibits: All-British Wireless Exhibition	188, 219, 263, 297	— Receiver, Compact	143
Design for a Cabinet Receiver	131, 205	Frame Aerial and Radio Set Combined (Novel Ideas)	411
— of a Receiver, "Results," Some Considerations on the	680	— Aerial Connections, An Improvement in	669
Detector and Amplifier for Telephony Reception	313	— Aerial, New	39
Detectors and Liquid Valves, Electrolytic	533	Framework to replace the Usual Wooden Box (an Instrument Frame)	689
Developments in Many Directions, Notable	488	Frankenstein, The Amateur's	130
D.F. Apparatus, Reducing the Errors of	16	French Circuit with some Interesting Features, A	431
— Receiver and Recorder, A (Novel Ideas)	319	Frequency Calibration, A Method for Accurate	639
Diaphragms for Telephones (Novel Ideas)	318	Fundamentals of Loud Speaker Construction, The	340, 385
		Fusible Alloys, Wood's Metal and other	591

	<i>Page</i>		<i>Page</i>
Galena —Natural and Artificial	435	International Amateur Radio Call Signs	76 7
"Geophone" Constructor's Set, The	285	— Radio Language, The Need for an	640
Generating Very Short Waves (Novel Ideas and Inventions)	87	— Working, Amateur	756
Generator for Transmitters, Hand	180	Intervalve and Telephone Transformers	279
Gimbal Coil Tuner, A	243	— Transformer, A New	473
Grid Leak, Another Variable	49	Inventions and Novel Ideas	651, 690, 749
— Leaks	17	Investigations with the Cathode Ray Oscillograph	309
Hand Generator for Transmitters, A	180	Is the B.B.C. Oscillating?	638
Hand-Screwing Tackle, Use of: Practical Points on Cutting Simple Screw Threads	171	Italian Transmitter A C D, The	793
Heterodyne Oscillator for 180-200 Metres (Short Wave Wavemeter)	584	Jacks and Switches: How to Use Them (Switching)	771
— Receiver, The Supersonic	201, 236, 280	KDKA : Experimental Work on the Relaying of American Broadcasting	609
H.F. Circuits, Minor Refinements in	249	Keying an Arc Transmitter, Methods of (Novel Ideas)	437
Higher Powered American Broadcasting Stations, The	105	Language , The Need for an International Radio Leaflet Harmonics, The (Correspondence)	640
High-Frequency Telephony, Multiple (Novel Ideas)	379	— Imperial Wireless Service, The	443, 482
— Transformers, Testing: Simple Tests for Efficiency and Optimum Wavelength	12	Legal Points for the Wireless Amateur	98
High-Power Radio Circuits, Condensers for (Novel Ideas)	380	L.F. Circuits, A Useful Device for	204
— Wireless Station Without Masts, A	502	— Transformer Windings, The Testing of (A Simple Method of Detecting Short-circuited Turns)	728
High-Speed Radio Signalling (Novel Ideas)	438	Limiting the Wave Band of a Radio-telephone Transmitter (Novel Ideas)	379
Historic Bell	541	Liquid Valves, Electrolytic Detectors and	533
Hogg, Mr. F. L., Transatlantic Amateur Station of Holder for Coupled Inductances (New Devices)	442	Long-Distance Transmissions	568
Holweck Valve, The: A New Departure in High-Power Transmitting Triodes	458	— Transmissions: A Report of the More Recent Amateur Achievements	655
Home-Made Inductance Coils of Low Distributed Capacity	67	Loose Couplers	140, 177, 212, 245
Homodyne	645	Loud-Speaker Construction, The Fundamentals of	340, 385
— (Correspondence)	774	Loud Speakers	521, 560
Honeycomb Coil, An Improved	15	— Speakers, Further Discussion on	715
— Coil, The (Instructional Article)	18	— Speakers for Wireless and other Purposes, Discussion on	472
House Wiring for Loud Speakers	703	— Speakers for Wireless Purposes	497
Ideas and Inventions, Novel	16, 87, 278, 318, 379, 411, 437	— Speakers, House Wiring for	703
Imperial Wireless Service, The Leaflet	443, 482	— Speaking Telephones (Inventions and Novel Ideas)	651
Importance of the Amateur, The	620	Low-Capacity Inductance Coils	613
Improved Honeycomb Coil, An	15	Low-Frequency Amplification, The Measurement of	699, 731
Improvement in Frame Aerial Connections, An	669	— Amplifiers, Resistance-Coupled	99
Inductance Calculator, An	464	— Couplings, Resistance, Choke or Transformer	580, 624
— Coils (Instructional Article)	18, 45	Lynby, Denmark's Broadcasting Station: Description of the Equipment at	428
— Coils, Low Capacity	613	Mains , Filament Current from the	740
— Coils of Low Distributed Capacity, Home-Made	67	Master Oscillator System, The (Short Wavelength Transmission)	404, 432
— Coils, The Selection of Tapping Points in	649	Maxim, The Visit of Mr. Hiram P.	784
— Mounting, Plugs and Sockets for (New Devices)	452	Measurement of Low-Frequency Amplification, The	699, 731
— of Coils, Some Notes on Calculating the	572	Meteorological and other European Wireless Telegraphy and Telephony Stations	417
— of Multilayer Coils (Instructional Article)	45	Microphone for Divers, A	475
Ingenious Crystal Detector Design	734	Mihaly: Television—An Account of the Work of Mr. D.	760, 794
Institution of Electrical Engineers: Discussion on Loud Speakers	715	Milestone, Another Wireless	368
Instructional Article for the Listener-in and Experimenter	18, 45, 81, 109	Minor Refinements in H.F. Circuits	249
Instrument Board, A Useful	743	Motor Cars, Wireless Sets for	144
— Frame: A Framework to replace the usual Wooden Box	689	Mounting Flat Coils (Novel Ideas)	411
Insulation Aerial	117	Multi-Circuit Experimental Valve Panel	735
Interesting Control Device for Radiotelephony, An	168		
Interference Due to Atmospherics, Another Scheme for Reducing	16		
— During Broadcasting (Correspondence)	722		
— Reducing Atmospheric	318		
International Amateur Organisation, An	668		

	<i>Page</i>		<i>Page</i>
Multilayer Coils, Inductance of (Instructional Article)	45	Plug Connector, A New	471
Multiple Directive Receiver, A (Novel Ideas)	318	Plug-in Coils, Mounting (Instructional Article)	49
— High-Frequency Telephony (Wired Wireless) (Novel Ideas)	379	Plugs and Sockets for Inductance Mounting (New Devices)	452
Multivalve Circuits, Switch Design for use in	336	— and Sockets for Tuning Coils (Novel Ideas)	88
Mutual Radio	44	Policy, Our	2
Myers Valve, The	590	Portable Armstrong "Super," A	7
		— Experimental Receiver	113
National Physical Laboratory, 5HW, The		Power Lines, Wired Wireless Transmission on	438
Experimental Transmitting Station of the	467	Practical Demonstration of Some Applications of the Cathode Ray Oscillograph	705, 805
Natural and Artificial Galena	435	Presidential Address to the Radio Society of Great Britain, Autumn Session	50
Need for an International Radio Language, The	640	Primary Battery, A New Type of	183
Neon Lamp, Another Application of the	674	Principles Underlying the Operation of the Thermionic Valve, The	491, 528, 565
— Lamps as Amplifiers (Novel Ideas)	437	Prize Awards, Transatlantic Broadcast Tests	583
Neutralising Valve Capacity in Radio-Frequency Amplifiers, A Simplified Method of	79	— Competition, Radio Society of Great Britain	92
Neutrodyne Receiver, A Four-Valve Dual	555, 587	Problem of Oscillation, The	520
New Clock for Wireless Purposes	466		
— Constitution of the Radio Society of Great Britain, The	218	Questions and Answers	29, 63, 94, 122, 156, 197, 233, 267, 300, 333, 365, 395, 425, 455, 485, 517, 549, 577, 605, 635, 665, 695, 725, 753, 778, 808
— Devices of Experimental Interest	452		
— Dual Circuit, A	181	Radio Direction-Finding, Errors in	380
— Frame Aerial	39	— Frequency Amplifiers, A Simplified Method of Neutralising Valve Capacity in	79
— Ideas in Receiver Design: Constructional Details of Three-Valve Set	399, 439	— Frequency Amplifiers (Novel Ideas and Inventions)	319
— Intervale Transformer, A	473	— Signalling, High Speed (Novel Ideas)	438
— Plug Connector, A	471	— Societies, The Conference of	739
— Range of Tuning Coils, A	6	— Society of Great Britain	61, 121, 186, 218, 290, 327, 359, 571, 722, 777
— Super Circuit, A	167	— Society of Great Britain and Radio Transmitters' Society, The	747
— Type of Primary Battery, A	183	— Society of Great Britain, Prize Competition	92
— Types of Valves	211	— Society of Great Britain: Report of the Annual General Meeting	507, 539
— Variable Condensers	78	— Society of Great Britain, The: The Transatlantic Amateur Tests	475
Notable Developments in Many Directions	488	— Society of Great Britain: Transmitter and Relay Section	92, 218, 256, 290, 422, 450, 654, 588, 777
Note-Magnifier, A Single Valve	163	— Telephone Transmitters, Double Grid Valves for	88
— The Design of a Crystal Set with	790	— Telephony, An Interesting Control Device for	168
Notes and News	24, 60, 90, 119	— Telephony, Distortion in	225, 257, 291, 328, 356
Novel Aerial, A	363	— <i>Times</i> , The	26
— Ideas and Inventions	16, 87, 278, 318, 379, 411, 437, 651, 690, 749	— Transmission, Short-Wave	552
— Method of Rectification, A	106	— Transmitters' Society	575
— Variable Condenser, A	278	Radiophare Transmitters (Novel Ideas)	379
		R.A.F. Receiver, Type 10, Adapting the	349
Operation of the Armstrong Super, The	239, 360	Reading Wavelengths by Touch	104
— of the Thermionic Valve, The Principles Underlying the	491, 528, 565	Receiver Design, A Useful Feature in	501
Optimum Wavelength, Simple Tests for Efficiency and (Testing High-Frequency Transformers)	12	— Design, Some New Ideas in (Building a Three-Valve Set)	399, 439
Oscillation, The Problem of	520	Rectification, A Novel Method of	106
Oscillator System, The Master	404, 432	Reducing Atmospheric Interference (Novel Ideas and Inventions)	318
— Valve without a Grid, An (Novel Ideas)	319	Reducing the Errors of D.F. Apparatus	16
Oscillograph, A Practical Demonstration of the Cathode Ray	705, 805	Refinements in H.F. Circuits, Minor	249
— Investigation with the Cathode Ray	309	Regular Programmes Broadcast from European Stations	27, 62
Otophone, The: An Aid to the Deaf	147	Relay for Remote Control: A Useful Device for Filament Switching at a Distance	653
Our Policy	2		
Our Transatlantic Broadcasting Tests	321, 361, 393, 420, 448		
Pancake Coils (Instructional Article)	46		
Paris Wireless and Physical Exhibition, The	461		
Parliamentary Debates: Should They be Broadcast?	283		
Parliament, The Amateurs'	658		
Patent Abstracts	476, 506, 530, 563, 586, 631		
Physical Society of London, The Annual Exhibition of the	490		
Plate Current Regulator for D.C. Mains (Another Application of the Neon Lamp)	674		

	<i>Page</i>		<i>Page</i>
Relay of American Broadcasting, Experimental Work on the (KDKA)	609	Supersonic Heterodyne Receiver, The	201, 236, 280
Reliable Sliding Contact, A	452	Switch Design for Use in Multivalve Circuits	336
Remote Control, Relay for	653	Switching: Jacks and Switches—How to Use Them	771, 800
Resistance Choke or Transformer Low-Frequency Couplings?	580, 624	Tapping Points in Inductance Coils, The Selection of	649
— Coupled Amplifier, Building the Three-Valve	74	Telephony Reception, Detector and Amplifier for	313
— Coupled Low-Frequency Amplifier: Distortionless Telephony Reception	35	— Reception, Distortionless	35
— Coupled Low-Frequency Amplifiers	99	Television: An Account of the Work of D. Mihaly	760, 794
“Results”: Some Considerations on the Design of a Receiver	680	Terminal, A Useful	589
Retransmission of American Broadcasting, The	463	Testing High-Frequency Transformers: Simple Tests for Efficiency and Optimum Wavelength	12
Safeguarding Valve Transmitters (Novel Ideas) Samples Received	379	— of L.F. Transformer Windings, The (A Simple Method of Detecting Short-Circuited Turns)	728
Scholarships in Electrical Engineering	799	Thermionic Rectifier for Battery Charging, The	376, 408
Screw Threads, Practical Points on Cutting Simple (Use of Hand Screwing Tackle)	171	— Valve, The Principles Underlying the Operation of the	491, 528, 565
Selection of Tapping Points in Inductance Coils, The	649	Thorpe Valve, The	745
Sheffield Relay Station, The	282	Three-Electrode Valve, The	592, 617, 676, 710, 765, 797
Short Circuited Turns, A Simple Method of Detecting (the Testing of L.F. Transformer Windings)	728	Three-Valve Receiver, A	271, 315
— Wavelength Receiver with Two Stages of H.F. Amplification, A	250, 369	— Resistance Coupled Amplifier, Building the	74
— Wavelength Transmission: The Master Oscillator System	404, 432	— Set, Building a (Some New Ideas in Receiver Design)	399, 439
— Wave Radio Transmission	552	Time Indicator, A Simple	138
— Wave Reception, Amplifiers for	776	— Signals, Wireless: Alterations recently introduced	547
— Waves, Generating Very (Novel Ideas)	87	Timing	102
— Wave Wavemeter: A Heterodyne Oscillator for 180 to 200 Metres	584	Tonic Train Transmission, A Chopper for	88
Signalling, High Speed Radio (Novel Ideas)	438	Touch, Reading Wavelengths by	104
Simple Method of Coil Calibration, A	38	Transatlantic Amateur Reception	118
— Time Indicator, A	138	— Amateur Station of Mr. F. L. Hogg	442
— Type of Variometer, A	80	— Amateur Tests, The Annual	390
Simplified Method of Neutralising Valve Capacity in Radio Frequency Amplifiers, A	79	— Amateur Tests, The (Radio Society of Great Britain)	475
Simultaneous Transmission and Reception	17	— Broadcasting Success, The	304
Single-Valve Note Magnifier, A	163	— Broadcasting Tests, Our	321, 361, 393, 420, 448
6XX, Calibration Signals from	612	— Broadcasting, The	270
Sliding Contact, A Reliable	452	— Broadcast Receptions, List of	322, 361, 393
— Contacts for Tuning Inductances	16	— Broadcast Tests	200, 256, 583
Small Condensers, Calibrating	494	— Broadcast Tests: Prize Awards	583
Societies, With the	159, 194, 231, 261, 294, 330, 358, 392, 423, 453, 481, 515, 548, 576, 602, 632, 663, 693, 723, 751, 781, 811	Transformer, Intervalve and Telephone	279
Soft Valve, The	108	— Low-Frequency Couplings? Resistance, Choke or	580, 624
— Valves having “Hard” Characteristics (Novel Ideas)	411	Transformers and Audio Amplifiers (Inventions and Novel Ideas)	749
Soldering and Soldering Appliances	100	Transmission and Reception, Simultaneous	17
Soldering Bits, Care of	102	— during Broadcasting, 200-metre	535
— Stoves	100	Transmissions, Long Distance	568, 655
Solid Dielectric, Variable Condensers with	278	Transmitter and Relay Section, Radio Society of Great Britain	92, 256, 290, 422, 450, 654, 688, 777
Some New Ideas in Receiver Design: Building a Three-Valve Set	399	—, The Electrostatic	785
— Notes on Calculating the Inductance of Coils	572	Transmitters, Unity among the	608
— Useful Components	682	Transmitting Amateur, The	750
Sound Reproduction (Novel Ideas and Inventions)	87	Tuning Coils, A New Range of	6
Sporting Instinct in Wireless, The	796	Two New Broadcasting Stations—Brussels and Rome	352
Stable Dual Amplification Circuit, A	525	Two-Valve Receiver, A Compact	9, 381
Sterling Works, A Visit to the	629	Two-Way Communication with U.S.A., First Successful Amateur	412
Sulphating in Small Accumulators	135	Unity among the Transmitters	608
Super Circuit, A New	617	Universal Receiver, A	683, 717

	<i>Page</i>		<i>Page</i>
Useful Components, Some	682	Wavemeter, Short-Wave (A Heterodyne Oscillator for 180-220 Metres)	584
— Device for L.F. Circuits, A	204	Why?	66
— Instrument Board, A	743	Wired Wireless Transmission on Power Lines	438
— New Coil Holders	84	Wireless Amateur, Legal Points for the	98
— Variometer : 180-650 Metres, A	531	— and Physical Exhibition, The Paris	461
Use of Hand-Screwing Tackle, The : Practical Points of Cutting Simple Screw Threads	171	— Annual for Amateurs and Experimenters, The	418
Vacuum Tubes, Exhausting	278	— Club Reports	22, 58, 85, 126
Valve Capacity in Radio Frequency Amplifiers, A Simplified Method of Neutralising	79	— Development. The Amateur's Part in (Presidential Address to the Radio Society of Great Britain)	50

Stable Dual Amplification Circuit, A . . .	525, 526	2AC, near Manchester, Experimental Receiving Equipment at . . .	612
Steffensen, Receiving Apparatus of Mr. J. . . .	626	2HF, Operated by Mr. W. G. Gold . . .	275
Steinmetz, The late Dr. and T. A. Edison, examining a broken insulator . . .	185	2JP, Transmitting and Receiving Apparatus Operated by Mr. M. C. Ellison . . .	685
Sterling Four-Valve Receiver-de-Luxe . . .	266	2KF, Aerial of . . .	414
— Telephone and Electric Co., Ltd., Crystal Receiver by the . . .	266	2LO, Apparatus installed for the Transmission of Time Signals at . . .	628
— Works, A Visit to the . . .	629, 630	— Reproduction of the Studio at the All-British Wireless Exhibition . . .	253
Stocks and Dies, Screw Plate and Taps, and Adjustable Screw Plate (Hand-Screwing Tackle) . . .	171	2NM at Caterham, Operated by Mr. Gerald Marcuse . . .	655
Stoke-on-Trent Wireless Society, Annual Dinner of the . . .	752	Two-pole Switches . . .	772
Stoves, Soldering . . .	100, 101	2SZ, Transmitter at Mill Hill School . . .	657
Students at the London Telegraph Training College, Earl's Court . . .	331	Two-Valve Amplifier in Cabinet by the British Thomson-Houston Co., Ltd. . . .	224
Studio at KDKA, Pittsburgh, U.S.A. . . .	611	— Receiver, A Compact . . .	381
Super-Heterodyne Receiver, An Eight-Valve . . .	229	— Receiver, Burndept Constructor's . . .	263
Supersonic Heterodyne Receiver, The . . .	201, 202, 203, 236, 237, 238, 280, 281, 282	— Receiver by Messrs. Radiax, Ltd. . . .	266
Switch Design . . .	336, 337	— Receiver by Messrs. W. J. Henderson . . .	220
Switches . . .	771, 772, 773, 774, 800, 801	— Receiver, Compact . . .	9, 10, 11
Tank, A Wireless-Equipped . . .	462	Two-Way Communication with U.S.A., First British Station to effect successful . . .	413
Tape, Specimens of (Automatic Reception of Wireless Signals) . . .	115	Universal Receiver, A . . .	683, 684, 685, 716, 717, 718
Tapped Reactance Unit with Coupling Coil for providing Reaction Effects (Lissen, Ltd.) . . .	180	Useful Instrument Board, A . . .	743
T.C.B. Resistance by Messrs. T. C. Ball . . .	191	Valve Amplifying Equipment Used on Trunk Telephone Circuits . . .	545
Telephone Transformers, Intervolve and . . .	279	— Holder and Resistance, Combined . . .	80
Telephony Reception, Detector and Amplifier for . . .	313, 314	— Receiver, Compact . . .	648
Television, Apparatus used in Producing . . .	762, 794, 795	Variable Condenser, A Novel . . .	278
Terminals, New Type of . . .	589	— Condenser, A Novel (French make) . . .	534
Testing H.F. Transformers for Optimum Wavelength, Instrument for . . .	14, 15	— Condenser (Patent Abstract) . . .	586
Thermionic Rectifier for Battery Charging . . .	377, 378	— Condensers . . .	305, 306, 307, 308, 340, 347, 348, 382, 383, 384
— Valve: Principles Underlying the Operation of the . . .	491	— Condensers for Panel Mounting or Laboratory Use . . .	78
Three-Coil Holder arranged to permit variable coupling between coils of the plug-in type (Burndept) . . .	142	— Condenser with Solid Dielectric . . .	279
— Holder by Gambrell Bros., Ltd. . . .	142	Variable Grid Leak . . .	49, 563
— Holder for Gimbal Coils . . .	142	Vario-coupler (Igranic Electric Co.) . . .	178

	<i>Page</i>		<i>Page</i>
Variometer, A Simple Type of	80	WGY, The Control at	673
— A Useful: 180-650 Metres	531, 532	WHAZ, Apparatus Room at	324
— with Double Set of Windings.	329	—, the Broadcasting Station of the Rensselaer Polytechnic Institute, Aerial Arrangement at	324
— with Three Windings (R. T. Smith and R. C. Bookless)	530	Where the Lead-in Trails Round the Room in Search of the Aerial Terminal of the Receiver	505
Variometers 81, 82, 83, 84, 109, 110, 111, 112		White Ivorine Scale	682
Vernier Attachment for Condensers, "Fynetune" Micro-Adjuster	720	Wireless Apparatus in the Lord Mayor's Show (The Invisible Band).	242
— Condenser, Compact	37	— Exhibition Plan, All-British	148
— Condensers	527	— Sets for Motor Cars	144, 145
"Vertex" Aerial, The	363	— Signals, Automatic Reception of (Specimens of Tape)	115
Visit to the Sterling Works, A	629, 630	WJZ, Mr. Gerald Gray of American 3 CG transmitting from	419
"V 3," The New Marconiphone	298	— One of the American Broadcast Stations taking part in the Tests	304
Walthamstow Amateur Radio Society, Apparatus Exhibited by	23	— Transmitting Equipment at	248
Warner, Clock Won by Mr. Kenneth B.	796	WMAF, South Dartmouth, Mass., Aerial System at	321
Wavemeter arranged for Reading by Touch, Heterodyne and Buzzer	104	Wood & Son, Ltd., Coil-Holders Manufactured by Messrs. H. L.	84
— Short-Wave Heterodyne	584, 585, 586	Worthington-Evans, Sir Laming, at the All-British Wireless Exhibition	216
Wavetrap Interference Eliminator by Messrs. Bowyer Lowe Co., Ltd.	190		
"Wecovalve" with Adapter	211		
Wembley Wireless Society's Exhibition	516		
West London Wireless and Experimental Association, Members of	59
