RCA Receiving Tubes

Chart 1. is arranged to permit quick determination of the type designations of (A) RCA picture tubes according to their envelope size, focus method, and deflection method; and (B) all other RCA receiving tubes according to their functions and filament or heater voltages. Chart 2. starting on page 6 lists characteristics and operating data of all RCA receiving tubes. Chart 3. starting on pages 38 and 39 lists characteristics and operating data of all RCA picture tubes. Both Charts 2. and 3. include RCA discontinued types.

1. RECEIVING TUBE CLASSIFICATION CHART

A—Picture Tubes

Light Face = Discontinued type.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

Four vertical rules before or after type No. = Subminiature type.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by $\frac{1}{8}$ (approx.) of filament voltage.

● Grids # 3 and # 5 are screen. Grid # 4 is signal-input control grid.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

▸ Supply voltage applied through 20000-ohm voltage-dropping resistor.

♣ Obtained preferably by using 70000-ohm voltage-dropping resistor in series with a 90-volt supply.

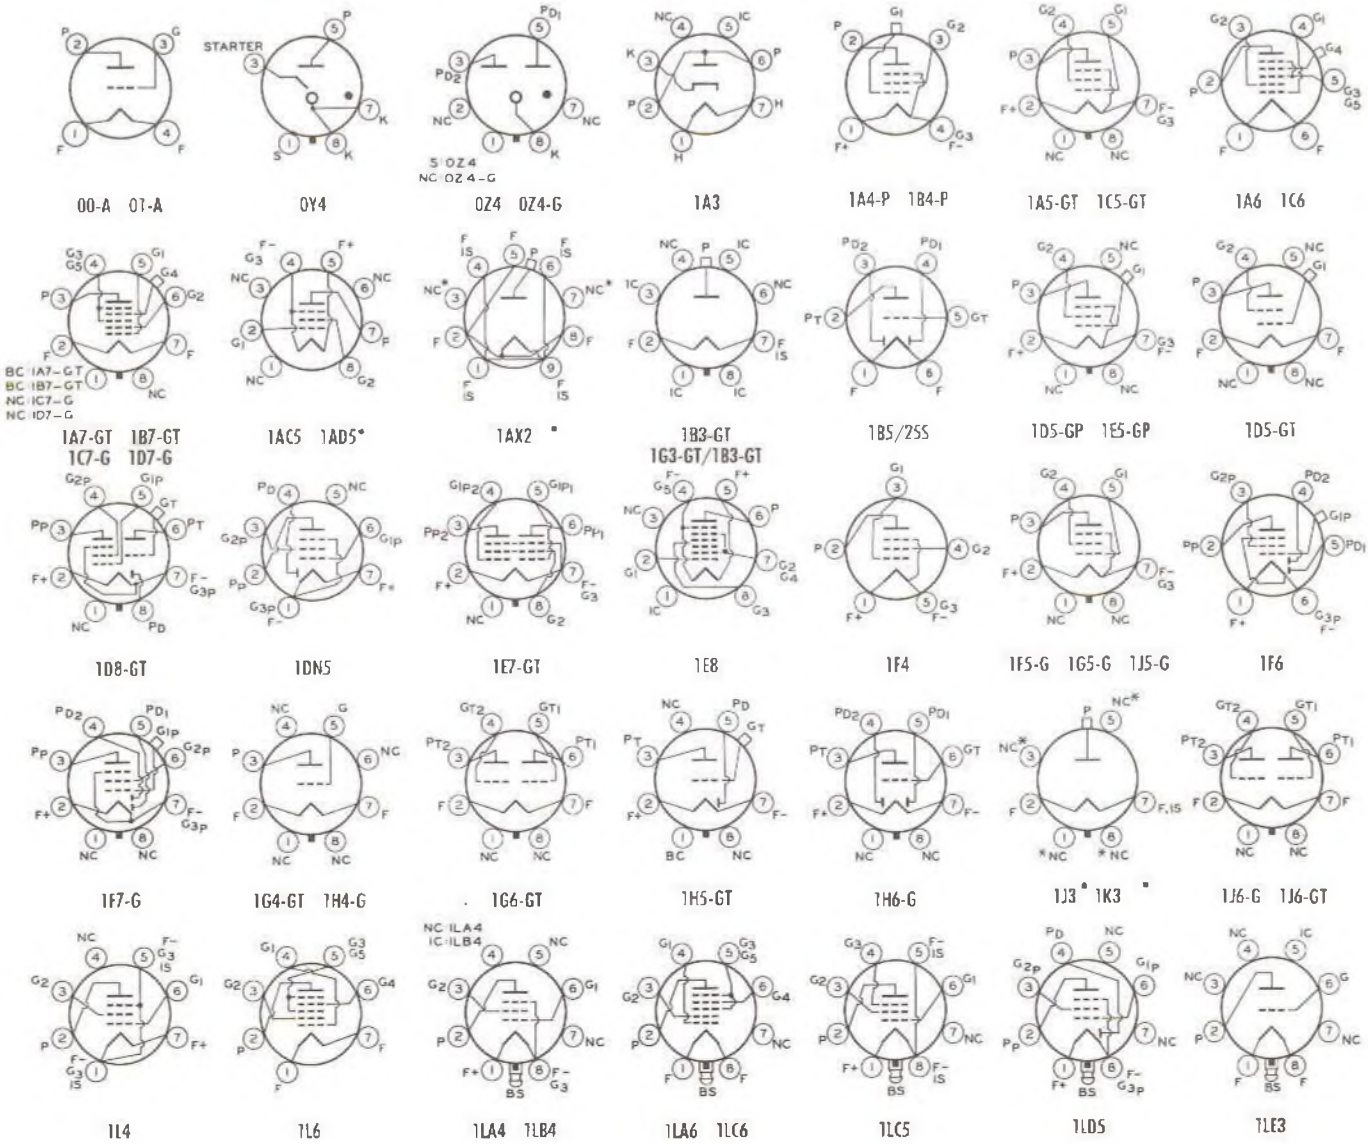
§ Megohms.

♠ For two tubes.

† Power output is for two tubes at stated plate-to-plate load.

★ For Grid-leak Detection—plate volts, 45; grid return to + filament or to cathode.

◔ 50000 ohms.



• Pin No. 4 includes an internal shield.

■ Pin numbers with asterisks may be connected to filament, otherwise do not use.

Light Face – Discontinued type.

One vertical rule before or after type No. = GT or other larger glass type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

Four vertical rules before or after type No. = Subminiature type.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ½ (approx.) of filament voltage.

● Heater has controlled warm-up time for series-string operation.

▲ Grids # 2 and # 4 are screen. Grid # 3 is signal-input control grid.

◆ Grids # 3 and # 5 are screen. Grid # 4 is signal-input control grid.

Note 1: Subscript 1 on class of amplifier service (as AB_1) indicates that grid current does not flow during any part of input cycle.

§ Megohms

♠ For two tubes.

Light Face = Discontinued type.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ½ (approx.) of filament voltage.

● Heater has controlled warm-up time for series-string operation.

▫ Grids # 3 and # 5 are screen. Grid # 4 is signal-input control grid.

◣ Supply voltage applied through 20000-ohm voltage-dropping resistor.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

Note 1: Subscript 1 on class of amplifier service (as AB_1) indicates that grid current does not flow during any part of input cycle.

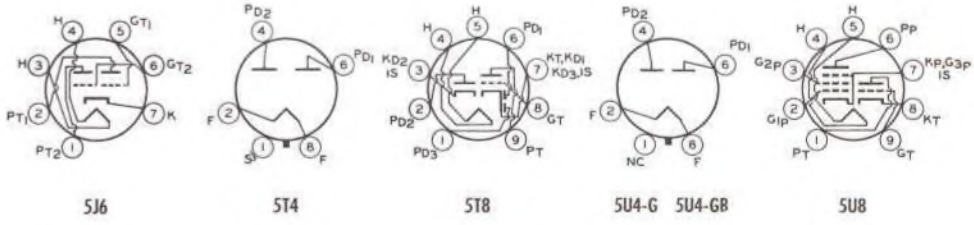
♠ For two tubes.

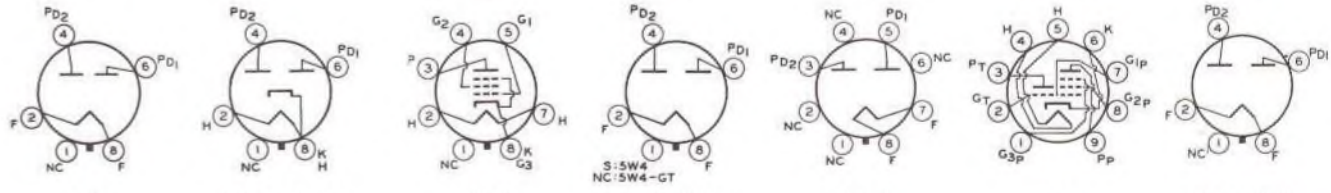
! Power output is for two tubes at stated plate-to-plate load.

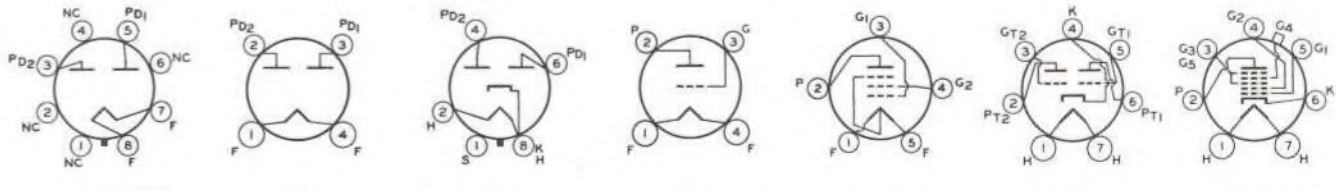
▲▲ Both grids connected together; likewise both cathodes.

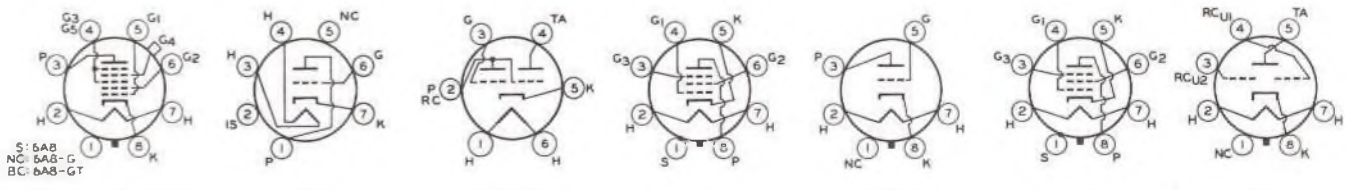
√ With separate excitation and triode unit grounded.

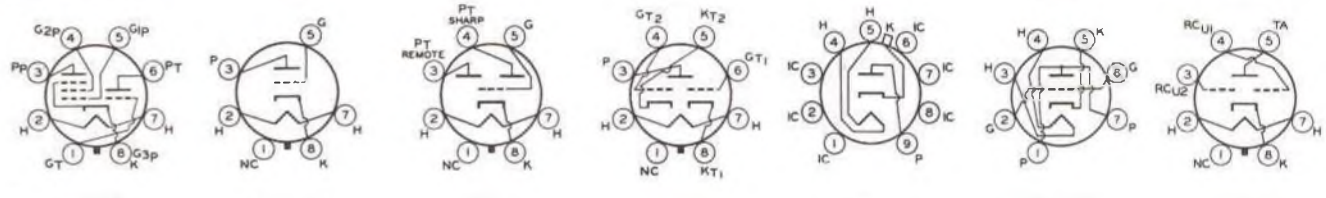
⌀ 50000 ohms.











• *Pin Nos. 4 and 6 are omitted.*

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

Light Face = Discontinued type.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ½ (approx.) of filament voltage.

● Heater has controlled warm-up time for series-string operation.

▲ Grids # 2 and # 4 are screen. Grid # 3 is signal-input control grid.

□ Grid # 2 tied to plate.

✖ Applied through plate resistor of 250000 ohms.

Note 1: Subscript 1 on class of amplifier service (as AB_1) indicates that grid current does not flow during any part of input cycle.

§ Megohms.

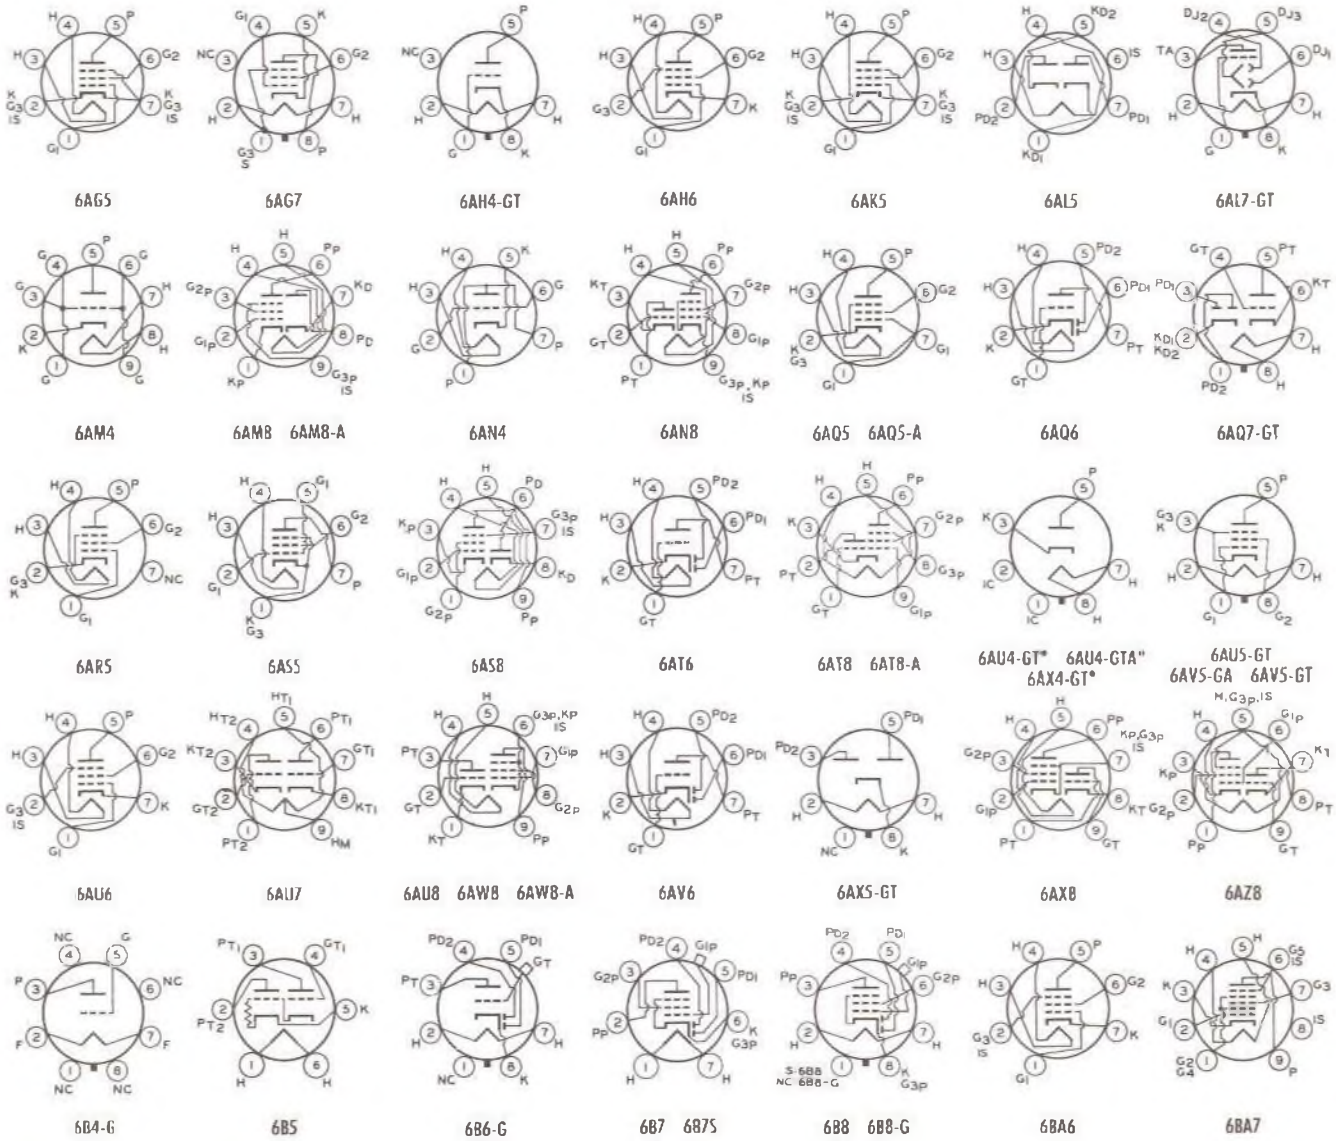
♠ For two tubes.

† Power output is for two tubes at stated plate-to-plate load.

** For grid of following tube.

*/ With separate excitation and triode unit grounded.

▣ With tube mounted horizontally and pins No. 4 and No. 8 in a vertical plane (pin No. 4 on top), deflecting electrode No. 1 controls left-hand section of pattern, deflecting electrode No. 2 controls top right-hand section of pattern, deflecting electrode No. 3 controls bottom section of pattern.



* Socket terminals 1, 2, 4, and 6 should not be used as tie points.

Light Face = Discontinued type.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ⅛ (approx.) of filament voltage.

● Heater has controlled warm-up time for series-string operation.

• Supply voltage applied through 20000-ohm voltage-dropping resistor.

Note 1: Subscript 1 on class of amplifier service (as AB$_1$) indicates that grid current does not flow during any part of input cycle.

♥ Applied through plate resistor of 100000 ohms.

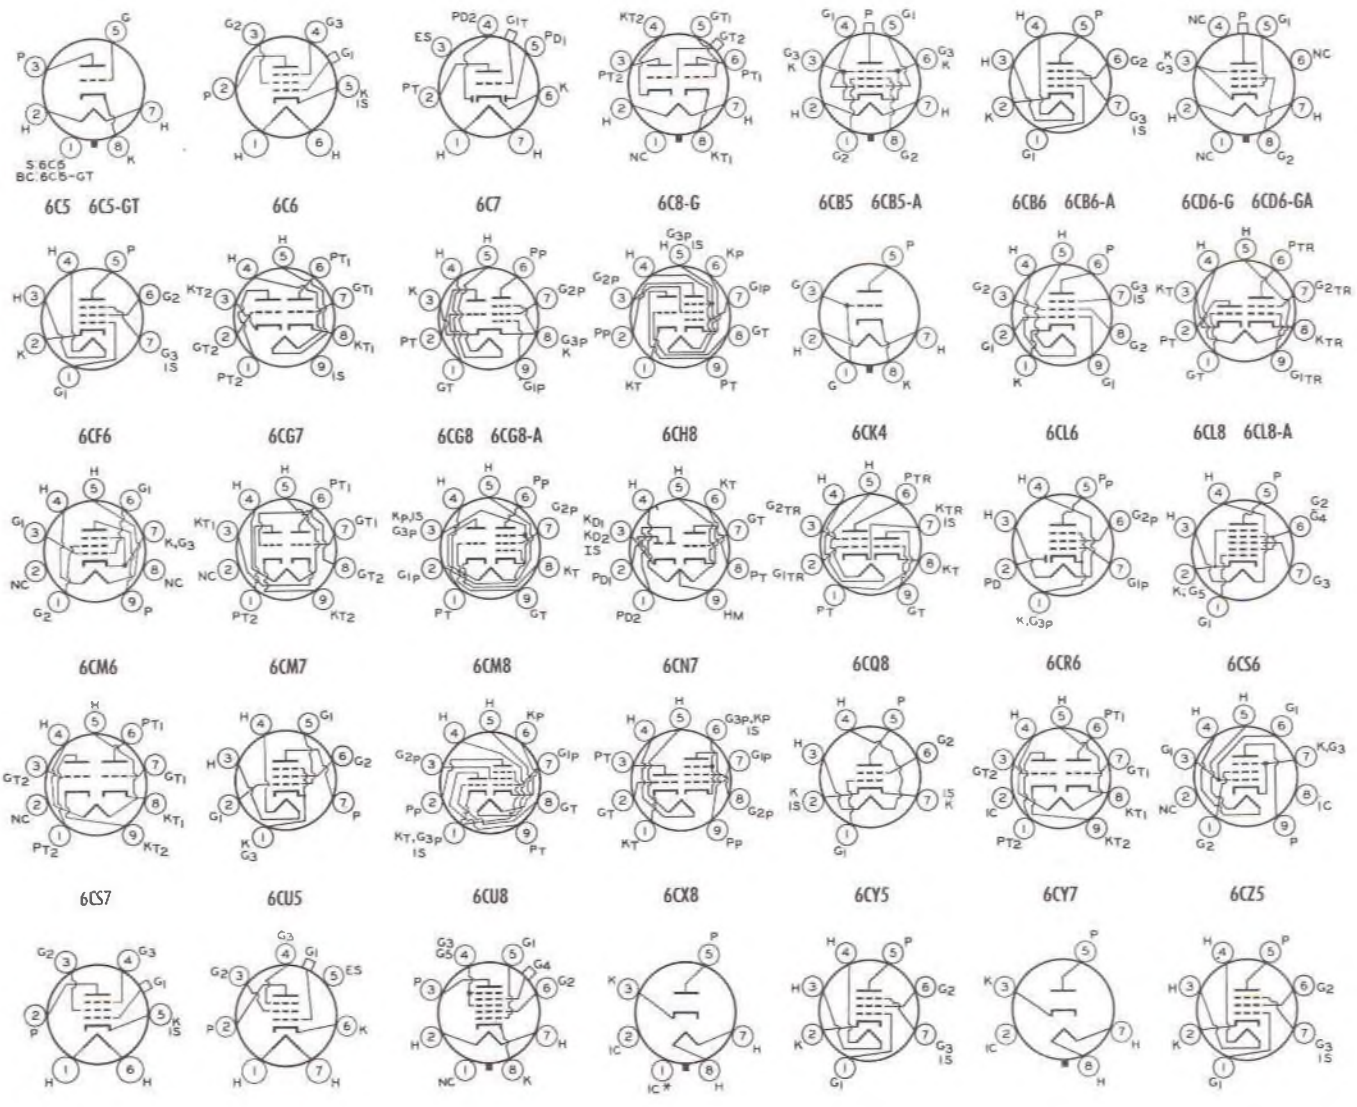
§ Megohms. □ Grid # 2 tied to plate.

♠ For two tubes.

•• For grid of following tube.

√ With separate excitation and triode unit grounded.

♠ 50000 ohms.



Pin numbers with asterisks may be connected to filament, otherwise do not use.

Light Face = Discontinued type.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ½ (approx.) of filament voltage.

● Heater has controlled warm-up time for series-string operation.

✖ Applied through plate resistor of 250000 ohms.

▲ Supply voltage applied through 20000-ohm voltage-dropping resistor.

§ Megohms.

♠ For two tubes.

† Power output is for two tubes at stated plate-to-plate load.

** For grid of following tube.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

Light Face = Discontinued type.

● Heater has controlled warm-up time for series-string operation.

▲ Grids # 2 and # 4 are screen. Grid # 3 is signal-input control grid.

▲ Grids # 2 and # 4 are screen. Grid # 1 is signal-input control grid.

« Applied through plate resistor of 250000 ohms.

♥ Applied through plate resistor of 100000 ohms.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

Note 1: Subscript 1 on class of amplifier service (as AB_1) indicates that grid current does not flow during any part of input cycle.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by 1/3 (approx.) of filament voltage.

† Power output is for two tubes at stated plate-to-plate load.

‡ Each unit. § Megohms. ♠ For two tubes.

¶ For signal-input control-grid (# 1); control-grid # 3 bias, −3 volts.

° Both grids connected together; likewise, both plates.

°° For grid of following tube.

ø For television damper service.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ½ (approx.) of filament voltage.

● Heater has controlled warm-up time for series-string operation.

▲ Grids # 2 and # 4 are screen. Grid # 3 is signal-input control grid.

▫ Grids # 3 and # 5 are screen. Grid # 4 is signal-input control grid.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

♠ Supply voltage applied through 20000-ohm voltage-dropping resistor.

Note 1: Subscript 1 on class of amplifier service (as AB_1) indicates that grid current does not flow during any part of input cycle.

§ Megohms. Light Face = Discontinued type.

♣ For two tubes.

† Power output is for two tubes at stated plate-to-plate load.

◆ 50000 ohms.

One vertical rule before or after type No. = GT or other larger glass type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

Light Face – Discontinued type.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ½ (approx.) of filament voltage.

● Heater has controlled warm-up time for series-string operation.

◎ For use in automobile receivers which operate directly from 12-volt storage batteries.

▲ Grids # 2 and # 4 are screen. Grid # 3 is signal-input control grid.

▫ Grids # 3 and # 5 are screen. Grid # 4 is signal-input control grid.

✖ Applied through plate resistor of 250000 ohms.

For key to tube dimensions and legend for base and envelope connection diagrams, see page 37.

Note 1: Subscript 1 on class of amplifier service (as AB1) indicates that grid current does not flow during any part of input cycle.

§ Megohms.

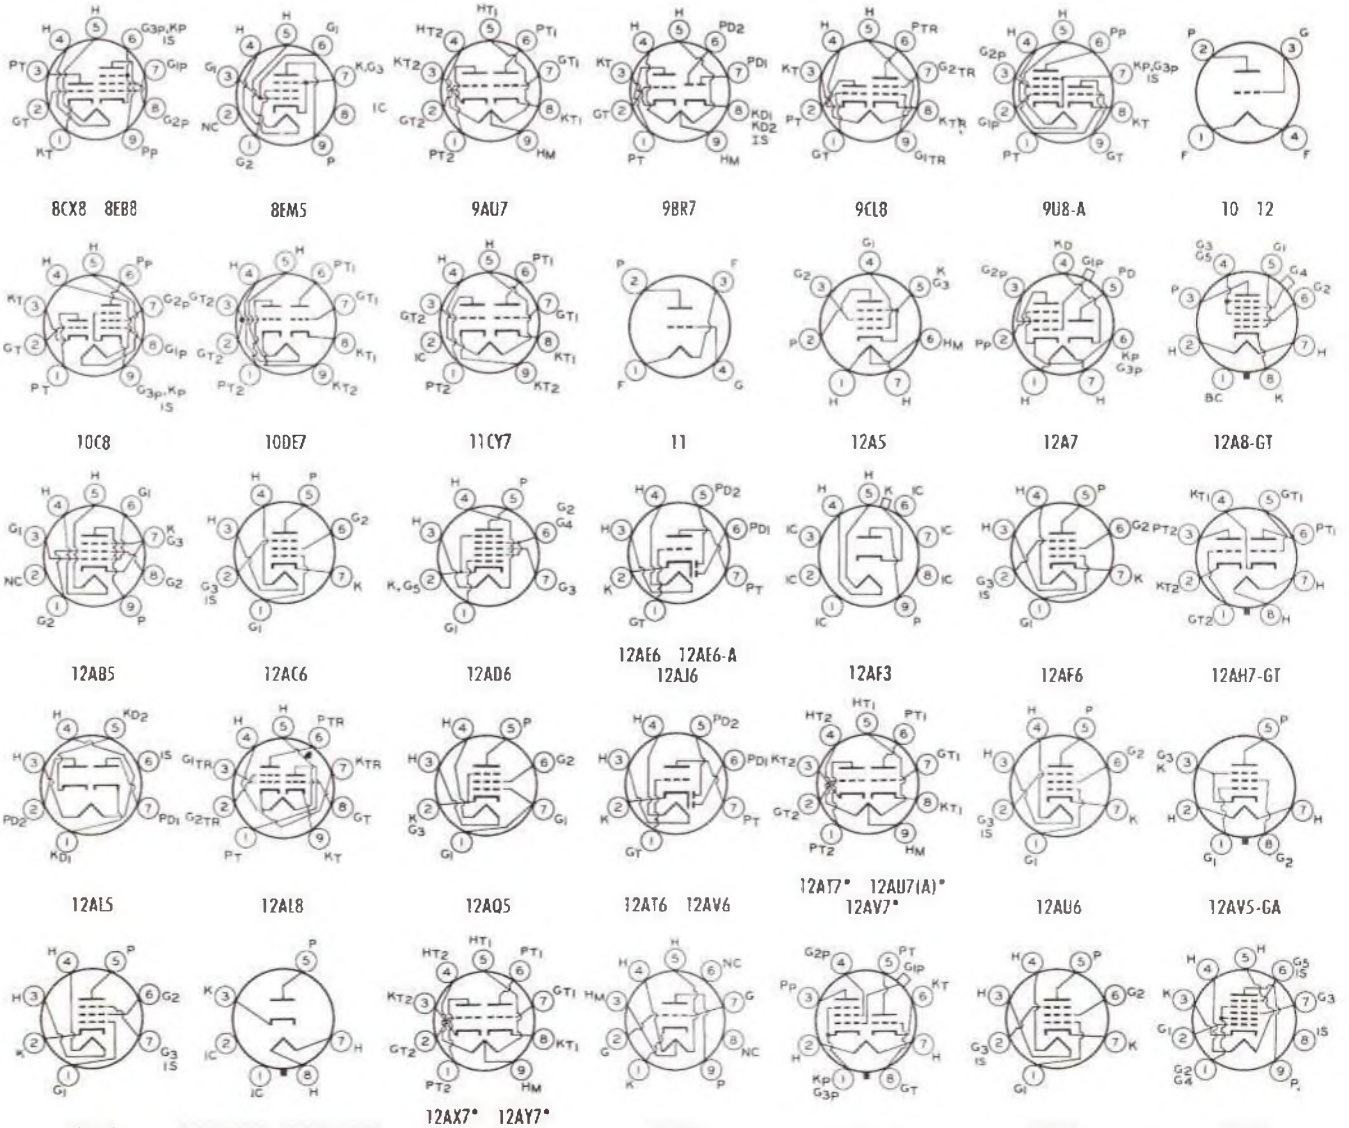
✚ For two tubes.

* Power output is for two tubes at stated plate-to-plate load.

★ For Grid-leak Detection—plate volts, 45; grid return to + filament or to cathode.

** For grid of following tube.

® Superseded by 10-Y. See Power and Gas Tubes Booklet PG-101D.



• Heater for section 2 between pins 4 and 9; for section 1 between pins 5 and 9.

•• On the 5-pin bases, pin 1 as well as pin 4 and 6 is omitted.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

Light Face = Discontinued type.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by ⅛ (approx.) of filament voltage.

▲ Grids # 2 and # 4 are screen. Grid # 3 is signal-input control grid.

● Grids # 3 and # 5 are screen. Grid # 4 is signal-input control grid.

⊖ For use in automobile receivers which operate directly from 12-volt storage batteries.

One vertical rule before or after type No. = GT or other larger glass type.

Two vertical rules before or after type No. = Metal type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

■ Either ac or dc may be used on filament or heater, except as specifically noted. For use of dc on ac filament types, decrease stated grid volts by 1/2 (approx.) of filament voltage.

▲ Grids # 2 and # 4 are screen. Grid # 3 is signal input control grid.

♥ Applied through plate resistor of 100000 ohms.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

Light Face = Discontinued type.

§ Megohms.

* Maximum.

= Value is for both units operating at the specified conditions.

★ For Grid-leak Detection — plate volts, 45; grid return to + filament or to cathode.

◇ For television damper service.

One vertical rule before or after type No. = GT or other larger glass type.

Three vertical rules before or after type No. = Miniature type having either 7 or 9 pins.

Light Face = Discontinued type.

For key to tube dimensions and, legend for base and envelope connection diagrams, see page 37.

■■ Grid # 1 is control grid. Grid # 2 is screen. Grid # 3 tied to cathode.

¶ Grid # 1 is control grid. Grids # 2 and # 3 tied to plate.

For data on RCA Picture Tubes see pages 38 through 47.

Note 1: Subscript 1 on class of amplifier service (as AB_1) indicates that grid current does not flow during any part of input cycle.

§ Megohms.

♠ For two tubes.

† Power output is for two tubes at stated plate-to-plate load.

⧈ Grid-No. 2 of each tube connected to tap on plate winding of output transformer. This arrangement permits approximately 40% to 50% of the plate signal voltage to be applied to Grid-No. 2 of each output tube.

LEGEND FOR BASE AND ENVELOPE CONNECTION DIAGRAMS

Bottom Views

Subscripts B, D, HP, HX, P, T, and TR indicate, respectively, beam unit, diode unit, heptode unit, hexode unit, pentode unit, triode unit, and tetrode unit in multi-unit types.

BC — Base Sleeve
BS — Base Shell
C — External Conductive Bulb Coating
CL — Collector
DJ — Deflecting Electrode
ES — External Shield
F — Filament
F_M — Filament Mid-Tap
G — Grid
H — Heater
H_L — Heater Tap for Panel Lamp
H_M — Heater Mid-Tap
IC — Internal Connection—Do Not Use
● — Gas-Type Tube
IS — Internal Shield
K — Cathode
NC — No Connection
P — Plate (Anode)
RC — Ray-Control Electrode
S — Shell
TA — Target
U — Unit

• ULTOR is defined as the electrode, or the electrode in combination with one or more additional electrodes connected within the tube to it, to which is applied the highest dc voltage for accelerating the electrons in the beam prior to its deflection.

§ Positive bias value = 0 volts; positive peak value = 2 volts.

◆ Referred to grid No. 1—Cathode-Drive Service.

• During equipment warm-up not exceeding 15 seconds.

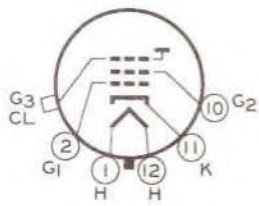
= Grid No. 2 connected to final high-voltage electrode within tube.

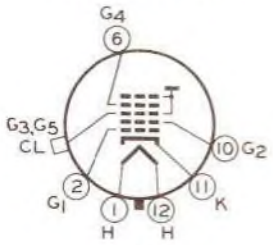
▲ Each gun.

▲ This value has been specified to take care of the condition where no voltage is provided for dynamic focusing.



F

ULTOR = G_3 + CL



G

◆ ULTOR is defined as the electrode, or the electrode in combination with one or more additional electrodes connected within the tube to it, to which is applied the highest dc voltage for accelerating the electrons in the beam prior to its deflection.

§ Positive bias value = 0 volts; positive peak value = 2 volts.

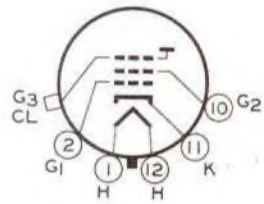
◆ Referred to grid No. 1—Cathode-Drive Service.

* During equipment warm-up not exceeding 15 seconds.

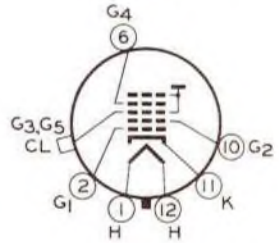
= Grid No. 2 connected to final high-voltage electrode within tube.

- Each gun.

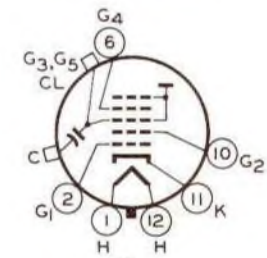
▲ This value has been specified to take care of the condition where an ac voltage is provided for dynamic focusing.



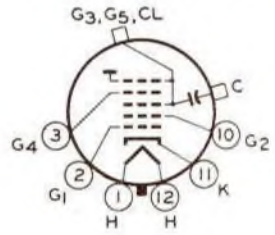
F
ULTOR = G_3 + CL



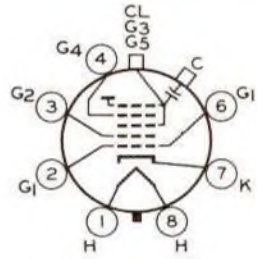
G
ULTOR = G_3 + G_5 + CL
FOCUSING ELECTRODE = G_4



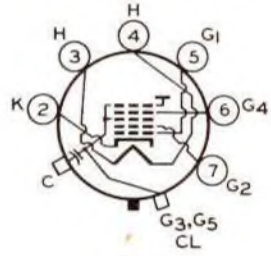
H
ULTOR = G_3 + G_5 + CL
FOCUSING ELECTRODE = G_4



J
ULTOR = G_3 + G_5 + CL
FOCUSING ELECTRODE = G_4



K
ULTOR = G_3 + G_5 + CL
FOCUSING ELECTRODE = G_4



L
ULTOR = G_3 + G_5 + CL
FOCUSING ELECTRODE = G_4

M
ULTOR = G_5 + G_6 + CL
FOCUSING ELECTRODE = G_3

N
ULTOR = G_4 + G_5 + CL
FOCUSING ELECTRODE = G_3

TECHNICAL PUBLICATIONS

ELECTRON TUBES—

• **RCA TUBE HANDBOOK**—HB-3 (7⅜" x 5¼"). Five deluxe 2-inch-capacity black binders imprinted in gold. The bible of the industry — contains over 4200 pages of loose-leaf data and curves on RCA receiving tubes; picture tubes; oscillograph tubes; special-purpose kinescopes; photosensitive devices including phototubes, photoconductive cells, photojunction cells, and camera tubes; storage tubes; gas tubes; and other miscellaneous types for special applications. Available on subscription basis. Price $17.50 including service for first year. Also available with HB-10 Semiconductor Products Handbook at special combination price of $20.00.* Write to Commercial Engineering for descriptive folder and order form.

• **RCA RECEIVING TUBE MANUAL**—RC-19 (8¼" x 5¾")—384 pages. Revised and expanded. Contains technical data on more than 625 receiving types. Features tube theory written for the layman, application information and a circuit section. Features lie-flat binding. Price 75 cents.*

• **RADIOTRON DESIGNER'S HANDBOOK**—4th Edition (8¾" x 5½")—1500 pages. Comprehensive reference thoroughly covering the design of radio and audio circuits and equipment. Written for the design engineer, student, and experimenter. Contains 1000 illustrations, 2500 references, and cross-referenced index of 7000 entries. Edited by F. Langford-Smith of Amalgamated Wireless Valve Company Pty. Ltd. in Australia. Price $7.00.*

• **RCA TRANSMITTING TUBES**—TT-4 (8⅜" x 5⅜")—256 pages. Contains basic information on generic tube types, on tube parts and materials, and on tube insulation and application. Includes technical data and curves for power tubes having plate-input ratings up to 4 kilowatts, and data for associated rectifier tubes. Contains sections on transmitter-design considerations, rectifier circuits and filters, and circuit diagrams for transmitting and industrial applications. Features lie-flat binding. Price $1.00.*

• **RCA POWER AND GAS TUBES**—PG-101D (10⅞" x 8⅜")—32 pages. Technical information on over 175 RCA vacuum power tubes, rectifier tubes, thyratrons, and ignitrons. Includes terminal connections. Price 30 cents.*

• **RCA RECEIVING-TYPE TUBES FOR INDUSTRY AND COMMUNICATIONS**—RIT-104B (10⅞" x 8⅜")—32 pages. Technical data on 190 RCA "special red" tubes, premium tubes, computer tubes, pencil tubes, glow-discharge tubes, small thyratrons, low-microphonic amplifier tubes, traveling-wave tubes, and other special types. Price 30 cents.*

• **RCA RECEIVING TUBES AND PICTURE TUBES**—1275J (10⅞" x 8⅜")—48 pages. New, enlarged, and up-to-date booklet contains classification chart, characteristics chart, and base and envelope connection diagrams on more than 900 entertainment receiving tubes and picture tubes. Price 35 cents.*

• **RCA PREFERRED TYPES LIST**—PTL-501G (10⅞" x 8⅜")—8 pages. Lists RCA Preferred Tube Types both receiving and non-receiving by function. An aid in the selection of tube types for new equipment design. Single copy free on request.

• **RCA INTERCHANGEABILITY DIRECTORY OF INDUSTRIAL-TYPE ELECTRON TUBES**—ID-1020B (10⅞" x 8⅜")—24 pages. Lists more than 2700 type designations of 33 different manufacturers; shows the RCA Direct Replacement Type or the RCA Similar Type, when available. Price 25 cents.*

• **RCA PHOTOSENSITIVE DEVICES AND CATHODE-RAY TUBES**—CRPD-105A (10⅞" x 8⅜")—32 pages. Technical information on 134 RCA tubes including single-unit, twin-unit, and multiplier phototubes; camera and image-converter tubes; flying-spot tubes; monitor, projection, transcriber, and view-finder kinescopes; oscillograph and storage tubes. Price 30 cents.*

• **RCA MAGNETRONS AND TRAVELING-WAVE TUBES**—MT-301A (10⅞" x 8⅜")—48 pages. Operating theory for magnetrons and traveling-wave tubes, application considerations, and techniques for measurement of electrical parameters. Price 50 cents.*

• **RCA TRIPLE PINDEX**—PINDEX-109 (8¼" x 5¼")—240 pages. Gives base diagrams for more than 2000 JEDEC-registered receiving types including picture tubes. Base diagrams of over 1500 receiving types are presented in triplicate to provide the user with any three base diagrams at any one time. More than 200 small industrial-receiving types and more than 200 foreign receiving types are cross-referenced to the receiving-tube section for base diagrams. Price $1.75.*

• **RCA INTERCHANGEABILITY DIRECTORY OF FOREIGN vs U.S.A. RECEIVING-TYPE ELECTRON TUBES**—ICE-197 (8⅜" x 10⅞")—4 pages. Covers approximately 450 foreign tube types used principally in AM and FM radios, TV receivers, and audio amplifiers. Indicates U.S.A. direct replacement type or similar type if available. Single copy free on request.

• **RCA HIGH-FIDELITY AMPLIFIER CIRCUITS BOOKLET**—HF-110 (8⅜" x 10⅞")—28 pages. Includes circuit diagrams with parts lists, design considerations and performance requirements, and characteristics chart of RCA high-fidelity tube types. For hobbyists, technicians, and others interested in construction of their own high-fidelity amplifier systems. Price 35 cents.*

• **RCA COLOR TELEVISION PICT-O-GUIDE**—(9⅝" x 5⅜")—200 pages. Developed and written by John R. Meagher RCA's nationally recognized authority on practical TV servicing. Prepared to aid TV technicians in trouble-shooting and adjusting color TV receivers. Color photographs are included to assist in recognizing and understanding visible symptoms of troubles and misadjustments. Price $4.50.*

• **TV SERVICING**—TVS-1030 (10⅞" x 8⅜")—48 pages. Contains articles on TV trouble shooting, TV tuner alignment, and TV circuit analysis by RCA's expert in the field of TV servicing and test equipment—John R. Meagher. Price 35 cents.*

• **TV SERVICING, SUPPLEMENT 1.**—TVS-1031 (10⅞" x 8⅜")—12-page booklet by John R. Meagher on solving trouble-shooting problems in those hard-to-service TV receivers known to service technicians as "tough" sets or "dogs". Price 15 cents.*

• **PRACTICAL COLOR TELEVISION**—Revised Edition (11" x 8½")—84 pages. Black-and-white and color illustrations. Comprehensive information on color principles, color signal, color camera, and color picture tubes. Covers commercial receiver circuit using the RCA-15GP22 color picture tube, as well as installation and service of color receivers. Provides detailed description of color-test equipment. Price $2.00.*

• **PRACTICAL COLOR TELEVISION, SUPPLEMENT 1.**—(11" x 8½")—36 pages. Describes theory, operation and servicing of large-screen color TV receiver using RCA-21AXP22. Has 55 black-and-white and color illustrations, wave-forms, and explanations of color circuits and adjustments. Price 75 cents.*

TRANSISTORS AND SILICON RECTIFIERS—

• **RCA SEMICONDUCTOR PRODUCTS HANDBOOK**—HB-10 (7⅜" x 5⅝"). Deluxe 2⅞-inch capacity red binder imprinted in gold. Contains over 400 pages of loose-leaf data and curves on semiconductor devices such as germanium transistors, silicon transistors, and silicon rectifiers. Available on subscription basis. Price $5.00* including service for one year. Also available with HB-3 Tube-Handbook at special combination price of $20.00.* Write to Commercial Engineering for descriptive folder and order form.

• **RCA SEMICONDUCTOR PRODUCTS**—SCD-108B (10⅞" x 8⅜")—40 pages. Contains technical data on RCA transistors and silicon rectifiers. Includes an interchangeability directory which lists over 1100 types of 29 different manufacturers, and a section on circuits containing 37 schematics illustrating some of the more important applications of these devices. Price 30 cents.*

*Prices shown apply in U.S.A. and are subject to change without notice.
