

TELEVISION

AND

SHORT-WAVE WORLD

The First Television Journal in the World

VOL. X. No. 107 to No. 118

JANUARY 1937 to DECEMBER 1937

Bernard Jones Publications Ltd.

Chansitor House

37-38 Chancery Lane

London W.C. 2

GENERAL INDEX

VOL. X. No. 107 to No. 118.

January 1937 to December 1937

- ABC of Synchronising, 403
A.C.-D.C. Electron-coupled Oscillator, 369
Acorn Valve Receiver for Vision Signals, Construction of an, 340
,, Valve Receiver for Vision Signals, First, 273
,, ,, ,, 10-metre, 49
Adjustable Crystal Holder, 509
Aerial Coupler, Autodyne, 42
,, Coupling Circuits, 502
,, Experiments, Some Television, 81
,, Mast, Cheap, 302
Aerials for Ultra-short Waves, 681
,, Some Experiments with, 367
Alexandra Palace Transmissions, Field Strength Measurements of the, 265
All-wave Super-het, 4-valve, 39
Amateurs and Broadcast Interference, 632
America's Biggest Step in Television, 260
Amplifier Design, Class B, 687
,, Direct-coupled, 680
,, Regenerative R.F., 753
,, 6L6 60-watt, 362
,, with Resistance Coupling, 23-watt, 620
Antenna Systems, Johnson Q and Other, 634
Atlantic, Television Signals Across the, 527
Autodyne Aerial Coupler, 42
Baird Big-screen Television, 26
,, Laboratories Destroyed in Crystal Palace Fire, 14
,, Scanning Equipment and Cathovisor Tube, 601
,, Television Receivers, The Evolution of Design as Exemplified in the 1926-1937, 717
B.B.C.'s Questionnaire, 78
B.B.C. to Lead in S.W. Transmission, 296
Beam Valve Oscillator, 558
Beginner's Transmitter, 52, 239
Below Five Metres, 754
Bi-directional 5-metre Aerial, 252
Big-screen Television, Baird, 26
Brighter and Bigger Pictures with the G.E.C. Receiver, 394
British Television Through American Eyes, 721
Cable, Coaxial, 202
Camera, Television, 329
Cathode-ray Tube Equipment, "Universal," 19, 99
,, ,, for the Beginner, 92
,, ,, History of the, 85
,, ,, Research at the Ediswan Laboratories, 23
,, ,, Television Projection with the, 457
,, ,, Terminology, 735
,, Tubes for Television, 80
,, ,, Projection with, 413
,, Tuning, Indicator, 382
Cathode Rays for Television—A 30-year Old Idea, 352
Cathovisor Tube, Baird Scanning Equipment and, 601
Cheap Aerial Mast, 302
Cheaper Television, 133
Cinema Installation, First, 331
Class B Amplifier Design, 687
Coaxial Cable, 202
Columbia Plans Huge Television Station, 288
Communication Receiver, Metal-valve, 166, 237
,, Receivers, Modern Amateur, 113
Completing the "Universal" Cathode-ray Tube Equipment, 155
Considerably Improved Service to Start at Once, 545
Construction of an Acorn Valve Receiver for Vision Signals, 340
Contrast or Picture Brightness? 145
Controls of a Television Receiver, 37
Converter, Mains-operated Short-wave, 297, 378
Coronation Week, Television in, 264
Cossor Cathode-ray Tube Unit, 675
Cost, Halving Receiver, 657
Coupling Circuits, Aerial, 502
C.R. Tubes are Made, How, 152
Crystal Oscillators—and the Beginner, 309
Crystal Palace Fire, Baird Laboratories Destroyed in, 14
Death of Marconi, 472
Design of the G.E.C. Television Receiver, 663
,, ,, ,, Philips' Receiver, 477
,, ,, Vision-frequency Amplifiers, 160, 220, 279
Developments, Recent Television, 13, 89, 158, 223, 285, 347, 415, 481, 543, 607, 673
Dial Ratio and Short-wave Tuning, 186
Diode Valve Monitor Meter, 111
Direct-coupled Amplifier, 680
Divider, Glow-gap, 332
Easy Home Construction, Televisor for, 644
Ediswan Laboratories, Cathode-ray Tube Research at the, 23
Effective 5-metre Installation, 630
Efficient 1-V-1 Receiver, 749
Eiffel Tower, Super-Power Television Transmitter for the, 287
Electron Apparatus at the Physical Society's Exhibition, 76
Electron Camera, New, 467
Electron-coupled Oscillator, A.C.-D.C., 369
Electron Optics, 164
Electronic Light Relay for Large Pictures, 716
,, Television, 4
Everest Transceiver, 228
Experimental Miniature Television, 523, 599
Extending the High-frequency Limit of a 15 mc. Transmitter, 43
Faults, Scanning—And How to Remedy Them, 200
Field Strength Measurements of the Alexandra Palace Transmissions, 265
15 Mc. Transmitter, Extending the High-frequency Limit of a, 43
15-watt Transmitter for Beginners, 676
Films, Televising of, 594
First Acorn Valve Receiver for Vision Signals, 273
,, Cinema Installation, 331
,, Details of The Philips' Projection Receiver, 581
,, International 5-metre Transmitting and Receiving Contest, 752
,, Real Television "O.B.," 335
5-channel Receiver, 380
5-metre Aerial, Bi-directional, 252
,, Installation, Effective, 630
,, Record, 171
,, Super-het, Points in the Design in a, 304
,, Transmitter, Long Line, 497
Five Metres, Below, 754

GENERAL INDEX

- Five Metres, 6L6 Exciter Unit for, 376
5- and 10-metre Reception, 371
Four-band Ultra-short Wave Receiver, 230
Four Months' Viewing, Some Reflections on, 203
4-valve All-wave Super-het, 39
French 5-metre Activities, 236
,, Television Receiver, 409
Frequency Doubling Simply Explained, 363
G.E.C. Receiver, Brighter and Bigger Pictures with
the, 394
,, Television Receiver, Design of the, 663
German Television Progress, 541
Glow-gap Divider, 332
"Guaranteed Receiver," 30, 149
,, ,, Time Bases, Operating
Notes on the, 101
Halving Receiver Cost! 657
,, the Cost! A Practical Design Employing a
4-inch Tube, 712
Heard on the Short Waves, 374
High Frequencies, Pentodes on the, 106
High-gain T.R.F. Receiver, 613
High-quality Amplifier, Pen-428, 244
High-voltage Power Supply Units for Television, 726
History of the Cathode-ray Tube, 85
Home-built Receiver, Television at 70 Miles with a, 453
Hospitals, Television for, 205
How C.R. Tubes are Made, 152
,, the Mihaly-Traub System Works, 325
,, to Get a Transmitting Licence, 318
,, to Make a Television Aerial, 132
Johnson Q and Other Antenna Systems, 634
Kerr Memorial Lecture, Second, 412
Kinema, Television and the, 539
Large Pictures, Electronic Light Relay for, 716
,, ,, Multi-C.R. Tube Screen for, 345
Large-screen Pictures, New Idea for, 653
,, Television, 68
Light Control System, Supersonic, 460
,, Intensity, Measurement of, 346
Long Line 5-metre Transmitter, 497
Low-cost Televisor for Simple Home Construction, 708
Luminescence—And its Applications, 146
,, Theory of, 408
Magic Eye—Many Practical Applications, 491
Magnetic Focusing of Cathode-ray Tubes, 94
,, Scanning Defects—And their Causes, 268
Mains-operated Short-wave Converter, 297, 378
Marconi, Death of, 472
Marconi-E.M.I. Television—A Year's Most Notable
Progress, 729
Marconiphone Receiver, New, 282
Measurement of Light Intensity, 346
Mechanical Vibrator Battery Eliminator, 562
Metal Rectifiers for Television, 410
Metal-valve Communication Receiver, 166, 237
Metal Valves, Ultra-short Wave Receiver with, 485
Midget Receiver, Ultra-short Wave, 176
Midwest "New Imperial" Chassis, 764
Mihaly-Traub System, 324
,, ,, Works, How the, 325
Milliammeter and Voltmeter, Multi-range, 431
Miniature Cathode-ray Oscilloscope, 425, 495
,, ,, Tube, Mullard, 670
,, ,, Television, 456, 523, 599
Mirrors, Revolving—A Theorem, 140
Mobile Short-wave Equipment, 126
Modern Amateur Communication Receivers, 113
,, Flats, Television Relays for, 399
Modulated Oscillator, 103
Monitor Meter, Diode Valve, 111
More Programme Ideas and Criticism, 292
Mullard Miniature Cathode-ray Tube, 670
Multi-C.R. Tube Screen for Large Pictures, 345
Multi-range Milliammeter and Voltmeter, 431
,, Short-wave Converter, 717
Multiplier Photo-cells, 662
Murphy Television Receiver, 411
Navigation by Ultra-short Waves, 110
Neutralise Effectively, How to, 58
New Electron Camera, 467
,, Idea for Large-screen Pictures, 653
,, Ideas for Short-wave Listeners, 636
,, Marconiphone Receiver, 282
,, Method of Transmitting High Frequencies, 79
,, Optical Method of Television Reception, 652
,, Range of Valves for Constructors, 116
,, Valves for Television and Radio Constructors, 626
,, Vision, 355
1926-1937. The Evolution of Design as Exemplified in
the Baird Television Receivers, 717
Novel Scheme for Television in Colours, 480
"O.B.," First Real Television, 335
One-inch Tube, Picture on a, 668
r-V-1 Receiver, Efficient, 749
Operating H.M.V. (Television Receivers, Useful Hints
on, 199
Operating Notes on the Guaranteed Receiver Time
Bases, 101
Optical Method of Television Reception, New, 652
Optics, Electron, 164
Oscillator, Beam Valve, 558
,, Modulated, 103
Oscillators, Crystal—and the Beginner, 309
