AND MORE!

THESE SPECIAL DX'ers and SWL's

David Sharp, Editor

17602 Meadowbridge, Lutz, Florida 33549

Deadline: 12th of month

Hello everyone, and welcome again to SPEEDX Spotlights. This month, four members have earned full membership. We congratulate.....

WALTER BURBANK, FL; TED GURLEY, TX; ABE LEWKOWICZ, MA; FRANK PAGANO, DC

Once again, congrats to all of you. For your fine work, you now enjoy a great membership certificate and full voting rights. We hope we'll continue to see your contributions in the year to come!

This month, we welcome 23 new and rejoining members!

Hirji Taraporevala, Stateline-NV
James Progue, FPO San Francisco
Paul Stringer, Christchurch-N. ZEALAND
Steven Colburn, Largo-FL
Shinichi Isaka, Niigata-JAPAN
Hani Draye, Riyadh-SAUDI ARABIA
F.M. McDaniel, Agusta-GA
Steve Rahn, Bolingbrook-IL
Hirokazu Koizumi, Tokyo-JAPAN
Del Green, Salt Lake City-UT
Ron Faulkner, Woodstock-ONTARIO, CAN.
Lynn Burke, Newport News-VA

Mark Bryant, Lexington-KY
Ray Surapine, Enfield-CT
Dennis Kibbe, Tempe-AZ
Wayne Cronin, Tempe-AZ
Gerry Dexter, Lake Geneva-WI
Randy Erickson, Allen Park-MI
Alan J. Nacht, New York-NY
Nosca Zardi, APO New York
Chuck Evola, Redford-MI
Jerry Blake, Fort Wayne-IN
M. Cooper, Atlanta-GA

There you are, 23 fine members. You've taken the first step to obtaining Full Membership by joining, and now the rest is up to you. You can start by sending your contributions to your favorite columns by the 12th of each month. Or, in these times of high prices and inflation, SPEEDX offers relief to the high costs of postage: our wonderful Central Distribution Editor. Affectionately known as "Perky" Peggy Thompson, she'll forward your contributions and see you get the membership credits you deserve. All Peggy asks is that you send her your material by the SIXTH of the month. Her address is listed on the back cover. So, no matter which route you choose, we hope to see your name in the pages of SPEEDX.

CUN DX MONTAGE,
David

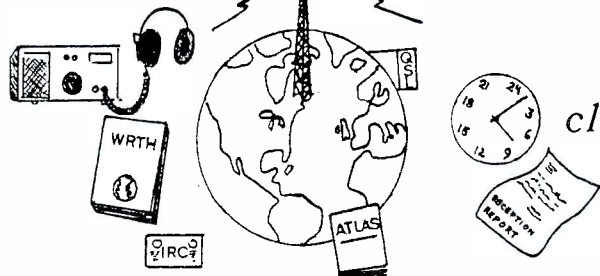

Some supplies available from headquarters in Tucson:

-Foreign Language Rpt Guide helps you write reception reports in Spanish, French, and Portuguese. \$1.50 (or 5 IRC's) in America; \$2.00 or 7 IRC's airmail overseas.

-Handy rpt forms for UTES/SWBC/QLS Columns. Cost in NA is 6¢ each, and airmail to the rest of the world is \$1 or 4 IRC's per 10 forms. Make sure to state which forms you want when ordering!

David Sharp, 17602 Meadowbridge, Lutz, FL 33549
Deadline: 12th of the month

OCTOBER, 1984

Hi friends, and welcome to your column, DX Montage. Traditionally, the month of October brings bats and beasts, goblins and ghosts to the streets of America. But, it also brings greater hours of darkness and better DX conditions. Hope you log that great catch. This month, the column is back to only 3 pages, and since I have lots of information and contributions to present, I don't wanna waste another line!

Message From the BOD: The Board of Directors want to remind you they are interested in receiving your views on the club. Is there something you like or dislike? Let the BOD know. You elected them to represent you in the club, but they can't if they don't receive your input. Write to a BOD member today (a list of BOD members is on the back cover) and let your voice be heard. ds.

If You Are Moving please remember to send your address change to Jack Sanderson at Tucson HQS at least three weeks in advance. Include a mailing label from a previous issue, or be sure to send your name as it appears on the label.... Just to prove editors aren't perfect (hi!), I moved two years ago, and sent my address change in late. That resulted in a several week delay in receiving the magazine. That unfortunate situation doesn't have to happen to you, if the above steps are taken! ds.

DXM Trivia Corner: Because radio waves travel at 186,000 miles per sec., and sound waves travel at a speedy 700 MPH, a broadcast voice can be heard sooner 13,000 miles away than it can be heard at the back of the room in which it originated. (This via Peggy Thompson-CA and Isaac Asimov's Book of Facts. I think I'll be smart and keep my comments to myself, hi! ds.)

DXM Station Review, Pt. 1: Radio Dublin: Radio Dublin started in 1966, as an alternative to Radio Caroline - a pirate ship based off the south coast of England. It was started by Roger Lloyd and Ken Sheehan. At that time, RD only broadcast on Sunday afternoons on less than 10 watts on MW. The station made no real progress until 1973-74 when several DJ's from Co. Kildare joined the station. RD then extended operations to Saturday afternoons as well as most of Sunday. In late 1974 the transmitter broke down and Eamon Cooke was asked to repair it. Eamon began to take an interest in RD and in time Roger and Ken dropped out, leaving Eamon and Doctor Don to run the station.

In 1976 another station was set up in Dublin by Dr. Don and Dave C., another Dublin DJ. This station was called ARD, which stands for Alternative Radio Dublin. Eamon kept Radio Dublin going and in December 1977 he could see that RD listeners needed more than just a weekend alternative to R.T.E., the national network. So, for a three week period over Christmas of 1977, RD broadcast 24 hours a day - the first to ever attempt such a feat in Ireland. After Christmas, Eamon found that people would not accept the idea of RD broadcasting on weekends only, so he gave up his television repair shop and went full time into running Radio Dublin. (Tks to Gerry Jones of Radio Dublin for sending this information to DXM. We'll continue our look at this station in Nov. ds.)

HOPE TO SEE YOU ON THE NEXT PAGE

Japanese Member Koichiro Sasaki writes that he would like to correspond with other SPEEDXers, in EE or JJ. Koichiro writes that he is 27 yrs. old, and works for a construction company. In addition to SW, his hobbies include: seeing fine arts, studying architectural history, and studying foreign languages. He promises to reply promptly to your letters, and you may write to Koichiro at the following address: 1-15-11 Shinden, Ichikawa-shi, Chiba-ken, Japan. (Thanks for your letter, Koichiro. You are the first Japanese member to contribute to DXM! ds.)

As Promised Last Month, here is the second half of a review on the RF-B600, by Jeff Elson-MO: Keypad tuning is simple, similar to the ICF-2002. Manual tuning is smooth and convenient with the large tuning knob. The fast tuning speed results in a tuning rate of 50 kHz per knob revolution, with 5 kHz per revolution in the slow position.

Audio quality is good, but not quite as powerful as the R-2000 due to the smaller speaker of the B600. The treble and bass controls function well and result in an ability to tailor the radio. Battery drain is only fair because of the relatively powerful audio section. Battery life may be extended by keeping the meter light off and blanking the freq. display once a station has been tuned in. The 3 AA cell memory back-up batteries seem to last forever. Portable operation is a real plus compared to the R-2000, which can only use AC or an ext. 12v source. The B600 will also operate with an ext. 12v source for those who desire this type of power supply.

Sensitivity with the telescopic antenna is much better than the 2002. With an external antenna, sensitivity is exc. The RF Gain control in the DX position results in better sensitivity than the R-2000, but RF Gain must be reduced to avoid slight AGC pumping when encountering very strong signals. I have found that signals which are inaudible or very weak on the R-2000 are entirely usable on the B600, esp. on higher frequencies. Overloading does not seem to be a problem with the B600, but if encountered may be reduced with the RF Gain control.

Panasonic seems to have goofed regarding SW AM AGC action and the signal strength meter. The decay time of the S Meter in the AM mode is too fast, though it appears to work properly when using SSB modes. In all probability, Panasonic utilized the wrong time constant in the AGC circuit with the resultant quickly changing voltage being applied to the S Meter. The final result is a wildly swinging S Meter when listening to AM stations with the RF Gain down or with rapidly changing signal levels.

Selectivity is excellent for SWL'ing and DX'ing, especially when using the narrow (2.6 kHz) filter. I have found no appreciable difference between the R-2000 and B600 in this respect. Receiver stability allows for exalted carrier reception of AM stations with no difficulty. In conclusion, the B-600 appears to be a state-of-the-art rcvr and well worth purchasing by any SWL. At its discount price at most dealers, the B600 would appear to offer good value for the money. (Tks again to Jeff for this great review! ds.)

Battle of the Airwaves: (editor's note: this article recently appeared in So-rush, which is published by IRIB. It is presented here for your information and reading pleasure, and does not imply endorsement by SPEEDX or myself.)

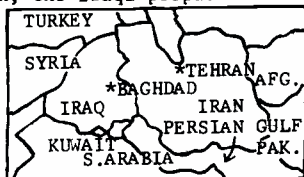

Radio and TV- modern world's most powerful means of communications- are in full swing in the Gulf War. Since 1979, when the Islamic Rep. of Iran came into being, an unseen war has been waged by a whole host of radio stations. The Voice of the Islamic Rep. of Iran (IRIB), broadcasts in several languages with worldwide coverage. From the outbreak of the Gulf War in Sept. 1980, the external services of IRIB in AA have been continually jammed. The source of this jamming is thought to be the BBC Relay on Masirah Is.

The Iraqi Broad. Corp. has also been using various channels to voice its propaganda. Apart from using its own designated broad. channels, R. Baghdad also uses Saudi, Omani, and Egyptian facilities. While clandestines come and go on a frequent basis, more than a dozen have operated during the war.

The oldest clandestine is the National Voice of Iran, which broadcasts daily to Iran in Farsi. It was first heard in April 1959, and is based in Baku, in the southern part of the Soviet Union. Baghdad is known to host at least half a dozen clandestines. Radio Iran, first heard on June 20, 1980, backs the shah's last prime minister, Shahpour Bakhatiar. The Free Voice of Iran, which has broadcast since May 1980, belongs to General Owaisi. The Vx of Iranian Kurdistan, broadcasting since Oct. 1980, transmits in Kurdish and Farsi, and backs the cause of autonomy for the Kurdish people. Baghdad has also broadcast the Voice of the MKO, which supports terrorism inside Iran. Within the past few months, the MKO has dropped its station in favor of Radio Salvation of Iran and Vx of the Iranian Revolution. The addresses of both are postal boxes in Paris. (concluded on the next page, ds.)

THE COST OF MAILING A LETTER WILL GO UP TO 22¢ NEXT YEAR.

When the shah fled to Egypt, Sadat gave him his own station. This is R. Vatan, which still broadcasts. The station is based in Cairo and is financed by Ashraf, the shah's sister. Compared to Iran, the Iraqi people have very few clandestines. There are only two. One is the Voice of Iraqi Kurdistan, a pro-Soviet, anti-Saddam station, and Voice of the Iraqi Revolution which is a pro-Syrian, anti-Saddam station, presumably the voice of the Ba'ath Party.

Final Part: Communications in Mauritius: In September, we discussed the emphasis on programming at the Mauritius Broadcasting Corporation. This month, we end our series by discussing the overall importance of the corporation to the well being of Mauritius.

Besides of providing a cultural melting pot for the ethnic groups of Mauritius, the MBC also promotes health care seminars for the public. Through such programs, the MBC hopes to better the life for people in Mauritius. However, such an endeavor sometimes evolves into a 24 hour, round-the-clock operation. Being situated in the Indian Ocean, Mauritius is extremely vulnerable to being hit by cyclones. Such was the case during Christmas of 1983, when a powerful cyclone devastated the island, and the MBC was ready. In such a crisis, the MBC operates 24 hours a day, giving warnings as to when the storm will hit land and what evacuation procedures will be taken. After the cyclone has passed, the MBC helps in coordinating relief efforts.

On shortwave, the MBC currently operates with about 10 kW. However, the corporation realizes that with the crowded conditions on SW, more power is needed for reliable signals. Hopefully, that problem will be resolved, as the MBC plans to make two 50 kW xmtrs operational in 1985. Currently, the best time for NAM reception is around 1100 GMT on 9710 kHz. A colorful QSL card is awarded for correct reception reports, and they may be sent to the following address: Broad. House, Louis Pasteur St., Forest Side. We give our thanks to the kind and helpful staff at the MBC. Without them, this series wouldn't have been possible. ds.

1985 WRTH Offered At Discount: As in past years, Don Erickson and Century Print Shop (6059 Essex St., Riverside, CA 92504-1599) are offering the WRTH at a reduced rate. Currently, publication orders are being taken at \$15 UPS or Book Rate (please specify.) For First Class Mail, add \$3. The deadline for this special price is Nov. 10. Thereafter, price will be \$16, with a \$4 additional charge if First Class mailing is desired. Checks should be sent to Century Print Shop at the above address. Outside U.S.A., please send an SASE for price info to: CIDX, Don Moman, 6815 12th Ave., Edmonton, Alberta, Canada, T6K 3J6. (Thanks to Jack Sanderson for this. ds.)

Deutsche Welle will present a wine appreciation course this autumn. Listeners are invited to send for their free wine appreciation books from: N. America Service, DW, P.O. Box 100444, Cologne, W. Germany. (Tks to Lori Klosowski-FL for this unusual item. ds.)

Pin the Tail On Ye Ed: Last month, I wanted to know the name of the country that was formerly known as Southern Rhodesia. The answer is Zimbabwe. Winner of the \$10 prize is Bob Moser-IL, who is graciously donating the prize to HAP. Now, here's the other winners, who'll be getting a membership credit and a consolation prize: Mike Schulsinger-OH, John Walters-NJ, Gayle Van Horn-TX, Robert French-MD, Terry Provance-OH, George Scott 3rd-NV, Daryll Symington-OH, John Kapinos-MA, Michael Scheel-IA, John Gunter-NC, Virginia Macrie-NJ, David Claytor-MI, Wally Burbank-FL, Robert Adams-MA, Lori Klosowski-FL, and Richard D'Angelo-PA. And finally, congrats to these late entries for the August contest: Dr. Richard Wood-HI, and Charles Hodgson-South Africa. Now, this month's question: Name either of the two countries from which the Voice of the United Nations Command broadcast. Just to make things a bit easier, here's a clue: Both countries were in Asia. Winner will get a copy of the 2nd Edition Shortwave Directory by Bob Grove. A must for those of you who DX UTE's. ds.

Well, that wraps everything up for another month. I am still receiving many contributions, and I promise to get to them as soon as possible. We really need a fourth page here! But please continue to support the column. It's you, and not me which makes DXM great. So please keep up the good work. Any and all input from the membership is appreciated. And remember, final votes for the popularity poll are being taken now. The exciting results appear next month. Until then.....

CRACKER COUNTRY: Better not let a goblin gobble up your FRG 7!!!

Happy Halloween,
73s and best -
David 5

PSST!

TIPS 'N' TOPICS

JOHN DEMMITTE
Box 4, K0848
Bellefonte, PA 16823
DEADLINE: 12th

The days are getting cooler in the center most part of Pennsylvania and the days are getting shorter. Ideal conditions for DX! The contributions to Tips and Topics have been down but I'm sure that is going to change now that SPEEDX'ers are returning from vacations. I would like to thank those of you who have sent in articles and other items. You are promoting the radio hobby by providing members with interesting and informative tidbits. Should any shortwave listener notice a sudden drop in signal strength on Halloween night, chances are a low flying witch may have cut your antenna with her broom. hi.

ANARC CLUB LIST AVAILABLE FOR 25¢! The Association of North American Radio Clubs is now distributing the June, 1984 ANARC Club List which has just been updated. The Club List provides information of each member club listing such items as addresses, types of publications issued by each club, dues, cost of samples, etc. To order your copy, send 25¢ and a SASE to: ANARC Publisher..... 1500 Sunbury Drive, North Whittier, CA 90601 (ANARC Dave Brown)

FOREIGN LANGUAGE REPORT GUIDE... A 16 page booklet that will help in writing reception reports in English, French, Spanish and Portuguese has been published by SPEEDX, 7738 East Hampton Street, Tucson, AZ 85715. The price is \$1.50 in North America or 5 IRC's outside North America. Included are complete phrases in the four languages plus a vocabulary list. (ANARC Newsletter, ed.)

SHORTWAVE CAT - \$1.00..... The new Universal Shortwave Catalog is now available by sending one dollar to: Universal Shortwave Radio, 1280 Aida Drive, Reynoldsburg, Ohio 43068. The catalog is filled with communications receivers, portable shortwave radios, antennas, radioteletype equipment, communications books, parts and accessories. The one dollar is refundable with your purchase.(ed)

A LETTER FROM THE VOICE OF FREE CHINA..... I'm Lily Liu from the Voice Of Free China. I host "Mailbag Time", a 15-minute feature answering questions from our listeners all over the world. For those who have already joined me in this feature, I hope you have been enjoying it, and I look forward to your valuable comments. I hope those who haven't listened to this program will join me soon. "Mailbag Time" belongs to all of you. If you have any questions about the life, culture, or any aspect of the Republic of China, please feel free to write to us. Feel free to request a record we may be able to play for you. We'll arrange to have your request answered over the air. I will also send you a little souvenir of our contact over the air. Best wishes, Lily Liu. (direct....ed)

TRANSMITTER ALLOWS BROADCAST TO ALL OF ASIA... The Far East Broadcasting Company has established a new route for shortwave broadcasts, one that has an unhindered path to all of Asia. In May it began formal transmission on it's new 100,000-watt shortwave station on Saipan, an island in the northern Pacific Ocean that is administered by the United States. The station, called KFBS, is transmitting in Indonesian, Russian, Mandarin, Chinese and two Indian dialects. (Alliance Witness, ed)

SW UTILITY LISTENERS - VALUABLE REFERENCE GUIDE AVAILABLE!!! SWL's and DX'ers of the utility frequencies can have the most comprehensive reference guide ever published which covers the entire HF spectrum from 1.6-30 MHz. with the expanded second edition of SHORTWAVE DIRECTORY edited by Robert B. Grove and distributed by Grove Enterprises Inc., P.O. Box 98, Brasstown, NC 28902 for the price of \$12.95 (free bookrate shipping). Over 200 pages of information printed in an easy to read format on 8 1/2 X 11 inch looseleaf pages already drilled for a 3-ring binder makes reference to the publication quick and easy. The completely updated and expanded data makes this the most valuable publication available. Due to the recent federal law classifying non-broadcast frequencies, it is most doubtful that any other publication will be as comprehensive as the SHORTWAVE DIRECTORY. For this reason one would be most wise to add this publication to his or her library as soon as possible while they are still available. The SHORTWAVE DIRECTORY contains a great wealth of information covering such areas as Aircraft, Space, Maritime, Public Safety, Common Carrier, Business, Private, Scientific, Broadcasting, Facsimile, RTTY, Air Force, Coast Guard, Navy, Army, Federal Government and lots more. Complete frequencies and locations are given with the call letters of the agencies listed. There are maps and charts throughout the publication. There are sections devoted to interesting frequency users one seldom gets a chance to read about such as the Spy Numbers Stations, FBI, State Department, Federal Emergency Management Agency, NASA and even the Smuggling Networks. The handy Frequency Cross Reference section of the SHORTWAVE DIRECTORY provides immediate identification for frequencies in the HF spectrum showing the countries and services using the utility frequencies. The section is color coded so the user may quickly refer to this part of the manual. To be fully appreciated, one would have to see the SHORTWAVE DIRECTORY. It is packed with a great deal of information and belongs in the reference library of every utility SWL & DX'er. (John N. Demmitt, PA)

HAMWATCH: CITIZENS BAND TOGETHER TO FIGHT CRIME! Two and a half years ago, a couple of Van Nuys residents approached LAPD Van Nuys Division's Captain Bill Riddle with an offer to help combat the Valley's rising crime rate. Their ammunition did not consist of 45's but ham radios. Still Riddle put them to work. The captain has since retired, but today, "Van Nuys Area Hamwatch" is a thriving volunteer corps made up of over 40 local amateur radio operators who are prepared at a moment's notice roofs and stake out crime. Officer Bill McGee, one of the division's four officers who has a ham radio license, has been with Hamwatch since its inception and now works with Officers Joe Celentano and Scott Aldrich on the program, which is overseen by Sgt. Jim Flavin. McGee explains how it works. "First we train the volunteers in observation...then we locate them on rooftops and in vehicles in high crime rate areas. That they do is watch these areas, and when they see a crime being committed they radio us." McGee or one of the others circulates in the vicinity in plainclothes and one of two unmarked cars equipped with ham radios. The officer then requests back-up and an air unit, whips over to the spot, and arrests the violators. McGee said that everything runs smoothly at every stake-out and false alarms never occur. Each stakeout has a 100% arrest rate! (Perhaps there are some ARD's out there who might be interested in setting up programs like this in their own communities. ed) (Valley Magazine...Peggy Thompson, CA & John Demmitt, PA)

TRIAL BROADCAST SYSTEMS... An appeals court approved a Federal Communications Commission order granting licenses for experimental broadcast systems that will send television signals from space directly to viewers' homes. (SW satellite broadcasts are also being considered for iron curtain countries. ed) (Betsy Robinson, TN)

CREATIVE WORKSHOP: MULTI-ELEMENT ACTIVE MINI ANTENNAS.....

These ideas are meant as a catalyst to inspire you to try something new and perhaps create something of use to all. Mini-antennas with active elements? Can more than one element be phased together or electronically linked to provide reinforcement? Can an electronic phasing unit (using IC's?) be built? Some of the properties of an antenna are: Signal-grabbing ability, electronic characteristics, such as distributed capacitance and inductance. This is determined by physical length or size in a passive type. But in an active mini-antenna, can it be set and varied electronically? Ability to reject or reduce (suppress) noise is very important. Will electrostatic shielding of an active mini-element help? Strive for directivity to a very sharp degree. Will multi-elements linked or phased together do the job? How can the phasing be done and how can two or more multi-elements be linked? Is it possible to provide a null circuit to reduce noise and to accentuate the sharp angle of the beam? Incoming radio waves can be either horizontally or vertically phased, or a combination of both. What would happen if the response of the mini-antenna were varied accordingly? If amplification and reinforcement of the signal by various elements is sufficient to override noise, and if the noise is not in phase, this might give a very good signal-to-noise ratio? Is the actual location of the elements going to determine how much signal we can grab? It would be revolutionary if an electronic equivalent to a 90 meter band rhombic antenna (rotatable, no less!) could be designed to fit into a 20 foot space, or an equal to a beverage antenna for medium wave a 60 foot square.....that is stretching the point quite a bit, but any improvements for space-hungry, RF polluted apartment dwellers would be a big boost to the radio listening/DX'ing hobby. (Anyone having answers to these questions or solutions to the problems should feel free to share them with the readers of Tips & Topics. ed) (William Flynn, CA)

ANOTHER USE FOR THE AUTEK RESEARCH QF-1A ACTIVE AUDIO FILTER!

Many radio hobbyist are quite familiar with the advantages of a good active audio filter in line with the receiver output to the speaker or phone/recorder. For the price, the QF-1A is a very cost-effective model. It gives a slight degree of amplification and the four variable controls on it make the unit quite versatile for improving reception of CW, SSB and AM mode signals. I have mine in parallel to the speaker and recorder. I have some old records that bring fond memories of years past whenever I play them, but they have gotten scratched up through the years. They are 15 to 20 years old and are irreplaceable. The QF-1A is capable of "cleaning them up", and I then tape the cleaned up version of the record through the QF-1A output. The best setting I have found for this procedure is as follows; (From left to right) AUX NOTCH FREQ: Between 7 & 8 O'clock, depending how scratchy the record is. FUNCTION: HP (Hi-Pass). SELECTIVITY: 3 O'clock. FREQ: 250 Hz. (A great use for the filter when the bands are out. I can't wait to hear what else you will get your QF-1A to do next Neal. ed) (Neal Perdue, AL)

ESKA RX99PL COMES TO AMERICA..... Rafael Calabuig, Marketing Manager at ESKA ELEKTRONIK A/S in Denmark has told Ruth Hesck that the microprocessor controlled communications receiver ESKA RX99PL is going to be available in October and will sell between 900 to 1000 US dollars depending on the fluctuating currency. Mention was also made that an IF notch filter could be added as an option. The data sheet which was also enclosed showed the synthesized AM/SSB receiver with 99 memory channels and a phase-locked AM detector to have the most advanced technology in a receiver it's size. It employs a low power CMOS microprocessor with a 64k bit memory which allows for numerous functions. The membrane keyboard has 58 keys. Tuning is programmed either by direct frequency using the keyboard or manual in steps of 5,9 or 10 kHz increments with fine tuning at 10 or 100 Hz increments. The display is liquid crystal and shows two lines each with 20 characters both alpha & numeric. (Ruth Hesck, NY)

AM PRESS/EXCHANGE..... The AM Press/Exchange is a publication which provides readers with timely, up to date news on FCC actions and happenings at the American Radio Relay League and elsewhere as well as as what members of the AM community are doing. It provides a forum for the exchange and ideas among the enthusiasts in amateur radio. Technical articles serve the Amateur Radio Operators (ARO's) with interesting construction projects. There is a column devoted to the exchange of AM equipment which is free of charge (the listing) to those subscribing to the AM Press/Exchange. There is even a section in the publication devoted to SWL NEWS! Really, a column in an ARO's publication containing information about shortwave listening. AM Press/Exchange is edited and published by Donald Chester, K4KYV and Roger Frith, N4IBF. Subscriptions are \$9 per year and can be ordered from; AM Press/Exchange, Route 1, Box 281, Woodlawn, Tenn. Zip Code 37191. (Direct...ed)

PROGRAM GUIDE COVERUP..... The International Shortwave Listener's Program Guide published and distributed by Miller Publishing, 424 West Jefferson Street, Media, PA 19063 has covered up it's September 1984 edition with an attractive heavy paper cover which protects the newsprint pages inside. No more printer's ink on the reader's hands! No more torn covers while being handled by the USPS. The 8½x11 inch Program Guide is handy and can be stored easily. In the September edition one can read such interesting articles as, DX-pert by Dr. Richard Wood who provides readers with excellent tips on getting those hard to get stations., African Broadcasts by Sandy Manning who is an authority on the subject. Sandy in her first column presented an interesting introduction to the new adventure of listening to the African shortwave stations for those who have not already discovered this listening pleasure. Adrian Peterson who is a well known expert on Asian programming always manages to give a colorful description painting a picture for the readers of his Asian Programming column. Tuning In The Clandestines by Steve Ross is a revealing report on what is happening at the various clandestine stations both on and off the air. The action packed September column also contained material supplied by Larry Miller and Dr. John Santosuosso. In addition to the program guide, contest and letters column there are a great many features devoted to shortwave programming. A good many of the features were devoted to the news about WRNO serving a notice of cancellation to Radio Earth. I was impressed at the handling of this delicate situation. Both sides were heard from and the various articles related to the story were well balanced. Those wishing to subscribe to Program Guide may do so by sending a check payable to Miller Publishing in the amount of \$19.95. This is a monthly publication and the format allows for the most current information to be included prior to going to the presses. (John H. Demmitt, PA)

RADIO NETHERLANDS 24 HOUR RETURN LINE..... 31-35-18700..... Shortwave listeners can voice their opinions over the Radio Netherlands 24 hour return line. Hear these opinions being expressed by DX'ers & SWL's over Shortwave Feedback hosted by Nevil Gray at 0230 Sunday (UTC) (Program Guide...ed)

CAPACITY HAT TIDBIT..... Like many things in radio, antennas seem to be doing something that works and the theorist figure out why at a later date. Hertz originally used "ears" or metal plates mounted on poles as both transmitting and receiving antennas. He discovered later the feedwire or vertical, was doing all the work so he did away with the "ears". A great many years later engineers discovered the improved efficiency of a "capacity hat" and added a type of an "ear" to their verticals. (Carl Huffaker, Mexico)

BBC LONDON CALLING..... This excellent & detailed program guide can be subscribed to for 8 pounds sterling. Write to.... BBC London Calling, Bush House, PO Box 76, Strand, London WC2B 4PH.

FCC WIFE HANDLE ON ADVISERS DURING OLYMPICS..... Uncle Charlie is listening - as the CB'ers say. And the Federal Communications Commission lived up to its handle during the XXIII Olympiad in Los Angeles. From July 25 to Aug. 12, the FCC field office in Long Beach employed 21 engineers and investigators to monitor and track unauthorized transmissions on VHF & UHF channels assigned to Olympic security agencies and visiting nations. The price tag could hit \$50,000. The Department of Defense loaned 2,000 handheld radios, repeaters and base stations to state, federal and local law enforcement agencies providing Olympic security. The interdepartmental Radio Advisory Committee (IRAC) which regulates government broadcast frequencies, cleared use of Department of Defense air waves for Olympic security. The FCC which regulates air waves for non-government users, assigned separate VHF bands to ABC and the Los Angeles Olympic Organizing Committee (LAOOC). They were little used so Uncle Charlie focused on Department of Defense and VHF bands. The more than 70 countries who answered Olympic committee questionnaires asking if they needed radio equipment and frequencies had to get approval by the FCC in Washington. Motorola rented equipment to those nations that did not bring their own. Planning Olympic communications and the monitoring operation began last September when public safety and security agencies met with Lawrence D. Guy, engineer in charge of the FCC's Long Beach office. "In essence, we had to know what they had planned to protect," he says. We had to determine what their fears were. We were concerned with the federal and public safety operations and that the additional influx of foreign users might saturate our area even more. Interference with Olympic security operations, existing fire, police and hospital licenses and the threat of terrorist activities were chief concerns. Guy imported 15 additional FCC staffers from around the country to monitor and track VHF broadcasts daily between 7 a.m. and midnight. Each of the two shifts used four mobile and three fixed ADF (Automatic Direction Finding) tracking devices. The mobile units monitored VHF broadcasts near Olympic villages, venues and Los Angeles International Airport. The fixed ADF devices were atop the FCC field office in Long Beach and at sites in Rio Hondo and Griffith parks. The territory covered Los Angeles, Riverside, San Bernardino and Orange counties. Uncle Charlie's ears pricked at any unauthorized or foreign-language transmissions on any Department of Defense frequency. Engineers also listened for interference caused by electromechanical defects or signals that bled into other frequencies. All were recorded. To trace the origin of interference or a suspicious transmission, a trio of mobile ADF units took separate frequency readings (I believe the Daily News meant to say, direction bearings of the signal. ed) from three directions. An engineer drew lines on a central map to put the origin within a geographical triangle before sending out a mobile unit to pinpoint the location. FCC engineers used scrambled, enciphered or coded transmissions to dispatch mobile units. Guy says units traced most interference to "spurs" (illegitimate signals) from transmitters or "mixes" (blends of two signals that interfere with another. Towers, planes, wire fences or broken transmitters can cause mixes. One of the most interesting causes involved a Chinese vessel with a mechanical problem trying to contact a coast base station. Guy says the ship transmitted on a marine channel for intership safety, but was not authorized to do so. The FCC contacted the State Department and the transmissions stopped. The engineers sent 40 cases to FCC investigators involving Olympic interference - nine involving foreign users. Guy says many cases (especially those involving mechanical failure) will never make it to a federal court. Culprits found guilty of unlicensed, willful or malicious interference with licensed FCC broadcasters in the Los Angeles basin could be fined \$2,000. Guy says the FCC was also authorized to perform search and seizures and, if necessary, use arrest warrants to stop transmissions that interfered with Olympic security or safety. Amateur radio operators also put on the ears for Uncle Charlie during the Olympics. Ray Frost, head of the direction finding unit of the FCC's Amateur Auxiliary, posted listeners along Olympic yachting and marathon routes up to two hours before each event to help insure the safety of athletes. They also tracked down an open repeater sending transmissions. Guy said we expected more interference but we didn't get it, not even foreign interference. (N.A. Life - Daily News..... Peggy Thompson, CA)

RADIO AND ELECTIONS IN CANADA..... In Canada, like the US a wide country, West Coast polls are still open after those in the East have closed. Under a 1938 law TV and radio cannot report results in any time zone where the polls are still open. No political advertising was allowed during the first four weeks of the campaign prior to this year, and none will be allowed on the day before the election nor on the polling day. The duration of the first ban varies slightly depending on the length of the campaign interval. The final two-day blackout is most noticeable on TV - there can be no last minute ad blitz. (Canada Today/d'aujourd'hui and received direct...ed)

ADDRESS CHANGE FOR GLENN HAUSER..... In a recent SWL Digest program, it was reported that Glenn Hauser, Publisher of Review of International Broadcasting has relocated and can now be reached at the following address; Glenn Hauser, P.O. Box 756, Ft. Lauderdale, FL 33349-0756. Subscriptions to RIB are \$18 per year in the US and are sent via first class mail. This publication is especially interesting to those who follow the world news as well as DX'ers looking for those hard to get stations. (RCI.....ed)

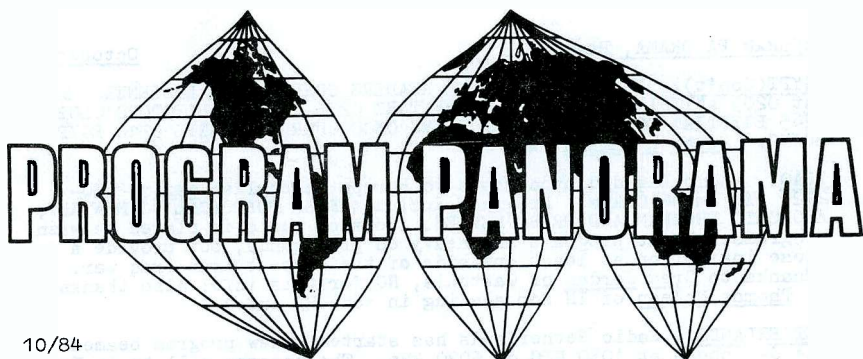

NO TOUR TODAY! Wayne Heinen informs us that due to budget cutbacks at the National Bureau of Standards, the engineering staff has been cut from twelve to three bringing about a directive which no longer allows tours at the WWV site. Wayne shares his concern that future service could suffer as a result of the lack of money to operate WWV and suggests that we write our Congressmen and express our opinions. (Wayne Heinen, CO)

BBC HALTS TOURS! After being inspired by an article Ruth Hesch wrote about her trip to the BBC while she was in England, a newcomer to the radio hobby decided to also take the tour when she arrived in London however, much to her regret, the BBC stated they were unable to allow tours due to security problems. Hopefully it is just a temporary measure and will be resolved soon as security concerns are satisfied. As far as we can determine, Ruth Hesch is the last SPEEDX'er to have toured the BBC. (John E. Demmitt, PA)

OVERHEARD AT RADIO SHACK..... While at a local Radio Shack the other day to buy a battery, a miracle occurred! A fellow was asking about the DX-400 and mentioned that he heard it was the same set as the Uniden CR-2021 which is being sold by Grove Enterprises at a much less cost. The Radio Shack salesman shocked this reporter by telling the customer that he would be better off purchasing the Uniden not just because of the better price but because the Uniden has a one year warranty whereas the DX-400 has only a 90 day warranty. (Name withheld)

RADIO JAPAN OUT TO COVER THE WORLD..... Radio Japan which now broadcasts 21 languages daily aims to expand it's overseas service to cover almost the entire world in the near future. A meeting by the Post & Telecommunications Ministry decided in an agreement with Thailand, Panama and Gabon that relays would be set up in these countries. The Thailand site will provide coverage for much of Asia and a power house 500,000 watt transmitter in Gabon will serve Southwest Africa and the Middle East. The Panama site will beam it's broadcasts to North, Central and South America. In addition to relaying Radio Japan's programming, the relays will be operating their own programming during the times Radio Japan is not being carried at the relay. Several years will be needed to complete the work. (Hiromasa Sato, JAPAN)

RADIO PRAGUE CONDUCTS POLL..... During the period between August 1984 till April 1985 listeners corresponding with Radio Prague will be asked to complete a poll for souvenirs. (ed)

PROGRAM PANORAMA

10/84

Woody Seymour, Jr. P.O. Box 848 Sanford, N.C. 27330

AUSTRALIA...Announcements from Radio Australia indicate that the station has a new stamp program hosted by Keith Glover. For those of you who did not hear Keith during his stint as RA's MAILBAG host for many years, be sure to tune in. It would be nice if a member would tune in the program and send us a schedule of it, along with some comments on the quality of the program.....RA's new schedule is a full-color folder, giving sketchy details of its different language broadcasts. We'll try to include some details of RA's new schedule in the coming months.

BRAZIL...SPEEDXer Michael Neuverth of CO sends along the current program schedule for Radio Nacional do Brasil. The station broadcasts in English to Europe at 1750 UTC on 15280 kHz and to North America at 0200 UTC on 15290 kHz. Mon-Fri features 10 minutes on news in Portuguese, followed by THE NEWS REPORT, MUSICAL, then Mon ECOLOGY or TOURISM Tue TRADE & INDUSTRY or BRAZILIAN PERSONALITIES Wed GEOGRAPHY OF BRAZIL Thu THE COUNTRY SIDE OF BRAZIL or DAILY LIFE IN BRAZIL Fri CULTURAL HAPPENINGS or BRAZILIAN FOLKLORE; Sat features are THE NEWS REPORT, SPORTS IN BRAZIL, MUSICAL, HIGHLIGHTS OF THE WEEK; all Mon-Sat transmissions end with more MUSICAL. Of course, Sunday has always been a special day at the station, and the programs now offered on that day include CHATTING WITH OUR LISTENERS and SUNDAY SPECIAL. Tune in for a lively look at life in this South American country.

ECUADOR...HCJB's English Section plans another phone-in program: during the month of October. It will be aired to North America Thu evening the 18th(19th UTC) from 0230-0330 UTC and simulcast to Europe and the South Pacific Sat the 20th from 0700-0800 UTC. The program will be hosted by the MUSICAL MAILBAG team. (Glen Volkhardt, Director, English Service) Glen adds that a call-in version of the DX PARTY LINE will be held in November and tentative arrangements have been made for a Christmas call-in in late December. Details of these programs will be passed on as they are made available.

EGYPT(ARAB REP. OF)...Radio Cairo broadcasts in English to North America from 0200 to 0330 UTC on 9475 kHz and 9675 kHz. Daily programs are:0202 EGYPTIAN MUSIC;0215 NEWS 1;0315 NEWS 2;0330 CLOSE DOWN WITH NATIONAL ANTHEM. Weekly programs are: Sun 0205 DO YOU KNOW? 0225 COMMENTARY 0235 ROUND-ABOUT 0245 LISTENERS MAIL; Mon 0205 MAIL CALL 0225 COMMENTARY 0235 LIFE IN EGYPT 0245 EGYPTIAN SONGS 0250 THIS IS ISLAM 0300 BETWEEN EGYPT AND AMERICA 0310 EGYPTIAN SONGS; Tue 0205 MAIL CALL 0225 SPOTLIGHTS ON THE MIDDLE EAST 0235 TOURISM IN EGYPT 0245 EGYPTIAN SONGS 0250 VARIED TALKS 0300 MEETING IN CAIRO; Wed 0205 THIS WEEK'S WEATHER REPORT 0225 COMMENTARY 0235 MODERN EGYPTIAN HISTORY 0245 LISTENERS MAIL; Thu 0205 ARAB POETRY 0225 EGYPTIAN FOREIGN POLICY 0235 PHARAONIC EGYPT 0245 EGYPTIAN SONGS 0250 MOHAMED THE PROPHET OF ISLAM 0300 PEOPLE AND PLACES; Fri 0205 HOLY KORAN AND INTERPRETATION 0225

EGYPT(Con't)...PRESS REVIEW 0235 READERS CORNER 0240 LISTENERS MAIL; Sat 0205 ANYTHING GOES 0225 COMMENTARY 0235 STAMP COLLECTORS CLUB 0245 EGYPTIAN SONGS 0250 FOLK TALES 0300 CURRENT EVENTS 0310 EGYPTIAN MUSIC: (Betsy Robinson, TN)

IRAQ...Radio Baghdad broadcasts to Europe in English daily 2030-2125 UTC on 9610 kHz. Programs include NEWS, POLITICAL COMMENTARY, ECONOMIC PROGRAM AND PRESS REVIEW. Lots of music is played between programs. These programs are heavy on propaganda, but provide a close insight on at least one side of the current Iran-Iraq war. (Thanks to Greg Jordan of Gastonia, NC for this info; also thanks to Thomas McKeon of IN for sending in some RB info)

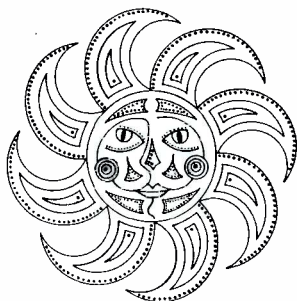

NETHERLANDS...Radio Netherlands has started a new program beamed to the Caribbean at 1030 UTC on 6020 kHz. The program will be in English, and the English news bulletin at 0955 UTC during the Dutch program will be dropped. (MEDIA NETWORK 9/7 via Michael W. Scheel, IA)

SINGAPORE...SPEEDer Wayne Heinen of CO sends along a complete English schedule for the SBC's Radio One. Shortwave frequencies are 5052 and 11940 kHz. There is so much info that only some highlights will be included here. Sign on is at 2200 UTC(which is 6 AM local time) with NEWS IN BRIEF and ANOTHER MORNING ANOTHER SHOW. This program continues until 0200 UTC. The midmorning show is called FEMININE FLAIR. The early afternoon show is ON THE HOUSE. Evenings feature YOUR HOST TONIGHT. Sign off is at 1600 UTC(Midnight local time). Thanks to Wayne for this program information.

UNITED ARAB EMIRATES...JAE Radio in Dubai broadcasts NEWS IN ENGLISH daily at 0330, 0530, 1030, 1630 UTC. Daily feature programs in English deal with Arab life, history and culture, both historical and present day. A fortnightly(every other week for you non-Commonwealth types-WS) MAILBAG PROGRAM in which they discuss propagation(of the radio type, I hope-WS) and answer listener letters is broadcast on Fri, Sat and Sun in place of the feature program--it alternates week-ends with INTERVIEW PROGRAM(a fortnightly program of interviews with people living and working in Dubai). The station broadcasts to North America, the Far East, Europe and North Africa. (Thomas McKeon, IN) (Wonder if they play any music by the "Dubai Brothers?"-WS)

UNITED KINGDOM...BBC World Service broadcasts a portrait of Lady Diana, Princess of Wales. A PRINCESS FOR TODAY can be heard on the 9th @ 1615, repeated on the 10th @ 0030 and 0630 UTC.....Other October offerings include WITH RESPECT, AMBASSADOR in which the diplomatic corps is examined--Sat 1715, Wed 1000, Fri 0230 UTC..... Start your November with a phone-in program involving Alistair Cooke, November 4th at 1630 UTC. (London Calling, 10/84)

USA...(Donald McCants, AL): "I generally like the programming of WYFR, but there are a couple of programs broadcast on Mon UTC that I especially like to hear. I like to listen to the WYFR MAILBAG program on 9715 from 0205 to about 0220 UTC, and I also like to listen to the BACK TO GOD HOUR, the weekly program sponsored by the Christian Reformed Church. It is broadcast 0220-0240 UTC, also on 9715."Radio Earth has had some interesting developments since last month. Shortly after last month's column was completed, the station began making announcements that WRNO would no longer carry the program after September 18. It seems that the 'RNO ownership made this decision unilaterally, despite a contract with Radio Earth to carry the station's programming until the end of the year. As the deadline passed, some sort of arrangement between Radio Earth and WRNO seems to have been made, and the station is still on 6185 as of 9/19. Alternative arrangements had been made with Radio Clarin, so only time will tell about the future of Radio Earth. (Direct and observations by WS) Well, out of room and we didn't get to the USSR...next month, we'll have some schedules for Vilsius and Tashkent. Until then, Good listening! WS 9/19

OCTOBER 1984

Well, it looks like the DX is beginning to pick up a bit, which can be only good news. Things are looking quite promising as of the middle of September. Let's keep our fingers crossed, shall we?

I've recently purchased a Radio Shack DX-400, which has so far pleased me no end. Ergo, I no longer need my GE World Monitor II, so up on the blocks it goes. This rig is 1½ years old and is in good condition. I'm asking \$75, and I'll pay the postage. For more info, give your friendly neighborhood editor a call at the number above. Now how can you pass this up? Where else are you going to find a GE WMII at such a price, hum?

Certainly, one of the waves of the future is the computer bulletin-board, or other info-exchange services for SWLs. One of the best info-exchanges is in Washington DC, and is run on a telephone answering machine. What you do is send in a yearly payment of \$10, and you can access all sorts of up-to-the-minute DX tips. I'm a member of this Washington system, and I don't think I've spent a better ten-dollar bill in my life. For a sample, call (301) 953-0777. You might have heard of it over World of Radio or Austrian SW Panorama. Right now, we have folks from as far as Kansas, Florida and England on the system. Give it a listen!

In response to my poll on the priority of printing Pirate stations, the majority seems to favor my returning to including Clandestine and Pirate stations in regular alphabetical order in the column. So be it, beginning this month. Interestingly enough, only 9 people bothered to give me any feedback. Another case of the minority leading the majority I suppose.

Listeners of R. Earth over WRNO should have been in for a rude surprise when R. Earth was removed from WRNO. Jeff White gave a call to the aforementioned DX Newline to break the news, but he didn't give any reasons. Unofficially, I'm told that R. Earth was upset by WRNO's plans to carry football games in R. Earth's time slot. R. Earth didn't want to change time-slots (a violation of contract I believe), so Mr. Costello kicked 'em out. WRNO may be planning to sue WRNO over this issue, but the immediate fate of Radio Earth is unclear at this time. Through the DX Newline, R. Earth had planned to test over R. Milano International in Italy. I listened for this test on Sept. 8th, but didn't hear R. Earth. Meanwhile, another rumor has it that WRNO planned to replace R. Earth with the Radio Monitor's International program! Whatever transpires, let's hope that World of Radio doesn't befall the same fate.

Another piece of news is that VOA planned to start some form of DX program, but I have no info on that. Knowing VOA, I'm not very excited at that news!

From the August SPEEDXGRAM...

Alaska...KNLS will be using 7355 from 9/2 (1500-2000) w/EE (1730-2000) (Cushen via SCDX 8/14)

Bolivia...R. Illimani is now observed broadcasting 24 hours on 4965 and 6025 (BBMS)

Falkland Is...The current FIBS sked reads (0900-1115) on 2380; (1115-1930) on 3958; (1930-0530) on 2380 (Sennitt, Media Network 8/16)

Surinam...The Dutch newspaper "Trouw" reported that the Surinam Government Info. Service will begin SW broadcasts to the Netherlands. This service is to be relayed via the 250kw transmitters of Radiobras. The planned frequency is to be 17755 (1800-1900 weekdays, 1430-1530 weekends) Unconfirmed reports indicate that this service is to start 8/31 (Media Network)

USA...The callsign for the High Adventure Station, CA, is to be KVOH (Hauser, WOR 8/3). The religious station KCER, Dallas plans to test on 17705 (1800-2000) w/50 kw to LAM and Europe (SCDX 8/14)

No room to begin anything here...next page!

A quick note before I begin. A esteemed DX Montage editor David Sharp is beginning a Guide to African DXing, and like me, he needs your help. For more info on this newest effort, drop David a SASE. His address is in DX Montage. The Guide to Latin American DXing is plowing forward in bits and pieces. So far, one (1) person has contributed any info. Thanks Carl! What about you? We need you to help make these guides as complete as possible. Volunteer today!!!

Remember, any logs with no language designation was reported in Spanish, or ~~Pottuguese~~ for Brazilian stations.....

Well, I have a whole lot of space left. What am I going to do with it? Since I'm in a nasty mood today, I guess I'll chew over a few things bothering me...

OLD REPORTS...one of the biggest problems in a club bulletin like SPEEDX is that by the time you get it, the info included is a month to two months old. If the news is that old, then who needs stale reports? Old logs do no good for anyone. So don't send in reports dated earlier than the 5th of the previous month.

LACK OF DETAIL...when you report, don't just put down "nx, tx" then be done with it. If you're reporting a good catch, then a general rule includes put all the info you can on your report. But what kind of info? Type of music heard, ads heard, ID texts, s/on-off, and so on. If you're reporting the easier-heard stations, then the name of the program you heard will usually do. When I'm figuring out which report to print of a station if I have multiple reporters, I usually print the report that contains the most useful info. If all the logs basically say the same thing, then I'll print the shortest log to conserve space.

LACK OF SUPPORT...what? You think WH has good support, right? Well, you are right. What I'm talking about is extra-columnar support. As you know, I'm trying to compile a Guide to Latin American DXing, and I need help. So far, ONE member has offered, and another one is pending his support. I've had about 5 requests for more info as well. That's a total of 7 people. Seven people out of 1200. Right now, there will be no QSL section in the Guide, because none of the QSL chasers have offered their support. I don't QSL, so I can't do that section. The Guide will be written, and hopefully finished around Christmas, but the quality will not be at its maximum unless you help. Come on folks, I'm beggin' ya. As a full-time college student with a 7-page column to do every month, my time is limited on the Guide. If you help, maybe we can get it out faster. It's all up to you. If you pass the buck, then no progress can be made.

RUMOR SQUASHING...I have no idea who started this rumor, but some smart-aleck said that SPEEDX was ready to fall apart because we couldn't hold onto editors. Well, I'm here to tell you SPEEDX has never been in better shape. We have 4100 dollars in the till, 1200 members, and a dedicated staff. Our editor problem is in my opinion just bad luck. We're in a bad streak concerning holding onto editors, but that'll break sooner or later. Our BOD is hard at work brainstorming on how to improve/expand the bulletin. So, the next time someone tells you SPEEDX is about to go belly-up, punch them in the mouth for me.

Well, that's it. This has been my toughest column to do because of my typewriter problem. Hopefully, next month will be better as I get my spiffy new typewriter back on line.

73's John

SWBC - EUROPE

EDITOR:

DANIEL SAMPSON
Rt #1 Box 36
Black River Falls, WI 54615

Deadline: 12th
Times and Dates: GMT
Frequencies: kHz

With this column will come the end of the first year of my editing the SWBC-Europe column and with it the hope that there will be many more! I hope you all have been pleased with the way the column is being handled and if you have any suggestions I would love to hear from you. For those of you worrying(?) about my unemployment situation I finally have a job working at John's IGA here in Black River Falls part-time cleaning up the meat department. Hopefully a full-time job will become available in the near future. Welcome aboard the SPEEDX bandwagon Jeff Knapp & J. Speed Gray III. I'm looking forward to your columns. As for Mark Koukol & Mike Chabak we'll all miss your well done columns and hope to receive loggings and articles in the future. You are all probably waiting for me to get into Albania, what?, well we'll do it anyway, hi!

BCMS WORLD BROADCASTING INFORMATION

USSR A transmitter operating in SSB mode is currently being heard on 16330 from 0500-
 1600 approximately carrying the All-Union Radio cultural & classical music Third
 Program. This service is carried on the LSB, while the Mayak service is observed on the
 USB. This is believed to be the first time the Third Program has been observed on such
 a transmitter. (8/16)

SHORTWAVE AFRICA

MARK KOUKOL, 109 Pennsylvania #8, Loves Park, IL 61111

Welcome to October and my last column as editor of SPEEDX-Africa. I will miss all my regular contributors and want to say a heart-felt THANK YOU for your support in helping to make SPEEDX the great organization it is. Replacing me as of next month is J. SPEED GRAY, an enthusiastic DXer who I'm sure will carry the SPEEDX tradition of quality & activity upwards & onwards in his new position. Send all your direct reports for Africa for the November column and following months to:

J. Speed Gray III
1260 Troon Ct. SE
Grand Rapids, MI 49506

I intend to continue my own DXing as time allows, and hope that you'll be seeing some of my loggings in Speed's column and others soon. Thanks to David Sharp, Vincent Hevern, Michael Wegner, and Bob Thunberg for your kind remarks--it's been a pleasure, gentlemen!

ALGERIA

DEADLINE: 12th of each month
FREQUENCIES IN KILOHERTZ
TIMES ARE IN GMT
0000=sign on 0000=sign off

As I type this month's column, I am nervously listening to the Amateur Radio National Hurricane Net on 14525 kHz. At this moment, Hurricane Diana is off the S. Carolina coast and is headed slowly in a north-east direction toward Cape Hatteras on the Outer Banks of N. Carolina. The reason for my nervousness is that in just five days I plan on beginning a week's vacation there. Though I'm sure I will miss any possible hit by the storm, I really don't want to spend my hard-earned vacation in a devastated area! The XYL and I were on the Outer Banks when Hurricane David hit land in 1979; luckily it went around us, but I'm sure you members in S. Carolina and in the Tidewater region of Virginia will remember that storm. Anyway, Maybe typing the column will keep my mind off the impending disaster-HI. DX seems to be down again this month but starting to show signs of picking up. Labor day-the unofficial start of the DX season has passed and I expect contributions to A/O to be on the upswing next month.

Late-arriving reports are usually a nuisance, but this month they were a blessing. Thanks go to all contributors and especially to those of my mini column-you saved my neck! Please don't make after deadline reports a habit though; with the expected increase in logs during the coming months, I may not have room for them. Remember-all logs sent directly to me should be here by the 12th of the month, and those sent to Peggy, our CDE, have to reach her by the 6th...RBT

I'll take this opportunity to welcome two new editors to SPEEDX: J. Speed Gray, our new African ed. and Jeff Knapp who has taken over the Utility column. Let's all give them our whole-hearted support!

For those of you looking for a good SW portable radio at a low price, the Uniden CR2021 should end your search. A number of SW outlets are offering this rig for under \$100.00. I just purchased one for \$89.00 from National Tower Co. of Shawnee Mission, KS and am very pleased with its performance. Looking forward to taking it along to NC.

Speaking of NC, at the present time, Diana has been down graded to a Tropical Storm but is headed in the direction of the Outer Banks. Winds have diminished considerably but they are receiving considerable amounts of rain. Hopefully this will all be over in the next couple of days; a little rain I don't mind, but a motel without a roof is another matter-Hi! If there any members in the affected area of the storm, I hope you were able to escape its wrath. If there is a Nov. A/O column, you'll know I survived.

By the way-the correct 19m freq for R. Ulan Bator is 15305. I tuned it in a few min. ago at *1257. Weak and w/poor mod but mostly readable until buried in QRM at 1315. Thanks to Ed Soomre-MA & David Sharp-FL for this tip. This was my 1st reception of RUB. Until Nov:

73, Bob

QSL REPORT

VIA AEREA

Due to popular demand, I have decided to continue the QSL policy listing that I started in the August issue. I received many requests for the continuation, and I feel that this is the best time to finish it. All reports will be held till then, and all credit will be given for contributions. Please understand that in the regions that I am about to cover there are many, many stations. I will not attempt to cover them all. I will try to cover the most common ones. Do not think that because a station is missing, they will not QSL. I may have left it out of the list for one reason or another. So on to the list...

**** NORTH AND CENTRAL AMERICA AND THE CARIBBEAN ISLANDS ****

ALASKA-KNLS-sends out f/d form letters in about a week for US ms.

ANTIGUA-The BBC maintains a transmitter site here which is also used by the Deutsche Welle. Neither station issues f/d cards. DW periodically issues f/d cards for special occasions, but is not currently doing so. Attempts can be made to verify direct to the site, but the results may be the same as if reported to the station.

BELIZE-R. Belize-issues f/d map cards for rp. This station has been using the same QSL cards for many years.

CANADA-RCI-sends out do-it-yourself cards with the Spring program schedule to people on the mailing list. You fill it out and send it back to have it validated. CKZN, CKZU, CKFX, CFVP, CFRX, CKFX, and CHNX all have good QSL policies, but do send return postage. CBCNQSW will not verify.

COSTA RICA-R. Reloj-date/freq cards for 2 ircs and SS rpts. TIFC-sends f/d cards for return postage. R. Colombia-f/d cards for SS rpts and return postage.

CUBA-R. Habana-Slow, but reliable QSLer, no rp necessary. R. Moscow-faster QSLer than RHC, request site on card.

DOMINICAN REPUBLIC-R. Clarín is tough to get a card from, but relays other stations that buy time from them. These can often be verified to the studio site.

EL SALVADOR-I believe that there is no official station activity here at the present.

GREENLAND-There is a station here. It broadcasts a program for fisherman. I believe that the station QSLs correct reports, but it is not reported that often for definite details.

GRENADA-R. Free Grenada-This station was one of the casualties of the American invasion of Grenada. It was not a good QSLer until recently, and now it doesn't exist. Those with RFG cards can consider themselves fortunate.

GUATEMALA-TGNA-good QSLer, but send return postage. R. Cortis-Spanish reports and RP sometimes bring results. The same goes for R. Tezulatlán.

HAITI-4VEH-Sends cards, but return postage is necessary.

HONDURAS-HRVC-very good qsler, but send at least 3 ircs for rp. La Voz del Junco-f/d card for ms and SS or EE rpt. R. Landia-f/d cards for ms and SS reports. R. Luz y Vida-f/d letter for 2 ircs also a pennant. La Voz de la Mosquita-f/d letter for SS report, but can be a spotty verifier.

MEXICO-R. Mexico, QSL for SS rpts and rp. XEQM-Tus Panteras-p/d letter was received recently by John Wilkins after 5 rpts, SS rpts, and \$1.00.

MONTSERRAT- The DW maintains a relay site here, and the usual DW QSL policy applies.

NETHERLANDS LEWARD ANTILLES-Bonaire-R. Netherlands-f/d cards are issued by the RN headquarters. Only cards marked Bonaire are valid here. TWR-issues f/d cards, but, as with all religious broadcasters, return postage should be sent.

NICARAGUA-La Voz de Nic-letters, stickers and pennants are sent out. EE rpts are OK:

***** SOUTH AMERICA AND ANTARCTICA *****

ARGENTINA-RAE-f/d cards and pennants. EE rpts OK, of course, but send return postage.

BOLIVIA-R. Illimani, R. Panamericana-SS rpts, and return postage, along with f/up reports will (most of the time) get results here. The other Bolivian stations will QSL periodically, SS rpts and mint stamps for return postage are a must, as are plenty of follow up reports.

BRAZIL-R. Nac. do Brasil--issues f/d cards for complete reports in any lang- return postage is not necessary. R. Brasil Central-n/d form letter for PP rpts and ms. The other stations are spotty verifiers. PP rpts, mint stamps and patience are a must. Remember to keep sending those follow up reports.

CHILE-I do not know of any way at the present to get this country confirmed. There are some stations that can be confirmed, when active, with some work. I am not that familiar with the broadcasting situation in this country at the moment.

COLOMBIA-Armonias del Caqueta-n/d cards for SS rpts and ms. R. Macarena f/d cards for SS rpts. Also has stickers. Santa Fe, R. Guatapuri, Ondas del Meta and others need work. R. Sutatenza used to be a good verifier, but lately I have not seen it. Again SS rpts and Rp help a great deal.

ECUADOR-HCJE-is of, course, a good verifier. They do request return postage, however. F/d cards are always available. R. Quito-cards and pennants available try EE or SS letters and rp. CRE-this is a tough one, but once they crack, they send out a letter and a nice large blue/white pennant that is well worth the trouble. It is also not all that common of a pennant, so its nice for the collection. Emisora Jesus del Gran Poder-f/d cards and pennants for SS rpts and rp. R. Paz y Bien-f/d card and pennant for SS rpt and ms again. This also applies to R. Rio Amazonas, but they have stickers instead of pennants. Emisora Gran Colombia-pennant, stickers and n/d letter for a SS rpt. For the rest of the stations, follow the usual Latin American rules. These are often repeated in this column, so don't miss them-HI.

FALKLAND ISLANDS-FIBS-f/d cards are available from this one if you are lucky enuf to be able to hear it.

FRENCH GUYANA-RFO-Have not seen any cards from this one lately. R. France Intl is using this as a relay though, and a card should be able to be obtained from this station.

GALAPAGOS-La Voz de Galapagos-used to issue cards for SS rpts, but I have not seen any in a while. I do not even know if the station is still active.

GUYANA-Action Radio Guyana can be heard in the very early morning here in New York and can be verified for rp and a correct report.

PARAGUAY- R. Nacional is the most common heard station here, but can be tough to get verified. Return postage is good, and SS or EE rpts are OK.

PERU-This is a tough one to give details on. There are so many stations and the policies vary widely. I guess that the most important thing here is SS and rp. The f/up reports are more often necessary than not to get replys. Some of the better QSLers are: R. Union, R. Tacna, R. Atlantida, R. Inca del Peru, R. Los Andes, R. Del Pacifico. I know I left some out. The stations here are usually fairly generous when they answer reports, and pennants are very common from Peru stations. Ask for one.

SURINAM-This one used to be pretty good. R. Apintie used to QSL very well, and SRS was just a touch spotty. This has changes, and I have not seen any reports from either station is quite a while.

URUGUAY-This is a tough one to hear, as well as verify. I do not know the polices here, except that it is not reported often.

VENEZUELA-R. Rumbos-ms and SS rpts bring replies here. R. Turismo-Same here. p/d cards from R. Tachira for the same. Ecos del Torbes-used to be a lot more reliable, but SS rpts do bring results. R. Barquisimeto, R. Maturin, R. Juventud, La voa del Tigre, and R. Nac can respond if they like the report you send them. If no luck after the first, then send another.

ANTARCTICA-LRA36 can be verified, with either a card or form letter, for a ss rpt and ms.

Well, it seems that I have left out one very important country. Maybe it is because I saved the best for last-HI. This country is: The United States of America-WYFR-ms brings quick reply. Same holds true for WINB, and KGEI. WRNO is a bit slow. VOA-very quick replies, and no postage is necessary. AFRTS-will not QSL US residents any more.

Well, I guess that just about raps up the list. This part did not take up as much space as I had thought it would. I think that now I will repeat some rules for QSLing, and maybe even type a sample reception report.

The one rule to remember when writing to the radio stations is courtesy. The station that you are writing to is not required to send you a QSL, it is a favor. As for a card politely, do not demand one. The same thing applies if you are requesting a pennant. Make sure that your intentions are clear. As for the information to provide in the letter, date, time, frequency, reception quality and reception details are the bare minimum. Details about yourself and your hobby can be added, and make the letter alot more interesting.

Return postage should be sent. Ircs or ms are fine, but ms may be better with the African and South American countries. Make sure that the report is in the lative language of the country, or the language that the program was in. There are many foreign lang report guides available to help those of us who are not multi-lingual (and those of us who are!). You just copy thereport and fill in the details.

A brief reception report can look like the following sample report to a large broadcaster:

Dear Sir:

Hello, I am a shortwave listener, and as I was tuning the 31m band this evening I came across your North American Service. I found the program very interesting and enjoyable. The program that I heard was on 19 September 1984, and the time was at 0030 to 0130 UTC. The frequency was 11855 Khz and the reception on that frequency was very good. I gave it a SINPO of 44554 in my logbook.

The program that I heard consisted of the news for 15 minutes, and then a commentary. This was on your country's refusal to give up the island of Ting Tong to your neighboring country, which has been trying to claim it. Then there was a music program called "the Sounds of Ting Tong" which lasted 30 minutes, until 0120 UTC. The music played was mostly lively instrumental tunes, which I enjoyed very much. I even taped some of the tunes to play back when I want. Then there was an announcement about what was going to be on tomorrows program, the news briefs, and then your national anthem. Another program started at 0130, in your native

language.

As I mentioned above, I enjoyed this program very much. I would appreciate it if you could send me some more information on your country. I would also like to receive a QSL card confirming my reception, if you have any available. Also, if possible, maybe you could answer a question I have. You mentioned that the island of Ting Tong was very valuable, but you neglected to mention what makes it so valuable to both countries. I would appreciate a clarification on this point.

Thank you fo your time, and I am looking forward to hearing from you. Best of luck and good wishes.

Sincerely.....

I think that that was totally boring for most members, but many have asked to see sample reports. So that was it, and I promise that I will never do one again (Unless asked)-Hi Hi.

Anyway, the report gives the time, date, frequency and Quality of reception. It also gives necessary details on the program, and some information to the station on what the listener thought about the program. Any thing else that you want to add, about your radio, personal information is fine, but try to keep the letter to one page. Long letters get boring.

And, I assume, so does my constant chit-chat, so I guess I will start to catch up on some the contributions that I have back-logged.

#####

**** SOUTH AMERICA ****

ARGENTINA-RAE-15345, 11710, f/d logo card and paper pennant in 32d for 1 irc (Falbo-OR). Same in 27d for 2 ircs (Deckman-GA).

Well, that about does it. I want to apologize to everyone for this column. It did not turn out the way I wanted it to. It was done in a rush because of some recent problems with my car and a recent business trip. I hope that the information provided is of use. I have only the reports

that were sent to me for the October column now. All others have been published. The information that I have on hand now will definitely appear in the next column, along with the information that I receive for it. Then I will be all caught up and things will go easier again. So I guess that I will fill up the rest of the space with pictures. Best of luck until next month and best DX. 73 Leon, N2EKL.

Cusco, 26 de Enero de 1984.

Señor.
Christopher R. Lobdell
U S A (EE UU).

Estimado amigo:

Fue en nuestro poder su atenta carta e informe de recepción de nuestra Emisora RADIO TAWANTINSUYO, el cual nos complace muy de veras, que nuestras Ondas hayan sido sintonizadas por Ud. así mismo queremos informarle que en unos meses estaremos saliendo con equipos mas potentes al actual en Onda Corta y seguiremos esperando que Ud. nos de algun informe de como llega nuestra emisora Radio Tawantinsuyo en las horas que Ud. nos sintoniza según su informe a horas local 4.50 a 5.23 A.M. de fecha 11 de marzo de 1979, en la frecuencia de 6,175 Kilohertz.

Nosotros vivimos en la ciudad del Cusco, denominada Capital Arqueológica de América, estamos a una altura de 3,300 metros sobre el nivel del mar, es una Ciudad Colonial y con muchos lugares y ciudadelas de Turismo como la ciudadela de Machupicchu, fortaleza de Sacsayhuaman, El valle sagrado de los incas y bellos templos que dicen mucho de nuestra cultura, así como la fiesta al sol que es el Inti Raymi.

Así mismo, la organización de Radio Tawantinsuyo, tiene un conjunto de Danzas del Tawantinsuyo, que interpretan danzas típicas de la Region, y los diferentes y variados trajes tienen un bello colorido, el Director de este conjunto es mi esposo el Ing. Raúl Montesinos Espejo a quien Ud. dirige la carta, y como el esta ausente, en la Capital del Perú Lima, al recibir su carta me apresure a darle respuesta, así mismo agradecerle por las estampillas, calendario y la targeta postal muy interesante.

Adjuntaros a la presente unos recuerdos del Cusco para Ud., en la targeta de Radio Tawantinsuyo estoy Yo y mi hijo que a la fecha tiene 13 años y el traje que luce es típico de Tinta de la Provincia de Canchis.

Sin otro particular y en espera de su recepción quedo de Ud.

Atentamente

RADIO TAWANTINSUYO

JEFF KNAPP 1823 7th Avenue Charleston, WV 25312
1-304-344-9801(week days) 1-304-343-3138 (nites)

Let's all bid Jeff a hearty welcome, via our utz submissions.....

New Publication - "Handbuch der Funknavigationshilfen" (Radio Beacon Handbook) This is an english translation of a 1983

German publication by Dr. Jürgen Trochimczyk. This manual lists over 9,000 Long/Medium wave beacons, throughout the world. Info is arranged by geographical areas. Pertinent data is presented alphabetically by call sign, then freq, country, location, & where noted, geographical coordinates, nominal range/output power & service type. This book gives the LMCA manual a run for its money. The only shortcoming is its lack of a freq/callsign cross reference. Nevertheless, it is up to date and very comprehensive, 5.5 x 8" softbound - 251 pages. There is one problem. This copy was sent in by Gilfer Associates for Frendk. No info as to exactly whom to order from, nor the price. When I get this info, I'll pass it onto you.

Grove Publications - "Behind The Dial" A reprint of the 1977 73 Magazine publication by Bob Grove. It cover basic topics of radio waves & propagation, antenna systems, shack layout & receivers, QRN and what to do about it. Also a short discourse on scrambled xmsms. The rig section is somewhat outdated, due to its 1977 writing. It is informative, and for the \$3.95 ppd price, not a bad deal. 8.5x11 - 64 pages.

"Shortwave Directory" (1.6 to 30 MHz) 2nd edition. This is a reference book that I can recommend for the utes. Covers virtually every ute area to one degree or another, on a worldwide basis, for voice, CW & RTTY/FAX modes. The only obvious shortcoming is that the USAF bases need correction & updates, in a few areas. Otherwise, it is well worth having as a utility reference book. 8.5 x 11 - 174 pages. \$12.95 ppd. Comes to you loose, 3-hole punched. You must supply a standard 3-ring binder. Both of the above can be had from:

XMSN MODES: A-am.. C-continuous wave(CW).. F-facsimile.. I-independent side band.. L-lower side band.. M-modulated CW.. R-radioteletype.. S-single side band.. U-upper side band.. 3-A3H..

We had only 30 this month, and this was the smallest number since I took over. Several reasons for this. Some of you were confused just who to send into. Speedx itself fell victim to this, and I received nothing from the CDE. Others I assume just didn't want to be part of the wake. Even so we did have 2 new first timers, and this upheld the tradition of having at least one new face per issue. To those of you who sent, via CDE, Speedx will give you credit, even though your material didn't make it to this column.

*** QSL returns... I held off printing this. All QSL submissions will be sent to Jeff, for inclusion in his first column.

*** I want to use the remainder of this column to say a few things to you.
 LOGGINGS... It is your right to send in as many loggings as you wish. A large number from a single individual, during the summer months, can usually be accommodated with no problem. During the winter months, many more uses input, and therefore the editor must give each, their fair share of line spaces. When the total submission input exceeds the allotted pages, then it becomes the right of the editor to exclude loggings. I strongly advise that you pre-screen your submissions, during the winter months, and only send in what you consider to be good or unusual loggings. From the editors standpoint, 20 good ones is better than 50 of everything you logged. Don't burden your editor with a large number of submissions & let him pick and choose. It is far better for all concerned, that you pre-screen. I'm sure that Jeff will appreciate this, during the winter months.

Logging Data (IDENTS)... many stations are known by both their official call letters & station name. Ships are one example. Where necessary, the editor will include both, so using common sense, it is advisable for you to include both. This gives the editor all the basic station indent data, and precludes him having to search out which of the two aspects you did not include. This is a needless waste of time for the editor, and during some months, he'll need all the time he can just to get the column out on time.

By both pre-screening & providing complete logging data, you make the editors job that much easier.

**** Don't flip flop loggings and report the same stations. Example: USA 6506.4 0250 GMT-NM CG Portsmouth VA wkg CGC Hamilton SHIP 6506.4 0250 GMT- CGC Hamilton wkg CG Portsmouth

This is nothing more than a duplicate logging. Choose one or the other to send in.

**** If you cut your loggings into strips, use a regular #10 size envelop & mail them flat. On several occasions I've received submissions in a USPO plastic bag. The strips were folded over, making a fat bulge, and when this went through the FO machinery, the envelop and contents were ripped up. Hence the mangled remains were delivered in a sealed plastic bag.

**** SRGU - It is in trouble, as the lack of further installments indicate. Let me correct a misconception. Speed itself doesn't materially support the SRGU. In other words, Speed has not gone out and purchased all of the available governmental & international radio regulatory publications. The concept of the SRGU is, for the uses, by the uses. You make the SRGU what it is.

When I took over, I had the assistance of three local people. Since then, it has been reduced to just one - me. There is no organization backing the SRGU. You are the backers. My primary job is to act as a central data input bank, from which I then collate, assemble and type up the installments. I do not have the financial resources to purchase all of the gov't/ITU type publications, nor am I totally aware of all the available material that can be acquired. You have bits & pieces of data that I require, and when this total input is accurate & comprehensive, the results can be like the USOC section. (now needs update on aircraft & cutters)

Mailing addresses is another big problem. I have repeatedly asked for this data, but few of you send it in. So how can I verify addresses and compile new ones, when there is but scant input on this? If you have data that is not in the SRGU, but all means send it to me. Don't assume that I already have it.

**** AIRCRAFT ****

I will be quite frank. After I put together what I now have, if there continues to be no measurable support, I will terminate my association with the SRGU. I will not expend my free time, nor utilize anymore money out of my own pocket, to SINGLE HANDEDLY produce the SRGU. Some of you have inquired and complained about the lack of follow on installments - now you know why. If you want an accurate and comprehensive SRGU, then you will have to send in the data that you have. If not, I'll hand this project back to Speedx.

These are my last direct comments to you. Some were designed to make Jeff's job a little bit easier, while the SRGU discussion sums up what the project has degenerated into.

But no matter, I've enjoyed rag chewing with you these past four years. You may not have cared to read my babbling, but for me it was the most practical and cost effective manner to reach all of you.

It is not easy being a utility editor. The subject is so diverse that it is impossible for any one radio buff, to be totally proficient in all of its many aspects. The task is even harder when you are expected or perceived to be, a wise all knowing utility sage. The burden comes with the position, and I only hope I pulled it off OK.

You've got to suffer through just one more page, and then that is it. After which, I'll be just like you - another happy go lucky utility contributor.

**** Well gang, as Porky Pig said it, "that's all folks". I'd like to say that the past four years were all fun and games, but 50 columns and roughly 440 pages of typing, were hard work... and in the course of this, almost 350 of you left your mark in this column.

We utes did accomplish much, for via your support, we took a minority SWL interest, and ended up, line for line, the largest single column in this bulletin. If there is credit due, then you earned it.

Yet even then this rotated/dual column, with massive abbreviations, couldn't contain the heavy winter season input. Support simply outpaced the ability of its fixed page allotment to handle it.

But out of all of this we have shown our SWBC brethren, that the bazaar world of utilities has a wide spread and dedicated following. Utility stations represent the real world, going about its daily routine. Via ute monitoring, you are feeling the pulse & hearing the heartbeat of this planet and its inhabitants. Ute monitoring is a complex, diverse and unique radio endeavour, and those of you who heed its strange calling, are yourselves, a unique breed among your fellow SWERS. Unique yes, but special no. Utility buffs are just as odd or conservative as their SWBC counterparts.

What all of this really means is, that whether one is a disciple of SWECING or the utilities, the only real difference is the radio monitoring arena to which each subscribes to.

I trust that all of you realize, that it is this combination of radio interests, presented via the bulletin, that makes Speedx what it is..... and Speedx can ill afford to be without one or the other, either in representation or support.

Starting next issue, Jeff Knapp will pilot this column. How he presents your loggings & the format he'll adopt, will be of his own choosing. Undoubtedly there will be changes, major to minor, but as your editor, it is his responsibility to present the utility column in the best way he knows how. Jeff will be getting his feet wet, so let us all be understanding, while he sorts things out.

If you feel that you owe me anything, show it by supporting Jeff and go on to make the Speedx utility column, even better than what it was.

Well Jeff, she's your baby now. I wish you the best of luck, and good fortune.... Go for it !!!

THANKS gang... that simple word can not express what I really feel, but it is voiced with all measure of sincerity, and with the full impact of its meaning.

Here's looking at you kid... All the best to each of you in your utility endeavours.
and my the God or force that you believe in, keep you out of harm's way.....

THE FOLLOWING COLUMNS DIRECT CONTRIBUTIONS WERE NOT RECEIVED IN TIME:

WESTERN HEMIS/UTES/QSLs/PGM PANORAMA

THE FOLLOWING COLUMNS ARE INCLUDED FROM LAST MONTHS BULLETIN:

AFRICA/UTILITIES

NOTES FROM PUBLISHING HEADQUARTERS:

THANKS TO JOHN TRAUTSCHOLD for not filling this page. It gives me a chance to update some information and make a few brief comments on the publication of the SPEEDX bulletin. Of course, John didn't realize he was doing me a favor at the time, but that's the way it works out, hi! Here goes...

CHRIS LOBDELL'S "STATION SKEDS" COLUMN has still not arrived here in Mt. Pleasant as of today (9-24). Considering Chris' long-perfect record, I waited a couple of extra days for it to arrive. But, in fairness to everyone, I can't wait another day. Guess the USPS lost it somewhere along the way. I'm sure, though, that all contributions will be credited, and when it arrives, hopefully Rick Drollinger and I can find a way to print this month's column in the November issue. Once again, I apologize for its omission, but I hope you understand my reasoning for not waiting.

I DON'T WANT TO SOUND LIKE A SHILL, and I'm not selling subscriptions, hi! but my hat's off to Tom Kneitel and the rest of the staff at *POPULAR COMMUNICATIONS*. Tom writes a real nice editorial in the October issue dealing with shortwave listener clubs, like SPEEDX. He points out the ups and downs of being a member, as well as the frustrations and joys of the many volunteers who run the clubs: editors, coordinators, board members, etc. *POP'COMM* puts in a plug for SPEEDX quite often, recommending us to many new shortwave listeners. Maybe a few of you are among that group. Just wanted to return the favor, Tom. Thanks for your insight and understanding.

SOME QUESTIONS HAVE ARISEN of late as to where Changes of Address should be sent. I'd guess this is probably due to the listing of all staff members' addresses on the back cover. To clear the air, let me state that all Changes of Address should be sent to Jack Sanderson at club HQ in Tucson, Arizona. I've received a couple of late which I have forwarded to Jack. So please send those COAs to Tucson from now on.

AN INVITATION IS EXTENDED to any SPEEDXers who are even slightly artistic! I need some new cover designs for the bulletin. My file is getting kind of thin, and I'd welcome any and all submissions. All designs receive one credit point. If you draw it yourself, use black ink on white paper only, as blue ink doesn't reproduce very well. If you just have a great idea, but feel your artistic talents are rather weak, jot down the idea as you envision it and send the description to our talented Central Distribution Editor, Peggy Thompson, whose address is on the back cover. Many of our current designs are Thompson artworks, either from her own inspiration, from a collaboration with another great artist (i.e. John Demmitt), or from ideas sent in by plain Joes like you and I. So send in those covers today!

ANOTHER INVITATION... SPEEDX President John Trautschold mentioned to ye publisher the other day about you, the membership, letting the Board of Directors members know what you think of the club, and what improvements you'd like to see. Be informed that this is an open invitation, with no time limit! Please let those able leaders know what you think by writing them with your comments. All of their addresses are on the back cover. Also, you'll notice the addition of Managing Editor Rick Drollinger to the BOD list. Welcome to the top, Rick! And I'm sure he'd be happy to hear from you with congratulations or ???, hi!

ALONG THE SAME LINES, if you have a question, comment, or suggestion concerning the bulletin, feel free to direct these letters to either Rick D. or myself. We are always trying to improve the layout and content of SPEEDX, and would like to hear what you have to say.

A REMINDER THAT EDITORS David Sharp and John Cereghin are beginning work on Guides to African and Latin American DXing, respectively. These Guides will be put together under the auspices of our Special Projects arm, headed up by the ever-able Kraig Krist. These fellows would sure appreciate whatever assistance you might offer toward these publications, whether in terms of writing articles, offering suggestions, contributing information, or helping with the typing and layout. If you're an African or Latin American DX chaser, even if you're a relative newcomer to the hobby, give the rest of the DX world the benefit of whatever experience you've had by contributing to these Guides. They're SPEEDX publications...which means they're really put together by you, the members of SPEEDX. Thanks.

WHILE ON THE SUBJECT, remember that SPEEDX HQ has numerous publications and DX-ing aids available at low cost to SPEEDX members. David Sharp lists just a couple on page two, but a complete list can be had by mailing a SASE to club HQ, address on the back cover. Jack (Master Salesman) Sanderson will be glad to fix you up with the latest list of SPEEDX goodies for you to select from.

I'M VERY GLAD TO WELCOME TWO NEW EDITORS TO SPEEDX, starting next month. Jeff Knapp will be taking over "Utility Scene" from Mike Chabak, and J. Speed Gray is the new "SWBC Africa" editor, replacing Mark Koukol. I'm sure you'll join me in thanking these two men for volunteering, and I'm looking forward to their first efforts, coming up in the November SPEEDX.

I ALSO WANT TO EXPRESS A HEARTFELT "THANKS" to Mark and Mike, for their years of service to the club. We all really appreciate the work you've done, gentlemen, and also hope you will continue to stay active in whatever way you can. Once again, thanks for a job well done!

SPEEDX "WANT ADS" EDITOR David (One Month Only) Sharp would like to remind one and all that all want ads should be sent to him in Lutz, Florida! This month, we were going to catch up on a backlog of ads until we realized that I cleared 'em out last month! So there's only one ad, hi! Of course, if you send lots of ads to "ds" this time around, you won't have to read my drive! in November, HI HI HI!

FINALLY, I'd like to repeat a point that John Cereghin makes at the end of his column this month. It has also been asked of me in the last couple months... "What's wrong with SPEEDX? Is the end near?" Let me respond to that... I do not know where that idea started. I admit we've had a bit of a turnover of late in editors, but every volunteer organization ever invented has had that problem from time to time. Let me assure you that SPEEDX is in fine shape, financially, membership-wise, and in spirit. Even now we are working to make this club better and better.

We comprehend the changes taking place in our hobby as well as in the overall field of communications. We stand ready to make similar changes in SPEEDX as the needs arise. And, believe me, I would not have volunteered to be the publisher of SPEEDX if I even remotely thought I'd be out of a job after less than a year. SPEEDX will be around for yet awhile...so I guess you are stuck with me for awhile, too...hi!

Thanks for a fun five months!
73/Great DX,

Tom
Tom Kephart
